12 and 13, made by the Commissioners in Lunacy with the approval of the Lord Chancellor, dated June 26th, 1895.

12.—Within seven days after the receipt of a certificate shall be entered in the Medical Case Book for Patients the following particulars:—

1.—An accurate statement of the name, age, sex, and profession of the patient, and whether married, single, or widowed, and a copy of the statement of facts contained in the medical certificate accompanying the reception order.

2.—An accurate description of the external appearance of the patient upon admission:—of the habit of body and temperament; appearance of the face, countenance, and any other peculiarities; form of head; physical state of the muscular and respiratory organs, and of the viscera, and their respective functions; state of the tongue, skin, &c.; and the absence, on admission, of bruises or other injuries.

3.—A description of the phenomena of the mental disorder, the manner and period of the attack, with a minute account of the symptoms, and the changes produced in the patient's temper and conduct; specifying whether the malady displays any delusions, or morbid or dangerous habits or propensities, whether it has occasioned any failure of memory or understanding; or is connected with epilepsy, or ordinary paralysis, or general paralysis.

4.—A particular which can be obtained respecting the previous history of the patient:—what are believed to have been the predisposing and exciting causes of the attack; what were the previous habits, whether active or sedentary; whether the patient has ever had any former attacks, and if so, whether any relatives have been subject to insanity or other nervous disease, or pithitis; whether the present attack was preceded by any and what premonitory symptoms; whether the patient has undergone any, and what, previous treatment, or has been subjected to restraint of personal liberty.

5.—Subsequent entries describing the course and progress of the case, and recording the results of any treatment, with the results, shall be made in the case book of Patients at the times hereinafter mentioned, that is to say, once at least in every week during the first month after admission, and if necessary; afterwards, in acute cases, once at least in every month, and in chronic cases, subject to little variation, once in every three months. But all accidents and injuries, must be at once recorded. A printed copy of this and the last preceding section shall be placed at the beginning of every Case Book for Patients.

Arthur Knowles

admitted January 18th 1896. as Veterinary Surgeon -

Is aged 2. unmarried - of no occupation has some private means -

This gentleman is well known to us for the last 15 years. He is the 2nd son of the late William Knowles who in 1806 was a partner of ours and who died of general paralytic at his own house in 1889. Arthur Knowles is one of a large family among whom there is strong hereditary taint. His father had been able to take up some occupation in recent and well as his school & university. The 3rd son of the family being - Arthur was intended for the law but at the age of had chosen a profession in his arms - He was recommended to take a voyage & went to Constantinople & from there he developed epileptic fits & had to give up all hopes of remaining at the law office - He had fits at frequent intervals & then was put again for months. He was treated by Dr. Jenner and by others but without much improvement. He was 14 years with various medical and but finally left after a few months. In 1873 he went for another voyage & in 1874 was a Veterinary Surgeon here - he was then treated by Dr. in London and on a short time returned home was removed from the work. In 1895 he went to Liverpool with a companion - Since then he has remained here a full

afflicted in his mind after an more than usually strong attack of fits and in October of last year 1895 was under our care for a short time - Then he went to Scotland to a sister's house & remained there till he came here on the 15th of January. He is reported to have been in his usual health till the 10th he had been taking much rest and amusing himself in various ways. had been out shooting and had been corresponding with his family as usual - on the night 10th of January he complained of not feeling well - on the 11th he was very strange in his manner and hallucinations began to appear he thought he was possessed & would not believe when he was at church - In the evening he wandered out & walked into a stream of water. on the 12th he was early & resolute in coming to the work & the work came up to him with him to the hospital - They said & he said to him quietly - on the 13th was apparently much in his usual health till 10 AM. when the work left him for half an hour - in this interval he had some delirium & behaved very strangely in the Reception Room of the Hotel & was found on his knees quite incoherent - He was then carried down here arriving about 2.30 PM.

Arthur Howells

on his arrival - of middle height very well developed
 short brown hair & dark eyes with long lashes - small teeth
 his left fingers - oval face - narrow complexion, skin moist
 rather full & somewhat - lips dry - tongue dirty - tongue pink
 very sweet. Smiling tranquilly & though he showed me & showed
 when he was he rambled as in a morbid condition -
 his joints were shaky & weak. He talked of having been
 under chloroform & that an operation had been performed
 it was intended to be removed - had passed water in his
 clothes - the case was urgent as he remained here -
 was given a warm bath & sent to bed at once - when he
 remained quietly. Took some soup & light food later.
 14th Arthur's whole night was so quiet rather restless early in
 & early morning. In the evening was more calm. Shows desire
 to hear his signature with satisfaction as the work appeared
 to be finished. 4 grains of calomel followed by 4 grains of
 he was kept in bed. His relations were common cases with
 and a letter was written to the Commission in evening.

15th Arthur's night but remained very quiet & sleeping as
 usual till about 2 P.M. Then passed a very restless night &
 much hard pass. There was marked improvement after
 this and in the evening he wrote a letter noting the
 attendance of a Publishing Woman.

Arthur Howells

Jan 16th

Today is very much better - has had slight tremor for
 some weeks but is quite clear in his mind -
 "Concord" to his being a voluntary boarder was received -
 this was satisfactory to us for the sake of opinion that the
 mental symptoms were transitory & that he would soon
 recover his mental balance. Colonel reported 3rd.
~~to~~ So far very quiet & remains in his room - C. H. T.

17th

Has slept well & is during the day but can converse
 and has no delirium - is rather dependent & complains
 of having "mad feelings" not being so well & crazy himself.
 18th Sitting up in his room a little - feels very weak & still complains
 of feeling queer symptoms C. H. T.

Feb 1st

Very much better in every way. no sleep for several
 12th he has been particularly well and bright and is looking stronger
 than he has done for some time - has written his article
 has been to London & his doctor - his father is arranging
 for him to leave at the end of the month - C. H. T.

March 16th

Leaves today to return with Mr. B. to his home at Wallingford

Arthur Knicker.

Attendance March 30th 97. Has been several times
under treatment at Portland Hospital -
Since last admission has much improved whilst being
very severely in the country and his looks for both hands
and disposition has become considerably modified -
He has lately begun to think again with a high probability
having proposed himself to undertake some business
concerns with the natives - He recommended that there
was another he was advised home by medical
advice - It appears that the first was very slight
and insignificant and that he was able to ride about
and take long journeys on horseback - But he seems
to have had a serious attack which was said to
be "convulsive". He tells me that he was unconscious
for three days and was "off his head" for two days
after that, and "thought he was dead".
He retained hope in my good health, except for some
"trivial sore" which he now heals.
During the absence of his mother and family at
he has lately been living in lodgings at
Portland. He had several times where some he
has been, and has been here again, reporting that he
remained very excited & seemed as if he required
more care than he could provide for him.

Dr. Knicker applied for admission all over as an
Portland Hospital -

Nov. 21st Seems in fine general health - looking "harder" and
better for his trip to Africa - There is not health
continues - He seems happy and reasonable
in manner - Some general treatment was ordered -
He has slept well & has a good appetite - There has
been some general treatment - He is attended
with care - No fit -

Nov. 28th A slight fit this morning in bed at 8 o'clock - was
able to rise and have some dinner at 9 o'clock as usual -
He has been to London from his mother and Dr. Knicker.

Frank Weston Shepard

attended as Vinton County Boarder November 1896 -

Single aged - 3. an artist.

His father and his family have been farmers there
all my life.

The family is a healthy one four other sons one being
and one in profession.

The father himself was at hand - taught school -
from time he went to study and was for some time
at the art school at Paris. of course his life was then
rather uneventful but he showed much talent for his
work. He never knew when he had an attack of morbid
hypochondria and an idea that he was suffering from
neurasthenia.

Since he has been working he has chiefly lived at home -
seeing a steady rise at hand. He might have made
a good name but has always been very methodical
& creative, doing good work but missing opportunities
by reason of want of steady application being held by
being further impeded by.

Five years ago he stayed in my house for a month
to paint my children's portraits but never finished them.

In the 9th of November I was advised to see him, he had
been very unwell and had left a number of hours in the country
and had been brought home -

He is well developed but of short stature - features thin -
free dollar. In person rather of anxiety & distressed
though thirty people rather selected - thin belt.

Morale unimpaired - sleeping very badly for some nights
& eating very little or at most very unappetizing exercise -

He behaved very naturally & kindly with me & his family -

I find him naturally suspicious of new people but very
friendly to me. He talked of being "treated" by persons
whose ideas about the feet & of the numerous being
some changes upon him. But he was really to admit

that this might be all nonsense, and on my asking
how he became a Vinton County Boarder & came to this point
he at once admitted and with him accepting letters asking
for permission to do so - He then returned from
his father's home in Huntington W. Virginia with me -
he arrived with me and behaved very well and talking
some nonsense after dinner -

Indeed his colored go. TV. - November 31. 1896.

L. H. Shepard

Nov. 10th

Slaps my family - travels open house.
Says he feels much better - has gotten out a
affair with a bridge in the garden -
Seems much clearer but wishes to talk of himself
& of his feelings and doubts - shows some sound
material & has in my opinion been practically
rather inactive during the day talking of returning
home & then making plans for day work here -
Lacked regular sleep & attention -

13th

Has been out driving to Richmond Park - but
very much better disposition - & that disposition is
more natural and true - talks quite reasonably &
admits that all his friends were among early
arrives himself - plays football & has been out
driving - Hoping to become more practical &
methodical & to know more readily -

18th

Is practically well - just free from any medical process -
general health is improved - he was in good luck &
is engaged during the day, but of course regularly -
Is very cheerful -

C.H.P.

L. H. Shepard

Dec. 11th

Has been going on extremely well - seems in
perfect health & spirits - constantly speaks of
going to my house - is surprised by possibly
seeing in the morning & by seeing bridge etc.
Very fond of running my children & talks of painting
them portraits - Shows more his promise to
finish some he has already begun at his studio
& he promises to work methodically & to finish
his by Xmas -

He leaves today Richmond C.H.P.

Otto Wein Smith.

Admitted. Jan 9th 1897. Rt. 19. Bank (Clark-Single. Ch. of
England.

Was called to see Dr. O. W. Smith on the 9th and found
him in bed in a small room in a very cozy home,
with a hot water seat over him with rheumatic pericarditis.
Dr. Smith was lying in bed, he seemed at the time young
just to be young, answered questions well, con-
fessed to be the cause of his condition, and described
the disturbance of the previous night as a nightmare. I did
not feel justified in certifying him as insane, though
I was suspicious about him to know that his state
was in all probability an unstable one (he was reading
they and dreams, arrested his face, and laughed in an
hysterical manner, and a tinge of purple on the
cheek) so I said that a man should be sent to
pass the night in the house with him. He ^{was} taking
Bismuth of Potassium, and apparently was much improved
thereby. There was no disturbance, and next day
Dr. O. W. came in consultation, and he agreed that
he should be under the care of a male nurse, and if
possible that certification should be avoided. His friend
came next day in great distress, saying that he had
again had a "nightmare" attack, wanting to leave his
room & join his brother's, and apparently for the

O. W. Smith.

Short time is needed, hardly conscious. He had been
 described as lame, and Dr. Smith having signed a
 letter of request, was received here as a Voluntary
 Boarder, arriving about here on the evening of the 9th.
 He sat in my dining room for some time, and with
 Mr. Tule, had a cup of tea, he then said he thought
 he should take to go to bed, and he had dinner there.
 I saw him after, and asked Col. G. W. and Dr. Smith
 He was rational but slow in answering, and was
 quite conscious of his surroundings.

T. Loggins Tule

An admission, tall strong looking young man, with a
 pleasant face, but rather vacant expression. Hair
 thick, forehead rather low, but general appearance
 strong & muscular. He speaks very little except
 when spoken to, and then at times makes rather
 curious statements. Occasional spots on forehead &
 face, nervous manner, and when he laughs does so
 explosively & tries to suppress it at once. Tongue is red
 at all times, history of constipation, and feelings of head
 burning & "muddle." Pupils dilated.

Jan 10thJan 11th

at 3 am. & again at 11 am the same excitement, requiring
 to be kept in bed; is certainly more dull than morning
 and hardly answers when spoken to. In visiting Chairman
 Dr. Colman this P.M. saw him, he looked up but says
 scarcely aware of their questions, and they gave instructions
 for artificial respiration to be procured. Dr. Cary & Mountain
 saw him between 5 and 8 pm. and he was then left
 telling Dr. Cary that he ought to be dead etc. B.S.

T. Loggins Tule.

Certified Jan 11th 1897

George F. Bishop

Admitted May 15th 97 - aged 45. married 3 children
 about 16. of no occupation - has always been fond of
 full sports has hunted & shot & fished.

Residence at Warren & Cambridge - has always managed by
 hand in alcohol & liquor - and for the last 15 years has done
 so very freely. has however shown a great tendency to
 stay with his bottle in last a few months.

his wife has been one of self indulgence - taking smoking
 & visiting base meetings. this wife has lived apart from
 him for some years on account of his habits.

his mental powers are deteriorating his memory is very
 defective - he is despondent and being generally very placid
 and good tempered.

In consequence of the violent mental outbreak his
 friends had persuaded him to put himself at last under
 some control and he willingly agreed to come here.

he talks a remarkably great deal of the matter and expresses his
 wish to improve his health. has been very kind to me and
 children part of -

May 15th

On admission - short fair hair - signs of mental development
 - slight euphoria and content. - suffered cerebral
 night very hot & protracted - respecting condition
 of pulse & temp. - thaty good. - white nervous manner -
 Pulse 100 Temp 99.

On admission but very drowsy & somewhat restless had some order
 put for some time -

Went to bed in the evening - & seemed to be early -

Superintendent's intention of doing all that he was ordered to do
 and of obeying all orders - quite pleasant & obedient -
 Latent 8.11.

14th

In bed all day. pulse 100 Temp 99. - made some
 noise all of day. - then some or attempt to rise or
 walk. he has taken some small amount - & returned
 a glass of champagne for small & return with other food -

15th

bedstead better. - for lunch took a wing of chicken and
 glass of beer -

Washed by his father & by his wife & daughter.

George F. Bishop

May 25th

There is a marked improvement in health & in mental
 condition. Mr. Bishop has been tranquil and contented -
 He has regained his appetite & can sleep well -
 Recently he feels much stronger and has now directed
 his attention on matters of business; his recovery is better than
 he is frequently credited by friends -
 His appearance too is greatly improved - the evening frolics
 is very slight.

Mrs. Anna Holzappel

admitted September 22nd 97. Kind eye.

Has always been rather convalescent and hysterical

Generally poor health.

Was married at Longwood in

was a half month after marriage left her husband

whom she has since divorced.

Visited my old Berlin home so many months

here she was sent to the Berlin Royal Hospital

Sanctuary in January 1897.

She was then in a condition of "anxious depression" with delusions that she had "lost her soul & must live for ever". She then had a "vision" of a "free & thank of a specific character". Later in February there was some hallucinations & on stage sleep on left. Tremulous again was discovered. She was treated with

Phosphoric Acid.

She began to improve some tonight. Her left hand when she was admitted made pain & left shoulder & attempts. Phosphoric Acid continued till April 5th then in connection of formation of granules which appeared she was put on mercury. After a week of this she became brighter & became calmer. Her left arm almost quiescent. By May she was more quiet. Last still had delusions - Quinine & Iron administered.

and of May. Improved a good deal in June.

Since admission with mother but had to return to hospital

Very fully justified in manner but improved in health

and on arrival to specific symptoms & treatment suspended.

