Dear Sir,

In reply to the last clause of your letter of the 21st inst., addressed to Burroughs Wellcome & Co., I may say that owing to the magnitude of the work involved, our arrangements for the exhibition are not yet complete, and the date has not yet been definitely fixed. As soon as I am able to do so, I shall be glad to advise you without delay.

I am,

Yours very truly,

George A. Auden Esq., B.A.,

28 January 1904.

Dear Sir,

I beg to acknowledge receipt of your letter of the 12th inst, and to thank you for your interesting loan to my forthcoming historical medical exhibition. The charms were duly received.

With respect to the medal used as a badge at the International Medical Congress in 1894, I am afraid that this is rather a too recent production for my purpose.

If you know of any other objects which would be interesting to the exhibition in the possession of your friends, I shall esteem it a favour if you will kindly let me know.

I have pleasure in sending you enclosed, in accordance with your request, a set of the Viking series of advertisements, which please accept with my compliments.

I am,

Yours very truly,

George A. Anden Esq. M.A., M.D.
64 Eootherham,
York.

M. 20

Dear Sir

I am extremely interested in your proposed Historical Medical Exhibition, and shall be glad to hear the date when it has been arranged.

X I enclose two Indian charms used in native midwifery, which were sent to me by a former pupil of mine; with them are enclosed the letters explaining their use.

There is an interesting account

of a similar charm used by a
quack in London in 1382 in the
Guildhall Letter Book H. 145.
(quoted in Sidney Young's "Annals
of the Barber Surgeons p 37). The
^{only} other article of a quasi-
historical interest which I have,
is the facsimile of the medal
struck at Rome B. C. 291. to commemo-
rate the bringing to the Island
of Tiber of the serpent of
Aesculapius to avert the plague.
This facsimile was used as a
badge at the International
Medical Congress at Rome in 1894

but I expect you have one yourself
Some time ago you kindly let me have a
series of your "Zodiac Series" of advertisements,
I have been much interested in your later
+ series of "Viking" pictures, I should be very
grateful if you could let me have a series
of these as I take an interest in Runic
Monuments and matters pertaining to the
Danes & Vikings

Believe me
yours faithfully
George A. Auden.

AT THE HEAD OF YOUR REPLY PLEASE WRITE

Dear Sir

By all means keep the Korean
Charms for the Exhibition - I was
afraid that this had been held & that
I had missed it.

Shall you have any exhibits for
English amulets & charms of a curative
nature? e.g. the 'lucky bones' used
in the Isle of Man & 'Whitby' for success
in fishing & general luck & health, or the
potato worn as smooth & hard as a marble
carried in the pocket as an antidote

to rheumatism?

Believe me
yours faithfully
George A. Auden.

Henry S. Wellcome

H. M. S.

11th May, 1909.

Dear Sir,

I desire to thank you for your letter of the 10th inst. I shall be pleased to retain the Koran charms, which you kindly offer, until the exhibition is over, when they shall be safely returned to you.

I hope to have a good exhibit of English charms, amulets and talismans of every description, homely and otherwise. Any objects you could lend me in this way would be much appreciated, but kindly do not forward them until the exhibition is announced, when I will duly inform you of the time and place to which loans should be sent.

Thanking you for your kindness,

I am,

Yours very truly,

Dear Sir,

With respect to the Koran charms which you kindly loaned me for the Historical Medical Exhibition, I have these still in safe keeping.

Owing to the magnitude of the work involved, and to the fact that offers of loans are still coming in from all parts of the world, I have not yet been able to fix a definite date for holding the Exhibition. As soon as I am able to do so, I will at once inform you. Meanwhile, if you wish, I will return the charms if you will kindly let me know.

Dear Sirs

Welcome Research Lab.
Khartoum. Report.

no not refer

I shall be glad to know if it
is possible to obtain single articles
as published in the Report. I am
anxious to get a copy of Capt.
Anderson's article on Medical Practices
in Kordofan, and do not want the
whole volume of the report for my
purpose. [In this connection I may
add that about 1901 when the
appeal for exhibits for a Medical

Historical exhibition was made, I
forwarded two Koraw charms from India.
They have never been returned nor
have I heard of any exhibition having
been opened.

I should be glad if these could
be traced.

I am
yours faithfully

George A. Pruden.

Dear Sir

In reply to your request
relative to Curcups, I have
a Medicine chest which
might suit your purpose
A gum elastic catheter with
Metallic top & opening this
way passed over a piece of
catgut, pre wrapped paper
into the bladder; I have
also a Midwifery Forceps
one blade of which passes
through the other & close to the
I am all yours for a minute
I am out the same other matters

as my friend Mr. Gualpica
in Dublin & Paris so far
back as 1786

The Medicine chest is Mahogany
23 inches high 17 inches
& 10 inches laterally with
opening in center. The sides
are 3 inches deep & have
compartments for 36 ^{3 1/2} ounce
bottles in front on top
them are five compartments
for 5 ^{3 1/2} ounce bottles next there
are four drawers, divided
in the center & can slip
as they are covered with wood
next four drawers
for instruments, ~~next~~ the 6 small
bottles next a compound drawer
then an empty one

at the back which can
be drawn out by means of
a spring in front. There
are compartments for five
No. XVI bottles & under
the compartments for five
glass goblets that have brass
lids.

The chest contains at present
20 four ounce bottles five No. XVI
ounce bottles & 6 small bottles
in the front at the back
3 bottles 2 goblets & 4 brass
covers. I would like one of
your travelers to see it as I
often thought you could stock
it for a business house. It is a
thank for your drawing & sketches
I use the celebrated French paper

Dear Sir

Your excellent
representation in Scotland -
Mr Taylor - asks me to
send an old fashioned
clinical thermometer which
has been to you personally for
inclusion in your very
interesting prospective exhibition

I do so very gladly - Old
time articles of this kind
are getting scarce even in
a huge place like this,
with a history of a
epoch of hundred years -

I trust your efforts
will meet with the
success that is a feature
of the undertakings of
G. W. C. -

Yours,
Very respectfully
W. S. Alexander

337

March 8, 1904

Dear Sir,

Many thanks for yours of the 8rd inst. The old Clinical Thermometer has just come to hand, and on opening it, I am sorry to inform you that I find it is broken in two places. It apparently had no packing round it beyond the sheet of brown paper, and has been treated roughly in transit. I am communicating with the Postal Authorities at this end, and shall be glad to hear from you respecting the matter.

Thanking you for your kind wishes for the success of my Exhibition,

I am,

Yours very truly,

Thos. Alexander Esq.,
Royal Infirmary,
Edinburgh.

-- Arundel Esq.,
Messrs Arundel & Marshall,
Hoxton, E.

471
Mr C.J.S.Thompson.

Mr Arundel of Arundel & Marshall, box makers, Hoxton has been good enough to offer us some early Callotype and wax paper negatives and prints, and an old folding 10 x 8 Camera for taking the same fitted with lens of the period, dated about 1850. I think these are about the things Mr Wellcome desires and shall be glad if you will write Mr Arundel on the subject.

April 19, 1904.

Re Historical Medical Exhibition.

Messrs Burroughs Wellcome & Co.
Gentlemen,

When I was last in Athens, about one year and a half ago, I gave you the name of Mr Bosanquet who was at that time the director of the school of archeology at that town and told you how eagerly he entered into the scheme and how pleased he was to help us in all that he could do.

He was at that time leaving in a few days and I gave you an address in Italy (Empoli) where you could communicate with him. When I was last in London you told me that you had written to him but at that time you had not received an answer.

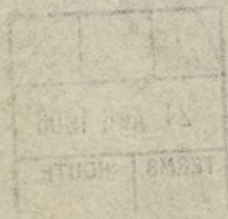

I also engaged a photographer to photograph certain statues which are in the museum at Athens and which are very interesting for such an exhibition. I paid him half the amount and left the remainder to be paid by Mr Vandyke, the director of the Hotel d'Angleterre Athens, upon his receiving the photographs. Also these you had not received when I was last in London. I shall be pleased, therefore, if you will kindly let me know how these matters stand at present so that I can complete this work if it has not already been completed.

I have heard here that Mr Bosanquet has left Athens, but I do not yet know if this is true or not. If he has left I will try and obtain an interview with his successor.

Any information which you can give me on these matters will be of great use to me.

Yours truly,

J. A. Kinnison

Universities as well as from other sources. Their total income amounts to about £ 1700-0-0 (one thousand seven hundred pounds) yearly. They are at present carrying on excavations in Crete and have unearthed an ancient city dating back about 2000 years B.C. In the ruins they have discovered many vases and antiquities of great value. Mr R.C. Bosanquet is most interested in our exhibition and would like to receive an invitation to visit it. He has shown me great kindness even to the extent of accompanying me to the different shops where photographs are sold and also antiquities and has given me his help as an expert to prevent my being imposed upon. Mr Bosanquet gave me the following assistance. He advised me to buy and send you the certain photographs as follows (see catalogue),

No 1332- Votive relief to Asclepios, Demeter and Kore. From the Asklepieion, Athens.

No 1331- Offering to Asclepios, and Hygieia. From the Asclepieion, Athens.

No 1395- Votive relief to Asclepios. From the Amphiareion.

No 271-264- Statuettes of Asclepios and Hygieia. From Epitauros.

These I am sending you under separate cover together with the catalogue of the English Photographic Co, Athens, so that you may, if you choose to other photographs write to the company and obtain them.

I have ordered the following and paid for them as they had the negatives and no prints. They will reach you in about a weeks time by post.

No 265- Statue of Asclepios.

No 1329- Votive relief of Archandros to Pan and the Nymphs.

No 1330- Offering of pig to Asclepios and Hygieia. From the Asclepieion, Athens.

No 1407- Votive relief Asclepios. From the Asclepieion, Athens.

He showed me a book which I think would be very useful to you if you have not already got one. The name is 'The Temples & Ritual of Asclapios by Richard Caton, M.D. Liverpool and published by C.J. Clay & Sons, Cambridge University, Press Warehouse, Ave Maria Lane, London (last edition I believe 1900).

He told me that there is one of the finest sets of ancient surgical instruments from Pompeii in the Naples Museum. These date before the destruction of that city about A.D. 70. Photographs or models of these can be obtained.

