CASE BOOK.
ORDER REVISED, 1874.

8 & 9 Vict. c. 100, s. 60.

THE COMMISSIONERS IN LUNACY, by virtue of the power vested in them by the Act of Parliament passed in the Session holden in the 8th and 9th years of the reign of Her present Majesty, intituled "An Act for the Regulation of the Care and Treatment of Lunatics," do hereby ORDER AND DIRECT:

—That the Medical "CASE BOOK," by the said Act directed to be kept in every Licensed House and Hospital, shall be kept in the Form hereinafter mentioned, viz.:

First—A statement to be entered of the name, age, sex, and previous occupation of the Patient, and whether married, single, or widowed.

Secondly—An accurate description to be given of the external appearance of the Patient upon admission:—of the habit of body, and temperament,—appearance of eyes, expression of countenance, and any peculiarity in form of head;—physical state of the vascular and respiratory organs, and of the abdominal viscera, and their respective functions;—state of the pulse, tongue, skin, &c.;—and the presence or absence, on admission, of bruises or other injuries to be noted.

Thirdly—A description to be given of the phenomena of mental disorder:—the manner and period of the attack—with a minute account of the symptoms, and the changes produced in the Patient's temper or disposition; specifying whether the malady displays itself by any, and what illusions, or irrational conduct, or morbid or dangerous habits or propensities;—whether it has occasioned any failure of memory or understanding;—or is connected with epilepsy, or ordinary paralysis, or symptoms of general paralysis, such as tremulous movements of the tongue, defect of articulation, or weakness or unsteadiness of gait.

Fourthly—Every particular to be entered which can be obtained respecting the previous history of the Patient:—what are believed to have been the predisposing and exciting causes of the attack;—what the previous habits, active or sedentary, temperate or otherwise;—Whether the Patient has experienced any former attacks, and, if so, at what periods;—Whether any Relatives have been subject to Insanity;—and whether the present attack has been preceded by any premonitory symptoms, such as restlessness, unusual elevation or depression of spirits, or any remarkable deviation from ordinary habits and conduct;—and whether the Patient has undergone any, and what, previous treatment, or has been subjected to personal restraint.

Fifthly—During the first month after admission, entries to be made at least once in every week, and oftener where the nature of the case requires it. Afterwards, in recent or curable cases, entries to be made at least once in every month; and in chronic cases, subject to little variation, once in every three months.

In all cases an accurate record to be kept of the medicines administered, and other remedies employed, with the results, and also of all injuries and accidents.

—That the several particulars, hereinbefore required to be recorded, be set forth in a manner so clear and distinct as to admit of being easily referred to, and extracted, whenever the Commissioners shall so require;

AND THAT the present order be in substitution for those of January 9th, 1846, and of March 20th, 1863, and that a copy hereof be inserted at the commencement of the Case Book.

Dated this 16th day of March, One Thousand Eight Hundred and Seventy-four.

Mark Paglor. 32. ad.

Single, Bank Clerk, Ch. of Eng. - London.

Family History - no hereditary taint of insanity,
or intemperance - No phthisis

Previous History - hard working & industrious
had the care of his family left orphaned
by death of both parents
has been studious - fond of debating -
led a very regular life

History of Present attack. On the 25th March
1888 he had an attack of acute mania
the supposed cause of which is not quite
clear - though a practical joke is stated
to be the probable cause. This attack
lasted a few days only, but was very
severe while it lasted - Since then he
has been more or less weak-minded
with delusions. -

On admissions - Restless - wandering about
in an aimless way, unable to settle
down to anything - Says people look
on him as having committed a murder -
but cannot say anything definite as
to who his accusers are - nor when or
where the murder was committed.

W Hardy - artist 57.

No heredity - married

separation in the morning

3 weeks ago was dirty in
habits

lost nerve - pain along 2

bladder and retention -

Within last two years

his work has fallen off

as an artist. Has been

V.B. at Brillens - 10 occasions

10 years ago. Since then on

3 occasions - has been dull

& depressed - but is not

born June 2nd 91. Late residence Dulwich. Ht. 5 ft 8 in.

Family History

Previous History: Has led rather a loose life for some time past and gives history of having contracted Syphilis ten years ago, for which he has never been treated for any length of time.

Mental

Present Attack. States he has had home troubles with brother mother and servants causing him considerable worry and sleeplessness. Has had other family troubles that he does not care to tell. Does not sleep soundly, dreams a good deal and describes peculiar sensations ^{shivering} that occasionally wake him up at night. Says he thinks his limbs are malformed. Somewhat Hypochondriacal.

Physical

Condition. Physical. Fairly well nourished, stooped & rather sallow faced. Height 5 ft 7 in. Skin greasy. Pupils normal in reaction. Kneeflex normal. Eyes blue. Hair brown. Tongue silvery & cracked.

Nov. 11th 99. Mental Cont^d. He has been depressed for a few days & rather irritable. He says his previous acts of wickedness arise in his mind & make him feel very miserable. Says he has horrid dreams at night & that he is possessed of the devil, that he is going to die. Last night ^{in bed} he shouted at top of his voice & when asked this morning what was the cause he said he thought he was dying & it was the terrible "fear of hell" that frightened him. His bowels are very irregular & has been ordered 2 pills. He has a small patch of tinea on the left side of forehead which has been treated by painting with starch of iodine. It seems to have had effect as the patch is lessening. He has been previously (since admission) going on very satisfactorily up till the above date when increased depression set in. He has a short nail on Right Thumb which seems retarded in its forward growth & is hence accumulating & becoming thickened about the centre of the matrix. He had a blow from a cricket ball on it ^{the old nail, which} which has bruised ~~the finger~~ ^{it} ~~and which~~ ^{it} was afterwards loosened & removed, hence the present condition. Has taken his food very well up till the present date. J. J. M. Hothick. Secured a little quieter last evening but became very sleepless & restless during the "one" hour beyond the hour, attempted to throw himself down the stairs

Nov. 12th

head first + also to swallow a piece of wire about
 1/8 in thick & 3 inches long. J.A. McKittrick.

13th Nov. 91. Today he was certified as suffering from Acute Mania
 with suicidal tendency by H^{rs} Philipps & Little &
 transferred to ^{Peckham} Lambrook House. J.A. McKittrick.

//

Un. 1st Oct. 91 Booth Arthur Goodman aet. 24, admitted 1st October 91, a student at Cambridge; Single, his religious persuasion being Church of England. He formerly resided at 47 Sheep St. Northampton.

Fam. Hist. He had a male cousin, aged 50, who suffered from mental depression. His sister also suffered from depression and religious delusions. No history of Alcoholism or intemperance.

Pres. Hist. He was always a quiet boy of a retiring disposition. He was a student at Cambridge for 3 years. One day in his student life he had a bad fall bruising the back of his head. He was insensible for some time after it, he became depressed & incapable of studying & was sent by Dr. Savage to the Continent for a rest. He came home & went to Cambridge for 3 mos. again but found it difficult to study. He became more weakened & depressed & was sent to Murray's Asylum Perth.

Pres. Attack It is the first attack & has lasted for nearly 2 years. He became worse last November & was sent to Perth Asylum & was released & transferred here on 1st Oct. Causation being vicious habits.

On Admission A. Physical. He is of medium height & good build. Has dark hair & moustache. Of a retiring & bashful disposition. His hands tremble when spoken to & he seems nervously excited. Pupils somewhat dilated, react normally. Knee jerks present & slightly exaggerated. No physical signs of disease in thoracic or abdominal organs.

B. Mental. He suffers from mental depression, & is weakened. He states that when travelling one day with his mother in the train he suddenly became weakened & had a great difficulty in thinking & understanding the conversation. He is incapable of mental exercise or mental application. He has sometimes difficulty in understanding the simplest questions. ^{rather} He has been ~~very~~ irritable & excitable tending to strike the other Leeds & some of the attendants. He grins most of the time while at the dining table. He has occasionally been shouting out in the night. Walks about the airing court quickly singing & laughing to himself & making various facial contortions. No delusions of any kind to be detected. Plays football regularly & takes his good well. F.M. Huthrie.

Nov. 18th Has been rather abusive lately & had to be blistered B in order to put a stop to it. F.M. Huthrie.

Dec. 2nd Walks about talking & smiling to himself. Takes no interest in anything nor does he occupy himself in anyway. F.M. Huthrie.

Dec 19th 92 To-day he was certified by the order of the Commissioners during their last visit. F.M. Huthrie.

//

Brandram Henry Mackay admitted 7th Oct. 91.
 Age 38. Whitehead manufacturer, widower, one child.
 His religion is Church of England. This is his 2^d
 attack of any importance. The first occurred 2 years
 ago.

Fam. Hist. His history of insanity. His Father & Mother were both
 depressed; his mother being specially so nervous & hysterical.
 No history of alcoholism or Melancholia.

Pres. Hist. He has always been of a nervous disposition. He
 had an attack of mental depression 2 years
 ago. He remained at home most of the time.
 He has been in business as above mentioned & did work
 up till last March. His wife died in August 1890 of
 Bright's disease & this seems to have caused him
 a good deal of anxiety. He has often been in a dull down
 spirited condition. He lived with a D^r at Deal.

Pres. Attack. This is the 2^d attack of importance. It began in November
 last year the duration therefore being about 1 year. The supposed
 cause is domestic anxiety by the death of his wife along
 with neurotic predisposition. No evidence of suicidal tendency.

On Admission. A Physical. Height ordinary with dark brown hair.
 & Moustache. The face presents a bloated appearance being studded
 over with a few acne pustules. Dark brown eyes. Pupils normal.
 Vision normal. Complains of pain in Epigastrium.

result of Catarrhal condition (chronic), also complains
 of constipation. No signs of disease in any of the
 Thoracic Organs or abdominal Organs with the
 exception of the above.

B. Mental. He suffers from mental depression
 and appears rather nervous, restless & fidgety when
 anyone is conversing with him. He complains of
 mental inaptitude for any work, & has no desire
 for or interest in any trade or games. Says he feels
 he can't make up his mind to do anything, nor can
 he manage his clothes; Says he will be killed if he
 remains in a place like this. He has a tendency to be
 hypochondriacal & worries himself a deal about his
 health. F.D.D. McNeill

Nov 7th Still depressed. does not incline to associate
 with any of the Gentlemen. He constantly repeats
 "he has no clothes but is in a state of rage, while
 all the time he is wearing a very good suit. Still he
 won't take part in outdoor games. Acne pustules
 not so numerous. He is taking the annexed medicine.
 R^x. liq. arsenicalis ʒj 40. | on two or 3 occasions has
 Suet Lent. ʒiij. | had an aperient pill for
 aqua. ad. ʒviii. | his constipation. F.D.D. McNeill
 Sig. ʒp. b.i.d. statim
 ante cibum

Dec 7th Showing signs of improvement, continuing the

above medicine. The acne pustules are less. He is more inclined to converse than formerly & has a little brighter expression. Takes daily walks when weather permits. He is inclined to be hypochondriacal however, always complaining about his bowels not operating & asking for pills; does not take his food so well as might be that of. He sleeps very well however. J.H.M. Kitchin.

