COMPANY, LIMITED,
61, Mark Lane, London, E.C.**

Manufacturers of

Milk in Powder, Concentrated Milk, Cocoa
and Milk, Chocolate and Milk, Infants'
Food, and other products
of Pure Milk.

Milk in Powder.

The *Lancet* says:—

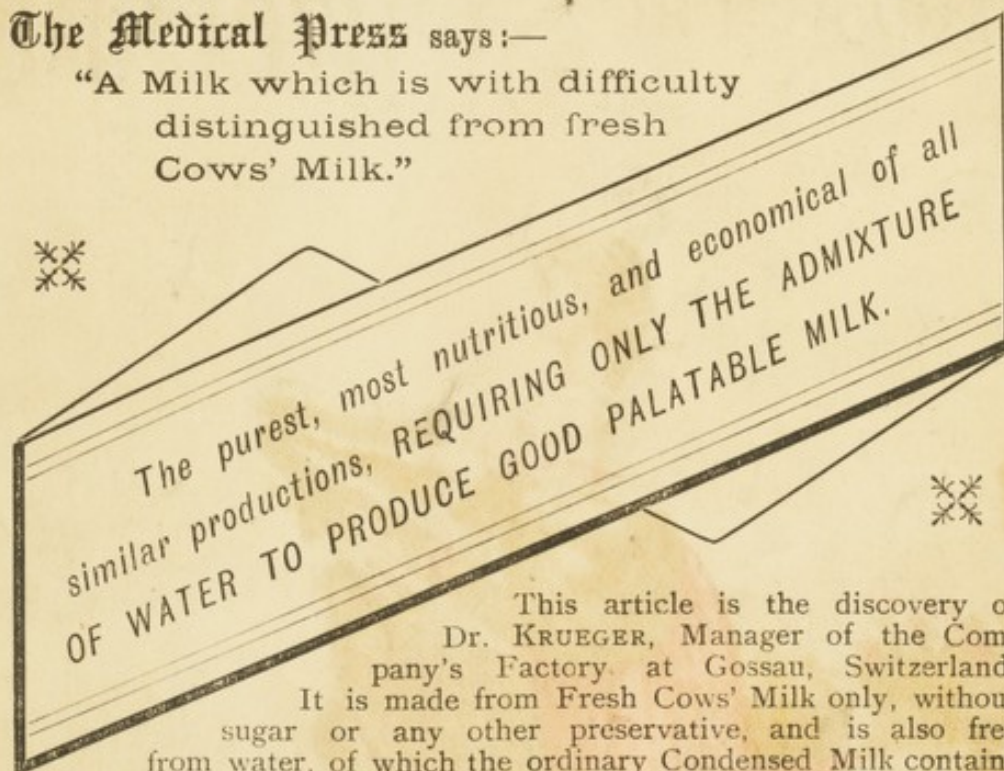

“A very interesting and valuable Preparation.”

British *Medical Journal* says:—

“The Preparation is sure to be appreciated.”

The *Medical Press* says:—

“A Milk which is with difficulty distinguished from fresh Cows' Milk.”

This article is the discovery of Dr. KRUEGER, Manager of the Company's Factory at Gossau, Switzerland. It is made from Fresh Cows' Milk only, without sugar or any other preservative, and is also free from water, of which the ordinary Condensed Milk contains 25 to 30 per cent.

The indisputable advantages of this Milk-Powder over other forms of Condensed Milk are:—

- (a.) The Milk-Powder is guaranteed to be **ABSOLUTELY PURE.**
- (b.) It is easily soluble in cold or hot water.
- (c.) For drinking purposes it is most palatable, and equal to Fresh Milk.
- (d.) It keeps well under varying climatic conditions.
- (e.) **IT CONTAINS NEITHER SUGAR NOR WATER.**
- (f.) It is more inviting in appearance, and can be placed in tea or coffee without injuring the flavour of either.

Dr. HASSALL reports:—“It is evident, from the analytical data, that this Milk-Powder is prepared from Cows' Milk only; that it is exceedingly rich in solids, not fat; and that it is, therefore, a very nutritious article of diet.”
