Spasmodic bronchial irritation? Some long time ago, along with Genl Doherty, had champagne, Genl D. would not touch it, so he drank the whole bottle. Next morning found his left arm half paralyzed & it has never been so strong since. Not aware of any purpose having been made upon it during the night.

Talked of Kinglake's account of the battle of the Alma, & the story about him & the Duke of Cambridge. He had put the 42nd on one side, under cover of hedge, & rode on. He came by the Cook of some of the men that something were going wrong in front. He had a very powerful horse, active hunter, leapt over the hedge, went through the vineyards, & then

20th January 1863 to 19th August 1863.

he saw the 77th away to the left, & the 90th in front, & the Light Div.n like a small body of skirmishers, without any formation, going up, reeling a little, & going again, not wavering, at the Russian redoubt. He saw at once that they could not stand - that the Russians seeing their small number would be down upon them, as there was no support - & then he made a remark about such pluck being wanted. He took the 42d through the 77th &c - Can well understand Col.l Egerton was furious - - I told him about Col.l Sanders, & Gen.l Brown's message -

Walk home - Write to Hospl -

THE RATE OF PROGRESS

IN EVERY BRANCH OF THE SOCIETY'S OPERATIONS,

disclosed by the above figures, affords the most conclusive evidence of the high position held by the Scottish Widows' Fund in public estimation.

They are well worthy of attention by all who, in the Office they select, wish to find the highest degree of Security with the largest measure of Profit.

The Whole Profit is divided among the Policyholders,

including the "Guarantee Fund," which is credited to each Policy in proportion to its value, and is payable at death, with interest, *in addition* to the Sum Assured and Bonuses. In Proprietary Companies the Profit is divided in certain proportions between *Shareholders* and Policyholders. The following figures serve to indicate that **VERY LARGE SUMS ARE PAID TO THE SOCIETY'S POLICYHOLDERS** which, under the Proprietary System, would be paid in Dividends to Shareholders.

Profit Realised.

Profit for Thirty-One Years, 1815 to 1845	**£708,968**
Profit for Seven Years, 1846 to 1852 .	**591,158**
Profit for Seven Years, 1853 to 1859 .	**724,117**
Total Profit Realised (1815 to 1859) .	**£2,024,243**

THIS IMMENSE FUND

having been divided *among the Policyholders exclusively*, individual Policies now (1865) stand increased as in the following Table of Examples which embrace the

SUMS ASSURED, BONUSES, & GUARANTEE FUND, *with Interest thereon.*

SECURITY

is of the greatest importance to persons for whose benefit Life Assurances are effected.

The only method by which it can be ascertained that the Policies of a Life Assurance Institution rest on perfect Security, **is examination of its Balance-sheet,** which should show (1.) the Invested Funds; (2.) the values put upon the other Assets and Liabilities; (3.) the *whole* Loading on the future Premiums, as not to any extent anticipated; and (4.) the Table of Mortality and rate of Interest by which these values have been ascertained.

The following Balance-sheet is published with the view of bringing clearly before the Public the character of the Security enjoyed by the Policyholders of the SCOTTISH WIDOWS' FUND and their representatives.

The Valuations were made by the Carlisle Tables of Mortality, and the Rate of Interest assumed was £3 per cent.

BALANCE-SHEET

AT LAST SEPTENNIAL VALUATION, 31st DECEMBER 1859.

LIABILITIES.			ASSETS.		
Value of Sums Assured and Bonuses		£5,663,593	Value of Assurance Premiums (*less whole Loading*, £748,185)		£2,993,208
Value of Annuities		88,772	Value of Annuity Premiums (*less whole Loading*, £852)		2,941
					£2,996,149
BALANCE, *being* **PROFIT**, *composed of*			Realised Funds, all invested in First-class Securities, as at 31st December 1859		3,518,230
Guarantee Fund at 31st December 1852	£122,613		**Note.—The Invested Funds now exceed £4,200,000.**		
Profits of the seven years, 1852 to 1859	724,117				
	£846,730				
Less share of seven years' Profits paid to representatives of Members who died between 1852 and 1859	84,716	762,014			
		£6,514,379			£6,514,379

The above Balance of **PROFIT**, £762,014, has been apportioned among the Policyholders in the following manner:—

In Bonuses (see Examples of Bonuses, pages 5 and 8)	£569,770	18	1
In Guarantee Fund to each Policy, as explained on page 5	192,243	8	8
	£762,014	6	9

The Highly Profitable Character of the Society's Policies

will further be seen by comparing the Bonuses added to Policies of £1000 with the total amount of premiums paid (age at entry 30), as in the following Table :—

Policy dated	Amount of £1000 Policies, as on page 5.	Premiums paid.	Portion of Premiums added as Bonuses.
1815	£2583 5 3	£1319 12 6	120 per cent.
1825	2034 5 10	1060 17 6	97 per cent.
1835	1729 4 2	802 2 6	91 per cent.
1845	1417 15 10	543 7 6	77 per cent.
1855	1191 19 7	284 12 6	67 per cent.