Feb. 8th 1893. Patient is at present at Brighton & seems enjoying & benefiting by the change. J.H.M. Kitchin.

19 Sep. 1893

Left to-day to visit Mr. R. T. Matheson & Mrs. Buchanan. 6 & 7 & 8 are good friends, but otherwise none. S. H. Kitchin.

Adm. 21st Oct. Morse Rev Denis admitted 21st October at 56
clergyman, Church of England, married, no
children, formerly resided at 16 Seafield Road
Brighton.

Fam. Hist. Has one brother & 3 sisters who are well. No history
of intemperance, insanity or Phthisis in family.
neither is there any evidence of epilepsy in family.

Pres Hist. The first seizure slightly of an epileptiform character
occurred when he was 25 years of age. They recurred at
intervals varying from once a month to once in
6 months & even only having one in 12 months.
He was put upon a course of Bromide & Chloral.
He says 20 grs of the former & 50 grs latter. This was
stopped & sometime after he had a course of Stychnine.
He says the Stychnine seems to do him more good than any
other medicine. The seizures were first much worse,
during the latter part of his life they have been less intense.

Pres Attack. The present ^{mental} condition began about a fortnight ago.
For 3 months previous to this he has been having the
seizures more frequent, but less severe, somewhere about
one every 3 weeks. Can give no cause for the condition.

On Admission A Physical a man of medium height, broadly
built with brownish ^{grey} hair & bald on the ^{upper} fore part of

the head. The skin of face somewhat wrinkled. Eyes
blue, pupils normally react readily to light and
accommodation. Patient says there is an abnormal quantity
of sugar passed in his urine, but an examination
has not yet been made of it. He says it is occasional.
No signs of funguses or of disease in any of the
abdominal or thoracic organs.

B. Mental. He is depressed & dull & complains of
lassitude, shunning conversation with any of the
other gentlemen, tho he talks to Med. Officer readily.
His memory is very poor at present especially
for recent events. Says he feels unfit to carry
on conversation. Each seizure lasts for about
36 hours during which he is unfit for anything.
He feels very sleepy during this time, says he passes the
greater part of the time in sleep. The seizures
recur usually in the morning from 5-8 A.M.
His special weakness is attraction for boys which ^{he} ~~causes~~ ^{causes} ~~bores~~ ^{bores} indirectly with him. ^{Dr. McNeill} ~~Dr. McNeill~~.

Nov. 18th 20-day he left for home improved by the course
of medicine he has had for the month, & expressing
himself highly benefited by the social evenings
& by the agreeable companions he associated with
(both ladies & gentlemen) during his month's stay.
The amended prescription is what he took. ^{he was entirely}
free from any other seizures while here. ^{Dr. McNeill} ~~Dr. McNeill~~.

23

Subject. Harding Rufus Harold Decimus.

Adm. 27th 64. admitted 27th Oct. 91. aet. 32. Architect. Single
Church of England, formerly residing at 39
St Ann's Street Salisbury, Wiltshire.

Fam. Hist. Father & mother both dead. Has 3 sisters well. No history
of Intemperance, insanity or Phthisis in family.

Prev. Hist. When a boy he was very delicate & has had every disease
nearly occurring in childhood. He says he never was able to
take animal food, ~~from~~ till he was 14 years of age, on account
of a severe attack of Gastric fever. He had an attack of
Bronchitis when 8 years old; measles at 9, severe Thrush (aphthae)
when 10. Scarletina at 14. Has more or less been subject to toothache
and Neuralgia since childhood. At 17 he began to take Whisky,
at first in small quantities & gradually increased till within 6 mo.
he was taking on an average 15-20 Brandin. Whiskeys each night & reg-
-ularly 2-3 bottles of Champagne each night; till it culminated in an attack
of delirium tremens 5 M^o ago when he afterwards became depressed
& thought life not worth living; & was even tempted to commit suicide
going so far as buying a knife for the purpose. He however recovered
from this attack but was not able for his duties mentally. He has
also been an excessive smoker since 17, having 12-15 Cigars a day
latterly. 16 months ago he had once bad attack of Influenza.
He had another slight attack ^{of influenza} 5 mo ago.

Pres. Attack. His present mental condition began 4 months
ago following upon an acute attack of delirium
tremens. He has also been a victim to excessive
self abuse since 14; the causation of his
present mental condition being intemperance and
self abuse.

In Admission. A. Physical. Very tall, brownish-red hair. Eyes
dark pupils slightly dilated & react readily to
accommodation. Complains of slight loss of taste
which he first noticed about 6 mo. ago. Says he has
occasional sharp pains over his right kidney, sim-
ilar to a knife being thrust in then taken out again.
His liver is slightly enlarged. He is also subject to haemorrhoids
which began about 2 years ago. They bleed occasionally.
He is rather thin and anaemic. Palellar reflexes
normal. Both testes are ^{small} thin and atrophied & there is
slight varicocele. Marked Dropsy on ^{slight} exertion.

B. Mental. Complains of inability for any con-
tinued mental exercise. Says he had to leave work
(an architect) twice within the last 2 years "of his in-
-ability to go on. He was off 6 M^o last year staying at
Bath. He suffers from depression & languor. When
he sits down to write a letter he often feels his
thoughts slip from his memory & writes a
somewhat disconnected letter. He does not sleep

well & during the midnight hours while awake he has
 "bawdy" & immoral thoughts arising in his mind & is
 often subject to impulses to commit self abuse. He
 had little control over them at first indeed was a
 constant victim; but latterly has been more able to
 restrain himself. He manifests a slight tendency to
 exaggeration & presents now & then exalted ideas. *J. M. Hathcock*

Nov. 27th: 91 Beyond complaining occasionally of slight depression
 during the past month, he has been going on satisfactorily
 occupying himself in drawing, & all kind of indoor
 amusements. Does not take part in outdoor ones however;
 he is afraid they are rather rough for him; want of manliness
 in that respect. He is taking his food well & sleeping better.
J. M. Hathcock

21st Oct: 92 Do. Key Patient left.

//

Thurnam Arthur William previously residing at
 adu. 8th Mch 90. 40 South Grove N. admitted 8th March 1890.
 Cent 22 Feb 95 act 45 Church of England. Single, Architect.

Fam. Hist. Father died of apoplexy, Mother, senile decay.
 Has 2 brothers both well.

Pres Hist. Says he has masturbated a good deal lately;
 but never in early years. Has led a life of solitude
 which led to his masturbating habits & depression.

Present Cond. Physical. Tall broad built man +
 20th Dec. 92. inclined to be stout, hair dark bad over
 front of forehead. Eyes brown pupils normal
 patellar reflexes normal. No evidence of disease
 in Thoracic or abdominal organs.

Mental. Lately he has been abusing himself very
 much, & is dull & depressed slightly, inclined
 to sit in the house all day not going out for a con-
 stitutional even when ordered to do so by M.O. He has
 also been very obstinate; when ordered to do anything
 by the attendants in the working gallery, having now +
 then been forced to come occasionally in contact
 with them. When in the gallery he became
 rather annoying to other gentlemen & was transferred
 to No 5. He was walking about the corridors

& apparently very restless, & smiling & talking to
 himself. He refuses to give reports any information
 about himself; but will talk readily about any other
 topic. He is dull & torpid. L. P. McKeith.

May 22:93 There is no improvement to report in patient's
 condition. He continues dull & listless & wanders
 about the grounds. He has been rather obstinate
 & destructive & in a fit of passion ^{naughty} tore up his
 coat. His physical health is good. J. P. McKeith.

Nov 17. It is listless & dull but willing to converse,
 he is in no 2 gallery & does not do
 anything all day, except play billiards
 when he has the opportunity. L. P. McKeith.

Transf. from lat. list
16th April 91.
Haire, Arthur J. McRae transferred from Retard
 list to Vol. Boarders on 16th April 91, age 22.
 Church England. Single formerly clerk in a mortgage
 office in Boston U.S.A.

Sam. Hist. Has one younger brother alive & well. His father,
 died 20 years ago from rupture of cardiac aneurism.
 He led a very intemperate life when on sea as an officer
 in the armed line. Mother still alive but weak &
 suffers from cardiac complaint. His father's sister
 was insane & died in an asylum during her 2nd att.
 He says at his father was also rather eccentric.

Pres. Hist. When at Boston as clerk he became insane & was
 certified & brought over to England again. During his voyage
 he was very depressed & became suicidal & tried to do
 away with himself on board. He was taken to Bethlem
 Hospital where he remained 3 months & then discharged
 recovered. He afterwards boarded with Dr. Bower of Ware
 Hertfordshire. He returned home where he became ill again
 was recertified & sent to St. Ann's Hall. He remained there
 2 years as a patient & was discharged ^{16th April 91.} but remained as
 a Voluntary boarder & has been so 9 months. Has been
 circumcised twice the first time only partially; the
 2nd time too much at St. Thomas' Hospital. Has practiced
 the evil habit of masturbation for some years; being taught it by a pupil of a
 clergyman.

Pres. Condit.

A young man rather boyish in appearance, with
 reddish hair & moustache & a short stumpy beard.
 blue eyes, pupils rather dilated & patellar reflexes
 rather tend to exaggeration. Tongue clean & slightly
 moist. appetite good. He has a number of boils
 over his body at present, one largest under the right
 axilla another over left thigh; both discharging
 freely.

Mental. Rather weak-minded tho he talks very
 rationally during conversation. slightly hysterical
 & tends to the hypochondriacal. Very sensitive to
 the slightest pain; shrinking from being touched
 even screaming before he is touched. He has
 been very abusive to himself lately & had to
 be blistered for it; ~~as has not been able to~~

Nov. 18th

His boils seem more numerous & to have
 been the result of the blistering as the large one in
 the thigh & the smaller ones clustered over the iliac
 region appeared 2 days after its application. The
 larger ones have discharged their core & several of the
 smaller ones are matured. He is taking Iron & Arsenic
 with a compatible bitter infusion ^{ultra tonic doses} & no others seem to
 be forming; ~~but~~ has improved much. J. D. McRae.

