EARL. REV. WILLIAM, TYNEMOUTH

1905

Tynemouth.

April 6. 1905

Mr H S Wellcome

My dear Sir

Extract in  
Cuttings Book  
BT

You were good enough to  
send me a circular asking for  
co-operation in your forthcoming  
Exhibition. Unfortunately I have  
nothing that is suitable. But  
I might mention what I was  
told in the Rhonda valley  
in 1876 - 1877. There was a man  
living at Porty-pudd who was

but the paper on "Poison and  
their Antidotes." In my writing  
advice is sometimes asked for  
and I value the compact form  
in which it is given. I wanted  
to ask if I could buy a copy of  
the last edition of the Essay

I remain

Yours very truly

William Earl

Wesleyan Minister

Sydney

considered the last of the Series

A case of Small Pox occurred  
in the valley and the patient was  
treated by him. He advised  
them to wrap the patient from  
head to heel in a Bread  
poultice. How long the poultice  
remained on I cannot say but  
when it was taken off I was  
told it was alive with worms.

I have never met with any  
thing in my reading to throw

light on this and when your cir-  
cular reached me though it may  
be worth nothing at all I  
thought it might be mentioned

One thing I have wanted to  
ask. A year or two since the  
Widow ~~of~~ <sup>18 APR 1908</sup> herself gave me a  
copy of your 'Lennards' diary  
which I have found very useful  
and indeed every I get now  
only for the present information