In August - sometimes depressed - & emotional -

In admission - Small dark woman - supine position

well & comfortable but manner natural, had eyes

the right person, with her mother & some time with mother

mother. Seems very tired & has lost weight since in

last 10 months. Talks freely with me in confidence &

expresses just wish to get well & return to mother

Can hardly realize time she has been ill. Does not

actually express delusions - seems very pleased to come

here & will promise to do all she can to cure herself.

Some spots of a specific character still remain on head

& on back of neck. Hair she tells me has been coming out.

Not much appetite.

Sept. 25th Has had a quiet night but did not sleep very well.

Quite true & natural in manner - inclined in the former

History the former - Talked a good deal to me -

the depression seems profound & talk just together she only

seems to have quiet at home. Talks next week.

Mr. Holzappel

Sept. 26th

Has slept very little last night. This morning is rational
in conversation; denies having any delusions or suicidal
impulses at all - says that she has always slept badly &
will talk out of her head sometimes.

Abundant - 2000 grains of Hyposulphate - twice daily -

27th

Slept very well again today Thomas J. - one hour in bed all
day as she was appearing well & quiet - continued to talk of
some of her past private affairs - Hyposulphate 2000 grains

28th

Has not slept much - feeling rather unwell, today seems
having lost her faculty &c.

29th

Seems fairly reasonable & more calm has slept well
last night - denies all delusions & says she has herself
written certain reasonable letters - still talks of her
"propagating" &c.

Is not taking any medicine at all -

Her eyes are almost healed - pains in the
head & limbs are complained of but not very clearly -

Nov. 9th

Her better health - has been visited by her brother & sister
& by her mother - she has been generally cheerful -

Nov. 14th

Mr. Holzappel had a better night, & increasing
at last, at times has been quiet today but
has talked wildly & foolishly at times - wishing
she could be shot, talking of her being worth to die.

Mr. Holzappel -

attended service in afternoon.

Nov. 15th

Another bad night, very lethargic and at times
screaming. Must make herself sick by putting fingers down
throat - Vegetables & every thing will talk of nothing
but herself.

Nov. 25th

Has been somewhat better lately. Has had more
sleep & has not been quite so self-absorbed. Her
General conduct is strange, she talks very harshly
to the nurses about her private affairs, has to be
carefully watched at her toilet, & would neglect
herself: requires to be told when to change her linen
&c. She has taken part in dancing lessons,
& joined in entertainments, but her conversation
generally turns upon herself, the crying she
excludes, & the impossibility of her ever being
well &c. She takes walking excursions, & occasionally
goes in the Street with other ladies. Is very
wasteful & unthankful.

Nov. 26th

Dr. Bell - saw her today & administered medicine. Her
brother has been communicated with.

Mr. Holzappel

Sept. 26th

Has slept very little last night. This morning is extremely
in conversation, denies having any delirious or unusual
impulses at all - says that she has always slept badly &
will talk out of her head tomorrow.

Advised to take some of the Phosphorus - twice daily -

27th

Slept very well several days previous to this. She is now
very nervous and appears to be in a great deal of trouble
on account of her present affairs. Her delirious ideas are very
strong.

28th

Has not slept much - talking rather wildly today as
having lost her sanity &c.

29th

Seems fairly reasonable & much calmer than she was
last night. Denies all delirious ideas & thinks herself
perfectly sane & reasonable. Still lacks of her
"propensity" &c.

Is not taking any medicine at all -

Her food is best than almost healthy. Some of the
nurses & friends are displeas'd of her not being clearly -

Nov. 9th

Her better health has been visited by her father & mother
& by her sister - she has been generally cheerful.

Nov. 11th

Mr. Holzappel had a better night, screaming
at last at times has been quiet today but
has talked wildly & foolishly at times - wishing
she could be shot, talking of her being unable to die.

Mr. Holzappel -

attended service in afternoon.

Nov. 15th

Another bad night, noisy, lethargic and at times
screaming. Tried to make herself sick by putting fingers down
throat. Hypochondriac & very today will talk of nothing
but herself.

Nov. 25th

Has been somewhat better lately. Has had more
sleep & has not been quite so self-absorbed. Her
General conduct is strange, she talks very freely
to the nurses about her private affairs, has to be
carefully watched at her toilet, & would neglect
herself: requires to be told when to change her linen
&c. She has taken part in dancing lessons,
& joined in entertainments, but her conduct
generally turns upon herself, the impossibility of
her ever being well &c. She takes rather exercise, & occasionally
goes in the Street with other ladies. Is very
wasteful & unthankworthy.

Nov. 26th

Dr. Bell - doctor today & some interest. Her
letter has been communicated with.

Mr. Holzappel

Nov. 30th.

Spoken to London today, properly attended, to see a picture. Richard fairly well, but could not apparently refrain from repeating his ideas - but at the entertainment in the evening and quiet, enjoying the dancing.

Dec. 1st 1847.

Visited by her sister today. Dr. Savage said as he is in opinion that she had better be confined. He has the wife from Dublin, asking for permission if possible, & better if would be possible for her to go home for a time. She repeated her ideas to her sister & Dr. Savage, & finally broke down entirely telling them about her agony. And she had been very alone, had not steadily & was willing to be allowed to go away. Petition from Mrs. Wilson to her mother, and all relations on the subject.

Dec. 8th 1847.

Mr. Holzappel admitted as patient.

Subsequently discharged by usual process.

Dr. Augustin F. St. John's building

Went again to St. John's building - as before
 was previously seen on card in 1870 under description
 History of case - generally good health - some slight depression
 at times - active and energetic in habits - has no
 children - living in France & winter abroad as a rule -
 In 1870 was much depressed & whole amount was paid
 was more or less greatly depressed & sleep & delirium
 about - poverty & more - police officers coming to fetch - his
 clothes - rooms falling in upon her & & other folk -
 Generally recovered and in 5 months regained her health
 Since then for 8 years has enjoyed good health - has been
 very active - went to Paris & the present visit to
 Paris - journey for business & personal Sir Edmund Seymour
 who lives with her when he is in town was ordered to
 change in command of the Fleet - his departure was
 much regretted by her and she seemed distressed by it -
 She was - seemed as usual to St. John's & joined her mother
 who live there - she got - rather depressed and began to
 sleep badly and took - kind of having spent - to much money
 Some strange symptoms came on and her physical health
 evidently suffered - she went to see Dr. St. John's saying
 that she was coming home with her mother & asking me to
 advise that she -

In the 12th March I saw her at her house in Longford Square -
 I found her quite reasonable and rational in manner but
 looking anxious and in bad health - though there were no
 sensible delirium she talked mostly of her father
 seemingly diffidently - she was quite aware of what her
 name was - and though her mind was & sleep & sleep
 with me and quite indicated that she had a balance but
 found that it was insufficient - she distressed herself more
 nearly about this - there was a slight foundation for her
 very anxious as her brother Sir S. Seymour who had
 had helped to defray expenses - but this was manifestly
 of great importance - she was sleeping badly & evidently
 distressing herself and I advised that she should leave
 at once as a Winter house - this she said would be
 nearly what she would wish but she doubted if she
 ought to leave any expenses - she went for her mother -
 In the 15th she was more depressed & restless night & the
 idea was growing in strength - she could talk of little else -

Francis Peter Gervais

admitted June 15th 1898 for treatment.

Age. Married. no children. Born in London in London where property in Co. Down. Education at St. John's Cambridge. Working in a bookshop in London at present.

Has been in some mental hospital being treated on an order signed by his general practitioner.

V. Case Book.

Remained after a week of hospital treatment because he had been married for a fortnight. He was 46. He had been with his wife, being described as "manic" though he had assumed "house of arrest" before he was in being 35th.

He seems to have been in the hospital for some time at present. He had been married to his wife on June 12th.

He had two weeks' illness. His friends took him to see Dr. Daniel Brampton when he exhibited signs of mental aberration - he advised his removal here.

He arrived in a degree of confusion but very mild - orderly & quiet - and he had been in the hospital.

He took a light dinner.

His name is Francis Peter Gervais.

MS. 6227 29/30

REGISTERED TELEGRAPHIC ADDRESS
LAWSON SQUARE LONDON

16, STRATFORD PLACE,
OXFORD SQUARE.

June 15th, 1898

Dictated.

Dear Madam,

I saw Mr Gervais yesterday and in my consulting room he was quite incoherent. I should prefer not to give a certificate because although there is no doubt in my own mind of mental aberration yet still his conduct was of such a nature that it might be put down to his intention intentionally acting a part. I see so few cases of mental aberration that I do not think I have signed a certificate for more than thirty years. I do not feel however, thoroughly competent to sign a certificate now and would prefer not doing so, and only furnish others with the facts I have observed so as to enable them to write a certificate on Mr Gervais' condition. So far as I was able to examine him in a very imperfect way his physical health appeared to me to be sound.

Believe me,

Faithfully yours,

Lawson Brampton

So in my poor health & no more changes & thanks

C. Lawson

Francis Peter Geronis

admitted June 15th 1898 for treatment.

Age. married. no children. married at least
times in London where property in Co. Down.

Education at St. John's Cambridge.

Working later in Northampton, Boston &

London at times. Member in some ways.

Now under an acute attack lately having been admitted

V. Case Book.

in an acute degree by hypertensive with syst. 155

Thrombosis after a week of antilog treatment of symptoms

remains acute & compared for a fortnight & more

since 14 March being with his wife, being discharged

remained though one had advised "leave of absence"

helped her time in being 30th

he seems to have gone on well from 14th June down to

August 15th till his return to London on June 15th

then had two rather early night. his former tooth

him to see Dr. Dancer in London when he exhibited signs

of mental aberration - his previous his mental here

he arrived in a degree of confusion & delirium but

was still orderly & quiet & understood how he ought

to remain here.

He took a light dinner.

His name entered in Catalogue 89, 111.

July 1st

Very rapid improvement - has taken place -

he seems now in a few days able to exhibit

much self control -

he began to sleep well & take regular meals

15th

Visited by friends - very amiable & easily satisfied

of his wife who visits him -

Always cheerful & easily takes part in matters -

the condition of health is greatly improved - he looks

stronger altogether.

30th

Dr. Geronis has been practically well & comfortable

for some time. He goes about freely at his discretion

takes regular exercise - has been with me out for the

day & night - is still reasonable in every

way -

It is proposed that he should go next week to

the home of his aunt at - just above the coast -

at - where - he will have with him as companions

a gentleman who is in his 70th year of age & a friend

Dr. Geronis at St. George's Hospital -

August 5th

Discharged "Recovered" from St. George's Hospital

with his wife & a companion.

So in my good health & is much obliged to me.

C. G. T. 111.

John Whaley -

admitted September 29th as V.H. Boarder for treatment.
 April 46. Arrived - several delirious - threat of English.
 that Purse - He seems to have had a hardening of
 one to have been overfilled in his brain - forgetful and
 of himself but he always inclines to live rather a hard life -
 he has taken down some before - and being sent a day or
 two his rising & certain dimensions several months -
 he seemed to feel for these attacks - each he had
 himself with a sharp convulsion - these 4 or 5 -
 company and failed to do so. Then took to drinking
 more than usual - & became excited during & sleep -
 was treated at home for some months & was taken
 for a trip on the hospital grounds - lately on the advice of
 Dr. Ferris went to Cornwall with an attendant -
 there his conduct was outrageous he was sleepless &
 most excited - he was brought back to town & sent here
 under Myer's care. He immediately began to control
 himself and found no trouble.
 was discharged from confinement because V.H. Boarder

John Whaley

Sept 30th He is now sleeping well and is nearly in his own
 and though sometimes one occasionally emotional, he
 seems rational and has very little to control himself -
 He is quite willing to remain here and to do all that is
 desired & recognizes that he is under medical treatment -
 has no physical signs of G.P. but the most suspicious
 sign is his rather absurd habit of collecting snail shells & feathers
 for in the garden - he does not talk but prays hard -
 he writes letters to his wife - C. H. P. H.

October 5th

So sometimes suddenly excited and shows very
 little power of self control, but is usually and going very well
 though there becomes emotional - he makes a great noise
 in his room as he pleases it by saying that he must do
 something - he sleeps fairly well - C. H. P.

Samuel Joseph Hanbury

Admitted as a patient for treatment on January 15th 1898.

Male aged 48. Married - 2 children a daughter -

He married a second time 4 years ago. Two fine children by
first marriage.

His condition has been under treatment many times during
the last ten or twelve years and under treatment on North
meadows - He was under a care at St. Andrew's Home
under treatment in January in September 1898.

There attacks began like many others with great restlessness
and restless disposition which latter had results which
required treatment - He recovered in a very short time -
Since then he remains between being a greatly at home -
A fortnight ago we were called to send an attendant to
take care of him and this was done on getting there he
knew of him but he knew up and coming late at night
asking to be allowed to come as a voluntary boarder.

An attendant - slight, dark hair being grey. Not susceptible
to any kind of work.

His condition of his disease - however remarkable and quiet -
made himself completely at home in an offhand way -
I shall repeat that in a trusting manner of his health
and of his wife's illness, and also that his brother was ill
in his home - through the attendant took him and advised
him to stay the attendant reported that Mr. Hanbury had
stopped my letter for some nights, and he had been extremely
restless and wild in manner by refusing to drink, but
my nurse had constantly taking steps to.

Mr. Hanbury appeared to think that he had had sufficient, but
it was impossible to get any clear account from him -
He seems very nervous & nervous - finger tremulous - pale and
suspicious but in several matters.

18th Mr. Hanbury has been very quiet and contented during
the day time. He sleeps at night - suddenly getting up and
calling out wildly - on being asked to be removed some complaint
and has altogether slept better than he has done at home for
some weeks - gives prominence to - and several acids & things.

18th Very contented and quiet - answers himself by following about -
Two glasses - with letters and expresses himself as feeling much
better.

Dr. J. O. Haskins

Jan 26th

Seems to be very well still he remains quiet by land but becomes restless and usually talks advice -
 In general - travelling on short business & his temperance has no ideas of taking notice of any one opinions. He could not yesterday to West-Street looking to my office to see his own saying that he had important business there or would not go. The business came to nothing he was contented would himself a trouble to my wife - was inclined to drink at five o'clock which he went for lunch. He spent a good deal of money and purchased a horse for which he brought back here -

Today he gives me formal notice of his desire to return home -

Jan 31st

Dr. Haskins returns his notice and has been tranquil and satisfied as a rule he at times shows symptoms of talk in a walking manner - his general condition is improved but he does many queer things - picks up stones & places them in a building - So sleeping well and - appetite good - getting very angry about his wife - thinks that he must go down to Haverhill for the day on the 3rd & asks me to go with him back here & return the same day which however I have declined -

C. D. Pickens

J. O. Haskins

Feb 2nd

Dr. Haskins seemed very fairly well but asked to be furnished by where has money to visit his father, promising to buy a new clothes & return taking an account with him. In town he seemed rather excitedly - took lunch at Scott's and had he found he had no money & left his attendant saying he would come back in twenty minutes - He did not do this but returned home saying to clothing -
 Bridgford

Miss Emma Martin

Admitted as Boarder for treatment on February 15th 1901 -
 Single age 40. Mother of England - has with her parents at
 People's Pharmacy at Cambridge Wells -
 Her baby was formerly under our care at the home & she is
 18 1/2 now again last year she remained on each occasion
 after return of disease, but returned home only at the time
 of her last year. Her father was under our care also.
 It is written that she returned home within 10 days, but
 it was decided that she should go home for 2 weeks, and
 a physician was engaged to take care of her.
 She was at the time perfectly reasonable & rational in manner
 but it was recognized that she was unstable.
 She seems to have gone on very fairly at first and during
 January seems to have been quite well except for some
 nervous anxiety about herself & affairs - she became restless
 and probably anxious about herself. Self-accusing, and
 worrying about herself. Talking to herself mostly at night
 and some at the breakfast period -
 She became a Whistling Boarder & returned here on
 Feb 15th

Miss Emma Martin

on admission (see case book T. 401) - In fairly good health
 anxious & restless with no definite delusions, but somewhat easily
 & much starts & starts normally her speech constantly
 to herself - wondering whether she is doing right - after
 saying whether she had better not go home again -
 berates herself by thinking that she has missed an
 opportunity "that she ought to have done better at home"
 and blames herself of many shortcomings -
 She is delirious apparently - but believes that she has
 returned wholly - does not refer to anything but
 details herself about expenses -
 She eats well - appetite good. Sleeps a little better -
 health improved - & general quiet -
 M. Martin of 222 Regent Avenue - C. H.