Thus Bonuses equal to the greater part of the Premiums paid have been added to Policies of even recent issue, while in many instances **the Bonuses equal or exceed the whole Premiums paid.**

Surrender Values are payable on demand,

there being no interval of years, *as in most other Offices*, during which discontinuance of the Policy **involves forfeiture of all the Premiums paid.** The following are examples of Surrender Values of Policies of £1000, including Vested Bonus Additions for the number of years specified. *Age at entry being* 35.

Duration of Policy.	Premiums paid.	Surrender Value.	Percentage of Surrender Value on Premiums paid.
1 Year	£29 1 8	£9 13 2	33 per cent.
10 Years	290 16 8	173 14 0	60 per cent.
20 Years	581 13 4	439 16 4	76 per cent.
30 Years	872 10 0	774 7 1	89 per cent.
40 Years	1163 6 8	1130 8 6	97 per cent.
45 Years	1308 15 0	1448 2 2	111 per cent.

The Public Usefulness

of the SCOTTISH WIDOWS' FUND may be inferred from the magnitude of the sums it has paid, and is annually paying, to the families and representatives of deceased Policyholders. Thus :—

The Claims paid exceed £5,000,000

while in 1864 alone

The Claims paid amounted to . . £327,419

Lapsed Policies.

When the Premium is not paid within the thirty days of grace, and the Policy is not renewed within the further period of twelve months, a sum equal to the *full* Surrender Value is allowed.

Loans on Policies.

Loans (*not less than* £50) are granted on security of Policies to any amount covered by their 'Surrender Value.

Claims are paid in Full

in any part of the United Kingdom, *free of charge*, on the simple receipt of the parties entitled thereto in virtue of the Policy itself, or of Assignments, or under English, Irish, or Scotch Administration granted in their favour.

GENERAL SUMMARY.

The magnitude of the Society's Business, Funds, Revenues, and Profits; the scale on which all these are increasing; and the purely Mutual principle under which the Society's affairs are conducted for the sole benefit of the Assured, justify the expectation, that in the SCOTTISH WIDOWS' FUND every benefit of which the system of Life Assurance is capable will be realised.

The Pounds are the figures before the Decimal point.

The Shillings are found by doubling the first figure after the point and adding one Shilling if the second figure is 5 or above.

The Pence and Farthings. The second (*lessened by 5 if used for the Shillings*) and third figures may be reckoned farthings, which divided by four give the desired result.

First figure *after* the point	.8	× 2 =	16 0
Taking 5 from the second figure after the point	.05	=	1 0
Remaining figures reduced by .05	.0375	÷ 4 =	0 9

THE DUTY OF LIFE ASSURANCE.

"*To bring up a family in the lap of luxury, to accustom children to the comforts and indulgences of affluence, and then, in the otherwise sufficiently bitter day of a father's funeral, to leave them to find themselves dependants or beggars, appears to me to be* a crime against the community, and a cruelty to the children, *which I have no words strong enough to express.*"—DR. GUTHRIE.

THE INFLUENCE OF THE SCOTTISH WIDOWS' FUND.

"*This Society is the greatest Mutual Insurance Association in the world; and* its influence in Society has become so great, that, like the Bank of England, it determines to a great extent by its single voice the rate of interest to be paid on landed securities in Scotland."—SIR ARCHIBALD ALISON.

ADVICE TO POLICYHOLDERS OF THE SCOTTISH WIDOWS' FUND.

"*I do not presume to ask you to act as solicitors for this Society. But I do presume to recommend you to urge all your uninsured friends to leave a position generally so full of risk. You may recommend them further to take the best office they can find; and,* if they find a better than this, I can only say that they must be miraculously fortunate."—LORD COCKBURN.

GUTCH'S

Literary and Scientific

REGISTER & ALMANACK,

FOR

THE YEAR 1867.

ADDRESS.

THE present volume of GUTCH'S LITERARY AND SCIENTIFIC REGISTER AND ALMANACK for 1867, the 26th year of publication, will, it is hoped, be found inferior to none of its predecessors. No pains have been spared to keep the different branches of information treated on *au courant* with our present knowledge, and several improvements have been made throughout the Volume.