Prices asked by the vendors of antiquities here are such that I did not like to make purchases without your permission to pay the prices. I found in one store a small brass mortar about 6 inches high and marked with four or five figures of the Sphinx. He asked 500 francs for it. Mr Bosanquet told me that it is very old, probably Roman, and if we could get it at half the price it would be cheap.

(To be continued)

Not yet to hand. 5/1/07.

Faint, illegible text, likely bleed-through from the reverse side of the page.

Handwritten red markings on the right edge of the page, possibly a date or reference number.

(3)

(continued.

In another store we discovered a stone plate about 5 inches by 8 and about one inch thick. It bears in relief the private members of the ^{male} body with the name of the sufferer and its dedication to the Saint for his cure.

Mr Bosanquet told me that it is genuine and he translated for me the inscription. He said it dates back at least 2000 years B.C. The price asked is £ 10-0-0 (ten pounds).

This would not be allowed to leave Greece only by being smuggled out. Mr Bosanquet told me that at a sale of antiquities in London it might fetch £ 50-0-0 or £ 100-0-0 or even more. If you would like to have this Mr Vandyke, Director of the Hotel d'Angleterre, Athens, would purchase it and arrange to send it by some ships captain or doctor. It could not be sent in the ordinary way.

I have purchased two feet very small dating about 2000 years B.C. and pronounced genuine by Mr Bosanquet. These I shall send you by post.

Mr Bosanquet accompanied me last evening to the National Musium and showed me those statues which are of interest to the medical profession. We were accompanied by the photographer who does the work for the British Archeological Society. In about eight days the photographer will send you eight negatives of those objects including in all ten photographs. (That is, two of the negatives will have two photographs each) with two prints of each negative. The price for this work is 68 drachmes including postage and packing. This is the price paid by Mr Bosanquet for photograph of statues namely, eight drachmes each. The size of the negatives is whole plate.

If you wish, castings can be made of any or all of these objects, as you may decide upon when you see the photographs. Mr Bosanquet showed me the casting of the upper half of a beautiful vase which they have discovered in Crete. It is of the shape of an inverted egg cup. The work is most beautiful and clear. The figures in relief all round the vase represent the thanksgiving of the Cretians for the gathering in of their harvest. They are marching in procession bearing the barley or wheat upon their shoulders. The original vase dates back from 2000 years to 2500 B.C. I am sure that you would be pleased to have this and have asked Mr Bosanquet to have one made for us in white clay like his. He makes only one condition, that as up to the present there are no models or photographs of this vase published we must promise not to use it for advertising purposes for some little time.

I gave him the promise that we would not make illustrations from it until we have his permission which upon application might be in five or six months. As I said Mr Bosanquet is taking great interest in the proposed exhibition and will help us all in his power not only in Greece but elsewhere. He is leaving Athens in 7 or 8 days for a holiday and will visit

Return address:-c/o Messrs Thos Cook & Son, Cairo. Egypt.

Wesley House, Cairo.

23rd February, 1905.

Messrs Burroughs Wellcome & Co,
Gentlemen,

re Historical Exhibition.

Dr Sandwith took me this morning to see two statues in bronze of "Im-hetep" the Egyptian god of medicine. For particulars see Dr Caton's Harveian Oration published in the "B.M.J." and "Lancet" with illustrations about June 1904.

Dr Sandwith told me that he should like very much to purchase one of these statues for himself, but does not feel inclined to spend £12-0-0 (twelve pounds) the price fixed for each statue. He however thinks that they are genuine and that the price is just and thinks that you would like to have one or both of them. The size of the statues is about eight inches high and both are in a state of good preservation.

One especially, where the hieroglyphics upon the book placed on the kness could easily be deciphered.

If you would like to procure one or both of these statues please instruct me by return of post so that I may make the purchase before I leave Egypt. Of course before buying I should ask an expert of the Cairo Museum to see them and to give his opinion.

They would be packed and sealed by the Museum authorities so that they would not be opened in the customs and thus you could rely upon no substitution taking place before they reached you.

Yours truly,

J. H. Kinross

6th June, 1904.

Messrs Burroughs Wellcome & Co,
Gentlemen,

re Historical Exhibition.

Referring to your letter dated 22nd April, 1904, Ref. P.O.R. I note your instructions to inform all those who lend exhibits that we do not wish any goods forwarded to us until we communicate with the parties concerned as to the date fixed for the exhibition.

I have since the receipt of your letter carried out your wishes, but had already sent off from Beyrouth through Messrs Thos Cook & Son, the undermentioned. I trust they will reach you safely.

The following I bought and therefore ^{they} need not be returned.

(10) Arabic name:- "Amber", use:-

Burn a little to destroy bad smell of sick room.

(11) Urine director for boys when in bed.

(12) Urine director for girls.

(13) Syrian small tooth comb.

(14) Tooth brush used by Mohammedans.

(15) Arabic name:- "Kuhel".

This is a powder used for blacking the eyelashes to enable them to support strong sunshine.

I have also sent you an old mortar in wood aged from 300 to 400 years old and such are still used by the wandering Bedouins on the desert for grinding their coffee and other things.

One book in manuscript (Arabic) 3 to 4 hundred years old. At the end are several prescriptions.

Nos 2, 3, 4, 5, 6, 7, 8 & 9, I have sent you by parcel post.

The other books included in the parcel are the property of the English Hospital, Jerusalem, and must be returned after the exhibition to their address, Lincoln's Inn Fields, London.

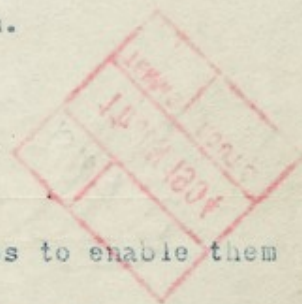

There is one other book in the parcel which belongs to Mr Gazouzi,
Pharmacien, Place des Canons, Beyrouth, Syria, which must be returned.

I am sorry that I had sent these off before receiving your instructions to the contrary.

Yours truly,

J. H. Binson

Mr. J. A. Atkinson has sent in for the
Historical Medical Exhibition the
following articles:-

Recd. May 26 '04 Box of Egyptian Materia Medica.

Package of photos from Athens.

Wooden mortar and pestle.

Recd. June 9 '04 Small piece of special bark used for colds.

Four photos of statuary.

Small box of silver trinkets and jewellery.

Return address:-c/o Thos Cook & Son, 308 Straia Reale, Valetta, Malta.

Private.

Hôtel d'Angleterre, Athens.

25th June 1904.

Messrs Barrington Wellcome & Co,
Gentlemen,

re Historical Medical Exhibition.

Referring to your letter of March 10th Ref. P.N. I have made enquiries in Athens as you desired and have arranged with a photographer to take photographs of those objects of interest to us which are to be found in the Museum at Athens.

These photographs will include a good one of Aesculapius.

The others are photographs principally of votive offerings.

Referring to your letter of May 5th Ref P.N. I made enquiries regarding private collections of models of various organs of the human body made of terra cotta clay and which you state there are large collections in Athens. I am sorry I have not been able to find any private collections although there are several in the Museum.

I have had an interview with Mr Lambros, Parthenagogiou St, Athens. He is, and has been for many years, a collector of antiquities. He told me that he had during his searching, many times, come across such antiquities as we require, but that he was not particularly interested with curios relating to the art of healing and had therefore given them to his brother Dr Lambros who is now living in Cairo.

There is a law which prevents the exportation of antiquities from Greece without special permission from the government. This law is very strict. It appears that Dr Lambros took away with him these antiquities without permission intending to dispose of them in Germany, but they were seized upon his arrival by the Greek Consul, and were confiscated and sent back to Greece. They now form part of the collection in the National Museum and are now no longer obtainable by us.

Mr Lambros was much interested in the idea of the Exhibition and told me that if he comes across anything which will be of interest to us he will let us know. He is Greek, but speaks French very well.

I think it well to suggest that you should write to him upon the subject as it will prompt his memory.

I have seen Mr Bosanquet (R.C. Bosanquet) Director of British School of Archeology, Athens. He is an Englishman. He told me that the school is supported as follows:

They receive a grant of £ 500-0-0 (five hundred pounds) yearly from the British Government and a subscription from both Oxford and Cambridge

Reply from Mr. Woolf (representative) to C.J.S.T.

Victoria Hotel, Damascus, Syria.

R/A, c/o Thos. Cook & Son, Beyrouth.

Dear Sir,

XI
In reply to your letter of the 1st. ult., ref.C.J.S.T. I regret to state that I was unable to trace the ancient black mortar in Cairo. The time that I had at my disposal was very limited, as I only stopped there two days on my way down from Upper Egypt to Syria, and I had a lot of other matters to attend to. The only two curiosity shops kept by Jews in the Esbekieh quarter, have long ceased to exist, one of the proprietors having died and his affairs sold, whilst the other had to stop business owing to his inability to meet the present high rents and taxes.

I remain,

Yours Faithfully,

(Signed) F. W. WOOLF.

Mr. C. J. S. Thompson.

Hôtel de la Ville, Smyrna.
1st July, 1904.

Messrs Burroughs Wellcome & Co.
Gentlemen,

I am sending you under separate cover a curious form of medicine used in Arcadia.

It consists of a cylinder made from the bark of a pine tree and is fastened together by pins of the same tree and stopped at the top and bottom by pieces of the same bark. It is filled with pine resin and this is used as medicine for colic.

The specimen which I am sending you was brought from Tripoli in Syria by Mr S.C. Bosanquet, Director of British School of Archeology, Athens.

I thought this might interest you. I was not able to find out how the natives use this remedy.

Yours truly,

J. A. Kinsow

Gentlemen,

I am sending you under separate cover a curious form of medicine used in Arcadia.

It consists of a cylinder made from the bark of a pine tree and is fastened together by pins of the same tree and stopped at the top and bottom by pieces of the same bark. It is filled with pine resin and this is used as medicine for colds.

The specimen which I am sending you was brought from Tripoli in Syria by Mr R.C. Bosanquet, Director of British School of Archeology, Athens.

I thought this might interest you. I was not able to find out how the natives use this remedy.