Dec. 21st 92

He has improved greatly tho he is still weak-minded
 He is going to private care. 27th He went today to St. Mary's
 to the care of Dr. Jones

Livingstone. Archibald admitted 29th July 91. act
adn 29th July 91. 18 years; Church of England, Single, One of six
children.

Fam Hist. Father & Mother alive, Mother rather eccentric. One
sister aged 15 died mysteriously.

Pres. Hist. 2 Years ago symptoms first appeared in which
he appeared slightly excited when bathing. He was
not excited or violent & soon got better. He afterwards
became hysterical.

Pres. Cond. a young man of ordinary height with black hair
& dark eyes, thin beard unwhiskered, pupils normal
patellar reflexes marked. Tongue clean & slightly moist.
appetite good. No signs of disease in Thoracic or abd. organs.
Mental. He is slightly weak-minded with a poor memory
when admitted he thought tricks had been played on him
& was hypnotised & drugged, says he found a pill once
that smelt very medicinal. He has been abusing
himself lately & was blistered for that reason.
When playing football he never knows apparently which
direction he ought to kick the ball, & is very unskilled, running
about any where sending the ball in any direction. His
body condition is good & he eats & sleeps well.

Dec 3rd

To-day he left to his friends.

J. J. McKittrick.

28th Dec To-day he returned from his friends having
been troublesome at home. On the 27th Dec
he was certified as insane & admitted as a
private patient. See Vol IV. page 81. J. J. McKittrick.

ad. 19 Feb. Milne, Charles James Barclay admitted as
a Voluntary boarder on Feb. 19th 1892. aet.
Single, formerly in Refuge.

Fam. Hist. No history of insanity in family. Father & Mother
are both alive.

Gen. Hist.

Pres. Condition A young well built man with dark hair fairly
tall. Dark eyes & dark moustache. Pupils
normal in size, & they react normally to light but
rather sluggishly to accommodation. Retellor
reflexes rather dull. Tongue clean & appetite
good. No present or physical signs of disease
in thoracic or abdominal organs.

B. Mental. ~~He~~ He is somewhat hypochondriacal
& sighs deeply about every five or ten minutes
when conversing with Medical Officer. He is very
coherent in language & his memory seems good.
He is in a rather depressed state & shows a
slight antipathy to his parents according to his
conversation. He sleeps well. H.M. Gattick.

April 20th

Patient has much improved: is in good bodily

condition. His depression is not so great
though it is still present to a slight degree. He
converses more readily with the others & is much
more cheerful; He is well read & his intellectual
faculties are good. When reporter asks him
to come to the dances or to go over to the ladies'
side during the evening, he at once refuses
saying it is not the place for him. He
joins readily in a rubber of cards with other
gentlemen & amuses them much with
his scotch stories anecdotes, which he seems
to have a good collection of. He plays well
in the cricket matches & practices & is becoming
more companionable. He has ceased his sighing
entirely. He is sleeping & taking his food well.
6th May 92. His morning patient left & he jumped in front of
train on crossing line & was killed. J.D. Gattick.

Complains of his bowels being twisted that he can't pass
 anything. Says he must give up taking food, has a
 Spasmodic Suppurgatory every fifth day when bowels don't
 act voluntarily. Taking Rosa Pomina & Nitro-Muriatic acid in
 Tonic doses. Sleeps very well. J. M. M. M. M.

26th Jan, 92. Patient left "Relieved" J. M. M. M. M.

Stocks, Bernard, at 31 Single admitted 19th June 18-
adm. 9th June 90. -40. Church of England, Picture Engraver, residing
formerly at 9 Richmond Villas Seven Eater Road S.W.

Fam. Hist. Father & Mother both alive his mother being of a
rheumatic constitution often having slight attacks
of rheumatism. Has 6 Brothers & 1 Sister all living &
well. Maternal Uncle died of Phthisis.

Pres. Hist. When a boy at school used to work hard & since
leaving it he has constantly applied himself to
study, taken little or no recreation, being ever since
a continual student. He applied himself to drawing &
engraving the latter of which he says, reduced him much.
About 9 years he felt unable to continue his
work & was constantly going "off his head" as he
terms it. He went to country for a time & returned
to work again well. After working some time he
broke out again & went to Isle of Wight for 22 Mos.
& stayed with Dr. Nevins. He afterwards went to Folkestone
where he remained 16 Mos. with Dr. Haughton. He came
home 18 months ago.

Pres. Condit. A Physical. A man of medium height with dark
hair rather thin ^{prominent along eyes & ears} & rather pale.
dark eyes pupils normal, react readily, knee jerks

present no exaggeration or diminution. Tongue
clean & moist. Appetite good. Bowels regular.

July 30th 92

B Mental. When admitted he complained of
being easily excited & laughing & jumping about
& losing self control ^{inclined to} breaking anything that
came in his way during this excitement.
At present he is very quiet; not taking much
interest in anything ^{but} that he takes part in the
football practices & seems to enjoy them. When
in the house he is either crouching over the fire
or walking listlessly about the corridors when the
weather is not very bright. He suffers occasionally
from gum boils, toothache & neuralgia. He says he
sleeps very well. J. J. McKeith.

24th Sept. 92. To-day he left much improved. J. J. McKeith

11

adm. 27th Mar 1890. Cranwell Herbert ~~James James~~ Walter, act. 39. Single
Church of England, assisted his father in
a Carpet business

Fam. Hist. Father still alive. 72 years of age. Mother died 3 years
ago. One brother died of Typhoid fever at age of 12
years. The other at 32 years, of Pneumonia
One sister died at 9 years old of Typhoid fever, other
sister died of Consumption at 21.

Pres. Hist. When a boy he was always quiet, reserved
& morose & timid. at the death of his first
sister he had a slight attack of depression
He recovered from this; but some time after he
was looking forward to the visit of his brother from
America; but suddenly news of his death only came
& this was the ~~the~~ cause of a 2nd attack of depression.
He was sent to Colney Hatch Asylum from '83-'85.
While there he had 2 fits, the result of excessive fear.
He had hallucinations of sight when there, say
he saw men in white robes with fire coming
from their mouths; & at other times saw funeral
processions in front of him. He was put into the
strong room & this made him very timid. His
present condition commenced 2 years ago

caused by the deaths of so many relatives.

A. Physical. well nourished, stoutish,
has a large ~~hydro-ce~~ ^{hydro-ce} cephalic head. circulation
is very poor. his extremities cold & somewhat
numbed. His eyes are bluish grey, his pupils
are normal in size & they react normally to
light & accommodation. His knee jerks are
slightly exaggerated. Ankleclonus not to be
produced. Tongue Coated with a creamy fur
& slightly tremulous.

B. Mental. He is depressed & moody; at
times very emotional, & weeps very easily,
there being loss of emotional control. He has
slight impairment of memory, both for recent
& remote events. His intellectual faculties are
very poorly developed, not being able to reckon
the difference between 92 & 68. He believes
he has committed a serious crime, &
thinks he is a criminal lunatic, hence
his great intimidation. He is hypochondriacal
& often talks a great deal about his bowels
muscular action very slow; of the phlegmatic
constitution. Lazy & indolent; & very timorous.
He is rather dull in the right ear, shuns

over, page 45.

Davey, Samuel, act.
Adm. 11th Mo. Strawberries & tomato grower. Single.

F-H.

P.H. Fourteen years ago had an attack of mania. was treated at St. Luke's Hosp. & recovered in 3 months. Between 2 & 3 years ago he became enamoured of a young lady who did not reciprocate his attentions - & he became much upset with delusions that people were watching him &c. Eighteen months ago went quite off his head for a few days & again about 9 months ago when he consulted Dr. Brewster & placed himself under his care. Has been twice struck severely on the head with cricket ball & once fell off his bicycle on to his head a few months before his first attack - Has masturbated extensively for years.

5th May, 92. Dr. Patient left. F.H.M.

Granwell, Constan^d. Society; & will not enter into the amusements or into conversation with any of the others. He even shuns the work (as, harrow work) & complains of it being too great for him; the real reason being that he prefers to lounge about lazily, or sit in the indoors if he could do so. He says he has a feeling in his head as if the upper half of his scalp were being lifted off, or as if his hairs were on end. He often sighs greatly, & says music affects him very much; recalling to his mind past events & making him weep. He is very suspicious of the others; very weak-minded & rather childish, there being absence of manliness & courage, & a feeling of inability to protect himself. F.H.M. Ketterick

16th Dec. 92 Patient left to-day. F.H.M. Ketterick

Adm 12th April. Chivers Thomas Morris, act 26. Church
 England. Single. fruit grower by occupation,
 & afterward Grocer assistant in Cape Town Hse.

Fam. Hist. His Grandfather was demented.

Previous Hist. He was a Grocer assistant at the Cape until August
 last, while out there he led a very wild life & was
 sent home. The disgrace lodged on his mind &
 he developed symptoms of insanity on the way home
 in August. In the month of September he became
 very depressed & it has continued more or less
 since (7 months).

Condition on
 admission.

Physical. A. a man of small stature but broadly built
 with light hair; Eyes of a grey colour & pupils
 rather dilated which act readily to light accommodation.
 His knee-jerks are very dull & his muscular system
 shows marked tone. His tongue clean but slightly
 tremulous on protrusion. His lung sounds are
 normal, but his heart is very irregular fast
 & slow alternate in each one or 2 minutes. He is
 rather anemic.

M. Mental. Depressed, Dull & uninterested
 showing signs of tears during conversation.
 He also becomes confused & absent-minded
 & is very uncommunicative. He has been

R. Talbot Esq. ordered the annexed prescription. He is
 settling down very well & is contented
 & happy.

 He takes his food well & enjoys good sleep. J. H. Hettich

Aug 20th He has gone to Brighton where he is improving
 by the change. J. H. Hettich.

29th Oct. To-day Patient left Hove Villa recovered. J. H. Hettich

//

Adm. 14th Ap. 92 Taylor, Thomas. act 25. Church of England
no occupation.

Fam. History.

Pres. Hist.

Patient has been subject to attacks of Epilepsy for several years; & was here previously for the same reason from May 1890 - June 1891.

Condition on admission

A. Physical. A young man below ordinary height with reddish hair & slight moustache. Eyes grey, pupils normal & react readily to light & accommodation. Knee jerks exaggerated & on voluntary effort he becomes somewhat tremulous. He has a tendency to slight calatypic condition. Lentigines are present over his forehead & cheeks. His pulse is quick & full & rather irregular. Heart sounds are abnormal both in position & quality. There is a slight indication of mitral stenosis though not well marked, the condition simulating reduplication of 1st sound very much. The point of maximum intensity of the mitral sound is just at the junction

of the xiphisternum with the manubrium. The aortic is about $\frac{1}{2}$ an inch higher. Why this displacement I cannot say beyond the conduction from the ~~condition~~ mitral stenosis. There is no enlargement of the right side of the heart otherwise it might have favored the reduplication sound. As to lung sounds he has rather hard breathing anteriorly indicating a chronic catarrhal condition, very jerky breathing.

