SOUTHFIELD	6,777	1,477	21.79	3
	22,888	5,564	24.31	22

7. The Council at its Meeting on the 6th October, resolved unanimously :—

Address to
the Mayor.

“That the best thanks of the Council be presented to Councillor ARCHIBALD DAVIS DAWNAY, J.P., for his able, courteous, and impartial conduct in the Chair, and for the time and attention bestowed by him in the discharge of his duties as Mayor of this Borough.”

8. The General Purposes Committee were instructed to prepare an address expressing the Council's appreciation of Councillor Dawnay's services, and the following address was accordingly engrossed, framed, sealed with the Common Seal of the Council, and presented to Alderman Dawnay at the Meeting of the Council on the 9th November :—

METROPOLITAN BOROUGH OF WANDSWORTH.

<i>Population.</i>	<i>Area.</i>	<i>Rateable Value.</i>
— 327,322	— 9,199 acres.	— £2,103,112.

TO ARCHIBALD DAVIS DAWNAY, Esq., J.P.

We, the Mayor, Aldermen, and Councillors of the Metropolitan Borough of Wandsworth, desire, on your retirement from the Office of Mayor, to express our high appreciation of the valuable services you have rendered to this Borough during your Mayoralty, from November, 1908, to November, 1909.

You have earned our respect and admiration by the courtesy, ability, and impartiality with which you discharged the various duties appertaining to the Chair of the Council and the Magisterial Bench, and we ask you to

accept our heartiest thanks for the ungrudging sacrifice of your time, and the great attention which you have devoted to the performance of these onerous duties.

There have been, during your year of office, many public ceremonies and movements in which you have represented this, the largest Borough in London, with dignity and distinction. In particular we would refer to the movement for the establishment of the Territorial Forces, in which, by your example and enthusiasm you have done much to encourage and strengthen not only the 23rd (the Local Battalion), but also the Territorial Forces of the whole County of London.

We gratefully recognise the generous hospitality which you have dispensed on so many occasions, and the philanthropy extended by you to all parts and to all classes of the Borough, notably on the occasion of the Christmas Dinners given by you and the Mayoress to the Unemployed and their wives at Clapham and Wandsworth, the entertainment of over one thousand school children at the Shakespeare Theatre, and the kindly interest taken by you and the Mayoress in connection with the gifts and entertainment to Poor and Cripple Children, instituted by Lord Mayor Treloar.

We also wish to express our great indebtedness to the Mayoress for the graceful tact and kindness continuously shewn by her in connection with the many Social and Public Functions in which you have taken part during your year of Office.

We trust that both the Mayoress and yourself will always look back upon your Mayoralty with pleasure, and that the Borough may long continue to enjoy the advantage of your valuable services as a Member of the Council.

Sealed by Order, this Ninth day of November, 1909.

(Signed) J. W. LORDEN, *Ex-Mayor*.

HEN. GEO. HILLS, *Town Clerk*.

L.S.

9. Alderman Lorden, on behalf of the subscribers, presented to the Mayor a silver dessert service, as a mark of appreciation of his services in the discharge of the duties of Mayor during the past year. The dessert service is of sterling silver, gilt inside. Centre piece of oval crescent-shaped design, enriched with beautifully chased and pierced cornflower border and handles, supported on finely chased foot of very elegant proportions. Height, 15½ inches. Engraved on one side with inscription: "Presented to Councillor ARCHIBALD DAVIS "DAWNAY, J.P., Mayor of Wandsworth, by Aldermen and Councillors of the Borough, November, 1909." On opposite side Borough Arms and Mayoral Arms. Two Dessert Dishes to match,

Presentation
to the Mayor.

engraved with Borough and Mayoral crests and mottoes. Fitted in velvet-lined oak case with Borough Arms engraved.

10. Councillor Wise, on behalf of the subscribers, presented
 Presentation to the Mayor. a diamond star brooch to Mrs. Dawnay, as a mark of appreciation of her services in the discharge of the duties of Mayoress during the past year.

11. The Mayor presented to the Council a silver loving cup.
 Loving Cup and Arms Shields presented by the Mayor. The cup is of sterling silver, assay marked (crown, lion, and date mark R, with maker's initials, D.G.C.), hand-chased roses and mask on three-quarters of the body; hand-fluted bottom of body, hand-fluted foot. Three plain leaf handles, with fluted knob. Height, 18½ inches without plinth. Gold cased inside and out. Weight, about 73 ounces troy. The Borough Arms of Wandsworth and the Arms of Mayor Dawnay are engraved upon the cup; also the following inscription, viz.: "Presented to the Corporation of the Metropolitan Borough of Wandsworth by Councillor ARCHIBALD DAVIS DAWNAY, J.P., Mayor, 1908-9." Stamped on the bottom is the maker's name—D. George Collins, 118, Newgate Street. The cup is mounted on an ebonised plinth, and enclosed in a cloth-lined oak case with two drop handles, and brass plate on top, inscribed: "The Metropolitan Borough of Wandsworth, 1909."

The Mayor also presented to the Council ten Arms Shields.

12. Alderman James Edward Parker having intimated that he
 Retirement of Alderman Parker. did not propose to seek re-election upon the expiration of the period in November, 1909, of the period for which he was elected an Alderman of the Borough, the Council at its Meeting on the 20th October expressed its great appreciation of the services rendered to the Borough by Alderman Parker, especially as a member of the Highways Committee, and its regret at his proposed severance from the work of the Council.

13. At the same Meeting the Council also expressed its high
 Retirement of Councillor Welton. appreciation of the valuable services of Councillor Thomas Abercrombie Welton, especially as Chairman of the Finance Committee, and expressed its regret that he was not seeking re-election as a Councillor.

14. The Mayor, Aldermen, Councillors and principal Officers of the Council attended, in State, services at the following churches in the Borough, viz. :—

Church Services.

- 9th May, 1909 ... Parish Church of Tooting, St. Nicholas, Church Lane.
 23rd May, 1909 ... Parish Church of Wandsworth, All Saints', High Street.
 2nd Jan., 1910 ... Parish Church of Clapham, Holy Trinity, Clapham Common.
 23rd Jan., 1910 ... Parish Church of Putney, St. Mary, High Street.
 27th Feb., 1910 ... Parish Church of Streatham, St. Leonard's, Streatham High Road.

15. The Council's Petition in opposition to the Scheme of the Weir Hospital Charity Commissioners for the administration of the Weir Hospital Charity was heard before Mr. Justice Eve on the 10th and 15th March. The Council was represented by Mr. P. O. Lawrence, K.C., and Mr. Shebbeare, the majority of the Trustees by Mr. Jessel, K.C., and Mr. Sheldon, and the Attorney General by Mr. Austen Cartmel. The judgment of Mr. Justice Eve concluded as follows, viz. :—

"The result is I cannot accede to the prayer of the Petition, and, unless any serious objection is raised, I propose to make no order upon it, except that the costs of the Petitioners and of the Respondents be taxed as between Solicitor and Client, and be paid out of the current income."

16. The Council decided to appeal against the decision of Mr. Justice Eve. The appeal came before the Court of Appeal (consisting of the Master of the Rolls and Lords Justice Farwell and Kennedy) on the 24th and 25th May, 1910, and the Court, on the 7th June, unanimously allowed the appeal and referred the matter back to the Charity Commissioners, so that the fund may be applied under a Scheme so framed as to give effect to the directions contained in the testator's will. The Court made a similar order as to costs as was made in the Court below.

17. Alderman Hewett, Councillors Anderson, and Garrett, Junr., whose term of office expired on the 10th October last, were re-appointed the Council's representatives on the Committee of Management of the Weir Hospital Trust for the current year.

18. In June, 1910, the Council considered the draft scheme of the Charity Commissioners for the administration of the Edward Baker Charity.

Edward Baker Charity.

The Trust Fund consists of £12,288 5s. 8d. Consols, the gross yearly income being £307 4s. od. The scheme provided that the Charity should be administered by four *ex-officio* Trustees, three Representative Trustees, and two Co-optative Trustees; that the *ex-officio* Trustees shall be the Rector of Holy Trinity, Clapham; the Vicar of St. James', Park Hill; the Minister of the Congregational Chapel, Grafton Square, and the Minister of the Wesleyan Chapel, High Street, Clapham; the first representative Trustees, A. D. Dawnay, J. W. Cundall, and T. Young; and the first Co-optative Trustees, J. Lidiard and B. R. Tucker, of 49, Sisters Avenue, Clapham Common; that Representative Trustees are to hold office for four years and Co-optative Trustees for five years; that all proper costs and expenses incidental to the management of the Trust are to be defrayed out of the income thereof, and that the Trustees may pay a yearly sum not exceeding £100 to the Trustees of the Hibbert Almshouses and shall apply the balance of the income for the benefit of pensioners. The pensioners are to be Protestants of good character, of 60 years of age or upwards, who have resided in Clapham for not less than 10 years, and have not received Poor Law relief other than medical relief during the last two years, and who from age, ill-health, accident, or infirmity, are, wholly or in part, unable to maintain themselves by their own exertions. Pensions are not to be less than 5s. nor more than 10s. per week and are to be granted for periods of three years. Future Representative Trustees are to be appointed by the Borough Council.

The Charity Commission was informed that this Council was prepared to appoint future Representative Trustees, and it was suggested to the Charity Commission that the following amendments should be made in the scheme, viz. :—

- (a) Clause 6. That the term of office of future Representative Trustees be 3 years instead of 4 years.
- (b) Clause 8. That the term of office of future Co-optative Trustees be 4 years instead of 5 years.
- (c) Clause 21. That the sum to be paid annually to the Trustees of the Hibbert Almshouses be limited to £26, being the sum by which the income of the Trustees was reduced by the alteration of the rate of the dividend on the capital of the Almshouses Trust.
- (d) Clause 23. That the words limiting the granting of pensions to persons of 60 years of age or upwards be left out.

19. In December last a letter was received from the Charity Commission forwarding copy of the scheme, and stating that the

scheme had been amended in accordance with the suggestion of the Council that the sum to be paid annually to the Trustees of the Hibbert Almshouses should be reduced, and that the words limiting the granting of pensions to persons of 60 years of age or upwards should be left out. The Commissioners stated that they were unable to adopt the other suggestions of the Council.

20. Mr. Frederick Newens, of 167, High Street, Putney, was re-appointed to act in the administration of the Charities of Henry Smith and Sir Abraham Dawe's Almshouses for a period of four years from the 22nd September last.

Putney Charities.

21. The period for which Councillor Mellhuish, the Rev. Bevill Allen, and Messrs. J. Cusden, W. Eland, and J. Perry were appointed the Council's representatives to act in the administration of Henry Smith's Charity having expired, the Council re-appointed Councillor Mellhuish, the Rev. Bevill Allen, and Messrs. J. Cusden, J. Perry, and appointed Councillor J. Wright Hallett its representatives for a period of four years from the 22nd September last.

Tooting Charities.

22. Councillor Phillips was re-appointed a Representative Trustee on the Body of Trustees to administer the Streatham Non-Ecclesiastical Charities for four years from the 14th March, 1910.

Streatham Charities.

23. The Charity Commissioners have made a scheme varying the scheme for the regulation of the Non-Ecclesiastical Charities of Streatham, so as to provide that the number of pensioners may be increased if and as the charity permits, and that the receipt of Poor Law relief shall not disqualify a person from being an almsperson or pensioner of the charity.

24. The period for which Mr. A. J. Littlechild was elected a representative of the Council on the Governing Body of the Wandsworth Technical Institute having expired, Mr. Littlechild was re-elected a representative of the Council on such Body until July, 1911. The period for which Alderman Robinson and Mr. J. Luscombe were elected on such Body having also expired, Alderman Robinson was re-elected, and Councillor Buchanan elected a member of such Body until July, 1912.

Wandsworth Technical Institute.

25. During the year Alderman Bulcraig and Alderman Hewett were placed upon the Commission of Peace for the County of London.

Commission
of Peace.

26. Councillor Anderson, M.A., has been re-appointed this Council's representative on the Sub-Committee for this Borough and the Metropolitan Borough of Battersea of the Local Pension Committee.

Local Pension
Committee.

27. In July, 1909, the Council approved a list of officers and servants to be placed on the permanent establishment by a resolution of the Council in accordance with the definition in the Act of the terms "officer" and "servant." Seven officers and servants gave notice under Section 15 of the Act of their intention not to avail themselves of the provisions of the Act. In these cases deductions will not be made from the salaries or wages, and if the Superannuation Act of 1866 applies, they will remain subject to the provisions of that Act. Mr. T. Gans Ackland, F.I.A., was retained to furnish the report and certificate required by Section 13 of the Act, and he certified that the sum of £400 (the minimum sum prescribed by the Act) is to be paid into the Superannuation Fund during the quinquennial period commencing 1st April, 1910, as the primary annual contribution of the Council.

Superannua-
tion Act.

28. The alteration in the system of compounding for rates, mentioned in the last Annual Report (page 39), took effect as from the 1st October last. The number of properties in the Borough in the quarter ended 31st December last of a rateable value not exceeding £20, was 32,163. The number compounded for in that quarter was 26,326, leaving the number not compounded for, 5,837, the bulk of which were paid for by owners (when occupied). It is estimated that the nett increased income for the half year ended 31st March last, consequent upon the alteration in the system, is over £4,000. The change has also had the effect of considerably expediting the collection.

Compounding
for Rates.

29. At the last quinquennial valuation (1905) of the Borough, the Council engaged Mr. C. Barker (the Council's valuer for new properties) for the valuation of railway, gas, and other Companies' undertakings, licensed premises, and such other special properties as might be deter-

Quinquennial
Valuation.

mined, and another valuer for all other properties for a fee at the rate of £10 10s. for four days' attendance per week. The Council was of opinion that it was not necessary to engage a Valuer for ordinary properties for the quinquennial valuation this year, there being in the possession of the Council much information which was not available five years ago. Mr. Barker was engaged for the valuation of railway and other special properties, and a Sub-Committee of the Rating Committee was appointed to provisionally settle the draft Quinquennial Valuation List. The Sub-Committee held fourteen meetings, each occupying several hours, and the list, which contains 65,000 separate assessments, compared with 55,691 in 1905, was deposited with the Assessment Committee of the Union on the 31st May. The statement on the following page shows the Valuation, before the List was submitted for revision by the Assessment Committee, as compared with the Valuation in 1905, and the values at 2nd April, 1910.

QUINQUE\NIAL VALUATION, 1910.

30. Complaints having been received of annoyance arising from shouting in connection with the use of certain premises in the Borough as places of entertainment, the Council on the 28th July, 1909, made the following Bye-law on the subject, viz. :—

Street
Shouting.

* "No person shall, for the purpose of announcing or advertising any show or entertainment, shout in any street or public place to the annoyance of the inhabitants of the neighbourhood.

"Any person who shall offend against the foregoing Bye-law shall be liable for every such offence to a fine not exceeding forty shillings."

31. Complaint having been made by two ratepayers under the provisions of 25 Geo. II., ch. 26, that the King's Hall, Tooting, was used for purposes of public music without a license, proceedings were taken against the owner of the premises as required by the statute. The case came before a jury at Quarter Sessions, and the owner was convicted, fined 1s. and ordered to pay the Council's costs. There was no complaint as to the suitability of the premises for the entertainment, nor as to the class of entertainment. The Council were obliged to take the proceedings upon receipt of the prescribed notice and to pay each of the two informers £10. The Council being of opinion that the law should be altered so as to allow of proceedings being taken before a court of summary jurisdiction, asked the London County Council to take the necessary steps to obtain an amendment of the law accordingly. The County Council has since promoted a Bill in Parliament, which will carry out the suggestion, and will authorise that Council to grant music and dancing licenses at other times as well as at the Annual Licensing Meeting.

Music and
Dancing
Licences.

32. Proceedings were taken by the Council in four cases with respect to disorderly houses, and the following convictions obtained, viz. :—Fined £5, or one month's hard labour; fined 40s., or 14 days' hard labour; two months' imprisonment with hard labour; and six months' imprisonment with hard labour, respectively.

Disorderly
Houses.

33. The Council had under consideration the unsatisfactory and inadequate accommodation for the transaction of business at the Wandsworth County Court, and in July, 1909, called the attention of the Lord Chancellor and the Treasury to the matter and asked that steps should be taken for

County Court.

the provision of a larger building in the Borough of Wandsworth, with appropriate accommodation. In April last the Lord Chancellor stated that he understood that H.M. Office of Works had settled on plans for improving the accommodation of the Court. The Office of Works have been asked what steps are being taken in the matter, but up to the present no information has been furnished.

34. The Council considered the order in Council establishing
Juvenile Juvenile Courts under the Children Act, 1908. The
Courts. order provides that Juvenile Courts are to be provided at six police courts in London, including Westminster, the district assigned to the latter Court being the divisions assigned to the Westminster, South Western and West London Police Courts. The Council being of opinion that six Courts for the whole of the County is inadequate, and the area assigned to Westminster much too large, called the attention of the Home Secretary to the matter and asked for the provision of more Courts, including one in this Borough. No reply has yet been received.

35. The following Parliamentary Bills were considered by the
Parliamentary Council, viz. :—
Bills.

- London County Council (Tramways and Improvements).
- London County Council (General Powers).
- Gas Companies (Standard Burner) No. 1.
- Crystal Palace.
- Mercantile Corporations and Companies (Municipal Franchise).
- Municipal Representation.
- Voters (Qualification and Registration).
- London Elections.
- Milk and Dairies.
- Vehicles on Highways.
- Metropolitan Sewers and Drains.
- Moveable Dwellings.
- Housing of the Working Classes.
- Deaths—Certificates (Charges).
- Deaths, Registration and Burial.
- Continuation Schools (No. 2).
- Public Health Officers.
- Shops (No. 2).
- Building and Engineering Works.

Cinematograph.
 Electric Lighting Acts (Amendment).
 Education (Administrative Provisions).
 Housing and Town Planning.
 Labour Exchanges.
 Local Authorities (Legal Expenses).
 Local Authorities (Expenses).
 Local Government Qualification (England and Wales).
 London Electric Supply.
 Municipal Elections.
 Payment of Rates.
 Sale of Margarine.

36. This Bill proposed to authorize the County Council to
 London County Council (Tramways and Improvements). construct new tramways, and to reconstruct exist-
 ing tramways in various parts of London.

37. The proposed tramways in this Borough were tramways Nos. 8 and 8A (from the existing tramways at Putney Bridge along High Street, Putney, Putney Bridge Road, High Street, Wandsworth, to York Road, Wandsworth), of which 1 m. 1 f. 10'30 ch. will be double, and 5'45 ch. single line. This route is in substitution of the proposed tramways along Upper Richmond Road and Putney High Street, referred to in the last Annual Report (page 42), and was adopted by the London County Council at the request of this Council. The tramway along Putney Bridge Road is to be worked by the overhead system, and along High Street, Wandsworth, by the underground electrical system.

38. The Council petitioned against the Bill in order to protect the interests of this Borough. Several conferences were held between the Officers of this Council and of the County Council, and finally an agreement was entered into by the two Councils with reference to the widening of High Street, Wandsworth (including the bridge over the River Wandle), and Putney Bridge Road, the paving of roads and footpaths and other matters connected with the construction of the proposed tramways. Upon the agreement being entered into this Council withdrew its opposition to the Bill, which received Royal Assent on the 3rd August last.

39. This Bill proposed to amend the Public Health (London) London County Council (General Powers) Act, 1891, by omitting the word "black" from Section 24. The section is as follows: —

"Any chimney (not being a chimney of a private dwelling-house) sending forth black smoke in such quantity as to be a nuisance."

It also proposed to empower the County Council to enforce other provisions of the Act of 1891, and to amend the law as to employment agencies, and contained similar provisions with regard to milk supply as were contained in the Bill mentioned in the last Annual Report (page 43). This Council made no order with regard to the Bill. The clauses relating to milk were deleted, and the provisions relating to smoke altered during progress of the Bill in Parliament.

40. This Bill was promoted by the Wandsworth and Putney Gas Companies (Standard Burner) No. 1. Gaslight and Coke Co., the Brentford Gas Co., and eight other Companies, and provided that the testing for illuminating power of the gas supplied by the promoting Companies shall be by means of the Standard Burner (defined as the Metropolitan Argand Burner No. 2, or any other burner which the Board of Trade may approve), and prescribed the conditions and methods of testing with the standard burner. Two similar Bills, promoted by other Companies, were also introduced, and a conference was held of Local Authorities in whose districts the Companies supply gas. The conference decided to oppose the Bills in question, but this Council decided to be separately represented against the No. 1 Bill, and they accordingly petitioned against the Bill with the view of obtaining the insertion of provisions with respect to the testing of the calorific power of the gas supplied by the Wandsworth and Putney Gas Company, and providing for the transfer of the Company from the jurisdiction of this Council to that of the London County Council for the purposes of testing gas, the County Council being the authority for other Metropolitan Gas Companies. Both the Wandsworth and Putney and Brentford Gas Companies consequently withdrew from the Bill, which has now passed.

41. This Bill provided for the transfer of the management of the Crystal Palace from the present Board of Directors to a Board of Directors, consisting of a Chairman appointed by the Board of Trade, and eight other

members, one appointed by the Corporation of London, the London County Council, the Surrey County Council and the Kent County Council respectively, and four members of the Company, and proposed to authorise the Company to borrow a sum not exceeding £75,000, to set aside year by year such equal annual sums as would be sufficient to amount in 50 years to £250,000, and that such fund should be applicable exclusively for the purpose of redeeming the first Debenture Stock (£250,000); to raise a national fund for the purchase of annuities for the repayment of the £75,000 and £250,000 respectively above referred to; and provided that if in any year the funds should not be sufficient to pay the whole amount of instalments of principal and interest on such sums the deficiency was to be contributed by the Corporation of London, the London County Council, the Surrey County Council and the Kent County Council. The Council petitioned against the Bill, which was withdrawn.

42. The object of this Bill was to confer the municipal franchise upon Mercantile Corporations and Companies which pay a large proportion of the rates and yet have no votes. This Council petitioned in favour of the Bill, which, however, was not proceeded with.

43. The object of this Bill was to allow Municipal Authorities to adopt for their elections a system of proportional representation. The Council petitioned in favour thereof, but the Bill was not proceeded with. A similar Bill has been introduced during the present Session.

44. This Bill provided that every person should be entitled to be registered as a voter who was of full age and not subject to any legal incapacity, and had been an occupier of or lodger in any house during the three months preceding the 24th June. The Council petitioned against this Bill, which was dropped.

45. This Bill proposed to constitute the County of London a single Parliamentary Borough, and to amend the law relating to the Lists and Registers of Voters and the holding of Elections in London. It provided that the Clerk of the London County Council should be the Returning Officer for the whole County, and that a Special Revising Barrister should be appointed to deal with duplicate entries. The Council petitioned

against the Bill on the ground that the most suitable persons to be Returning Officers are the Town Clerks who prepare the list of electors and have local knowledge; that the provisions relating to the appointment of a Special Revising Barrister, and to the method of dealing with double entries, would cause great expense and would not result in more correct or complete registers than are at present made, and that the most urgent electoral reform was a measure for the re-distribution of seats. The Bill passed the House of Commons, but did not reach second reading in the House of Lords.

46. This Bill was introduced by the President of the Local Government Board, and proposed to provide for the more effective registration of dairies and dairymen, the inspection of dairies, and the examination of cows therein, the prevention of the sale of tuberculous milk, the issue of regulations for securing a supply of pure and wholesome milk, and the establishment by Local Authorities of milk depots for the sale of milk prepared for infants. This Council petitioned against the Bill, objecting to the proposal to authorise Sanitary Authorities to establish milk depots; to the extensive powers of making orders and regulations which the Bill would give to the Local Government Board; the power of County Councils and the Local Government Board to hold enquiries upon the complaint of only four inhabitant householders; and the provisions of the Bill which would interfere with the duties now carried out by the Council with respect to the registration of dairymen. The Bill was withdrawn on the 20th August, 1909.

47. This Bill proposed to limit the speed of vehicles on highways, and to authorise the Local Government Board to make regulations dealing with the matter. The Council petitioned against the Bill, which did not reach second reading.

48. This Bill, dealing with the question of combined drains, was again introduced, but did not reach second reading. The Council petitioned in favour of it.

49. This was a Bill to provide for the registration and regulation of moveable dwellings, and would have empowered the Local Government Board to make regulations dealing with the matter. This Council petitioned in favour

of the Bill, which was read a second time in the House of Lords, and then dropped.

50. This was a Bill to amend the law relating to the Housing of the Working Classes, to empower Local Authorities to levy rates upon empty houses, to establish fair rent Courts, and to provide for the establishment of Public Health and Housing Committees on County Councils. The Council presented a petition against it, but the Bill was not proceeded with.

51. The object of this Bill was to reduce the fee for a certificate of death required by an officer or member of a Trade Union from 2s. 6d. to 1s. The Council, seeing no reason why the charge for such certificates should be less to members of Trade Unions than to other persons, presented a petition against the Bill, which was not proceeded with.

52. The Council also petitioned against this Bill, the object of which was to amend the law relating to Deaths, Registration and Burials. The Bill did not reach second reading.

53. This Bill provided that a child should not be entitled to exemption from school attendance until 14 years of age, and that every child over 14 and under 17 should be compelled to attend Continuation Schools to be provided by Education Authorities without fees. The Council presented a petition against the Bill, which was dropped.

54. This Bill provided that a person should not be appointed a Medical Officer of Health or Sanitary Inspector unless he was qualified in the manner prescribed by the Bill; that Medical Officers of Health and Sanitary Inspectors should not be appointed for a limited period, and should be removable only subject to an appeal to the Local Government Board. The Council petitioned against it, and the Bill was not read a second time.

55. This Bill was introduced by the Home Secretary, on the 4th August, 1909, and, having been withdrawn, the Council adjourned the consideration of the subject until it was again introduced. A similar Bill has been introduced this Session, against which the Council has presented a petition.

56. No action was taken with reference to the other Bills above mentioned.

57. Alderman Lindsey and Councillor Kingston were appointed the representatives of the Council to attend a conference of representatives of Metropolitan Borough Councils to consider the meat supply of the kingdom, and the present restrictions on the importation of live cattle for slaughter, when the following resolutions were passed, viz. :—

Meat Supply.

- “(a) That this Conference, after carefully considering the information at its disposal, and bearing in mind the conclusions arrived at by the Departmental Committee appointed to enquire into combinations in the meat trade, and also the serious rise which has taken place in the price of beef in the past two years, is of opinion that the meat supply of the Metropolis is in an extremely unsatisfactory position.
- “(b) This Conference is further of opinion that, owing to the failure of the home supply to increase in proportion to the national demand, the decrease in the numbers of live cattle imported, and the increased necessity of depending upon supplies of chilled and frozen meat, it is easier for the trade to be effectually controlled by large and powerful trusts or combinations of companies.
- “(c) This Conference is further of opinion that the time has arrived when the needs of large urban communities, which have to rely to a great extent upon imported meat, call for a relaxation of the present restrictions upon the importation of foreign cattle for immediate slaughter, in order that channels other than those now available may be opened up for supplying this country with meat.
- “(d) That the Mayor of Westminster be requested to ask the Prime Minister to receive a deputation on the subject, in order that this Conference may place its views before the Government.
- “(e) That copies of the above resolution be sent to all Members of Parliament representing Metropolitan Constituencies, to the Corporation of the City of London, the London County Council, and to the Corporations of Birmingham, Liverpool, Manchester and Glasgow.
- “(f) That the Resolution be also sent to City and Borough Corporations and Municipalities with a population exceeding 100,000, and to the Association of Municipal Corporations.”

The Prime Minister was not able to receive the deputation, and a further conference was held, when the following resolutions were passed, viz. :—

- “(a) That the Mayor of the City of Westminster be asked to approach the Prime Minister and urge him to reconsider his refusal to receive a deputation as asked at the previous Conference.

“(b) That a copy of this Resolution be sent to the London Borough Councils asking whether they will support and are prepared to join in this deputation.

“(c) That copies of the above Resolution be sent to all Members of Parliament representing Metropolitan Constituencies, to the Corporation of the City of London, the London County Council, and to the Corporations, Cities and Boroughs which have replied to the circular letter sent by this Conference and asked to use their influence with the Prime Minister to receive a Deputation.”

The Council supported the resolutions of the conference, and Alderman Lindsey and Councillor Kingston were appointed the Council's representatives to join the proposed deputation. The deputation has not yet been received.

58. The provision of the proposed Mortuary for Wandsworth, referred to on page 49 of the last Report, has received further consideration. In the result, the plans of the Mortuary and Coroners' Court, which it was proposed to erect on part of the land acquired for the cemetery in Magdalen Road, were not proceeded with, and the question of the provision of a new Mortuary was allowed to stand over pending the report of the Departmental Committee appointed by the Government to enquire into the law relating to Coroners and Coroners' Inquests, and into the practice in Coroners' Courts. When the Committee's report was issued the subject was again considered, and the Borough Engineer was instructed to prepare a plan for a Mortuary only on the site acquired by the Council some years since in Ram Square, at the rear of the Wandsworth Town Hall. The plan was approved by the Public Health Committee, but in view of the introduction into Parliament of the Coroners' Law and Death Certification Amendment Bill, which provides means for obtaining an alteration of Coroners' districts and amends the law in other respects, it was decided to adjourn the consideration of the matter.

59. The Council considered the subject of carrying out the provisions of the Notification of Births Act, 1907. The Act was adopted by the majority of the London Borough Councils, and the Local Government Board, on the suggestion of the London County Council, made an order declaring the Act in force in those Boroughs (including Wandsworth) where it had not already been adopted. The Council thereupon decided

to issue notices calling attention to the requirements of the Act, and to provide the necessary cards for giving notice of births and forms of return.

The Local Government Board suggested that further steps should be taken in the administration of the Act. The Council did not, however, see its way to comply with the suggestion. The necessary records are being kept, and returns supplied to the London County Council as required by the Act. Visitation is also being carried out by the female Sanitary Inspectors.

60. Other information relating to public health is contained in the Medical Officer's Report, appendix H.

61. Alderman Hewett has again been appointed as this
 Metropolitan Paving Committee. Council's representative on the Metropolitan Paving Committee.

62. The Borough Council, at the instance of the Holborn
 Subways for Pipes, &c. Borough Council, considered the subject of the desirability of asking the London County Council to obtain for Metropolitan Borough Councils statutory powers, similar to those possessed by the County Council, to construct subways under thoroughfares, and to require public companies to pay rent for the user thereof, in order to obviate the necessity of breaking up the pavements. This Council decided to support the proposal, and representations were made to the County Council accordingly.

63. Aldermen Hewett and Penfold were appointed this
 Heavy Motor Traffic. Council's representatives to attend a Conference convened by the Fulham Borough Council, to consider the subject of heavy locomotive traffic. The Conference was held on 10th February, 1910, when the following resolutions were passed, viz. :

"That this Conference of Metropolitan Boroughs of Fulham, Hammer-smith, Kensington, and Wandsworth being of opinion that at present the roads in their Boroughs are used by owners of heavy motors and traction engines in such a way as to be a nuisance and to cause damage to the owners of property and the residents in the districts and to seriously affect the rateable value of such districts,

RESOLVES—

- (1) To recommend their respective Councils to take legal proceedings to cause an abatement of the nuisance.
- (2) For this purpose, if necessary, to take joint action.
- (3) To supply one another with any evidence or information in their possession."

64. The matter was further considered in April last, when the Council passed the following resolution, viz. :—

“That, subject to this Council approving the form thereof, the Borough Council is of opinion that the London County Council should be asked to introduce a clause in its next General Powers Bill, with the view of the regulation of traction engine traffic.”

The Council's views on the subject were communicated to the London County Council.

65. Further complaint having been received of the danger to the public arising from fast motor traffic in High Street, Putney, the Borough Council again asked the London County Council to apply to the Local Government Board for a regulation to be made under the Motor Car Act, 1903, limiting the speed of motor cars travelling along the thoroughfare in question to 10 miles per hour. The matter is now under the consideration of the County Council.

66. The London County Council having applied to the Local Government Board for a regulation to be made under Section 9 (1) of the Motor Car Act, 1903, prescribing a maximum speed not exceeding 10 miles an hour for motor cars passing along Roehampton Lane, the Borough Council expressed the opinion that if a speed limit was necessary in any portion of that thoroughfare it should only be in respect of the part between the angle near Rodway Road and a point just to the south of the Girls' School. The views of the London County Council, the Borough Council, and other interested parties, were placed before the Local Government Board Inspector, who held a local enquiry into the matter on the 28th February, 1910, and the Board, having considered his report, made a regulation under the above-mentioned section of the Act, but limited its application to the part of Roehampton Lane extending from the northern extremity of the buildings of the Convent of the Sacred Heart to the junction of the Lane with Portsmouth Road. This includes the part of the road which the Borough Council suggested should be dealt with. The regulation came into operation on the 20th June, 1910.

67. The reconstruction of the tramways in Wandsworth Road and East Hill for the underground conduit system of electric traction having been completed, the lines were inspected by the Board of Trade, and re-opened for traffic in December, 1909. The widening and re-paving

Speed Limit,
High Street,
Putney, and
Roehampton
Lane.

Wandsworth
Road and East
Hill Tramways.

of the roads were undertaken by the County Council in accordance with the agreement referred to in last year's Report (page 53, par. 76). These works have been completed, with the exception of two small widenings, one of which the Borough Council agreed should stand over for the present. In the other case, negotiations are in progress for the acquisition of property required.

68. The work of laying the tramways from Lavender Hill and Queen's Road, via Cedars Road, Clapham Common, North Side, and Long Road, to Clapham Common, South Side, referred to in last year's Report (pp. 54, 55, pars. 78-80), has been completed. The lines, which were constructed for the underground conduit system of electric traction, were inspected by the Board of Trade, and were opened for traffic in February last. The conditions contained in the agreement entered into by the London County Council and the Borough Council in August, 1906, have been complied with. In view of its heavy financial commitments, the Borough Council did not see its way at the present time to woodpave the part of the carriageway in Cedars Road and Clapham Common, North Side, outside the tramway area. An arrangement was, however, made for the tramway tracks and margins to be paved with wood when the tramways were laid, except in the part of Cedars Road where the gradient is too steep for this description of paving, the Borough Council undertaking to lay woodpaving in the remainder of the carriageway of the roads in question within a period of two years.

69. The agreement between the Borough Council and the London County Council with regard to the extension of the tramways along Streatham High Road to the County boundary at Norbury, referred to in last year's Report (page 55, par. 81), provided, *inter alia*, for the widening to 60 feet of the part of Streatham High Road adjoining Sunnyhill Road. A favourable opportunity having occurred during the past year, the property required for a portion of this improvement was acquired, the old buildings removed, and the road widened. In connection with this scheme the narrow entrance to Sunnyhill Road, from Streatham High Road, was made of the full width of 40 feet. The London County Council is bearing two-thirds, and the Borough Council one-third of the cost of the Streatham High Road improvement. The whole of the expense of the widening of Sunnyhill Road will be defrayed by the Borough Council.

70. Widenings of Streatham High Road at Streatham Green, The Shrubbery, and Voss Court, have also been effected by the London County Council in accordance with the agreement.

71. Attention having been called to the danger caused by the narrowness of the road and the congestion of traffic at the end of Streatham High Road near the Norbury tramway terminus, the Borough Council asked the London County Council to take the necessary steps with the view of effecting a widening of the road and of the bridge there. The matter is under the consideration of the County Council.

72. The Borough Council again repeated its application to the London County Council for permission to round off the corner of Streatham Common at the junction of Streatham High Road and Streatham Common North, and also applied for consent to the formation of a footpath on the Common adjoining the eastern side of Streatham High Road. The County Council, however, refused to allow either of these proposals to be carried out. The Borough Council is still in communication with the County Council on the subject.

73. When the old Streatham Vestry Offices in Shrubbery Road, Streatham, were disposed of, a narrow strip of land at the junction of Shrubbery Road with Streatham High Road was retained by the Council, as it was thought possible that part of it would be required for the widening of Streatham High Road in connection with the construction of the tramways there. The arrangements made with the London County Council for the widening of that thoroughfare do not, however, affect the piece of land in question, and, the consent of the Local Government Board having been obtained, the land was sold to the owners of the adjoining premises in Streatham High Road. In connection with the sale the Council arranged for the corner at the junction of Shrubbery Road and Streatham High Road to be rounded off and for the part of Shrubbery Road, upon which the site abuts, to be widened to not less than 40 feet.

74. In connection with the development of the Woodlands Estate for building purposes, an arrangement has been made for the widening of the part of Tooting Bec Gardens, Streatham, upon which the estate abuts. Steps

have also been taken with the view of an improvement being effected at the corner of Tooting Bec Road and Mitcham Lane. The London County Council has agreed to contribute one-half the nett cost of these widenings.

75. The roadway on each side of the County Bridge (Roe-
 Roe Bridge Widening. Bridge) carrying Mitcham Lane, Streatham, over the River Graveney having been widened, the Borough Council asked the London County Council to take the necessary steps with the view of the bridge being made of a similar width to that of the road adjoining. The London County Council has informed the Council that the widening of the bridge to 50 feet, at an estimated cost of £750, has been authorised, that the Surrey County Council has agreed to contribute one-half the nett cost, but that the work could not be put in hand until the levels of the widened road on the southern side of the bridge had been made to conform with the proposed levels of the new bridge.

76. The County Council having obtained powers under the
 Mitcham Lane and Southcroft Road Tramways. London County Council (Tramways and Improvements) Act, 1909, to construct tramways from Mitcham Road, Tooting, via Southcroft Road and Mitcham Lane, to Streatham High Road, submitted to the Board of Trade and the Borough Council plans and particulars of the system of traction (underground conduit) proposed to be adopted. The Borough Council approved of the proposal, subject to the usual conditions, and to the tramway tracks and margins being paved with wood, and an agreement, similar to that with regard to the Cedars Road tramways, was entered into, under which the County Council is to execute this work when the tramways are laid, and the Borough Council is to pave the remainder of the carriageways with wood within two years from the date of the agreement (5th May, 1910). A portion of Southcroft Road has not yet been adopted as a parish road, and when it is sufficiently built upon it will be paved as a new street at the cost of the owners of property abutting thereon. The Board of Trade consented to the system of traction, subject to the above-mentioned agreement, and the tramways works are now in progress. The London County Council is also taking steps for effecting the necessary widening of Mitcham Lane in connection with the construction of these tramways.

77. A similar arrangement to that mentioned in the preceding paragraph was made with regard to the paving works in connection with the tramways along Wimbledon Road from Garratt Lane and the County boundary at Summerstown. The approval of the Board of Trade having been obtained to the system of traction (underground conduit) the tramway works were put in hand and are now approaching completion. The London County Council has already carried out the widening of Wimbledon Road in accordance with the provisions of the Act authorising the construction of these tramways.

78. In connection with the making-up of Clairview Road, Streatham, as a new street, the corners at the junctions of that road with Furzedown Road have, with the permission of the London County Council, been rounded off by adding to the public way three small pieces of Tooting Common.

79. The Borough Council has now acquired nearly all the forecourts required for the widening of York Road, in connection with the electrification of the tramways there. The compulsory purchase of the outstanding interests in the remaining forecourts is being proceeded with, and in most cases terms have been settled.

80. In view of the proposal to construct tramways along Putney Bridge Road, the County Council, after correspondence extending over several years, has now agreed to contribute two-thirds of the expense already incurred by the Borough Council in connection with the following widenings of that thoroughfare, viz. :—

- (a) At junction with High Street, Wandsworth.
- (b) Between L. & S.W. Railway bridge and a point near Fawe Park Road.
- (c) At Edward's Cottages, Nos. 21-31, Putney Bridge Road. (In this case the property has been acquired, but the widening has not yet been effected.)

81. The total gross cost of the widening of Putney Bridge Road at its junction with High Street, Wandsworth, was

£4,796 11s. 2d. After allowing for sales of surplus land and old buildings, the nett cost of the widening was £4,494 18s. 2d., and the Council has in hand a narrow strip of land adjoining 138, High Street, Wandsworth. The total gross estimated cost of the improvement was £4,850, without taking recoupments into account. When the improvement was first arranged the London County Council promised to contribute one-third of the nett cost, the contribution not to exceed £1,617. As above mentioned, the County Council has now promised to increase its contribution to two-thirds of the cost.

82. By arrangement with the London County Council a widening of Putney Bridge Road is being effected at the corner of Brewhouse Lane, at an estimated cost of £300. The Borough Council agreed to contribute one-third of the cost, subject to the contribution not exceeding £100.

83. The Borough Council agreed to contribute one-third of the ultimate nett cost of the widening by the High Street,
Wandsworth. London County Council of High Street, Wandsworth, at Nos. 22 and 24.

84. The widening of the public way at the corner of High Street, Putney, and Lacy Road, has been completed at a total cost of £2,689 15s. 2d. The estimated cost of the improvement was £2,775. The London County Council contributed one-half (£375) the cost of the widening in High Street. High Street,
Putney, and
Lacy Road
Widening.

85. In connection with the re-building of premises known as Lacy Road,
Putney,
Widening. Grove Cottage, Lacy Road, Putney, arrangements were made with the owners for a widening of the public way there, at an estimated cost of £145 15s.

86. The Council regrets that it has not been found possible to Charlwood
Road
Widening. secure a widening of Charlwood Road, Putney, in front of the County Council school recently erected at the corner of Hotham Road, referred to in last year's report (p. 58, par. 94), the condition imposed by the County Council that the Borough Council should bear the expense of erecting a new boundary wall to the school, in addition to the cost of the paving works, being one to which the Borough Council could not agree.

87. For some time past the Council has had under consideration the question of widening Upper Richmond Road, Putney, to the west of Putney Hill. The necessary interests in certain of the forecourts in the part of the road in question have been acquired, and steps are now being taken for the compulsory purchase of a strip of land required for the improvement between Burston Road and Ravenna Road.

88. Owing to the extensive wood paving works carried out during the past year in connection with the construction of tramways in Streatham High Road it was anticipated that the Wood Paving, etc. (Short Loans Substitution) Fund would be considerably overspent. The Highways Committee were of opinion that it was not desirable to increase the fixed rate of 1½d. in the £ raised for the purposes of the Fund, and the Committee in their general estimates allocated the sum of £3,000 to defray part of the expenditure on the new paving works referred to above. The deficit in the Fund at 31st March, 1910, was £544.

89. As in previous years, the Council arranged for the execution, in conjunction with the Central (Unemployed) Body for London, of useful works upon which unemployed workmen could be engaged. The schemes put in hand this year were as follows, viz. :—

WORK.	Cost.		
	Unskilled labour.	Materials, skilled labour and supervision.	Total.
	£ s. d.	£ s. d.	£ s. d.
Widening and improving approaches to bridge over railway, Tooting Bec Road, Streatham ...	405 10 7	937 5 10	1,342 16 5
Widening and embanking portion of river Wandle at Garratt Park Shoot and filling in ditch across the shoot ...	771 5 9	112 2 0	883 7 9
Totals ...	£1,176 16 4	1,019 7 10	2,226 4 2

90. The expense of the materials, skilled labour, and supervision was borne by the Borough Council; the Central Body sup-

plied the unskilled labour, and the London County Council surrendered the strips of Tooting Common required for the Tooting Bec Road improvement.

91. By an arrangement entered into many years ago, the Borough Council's predecessors, the late District Board, in consideration of an annual payment of £20 by the London, Brighton and South Coast Railway Co., undertook the maintenance, for which the Company was responsible, of the road on the bridge, and the approaches thereto, carrying Tooting Bec Road over the railway. As the scheme of work to be carried out by the Central (Unemployed) Body in this road affected the approaches to the bridge, application was made for the consent of the Railway Company, and an agreement was entered into under which the Company agreed to the proposal, and the above-mentioned annual payment was reduced from £20 to £10.

92. The Borough Council also submitted to the Central Body a scheme of work for the improvement of Greyhound Lane, Streatham, between Eardley Road and the Graveney Brook. The estimated cost was £560 (unskilled labour, £410; materials and cartage, £150), and the Borough Council offered to bear the cost of the materials and cartage. The Central Body considered that the work was of a suitable nature to be undertaken by unemployed labour, but as the cost would eventually be borne by the frontagers, they were only prepared to entertain the proposal upon payment by the Council of a sum equal to the fair value of the work executed. Under these circumstances, the Council decided not to proceed further with the scheme.

93. The work of embanking and fencing the two strips of land between Garratt Lane and the River Wandle, near McMurray's Mills, and laying the same out as a shrubbery, was carried out with unemployed labour, under the supervision of the London County Council. On completion of the work the future maintenance of the shrubbery was undertaken by the Borough Council, pursuant to the arrangement previously made with the County Council.

94. The Borough Council continued the loan to the Vacant Land Cultivation Society of several small pieces of vacant land in various parts of the Borough for cultivation by the unemployed,

and other persons of small means, under the direction of the Society. Arrangements are now being made for several additional pieces of land to be lent to the Society for similar purposes.

95. A Committee of the London County Council, who have had under consideration the question of making Advertisements Regulation. Bye-laws under Section 2 (2) of the Advertisements Regulation Act, 1907, suggested that the proposed Bye-laws should apply to all districts in which public parks, gardens, and open spaces are situated, and the Borough Council asked that the following open spaces under its control should be included in the schedule of places to which the proposed Bye-laws would be applicable, viz. :—Coronation Gardens, Leader's Gardens, and Garratt Park.

96. The Islington Borough Council having suggested that the Public Health (London) Act, 1891, should be amended so as to include in the definition "trade refuse," refuse produced by restaurants, hotels, laundries, and similar trading institutions, the London County Council invited the observations of the Metropolitan Borough Councils thereon, and on the question of the possibility of instituting a system of daily removal. In reply, the County Council was informed that this Council was in favour of the suggestion of the Islington Borough Council; that in this Borough refuse of the description referred to was removed twice, and sometimes three times a week, and that the Borough Council was of opinion that that was sufficient.

97. For some time past the Borough Council has been in communication with the London County Council on the subject of the necessity of providing sanitary conveniences for the use of persons frequenting Streatham Common. After considerable correspondence, the County Council adopted a scheme for the construction of conveniences for both sexes on the lower part of the Common, adjacent to Streatham High Road, at an estimated cost of £515, provided the Borough Council contributed one-third of the actual cost. The Borough Council agreed to this condition, subject to the contribution not exceeding £171 13s. 4d., and the work of erecting the conveniences is now in progress.

98. The subject of the Council's depot and wharf accommodation has been under the consideration of a Subcommittee of the Highways Committee, and, the work of the Borough Engineer's department having been recently centralised, upon their recommendation the use of the small depot at the rear of houses in Sulina Road, Streatham, was discontinued. The Council's lease of these premises expires at Lady-day, 1912, and steps are being taken with the view of obtaining a tenant for the remainder of the term.

99. The Council is also endeavouring to let the Waterside Wharf, at the end of Jew's Row, Wandsworth, the other wharves in the possession of the Council being sufficient for its present purposes owing to the centralisation of work mentioned above.

