Dear Sir,

I much regret you did not receive an acknowledgement for the obstetric forceps which you kindly lent for the Historical Medical Museum. A printed form of acknowledgement was forwarded to you on the day the instrument was received from Messrs. Arnolds. It has already been placed in the Museum.

Apologising for the miscarriage of the acknowledgement,

To - Wellcome Esq
Dear Sir

Herewith I forward by "Parcel Post" a complete Chinese Medical & Surgical work. It consists of 24 volumes - & is divided into 4 sets - each set containing 6 books. The work is illustrated & deals with inward & outward diseases - remedies of all kinds - & the extensive use of the needle - an instrument which is second to none in the estimation of the Chinese.

This particular work is considered to be of a high order by the Chinese - & was strongly recommended to me on that ground. It has been printed in Shanghai - & is widely used amongst native Doctors. Its cost, places it within comparatively easy reach of all would be students - amounting to about Four shillings & six pence of English money.

I trust it will be of some use to you in your exhibition. Having been moving about a great deal during the past few months - I have lost your letter. However I hope it will be in time - for the purpose for which you require it. With kindest regards -

I am
Sincerely Yours
W. E. Burnett.

Dear Sir,

I desire to thank you very cordially for so kindly sending me the Chinese medical and surgical apparatus for my collection, which are duly come to hand. I am sure it will make an important addition to the collection of Chinese medicines in the Historical Medical Exhibition.

Will you kindly let me know the price of the same, and I shall be pleased to remit you a money order for that amount.

I am thanking you for your attention, and for the trouble you have taken in the matter.

Dear Sir,

I desire to thank you for your post-card of the 29th ult., and for your kind offer to loan me the books and illustrations you mention for the forthcoming Historical Medical Exhibition.

I have not yet been able to fix the date for the opening of the Exhibition, but as soon as I can do so, I will communicate with you again.

You will find in the syllabus which was sent to you under separate cover, and which no doubt you have by this time received, full particulars as to packing and insurance for which I shall be responsible.

Please do not forward any objects until you hear from me when the Exhibition is to be opened.

Dear Sir,

I desire to thank you so kindly sending me the old glass bottles for inspection. They are specimens of the draught phials that were used about a century and a half ago. I have a great number of these bottles in my possession, as they are turned up in large quantities in excavating foundations in the City of London. However, if you will kindly let me know the price you require for them, I shall be pleased to consider the matter of their purchase. If you care to send the leather and also on approval, please state price.

Any objects connected with medicine, chemistry, pharmacy or the art of healing, such as old surgical instruments or implements used in medicine, I shall be glad to hear of, should any come in your way.

Now consider of what
you are collecting. I might

Dear Sir,

I desire to thank you for your letter of the 11th inst., and for your kindness in sending me the old leather mug for inspection. It is an interesting piece, but I am afraid it will hardly come within the scope of the Historical Medical Exhibition. I am therefore returning it to you per registered post to-day.

I have pleasure in enclosing you a cheque for six shillings, plus fourpence for postage, for the four old bottles, and trust you will find this satisfactory.

I shall be very pleased to have further particulars of the curious medical appliance you mention for sucking air, and if you could have it sent to me for inspection I should be most interested in examining it. I shall be pleased to bear cost of carriage.

With respect to the miniature of William Pitt, I am afraid it is impossible for me to form any opinion of it from the photograph and description, but if you think it worth while to send it to me I shall have great pleasure in submitting it to an expert for you.

Again thank you very cordially for the trouble you have taken on my behalf,

Dear Sir,

I have received your letter with the inclosed labels.

I desire to inform you that the number of old microscopes has increased since your first letter, according to the accompanying list.

I should be glad to send these instruments to the exhibition, but I would draw your attention to the fact that most of the microscopes consist of several pieces which must be separated in order to be packed, and at the exhibition must be put together again.

Also there are several little objects belonging to the microscopes (objects - glasses, &c).

Can you assure me that the exhibiting and the reconstruction may be done by you, and that

nothing will be lost? Of course
you will have some trouble with
it, but if you don't mind
that, and if you think that the
objects can be wholly arranged by your-
self, I am willing to send them
to the exhibition. In this case
please send me some 5 or 6 more
labels, as the 4 which you have
sent me are not sufficient.

I will describe the objects
as clearly as possible.

Dear Sir,

In reply to your favor of April 9th duly to hand I beg to say the print of the *fo* of medicine I sent you is after Shên-nung.

Shên-nung was one of the first three Emperors of China and is said to be of supernatural birth; he taught the people the various uses of medicines.