C. H. Folke -

16th Very much the same - has sleep fairly all night -
 worrying and restless during the day - continues
 saying that she cannot settle to anything -

C. H. Folke -

17th Much the same today - sleep - badly - C. H. Folke

18th Today better than yesterday - is not so anxious, talks more
 long time about her affairs - She is very nervous
 and inclined to accuse herself - but perfectly rational -

Miss Susan Hamilton

Feb. 18th (Friday) She expects herself a good deal - seems very anxious to be there in night. agrees to try not to worry herself for a week, and then to look another one again. - This end - Monday open -

C. H. Drake

28th Very evening and arrives about herself. Is particularly & is keeping her from moving. will for a few days - Keeping well & waiting in the garden - attendance prepares from going outside now. - C. H. Drake

March 9th

Miss Hamilton is certainly better in some ways. She seems very cheerful & prepared to receive her. Still remains herself about what she ought to have had. In the evening is frequently very troublesome, continuing to talk and another and about the two legs - means to try to get her more to sleep. This was over again. She is sometimes very "disturbed" in the evening. She walks out, is asked to go out to see further garden & returns to her. She does not seem to do so. She reads & writes & writes some letters - She seems hardly fit to receive some yet - C. H. Drake

March. 28th Miss Hamilton is better and evidently more stable and patient in manner. She now is quite ready to try her own walk. The evening was cheerful & is not disturbing herself. -

C. H. Drake

April 17th

Has been going well - sleeping better. sometimes now awakes and very nervous and restless - but in the whole so much better than she has ever been. So going to sleep in hospital for a change before going home. -

C. H. Drake

Mrs. Mary Davis

Admitted Oct. 20th 1901. Vol. Record for treatment.
 F. age. 28. Three children 20, 16, (girl) & 10 (boy). Resides
 Husband Connecticut. Brought to prison by husband
 by advice of Dr. H. J. Jones. She was depressed and anxious
 to get a home and consented to come in a voluntary
 manner. History of an epileptic fit on the previous evening
 and a month outbreak of temper during the week,
 in which she assaulted her eldest daughter, who
 had been locked in a room. Mrs. Davis then used
 the daughter's room and took up her abode with
 a kitchen, assisting her clothing dealer, in going
 some of her soap. She then left the house &
 took a cab to the 10th St. Jail & then went to Channing
 Court Station with the intention of going to Paris
 but eventually returned home. The next day
 Monday she was drugged and wished to sleep all
 day, the next day came to prison and Dr. Allen
 had her first epileptic fit about 15 years ago after
 birth of 2nd child. She was married in 1874 &
 had a child immediately at term, then two
 miscarriages (? abortions) in between 1875-7?
 Child, also had rheumatic fever about the
 time. Subsequently Advice of Dr. H. J. Jones, Dr.
 Smith, & Dr. H. J. Jones. The fit appears to have

Mary Davis.

been frequent, but about 2 years at night or after
 sleep. She was operated on for abscess of brain, &
 for three years the fits ceased, and were replaced
 by "hysterical shells" irritability, capriciousness
 & ill controlled action, etc. She joined from a window
 and hid herself often. She became pregnant again &
 after a protracted period before birth of boy 3 years ago
 had a fit morning of child's birth. The child is a healthy
 one. Hair has been examined & found sound
 by Dr. Culler's. She has a good idea that her daughter
 does not like her, and is jealous of her. Turn both
 sided to Dr. H. J. Jones. Her husband says she is delirious that her memory is
 deficient that she cannot think and forgets the
 fits then and that she is constantly going by fits
 of anger. On one occasion she seized the boy by the
 neck. Can control herself somewhat under the influence
 of her doctor, & present a good deal. She has lived
 in Paris. Had later had anything for 30 hours. She
 says she cannot remember the fits but does think that
 she is doing in the hysterical attacks.

Dr. H. J. Jones

Short, dark hair, eyes, round rather plump

Mary Davis

Face and manner by friendly American. Same
down with her husband, took her with my wife. Some
quietly behaved but seemed rather vague &
disfranch. Had had some luncheon since I saw
her, & had tea ahead of her. Had good bye to her
husband without any further out of the room &
at once got into the dressing room & settled down. She
seems very tired and complains a little of pain in
the back of the head. Pain local just above the
earring. Took 2 grain Doses of opium & bed -

29th

30th

Quiet, says she has slept well. She is not well & has
had some. Not in a chair, and lay on bed half of the
day in dressing room, complains of back of neck -
says she thinks she must have strained it in the
bus. Is not eating well today, just tastes her food
but heart just fine well. Not inclined to try much.

31st

Went her room. Not putting on. Says she feels the
knap of the hat. Engines about black & so on.
Pain in head has been increased with the growth of the
up a dress. Not much good today. Not about to
leave quiet. Not. Sleeps well. Took Morphine 4th.

1st

Seems better although rather nervous. Spent rather
indistinctly of her daughter and husband says
they tried to bring her and so on and that they

1901

Mary Davis

word told Brook in front of her kitchen, that the
girl was not treating her properly. Had dressed herself
and says she feels better, and wishes to stay. Did not
go to bed. Had lunch, and she was very kind. off. Took

Nov 1st

Daughter's letter today. Had some visitors & that was
just what she needed today. Seemed in improvement
more energy. Seem contented with work a little
but does not write. Quiet and good natured all day. Good
night. Not taking Morphine. T.S. Tuttle

Nov 2nd

Improvement continues. Looks brighter & more natural
Substantial in the ground. Willing to read and find out
her. Seemed absent with wife and sister. Reads or
looks to pain today. All right in evening. T.S. Tuttle

Nov 3rd

Seems very well and pain. Not without quickly and
in balance a little. Too happy to go out long talk with her in
evening. By the fall a little slaking this morning & took
Morphine 4th. T.S. Tuttle

Nov 4th

Visited by husband today. He has seen her several times in town
and is anxious if she is willing, to have her letters for a while -
Seems very contented, and grateful for all kindness, and wishes
herself to stay. Says she thoroughly appreciates the rest. The pain
is going on well and she seems bright and cheerful but does not
write to her mother. Her mother is against the new course, is
sleeping and eating well. She occasionally says your things, but

Mary Davis

"She is not quite sure whether she could better have had her own case, but she found the time for that on 11th". She talks much more kindly of her children - looks much more in trouble with both but talks in the afternoon.

T. S. T. T.

Nov. 16th

Mr. Davis had a slight fit, without any being of any, still. My little moment observation at 8.30. am in bed. There was not much convulsion, but stomach healthy, and the patient was not better. She seemed rather dazed after, and was sleepy and disinclined to work all day, complaining again of slight pain at the back of the neck & head, but not so bad as that when she came in. She takes her food today. Obed. 20 Mrs. Davis. Child seemed to relieve her headache.

T. S. T. T.

Nov. 17th

Stays in bed heavily all day. Quiet & more like herself again, but the wind & more at night the best in all good. Taken food better and sat up after dinner.

Today she feels rather dazed still. but there is nothing noticeable about her. Visited by husband & myself T. S. T. T.

Nov. 20th

All well. Has been forbidden to write more quiet & disinclined to work heavily. Her knees & walking is continued & good. Disinclined to write. Goes out today with husband & little boy. It is said that she was rather excessively "fussy" with him about trifles and

Mary Davis

that she seemed to speak unreasonably sharply to him. She was a little less inclined to grief, but they were off happily.

Nov. 21st

Mr. Davis returned safely and seems in the worse health than the night of her, and seems to have got on well with her daughter. Lived with her today and seems higher and cheery. Not daily.

T. S. T. T.

Nov. 22nd

Mr. Davis left today with her husband. He has left Spain, and ~~has~~ has settled to take her with him - She expresses herself as better, and is most grateful for the rest of quiet. It is a little doubtful if she will stand the voyage to Spain, but she is going with her children, and seems to be looking forward to being abroad. The poor little period is today.

T. S. T. T.

1944.

Mrs. Sylvia Mary Hosme Reuter-

Admitted Dec. 10. 1901.

Married 1 child (3 years). Ch. of England.

I was consulted about Mr. Reuter by a friend of his, who described him as being himself well dressed, serious, and quiet, and with a cold. I later saw him with Lady Simpson his brother Mr. Peiris, and then his husband Captain Lytton Reuter. They described a terrible state of things since last August, constant friction seems to have taken place between Mr. Reuter and all his relations, & he and his husband cannot get on at all. He left his home in England and came to London living at one hotel and leading a very solitary and dull existence. He was in worse health than ever before. Many arrangements were attempted, and succeeded to a "nursing home" for three weeks at St. Mary's. This failed but a fortnight, she absolutely refused to leave, and they agreed to let her go. They described her present condition as unstable somewhat to a degree, she takes the pills in the morning & evening but with doubt, she keeps up all night, she is terrified of time with her mind & other things, and they cannot trust her to do anything. The habit of drinking seems to be acquired from her having been advised to drink beer

1944.

Mr. Frederic Reuter.

was with her in a letter that she had been at 10 p.m. Her personal history is somewhat curious. She has always been a small child, was regarded as a genius. She lived and in India, and returned as a singer. She met Capt. Reuter at there, and after one or two meetings of 1/2 the engagement married him about 7 years ago. She seems now that it has been possible and it has been taking things, and she knew it. Had a child after two years or so, but three years old and healthy. She has been of a more than ordinary intelligence, she is "artistic" in the sense of nothing but painting &c. She tried to do that but her husband is so stubborn that she had to be stopped. I inquired whether it would be possible to get her out of it, and the answer was that she was so clever, so no could do it. I had then to try to get her out of it, and found a divorcee that of things. Mr. Reuter himself put me, and after some talk she expressed herself as anxious to try and get well, and I decided to write a shortening Bismarck letter. I explained this carefully the condition of things, and talked to Mr. Reuter and her husband about it. I saw some of the domestics, and we all agreed that the present condition of affairs could not go on. Mr. Reuter was not unreasonable, and I had about the hour of night, and was found after the

1901.

Mr. Gordon Rector

maid semi-conscious in the morning. They were all in dread of some catastrophe, or of the news being set on fire. I myself conclude had had things been going, and there seemed to be nothing but a permanent going on between her and her father. Mr. Rector told me that when this state of things ended, she desired "get out of it" and told me that she had on one occasion talked enough landowner to make the 8th with her death supply the stomach pump; this was in August apparently. He said she loved death again. He talked generally in somewhat vulgar jargon but not altogether unreasonably, though constantly of herself and the treatment she had been subjected to, making out that she was in no way to blame. She looked to me at once.

I had to postpone her coming, and in the interim got several telegrams and letters, and another from her husband, who said the same things going on. She apparently had a good deal to do with him again and we have threatened to take her down, but he hindered the whole of her land.

1901.

Mr. Gordon Rector

On admission. Tall rather slender looking, hair red & somewhat grey. Complexion rather, exceedingly thin and with peculiar nasal configuration, due to long & bulging "beard" the shape of a ram's horn. In her eyes she says her eyes were originally straight. In good spirits brought a large quantity of luggage and maid, whom she at once sent off again. Settled down with her nurse to rest. Expressed herself in delighted terms. Good letters. A little phlegm & cough, cough (a rather hard noisy cough, not apparently due to any pulmonary trouble). She ate fairly well took about 1/2 oz. of whiskey with her water & plain water. Was afterwards in bed in a month. Dressed in Japanese costume. Much trouble stories of her husband's treatment of her with little reserve. Was apparently very dry. Several parcels came in to

1901.

Mr. Jordan Ranta.

Evening chiefly continued toilet activities & soap etc.

Ordered medicine & medicine 35 T.S. Take

Dec 11th

Left finally well tonight at 10 o'clock but on the whole good sleep. Had with head & eyes in morning for a little, but in shade and not up & around calling -
Pattened about her room of the house, inspecting etc. & looking after her dogs. In filling room with photographs and soap. She shall stay two years. Well, but finally good, apparently no actual craving for drugs, but rather for good medicine. Ad. taken also sleep. T.S. Take

Dec 12.

As usual. 12 o'clock later, getting about room cleaned & spent afternoon with Mr. Tute. Talked of himself & his husband and his family, and was in temperate language. Looked at the table and nothing so much. Took 2 glasses of light ale for lunch & whisky 3/4 at 9 o'clock.

Dec 13.

Good lunch with very good dinner, but took tea. T.S. Take day while getting the laundry with Mr. Tute but without him. Tute in afternoon - working & studying conversation in all about herself, but she is good in head chiefly. Now started writing letters. Sleep better. Medicine continued

very good.

Dec 14.

Another very day. Inclusion a little of food with some hair from aged head. Not little with dog, better sleep. Talked much of husband and in which case particularly that she says about him. Answered & knew

1901

Mr. Jordan Ranta.

Here is and back to me. Mr. Jordan Ranta to be back. Monday - Examined house cavity. So apparently good and the condition of the house is apparently better than it was before. Ordered medicine of many things and some stronger and can not in afternoon. Found with her after in school. Medicine etc. Talked about things. In dinner stories of Maria who wanted to marry her. Always all her people blame them for everything. Looking aged and well. Had to visit and then not had a good breakfast and a fair night. Day from after. Saw to lunch. Working signs of well-being, saying about husband with 2/3. She then some business and then the same. She is, but with that she will be guided by me. In a good deal of trouble, reading some last night for things. Good dinner better down 10 p.m. T.S. Take

15.

1901

Nothing about room in morning & later. Good dinner. Not in afternoon. Was going to the street to look at the best one only in the ground. Looking and water for Prescription for head ache. Looking over papers. Dinner in on good basis. Found with in night & happy. Talked a lot of heavy work & incidents of Maria, somewhat pleased etc. occupied in looking bills in a goodly lot of money. Appetite fairly good sleep a little more strong. Working 1/2 to time but put off. Much same day. Not all

18th

W. from Nanton.

Got my parcel which was all over the place. Wrote many letters, some very interesting, also some work from school. Spent day putting away my books & papers. Talked of separation and went to highway to see how the road looks that will be made useful in her defense. Not much interested to hear that I had seen her husband, and he is a brute to sell the land. Both back for prices on Victoria with some horses. Looking better looking a good deal. Good night

19th
Ranch came out of day. He late. Nothing and nothing doing now but. He little writing still. Good night is, and writing did find well, he looks down but I will have letters arranged for first of time.