100. The freehold land belonging to the Council on the southwestern side of Garratt Lane, Tooting, formerly used as a slop shoot, having been filled up, part of the site is being used as a depot, thus rendering unnecessary the retention of the old Tooting depot and mortuary on the opposite side of Garratt Lane. These premises are held by the Council on a lease having nearly sixty years to run, and arrangements are being made for their disposal.

101. The Hampstead Borough Council convened a Conference of Metropolitan Borough Councils to consider (1) whether the education in the London elementary schools could not be put upon a more practical footing, so as to fit the children to enter skilled trades, and to prevent them from drifting into casual employment, and (2) the advisability of appointing a deputation to attend the President of the Board of Education on the subject. This Council was represented at the Conference by Alderman Cresswell and Councillor Taylor. After considerable discussion at the Conference all the motions were referred to a Committee consisting of one representative of each of the Councils represented at the Conference, for consideration and report to a further meeting of the Conference. A deputation waited upon the London County Council in the matter, but no further meeting of the Conference has as yet been convened.

102. The London County Council in December last convened a Conference of various Local and other Authorities and Associations to consider the subject of the development of trade

schools and industrial training in education, and also in connection therewith (a) the administration of the apprenticeship charities in London, and (b) the establishment or development of employment bureaux or other means of bringing those leaving school into touch with the industrial and commercial world. The Council was represented by Aldermen Cresswell and Lorden, and, upon hearing the report of its representatives as to the proceedings at the Conference, expressed regret that there had been no effective result of the Conference, and requested the Lord Mayor to call another meeting so that definite resolutions might be approved, and a Committee formed to give effect thereto.

103. The Council considered a resolution passed by the
Cost of Education. Paddington Borough Council to the effect that, having regard to the annually increasing cost of education and the enormous burden upon the ratepayers consequent thereon, such Council was of opinion that the education of children should be wholly paid for out of Imperial Funds, instead of being partially charged to local rates. This Council did not agree entirely with those views, but expressed the opinion that a greater proportion of the cost of National Education should be met by increased Government grants, and that, as the contributions from Imperial Funds in London were less in proportion than in the rest of the country, the grants should be augmented in order that this unfair incidence might be remedied.

104. A Conference on educational matters was held in
Educational Conference. November, 1909, between Members of the London County Council and Managers of Public Elementary Schools in the Battersea, Clapham, and Wandsworth Electoral Divisions, to which the Members of this Council's Education Committee were also invited. Resolutions were passed at the Conference on the lines of the Council's views mentioned in the preceding paragraph, and on the subject of the constitution of the County Council's Education Committee, the administration of evening schools, the employment of married lady teachers, and other matters. On considering the decisions of the County Council upon the resolutions, this Council expressed the opinion that certain of the resolutions should be again brought before the Conference at its next meeting, and pressed for acceptance and action by the Education Authority, and arrangements have been

made for the Chairman and Vice-Chairman of the Education Committee to move such resolutions at the next Conference.

105. The Council decided to concur in the views expressed by the Metropolitan Counties Branch of the British Medical Association, that in view of the questions of physical welfare which would be undertaken by the School Care Committees, it was desirable to include medical practitioners in the membership of those Committees. The London County Council stated that endeavours were made to obtain the services of persons possessing special knowledge of the work of Care Committees, and would welcome the names of medical practitioners willing to serve on such Committees.

106. The London County Council has given formal notice of its intention to provide a new public elementary school for about 800 children in the district of Tooting, and one for about 1,000 children to be available for the area of West Streatham.

107. The Council has also been consulted by the County Council with regard to proposals to acquire two alternative sites for schools in lieu of sites previously decided upon, and in one case (Magdalen Road, Springfield) offered no objection to the proposal. With regard to the other site (Standen Road, Southfield) the Council was of opinion that the original site was more suitable, and so informed the County Council and the Board of Education. The Board, however, after considering the facts of the case, sanctioned the acquisition of the alternative site.

108. The Council approved of the proposal to erect a new Roman Catholic school for about 500 children at Earlsfield.

109. Attention having been drawn to a proposal to close the St. Michael's School, Southfield, the Council expressed regret at the compulsory closing, and asked the London County Council to reconsider the proposal, and to continue to recognise the school as a public elementary school, both in the interests of education and of the general body of rate-payers. The County Council afterwards decided to continue to recognise the school, and notice has since been received of the intention of the Managers to enlarge the school by providing additional accommodation for about 500 children.

110. Several schemes made by the Board of Education have been submitted to the Council for its information. They related to the administration of the Sir Walter St. John's Schools, Battersea, the United Westmister Schools, the Walcott Educational Foundation, Lambeth, the White Square School, Clapham, and the Holy Trinity School, Upper Tooting. With regard to the two last-mentioned cases the schemes authorised respectively the discontinuance of the school at White Square, and the use of the premises for other purposes, and the raising of a loan for altering and improving the school house of Holy Trinity School.

111. The number of bathers, admissions to the gymnasium, and the income since the opening of the baths in High Street, Wandsworth, in July, 1901, are as follows :—

Year.	Bathers.	Gymnasium.	Income.								
			Baths.			Gymnasium.			Total.		
			£	s.	d.	£	s.	d.	£	s.	d.
1901-2	59,983	—	651	7	8	—	—	—	651	7	8
1902-3	107,924	—	1,163	16	4	—	—	—	1,163	16	4
1903-4	118,030	3,256	1,243	16	11	40	0	10	1,283	17	9
1904-5	144,333	4,649	1,506	7	0	46	18	3	1,553	5	3
1905-6	151,389	3,696	1,539	12	1	65	5	8	1,604	17	9
1906-7	168,133	3,613	1,653	19	11	38	16	11	1,692	16	10
1907-8	163,641	3,718	1,615	16	4	48	4	0	1,664	0	4
1908-9	178,078	2,549	1,738	19	6	35	10	5	1,774	9	11
1909-10	169,892	2,856	1,629	5	8	60	12	5	1,689	18	1

112. The number of bathers, and the income since the opening of the baths at The Broadway, Tooting, in June, 1907, are as follows :—

	MEN.		WOMEN.		TOTAL.	
	1st class	2nd class	1st class	2nd class	Bathers	Income
1907-8 (9 mths.)	4,050	12,549	188	2,322	19,109	£233 6 3
1908-9	4,650	14,389	291	3,142	22,472	275 2 2
1909-10	5,405	15,589	349	4,258	25,601	317 12 6

113. The competition for the swimming trophy presented by Sir William Lancaster, J.P., and competed for annually by men resident in the Borough, was held on the 15th October, and was won by Mr. W. S. Barnes. Sir

William Lancaster again gave a prize for the winner, as a memento of the occasion, and the Mayor (Councillor Dawnay) kindly provided prizes for the competitors who finished second and third—Mr. J. Symons and Mr. A. J. M. Owen respectively.

114. The competition for the medal for women residing in the Borough, presented by the late Mr. John Bell, J.P., was held on the 19th October, at the annual entertainment of the Alexander Swimming Club, and was won by Miss N. Treversh.

Women's Medal.

115. Swimming competitions for school children were held at the Wandsworth Baths on the 15th October, and a free pass to the second-class bath, available during the following year, was awarded to the successful boy or girl from each school. The competitions are open to boys and girls from schools in the Borough attending the baths for instruction in swimming, the passes are available out of school hours and before seven o'clock in the evening. A large number of children and their parents were present, and the Mayor presided. There are 63 elementary schools in the Borough, 28 departments send pupils to the baths for instruction in swimming, and all entered for the competitions. The number of children taking part in the competitions was 135—70 boys and 65 girls.

Swimming Competitions for School Children.

116. The attention of the Baths and Washhouses Committee was drawn to the increasing expenditure for coal for the Wandsworth Baths, and the Borough Engineer was instructed to report as to adapting the boilers for oil fuel, and water gas, and cheaper means of producing steam. Upon enquiry it was found that the boilers were not suitable for the use of oil fuel or water gas. The Committee therefore directed their attention to improvements with the view of reducing the quantity of fuel consumed. Nine schemes, designed for this purpose, were considered by the Committee, and it was decided to make further enquiries with regard to two of the schemes. The Committee visited several premises where the apparatus was in use, and the Council ultimately, on the recommendation of the Committee, adopted, at a cost of £60, Messrs. Caddy and Co.'s apparatus, which consists of tubular fire bars fitted with steam jet for increasing the draught. There has been a considerable saving effected by the use of the apparatus.

Fuel consumption, Wandsworth Baths.

117. In the last Annual Report (page 67) it was stated that plans of the alterations, which would be necessary before a licence would be granted for the first-class swimming bath, had been submitted to the London County Council for their approval. The conditions upon which the County Council would be prepared to grant a certificate, under Section 12 of 41 and 42 Vic., cap. 32, have been received, and the County Council was prepared to grant a provisional licence, subject to certain works being carried out by this Council. Upon consideration of the requirements, and an estimate of the cost of complying with the same, it was decided in view of the uncertainty as to the receipts which would be derived from lettings if the works were carried out, not to proceed further with the matter at present.

118. The number of interments in the Council's Cemeteries during the years ended 31st March, 1908, 1909, and 1910 respectively, was as follows:—

	1908.	1909.	1910.
	—	—	—
Putney Lower Common Cemetery ...	26	22	24
Putney Vale Cemetery	334	341	341
Streatham Cemetery	1,644	1,612	1,286
Wandsworth Cemetery	1,918	1,970	1,692
	—	—	—
Total	3,922	3,945	3,343

119. The number of grave spaces sold during the last three years was:—

	Year ended March, 1908.	Year ended March, 1909.	Year ended March, 1910.
Putney Vale Cemetery ...	130	157	142
Streatham Cemetery ...	278	288	266
Wandsworth Cemetery ...	329	275	259
	—	—	—
Total	737	720	667

120. In connection with the reconstruction of the tramways at East Hill it was necessary to slightly set back the boundary wall of the Huguenot Burial Ground. At the request of this Council the London County Council erected

iron railings, similar to those at the Council House, in place of the old wall.

121. The purchase of 15 acres of land for the extension of Putney Vale Cemetery, referred to in the last Annual Report (page 65), has been completed, the Local Government Board having approved the proposal and sanctioned a loan for the purpose, after holding a public inquiry into the matter. The purchase-money was £6,000. The land has been acquired principally to meet future requirements for burials in the Borough, but a portion will be used at an early date to provide first-class graves. The remainder of the land has been let for the present.

122. The Council, in conjunction with the owners of the adjoining property, have redeemed the rent charge on the land at Putney Vale, payable to the Dorothy Cecil Charity of Wimbledon, by the purchase of sufficient Consols to produce an annual sum equal to the amount of the rent charge. The Council's proportion of the redemption money amounted to £307 3s. 4d. Consols, costing the sum of £253 5s. 4d.

123. With reference to the extension of the system of drainage at Streatham Cemetery (estimated cost £1,700) mentioned in the last report, a portion of the work has been carried out during the past year, the amount of the accepted tender for this portion being £795. Other works have also been carried out in connection with the pump and gas engine at the cemetery.

124. The subject of the regulations as to the burial of non-parishioners in the Council's cemeteries has been under consideration. Some difficulty has from time to time been experienced in dealing with cases of non-parishioners, and the Council considered it desirable to clearly define in the rules what members of a purchaser's family may be buried at parishioner's fees. The table of fees has accordingly been amended with this view, and some other amendments made therein, partly consequent upon the re-arrangement of the times for funerals. The amended Table has now been approved by the Local Government Board.

125. The times at which funerals may take place have been re-arranged. Funerals are allowed at the Putney Cemeteries between 12 noon and 4 p.m., and at the Streatham and Wandsworth Cemeteries between 11 a.m. and 4 p.m., extra fees being charged for funerals before or after those times. The Home Secretary has sanctioned the necessary alteration in the wording of the Table of Ministers' Fees.

126. The hours during which the cemeteries are open to the public have been altered, and are now as follows :—

	WEEK DAYS.		SUNDAYS.	
	A.M.	P.M.	A.M.	P.M.
January, February, November, and December	7 to 4.		10 to 4	
If a funeral is to take place	4.30		
March ...	7 to 6		10 to 6	
April ...	7 to 7		10 to 7	
May, June, and July ...	7 to 8		10 to 8	
August ...	7 to 7.30		10 to 7.30	
September ...	7 to 6.30		10 to 6.30	
October ...	7 to 5.30		10 to 5.30	

APPORTIONMENTS.

127. The following apportionments of the estimated cost of paving new streets have been made by the Council during the year, viz. :—

† Apportionment cancelled 28th July, 1909.

* Apportionment cancelled 23rd February, 1910.

The Daylesford Avenue, Putney, apportionment, made on the 10th March, 1909, was cancelled on the 23rd February, 1910.

REPAIR APPORTIONMENTS.

128. The following apportionments of the expenses of executing necessary works of repair upon roads not repairable by the Council, under the provisions of section 3 of the Metropolis Management Amendment Act, 1890 (53 and 54 Vict., cap. 66), have been made by the Council during the year, viz:—

Date of Apportionment.	Name of Street.	Amount of Apportionment.
1909.		£ s. d.
7th April ...	Moyser Road (2nd portion)	265 11 7
" " ...	Albert Road (2nd portion)... ..	225 6 10

23rd March ...	Granville Road (2nd portion—A)	199 17 0
" " ...	Heathfield Road (1st portion—A)	72 8 3
		£1,489 17 5

FLAGGING APPORTIONMENTS.

129. No apportionments of the estimated expenses of flagging footways under the provisions of the Metropolis Management Act, 1862, Amendment Act, 1890 (53 and 54 Vict., cap. 54), have been made by the Council during the year.

EXCESS APPORTIONMENTS.

130. The following apportionments of the excess of the actual over the estimated costs, charges and expenses of paving, have been made by the Council during the year, viz:—

Date of Apportionment.	Date of Original Apportionment.	Name of Street.	Amount of Original Apportionment.	Amount of Excess Apportionment.
1910.	1908.		£ s. d.	£ s. d.

157. The rateable value and area of the Borough are as follows:—

VALUE AS PER VALUATION LIST, APRIL 5TH, 1908.	VALUE AS PER VALUATION LIST, APRIL 5TH, 1909.	VALUE AS PER VALUATION LIST, APRIL 5TH, 1910.	AREA. Acres.
£ 2,060,695	£ 2,103,112	£ 2,129,492	*9,199

* Including 91 acres of tidal water and foreshore.

NUMBER OF JURORS.

158. The numbers of Jurors entered on the Jury List for the years 1905, 1906, 1907, 1908, 1909 and 1910 respectively, were as follows:—

1905.	1906.	1907.	1908.	1909.	1910.
—	—	—	—	—	—
11,104	12,571	13,176	12,955	13,850	14,220

By order of the Council of the Metropolitan Borough of Wandsworth.

HENRY GEORGE HILLS,
Town Clerk.

EAST HILL, WANDSWORTH, S.W.
August, 1910.

APPENDIX "A."

**REPORT OF BOROUGH ENGINEER AND
SURVEYOR.**

MILEAGE OF ROADS.

The total length of roads repaired by the Council is now 186 miles, 3 furlongs, 108 yards.

The following table shows the length of the various classes of paving, &c., in each of the following districts :—

District.	Wood Paving.	Asphalte.	Granite Setts.	Granite Macadam.	Flint Macadam.	Tar Macadam and Tar Paving.	Blue Brick, Granolithic and other Paving.	Total.
	M. F. Y.	M. F. Y.	M. F. Y.	M. F. Y.	M. F. Y.	M. F. Y.	M. F. Y.	M. F. Y.
No. 1. Clapham and Balham	3 6 69	140	218	19 5 211	21 1 43	1 89	44	45 0 154
No. 2. Streatham ...	2 4 21	—	2 115	17 0 44	11 6 116	171	—	31 6 27
No. 3. Balham and Tooting	3 7 191	—	—	22 0 28	11 2 55	—	—	37 2 54
No. 4. Wandsworth ...	3 0 161	48	1 127	14 2 197	21 2 48	2 106	163	39 2 190
No. 5. Putney ...	2 3 51	63	155	13 5 148	16 3 45	1 111	210	32 7 123
Totals ...	15 6 53	1 31	5 175	86 6 188	81 7 87	6 37	1 197	186 3 108

This does not include 10 miles, 5 furlongs, of public ways across fields, &c., which are used as footpaths only.

SEWERS.

During the past year the following lengths of sewers, &c., have been constructed in the Borough :—

LOCALITIES.	By Estate Owners. — 9-in. pipe.	By Council. — 9-in. pipe.	Total. — 9-in. pipe.	Cost to Council.
	Lineal feet.	Lineal feet.	Lineal feet.	£ s. d.
Clarence Road, from "Fair- lawn" to "Laleham" ...	—	278	278	96 3 10
Fernwood Avenue ...	780	...	780	...
Green Lane ...	404	...	404	...
Heathdene Road ...	808	...	808	...

	798	...	100,847	101,645

Total approximate length—19 miles, 2 furlongs, 1 yard, 2 feet.

SEWER VENTILATION.

Seventeen sewer ventilating shafts have been fixed against sides of houses and eight columns erected during the year, in lieu of surface ventilators in the roads.

The total number of ventilating shafts and columns in the Borough are as follows, viz. :—

403	6-inch by 4-inch ventilating shafts.	
1	4 inch by 4-inch	do.
2	4 inch by 3 inch	do.
82	6 inch circular	do.
45	5-inch	do.
61	4 inch	do.
3	3-inch	do.
123	6-inch ventilating columns	
<hr/>

<hr/>		

SANITARY CONVENIENCES.

The following is a return of the receipts during the year at each of the conveniences :—

	£	s.	d.
Balham Station	255	18	9
Clapham Cross	242	0	2
Cedars Road (closed June 18th, 1909)	13	10	0
East Hill, Wandsworth	43	1	11
High Street, Putney	116	16	5
Merton Road	11	15	4
Drewstead Road (near Streatham Hill Railway Station)... ..	20	8	6
Streatham High Road (near Church)	42	10	7
Tooting Broadway	193	0	4
Putney Bridge	61	11	0
Christchurch Road	27	19	10
	<hr/>		
	£1028	12	10
	<hr/>		

The amount expended in the maintenance of these, together with 20 urinals, was £2,247 13s. 8d.

A new circular ornamental cast-iron urinal for four persons has been erected on the west side of Mitcham Road between Renmuir Street and Longley Road. The ironwork was supplied and fixed by Messrs. W. Macfarlane & Co., and the foundations and drains were put in by the Council's employees, the total cost being £108 14s. 11d.

PRIVATE DRAINS.

The following are particulars of the private drains which have been constructed by the Council during the past year, the cost having been paid by the persons for whom the work was executed:—

No. of drains.	No. of houses drained.	Lengths and sizes, feet lineal.			Total length, feet lineal.
		9-in.	6-in.	4-in.	
176	602	148	3,046	903	4,097

In addition to the above, 7 drains, comprising 140 feet of 6-inch pipe have been laid under new roads at the time of, and in conjunction with, the construction of new sewers; these are intended to drain about 66 houses when built (the provision in many cases being for a future system of rear drainage by combined operation). Thus an aggregate of 4,237 feet of drains have been laid under roads and paths in the Borough for various purposes during the year.

NEW BUILDINGS.

No. of notices received.	No. of houses.	Additions to houses, etc.	Stables, Warehouses, Shops, and other buildings.	Churches, Chapels, Schools and additions.	Total No. of Buildings.	No. of Houses certified as having a proper and sufficient supply of water. (Flats under one roof counted as one house.)
208	711	109	77	13	910	879

DRAINS RE-CONSTRUCTED.

Number of Notices received	233
Number of Buildings re-drained	346

WOODEN STRUCTURES.

Number of Notices received	39
Number of Licenses granted	27
Number of Licenses renewed	6

HIGHWAYS.

The following materials were used in the paving and repair of the roads and footpaths in the Borough :—

Enderby Granite	304 cubic yards.
" " Chippings	40 "
Alderney "	16,961 "
" " Chippings	502 "
" " Siftings	629 "
Pit Flints	5,204 "
Old Macadam	4,170 "
" Siftings	518 "
Fine Gravel	9 "
Hoggin	131 "
Crushed Ballast	1,819 "
Thames Ballast	2,253 "
Asphalte	259 super. yards.
York Paving	36 "
Artificial Stone Paving	5,944 "
Tarpaving, Topping	491 cubic yards.
" Bottoming	122 "
Wood Blocks, 9-in.	55,072 No.
Cement	363 tons
Lime, Grey	96 cubic yards
Granite Setts	2 tons
Blue Paving Bricks	16,020 No.
Norway Kerb	4,492 lineal feet
Tar	27,037 gallons

TRENCHES.

The length of kerbing and superficial area of carriageways and footways disturbed by the Water Board, General Post Office, London County Council, and the various Companies having statutory powers for breaking up roads, in connection with mains and services, for the year ended March 31st, 1910, are as follows:—

Kerbing	1,843 lineal feet
York and other Stone	—
Paving relaid ...	9,592 super. yards
New York and other	
Paving ..	731 "
Tar Paving ...	8,022 "
Wood Paving ...	1,526 "
Granite Macadam ...	6,498 "
Flints and Gravel ...	10,140 "
Pitchings ...	1,184 "
Asphalte ...	182 "
	—
Total	37,875 super. yards

The charges for reinstating these trenches were £5,557.

HOARDINGS, &c.

176 hoarding licenses and renewals have been granted in the Borough during the year.

TAR-SPRAYING.

The following roads were tar-sprayed by the Taroads Syndicate, Limited, viz.:—

Abbeville Road	... from Park Hill to Cavendish Road.
Allfarthing Lane	... ,, Garratt Lane to Heathfield Road.

Westcote Road	...	" Mitcham Lane to opposite No. 9.

West Hill	from Upper Richmond Road to Tibbett's Corner.
Wimbledon Park Side	...	,,	Tibbett's Corner to Borough Boundary.
Windmill Road	...	,,	Heathfield Road to Spencer Park.
Woodwell Road	...	,,	North Side, Wandsworth Common, to East Hill.

Length, 37 miles, 3 furlongs, 50 yards.

Area, 587,229 superficial yards.

Cost, £2,385 12s. 4d.

UNEMPLOYED WORKS.

The following work has been carried out by the Central (Unemployed) Body for London in conjunction with the Council, the Central Body providing the unskilled labour and the Council the materials, skilled labour and supervision.

The cost, etc., is as follows:—

	ESTIMATE.			COST.		
	Unskilled labour. (Central Unemployed Body.)	Materials, skilled labour, supervision, etc. (Wandsworth Borough Council.)	TOTAL.	Unskilled labour. (Central Unemployed Body.)	Materials, skilled labour, supervision, etc. (Wandsworth Borough Council.)	TOTAL.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
Filling in ditches and widening Tooting Bec Road between the Avenue and Aldington Road	828 5 7	1,611 14 5	2,440 0 0	*690 13 3	†1,318 3 5	2,008 16 8
£	828 5 7	1,611 14 5	2,440 0 0	690 13 3	1,318 3 5	2,008 16 8

* The total cost of the labour employed on the work amounted to £762 8s. 3d., of which £71 15s. for skilled labour was defrayed by the Borough Council.

† This does not include the value of old materials used from Depots and Tramway works.

The value of the work carried out by the Central (Unemployed) Body is as follows :—

Actual cost of work with Unemployed					
Labour	£762	8 3
Estimated cost of work with Ordinary					
Labour	693	0 7
				} = 90·9% of the actual cost.	
				<hr/>	
				£69	7 8 = 10% above Estimate.

The following works were in hand but not completed :—

Garratt Park	...	Widening of River Wandle and formation of River Banks.
Tooting Bec Road	...	Widening from Garrad's Road to Aldrington Road.

NEW STREETS.

The following new streets have been paved and adopted during the year, viz. :—

Name of Street.	Length in yards.
Acuba Street (2)	61
Ashvale Road	185
Badminton Road	293
Baldry Gardens (3)	103
Bridgford Street	108
Burtop Road (2)	7
Clairview Road	312
Earldom Road	139
Eatonville Road	225
Esparto Street	108
Fallsbrook Road (3)	208
Franciscan Road (3)	223
Headworth Road (2)	82
Landford Road	241
Langside Avenue... ..	178
Nepean Street	149
Parklands Road	261
Pullorough Road... ..	387
Southcroft Road (1)	204
Waldron Road	380
	<hr/>
Carried forward	3,854

Name of Street.	Length in yards.			
Brought forward	3,854
Wavertree Road (2)	232
Welham Road (1)	57
Woodnook Road	222
Total	<u>4,365 yards.</u>

Or 2 miles, 3 furlongs, 185 yards.

Footpaths :—

Way leading from Blackshaw Road to Kenlor Road	47
Way leading from Kenlor Road to Level Crossing					20
Total	<u>67 yards.</u>

The following roads, which were previously repairable by the Council, have been paved as new streets during the year, viz. :—

Name of Street.	Length in yards.			
Mitcham Lane (2)	474	Footpaths only.
Rectory Lane	837	
Wimbledon Road (1)	293	Widened part on north side only.
			<u>1,604</u>	

Or 7 furlongs, 64 yards.

The estimated cost of making up and paving the above roads under apportionment amounted to £23,478 17s. 9d.

WORKS OF REPAIR.

The carriageways of the following streets, not repairable by the Council, have been repaired under the provisions of Section 3 of the Metropolis Management Amendment Act, 1890 (53 & 54 Vict., cap. 66), at the cost of the owners of property abutting thereon, viz. :—

Name of Street	Length in yards.			
Granville Road (2A)	378
Heathfield Road (1A)	141
Total	<u>519</u>

Or 2 furlongs 79 yards.

The estimated cost of repairing the above roads amounted to £250 os. od.

REMOVAL OF FISH OFFAL.

The contract for the above is being carried out by Messrs. Hempleman & Co., and the arrangements still appear satisfactory.

ROAD WATERING.

The details of road watering during the past year are set forth in the following tabular statement, viz:—

Length of road watered.			Expenditure.		
			Haulage.	Water, Labour and Repairs to Carts.	Total Expenses.
M. 186	F. 3	Y. 108	£2,716 11 3	£3,827 13 3	†£6,544 4 6

† Less £64 8s. 3d. received for watering horse rides, Tooting Common, Wandsworth Bridge, Magdalen Road, and roads in Cemeteries.

Average cost, £35 2s. od. per mile.

The total number of Standposts is 224.

The total quantity of water used in the Borough was 67,571,000 gallons, at 6d. per 1,000 gallons.

In addition to the above, the following quantities of water have been used for the several purposes as shown below:—

	Gallons.
Flushing Sewers	5,031,500
Repairs to Public Roads	1,013,225
Repairing Trenches	94,750
Paving Works	2,500
Scavenging	882,050
Improvements	41,640
Conveniences	3,941,786
Drinking Troughs	2,944,000
Yards and Wharves	929,571
Dust Destructor	653,000
Stables	384,643
Open Spaces	16,000
Private Works	78,000
Total	16,012,665

COLLECTION AND DISPOSAL OF HOUSE REFUSE.

The whole of the House Refuse in the Borough is now collected and disposed of by contract, with the exception of a portion from the Balham, Streatham, and Tooting Wards, which is disposed of at the Destructor.

The following table shows how it is dealt with in the various Wards:—

WARDS.	Contractor.	Estimated Quantity.		How disposed of.
		Van Loads.	Tons.	
Clapham, North and South	J. Guyatt ...	6,163	13,559	Barged away from Wharf at Nine Elms
Balham and Tooting	Do. ...	8,517	14,828	At Destructor.
" "	Do. ...	562	978	Sent to shoot outside the Borough.
Streatham ...	J. Cronk ...	3,353	6,351	At Destructor.
" ...	Do. ...	2,281	8,383	Sent to shoot outside the Borough.
Fairfield, Springfield, and Southfield	E. King ...	10,121	22,506	Barged away from Bell Lane Wharf.
Putney ...	T. King ...	4,619	8,834	Barged away from Ashlone Rd. Wharf.
Total	35,616	75,439	

Cost of Collection and part Disposal:—

TREES.

The trees in the public roads have been pruned and lopped, new stakes and wiring have been fixed, and new trees planted where necessary at a cost of £376 9s. 9d.

The following are particulars of work carried out :—

- 264 New Trees planted.
- 4,966 Trees pruned.
- 1,992 „ re-wired.
- 1,823 „ re-staked.
- 2,280 „ re-tied.
- 1,572 New Poles fixed to Trees.

STEAM ROLLERS.

The six steam rollers (belonging to the Council) have been worked 1,653 days during the year.

The cost of working was as under:—

	£	s.	d.
Wages (including watching and cleaning)	806	12	4
Coke, firewood, &c.	229	4	9
Oil, waste and sundries	35	7	1
Repairs	11	5	7
Insurance	13	9	9
Depreciation, 10 per cent. on £290 ...	29	0	0
	<hr/>		
Total cost of 1,653 days working ...	£1,124	19	6
	<hr/> <hr/>		

DAILY COST.

	s.	d.
Wages	9	9

LIGHTING.

Details as to the number and description of lamps in the Borough are set out on page 130.

The lamps under the heading of "Other Lamps" are:—

South Metropolitan Gas Company—

- 9 2-light incandescent burners at £5 12s. od. each per annum.
- 1 2 lamps (2-light incandescent burners in each) at £8 6s. od. per annum.
- 4 3-light incandescent burners at £7 8s. 7d. each per annum.
- 1 Scott-Snell lamp at £8 9s. 6d. per annum.
- 3 2-light inverted burners at £5 5s. od. each per annum.
- 14 3-light ditto at £7 5s. od. each per annum.

Mitcham and Wimbledon Gas Company—

- 1 Keith's high pressure incandescent lamp at Tooting Broadway at £8 8s. od. per annum.
- 4 arms to ditto at £5 8s. 2d. each per annum.
- 2 low pressure lamps ditto at £2 17s. 6d. „

Wandsworth and Putney Gas Company—

- 1 3-light incandescent burner at £7 9s. 1d. per annum.
- 18 2-light „ „ £5 4s. 2d. each per annum.
- 1 special (Town Hall) „ £5 2s. 10d. per annum.
- 3 Scott-Snell lamps at £9 os. 3d. each per annum.
- 2 Sugg's lamps fixed in front of Putney Railway Station, lighted by the London and South-Western Railway Company, at the cost of two ordinary lamps.

The lamps under the head of "Electric Lamps" are:—

- 5 lighted by the County of London Electric Supply Company, at the Causeway, Wandsworth, for £25 12s. per annum.
- 78 new lamps have been erected in the Borough during the past year.

P. DODD, M. Inst. C.E.,

Borough Engineer and Surveyor.

Borough Engineer and Surveyor's Offices,

215, Balham High Road.

APPENDIX "B."

GENERAL REPORT ON TESTINGS OF GAS SUPPLIED TO THE WANDSWORTH BOROUGH COUNCIL (1) BY THE WANDSWORTH AND PUTNEY GAS COMPANY; (2) BY THE MITCHAM AND WIMBLEDON GAS COMPANY FOR THE YEAR ENDED 31ST MARCH, 1910.

The mode of testing the gas has been the same as since 1st July, 1907, that is in accordance with instructions which I received from the Wandsworth Borough Council to test the gas twice weekly instead of daily, with such extra tests as might seem desirable or necessary.

The monthly averages of illuminating power and sulphur given in Table I., and the curves in Table III. of this report, indicating the fluctuations throughout the year ended 31st March, 1910, are, therefore, based on the results of bi- or tri-weekly testings of the gas.

By inspection of Table I. it will be seen that the average illuminating power of the gas for the whole year was 14·8 candles, the statutory limit being 14·0 candles. Previous yearly averages have been 1903-1906, 15·4; 1907, 14·7; 1908 and 1909, 14·9 candles.

During the year ended 31st March, 1910, the monthly averages have varied between a *maximum* of 15·2 candles (May, 1909) and a *minimum* of 14·5 candles (January, 1910)—see Table I., while the weekly averages have varied between a *maximum* of 15·6 candles (May, 1909) and *minima* of 14·3 candles (December, 1909, January and March, 1910)—see Table III.

In no instance have I found the illuminating power below the statutory limit during the year.

The average number of grains of sulphur in 100 cubic feet of gas was 24·0 for the whole year, there being no statutory limit in connection with this impurity since the passing of the Removal of Sulphur Restrictions Act, July 20th, 1906. Up to that date, and calculating from monthly

averages since October, 1903, the total average for that period was 15·4 grains of sulphur in 100 cubic feet of gas.

Although the average is now considerably higher than formerly, and has risen to over 30 grains on various occasions, it is rather less than that of the previous year (29·5 grains), and compares favourably with that of the Metropolitan Gas Companies on the whole during the same period. Should it not exceed the present average in future testings, the condition may be regarded as satisfactory.

Since the year ended 31st March, 1908, in which year some exceptionally high pressures were noted, and in connection with which I presented a report on January 1st, 1908, the pressures recorded at the times of testing have not been excessive, having varied between 2·5 and 3·0 inches, that is to say, pressures which will sustain a column of water of those heights.

I have not found this impurity in the gas at any testing during the year.

Sulphuretted
Hydrogen.

On December 7th, 1909, I received a letter from the Town Clerk, calling my attention to the promotion of the Gas Companies (Standard Burner) Bill, in which the Wandsworth and Putney Gas Company, and the Brentford Gas Company, proposed to join. I later received a copy of the Bill, and presented a report on the same to the Wandsworth Borough Council, dated December 31st, 1909. In that report, while generally agreeing that no valid objection could be raised against the proposed adoption of a standard burner, I called attention to certain proposed details of testing not quite in accordance with the latest notification of the London Gas Referees, and especially to the importance of instituting a Calorific Power Standard in connection with the testing of the Wandsworth and Putney Gas Company's gas.

The Council decided to present a petition against the Bill, in connection with which I conferred with Mr. Hills, with Mr. Young, the solicitor to the Council, and also with Mr. Coste, of the London County Council. I also attended a Conference on the Bill of Local Authorities at the Westminster Palace Hotel.

I was sorry eventually to learn from Mr. Young, in a letter dated 30th March, 1910, that the Wandsworth and Putney Gas Company had withdrawn from the Bill, and the matter, therefore, dropped.

I have tested this Company's gas as usual at the testing-place at Haydon's Road, South Wimbledon, which was first opened on January 1st, 1908, and I have given, in Table II. of this report, a complete record of the testings made during the year ended 31st March, 1910, in connection with which I may add the following remarks:—

As usual the illuminating power has shown a fairly high average, viz., 16·1 candles, the statutory limit being 15·0 candles. It has varied between a *maximum* of 17·0 candles (June 5th, 1909) and a *minimum* of 15·1 candles (November 19th, 1909).

The pressure, which is mostly rather higher than that of the Wandsworth and Putney Gas Company, has varied between 2·5 and 4·0 inches, with a general average of 3·4 inches.

I have not found this impurity present at any testing during the year ended 31st March, 1910.

H. WILSON HAKE, Ph.D.,
Gas Examiner.

I have examined the Accounts of the Weir Hospital Charity for the year ended December 31st, 1909, with the books and vouchers of the Charity, and with the Certificates affecting the cash at Bank and the investments, and I certify the Accounts to be in agreement therewith. The Dividends received from the Investments held by the Official Trustees of Charitable Funds have all been brought into the Accounts of the Charity. In my opinion the Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Charity's affairs according to the information given to me, and as shown by the books of the Charity. The investments as set out correctly represent the Capital of the Trust Funds.

TOWN HALL,
WANDSWORTH, S.W.

JAMES BAILEY,
Clerk to the Trustees of the Wandsworth Consolidated and Millington Charities.

APPENDIX "F."

REPORT OF THE WANDSWORTH DISTRESS COMMITTEE,

From the 1st July, 1909, to 30th June, 1910.

The Distress Committee was appointed by the Borough Council on the 11th October, 1905, in accordance with the Unemployed Workmen Act (1905), and constituted as follows:—

Members of the Borough Council	12
Members of the Board of Guardians	8
Persons experienced in the relief of distress		5

Members of the Council:—Aldermen Cresswell, Hewett, Lorden, Penfold, and Robinson; Councillors Anderson, Couzens, Denny, Everett, Jackson, Plumridge, and Prince.

Members of the Board of Guardians:—Rev. J. Cooney, Mr. G. J. Fowle, Councillor W. P. Mellhuish, Mr. E. A. Miller, M.B., Mr. H. P. Molyneux, Mr. Percival Rees (*Vice-Chairman*), Lieut. E. A. Sanders, R.N., and Mr. A. Sullivan.

Members experienced in the relief of distress, appointed for one year:—Rev. D. Tudor Craig, Mr. A. Glegg, J.P. (*Chairman*), Mr. T. Jones, and Miss M. H. Pollock. (One vacancy.)

A Sub-Committee of twelve members was formed, constituted as follows:—Mr. Percival Rees (*Chairman*); Alderman Cresswell, Councillors Couzens, Denny, and Jackson, Lieut. Sanders, R.N., Rev. J. Cooney, Mr. G. J. Fowle, Mr. T. Jones, Miss M. H. Pollock, and the Chairman and Members of the Central Body, *ex-officio*; the duties being to enquire and report as to the condition of labour, to consider and classify the Record Papers when completed.

Applications from unemployed persons were received at the office of the Distress Committee, 3, Church Row, The Plain, Wandsworth, during the winter months, from Men on Monday, Tuesday, Thursday, and Friday, and from Women on Wednesday, between the hours of 9 a.m. and 12 o'clock noon.

The particulars entered on the Record Papers were investigated and verified by personal visits to the homes of the applicants by the investigators, and references as to character were obtained from previous employers. No personal investigations were made outside the Borough.

The Sub-Committee considered the completed Record Papers and classified the applications into four divisions: Preference, Eligible, Ineligible, and Disqualified. In recommending applicants to the Central Body as suitable for employment, migration, or emigration, the Sub-Committee gave preference to men of good character, and distinguished as far as possible, between the habitual "out of work," and the applicant who was unemployed through trade depression, or kindred causes.

The wages of the men from this Borough employed on the Non-Colony Works were paid on Saturday morning at the Office of the Committee; the week's work being from Monday morning to Friday night. The rate of wages was 6d. per hour, except in the case of men working in Royal Parks, the wages there being 3/10 per day, and full fares paid.

The men sent to the Working Colonies receive 6d. per week, in addition to their board and lodging, a weekly allowance being made to the family on the following scale:—10s. to the wife, 2s. to the first child under 14, 1s. 6d. for the second child under 14, and 1s. for each other child under 14 years; but in no case was 17/6 to be exceeded. The allowances are paid at the homes of the men on Wednesdays. The men are allowed a furlough at the end of each month, their fares being paid for them.

REPRESENTATIVES OF WANDSWORTH ON THE CENTRAL
(UNEMPLOYED) BODY FOR LONDON.

Rev. J. H. ANDERSON, M.A., Vice-Chairman of the Central Body,
and Chairman of Works Committee.

Percentage of attendances at meetings of :—

Central Body, 94·11 per cent.

Works Committee, 92·30 per cent.

Employment Exchange Committee, 10·00 per cent.

Sub-Committee, 50·00 per cent.

As *ex-officio* member, attended the Finance Committee on 12
occasions.

Mr. PERCIVAL REES, Chairman of Finance Committee.

Percentage of attendances at meetings of :—

Central Body, 93·75 per cent.

Finance Committee, 84·21 per cent.

Works Committee, 78·57 per cent.

Joint Committee, 100·00 per cent.

Special Sub-Committees, 100·00 per cent.

Finance Sub-Committee of Accounts, 82·35 per cent.

EMIGRATION.

Number emigrated :—Heads of families, 8. Number of persons 32.

Number emigrated who had previously been employed on Colony or Non-Colony work :—*Nil*.

Four families, including 21 persons, are also awaiting sailing.

MIGRATION.

Number migrated :—2 families, comprising 12 persons migrated to Hollesley Bay Colony as settlers, and 2 women with 9 children migrated to join their husbands who had obtained employment in the country.

Number migrated who had previously been employed on Colony or Non-Colony work :—2.

* Extensive works have been carried out during the past year by the Wandsworth Borough Council in conjunction with the Central (Unemployed) Body for London; the work executed being the widening and improving of the River Wandle, and forming embankment to River at Garratt Park, and the widening of Tooting Bec Road.

Of the applicants applying in 1909-10 :—

361 applied once previously.	169 applied twice previously.
54 „ thrice „	29 „ four times „

Of the applicants given work in 1909-10 :—

107 were given work through the Central Body once previously.
40 „ „ „ „ twice „
4 „ „ „ „ thrice „

Number of applicants who have been in receipt of Poor Law Relief during the qualifying period of twelve months—47.

Number of applicants given work who have been in receipt of Poor Law Relief during the qualifying period of twelve months—5.

The effect produced upon those who obtained work, through the medium of the Distress Committee, varied according to the character of the applicant. In the case of those anxious to work and keep their homes together it was noticeable that after a week's wages, when nourishing food had been obtained, they gradually improved in efficiency.

Colony work has the advantage of fresh air and healthy surroundings, and of removing men from many local temptations. For various reasons, a number of applicants have declined to leave their homes for any period, preferring to wait for local employment.

In administering the Act, the Committee found reason to believe that a false impression was created amongst the unemployed, who, after having had the enquiry forms filled up and having received visits from the Investigators as to the correctness of the statements, felt that work was certain. As only 369 out of 1,424 applicants obtained work, the disappointed balance lost confidence in the usefulness of the Act, and to some extent also in those

administering it. The impression that work was coming also slackened their efforts to obtain employment elsewhere.

The Committee has not availed itself of the services of **Volunteers.** additional voluntary workers.

The Committee had referred to them before investigation all **Preliminary investigation.** cases where there appeared to be a technical disqualification, and if the applicant did not comply with the regulations issued by the Local Government Board no further action was taken. Applications from single men, and married men without families, were not investigated, unless the application was for Emigration.

The foregoing remarks are the same in substance as those made last year. An additional year's experience confirms the opinions of the Committee then expressed.

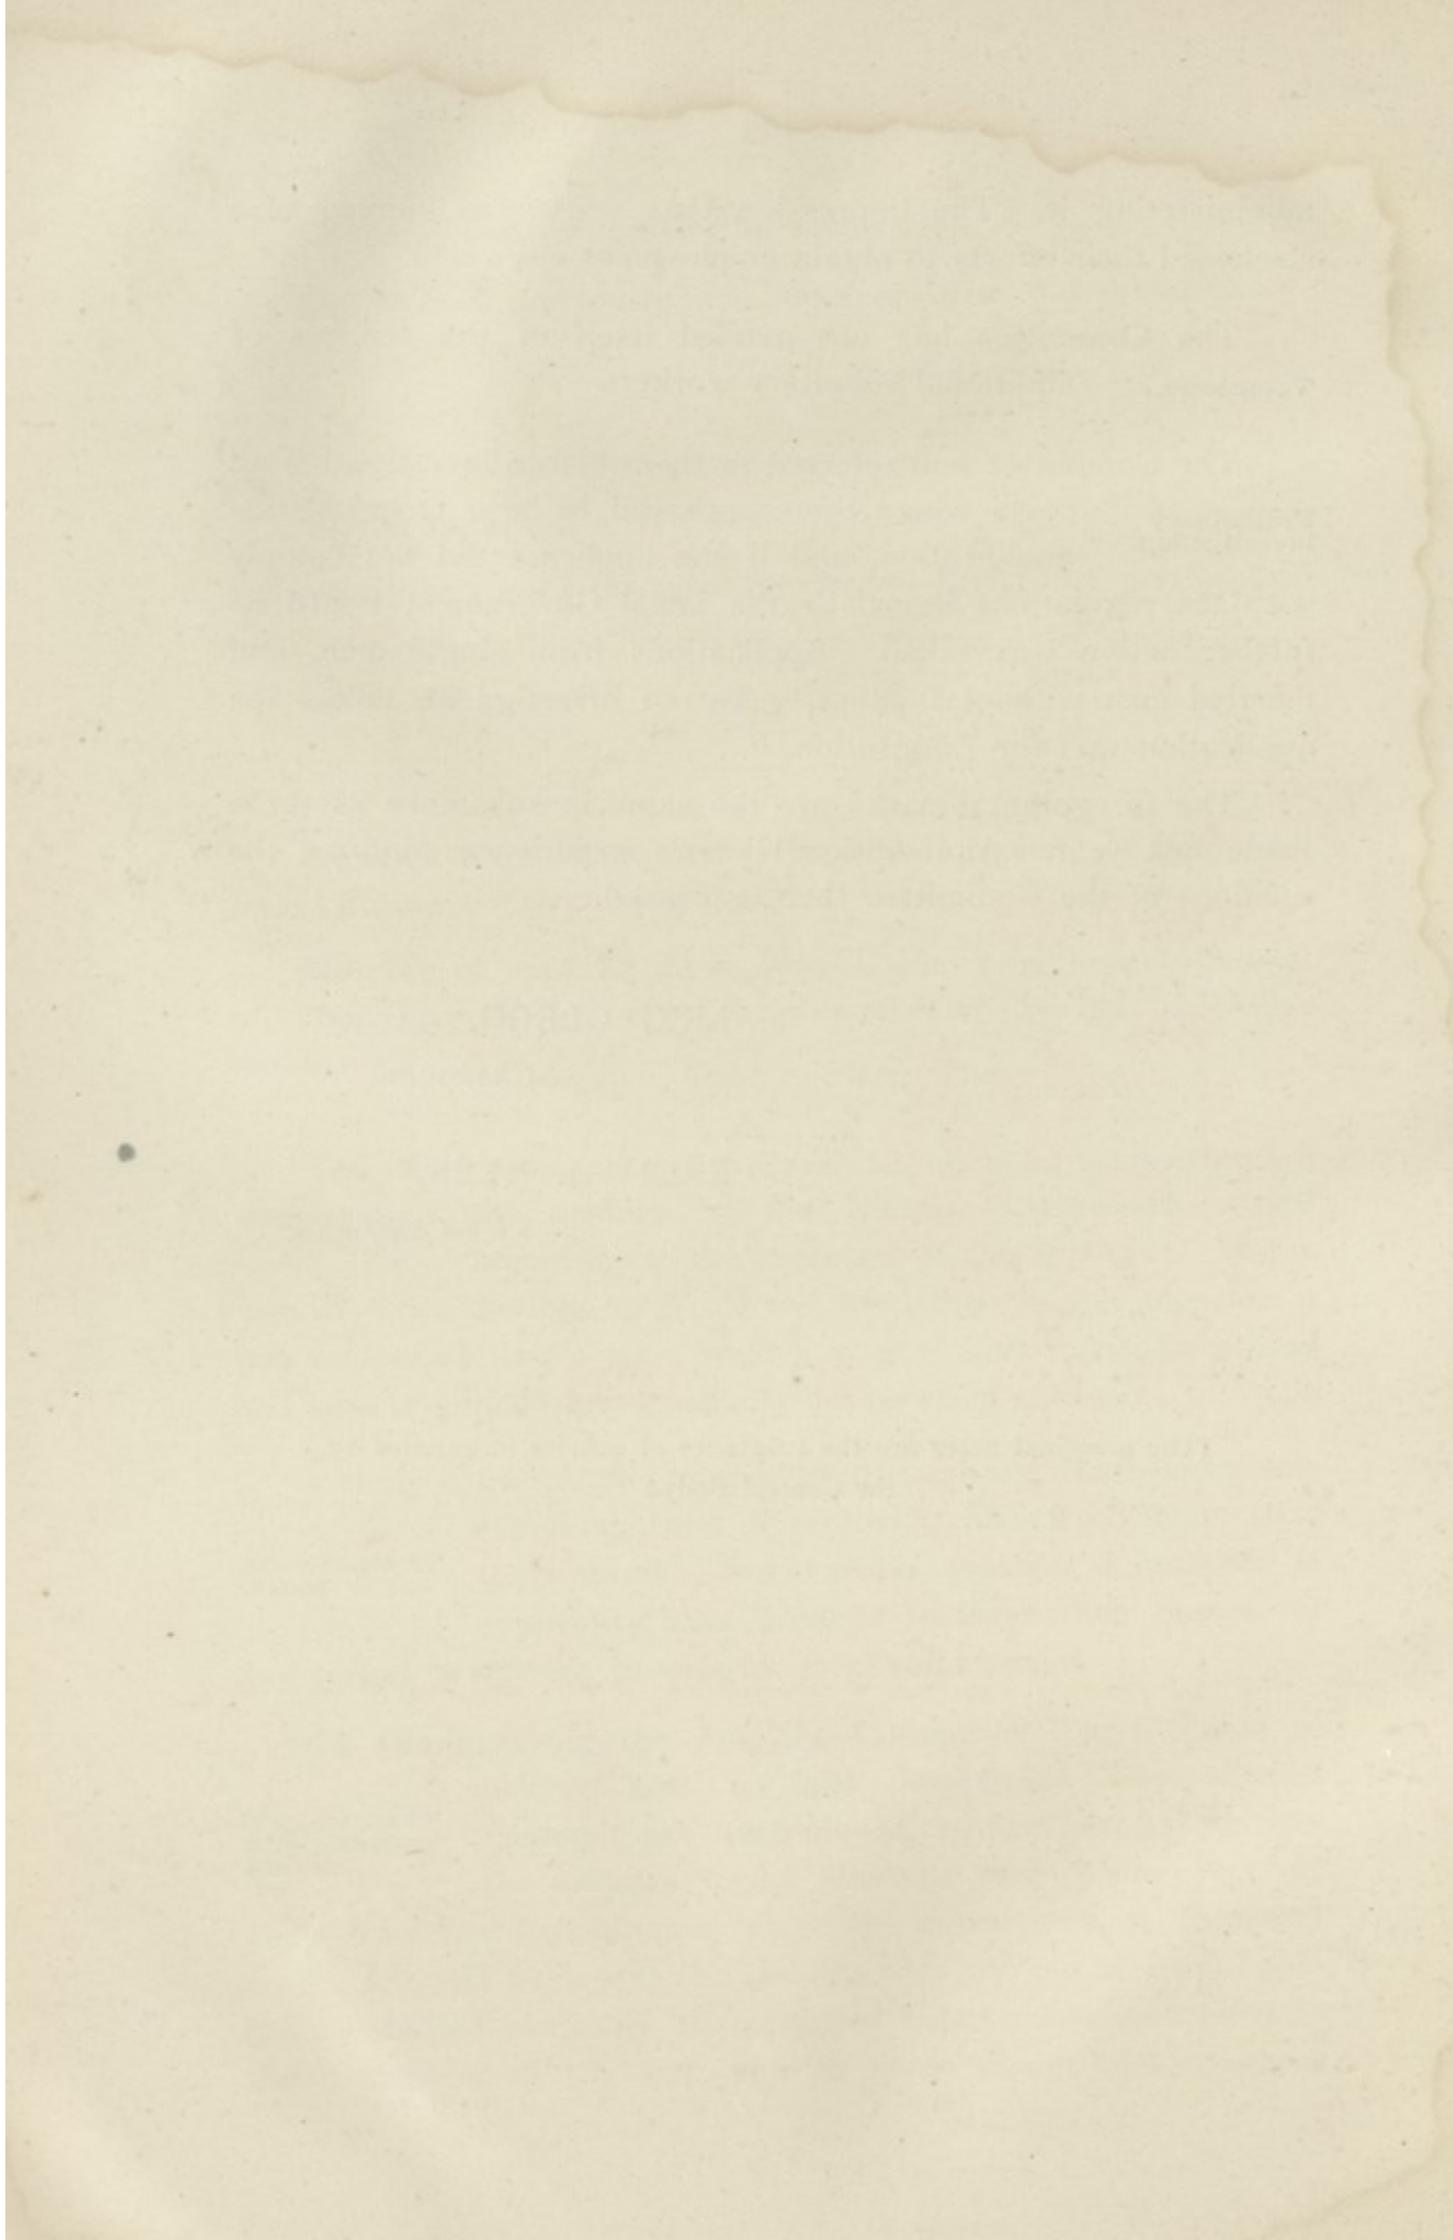

ALEX. GLEGG,

Chairman.