Shên-chên-jên or Yao-kang (God of medicine) practiced as a doctor and was deified after death by the Emperor. He lived in the Tang Dynasty long

Dear Sir,

In reply to your
Circular of Nov. I
have much pleasure
in sending you by
same post as this

a Print of the god of
Medicine. The last three
characters, ^{on enclosed slip} is his name
in Chinese — Sun - Si -
miao. He was a Surgeon
in the second reign of
the Tang dynasty and
was deified by the Emperor
because of his successful
treatment of the Empress
during her confinement.

With kind regards

Dear Sir,

I desire to thank you most cordially for so kindly sending me the print of the Chinese God of Medicine which will be a valuable addition to the Chinese section on Medicine in the forthcoming Historical Medical Exhibition.

I was given to understand that the earliest Chinese Medical Deity was Shen-nung. Would you kindly inform me if the print of the god you sent me is anterior to or after Shen-nung's time.

Again thanking you for your kindness and for the trouble you have taken in the matter,

Mr. N. S. Wellecome.

Dear Sir,

This morning I have
a letter from the Rev. Mr.
Mackenzie of Churis - at
present in London, ask-
-ing me to forward the
enclosed photo. to you.
This photo. I received
some time ago. from

my sister in China -
Mrs Garden Blairie.
She sent it to me by
Mr. Mackenzie when he
came home - but gave
no instructions what-
ever concerning it.
I have been expecting
to hear about it by
each mail, but so
far, it has never been
mentioned. I fear Mrs
Blairie must have
forgotten, that no partic-
ulars were sent with
the photo.

Will you kindly let me
know, if this is all
right. If you have
instructions regarding
it.

Yrs. truly

Madam,

I beg to acknowledge the receipt of the photograph which you kindly forwarded to me from Mrs. Garden Blaikie, of Swatow, China.

Mr. Mackenzie wrote to me some weeks ago, stating that he was forwarding this photograph for the Historical Medical Exhibition, and that it had been kindly lent by Mrs. Blaikie. I will return it to her after the exhibition is over.

With many thanks for the trouble you have taken in the matter,

Sir,

The accompanying
note from Mr. Blairie,
Swatow, has only just
reached me this morning,
along with explanatory
notes of the photo sent
by Mr. G. for the Exhibition
to be held in London.

Mr. B. also requests me

to send you a Copy of the
photo, as she wishes
me to keep for her here,
the original.

As you will remember,
I was requested by
Mr. Mackenzie, some weeks
ago, to forward this photo
to you, which I did, as
nothing had been said
to me of having it
copied. And now, since
you have the original,
I suppose I must leave
it, trusting that you will
take good care of it.

When the Exhibition
is over, will you kindly
return it to me here,
to keep for Mr. Blairie.

Sir -

The accompanying

The friend who was to

photo. stupidly omitted to

do so, hence the mistake.

The accompanying photograph shows a calculus, which was taken from the urinary bladder of a Chinese woman in the Women's Hospital, Swatow. It has been broken across to show the nucleus round which it had formed, which was a piece of bamboo, smeared with native medicine, inserted by mistake into the bladder, in an attempt to procure abortion.

After two years of extreme suffering and the ineffectual use of much native medicine, the patient came to the Western doctor and had the stone successfully removed. It weighed 11 drams and measured nearly 3 inches in length.

Dear Sir,

I have pleasure in sending you two objects which I think may be of service for your Exhibition. I hope they will be in time.

The first is a booklet which was presented to me by the priest at a temple here and is a good example of Chinese native medical lore. I send with it an explanation of its contents. The second is a photograph of a urinary calculus extracted by my wife, which has an interesting history. She has supplied the details. You need not trouble to return these objects.

Dear Sir,

I desire to thank you for your kind letter of the 13th inst.

Referring to your collection of ancient microscopes, I am very pleased to hear that you are able to lend us such an important collection. I shall be pleased to exhibit them all, and undertake they shall be properly reconstructed for exhibition, and every possible care will be taken of them.

I shall personally arrange the objects, and shall be glad to receive them between the 1st and 31st of January next.

Please have them packed with great care, and advise me in advance of the amount you wish them insured for.

Thanking you very cordially for the trouble you have taken in the matter,

Dear Sir,

In answer to your kind letter, I beg to inform you that the different gynaecological plaster models represent:

- 1) opening of the uterus of a virgin (os uteri)
- 2) " " " after repeated confinement.
- 3) the other ~~models~~ represent the different stages as they ~~are~~ ^{may} be felt with the fingers - up to delivery.

I cannot give a correct description without having the objects before me, but on the other hand any gynaecologist in London will be able to ~~tell you the~~ recognise each model.

I have still a few herbals & anatomical books with copper plates & others which might interest you. Should you care I could ~~let~~ ^{send} you have the titles of the same or even the books.

Yours &c. Dr. F. Bossard, Cham.

Translation of letter to Dr. Bossard.