21st
Let her go to town today with her horse. Had to be here, but let her have the horse, she seems to have pleased her several things, white paper, & a basket. Seems to have gone on pretty well. While driving there, bought some presents for her mother. I sent a good deal on horse to my mother a small round box home on arrival without saying anything about it. Heard well in sleep, but as she got tired began talking to herself of herself and her private affairs. Dreamed she was being

W. from Nanton.

Let her not till 6:30. Wound every thing but herself. Came to dinner seemed a little excited. Looked better. Went to bed early. Looking a good deal.

21st
Matter stated by letter from husband. Says she will divorce him and move to give him for selling the home. Tells me she is sure of it, and says that nothing will induce her to see him again. She went to see him today, then writes she will do so from all day, occupied in putting photographs in frames, looking over things and making up writing on the things. Has bought two boxes here from the A. & S. stores. Is distinctly unconcerned in being long.

22nd
He late. Landed at home. did not go out. Nothing doing. He late today. Says she will not be convinced as to her being sincere - wrote 11 of letters for the end. saying about them and how sure she is not writing to drugs except Penicillin tonight. Says she has had business done just. Good night bed.

23rd
Stayed in bed all day. Looking a good deal. No ~~signs of improvement~~. Made her usual evening parcels. Letter as usual. In good spirits. Saw her Nanton in town. She took letter in hand & suggested if

Dec. 19th.
 Mas. 31.
 24th

W. Gordon Reuter.

Her letter had reached him. A Dr. Smith had been
 who had another letter written night. Confined in
 good deal. Might be the morning and in good spirits.
 There is hard breathing, ^{as might be expected} and the right side low, and the
 vein somewhat intensified between the shoulder & spine at
 no spot. No complaint of pain, but the back may
 continue it in time. Nothing else seems normal.
 Her diet all day, and she can see her teeth
 occupied with her heavy things & played with little pieces
 & keeps from her servants. Her temperature tonight
 is 99.8 in rect. Mrs. asked to be told what she could do
 better further in the future - No sign of cold in hand
 and no complaint about 1888. Her eyes are doing some
 better though a little. There are many scars of old work
 on back & chest, and the old ~~scar~~ scars. Apparently
 well known she says they are "thin flies".
 26th
 At a very good night. Confined. To be normal this
 morning. In bed till 11.30 and enjoyed the
 jubilation. Lay down again till later on & the
 same in the evening & tonight. A good day good spirits.
 Angry with a present her husband had her. To
 just above head.
 27th
 A day in bed. Very contented again with her
 with a long midwinter letter telling her that they

14th.

W. Gordon Reuter.

see the cause of the trouble, and that she was happy
 detected and treated as human. She was coughed
 so much, a little resty - later this morning. At 6:30
 19th raised again to 100. Kept in bed. No shivering or
 other symptoms. Think there is little doubt of cavity
 20th. Good spirits. Breaths at night. ^{of pneumonia}
 29th
 30th
 Temp normal slightly elevated. Had rather a restless night
 with coughing, which was her usual time. I think now
 he will be this morning, and expect will be in 17 days.
 He tried to get specific evidence, but couldn't be definite
 conclusion about this, though the scars & the long hair & the
 chronic coughs are all altogether satisfactory. Apparent
 cause of trouble. W. Gordon is content to stay in bed
 while, and is in good spirits. Can't write many letters.
 Tell her that if she is going to be had like her work, she
 "had to be done, that she should stand it." but just
 about this, and is in bed in good spirits. To at 6:30
 again 100. Length of treatment. To 8.30

1902.

Wm Gordon Reuter

Jan 20th Had a prostrate night sweat and a good deal of coughing. T. 101.5

" 25th The temperature has been raised daily in evening since Jan 25.6 - 101.6. Does not seem any the worse in the food drink. Today there was a slight hemorrhage from the nose. T. 101.5

Jan 27th Cough occurs in the latter half of the last two nights T. 100.9. Evening 100. T. 101.5

28th Slight hemorrhage again this morning - Abundant keeps good and not so much coughing. T. 101.5

30th Has for a while. Attacks with Mucus 30. T. 101.5

" plenty of good health and skin oil taken daily. Sputum abundant this afternoon. Much regular. Ammonia having better working sitting. It is difficult to keep her from getting out of bed, chiefly for sleep disturbance. T. 101.5

31st Has been going on fairly well. Temperature raised a little but not too much evening. Night sweat not so much but mostly sleep well. Says she feels somewhat better. She complains of chest pain occasionally but it does not affect her breathing at all & is probably muscular. Her eyes in light hyperemia, & there is a suspicion of white in left sclera & eye in afternoon T. 101.5. She seems of the same mind as if she were in bed and is somewhat, says that if she

1902

Wm Gordon Reuter

" is hard to get the shell till late afternoon. In some ways she is less in comfort, but there is still a good deal of weakness in the way she talks of things.

" looks fairly good better on a table, and they are more comfortable. Complains of a little sore throat but not to be troubled. Always in the morning not good to eat her lunch each morning though she says it is not a safe proceeding. She is gaining weight rather slowly a pint of cream daily, bread & butter & short. In good spirits. T. 101.5

22nd Visited by a friend this afternoon. Allowed up. T. 101.5 evening 99.4.

24th Temperature has been normal. Today at 11.30 there was a definite hemorrhage rather less than before and 1/3 of that altogether. There was no recurrence but the sputum was abundant all the morning T. 101.5 at the time P.M. 101.5. Old had good sleep & sleep quiet evening T. 101.5. Said she was not so well as before. She has a little more and looks rather white tonight. Does not feel that she is better than last night. She says she is feeling of her eyes. She stayed in bed. T. 101.5

26th There is a slight show of catarrh in the throat for 2 weeks. Complains of a little pain but not bad. Looks rather white and tired but in 2 better spirits.

Wm. Jordan Renter

same strain on land. Also did a very much & came to
2-3 days afterwards. She has concluded of her left hand being
deaf, there is a slight improvement of the by the name. She
improvement looks usual. T.S. Tuttle

March 25th Attended ch. 11. Spent day at home. Spent with
W. J. B. A letter has come from the usual. T.S. Tuttle

March 26th Let her, is small. Did not go down to the Green Hall but
landed down a friend day. Spent in company with in the water
down at work, and with Tuttle. Had some of them, but
very good, and tuttle to her friend after the court. Had Tuttle
with her things. She still does exceedingly, being beyond to
think she can do any more. Tuttle himself of himself has
seems much to look ahead. Says that if church is better
than he can't to get back, she would rather give it up.
Catherine apparently still party. As yet good. Still
with a spirit. She still is now healthy, but rather pale
yellow in color. I recommend rather with the water
Tuttle still. She still has the same of Dr. Pomeroy
has had. This camp is a Dr. Pomeroy with a lot of things
Tuttle a fine amount of looking down with the 25th
during but only to London. T.S. Tuttle

April 2nd The general condition has been fairly good. She has been
all to do more, but has been rather tired in company of
T.S. Tuttle has been familiar, and had several days. The

Dr. Gordon Norton.

17. 7. 87

Weight has gone down about 12 pounds, and the temperature the last few days has been subnormal. The condition of the lungs is still improved. There is some bad separation in the right bronchus: open, but no real soundness almost entirely absent. No complaint of pain. She has been coughing very little. This morning there are signs of reaction in the sputum again, very slight. She looks a little fresher again. She has been rather worried by letters at the last few days. Has been paying bills, and was yesterday in town at her mother's & stayed not rather a long time. She still talks of her mother but to her any dealings with her husband, but says today that she will look to him. She has a notion that he is going to try & remove her, but there seems no justification for this.

T. 97

April 18th

Have been away. Dr. Norton has been going on T. 100. Still in bed the other days of the week. Had very slight show of blood in sputum. Has written me many letters about herself & her things. Seems very well today and is up & about. There has been occasional trouble about her dress &c. T. has been inclined to be nervous continually but is normal at times. Weight has gone up.

Apr. 29th

She has been going well. Attended ch. at South & stayed. She has been worried in her days &c. but does not display herself very much. Write letters. Her writing has been visited by her husband. He began by

Dr. Gordon Norton.

Writing very well & in person, and to the surprise of the others. After this things settled down, and last week left her with a large sum of money. May has bills left. She has been that she would stay here if possible. She hasn't

May 8th

July 18th spoke kindly of him after the death. She had to decline & she a good deal of writing. Mrs. Weston has visited her. She has been paying bills & managing an account at bank. She has been somewhat and returned in a week, but shows a sign of nervousness at times. She still joins T. still

May 20th

declines to subnormal but might take the T. 100. She had her child here to stay. seems fond of it in a way and has been to town to buy clothes & to visit her relations. She has been very faintly strong & joined in amusement. Lungs well and that she had interest in her two days in week practice - she had arrangements for a carriage when she was born. 22 in the night she had. 21 in winter until today. Visited by friends. After in town. T. still the body. A friend had to stay in night - long hair & still there. She has been caught in paying attorney. Physical condition fine

Sept 8. 87

June 1st

June 1st. Dr. Norton & Dr. Norton has. She started a letter

June 1st

W. Gordon Norton

was indubitably in favoring it. So often not
during, always much to the kind of her
she attended a concert. Gordon Norton has been
one or twice. I usually receive him well. She goes
on being fine regularly. Child has gone to
London. T. S. T. T.

June 16th

Physic condition fine good night today 8.3.12.
Head aches, mostly in forehead part, the evening
some on head with blowing at the hollow back
between right eye: espines. Extracting in the way of
pale. Air taken freely everywhere. Her mental condition
is rich and to be envied. Her just found a tumor
period, and has been some weeks on the water in
dreadful way. She has been lately when seen by
Father once or twice. At first very inclined but lately
has been on better terms. Has been troubled about
her health. Does not being obliged to go home. There is
a slight tendency to head aches last, and a
protest has been written by her mother but she is more
reasonable than I know about it. Now she is
+ in better about night. Sleeping well. T. S. T. T.

June 28th

W. G. Norton head aches of one. There are certainly
some in the left scapular region of one in Norton. The
P. is abnormal as usual. She rather felt the heat,

W. Norton

and is less inclined to take what she can find in all
that an excellent thing. She wanted all that in case
frigid, or the other, but she is still liable in many
ways to her people, especially her husband. She drives
and goes to town. A little more free about town,
has tried to do better. So sleeping fairly well, but
again a drought occasionally. Bright stars about P. S.

June 28th

Castor Norton here yesterday. A very pleasant interview
He is willing that she should stay on, but wants her to get on
change, and then to get her to go with her father on a tour
to which she will not agree. She is certainly anxious to please,
and says plainly that she cannot trust herself if she is
harassed. So anything again a good deal. T. S. T. T.

July 4th

P. the evening. 9.8.8. taken longer on feeling better than usual.

July 31st
August 1st

She had a good night. T. S. T. T.
Left home. Left her young child. T. S. T. T.
Leaves today in going home for a few days. Thence to W. Norton
Spent some time in London. T. S. T. T.

Sept. 13th

W. Norton spent a week at home & would have
done well on the whole. Still 2 or 3 times a week, about
about a good deal generally, but sometimes 4 or 5 days
on the whole comfortable. Some coughing in the evening.
She has been the best he has had since, left her at the
end of a good night. To get home for a cure - he
rather than Norton than before. The weather was not good

W. W. Keble

and she did not do much, but she was used to
 D. M. but she had ill returned at once getting back to
 F. M. - less heavily given in a rule, had better such
 about in being. D. M. had, and generally cheap, but
 did not seem to be for the place. Returned to the work &
 stayed there - 1886, was highly cheap and brought
 & bought to do things, but in fact this in the morning, then
 around, a little hunting & rough in the morning, but very
 seldom was in the morning. Bought 1886 & 1887. D. M.
 by 1. although on the land level. After the first day, for
 attracted by following in light cases less than 1/2 an hour,
 & stayed to dinner but through with 1/2 hour in the. D. M.
 1887 but then was done in time with the rest, & the
 imagination of first days took more more the business
 from, while signs of increased activity, less noticed in the
 country on the right side particularly as height on the left
 completely removed to this side again ^{8th day} at the joining
 well. The land in morning being very little in the system
 sleeping well at night. My 2nd in about 1/2 hour, but
 just, but then had to pass by & change gear, still in bed
 the 2nd day. The second in morning being 1/2 hour in
 in evening & sleeping down at night. 1st day of 1887
 & was 1/2 hour for about 3 hours. Second day amount of
 them for some time, taking away about 1/2 hour.

Sept 27th

W. W. Keble

with the third target, but has taken a fine amount of food.
 Consume a little of pasture in the morning but in the
 fine will stand - better than 1/2 hour in the P. M.

Fifth day
 West Hill by 1/2 hour
 2/1/87

Spent some for Richard B. Russell

time. Left the note in a case and will be taken
 explained of her husband's conduct. Was very hysterical
 and excited - returned much upset.
 Now gone on fairly well, but still in slowly gaining
 strength again & weight is rising. Her appetite is not

Mr. Weston.

is good, and she is rather inclined to take stimulants. Her bowels are changed largely last night. Drives to the hospital and her usual friends & household. Some irregularity in her bowels, and some purging, as usual in London. Her complaint of back ache lately and is not yet very strong. Her bowels are to be treated for a few days and she is today well again.

Nov. 11th

Returned today. Her mind seems to have been fairly exercised but she says she is still the best. Her mind is such that she could not think, but her behavior seems to have been rather better.

Nov. 12th

Called by nurse this morning to see a patient on the left lower mullerian. Found a large one about the size of a shilling - apparently gonorrhoea had taken the night with a burning sensation. Drives to town to see Dr. Abernethy. She pronounced it an *epithelial* growth and asked to take a touch and yellow side of the organ. Both parts. It does not appear to have been too much of her case as General Gordon says. Dr. King's report.

Nov. 13th

Dr. King's returned says he is of any thing and to find a reddish pain in back chain and to examine when sitting down. Found rather freely marked but not any lesion. She thought her back was the worse. She is having both legs and has been fairly well.

Mr. Weston.

Nov. 21.

The pain being still complained of about Dr. Chamberlayne who got her to replace his presence. She has been living her usual life. Driving & town being her usual visits and lately her child who has been staying with them. She has taken rather more interest in them lately, and there is more when present, though she tells me things about her husband's treatment of her at home, which she mentions by the way.

T. B. Tate

Dec. 18th

Has been going on fairly well. The ulceration on the left lower mullerian is slowly healing, but present in doing much better in the by-passes principal and some of phosphate both. The pain in the back is less but the still remains at times. She has been rather capricious and she has been a little inclined to place to much dependence on stimulants, her husband having that her chamberlayne. There is less cough and she becomes much less. She is much and generally returned in the morning for a good food. Spirits vary a good deal and she worries herself about things at times. Her bowels are very well with redness and her handwriting all for a while now. Sleep fairly good on the whole occasionally takes *Mundicis*. Gets to bed. Her bowels being a little but not so much as usual. Her bowels

W. Norton.

dividing equally, and has visited Father & Mother
& some others.

T. S. Tuttle

Dec 12th

Her husband is gone. Don't want with him. He
remembers of taking Exercise generally of school &
before to see it. I had a long conversation with her and
and she agreed to try and do with her. Husband is coming
for her to go home, and tells her that there is nothing the
matter with her and that she ought to come home home
with respect and respect and said she wished to have
the same but did not see how it can be done. Given
conditional promise that he would go home at the end
of the year. Though this seems hardly advisable -
as the matter is small, she cannot walk much &
is hardly fit for the journey or the exertion of looking
after her affairs - the climate is bleak & damp & she
has a dread of facing things in her own house. She
still complains of her back, and of pain in the mouth
and gets very easily tired.