PERCIVAL REES,

Vice-Chairman.

WANDSWORTH.—C. T. Davis, 38, West Hill, Wandsworth, S.W.

CHAIRMAN'S PREFACE.

This year the form in which the Report of the Libraries Committee has hitherto been presented has been changed. The statistics of the several libraries have been collated. They are now placed side by side in a form which makes comparison easy and instructive, and may possibly help towards uniformity of administration.

The issue of books from all the libraries has largely increased. In every library the issues are the highest hitherto recorded. The figures in the Report of the Clapham Library Sub-Committee demonstrate the value of a good Reference Department where books can be consulted without being lent. There 22,982 books were consulted without being taken away.

The marked increase in the number of Students' Tickets issued is gratifying. This increase shows a growing demand for books of an educational character.

Consideration of the use made of the Reading Rooms, the Reference Departments, and the Lending Departments of the Borough Libraries shows how greatly and increasingly the public are enjoying the benefits of these institutions. It is a credit to municipal administration that advantages so extremely appreciated can be provided within the narrow limits of a penny rate.

J. H. ANDERSON,

Chairman.

12th August, 1910.

REPORT OF THE CLAPHAM PUBLIC LIBRARY
SUB-COMMITTEE

FOR THE YEAR ENDED 31ST MARCH, 1910.

The Sub-Committee have pleasure in presenting the Twenty-Third Annual Report on the work of the Clapham Library.

The number of books issued during the year was 136,604 in the Lending Library and 22,982 in the Reference Library, being a total issue of 159,586 volumes, and a daily average of 665 volumes for the 240 days on which the library was open. These figures are much higher than any hitherto recorded, and show an increase in issues of 28,110 volumes over the previous year, and a daily average increase of 126 volumes.

The number of books now in stock is 18,659, of which 15,196 are in the Lending Library and 3,463 in the Reference Library.

4,337 readers' ordinary tickets (including renewals) and 1,102 students' tickets were issued during the year.

Advantage was taken of the publication of a new catalogue of works of fiction and juvenile literature in July, 1909, to withdraw a number of obsolete and worn-out books, to add duplicates of the more popular works, and to re-arrange and re-number the books in these classes in alphabetical order under authors.

The Sub-Committee desire to express their cordial thanks to the various donors of books, periodicals, etc., during the past year. The principal donations were a number of books from Dr. H. R. Mosse and Mr. T. Browning, and a Roman altar stone, found in the grounds of Cavendish House, Clapham Common, and presented by Councillor E. J. Golds.

The Borough Council in November, 1909, appointed the Mayor (Alderman Dawnay, J.P.), Alderman Lidiard, and Councillors Bulcraig, J.P., Cox, Cundall, Duncan, Henderson, and Young, as the Sub-Committee for the Clapham Library for 1910. Councillor Cundall was elected chairman, and a vote of thanks was passed to Councillor Bulcraig for his services as chairman during the previous year.

The Sub-Committee are pleased to record their appreciation of the satisfactory and efficient manner in which the Librarian and his Staff have discharged their duties.

On behalf of the Sub-Committee,

JAS. W. CUNDALL,

Chairman.

2nd May, 1910.

REPORT OF THE PUTNEY LIBRARY SUB-COMMITTEE,
FOR THE YEAR ENDED 31ST MARCH, 1910.

In presenting the Twenty-Second Annual Report of the Library the Sub-Committee have pleasure in stating that the Library continues to be extensively used in all departments.

In December, 1909, Councillors Hoile, Jackson, Mathias, and Radford were appointed by the Borough Council to act as the Sub-Committee for the year 1910. Councillor Gosden was elected to the Sub-Committee in February, 1910.

A second edition of the Catalogue Key to the Indicator has been issued, and is well used by borrowers from the Lending Department.

During the year the following works have been carried out under the superintendence of the Borough Engineer and Surveyor:—Erection of new bookcases and additions to the directory stand at a cost of £38, and painting works, costing £16.

The Electric Light Installation has been altered and improved transformers fixed and the use of metallic filament lamps introduced at a cost of £95. The result has proved highly successful, shewing a considerable reduction in the current used.

The Sub-Committee desire to place on record their appreciation of the valuable services of Mr. J. E. Parker, the Chairman of the Sub-Committee for the past two years, during the many years he was associated with the management of the Library.

The estimates for the year 1910-11 have been reduced by £77 in order to bring the sum to be expended within the amount of the estimated product of a penny rate in the Putney Ward.

The Sub-Committee desire to thank the donors of various books and newspapers to the Library.

The stock in this department has increased by 759 volumes; of these, 736 were acquired by purchase, and 23 were presented. 284 obsolete volumes were withdrawn from stock, making a total of 11,291 volumes now available for the use of borrowers.

The issues have increased by 1,723 volumes, the total number being 74,089 as compared with 72,366 issued during the year 1908-9. On March 31st 2,221 borrowers' tickets and 323 students' tickets were available for use in the department. The sum of £55 4s. 11d. was received from the sale of catalogues, fines, &c., during the year.

The Reference Library is shelved in open cases, a plan greatly appreciated by readers. No record is kept of the number of books consulted, but it is estimated that upwards of 150 persons use the room daily. During the year 57 volumes have been added to the stock, making the total 2,407 volumes.

Forty monthly magazines and reviews, six quarterlies, and 53 weekly periodicals are placed in these rooms, which continue to be used by an increasing number of readers. The magazines and reviews are transferred to the Lending Department when replaced by new issues and are greatly in demand for home reading.

The list of newspapers, &c., provided in this room includes 31 daily newspapers, among which are Birmingham, Cardiff, Dublin, Edinburgh, Liverpool, Manchester, and Plymouth daily journals, 55 weekly newspapers and periodicals, and 55 monthly and quarterly publications.

The only change in the staff was the appointment of Wm. J. Mills as a Junior Assistant, in March, 1910, in place of James C. Clarke, who was transferred to the Rating Department.

The Sub-Committee again have much pleasure in recording their satisfaction with the work of the Librarian and his staff.

Signed on behalf of the Putney Library Sub-Committee.

July, 1910.

A. W. MATHIAS,
Chairman.

REPORT OF THE STREATHAM, BALHAM, AND TOOTING
LIBRARIES SUB-COMMITTEE,

FOR THE YEAR ENDED 31ST MARCH, 1910.

The Sub-Committee have pleasure in presenting their report on the work of the Streatham, Balham, and Tooting Libraries for the year ended March 31st, 1910.

The large increase in the number of books borrowed for home-reading is again a gratifying and noticeable feature of the year's work. The number of books issued at the three libraries reached a total of 455,007, or 38,674 more than that of last year. The circulation at each library (the highest hitherto recorded) was as follows:—

	Lending Library.	For Reference Purposes.	Total.	Average Daily Issue.
The Tate Library	185,948	6,120	192,068	800
Balham Library	156,539	2,642	159,181	663
Tooting Library	101,941	1,817	103,758	432
Total Number of Volumes issued			455,007	1,895

A detailed statement of the number of books issued in each class of literature will be found in the general table of statistics appended to this report, page 17. The classification in the tables has been slightly modified this year so that the returns pertaining to all the libraries in the Borough may be combined in one general table. Though the statistical information given in the tables affords some indication of the extensive use and popularity of these libraries and of the work involved in their administration, yet, at the same time, it is impossible to indicate by means of figures alone that value and usefulness which depend so largely upon the judicious and satisfactory

provision that is made for meeting the requirements of all classes of readers. The Sub-Committee are glad to find that their aim in supplying a comprehensive selection of literature and technical books suited to the increasing needs of the numerous borrowers and students using the three libraries meets with general satisfaction. They regret, however, that owing to financial limitations they are prevented from extending as fully as they would like the scope and utility of their work.

The number of Borrowers' Tickets issued at each library during the year was as follows :—

Issued from	No. of Tickets issued.		
	Ordinary Tickets.	Students' Tickets.	Total.
The Tate Library, Streatham ...	5,222	2,037	7,259
Balham Public Library ...	4,073	500	4,573
Tooting Public Library ...	2,680	884	3,564
Total ...	11,975	3,421	15,396

It is gratifying to find that the granting of Supplementary or Students' Tickets continues to be much appreciated by borrowers, as evinced by the large number issued during the past year. These tickets are not available for works of fiction or books in the Juvenile Department.

The stock at the 31st March, after making the necessary deductions on account of replacements and discarded books, numbered 41,605 volumes, located as follows :—

	Volumes in Stock.	
The Tate Library, Streatham	20,090
Balham Public Library	12,866
Tooting Public Library	8,649
Total ...		<u>41,605</u>

More detailed information respecting the stock will be found in the general table appended to this report, page 16.

In the acquisition of books careful consideration is always given to the requirements of every section of the libraries, and when, at times, it is found necessary to limit the additions, the Sub-Committee endeavour so to expend their funds that no class of literature is neglected from a want of due appreciation of its value and utility.

The reading rooms have been well attended during the year. They are supplied with a large selection of the principal newspapers and periodicals, many being presented by their respective publishers or other donors. During the year 201 publications were provided at the Tate Library, 136 at the Balham Library, and 121 at the Tooting Library. A list of these papers, &c., is given on pages 18 to 27.

The reading rooms are open on week-days from 9 a.m. to 10 p.m., and on Sundays (except during the months of July, August, and September), from 3 to 9 p.m.

The work of painting the exterior wood and iron-work of the Tate Library and sundry repairs connected with the building were carried out in the early part of the summer.

A considerable saving in the cost of electric lighting at the Tooting Library has been effected by the provision of a transformer and the substitution of metal filament lamps.

The Sub-Committee again have much pleasure in recording their satisfaction with the work of the Librarian and his Staff.

Signed on behalf of the Sub-Committee,

A. DOUGLAS ROBINSON,

Chairman.

30th May, 1910.

REPORT OF THE WANDSWORTH LIBRARIES
SUB-COMMITTEE,

FOR THE YEAR ENDED 31ST MARCH, 1910.

The Libraries Sub-Committee for the Parish of Wandsworth beg to report on the work of the Wandsworth Public Libraries for the 25th year of their existence.

The members of the Council which form the Sub-Committee are : Councillor Couzens (Chairman), The Mayor, Alderman Lidiard, Councillors Everett, B.A., Evershed, Junr., Harrison, J. A. Robinson, and Shillington.

Last year's issue was 153,095, and the present year's (1909-10) was 162,300, an increase of over 6 per cent. It may be noted, too, that the issues show a striking increase of 88 per cent. since the Council took over the libraries in 1901-2, whilst the population of the Parish of Wandsworth has only increased 61 per cent., thus indicating that the reading public has grown much larger.

Having regard to the limited amount of money available for additions to the Wandsworth Libraries, it gives the Sub-Committee much satisfaction to find that the inhabitants of Wandsworth have so appreciated the care and attention paid to the selection of books that the issues have continued to increase.

In accordance with an order of the Libraries Committee, the details of the statistics have been re-arranged.

During the year two catalogues have been printed of the books in the lending department at the West Hill Library, in accordance with the rules passed by the Council on 25th March, 1908 ; 190 copies of the general and 415 copies of the fiction catalogues have been sold.

Advantage was taken of the re-printing of the catalogue to discard the obsolete books and to add others of more modern date in their places.

The advertisement boards have attracted great numbers of those interested in the requirements of the labour market, and during the year the Proprietors of the *Daily Mail* have presented two copies of

their paper, from which the advertisements are cut and exhibited on the notice boards the proprietors kindly supplied. This is in addition to the presentation of two copies of *The Times* and three copies of the *Daily Telegraph* recorded last year.

The rooms over the Branch Library in Garratt Lane are now re-let to another tenant for three years.

The outside of the library at West Hill has been re-painted.

The Sub-Committee are glad to find that all their officers and servants (with the exception of two who are only on part time) have been placed on the permanent staff.

The Sub-Committee are again indebted to many donors of books and newspapers.

The Borough Engineer and Surveyor kindly gave the Sub-Committee an old boundary stone found in connection with the widening of High Street; it is placed in the forecourt of the West Hill Library, where it may be seen with the milestone (seventh from Royal Exchange) which formerly stood where Santos Road joins West Hill, also an old wooden water pipe dug up in the town, and two of the stone sleepers of the Surrey Iron Railway.

A hearty vote of thanks was given to Councillor W. J. Harrison for his services in the chair during the past three years. Councillor Couzens was called to the chair for the ensuing year.

There have been two changes in the staff, viz. :—Mr. H. E. Ilott was transferred to the Rating Department, and Mr. S. Bastin, from Streatham Library, was appointed in his place. Mr. L. E. Hull left the service of the Corporation to go to Canada, and Mr. E. Mendham has been transferred from Balham Library.

The Sub-Committee desire to express their appreciation of the able and efficient way in which the Librarian and his Assistants have discharged their duties during the past year, also of the helpful assistance given by the Librarian to inquiring students and visitors generally.

Signed on behalf of the Wandsworth Libraries Sub-Committee,

EDWD. COUZENS,

Chairman.

28th June, 1910.

REPORT

Of the Medical Officer of Health
for the Year 1909.

*To the Mayor, Aldermen and Councillors of the
Metropolitan Borough of Wandsworth.*

SIR AND GENTLEMEN,

I have the honour to present the Annual Report on the health and sanitary condition of the Borough for the year 1909.

Population.

The population of the Borough as estimated by the Registrar General was, in the middle of 1909, 297,646, an increase of 8,140 compared with 1908, but this estimate, in my opinion, is much under the actual population.

The population on which all the rates in this Report are calculated has been obtained in a similar manner to that adopted in 1905, 1906, 1907, and 1908, by dividing the number of inhabitants at the Census, 1901, by the number of rated hereditaments in that year.

The factor thus obtained represents the number of persons per rated hereditament, by which the number of hereditaments in the middle of 1909 is multiplied.

It is probable, however, that this calculation gives a population somewhat in excess of the actual population, as the number of persons per rated hereditament may have decreased. The method adopted, in my opinion, gives the closest approximation to the actual population.

The population for the purposes of the Equalisation of Rates Act was estimated in 1906 as 296,020, in 1907, 308,663, in 1908, 318,603, and in 1909, 327,322, these populations being calculated from the number of rated houses.

Table I. shows the population of each Ward and the number of rated hereditaments in 1901, the number of hereditaments in the middle of 1909 and the estimated population.

TABLE I.

Ward.	Census Population, 1901.	Rated Hereditaments, 1901.	Rated Hereditaments, 1909	Estimated Population, 1909.	Increase since 1901.
Clapham North..	28,772	5,081	5,680	32,150	3,378
" South..	22,589	4,115	6,680	36,600	14,011
Putney	24,139	4,553	5,960	31,590	7,451
Streatham ...	33,624	6,759	11,220	55,760	22,136
Balham... ..	38,034	7,204	9,860	51,960	13,926
Tooting	16,473	3,341	6,930	34,170	17,697
Southfield ...	21,924	3,963	7,280	40,250	18,326
Fairfield	18,520	3,896	4,060	19,240	720
Springfield ...	27,959	4,384	6,800	43,180	16,221
Whole Borough	232,034	43,296	64,470	344,900	113,866

Table II. shows the population of each sub-district, compared with the Census population, uncorrected and corrected for Institutions.

TABLE II.

Sub-District.	Census Population, 1901.	Estimated Population, 1909.	
		Corrected.	Uncorrected.
Clapham	51,361	69,050	68,750
Putney	24,139	31,490	31,590
Streatham	71,658	107,220	107,720
Tooting	16,473	32,070	34,170
Wandsworth... ..	68,403	99,270	102,670
Whole Borough	232,034	339,100	344,900

The estimated uncorrected population was, in 1908, 335,500, and in 1909, 344,900, an increase of 9,400, while the corrected population was, in 1908, 329,700, and in 1909, 339,100.

Compared with 1908, the greatest increase in population occurred in Streatham, next in Wandsworth, and the smallest in Clapham.

The corrected population in Table II. is used to calculate the rates in this Report.

The difference between the corrected and uncorrected population is made up by the population in the Public Institutions of the Borough, which are as follows:—

CLAPHAM :—Hostel of God.

PUTNEY :—The Priory, Roehampton.

STREATHAM :—St. Anne's Home. (St. Pancras parish.)
Middlesex County Lunatic Asylum (part of).

TOOTING :—Tooting Home.

Metropolitan Asylums Board's Hospitals
The Fountain and the Grove.

Newlands Asylum.

Tooting Bec Asylum.

WANDSWORTH :—The Workhouse.

Royal Hospital for Incurables.

Middlesex County Lunatic Asylum
(part of).

H.M. Prison.

The total population of these Institutions was about 6,300, but as a proportion of the inmates of the Tooting Home, the Workhouse, and the Metropolitan Asylums Board's Hospitals belong to this Borough, a deduction of 5,800 made from the uncorrected total population gives, approximately, the corrected population, viz. :—339,100, compared with 329,700 in 1908, 320,120 in 1907, and 310,310 in 1906.

Births.

During the 52 weeks ending the 1st January, 1910, 6,985 births, 3,553 of males and 3,432 of females, were registered, compared with 7,331 in 1908, 7,036 in 1907, 7,057 in 1906, and 6,892 in 1905.

The total number of births registered in this Borough was 6,924, but 139 births occurred in Institutions outside the Borough of persons belonging to the Borough, and 78 births in Institutions in the Borough of persons not belonging to the Borough, making a corrected total of 6,985.

Of the 139 births which were registered outside the Borough, all occurred in Lying-in Institutions, 123 in Clapham Maternity, and the remainder in various Institutions in other parts of London.

In Table III. is shown the number of births, males and females, the birth-rate, and the rate of natural increase for each sub-district, and for the whole Borough.

TABLE III.

Sub-District.	BIRTHS.			RATES.	
	Males.	Females.	Total.	Birth-Rate.	Rate of natural increase.
Clapham	681	657	1,338	19·37	8·36
Putney	247	251	498	15·81	5·53
Streatham	946	884	1,830	17·06	8·17
Footing... ..	533	484	1,017	31·71	19·11
Wandsworth	1,146	1,156	2,302	23·19	12·35
Whole Borough ...	3,553	3,432	6,985	20·60	10·22

Table IV. shows the birth-rate in the Borough, in the five sub-districts, in London, and in England and Wales, for the year, as well as the rates for the previous 10 years, compared with the decennial average.

TABLE IV.

Year.	Clapham.	Putney.	Streatham.	Tooting.	Wandsworth.	Whole Borough.	London.	England and Wales.
1899	25.45	23.79	22.75	29.60	29.22	25.83	29.7	29.1

1905	22.09	18.73	19.95	35.52	26.76	23.64	27.0	27.2
1906	20.50	17.12	18.47	35.44	26.57	22.74	26.6	27.0
1907	20.03	16.46	18.82	31.38	25.43	21.97	25.68	26.3
1908	20.19	18.02	18.72	34.31	24.84	22.23	25.82	26.5
Average for 10 yrs.	23.75	20.50	20.88	32.57	28.26	24.57	27.76	27.82
1909	19.37	15.81	17.06	31.71	23.19	20.60	24.3	25.6

The rates for the year show a very considerable reduction in the birth-rate, and this is general in all the sub-districts. The rate for Putney is exceptionally low, being 2.21 under the rate for 1908, and 4.69 under the decennial average. The rate for Tooting is this year under the decennial average, but compared with the other sub-districts, Tooting has a high birth-rate.

The rate for the whole Borough is much lower than any previously recorded, being 1.63 per 1,000 under 1908, and 2.34 under the decennial average.

The birth-rate for the whole of London was 24.3 per 1,000, compared with 25.82 in 1908, and 27.76 the decennial average;

while for England and Wales this rate was 25·6 per 1,000, compared with 26·5 in 1908, and 27·82 the decennial average.

With regard to this rate, although, as the Registrar General states in his Report for 1908, the crude birth-rate, *i.e.*, the ratio of births to population at all ages, is valuable for comparing the rates from year to year, or for ascertaining the rate of natural increase, yet it is not of great value for any inquiry into the significance of the variations which occur over a period of years, on account of the changing constitution of the population, or for comparing the rate in different communities, on account of the differences in age and sex distribution.

It is necessary therefore to calculate the proportion of births to the number of possible mothers, or the total number of females living in the Borough at ages 15 to 45 years.

In the year 1901 this rate was 88·6 per 1,000, in 1907, 74, in 1908, 73, and in 1909, only 69·4; while for England and Wales the rates were, in 1901, 114·2, and in 1908, 106·1.

The legitimate birth-rate, calculated on the married female population was in 1901, 215 per 1,000, in 1908, 174, and in 1909, 165; while for England and Wales it was, in 1901, 234·2, and in 1908, 217·6.

The low rates in this Borough are due to the greater proportion of females, both married and unmarried, at ages 15-45, compared with the whole of England and Wales, and also to the lower birth-rate.

Although these rates are, owing to the lapse of time since the last Census, only approximately correct, yet there is no doubt that a very serious reduction has taken place in the birth-rate during the last 10 years.

184 births occurred in the Workhouse during the year and one in the Middlesex County Asylum. Of the births in the Workhouse 12 belonged to Clapham, eight to Putney, 21 to Streatham, nine to Tooting, 57 to Wandsworth, 67 to Battersea, and 10 to other places,

Of these 184 births 103 were illegitimate, eight belonging to Clapham, seven to Putney, 15 to Streatham, four to Tooting, 25 to Wandsworth, 35 to Battersea, and nine to other places.

In the Borough, excluding the Workhouse, 116 illegitimate births occurred, 30 in Clapham, 10 in Putney, 26 in Streatham, 23 in Tooting, and 27 in Wandsworth.

One illegitimate birth occurred in the Middlesex County Asylum.

The total number of illegitimate births was 175, 38 of which belonged to Clapham, 17 to Putney, 41 to Streatham, 27 to Tooting, and 52 to Wandsworth, compared with 177 in 1908, and 189 in 1907.

The percentage of illegitimate births to total births was 2.50, compared with 2.41 in 1908, 2.68 in 1907, and 3.5 for the whole of London for 1908.

The following Table shows the percentage of illegitimate births to total births for each sub-district and for the whole Borough for the year, and for the three previous years.

	1906.	1907.	1908	1909.
Clapham	3.0	2.7	2.45	3.58
Putney	1.6	2.8	3.42	3.41
Streatham	2.8	2.5	2.08	2.24
Tooting	3.7	3.2	2.88	2.65
Wandsworth	2.8	2.5	2.20	2.25
Whole Borough	2.87	2.68	2.41	2.50

The illegitimate birth-rate in proportion to total births in this Borough is considerably lower than that for England and Wales, which was, in the five years 1896-1900, 4.10 per cent., in 1901-1905, 3.95 per cent., and in 1908, 3.99 per cent.

Deaths.

During the 52 weeks ending the 1st January, 1910, 3,279 deaths, 1,589 of males and 1,690 of females were registered, compared with 3,230 in 1908, 3,337 in 1907, and 3,341 in 1906.

Compared with 1908 there has been an increase of 49 deaths, but a decrease of 885 compared with the decennial average corrected for increase of population.

The uncorrected death-rate for the Borough was 9.50 per 1,000, compared with 9.63 in 1908, 10.24 in 1907, and 10.57 in 1906.

The average uncorrected rate for the decennium 1899-1908 was 11.76, or 2.26 above the rate for the year 1909.

In the sub-districts Streatham had much the lowest rate, viz. :—7.17, and Tooting the highest, viz. :—23.53.

The reason for the high rate in Tooting is that in that sub-district there are a number of Public Institutions, as the Tooting Bec Asylum and the Tooting Home, where persons from other parts of London are received and among whom the mortality is very great.

To ascertain the corrected death-rate corrections must be made to the above by the addition of the deaths in Out-lying Institutions of persons belonging to the Borough, and the subtraction of all deaths in Public Institutions in the Borough of persons not belonging thereto, whose domiciles were in other parts of **London**.

The total number of deaths for the 52 weeks, corrected for both internal and external Institutions was 3,520, compared with 3,380 in 1908, 3,416 in 1907, 3,461 in 1906, 3,320 in 1905, 3,417 in 1904, 3,023 in 1903, 3,328 in 1902, 3,130 in 1901, and 4,175 the decennial average corrected for increase of population,

During the year 745 deaths occurred in Public Institutions and 92 in other places not institutions in the Borough. Of these 837,656 deaths were of persons not belonging and 181 of persons belonging to the Borough.

Table V. shows the total number of Institution deaths arranged according to sub-districts and Institutions in which they occurred, Table VI. the deaths of persons not belonging to the Borough, and Table VII. of persons belonging thereto arranged according to causes of death, sex and age, and Institution in which the death occurred.

TABLE V.

Name of Public Institutions.	Clapham.	Putney.	Streatham	Tooting.	Wands'th.	TOTAL.
Hostel of God ...	36	36
St. Anne's Home	22	22
Middlesex Lunatic Asylum	15	...	75	90

Tooting Home	114	...	114
H. M. Prison	6	6
Workhouse	68	68
Royal Hospital for Incurables	14	14
Tooting Bec Asylum	302	...	302
The Priory	9	9
TOTAL	36	9	37	500	163	745
Other places not Institutions ...	14	17	38	9	14	92
GRAND TOTAL	50	26	75	509	177	837

Compared with the year 1908 there has been an increase of 14 in the deaths in Institutions, and an increase of five in other places, or a total increase of 19.

In the Middlesex County Asylum the deaths were five more, in the Tooting Bec Asylum 34 more, in the Hostel of God 19 less, in the Tooting Home 18 less, in the Fever Hospitals 42 less, in the Workhouse 45 more, in the Prison one more, in the Royal Hospital for Incurables two more, in St. Anne's Home four more, in The Priory two more, and in other places five more, compared with the year 1908.

Of the deaths in other places not Public Institutions 14 occurred in Clapham, 17 in Putney, 38 in Streatham, nine in Tooting, and 14 in Wandsworth.

Table VI. shows the deaths in Public Institutions in the Borough of persons not belonging thereto, arranged as to ages, causes of death, and Institution in which the death occurred.

The greatest number of deaths was due to Old Age, and of the 172 registered, 123 occurred in Tooting Bec Asylum, 28 in the Tooting Home, and 10 in the Middlesex County Asylum.

In the Middlesex County Asylum the greatest number of deaths occurred from Tubercular disease of the Lungs, Old Age, disease of the Respiratory Organs, Bright's disease, and all other causes, which include all diseases of the nervous system.

In Tooting Bec Asylum the greatest number of deaths occurred from Tubercular disease of the Lungs, diseases of the Respiratory Organs, Old Age, Bright's disease, Cancer, and all other causes; in the Hostel of God from Tubercular disease of the Lungs and Cancer; and in the Tooting Home from Tubercular disease of the Lungs, Old Age, and all other causes.

In the Fever Hospitals 18 deaths occurred from Scarlet Fever, compared with 46 in 1908, 28 from Diphtheria, compared with 27, and one from Lobar Pneumonia.

Table VII. shows the number of deaths in Public Institutions in the Borough of persons belonging thereto, arranged according to cause of death, sex, age, and Institution in which the death occurred.

The total number of deaths was 181, 92 of males and 89 of females, compared with 185 in 1908, 147 in 1907, and 160 in 1906.

37 of the deaths occurred in the Fever Hospitals, compared with 48 in 1908; 67 in Tooting Home, compared with 64; three in the Hostel of God, compared with six; 41 in the Workhouse, compared with 11; nine in the Tooting Bec Asylum, compared with 14; and 40 in other places, compared with 37.

These deaths are allocated to their proper sub-districts in Table XV.

The number of deaths in Table VI., viz. :—656, and that in Table VII., viz. :—181, make up the total of 837, the total number of deaths in Public Institutions in the Borough as shown in the last column of Table XV., and in column nine of Table XI.

In the next Table the number of deaths in Institutions outside the Borough is given in detail, but a complete list of these Institutions with the number of deaths that occurred in each during the year, is given after Table I. of the Local Government Board's Tables.

As the Borough is dealt with as one Sanitary District the deaths of persons belonging to other parishes in the Borough in Institutions such as the Fever Hospitals, Tooting, are considered to be deaths in Internal Institutions with regard to the whole Borough, and are not included in the following Tables. The same applies to deaths in the Hostel of God, Clapham, the Tooting Home, the Workhouse, the Tooting Bec Asylum, and the Royal Hospital for Incurables.

TABLE VIII.

DEATHS in PUBLIC INSTITUTIONS outside the Borough of Persons belonging to the Borough, 1909.

CAUSES OF DEATH.	Deaths belonging to whole District at subjoined ages.							Deaths belonging to Localities (at all ages).					Institutions.

The total number of deaths in out-lying Institutions was 897, 481 of males and 416 of females, compared with 783 in 1908, 739 in 1907, 731 in 1906, and 689 in 1905.

436 of these deaths occurred in Workhouses and Workhouse Infirmarys, compared with 326 in 1908; 447 in General and Special Hospitals, 92 of which occurred in Public Lunatic or Imbecile Asylums, compared with 433 in 1908; and 14 in the Metropolitan Asylums Board's Hospitals, compared with 14 in 1908.

Of the 447 deaths in General and Special Hospitals, 77 occurred in St. Thomas's Hospital, 40 in Bolingbroke Hospital, seven in Belgrave Hospital, 14 in Victoria Hospital, seven in St. George's Hospital, 23 in Westminster Hospital, 11 in Guy's Hospital, 22 in Long Grove Asylum, 11 in Horton Asylum, 15 in Banstead Asylum, 18 in Charing Cross Hospital, 13 in Cane Hill Asylum, nine in Middlesex Hospital, and 11 in West London Hospital.

In the South Western Hospital of the Metropolitan Asylums Board, there were 14 deaths, one from Scarlet Fever, three from Diphtheria, four from Diarrhœa, two from Enteric Fever, and four from other causes.

The number of deaths in these and other Institutions outside the Borough is shown on Table XII.

The corrected number of deaths after adding the deaths of persons belonging to the Borough and subtracting those of persons dying in the Borough and not belonging thereto, was 3,520, 1,723 of males and 1,797 of females, an increase of 148 compared with 1908, but a decrease of 655 compared with the corrected decennial average.

The corrected death-rate for the year was 10·38, compared with 10·25 in 1908, 10·67 in 1907, 11·15 in 1906, 11·61 in 1905, 12·93 in 1904, 12·24 in 1903, 13·43 in 1902, and 15·33 in 1901.

Table IX. shows the total number of deaths and the death-rates for each sub-district and for the whole Borough, corrected and uncorrected for deaths in Public Institutions.

The death-rate for the whole of London for the year was 13·99 per 1,000, compared with 14·75 in 1908, 14·55 in 1907, 15·07 in 1906, 15·1 in 1905, 16·10 in 1904, 15·6 in 1903, and 17·2 in 1902.

TABLE IX.

Whole Borough	1,723	1,797	3,520	1,589	1,690	3,279	10·38	9·50

The death-rate in England and Wales in 1909 was 14·5 per 1,000, compared with 14·7 in 1908, 15·0 in 1907, 15·4 in 1906, 16·2 in 1905, and 16·2 in 1904; in the 76 Great Towns 14·7, compared with 14·9 in 1908; and in the 143 Smaller Towns 13·9, compared with 14·0.

If a comparison is to be made with other places it is necessary to again correct the corrected rate, viz. :—10·38, for age and sex distribution.

This is done by multiplying the rate by a factor obtained by dividing the standard death-rate in England and Wales, at the Census of 1901, with the standard death-rate for the Borough at the same period. This factor has been ascertained to be 1·0547, which gives a rate for this Borough for the year 1909 of 10·94 per 1,000, compared with 10·81 in 1908, 11·25 in 1907, 11·76 in 1906, 12·24 in 1905, 13·60 in 1904, 12·87 in 1903, and 14·00 in 1902.

The following Table shows the standard death-rate, the factor for correction, the crude death-rate, the corrected death-rate, and the comparative mortality figure for London and for the 29 Boroughs, including the City of London, for the year 1909.

The figures are extracted from the Quarterly Returns of the Registrar General for the year.

TABLE X.

City of London ...	16.55	1.0993	20.22	22.22	1,511

In the separate sub-districts of the Borough the corrected death-rate was 8·89 in Streatham, 10·28 in Putney, 10·84 in Wandsworth, 11·01 in Clapham, and 12·60 in Tooting.

The rates for Clapham, Putney, Tooting and Wandsworth were higher than in 1908, while that for Streatham was lower. The increase in the rate for the whole Borough was very small, being only ·13 per 1,000, and was due to the great mortality in the first quarter of the year from Diseases of the Respiratory Organs caused by the severe climatic conditions.

The rates in this Table do not agree with the rates in Table XI, as the rates in the latter Table are calculated on the total population without deducting the population of non-parishioners in Public Institutions in the Borough.

The first Chart shows the death-rate in the Borough for each fortnight compared with the average for the quinquennial 1904-1908.

The Chart shows that only on four occasions was the fortnightly rate above the rate for the five years 1904-1908, viz. :—on the fortnight ending the 27th February, the fortnights ending the 13th and 27th March, and the fortnight ending the 10th April. In all the other months of the year the rate was below the average, and this was specially the case in July, August and September. The highest rate, 19·58, occurred in the fortnight ending the 13th March, while the lowest rate, viz. :—7·24, occurred in the fortnight ending the 31st July.

The next Chart shows the annual death-rate per 1,000 during each week of the year for the whole of London, and for each fortnight for the Borough of Wandsworth.

During the whole year the rate for this Borough was considerably under the rate for the whole of London. The highest rate in London was in the second and third week of March, and the lowest in the fourth week of July. The rates both in the Borough and in London only increased slightly in the months of August and September as the mortality from Diarrhœa again was less severe.

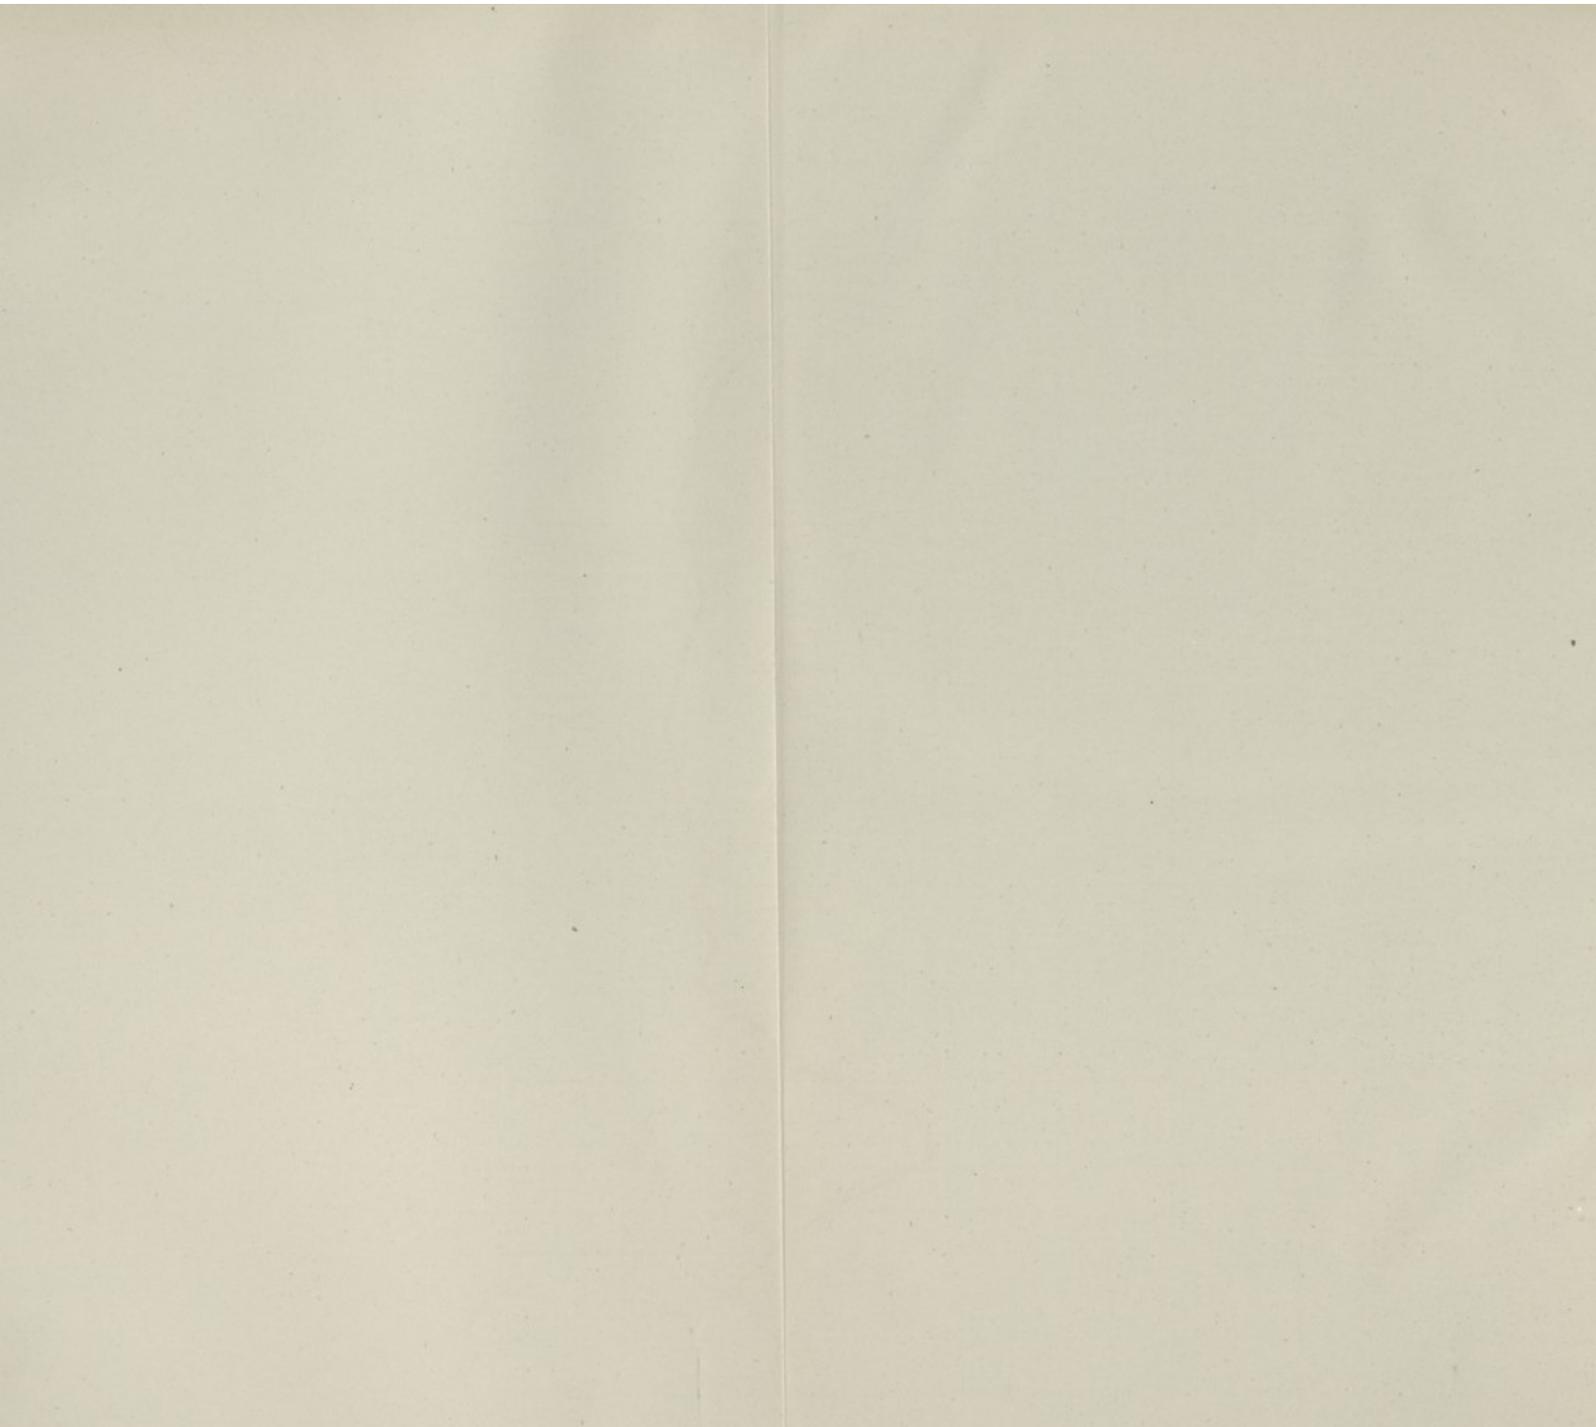

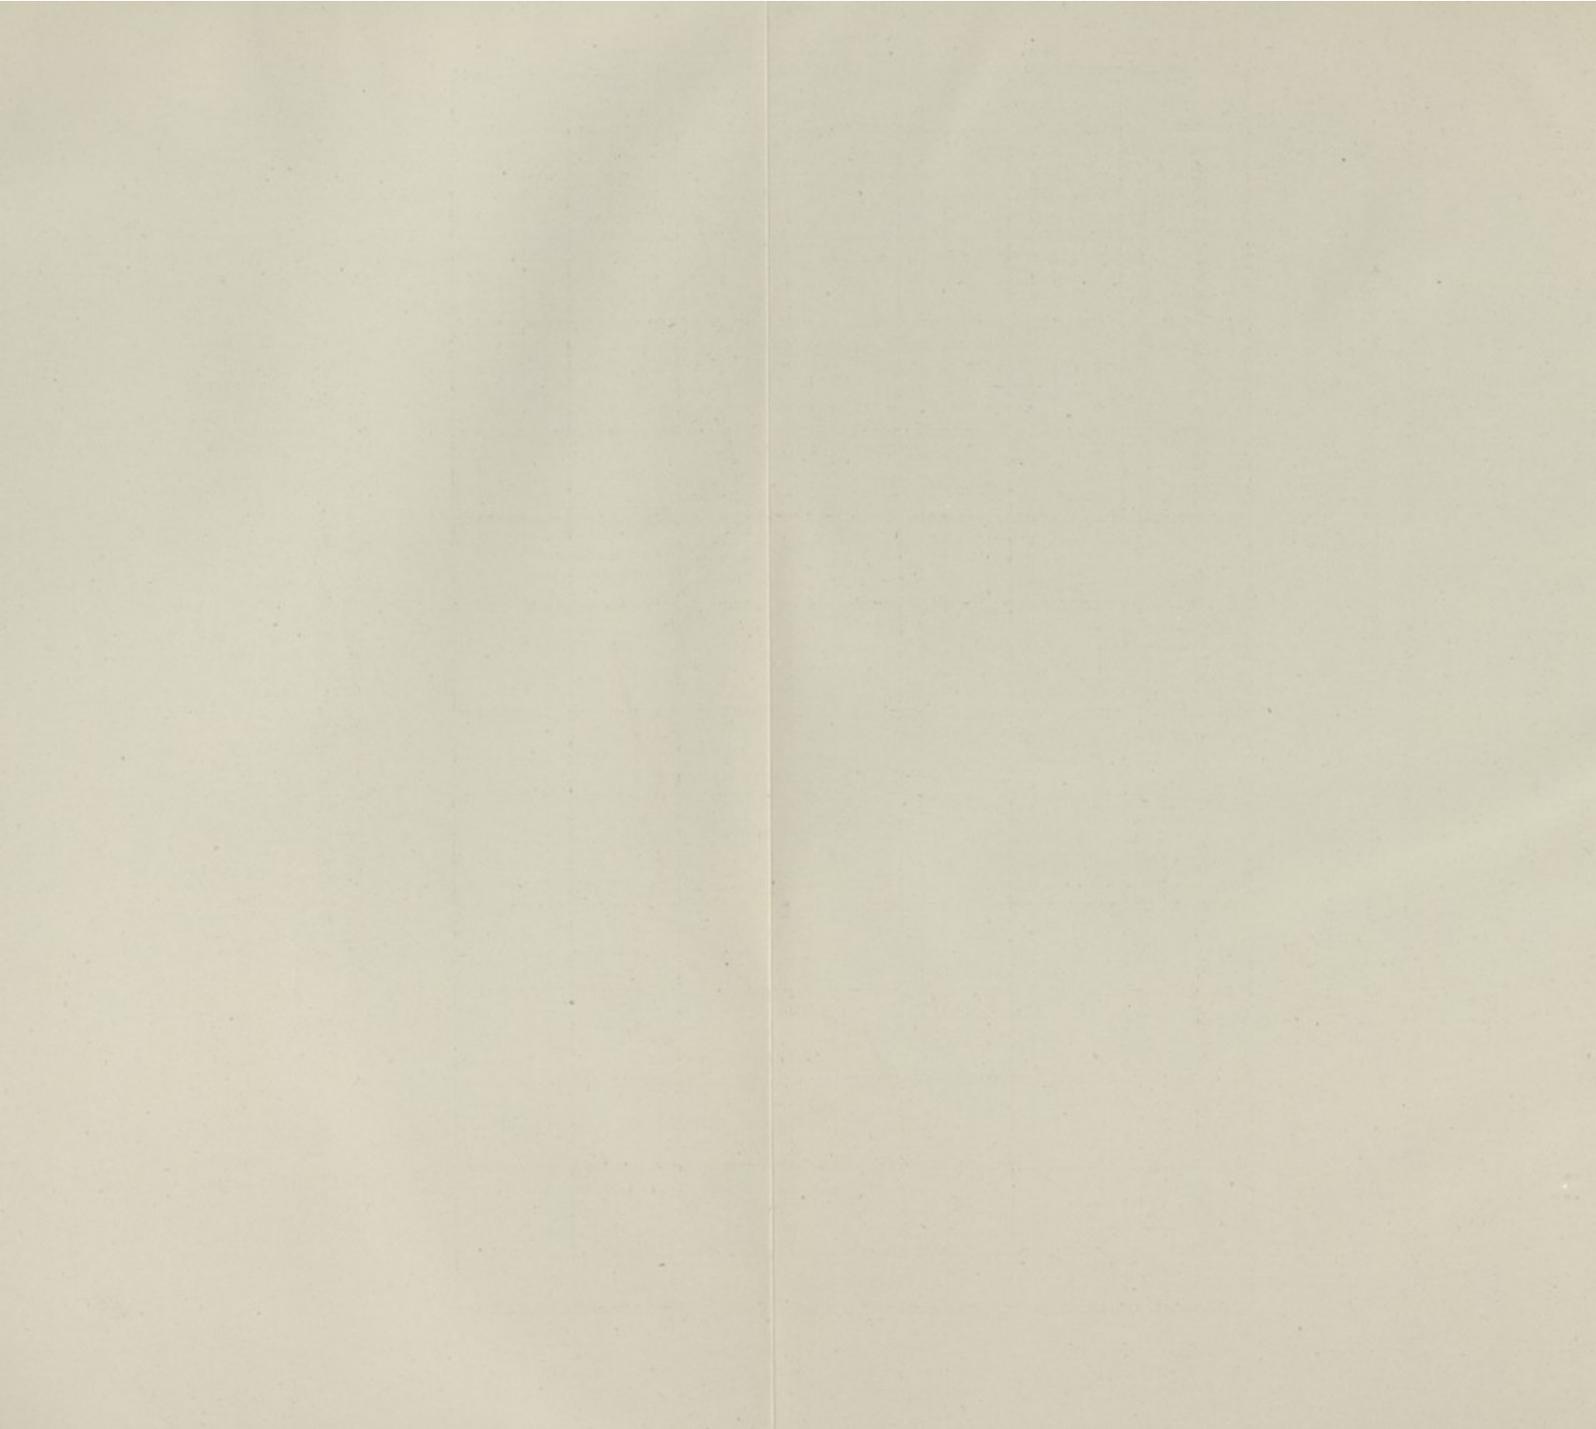

CHART *Showing the Annual Death-rate during each week of the year 1909 for the whole of London, and the Annual Death-rate for each fortnight for the Metropolitan Borough of Wandsworth.*

*Death-rate for London shown in Black.
Death-rate for Wandsworth shown in Red.*

The high rate in London in March was due to the very great mortality from diseases of the Respiratory Organs and Influenza.

