<p>1876 Papet 1876 Levine</p>	<p>He labours under a constitutional fracture of the femur caused by jumping of a window on the last of the two occasions above referred to. Condition good</p>	<p>He labours with general impairment of memory, & considerable oscillation, given way to leave himself unaided at times depression which facts indicate that his mind is apparently in the same condition as it was when he lately made two attempts to commit suicide.</p>				2			61	July 17 th 1876	1				<p>Copy of Statement sent to the Commission May 27th 1876. In conversation with Dr. M'Clintock irrational, but from what we have observed during the time he has been at Trichurst we believe fully that his mind is in the same state as it was when he made the attempts on his life. At that time he himself admits that he was insane. The reason he gives for making these attempts is that he felt most miserable & that life was insupportable. His restlessness, quickness of manner & absence of due reflection in answering questions are evidence of mental disturbance. The more we see of this Patient the more the impression grows upon us that he still labours under suicidal mania. We are therefore of opinion that Dr. M'Clintock is of unsound mind.</p>