This year, as on former occasions, we have to thank many kind *collaborateurs*, and we gladly take this opportunity of doing so. Only by hints given by the cultivators of each separate branch of knowledge can a book of the present size be rendered worthy even of perusal. The field of modern science is so large, and "Gutch" is so small, that the rejection of facts becomes the Editor's chief difficulty. May all, therefore, who are disappointed with the information afforded think of this, and console themselves with the fact that, after all, it is somewhat difficult to write an inventory of the Kosmos in some 300 poor pages.

POSTSCRIPT, Oct. 26th, 1866.

The greater part of the present volume, including the chapter on Astronomy, was already printed before the contents of the following paragraph had been publicly made known:—

NEW PLANET.—At the last meeting of the French Academy of Sciences, an announcement of the discovery of a new telescopic planet was received from M. Luther. It has been named Antiope, and is the ninetieth of the series. The positions observed at Bilk on the 1st inst. were:—Mean time, 11 h. 49 min. 24·8 secs. R.A., 0 h. 9 mins. 28·05 secs. South Declin.—2 deg. 31 min. 16·6 secs. Diurnal motion in R.A., retrograde, 44 secs.; in S. Declin.—4·2 min. The same planet has also been observed at Berlin.

All emendations or suggestions, addressed to "The Editor, Gutch's Literary and Scientific Register," 37, Bell Yard, Temple Bar, London, W.C., will be duly attended to.

OPINIONS OF THE PRESS.

"The whole of the matter has been carefully revised and former errors corrected. It contains, in addition to the other things set forth in the Almanack itself, a mass of scientific and literary intelligence, condensed and made intelligible to all capacities, besides a numerous collection of tables on almost all subjects connected with the constant avocations and requirements of life, and is an excellent referee for all classes."—*The Times.*

"Carefully revised, corrected, and enriched from year to year with new matter, this excellent little annual continues in 1866 to be worthy of the high reputation which it has enjoyed for a quarter of a century. In a literary, as well as in a mechanical point of view, it is a marvel of fulness and handy compactness. Within a very small space it contains a cyclopædia of facts and figures pertaining to subjects of daily interest; also a useful almanack. Among readers and writers there are few, whatever be the extent of their learning or the tenacity of their memory, who might not find it for their advantage to have such a prompter always at hand."—*Daily Telegraph.*

"Mr. Gutch's 'Literary and Scientific Register,' we may inform those who know it not, is a mine of information on subjects within its scope."—*Athenæum.*

"We advise our readers by all means to procure this little book, which may be carried in the waistcoat pocket. We know no better investment for 3s. 6d. It contains a vast fund of useful information. The author is a very successful photographer, and the chapter on photography contains some useful hints."—*Sutton's Photographic Notes.*

"The principal additions to this Annual Register are the articles on Astronomy, Physiology, and Photography, which are much improved."—*The Pharmaceutical Journal.*

"Of all neatly got up almanacks, and handy annual vademecums, this is by far the neatest, handiest, and most complete. We would earnestly recommend those of our readers to whom Mr. Gutch's Almanack is still a stranger to take a look at it the first time they go to their bookseller, when they will thank us for having made them acquainted with a little yearly pocket companion the like of which, as regards compactness, neatness, and usefulness, we do believe is not to be found. The amount of information contained in this Register and Almanack is really astonishing; for not only does it contain the usual astronomical observations, but, besides, there are two hundred and seventy-four pages of information on every conceivable subject, so as to deserve the name of a complete pocket Encyclopædia. Every space is occupied with something useful, and so is the outside of the cover, where there is printed in gold a comparative scale of English inches and French decimeters."—*Bristol Times.*

Probable Origin of Almanacks.

—o—

The etymology of the word *Almanack* has been, perhaps, the subject of more dispute than that of any term admitted into our language. With the single exception of Verstegan, all our lexicographers derive the first syllable *al* from the article definite of the Arabic, which signifies *the;* but the roots of the remaining syllables are variously accounted for, some taking it from the Greek μανακος, a lunary circle; others from the Hebrew *manach*, to count; Johnson takes it from the Greek μην, a month; but why the first syllable should be in one language, which these authorities agree in, and the two last in any other language, is not easy to comprehend. Whether, therefore, the Saxons originally took their term from the Arabic, either wholly or in part, Verstegan seems the most to be relied on: "They," he says, alluding to our ancient Saxon ancestors, "used to engrave upon certaine squared sticks, about a foot in length, or shorter or longer as they pleased, the courses of the moones of the whole yeere, whereby they could alwaies certainely tell when the new moones, full moones, and changes should happen, as also their festival daies; and such a carved stick they called an *al-mon-aght*, that is to say, al-mon-heed, to wit, the regard or observation of all the moones, and here hence is derived the name of almanack." An instrument of this kind, of a very ancient date, is to be seen in St. John's College at Cambridge, and there are still in the midland counties several remains of them. Almanacks became general shortly after the invention of printing. The earliest English ones were printed in Holland in small folio sheets. Letters patent were granted to the two Universities and Stationers' Company in the reign of James I., for an exclusive right of printing almanacks; these, in 1775, were declared illegal.