The four Tables which follow are inserted by order of the Local Government Board.

Table I. shows the births, birth-rate, deaths, and death-rate per 1,000 for the whole Borough for the year, and the 10 preceding years; the total deaths of children under one year of age is also given, and the rate per 1,000 births registered.

In this Table column five gives the corrected number of deaths under one year, as the uncorrected number, viz. :—512, would not give the true rate of infantile mortality.

Table II. shows the population, the number of births and deaths registered, and the number of deaths under one year of age, for the whole Borough, as well as for the various sub-districts. It also shows these for each year since 1899, and is to a large extent a complete history of the mortality of the Borough for the last 10 years.

Table III. shows the number of cases of infectious disease notified during the year at all ages and at certain age periods in the Borough and in the several sub-districts, and also shows the number of cases removed from each sub-district to hospital.

Table IV. is the General Mortality Table for the whole Borough, showing the number of deaths at all ages, arranged as to cause of death. This also shows the total number of deaths in each sub-district, and the number of deaths in Public Institutions in the district, both of residents and non-residents.

TABLE XI.

WANDSWORTH DISTRICT.

Vital Statistics of whole District during 1909 and previous years.

*Rates in Columns 4, 8, and 13 calculated per 1,000 of estimated population.

NOTE. The deaths to be included in Column 7 of this table are the whole of those registered during the year as having actually occurred within the district or division. The deaths to be included in Column 12 are the number in Column 7, corrected by the subtraction of the number in Column 10 and the addition of the number in Column 11. By the term "Non-residents" is meant persons brought into the district on account of sickness or infirmity, and dying in public institutions there; and by the term "Residents" is meant persons who have been taken out of the district on account of sickness or infirmity and have died in public institutions elsewhere. The "Public institutions" to be taken into account for the purposes of these tables are those into which persons are habitually received on account of sickness or infirmity, such as hospitals, workhouses and lunatic asylums.

Area of district in acres (exclusive of area covered by water), 9,126½.

Total population at all ages	232,034	} At Census of 1901.
Number of inhabited houses	37,764	
Average number of persons per house	6'1

Ages at Death.

The following Table shows the percentage of deaths to total deaths at six age periods for each sub-district and for the whole Borough.

TABLE XVI.

Sub-Districts.	Under 1 year.	1 to 5 years.	5 to 15 years.	15 to 25 years.	25 to 65 years.	65 years and upwards
Clapham	14.72	9.33	2.76	3.28	36.27	33.64
Putney	13.27	9.88	4.01	3.70	35.50	33.64
Streatham	13.94	6.39	3.67	4.51	34.48	37.01
Tooting	24.75	14.85	5.44	2.97	32.18	19.81
Wandsworth	19.78	11.05	4.00	4.18	33.98	27.01
Whole Borough ...	17.07	9.74	3.81	3.89	34.55	30.94

Compared with 1908 the percentage of deaths under one year was as much as 4.24 lower, due chiefly to the decrease in the number of deaths of infants from Diarrhœa and Zymotic Enteritis; from one to five years .28 higher, due to the increase in the number of deaths from Measles and diseases of the Respiratory Organs; from five to 15 years 1.09 higher; from 15 to 25 years .02 higher; from 25 to 65 years .54 lower; and from 65 years and upwards 2.39 higher.

There was a considerable diversity in these rates in the different sub-districts.

In Putney the rate under one year was only 13.27, while in Tooting it was 24.75, while over 65 years of age Tooting had a rate of 19.81 and Streatham of 37.01.

Again, at from one to five years the rate was still high in Tooting and low in Streatham, and also at ages five to 15, while at ages 15 to 25, 25 to 65, and over 65 the Tooting rates were much lower and were the lowest of the five sub-districts.

These differences are due to the different age and sex constitution of the separate sub-districts, as well as to the differences in social conditions.

Infantile Mortality.

The total number of deaths of infants under one year was 601, compared with 720 in 1908, 715 in 1907, 874 in 1906, 818 in 1905, 851 in 1904, and 743 in 1903.

Of these, 112 occurred in Clapham, 43 in Putney, 133 in Streatham, 100 in Tooting, and 213 in Wandsworth.

The infantile mortality, or deaths under one year to 1,000 births was 86, compared with 98 in 1908, 101 in 1907, 125 in 1906, 118 in 1905, 123 in 1904, and 110 in 1903.

This rate was 83 in Clapham, compared with 98 in 1908 and 119 the decennial average; 86 in Putney, compared with 97 and 122; 73 in Streatham, compared with 80 and 108; 98 in Tooting, compared with 122 and 152; and 89 in Wandsworth, compared with 101 and 126.

In the whole Borough the rate was no less than 12 per 1,000 births under that for 1908, and 36 under the decennial average.

The rate in 1909 was much lower than any rate ever recorded, and in each sub-district it shows a marked diminution as compared with the decennial average, in Tooting showing a difference of 54, in Wandsworth of 37, in Clapham and Putney 36, and in Streatham 35 per 1,000, compared with that average.

The following Table shows the number of deaths, the percentage to total deaths, the rate per 1,000 births for the year and for the three previous years for each sub-district and for the whole Borough.

TABLE XVII.

Sub-District.	No. of Deaths under one year.	Percentage to total Deaths.	Rate per 1,000 Births.			
			1906	1907	1908	1909
Clapham	112	14.71	111	90	98	83
Putney	43	13.27	128	109	97	86
Streatham... ..	133	13.94	113	88	81	73
Tooting	100	24.75	146	148	122	98
Wandsworth	213	19.77	131	97	101	89
Whole Borough ...	601	17.07	125	101	98	86

Table XVIII. shows this mortality for the 10 years 1899-1908 in each of the sub-districts and in the whole Borough, and the decennial average, compared with the present year.

TABLE XVIII.

Average...	119	122	108	152	126	122
1909	83	86	73	98	89	86

The Tables which follow are inserted at the request of the Local Government Board and show in detail the deaths of infants under one year, arranged in monthly age periods and from certain diseases.

Table XIX. shows the deaths in the whole Borough and the six following Tables the deaths in each registration sub-district.

The total number of births was 6,985, of which 6,810 were legitimate and 175 illegitimate, and the total deaths 601.

From the notifiable infectious diseases there was only one death, from Diphtheria, the death occurring in the Southfield sub-district.

From Measles there were 21 deaths, from Whooping Cough 26, from Diarrhœal diseases 92, from Wasting diseases 246, from Tuberculous diseases 17, from diseases of the Respiratory Organs 115, from Convulsions 29, from simple Meningitis seven, from Suffocation, overlying, seven, from Syphilis six, and from all other causes 34.

Compared with 1908 there has been a decrease in the number of deaths from the notifiable diseases, from Diarrhœal diseases, from diseases of the Respiratory Organs, from Wasting diseases, and an increase in the number of deaths from Measles and Whooping Cough.

In all the deaths with four exceptions, one in Putney, two in Streatham, and one in Southfield, the cause of death was certified by a medical man, or by a coroner after inquest.

37·4 per cent. of the deaths occurred in the first month, compared with 32·9 in 1908, and 33·7 in 1907, the increase being almost wholly due to the increase in the number of deaths from Wasting Diseases; 54·4 per cent. in the first three months, compared with 55·1 in 1908, and 53 in 1907; and 73 per cent. in the first six months, compared with 77·3 and 73.

The Table also shows that 246, or 40·9 per cent. of the deaths occurred from Wasting diseases, and of these 181, or 73·5 per

cent. occurred under one month, an increase of 11·1 per cent. compared with 1908.

Of the total deaths under one month, viz. :—225, 181 or 80·4 per cent. occurred from Wasting diseases, compared with 77 per cent. in 1908, and 74 per cent. in 1907.

From Diarrhœal diseases only two deaths occurred under one month. The greatest mortality from these diseases occurred at one to two months, two to three months, and three to four months.

From Tubercular diseases 17 deaths occurred, compared with 26 in 1908, 19 in 1907, 42 in 1906, and 34 in 1905; and from diseases of the Respiratory Organs 115, compared with 134, 158, 112, and 136.

Seven deaths were registered as due to Meningitis, but enquiries of the medical attendant showed that all these were due to Posterior-basic Meningitis.

Table XXVI. shows approximately the proportion of deaths per 1,000 births for each week under one month, and for each month up to 12 months from five groups of diseases.

Compared with 1908 the rate from common infectious diseases is higher, due to the increase in the number of deaths from Measles and Whooping Cough. There has, however, been a very large reduction in the rate from Diarrhœal diseases, the rate having been only 13·15, compared with 20·72.

From Wasting diseases, Tuberculous diseases and other causes there has also been a slight decrease compared with 1908.

Compared with the rate for England and Wales for 1908, the rate for the common infectious diseases was 7·41 per 1,000 in England and Wales and 7·07 in Wandsworth, from Diarrhœal diseases 19·90 in England and Wales and 13·15 in Wandsworth, from Wasting diseases 42·37 in England and Wales and 35·18 in Wandsworth, from Tuberculous diseases 4·65 in England and Wales and 2·43 in Wandsworth, and from other causes 46·10 in England and Wales and 28·17 in Wandsworth. The total rate per 1,000 births was 120 in England and Wales and in Wandsworth 98 for 1908, while the rate in Wandsworth for 1909 was only 86, by far the lowest rate ever recorded.

Compared with the rate in England and Wales for the five years 1903-1907 the rate in this Borough was, from the common infectious diseases 1·21 lower, from Diarrhœal diseases 9·42 lower, from Wasting diseases 8·65 lower, from Tuberculous diseases 2·93 lower, from other causes 22·9 lower, and from all causes 45·11 per 1,000 births lower.

The rate for 1909 compares more favourably even than in 1908 with the rate for England and Wales for the five years 1903-1907.

In the Table it will also be seen that the rate from the common infectious diseases was highest at 10 to 11 months, from Diarrhœal diseases at three to four months, from Wasting diseases under one month, from Tuberculous diseases at five to six and 11 to 12 months, and from other causes at one to two months.

From all causes the rate was highest under one week and lowest at 11 to 12 months.

Table XXVII. shows the infantile mortality per 1,000 births from all causes and from certain causes for the whole Borough and for each sub-district.

From Premature Birth the rate was lowest in Tooting and highest in Clapham, from Developmental diseases highest in Putney and lowest in Streatham, from Diarrhœal diseases highest in Tooting and lowest in Putney, from Measles and Whooping Cough highest in Wandsworth and lowest in Tooting, from Respiratory diseases highest in Tooting and lowest in Putney, from Tubercular diseases highest in Streatham and lowest in Clapham, and from other causes highest in Putney and lowest in Clapham.

An examination of all the Tables dealing with infantile mortality and especially with Table XVIII., which gives the rates for the year and for the decennium 1899-1908, shows that in no year has this mortality been so low. In Tooting, which had during the decennium a rate of 152 per 1,000, the rate was only 98 in 1909, and this is lower than the rate in any of the other sub-districts during that decennium.

To put this in another way: if the rate during the year 1909 had been equal to the rate in the previous decennium then the number of deaths would have been 852, or 251 more.

This enormous saving of infant life has been the result of various agencies which have been at work in the Borough.

First the climatic conditions were unfavourable for the production of Diarrhœa and other digestive troubles in infants. The temperature remained low till the first fortnight in August, and there was more than the average amount of rain and less than the average amount of sunshine. This weather was inimical to fly life, and in every part of the Borough it was noticed that the number of house-flies was less than usual.

In the second place the reduction was caused by the better sanitary condition of yards in rear of houses, and the greater attention paid to the removal of deposits from these yards, as well as to the improvement in dust-bin arrangements and the removal of house refuse.

Last but not least a considerable amount of the reduction has been due to the work of the female inspectors, the educational value of whose visits cannot be over estimated.

Some of the results of their work is shown later on in this Report, but it is impossible to give statistics of the educational value of the work which I am satisfied has been very great.

TABLE XXVII.

Infantile Mortality per 1,000 Births from all causes, and from certain causes, for each sub-district and for the whole Borough.

Sub-Districts.	Premature Birth.	Developmental Diseases.	Diarrhoea.	Measles and Whooping Cough.	Notifiable Diseases.	Respiratory Diseases.	Tubercular Diseases.	Accidental.	Other causes.	Total.

ZYMOTIC DISEASES.

The next Table shows the number of deaths from these diseases during the year and for the 10 previous years. This Table is corrected for Institutions, as a large number of deaths registered in the Borough occurred in the Fountain and Grove Fever Hospitals, and belong to other Metropolitan Boroughs. The number above or below the corrected decennial average is also shown.

TABLE XXVIII.

Totals ...	549	471	426	535	434	511	451	530	430	377	398	200.6

The total number of deaths from these diseases was 398, 85 in Clapham, 27 in Putney, 94 in Streatham, 60 in Tooting, and 132 in Wandsworth, an increase of 21 compared with 1908, but a decrease of 200 compared with the corrected decennial average.

Compared with 1908 there has been an increase in the number of deaths from Puerperal Fever, Erysipelas, Measles, Whooping Cough, Influenza, and other Septic diseases, and a decrease in the number of deaths from Scarlet Fever, Diphtheria, Enteric Fever, Continued Fever, and Diarrhoea.

Compared with the corrected decennial average there has been an increase in the number of deaths from other Continued Fevers, Puerperal Fever, Measles, and other Septic diseases, and a decrease in Scarlet Fever, Diphtheria, Enteric Fever, Erysipelas, Whooping Cough, Influenza, and Diarrhœa.

From all Zymotic diseases the death-rate was 1·47 per 1,000 (1·23 in Clapham, ·85 in Putney, ·87 in Streatham, 1·87 in Tooting, and 1·33 in Wandsworth), compared with 1·14 in 1908, 1·34 in 1907, 1·70 in 1906, 1·57 in 1905, 1·93 in 1904, and 1·80 the decennial average.

The rate from the principal Zymotic diseases, viz. :—Small-pox, Measles, Scarlet Fever, Whooping Cough, Diphtheria, Enteric Fever, and Diarrhœa, was ·81 per 1,000 (·88 in Clapham, ·47 in Putney, ·48 in Streatham, 1·43 in Tooting, and 1·02 in Wandsworth), compared with ·82 in 1908, ·97 in 1907, 1·36 in 1906, 1·30 in 1905, 1·60 in 1904.

The rate in London was 1·30 per 1,000, compared with 1·37 in 1908, 1·37 in 1907, 1·94 in 1906, 1·68 in 1905, and 2·14 in 1904.

The rate for England and Wales was 1·12, compared with 1·29 in 1908; in the 76 Great Towns 1·42, compared with 1·59; in the 143 Smaller Towns 1·08, compared with 1·26; and in Rural England and Wales ·80, compared with ·99.

In out-lying Institutions 96 deaths occurred from Zymotic diseases (21 belonging to Clapham, four to Putney, 16 to Streatham, 13 to Tooting, and 42 to Wandsworth), compared with 54 in 1908, 48 in 1907, 52 in 1906, 67 in 1905, and 58 in 1904.

Of these deaths 68 occurred in Workhouse Infirmaries, 27 from Measles, three from Influenza, 24 from Whooping Cough, three from Diarrhœa, four from Erysipelas, four from Puerperal Fever, and three from other Septic diseases; 12 in General and Special Hospitals, two from Influenza, three from Diphtheria, one from Diarrhœa, one from Enteric Fever, one from Puerperal Fever, and four from other Septic diseases; six in Public Lunatic Asylums, two from Diarrhœa and four from Influenza; and 10 in

the Hospitals of the Metropolitan Asylums Board, one from Scarlet Fever, three from Diphtheria, two from Enteric Fever, and four from Diarrhœa.

In Institutions in the Borough 57 deaths from Zymotic diseases occurred of persons not belonging thereto, compared with 82 in 1908, 106 in 1907, 90 in 1906, and 89 in 1905. The decrease in 1909 is due to the decrease in the number of deaths from Scarlet Fever.

Of these deaths 46 occurred in the hospitals of the Metropolitan Asylums Board at Tooting, 18 from Scarlet Fever, and 28 from Diphtheria.

Six deaths from Measles occurred in the Workhouse, two deaths from Influenza in the Middlesex County Asylum, one from Erysipelas in the Tooting Bec Asylum, and one from other Septic diseases in the Hostel of God.

In Institutions in the Borough 46 deaths from Zymotic diseases occurred of persons belonging thereto, 33 in the Fever Hospitals at Tooting, two from Measles, 12 from Scarlet Fever, and 19 from Diphtheria; 10 from Measles in the Workhouse; and two from Whooping Cough and one from Enteric Fever in Nursing Homes.

Compared with 1908, this shows a decrease of five deaths from Scarlet Fever, and of five deaths from Diphtheria.

The next Table shows the death-rates from these diseases for the whole Borough and for each sub-district for the year 1909, as well as for the preceding 10 years, and the rates above or below the decennial average are also shown.

TABLE XXIX.

Sub-Districts.	1899	1900	1901	1902	1903	1904	1905	1906	1907	1908	1909	1909	
												Rate above decennial average.	Rate below decennial average.
Clapham ...	3·33	1·85	2·09	2·15	1·66	1·86	1·35	1·54	1·06	1·09	1·23	...	·56
Putney ...	1·65	1·95	1·02	1·75	1·69	1·48	1·69	1·49	1·13	·94	·15	...	·62
Streatham ...	2·29	1·7	1·14	1·76	1·38	1·33	1·10	1·31	·93	1·03	·87	...	·52
Tooting ...	2·17	2·84	3·38	2·58	2·07	2·50	2·81	3·04	2·99	1·69	1·87	...	·73
Wandsworth.	2·73	2·25	2·20	2·64	2·09	2·63	1·87	1·89	1·50	1·17	1·33	...	·75
Borough...	2·55	2·10	1·81	2·18	1·72	1·93	1·57	1·70	1·34	1·14	1·17	...	·63

The death-rate from Zymotic diseases as shown in the above Table was '03 above that for 1908, but '63 under the decennial average.

The rate was lowest in Putney and highest in Tooting, while, compared with the decennial average, Wandsworth shows the greatest reduction and Tooting the next.

There has been a slight increase in this rate in Clapham, Tooting and Wandsworth, but a decrease in Putney and Streatham, compared with the year 1908, but in all the sub-districts there was a very decided reduction in this mortality compared with the decennial average.

Notification of Infectious Diseases.

The total number of cases of infectious diseases notified during the year is shown on Table III. of the Local Government Board's Tables.

The number of notifications of cases received in this Borough for the year and for the previous 10 years is shown in the following Table, as also the number above or below the corrected decennial average.

TABLE XXX.

The following Table shows the total number of cases of infectious diseases notified during the year, the number removed to hospital, the number that died in hospital and at home, as well as the total number of deaths:—

TABLE XXXI.

Cases of Infectious Diseases notified.

DISEASE.	No. cases notified.	No. patients removed to Hospital.	No. died in Hospital.	No. died at Home.	Total deaths in Hospital and at Home.
Small-pox
Scarlatina	987	810	13	1	14
Erysipelas	192	45	4	4	8
Diphtheria	380	314	23	6	29
Membranous Croup					
Enteric Fever... ..	66	47	4	2	6
Continued Fever	2
Puerperal Fever	26	18	5	5	10
Cerebro-spinal Meningitis	4	1
Total	1,657	1,235	49	18	67

No cases of Small-pox were notified during the year, none in 1906, 1907, or 1908, one in 1905, six in 1904, 28 in 1903, and 127 in 1902.

987 cases of Scarlet Fever were notified, compared with 1,232 in 1908, and 1,330 in 1907; of Diphtheria 380, compared with 581 and 629; of Enteric Fever 66, compared with 60 and 70; of Puerperal Fever 26, compared with 14 and 25; and of Erysipelas 192, compared with 203.

Compared with 1908 there has been a decrease in the number of cases of all the notifiable diseases with the exception of Puerperal Fever.

Compared with the corrected decennial average there has been a decrease in the number of cases of all the notifiable diseases with the exception of Puerperal Fever, which shows a decided increase.

The total number of cases notified was 1,657 (322 in Clapham, 86 in Putney, 533 in Streatham, 248 in Tooting, and 468 in Wandsworth), compared with 2,095 in 1908, 2,270 in 1907, 2,030 in 1906, 2,211 in 1905, and 1,540 in 1904.

The total number of cases notified per 1,000 persons living was 4·8, compared with 6·97 in 1908, 6·97 in 1907, 6·42 in 1906, and 7·5 in 1905.

The rates in the sub-districts were as follows:—In Clapham 4·68, compared with 5·50 in 1908, 5·34 in 1907, 5·36 in 1906, and 6·2 in 1905; Putney 2·72, compared with 3·85, 5·57, 3·3, and 3·2; Streatham 4·94, compared with 4·36, 6·00, 5·3, and 5·4; Tooting 7·22, compared with 10·83, 15·45, 10·2, and 10·5; and Wandsworth 4·55, compared with 7·89, 6·77, 7·4, and 11·3.

In the County of London this rate was 6·12, compared with 7·50 in 1908, 8·72 in 1907, 7·5 in 1906, and 7·0 in 1905.

In Public Institutions within the Borough two cases of Diphtheria and one of Erysipelas were notified from the Workhouse; one case of Erysipelas from the Middlesex County Asylum; 31 cases of Scarlet Fever and 16 of Diphtheria from the Grove Fever Hospital; one case of Diphtheria from the Intermediate Schools; seven cases of Scarlet Fever, one of Diphtheria, and two of Erysipelas from Tooting Bec Asylum; one case of Erysipelas from the Tooting Home; and two cases of Scarlet Fever from Dr. Barnardo's Home.

There has been a decided decrease in the number of these notifications compared with 1908, due to the fact that no cases of Diphtheria were notified from the Union Infirmary. There was,

however, an increase in the number of cases of Puerperal Fever notified from that Institution.

In 1908 the total number of notifications received from outside Institutions was 170, in 1907, 55, and in 1906, 92.

Vaccination.

Table XXXIII. is taken from the official returns of the Vaccination Officers to the Board of Guardians for the year 1908. It shows the number of children successfully vaccinated for the whole Borough, as well as for the separate sub-districts. Streatham, Balham and Tooting are included under the heading of Streatham.

TABLE XXXIII.

SUB-DISTRICTS.	Number of Births returned from 1st January to 31st of December, 1908.	Successfully Vaccinated.	Insusceptible of Vaccination.	Had Small pox.	Dead, Unvaccinated.	Certificates of Conscientious objection.	Postponed by Medical Certificate.	Removed to District, Vaccination Officer of which has been duly apprised.	Removed to places unknown, or which cannot be traced; and cases not having been found.	Remaining on Books as Unvaccinated.
Clapham	1,322	686	3	...	76	125	23	41	260	108
Putney ...	532	452	2	...	28	38	...	3	7	2
Streatham	2,879	1,571	12	...	199	248	287	138	235	189
Wandsw'th	2,469	1,708	8	...	178	170	66	52	242	45
TOTALS ...	7,302	4,417	25	...	481	581	376	234	744	344

During the year 1908, of 7,202 children whose births were registered, 4,417 or 61·3 per cent. were successfully vaccinated, compared with 66·5 per cent. in 1907, 71·05 per cent. in 1906, 74·6 per cent. in 1905, 73·5 per cent. in 1904, and 73·7 per cent. in 1903. This is a decided decrease compared with the five previous years.

The next Table shows the percentage of children vaccinated to total births registered in the Borough, and in the vaccination sub-districts for the year 1908, as well as for the 10 years 1898-1907. The average for the 10 years is also shown on this Table.

Compared with 1907 there has been a decrease in the percentage of successfully vaccinated in all the sub-districts with the exception of Putney. The greatest decrease occurred in Streatham, next in Clapham, and the smallest in Wandsworth, while in the whole Borough there has been a decrease of 8·8 per cent., or nearly double the decrease in 1907.

Compared with the decennial average there has been a considerable increase in Putney, but a decrease in all the other sub-districts.

481 infants died unvaccinated, a percentage of 6·7, compared with 6·6 in 1907, 8·1 in 1906, 8·4 in 1905, and 8·6 in 1904.

Of the 2,304 infants remaining, 25 or '34 per cent. were stated to have been insusceptible to vaccination; 581 or 8·0 per cent. in respect of whom certificates of conscientious objection were received; 376 or 5·2 per cent. had vaccination postponed by medical certificate, leaving 978 or 13·6 per cent. as removed, not to be traced, or otherwise unaccounted for; while 344 or 4·8 per cent. remained on the books as unvaccinated, compared with 13·4 per cent. as removed, etc., in 1907, 10·1 in 1906, and 7·7 in 1905; and 4·4 remaining as unvaccinated in 1907, 3·1 in 1906, and 3·1 in 1905.

There has been an increase of '2 in the percentage of cases removed, and of 3·9 per cent. in the number of certificates of conscientious objections received.

If the total number of infants who died unvaccinated be deducted from the total number of births registered, then of 6,721 the remaining infants, 65·7 per cent. were successfully vaccinated, compared with 71·2 in 1907, 78·1 in 1906, 81·5 in 1905, and 80·5 in 1904; '37 were insusceptible, compared with '41, '23, '3 and '48; 5·6 per cent. were under certificate of postponement, compared

with 4·8, 5·1, 4·2 and 3·4; 8·6 per cent. in regard to whom certificates of conscientious objection had been obtained, compared with 4·4, 2·8, 2·2 and 2·1; leaving 19·7 per cent. unaccounted for as regards vaccination, compared with 19·1, 14·5, 11·8 and 13·1.

TABLE XXXIV

SUB-DISTRICTS.	1898	1899	1900	1901	1902	1903	1904	1905	1906	1907	Average for Ten Years.	1908
Clapham ...	51·1	57·7	62·5	62·8	63·7	68·2	62·9	68·8	59·9	55·1	61·2	51·9
Putney ...	64·3	72·0	71·0	75·7	84·4	86·5	83·4	88·1	86·7	83·6	79·5	85·0
Streatham ...	61·6	61·0	63·7	68·7	65·2	66·9	69·2	69·7	66·9	62·3	65·5	54·5
Wandsworth ...	68·5	76·0	74·0	78·6	82·3	81·7	82·8	80·9	78·7	74·5	77·7	69·1
Borough ...	62·0	68·1	67·8	71·4	72·4	73·7	73·5	74·6	71·05	66·5	70·1	61·3

The returns for the year 1908 again show a large falling off as regards successful vaccination, and with the exception of the sub-district of Putney, and to a less extent in Wandsworth, the record of the number of unvaccinated children in the Borough is by no means a satisfactory one.

Fortunately during the year Small-pox has been almost absent from London, but if the number of unprotected increases as rapidly as it has been doing during the last three years, imported cases, which will in the course of time be introduced, will have a greater number of unprotected to infect, resulting in serious loss to the community both financially and otherwise.

The percentage of children not finally accounted for, including cases postponed, to total births during the last 10 years was as follows for this Borough, for the Metropolis and for the rest of England.

	1899	1900	1901	1902	1903	1904	1905	1906	1907	1908
Wandsworth ...	17.7	15.6	15.0	15.7	15.9	15.3	14.6	18.0	22.4	23.4
Metropolis ...	27.7	25.8	24.1	21.3	20.7	19.1	18.9	21.2	22.7	...
Rest of England ...	15.4	13.9	11.2	10.0	9.1	8.7	8.6	9.5	10.3	...

The above Table shows that in Wandsworth this percentage is higher than it has been for the last 10 years.

The above percentages do not include those children with respect to which conscientious objection certificates were received, and if this be added it makes the percentage of unvaccinated children in the Borough 31.4, a very large increase compared with former years.

Scarlet Fever.

987 cases of Scarlet Fever were notified during the year, compared with 1,232 in 1908, 1,330 in 1907, 1,069 in 1906, and 1,494 in 1905.

189 of these were in Clapham, 39 in Putney, 360 in Streatham, 126 in Tooting, and 273 in Wandsworth.

810 or 82 per cent. of these cases were removed to the hospital where 13 died, and 177 or 18 per cent. were treated at home with one death.

The total number of deaths was 14, of which four were in Clapham, none in Putney, five in Streatham, two in Tooting, and three in Wandsworth.

The percentage of cases removed to hospital, viz.: 82, is lower than in 1908, which was the highest recorded. In 1907, 84.8 per cent. were removed; in 1906, 83.8; in 1905, 84.1; in 1904, 81.6; in 1903, 78.1; in 1902, 75; and in 1901, 70.6 per cent.

The case mortality was 1·42 per cent., compared with 1·7 in 1908, 1·65 in 1907, 1·78 in 1906, 1·87 in 1905, and 1·74 in 1904.

The mortality among cases removed to hospital was 1·6 per cent., compared with 1·77 in 1908, and among those treated at home ·57, compared with 1·25 in 1908. The mortality among the home treated cases is much lower than among those cases treated in hospital, while in 1908 the rates were respectively 1·77 and 1·25.

The proportion of cases notified per 1,000 of population was 2·88, compared with 3·67 in 1908, 4·08 in 1907, 3·4 in 1906, 5·1 in 1905, and 2·8 in 1904, and in the County of London 3·56, compared with 4·60, 5·53, 4·3, 4·1, and 2·89.

The proportion of cases notified was thus ·68 per 1,000 lower in this Borough than for the whole of London, while in 1908 it was ·93 per 1,000 lower.

The following Table shows the rate of notified cases per 1,000 persons living for each sub-district and for the whole Borough for the year and the three previous years, as well as the corresponding rates for the whole of London.

TABLE XXXV.

SUB-DISTRICTS.	1906	1907	1908	1909
Clapham	2·7	3·04	3·40	2·75
Putney	1·1	2·72	2·13	1·23
Streatham	2·6	3·83	2·62	3·34
Tooting	7·9	9·80	6·52	3·68
Wandsworth	3·7	3·56	4·45	2·66
Whole Borough ...	3·4	4·08	3·67	2·88
London	4·3	5·53	4·60	3·56

Streatham was the only sub-district in which the rate was higher than in 1908, and it will be noted that a great reduction occurred in Tooting and Wandsworth.

In Clapham the greatest number of cases was notified in May, and the smallest in February and August.

There was again a decrease in the number of cases in Putney in 1909, compared with 1908, 39 cases having been notified, compared with 66. The greatest number was notified in July, viz.; nine, while no cases were notified in November.

In Streatham the total number of cases was 90 more than in 1908. The maximum number of cases was notified in January and the minimum in August.

In Tooting, although the number of cases notified per 1,000 of population is still high, yet compared with the previous year there has been a marked reduction. In 1907, 318 cases were notified, 47 of these occurring in Institutions, in 1908, 218, 21 in Institutions; and in 1909 only 126, 38 of which were in Institutions, were notified.

In this sub-district the rate of notified cases per 1,000 of population was 3.68, compared with 6.52 in 1908, and if the cases in Institutions are deducted, 2.74, compared with 6.3.

The maximum number of cases in Tooting occurred in February, and the minimum in September.

In Wandsworth there was a large reduction in the number of cases notified, the rate per 1,000 having fallen from 4.45 to 2.66, and it is also lower than the rates in 1906 and 1907.

The maximum number of cases occurred in February, and the minimum in December.

In the Borough the maximum number of cases was notified in January, and the minimum in August.

The following Table shows the number of cases notified in each sub-district during each month of the year 1909, and for the whole year.

TABLE XXXVI.

SUB-DISTRICTS.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Whole Year.

Whole Borough	117	91	80	88	77	105	111	46	73	66	64	69	987

There was one slight outbreak in the Borough due to specific infection of the milk supply, and the following report was made to the Committee as soon as the cause was detected:—

“ 24th June, 1909.

“I have to report the occurrence of 13 cases of Scarlet Fever in the sub-district of Wandsworth which has been definitely traced to milk supply. The outbreak was very slight, and the measures which were immediately taken had the effect of checking the outbreak as far as this district is concerned.

“On the 17th inst. I received a notification of a case of Scarlet Fever in Quinton Street, and on the 18th five cases were notified in the same neighbourhood. On that day the Inspector, on my instructions, at once investigated the cases notified, and reported to me in the forenoon of that day that all the cases were supplied by one milkman in Garratt Lane. I at once visited the milkman's premises and advised the immediate stopping of the milk supply until more detailed

inquiries could be made. Three notifications were received on the 19th, and four on the 21st. With the exception of two on the 21st, all were supplied by the same purveyor in this district, the two last, however, being supplied by another milkman. Further inquiries showed that both these milkmen derived their supply from the same source. Both premises in this district were satisfactory, but at one of them there were no means of sterilizing the utensils, and I instructed the proprietor to send these utensils to the Disinfecting Station at Tooting, where they were thoroughly sterilized.

“In all the cases the first symptoms of the disease appeared from the 15th to the 18th, but in one case which occurred outside the district supplied by the purveyor, but where the child had visited a house supplied by him and had some milk on the 13th, the first symptoms were stated to have occurred on the 18th, showing that the period of incubation had been five days.

“The medical men in the neighbourhood were at once communicated with and informed of the fact that a certain milk supply was infected.

“I communicated with the London County Council to ascertain if any other districts in London were infected, and I was informed that the City of Westminster and the Borough of Chelsea had reported a number of cases in which the same milk supply was involved. I also ascertained that a number of places in the County of Surrey, whose milk supply was from the same source, were infected, and that in the Borough of Kingston alone over 170 cases had been notified. The Medical Officer of Health of the London County Council informed me that they would at once institute inquiries in the localities from which the milk was sent. These inquiries showed that at the farm some cases of Scarlet Fever had occurred, and that the authorities who were dealing with the outbreak were of opinion that these cases were the cause of the outbreaks which had occurred.

“As the infected supply has now been stopped I am of opinion that so far as this Borough is concerned the outbreak is at an end.

"All the cases have been removed to hospital and the premises disinfected."

In this outbreak upwards of 400 cases occurred in the Boroughs and districts affected, and careful inquiry was made by the Medical Officers of the London County Council, and also of the Surrey County Council, in whose district the farm from which the infected supply was derived, is situated.

As was stated in that report, there are two hypothesis as to the infection of the milk, one that it had been infected from human beings, and the other from some condition of the cow or cows.

The investigation failed to prove the former, but it did not prove the latter, although it showed the probability that a diseased condition of the cow was responsible for the outbreak.

The death-rate was only $\cdot 04$ per 1,000, compared with $\cdot 06$ in 1908, and with $\cdot 08$ for the whole of London.

Scarlet Fever and Schools.

The next Table shows the number of cases of Scarlet Fever for each month of the year among children in attendance at elementary and other schools for each sub-district, also the number for the whole Borough, the number of cases among persons not at school, the number attending schools outside the Borough, as well as the number of cases in which, as far as could be ascertained, the diagnosis of Scarlet Fever was incorrect.

Of the total number of cases, viz. :—987, the diagnosis was incorrect in 52 or 5·2 per cent. ; 510 or 51·7 per cent. were in attendance at schools in the Borough ; 37 or 3·7 per cent. attended schools outside the Borough ; while 388 or 39·3 per cent. did not attend school, being either above or under school age.

The percentage of children attending school was as follows : in Clapham, 116 out of 189, or 61 per cent. were at school ; in

Putney, 12 out of 39, or 31 per cent. ; in Streatham, 201 out of 360, or 55 per cent. ; in Tooting, 50 out of 88, or 57 per cent. ; and in Wandsworth, 131 out of 273, or 48 per cent.

The percentage in Tooting is calculated after deduction of the cases notified from Institutions in that sub-district.

In Clapham the schools chiefly affected were Telferscot Road, Cavendish Road, New Park Road, and St. Andrew's Street. In the latter school cases had occurred in the latter part of the year 1908, the cases in 1909 occurring only during the first six months of the year, and four out of 11 cases occurred in January.

In Telferscot Road School seven cases occurred in April, three of these occurring in one house, and the first of these being possibly the cause of the other two cases.

Of the five cases that occurred in Cavendish Road School, two occurred in one house.

There was no sequence of cases in the other schools in Clapham that call for special notice.

In Putney only 12 cases occurred among children attending school, and in none of these was there definite evidence that infection had been received at school.

In Streatham the schools chiefly affected were Hearnville Road, Eardley Road, Sunnyhill Road, and Welham Road.

In Hearnville Road 40 cases occurred, five in April, six in May, 10 in June, and 11 in July, and, as in that month the number of cases showed no signs of lessening although frequent visits had been made to the school and individual children excluded, I advised that the school should be closed so that not only could the school be thoroughly disinfected and cleansed, but unrecognised cases, which appeared to be present in spite of careful examination, would have time to become non-infective.

The following report was made to the Committee on the matter:—

“July, 1909.

“Since the 26th May there has been a succession of cases of Scarlet Fever among children attending Hearnville Road School, more especially in the Infants' and Girls' Departments, and as from the history of the individual cases it was difficult to explain their causation except on the ground that they were due to an unrecognised case or cases, I communicated with the Education Department of the London County Council and asked that the children in these Departments should be thoroughly examined.

“I visited the school on the 28th June, and, in consultation with one of the Assistant Medical Officers of the Education Department, examined the registers, and on that occasion discovered two cases obviously recovering from Scarlet Fever, in attendance. Lists of children absent were then forwarded to me, and the homes of all visited, with the result that another case was discovered.

“One of the cases excluded on the 28th June, a child in Room “D,” Girls' Department, was in my opinion responsible for a considerable proportion of the cases. This child had suffered since May 13th from the disease, but had not been at school until June 28th, when she was found to be still desquamating. She had, however, been playing with other children in the street, and in this way communicated the disease to others.

“I had several consultations with the London County Council Medical Officer on the matter, and we agreed to allow the School to remain open, as otherwise it would have been impossible for him to ascertain if any unrecognised cases were still in attendance, and it was anticipated that after the exclusion of the two children on the 28th June that no fresh cases would occur. This, however, did not prove to be the case as several cases have since been notified, which could not be traced to the first group, and this in spite of the most careful examination.

"I therefore advised the Medical Office of the Education Department that the school should be closed on Friday the 16th July, so that the whole school could be thoroughly disinfected and cleansed.

"In all 32 cases have been notified, eight from the Infants' Department, 16 from the Girls' Department, and eight from the Boys' Department. In the Boys' Department the majority of the cases were infected out of school, and two of the boys attending had sisters suffering from the disease.

"The cases were of an exceedingly mild type, in fact in the majority of cases it was almost impossible to make a correct diagnosis in the first ten days, and it was not until desquamation had occurred that a definite diagnosis could be arrived at.

"In those cases that I personally examined, the desquamation was quite characteristic, but the history of previous sore throat and feverishness, although obtainable, was not so definite as to impress on the parents the necessity for obtaining medical advice.

"In a considerable number of the cases excluded by the London County Council Medical Officer, there was a history of sore throat, and there is no doubt that some of those cases were of an infectious character. It was also clear that the later desquamation in Scarlet Fever is not so infectious as was at one time supposed, otherwise there would have been a considerable number of cases infected by the attendance of the two children excluded on June 28th.

"The Girls' and Infants' Departments will be thoroughly disinfected this week, and I have been informed that the whole school is to be cleansed and redecorated during the holidays."

In Sunnyhill Road, eight out of a total of 17 cases occurred in April, but five of the cases in that month were in one house.

In Tooting the only school specially infected was Franciscan Road, but here the number of cases was spread all over the year with the exception of the months of June and August.

In Wandsworth, Waldron Road and Southfields Schools had the greatest number of cases, 29 occurring in the former and 20 in the latter, but the cases were, as in Franciscan Road School, Tooting, spread over the year.

The Chart shows the number of cases notified in each week during the year.

The greatest number, viz. :—35, was notified in the third week of January, and the smallest, viz. :—eight, in the first week of September.

There were other two weeks, viz. :—the third week of June and the fourth week of July, when the number of cases notified was over 30, the increase in these weeks having been chiefly due to the cases from Hearnville Road School.

Of the total number of cases notified, viz. :—987, eight or '81 per cent. were under one year, compared with 13 or one per cent. in 1908; 253 or 25'6 per cent. were from one to five years, compared with 318 or 25'8 per cent.; 574 or 58'1 per cent. from five to 15 years, compared with 716 or 58'1 per cent.; 94 or 9'5 per cent. from 15 to 25 years, compared with 110 or nine per cent.; and 38 or 5'9 per cent. from 25 to 65 years, compared with 75 or 6'1 per cent.

Diphtheria.

The number of cases of Diphtheria notified during the year shows a satisfactory decrease compared with 1908, and is also under the average number for the last 10 years.

The following Table shows the number of cases notified, the number of deaths that occurred in the separate sub-districts and in the whole Borough for the years 1899-1908 inclusive, the average for the 10 years, and the number of cases and deaths in 1909.

TABLE XXXVIII.

YEAR.	Clapham.		Putney.		Streatham.		Tooting.		Wandsworth.		Whole Borough.

1907	79	2	65	...	157	8	138	12	190	19	629	41
1908	91	7	39	1	137	11	89	6	225	12	581	37
Average Ten Years 1899 to 1908	106	9	34	4	169	12	64	6	162	16	535	47
1909	67	5	25	...	119	9	61	5	108	10	380	29

The total number of cases notified was 380 (67 in Clapham, 25 in Putney, 119 in Streatham, 61 in Tooting, and 108 in Wandsworth), compared with 581 in 1908, 629 in 1907, and 566 in 1906. This number was 145 under the corrected, and 299 under the uncorrected decennial average.

In all the sub-districts there has been a decrease compared with 1908. In Clapham of 24, in Putney of 14, in Streatham of 18, in Tooting of 28, and in Wandsworth of 117.