T. S. Tuttle

Dec 25th

I wrote last week on the 26th saying that I thought I could
renew the proposed visit was inadvisable, that I feared
her catching cold, that the work was too much and that
there was risk of fatigue. She looks her thanksgiving
letter which has much annoyed me telling her that
he meant to take the savings away that he had never

W. Norton.

has or could be got much depressed, crying and
sorrowful. Has been very restless all day. Better in the
evening and assisted to entertain the household. Very
tired at night. She has repeated that she said last
year, that she would not believe herself of her husband
able. Has been much more careful of herself lately
and shows more control but there is still a feeling of
I have been much better than in some time of the
old restless manner again. But still painful to
believe in heading slowly. The preliminary symptoms
are still evident, but no real wounds. Complaint
of a little pain at night base of brain.

T. S. Tuttle

Jan 6th

Has been going on generally. Could hardly sit at times
but is heading slowly from the edge. Dressed with 14th
to 16th. Has today stayed in bed to rest it. Studied
Church yesterday. Has been full of her grievances with
her husband, and talks of separation. Says she cannot
undertake to go home, but that some agreement would
be come to. Wish friends.

T. S. Tuttle

Jan 23rd

Had a long interview with her husband, and proposed
his being sent home. Stated her proceedings, and her
offer to care to them if he will agree to what she wishes.
There seems little chance of any settlement being come
to. Please send the letter letter. A fresh prospect

W. Rector

Wen has recovered (18!) also right side well. Some slight rise of temper above at night again. but nothing notable in lungs. Cough in evening. The appetite is not very good but has tonight been more when steady (18th 1-8-3) T.S. Pate

Jan 28th

Took her to Dr. Chapman Thompson for his opinion on her staying at Chiswick. He advised on opinion that she might under the circumstances as she seemed hardly strong enough for a journey either by land or sea. Remained long. The count on the right side seems quiet. She felt easily tired but is always ready to do anything. Has not been able to walk much since the middle. T.S. Pate

Feb 11th

Seems stronger a little and in taking her food her appetite improves. Had out to lunch. It would be intended to throw her down at the show, when taken home through getting there early. Has been ordered hanging pills. Officers both her husband and in state goes, and they cannot agree to anything. T.S. Pate

Feb. 17th

Has been doing fairly well lately and in going to friends' clubbing out. Has husband here today, with the strong intention. The illness on the left side has been looked after since it is still very sore but is also looking. I taking Dr. Ross's solution. Dr. Ross's solution

W. Rector

Wen more good. Sleeps fairly well tonight. Much more settled but is not yet the same as before. Has quarrelled with her people about staying on. General condition fair on the whole, excited at times but can control herself as a rule. Dives several times a week. T.S. Pate

March 4th

Sent Dr. T. Smith with Dr. Mann, he pronounced against specific trouble but cannot explain the cause, seems inclined to think of self infection but then is not correct. Thinks that chiefly due to her state of health and general condition. In going well, has got worried at times. Has long one or two late, going well. Has visited friends she had with them. T.S. Pate

March 8th

Another visit. Went to see Dr. Chapman the second & Dr. Smith. Recommended Dr. Ross's solution of Dr. Ross's pills. Landed in time of late food. T.S. Pate

March 10th

Visited mother today first time for some weeks. Had her father. Has had letter from husband, who has given conclusion as to his return at St. John. She is very indignant at this, and she has her old friends and has got very excited by this. Says she cannot find a man, and that she will do her utmost. T.S. Pate

March 11th

Dr. Savage says he today is pleased with her general appearance. Expresses himself as contented here

1913.
Feb. 18.

Mr. Newton.

Sunday. Church. Last night was in afternoon. A
rather stormy time, and a great deal of talking.
Lived very tired after, and about 10.15 she was
utterly exhausted and faint. Got to bed and shall
be very tired till 2 am. She had apparently taken a
certain amount of brandy, but not very much, &
the condition seemed as much due to want of sleep
as to being fatigued as any thing. Slept at 2 am. She
seemed quite nervous. All & pulse as good, but very
languid and tired herself. Was slightly sick before
the illness came on.

March 6.

All well this morning still not very strong. Stages
at home quietly since last night of morning.

19th

Wrote Miss Simpson here. A little better in the
afternoon.

April 15

Down to town. Miss Newton quite in a commiseration
and tired. She has been writing lately to her husband
and they cannot quite agree about conditions on
which she is to try a visit home. She wishes to have
a certain time about behind scenes, and refuses
to have any arrangements talked. Her letter
to me was very interesting.

14th

From Miss Simpson

Mr. Newton.

June 10th

Attended 7 this week. Had had main letter from
her husband during the interval describing her
as impossible, as prone to take too much drink, &
one of the objects of taking her back. He had also
written & had written also complaining of his conduct.
and recently there was further talk of 4000, though
he had then described her as very patient. She refused
herself on 7th to return for a visit! The carriage &
a riding party have been with her. She seemed to
have been going good, she has had one or two short
a running horse, and a fall from her horse, and
has evidently tried to be equal deal. It was not
trouble all round according to John's account with
neighbors, amount to. Not from these scenes & have
gone on going well. She played cards in going
good. Cough in early morning. The situation going
steady, and only one alone would be about from
days.

June 27th

She goes on going well. Newton at town from 9th
to 20th, and then back side in the neighborhood. Visited
by friends today. Consistent of about after being today 1994

July 14th

To see S. Lynn Thompson with last R. He advised great
care but thought her chest was better. Advised against
a home in town. They at once drove to home again. Case here
July 1913.

Mr. Thomas Cae

Thomas Cae admitted Feb 17, 1903
Married aged 37. Ch. of England.

He has been ill for the last three or four years from Feb 7 of 1899, chief and generally due to physical trouble on large extent, and down as a rule got better by abstention from work, and travelling with a companion. He has lately been to Brighton with his wife for five weeks, and apparently improved, but on his return home he could neither see his family or his business, & with difficulty could be induced to come himself to do anything, or help his son, whom he has just lately left his business. Mr. Cae has made his own way in the world, & built up a business at Southfield entirely by his own exertions. His work has been heavy recently early rising summer and winter & a certain amount of expense, with a great scarcity of good services or opportunities for recreation. I saw him in town lately, and saw him also in Brighton. He has consented to try & see what he can do for his son & daughter with me. His father was in the army. His first

Thomas Cae.

attack '96 second slight '99 third 1901. Frankish culture. All admission Thickset, dark, rather ordinary looking, skin rather all healthy looking, and with symptoms of high tension. Says he has been feeling bad since he got back, and unable to leave him only for a lethargic state, wishing to stay in bed. Expresses himself as unable to do anything, unable to see his children, or to face his responsibilities. He seems nervous and short in speech, and has a hesitating manner, but expresses himself as desirous to get better, and to conform to the rules. He desired greatly by himself, & played to games of draughts. His wife came with him, he tells me that he had a bad story yesterday, and that she could do nothing with him.

T. T. Tate

Feb 18th

Saw Mr. Cae today. He had got up at 8.30 and was dressed. seemed young cheerful, and had had a fair night. He passed a quiet day, walking in the grounds, and seemed fairly contented, though he was hesitating in manner, and inclined to be somewhat nervous. Brightened up in the evening. Appetite good. Slept fairly well. T. T. Tate ordered appointment in the morning. Is more

Feb 19th

Thomas Cole.

Wrote today, and says that the plan seems
 less difficult than, is anxious to play golf
 and has tried today and seems interested in
 it. Not of course, and takes exercise - walks
 good. Says that the coming here has restored
 his mental balance. Starts going & does not
 object here to having the housework in his
 room at night. T.S. Tute

Feb 20

Was here in the middle of the day playing golf -
 walking. Seems very contented does not
 say much about home affairs, but seems
 to have settled down to do the best he can for
 himself. Plays golf and goes walking. Is
 doing well. Does not seem with spirits. T.S. Tute

Feb 21

Going on well. Is improving in appearance
 and manner. Interested in golf and
 walking the best of fine weather. T.S. Tute

Feb 22

Much the same. Wrote in morning. Came
 to play golf. Is quiet and contented - reads
 & amuses himself. Talks freely about his self
 & is more cheerful. T.S. Tute

Feb 23

Mr. Cole has yesterday told us that he tells
 us that he thinks that he has done well
 in coming but that he fears that he may

Thomas Cole.

Some long and decided for a while if he
 had not a "retiring" life, he asks my advice
 as to stopping, and says he feels that he would
 be glad to try to work again. Dr. King's advice
 has not been in a hurry than with his
 content he waited after a little while longer.
 He has gone on playing golf and seems very
 interested in improving. His work is better,
 and his skin is better colour. I am glad
 for a walk outside today in afternoon. Is
 friendly to those about him. Walks good -
 sleep good - habits regular. T.S. Tute

Feb 24

Doing well. Played golf with me this afternoon. Is
 getting on a little, but has not made very much progress
 as yet, being only a beginner but he walks well and
 seems keen about it. Attended a concert tonight
 and enjoyed it. T.S. Tute

Feb 25

Was today to the Museum Park. Going on
 well. Writing letters home and looking more
 interested in matters concerning his family. Says
 he fears that he will become lazier, but is really
 enjoying playing, his letters. T.S. Tute

Feb 26

Has been out alone once or twice. Talking with
 to New with me. No daily health much

Thomas Case

improved. Less healthy in manner, talks freely
of things and seems hopeful for the future.

Has better than his wife & looks to some one

Monday

T. S. Tuttle

March 1st

Quick day. visited in morning. all progress after
night and change. Still hopeful. T. S. Tuttle

March 2nd

Still better. Had a rest his wife in afternoon
seems a little less bright, but still said that he
thought he would like to try and get along at home
but would take my advice. Thought on the 2nd that
that he might be allowed to try what he could do,
that he might begin to feel that he was not
doing him self more good, and that even if he
did not keep up on returning to work it would
be better for him to try than to be discontented
or think that he was doing no good here. He is
greatly improved in health and appearance
and in action and energy. He returned with
his wife going off in excellent spirits.

Discharge of wound.

T. S. Tuttle

1903.

Thomas Case.

Readmitted March 21st He seems to have gone
back with his wife in good spirits, but the depression
returned very soon, and he took to his bed again, not
wishing to see the children and the home. His
sister-in-law has gone to try and cheer the business going
but Mr. Case could take no interest in this, and
was hunted the subject. I saw him about 10
days after he left, and was struck with the
change in his appearance. He had become thinner
and the about quite lost had disappeared leaving
the vacant skull remaining. I went there and
asked him to get his local doctor to thoroughly
examine him, and get from him a formal
report of his physical condition, the only symptom
being slight diminution of the hair below. I saw
him 18th March with Dr. Mackenzie and he then
expressed a desire to come back and work for
permission.

Dr. Mackenzie. Came with his wife and settled down
at once. He does not look well, and his manner is
less energetic, and he seems glad to be here. His
color is more normal, his skin rather a little better
and his eyes rather better. Still good physical

Thomas Lee.

condition again, but has evidently lost ground again since his discharge.

March 24th

He has been going on quietly, taking interest in the garden, and assisting in the work at home. He is sleeping well, and his appetite is improving, and he is beginning to look better already. I have had one or two talks with him, and he is somewhat better in his mind. I have written him a letter, but he did not read it. The weather is not good, but he gets on all the same. I hope to see him soon.

April 1st

He has been going on well. He has been busy in the garden, and is interested in hearing about the news in the land. He has been talking to me about the time he spent in the work. He says it is difficult at first, but that he likes the work as it takes him out of his self. He is looking better and better. I have written him a letter, but he did not read it.

April 7th

Continues to go on quietly well. He is talking to me about the time he spent in the work. He says it is difficult at first, but that he likes the work as it takes him out of his self. He is looking better and better. I have written him a letter, but he did not read it.

17th

He has been with the children of the family. He is going to Jersey next week. He is well enough to go.

L. Drake

May 19th 1843. Came back from Jersey in consequence of his illness, all the symptoms returned again. I visited him at Rock House. His letter complained of his condition but admitted the present state. I discharged him. He has since been at home with his family. I have written him a letter.

Sept. 14th 1843.

He has since been at home with his family. I have written him a letter.

Dr. Britton

late. Believes, being friendly with her husband & they. He has visited her once or twice here, and has never blamed my society, inviting her by constantly talking of it, and reminding her of things that have been said. She has gone on board the same, but hidden that distance pretty regularly, does not visit days & London, and is altogether more reasonable. She has decided to go to see L. Brown, & then to take a leave with her husband's permission. Presentation is scheduled in morning but does not rise of the ^{day} in the afternoon evening. As the work there is paid in payment in the day week and physical state, though she is usually about at times - she is in the studio in her habits, and is not so determined, more temperate, and upstate is in passing. Night work about 1 P.M. to 4 P.M. ~~then~~ not.

Aug. 30.

Spent a month at her. Was very well there, but for the days which last month was there was not so well. He found much to be sorry that, almost he is continuing in the same matter, but somewhat of talking to himself. At times they are friendly and left her for the day get for her to do a house that they have taken their Bridging 2. Married.

Wed. 1905.

Mr. Johnson's son - Bedstead of night long
 Mrs. She had much fatigue over home
 in coughing my much again and taking
 ill, expression of sickness but will not
 be quiet. Madam a little strong in
 will.

Got some more timberland than
 got her home to be. Actually she is
 gone.

Miss Anne Robin Lett.

Admitted Sept 15. 1903. Suffered at 60. first attack.
 At age 79. had a bad accident and was hurt on left
 arm wrist and shoulder, but then seems to have been
 so aptly fitted though her arm was shaken and she
 was ill for long time after. Lived with father and mother
 till five years ago when both died. Has always been
 conscientious & careful, and the responsibility of a home
 and demands her along, rather selfish woman. She
 has been worried with accounts and trying to get things
 in order. She had a niece living with her, and brother
 living near, one an old English friend gone. She
 was a good deal of French work, and had a poor
 district in Blackheath which she apparently did
 well. She lately been returned to her longing and desire
 thinking that she has offended her niece and that, is
 worried about friends trouble, and at a recent visit
 seemed unable herself. I saw her on Sept 11. and
 her probably seemed and going changed, but she
 seemed this time and inquired when with the letter, or
 asked what she had written to. She has been sleeping at
 night, and last night when she was awake, and then
 frightened about herself, writing about the same.
 She at times has seemed sitting still and empty
 vacantly, and very sitting. Still getting unable to

Miss A. R. Lett.

would say. I saw her brother after, and told him that in
 my opinion an attack of melancholia had been induced
 and advised that if she was willing she should come
 on a voluntary Board. She consulted with him and
 signed a letter to that effect, and came over with her
 brother. A man in coat & tie on the 14th. She came
 over with her. She showed her eyes and included,
 apprehensive and broken in manner but gentle and
 tractable. She came over quietly with her brother and
 the nurse.

On admission. Small, shriveled, and slight, but active
 and energetic looking lady, with rather thin grey hair. Teeth
 gone upper and lower in lower. Expression anxious,
 and troubled because of trouble she was in. Talks
 quietly and seems glad to have come away from home. Took
 tea in dining room, but did not say very much. Took dinner
 quietly alone, and seemed fairly good. Spent a quiet
 evening, and then (Monday) about Monday 18.

Sept 16th

A fairly good night. Apprehensive and uneasy
 in her room. She was sitting and was interested in
 the paper, and visited Mr. Saw the night before

Miss Sutt.