Yours truly,

J. A. M. Rinsow

Dear Sir ,

Referring to your letter dated 1st inst, acknowledgment of which has already been made you, we are to-day in receipt of the curious form of medicine which you describe as being made from the bark of a pine tree. We note that the specimen which you have sent us was brought from Tripoli in Syria by Mr. Pasanquet, Director of the British School of Archeology, Athens.

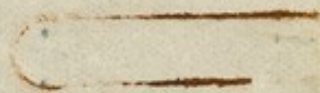

Yours truly,

Burroughs Wellcome & Co.

Wesley House. Cairo.

17th November 1903.

Messrs Burroughs Wellcome & Co.
Gentlemen.

When I was last in London, Mr Wellcome instructed me to try and find an old mortar in a street leading off the Mousky. I have not been able to find it although I have tried my best to do so.

I have however in the Esbekieh quarter of Cairo, discovered a mortar which I have thought well to report to you. It is in a dirty shop belonging to a Jew. I saw it at the door and made enquiries. The height is 43 centimetres. The width, at the top, 53 centimetres. It is in black granite and looks very old.

On one side, is the head of the goddess Hathor with an inscription in hieroglyphics, and on the other side, the head of the goddess only.

I am told that the mortar is more than 4000 years old.

One side of the mortar has been broken, but the piece is there and it could easily be fastened together.

The price asked for the mortar is £18. (eighteen pounds sterling) but I might be able to buy it for about £13. (thirteen pounds).

The owner will sell it conditionally upon its being proved genuine by the professors of antiquities at the Chizeh Museum. I shall be pleased to receive your instructions upon this subject.

Yours truly.

J. H. H. Kinson

Chadwell Heath,
Essex.

Return address:- " Poste Restante" Trieste, Austria.

Grande Hotel Bretagne, Catania.
26th August 1904.

Messrs Durrroughs Welloome & Co,
Gentlemen,

re Historical Exhibition.

Again referring to your letter of March 10th 1904, Ref. P.N. I beg to give you particulars of what I was able to do in Malta relative to the exhibition.

The Rev. J. Reynolds, Assistant Rector, Education Department, Valetta told me that they have no antiquities or curios relating to medicine in that department. He referred me to the librarian of the public library Valetta, Malta.

Mons. Mifsud, D.D. Librarian, Public Library, Valetta, Malta, received me very amiably and told me that they have many works in manuscript in the library relating to the Knights of St John of Jerusalem. He told me where I could buy a catalogue of them also of the Armoury of the Knights. Both these catalogues I purchased and have sent them to you under separate cover.

R. Carbone Esq, M.D. Faculty of Medicine, Valetta, took a great interest in what I told him about the exhibition. He would very much like to see it. He has two old books on medicine the titles of which he could not remember. He will be pleased to lend them for the exhibition if we will let him know when to send them off. He has also promised to interest other doctors in the exhibition.

Dr R. Said, The Malta Cross Pharmacy, Valetta, Malta showed great interest. He has promised to lend some old books on medicine and probably a few surgical instruments if we let him know the date they will be required.

Mr Mizzi, has some old books on medicine one in manuscript which he has expressed his willingness to lend. His address is Mr Mizzi, Junr. Chemist Strada Reale, Valetta, Malta.

Dr T. Zammit, Board of Health, Valetta, Malta showed a very great interest in the exhibition and as promised to assist us all in his power. He thinks he can make a small contribution himself on loan, but he can do what is far more valuable to us than this, namely:- He took me to the Museum and showed me over it on the Sunday morning and I saw immediately that there are such objects as would be of very great interest.

There are a number of very beautiful and very old medicine jars bearing portraits of the Knights of Malta with curious inscriptions, votive offerings, old bottles etc, but what I think would be of exceptional

(to be continued)

BW F 4
2-SEP. 1904
TERMS. ROUTE

interest to us, is the complete collection of portraits of the Knights of Malta engraven on copper plate. The copper plates are about two feet high and about eighteen inches wide. Besides these portraits of all the Knights there are also other plates, the same size as the portraits, bearing inscriptions relative to the Knights. All these plates are in excellent condition and can be easily photographed. Of course these objects of interest in the Museum cannot be lent, but they may be photographed. Dr Zammit has kindly promised to have photographs taken of any or all of these objects of interest should you wish him to do so. They are very beautiful and I think you would be pleased with photographs of them.

As the Museum is a small one and was only started by Lord Francis Grenfell with a nucleus of antiquities from Egypt and is not yet in order that is, none of the objects are numbered or properly arranged, there is no catalogue of the Museum. Dr Zammit is doing his best to get it put in order, but he explained to me that he has very little time to devote to it on account of being on the fever commission and some of the members of the commission being absent on leave.

As I have said Dr Zammit will be very pleased if you wish him to do so to choose those objects which will be of interest in the Medical Exhibition and undertake to have them photographed also the portraits etc of the Knights. He will forward written particulars as to the age and I might say all necessary particulars of the object photographed, in brief.

If you decide please write to him direct to his address, The Board of Health, Valetta, Malta, and ask him to do so. He will accept no payment for his kindness as he told me he was very much interested in the Exhibition and it will be a pleasure to him to render any assistance in his power. He asks, however, should you wish the photographs to give him instructions at your earliest possible convenience as it would take some time to get them ready. I told him of course we should pay the expense incurred. It will of course be necessary to let him know the size and kind of portrait required (whether bronze, silver or platinotype or otherwise). The negatives also will be yours.

You will find portraits of the armour of the different Knights in the catalogue which I have sent you and referred to above.

Yours truly,

J. M. Kinsow

P R O C E E D I N G S
OF THE
SOCIETY OF ANTIQUARIES
OF NEWCASTLE-UPON-TYNE.

3 SER., VOL. I.

1904.

No. 30

The ordinary monthly meeting of the society was held in the library of the Castle, Newcastle, on Wednesday, the 30th day of November, 1904, at seven o'clock in the evening, Mr. J. Crawford Hodgson, F.S.A., a vice-president, being in the chair.

Several accounts, recommended by the council for payment, were ordered to be paid.

The following NEW BOOKS, &c., were placed on the table :—

Presents, for which thanks were voted :—

From the Society of Antiquaries of London :—Their *Proceedings*, 2 ser. IX, 8vo (to complete this society's set).

From Mr. D. D. Dixon of Rothbury :—A folio volume, bound full calf, and lettered on back: 'Collect. of Tryals.' It formerly belonged to Joseph Crawhall, and was given by him to Mr. Dixon.

The following are in the volume :—

1. 'The answer of the Right Honourable the Earl of Danby, to a late Pamphlet entitled An Examination of the Impartial State of the Case of the Earl of Danby. London, printed by E.R., to be sold by Randal Taylor near Stationer's Hall, 1680.'
2. 'A Discourse concerning High Treason or the Statute of the 25th Edward the Third de Proditionibus considered and explained, as also a Short Treatise of Misprizon of Treason, Designed for the Instruction of the Ignorant, that they prove not offensive to the Supreme Power. London, Printed by T.B. for Richard Mead, MDCLXXXIII.'
3. 'A Brief History of the Succession of the Crown of England, &c., collected out of the Records & the most Authentick Historians, written for the Satisfaction of the Nation (interpolated by Lord Somers). London, Printed, & are to sold by Richard Janeway, in Queen's-Head-Court in Pater-Noster-Row, 1683/9.'
4. 'An enquiry into the Power of Dispensing with Penal Statutes, together with some Animadversions upon A Book writ by Sir Edw. Herbert, Lord Chief Justice of the Court of Common Pleas Entitled, A Short Account of the Authorities in Law, upon which judgment was given in Sir Edward Hale's case. By Sir Robert Atkyns, Knight of the Honourable Order of the Bath & late one of the Judges of the Common Pleas. London, Printed for Timothy Goodwin, at the Maiden-head, against S. Dunstan's Church in Fleet-Street, 1689.'
5. 'The Power, Jurisdiction, & Priviledge of Parliament & the Antiquity of the House of Commons asserted, occasioned by an information in the King's Bench, by the Attorney General against the Speaker of the House of Commons. As also a discourse concerning the Ecclesiastical Jurisdiction in the Realm of England, occasioned by the late Commission in Ecclesiastical Causes. By Sir Robert Atkins, &c. &c. London, Printed for Timothy Goodwiu, at the Maiden-head, against S. Dunstan's Church in Fleet Street, 1689.'
6. 'An Account [in manuscript] of the Proceedings of the Lords Commissioners for Ecclesiastical Affairs, against the Bishop of London, Dr. Henry Compton, At the Counsell Chamber at Whitehall, 4 August, 1686.'
7. 'The Proceedings & Tryal in the Case of the Most Reverend Father in God William, Lord Archbishop of Canterbury, & the Right Reverend Fathers in God, William, Lord Bishop of St. Asaph, Francis, Lord Bishop of Ely, John, Lord

- Bishop of Chichester, Thomas, Lord Bishop of Bath & Wells, Thomas, Lord Bishop of Peterborough, & Jonathan, Lord Bishop of Bristol. In the Court of Kings-Bench at Westminster, in Trinity Term in the Fourth year of the Reign of King James the Second, Annoque Dom. 1688. London, Printed for Thomas Basset, at the George in Fleet Street, & Thomas Fox, at the Angel in Westminster-Hall, 1689.
8. 'The Arraignment Tryal & Condemnation of Sir William Parkins, knt., for the most Horrid & Barbarous Conspiracy to assassinate His Most Sacred Majesty King William, & for Raising of Forces in order to a Rebellion & encouraging a French invasion into this kingdom, who was found guilty of High Treason March 24, 1695/6, At the Sessions-House in the Old Bailey, toge her with a true Copy of the Papers delivered by Sir William Parkins & Sir John Friend to the Sheriffs of London & Middlesex at the time of their execution, London, Printed for Samuel Heyrick at Grays-Inn Gate in Holbourn, & Isaac Cleve, at Serjeants-Inn Gate in Chancery Lane, 1696.'
 9. 'The Arraignment Tryal & Condemnation of Sir John Friend, knight, for High Treason.....at the Sessions-house in the Old-Bayly on Monday, March 25, 1695/6, London, 1696.'
 10. 'An account of the Arraignments & Tryals of Col. Richard Kirkly, Capt. John Constable, Capt. Cooper Wade, Capt. Samuel Vincent, & Capt. Christopher Fogg.....for Neglect of Duty, Breach of Orders & Other Crimes.....in a fight at sea.....19th August, 1702, off St Martha, Between the Honourable John Benbow Esq. & Admiral Du Casse with 4 French Ships of War.....London, 1703.'
 11. 'The Tryals & Condemnation of Robert Charnock, Edward King, & Thomas Keyes for the Horrid and Execrable Conspiracy to assassinate his Sacred Majesty King William.....London, MDCXCII.'
 12. 'The Tryal, Attainder & Condemnation of Sir John Fenwick, Baronet, before the Parliament.....Truly & Faithfully Collected from the Journals of the House, As also a True Copy of the Paper delivered by Sir John Fenwick to the Sherriffs of London & Middlesex on Tower Hill at the Time of his execution, being Jan. 28, 1696/7.' Printed at the Hague, 1697.'