B. Mental. He has recurrent epileptic seizures at varying intervals & consequently he is rather weak-minded. He has diminished volitional power, & is very uncertain & undecided as to what to do at certain times. He has slight impairment of memory, especially for recent events. He appears rather stiff & stupid at times & has a very abrupt style of speaking & when asked if ^{he} has a pain anywhere he replies "yes" to every place mentioned. He breathes in a very jerky manner & sighs heavily. He has been given

Ry. Pot. Brom. the amended medicine daily; & for his bowels ^{and Lam. 30} was given Pil. Cal. & Col. ii noct. He does not sleep well as yet. ^{and Chen. 30} ^{of 20 30m} ^{Sp. t. d.}

24th May.

He had an epileptic attack; during the convulsions he dislocated his left shoulder, after recovering

J. J. McArthur.

7th June

he was given a few whiffs of Chloroform & the head of the humerus replaced from its abnormal position under coracoid process. It was bandaged & put in sling & is now going on satisfactorily. ^{J. H. McArthur}
 Patient is very talkative & rambling in his conversation. He had 2 epileptic seizures on the 5th June & following upon the attacks he became quite excited, suspicious of the attendants, & refused to take his medicine. He has been constipated for several days & was given $\frac{1}{4}$ of castor oil during his excitement. This did not have much effect & he was given 2 pills at night. (of Calomel & Colony 4).
23rd June He has been transferred to Patients Post. ^{J. H. McArthur}

Fam. Hist.

Father & Mother alive, Father suffers from debility,
3 Brothers & 3 Sisters alive & well, no history
of Consumption &c. &c.

Prof. Hist.

When 18 years of age he was sent to the Navy &
tried to pass an examination but failed his eye-
-sight failed him & he had to give it up. This went
on for 2½ years then he was sent to training ship
at 16 years & went into for his next exam & got over
it. He says his Father was very strict with him;
that he got a dislike for him. This was when he
was 19. at 21 he went to Virginia to learn fruit
-farming. He says he never did anything but went
about & never did any farming or took no interest
in it. He wrote home to his Father that the farm
was not paying & he wished to leave. When there
he became enamored of a young lady & got engaged
& afterward tried a piece of business but
always shrank from work. He then came home &
did a little office work for his father in the way of keeping
his cash books. He gave up all hopes of ever being
able to do anything & admits he had strong im-

-pulses to throw himself in front of train. He
sat in his lodgings with his head in his
hands & was quite melancholic. He was then
sent to Smedley's Dispensary Derbyshire for 7
weeks then returned home. When going about he
met a young lady from Belfast & became engaged to
her but broke it off. He went to Florida
again, but could not ^{do} anything & came
back & went to Smedley's last spring again. He
was rather depressed. He lay in bed 5 weeks
he attempted to cut his throat & even went so
far as thrusting a knife into his jugular vein.
This healed thoroughly with a slight scar.

Condition on
admission

Mental. He is depressed & has a poor
idea of his abilities. says he thoroughly hates
work. Has no ambition to get on in the
world at all. & shirks all society. Says
he has no more knowledge than that of
pointing to one in front of him. He always
thinks of himself & has no affection for his
people, tho he admits their kindness & anxiety
for him but he cannot return it. When he
reads anything he cannot retain it.

23rd Dec 92

To-day He left improved. J. M. Cottrell

adm. May 30th 1892
John Richard Brewster, 40. Leicester.
 Protestant. Married.

Fam. Hist. Nil.

Pres. Hist. Had a slight attack 2 years ago (the 1st), during which he was depressed. He was worried through overwork. The duration was short. Two years ago he had several losses on the stock exchange & again became depressed for six weeks & recovered when his circumstances improved. A year ago he had exalted ideas, thought he was rolling in wealth; spent all his money, & became bankrupt a few months ago. A fortnight ago his speech became indistinct & stilted-shuffling. On Friday night last he made an indecent assault upon his own daughter (8 1/2 years old). He has been drinking a good deal lately & has been indulging in masturbation & sexual excess both with his wife & other women.

Condition on admission

Height 5ft 6 1/2 ins 11 1/2 lbs
 A. Physical: He is well nourished. Hair light in color, thin, & bald over temples. His eyes are light blue, his pupils are irregular in

outline & unequal in size; they react very slowly to both light & accommodation the latter more so. His tongue is coated & tremulous, his speech thick & hesitant. He has a reddish moustache & beard (the latter short). His knee jerks are greatly exaggerated, & ankle clonus well marked. His muscular system occurs in a state of tension. No organic disease in Thoracic & abd. organs.

B. Mental. Patient sits with his eyes closed in a depressed & morose state, after conversing with him for some time, he became irritable & showed signs of loss of control. He does not sleep well. He uses obscene language & becomes very excitable if thwarted. He is also very untidy in his dress, & careless of his personal appearance. Has slightly exalted ideas. Uses vulgar language against the ~~hospital~~ institution & its authorities. He was given ~~two~~ pills at bedtime with the object of relieving his constipated condition. He was also given the annexed prescription. J. H. M. Hitchcock.

Bradenell.

Fam. Hist.

Father died at 84 foldage. Mother at 64 of Cancer
of the Liver. He says his eldest sister also died of
Cancer of the ^{Breast} Liver. Brother died of drunkenness
and a stroke.

Pres. Hist.

Patient says he has had 3 previous illnesses. Rheumatic
fever ²⁻³ years ago being about 6 Mon before he was
thoroughly convalescent. About 8 or 9 years ago he had
Ulceration of the ^{vomiting & such} stomach, caused he says by bolting
his food so hurriedly on account of the great amount
of work he had, & the active life he led. Says he has
had a good deal of business worry. He had a blow
on the posterior part of right parietal bone, with the
butt of a gun by poachers who attacked him when
they saw he was watching them. This was when he was
a young man of 22 years of age. The part where
the blow was given is now depressed & bald.

Condition
admission

Patient is short with large, ^{shiny} features & of a dirty
yellow complexion, has a dry scaly seborrhoeic
condition on the back of the hands. Vision is
defective (myopic). His pupils are of a pupil

brown colour & slightly contracted. They
react normally to light but sluggishly to
accommodation. Tongue cracked & tremulous.
Pulse jerks normal. He complains of
sickness & has an unsteady gait always
having a stick for support. He ~~has~~ ^{complains}
of a severe pain in the epigastric region
extending through to the back, & mostly to the
right side. He complains of headache in temporal
regions.

P. Mental. He is very depressed & hypo-
chondriacal, his memory is defective,
& he is very timid & nervous, said he
thought he was going to die last night.
He wrings his hands & said in reporters
presence "God forgive me". Believes
himself to be very wicked. He is mentally
confused & has a difficulty in sustaining
conversations. 7.9.92. M. H. H. H.

June 20th

While patient was out looking at cricket match
shortly after 4 o'clock he became pidd, & staggered
& was brought in & put to bed & a reporter was
called. At 4-50 p.m. he was very semi-conscious
& there was hemianesthesia of left side &
marked loss of motion on same side though

it was not complete. His face was flushed his skin moist. Pulse quick & irregular, full & hard. Respiration slow & attended with a moan as he draws his breath in & puffing of left chest as he ~~exhales~~ exhales. When pinched he made a slight movement; his left ~~exhales~~ ^{exhales} were rigid & offered slight resistance in attempting to move them, & there were numerous twitchings of the extensor muscles in both limbs. His pupils were contracted & unequal the right being smaller than the left. Conjunctival sensibility decreased on left side, normal on right. His left eyebrow is lower & more relaxed than right. There is ^{slow} oscillation of eyeballs. His left pupil acts more rapidly & lightly than the right. Deviation of head to the right side. The left sterno-mastoid & trapezius showed slight contractions. Drooping of left angle of mouth with trickling of saliva from same side. Tongue placed lying well back in mouth against the roof. There is loud stertorous breathing, the number of respirations being 32 per min. They are intermittent & irregular. Pulse 92 per min. He has attacks of hiccups each of which lasts about 5 min. ^{His} ~~the~~ ^{breath} ~~the~~ ^{temperature} 100.4 per rectum. Has had 3 attacks of hiccups during the morning. Rigidity of left arm & leg still present; with ^{slight} flexion of forearm & arm

5 fr. Colonel
pneu.

June 26 th
4 P.M.

at an angle of about 35°. Biceps slightly contracted slight twitchings of extensors of forearm these recurring every 5 seconds. There is also flexion of the hand on forearm, as well as the hand being drawn to the ulnar side, at an angle of about 20°. The middle, ring & little fingers are placed into the palm; the forefinger & thumb natural.

The right hand now performs rhythmical movements in the following manner. The hand is laid across his chest, resting in his shirt as if it were acting. Twitchings are then seen to commence in the extensor muscles of right forearm, the hand is drawn out of its sling & laid straight down by the side of his body for 1 or 2 seconds, then it is raised to his face right side & passed upwards over his right cheek & the right side of his forehead & over to the back of his head then down again and laid over his chest. The time occupied in performing the whole movement averaging 15 seconds. The cremasteric reflex absent on left side, but present on right. There is ^{loss of control} incontinence of vesical sphincter & his urine constantly passing in small quantities. No urine has passed since 4-30 p.m. Sensibility of left side entirely absent. Twitching in left leg & foot in the extensors. Foot in position of Equino-varus.

Colonel has
poisonous effects
the cotton oil
men.

6 P.M.

Occasional hicough, Cheyne-Stokes breathing present. 7 PM. Wettrich.

8 P.M. Rigidity of left limb still present: passed urine once since 6-10. 7 PM. Wettrich.

24th June 7-50 a.m. Breathing more rapid & irregular at one time 40 per min. the next minute 60 per min. Large tracheal rales very low: pulse most variable, at present 58 p.m. the 1st 15 seconds ^{beating} at rate of 100 then slowing to rate of 50-60 per the rest of the minute. The rigidity is passing off & the limbs more limp & flaccid. There is a large quantity of uric albumen in urine. No sugar, blood or bile. Urine has smoky appearance, & is acid in reaction. Temperature 100.6 per rect. Slightly rising. 7 PM. Wettrich.

9-50 a.m. More drowsy & deeply comatose, conjunctival reflex sensibility on right side diminishing also. completely absent on left. Conjugate deviation of head to right - more marked. 7 PM. Wettrich.