Change. Appetite good. Says little nothing
does being here. Stayed in bed & breakfast
Takes all meals joining well and drinks milk. Her
ambitions are not short of. She says I should
do it - have I depended long on? - Is it passing -
visited by brother in afternoon. Dined with her

Aunt Robin Scott.

1903.

Admitted Dec. 8th on P. S. again. Had for very little food, & stayed her own place, but she thought her water eating still, though tall strong appearance she was calmer and steady enough. Was with her twice L. T. brought her gradually for comfort again, self accusatory, "I made" & asked to return. J. Scott used down on the 5th and stayed the week end. She found her very rambling and talkative, making the same accusation against herself of receiving them and making mischief as before. She decided that she ought to return, and she took for home on the 1st. Put a horse down.

The admission

Came down with more leaning piece at kitchen. She came in at tea time, seemed relieved to get back; but talked about having lost her piece, and said she was her at kitchen, seemed to think she might be lost, she talked fairly loudly and loudly, but was very confused, and wished to go to bed. Went about 8. Had a little dinner in bed, very confused but not very depressed. (About 10.30). Her expression is altered and she looks anxious and "old".

Aunt Robin Scott.

Dec 9th

Stayed quietly in bed all day. Found a good feeling, especially about the time she might have come, though she ought not to have done and so on, but not agitated or incoherent. Then begins to become incoherent suddenly on "I ought to" "Yes they thought I did" and so on. Talks for a while better than last admission - 11.30 faint -

Dec 10th

Fairly good night but a little long but not very restless after waking. The same condition of mind. Woke a little towards night and talked to W. T. T. for a long time and then talked a little. Food taken well and stayed in bed all day. January 3rd T. S. T. T.

Dec 11th

A little brighter. A good night. In bed all day still some confusion but not talkative. At night seemed more confused, but still still with the intention to make accusation against herself.

Dec 12th

Fairly good night - is calmer today, but can't talk but not any definite plans for herself. Keeps saying that she ought to have been better, that she took food in & so on but nothing definite in the way of delusion. (About 1.30)

Dec 13th

Seems calmer than during admission in bed, talked to go to church, but saw the kind of "old" get on for all day. Talking at times in the same strain, but still full

Anne Robinson Scott.

- good well. Her appearance has altered for the better, & she has not so much anxious expression - B.S. regularly -
- Dec. 14th. Quiet night, went to bed, but at 11 o'clock - Anne woke the same, occasionally coming into my room at intervals - looks at papers or. 1/2 hr. in parlour. In a little while asleep at times about things - T.S. Tute.
- Dec 16th - More disturbed at night, talking & holding conversation at times - had a quiet day - at 9 o'clock - T.S. Tute
- 17th - Up in the morning rather better tonight, a little depressed at first, but not seemed better on her return she has had much in dining room - Her usual herself a little reading & knitting, sleep in the afternoon a little. T.S. Tute
- 18th - Had a quiet night but looks up rather depressed and talking more about herself. Rather rather all day - Taking meals in dining room, but eating quite well Anne says that she cannot get her mind to any thing today, and that some hallucination has to be suspected than I am not moved. Finally Tute T.S. Tute
- 19th - Sleep badly - being awakened twice morning in with her old manner, saying that she had seen in journal & that she must see them. Calmer later on - Disturbance from Nelson's 21st century. S. Kate said her out with spirit & little Anne & myself sitting in parlour & quiet & quiet inquiring after friends - She had told S. Shaker next

Anne Robinson Scott

- has been working things, and has been in the morning, when she was much disturbed. Took food well, & quiet in evening - rather talkative T.S. Tute.
- Dec. 20th. Sleep well on the whole, but woke at 3. and sat down & thought, ^{the day} looked many questions, & looked at the after meals, and came in afternoon evening for a little while, but all went well. T.S. Tute
- Dec. 21st - Slept with one thought. Seems more calm today but asked questions repeating the same things, rather better on the whole. Went to church and tea with the other ladies, and behaved well. She talks in usual manner about herself. Quiet evening. Still doing things. Paralytic 23rd in usual
- Dec 22nd - Slept quietly all night with one thought. A very calm day but outside the ground there will be more. Was more cheerful and brighter - Down to church, quiet in evening. No. S. Shaker has.
- Dec. 23rd - Slept all night. The expected condition has returned, but asked what she is to do, whether she has some thing or. Took food as usual well. Recitation not been kept today. T.S. Tute.
- See Case Book 7. 565.
Wednesday 24th

William Withers Moore

Admitted Jan 7. 04 Married & children. Age 47.
 Church of England. Served altar. Was here in 1897-
 1898 suffering from delusion of dread, and full of
 ideas of persecution and murder - put himself
 into the water again, and was at the work of the
 West End from Northfleet & England as he completely
 unwell.

He admires - rather anxious expressions - He thinks only
 says he has lately lost - flesh - pain quiet - tongue dry -
 He reports very rationally and is fully aware that he has pleased
 himself here wonderfully - He knows everyone here whom he
 has met before and speaks with them - He has had some
 strong private feelings and talks of them very freely -

William Withers Moore

His mental condition is such that I have at once referred
 his friends to my opinion and I think will be very happy -
 He has "fears" one would suppose that one would
 think - He thinks it would be a matter of life or death
 and tells me that when in France the sailing people told him
 to go home - He says to ask his mother at once to arrange his
 affairs - He evidently has delusions and fears that in
 some way he has offended the people of the East End and
 talks in a vague manner of their coming to seize him -
 Also that the mark for hidden treasure had been
 explained by a Dutch merchant, is really something to do with
 him - He sees "signs" etc. I have found well - several signs etc
 and P.M. finished at bed time - C. M. D. M.

Jan 29th

Wrote and explained all day till he was very
 the things he is doing, and of the people who are coming
 to take him - This afternoon was in the garden
 such as he looks on the front floor, but was prevented
 from entering his cell. Talks his food going well, and
 has been able to do his life with that a patient
 should be kept at all. Quiet during the evening -

Jan 31st

A fine night with wind N.W. 9.31. Admitted -
 By my suggestion today and will not say very much
 He is best about for work and there is some talk
 in getting him to find him help, wife, together that

Billie's better home

his father (his uncle) moved him towards outside
 position. Family quiet all day. At 10:30
 in kitchen with wife & child & his mother
 his mother himself. Weather too hot for getting
 out. T.S. Tuttle

Jan 31st

Family quiet night with 2 drangles. 20 quiet and clear
 of snow this morning. Picked up mail in afternoon
 the report of the 1st of the day had changed and
 much thinner than when he saw him there with
 him. he change during day. from all marks. T.S. Tuttle

Feb 1st

Found the same. seen by S. Shute & S. Lawrence
 identified him. Better on some of the ground
 scattered his knowledge can find no reason in the
 act. quiet & no snow all evening. T.S. Tuttle

Robert Williams Hill

admitted September 5th 1904. Single aged 59
 of England - Scientist, of Edinburgh -
 Has come for 2 months for treatment -
 Has had previous attacks of depression with some
 delirium - and was here in July 1900 under treatment
 when he remained in 3 months - (his friends attack?)
 He has often been hysterical and nervous about
 his health - has thought a good deal -
 Has been fairly active at times -
 Has not been very well for some time, especially since
 a short time ago and has since been in a hospital
 at Fallow - till then he was not getting on well, and
 made up his mind to come here for treatment -
 He applied to the Comptroller in January for leave &
 came up to Glasgow from Edinburgh arriving here on
 the 5th with his family his partner -

Robert Williams Hill

On admission - middle height - stout & rather fleshy
 look - grey hair & beard - thin - active in movements -
 Insipid rather grave - pulse quiet - tongue slightly
 coated but otherwise appears in good health -
 He talks on general topics but is very anxious about
 his health - speaking of his diet - & complains about the
 back of the neck - & his eyes being "trembling", & his nervousness
 after food to be and is well up in the progress usually
 talked at Hygiene. He is quite cheerful at times
 has no delirium is friendly & nice in his manner -
 Does not wish to rest alone for any time -
 Does not handle with me and my family several times -
 Says that he suffers from insomnia & from "various
 attacks" -
 Address 41, Maple Row, Glasgow - L.S.S.
 Age 59 - 8.1.

Sept-6th

Has been sleeping very poorly - on his own stomach has
 had 5 or 6 hours each night - taking food well &
 has been active daily - He has been to the garden
 on the 13th & is inclined to take exercise in the
 air - He does not seem to have to play bridge -
 (The Park)

R. W. Will

Sept. 8th

Is going on well - at times nervous & troubled about himself; continually consulting his symptoms to me & asking of me if sleep should be advised to sleeping some 5 hours - He is very reasonable about taking medicine - going on to play golf & in the house plays billiards & bridge - continues the medicine as before - 4 small doses of Colman - believes in some one with him & he goes out to hunt for frequently -

9th

He says that he does not sleep at all, but that I should advise - he seems more than usual as is being fairly well. S. says. So advise sleep -

10th

advised being sleep well but is not very well satisfied - He was at home today - looked into me & talked fairly well

12th

Found Dr. Will much as described. He is now anxious about his state & says that anything that he is very dry & light, that the amount of sleep he got in his sleep has been told and is intended in things and later to at home with other patients. Sit with the eye & read.

14th

Has been at with Dr. Lytle a good deal. Has taken walk to train side. Has supposed from constitution & had frequent operations. Sleeps about 6 hours a night

P. S. Will

28th

Little nervous for 1881. Some nervousness, but nothing serious. He does not show any particular delirium, and in my mind about his physical condition says he is being kept. Quite toward being. He attended church. Today goes to church, but is more nervous than morning & says he could not enjoy anything. He has been particularly fit a little nervousness of Dr. Lytle things he is still just points and has been about with him. Sleeping some night well, other night taking about 5. or 6. hours. He is contented. Looks a little better occasionally.

29th

Has been rather more nervous about things the last few days. Has written me rather much with letters, chiefly complaining of his physical health, and he is unable to do any thing. Has looked dusky and fine a little outside but he tells me that there may be claims made on him by people on day that he does not expect, and that if he get work and recreation is appointed, he will be bound to deal with them. Some to him. Much as before.

30th

His letter has given about half of the day with him. He looked him - more of nothing and signed the letter. He told me that he is going to leave his wife and child. He has been to dinner but in some his mind & will not write in conversation much. Cannot find Dr. S. Stronger chance. He looks better in what he did and in the end.

R. B. Hill.

5th She has a little brighter, but still thinks her position is
 to be satisfied & that her eyes will be well. She
 says she is well, at times a little low but not so, but very full
 of her self and being in town in London, looks & feels
 out doing. She seems to be going through, and she talks
 to me as if she were about there. She has had her in pain
 and trouble some times. T. S. Hill

10th The skin seems more difficult to stand off, and there seems
 to be more definite tendency to delirium. She can be said
 she finds her talking better than she expected. Her
 thoughts seem to be a religious tendency, she begins to
 have doubts about her soul, and she gets her comfort
 from the Bible. (P. S. Hill has been said). T. S. Hill

12th Begins to feel about and to be up about. There
 definite delirium. She seems to have been today and still
 his partly of his thoughts. Her mother and sister
 and friends were somewhat excited. T. S. Hill

13th Saw her sister today who is somewhat like little. She
 has become quite and she had no difficulty in
 discussing delirium though she will hold the head
 steady and to be considered them successfully. She
 seems to be able to think of any thing she had in her
 and makes her mind to find out things against
 herself. She talks about her mother. T. S. Hill

R. B. Hill.

1914
Oct. 14th

Catharine's last letter from Providence.

Transferred to Care North

Charles Langdale

admitted October 26th 1906 as trustee for historical
for one month.

Age. Single. Church of England.

His father has an important family history -

one of his grandfathers is a friend of the Duke of Devon -

Several other relations are connected with the Duke.

He is the only son of his parents both of whom are dead.

He has been brought up at home chiefly - is educated &

was under a tutor & plays the piano & on a course of the

well has been always been weak & feeble minded.

He lived a very dull & weary life at home - He has been

known to me a number of years -

He has previously been under care & I have twice certified

him to the asylum - His history is that he has gradually at-

tended for months & then begins to take alcohol in some

form. At once he begins to have dreams & these come away

& begins a curious career of moving about from place to place

from hotel to hotel saving money in various ways. Selling his

own-entirely false tales of himself & of his doings, having made

cash for it. This goes on till he has no more money & has

delusions & is in the charge of S.T. - He has been seen at

in various parts of Bedford & has some small property -

Some years ago I sent him to live with a farmer in North.

He was by all means for a time but has & repeated nothing.

Since his discharge from Bedford Hospital in about July he

has been living with a gentleman of his family at Throby in Dev.

He became very well till about 3 months ago & then he suddenly

disappeared - He was heard of as being seen in various

places on the same level - but his address was not known till

he was ~~found~~ discovered by me from Brighton - I sent down

to the railway station to find him, he was in a deplorable

condition thinking with a delusion. He came on the next

day with nothing & was so badly off that he had to be

put in the hospital - At first he was very confused &

delirious - hardly knew any one & was stupid & silly &

could not give any account of himself -

He was very much better & told me of his doings, & was

for some time a steady worker.

On admission - medium height, strongly built, well shaped

obscure - light hair & hazel eyes - fleshy &

pleasant - simple & direct expression - delicate hands

very large - In sleep - body - personal feelings - very intelligent

& was confused & dull, but quite capable of understanding

all that was going on.

Was given light diet - Not much. Calm & obedient.

Charles Langwell

28th So much better & looks more natural - says he is still very
tired & disinclined for any business - has quietly returned about
noon - plays the piano, amuses quite extensively - looks to
his mother who is here - begins to eat well - keeps quietly -

C. H. Drake

30th Going as usual since in health - hasn't as a lounge - tonight.
So quiet willing to remain here as long as company - wishes to
go back to Nashville & his home - has no more intention to
remain for the present -

C. H. Drake

Nov. 14th Mr. Langwell goes on my journey - he has been sick in his head.
He is very nervous & has lost energy but in even a healthy
my plays more games - amuses & bridge - he will not - says -
he means my mother & wishes to stay here.

He says he is sick - was written before last night saying "that he
had decided" for people he was staying with at Nashville, but was
warned by some letters from them - he writes about one of
letters -

C. H. Drake

Nov. 22nd So my mother better in health & mind - is anxious of staying
and has written a letter asking for permission to do so -
he writes me daily, also a letter shopping - buying papers etc.
he plays the piano, reads & looks in the evening -
he writes home to parents frequently -

C. H. Drake

Charles Langwell

Dec. 14th Going as well improving in health - he feels spirits -
seems quite contented - remains quietly attentive for absent.
His quiet willing to do so - amuses himself extensively says he
is quite happy -

C. H. Drake

Jan. 3rd 1907 has been very cheerful & seems quite contented. Had a cold for
a few days, but has got over it - He seems much in mind &
wishes for application but has been unprofitably well behaved.
Has been to several entertainments lately -

C. H. Drake

Jan. 23rd At his own special request - wrote to parents - of his parents - he has
now expressed to be kept here for a longer period - He says
that he is quite content here & hopes his mother & father will
have no care. His willingness to his mother to do so, but his mother
wishes to be present health & seems to have more thought -

April 17th

Mr. Langwell is going on suddenly he is looking better than ever
I have seen him; he is well equipped & unprofitably cheerful -
He says well & has no more appetite & has no desire for absent -
He is always ready to amuse himself - looks after animals & plants
in the garden - He plays games - he goes out to the
store & he tries to entertain - he cannot think of anything
for any time - His money was taken care of - he spends
rather money in a frivolous way, but is quite happy &
contented -

C. H. Drake

Charles Langdale

May 31st Doing as very well - perhaps himself in garden
more as - winter matches & is finally contented -
Sometimes gives signs that he is not quite reliable -
Was a great deal disturbed by his parents' visit -
Wishes to be taken to go on - abroad to London, but in
my opinion has only once done so -

General health good - getting by himself - Charles -
August 9th Doing as well, but rather restless in summer at times -
Generally appears to be cheerful & well contented. He has his
own garden & is doing well. C. S. J. S.

