Stool 2 today very
watery Temp 85°

R. Sant. Int. Dr. Dr.
H. Riani.

Mr. B. Vignio. 86.

married 34. years of age.
The monthly period
ceased only 4 months
ago. Before that she
had discharge of blood
& water for 2 years.
Before that regular.
She is now getting
thinner no appetite
very weak. Pain in
the right & left abdomen
occasionally. The last
time she had pain was
on the 21st July. Pain
went all round bowels
desire to go to stool
but no stool. no blood
with motion much
constipation. Urine all
night.

Examined fund tumor
occupying middle line

moveable but not
fully. Ends level of
umbilicus. Nipple Cadifor
falls heavy & solid but
there is obscure fluctuation.

Exam: per vagina
The vulva swollen &
colder & rather narrow.
The os is closed down &
the tumour uterine
more together. The
uterine round mass
readily upheaved &
to the left.

Diagnosis: Fibroid, ^{cystic attached} & periton
walled uterus

N.W. adis. Complicated lately

afterwards had delirium
for two days. When he recovered
he went out to work he got
a relapse of ~~the~~ getting cold
in the kidneys. He was
muddy. He had to stay
in bed 7 days. Ever since
he has felt about his work
but he believes that in the
end he will be as good
as ever.

Never had chills. but had
cough. He used to drink stout
milk. Doctor never warned
him against drink.

Before he had measles he
could drink as much as
he pleased for 5 years
been every night when
he was about 20 & 21.

Now he cannot drink
his tea and next morning
eye right. if he reads long
times runs in to each other.

Commencing after
measles
not improved by
glasses.