11. 10 a.m. Deviation of head still present. No the eyes show no right deviation. Deep Coma. Muscular relaxation, tongue & mouth parched, ^{lower} jaw falling, & recurrent hicough. The hysterical movements have ceased. 7 PM. Wettrich. There is still no movement of bowels.

3 p.m. Bowels moved with discharge of dark grumous fluid liquid feces. Still deeply comatose. 7 PM. Wettrich.

6-5 p.m. Patient died never having regained consciousness. Cause of death being rupture of vessel on right side. 7 PM. Wettrich.

adm. 7th July
1892.

Fam. Hist.

MacGillivray Hugh Franklin. 33. married.
one child. Clerk in last London Merchant Office
Father & mother both alive, 3 brothers alive, one
dead from consumption

Pres. Hist.

Patient has had several previous attacks of
depression, the principal ones occurring 15
years ago & ~~the~~ 7 years ago. In the Spring of 88
he picked up again shortly after got married.
has one child (girl). Has been well till 7 weeks
ago when in London he found he couldn't do
his work & again became more depressed than
ever & believed he had committed unpardonable
sins & that his life was a failure, & he
still believes this. He says he has attempted
suicide. He has led a solitary & sedentary life

Condition on admission } Patient has a reddish brown complexion; of a
somewhat grey appearance. Eyes bluish-grey, pupils
normal in size react readily to light & accom-
modation. He is rather anaemic. Tongue is
moist & clean. His knee jerks normal, & no
ankleclonus. His heart action is irregular
the complaints of palpitation occasionally, but

there are no evident physical signs or symptoms
of disease or incompetence. His bowels are
constipated, pulse thready, irregular.

P. Mental He is low spirited & dull, &
says he is unable to keep at work beyond
one or two hours if he endeavours to work
longer he becomes irritable & restless, feels
it a fatigue to him. He has loss of will power
to do anything but inclines to be lazy, & says
he can't bear the trouble to get up in the
morning. He also complains of loss of
memory, & says that after reading a book
he remembers nothing that he has read.
He also lacks the power of attention & cannot
concentrate his mind on anything, except
on himself & on his deeds & says he does
not feel that life is worth living. He has

adm. 9th March. Stow Brian Thomas, 48, married; no family
Church of England. Has 4 brothers & 3 sisters
all well living. 2 sisters have chest complaint
the 3rd sister has her lung affected.

Pres. Hist.

Credit on adm. at Physical. A man of ordinary height with dark
hair mixed with grey, bald on the crown & forehead
black moustache, dark eyes, pupils normal in size
& regular in outline, at times they become much dilated.
They react readily to light-accommodation. He is a fairly
muscular man. His knee jerks on right side is
normal, on left a little exaggerated. His tongue is thickly
coated & very tremulous. He complains of a severe
headache. His heart & lung sounds are normal.

B. Mental. He is depressed & says he is doomed to
ill. He says he has no hope in this world, & he has
great horrors of death, & he says he never will be able
to dismiss the thought of terror at death approaching.
He is emotional at times. He is hypochondriacal.

He says he has a burning sensation in his brain
which has lasted about 7 months & it extends from
his head down his throat. F.P.M. Kitchin.

18th April. He seems more depressed. He says he has horrible thoughts
& mostly, impure ones at night which frighten him
& keep him awake. F.P.M. Kitchin.

23rd April. Patient has become more restless wandering about
the corridors talking to himself about the "horrors of death"
& the eternal misery to which he is doomed. yesterday
patient refused his food all day & had to be fed finally
at night. He had a wild expression. F.P.M. Kitchin.

16th May. To-day patient was certified & transferred
to patients list. See vol V. p. 147. F.P.M. Kitchin.

Fam Hist. No evidence of heredity.

Pres Hist.

Condition on Admission Physical. Height 5ft. 10½ in. Weight 11½ lbs. Muscular condition well developed. Dry hair. Moustache & short beard. Pupils normal; reflexes dull. Heart & lungs sound normal.

Mental. He is depressed & suspicious & hears voices. He says the voices tell him his wife is in this building & that his brother is here also & is going to take her away from him. He is rather restless & wanders about the corridor listlessly. He is very anxious to get out by himself.

May 2nd 93. On account of his hallucinations becoming more troublesome & he being more restless, he had to be certified on this date. See Vol V. p. 127. J. J. H. H.

Adm June 9th 93. Hartnidge Clifford - 24. single. clerk Independent non conformist, first attack for a year has him under treatment at St. Rose. Freely supposed cause of hysteria.

Fam Hist. Great grandfather on mother's side insane. Pres Hist.

Condition on admission Physical. A weak minded looking in appearance, small forehead & crooked in by high arched palate. bad teeth. - 2 physical signs of disease.

Mental. concentration slow, & difficult to make him change a subject when commenced. - suspicious & nervous manner. talks about eating little or going some days without food to mortify the flesh. Has the idea that his food is tampered with in order to give him more motions.

In consequence of his refusal to eat, & his probable attempts to kill, he was certified & transferred on June 24th.

Adm June 4th Evans

a medical man.

Pres hist.

First as Mary's sister he took the gold medal for anatomy, then migrated to Guy's, held the ordinar, appointments. - more sociable, of very retiring disposition. after qualifying, commenced a practice & became exposed, instead of making money to her & this is supposed to be the cause of his present condition.

Condition on admission

Small, sickly man, badly developed physique. No physical signs of disease.

Mental. In a condition of stupor, will speak if moved but almost immediately relapses; sits for almost 2 hours together in one attitude, only moves on compulsion, a very depressed melancholic expression. -

June 16th

A slight improvement, recognized the reporter & spoke for some time about Guy's & its doings: will speak if addressed, but never volunteers any statement.

June 28th

Further improvement but slight; walks about by himself seldom mixes with the others, has been induced to play cricket, takes pains, but in a very stupid way. -

July 20th

Is gradually coming out of his shell, still lethargic, & only reacts to external stimuli.

Aug 5th

Left today on visit to friends.

[Signature]

Adm. June 16th 1873 Dr La Cour

Condition on
admission

A clean shaven face, has the markings of a good physiognomist
his muscles are flabby, of average height
stout & deep chested. it is doubtful if the liver
is enlarged - suffers from frequent vomiting after
meals on the morning -

Diagnosis. Apparently hypochondriacal, is suffering from
the effects of over indulgence in alcohol, has small
ulcerating patches about his hands - vomits frequently
after meals, often causing it himself by patting his fingers
down his throat, because of the inconvenience of spasm to swallow.

Adm. Jms 24th / 1933 Orbitt Charley 42 married Church of E.
first attack, duration 17 weeks. Commercial traveller

Condition on admission. Tall thin man with very miserable depressed expression. Large forehead - prominent ^{nose} nose. Eyes large & of the 'Jolly' type. - rather bald. Impish faint sound of the heart. Respirations whiffy at the R apex. Pupils dilated, rather oval in shape, react to light. Knee jerks brisk, clonus and clonus, looks ill & emaciated, muscles thin & flabby, left testicle seems larger than the right, remains of a coppery syphilitic roach about the chest

Mental. Very depressed, continually saying 'what can I do' is at times excited & noisy believing that he is choking from his mouth going down his throat, or that his testicles are disappearing, constantly in fear of the nurse looking at his mouth & throat & also frequently moving his fingers to find out whether his testicles remain or not, or with his hands in his pockets holding them. It is doubtful if he masturbates but he is constantly complaining that he is impotent when the 'choking' sensation comes on he seizes his throat with his hands & puts his fingers down his mouth. Between the attacks he is quiet, & nervous, &

He continued to get worse, became more excited & noisy, but flesh rapidly & was cut off & transferred on July 11th / 1933.

x

Adm Aug 14th Cressy.

Prex hist. Total abstainer from alcohol & tobacco; has done no work for last 20 months; formerly a shop assistant, was at several schools, always very backward & dull; quite unaware of the functions of his prostatic apparatus until about 2. 3 yrs ago, then was so curious that he asked his mother for full particulars, commenced to masturbate, went to guards about his condition read their books.

Condition on admission Slight, poorly developed youth, with small pale face, head of small dimensions, forehead small, chin marked, palate arched, with a very depressed & melancholic expression. No signs of physical disease, pupils dilated, acting readily to light. Speech hesitating. Somewhat stammering, tongue large & flabby, loose parts, hist.

Mental. Well minded with slow cognition, both answer questions, but does not sustain a remark or conversation, does not occupy himself in any way. - listless & wants sleep. -

certified & remained as patient.

X

Adm. Aug 18th 1893 Prakam. W. E. aged 18.
Left 12 Feb 95

Facial hist.

Facial hist.

Condition on
admission

A short poorly developed youth, looking about 16, hyper-
aemic on face, chest, & back. ? Prominent Red. no
signs of ordinary physical disease about the least strong.
Pupils equal. React to light accommodation. Vision
fairly weak.

Mentally weak minded, very egotistical, long of memory.
& childish in his manners, speaks with a slow deliberate
manner, half hesitating - Is subject to epileptic
fits.

Nov. 17. Still in the same mental condition. Has been
discouraged masturbating lately & has been
blistered H. H. W. M. M.

Adm Sept 5th McFarlane 30. single, Presbyterian
 Sept. 26-94

From hist.

Syphilis 10 yrs ago. primary secondary symptoms, since then perfect, well until last Jan (9 months ago) when he had sudden stroke, was unconscious for about 10 min. paralyzed both arms & legs, but could speak - gradually recovered the use of his arms & legs & apparently got quite well. In May during his sleep he seems to have had another seizure & woke up one morning, with his arms & legs paralyzed, speech gone & face drawn to the Right. Gradually recovered to a certain extent the use of his arms & legs, & his speech.

Condition on admission

A well developed well nourished man, with red hair & reddish complexion, specular staining eyes. speaks slowly & deliberately. His muscles are flabby but there are no definite signs of reparation, the left calf is smaller than the right. Suffers with nervousness, soot as dressing himself, with difficulty, has a foot somewhat

like a commencing hemiparesis case, but seems to have no definite loss of coordination, & does not experience fatigue, like jerky pains etc. pupils equal, react to light & accommodation, knee jerks much exaggerated, patella tap present, ankle clonus well marked, plantar reflexes exaggerated. There is ^{no} loss of sensation of anaesthesia, or hyperaesthesia. The Rt Hand is stronger than the left. & the R leg is stronger than the left. - but the difference is small. - At rest quite normal: but there is 'shuffling' walking at the Rapsey, with behind stamp with Brachophony & Pectoriloquy. - does not appear to be enlarged, the left testicle is slightly harder than the Right, but sensation normal. - No tremor of the lips or tongue. Ht 5ft 7 1/2 Wt 146 lbs.