The greatest number of cases occurred in Streatham, and the smallest in Putney.

The number of cases notified per 1,000 of population was 1·10, compared with 1·73 in 1908, 1·93 in 1907, and 1·79 in 1906, and in London 1·38, compared with 1·64, 1·65 and 1·70.

314 or 91 per cent. of the cases were removed to hospital where 25 died, and 66 or 9 per cent. were treated at home with four deaths.

The case mortality was 7·6 per cent., compared with 6·3 in 1908, 6·3 in 1907, 8·9 in 1906, 8·9 in 1905, and 10·8 in 1904.

The case mortality for the whole of London for the year 1909 was 9·1 per cent., compared with 9·2 in 1908, 8·89 in 1907, 8·7 in 1906, and 8·5 in 1905.

The case mortality among cases treated in hospital was 7·9 per cent., and among those treated at home 6 per cent. The slight increase in the case mortality may be explained by the fact that during the year no outbreak occurred in which it was necessary to take a large number of swabs, consequently very few cases of Diphtheria were notified on bacteriological diagnosis alone.

The following Table shows the number of cases, the case-rate per 1,000 living, for the year and for the 10 previous years, the number of deaths and the death-rate for the whole Borough, as well as for the separate sub-districts.

TABLE XXXIX.

SUB-DISTRICT.	Cases 1909.	Case-rate per 1,000 living.		Deaths 1909.	Death-rate per 1,000 living.	
		1899- 1908	1909		10 Years	1909
Clapham	67	1·8	·97	5	·15	·07
Putney	25	1·2	·79	—	·15	—
Streatham	119	2·0	1·10	9	·14	·08
Tooting	61	2·7	1·78	5	·25	·14
Wandsworth	108	2·0	1·05	10	·20	·09
Whole Borough ...	380	1·9	1·10	29	·17	·08
LONDON	6,685	2·0	1·38	606	·22	·12

The case-rate for the year is ·63 under that for the year 1908, and is ·63 under the average for the 10 years 1899-1908.

The highest case-rate was in Tooting, and the lowest in Putney.

The case-rate for the Borough is ·28 under that for the whole of London, and the death-rate is ·04 per 1,000 lower.

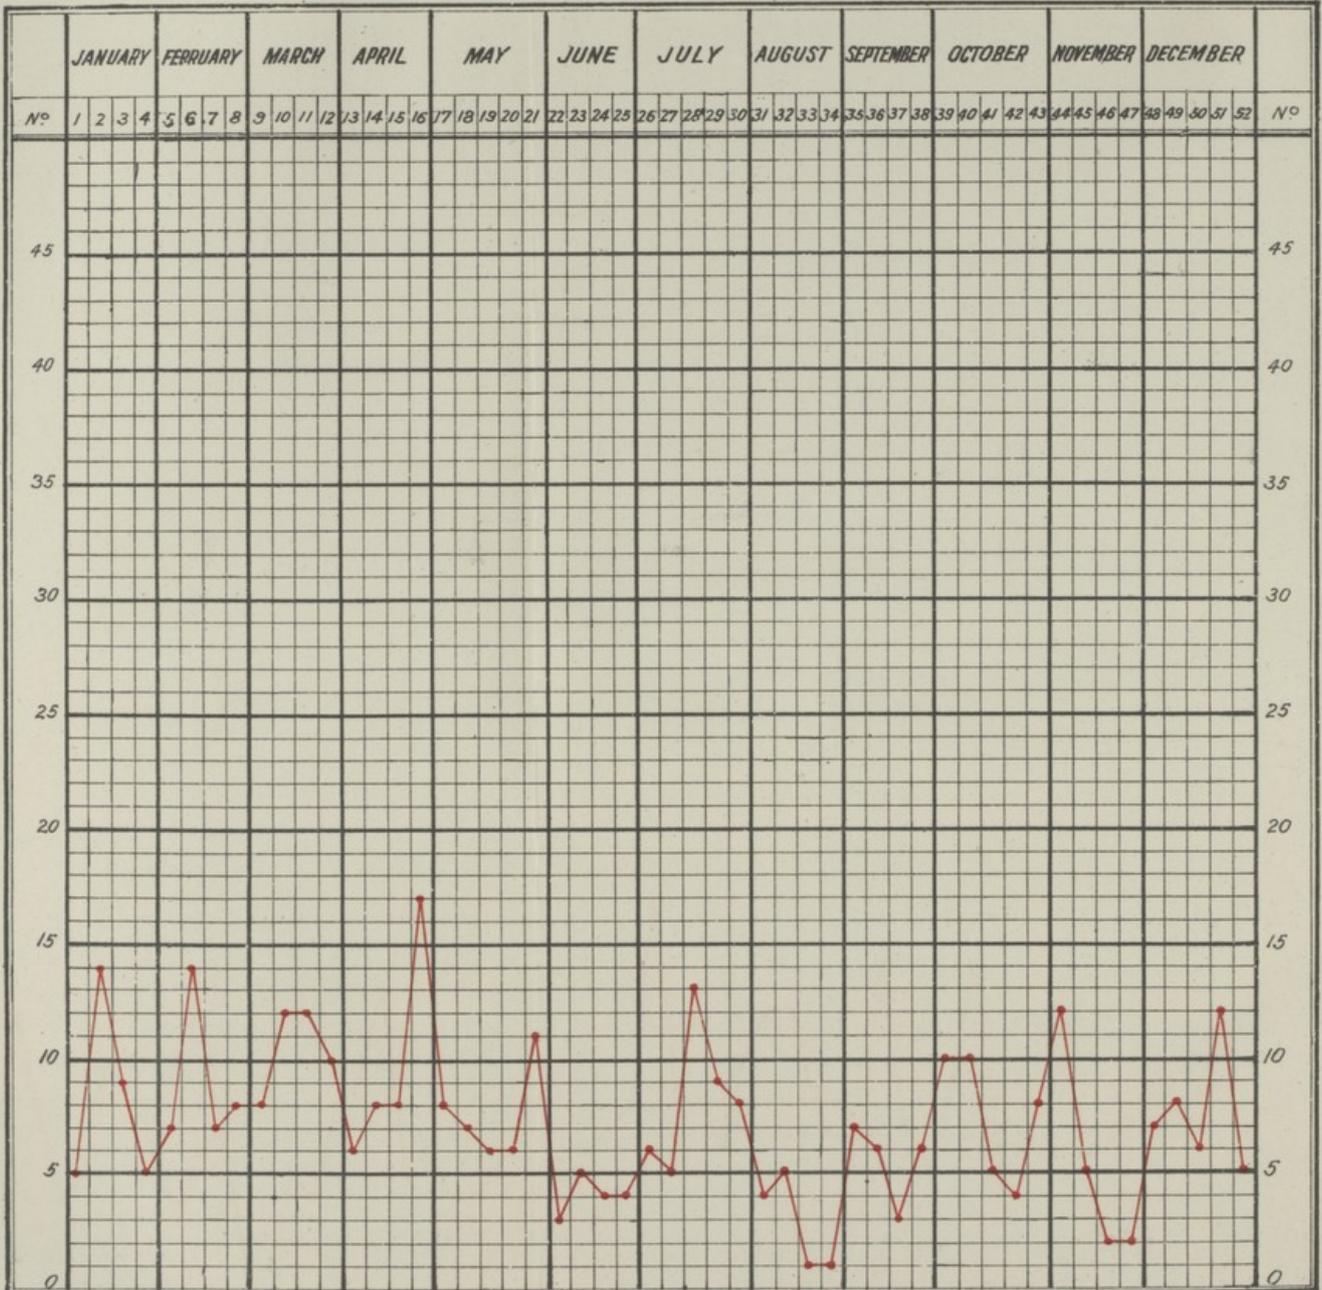

The death-rate per 1,000 in the Borough was ·08, compared with ·11 in 1908, ·12 in 1907, ·16 in 1906, ·11 in 1905, and ·17, the decennial average.

In Clapham the death-rate was ·07, in Putney nil, in Streatham ·08, in Tooting ·14, and in Wandsworth ·09 per 1,000.

All the sub-districts show a decrease compared with the previous year.

CHART Showing the number of cases of **DIPHTHERIA** notified during each week of the year 1909.

The Chart shows the number of cases notified during each week of the year.

The maximum number of cases, viz. :—17, was notified in the last week of April, and the minimum, viz. :—one, in the third and fourth weeks of August.

At no period of the year was there any outbreak to call for special notice, and this is due, as was stated in my Report for last year, largely to the methods adopted for dealing with cases in elementary schools.

Diphtheria and School Attendance.

The following Table shows the number of cases of Diphtheria and their relationship to the schools in the Borough :—

In Clapham, out of a total of 67 cases, 25 or 38·4 per cent. occurred in children attending school; in Putney, of 25 cases, 12 or 48 per cent.; in Streatham, of 119 cases, 72 or 60·5 per cent.; in Tooting, of 61 cases, 29 or 47·5 per cent.; in Wandsworth, of 108 cases, 39 or 36·1 per cent.; and in the whole Borough, of 380 cases, 177 were in attendance at schools in the Borough, and 10 at schools outside the Borough, a total of 187, or 49·2 per cent.

Of the remaining cases, viz. :—193, in 45 or 11·8 per cent., the diagnosis was incorrect, and 148 or 39 per cent. were not in attendance at school.

From the above percentages it would appear that school infection played a more important part than it did in 1908 when the percentage of children in attendance at school affected was only 40, compared with 49·2 in 1909, and not in attendance 50·6, compared with 39.

An examination of the Table shows, however, that in Clapham and Putney the number of cases in each school was small, and that they occurred at irregular intervals throughout the year.

In Streatham, Eardley Road School had a sequence of cases in the first four months of the year, and Hearnville Road School had five cases in the month of July and four in November.

In Tooting, Franciscan Road School was chiefly affected, but only 11 cases occurred during the year chiefly in the last three months, while in Wandsworth there was no sequence of cases in any of the schools.

Of the total cases notified 45 were incorrectly diagnosed, compared with 54 in 1908, leaving a total of 335, compared with 527 in 1908, and 585 in 1907.

17 cases were notified among children attending private schools, compared with 11 in 1908, and 21 in 1907.

No cases of Diphtheria were notified as having occurred in children attending the following elementary schools in the Borough:—

In CLAPHAM:—

Aristotle Road.
Christchurch.
Haselrigge Road.
New Park Road.
New Road.
St. Mary's Roman Catholic, Crescent Lane.

In PUTNEY:—

Girls' School, Walker's Place.

In STREATHAM:—

Christchurch, Roupell Park.
Hitherfield Road.
Holy Trinity, Upper Tulse Hill.
Nightingale Square Roman Catholic.
Fircroft Road.

In TOOTING:—

Fountain Road.

In WANDSWORTH:—

Eltringham Street.
Frogmore.
St. Michael's.
St. Thomas's.
Wandle.
Warple Way.

In all, 19 schools remained free from Diphtheria, compared with 21 in 1908.

Of the total number of cases of Diphtheria, eight or 2·1 per cent. occurred among children under one year, 117 or 30·8 per cent. among children from one to five years, 195 or 51·4 per cent. from five to 15 years, 28 or 7·3 per cent. from 15 to 25 years, and 32 or 8·4 per cent. from 25 to 65 years.

Of the 314 cases removed to hospital, 45 were reported not to have suffered from Diphtheria.

Drainage defects were found in only 13 premises in which cases of Diphtheria occurred, compared with 56 in 1908, and 92 in 1907.

Return Cases of Scarlet Fever and Diphtheria.

46 cases of Scarlet Fever occurred after the return of cases from the hospitals of the Metropolitan Asylums Board, compared with 57 in 1908, and 41 in 1907.

There were also four cases of Diphtheria, compared with 17 in 1908, and one in 1907.

10 of the return cases occurred in Clapham, none in Putney, 16 in Streatham, nine in Tooting, and 11 in Wandsworth.

Of the return cases of Diphtheria two occurred in Streatham and two in Wandsworth.

The following Table shows the date of removal to hospital of the first case, the date of return from hospital, the number of days the first case was in hospital, the date of the first symptoms of the subsequent case, and the number of days elapsing between the return of the first case and the first symptoms of the subsequent case or cases.

The average number of days the cases of Scarlet Fever were in hospital was 65·47, compared with 63·6 in 1908, and in the cases of Diphtheria 41·25 days, compared with 57·4 in 1908.

With regard to the return cases of Scarlet Fever, in 10 premises more than one case occurred after the return of a case from hospital; two cases each in nine premises; and three cases in one premises. In only four of the cases was there any complaint made by the parent of the condition of the children returned, three of these suffering shortly after their return from nasal, and one from ear discharge.

There has been a considerable decrease in the number of these cases compared with the year 1908, due largely to the warning given to parents not to permit the children returned from hospital to associate with the other children in the house for some time.

Another return case of Scarlet Fever occurred, but the first case was notified at a seaside resort and was returned from the hospital there, the first symptoms of the case in this Borough appearing five days after the other case returned.

For many years no cases have been recorded of subsequent cases occurring at home after the recovery of previous cases in the same house, but this year six cases occurred, five in one house, and one in another.

In the first of these cases the notification was received on the 25th August, and was certified by the medical attendant to have recovered on the 3rd October. The first of the subsequent cases in this house occurred on the 22nd October, and the second on the 23rd. These two cases were certified by the medical attendant to have recovered on the 14th December. On the 26th December other three cases were notified, one of these being a servant and the other two schoolboys who had returned to the house on the 20th December and were taken ill on the 26th.

Enteric Fever.

66 cases of Enteric Fever were notified during the year (13 from Clapham, 11 from Putney, 15 from Streatham, 19 from Tooting, and eight from Wandsworth), compared with 60 in 1908, 70 in 1907, 96 in 1906, and 96 in 1905.

47 of the cases were removed to hospital where four died, and 19 were treated at home with two deaths.

The total number of deaths was six (one in Clapham, none in Putney, three in Streatham, one in Tooting, and one in Wandsworth), compared with seven in 1908, 10 in 1907, 15 in 1906, 11 in 1905, and 11 in 1904.

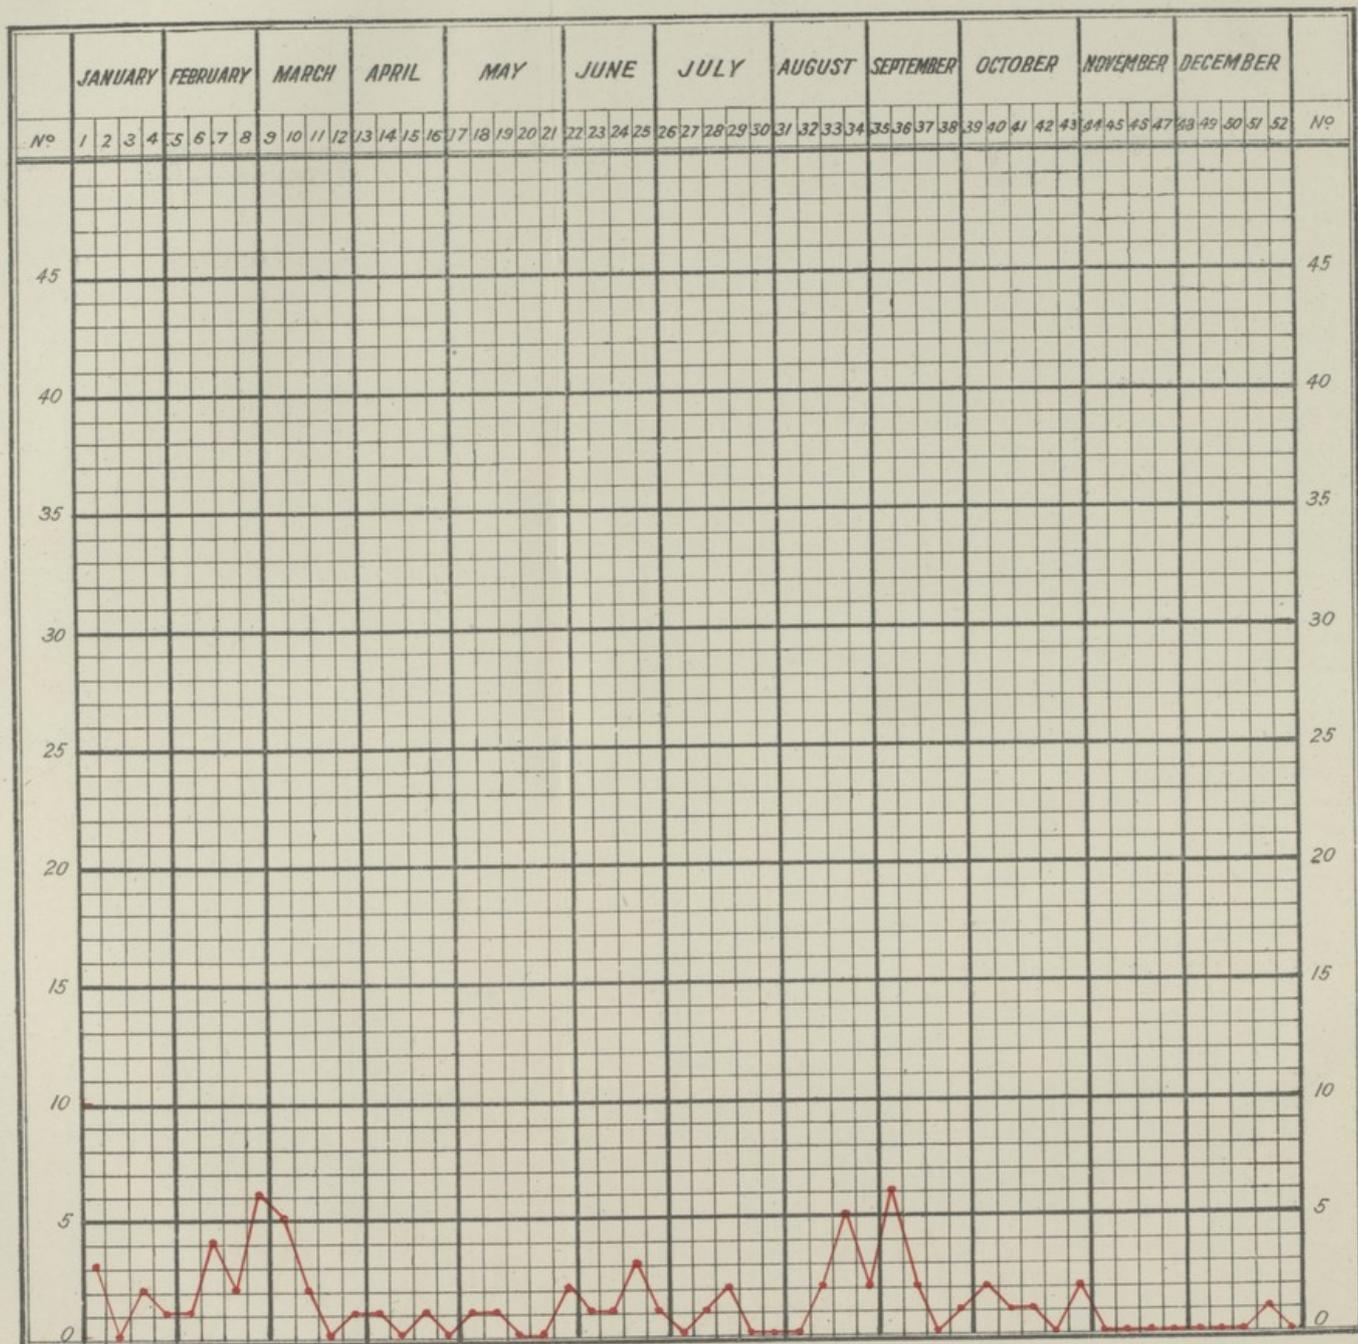

The number of deaths was one less than in 1908, and 14·4 under the decennial average.

The proportion of cases notified per 1,000 of population was ·19, compared with ·18 in 1908, ·21 in 1907, ·30 in 1906, and ·33 in 1905, and with ·21 for the whole of London.

The corrected death-rate from Fever was ·017 per 1,000, compared with ·02 in 1908, ·03 in 1907, ·048 in 1906, ·04 in 1905, and ·04 in 1904, while the rate for the whole of London was ·03, compared with ·04 in 1908, ·04 in 1907, ·05 in 1906, ·05 in 1905, and ·06 in 1904.

CHART Showing the number of cases of **ENTERIC FEVER** notified during each week of the year 1909.

Of the 47 cases removed to hospital, 15 or 32 per cent. were found not to be suffering from Enteric Fever, compared with 30 per cent. in 1908.

The Chart shows the number of cases notified during the year.

In 20 of the weeks during the year no cases were notified, one case each in 15 of the weeks, two cases each in eight of the weeks, three cases each in two of the weeks, four cases in one of the weeks, five cases in two of the weeks, and six cases in two of the weeks. The maximum number of cases, viz. :—six, was notified in the last week of February and the first week of September.

Of the 66 cases notified 14 were not Enteric Fever, leaving 52 cases in which special enquiries were made as to the probable cause of the disease.

In only five of the cases was the disease probably contracted by eating shell-fish, in five it was contracted outside the Borough (one in Spain, one in Ramsgate, one in Lincoln, and two in other places), in two the infection was contracted from other cases, in seven probably from watercress, in nine from polluted milk supply, while in 24 no history of infection could be ascertained.

With regard to the five cases caused by shell-fish, two were from oysters, two from mussels, and one from winkles.

The nine cases caused by infected milk supply were the subject of special reports, as follows :—

“On the 18th February I received a letter from Dr. Crookshank, Medical Officer of Health to the Urban District of Barnes, stating that five cases of Enteric Fever had recently occurred in his district in all of which the milk had been supplied by a purveyor in this Borough.

“The same evening I interviewed the purveyor and, although at that time no cases had been notified to me, I asked him to let me have a list of all the farms from which he

derived his supplies. He at the same time informed me that he had been in communication with Dr. Crookshank and that he had Pasteurised all the milk which was sent out from the two depots on the 15th February. I made full inquiries as to the health of his employees, and particularly as to the health of the foreman who was in charge of the drumming or mixing of the milk. He informed me that there was no illness among any of his employees, and as the cases in Barnes were supplied by different roundsmen I had no reason to suspect that the milk was infected in this district. I advised the purveyor to communicate with all the farms at once, as well as providing me with their names and addresses. During this interview he showed me a printed form of contract in which it is definitely stated that if any cases of infectious disease occur at any of the farms the consignee is to be at once informed, and also that the consignor is to be remunerated at the same rate even if no milk is sent.

"The next day, having received a list of seventeen farms in six counties from him I communicated with all the Medical Officers of Health of the County or district in which the farms were situated.

"I again called on the purveyor on the evening of the 19th and saw telegrams which he had received from the farms, all of which gave negative replies to the letter sent by him asking if there was any illness at the farms. On Saturday morning, the 20th February, the purveyor received a letter from a farm near Highworth, Wiltshire, stating that a case of Enteric Fever had occurred there, and that the officer who called had stated that as the dairy was at a distance from the farm there was no risk of infecting the milk, but instructions were given to notify the dairyman in London. These instructions, however, were not carried out. It is difficult to understand why the farmer did not notify the purveyor, as, if he had done so, the infected milk could have been stopped on the 30th January.

"On Sunday, 21st February, I again saw the purveyor, who had visited the farms in company with a bacteriologist,

and he ascertained that a case of Enteric Fever had been treated at the farm house for some weeks, also that the water supply to the dairy was derived from a spring which appeared to be contaminated by the drainage of a cottage in the vicinity.

“The Medical Officers of Health of all the districts replied stating that there was no infectious disease at any of the farms with the exception of the farm in Wiltshire, and Dr. Tubb-Thomas, the County Medical Officer of Health, communicated with me on the 22nd February stating that he had just heard of a case of Enteric Fever at that farm. He also stated that there was illness at this farm in November or December last, treated as Tubercular Meningitis, but that he was inquiring into the matter, and that he had had no cases of Enteric Fever in any of the Rural Districts in which the other farms were situated during the months of December, January, and February. Dr. Tubb-Thomas also informed me that the Medical Officer of Health of the Rural District in which the farm is situated was Dr. Streeten, and I at once wrote to him on the matter.

“As it was quite possible that cases were occurring in this Borough due to the same cause, and knowing the difficulty of diagnosis, especially in children, I at once communicated with the medical practitioners in the district in which milk was supplied by this particular purveyor, stating that the milk supply was infected, and that cases of Enteric Fever had occurred in another district in which this milk supply was implicated.

“After this circular was sent the following seven cases were notified to me ;—

Case.	Age.	Date of first symptoms.	Date of notification.
S. E. ...	5½ years ...	9th February ...	22nd February.
A. T. ...	48 " ...	12th " ...	23rd "
P. H. ...	5 " ...	16th " ...	23rd "
G. M. ...	18½ " ...	17th " ...	25th "
K. H. ...	4¾ " ...	12th " ...	1st March.
M. W. ...	25 " ...	20th " ...	2nd "
D. B. ...	14 " ...	11th " ...	4th "

"In addition to the above seven cases one case was infected in this district, but was notified in Barnes as the patient had removed before the disease was diagnosed.

"The purveyor, on Saturday, 20th February, stopped the distribution of milk from that particular farm, and instructed the farmer not to forward any more milk until he was further advised.

"Dr. Streeten, Medical Officer of Health for the Highworth Rural District, communicated with me on the 24th February, and the following is a copy of his letter:—

" 'HIGHWORTH RURAL DISTRICT.

" 'Town Hall,

" 'Swindon,

" '24th February, 1909.

" 'Re Enteric at Blunsdon.

" 'DEAR SIR,

" 'In reply to your letter *re* above. A case of Enteric Fever, I. S., aged 14, was notified to me on January 29th, by Dr. Lewarne, of Cricklade, Wilts, and a second case, mother of this child, on February 22nd.

“ ‘I visited the farm on February 1st. Instructions were given to notify the dairyman in London who received the milk from this farm. The dairy is isolated from the house, and no one from the house was to enter the dairy or handle the milk.

“ ‘The water supply is from a spring in the coralline formation on Blunsdon Hill, one mile distant, and it has been in use for thirty years. Last summer two cottages were built on this hill, about fifty yards above spring, one only has been inhabited, and no illness has occurred since the occupation in September of last year. No case of Enteric has been reported in Blunsdon parish for ten years. The drainage of these cottages is to a ditch near. I hardly think it can have polluted the spring. I fancy the infection of the milk has occurred at the farm. I have ascertained that the copper, provided in the dairy for heating water for cleansing the milk utensils, is also used for domestic purposes, including the family washing.

“ ‘If I can give you any further information please let me know.

“ ‘I am, faithfully yours,

“ ‘F. EDWARD STREETEN.

“ ‘Dr. P. Caldwell Smith.’ ”

“ ‘There seems to be no reason to doubt that the milk was contaminated at the farm, but it is not clear from the information which has up to the present time been received, at what date this contamination took place. As far as the first symptoms are concerned in all the cases notified in this district, and in Barnes, I agree with Dr. Crookshank that the milk was probably infective on the 16th January. I have not yet been able to ascertain the date of the first symptoms of the case notified to Dr. Streeten on the 29th January, but I am making further inquiries,

“The cases in Barnes appear to have been notified earlier than in Wandsworth, as the first symptoms in the earliest of Dr. Crookshank’s cases occurred on the 30th January, whereas as far as could be ascertained in the cases in this Borough, the first symptoms of the earliest case occurred on the 9th February.

“If the infected milk was Pasteurised on the 15th February, and completely withdrawn on the 20th February, I am of opinion that no further cases will occur in which the first symptoms would appear later than the 1st or 2nd of March. Cases, however, may be notified for another fortnight owing to the difficulty in diagnosis.

“I have further communicated with the medical men in the district informing them that the source of the infected milk had been traced, and that the distribution of that particular milk had been stopped, also that all the other farms supplying milk to this particular purveyor had been inspected and found in a satisfactory condition.

“I have had another interview with Dr. Crookshank, of Barnes, and have seen a copy of his report which he is forwarding to the Local Government Board. In that report he agrees with my opinion that this farm was the cause of the infection. The total number of cases which have occurred in his district up to the present have been 11, one of which, however, as previously stated, having been infected in this Borough.

“A further report will be made on the 18th March.

“18th March.

“*Re Enteric Fever.*

“Since the date of my last report only two cases of Enteric Fever have been notified in connection with the outbreak in this Borough. Both these cases occurred in households which had been previously infected, but both cases were infected about the same time as the case first notified. In all

nine cases have occurred, exclusive of the one which was notified in Barnes, but which was infected in this Borough. I am of opinion that no further primary cases will occur, and can report that the measures which have been taken have been successful in preventing an outbreak which might have been serious.

“In accordance with the instructions of the Committee I visited the farm in Wiltshire in company with Dr. Crookshank, Medical Officer of Health for the Barnes Urban District, and Dr. Streeten, Medical Officer of Health for Highworth, in which district the farm is situated. With reference to the condition of the cowsheds I may say that these are in a most unsatisfactory condition, being dilapidated and dirty. There were also accumulations of manure in the vicinity of the cowsheds, some of which to all appearances have not been removed for months. The cows looked fairly healthy, but the udders showed evidence of not having been recently cleansed. I was informed, however, that steps are being taken to reconstruct the cowsheds and dairy arrangements. The dairy itself was satisfactory, except that the lighting of that part of the dairy where the cooling was carried on was not good. This also is being remedied. I also inspected the copper where the washing was stated to have been done, and there seems no reason to alter the statement in my last report with reference to this being in all probability the immediate cause of the pollution of the milk supply.

“I made inquiries of the farmer with reference to the child who had been ill in July or August, 1908, but could not get any particulars, nor would he permit me to have a specimen of the blood or excreta for bacteriological examination.

“The dairy is about 50 yards from the house where the two cases of Enteric Fever are presently being treated, and, as far as I can judge, everything is now being done to prevent pollution either of the water or of the milk.

“I also inspected the water supply, and although the analysis does not show evidence of any pollution yet it is quite

possible for the water to be polluted in transit from the source to the farm.

"I also made an inspection of another farm about a mile and a half distant, to which the cows from the infected farm were to be removed, and I am of opinion that if the cows are removed, and if the water supply is satisfactory, there will be no risk in permitting the milk to be sent to this Borough for distribution.

"At the present time the farmer is making cheese from the milk of the cows at the farm, but whether the processes which are carried on in its manufacture will be sufficient to destroy the typhoid bacillus is a matter not yet practically decided. Theoretically these processes should be inimical to the existence of this bacillus, and I called the attention of the Medical Officer of Health of the district to this fact.

"This outbreak has made me realise more fully the importance of the notification of all cases of infectious disease by the Medical Officer of Health of the district in which the farm is situated to the Medical Officer of Health of the district to which milk is sent. If this had been done in this outbreak the milk supply would have been stopped on the 30th January, and it is quite possible that some of the persons would not have been infected. I am of opinion that it would be advisable to call the attention of the Local Government Board to this so that a clause could be inserted in the Milk Bill which is shortly to come before Parliament.

"In conclusion, during the whole period of the outbreak in the necessary inquiries I have been assisted very much by the purveyor in this Borough."

The outbreak, although a small one owing to the measures taken, might have proved exceedingly serious, and I have to thank both Dr. Crookshank, of Barnes, and Dr. Streeten, of Swindon, for the help given in elucidating the cause. We were not quite satisfied that the first case at Highworth, notified on the 21st January, was the cause of all the cases that occurred in this Borough and in Barnes, unless the case was infective some days before it was seen by the medical attendant.

One satisfactory feature of the outbreak was that no deaths occurred among the cases in this Borough.

In only two cases had members of the patient's family had an attack of Enteric Fever, one 23 and the other 10 years before.

Cases of Mistaken Diagnosis.

In 112 cases (52 of Scarlet Fever, 45 of Diphtheria, and 15 of Enteric Fever), information was received from the Metropolitan Asylums Board's Hospitals that the patients were not suffering from the disease notified or any other notifiable disease, compared with 110 in 1908, 111 in 1907, 93 in 1906, 97 in 1905, and 94 in 1904.

Of the 1,171 cases removed to hospital, in 112 or 9·5 per cent. the diagnosis was incorrect, compared with 6·9 per cent. in 1908, 6·5 in 1907, 6·7 in 1906, 5·2 in 1905, and 10 in 1904.

There has been a marked increase in the percentage of incorrect diagnosis compared with the previous year.

TABLE XLII.

Disease.	No. of cases of mistaken diagnosis.					Total.	Total cases removed.	Percentage of error in Diagnosis.
	Clapham.	Putney.	Streatham.	Tooting.	Wandsworth.			
Scarlet Fever ...	7	1	15	8	21	52	810	6·4
Diphtheria ...	7	3	14	10	11	45	314	14·3
Enteric Fever ...	2	...	3	9	1	15	47	31·9
Total ...	16	4	32	27	33	112	1,171	9·5

In 1908, the percentage of cases of mistaken diagnosis for the whole of London was: for Scarlet Fever 6·1, compared with 6·8 in 1907; for Diphtheria 22·2, compared with 17; and for Enteric Fever 39·1, compared with 29·1.

Cerebro-Spinal Fever.

Four cases of Cerebro-spinal Fever were notified during the year (one from Clapham, two from Streatham, and one from Tooting), compared with five in 1908.

One of the cases was notified from King's College Hospital.

In London 111 cases of this disease were notified during the year, compared with 85 in 1908.

26 deaths were registered as having been caused by Meningitis (five in Clapham, four in Putney, seven in Streatham, one in Tooting, and nine in Wandsworth).

Seven of these were of infants under one year, nine from one to five years, and 10 over five years.

As in previous years, inquiries were made from the medical attendant, and in all the cases the disease was stated to have been Simple Meningitis, although in four of the cases it was stated that there was a probability of the disease having been of a Tuberculous nature.

Bacteriological Examinations.

During the year 397 bacteriological examinations were made at the Lister Institute, compared with 491 in 1908, 466 in 1907, 407 in 1906, 174 in 1905, 121 in 1904, 125 in 1903, 98 in 1902, and 66 in 1901.

The following Table shows the number of examinations in each sub-district and for the whole Borough, also the disease for which the examination was made and the result of such examination.

TABLE XLIII.

	Clapham	Putney.	Streatham.	Tooting.	Wandsworth.	Whole Borough.
DIPHTHERIA.						
Negative	24	21	93	19	118	275
Positive	10	10	34	11	32	97
ENTERIC FEVER.						
Negative	2	5	5	3	15
Positive	2	...	5	3	10
Totals	34	35	132	40	156	397

In 97 out of 372 examinations for the bacillus of Diphtheria the result was positive, and in 10 out of 15 examinations of blood in suspected cases of Enteric Fever, the Widal reaction was obtained.

Puerperal Fever.

26 cases of Puerperal Fever were notified, compared with 14 in 1908, 25 in 1907, 25 in 1906, 18 in 1905, and 14 in 1904.

Seven cases occurred in Clapham, one in Putney, six in Streatham, four in Tooting, and eight in Wandsworth.

10 of the cases (three in Clapham, two in Streatham, two in Tooting, and three in Wandsworth), or 38·4 per cent. were fatal, compared with 42 per cent. in 1908, 40 in 1907, 44 in 1906, and 44·4 in 1905.

17 of the cases were removed to the Union Infirmary, where four died, and two to General Hospitals where one died.

The death-rate was ·029 per 1,000, compared with ·018 in 1908, ·031 in 1907, and ·035 in 1906.

The case-rate per 1,000 births was 3·7, compared with 1·9 in 1908, and for the whole of London 2·4, compared with 1·8.

In five of the cases midwives only were employed, while eight cases were miscarriages, and in four the children were stillborn.

Five nurses had free baths, and of the others, four came from Battersea, six were district or surgical nurses, and the remainder had baths at their own homes.

In 18 cases the personal clothing of the nurse was disinfected.

Erysipelas.

192 cases of Erysipelas were notified during the year and eight deaths occurred. 45 of the cases and three of the deaths occurred in Clapham, 10 cases and no death in Putney, 30 cases and one death in Streatham, 37 cases and two deaths in Tooting, and 70 cases and two deaths in Wandsworth.

In 1908 the number of cases notified was 203, and the deaths six.

30 of the cases were removed to the Union Infirmary where four deaths occurred.

Measles.

During the year 108 deaths, 56 of males and 52 of females, were due to Measles, compared with 45 in 1908, 68 in 1907, 65 in 1906, 89 in 1905, and 104 in 1904.

19 of the deaths occurred in Clapham, nine in Putney, 19 in Streatham, 20 in Tooting, and 41 in Wandsworth.

The number of deaths is 63 more than in 1908, and 7·6 above the corrected decennial average.

21 of the deaths were of infants under one year, 78 from one to five years, and nine from five to 15 years; 91·6 per cent. of the deaths having occurred under five years of age.

The death-rate was ·31 per 1,000, compared with ·14 in 1908, ·21 in 1907, ·21 in 1906, and ·31 in 1905.

The death-rate for the whole of London was ·48, compared with ·31 in 1908, for England and Wales ·35, and for the 76 Great Towns ·47 per 1,000.

During the year 1,556 visits were made by the Sanitary Inspectors in cases of Measles, 212 in Clapham, 112 in Putney, 388 in Streatham, 367 in Tooting, and 477 in Wandsworth.

The next Table shows the number of premises disinfected after Measles in each sub-district for each month of the year.

The total number of premises disinfected was 1,012 (144 in Clapham, 53 in Putney, 241 in Streatham, 208 in Tooting, and 366 in Wandsworth), compared with 884 in 1908, 955 in 1907, 902 in 1906, 798 in 1905, and 1,115 in 1904.

The greatest number of disinfections was carried out in March and April, this being due to outbreaks in Tooting and Wandsworth. The greatest number of cases occurred in January, March, April and June. In August, September, October, November and December the number of disinfections was small as there were very few cases in any part of the Borough.

TABLE XLIV.

Total ...	144	53	241	208	366	1,012

Table XLV. shows the number of cases of Measles and other non-notifiable diseases notified by the teachers in the elementary schools in the Borough.

In all 4,342 cases were notified, compared with 3,753 in 1908, 4,079 in 1907, 3,810 in 1906, and 3,352 in 1905.

1,670 of these were cases of Measles, 899 of Chicken-pox, 538 of Whooping Cough, 645 of Mumps, and 590 of Ringworm. There was an increase in the number of cases of Chicken-pox, Mumps and Ringworm, compared with 1908, but a decrease in the number of cases of Measles and Whooping Cough.

With regard to Measles, 243 cases were notified from schools in Clapham, 82 in Putney, 408 in Streatham, 323 in Tooting, and 614 in Wandsworth.

The schools chiefly affected were: in Clapham, Larkhall Lane and Bonneville Road; in Putney, Hotham Road; in Streatham, Oldridge Road, Smallwood Road and Hearnville Road; in Tooting, Franciscan Road, Fountain Road and Sellincourt Road; and in Wandsworth, Southfield, Brandlehow Road, Eltringham Street and Garratt Lane.

Whooping Cough.

67 deaths were registered during the year, 35 of males and 32 of females, an increase of eight compared with 1908, but a decrease of 17 compared with the decennial average. 22 of the deaths occurred in Clapham, four in Putney, nine in Streatham, four in Tooting, and 28 in Wandsworth.

26 of the deaths were of infants under one year, 38 of children from one to five years, and three from five to 15 years.

The death-rate was '19 per 1,000, compared with '18 in 1908, and '25 for the whole of London in 1909.

This disease was slightly more fatal in London and in this Borough in the year 1909 than in the previous year. In the sub-districts of Clapham and Wandsworth it was slightly more prevalent than in the other sub-districts.

The number of cases notified from schools was 538, compared with 612 in 1908, 255 of these being from schools in the sub-district of Wandsworth, and the schools chiefly affected in that sub-district were Southfield, Wandle, St. Faith's and Waldron Road.

There were also 111 cases notified from schools in Clapham, the schools chiefly affected having been Haselrigge Road, Telferscot Road and Bonneville Road.

In Putney the school chiefly affected was St. Mary's, and in Streatham Mitcham Lane and St. Andrew's.

The greatest mortality from Measles and Whooping Cough occurs among children under five years of age. Of the 175 deaths that occurred from these diseases, 163 or 93 per cent. were deaths of children under five years.

Other Diseases Notified from Schools.

In addition to the 1,670 cases of Measles and 538 of Whooping Cough notified by the teachers of elementary schools, there were also notified 899 cases of Chicken-pox, 645 of Mumps, and 590 of Ringworm.

No action is at present taken by the Sanitary Authority after notification of these diseases, although during the prevalence of Small-pox cases of Chicken-pox were visited.

Chicken-pox was most prevalent in Streatham and Wandsworth, Mumps in Clapham and Wandsworth, and Ringworm in Clapham and Wandsworth.

All these cases of non-notifiable diseases were more regularly notified by the teachers during the year 1909, and I have received every assistance from the teachers of schools in dealing with those cases that were investigated.

Closure and Disinfection of Schools.

During the year the following schools were closed and disinfected or disinfected only, on account of the prevalence of Measles or Scarlet Fever.

- (1.) St. Joseph's School, Wandsworth. Closed from the 24th January to the 5th February inclusive, on account of Measles. Three rooms and cloakroom disinfected on the 30th January.
- (2.) Waldron Road School, Wandsworth. Closed from the 9th February to the 1st March on account of Scarlet Fever. Two rooms disinfected on the 6th February, and 10 rooms on the 13th February.
- (3.) Hitherfield Road School, Streatham. Four rooms disinfected on the 15th March on account of an outbreak of Measles.
- (4.) Hearnville Road School, Streatham. One Classroom disinfected on the 27th March on account of Scarlet Fever.
- (5.) Sunnyhill Road School, Streatham. 10 rooms disinfected on the 8th April on account of cases of Scarlet Fever.
- (6.) Telferscot Road School, Clapham. Three rooms disinfected on the 13th April on account of Scarlet Fever.

- (7.) Holy Trinity School, Streatham. Three rooms disinfected on the 24th April on account of Measles.
- (8.) Hearnville Road School, Streatham. Three rooms disinfected on the 8th June on account of Scarlet Fever.
- (9.) St. Ann's School, Wandsworth. Two rooms disinfected on the 29th June on account of Measles.
- (10.) New Road School, Clapham. Two rooms disinfected on the 1st July on account of Scarlet Fever.
- (11.) Hearnville Road School, Streatham. Whole school closed from 15th July till after the summer holidays on account of Scarlet Fever. 10 rooms disinfected on the 3rd July, and 32 rooms on the 20th and 21st July. The school was thereafter cleansed by the L.C.C.
- (12.) Hotham Road School, Putney. Closed from the 28th June to end of summer holidays on account of Measles. Four rooms disinfected on the 6th July.
- (13.) St. Mary's School, Streatham. Two rooms disinfected on the 9th September on account of Scarlet Fever.
- (14.) Three private schools were also disinfected during the year on account of slight outbreaks of Scarlet Fever.

In addition to the schools, which were closed, mentioned above, the Medical Officer of the London County Council (Education) gave instructions to the Head Teacher of the Department affected in cases of Measles to exclude all the children unprotected by a previous attack. The following Table shows the schools and classrooms therein affected, also the time of exclusion ordered.

TABLE XLVI.

Information is given to the parents of all unprotected children that a case of Measles has occurred in the classroom, and instruction by means of a card is also given as to the symptoms of the disease and the procedure to be adopted as regards school attendance if the child shows any of these symptoms.

Epidemic Influenza.

89 deaths, 41 of males and 48 of females, were due to this disease, compared with 82 in 1908, 88 in 1907, and 70 in 1906. There has thus been an increase of seven deaths compared with the previous year, but a decrease of 2·4 compared with the corrected decennial average.

15 of the deaths occurred in Clapham, 10 in Putney, 33 in Streatham, nine in Tooting, and 22 in Wandsworth.

The death-rate was ·26 per 1,000, compared with ·25 in 1908, ·27 in 1907, and ·22 in 1906.

37 of the deaths were of persons from 25 to 65 years, and 43 of persons over 65 years.

Diarrhœa.

52 deaths, 28 of males and 24 of females, occurred from Diarrhœa and Zymotic Enteritis during the year, compared with 101 in 1908, 65 in 1907, 218 in 1906, 137 in 1905, and 208 in 1904. There has thus been a decrease of 49 in the number of deaths from these diseases compared with the previous year, and of 129·9, compared with the corrected decennial average.

10 of the deaths occurred in Clapham, two in Putney, seven in Streatham, 14 in Tooting, and 19 in Wandsworth.

In all the sub-districts the number of deaths was less than in 1908, the greatest decrease having been in Streatham and Wandsworth.

In Clapham the number decreased from 16 to 10, in Putney from nine to two, in Streatham from 28 to seven, in Wandsworth from 30 to 19, and in Tooting from 18 to 14.

The death-rate was '15 per 1,000, compared with '30 in 1908, '20 in 1907, and '70 in 1906. The death-rate for the whole of London also shows a decrease, it being '32, compared with '53 in 1908, but in the three previous years the rates were: '33 in 1907, '95 in 1906, and '72 in 1905.

The death-rate in the sub-districts was as follows:—In Clapham '14, compared with '23 in 1908; in Putney '06, compared with '29; in Streatham '06, compared with '27; in Tooting '43, compared with '57; and in Wandsworth '19, compared with '31.

Of the total number of deaths registered, 42 or 80 per cent. were of infants under one year, compared with 73 per cent. in 1908, 83 per cent. in 1907, 86 per cent. in 1906, and 87 per cent. in 1905.

Including Enteritis, the total number of deaths was 124, compared with 183 in 1908, 127 in 1907, 289 in 1906, 203 in 1905, and 301 in 1904. Of these 124 deaths, 90 or 72'5 per cent. were of infants under one year.

The following Table shows the number of deaths from Diarrhœa and Enteritis under one year for the four quarters of 1909, and for the five previous years.

TABLE XLVII.

	1904.	1905.	1906.	1907.	1908.	1909.
Total deaths under one year from Diarrhœa and Dysentery, including Epidemic Diarrhœa and Zymotic Enteritis in first quarter of the year	5	2	3	8	7	5
Do. in second quarter	9	4	4	2	7	4
Do. in third quarter	160	108	170	33	51	35
Do. in fourth quarter	6	6	11	22	9	8
Total deaths under one year from other forms of Enteritis in first quarter of year	6	6	9	12	13	15
Do. in second quarter	12	4	4	6	9	11
Do. in third quarter	38	36	42	18	22	31
Do. in fourth quarter	11	7	16	26	18	15

35 out of a total of 52 deaths from Diarrhœa, and 31 out of a total of 72 from Enteritis occurred in the third quarter of the year. The proportion of deaths in this quarter to total deaths from Diarrhœa is smaller than in previous years with the exception of 1907.

The number of deaths from Diarrhœa, Zymotic Enteritis, and Enteritis under one year represents 15 per cent. of the total mortality at that age, compared with 19 per cent. in 1908, 13·8 per cent. in 1907, 33 per cent. in 1906, 21·1 per cent. in 1905, and 28·8 per cent. in 1904, so that the diminution of the mortality under one year was, as in the two previous years, largely due to the decrease in the number of deaths of infants from the above causes.

In 82 out of the total deaths under one year, special enquiries were made, and the following Table shows the nature of the food given.