30 August 1913.

Dear Sir,

I desire to thank you very cordially for your kind letter giving us the information concerning the gynaecological plaster models. If you would be good enough to send us a list stating the titles, authors' names and dates of publication of the books and herbals on anatomy you mention, and also the price you require for the same, we shall be very pleased to give the matter early consideration.

Faithfully yours,

Translation of letter to Dr. Bossard, 23 August 1913.

Dear Sir,

Some three years ago you very kindly sent us two boxes containing models for gynaecological in plaster coloured red. These have now been placed in the H.E.M. of the International Congress of Medicine, and I should be glad if you would kindly let me know for description in the catalogue what these models were used for and let me have a full description of them. Each of them I notice is numbered. I should be very grateful if you could furnish me with any information relating to them.

Thanking you in anticipation,

Please accept my best thanks for the cases which have arrived
to-day. They are most excellent being very practical and compact.
If I hear of anything further for your exhibition, I will send
it you on immediately,

I am glad to hear that the old books and instruments reached you safely, and am still more pleased to hear that you are so kindly sending me a no 702 tabloid case, and 505 solid bacteriological case.

Herewith I am sending you a few prints from two old Bibles, which may perhaps be of some interest to you. The four small pictures illustrating the history of Job came from a Bible in Venice, printed in 1519 (V. Luce Antoni de giunta Florentini die 15 mesis Octobris, 1519). The bigger picture is from an Augshurg Bible, 1618, and depicts the Circumcision of Christ (as it appears without instruments.)

Should I find anything further in my Library, I will willingly send the same to you.

Mit Gegenwärtigem erlaube ich mir, Ihnen meinen verbindlichsten Dank auszusprechen für die Manuskripte, Bücher sowie die chirurgischen und zahnärztlichen Instrumente und die gynäkologischen Gipsmodelle, die Sie die Freundlichkeit hatten, mir für die Historisch-medizinische Ausstellung zu überreichen. Ich habe die Gegenstände mit grosser Interesse untersucht, und werden dieselbe eine wertvolle Bereicherung der Ausstellung bilden.

Es wird mir ein Vergnügen sein, Ihnen so bald wie möglich ein 'Soloid'-bakteriologisches Besteck No. 505, sowie die 'Tabloid'-Apotheke No. 702 zu übersenden, in der Hoffnung, dass Ihnen dieselben in Ihrer Praxis von Nutzen sein werden. Sobald ich instande bin, dieselben abzusehen, werde ich Ihnen Versandsavis zukommen lassen.

Indem ich Ihnen nochmals verbindlichst für Ihre Gefälligkeit und das der Anwesenheit entgegengebrachte Interesse danke, empfehle ich mich Ihnen

Please have the following translated into German, and return to Mr C.J.S.T.

Dear Sir,

I desire to thank you very cordially for the Mss, books, surgical and dental instruments, and gynaecological models, which you have so kindly presented me for the Historical Medical Exhibition. I have examined them with considerable interest, and they will form a valuable addition to the Exhibition.

I shall have pleasure in forwarding you as early as possible a 'Soloid' bacteriological case, no 505, together with the tabloid medicine case, no 702, which I trust you will find of service in your practise. As soon as I am able to despatch these, I will again write you a letter of advice.

Again thanking you very heartily for your kindness and the interest you have taken in the matter,

Yours very truly,

Dr F. Bossard,

Translation of letter addressed to Mr. Wellcome by
Dr. Fr. Bossard, Cham, Switzerland; dated Nov. 12th, received
November 15th, 1909.

According to your wish I have to-day sent you the
obstetrical tongs, 4 dental instruments, 2 gynaecological
plaster models, a few manuscripts and books, to your address, and
hope that these things will arrive safely in London, and will
make more complete your Historical Medical Exhibition. I leave
these objects entirely in your possession, and I should be glad,
if you would kindly let me have in acknowledgement some medicine
case from your rich catalogue. As I am much occupied with bacte-
riological examinations I should be glad to receive the 'Soloid'
Bacteriological Case No. 505, and as I often go to the country to
visit my patients, I should profit by your 'Tabloid' No. 702, but
I should not like to be immoderate and leave the choice entirely
to your discretion. I could make use of everything of your
beautiful products and cases.

Dear Sir,

I desire to thank you for your letter of the 23rd ult., and for your kind offer to loan me the old obstetric forceps, the vectus, and the copy of an Egyptian prescription, 1552 B.C., for the forthcoming Historical Medical Exhibition. The book you mention I already possess a copy of.

Any objects of interest connected with native medicine in the district in which you reside, such as native surgical instruments, charms, or other objects used by witch doctors etc., would be greatly appreciated, as the medicine of the Far East will form an important section in the Exhibition. I should be glad to hear from you, if you should meet with any articles of this kind.