There does not appear to be any trace of the original inventors of almanacks. The first in print is admitted to be that of John Muller, of Montenegro, better known by the name of Regiomontanus, published at Nuremberg, 1472. The first recorded account in this country of an almanack is in the *Year Book* of Henry VII.

Brief Directions to Executors.

Having caused the Property to be described and valued, take the Inventory with the Will, to your Proctor (this should not exceed six months after decease of Testator). In due course the Will is deposited in the Registry of the Ecclesiastical Court, and a copy (the Probate) delivered to you, with Certificate of it having been proved. You may then collect the Debts and satisfy all Demands upon the Estate; the latter in conformity with the following order, which shews the precedence required by law:—

1, Funeral, Testamentary, and all other expenses incurred in the due execution of the Will.—2. Debts due to the Crown on record or specialty.—3, Debts which by particular statutes are given precedence over others, as Poor-rates and the like.—4. Mortgages, Judgments, Decrees of Chancery, &c.—5, Special Contracts, as Leases, Bonds, and the like.—6, Bills of Exchange and so forth.—7. Book Debts.—8, and last, (usually about twelve months after decease, as the Executor is liable to the claims of all Creditors, who seldom fail to declare themselves before that time) the Legacies; first deducting the amount of duty thereon, (which must be paid to Government within 21 days), and taking a receipt provided for that purpose by the Stamp Office. Great care should be taken not to pay them to parties unqualified to give a proper discharge, a Minor for example, or a Married Woman; in the latter case, the joint receipt of Herself and Husband must be taken, unless the legacy is left for her separate and especial use.

The Weather.

RULES FOR PRESAGING THE WEATHER BY THE BAROMETER OR WEATHER GLASS.

1. The Barometer is highest during a long frost, and generally rises with a N.E. wind. It is lowest during a thaw after a long frost, and is often brought down by a S.W. wind.

2. When the Barometer is near its greatest height for the season, there is little probability of immediate rain.

3. When the Barometer is low *for the season*, there is seldom a great weight of rain, though a fair day is rare. At such times short, heavy, and sudden showers, with squalls of wind from the S.W., W., or N.W. prevail

4. In Summer, after a continuance of fair weather, with the Barometer high, it mostly falls gradually, and for a few days before there is much appearance of rain. If the fall be sudden and great, it will probably be followed by thunder.

5. When the sky appears very promising for fair, and the barometer is at the same time low, it may be relied upon that the appearances will not continue long.

6. Very dark clouds, when the barometer is high, pass over without rain but when low, it sometimes rains when clouds are scarcely visible.

HARWOOD'S METALLIC MEMORANDUM BOOKS,

Of Prepared Paper with Metallic Pencils.

MANUFACTURED BY A. COWAN & SONS.

These highly distinguished Books may be had in almost every form for the pocket, and adapted for a variety of purposes independently of their use for Order and Betting Books, for which they are so well known; they will be found very desirable, ruled with money columns for Pocket Ledgers, Cash Memorandums, Collecting Books, &c., as they preserve a permanency as durable as ink Also especially useful, ruled to pattern (with printed headings, if required) for surveying and taking levels, &c. for railroads, as they may be used even in wet weather and retain the same legibility; they possess important advantages for reporting or taking notes of any kind, as they admit of the greatest freedom and rapidity in writing, and preserve the most faithful accuracy and perspicuity without any impediment whatever to their use.

"Invaluable to all Persons engaged in Commercial or other important pursuits, where *rapidity*, CLEARNESS, and INDELIBILITY of writing are of the utmost consequence."

The great celebrity obtained by these books has called forth a number of spurious *Imitations*, which in many cases have been sold to the Public as HARWOOD'S BOOKS. Until the deception is discovered, the fraud is calculated to injure the genuine article, and produce serious disappointment to the purchaser.