Exchanges :—

From the Society of Antiquaries of London :—*Proceedings*, 2 ser, xx, i, [included in it are some 'Notes on recent discoveries in the Castle of Durham,' by Dr. Gee; and by the Rev. J. T. Fowler, on the 'Grave of Richard of Bury, bishop of Durham' in the 'Nine Altars' at Durham, and on fireplaces in the vestries of Warkworth and Morpeth churches], 8vo.

From the Cambrian Archaeological Association :—*Archaeologia Cambrensis*, for October, 1904 (6 ser. iv, iv); 8vo.

From the Cambridge Antiquarian Society :—*The Annals of Gonville and Caius College*, by John Caius, M.D., edited by John Venn, 8vo., 1904.

Purchases :—The Ancestor for October, 1904 (no. xi); *Brenan's House of Percy*, 2 vols.; *Maxwell's House of Douglas*, 2 vols.; *Mittheilungen* of the Imp. German Archaeological Institute, xviii, ii, and xix; *The Antiquary* for November, 1904; *Borough Sals of the Gothic Period*, by Gale Pedrick, with photographic reproductions of the seals [included in the volume are descriptions, with illustrations, of the medieval seals of Alnwick, Berwick, and Hartlepool]; and *Notes and Queries*, Nos. 44 to 48; and twelve original drawings (making 142 in all) by the Revd. E. A. Downman, of Ancient British camps in Derbyshire, &c. [the plans are of Bolsover, Eyam Moor, Harthill Castle, Markland Grippis, Derbyshire; Breedon Hill, Burrow Hill, Bury Camp, Hallaton Castle, Old Ingersly, Leicestershire; Brandon Castle, Brinklow Hills, Warwickshire; and Combs Farm, Nottinghamshire.]

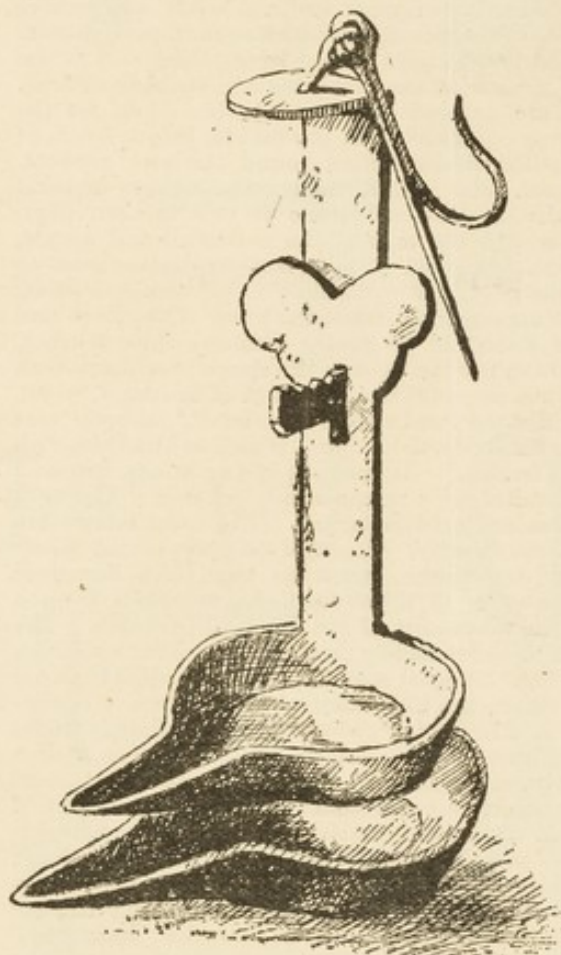

[Mr. Downman, in a letter which accompanied these plans, writes :— 'I have now examined some 270 earthworks, but there are a great many others I am anxious to visit, but multiplying by hand is rather slow work. At present the Bodleian, Oxford, have the best collection (170), and the London Guildhall and the British Museum 164 between them, I hope in a year or two to get a complete set of all I have examined, in

London between the Guildhall and the British. I believe your Society and the Bodleian have a complete set between you and overlap, and in case of my death my own set ought to make up two or perhaps three complete sets. I am also doing one local set for some counties (so far Wilts, Norfolk, and Surrey), for a public library or archaeological society.']

The recommendation of the council to purchase the following books was agreed to:—*A History of English Furniture*, by Percy Macquoid, to be issued in 20 parts at 7s. 6d. each; Professor Baldwin-Brown's *Early Arts in Britain*, 3 vols.; and T. Wright's *Roll of Carlaverock*, with shields of arms in colours.

EXHIBITED:—

By Dr. Allison:—(i) A double iron lamp from Orkney, known as a 'crusie.' The illustration below is of a similar lamp in the society's museum at the Blackgate, from a drawing by Mr. Henry Clarke of North Shields.

CRUSIE, IN THE BLACKGATE MUSEUM.

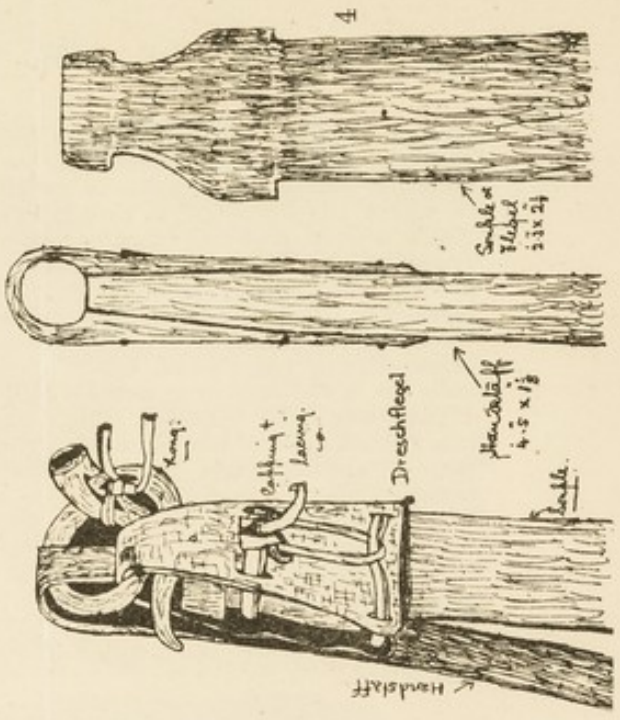

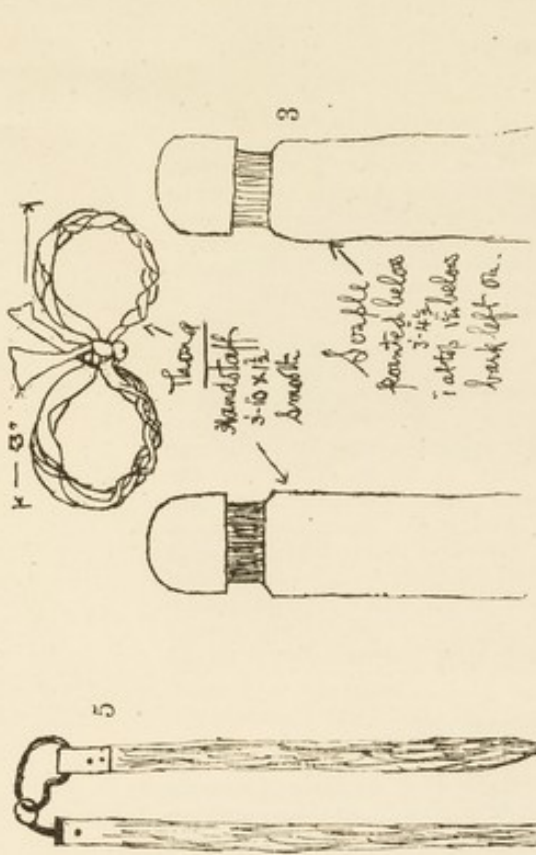

the stem ending in a spike and hook at its free extremity. The spike

[Dr. Allison said "The 'crusie' or 'kolle' consists of an upper and under iron shell (both shells shaped like sauce boats). The upper shell acted as the oil reservoir, and the under one served the purpose of catching any drippings or overflow from it. The under shell and the upright back were usually in one piece. The upper shell (a separate and slightly smaller vessel) was suspended on, and could be detached from, a notched bar, which projected forward from the back at right angles, or had an upright incline, as in this example. When detached any overflow of oil could be repoured from the lower into the upper vessel. At its top the back was bent forward at right angles, so as to adjust itself to the centre of gravity, and was perforated for a stud. This stud ended above in a ring, which interlinked with the ring of a twisted stem (forming a joint)

was used for insertion into the unplastered walls of the cottages, the hook being employed for suspension. The kollie was manufactured in Orkney and Shetland by the local blacksmiths. It is mentioned in the ancient 'Sagas,' and was in use up to the middle of the nineteenth century, when it was supplanted by a tin lamp, which was followed by the ordinary paraffin lamp. Oil from fish livers was commonly used, the wick being usually of cotton, or native worsted yarn, and as it gradually burnt down the wick was trimmed and pushed to the front of the nozzle or spout, by a slight wooden pin, which, for the purpose, lay in reserve in the upper shell. When not carried in the hand, the 'kollie' was hung upon a nail, or suspended on a cord. I am indebted to Goudie's *Antiquities of Shetland*, kindly lent me by Mr. Williamson, for much of the above."

(ii) Four flails from different countries:—(1) From the Island of Achill; (2) from Stromness, Orkney; (3) from Kirköen (Kirkisland) of the Hvalöerne group, Norway; and (4) from Saxony.