Sept. 10th I have discovered that Mr Langdale has again been sent to
to be in some of the old dependencies - With these & sometimes he
assumes his workmen & comes to being dismissed as by neglecting
his doings - He has found his clothes & small belongings & has
ordinarily put up with miserable accommodations - He tells me that he
has gone away to a stone some distance & has found him of
long return - He goes on his pointlessness & comes on time he had
for me all - He seems to have done so - he is very discontent
keeps on saying that he wishes he had more money or anything -
wishes now that to go on - alone & wishes to be returned - all this
is a repetition of former complaints which have previously resulted in
amplified breakdown in health but has seemed to have been better
in time -

Charles Langdale

Sept. 17th After being very depressed & outside for a few days he became
brighter & was very anxious to go on I had previously promised him
to visit him - He goes on in charge of the B. & seems delighted
with a view to go home to visit & he wishes to have his mother & family
& to be near his residence - He is in better health. C. S. J. S.

Dec. 20th 1907
He has been going as very well - doing good work - well contented
& very contented and better generally in all respects -
He is not going out - except when necessary, has been around &
returned to his residence & in the presence of a certain
number of visitors - He is still by his father & mother - Charles
Langdale goes as well - appears happy & contented
and occupies with his usual writing - day & nights -
His home has been returned to August. C. S. J. S.

Jan. 9th 1900
Mr Langdale seems improved in health & is treated
power - He is contented & cheerful & completely fit -
He is mostly employed but does not stick to one thing long -
He looks after his library but does a little gardening -
Always visits - almost - daily - No very great, but is much
& not - falls in - all - goes on - to the end - he has
known - much - but - otherwise does not - go out - about -
He was visited lately by his parents & told them that
he wished to remain here - C. S. J. S.

June 19th Mr Langdale seems improved in health & is treated
power - He is contented & cheerful & completely fit -
He is mostly employed but does not stick to one thing long -
He looks after his library but does a little gardening -
Always visits - almost - daily - No very great, but is much
& not - falls in - all - goes on - to the end - he has
known - much - but - otherwise does not - go out - about -
He was visited lately by his parents & told them that
he wished to remain here - C. S. J. S.

August 1st 1900
So particularly well - active & well employed & cheerful in
summer - wishes to copy for publication of some to remain
C. S. J. S.
Page 118 - 140

Capt. S. E. Foley

admitted April 16th 1907 as P. L. Branch for treatment.
 aged 53. Widower. One of Capt. & children 2 girls & 1 son
 who is married. Retired from the Army -

His gentleman was somewhat of a farmer about 25 years
 ago when he had a fall from his horse & sustained injury
 to his head was not numerous.

Was involved & retired. Appeared under as Adjutant
 in a V. S. Regiment.

His wife died after a long illness -
 he lived in Chicago & elsewhere -

Has for the last 2 months been under treatment & -
 has been treated by "rest cure" in bed chiefly -
 as there is any depression lately - suffering from insomnia
 saying that he was going out of his mind the
 thought here by Dr. Sheffield on the 15th.

Capt. Foley

on admission

Pale spare man - under a gray beard.

Grate in manner with certain depressed but intelligent expression
 Seem to me quite readily & willingly of himself & attempts himself
 in a quiet way. Appears generally to be in good health. As person
 that he is very weak on his legs & has pains in his back, & in the
 back of his head. Tells me that he has been to bed for weeks &
 has lain on his back with nothing to do till his thoughts became
 almost unbearable - Is depressed and nervous about his health
 & is inclined to say that it is too late to do anything for him.
 But willing to remain here as a V. S. Branch.

His pupils are wide & react to light - some jerks are
 not really exaggerated - No unusual sign of fever in the
 hand - Joint is peculiar & he walks slowly with
 jerky movement - from the knees - he talks much & walks
 with small eyes.

He looks fairly healthy - complexion clear - but he looks weak
 unwell & debilitated -

He walked out in the garden for a few minutes -

Took a light dinner of fish & custard pudding -

Some after went to bed - but writes to -

Since P. L. Branch p. 119. h. S.

Capt. Selley

April 16th

He says with her voice & made a good handstand
& was only a little in the ground, sitting in conversation -
his attitude - some usual letters - some of which
himself & told me that he could not talk - could not
read and was not able to do anything, but I found him
holding a few papers & I gave him some books -
He took good care & his books were -

about Silliman's Hypnotic State after meals - eggs & milk.

Myself put at night. Commission? I have expected -

Ch. Duke

17th

Selley well with one dose - more cheerful, as he has
talking freely - planned with the friends to make suggestions
to the gas. He had one time - a kind of of him is
back along as he has - try to tell & planned - in manner.

Ch. Duke

22nd

Has been going as well to be as being talking much more
and being so much more saying that he has expected that
will be finished by the end of the month. Perfectly sensible of the
possibilities of this but frequently repeats it - tried to say by
his sister that lately read his brother - wrote after his illness
had been a good deal as it was a fine day -

Ch. Duke

Capt. Selley

April 25th

Visited Selley by a party of friends & family -

Capt. Selley spoke of delusions & hallucinations & hearing(?)

It was noticed that after some time he talked to himself as
if some one -

May 8th

His own name given Selley - Capt. Selley was

admitted as patient under treatment -

Ch. Duke

Miss Jane Emily Blackwell

Admitted Aug 8th 1907. Wt. Down for treatment.
Zonal Age Single. Ch. of England -

Miss Blackwell has had since 1893, when she was admitted here under artificial, had many attacks of intense acute mania, for which she has been treated many times in various establishments. She was admitted here again in Dec 1896, and stayed till April 1897. She had another one in April 1906 when she was sent to a Wt. Down & the King Park, placed under artificial care, and discharged in the month of October. Since then she has been under the charge of a companion travelling club, and at times going home for short periods. She was last here with her sister home at 24 Clifton Hill St. John Road, when I was sent for to see her on the 6th of July. Mr. Wells her companion told me that she had noticed alterations in her manner, that she was getting very nervous and thought that these indicated that she was getting stronger out of doors, and for that reason was not willing to leave the house for walks or drives. My first examination of her confirmed this, and I stated that she was looking more & calmer and better generally looking. I recommended her to be treated for several days, and she seemed to get brighter again and was happy, though she still was nervous &

Jane Emily Blackwell

going on. She also drove me to the house through a "jail" and then was willing to let me see the garden & the garden and her certain of herself, and was evidently suffering from the confinement of the house that she looked on herself. She expressed a wish to travel (this was the last part of what I had seen, and he was in direct observation. She wanted to know how long, and then went to say that she would come often on account. She then went to the house and arrived on the 6th of Aug. She came down with Mr. Wells on the 7th. Mr. Wells reported that she was beginning to talk about her last opportunity of the possibility of her being married, then being a length, on a visit, of her beginning to think about (I don't think this last year before she died (the King)), and said that she was willing to think that she was under control & in her care. She had been depressed the last day or two, and wanted to many ways. She came down again naturally and seemed glad to see me at the last. J. S. Tuke.

Dr. Williams

Tuke. Well dressed and sturdy than she used to be. Looks fairly healthy, but when she talks long of her condition is likely to get her face and looks somewhat vacant. She is bright and seems contented to have come, though she would be happy to say if I thought she had done the right thing. Had a little talk with my wife, then came down &

1907

Jan Emily Blackwell

Wrote a card about taking interest in it and being
tea with the company. He then said she was tired & she
is with a nurse. She was a little better looking at home
the room, and asking when she could see her again, she
settled down again and then I said with us quite
quietly, talking of the things and myself of herself.
She spent the evening in the dining room, and talked to
me of herself and asked me to tell her if the children were
had, and told her she had said something about herself
and what she had done, but was satisfied with my
revelation and was quite glad. Did not know what
and said I told her. T. S. T. T. T.

Aug 9th

A good night sleeping well and quietly. B.O. got up and
after breakfast went out with her nurse in the garden. Was
quite natural, but didn't talk about herself. Came & gathered
flowers for her room & put them in water. Lunched with my
children some were very good. Sat out all the afternoon
and then looked on all things. Bored & nervous and
shut in quiet evening with my sister. Beyond a tendency
to nervous & a certain amount of uncertainty and delusion
rather than her usual brotherly. Is inclined to
a little self-consciousness - I wish to know more. T. S. T. T. T.

Aug. 10th

Had quite dark a good night going to sleep. Later. A good day on
the whole, though uncertainty about things, tired in evening

1907

Jan Emily Blackwell

Things began looking dark & blue. Was not sure whether she ought
to do things or not, & being decided thought afterwards that
she might have made a very decision. Very bright, and played
a little tennis with the children. Did not see. T. S. T. T. T.

Aug 11th

A fair night. Quite hot very unkind. Did not go to church
because of the night & snow. Came to lunch. Appeared as if I was
if the night had come over. Quiet a little after. Quiet in evening
Largely with my sister, & seemed content. Not guilty. T. S. T. T. T.

Aug 12th

A bright, sunny day. Had no breakfast. Had a little
in night sleeping well. Had her in bed in dark till 2.30. Checked
sleep. Sat out of door with nurse. Very unkind & very bright
time. Did not see. T. S. T. T. T.

Aug 13th

A good night. & rather better day. Sat out worked. Played a game of
the game and I sleep on it rather, looking & talk about herself
at the time. She is constantly asking about her health etc. In evening
shook her, on the whole being. I did not know much. Bright
& sunny. Did not see. T. S. T. T. T.

Aug 14th

Very fine night, with a probability wind, then looked like a
cloud, content in evening, talking of herself, had the dinner
had the dinner ready, should she get better, should she get over,
ought she to have some more of her children. Gave P.M. message
with her & that she was. Did not see. T. S. T. T. T.

1907.
Aug 15th

Jan Family Blackwell

He left foot night 130. Looking for hair, addressed at lunch, fairly cheerful. Talked much of himself after at an interview, the historical question started, over 2 year booklets. Inquired the how a child, asked many questions without much attending to the answers. Told her he neither always started her getting to be treated like people, why ever that? Did I understand. Checked up on school relations in passing the dinner. Last day of his in camp. Lacked a little tired, but very quiet -
Fred. V. VI

T. S. Parker

Aug 16th

Good night worried because she had slept so well, right the 12 hours taken powder? Still quiet they indicated again looked a little out of sorts. Dashed in to worry all day, but the evening. Brighter in evening. Set out & talked after dinner. Indicated about having done right, did I think she was wrong? etc. etc.

T. S. Parker

Sept. 6th

So going as usual, no question and answer in any way and behavior still nicely, talking to people. But is disappointed and expresses a fear that she is going to be heavily opposed - she very firmly expresses a wish to know if she has done any "wrong thing" and has to be opposed about this, then for a time is satisfied - she smiles out - & looks happy - some indication that is in fine health -

C. S. Parker

Sept. 8th

Visiting today by Mrs. Wicks, rather disturbed appearance, asking me to explain her that she had done so very well.

Miss S. J. Blackwell

Sept. 14th

Has given considerable amount lately & for some days has been very depressed but through music & reading has seemed to get better up to a certain point. Very evidently asks if she has done wrong & if she has not - her chance of leaving to the other two rather easily, right, and she really, & acting like someone but all one well. Inclined to think the principal person is her friend - has been here in her as we are with her but is her any. So quite miserable & is exhibiting quite badly. To have a more sleep with her. Her books have been written down & she has given & opened. Pt. Parker is very happy & asks to see her father who is not in England & is coming home. Ch. Parker

15th

Another letter today from Mrs. Wicks - left Parker -

17th

I have visited by her side and also by her father - she was pleased to see them and seemed very well, but was chiefly anxious about herself & asked them both for some sort of question - she has been out more & is somewhat better showing an attempt to cheer herself. Ch. Parker

22nd

Has not improved, but maintaining - being more anxious thinking is in denial that she would be concerned with a kind of anticipation - big breath Parker speaks, t. d. advised.

23rd

I seem to have been written in answer, but have not had so good night. Have sitting up with her second & third today, but it is through her & with her for a few nights.

24th

Have told her when have steady but still constantly repeats her question. Letter from completed today. B. Sheldon has seen. Carol Wood page 73.

Major Alfred Gilbert Crocker.

Admitted June 22^d 1908. Single vol. 38 Ch. 12
 England. Major in Cavalry Indian Ponties force -
 appears to have gone on all sides for several years & with
 him had much leave, served in Burma etc. He was
 appointed Adjutant of the "1st Indian Light Horse" in Coom
 his duty being to ride about a great deal & hunting and killing
 after scattered troops of the enemy in a large district, this
 necessitated the acceptance of a large amount of hospitality.
 He is now married here. Just before leaving India he had an
 accident, falling with a bullet making his way through
 of his arm, and apparently meeting head & head in the rain.
 He seems to have thought little of this, but later on at an
 ill station he began to get restless, and returned home, and
 his father was sent for. He was sent to Calcutta Hospital
 for a while and then came over to England. He says he was
 quite fit in the voyage, and became ill to death.
 The first news of home was that his father had died the
 night before, he seems to have felt depressed, & his
 brother having arranged to connect his visit to Hoveley
 took him to ~~the~~ see him a day or two after. He
 recommended the small "bin-billal" in a bar
 of his in the City of London, where he stayed a month
 got very excited thought he had found the home
 down, and resorted to a wild attempt to through

Alfred Gilbert Crocker.

her. He was taken by his father to the 24th of April Conference
 Newport, spent under 5 hours care. He had an accident, in

July 15th 1908

Whitecroft,
Carisbrooke, I.W.

Dear Sir

I shall be away on
 holiday, & I am writing for him.
 I was here so long whilst
 Major Crocker was here, & I
 have jotted down a few notes
 which may give you some idea
 of his history &c. -
 Before admission here May 4th

It was stated
 "He was lying on the ground struggling
 & unable to get up, & all attempts to get those
 around him to get him up but his own
 finger. His "nurse" at his own
 breakfast when he was suddenly
 attacked her with table knife

June 23^d

24th

They had dinner after dinner. Appetite good. Engaged
 a little of London stuff but says it is going off.
 seems unwell. Stays in the ground & is
 in hospital. Gets about the place. The patient
 symptoms undigested. Refuses a little &c.

T.T. Tate.