A. COWAN AND SONS beg to inform the Public that no book is genuine without the *Signature*, "J. HARWOOD," inside the cover.

It must contain no enclosure, and it must have no writing or mark upon it, or upon the cover, except the name and address of the person to whom it is sent, the printed title of the publication, and the printed name of the publisher or vendor who sends it.

Newspapers sent abroad are liable to the same regulations as Newspapers passing between different parts of the United Kingdom, except that, before going abroad, the name of the Newspaper must have been registered at the General Post Office, and that, instead of requiring an impressed stamp, each Newspaper, if sent to a British Colony, is liable to a postage of 1*d.*, which must be pre-paid in stamps together with the postage for its conveyance.

BOOKS, ETC., FOR THE COLONIES.

Book Packets and Printed Papers of every kind, not exceeding 24 inches in length, or 12 inches in width or depth, can be sent to or from most of the Colonies, at the following

" more than 4 oz. but not above 8 oz. ..	0	6
" " 8 oz. " 12 oz. ..	0	9

and 3*d.* extra for every additional ¼ lb. or fraction of a ¼ lb.

(1.) The rates of postage to India, Ceylon, China, Labuan, Borneo, South and Western Australia, New South Wales, Queensland, Victoria, Tasmania (Van Diemen's Land), and New Zealand, are *one third* higher than the rates to the other Colonies.

(2.) No book packet weighing more than 5 lbs. can be sent to India, or above 3 lbs. to Queensland, or New South Wales.

(3.) The postage must be paid in full by stamps, and the other regulations are also similar to those given above for the Home book post.

POSTAL DISTRICTS, ETC.

London and its environs are divided into Nine Postal Districts. The following are the names of the Districts, with their abbreviations, viz.:—

Northern.....	N.	Eastern.....	E.
North Eastern	N.E.	East Central	E.C.
North Western	N.W.	Western	W.
South Eastern	S.E.	West Central	W.C.
South Western	S.W.		

By adding the Initials of the Postal Districts to the addresses of letters for London and its neighbourhood, the public will much facilitate the arrangements of the Post Office.

The portion of each District within about 3 miles of the General Post Office is called the Town Delivery, and the remainder the Suburban Delivery.

Within the Town limits there are twelve deliveries of Letters daily:—The *First*, or General Post delivery, including all Inland, Colonial, and Foreign letters arriving in sufficient time, commences about 7.30 A.M.; the second about 9 A.M., and the next nine deliveries are made hourly. The last delivery commences about 7.45 P.M. Each delivery within the Town limits occupies about an hour from the time of its commencement. There are seven despatches daily to the Suburban districts.

REGISTRATION.

Any letter, newspaper, book, or packet, on which the postage has been pre-paid in stamps, can be registered to any place in the United Kingdom or the British Colonies, by the pre-payment of a fee of 4*d.* This does not guarantee the safe delivery of the letter, but makes its safe transmission

more secure, by rendering it practicable to trace it, when Inland, from the receipt to its delivery; and when Foreign or Colonial, if not to its delivery, at least to the port of despatch.

Postage of Registered letters must be pre-paid, and by *stamps*, if the letters be inland. Registration of inland letters, containing coin, is compulsory.

A registered letter must be posted half an hour before the closing of the box for the Mail by which it is to be despatched.

Brief Directions to Executors.

Having caused the Property to be described and valued, take the Inventory with the Will, to your Proctor (this should not exceed six months after decease of Testator). In due course the Will is deposited in the Registry of the Ecclesiastical Court, and a copy (the Probate) delivered to you, with Certificate of it having been proved. You may then collect the Debts and satisfy all Demands upon the Estate; the latter in conformity with the following order, which shews the precedence required by law:—

1, Funeral, Testamentary, and all other expenses incurred in the due execution of the Will.—2, Debts due to the Crown on record or specialty.—3, Debts which by particular statutes are given precedence over others, as Poor-rates and the like.—4, Mortgages, Judgments, Decrees of Chancery, &c.—5, Special Contracts, as Leases, Bonds, and the like.—6, Bills of Exchange and so forth.—7, Book Debts.—8, and last, (usually about twelve months after decease, as the Executor is liable to the claims of all Creditors, who seldom fail to declare themselves before that time) the Legacies; first deducting the amount of duty thereon, (which must be paid to Government within 21 days), and taking a receipt provided for that purpose by the Stamp Office. Great care should be taken not to pay them to parties unqualified to give a proper discharge, a Minor for example, or a Married Woman; in the latter case, the joint receipt of Herself and Husband must be taken, unless the legacy is left for her separate and especial use.