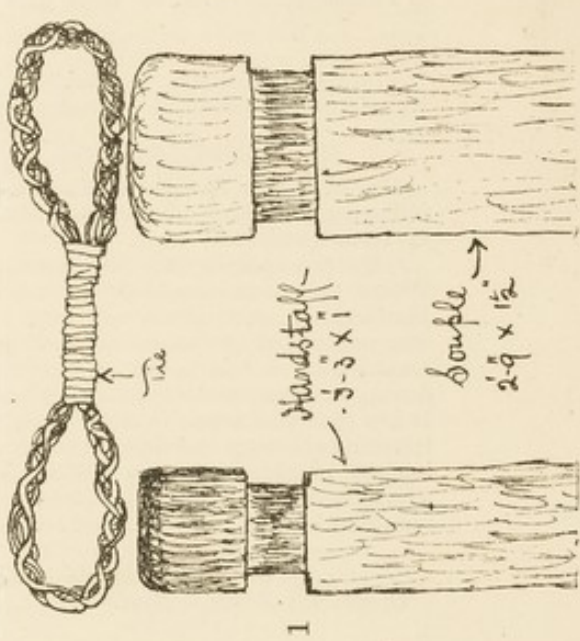

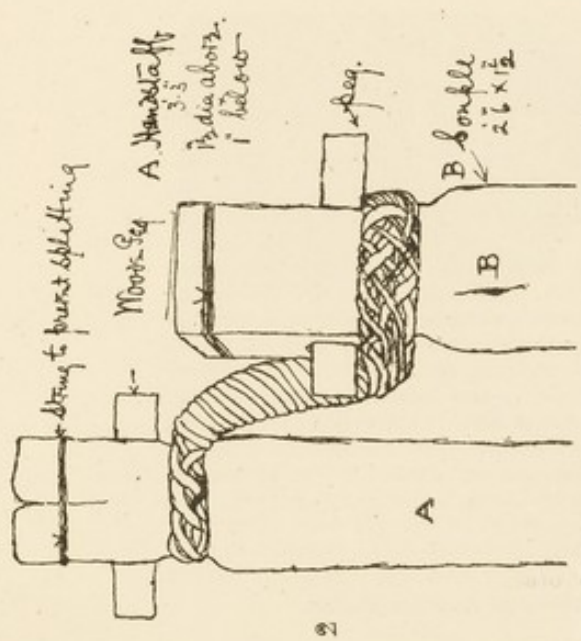

Dr. Allison read the following notes on these flails:—"This flail (no. 1) kindly sent to me by Mr. Parker Brewis when visiting Achill, is typical of Ireland. There is no wood on the island, and sticks are imported from the mainland. It consists of two sticks joined by a thong. It is the simplest form of flail, and gives both the revolving and striking actions. The handstaff and souple are grooved near the attached ends, for the thong. The latter is a circle constructed in the middle into a figure of eight by lapping, the smaller circles fitting round the two grooves. The thong is of twisted eel skin, which, being oily, affords natural lubrication. No. 2 has the distinctive feature of two wooden pegs, which pass respectively through the tops of the handstaff and souple, and prevent the thong from flying off. There is a constricted part or neck immediately below the pegs, and a shoulder to prevent the thong from slipping down. This arrangement takes the place of the Irish and Norwegian grooves. The thong is of neatly plaited white leather, forming a circle, constricted in the centre into the shape of a dumb-bell. This flail is distinct from that usual on the mainland of Scotland, which has a perforated handle, whilst the local names 'handstaff,' 'souple' and 'thong' are English, rather than Scottish. No. 3 is almost identical with that from Achill (Western Ireland). It consists of two sticks, grooved at the attached ends, and united by a thong of oily eel skin. The only difference is that the sticks are a little longer. The local names are *Priler* (flail); *Handvagel* (handstaff); *Slagvagel* (souple); and *Korre* (thong). The following description, showing that like ourselves different districts in Norway have different flails, is taken from a Norwegian dictionary, in the possession of Mr. Ripley of Gosforth. The description will be noticed to differ widely from the foregoing example. It is as follows:—"The 'Plegl' (fleegle) is an implement worked by hand for threshing operations, before the introduction of machines. It consists of three parts, viz.: I. The 'slagl' (souple), a stick slightly edged and curved, made of a tough and hard wood, especially ash, 3 to 3½ feet long, 1 inch thick at the top, and 2 inches thick below. II. The 'handstok' (handstaff), or 'pleglskaft,' a round and somewhat longer stick of tough wood, such as beech. III. The 'hilden,' the connexion between the 'slagl' and 'handstok,' usually made of thick leather 5 inches long, sewn together with straps [of straps sewn together?]. The rotation of the 'slagl' during work is most frequently effected by applying through a hole in the 'hilden,' a round stem at the top of the 'handstok,' supplied with an iron ring. For the rest the turning had to be done exclusively by the hands during the rotation of the 'slagl' over the head of the performer." I take this description to be that of the imaginary

VARIETIES OF FLAILS.

1. From isle of Achill, Ireland.
2. From Stromness, Orkney.
3. From Norway.
4. From Saxony.
5. To illustrate Norwegian dictionary.

See opposite page.

flail (no. 5), and while it shows the difficulty of translation, it is clear that the Norwegians possessed the two main varieties of flails, viz., those in which the handle is revolved in the hands, and those in which the handstaff is firmly grasped as in the example shown. No. 4, a huge, club-like example (modern) of the flail or *Dreschflegel* (*Drashflagal*) is from Herwigsdorf, near Fittau, in Saxony. The souple is termed the *Flegel*, there being no special name for the handle. It consists of (i) the handstaff, having a wooden eye in the end, formed of the end of the handstaff proper, and covered by a bent strip, or capping, of wood 14 in. long, which is attached to the sides of the handle by nails; it is the only example of a strip of wood used in this way that I have seen; the handstaff is 4 ft. 5 in. long, by 1½ in. in diameter; it is turned smooth and round; (ii) the souple is a very heavy round piece of smooth wood, 2 ft. 3 in. long, and 2½ in. in diameter; the attached end is wedge-shaped, two sides being flattened, and the other two having grooves ⅜ in. deep and 4 in. from the top; a broad capping of white leather fits the flattened sides, slipping being thus prevented; the lacing perforates the capping and passes round the grooves; and (iii) the thong, a doubled slip of white leather, passes through the wooden eye, and the leather capping; one slit end passes through a slit in the other end, and a lace goes through the first slit and is tied."

DONATIONS TO THE MUSEUM.

From Dr. Drummond of Westoe: A curious object of iron found in a peat moss near Birtley in North Tyndale. It consists of a circle from which four curved rods project downwards, at their junction there is a socket in which there is still some tow. Above the ring a handle arches over from side to side for suspension.

From R. Blair (one of secretaries): (i) A two wheeled watchman's rattle; and (ii) four bobbins from Roade, near Northampton, used in pillow-lace making, locally known as 'legs.'

Thanks were voted for these gifts.

DECEMBER MEETING.

The recommendation of the Council that no meeting of the society be held in December on account of the Christmas holidays was agreed to.

A ROMAN CENTURIAL STONE FROM WEST DENTON.

Mr. R. Oliver Heslop, M.A., F.S.A. (one of the secretaries), read the following note on a centurial stone found on the line of the Roman Wall at West Denton:—

"By the courtesy of the directors of the Newcastle and Gateshead Water Company the stone before you, discovered by Mr. Alfred L. Forster, the company's engineer, is now presented to our society. It was unearthed at the end of last month on the military road at West Denton, a few yards west of the lane leading south-west to Newburn, during the construction of a new pipe line, on the site of the Roman Wall. It is a centurial stone of more than ordinary elaboration, its carving and lettering showing careful execution. Its face measurement is 16 inches long by 12 inches high, and its depth from front to back is 9 to 10 inches. The lettering, on a panel 8 inches long by 3½ inches wide, is enclosed in a moulded border, ansated, and reads:

O . AVI
DIRVFI

C(enturia) Avidi(i) Rufi.—The centuria of Avidius Rufus.

The same name occurs on a stone found at Carrawburgh (*Procolitia*) and now in the museum at Chesters (*Lapid. Sept.* no. 167, and *C. I. L.* VII, no. 629). In the *Procolitia*

stone the prenomens Avidius is ligatured (see illustration and Bruce. *Roman Wall*, 3ed., 173). Its reading, however, is identical with the stone now before you, recording the *centuria* of Avidius Rufus; but it differs from the West Denton stone in size, measuring on its face 15½ inches long by 6½ inches high: being thus almost of the same length,

but only about half the height of the West Denton stone. As the Carrawburgh stone represents the height of the course of ashlar of which it was a member, the stone now before us may have occupied the height of two courses, or it may represent structural work on a scale of greater proportions. In either case it would occupy a more conspicuous position, accounting for the superior character of its lettering and sculpture. Two other centurial stones in the museum at Chesters

bear the inscription *C(enturia) Avidi(i)*, the name occurring without the cognomen. One of these was found in *Procolitia*, and the other between that camp and *Borcovicus* (*Lapid. Sept.*, nos. 165 and 166: and *C. I. L.* VII, no. 628). They

are each of them bedding stones, of ruder finish than the one before us, the former having the letters > AVIDI roughly incised on the face of the stone, the second having the same lettering enclosed in a coarsely executed panel, with the conventional dove-tails on either side. If we may identify *Avidius* and *Avidius Rufus* we have now the record of four separate works executed by the *centuria* bearing his

name, an evidence of unusual activity. But if the cognomen *Rufus* distinguishes one *Avidius* from another centurion of the same name, we have still the fact that *Avidius Rufus* was engaged in the Wall construction at or near *Procolitia*, and again upon some building as far distant as the east of *Vindobala*, as witnessed by our stone.