TABLE XLVIII.

METHOD OF FEEDING.	AGE IN MONTHS.				
	0-3.	3-6.	6-9.	9-12.	TOTAL
1.—Breast-fed only	9	2	1	1	13

Do. and farinaceous food...	3	5	8
3.—Condensed milk only	3	4	2	2	11
4.— Do. and farinaceous food	3	2	1	6
5.—Unknown	5	...	2	7
TOTALS	20	29	17	16	82

Of the total of 75 children who died from these diseases where the exact nature of the food given was ascertained, only 13, or 17·3 per cent., were nursed by the mother without the addition of any other food, and of these nine died in the first three months.

In 43, or 57 per cent., cows' milk, either alone or with condensed milk or farinaceous food, was given; while in 17, or 22·6 per cent., condensed milk only, or condensed milk and farinaceous food, was given. In seven cases no information could be obtained, three in Streatham, two in Tooting, and two in Wandsworth.

In many of the cases the enquiries of the Inspectors showed that the children had been suffering from other diseases, or had been delicate from birth.

The following exceptional cases may be cited as examples:—

- (1.) One child, aged four months, born prematurely, the youngest of three under three years, came of a consumptive family, and had been ill for $2\frac{1}{2}$ months.
- (2.) Another, aged four months, had been ailing from birth. The mother had epileptic fits, and had lost two children during the year, the whole family being delicate.
- (3.) Another, illegitimate and born prematurely, died at three months, had been delicate from birth. When first visited the child was in a wretched condition, face covered with sores and very puny and emaciated. The mother removed shortly afterwards and could not be traced till the death of the child was registered.
- (4.) Another, aged eight months, had Diarrhœa from birth, and had been in two hospitals and attended by three doctors.
- (5.) Another, eight weeks, was the youngest of 18, nine only being alive. This child was entirely breast fed.
- (6.) Another was 12 months all but five days, had been ailing from birth, had had Measles, Bronchitis and Chicken-pox, and had been in a hospital.
- (7 and 8.) Two others, of four and five months, were nurse children, and had been deserted, one of these was illegitimate.

The next Table shows the result of the enquiries made after these deaths, arranged in Wards, and there is also shown the number of infants who had been previously visited, the number of illegitimate infants, and the social status of the parents.

It may also be seen in the Table that only eight of the infants who died from Diarrhœa had been fed in accordance with the

pamphlet left by the Inspectors, and also that of the total number of deaths, viz. :—82, 10 were prematurely born, and 23 were delicate from birth.

Of the eight stated to have been fed in accordance with the instructions on the pamphlet, three were delicate from birth, one was illegitimate, and one suffered from Acute Bronchitis.

During the year the female Sanitary Inspectors have continued the work begun in 1905, in visiting the homes where births had occurred, and they have also had during the year, as is stated in their report, valuable assistance from several voluntary health visitors.

“We have the honour of submitting to you a report of our visits among infants during the year 1909.

“We had the help of three voluntary workers at different times during the year—one from the 15th February to the 21st April, one from the 17th August to the 22nd October, and the third from the 24th August to the 21st December. Out of the total number of visits, viz. :—4,102 (which includes re-visits and ineffectual calls), 1,943 were paid by the voluntary workers (Clapham 113, Putney 116, Balham 126, Tooting 423, Southfield 288, Fairfield 286, and Springfield 591). The large proportion of voluntary work done in Wandsworth is due to the fact that so many more cases of Phthisis were notified under the Public Health (Tuberculosis) Regulations, 1908, in that district than in the others, and this work occupied a great part of our time.

“The total number of visits paid after registration of births will be found in the first of our Tables (No. L.), which also shows the method of feeding at the first visit, and the number of ineffectual calls. The number of deaths among infants visited we have this year shown in a separate Table, so as to indicate the age in months at which they died.

“In Putney only one death occurred, the cause being Syncope and Convulsions. In Balham three died from Bronchitis and one from Marasmus. In Tooting 10 died from Diarrhœa and Enteritis, one at the age of one month, one at two months, three at three months, one at four months, two at seven months, one at eight months, and one at nine months; two died from Marasmus aged one and four months; and three from other causes, at two, three and five months. In Southfield three died: two from Diarrhœa at the age of seven months, and one from Bronchitis aged one month. In Fairfield eight died: two from Diarrhœa aged two and three months, two from Marasmus also aged two and three months, and four from other causes aged two, three and eight months. In Springfield there were 23 deaths, chiefly from Bronchitis and Pneumonia, 10 being due to that cause, four died at the age of two months, one at three months, two at

four months, one at six months, one at 10 months, and one at 11 months respectively; three were due to Marasmus at two, three and four months; and six from other causes (two being twins) at ages ranging from three weeks to six months.

“In addition to those infants who died from chest and lung diseases we found many ill with Bronchitis, Whooping Cough and severe colds; we were, in fact, struck by the prevalence of these complaints amongst infants, particularly during the latter part of the year. 44 were found to be suffering from Bronchitis and Pneumonia, 11 from Whooping Cough, and 25 from very severe colds.

“Of the 2,268 infants visited only 56 were premature (Putney three, Balham three, Tooting eight, and Wandsworth 42); of these, eight died (Tooting two and Wandsworth six). 28 were delicate from birth (Clapham two, Balham nine, Tooting 12, and Wandsworth five), and of these, six died, four in Tooting and two in Wandsworth, the latter being twins.

“Again we found difficulty in keeping in touch with the illegitimate births. Two wrong addresses were given, one in Tooting and one in Southfield, two removed immediately after confinement, one in Tooting and one in Springfield; and four died previous to our visit. Of the 43 visited (Clapham four, Putney two, Balham three, Tooting 18, Wandsworth 16), 12 came into the Borough for confinement only (Balham two, Tooting seven, Clapham one, Wandsworth two), the majority leaving the children to be nursed here. At the first visit 15 were wholly breast fed (Clapham one, Putney two, Tooting three, Wandsworth nine), and at the second visit seven (Balham two and Wandsworth five), one in Wandsworth having discontinued cows' milk and biscuit. Ten had removed when the second call was made and could not be traced. Two only of those visited died, one in Tooting from Atrophy and Pertussis, aged two months, and one in Wandsworth from Diarrhœa, aged three months, the latter being an exceptional case referred to in the Diarrhœa report. Of the 43 illegitimate infants, two born in Wandsworth were premature, and four in Tooting were delicate from birth.

“The second Table (No. LI.) shows the number of re-visits, and the method of feeding then found, the average age at the second visit being from four to five months.

“The proportion of infants entirely breast fed this year is practically the same as last, as is also the proportion of those having milk or food in addition to the breast. The number of those having cows’ milk is greater, and of those having condensed milk less, and there is an appreciable decrease in the use of farinaceous and other foods. One mother’s reason for not giving the breast was that “she did not like the idea of it.” The above applies to the method of feeding at the first visit.

“With regard to the feeding at the second visit there is a slight decrease in the proportion of those wholly breast fed, 65 as against 66 per cent., but on the other hand, there is a great increase in the proportion of those having cows’ milk only. Several mothers who were giving a little milk or a little food (chiefly biscuit), in addition to the breast at our first visit, were by our advice giving the breast alone at the second visit.

“The use of boat bottles is still on the increase, 399 boat bottles were used (Clapham 16, Putney 13, Balham 46, Tooting 127, Southfield 23, Fairfield 66, Springfield 108), as against 99 tube bottles (Clapham two, Putney two, Balham 20, Tooting 47, Southfield one, Fairfield six, Springfield 21) In 16 cases (Balham six, Tooting six, Fairfield three, Springfield one), where tube bottles were being used at our first visit, we found boat bottles substituted at the second visit. Both tube and boat bottles were in use in 12 instances (Clapham one, Balham six, Tooting four, Springfield one), and spoons were used in preference to either in 67 cases (Clapham six, Balham 10, Tooting 28, Fairfield 10, Springfield 13).

“With regard to employment of midwives, out of the 2,268 mothers visited, 964 availed themselves of their services. Of these, 660 employed midwives registered under the London County Council (Clapham 43, Putney 33, Balham 38,

Tooting 195, Southfield 47, Fairfield 82, Springfield 222). The non-registered midwives were employed chiefly by the very poor (Clapham five, Putney 22, Balham 20, Tooting 83, Southfield 36, Fairfield 57, Springfield 81).

“The sanitary defects discovered in the course of our visits were remedied, or if involving structural work, referred to you. 160 intimation notices were served (Clapham one, Putney two, Balham 22, Tooting 64, Southfield seven, Fairfield 33, Springfield 31), and five statutory notices were required (Balham one, Tooting two, Southfield one, and Springfield one).”

(k) Condensed milk and food	3	4	7
(l) Farinaceous and other foods	1	6	1	2	1	11
Totals	46	121	4	64	96	331

In all 2,268 visits were made, compared with 1,996 in 1908, and 1,603 in 1907, and this increase is wholly due to the assistance of the voluntary health visitors.

129 visits were in Clapham, 89 in Putney, 201 in Streatham, 707 in Tooting, and 1,142 in Wandsworth.

Of the 2,268 infants visited, it was found that 1,824, or 80·4 per cent., were wholly breast-fed, while 444, or 19·2 per cent., were otherwise fed.

If, however, we add to the number wholly breast-fed the number of children in which other foods were given in addition, we find that the percentage is increased to 89·2, a slight increase compared with the previous years.

146, or 6 per cent., were fed on cows' milk only, but nine had other foods in addition, raising the percentage to 6·4, a decrease compared with 1908, when the percentage was 6·7.

76 had condensed milk only, and six had condensed milk and food, a total of 82, or 3·6 per cent., an increase of ·1 per cent. compared with 1908.

Eight infants were fed on farinaceous and other foods, compared with 11 in the previous year.

With reference to the cases re-visited, it was found that out of a total of 948, 617 or 65 per cent. were still breast-fed only, compared with 66·7 per cent. in 1908; while taking other foods with the breast the percentage was 77·8.

The total number of deaths among those visited by the Inspectors was 57 (one in Putney, four in Streatham, 18 in Tooting, and 34 in Wandsworth). Table LII. shows these deaths arranged in monthly age periods.

The mortality among the infants visited by the Inspectors was only 25, compared with 86 per 1,000, the rate for the Borough for the year.

Measles ...	·39	·31	·21	·21	·13	·31

Other Septic Diseases.

12 deaths were caused by other Septic diseases, two in Clapham, one in Putney, six in Streatham, and three in Wandsworth.

Of these eight were stated to have been due to Malignant or Septic Endocarditis, and four to Septicæmia.

Two deaths were caused by Intermittent Fever or Malaria, the disease in both cases having been contracted abroad.

NON-ZYMOTIC DISEASES.

The next Table shows the number of deaths from these for the year, as well as for the previous decennium for the whole Borough. With the exception of the year 1899, the numbers are corrected for External and Internal Institutions.

TABLE LIV.

Deaths from Non-Zymotic Diseases.

	1899	1900	1901	1902	1903	1904	1905	1906	1907	1908	1909

All other Diseases...	641	924	951	952	827	1044	1019	1034	1050	1053	1057
Totals ...	2247	2712	2704	2793	2639	2906	2869	2931	2986	3003	3122

The above were the cause of 88·7 per cent. of the total deaths, compared with 88·8 in 1908, 87·4 in 1907, 84·7 in 1906, 86·4 in 1905, 84 in 1904, 85·8 in 1903, 83·9 in 1902, and 85·3 in 1901.

Cancer.

The total number of deaths from Cancer and other malignant diseases was 275, 101 of males and 174 of females, compared with 274 in 1908, 272 in 1907, 256 in 1906, an increase of one, but a decrease of 12·5 compared with the corrected decennial average.

The corrected death-rate was ·81 per 1,000, compared with ·83 in 1908, ·86 in 1907, ·82 in 1906, ·78 in 1905, ·92 in 1904, and ·98 in 1903.

The number of deaths and the death-rate in each sub-district was as follows:—Clapham 57 and ·82; Putney 19 and ·60; Streatham 97 and ·90; Tooting 22 and ·68; and Wandsworth 80 and ·82.

One of the deaths occurred at ages from one to five years, one from five to 15 years, four from 15 to 25 years, 161 from 25 to 65 years, and 108 over 65 years.

The following Table shows the number of deaths according to the part of the body affected.

TABLE LV.

Locality of Disease.	Males.	Females.	Total.
Stomach and Gullet	30	19	49
Uterus	...	40	40
Breast	...	40	40
Bowel	12	21	33
Liver	12	13	25
Abdomen	2	20	22

Bladder and Kidney	3	2	5
Pancreas	1	1	2
Other parts	16	14	30
Not specified	4	1	5
Total	101	174	275

In Institutions within the Borough nine deaths occurred from Cancer, three males and six females. Three of these deaths occurred in the Workhouse, one in the Hostel of God, one in Tooting Home, and four in private nursing homes.

84 of the deaths, 37 of males and 47 of females, occurred in external Institutions, 32 in Workhouses and Workhouse Infirmarys, and 52 in General and Special Hospitals.

80 of the total deaths occurred among females from Cancer of the Breast or Uterus, compared with 75 in 1908, 81 in 1907, 59 in 1906, 47 in 1905, and 69 in 1904.

The next Table shows the death-rate per 100,000 for each of the sub-districts and for the whole Borough for the year and for the 10 preceding years.

TABLE LVI.

SUB-DISTRICT.	1899.	1900.	1901.	1902.	1903.	1904.	1905.	1906.	1907.	1908.	Average for 10 years.	1909.
Clapham ...	96	94	104	109	95	107	73	79	104	86	84.7	82

Tooting ...	70	70	58	52	55	87	47	73	50	67	62.9	68
Wandsworth ...	70	48	63	89	103	83	80	87	78	77	77.8	82
Whole Borough	84	62	81	90	98	92	78	82	86	83	83.6	81

Compared with 1908, there has been an increase in this rate in Putney and Tooting, and a decrease in Clapham, Streatham and Wandsworth.

It is satisfactory to note that there has again been a slight decrease in the rate from this disease compared with the previous year and with the decennial average. In the decennium 1851-1860 this rate for England and Wales was only 32.5, but it increased in 1891-1900 to 75.8, and for London only in the decennium 1891-1900 to 86.3.

Tubercular Diseases.

The total number of deaths from diseases of a Tuberculous nature was 362, compared with 382 in 1908, 352 in 1907, 376 in 1906, 360 in 1905, and 380 in 1904.

273 of the deaths were due to Tubercular disease of the Lungs, 51 to Tubercular disease of the Brain, and 38 to other forms of Tubercular diseases.

The number of deaths from Tubercular disease of the Lungs and other Tubercular diseases and the rates per 1,000 for the whole Borough and for the separate sub-districts are shown in the next Table.

The corrected death-rate from Tubercular disease of the Lungs was '80 per 1,000, compared with '83 in 1908, '81 in 1907, '86 in 1906, '93 in 1905, and 1'07 in 1904; from other Tubercular diseases '26, compared with '33, '28, '35, '33 and '36; and from all Tubercular diseases 1'06, compared with 1'16, 1'09, 1'21, 1'26, and 1'43.

TABLE LVII.

SUB-DISTRICT.	Phthisis.		Other Tubercular Diseases.		TOTAL.	
	No. of Deaths.	Rate.	No. of Deaths.	Rate.	No. of Deaths.	Rate.
Clapham	60	'86	15	'21	75	1'07
Putney	32	1'01	7	'22	39	1'23
Streatham	55	'50	25	'23	80	'73
Tooting	33	1'03	10	'31	43	1'32
Wandsworth	93	'93	32	'32	125	1'25
Whole Borough ...	273	'80	89	'26	362	1'06

From all Tubercular diseases the rate per 1,000 was lower in Clapham, Streatham, Tooting and Wandsworth, but higher in Putney than in 1908.

With regard to Tubercular disease of the Lungs, the rates for Clapham, Putney and Tooting were above, and those for Streatham and Wandsworth under last year's rates.

From other Tubercular diseases the rate was '07 lower than in 1908.

This rate was lowest in Clapham and highest in Wandsworth, and the rate for Tubercular disease of the Lungs was lowest in Streatham and highest in Tooting.

The following Table shows the death-rate per 100,000 from Tubercular disease of the Lungs for the whole Borough, and for the separate sub-districts for the year, as well as for the preceding 10 years.

TABLE LVIII.

	1899	1900	1901	1902	1903	1904	1905	1906	1907	1908	Average for 10 years.	1909.
Clapham ...	148	114	131	117	93	124	95	97	74	78	107	86.
Putney ...	105	93	82	113	77	81	84	75	59	55	82	101
Streatham ...	84	91	79	58	61	79	67	67	64	75	72	50.
Tooting ...	145	116	88	83	82	121	100	77	82	77	97	103.
Wandsworth ...	131	137	140	92	133	130	120	103	112	104	120	93.
Whole Borough	119	119	112	87	91	107	93	86	81	83	97	80.

Compared with the decennial average the mortality from Tubercular disease of the Lungs shows a large reduction, and this is most marked in Clapham, Streatham and Wandsworth.

The great increase in the rate in Putney was due to the fact that a number of the deaths was of persons who had removed to that sub-district from other parts of London in consequence of premonitory symptoms of the disease.

Three deaths from Tubercular disease of the Lungs occurred in infants under one year, five in persons from one to five years, 12 from five to 15 years, 36 from 15 to 25 years, 199 from 25 to 65 years, and 18 over 65 years. From other Tubercular diseases 14 deaths occurred under one year, 36 from one to five years, 16 from five to 15 years, 11 from 15 to 25 years, 11 from 25 to 65 years, and one over 65 years.

The list which follows shows the occupations of those who died from Tubercular disease of the Lungs during the year.

Total	162	111	273

Of the total number of males who died, viz.:—162, the occupation of 149 is stated, nine were children and four had no occupation.

As in previous years clerks and labourers head the list, 23 deaths having occurred among the former, one of which was a female, and 22 among the latter class.

Among females, of 111 deaths, 14 only were engaged in some occupation, four having been domestic servants. 17 had been widows, wives or daughters of artisans, 26 of the labouring class, 17 of travellers or clerks, eight were children, and 27 had no occupation.

The next Table shows the deaths and death-rates in males and females from Tubercular disease of the Lungs, and for other Tubercular diseases, as well as the deaths and death-rates among children under five years from other Tubercular diseases, for the 10 years 1899-1908, and for the year 1909.

Among males the rate for Tubercular disease of the Lungs for the year 1909 was 1·03, compared with 1·16 the decennial average; and among females ·59, compared with ·76; while from other Tubercular diseases the rate among males was ·26, compared with ·44; and among females ·25, compared with ·31.

Among children under five years the rate for the year was ·14, compared with ·24, the decennial average.

Although the reduction in the rate has been considerable compared with the decennial average, yet it is not at all certain that this diminution will continue unless other additional measures are taken to prevent the spread of the disease.

It is to be specially noted that during the last four years the rates have remained practically the same, and if the population has been over-estimated, which is quite probable, then these slight differences would altogether disappear.

The public are not yet sufficiently educated on this question to realise that Tubercular disease of the Lungs can be prevented, but this prevention will never be brought about unless compulsory notification and segregation of the more fully advanced cases are adopted.

Notification of Consumption.

The Local Government Board issued an Order in December, 1908, to provide for the notification to the Medical Officers of Health of Sanitary Authorities of cases of Pulmonary Tuberculosis occurring amongst the inmates of Poor Law Institutions, or amongst persons under the care of District Medical Officers, and for the taking of certain measures in such cases.

This Order came into force on January 1st, 1909, and the following report was made to the Public Health Committee on the 26th April, 1909. The report was not made earlier, as it was thought advisable to wait for three months to ascertain the number of cases that would be notified in that period.

“REPORT OF THE MEDICAL OFFICER OF HEALTH ON THE NOTIFICATION OF PULMONARY TUBERCULOSIS OR CONSUMPTION.

“In January, 1903, a Report was made to the Council dealing with the above, and since that date the voluntary system of notification has been in force in this Borough.

“In that Report I dealt fully with the question, pointing out the benefits that would possibly result from such notification, more especially in the more closely populated localities and among the necessitous poor.

“It was also pointed out that the provision of Sanatoria would be beneficial, but that permanent good could not be expected unless the patient is prohibited from returning to town life and work.

“In my Report for 1908, a Table is inserted showing the number of cases notified since 1903, the number of cases in which death occurred, the number removed and recovered, and the number living at the close of the year 1908.

“This Table is as follows :—

Year.	Cases reported.	Cases died.						Removed.	Recovered.	Not Phthisis.	No enquiries.	Cases living at end of 1908
		1903	1904	1905	1906	1907	1908					
1903	86	44	9	1	17	8	6	1	...
1904	102	...	50	8	1	1	...	30	5	...	6	1
1905	82	33	4	2	...	29	4	...	9	1
1906	64	30	5	...	13	6	...	9	1
1907	40	17	...	21	1	1
1908	58	25	12	5	16
Totals	432	44	59	42	35	25	25	122	23	6	31	20

“In all 432 cases have been notified, and of these 230 have died, 122 have removed, 23 recovered, six were not cases of Consumption, in 31 no enquiries were made at the request of the notifying practitioner, while 20 were still alive at the close of the year.

“These cases were, with the exception of the 31 in which no enquiries were made, visited by the female Sanitary Inspectors and kept under observation till the death or removal of the patient, when the premises were disinfected and cleansed. The 20 cases remaining are still being visited by these Inspectors. The circular which was issued in 1903 is still used and valuable instruction is given by the Inspectors to those in charge of the patients, or to the patients themselves.

“In the beginning of 1909 the Local Government Board issued regulations making it compulsory on every Poor Law Medical Officer to notify any cases of Pulmonary Tuberculosis to the Medical Officer of Health, and also to notify any change of address of the patients.

“These regulations also point out that this Council may :
(1) take all such measures as are authorised with regard to the destruction and disinfection of infected articles or the cleansing or disinfection of premises; (2) take all such measures as are appropriate or necessary for the safe disposal or destruction of infective material or otherwise for the prevention of the spread of infection from such material; (3) afford or supply all such assistance, facilities or articles as will obviate, remove, or diminish the risk of infection arising from the condition of the sleeping apartment, and (4) furnish on loan or otherwise any appliance which would assist in preventing the spread of infection.

“These regulations were supplemented by a Memorandum from the Medical Officer to the Local Government Board which dealt with the pathology of the disease and also with the administrative measures that can be taken and the assistance that can be given to the patient.

“It does not come within the scope of this Report to discuss the pathology of the disease as that has been dealt with fully in the Memorandum, but it will be necessary to point out to this Council what has been done during the past five years' administration to prevent the disease, and also what additional measures might be adopted to still further limit its spread.

“The Memorandum states that the measures which may be adopted are educational measures, which comprise means for instructing the general community, those more directly exposed to the infection of tuberculosis, and those suffering from the disease. For instructing the general community there is no doubt that the teaching of hygiene in the elementary schools would prove most beneficial, but to the rest of the general public the difficulty of imparting the necessary information is at present a serious one. Much may be done by voluntary work by church societies, friendly societies, and by public lectures generally, but these agencies would not, in my opinion, be sufficient or even capable of reaching the careless and ignorant poor, among whom cases of this disease are very common.

“With regard to the giving of instructions to those already tuberculous, and to those in attendance on them, this has been done in this Borough for the past six years, and with considerable success, although this cannot be definitely stated in statistical form.

“ More frequent visits are, however, advisable than is at present possible with the existing staff.

“ The other measures against Tuberculosis mentioned in the Memorandum are the investigation of cases of the disease, advice being given, disinfection and cleansing recommended, and spit bottles supplied to the poor. Spit bottles have not yet been supplied by this Council, but from the reports of the cases notified since January 1st, this would appear to be a most desirable and necessary measure to adopt, and not a costly one. Each bottle costs about 5d. wholesale, and four dozen would possibly be supplied in one year.

“ The provision of Dispensary and Poor Law treatment of patients is a measure which is at present carried out in this Borough to a considerable extent, as will be observed in the particulars given further on in this report on the cases notified since January 1st of this year. The provision of Dispensary treatment would include all the General Hospitals, the Brompton Hospital, as well as such agencies as the Clapham Dispensary, the Weir Dispensary, Medical Aid Societies, and Slate Clubs, most of these not being wholly self-supporting. They, however, only deal with the early treatment of cases, when the patient is in many instances still at work and able to continue his weekly contributions. As soon as these cease, he must eventually apply to the Relieving Officer, and be treated as a parish case.

“ The next measure—the provision of sanatoria—opens up a very wide question, and one which cannot be adequately or economically dealt with by individual boroughs. The only Metropolitan Borough which has done anything in providing sanatoria for Consumptives is Woolwich, and that Borough supports seven beds in the Peppard Sanatorium. The cost

of this amounts to about £500 per annum, and from an educational and curative point of view, this provision by the Woolwich Council has proved decidedly satisfactory.

“ To sum up: the measures carried out at present in this Borough are:—

“ (1.) Notification.

“ (2.) Visiting cases and exercising a certain amount of supervision over those treated at home.

“ (3.) Disinfection and cleansing of premises after death or removal.

“ The other measures which might be taken are:—

“ (1.) The provision of spit bottles and paper handkerchiefs.

“ (2.) The establishment of a dispensary for Tuberculosis.

“ (3.) The provision of a certain number of beds at a sanatorium for cases at an early stage of the disease.

“ (4.) The institutional treatment of advanced cases so as to prevent infection of the healthy.

“ FINANCIAL ASPECT OF THE SUBJECT.

“ Dr. Newsholme, in his book on the prevention of Tuberculosis, has collated statistics on this subject, and calculated that by the experience of England and Wales in the years 1891-1900, nearly 10 millions sterling would be saved by the total abolition of Consumption in men, making no allowance for the loss sustained by sickness, nor from the premature death of women from this disease.

“ It is also stated that one-eleventh of the total cost incurred by the relief of pauperism in England and Wales is caused by Consumption, the amount annually spent on paupers who were made such by Consumption being over one million pounds.

“ Again, if we assume that only one year’s disablement is caused by every fatal case, then the loss in wages alone, reckoning £1 per week as an average, amounts to over one million pounds.

“ In this Borough 1,300 deaths of males between the ages 20-65 have occurred in the 10 years 1899-1908, or an average of 130 per annum, and a consequent loss in wages alone of £6,500 per annum.

“ Dr. Newsholme, in dealing with this question, says: ‘ Looking at the subject from the standpoint of natural economics, it is not open to dispute that the most elaborate and complete measures of every description against Tuberculosis would only cost a fraction of the present total loss inflicted by this disease, and that this expenditure would, as time goes on, be paid for many times over in the prevention of sickness and increase of efficiency of the community.’

“ NOTIFICATION OF CASES SINCE JANUARY 1ST, 1909.

“ The total number of cases notified since January 1st was 173, of which 146 were cases notified under the Regulations for Poor Law cases, which came into force on that date.

“ Of these 173, 42 were notified from the Infirmary, 55 from the Tooting Home, 44 by District Medical Officers, and five from other Poor Law Institutions.

“ Only 16 of these 173 cases are at present being treated at home, the others being treated in institutions.

“ 15 cases have been notified from Brompton Hospital, 14 of which are being treated at home; and 12 by private practitioners, seven of which are being treated at home.

“ Since the beginning of the year 17 of the cases notified by the Poor Law authorities have died, and six of those notified otherwise—a total of 23 in all.

“ Including those notified privately in previous years, the Inspectors have on their register for visiting 59 cases.

“ They report that in only one case visited is a proper spit bottle being used, and that in all the other cases rag or paper is used.

“ The latter is not nearly so satisfactory a means of disposal of expectoration, as a fire for destruction is not always available. I am of opinion that if the Council saw fit to supply spit bottles much good would result.”

From 1st January to 31st December, 317 cases were notified, 49 of these belonging to Clapham, 18 to Putney, 47 to Streatham, 22 to Tooting, and 122 to Wandsworth, and in 59 cases the home address was not stated.

The following Table shows the number of these cases received, and also the number of times the cases were notified :—

TABLE LXI.

	Clapham.	Putney.	Streatham.	Tooting.	Wandsworth.	Unknown.	Total.
One Notification	27	8	26	14	67	59	201
Two Notifications	16	7	14	5	41	...	83
Three Notifications	5	2	6	3	10	...	26
Four Notifications	1	...	1	...	3	...	5
Six Notifications	1	1	...	2
	49	18	47	22	122	59	317

It will be noted that 201 cases were notified once; 151 of these were on Form A by the Medical Officers of Poor Law institutions and 50 on Form B by the District Medical Officers.

83 cases were notified twice. 59 of these were by District Medical Officers and the Medical Superintendent of the Union Infirmary, 16 by the Medical Superintendent of the Infirmary and the Medical Officer of the Tooting Home, three by the Medical Officer of the Workhouse and the Medical Superintendent of the Infirmary, and two by Medical Officers of other Institutions and Infirmaries.

26 cases were notified three times. 17 of these were by District Medical Officers, Medical Superintendent of the Infirmary, and the Medical Officer of the Tooting Home; four by District Medical Officers twice and the Medical Superintendent of the Infirmary; three by the Medical Superintendent of the Infirmary twice and the Medical Officer to the Tooting Home; and two by District Medical Officers and the Medical Superintendent of the Infirmary twice.

Five cases were notified four times. Three by District Medical Officers, the Medical Superintendent of the Infirmary, and the Medical Officer to the Tooting Home twice; and two by District Medical Officers, the Medical Superintendent of the Infirmary twice, and the Medical Officer to the Tooting Home.

Two cases were notified six times. One by District Medical Officers twice and the Medical Superintendent of the Infirmary four times; and one by District Medical Officers three times and the Medical Superintendent of the Infirmary three times.

This makes a total of 477 notifications received for the 317 cases.

The next Table shows the number of cases in the various sub-districts, and the number who died, recovered, removed, the number still in Institutions, and the number under observation.

The totals in Clapham, Tooting, and Wandsworth do not correspond with those on Table LXI., as the unknown cases have been allocated to the sub-district in which the patient last resided, this residence being in all cases an Institution in that sub-district.

TABLE LXII.

	Clapham.	Putney.	Streatham.	Tooting.	Wandsworth.	Whole Borough.
Number of cases notified	50	18	47	56	146	317
Number dead	9	9	12	5	36	71
„ recovered	2	2
„ removed	1	1	3	3	3	11
„ in institutions	28	7	22	39	88	184
„ under observation	12	1	10	9	17	49
Totals	50	18	47	56	146	317

71 discharge certificates were received, 68 on Form C from Superintending Officers and three on Form D from Relieving Officers.

Of the 71 certificates, 55 were received from Superintending Officers in the Wandsworth Union, and 13 in other Unions, two from Willesden, two from Southwark, and one each from Swansea, Strood, Croydon Rural, Central London District, Camberwell, Fulham, Chelsea, Kensington, and Paddington.

Of the 55 certificates from Superintending Officers in the Wandsworth Union, 35 were received from the Union Infirmary and 20 from the Tooting Home.

The 71 certificates received related to 64 cases, one case having been notified three times and five cases twice.

13 cases were notified as having gone to addresses in Clapham, four in Putney, 12 in Streatham, eight in Tooting, and 27 in Wandsworth. Six of these cases could not be found, as

wrong addresses had been given. Three in Wandsworth were discharged to Common Lodging-Houses, one discharged from Swansea to Wandsworth was taken ill on the way, and is now in Pontypridd Infirmary, one discharged from Willesden comes to Wandsworth at intervals for a few days, and then returns to Willesden Infirmary.

Many of the cases notified from Tooting Home at the beginning of the year could not be traced, as at the addresses given they were not known, some of them having been in that Institution for some time.

32 of the cases allocated to Tooting were notified from Leavesden Asylum as having been received from Tooting Bec Asylum, no home address being given.

During the year 74 cases of Phthisis were voluntarily notified by medical practitioners, 18 belonging to Clapham, eight to Putney, four to Streatham, seven to Tooting, and 37 to Wandsworth, compared with 85 in 1908, 49 in 1907, 74 in 1906, and 104 in 1905.

Of the 74 cases notified, 39 were notified from the Brompton Hospital, four from Military Hospitals, four from Margaret Street Hospital, and 27 were notified by private practitioners.

At the close of the year 1909 there were 70 cases still on the register, but five of these became Poor Law cases in 1909, and are included in the number given as such cases.

22 of the cases died, six of these having been notified in 1908 and one in 1906.

TABLE LXIII.
CONSUMPTION, 1903—1909.

Year.	Cases reported.	Cases died.							Removed.	Recovered.	No enquiries.	Cases living at end of 1909.
		1903	1904	1905	1906	1907	1908	1909				
1903	80	44	9	1	17	8	1	...
1904	102	...	50	8	1	1	29	5	6	2
1905	82	33	4	2	29	4	9	1
1906	64	30	5	...	1	12	6	9	1
1907	40	17	21	...	1	1
1908	75	25	6	20	...	5	19
1909	74	15	7	2	4	46
Totals	517	44	59	42	35	25	25	22	135	25	35	70

Of the total number of cases notified, viz., 391, 68 belonged to Clapham, 23 to Putney, 56 to Streatham, 62 to Tooting, and 182 to Wandsworth.

Two of the cases were of infants under one year, 11 from one to five years, 25 from five to 15 years, 55 from 15 to 25 years, 279 from 25 to 65 years, and 19 over 65 years.

The whole of the work in connection with these cases was carried out by the female Sanitary Inspectors, and I can report that this work was done in a most thorough and satisfactory manner.

The total number of visits paid was 594, 103 in Clapham, 47 in Putney, 79 in Streatham, 44 in Tooting, and 321 in Wandsworth.

As in previous years, the pamphlet which has been in use since 1903 was left, and the instructions thereon were in many cases much appreciated.

During the year 28 spit bottles have been supplied to persons suffering from this disease, these persons not being in a position to purchase the same.

It is too soon to express a definite opinion as to the beneficial effects of the compulsory notification of Poor Law cases, but there is no doubt that the educational effect is great. In the cases under observation the instructions are generally found to be carried out by the patient and his friends, specially with regard to the destruction of the sputa.

The Inspectors report that there is always a difficulty in obtaining reliable family histories, and also in tracing sources of infection. In most of the cases the relatives had only a very vague idea of the causes of the disease, and connect Consumption only with lung trouble.

Great difficulty is experienced in obtaining efficient isolation at home, which in many of the cases consisted only of one or two rooms. In such cases the removal of the patient to a sanatorium is advised, and in a few cases assistance has been given to try and obtain this, but not until some public institution is available for the needs of the Borough will it be possible to get those cases removed in which, from a public health aspect, isolation is necessary.

Of the 391 cases visited by the Inspectors, it was possible to ascertain a definite history of infection in 113.

In 17 of the cases the father had died of Consumption, in 16 the mother, in 11 a sister, in 10 a husband, in six both father and sister, in four the brother, in four the brother and sister, in three the mother and brother, in one both father and mother, in four children of the patient, and in 20 other relatives.

In some of the cases investigated the mortality from this disease among members of the family was most serious. For example, in one case the grandfather, two uncles, and seven brothers and sisters had previously died of Consumption; in another eight brothers and sisters, four cousins, and a maternal aunt; and in a third, father, mother sister, and brother.

In 14 other cases more than two near relatives had died previous to the notification of the cases investigated.

During the year disinfection was carried out at 255 premises, either after the death or removal of the patient, compared with 184 in 1908 and 135 in 1907. 69 of the premises disinfected were in Clapham, 23 in Putney, 40 in Streatham, 27 in Tooting, and 96 in Wandsworth.

Deaths from Phthisis in Public Institutions.

The following Table shows the number of deaths and the rate to total deaths from this disease for the year 1909, and for the previous 10 years :—

TABLE LXIV.

Year.	Total Number of Deaths.	Institutions.					
		Union Infirmary.		General and Special Hospitals.		Total.	
		Number.	Rate.	Number.	Rate.	Number.	Rate.
1899	234	40	17.1	23	9.8	63	26.9
1900	276	33	11.9	16	5.8	49	17.7
1901	259	53	20.4	23	8.9	76	29.3
1902	215	27	12.6	18	8.3	45	20.9
1903	230	48	20.9	19	8.2	67	29.1
1904	283	54	19.1	24	8.4	78	27.5
1905	266	55	20.6	20	7.5	75	28.1
1906	267	69	25.8	26	9.7	95	35.5
1907	261	65	24.9	37	14.2	102	39.1
1908	273	55	20.1	24	8.8	79	28.9
Average	256	49	19.4	23	8.9	72	28.3
1909	273	74	27.1	32	11.7	106	38.8

This Table shows that the rates for the present year are higher than the average for the past 10 years, and also than the rates in 1908.

The rate in the Union Infirmary showed a considerable increase, and the rate in the General and Special Hospitals has also increased, but not so greatly.

Previous to 1908 these rates showed a tendency to increase, the rate in 1907 having been 39·1 and in 1898 only 23·7, but in 1908 this rate dropped to 28·9, in 1909, however, rising again to 27·1 in the Union Infirmary, and 11·7 in General and Special Hospitals.

Bacteriological Examination of Sputum.

105 examinations of sputum were made at the Lister Institute : 11 from Clapham, one from Putney, 41 from Streatham, seven from Tooting, and 45 from Wandsworth.

In 35 of the cases it was reported that the bacillus had been found, and in 70 that it was absent.

Circulatory Diseases.

From the above group of diseases 366 deaths occurred, 168 of which, 74 males and 94 females, were due to Organic disease of the Heart.

80 of these deaths occurred in Clapham, 34 in Putney, 114 in Streatham, 42 in Tooting, and 96 in Wandsworth.

Of the deaths from Organic diseases of the Heart, 11 were from five to 15 years, 15 from 15 to 25 years, 73 from 25 to 65 years, and 69 over 65 years.

The number of deaths in 1909 was 16 more than in 1908, but 70 under the corrected decennial average.

Respiratory Diseases.

The total number of deaths was 690, compared with 543 in 1908, 550 in 1907, 511 in 1906, and 512 in 1905. The number of deaths was 147 more than in the previous year, and 45 above the corrected decennial average.

151 of the deaths occurred in Clapham, 67 in Putney, 164 in Streatham, 99 in Tooting, and 209 in Wandsworth.

Compared with 1908, there is an increase in all the sub-districts, but the greatest increase occurred in Streatham.

160 of the deaths occurred from Acute Bronchitis, compared with 139 in 1909; 186 from Chronic Bronchitis, compared with 127; 128 from Lobar Pneumonia, compared with 97; 179 from Lobular or Broncho-Pneumonia, compared with 149; and 37 from other diseases of the Respiratory Organs, compared with 31.

115 of the deaths were of infants under one year, 89 of persons from one to five years, 12 from five to 15 years, 14 from 15 to 25 years, 180 from 25 to 65 years, and 243 over 65 years.

The greatest number of deaths from these diseases occurred among persons from 25 to 65 years and over 65 years.

The great increase in the mortality from these diseases was due to the severe climatic conditions experienced in the months of February and March.

From Chronic Bronchitis alone 126 deaths occurred among persons over 65 years of age, compared with 97 in 1908.

Premature Birth and Developmental Diseases.

254 deaths, 146 of males and 108 of females, were registered as having occurred from these diseases, compared with 294 in 1908, 285 in 1907, 315 in 1906, and 317 in 1905. The number of deaths is thus 40 under last year, and 114 under the corrected decennial average.

111 of the deaths were due to Premature Birth and 143 to Developmental diseases. 250 were of infants under one year, and four of children from one to five years.

The number of deaths from these diseases is shown more in detail in Tables XIX. to XXV., which deal with Infantile Mortality in an earlier part of this Report.

Old Age.

192 deaths, 60 of males and 132 of females, occurred from Old Age, compared with 166 in 1908, 194 in 1907, 191 in 1906, 173 in 1905, and 218 in 1904.

46 of these occurred in Clapham, 20 in Putney, 62 in Streatham, 13 in Tooting, and 51 in Wandsworth.

191 of these deaths were of persons over 65 years, and one was under that age. Seven were from 65 to 70, 18 from 70 to 75, 50 from 75 to 80, 50 from 80 to 85, 40 from 85 to 90, 24 from 90 to 95, and two over 95 years.

1,089 deaths, or 30·9 per cent. of the total deaths occurred in persons over 65 years, compared with 28·5 in 1908, 30·3 in 1907, 26 in 1906, 24·2 in 1905, and 25·5 in 1904.

The percentage of deaths over 65 years to total deaths in the sub-districts was as follows :—In Clapham 33·6, in Putney 30·8, in Streatham 37, in Tooting 19·8, and in Wandsworth 27.

Deaths from other causes.

From Alcoholism, Acute and Chronic, eight deaths, three of males and five of females, occurred; and 38, 19 of males and 19 of females, from Cirrhosis of the Liver, compared with 12 and 32 in 1908.

From Nephritis and Bright's disease 106 deaths occurred, 55 of males and 51 of females, compared with 128 in 1908.

From diseases of the Brain and Nervous System 372 deaths occurred, compared with 320 in 1908, 308 in 1907, 299 in 1906, and 307 in 1905. 86 of these deaths were in Clapham, 42 in Putney, 118 in Streatham, 26 in Tooting, and 100 in Wandsworth.

26 of the deaths were due to Meningitis, 14 to Inflammation and Softening of the Brain, 158 to Apoplexy, 30 to Hemiplegia and Paralysis, 31 to General Paralysis of the Insane, 12 to Epilepsy, 34 to Convulsions, 17 to Paraplegia and diseases of the Spinal Cord, and 50 to other diseases of the Nervous System.

The number of deaths from Apoplexy in each sub-district was as follows:—In Clapham 37, in Putney 14, in Streatham 62, in Tooting 11, and in Wandsworth 34, a total of 158, compared with 120 in 1908, 143 in 1907, and 115 in 1906.

From Accidents and diseases of Parturition 14 deaths occurred, three from 15 to 25 years, and 11 from 25 to 65 years. This, added to the number of deaths from Puerperal Fever, viz., 8, gives a total of 22 deaths after child-birth, or a proportion of 3·14 per 1,000 births. In England and Wales for the year 1908, which is the latest available report, this rate was 3·57, and in the 10 years immediately preceding, the average proportion had been 4·31 per 1,000 births. Of the 14 deaths, two occurred in Clapham, one in Putney, three in Streatham, two in Tooting, and six in Wandsworth. Six of the deaths were due to Hæmorrhage, three to Convulsions, one to Extra-uterine Gestation, one to Rupture of Uterus, one to Cæsarian Section, and two to Cardiac Syncope.

Diabetes Mellitus was the cause of 31 deaths: three in Clapham, two in Putney, 10 in Streatham, two in Tooting, and 14 in Wandsworth.

From Acute Appendicitis there were 19 deaths during the year: four in Clapham, four in Streatham, one in Tooting, and 10 in Wandsworth.

One case of death from Manslaughter was reported in the person of a male aged 41 years, and one of Wilful Murder in the case of a newly-born infant.

Violence.

118 deaths, 69 of males and 49 of females, occurred from Violence, compared with 107 in 1908, 90 in 1907, 108 in 1906, and 91 in 1905.

87 of the deaths were due to Accidental and 31 to Suicidal causes.

31 of the deaths belonged to Clapham, 13 to Putney, 34 to Streatham, eight to Tooting, and 32 to Wandsworth.

From Accidental causes 10 of the deaths were of infants under one year, eight of persons from one to five years, nine from five to 15 years, nine from 15 to 25 years, 35 from 25 to 65 years, and 16 over 65 years.

Of the deaths from Suicidal causes three were from 15 to 25 years, 24 from 25 to 65 years, and four over 65 years.

The number of deaths from Violence, although 11 more than in 1908, is 24 under the corrected decennial average.

Inquests.

The next Table shows the number of Inquests held in the Borough during the year.

The total number was 208, compared with 205 in 1908, 181 in 1907, 215 in 1906, 177 in 1905, and 196 in 1904.

43 of the Inquests were held on persons who died in Clapham, 26 in Putney, 51 in Streatham, 22 in Tooting, and 66 in Wandsworth.

In 129, or 62 per cent. of the cases, a verdict of death from Natural causes was returned; in 40, or 19·2 per cent., from Accidental causes; in 32, or 15·3 per cent., from Suicidal causes; in four Open verdicts; in one of Manslaughter and in one of Murder were returned; while one Execution took place.

TOTALS	43	26	51	22	66	208

27 of the Inquests were held on persons not belonging to the Borough who died in the Borough. Four of these were on persons who died in the Prison, one in the Tooting Bec Asylum, one in the Workhouse, two in the River Thames, one in the Priory, one in St. Anne's Home, and 17 in other places and on the street.

90 of the Inquests were held on persons belonging to the Borough who died outside the Borough: 17 from Clapham, 11 from Putney, 25 from Streatham, six from Tooting, and 31 from Wandsworth, and the following Table shows the causes of death. 30 of these deaths were from Natural, 45 from Accidental, and nine from Suicidal causes; in three Open verdicts were returned, in two verdicts of Manslaughter, and in one of Murder were returned.

TOTALS	17	11	25	6	31	90

Deaths and Causes of Death in Public Institutions.

In the Public Institutions in the Borough 837 deaths occurred during the year, compared with 818 in 1908, 807 in 1907, 771 in 1906, 729 in 1905, and 669 in 1904. Of these, 656 deaths were of persons not belonging to the Borough, compared with 633 in 1908, and 181 of persons belonging to the Borough, compared with 185 in 1908.

The increase was due to the increase in the number of deaths of persons not belonging to the Borough.

In Clapham 33 deaths occurred in the Hostel of God, three of these being Borough residents. Of these, 21 were due to Cancer, 10 to Tubercular disease of the Lungs, one from other Septic diseases, one from other Tubercular disease, one from Nephritis, and two from other causes.

Nine deaths occurred in the Priory, Roehampton, two of these being Borough residents. Of these, two were from diseases of the Respiratory Organs, one from Old Age, one from Suicide, and five from other causes.

In Streatham there were 22 deaths in St. Anne's Home and 15 in the Middlesex County Asylum Annexe. Of the 22 in St. Anne's Home one was from Cancer, 12 were from diseases of the Respiratory Organs, two from Old Age, one from Cirrhosis of the Liver, one from Accident, and six from other causes. Of the 15 in the Middlesex County Asylum Annexe, six were from Tubercular disease of the Lungs, one from other forms of Tubercular diseases, two from diseases of the Respiratory Organs, one from Softening of the Brain, and four from other causes.

In Tooting 503 deaths occurred in Public Institutions, 302 in Tooting Bec Asylum, 114 in the Fever Hospitals, 84 in Tooting Home, and three in Newlands House Asylum.

98 of these — 51 in the Tooting Home, 37 in the Fever Hospitals, nine in Tooting Bec Asylum, and one in Newlands House Asylum—were of persons belonging to this Borough.

Of the 302 deaths in the Tooting Bec Asylum, 129 were from Old Age, 14 from Tubercular disease of the Lungs, 54 from diseases of the Respiratory Organs, 33 from diseases of the Heart, 34 from diseases of the Nervous System, 10 from Bright's disease, six from Cancer, one from Accident, and 21 from all other causes.