The Weather.

RULES FOR PRESAGING THE WEATHER BY THE BAROMETER OR WEATHER GLASS.

1. The Barometer is highest during a long frost, and generally rises with a N.E. wind. It is lowest during a thaw after a long frost, and is often brought down by a S.W. wind.

2. When the Barometer is near its greatest height for the season, there is little probability of immediate rain.

3. When the Barometer is low *for the season*, there is seldom a great weight of rain, though a fair day is rare. At such times short, heavy, and sudden showers, with squalls of wind from the S.W., W., or N.W. prevail.

4. In Summer, after a continuance of fair weather, with the Barometer high, it mostly falls gradually, and for a few days before there is much appearance of rain. If the fall be sudden and great, it will probably be followed by thunder.

5. When the sky appears very promising for fair, and the barometer is at the same time low, it may be relied upon that the appearances will not continue long.

6. Very dark clouds, when the barometer is high, pass over without rain but when low, it sometimes rains when clouds are scarcely visible.

Of Prepared Paper with Metallic Pencils.

MANUFACTURED BY A. COWAN & SONS.

These highly distinguished Books may be had in almost every form for the pocket, and adapted for a variety of purposes independently of their use for Order and Betting Books, for which they are so well known; they will be found very desirable, ruled with money columns for Pocket Ledgers, Cash Memorandums, Collecting Books, &c., as they preserve a permanency as durable as ink. Also especially useful, ruled to pattern (with printed headings if required), for surveying and taking levels, &c. for railroads, as they may be used even in wet weather and retain the same legibility; they possess important advantages for reporting or taking notes of any kind, as they admit of the greatest freedom and rapidity in writing, and preserve the most faithful accuracy and perspicuity without any impediment whatever to their use.

"Invaluable to all Persons engaged in Commercial or other important pursuits, where *rapidity*, CLEARNESS, and INDELIBILITY of writing are of the utmost consequence."

The great celebrity obtained by these books has called forth a number of spurious *Imitations*, which in many cases have been sold to the Public as HARWOOD'S BOOKS. Until the deception is discovered, the fraud is calculated to injure the genuine article, and produce serious disappointment to the purchaser.

ALEX. COWAN & SONS beg to inform the Public that no book is genuine without the *Signature* "J. HARWOOD," inside the cover.

POSTAL DISTRICTS, ETC.

London and its environs are divided into Nine Postal Districts. The following are the names of the Districts, with their abbreviations, viz.—

Northern.....	N.	Eastern.....	E.
North Eastern	N.E.	East Central	E.C.
North Western	N.W.	Western	W.
South Eastern	S.E.	West Central	W.C.
South Western	S.W.		

By adding the Initials of the Postal Districts to the addresses of letters for London and its neighbourhood, the public will much facilitate the arrangements of the Post Office.

The portion of each District within about 3 miles of the General Post Office is called the Town Delivery, and the remainder the Suburban Delivery.

Within the Town limits there are twelve deliveries of Letters daily:—The *First*, or General Post delivery, including all Inland, Colonial, and Foreign letters arriving in sufficient time, commences about 7.30 A.M.; the second about 9.45 A.M., and the next nine deliveries are made hourly. The last delivery commences about 7.45 P.M. Each delivery within the Town limits occupies about an hour from the time of its commencement. There are seven despatches daily to the Suburban districts.

REGISTRATION.

Any letter, newspaper, book, or packet, on which the postage has been pre-paid in stamps, can be registered to any place in the United Kingdom or the British Colonies, by the pre-payment of a fee of 4*d.* This does not guarantee the safe delivery of the letter, but makes its safe transmission

more secure, by rendering it practicable to trace it, when Inland, from the receipt to its delivery; and when Foreign or Colonial, if not to its delivery, at least to the port of despatch.

Postage of Registered letters must be pre-paid, and by *stamps*, if the letters be inland. Registration of inland letters, containing coin, is compulsory.

A registered letter must be posted half an hour before the closing of the box for the Mail by which it is to be despatched.

Brief Directions to Executors.