Sept 27th

Has been given Pot & Hydrarg Pickles & gradually increasing doses. - is better since admission. -

Nov 17.

He about a week ago had a slight attack & lost the use of his legs completely for a day, but has since recovered power in them gradually, has been moved to infirmary
 with Shadys

Adm. Sept 24^{1/2} Stock Dudley 21. Supt. a Royal Academy
Student. formerly at the 5th / John's term school of
art

Pr. Hist.

Fac. Hist.

Condition on admission A slight youthful looking man. Little white hair about
his face, pupils equal. reacting to light accommodation
with a fixed morose expression. No signs of
physical disease, knee joints

Mental

Melancholic & semi-stuporous. refuses his food.
expresses freedom with the tube, which he takes in
a passive resigned fashion. Will speak after some
pressing, when he says he has sinned. He is a liar.
admits to suffer agony. wrote a letter to the attendant
sister, expressing regret of his intention to commit
suicide.

Sept 26^{1/2}

Has been certified, & transferred today as
a patient.

admitted 14-7-92 Stocks Bernard. 32. previously has as
Left Sep 26-94 at St. Bourdon from June 9th 190. See p. 41

Condition on
admission

Ht. 5ft 6in. Wt. 150lbs.

Mental.

Suspicious nervous manner. Talks at one time
louder than turns his eyes ^{away} & speaks without looking
straight down sideways. Has nervous twitchings of
his face. laughs in a stupid kind of way now and
then. - States that he is melancholic & depressed.
that he has not been able to do his work for some
time past. considers the cause has been a succession
of uncomfortable lodgings when sketching in the
country.

Nov-17. It is much the same condition, but appears
to be more variable. W.H. May

Admitted 21-94 Stocks Bernard

1895

May 1st a peculiar reserved little man
an excellent etcher and draws well. & has
very strong & many designs on the walls.
Health very fair & seems active. W.H. May

Dec: 15. Has come out of his shell, and joined
in the amusements of the place.
Smoking concert, football etc. & very
shy and nervous. - W.H. May

1896

June 16. Much about the same. & wishes
to be a little exalted. W.H. May

Feb 1. 98. Left to day. W.H. May

Adm Sept 23rd Granger Arthur Henry 35 single. Farmer
Ch of England. several previous attacks was formerly
but an apatient from Nov 26th/92 - May 23rd/93

Condition on
admission

Physical - Dazed & confused depression, much
sarcasm, of poor physique. no signs of physical
disease.

Sept 27th Mental. Fidgety restless, quite unable to
converse, will not answer any questions,
but is constantly muttering 'Christ' -
'Have mercy' - & so on. -
On admission he was sane in manner, but
rather depressed & would not occupy himself. -
Certified & remained as patient.

Adm Oct 6th 93 Griffin Richard William 27 single.
Oct. 9th 1893 Transf^d to P.R. See case book. VI p 5.

Sam Hist^y. Father died 43 drunkard.

Pres. Hist. Two years ago had Influenza, never well since. Worked
excessively hard for grain which he passed 6 years
ago & immediately broke down.

On Adm. Ht 5ft 10in Wt 165 lbs. a well developed man, Gray eyes
pupils normal. Brown hair & clean complexion. Very
depressed looking, eyes rather sunken, overhanging eyebrows
stare rather & move in a listless manner. Muscles in
good condition. Appetite good, but has to take aperients
regularly. Sleeps badly & usually requires a sedative.
Mental Very depressed & hypochondriacal. Thinks his left does not
fulfil their functions properly. He further complains of
pain in his head, & thinks his sense of taste is lost & boy.
He often contemplates suicide. He suffers from
rather excessive nocturnal emissions. He appears
to have had affection for his people.

Boobyer. John.born. Oct. 1st 93

See Case Books, VI p. 323

Cause. History of Sexual Excesses, Scholastic Exclusion & excessive brain work with consequent loss of mental balance.

Present.

Excitable, irritable disposition, lately had outbreaks of temper on one trifles often dull also-sporadic.

* Complaining of vague disagreeable thoughts.

Has been married about 5 years, has 2 children: was in the Stock Exchange but did not like it, & so went to University College & passed the B.Sc. London. afterwards went up to Cambridge, behaved very strongly, got engaged much against the wishes of his family, & finally was married without their knowledge; his married life has apparently been unhappy.

Family Hist.

Slight history of epilepsy. - (2 or 3 individuals out of about dozens in 2 generations)

Condition onAdmission

Physical, a fairly developed man, with aged, staring expression, pupils contracted, & do not react to light & accommodation. - Knee joints normal. - Respiratory ends normal, & slight free systolic bruit at the apex, with a thrill, & a muffled second sound. - Urinary Inquired Normal. -

Condition

Mental. Imprinted & autistic, with ^{first} ~~apathic~~ rational answers to questions, but cerebration is slow, & he will volunteer no information merely answering as much as possible in monosyllables. - His memory is impaired: for instance he denies going to Cambridge when he took the B.Sc. London. - No delusions can be elicited. -

Certified & remained as a patient.

Adm Oct 31-93

Backer Jas E. 34. Married, clerk to the British & Foreign Bible Society.

New Hist

Had influenza 2 years ago when he chiefly had gastritis & other digestive troubles. He began to have a feeling of lassitude & did not take any interest in his work was at work up till a week before admission. He also used to have fits of excitement. His grandmother died a lunatic.

Married 7 years, has 3 children.

New Conduct

Ht. 5ft 2in. Wt 7st 6lbs. a small poorly developed man, with brown hair & blue eyes; the pupils do not appear to react well. R pupil enlarged. His head is badly shaped, the forehead is sloping & there is a transverse sulcus on the vertex. Expression mild & vacuous. He has some slight difficulty in articulation. His thoracic organs are healthy. Muscular system is poor, & knee jerks are not obtainable, perhaps because it is quite impossible to get him to relax his extensors. He is not able to stand steadily with his eyes closed. His teeth in a very bad condition, & his breath is very offensive. His tongue is pale & flabby, appetite good, his bowels are rather constipated. Sleeps badly.

Mr. Backer has exalted ideas & talks a great deal of irrelevant matter; he wanders about & is apt to lose himself even in the corridors.

J. H. M. M. M.

Nov. 17.

Speech appears thickened. Memory more confused.

J. H. M. M. M.

Dec 15.

He continued & removed to another asylum.

J. H. M. M. M.

Adm.

Dec 9. 93

Left Jan 20. 94

Neil James Christopher. 23. sample.
2nd Mate in Merchant service.

It admits to having masturbated a great deal at school. He went to sea, & was in a shipyard, he has never been quite the same since. He became restless, & tho' of a frank nature & always kind hearted, he committed some absolutely unaccountable crimes, e.g. he forged a cheque in his father's name; he also has been in the habit of stealing & selling things.

It is a well built young man, ht 5 ft 7½ in, wt 9st 13½ lb. He has an pleasant frank expression, light hair & slight beard & moustache. Grey eyes, pupils normal. Lungs & heart healthy; digestive system good, sleeps well. He is quite rational in his conversation & cannot account for his previous peculiarities. He is quite happy here & enters into everything thoroughly.

Arthur M. Mady.

Jan 20

It left today. He has been perfectly well all the time he was here & has not given the least trouble.

Arthur M. Mady.

Aden

Jan 2. 94

Left Jan 30-94

Henry Samuel.

He has had several misfortunes a disappointment during the latter part of his life.

He has at intervals had attacks of great depression & melancholy. He suffers a great deal from insomnia & is unable to take his food. This present attack has been going on about a month.

He is 5ft 7 1/2 in height & well nourished. He has white hair & beard, red complexion, rather spotted. Eyes normal. Chest & heart fairly healthy. Appetite bad, flabby tongue, bowels fairly regular. He sleeps very badly.

He is depressed & apt to weep. He realises that he has no sufficient cause for his unhappiness, but says he is unable to throw it off. He is perfectly rational in conversation.

John M. M.

Jan 30. He left today. He seems to have almost entirely shaken off his melancholy. He is still suffering slightly from insomnia. His general health is very good. John M. M.

Adm

Jan 4. 94

Curt 23 Feb 95

Wood, Frederick Hays 41 single, no occupation,
chef England.

He was received here on certificate last January,
see Case Book V. p 37. He was shut down &
demented, but improved considerably whilst
here & was discharged on the 27th of Decemb. 93,
after having been nearly five months in house.

Ht. 5ft-8. wt 9st 5lb. A delicate looking man,
thin & pallid complexion. Brown hair &
moustache with tinges of grey. Dark grey eyes,
pupils equal react to light accommodation.
No signs of physical disease in lungs or
heart. Tongue pale & tremulous, appetite
good, bowels regular, sleeps well. Muscular
system poorly developed, knees exaggerated.

Indirect inguinal hernia on right side.
Mental It is weak minded & childish; talks
to himself & laughs. He is constantly touching
his shoulder & says he feels someone putting
their hand on his back. He employs himself
padding & walking up & down the asphalt.

Edith M. Kelly

12 Feb 95

Became a certified patient see Case Book
Vol VII. 101.

adm.

Eley. Henry

Jan 14. 94

Left March 3. 94

A delicate looking man, 5 ft 6 in height, with thin grey hair & whiskers & moustache. Rather sallow complexion. Grey eyes, pupils equal & react normally to light & accommodation. Lungs & heart healthy. Tongue pale, appetite fair, bowels constipated. Muscles in fair condition & knee jerks good.

He is depressed & feels that he requires to be looked after. He has frequently suffered from these attacks during several years.

He is intelligent & voraciously enters into games of football, billiards etc.

He gives no definite cause for his mental state, but appears to have suffered many misfortunes in life. Atth. Mudge

March 3

He is much better, in fact quite cheerful. He left today. Atth. Mudge

adm.

Harris David. married. medical practitioner.

Jan 17. 94

Left Feb 7. 94

He was out of the Cape for some time & appears to have had a very rough time for a while. He has become extremely hypochondriacal & has loaded himself with drugs of all descriptions.

Ht. 5 ft 11 in. wt. 136 lbs. Very thin & delicate looking. Sallow complexion, black hair, beard & moustache. Dark brown eyes, pupils equal & normal reaction. No signs of active disease in lungs, circulation good. Tongue pale & furrowed, appetite bad, bowels irregular. Muscles in weak & flabby condition, knee jerks fair.

He is in a state of most extreme hypochondriasis. He imagines himself to be a shattered wreck. He gasps for breath & is unable to go on talking, & has a nervous hyperaesthesia. He is constantly asking for stimulants to support himself. He thinks he is unable to sleep, but seems to have fair nights. Atth. Mudge

Feb 7.