In the Fever Hospitals 84 deaths occurred, 37 of which belonged to the Borough, compared with 126 in 1908, 53 in 1907, 55 in 1906, 50 in 1905, and 106 in 1904. 30 of these deaths were from Scarlet Fever, 47 from Diphtheria, none from Enteric Fever, two from Measles, two from diseases of the Respiratory Organs, two from Enteritis, and one from Accident.

114 deaths occurred in the Tooting Home, 51 of which were Borough residents. 39 of these were from Tubercular disease of the Lungs, 44 from Old Age, 10 from diseases of the Respiratory Organs, three from Cancer, four from Organic disease of the Heart, and 14 from all other causes.

In Wandsworth 76 deaths occurred in the Middlesex County Asylum, 14 in the Royal Hospital for Incurables, six in the Prison, and 68 in the Workhouse.

Of the 76 deaths in the Middlesex County Asylum, 14 were from Tubercular disease of the Lungs, 10 from Old Age, eight from diseases of the Respiratory Organs, three from Bright's disease, one from Enteritis, one from other forms of Tubercular diseases, two from Cancer, 26 from diseases of the Brain and Nervous System (of which 14 were from General Paralysis of the Insane, six from Epilepsy, and one from Apoplexy), seven from Heart disease, and six from other causes.

Of the 13 deaths in the Royal Hospital for Incurables, three were from Tubercular diseases, one from Cancer, two from diseases of the Respiratory Organs, and seven from all other causes.

Of the six deaths in the Prison, two were from Tubercular diseases, two from diseases of the Respiratory Organs, one from disease of the Stomach, and one was a case of Execution.

Of the 68 deaths in the Workhouse, 22 were from Old Age, 16 from Measles, four from Cancer, seven from Premature Birth and Developmental diseases, three from diseases of Parturition, three from diseases of the Respiratory Organs, and 13 from other causes.

In other places not Institutions 88 deaths occurred, 12 of these being from Accidents, 10 from Cancer, 10 from Suicide, seven from Tubercular disease of the Lungs, two from disease of the Heart, six from diseases of the Respiratory Organs, three from Old Age, two from Nephritis, two from Influenza, one from Enteric Fever, and 23 from all other causes. 32 of these deaths occurred in Private Nursing Homes, and three in the River Thames.

There has again been a marked increase in the number of deaths in Institutions, and to show that the increase has been going on for some years, the following Table has been prepared.

The comparative percentages for London are also shown, and it will be noted that in the 20 years 1888-1907 these increased in London from 23·6 to 39·8, with an average of 30·2, and in Wandsworth from 15·2 to 28·7, with an average of 18·7.

In this Borough the percentage is lower than for the whole of London, and this is what might be expected in consequence of the social condition of the population, but in spite of the better social condition, it is rather startling to find that over 28 per cent. of the total deaths occurred in Institutions, and that for the year 1908 12·8 per cent. occurred in the Workhouse and Workhouse Infirmary.

Compared with the 20 years' average, the greatest increase has occurred among the deaths in General and Special Hospitals, while the rate in the Metropolitan Asylums Board's Hospitals is about the same.

TABLE LXVII.

PERCENTAGE OF DEATHS IN PUBLIC INSTITUTIONS TO TOTAL DEATHS
FOR THE YEAR 1908 AND FOR THE 20 PREVIOUS YEARS.

Year.	Workhouse and Workhouse Infirmarys.		General and Special Hospitals.		Metropolitan Asylums Board's Hospitals.		Total.	
	London.	Wands-worth.	London.	Wands-worth.	London.	Wands-worth.	London.	Wands-worth.
1888	12.0	8.1	10.7	6.0	.9	1.1	23.6	15.2
1889	12.3	7.5	11.3	7.1	.9	.6	24.5	15.2

1894	13.4	8.7	12.5	7.1	4.7	2.4	28.7	18.2
1895	13.5	9.0	11.4	6.7	1.9	1.2	26.8	16.9
1896	13.5	8.5	12.1	7.4	2.2	1.5	27.8	17.4
1897	14.3	9.1	12.5	7.8	2.3	3.3	29.1	20.2
1898	14.7	8.1	12.2	6.1	2.1	2.8	29.0	17.0
1899	15.8	8.5	12.0	7.2	2.1	1.8	29.9	17.5
1900	15.8	8.0	12.7	6.5	2.0	1.8	30.5	16.3
1901	16.5	9.5	13.6	8.0	2.4	1.8	32.5	19.3
1902	16.6	8.4	14.0	8.4	3.5	3.7	34.1	20.5
1903	18.3	10.8	15.5	9.0	1.6	1.9	35.4	21.7
1904	18.1	11.0	15.5	10.5	1.4	1.6	35.0	23.1
1905	19.3	12.0	16.7	10.5	1.5	1.8	37.5	24.3
1906	19.3	12.5	17.4	11.2	1.6	2.0	38.3	25.7
1907	20.05	12.7	17.4	11.5	1.9	1.7	39.8	25.9
Averages 1888-- 1907	15.28	9.16	13.04	7.79	1.97	1.82	30.23	18.77
1908	21.4	12.8	18.7	14.1	1.8	1.8	41.9	28.7

Cutting-off Notices.

During the year 95 notices with respect to 120 premises were received from the Water Board stating that the supply had been withdrawn.

20 of the premises were in Clapham, eight in Putney, 41 in Streatham, 26 in Tooting, and 25 in Wandsworth.

The supply was withdrawn for non-payment of rates from 38 premises, from 38 premises in consequence of defects, in 20 the premises were empty, in 23 the supply was withdrawn by request, and in one the reason was not stated.

Compared with 1908, there has been an increase in the number of notices received, chiefly in consequence of defects and at the request of the owners.

Mortuaries.

No change has taken place in the four Mortuaries during the year. I have inspected them on several occasions, and am able to report that the Regulations and By-laws made by the Council in 1905 have been in all cases complied with.

The site of the new Mortuary for Wandsworth has not yet been decided on, and the matter is still under the consideration of the Public Health Committee.

In Clapham, 38 bodies were removed to the Mortuary, compared with 51 in 1908; in Streatham 55, compared with 38; and in Wandsworth 113, of which 63 were from Wandsworth, 26 from Putney, and 24 from Tooting—a total of 206, compared with 204 in 1908.

General Sanitary Work in 1909.

The following list shows the special inspections made by me during the year :—

- (1.) An inspection was made of the land at Putney Vale Cemetery about to be purchased by the Council for an extension of the same, and the following report was submitted to the Burials Committee :—

“ 10th May, 1909.

“ In accordance with your instructions, I have made an inspection of the land which it is proposed to add to the Putney Vale Cemetery, and have to report as follows :—

“ This land has a frontage of 469 feet on to Kingston Road, and is a continuation of the land which is at present used as a cemetery. The highest point of the land, which is close to Wimbledon Common, is about 90 feet above ordnance datum, and the lowest point, which is close to Kingston Road, is about 54 feet.

“ Generally speaking, the soil is a mixture of loam, gravel, and clay, with an average of 1 ft. 6 in. of mould on the surface. Seven trial holes have been dug, as shown on the plan drawn out by the Borough Engineer and Surveyor, and these, on inspection, showed that, generally, the geological conditions are similar to those existing in the present Cemetery. In the trial holes, where water was found, the level of this averaged five feet from the surface, and I am of opinion that this is about the average of the ground water level in this locality.

“ There will be no difficulty in properly draining this ground to the depth necessary to render the graves dry, as there is a sewer in close proximity.

“ The ground water naturally flows towards Beverley Brook, the water level at that Brook being about 29½

feet above ordnance datum and 800 yards distant from the land.

“ The nearest inhabited house is situated on the Portsmouth Road, and is about 100 yards distant, while Newlands Farm, which is at a lower level, is over 200 yards distant.

“ There are no sources of domestic water supply near the site, all the houses being supplied with water by the Southwark and Vauxhall District of the Metropolitan Water Board.

“ In my opinion, with proper drainage, the proposed site is suitable for a cemetery.”

- (2.) As in previous years, special inspections were made of several localities in consequence of complaints of smells from road gullies and sewer ventilators.

The number of complaints was much fewer than in the previous year, this having been due to the fact that the climatic conditions were unfavourable.

In all 79 complaints were received, compared with 143 in 1908: two from Clapham North, five from Clapham South, 16 from Putney, 15 from Streatham, 10 from Balham, nine from Tooting, 14 from Southfield, four from Fairfield, and four from Springfield Wards.

All these complaints were forwarded to the Borough Engineer and Surveyor, who reported that in every case the necessary cleansing and flushing or other work had been carried out.

- (3.) A large number of inspections were again made of passages and mews, and a considerable number of these have been satisfactorily dealt with during the year, but in some, owing to legal difficulties as to ownership, no work has yet been begun to comply with the notices served.

- (a) The passage at the rear of Nos. 152-180, Streatham High Road, entering from Becmead Avenue, has been paved and drained in a satisfactory manner.
- (b) Roadway between Nos. 205 and 207, Brixton Hill has been repaired and the nuisance for the time has been abated.
- (c) Land at rear of Blackshaw Road. After prolonged inquiry, it was found that owing to difficulty of ascertaining the owners, as defined by the Public Health (London) Act, 1891, the matter was referred to the New Streets Committee, who are now dealing with it under the Metropolis Management Act.
- (d) Yards and passages at Rowlands Cottages and Young's Rents, Clapham, have been paved with concrete by the owners without service of notice, making a most desirable improvement in the sanitary condition of these premises.
- (e) Road from 8 to 20, Boundaries Road, Balham, has had several loads of hard core laid, but has not been paved or drained. The nuisance has for the present been abated, but will, in my opinion, recur.
- (f) Open space in rear of Market Parade, Balham. This has been covered with brick and hard core, with a top dressing of gravel.
- (g) Passageways at rear of 113 to 125, Lower Richmond Road, 1 to 21, Roskell Road, and 2 to 24, Salvin Road, Putney, have been properly paved with concrete.
- (h) Passageways at rear of 521 to 541, and 543 to 557, York Road, Wandsworth. These passageways are still under notice, although something has been done to abate the nuisance by depositing hard core on the surface.

- (i) Passageway at rear of 255 to 305, Garratt Lane has been paved with blue bricks and properly drained.
- (k) Passageway at 230 to 244, Earlsfield Road drained and paved with concrete.
- (l) Passageway at 146 to 154, Earlsfield Road has been tar paved.
- (m) Passageway at 576 to 582, Garratt Lane has been paved with concrete.
- (n) Passageway between 551 and 553, Garratt Lane is still under notice, but work will shortly be begun to erect new stables, and the passage will therefore be properly paved and drained.
- (o) Passageway at rear of 844 to 850, Garratt Lane has been satisfactorily concreted.
- (p) Passageway 250 to 255, Upper Tooting Road has been drained and paved.
- (q) Passageway at rear of 62 to 72, Mitcham Road paved and channelled with granite setts.
- (r) Passageway at rear of 42 to 48, and 50 to 58, Trinity Road has been tar paved.
- (s) Other passages in Tooting have been dealt with and nuisance abated, viz., between 52 and 54, Moffatt Road, 19 and 31, Hazelhurst Road, and at rear of 838 and 842, Garratt Lane, and 828 to 832, Garratt Lane.
- (t) Entrance to Newman's Court and the passage to six houses in the same court have been properly paved.
- (u) The entrance to Acre Square and the passage to six houses in Acre Square have been properly paved.

- (v) Passageway at rear of Furzedown Market, Tooting, is at present under notice, and the necessary works will be carried out during the current year.
- (w) Field's Alley, Wandsworth. A portion of this passage was tar paved.
- (x) Passage at rear of shops in Mitcham Lane from Westcote Road has been properly paved.

The condition of these passages has been greatly improved in consequence of the works carried out, but there still remains a number in the Borough which will eventually have to be dealt with in the same manner.

- (4.) Special house-to-house inspections were made during the year of premises in Young's Rents, Rowland's Cottages, Heath Road, Queen's Road, Pitcairn Street, Clapham; Isabella Place, Cox's Place, Bigg's Row, Bendermere Road, Putney; Colmer Road, Streatham; Wardley Street, Lydden Grove, Lydden Road, Bendon Valley, and Hill's Yard, Wandsworth.
- (5.) Special inspections were made also of the milkshops in the Borough, especially those where grocery goods were also sold, and a very desirable improvement has been carried out in a large number of these premises by the provision of a proper milk safe, so as to prevent as far as possible the pollution of the milk sold.

In all, 200 visits were made to these premises, and I am able to report that the conditions under which milk is now sold have been very greatly improved.

Including the house-to-house inspections and inspections for certificates under the Revenue Act, but excluding the routine inspections of bakehouses, slaughter-houses, cowsheds, and offensive trade premises, 1,056 inspections were made of premises, chiefly previous to the service of statutory notices.

My attendance was necessary at the Police Court on 15 and at the High Court on two occasions during the year.

Revenue Act.

During the year 12 certificates were granted under the above Act, one was deferred, and four refused.

The certificates granted referred to 118 houses, or 304 tenements.

Sanitary Operations.

The Table of Sanitary operations shows in detail the amount and nature of the work carried out by the Sanitary Inspectors during the year.

The number of complaints received and attended to was 1,692, compared with 1,645 in 1908, and 1,836 in 1907.

There was an increase in Clapham North, Tooting, Southfield, and Fairfield Wards, and a decrease in Clapham South, Putney, Streatham, and Springfield Wards.

Four of these complaints were made to the London County Council, and these were at once attended to.

The number of houses and premises inspected was 26,835, an increase of 1,943 compared with 1908, and of 2,605 compared with 1907.

There was an increase in the number of houses and premises inspected in Clapham North and South, Putney, Balham, Tooting, Southfield and Fairfield Wards, and a decrease in Streatham and Springfield Wards, the largest decrease having been in Springfield Ward.

The total number of house-to-house inspections made was 7,007, compared with 5,575 in 1908, 5,718 in 1907, 5,686 in 1906, and 6,290 in 1905. There has been an increase in the number of house-to-house inspections in Clapham North and South, Streatham, Balham, Tooting, and Fairfield Wards, and a decrease in Putney, Southfield, and Springfield Wards.

In Tooting alone the number increased from 226 in 1908 to 769 in 1909, and in Streatham from 404 to 741, this being due to the fact that an additional Inspector was appointed at the close of the year 1908.

TABLE LXVIII.

Summary of Sanitary Operations in the Borough during the Year 1909.

	CLAPHAM.		PUT- NEY.	STREATHAM		TOOT- ING.	WANDSWORTH.			WHOLE BOROUGH.

The Tables of house-to-house inspections which follow show the names of the streets and the number of houses inspected, the number of houses in which defects were found, the percentage of defects to houses inspected, as well as the number of families living in one, two, three, and four rooms and upwards.

In 4,385 out of a total of 7,007 houses inspected, or 62·58 per cent., sanitary defects necessitating the service of an intimation notice were found.

The highest percentage was in the Streatham Ward, where the percentage was 78·54, and the lowest in Southfield Ward, where it was only 38·35, the next lowest being Clapham North Ward, where it was 50·77.

The following Table, which is prepared from the figures given in the summary, shows the percentage to total number of families of those living in one, two, three, or four rooms and upwards, in the separate Wards and in the whole Borough, in the premises inspected in 1909.

TABLE LXIX.

Percentage to total living in one, two, three or four rooms and upwards.

Wards.	One room.	Two rooms.	Three rooms.	Four rooms and upwards.
Clapham, North ...	9·8	10·4	9·0	70·8
Clapham, South ...	9·3	12·5	33·4	44·8
Putney ...	1·6	2·7	46·0	49·7
Streatham ...	7·8	11·9	25·7	54·6
Balham ...	8·2	17·7	26·4	47·7
Tooting ...	5·5	7·0	16·8	70·7
Southfield ...	4·0	4·5	33·8	57·7
Fairfield ...	8·9	8·3	33·4	49·4
Springfield ...	7·0	11·5	44·5	37·0
Whole Borough ...	7·3	10·3	27·5	54·9

Clapham North Ward had the highest percentage of families living in one room, and Putney the lowest. Balham had the highest percentage living in two rooms, and Putney the lowest. Putney had the highest percentage living in three rooms, and Clapham North the lowest. Tooting and Clapham North had the highest percentage living in four rooms and upwards, and Springfield the lowest.

In the Borough, of the total families whose houses were inspected during the year, viz., 9,854, 7·3 per cent. lived in one room, compared with 7·6 per cent. in 1908, 6·9 per cent. in 1907, and 7·0 per cent. in 1906; 10·3 per cent. in two rooms, compared with 11·8, 10·4, and 9·7; 27·5 per cent. in three rooms, compared with 29·7, 34·7, and 25·3; and 54·9 per cent. in four rooms and upwards, compared with 50·9, 48, and 58.

House-to-house Inspections.

WHOLE BOROUGH...	7007	4385	62·58	718	1013	2715	5408

The total number of intimation notices served was 9,336, compared with 8,138 in 1908, 7,613 in 1907, and 7,500 in 1906, and of statutory notices 1,119, compared with 1,564, 1,100, and 1,044.

The greatest number of intimation notices was served in Balham and Streatham Wards, and the smallest number in Southfield and Putney Wards. The greatest number of statutory notices was served in Balham and Springfield Wards, and the smallest number in Putney and Southfield Wards.

84 of the statutory notices served in 1909 were not complied with. The majority of these were served in December, and were complied with in the early months of the current year.

The number of statutory notices served include By-law notices, 342 of which were served in respect of the following contraventions of the By-laws:—Yard paving 143, repairs to water closets 64, repairs to flushing apparatus of water closets 43, cleansing of water closets three, covers to cisterns 14, cleansing cisterns 14, cleansing house and other contraventions of the By-laws as to houses let in lodgings 43, paving and draining stables four, and absence of proper manure receptacles 14.

The number of cases of overcrowding dealt with during the year was 131, compared with 158 in 1908, 87 in 1907, 100 in 1906, and 92 in 1905. 14 of these were in Clapham, six in Putney, 29 in Streatham, 11 in Tooting, and 71 in Wandsworth.

The cases of overcrowding in Clapham were chiefly in Milford Street and Lyham Road; in Putney, in Quill Lane and the Platt; in Streatham, in Eardley Road, Larch Road, Zennor Road, and Foss Road; in Tooting, in Fairlight Road; and in Wandsworth, in Guelph Street, Bendon Valley, and Lydden Grove.

64 of the cases were caused by sub-letting rooms, largely in consequence of the original occupier being out of employment, and in the remainder of the cases the overcrowding was caused by the house being too small for the number in the family. All the cases were remedied without difficulty.

1,292 ashpits were provided or repaired, compared with 1,233 in 1908 and 1,099 in 1907, and 421 complaints with reference to the non-removal of house refuse (61 from Clapham, 46 from Putney, 185 from Streatham, 26 from Tooting, and 103 from Wandsworth) were received during the year. These complaints were, as in previous years, attending to by the Dusting Inspectors.

1,574 yards in connection with dwelling-houses, and 95 in connection with stables, were paved, drained, or cleansed, compared with 1,025 and 135 in 1908.

7,301 rooms and 1,519 staircases and passages were cleansed or repaired, compared with 5,856 rooms and 1,327 staircases and passages in 1908.

The greatest number of rooms cleansed was in the Balham Ward, where 1,411 were done, and in Streatham Ward, where 1,089 were done, and the smallest number in Putney and Southfield, where the numbers were 368 and 271 respectively.

1,041 drains were cleansed or repaired, and 53 rain-water pipes disconnected from the drains.

144 notices of reconstruction of drains were sent to the Borough Engineer from this Department: 34 in Clapham, compared with 18 in 1908; five in Putney, compared with nine; 51 in Streatham, compared with 41; 14 in Tooting, compared with 12; and 40 in Wandsworth, compared with 44.

The total number of houses where the drains were reconstructed during the year was 307: 74 in Clapham, 22 in Putney, 121 in Streatham, 19 in Tooting, and 71 in Wandsworth.

347 accumulations of manure were removed after service of notice, compared with 361 in 1908: 75 in Clapham, 33 in Putney, 117 in Streatham, 35 in Tooting, and 87 in Wandsworth. There has been an increase in the number of cases dealt with in Clapham and Wandsworth, and a decrease in Putney, Streatham, and Tooting.

50 notices were served for the periodical removal of manure every 48 hours, compared with 55 in 1908, 33 in 1907, 16 in 1906, and 20 in 1905.

The number of waterclosets cleansed and repaired was 2,128, compared with 1,809 in 1907, and 1,936 in 1906. The greatest number of these were in Balham and Springfield Wards.

837 drinking water cisterns were cleansed, covered, or repaired: 255 in Clapham, 32 in Putney, 157 in Streatham, 103 in Tooting, and 290 in Wandsworth, compared with 755 in 1908.

83 premises were inspected and notices served where animals were kept in such a manner as to be a nuisance. Nine of these were in Clapham, one in Putney, 24 in Streatham, nine in Tooting, and 40 in Wandsworth. This nuisance was most common in Balham and Springfield Wards, and the animals kept were chiefly ducks and hens.

58 smoke nuisances were reported during the year: two in Clapham, two in Putney, six in Streatham, three in Tooting, and 45 in Wandsworth.

Three complaints of black smoke were received from the Public Control Department of the London County Council with regard to three premises, and seven complaints from the Coal Smoke Abatement Society with regard to 14 premises.

These complaints were all at once attended to and the premises kept under observation.

182 soil pipes were repaired, 36 in Clapham, 56 in Putney, 44 in Streatham, 23 in Tooting, and 23 in Wandsworth, compared with 125 in 1908, 184 in 1907, and 185 in 1906.

1,159 leaky roofs and gutters were repaired, compared with 945 in 1908.

46 unwholesome or dilapidated houses were cleansed and repaired, two in Clapham, two in Putney, 16 in Streatham, 13 in Tooting, and 13 in Wandsworth, compared with 97 in 1908.

A large amount of work has been carried out to abate nuisances arising from damp conditions. In all 746 premises have been dealt with, 101 in Clapham, 19 in Putney, 334 in Streatham,

60 in Tooting, and 232 in Wandsworth; and in 115 of these, 15 in Clapham, 51 in Streatham, 12 in Tooting, and 37 in Wandsworth, damp courses have been inserted.

The number of unclassified nuisances was 719, 223 in Clapham, 49 in Putney, 263 in Streatham, 49 in Tooting, and 135 in Wandsworth, compared with 863 in 1908.

Removal of House Refuse.

No change has taken place in the methods of removal or disposal of house refuse during the year, details of which have been given in previous reports.

During the 12 months ending March, 1909, the quantity of dust collected and disposed of was approximately 61,331 tons, compared with 58,623 tons in the previous year, and the total cost of collection and disposal was £16,573, compared with £16,288.

140 statutory notices were served under section 37 of the Public Health (London) Act, 1891, to provide ashpits in accordance with the By-laws, and these have been complied with.

Disinfection.

The total number of rooms disinfected after the occurrence of cases of infectious disease was 3,146 (507 in Clapham, 210 in Putney, 1,000 in Streatham, 474 in Tooting, and 955 in Wandsworth), compared with 2,868 in 1908, 3,206 in 1907, and 2,794 in 1906.

The increase was chiefly due to the increase in the number of disinfections carried out after Measles and Consumption.

1,581 lots of bedding were stoved at the Disinfecting Station, compared with 1,826 in 1908, 1,948 in 1907, and 1,669 in 1906.

The 1,581 lots of bedding included the following :—985 beds, 1,044 bolsters, 2,694 pillows, 1,110 mattresses, 509 palliasses, 1,773 sheets, 1,625 quilts, 683 cushions, 4,883 articles of clothing, 3,087 blankets, 174 carpets, and 2,276 extra articles, a total of 20,843 articles, compared with 24,034 in 1908, 29,102 in 1907, and 28,885 in 1906.

1,012 premises were disinfected after Measles and 255 after Tubercular disease of the Lungs, compared with 884 and 184 in 1908.

24 beds, nine bolsters, 27 pillows, 26 mattresses, 37 palliasses, eight sheets, four quilts, 21 cushions, 96 articles of clothing, 14 blankets, five carpets, and 80 extra articles, were removed and destroyed by request of the owners during the year.

Disinfection was also carried out by the Sanitary Staff at premises after non-notifiable diseases, chiefly Cancer, and the sum of £20 10s. od. was received for such disinfection.

68 rooms were disinfected in consequence of their verminous condition, two rooms were sprayed, and five lots of verminous bedding disinfected.

The disinfection by steam was carried out at the Station at Tooting, and I am pleased to report that this Station has proved most satisfactory in every way.

I have regularly visited the Station during the year, and am able to report that the work has been carried out by the staff to my entire satisfaction.

Only three complaints of damage to goods by disinfection have been received, and on inquiry it was found that the goods were damaged or stained before being placed in the disinfecting chamber.

The approximate cost of working and maintaining the Disinfecting Station during the past year, including the cost of disinfectants used in fumigating and cleansing rooms, was as follows :—

	£	s.	d.
Wages	911	12	10½
Fuel	9	6	7
Horse Hire	114	5	0
Stores, Tools, and other materials ...	55	4	10½
Repairs to Horse Vans and Harness ...	13	19	6
Disinfectants, etc.	40	13	3
Repairs to Motor Van	15	6	5
Motor Running Expenses	43	19	10
Lighting	1	17	2
Insurance	9	6	7
Water	4	6	0
	<hr/>		
	£1,219	18	1
	<hr/>		

The number of lots of bedding stoved was 1,581.

Cost per lot of bedding 15s. 5d.

Cleansing of Persons Act.

The baths at the Disinfecting Station have not been so frequently used this year, chiefly owing to the smaller number of verminous children dealt with.

The names of 107 children, 12 belonging to Clapham, seven to Putney, 13 to Streatham, 12 to Tooting, and 63 to Wandsworth, stated to be in a verminous condition, were forwarded to me by the Medical Officer, Education Department, London County Council, and the homes were visited by the Inspectors. In the majority of cases only the heads of the children were verminous, but in a considerable number the bodies and clothing were also verminous. Of these latter, 12, six boys and six girls, were cleansed at the baths, and the clothing was at the same time stoved with beneficial results.

23 adults also had baths, six being nurses who had been in attendance on cases of Puerperal Fever, 16 were contacts with cases of Scarlet Fever or Diphtheria, while one female was verminous.

Inspection of Urinals in connection with Licensed Premises.

The number of urinals inspected was 175, 36 in Clapham, 21 in Putney, 49 in Streatham, 13 in Tooting, and 56 in Wandsworth.

400 inspections were made during the year and 47 notices, chiefly for cleansing, were served and complied with.

Police Court Proceedings.

The list which follows shows particulars of Police Court proceedings under the Public Health (London) Act, 1891, during the year.

The total amount of fines inflicted was £30 17s. 6d., and the costs £11 3s., compared with £27 4s. and £11 11s. in 1908.

The majority of the cases were with respect to nuisances or contraventions of By-laws, but eight were for permitting houses to be occupied without first having obtained a certificate from the Sanitary Authority that the premises had a proper and sufficient supply of water.

One case was for exposing decomposed meat for sale, one for obstructing the Sanitary Inspector, one for failing to notify a case of Puerperal Fever, and seven for selling milk without being registered as required by the Dairies, Cowsheds and Milkshops Order, 1885.

Inspection of Milkshops, Cowsheds, &c.

The following Table shows in concise form the number of milk premises, cowsheds, etc., on the register, the number of inspections, and the number of cases of legal proceedings during the year, as well as other information which it has been thought advisable to group together for the purpose of comparison with other Metropolitan Boroughs.

TABLE LXXXI.

PREMISES.	NUMBER OF PLACES				Number of inspections, 1909.	Number of notices, 1909.	Number of prosecutions, 1909.
	On register at end of 1903.	Added in 1909.	Removed in 1909.	On register at end of 1909.

Registered houses let in lodgings	267	8	...	275	722	{ *a31 *b429	{ ... 1

*a For overcrowding.

*b For other conditions.

Total number of intimation notices served for all purposes 9,336

Overcrowding, 1909—

Number of dwelling rooms overcrowded 131
 Number remedied 131
 Number of prosecutions —

Underground rooms—

Illegal occupation dealt with during year —
 Number of rooms closed —

Insanitary houses—

Number closed under the Public Health (London) Act, 1891 14
 Number closed under the Housing of the Working Classes Act —
 Number of premises cleansed under Sec. 20 of the L.C.C. General Powers Act, 1904 70

*Shelters provided under Sec. 60 (4) of the Public Health
(London) Act, 1891—*

Number of persons accommodated during the year ... 1

Revenue Acts—

Number of houses for which applications were received
during year 146

Number of tenements comprised therein 304

Number of tenements for which certificates were :

(a) granted 238

(b) refused 32

(c) deferred 34

*Number of prosecutions under By-laws under Public Health
Act, 1891—*

(a) For prevention of nuisance arising from snow, ice,
salt, filth, etc. —

(b) For prevention of nuisance arising from offensive
matter running out of any manufactory, etc. —

(c) For the prevention of keeping of animals in such
a manner as to be injurious to health —

(d) As to paving of yards, etc., of dwelling houses ... 2

(e) In connection with the removal of offensive matter,
etc. 1

(f) As to cesspools and privies, removal and disposal
of refuse, etc. —

(g) For securing the cleanliness of tanks, cisterns, etc. —

(h) With respect to water closets, earth closets, etc. ... —

(i) With respect to sufficiency of water supply to water
closets —

(j) With respect to drainage, etc. (Metropolis Manage-
ment Act, Section 202) —

(k) With respect to deposit of plans as to drainage,
etc. (Metropolis Management Acts Amendment
(By-laws) Act, 1899) —

Mortuaries—

Total number of bodies removed...	206
Total number of infectious bodies removed	—

Milkshops.

At the close of 1908 there were 367 milkshops on the Register, 58 have been added in 1909 and 94 removed, leaving 331 on the Register at the end of 1909.

During the year 1,365 inspections were made of these premises and 57 notices, chiefly for cleansing, were served.

Seven prosecutions were instituted for carrying on the business of a dairyman without being registered, and fines amounting to £4 2s. were imposed, with 12s. costs. The magistrate dismissed one of the cases on the ground that the vendor had been previously registered in this Borough, and that although he had left, the Sanitary Authority had no power to remove his name from the Register.

The increase in the number of inspections of milkshops was due to special inspections made in consequence of powers given to the Sanitary Authority under Section 5 of the London General Powers Act, and, in addition to these inspections, I made 154 inspections before reporting the cases to the Public Health Committee.

In 36 cases, nine in Clapham, three in Putney, five in Streatham, five in Tooting, and 14 in Wandsworth, where grocery goods, potatoes, etc., were also sold the occupier voluntarily cancelled the registration, while in 99 cases proper milk safes (23 in Clapham, five in Putney, 10 in Streatham, 13 in Tooting, and 48 in Wandsworth), were provided.

These safes have proved very satisfactory in preventing the pollution of the milk, and in many instances the occupiers express themselves as being thoroughly satisfied that their provision has effected a decided improvement.

Cowsheds.

The following is a list of the registered Cowhouses in the district granted by the London County Council in October:—

CLAPHAM—

London, Gloucester, and North Hants Dairy Company, Ltd., 41, Clifton Street. (10 cows.)

Denny, Charles, 128, Wirtemberg Street. (25 cows.)

PUTNEY—

James, Messrs., Lower Richmond Road. (Number of cows, Shed No. 1—46; Shed No. 2—10.)

Morrison, Messrs., Putney, Lower Common. (Number of cows, Shed No. 1—24; Shed No. 2—20.)

Smith, H. C., Clarence Farm, Roehampton. (Number of cows, Shed No. 1—11; Shed No. 2—7; Shed No. 3—8; and loose box—2.)

STREATHAM—

Curtis, Mrs., Chestnut Grove, Balham. (17 cows.)

London, Gloucester, and North Hants Dairy Company, Ltd., Harberson Road, Balham. (9 cows.)

Curtis Brothers, The Mineral Wells. (Number of cows, Shed No. 1—7; No. 2—30.)

TOOTING—

London, Gloucester, and North Hants Dairy Company, Ltd., High Street. (6 cows.)

WANDSWORTH—

Wharton, Charles, Allfarthing Lane. (11 cows.)

Cookson, C. M., 266, Earlsfield Road. (16 cows.)

Turner, G. S., Headworth Road. (14 cows.)

The total number on the Register at the close of 1909 was 12, and 61 inspections were made. One cowshed in Clapham was removed during the year.

Slaughter-houses.

There were 19 Slaughter-houses and one Knacker's Yard on the Register in 1908, one in Streatham was removed, the premises having been pulled down, leaving 19 on the Register.

During the year 476 inspections were made of these, but it was only necessary to serve four notices for cleansing. The usual cleansing was carried out by the occupiers at the proper times.

During the year the Inspectors inspected the carcasses of 447 cattle, 2,124 sheep, 166 pigs, and 21 calves in Slaughter-houses and Butchers' Shops, and reported that all the animals were healthy.

The following list shows the number of Slaughter-houses licensed by the London County Council in October:—

CLAPHAM—

Masters, Albert, 63, Clapham Park Road, Clapham.

(Condition—Small cattle only.)

Yarworth, William, 140, Clapham Park Road, Clapham.

(Condition—The licence is granted on the undertaking of the licensee that the killing of bullocks at these premises be restricted to the period of hot weather, and then only occasionally, and on the further condition that the slaughtering be limited to animals the meat from which is to be sold by retail in the shop attached to the premises.)

Woodman, George, 140, Larkhall Lane, Clapham.

Cradock, Albert Henry, 147, Larkhall Lane, Clapham.

(Condition—This licence is granted on condition that the slaughtering of cattle on the premises is limited to animals the meat from which is sold by retail in the shop attached to the premises.)

Lavender, Thomas Nathaniel, 172, Larkhall Lane, Clapham.

Wright, Thomas John, 272, Wandsworth Road, Clapham.

Simmons, John, 647, Wandsworth Road, Clapham.

Warren, James Edward, 63, Old Town, Clapham.

PUTNEY—

Lindsey, John, Montserratt Road, Putney.

(Condition—This licence is granted on the undertaking of the licensee to drive cattle on the premises only between the hours of 8 p.m. and 6 a.m., and to limit the slaughtering to the requirements of the retail trade of his own shop.)

STREATHAM—

Cooke, James Robert, 45, Balham High Road.

Covell, Herbert Alfred, 107, High Road, Streatham.

Wootten, Henry, & Dean, Isaac, 165, High Road, Streatham (rear of).

Holterman, William, 78, High Road, Upper Tooting (rear of).

WANDSWORTH—

Holton, Frederick, 2, Armoury Yard, The Plain.

Miller, George S., 27, Belle Vue Road.

Covell, Herbert A., 73, High Street, Wandsworth.

Masters, George, 165, High Street, Wandsworth.

(Condition—This licence is granted on the undertaking of the licensee that large cattle are not to be admitted except between the hours of 11 p.m. and 9 a.m., that not more than one large animal be killed per week; and that large and small cattle are not to be brought on to or kept on these premises at the same time.)

Wood, John James, Durnsford Farm, Merton Road.

(Condition—This licence is granted on the undertaking of the licensee that his own pigs only be killed at these premises.)

Houses Let in Lodgings.

At the end of 1908 there were 267 houses let in lodgings on the Register. Eight were added during 1909 and none removed, making a total of 275 on the Register at the end of 1909.

722 inspections of these were made during the year, and 460 notices were served, 31 for overcrowding and 429 for other conditions, chiefly cleansing. With regard to one premises a summons was issued for failing to cleanse, and a conviction was obtained.

The Housing, Town Planning Act, etc., 1909, has now definitely placed the responsibility of cleansing on the owner of the premises, and in future the difficulty of deciding as to the person liable will not arise. On the whole the By-laws have been satisfactorily complied with, although in some instances the cleansing was not carried out at the specified time.

Offensive Trade Refuse.

No complaints have been received during the year as to the removal of the above refuse, and I am able to report that the arrangement entered into by the Council has been satisfactorily carried out by the Contractor.

Unsound Food.

During the year 1 box of Haddocks, 2 boxes of Herrings, 1 case of Cat-fish, 3 cases of Hake, 2 boxes of Cod, 6 boxes of Kippers, 1 trunk of Skate, 1 case of Soles, 2 boxes of Mackerel, 2 boxes of Fillets, 1 case of Apples, $1\frac{1}{2}$ bushels Cherries, 7 baskets of Strawberries, $\frac{1}{2}$ bushel of Black Currants, 1 case of Bananas, $\frac{1}{2}$ bushel of Plums, 33 boxes of Tomatoes, 4 sacks of Peas, 1 sack of Carrots, 7 bags of Broccoli, 5 Rabbits and 1 carcase of Beef were destroyed at the request of the owners, and the usual certificates granted.

Factories and Workshops.

I am able to report that during the year 1909 there has been a considerable increase in the amount of work carried out by the Inspectors under the Factory and Workshops Act, and also that the condition of all the factories and workshops in the Borough is satisfactory.

There has again been some difficulty experienced in regard to the lists of outworkers, and it was found necessary in one case to take proceedings when the occupier was fined for failing to keep a register of outworkers as required by the Act. It was also necessary to issue circular letters to many employers reminding them of the necessity of sending in these lists, and also that the official form should be used for this purpose.

The Tables which follow are similar to those used in previous Reports, and the whole of the work done by both male and female Inspectors is there shown in a concise form.

The total number of workshops on the Register was 1,657, including 140 retail bakehouses, 150 workshop laundries, 313 dressmakers' and milliners' premises, and 1,054 other workshops, but not including 351 factories, 985 workplaces, and 312 outworkers' premises.

Including all factories, workshops, workplaces, and outworkers' premises, there were on the Register at the end of 1909 3,305 premises, compared with 3,347 in 1908, 3,281 in 1907, 3,096 in 1906, 3,045 in 1905, 2,987 in 1904, and 2,676 in 1903.

The total number of inspections made during the year was 6,531, compared with 5,801 in 1908, 6,048 in 1907, 5,997 in 1906, 4,933 in 1905, and 4,946 in 1904.

The total number of notices served was 597, 549 intimation and 48 statutory, compared with 434 in 1908, 453 in 1907, 427 in 1906, 462 in 1905, and 465 in 1904.

There were two prosecutions under the Public Health (London) Act, 1891, for sanitary defects, and one under the Factory and Workshop Act for failing to keep a register of outworkers.

Under the head of other workshops are included domestic workshops, and under the head of places where food is prepared for sale are included the kitchens of hotels, restaurants, tripe, fried fish and eel shops, and other places where food is prepared for sale.

In all 817 inspections were made of 351 factories, and 74 notices, 69 intimation and five statutory, were served.

The total number of workshops on the Register was 1,657, 150 of which were workshop laundries, 140 workshop bakehouses, and 1,367 other workshops.

In all 3,366 inspections of these were made, compared with 3,130 in 1908, 3,148 in 1907, 3,233 in 1906, and 2,628 in 1905, and 276 intimation and 23 statutory notices were served.

The total number of workplaces on the Register was 985, and 1,902 inspections were made, while 163 intimation and 20 statutory notices were served.

The total number of defects found was 745, including six cases in which there was a breach of special sanitary requirements for bakehouses, compared with 609 and 16 in 1908.

To abate these nuisances 549 intimation and 48 statutory notices were served, all of which, with the exception of 30, were complied with at the end of the year. The 30 outstanding were complied with, with two exceptions, in the first month of this year. These two exceptions were two laundries which were given up shortly after service of the notices.

In all, 745 defects were found and 720 remedied, but only 549 intimation notices were served, as one notice frequently called attention to several defects on the same premises.

INSPECTION OF FACTORIES, WORKSHOPS AND WORKPLACES.

TABLE LXXXII.

CLASS OF WORKS.		Number of Places					Number of Inspections, 1909.	Number of Notices.		Number of Prosecutions, 1909.	
		On Register at end of 1908.	Added in 1909.	Removed in 1909.	On Register at end of 1909.			Intimation, 1909.	Statutory, 1909.	Under Factory Act.	Under Public Health Act.

The three following Tables are inserted by request of the Secretary of State for the guidance of Medical Officers of Health in preparing that part of the Annual Report which relates to factories and workshops. It is intended to provide for uniformity in the presentation of such particulars as lend themselves to statistical treatment:—

Factories, Workshops, Laundries, Workplaces and Homework.

TABLE LXXXIII.

<i>Offences under the Factory and Workshop Act:—</i>				
Illegal occupation of underground bakehouse (S. 101)
Breach of special sanitary requirements for bakehouses (SS. 97 to 100)	6	6
Other offences (Excluding offences relating to out-work, which are included in Part 3 of this report.)
Totals	745	720	...	2

* Including those specified in sections 2, 3, 7 and 8, of the Factory and Workshop Act as remediable under the Public Health Acts.

The table which follows and which relates to Home Work is similar to the one in last year's Report.

There has been an increase of four in the number of lists sent in twice a year, and a decrease of nine in the number sent in once a year.

In all, 152 lists were received twice in the year, containing the names and addresses of 56 contractors and 612 workers, and six lists once in the year, containing the names and addresses of 13 workers.

The total number of addresses received from other Councils was 370, compared with 352 in 1908, 322 in 1907, and 173 in 1906, and 334 addresses were forwarded to other Councils, compared with 301 in 1908, 325 in 1907, and 122 in 1906.

The following are the districts to which lists of outworkers were forwarded, and also the number of outworkers:—Battersea 85, Lambeth 69, Stepney 46, Fulham 15, Southwark 14, City of London 10, Croydon and Merton nine each, Camberwell eight, East Ham and Chelsea six each, Hammersmith and Islington five each, Bermondsey, Westminster, St. Pancras and Bethnal Green four each, Ilford, Stratford and Poplar three each, Stoke Newington, Woolwich, Chiswick, Willesden, Shoreditch and Southampton two each, Hampstead, Hackney, Lewisham, Finsbury, Wimbledon, Holborn, Twickenham, Bromley, Surbiton and Hove one each.

99 names and addresses were forwarded to this Borough in error and are not included in the above Table.

The number of notices sent to employers during the year was 127, and these had a most satisfactory result, although in some cases it was also necessary for the Inspector to call and warn them that if such lists were not sent proceedings would be taken.

At the end of 1908 there were 331 outworkers' premises on the Register, 99 were added and 118 removed during the year, leaving 312 on the Register.

446 inspections were made of these premises during the year, and 41 notices, all for cleansing, were served and complied with.

During the year only six cases of infectious disease, four of Scarlet Fever and two of Diphtheria, were notified as having occurred in the homes of outworkers, compared with 22 in 1908, six in 1907, six in 1906, and five in 1905.

Underground Bakehouses (s. 101):—	
Certificates granted during the year
In use at the end of the year	47

The next Table shows in detail the work of the Inspectors in factories and workshops where males are chiefly employed.

The Table shows the work done in each sub-district and is grouped under five divisions: (1) factories, (2) workshops, (3) domestic workshops, (4) workplaces, and (5) outworkers' premises.

The total number of inspections was 3,175, compared with 2,263 in 1908, 2,408 in 1907 and 1,964 in 1906, and re-inspections 1,184, compared with 1,394, 1,298 and 1,649.

961 of the inspections and 159 of the re-inspections were in Clapham, 508 and 10 in Putney, 655 and 304 in Streatham, 242 and 45 in Tooting, and 809 and 669 in Wandsworth.

Six workshops where males were employed were notified to H.M. Inspector, and 22 were reported to this Council by H.M. Inspector.

In all the workshops under the supervision of the male Inspectors only three cases of overcrowding were discovered, and these were at once remedied.

Table LXXXIX. shows the principal trades carried on in the premises on the Register, but it does not include the trades in workplaces, domestic workshops, or in outworkers' premises.

Compared with 1908 there has been a decrease of 11 in the number of these trades, this decrease being almost wholly confined to the sub-district of Wandsworth.

Totals	243	107	207	48	227	832

The Tables which follow summarise the work done during the year by the female Sanitary Inspectors.

The total number of premises inspected was 1814 (365 in Clapham, 243 in Putney, 516 in Streatham, 117 in Tooting, and 573 in Wandsworth).

186 inspections were made of factories, 1,008 of workshops, 61 of domestic workshops, 351 of workplaces, and 208 of outworkers' premises, while 377 premises were visited for inquiry and no workroom found.

There were only two cases of overcrowding discovered, compared with four in 1908, four in 1907, five in 1906, 12 in 1905, and 17 in 1904, and these were at once abated. 56 were found to be in a dirty condition, compared with 25 in 1908, and 66 in 1907.

In two factories and one workshop the sanitary accommodation was insufficient. Two of these were remedied during the year 1909, while one, for which notice was served in December, was remedied in January of the present year.

In every workshop inspected during the year there were separate water closets for the sexes, but in six factories and 34 workshops the water closets were defective.

Other nuisances were discovered in four factories, 20 workshops, 17 workplaces, and seven outworkers' premises, and these have all been abated.

It was only necessary to serve 113 intimation notices, and these were all complied with with the exception of 13, five in Clapham, three in Tooting, and five in Wandsworth. These notices were complied with in the beginning of the current year. It was not necessary to serve any statutory notices during the year.

104 workshops and eight domestic workshops where females were employed were reported to H.M. Inspectors of Workshops, and 113 were reported to this Council by H.M. Inspector.

Only 18 of the workshops reported by H.M. Inspector were unknown to the Sanitary Inspectors. The other 95 had been previously reported by me, or were already on the Register.

Table XCI. shows the number of factories, workshops, domestic workshops, and workplaces on the Register at the close of 1908, the number removed from, the number added during 1909, and the number on the Register at the end of 1909. The number of workrooms in workshops is also shown.

The factories and workshops are divided into dressmakers' and milliners' premises, laundries, and miscellaneous premises; and the workplaces are divided into laundries and miscellaneous premises.

Of the total number of factories where women are employed, 73 are laundries and 19 other factories, while of the total workshops, viz. :—519, 313 are dressmakers and milliners, 150 laundries

and 56 other workshops, an increase of four other workshops, and one laundry, compared with 1908, while the number of dress-makers and milliners premises remained the same.

The total number of workplaces on the register is 265, a decrease of 29 compared with 1908, of which 70 are laundries, and 195 miscellaneous premises, chiefly dressmakers and milliners.

* (1) Dressmakers and Milliners. (2) Laundries. (3) Miscellaneous.

Table XCII. shows the nature of the trades carried on in the workshops inspected.

As in 1908, there has again been a slight decrease in the numbers, chiefly due to dullness of trade, and also to the fact that several small laundries which were classed as workplaces have now been given up, there being only 69 of these now on the Register, compared with 85 in 1908, and 132 in 1907.

The number of dressmakers and milliners shows some reduction compared with previous years. The total number, viz. :— 849 (169 in Clapham, 110 in Putney, 280 in Streatham, 69 in Tooting, and 221 in Wandsworth), is 38 less than in 1908, the greatest decrease having occurred in Streatham.

Canal Boats Act.

During the year 39 inspections of Canal Boats were made, but no notices were served. The condition of all the boats inspected was reported to be satisfactory.

Statement of Work done under the Sale of Food and Drugs Acts.

During the past year 1,030 samples of foods and drugs were submitted to the Public Analyst for analysis, compared with 1,004 in 1908, 989 in 1907, and 905 in 1906.