Having caused the Property to be described and valued, take the Inventory with the Will, to your Proctor (this should not exceed six months after decease of Testator). In due course the Will is deposited in the Registry of the Ecclesiastical Court, and a copy (the Probate) delivered to you, with Certificate of it having been proved. You may then collect the Debts and satisfy all Demands upon the Estate; the latter in conformity with the following order, which shews the precedence required by law:—

1, Funeral, Testamentary, and all other expenses incurred in the due execution of the Will.—2. Debts due to the Crown on record or specialty.—3, Debts which by particular statutes are given precedence over others, as Poor-rates and the like.—4, Mortgages, Judgments, Decrees of Chancery, &c.—5, Special Contracts, as Leases, Bonds, and the like.—6, Bills of Exchange and so forth.—7. Book Debts.—8, and last, (usually about twelve months after decease, as the Executor is liable to the claims of all Creditors, who seldom fail to declare themselves before that time) the Legacies; first deducting the amount of duty thereon, (which must be paid to Government within 21 days), and taking a receipt provided for that purpose by the Stamp Office. Great care should be taken not to pay them to parties unqualified to give a proper discharge, a Minor for example, or a Married Woman; in the latter case, the joint receipt of Herself and Husband must be taken, unless the legacy is left for her separate and especial use.

The Weather.

RULES FOR PRESAGING THE WEATHER BY THE BAROMETER OR WEATHER GLASS.

1. The Barometer is highest during a long frost, and generally rises with a N.E. wind. It is lowest during a thaw after a long frost, and is often brought down by a S.W. wind.

2. When the Barometer is near its greatest height for the season, there is little probability of immediate rain.

3. When the Barometer is low *for the season*, there is seldom a great weight of rain, though a fair day is rare. At such times short, heavy, and sudden showers, with squalls of wind from the S.W., W., or N.W. prevail

4. In Summer, after a continuance of fair weather, with the Barometer high, it mostly falls gradually, and for a few days before there is much appearance of rain. If the fall be sudden and great, it will probably be followed by thunder.

5. When the sky appears very promising for fair, and the barometer is at the same time low, it may be relied upon that the appearances will not continue long.

6. Very dark clouds, when the barometer is high, pass over without rain but when low, it sometimes rains when clouds are scarcely visible.

HARWOOD'S

METALLIC MEMORANDUM BOOKS

Of Prepared Paper with Metallic Pencils.

MANUFACTURED BY ALEX. COWAN & SONS.

These highly distinguished Books may be had in almost every form for the pocket, and adapted for a variety of purposes independently of their use for Order and Betting Books, for which they are so well known; they will be found very desirable, ruled with money columns for Pocket Ledgers, Cash Memorandums, Collecting Books, &c., as they preserve a permanency as durable as ink. Also especially useful, ruled to pattern (with printed headings if required), for surveying and taking levels, &c. for railroads, as they may be used even in wet weather and retain the same legibility; they possess important advantages for reporting or taking notes of any kind, as they admit of the greatest freedom and rapidity in writing, and preserve the most faithful accuracy and perspicuity without any impediment whatever to their use.

"Invaluable to all Persons engaged in Commercial or other important pursuits, where *rapidity*, CLEARNESS, and INDELIBILITY of writing are of the utmost consequence."

The great celebrity obtained by these books has called forth a number of spurious *Imitations*, which in many cases have been sold to the Public as HARWOOD'S BOOKS. Until the deception is discovered, the fraud is calculated to injure the genuine article, and produce serious disappointment to the purchaser.

ALEX. COWAN & SONS beg to inform the Public that no book is genuine without the *Signature* "J. HARWOOD," inside the cover.

Newspapers, Books, and Patterns.

Any publication coming within the following description shall, for the purposes of this Act, be deemed a newspaper (that is to say), any publication consisting wholly or in great part of political or other news, or of articles relating thereto, or to other current topics, with or without advertisements, subject to these conditions—That it shall be printed and published in the United Kingdom; that it shall be published in numbers at intervals of not more than seven days; that it be printed on a sheet or sheets unstitched; that it have the title and date of publication printed at the top of every page. And the following shall, for the purposes of this Act, be deemed a supplement to a newspaper,—that is to say, a publication consisting wholly or in great part of matter like that of a newspaper, or of advertisements, printed on a sheet or sheets, or a piece or pieces of paper, unstitched, with a leaf or leaves of the same form and size as the leaf or leaves of the newspaper to which it is a supplement, and published with the newspaper, and having the title and date of the publication of the newspaper printed at the top of every page. The proprietor or printer of any newspaper within the description aforesaid may register it at the General Post Office in London, at such time in each year and in such form and with such particulars as the Postmaster-General from time to time directs, paying on each registration such fee, not exceeding 5s., as the Postmaster-General, with the approval of the Treasury, from time to time directs. Money Orders.