Upon the whole question of centurial stones our members may be referred to the paper by Mr. John Clayton, in *Archaeologia Aeliana* (vol. IX), where the character and purpose of Roman centurial stones is discussed with all the erudition and experience of our late venerable vice-president. The inverted letter > or the rectilinear symbol >, preceding the name, are said to represent a twig of vine, the official badge

of a Roman centurion. When, as in the case of the stone before us, the centurion's name is in the genitive case 'the centurial mark,' says Mr. Clayton, 'must be read *centuria*.' It may be added to this, by way of reminder, that there are two words, viz., *centurio*, an officer in the Roman army commanding a hundred men, and *centuria*, the company of men itself. These stones were inserted in the face of a course of masonry at the time of its construction. In doing so 'the object of the centurion,' says Mr. Clayton, 'was to record his own name, as that of an individual who had taken a part in the great work, hence the particular cohort to which the centurion belonged, or the extent of the work done, is rarely recorded on the stone' (*Arch. Ael.* ix, p. 24). 'These inscriptions,' says Horsley, 'were doubtless inserted in the face of the wall, when it was building, and were, in all probability, erected by those centuries or cohorts who built that part of the wall, where they are found, or by their commanders,' (*Britannia Romana*, p. 127). Thus far Mr. Clayton is in accord with the earlier writer, of whom he says:— 'We are indebted to that sagacious and laborious Northumbrian, John Horsley, for the brightest light which has been thrown upon the subject of centurial stones on the Roman Wall. In his *Britannia Romana*, published in 1732,' continues Mr. Clayton, 'after adverting to stones of a similar character on the Antonine Wall between the Firth of Forth and the Firth of Clyde, on which are inscribed the name of the emperor, and the extent of the work executed by the troops employed in it, Horsley proceeds to state that, in his opinion, the inscriptions found on the Roman Wall, which he has called centurial, had been erected upon the same occasion and to the same purpose, though they were not so full and pompous' (*Arch. Ael.* ix, 30). It will be seen on comparison that this is not a quotation but a synopsis of Horsley's remarks, and it should be noted that, notwithstanding the eulogy pronounced by Mr. Clayton, he (as he is careful to explain) differed entirely from Horsley as to the date of the Wall of stone. Hence Mr. Clayton omits allusion to the argument based by Horsley on the prevalence of centurial stones in the Wall between Tyne and Solway, and the very different character of the inscribed stones 'erected upon the same occasion' (that is under the same circumstances) 'and for the same purpose' along the course of the Wall of turf from Forth to Clyde. The omission was a natural one in the circumstances seeing that Mr. Clayton had assured himself that Horsley's theory of the builder of the stone Wall was no longer tenable. These are Mr. Clayton's words:— 'In early times a portion of these works, that is to say, the stone wall, with its ditch to the north, was ascribed to the Emperor Severus, whilst the earthen rampart and its ditches were treated as a previous erection by the Emperor Hadrian. But Antiquaries are now,' that is in the year 1880, 'agreed, with considerable unanimity, that both the works are to be ascribed to the Emperor Hadrian, and that they were executed simultaneously.' (*Arch. Ael.*, ix, 22n). The two views thus so explicitly expressed were the views held respectively by John Horsley and John Clayton.

In recalling this to your attention the object is not to revive an old controversy, but rather, by pursuing the argument advanced in *Britannia Romana* and expanding the statement of the case (with your kind permission and forbearance), to show the value attached by John Horsley to the presence of these centurial stones, and in this to indicate incidentally the penetration and the power of observation displayed by that distinguished antiquary. Horsley, as we have seen, was of opinion that the stone wall between Tyne and Solway was built by the emperor Severus, also that the work of Hadrian on this line (antedating that of Severus by three quarters of a century) was an earthen fortification. In

contrasting a characteristic of the Wall of stone with a characteristic of the Wall of turf, known as the Antonine Wall from Forth to Clyde, the important point of a date had been established for the erection of the latter structure. That date was either A.D. 139, or in the following year; for whilst dedications indicate Antoninus Pius as the reigning emperor, inscriptions also discover the name of Quintus Lollius Urbicus, the imperial legate under whom the work had been erected. The name of this distinguished *propraetor* is familiar to us in the stone from *Bremenium* commemorating his presence there with the first cohort of the *Lingones* and their accompanying cavalry, doubtless on the way to or from the lines of the northern barrier. Urbicus had been a contemporary of Hadrian, under whose reign he had filled official posts of high importance as *tribune*, *quaestor* and *legate*. He was one of the legates of the emperor Hadrian in Judea, where he won the *hastula pura* (a Victoria Cross of the period), and yet later was *legate* or *governor* of the emperor for the province of Lower Germany (For the list of offices held by Urbicus, see his monumental inscription, *Corp. Insc. Lat.* VIII, pt. 1, No. 6706). He seems, in fact, to have been the tried and trusted administrator of that reign. Hadrian died in A.D. 138, and in that same year Urbicus had received the appointment to be *governor* of Britain. His office in this country was thus concurrent with the early years of the reign of Antoninus Pius, and in these were begun the defensive works from Forth to Clyde. But Quintus Lollius Urbicus had already spent a long and varied official life in the service of the state when he received his appointment to Britain, and it is proper to suppose that methods in vogue and details of administration current under Hadrian would continue to be observed under Antoninus Pius in the early years of his succession to the empire. Urbicus, at least, had gained his experience in the service of Hadrian; and it is natural to suppose that he would retain the traditions of the service in his administration of the affairs of Britain under Antoninus. It is this consideration which causes the Antonine Wall to be regarded as typical of a defensive line of the period of Hadrian. This is, at all events, a dated example, and it is a turfen, or *cespitiuous*, structure. Horsley, however, in the argument before us is concerned with details rather than with this larger question. In the stone Wall from the Tyne to Solway the various sections were marked as they were built by those engaged in the work; all along the line these records are of the character of the stone before you, or very similar to it. In the Antonine Wall the work of each company, as it completed its section, was also marked by the erection of an inscribed stone. But in place of the *centuria* with its centurial stone, as here, Horsley's observation is: 'All the inscriptions in Scotland of this sort are erected by legions or vexillations of legions, that work having been shared out to such bodies,' (*Britannia Romana*, p. 127) so striking is the difference that Horsley reiterates it in a note, thus:—'I think it curious and worthy of a remark that the allotment of the several shares in building the wall in Scotland seems not, as here' (on the Tyne) 'to have been according to the centuries, but by the whole legions and their vexillations' (*Brit. Rom.* 127{n.b.}) Horsley's inference is, that where you find inscriptions 'erected upon the same occasion' and 'to the same purpose' (that is under like circumstances and for the same objects as in the turf Wall and in the stone Wall where each working party had commemorated its length of work) these, if contemporary, would naturally be expected to be similar in their character. But just as natural would it be to find the usage of the time of Hadrian superseded, after the lapse of half a century or more, when changes of organization and of classification had been introduced, or

greater sub-division of labour had become customary; 'and,' adds Horsley, 'perhaps it was not customary, till Severus's time, to allot such works to centuries and cohorts (*Brit. Rom.* p. 127). Thus has Horsley shown that the centurial stones of our stone Wall do not conflict with his attribution of the structure to the time of Severus. The importance of the point, in his case, lies in the fact that the usage of Hadrian's time, was reflected in the Antonine Wall. Had the Wall of stone been built under that reign we should expect to find the several shares indicated by inscriptions erected by legions or vexillations of legions. Seeing that we do not find this, but on the lengths as completed the record of the *centuriae*, we discover a changed condition of organization such as would be quite compatible with changes evolved during the interval of time between the reign of Hadrian and that of Severus. So at least do we understand the argument. Turning to the relic before us to-night, it will be seen that in further investigation of a difficult and obscure question the evidence afforded by these centurial stones must be taken into account."

Special thanks were, by acclamation, voted to Mr. Heslop, for his note, to the Water Company for the gift, and to Mr. Forster especially, for so quickly announcing the discovery of the inscription.

THE FLAIL AND ITS TIMES.

Dr. T. M. Allison read his notes on this subject, supplementary to his paper read at the June meeting of the society (p. 153). They will be printed with that paper in *Archæologia Aeliana*.

Mr. W. S. Corder remarked that six or seven years ago he saw the flail in use at Hodge Hill farm, Cartmel fell.

Thanks were voted by acclamation to Dr. Allison, on the motion of the Chairman, seconded by Mr. Heslop.

THE MOISES FAMILY: GRANT OF ARMS TO HUGH MOISES.

The chairman said 'through the kindness of Mr. T. A. Thorp, of Alnwick, I have recently had an opportunity of examining the original grant of arms to Hugh Moises of Newcastle, clerk in holy orders, one of the two men of his family who occupied the influential and respected position of master of the grammar school of Newcastle.'

He then read the following grant of arms:—

'To all and singular to whom these presents shall come, Stephen Martin Leake, esquire, Garter Principal King of Arms, and Thomas Brown, esquire, Norroy King of Arms of the north parts of England, from the river Trent northwards, send greeting. Whereas Hugh Moises, clerk, A.M., lecturer of All Saints, in Newcastle-upon-Tyne, formerly Fellow of St. Peter's College, Cambridge, second son of Edward Moises, clerk, A.M., rector of Keyworth, in the county of Nottingham, by Elizabeth his wife, the daughter of Sir James Butler, knight, in the county of Middlesex, and grand son of Edward Moyses of Oswestry, in the county of Salop, hath represented unto the right honourable Richard, earl of Scarborough, Deputy, with the Royal Approbation, to the most noble Edward, duke of Norfolk, Earl Marshal and hereditary marshal of England, that his ancestors were originally Welsh, and the family name Moysen, which, upon their removal into Shropshire they altered to Moyses, and lastly, by Edward his father, to Moises, and that not finding the arms he has borne, registered in the Herald's Office, and unwilling to use any ensigns armorial without lawful authority, did therefore request his lordship's warrant for our granting and assigning to him and his descendants and to the descendants of his father such arms and crest as he and they may lawfully bear, and use, and that the same with his family pedigree may be registered with the gentry of this Kingdom in the Herald's Office. And forasmuch as his lordship duly considering the premises did by warrant under his hand and seal, bearing date the twenty second day of January last order and direct us to grant and assign unto the said Hugh Moises and to the descendants aforesaid such arms and crest accordingly. Know ye, therefore, that we, the said Garter and Norroy in pursuance of the consent of the said earl of Scarborough, and by virtue of the Letters Patent of our several offices to each of us respectively granted under the Great Seal of Great Britain have assigned and

do by these presents grant unto the said Hugh Moises the arms following, viz., *Gules a fess erminois between three bulls heads couped argent armed or*, and for the crest *On a wreath of the colours growing on a mossy mount bull-rushes proper* with this motto *Nisi Virtus vilior Alga*, as the same are in the margin hereof more plainly depicted; to be borne and used for ever hereafter by him, the said Hugh Moises and his descendants, and by the descendants of his father Edward Moises aforesaid, with their due and proper differences according to the antient practice and custom of arms, without the let or interruption of any person or persons whatsoever. In witness whereof we the said Garter and Norroy Kings of Arms, have to these presents subscribed our names, and affixed the seals of our several offices this twenty-second day of February, in the sixth year of the reign of our sovereign lord George the third, by the Grace of God, king of Great Britain, France, and Ireland, Defender of the Faith, &c., and in the year of our Lord, 1766.