Of these, 71 or 6·89 per cent. were reported to be adulterated, compared with 8·76 per cent. in 1908, 8·49 per cent. in 1907, and 9·29 in 1906.

The percentage of milk samples found to be adulterated was 7·39, compared with 6·9 in 1908, 10·97 in 1907, and 10·26 in 1906. In 18 of the adulterated milk samples the Public Health Committee, after considering the amount of adulteration and the circumstances of the sale, decided not to prosecute the vendor, so that the percentage of prosecutions was only 4·0, compared with 3·8 in 1908, and 5·9 in 1907.

In 44 out of the 71 cases in which adulterations were detected proceedings were instituted against the vendor, compared with 50 in 1908, and 52 in 1907.

The total amount received in penalties under the above Acts during the year amounted to £63 os. 6d., and the costs to £29 4s. 6d., making a total of £92 5s., compared with £118 9s. 6d. in 1908.

Table XCVI. shows the number of samples taken, the number adulterated, and the percentage of adulterated samples for the years 1899-1909.

TABLE XCVI.

Year.	No. of Samples taken.	No. Adulterated.	Percentage Adulterated.
1899	602	50	8.3
1900	587	43	7.1
1901	600	69	11.5
1902	584	51	8.7
1903	729	90	12.3
1904	750	85	11.3
1905	853	65	7.6
1906	905	84	9.2
1907	989	84	8.4
1908	1,004	88	8.76
Average 10 years 1899—1908	760	70	9.3
1909	1,030	71	6.89

As will be seen from the above Table the average amount of adulteration detected during the 10 years 1899-1908 was 9·3 per cent., whereas during 1909 the adulteration detected was 6·89. From these figures it would appear that the food supply of this Borough has improved, but this may, to some extent, be accounted for by the fact that in 1909 there was a decided decrease in the adulteration found in samples of meats and other groceries taken during the year.

The system which has been adopted by the Council of allowing the Inspector to provide his own assistants still works economically and well. During the past year no less than nine different assistants, including three women and two boys, have been engaged at various times to make purchases of food for analysis.

The following Table shows the number of samples taken in each sub-district of the Borough, together with the number per 1,000 of population, the number of adulterations detected, and the percentage of adulterations.

TABLE XCVII.

Sub-District.	No. of Samples taken.	No. per 1,000 of Population.	No. Adulterated.	Percentage Adulterated.
Clapham	186	2·7	15	8·1
Putney	104	3·2	11	10·5
Streatham	274	2·6	8	2·9
Tooting	158	4·9	23	14·5
Wandsworth	308	3·1	14	4·5
Whole Borough	1,030	3·0	71	6·89

In the sub-district of Tooting the number of samples taken per 1,000 of population was considerably higher than in any of

the other sub-districts. More samples were taken in Tooting as it was known that a number of purveyors of separated milk who lived outside the Borough were selling this article as milk, and the percentage of adulterations found shows that to a large extent these milk sellers were detected and convictions were obtained.

21 samples of milk have been taken in course of delivery at the various Public Institutions in the Borough, and these upon analysis proved to be genuine.

10 samples of milk were taken at various Railway Stations in the Borough. In taking these samples the Inspector awaits the arrival of the milk train and takes the sample of milk from the churns as they are being unloaded from the train. Only one of the 10 samples taken proved on analysis to be adulterated.

Three samples of milk were taken after complaint at private houses in the Borough, and in every case the milk proved to be adulterated. Proceedings were taken against the vendors of these samples and penalties were imposed.

The following Table shows the results of the analyses of the samples as above stated at the various Public Institutions, Railway Stations, and private premises, and the percentage of adulteration in each case.

TABLE XCVIII.

Premises.	No. of Samples taken.	No. Adulterated.	Percentage Adulterated.
Public Institutions ...	21
Railway Stations ...	10	1	10
Private Houses ...	3	3	100

77 samples of milk and one of butter were procured in the early morning and mid-day on Sundays during the year, and of these only two were found upon analysis to be adulterated, a percentage of 2.6, compared with 9 in 1908.

The following Table shows the number of milk, butter, coffee, and other samples submitted for analysis, and the number and percentage of adulterations in each class. It also shows the number of samples actually purchased by the Inspector and the number purchased by the various assistants employed, together with the percentage of adulterations detected in each class.

TABLE XCIX.

Description of Samples.	Number of Samples submitted.	Number of Samples Adulterated.	Percentage of Adulterations.	Number of Samples purchased by the Inspector.	Number Adulterated.	Percentage	Number of Samples purchased by Deputy.	Number Adulterated.	Percentage
Milk & Cream	545	40	7.39	202	20	9.9	343	20	5.83
Butter ...	299	16	5.35	299	16	5.35
Other Dairy Produce	23	2	21
Coffee ...	18	1	5.5	1	17	1	5.9
Other Groceries	77	4	5.2	3	74	4	5.4
Cereals and Flour	37	4	10.81	4	2	50.0	33	2	6.0
Beverages ...	15	4	26.6	15	4	26.6
Drugs ...	8	1	12.5	8	1	12.5
Meats ...	8	1	12.5	4	1	25.0
	1,030	71	6.89	231	26	4.2	799	45	5.6

It will be noted from the above Table that 15 beverages were procured during the year. I had been informed that at many of the public-houses in the Borough ginger beer was being served from the engine or counter pump, with a lead pipe communicating with the ginger beer in the barrel. I had several samples taken, which proved on analysis to contain metallic lead to such an extent that the continued consumption of the ginger beer would have produced symptoms of lead poisoning. The Public Health Committee recommended that the following notice should be sent to all persons in the Borough who sold ginger beer, drawing their attention to the danger of serving it from the engine :—

"5th August, 1909.

"The attention of the Medical Officer of Health has been called to the fact that ginger beer is being sold from barrels stored in cellars with lead communicating pipes to the engine on the counter. As there is serious risk of the ginger beer being contaminated with lead and thus causing lead poisoning this practice should, in the opinion of the Medical Officer of Health, be at once discontinued."

The Inspector when visiting the premises where notice had been given, reported to me that most of the vendors had discontinued the above practice, but in some instances where it had not been given up the Inspector obtained samples, which proved on analysis to contain metallic lead, and in one case the vendor was proceeded against, and although the magistrate only ordered the defendant to pay costs, yet in my opinion the prosecution had a salutary effect in giving publicity to the matter.

The amount of metallic lead found in four of the samples taken was as follows: 3.3 grains per gallon, 1.5 grains per gallon, 1.05 grains per gallon, and .42 grains per gallon.

In perusing Table XCIX. it will be noticed that the item under Cereals shows a large amount of adulteration.

This was caused by the number of samples of rice found to be adulterated, the adulteration consisting of an excess of mineral matter (talc or steatite), used for polishing the rice and giving it a white appearance. The following circular letter was issued by this Council and delivered to all the grocers and others who sell rice in the Borough, calling their attention to this practice:—

"METROPOLITAN BOROUGH OF WANDSWORTH.

"The attention of the Wandsworth Borough Council has been called to the large amount of mineral matter in samples of rice which have been submitted to the Public Analyst, which mineral matter consists wholly of talc or steatite, used for polishing the rice and giving it a white appearance. As rice is a diet that is frequently prescribed for infants and

invalids, the Council wishes to point out that such polishing is unnecessary, and hereby gives notice that the question of taking proceedings under the Sale of Food and Drugs Act will be considered in any cases in which it is found that the amount of mineral matter mixed with or added to the surface of the rice is excessive.

“HEN. GEO. HILLS,

Town Clerk.

“COUNCIL HOUSE, WANDSWORTH, S.W.,

“13th December, 1909.”

In four of the samples of rice taken the amount of extraneous matter, that is, mineral matter removed from the surface of the grain, was as follows: 1·04 per cent., ·87 per cent., ·79 per cent., and ·66 per cent.

The Inspector has on many occasions reported to me the difficulty of dealing with the increasing number of peripatetic milk vendors who come into the Borough from the surrounding districts, and most of whom carry two sorts of milk, viz. :—new and separated milk, on the same barrow. The following instance was one of several brought to my notice. A vendor, residing outside the Borough, was seen selling milk from a barrow on which the words “Pure New Milk Supply” was printed in large letters. The Inspector when taking a sample for analysis accosted the vendor, who was calling out “Lovely New Milk,” and asked for a half-pint of milk. The vendor proceeded to serve the Inspector from a quart can, and on enquiring what milk was on the barrow found that there was only about one pint of new milk, but about 30 gallons of separated milk. A sample which was taken of the separated milk proved on analysis to contain 30 per cent. of added water. Proceedings were instituted against the vendor, but before the summons was served he had absconded.

In any future legislation with regard to milk, it is, in my opinion, desirable that some stringent regulations should be made to control the sale of separated milk, as it is at present well known that this article is sold to the poor as genuine new milk,

In the official report of the Local Government Board it is stated that the heavy adulteration practised 30 years ago has practically disappeared, but if we judge by the number of samples which are reported as poor, or as just reaching the standard of three per cent. of fat, all of which have to be returned as genuine, it seems that the practice of depriving good milk of a large proportion of its cream so that it may just escape condemnation by the Public Analyst is on the increase. This method of systematically reducing the quality of the milk is known as "toning," and it will be seen that a large profit can be made, without risk, when the milk is thus impoverished. Some magistrates appear to consider the limit of fat fixed by the regulations as representing milk of an average quality, and regard all milk coming within five to 10 per cent. of that limit as passable, but it must be remembered that milk of good average quality contains more nearly 3·5 per cent. of fat than the 3 per cent. fixed as the standard.

During the year attention has again been directed to procuring samples on Friday and Saturday nights, and also to sampling milk early in the morning.

I have also to report that in two cases only have summonses been dismissed owing to the defendant pleading the "warranty defence."

One case was reported and a summons issued for refusing to serve the Inspector when requested, and the defendant was heavily fined.

I would also call attention to the fact that of the 40 cases of milk reported against, 25 had a deficiency in the amount of milk fat, 14 had extraneous water, and one had both. Of the 14 cases where extraneous water was found, five were separated milk. This shows, as was mentioned in my Report for 1908, that adulteration with water is not so prevalent as it was some years ago, when the addition of water was the most common method of adulteration.

In 1891 for example, of 15 samples of milk analysed all were adulterated with water, in 1892, of 17 samples all were adulterated with water, in 1893, of 16 samples, 14 had added water

and four fat abstracted. In each succeeding year the proportion of cases where fat had been abstracted shows an increase.

I am also able to report that the Inspector who was appointed to carry out this work during the year has done so in a very satisfactory manner.

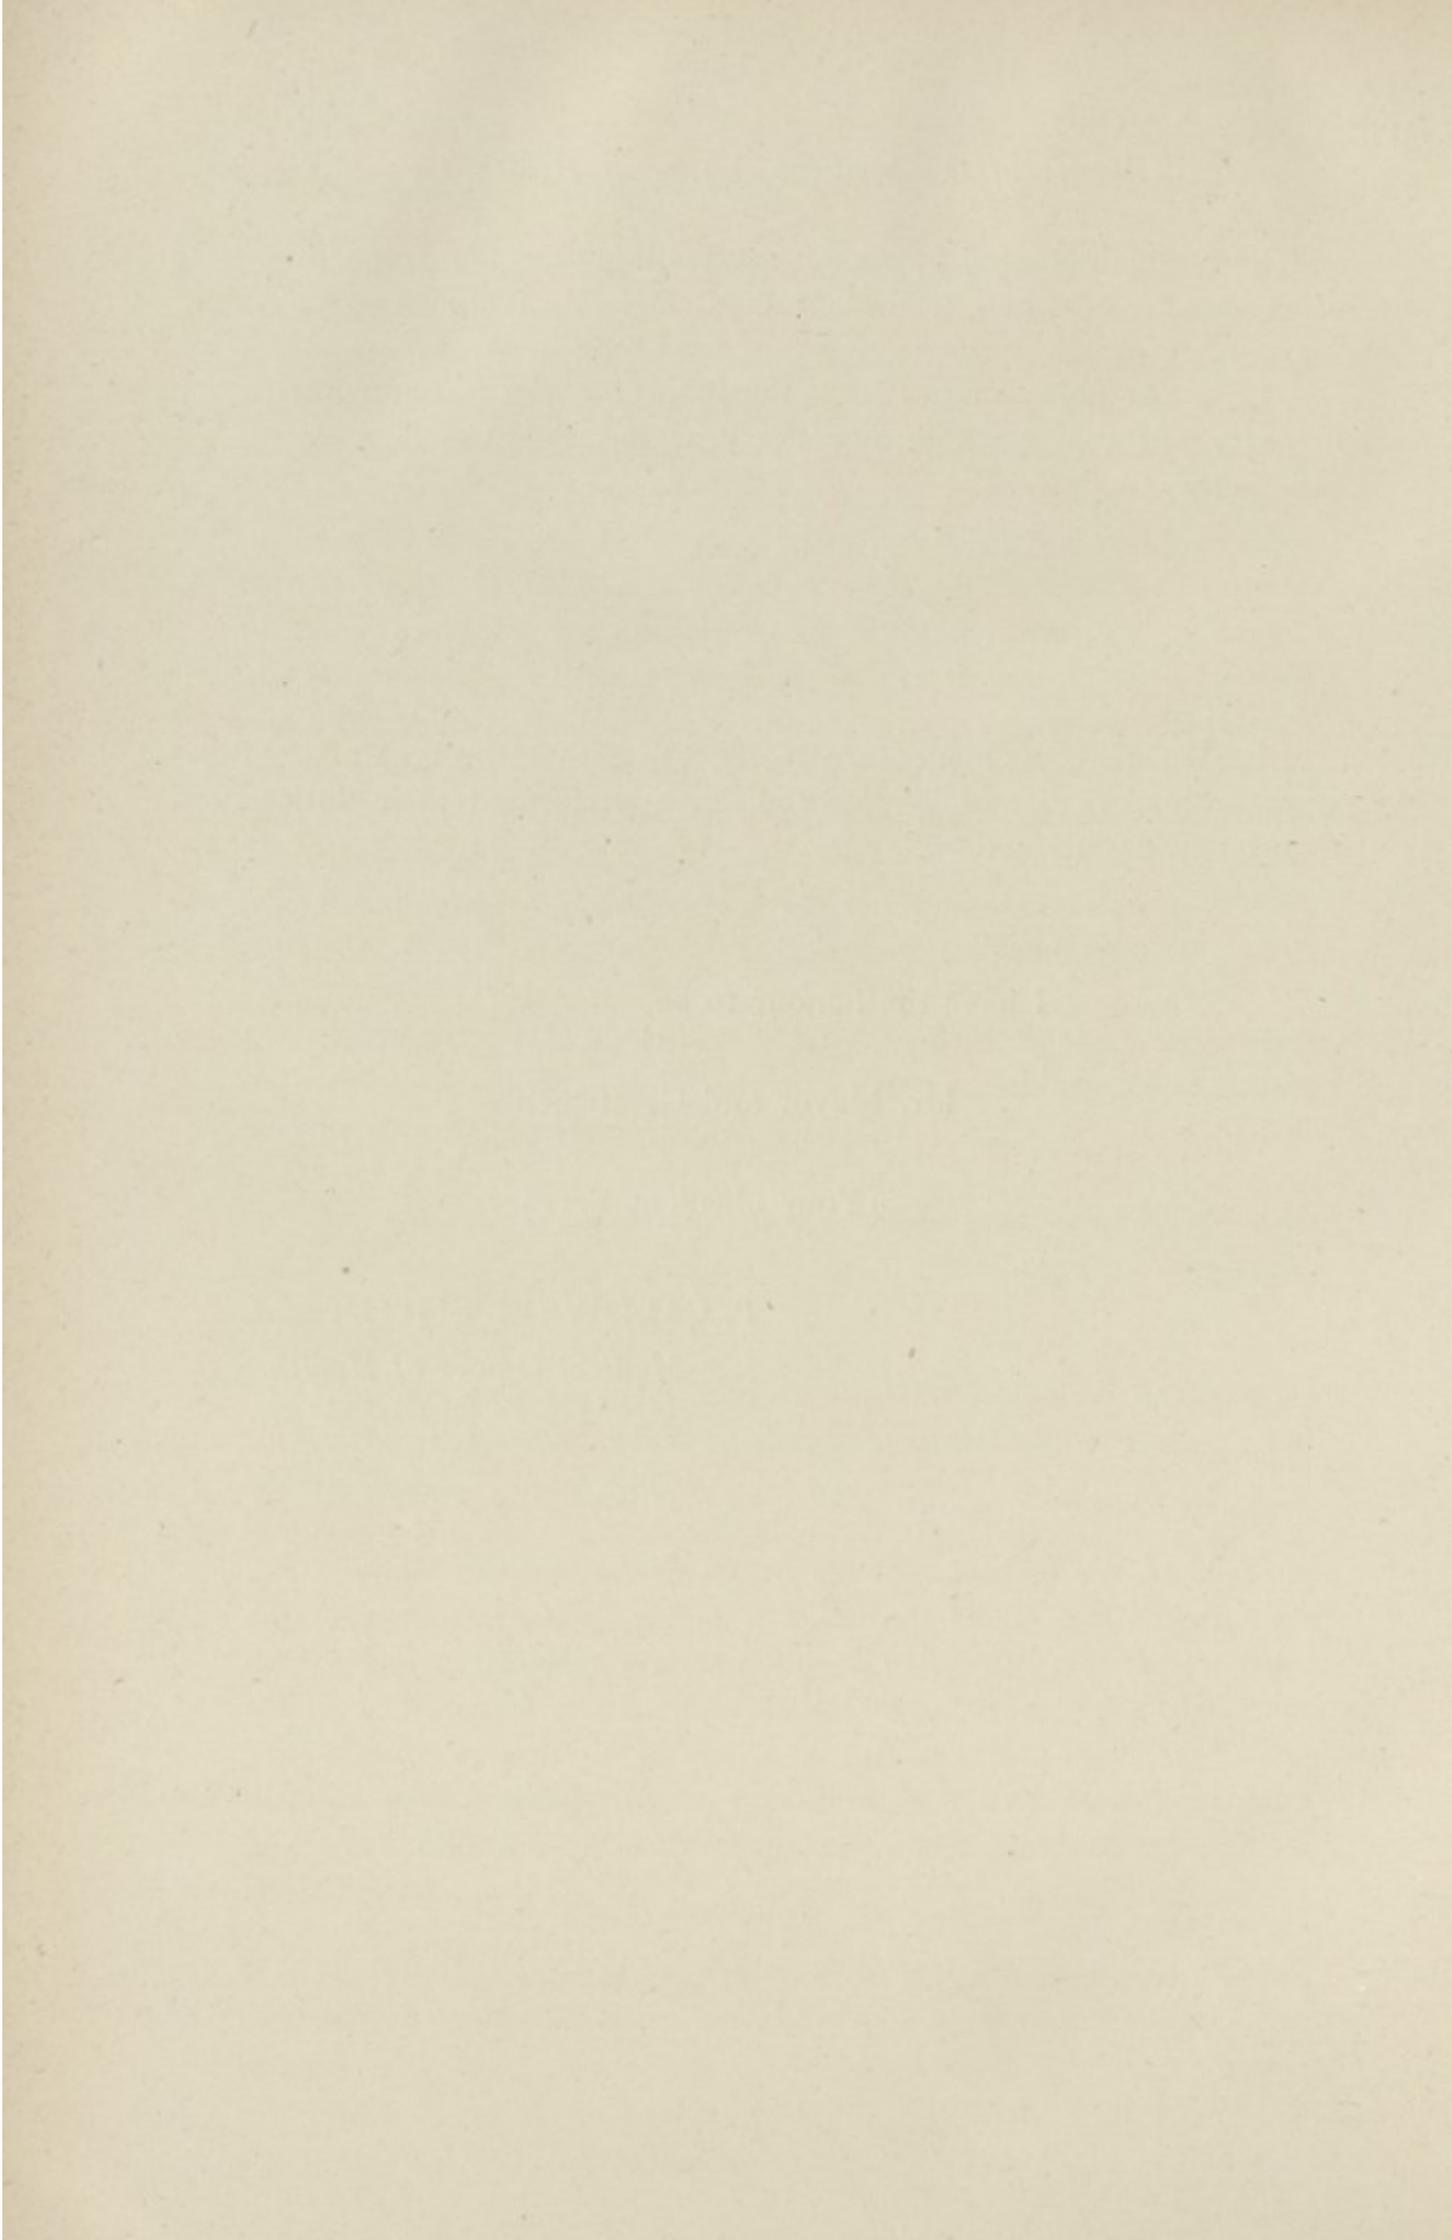

I have also much pleasure in reporting that the rest of the staff, both clerical and inspectorial, have performed their duties to my entire satisfaction.

I have the honour to be,

Mr. Mayor and Gentlemen,

Your obedient Servant,

P. CALDWELL SMITH,
Medical Officer of Health.

APPENDIX.

PARTICULARS OF DEATHS

IN EACH OF THE SUB-DISTRICTS

DURING THE YEAR 1909.

ANNUAL STATEMENT

Of the work done in the Borough of Wandsworth under the Sale of Food and Drugs Acts, summarised from his statutory quarterly reports by Dr. John Muter, Public Analyst.

During the year 1909 the Inspector brought to the South London Central Public Laboratory 1,030 samples of Food and Drugs, which may be classified as follows :—

Dairy Produce	867	samples.
Groceries	95	"
Cereals	37	"
Beverages	15	"
Drugs	8	"
Meats...	8	"
				<u>1,030</u>	<u>samples.</u>

1.—Dairy Produce.

The following articles were included in this division :—

Milk	541	samples.
Butter	299	"
Lard	21	"
Cream	4	"
Margarine	2	"
				<u>867</u>	<u>samples.</u>

Of these, 811 were found genuine or up to legal standard, while the following 56 were reported against :—

Name of Article.	Case No.	Nature and extent of Impurity.
Milk	51 ...	8 per cent. milk fat deficient.
Milk	71 ...	"
Milk	93 ...	"
Milk	94 ...	"
Milk	261 ...	"
Milk	265 ...	43 "
Milk	331 ...	92 "
Milk	333 ...	2 "
Milk	334 ...	46 "
Milk	372 ...	19 "
Milk	383 ...	3 "
Milk	397 ...	17 "
Milk	413 ...	6 "
Milk	414 ...	6 "
Milk	465 ...	5 "
Milk	487 ...	7 "
Milk	498 ...	3 "
Milk	525 ...	5 "
Milk	558 ...	5 "
Milk	626 ...	9 "
Milk	637 ...	5 "
Milk	638 ...	5 "
Milk	684 ...	66 "
Milk	981 ...	2 "
Milk	1013 ...	24 "
Milk	126 ...	11 per cent. extraneous water.
Milk	181 ...	3 "
Milk	223 ...	2 "
Milk	225 ...	5 "
Milk (separated)	489 ...	18 "
Milk	516 ...	3 "
Milk (separated)	577 ...	15 "
Milk	590 ...	7 "
Milk (separated)	632 ...	11 "
Milk (hot) ...	730 ...	30 "
Milk (separated)	917 ...	14 "
Milk (separated)	921 ...	30 "

Name of Article.	Case No.	Nature and extent of Impurity.
Milk	1020 ...	6 per cent. extraneous water.
Milk (skim)	431 ...	Separated, not skim.
Milk	816 ...	5 per cent. milk fat deficient, and 3 per cent. extraneous water.
Butter	67 ...	90 per cent. Margarine.
Butter	88 ...	90 "
Butter	131 ...	95 "
Butter (on bread)	239 ...	40 "
Butter	255 ...	100 "
Butter	307 ...	90 "
Butter	324 ...	95 "
Butter	732 ...	100 "
Butter	738 ...	95 "
Butter	811 ...	100 "
Butter	868 ...	100 "
Butter	870 ...	97 "
Butter	914 ...	37 "
Butter	928 ...	90 "
Butter	934 ...	100 "
Butter	968 ...	95 "

These results show that 7.39 per cent. of the milk samples and 5.35 per cent. of the butter samples were unsatisfactory.

II.—Groceries.

These included :—

Pepper	22 samples.
Coffee	18 "
Ground Ginger	12 "
Vinegar	10 "
Mustard	9 "
Olive Oil	8 "
Cocoa	6 "
Mace... ..	5 "
Sugar	2 "
Preserved Peas	2 "
Cinnamon	1 "

95 samples.

All these were found genuine, with the following exceptions:—

Name of Article.	Case No.	Nature and extent of Impurity.
Olive Oil ...	123	...100 per cent. mineral oil.
Olive Oil ...	145	...100 per cent. cotton seed oil.
Vinegar (Malt) ...	153	...100 per cent. coloured dilute acetic acid.
Vinegar (Malt) ...	822	...100 " "
Coffee ...	715	... 44 per cent. Chicory.

These figures show that 5·26 per cent. of the samples examined under this head were reported against.

III.—Flour and Cereals.

The following were included in this division:—

Rice	13 samples.
Arrowroot	12 "
Flour	3 "
Tapioca	3 "
Ground Rice	3 "
Sago	2 "
Pea Flour	1 "
			37 samples.

All these were found genuine, with the exception of four samples of Rice, which contained excess mineral matter removable from the surface of the grain in quantities as follows:—

Name of Article.	Case No.	Nature and extent of Impurity.
Rice ...	534	... 0·37 per cent. excess mineral matter.
Rice ...	535	... 0·54 " "
Rice ...	847	... 0·29 " "
Rice ...	851	... 0·16 " "

These results show that 10·81 per cent. of the articles examined were unsatisfactory.

IV.—Beverages.

These included the following :—

Ginger Beer 15 samples.

All these were found genuine, with the exception of the four following samples :—

Name of Article.	Case No.	Nature and extent of Impurity.
Ginger Beer	552 ...	1·05 grains of Lead per gallon.
Ginger Beer	561 ...	0·42 " " "
Ginger Beer	587 ...	3·3 " " "
Ginger Beer	710 ...	1·5 " " "

These figures show that 26·6 per cent. of the samples examined in this division were reported against.

V.—Drugs.

These were as follows :—

Cream of Tartar	4 samples.
Camphorated Oil	2 "
Comp. Liniment of Camphor ...	1 "
Milk of Sulphur	1 "
—————	
8 samples.	
—————	

All these were found genuine, with the exception of one sample of Cream of Tartar (No 779), which proved on analysis to be Bicarbonate of Soda.

These results show that 12·5 per cent. adulteration was reported in this division.

VI.—Meats.

The following were included in this class :—

Bacon	4 samples.
German Sausage	2	„
Saveloy	2	„
					—
					8 samples.
					—

All these were found genuine, with the following exception :—

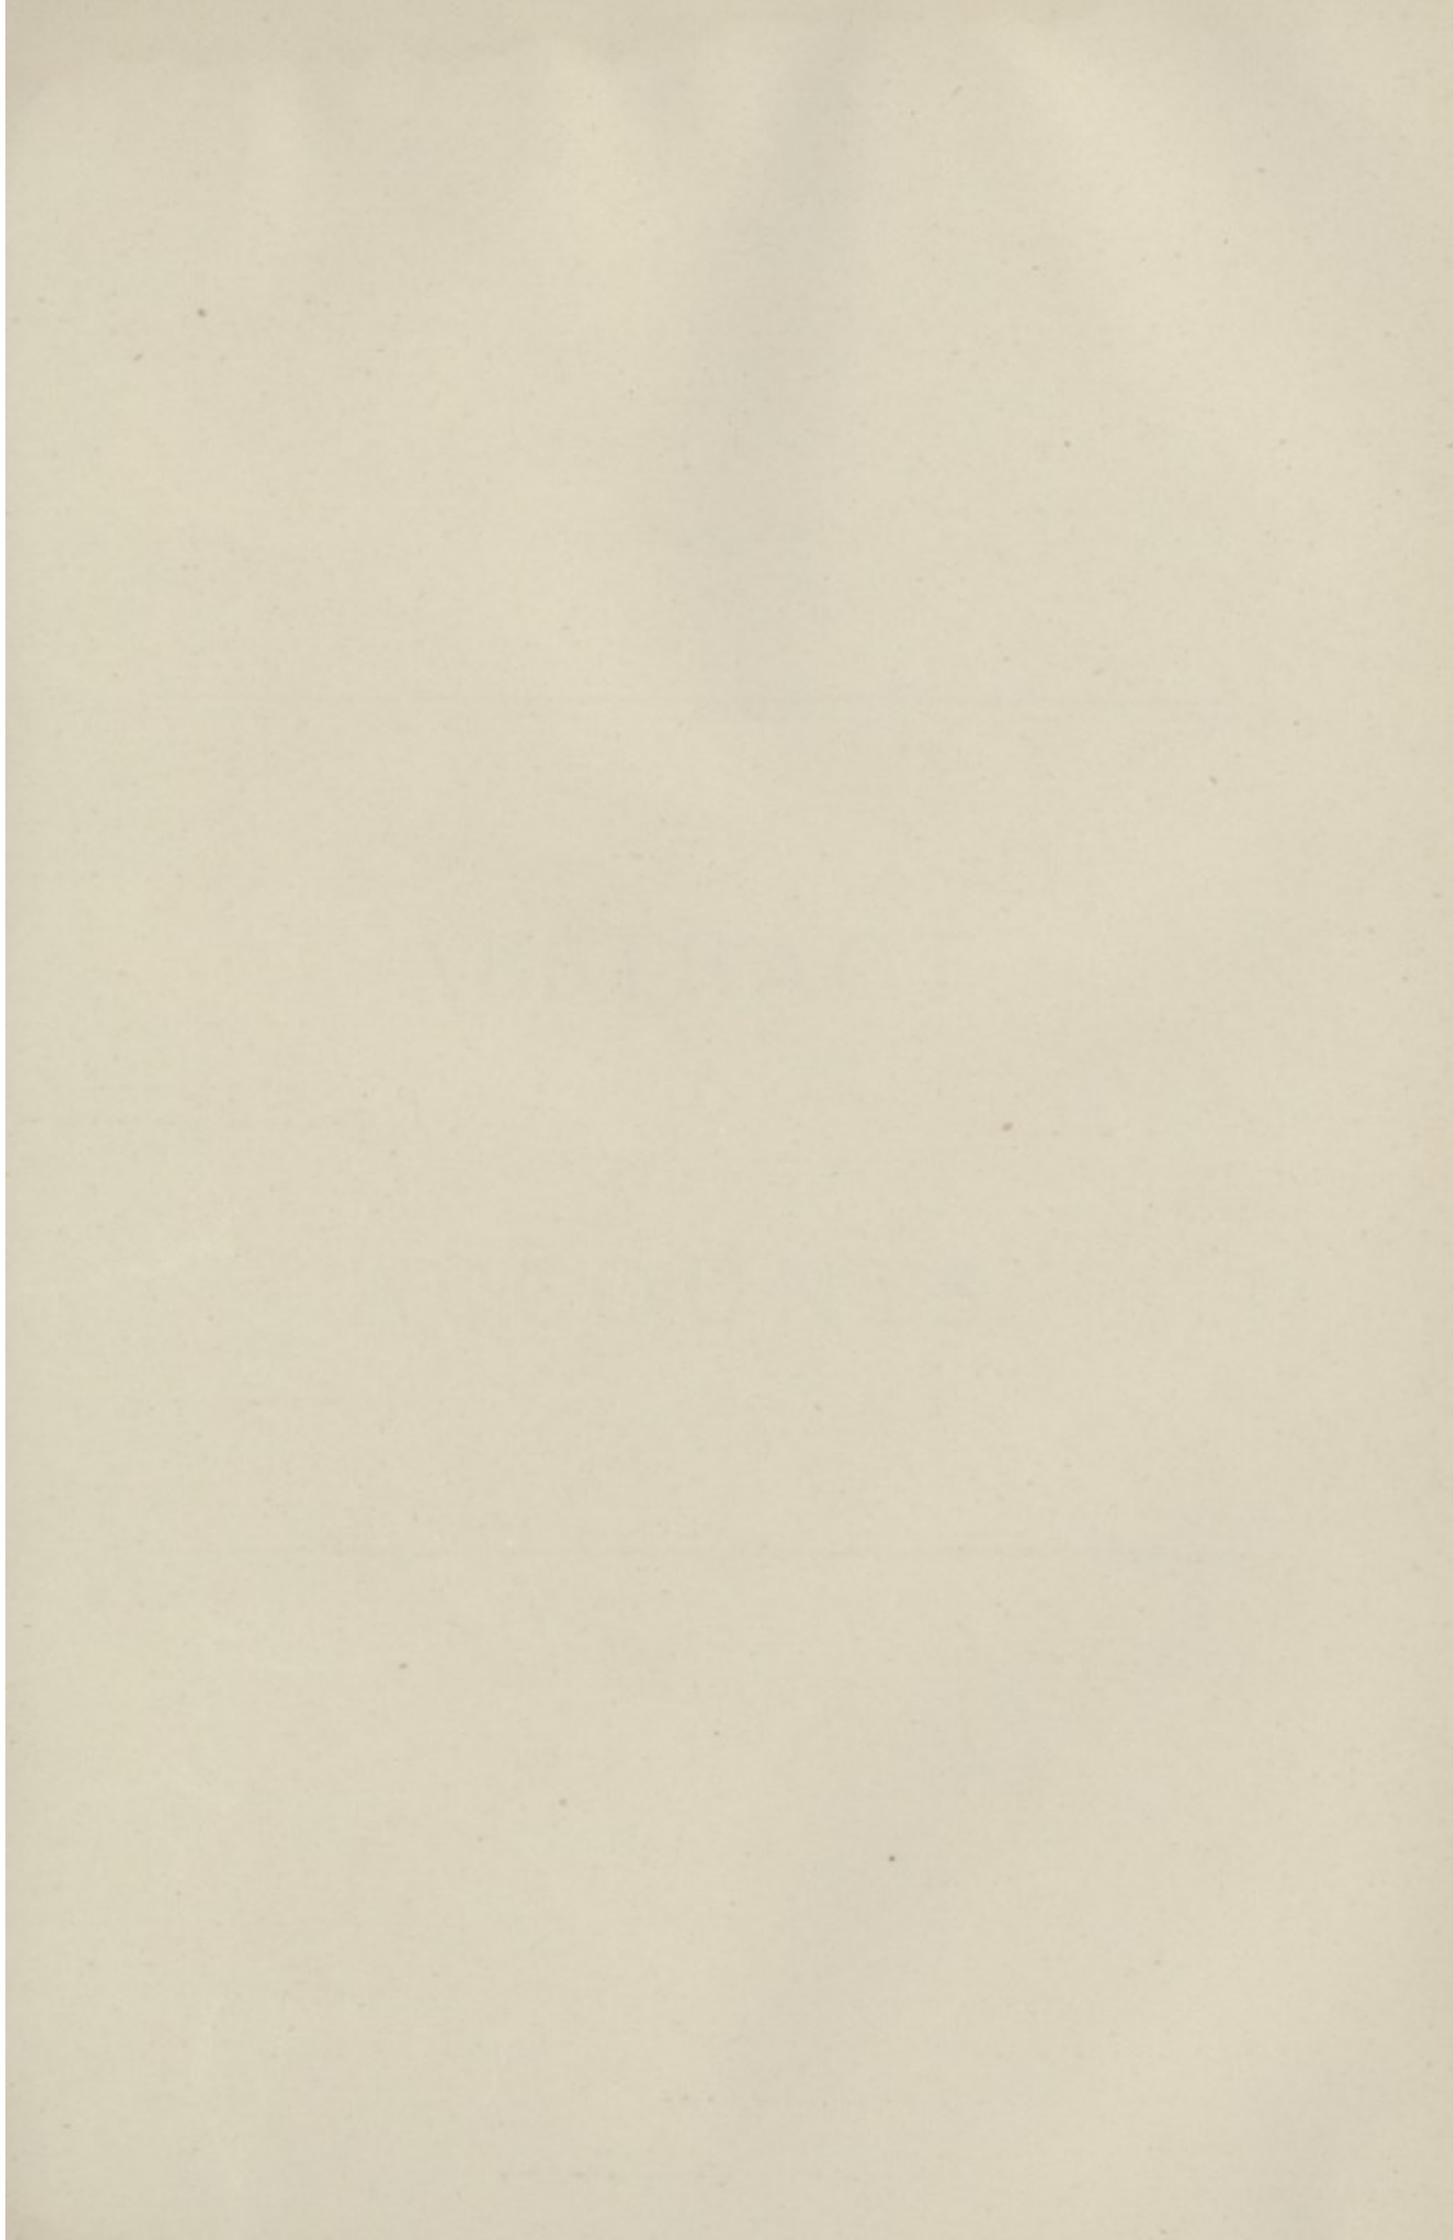

Name of Article.	Case No.	Nature and extent of Impurity.
Bacon 514 ...	2 grains per lb. Boracic Acid.

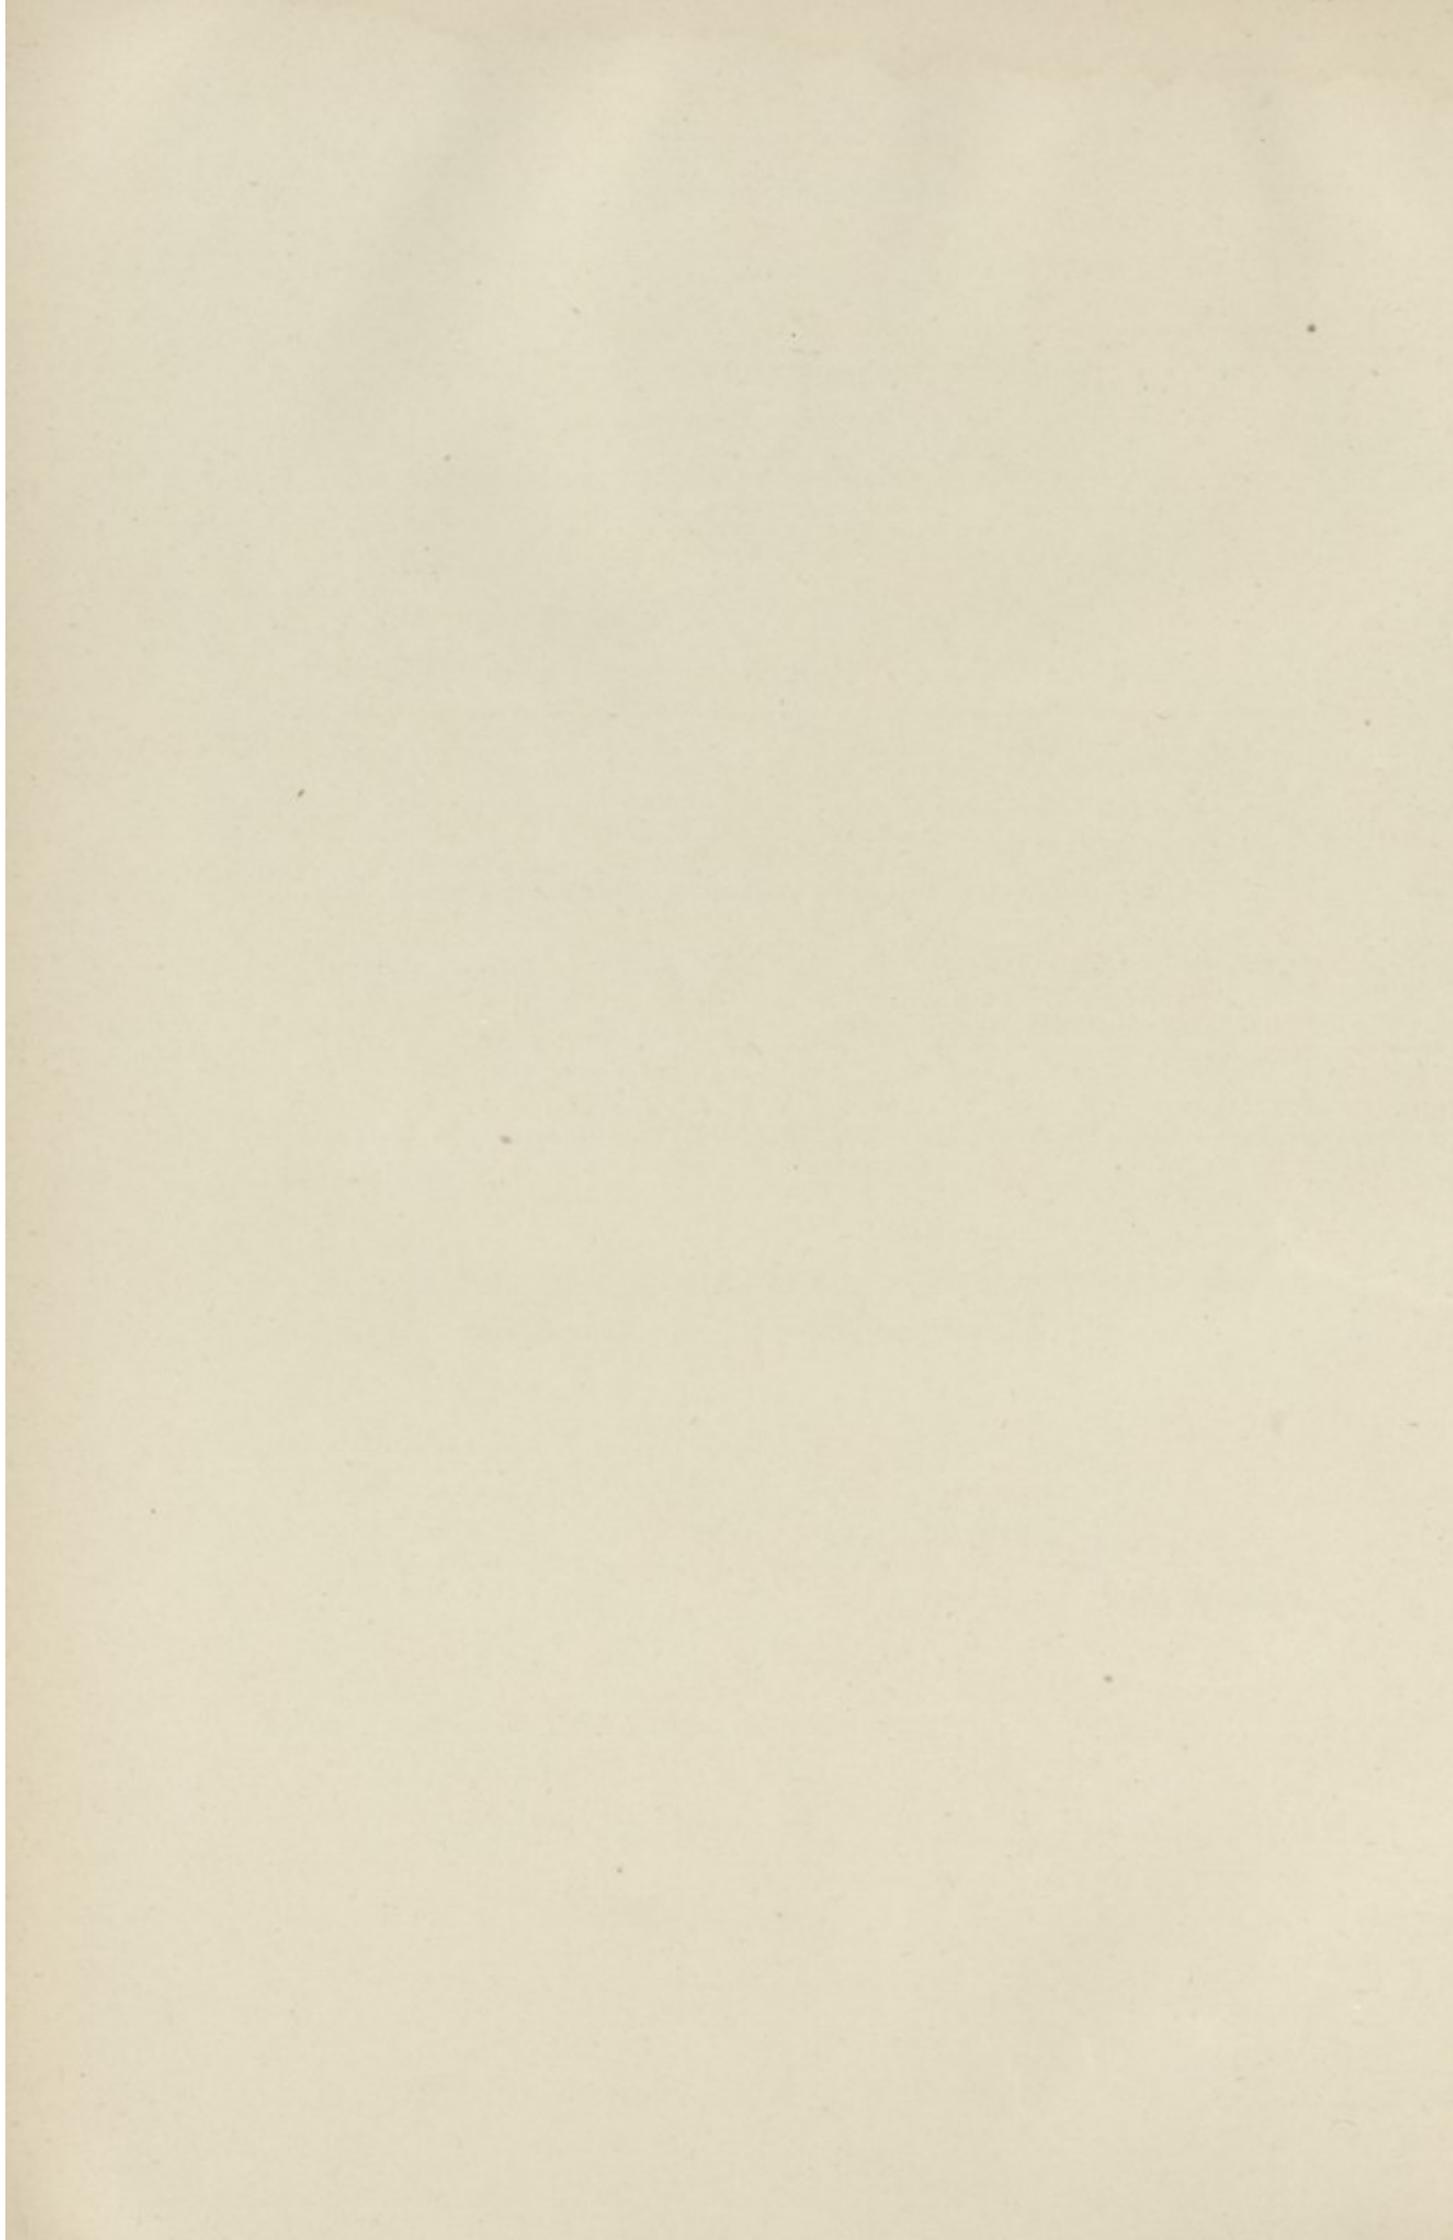

Thus, the amount of adulteration registered in this class was 12·5 per cent.

In conclusion, the foregoing results show that the total amount of adulteration for the year 1909 was 6·89 per cent.

JOHN MUTER, PH.D., F.I.C.,
Public Analyst.

South London Central Public Laboratory,
325, Kennington Road, S.E.,
19th January, 1910.