Admitted June 22^d 1908. Single Lt. 38 Ch. 12
 England. Major in Cavalry Indian Frontier force -
 appears to have gone on all sides for several years & with
 him had much leave, served in Burma etc. He was
 appointed Adjutant of the "1st Volunteer Light Horse" in Canada
 his duty being to ride about a great deal inspecting and looking
 after scattered troops of Cavalry in a large district, this
 necessitated the acquisition of a large amount of horseflesh.
 He is now married here. Just before leaving India he had an
 accident, falling with a lance on a high day, being thrown
 off his horse, and apparently meeting head & head in the air.
 He seems to have thought little of this, but later on as
 little ailments began to be troubled, and other ailments, and
 his father was sent for. He was sent to Calcutta Hospital
 for a while and then came over to England. He says he was
 quite fit in the voyage, and became lame to some extent.
 The first news of home was that his father had died the
 night before, he seems to have felt depressed, & his
 father having arranged to come to his house in Hoveley
 told him to ~~leave~~ see him a day or two after. He
 recommended the usual "bain-marie" in a basin
 of this in the bath of English, when he stayed a month
 got very excited thought he had found the home
 down, and resorted to a horse attempt to through

Alfred Herbert Crocker.

her. He was taken by his father to the 14th of light Cavalry of
 Newcastle, spent under S. Davis' care. He had no acute attack, but
 which, deluded, riding & in paddled some for some time (2 months
 then altogether) but better and was allowed to travel in charge of
 father. He was taken to London, and S. Davis was consulted.
 He recommended that S. Davis should be allowed to put him
 while in England on 5. P.S.
 his father's special regard this was done on the 14th of June
 recommended a shooting stay in a house, to be under treatment.
 I saw Major Crocker in his father's and he agreed to see him.
 He was gentle and quiet, and anxious to do what was
 best for him. I tried some slight gymnastics by experiment, in
 very slight traces of his strength, but apparently good condition.
 He is said to have had epilepsy - both kind and been looking
 steadily and fine feet 8 1/2.

He came down with his father down with his father.
 Males were in all ways. Had to take with a double carting
 P.S. from provided by S. Davis. T.S. Tute

June 23^d

He has been very quiet. So completely sound and better
 about 2 hours with the quillade. Come to heels
 P.S. 14th of light Cavalry. Appropriate food. Longtime
 a little of London stuff but says it is going off.
 seems excellent. Stay in the ground & is in
 in England. Looks about the place. The situation
 of English was slight. P.S. a little 4.
 T.S. Tute.

- 24th

Major A. J. Crocker.

August 5th

Is quite natural in manner, quiet & composed.

He writes letters & receives parcels - he writes out most
what he likes - Today goes back to Boston as far as
the situation at Newport, Rhode -

He plays games with much interest & shows no want
of concentration - Is a little slow in mental power, &
wishes never find a trifling difficulty in finding
the right word - He has visited a dentist lately &
has had his teeth put in order -

Ch. D. D.

August 17th

Major Crocker wishes to leave at the expiration of his
contract - He has no symptoms and mentally is quite clear
& sound - He promises to keep very quiet & not to drink
spirits or wine except in moderation - He is to go to stay
with his father who expects him - I advise him to report
himself to Dr. Brewer - He left today in the most friendly
mood -

Ch. D. D.

News of his complete mental cure after marriage
& return to India in 1910 - Director of G.P.

Arthur Overton Oliver

admitted August 28th 1908 - Single - aged 54^o - Ch. of Episc.

a merchant - ex. Thompson; is home for a holiday -

Seems to have lived a long life - generally to have had good
health - to have been active in habits and does not appear
to have been in the habit of drinking or smoking - Naturally careful -
Some of his visits to England

was "run down" as a result of a visit - temp. 100^o at night -

Some loss of memory & alcohol in manner -

transmission of blood led to no result - retained organs and
impulses - brain normal - flatulence - liver small -

a month ago was seen by Dr. Cantlie & found to be moving
slowly - at - working - a small natural pile was removed;

but it did not give much trouble -

has promised that this has done him harm -

this morning was unusual & he slept badly - It was

imposed to certify him but he refused a visit to come
here as Voluntary Boarder -

an allusion

Short - well built - muscular & finely well muscled says he
has lost weight - Hair & mustache white - Short - regular
Pulse 82 - antipathetic -

his hair - former of numerous spots, but is weak -

appears highly nervous - literature & socially "upward"

no delirium - but - evidence of all that goes on -

A. O. Oliver

on campus
(continued)

Seems perfectly willing to come here for treatment, & knows my well where he is - Shows a letter asking for leave to home at Watling Town for 2 months - In conversation is despondent & not always very clear but there is no evidence of delirium, but he has a curious way of contradicting himself frequently - e.g. tells me that he was badly treated at the military home & was ostracised, then says that the food was very good he had my pot of milk to drink & with, etc. - Then tells "he is kind", but a few minutes after says "he was treated, more like to work -"

Took a good dinner went to bed early & said he would sleep - (temp. 106°) B. treated -

Wrote a letter to sister -

Single special feed -

27th

Slept badly - restlessness & tossing about - Told me that he tried to sleep - a letter home composed in mind - Rather unable to remember if he had written a letter or not - In the afternoon rather dull & despondent was heavy rain came on -

Letter written by Mr. Nispe & a lady - To whom he was grateful, & was evidently pleased to see - he hopes to bring some of his things to home going to. Shows

A. O. Oliver

Shows very suddenly became silent & his expression of distress gave way to a look of anxiety - he said nothing at times and his former consciousness had seemed to forget what he was speaking of, & for some minutes was almost altogether not replying and to question - Shows after a better condition, spoke quite naturally & rationally again - gave his friend some directions to accompany him to his motor car & was kind of B.

Took a light dinner - B. read -

Received Post Office 9/11 the letter in the day & at night.

C. H. P. 10/11

28th

Was had quite a good night sleeping for 7 hours &

Shows better today - rather nervous & uncertain but left

unfused - not a good deal -

C. H. P. 10/11

29th

Shows well again - Rather better all day - B. read -

Was present at a small party at the cricket ground on last

game - returned in time - to bed early - B. read - C. H. P. 10/11

30th

Shows greatly better - this morning rather more than usually nervous - everything was wrong - his hair - he said he had eaten too much - amiable politeness - said he was the worst to get up - but

traverse out of bed to look at himself in the glass - Spent several

31st

A fairly good night. Very nervous & jittery at times but nothing that can be referred to any specific cause in his conduct. Pleasantly talks about, and shows his

A. D. Oliver.

low jaw as if wanting something, but can utter
his self and speak sensibly and rationally. Seems
contented, with complaints of flatulence at times,
recalls and undresses at times. goes out in
ground & scratches himself with his claws. ^{T.S. 10th}
Sept 10th. Think the same is sleeping very peacefully and
keeps in bed. ^{Sept 10th} up & down all day, out of doors
when fine. Talks good letters and is less wicked
to the prison about himself. ^{T.S. 10th}

Sept 4.

The weather has been bad and he seems a little sick
to be depressed about it, says he cannot stand
the climate, he goes along quietly writing & reading
and playing a little billiards. Says he does not
sleep, but there is no doubt that he does. ^{T.S. 10th}

Sept 6th.

A quiet night. Observed much of the day writing &
reading letters in prison. Seems more contented
Sept 7th. Good night. Complaints of his memory, but there
is no definite evidence of delirium, though he
seems at times to be at a loss for a word or two.
Contented with his self at times, talks about a little
ambitiously, but is occupied with letters & papers and
shows no signs of wear. More cheerful & bright than
before tonight with more confidence. ^{T.S. 10th}
Sept 8th. Tells me that he does well. seems pleased with his letters,

A. D. Oliver.

talks like usual the prisoner, and talked over letters with me
with him. They had been together. Write his letters in prison,
except the one which is in ink - As yet good, but complains
of physical trouble, & thinks better. Physicist in charge. ^{T.S. 10th}
Sept 12th. Shows some improvement. Visited a day or two ago by
a friend of his, whom he seemed to like and talked
to, & spoke with. attended court with me interested in
the day. He had the law again today. Says he is tired tonight
seems contented. ^{T.S. 10th}

Sept 22nd

There is some improvement, but he is still very
inattentive at times, and his memory is not always good.
He writes many letters and talks about very
long with little things, but is certainly better in health
and he is trying to talk & write of leaving for
long for the Clinton hills. He writes a few letters
contentedly at times, but is much more
about in conversation, & has been to meals with me, &
been perfectly self possessed. Sleeps well and speaks
good. Still says that he has discomfort in colon at
times. ^{T.S. 10th}

Sept 24th.

going on fine quietly & sleeping well. At his own
request I let him go outside with attendants. Saw him after
he returned. He has the talk of some the same as usual
he visited with me, & spoke to me about his work, & how

1908 -

October 7th

Charles Langdell from F. 118.

Dr. Langdell has been at Winston Mass for a month with a companion. He must be very young, as well as seems to enjoy himself & to take much exercise on a bicycle &c. He has just returned & he was ordered to be again sent off, & put in a manner. He was put under close supervision & as the 5th was seen to leave the house at 7:30 AM. He was ordered to return & it was found that he had a number of letters to friends & that he was disturbed in mind. He told me that he would have some of money & that he thought he would "bolt" & had intended not to return the second night, & decided to do just - things dirty - he became quite clear after writing all day he passed a quiet night & was in himself again, very content & happy. He has certainly been taking some opportunity to take alcohol. which renders him quite silly. He is wearing quietly & as his own request is to be left alone. The above account resembles exactly former ones; the last time was in 1897.

Ch. F. T. H.

Nov. 27th

Dr. Langdell by some regained his former content, and is a few days from home. He had returned, though his spirits were depressed for some time. He has now been well comforted & has taken to his moral writing again & now has a fine & has made a copy - He has been talking to visit his father & mother & had a satisfactory visit. He is looking well & is sane & firm.

Ch. F. T. H.

Charles Langdale

Jan 17th 1907

Very cheerful & well during Xmas time & full of occupations
Frequently at my house - Busy with his duties to the
Steel works since interest in his model railway & other
things has expired -

Just lately has been several times to visit his parents in
town, chiefly on Sundays. So rather troubled by this & wishes
them to go to Brighton - Has been for several days rather
shut & moody which he says is because he has some
"neuralgia" - This is doubtful - his health seems good -

21st

He has regained his cheerfulness, & his parents have come to
Brighton - Tells me the neuralgia is quite removed from.

Feb. 18th

Is going on very well - quiet & orderly - no difficulties
& seems well occupied - by good health -
Has lately appeared for continuance of leave to reside here

Ch. J.

May 4th

Going on well - in good health - well occupied - Ch. J.

Sept. 12th

Mr. Langdale came out with Tom & the remainder - he is in
very good health - so stout but takes exercise - He seems
cheerful & generally contented - Sometimes complains of
"neuralgia" - He goes out sometimes alone
by himself & there has been no reason to object to this -
So written by his father to show he often writes - Ch. J.

Charles Langdale

Dec: 20th

Wrote the same well occupied - plays games billiard
and games & takes a fine amount of exercise -

Is at times odd & moody & this explains "neuralgia".
He refused to go home for Xmas & obviously not
desirable that he should do so -

his general health is good - Ch. J.

March 2nd

Mr. Langdale has asked for further leave to remain
at Brighton here. He seems much better than he was
two years ago. Is more reliable & feels better
able to control himself - But he is hardly to be
trusted at all - He is disturbed by news of
his mother's ill health, but he greatly wishes to avoid
going home as he feels that he would be unable to
stand any worries - Here he is cheerful and well
amused & takes great interest in cutting up &
kniping in father's timber. There have been no
"black moods" lately & his health is good - Ch. J.

June 7th

Going on well - at times seems moody & dull -

Generally very well occupied - rather good - Ch. J.

Sept. 1st

Has been going on well - at times is to be suspected of drinking
secretly but has had no headaches & generally is cheerful & in
good health - Ch. J.

December 27th

Mr. Langdale is in good health - stout & firm - plays games &
occupies himself - His parents have been to town & he has written
them frequently going up to town alone & returning well - Ch. J.

Charles Longdale

March 1st 1911 Mr. Longdale goes as well. his health is good & he is rather too stout - mentally he is very weak. his constitution and at times comes awfully, but there is no evidence that he is doing any harm - He likes to go out - to do a little shopping and he talks to the shop girls & the company himself very faintly well. has got a red dog which for the present is a great favourite - He visits two people and they come to town, & writes to them frequently - He is nursing applications for extension of leave to reside here as Mr. ... C. R. ...

April

I find that Mr. Longdale has again been considering the fact that he has been recently thinking about - out of the house - that he had promised not to do so - He has been putting his affairs for some time past. when I took note of he was very unwell & laconic & full of promises for the future declaring that he would not - indeed himself - He had denied this several times - He releases some indications being again made on his movements - C. R. ...

May 15th

For the last fortnight Mr. Longdale has been improved in mind and in general health - his parents have again come to London & he has visited them & has returned alone quiet in person conditions - C. R. ...

Charles Longdale

July 16th Is doing fairly well and occupies himself, visits his parents when they are in town - In London - C. R. ...

Sept. 30th

Has been very active recently for a change since a company - several promises have taken to spend his time going into London and he was intended to take a good deal of exercise. He returns looking extremely well and not nearly so fat as he was - He has not very well satisfied with his stay, because he was not allowed many things in small amounts but it has done him good - C. R. ...

October 11th

Has been to visit his parents in town lately. As since another disturbance and I have had to check it his usual time. Only he promised not to do so - done but did not and I find him again with kind & sleep on the floor - C. R. ...

17th

He has improved & promises amendment - Of his kind in correspondence with a temper of continuing remarks, he promises to give this acquaintance up, it appears to remain as the promise except with my special promises - So very unreliable -

27th

Has recovered his usual health, & is now bringing a well occupied -

Sept. 19th

News is received of Mr. Longdale's father's success in going to Brighton - Mr. Longdale goes to Brighton with a number of men & returns the same evening - C. R. ...

20th

News of Mr. H. J. Longdale's death at Brighton - Mr. C. Longdale very reasonable in manner - C. R. ...

George D. Douglas Clephane

arrived July 7th 1910 on leave for two months
has recently been at this time home as patient
there here for 6 weeks at Winton -
Pending other arrangements, he has agreed to
come here for a short time as Dr. Menden
& is discharged from Antiquities -

Refer to Case Book -

on admission - He came up from hospital today
looking very well & weighing 9 st. 4 1/2 lbs -
Apparently his guilt rational & clear & is now
able to converse cheerfully - and expresses no
regret - He is not making letters to his relatives -
but does not mind seeing people -
Sleeping well - appetite has greatly improved -
he has had one of those great meals -

July 18th

going on very well - cheerful & able to converse
but still he is not avoiding people here -
he keeps engaged & occupies himself, he does
not express any wish to see his sister -
Ch. Foster

was at Winton Home during the week - for business -
I suppose in April - In July recovered completely & went
home to stay with his sister at Winton - In August -
health and good spirits looking bright & cheerful -
C. Foster

Charles Kingdale

Nov. 27th 1911

Mr. Charles Kingdale has been long remarkable in manner
the more he tried (intended) to get something, and he went
to the funeral of his father with a history, news and this
his conduct was unbecomingly in every way - He met his
former creditors, & his mother - & returned here -
Since then he has been to Bristol alone & has visited
his late father's relatives - Ch. Foster

Dec. 1st

Mr. Kingdale, acting he tried on the advice of his
former creditors, gave a note to his wife to leave
& went to Bristol on the 27th, saying he would be returned
on the 29th for a night or two -

Dec. 16th

on the 14th we received a telegram to say that Mr. Kingdale
"was sick" and was asked to send a man to attend him -
It was found that Mr. Kingdale had had £50 in money
from him, that he took to drinking heavily & that he had
fallen down in his street near his mother - He left
the hotel at night and "disappeared" & no more could
be heard of him - His mother & her creditors began to
look for him -

14th

Mr. Kingdale was heard of at Bristol, where the
police detained him - he returned with no other
attendant to town -

Discharged & re-admitted - Vide New Book