I have 2 pair of obstetric forceps & a vectus of about 70 years ago an old book "Dr Brookes General Practice of Physic" 1766 London. A fac-simile of an Egyptian prescription 1552 B6 that is now in our Museum but of course these would not interest you where you will have such a wealth of material. Dear Sir,

Before Dr. Stein went away he kindly offered to lend us several objects for the Historical Medical Exhibition to be held in London next year in connection with the meeting of the International Medical Congress.

These objects include -

- 1) Portion of medical handbook of case records, in Chinese:
- 2) Cover of small medicine chest (circa time of Christ), together with several other objects of medical interest.

He asked us in his absence to apply to you when we required them. I should therefore be glad to know if we might have them early next month. I enclose a form giving full particulars. Kindly state the value you place on them for insurance purposes.

Dear Sir,

If you will kindly send me a syllabus containing particulars of your proposed Historical Medical Exhibition with to the Clerk Room, St. Bartholomew's Hospital or to 14 Alfred Street, Coleburne Rooms, Islington, N. I will send you a list of anything I have which if suitable I shall be pleased to lend you. My large collection of the Hospital & Smithfield is I am afraid not available as it is packed away in a number of cases & trunks, but I have sent

views of the Hospital, some old prints &
Caricatures, & a copy of the water colour of
Raker Ward done by a patient in 1833 which
hangs - the Ward, I got special permission
to have it copied which during publication
I sawy about 20 years ago, it shows the old
wooden beds etc., But when I know the
kind of things you want I will send you a
list, with small photographs of some of them.

I am
Yours truly

Dear Sir,

I am informed by my representative, Mr. Macvic Hill, that you have been kind enough to offer to loan me an ancient mortar and an Apothecary's Note Book, of the seventeenth century, for the Historical Medical Exhibition.

I shall be very pleased to avail myself of your kindness when the Exhibition takes place in 1913.

Due notice will be forwarded to you of the time and place when the objects should be forwarded.

Dear Sir,

I am returning herewith the remainder of the prints and engravings, thirty two in number which you so kindly lent to the Historical Medical Museum. With reference to the coloured caricature entitled 'Physic', will you kindly let me know if you would be willing to dispose of this to us for the permanent Museum, as it is interesting from a pharmaceutical point of view. If so, will you kindly let me know the price required.

I take this opportunity of thanking you very cordially for your kind assistance which we much appreciate in making the Museum a success.

I desire to thank you for your letter of the 23rd inst., and for your kindness in offering to lend me such an interesting collection of objects for the Historical Medical Museum.

I am glad you have sent me a preliminary list, as a number of the portraits you have enumerated have already been sent in. I have, therefore, struck off in red pencil those we have. With respect to the books, I have copies of them in hand.

The rest of the objects I should be very pleased to have, if you could kindly send them at your early convenience.

Thanking you for your kindness and the trouble you have taken in the matter.

Dear Sir,

I am sending you a list of Prints, Portraits &c
I can lend you for the Historical Medical Museum, I
leave it entirely to you to show or not & among them
as far as the fit, as owing to the recent death of my
Francis & parents Sister the continued illness of another
Sister, I have not had time to see to any of. Besides the
list, I have two old oil paintings, rather dilapidated & not
framed, one with 2 figures; the body most decayed & remaining;
but are not likely to fit it for some time, the 1st is $33\frac{3}{4} \times 29\frac{1}{2}$.
A Surgeon is dressing a man's leg, one man holds his leg, & another
supports him behind & 2 women are looking on. The 2^d is $25\frac{1}{4} \times 19\frac{1}{2}$
A Surgeon is operating on a man's scalp, various pots & canes are at
at which another man sits, another man is standing behind the Surgeon
A woman holds a child behind her & another child is standing by
her side. I have not included them because I don't think of
an worth showing in their present condition, I suspect of an old copy.

I have also 3 books by Sir Benjamin Brodie, the 2^d Surge
in Medicine in London at St. Bartholomew's Hospital - 1855 when the Hospital
Court in the Brief, & on the bench of an agent by long members
of the senior staff of that day which makes them interesting. I do not
suppose that the 3^d Edition of Sydenham's Works which is 1695.
The 1st Edition of The Dispensary will be interesting enough, but I
will send them with pleasure if you.

You have been in communication with Mr. Mansel. re the loan of some jars which he possesses and he now says that he has some ancient pharmaceutical books which may be of interest. He will lend these also should they be desired. They are

- (1) 'Garth's Dispensatory' - an early edition - 18th century
- (2) 'Colpeppers London Pharmacopoeia'
- (3) 'do. English Physicians (Enlarged)'
- (4) 'Ambrose Pare's' Manual of Surgery an English translation dated 1568.

Perhaps you will write him regarding these.