S. Martin Leake, Garter Principal King of Arms.
Thomas Brown, Norroy King of Arms.

To elucidate the pedigree of the family, so far as it is known, the annexed table has been prepared.

Thanks were voted to Mr. Hodgson.

ROTHBURY FOREST, ETC.

The chairman stated that one of the meanings assigned to the word 'forest' in Dr. Murray's *New English Dictionary*, was 'a wild uncultivated waste, a wilderness.' He continued that the Northumbrian instances of this use of the word known to him were the forest of Cheviot*; the forest of Allendale (*i.e.* the High and Low Forest Grieveships); Rothbury forest; Earsdon forest; the forest of Aydon, now called Alnwick moor; Felton forest, an alternative name for Felton common; and the forest of Tynedale.¹

Mr. R. O. Heslop said that to this enumeration might be added the forest of Lowes.

* This name survives in Grey's Forest and Selby's Forest, two townships in the parcel of Kirknewton, apparently out of the waste of Cheviot.

In the *Builder* of 6th August there is a notice of the church of Chipping Ongar in Essex. On the south wall of the chancel there is a tablet to a member of the Mitford family—Mrs. Sarah Mitford. In connexion with this the writer tells a curious story of one of his visits to the church. His attention was particularly directed to this monument by a wealthy tradesman, who said that many persons came to the church expressly to see it. The arms above the tablet were described by him as bearing the four-fold cognizance of 'a flea, a fly, a louse, and a comb,' with a singular legend as to their origin! As the arms are now uncoloured and high up, they are somewhat difficult to decipher; but they proved to be a fesse between three moles (Mitford), impaling a chevron between three combs (Botell).²

MISCELLANEA.

A FORGOTTEN CHURCH IN UPPER COQUETDALE.

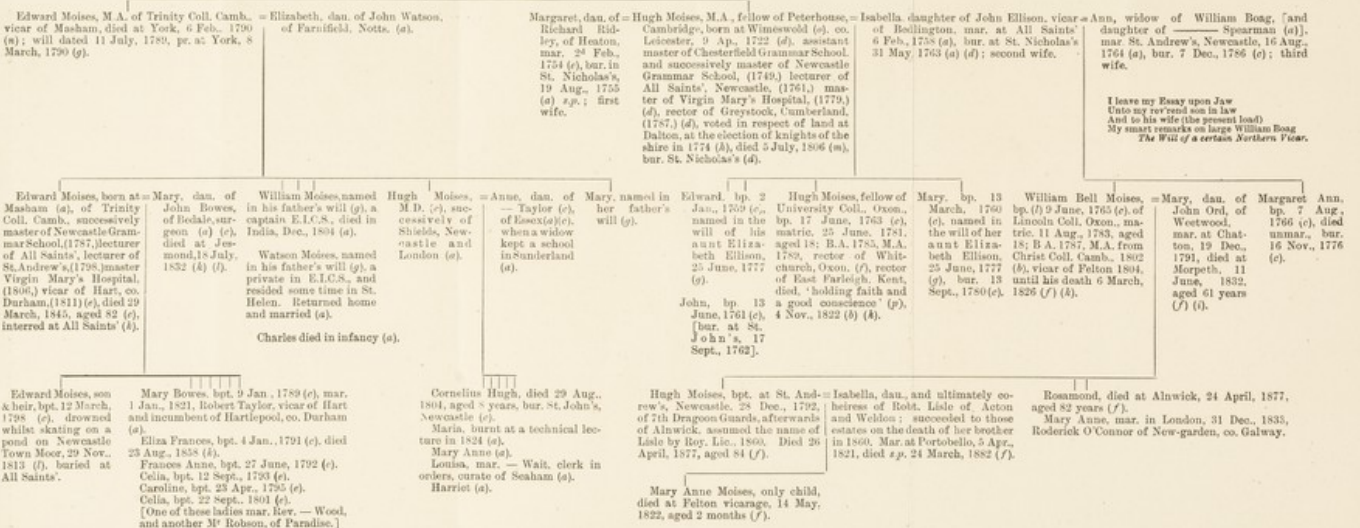

The following letter appeared in the *Newcastle Daily Journal* of the 17th December, 1904:—

"Sir,—Last year, when on a visit to Upper Coquetdale, I was informed that two or three hewn stones had been got from the foundation of an old kirk near Linbriggs for some building operations. Not having previously heard of any old kirk in that locality, I mentioned the matter to my friend, Mr. D. D. Dixon, whose *History of Upper Coquetdale* was then passing through the press, but he had no knowledge of one there, nor could I find any reference to it in any History of Northumberland.

In July last I called on Adam Dagg, the shepherd at Linbriggs, who

Edward Moyses of Owestry, Shropshire, a descendant of the Welsh family of Moysen =

Edward Moyses, M.A., fellow of Trinity College, Cambridge (e) = Elizabeth, daughter of Sir James Butler, knt. of the county incumbent of Wineswold, Leicestershire (d), afterwards vicar of Keyworth, co. Notts.

I leave my Essay upon Jaw
Unto my reverend son in law
And to his wife (the present lord)
My smart remarks on large William Bong

has lived there all his life, and he pointed out to me some foundations of old buildings—all the stones being porphyritic as far as I could see—on the right bank of the Coquet, opposite the west end of Passpeth. These old foundations, he said, were called Aydon Sheles, or Aydon-sheles Kirk, and the stones mentioned above were got from them. He also informed me that many years since, when some men were getting stones from this place, they found an inscribed stone which they could not decipher, and the late Mr. Thomas Ord of Shilmoor, would not allow it to be removed, but had it covered up again.

I have no doubt that this is the site of the ancient manor of Aldensheles held by Richard de Horsley in 1317, mentioned by Hodgson. The finding of an inscribed stone—probably a grave cover—seemed to me to indicate that a church once stood here. After a long search I have found a short but luminous entry relating to it in the *Calendar of Patent Rolls* of Edward II. Here it is: '1317, Sep. 25, Licence for the alienation in mortmain by Richard de Horsleye of a messuage, 100 acres of land, 6 acres of meadow, and 20s. of rent in Lynsheles and Alwenton, to a chaplain to celebrate divine service daily in the chapel of St. Nicholas, in his manor of Aldensheles, for his soul and the souls of his ancestors and all Christians.'

In the following year the lands of Richard de Horseleye were 'laid waste as well by the Scots as other enemies of the King in Northumberland,' and he was granted £20 a year in aid of his sustenance out of the customs on wool in the port of Newcastle. This chapel of St. Nicholas may have been demolished at the same time.—I am, etc..

J. NICHOL."

3, King's Avenue, Muswell Hill, N.,
5th December, 1904.

Mr. Ralph Nelson of Bishop Auckland, thus writes:—

"To the north-west of Willington, on the very edge of the hill, as it appears from Auckland, stands a solitary farm house, marked in the map Naxavan; a little to the south-west is Stone Chesters. On the door lintel of this house is the following:—

NACKSHIVAN
OR FIRST HOUSE
H. MILLS 1757.

Can you ascertain the meaning of Nackshivan? It is thought to be Gaelic. The Mills family lived at Willington, and owned land all around 100 years ago. Colonel Mills was agent for William Russell of Brancepeth."

Mr. A. L. Steavenson of Holywell near Durham, in a letter dated 2nd Nov. 1904, writes:—

"REMAINS OF CAMP OR FORT AT HOLYWELL.

I have, for many years, thought that there were remains of such a structure in the field in front of this house; the position is a most likely one, overlooking the river, and about 40 feet above it. It extends round two sides of a square, the other two apparently obliterated, but the whole area is most irregular, as if never properly levelled when laid away to grass. Yesterday I made two cuts into it, with sanction of Mr. Peirson, and found the embankment undoubtedly artificial, but no stones or bricks. I went down to original surface. About ten years ago, when making a drain, Lord Boyne's men found an ancient jar; they broke it, but I have the pieces. I showed them to Dr. Greenwell, but he did not think them very old."

THE FRAIL AND ITS COMPETITORS

It is difficult to realize that every year the supply of Great Britain and France was... The English and French... In Europe an invention called the frail... In the United States... The English frail is made of iron... The American frail is made of steel...

not found as in the larger variety. It was... The frail is generally made of iron... The American frail is made of steel... The English frail is made of iron...

IN PRAISE OF BRITISH MUTTON.

In the present day, with the keen competition from every quarter of the globe, there are very few industries in which the British producer can be said to occupy a position of undoubted supremacy. It would be very difficult to find any other industry in which the British producer can be said to occupy a position of undoubted supremacy. It would be very difficult to find any other industry in which the British producer can be said to occupy a position of undoubted supremacy.

CONSERVATISM IN NORTH-WEST DURHAM.

OPEN AIR MEETING AT LANGLEY PARK. It is noteworthy that the Conservative Party in the North-West Durham Division has held an open air meeting at Langley Park, Mr. A. J. Stewart, Conservative agent for the division, presiding and speaking of the meeting which had been held at an address from Mr. R. W. Davies (Manchester) on recent political topics. Mr. Stewart chiefly alluded to the fact that the Government was then had a majority in the House of Commons.

BRITISH MEDICAL ASSOCIATION.

