YELLOW FEVER

Yellow fever is a dangerous disease, which is spread through mosquito bites. The disease is preventable by immunization.

The Ministry of Health will be conducting a Yellow Fever Immunization Campaign for all persons aged 9 months and above on:

9th and 10th November 2002

(However, Immunization will continue until 30/11/2002)

Immunization will be given in all Health Facilities and selected posts. Take yourself/children to the nearest Immunization post.

Remember: Yellow Fever Vaccine is Safe