He appears to be rather worse, he lies on a sofa in the infirmary all day. He leaves today. Atth. Mudge

Adm

Jan 12. 94

Wilkins Charles Edward William. 21.

He left ~~school~~ school at 17 & was in an insurance office till a year ago. He did not like the work & does not appear to have got on very well. He was troubled with uncontrollable thoughts & felt he had not sufficient power over himself. He admits to have masturbated a good deal.

A tall youth with dark hair & a slight moustache, pale complexion. Dark brown eyes, pupils equal & of normal reaction. Lungs & heart healthy. Tongue pale, appetite good, bowels regular. He sleeps well. He is not very thickly built but muscles are pretty well developed & in fair condition.

He stammers especially when in the least excited or nervous, e.g. when questioned by a medical officer. He says that for some unaccountable reason, he has been in the habit of always promising to do exactly the opposite to what he intended to do & in other ways has shown want of control over himself. He is fairly intelligent tho' somewhat boyish for his age; quiet in manner. Arthur Mudge

March 12. He appears to be rather better, his general health is excellent & he says he feels he has more command over his thoughts & desires.

1895Arthur Mudge

April 10. a well grown healthy youth, of untid, habits and generally rather weak minded. 1895

1896

Jan. 12. in excellent health, but has not shown the same mental capacity.

Arthur Mudge

June 15. gets irritable and dull at times. Self-absorbed and complains of peculiar sensation in his head with aching ears. A little P.A.B. and this put him to ~~right~~ - 1895

Nov 17. 97.

Left to day.

1895

Adm.

Feb 10-94.

Sept 30, 94

Stevens Frederick R. 27⁺ Engineer

He early developed a taste for morphine & appears to have commenced injecting it at the age of 18; a habit which he has continued in up till the present time.

Ht. 6ft 12. Wt. 10 st 13 lbs. A tall well developed young man. Blasted expression & heavy looking eyes - light grey in color, pupils small react to light & accommodation. Dark brown hair & small mustache. All organs appear fairly healthy; tongue rather coated, appetite good. Bowels regular. Sleeps well. Muscular system well developed, not in very good condition, knee joints normal.

Mental It is noisy & rather excited. He seems to have grandiose ideas & is rather intrusive. His conversation is rational. Little May

Mar 20 It is very much better, he is quieter & well behaved & is making him self useful. Little May

Apr. 30. He left to-day, apparently quite well, but the flexor surfaces of his forearms, are one mass of scars, caused by the hypodermic syringe. Little May

Pres hist

Was received here on certificate Dec 25 1898
 supposed cause free living & business worry not
 suicidal or dangerous to others.

Pr in his business capacity has lived a very
 free life. He became partner in a flourishing
 business, but became greatly depressed & gave it
 up. He then discovered what a mistake he had
 made & became worse & also suicidal. He was
 certified & placed in Redlands Asylum
 Torbridge 2 1/2 months ago.

Left July 25

Lobby Island

122

Adm. Mar 5.94 Thompson. Sidney John 28 Single Student
Left Oct 22.94 Compensational. See Case Book. VI. p. 97

Reason. Oct 25.94 Adm. on certificate Jan 22.94. supposed cause
Sept 16. May 95 Heredity + masturbation, suicidal but not dangerous
to others.

Prev Hist. Patient has an aunt + three or four cousins afflicted
from insanity. He was on the stock exchange but
dislikes the work + in opposition to his family
started poultry farming, this was about 4 years
ago. His venture was a failure + this fact added
to the opposition of his family seems to have
started his fits of depression. He owns to having
masturbated a good deal. He has made several
attempts to poison himself the last being on Dec 12
1893 when he swallowed a large quantity of chloroform
from which however he was
resuscitated.

Description of
admission

Ht. 5 ft 4 in Wt 8 st 12 lbs Pt is a fairly well-
developed man with a fresh complexion, skin dry
+ scaly, his hair is light, he is clean shaven
His eyes are blue pupils equal + react well to
light + accommodation. Ears + head healthy. Tongue
rather pale appetite good, bowel regular. Pt sleeps
badly, muscles fairly well developed + in good
condition Knee jerks normal

Mental.

Pt. appears quite rational but says he has been subject

to fits of the deepest depression; when he has an unbearable
anxiety for death. — He says he has suffered a
good deal from nervous headaches.

May 17.95

on the 15th had leave to go to town and has not yet
returned. a letter received to day from him states that
he is in good spirits but he is careful to put no address
in his letter (head all over) but gone to town
to make enquiries — Red Keith

Reason 26.5.95

Oct 16 June 95

Has come back looking very much ashamed
of himself, says he felt miserable and that
is why he left so abruptly without giving due
notice — a friend of his with whom he has been
staying in Reading induces him to return —

Certified. 16 June. 1895. Vis. Vol VII. 181.

 attacks business worry. Insane, but not dangerous
 to others. See Case Books VI p 166

Bro. Hist.

He has been a very busy man all his life he has
 been occasionally subject to slight depressions but
 had never had to leave off work on that account.
 His wife states that in spite of what he says he
 has always been temperate, he on the contrary
 avows that he has been a constant tippler. He
 has had a good deal of worry & became acutely
 depressed.

When adm on a boarder he was quiet at first
 but on the second day he became very restless
 & was removed to the infirmary. He was with difficulty
 persuaded to take food, & has to take a sleeping draught
 on the 31st he was violently excited & shouted for two or
 three hours without stopping, that he had destroyed
 the whole world. On April 3rd he made an attempt
 to strangle himself with his necktie. He has been
 since to be fed regularly.

Phys. Hist:

His history of heredity

PR has always been rather a quiet youth; but for the last few months has been getting rather excited. He behaved in a very extraordinary manner for about a fortnight before admission, staying out all night with no object & driving about an old pony. He indirectly threatened to shoot his brother & avowed that he was carrying a revolver. He says he has a loose dissepiment which made him reckless.

He was trans^{ferred} to patients list ap 22nd

On admission Ht 5 ft 6 in Wt 94 lbs. a bright-looking youth fresh complexion, brown hair, clean shaven, brown eyes pupils equal rather dilated react to light & accommodation. Lung & heart healthy Tongue slightly furred appetite good bowels irregular. PR does not sleep well. Muscles in fair condition. I was unable to obtain knee jerks

Mental

PR is in an excited excited condition - has great ideas of himself & capabilities. He is quarrelsome

with other patients. memory apparently unaffected. He talks quite rationally & fully recognizes his position.

Came here on certificate. 18th May 1895, cause of
attacks unknown.

Prev Hist.

He has had several previous attacks & has been
with various medical men, & latterly at Bethlem Hos.
His first attack came on when he was 12 years old.

Bond on adm. in 95

Height - a fairly nourished young man with a
well heavy expression, dark hair & eyes. (His hair is
very thin) pupils normal in size & regular, react to
light & accommo^{tion}. Knee joints normal, no ankylosis, his
head & lungs sounds are normal. No signs of recent
injury.

Mental

Dull & morose & wanders aimlessly about never
occupying himself in any way. He believes that
there is a hard substance forming in his head
which prevents him concentrating his thoughts for
any length of time; & often caused him to hesitate
in doing what he would like to do.

Pres Hist. Pt worked very hard at Cambridge & took very little exercise except a little walking. He passed first in 1st class of mathematical tripos in 92, he went up for the 2nd part in 93 but was unable to work much & spent most of his time doing nothing but smoking a great deal. He did not do well in exam & was disappointed at not obtaining an appointment he applied for. Pt had syphilis two years ago, but otherwise seems to have been always healthy. He admits masturbating when a boy. Says he has had a love disappointment.

On Adm. Tall thin delicate looking man with a sallow complexion dark hair & moustache & brown eyes. Pupils react normally. His lungs are healthy. Heart somewhat contracted. His heart beat is very rapid but seems regular. Tongue pale & flabby appetite good & bowels regular. Prunelles in poor condition, knee jerks present. Pt does not sleep well.

Adm Jan 18-95 Joseph Storr 60 single formerly Bank Clerk
 Cert 21 Jan 95

Was admitted on certificate Jan 7 1893 for further
 history note case book V. 65

Miss Maria Storr (sister) 2 ayr Villa, Alexandra Rd
 Crofton.

Pres. Hist. was discharged released Nov. 14. 94 & owing to the
 inability of his sister to look after him he was brought
 back today and has signed a V.B. form meanwhile
 the necessary steps for his certification are being taken

21 Jan 95 Pl was duly certified see Case Book VII. 85

Adm 21 Jan 95 Allen Lambert 36, son of Tobacco Manufacturer
 address of married relative - A. J. Lambert Esq
 Sheldon House
 Crofton. Surrey

married. children. Tobaccoist.

Pres. Hist.

From 40-5 years has suffered from his nerves and been strong
 at times. For the last six months has been unable to work
 & has had to be turned out of the business owing to the muds &
 misdeeds he made. He alleges there is a plot against & that
 his wife is poisoning his food. For last few weeks, has been
 living alone in his home owing to his repugnance to his wife.

Medical as
 advised

A-Physical. a thin but well built man pale yellow complexion
 sunken eyes, worn appearance & looking ill.

B. mental. He appears to give the history of his own case with
 impartial frankness. He states that for some months back
 he thought there was a "cabal" against & that his father &
 wife had joined with men working against him - he also
 states that he still believes this to be true. viz. that there
 was a cabal against him - he comes to this conclusion
 through political & business relations which cause unhappiness
 he is willing to recognise that should there be any &
 persons come over him here (in the H.S.) then he would be
 willing to believe that he is out of his mind & that his ideas
 with regard to his & the plot against him are false notions.
 He admits that his ideas respecting his wife have caused him
 to act in a blackguard & violent manner towards his wife,
 & that she in consequence is unable to live with him.

26
 8 Feb 95

Became Patient under certificate No. C.B. VII. 97

am 25 Jan 95 Francis Chas J. Wilson 30

Address - Miss Wilson (sister) 123 Bristol Road
Edgbaston Birmingham.

No family history of Neurosis.

Previous History

For several years manager for Chemist by whom he was suddenly without warning dismissed. During the time he worked very hard - had very long hours. He was engaged to be married for years - this was broken off some time ago causing great trouble to him. In some months he has not been himself, but has continued work up till last week, not without during that he has been subject to periods of forgetfulness, ideas of great value especially having to do with money, prophetic ideas regarding suicide - thinking he was thought to be guilty of having killed his mother - matter which all his life has might be behaved violently towards his own sister.

