The barometer continues falling round the China Sea, evidently owing to a typhoon to the westward of Luzon. The weather is clear, hot and very dry in China. Cloudy and wet in Luzon.

1—Barometer reduced to level of the sea in inches, tenths and hundredths. 2—Temperature in the shade in degrees, Fahrenheit. 3—Humidity in percentage of saturation, the humidity of air saturated with moisture being 100. 4—Direction of the wind to two points. 5—Force of the wind according to Beaufort scale. 6—State of the weather, *b* Blue sky, *c* Detached clouds, *d* Drizzling rain, *f* Fog, *g* Gloomy, *h* Hail, *l* Lightning, *o* Overcast, *p* Passing showers, *q* Squally, *r* Rain, *s* Snow, *t* Thunder, *v* Visibility, *w* Dew wet). 7—Rain in inches, tenths and hundredths.

W. DOBERCK.