SEVENTY-SECOND ANNUAL MEETING. The seventy-second annual meeting of the British Medical Association will be held at Oxford on July 26th, 27th, 28th, and 29th, under the presidency of Dr. William Calverley. The meeting will be inaugurated by a service in Christ Church Cathedral at 10.30 o'clock, when the sermon will be preached by the Rev. James Patrick Bright, D.D., Master of University College. The first general meeting of the association will be held on Thursday, July 26th, at 12 o'clock noon, to be followed by the representative meeting. At eight o'clock the president will receive the official and foreign guests in the Sheldonian Theatre, and deliver the presidential address describing the growth and development of the Oxford medical School with reference to some of the greatest medical men who have been connected with the University. The Wednesday luncheon degree will be conferred in the Sheldonian Theatre, and at two o'clock the general meeting will resume its session in a hall where the association shall meet in 1905, and to commence the presidential address, an address of the honoree the representative meeting will continue its work. At eight o'clock the Sheldonian Theatre, Bath, K.G.B. to M.D. D.D., president of the Royal College of Physicians, will deliver an address in medicine in the Sheldonian Theatre. On Thursday at seven o'clock, Dr. William Calverley, M.D., F.R.C.S., F.R.C.P., will deliver an address in surgery in the Sheldonian Theatre, after which the representative meeting will again resume its session. At 7.30 the dinner of the association will be held in the hall of Christ Church. At eight o'clock a general session will be held in the Town Hall by Dr. George Bagnall Ferguson, F.R.C.S., M.D., on Friday at two o'clock the representative meeting will again resume its session. On Saturday, Sunday, and Monday from 10 to 1 p.m., the following international scientific sessions, viz., medicine, surgery, obstetrics and gynaecology, disease sanitation, pathological anatomy, pathology, physiology, anatomy, ophthalmology, dermatology, laryngology and otology, tropical diseases, surgery, and medicine, dental surgery, will meet in the University Museum Buildings, the exact programme to be printed in advance. Much hospitality will be offered to members. On Wednesday the president and members of the association will hold a reception in the Sheldonian Theatre, while in the evening the representative meeting will be held in the Sheldonian Theatre. On Thursday there will be a general session in the afternoon and in the evening an entertainment in the Sheldonian Theatre. On Friday afternoon the Duke of Marlborough will receive a limited number of guests at Blenheim Palace, and in the evening the Duke of Devonshire will receive a limited number of guests at the City Hall. For the purpose of the representative meeting has been arranged to place of interest in Oxford.

BUFFALO BILL'S VISIT TO NEWCASTLE.

Buffalo Bill's Wild West Show will appear in this city during the week July 13th to 18th, and before it is over it is believed that the management will be required to request that the great exhibition be continued in Newcastle at least for a few days. Buffalo Bill's Wild West Show is the greatest show on earth, and the most popular of the age. It is the only show of the kind in the world, and the only one that has been successful for so long. The show is the property of Buffalo Bill, and is the only one of the kind in the world. The show is the property of Buffalo Bill, and is the only one of the kind in the world. The show is the property of Buffalo Bill, and is the only one of the kind in the world.

August 28. 1904

Dear Sir,

I am informed by my representative, Mr J. S. Sixsmith that you have kindly offered to loan me your collection of flails for my forthcoming historical medical exhibition. I shall be glad if you will kindly send me photographs or rough sketches of them, and I will communicate with you at a later date.

Thanking you very much for your kind interest in the matter,

I am,

Yours very truly,

T. M. Allinson Esq., M.C.
22, Allison Place,
Newcastle-on-Tyne.

22, ELLISON PLACE,
NEWCASTLE ON TYNE.

26: Aug: 1904.

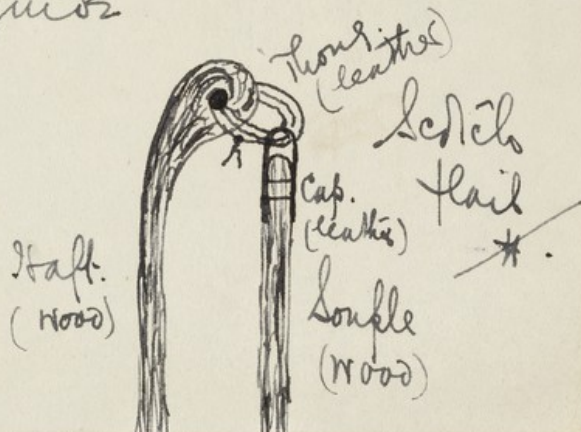

Dear Sir.

In affairs I was thinking
rather of your agricultural
sketches in *the Lancet* + B.M. of
when I offered the loan of my
flails, than of a medical
exhibition.

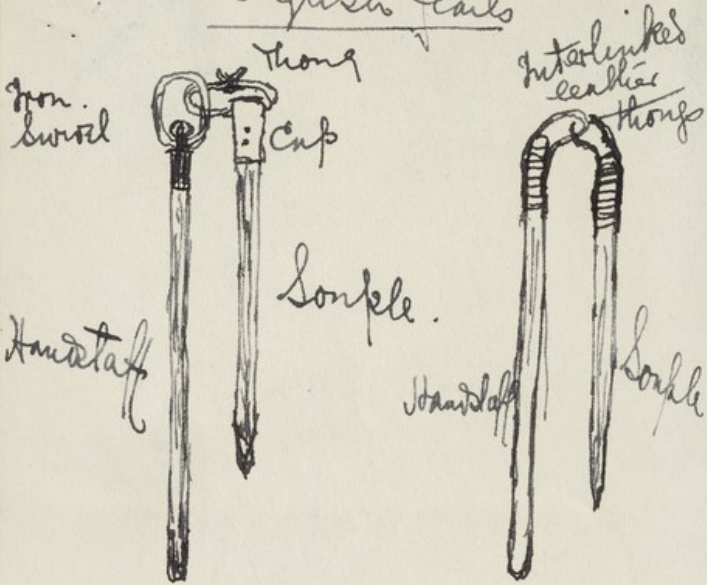

If however you care to
~~see~~ them I shall be very
glad to let you have them.

They are like two brush
handles, united by a flexible
leather etc. joint, ^{forming} "the flail
joint" of *Lucas*, & may therefore
cons. within the scope of your
exhibition.

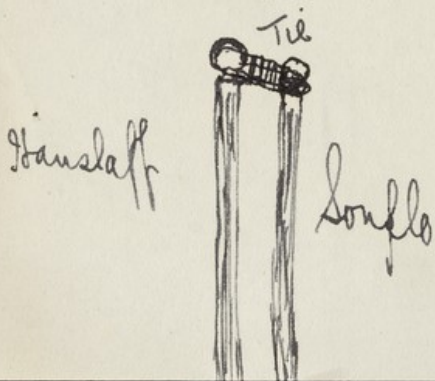

The following rough
sketches may be a
guide

English Gaits

Irish

I have pleasure in sending
a newspaper cutting
of an article on this
subject.

Wishing you exhibition
every success

Yours faithfully

T. M. Allison
H. S. Willcome Esq.

September 2. 1904

Dear Sir,

Many thanks for yours of the 26th ult. I have been much interested in your account and sketches of your collection of flails. I am afraid they hardly come within the scope of the historical medical exhibition, but at some future time I may write you again on the matter.

Again thanking you for your kind wishes,

I am,

Yours very truly,

F. M. Allison Esq.,
22, Ellison Place,
Newcastle-on-Tyne.

14. Jan. 1905.

Dear Sir,
Some little time ago we had some correspondence re flails & the flail joint of England. I have written two papers for the Society of Antiquaries here on the flail which they are publishing in their ^{yearly} records, next June. I wonder if you would be kind enough to let me

has the loan of the blocks
of the Lancelot & B. M. J.

cuts showing threshing operations
with the flail, as I should
like to make the papers as
complete as possible.

Any information at your
disposal would also be
much esteemed.

I enclose a copy of our
proceedings, which may
perhaps interest you, which
I should be glad if you would
kindly return.

Apologising for troubling
you, I am, yours faithfully,
- welcome Eng. - T. M. Allison.

MEMORANDUM FOR THE
55 EIGHTH BAY

555

January 23. 1905

Dear Sir,

In reply to your letter of the 14th inst. respecting your request for the loan of some of our blocks illustrating threshing and other agricultural occupations from early wood cuts, I should be glad if you would please let me know the exact purpose for which you intend to use the same, and if, in the event of my acceding to your request, you would kindly acknowledge the source from which you obtained them.

When you reply will you please let me know the numbers of the illustrated advertisements, the blocks of which would be of service to you.

I am,

Yours very truly,

T. M. Allison Esq., M.D.,
22, Ellison Place,
Newcastle-on-Tyne.

June 1. 1904

Dear Sir,

I am informed by my representative, Mr C. Ross, that you have kindly offered to loan me some old pharmacy jars, an ancient prescription and receipt book, and other articles of medical interest for my forthcoming historical medical exhibition. I shall be most pleased to have the loan of these and will inform you in due course when the exhibition takes place. Please do not forward them until you hear from me.

I need hardly say that these objects will receive the greatest possible care both in transit and while in my possession, and will be insured during the whole time to any reasonable value you might place upon them.

Many of the relics and exhibits already promised are of the greatest value, and I am taking extraordinary precautions to ensure their safety. The buildings in which they will be placed will be guarded night and day, so that there will be practically no risk of loss or damage.

I am,

Yours very truly,

Mr Ackermann,
Chemist,
Rue Conatterie,
Geneva.

Mr. C. J. S. Thompson.

Extract from Mr. Ross' letter from Geneva,
dated May 26th, 1904 received here 28th, folio 93.

- box
- " The Wellcome Exhibition. Mr. Ackermann, Chemist, Rue
 - " Conatterie, Geneva, has a copy of Geneva Pharmacopoeia 1616 A.D.
 - " Prescription book 1717,
 - " Receipt Book 1810.
 - " Three Vases, about 250 years old
 - " mark "Saylon" Ex. Gentiano
 - " Pulp Tamarind Rob Sambuer

All the name is
seen

If these objects are of the nature required Mr. Ackermann
" will lend them on conditions of all expenses paid and insured
" Kindly communicate with this friend."

February 4. 1905.

Dear Sir,

Referring to my letter of December 28th and to your kind offer to loan me "Principia Medicinae Auctore" MDCCLXX, for my forthcoming historical medical exhibition, I regret that lack of space will prevent my exhibiting any works published later than 1700. Otherwise, I should have been happy to have availed myself of your kindness.

Thanking you for your kind offer,

I am,

Yours very truly,

Dr Jno W. Arnold,