Money Orders for sums not exceeding £10 are granted by every post-town upon every other post-town in the United Kingdom; and also by and upon certain offices in the Metropolis; the commission is—

On sums not exceeding	... £2	... 3*d.*
Above £2 and not exceeding	5	... 6*d.*
,, 5 ,, ,,	7	... 9*d.*
,, 7 ,, ,,	10	... 1*s.*

Money Orders are recommended for small sums; but if neither that nor registration be adopted, all bills, notes, &c., should be cut in halves, and sent by different posts; the numbers, dates, &c., being carefully taken.

A Money Order granted upon *London*, without specifying any particular office, can only be paid at the Chief Office, St. Martin's-le-Grand. If personal attendance is inconvenient, payment may be obtained by receipting the Order, and giving the bearer information as to the Christian name, surname, and occupation of the remitter.

Any Money Order presented through a bank will be paid without the remitter's name and payee's signature in full, provided the bank be situated in the town on which the Money Order is drawn, that the Order be crossed with the banker's name, and that the party applying at the Money Order Office be known there as in the employment of the bank. In all such cases the liability of the Post Office will, however, terminate with payment of the Order so presented.

Payment of an Order must be obtained before the end of the second calendar month after that in which it was issued (*i.e.*, if issued in January, must be paid before the end of March) or a new Order will be necessary, and a second commission charged. If the Order be not paid within twelve calendar months after it is issued all claim to the money will be lost.

Money Orders are also issued between the United Kingdom, and Belgium and Switzerland, at the same rates, &c., as Inland Orders.

Money Orders are issued at all Money Order Offices in the United Kingdom on certain Money Order Offices in Canada, the Australian Colonies, New Zealand, Cape of Good Hope, Natal, British Guiana, Honduras, Newfoundland, Nova Scotia, Prince Edward Island, New Brunswick, Falkland Islands, West Indies, St. Helena, and West Coast of Africa, at a commission four-fold the commission on Inland Orders; and on Alexandria, Bahia, Buenos Ayres, Constantinople, Gibraltar, Malta, Suez, Hong Kong, Shanghai, Yokohama, Monte Video, Pernambuco, and Rio Janiero, at a charge three-fold the commission on Inland Orders.

This Act, which applies to all establishments (no matter how small) in the United Kingdom, directs,—

1st. That no child under the age of 8 years shall be employed in any handicraft.

2nd. That no child (of 8 and under 13) shall be employed for more than 6½ hours a day, between 6 in the morning and 8 at night.

3rd. That no young person (of 13 and under 18) or woman (of 18 and upwards) shall be employed for more than 12 hours in a day, between 5 in the morning and 9 at night, allowing 1½ hours for meals.

4th. That no child, young person, or woman, shall be employed on *Sunday*, or after 2 o'clock on *Saturday* afternoon, except in cases where not more than *five* persons are employed in making articles to be sold *Retail* on the *Premises*, or in repairing similar articles to those sold retail.

The Penalties for infringing the Act are, not exceeding £3 to be levied on the occupier of the workshop, and not exceeding Twenty Shillings on the Parent or Guardian of the person employed.

In all workshops where grinding or glazing, or dust of any kind is generated, a Fan must be provided, under a penalty of £3 to £10.

The carrying out of the provisions of the Act is invested in the local authorities, and any person refusing admission to the Officer appointed by them to inspect a workshop, will incur a penalty not exceeding £20. Inspectors and Sub-Inspectors of Factories are also empowered to enter workshops, under a penalty not exceeding £20 for refusal.

The penalties can be recovered summarily, and a portion applied to the compensation of the person giving the information.

Every person employing a child above 8 and under 13 years, must see that he or she attends School at least 10 hours every week, or will be subjected to a penalty of not exceeding £3, and the Parent to a penalty not exceeding Twenty Shillings.

There are some temporary exceptions and special references, for which the reader is referred to the Act itself.

Notice.—The Act applies to any of the persons mentioned above who may be occupied in any Handicraft, *whether for wages or not*, under a Master or under a Parent; and the word "Workshop" means *any room or place*, whether in the open air or under cover.

DIRECTIONS FOR MAKING A WILL.

A Will cannot be made in language too simple or concise; must be *written with Ink*, on Paper or Parchment, and, if contained on one sheet, must be signed at the end by the Testator, in the presence of two or more Witnesses; and if written on more than one sheet, the Testator and the Witnesses had better sign each sheet.

The Witnesses must rigidly comply with every particular required by the Attestation Clause, at the end of which clause they must sign their names.

The signature of the Testator must be acknowledged by him in the presence of the Witnesses; and in order that this be properly done, he must (after having signed the Will) take it in his hand and say, "I acknowledge this to be my last Will and Testament, and request you to witness it."