Condition on admission

A Physical. a well built young man with light brown hair & mustache - clear complexion. Greeny skin. Greyish brown eyes, the left pupil twice the size of the right one, both react bright and accommodation. Tongue unsteady, flabby & moist - speech hesitating (? owing to mental confusion) & not strong, distinct. Handwriting steady. Fair.

B. Mental. marked deficiency in memory. Expressed says he has lost an unspeakable amount. Gets auditory impressions - prophetic ideas that his life must end which causes him to see the advantage he might take when a train is coming into the station, is now passing station - without spending extravagantly he says, he gets ideas he is more wealthy than he is. That he is the Earl of Cadogan, that he is going to marry a royal princess, and that he is to prescribe for the Queen. He also thinks the Queen & other persons visit him under a different name such as, a Mr. Watson, whom he knows. (Gladstone)

31 Jan 95 Patient was certified Vite C.B. Vol VII. 89

am 27.2.95 Ashley Wilton Neville Thacker 28 married, late R
Left 25 Feb 95 South Laneshire.

Address - 11 M^{rs} a Shaker of Messrs Cox & Co Charing X^{SW}.

From History

He tells me he has Syphilis which he was told was contracted from his father. He has been taking large doses of Bromide & alcohol. Dr. Savage & Harvey say that there is a tendency to softening of the brain. He has had great many losses.

on admission

Is somewhat thin. Appearance of chest fair. Hb. normal at base.

Tongue coarser & unsteady. Lips tremulous.

Pupils active to light & accommodation.

R. slighter larger than left. Reaction brisk.

Reaction. His memory is poor. He talks rationally about his own doing. Tells me he has been taking Bromide. No hallucinations. Speech slow.

1 Sept 1894

VOLUNTARY BOARDERS AT HOLLOWAY.

A LOCAL PREACHER'S TRAGIC DEATH.

At the Crown Inn, Virginia Water, yesterday, Mr. G. F. Remond, Curator for West Surrey, held an inquest on the body of Mr. John Mead, an independent gentleman, formerly a Wesleyan local preacher, and for some time past an inmate of the Holloway Sanatorium, who committed suicide by placing his head on the metals in front of a railway train at Virginia Water on Saturday last.

Dr. Sutcliffe, medical superintendent of Holloway Sanatorium, identified the deceased as a gentleman who first went to the institution in January last. He entered as "a voluntary boarder."

The Curator: You have a good lot of these, I think? — Yes, about forty. They like the place, and live there a good deal cheaper than in lodgings. They like the surroundings. Mr. Mead's mind was in good order when he arrived at the sanatorium, where he had gone for rest and a change.

At first he was a little talkative, but that was all. He was not under a certificate as an inmate, and was not watched. The Commissioners in Lunacy had seen him, and were not of opinion that he need be under restraint at all. The deceased was going to leave the institution at Richmond. He was always very well-behaved, and gave no trouble.

The Curator: What did he come to the sanatorium for?

Witness: Well, he had been a Wesleyan local preacher and had taken to drink. He seemed to have run out of the lines a little for a preacher. He was allowed to go out and about as he pleased. He was very well-behaved. We took every precaution in examining him when he came.

The Curator: And yet, in spite of this —

Dr. Phillips: Yes, accidents will occur.

The Curator: Oh, yes, but it is my firm opinion, an opinion I expressed very decidedly in the case of the suicide of a theosophist at Dorking recently, that there are hundreds of persons at large who ought to be in asylums under restraint. I am convinced that generally not enough supervision is used in cases of suicidally disposed persons.

Sarah, a domestic servant, stated that at about nine o'clock on Saturday morning she saw the deceased sitting on a stile by the side of the London and South-Western Railway, near the level crossing a little way from Virginia Water Station. As the 2.54 train from Reading to London was nearing the crossing he jumped off the stile, threw his umbrella to the ground, and ran quickly down the embankment on to the metals in the train. The train prevented witness seeing what exactly happened afterwards, but when it had gone by she went to the spot and found the deceased lying out on pieces on the line.

The Curator said that the case was an exceptionally clear case of deliberate suicide. The sanatorium officials had no doubt taken all the precautions they usually did in cases of "voluntary boarders" at the establishment. It seemed clear to him that the deceased had known that previously he had been detained, under a certificate, in an asylum, owing to his having given way to drink. He (the Curator) held that there was an alarming number of persons of suicidal intentions about who really ought to have proper supervision and restraint.

A juror afterwards rose and said that recently the deceased had said to him that he went to the railway line to commit suicide, but when he saw the train coming he thought, "Well, I'm alive now, and if I do it the next moment I shall be in hell," so he ran away.

Prev. History. Has been drinking hard and steadily
for the last 3 years. The last two months
has never been sober after midday -

Physicist. Good a well nourished man of average height
smooth shaven. blotchy aspect. Tongue
and breath very foul from long continued
drinking. Has a great deal of paroxysmal
tremor. Knee jerks diminished -

mental
Aug 7th. Nothing noticeably abnormal -
Yesterday evening at 6.10 he had a
most severe and prolonged epileptiform attack
thoroughly epileptic in character, and again
another one at 8.50 pm. still more severe in
character. Bit his tongue terribly. vomited
everything given him. At 12 am he had
a succession of strong fits passing into the
status epilepticus. Death seemed certain.
I however injected per rectum, 40 gr. Pot Brom
25 gr. Am. Brom. 40 gr. Chloral. with
mucilage and 23 whisks. The fits
stopped in 10 minutes. This morning
he is very weak.

Aug 8. He has passed into a condition of Delirium
Tremens, and is in a most critical state.
Tongue much swollen, and the wounds made
by his teeth have a most unhealthy appearance.
Strychnine 7 Drops. Sinecalyptin applied
to the throat. He has been fed with milk
and whiskey as his heart is giving way.

Surgery. Strychnine per rectum -
Lij Strychnine administered. R-L health

Aug 9. This morning at 12.10 am he died
in spite of all my efforts. Was present.

Dec 6. To-day he left Horse Villa to take up an appointment

SUICIDE AT A LONDON HOTEL

DISCHARGED FROM THE MOLLOWAY SANATORIUM.

Dr. G. Dunford Thomas held an inquest yesterday at St. Pancras Coroner's Court on the body of John Sidney Thomson, aged thirty, who shot himself at Gower House Hotel, Euston Road, on Monday morning last. According to Mr. Benjamin E. Thomas, of Hildrop Road, Camden Road, N., his son was mentally affected, suffering from melancholia. For nearly two years he was an inmate of the Holloway Sanatorium, Virginia Water, but, at the instance of the Commissioners of Lunacy, and much against the witness's will, his son left that institution in October last, and, after being for a while at a convalescent establishment at Brighton connected with the Sanatorium, he returned home on the 26th of last month. He then appeared to be rational and found occasional employment in secretarial duties. On Friday morning last he left home ostensibly to attend to business, and witness never saw him alive afterwards. On Friday night a telegram was received from him saying: "All right; hope to return home to-morrow." It was witness's belief that if his son had been allowed to remain at the Sanatorium, he would have been alive now. — The Coroner: Doctors cannot detain a man who appears to be rational, and to have recovered sanity, although he may have relapsed. — The witness added that when depressed and despondent his son had been at times. — Other evidence showed that on Monday morning the deceased was discovered at the Gower House Hotel lying on the bed in his right arm, with a revolver clamped in his right hand and a bullet wound in his head. — The medical man who was called day after yesterday. — A note left by Thomson ran thus: — "Commence fight with my brother. No one is to blame for my death but myself. I ask all to forgive me and think kindly of me." — The Coroner: He seemed to think he had been a burden to his friends, and that there was nothing but endless trouble before him. It is evident he had had a relapse. — Referring to the coroner, the father said he had no notion where his son was between Friday morning and Sunday night. During his life of insanity he would wander about the streets. — The jury returned a verdict of suicide while of unsound mind.

Adm. 2 Nov. 95 Henry Eley - (admitted to Hove villa)

Cir 2 3 Nov. 95 address -

7 Nov. 95 ~~interview~~ has arrived here -

Physically, a well built average sized man, with greyish whiskers, mustache and hair. ^{fair} ~~good~~ general health - but a little run down -

Mentally, nothing to make mention of. says he has felt depressed

Adm. Oct 9. 96. Medical Practitioner - 9 Tron, N.B.

History

For the past 12 months (i.e. since his marriage) has complained of loss of will power & occasional fits of despondency - Altho able to think out what he ought to do. has been quite unable to carry out his purpose. Has always been a hard worker & bound up in his profession - Has never been a heavy drinker. (Has had no nervous or mental illness, no understanding of mind, and a slight, infrequent, headache. He has a little sleep at night.)

State on adm.
Physical.

Patient is a middle sized man with grey hair, rather bald on the top, light moustache. Heart & Lungs apparently normal. Pupils react. Right knee joint somewhat increased - tongue coated.

Mental.

Is very taken up with his own condition. I can talk of little else, his manner is quiet & his conversation rational but he seems to take little interest in things around him.

2 Nov. 1896. With attention & late notes on

12 Oct. 1896. Dr. Highet's wife married again on 10th Nov. 1896. He was, I understand, to write to her by letter but has not done so. He can not see what is the matter with him. S.A. Barclay.

Adm. Oct 24/96.

George Hingston Joriler age 32,
married

History.

Has always been a steady man. Last March he broke down & went to the Hants County Asylum, in May had an Epileptic fit was discharged as cured at the end of July, & remained well until a month ago since when he has been nervous, slept badly, suffered from constipation & at times lost control over his bladder.

Family Hist
State on
admission
Physical

ht. of about
Patient is a dark man rather above middle height, has a worried anxious expression, speech hesitating & laboured, words often clipped. Marked tremor of tongue, gait inclined to be ataxic, pupils widely dilated react to accommodation but not to light (Aryle-Robertson.) Knee jerks very much exaggerated.

Lungs show signs of emphysema otherwise healthy.

Heart etc. normal.

Digestive system Tongue furred, bowels constipated.

Mental

Is a evidently a man of very nervous temperament, altho his conversation is rational he lacks the power of more than answering questions, not voluntarily talking on any subjects. - Seems very nervous about himself & very depressed.

Oct 30/96

Will not talk much or take any interest in anything about him.

Nov 1st/96

To day transferred to patients list. See Case Book VII page 43.

Edwin Robert London

Adm. Oct 26/96.

For history etc see page 267.

Cond. on adm.

No organic disease but appears somewhat depressed & generally "seedy". W.T.

Nov 11/96.

On admission he was thoroughly searched & morphine discovered in his clothes etc. but in spite of his protestation that he had no more he managed to conceal some & has been taking it since admission. He admits to having done so. He has no apparently furnished it.
