Commissioners
in
Lunacy
12. Within seven days after the admission of a Patient there shall be entered in the
Medical Case Book for Patients the following particulars:
29 June 1912
Hamiltonian
W. Andrews
Frank Fairbank
29 June 1912 Hamiltonian
W. Andrews
Frank Fairbank
(a.) A statement of the name, age, sex, and previous occupation of the Patient, and
whether married, single, or widowed, and a copy of the statement of facts contained in the medical
certificates accompanying the reception order.
T. N. 1912 Hamiltonian
W. Andrews
Frank Fairbank
(b.) An accurate description of the external appearance of the Patient upon admission—
the habit of body and temperaments; appearance of eyes, expression of countenance, and any
peculiarity in form of head, physical state of the vascular and respiratory organs, and of the
abdominal viscera, and their respective functions; state of the pulse, tongue, skin, &c.; and the
presence or absence, on admission, of bruises or other injuries.
May 15 1913
Hamiltonian
W. Andrews
Frank Fairbank
(c.) A description of the phenomena of the mental disorder—the manner and period of the
attack, with a minute account of the symptoms, and the changes produced in the Patient's temper
or disposition; specifying whether the malady displays itself by any and what delusions, or
irrational conduct, or morbid or dangerous habits or propensities; whether it has occasioned any
failure of memory or understanding; or is connected with epilepsy, or ordinary paralysis, or
general paralysis.
Hamiltonian
W. Andrews
Frank Fairbank
(d.) Every particular which can be obtained respecting the previous history of the
Patient—what are believed to have been the predisposing and exciting causes of the attack;
what were the previous habits, whether active or sedentary, temperate or otherwise; whether the
Patient has experienced any former attacks, and, if so, at what periods; whether any relatives
have been subject to insanity or other nervous disease, or phthisis; whether the present attack was
preceded by any and what premonitory symptoms; and whether the Patient has undergone any
and what previous treatment, or has been subjected to restraint of personal liberty.
13.—Subsequent entries describing the course and progress of the case, and recording
the medical and other treatment, with the results, shall be made in the Case Book for Patients at
the times hereinafter mentioned, that is to say, once at least in every week during the first month
after reception, and oftener when necessary; afterwards, in recent or curable cases, once at least
in every month, and in chronic cases, subject to little variation, once in every three months. But
all special circumstances affecting the Patient, including seclusion and mechanical restraint, and
all accidents and injuries, must be at once recorded. A printed copy of this and the last preceding
rule shall be inserted at the beginning of every Case Book for Patients.

Mrs. Annie Kendall Brown

1901

Sept 28th

admitted Sept. 28th 1901.
Weight 13.7 lbs

Today Mrs. Brown was admitted as a patient
having been here as a Voluntary Boarder
since Aug. 16th 1901.

Statement:

of

Particulars:

Patient is 59 years, married, church of England
and has had several recurrent attacks of insanity.
Her first attack was at the age of 15 yrs.
when she was admitted to the Priory, and
has been admitted there on two more occasions.
Patient was admitted to "Lichfield" on Oct 15, 1900
and discharged Recovered on July 1st 1901. Since
July 1st she has been living with her daughter
and has gradually become depressed and
melancholic. She has a history of insanity
her father being insane. She is said not
to be suicidal, epileptic, or dangerous. The
duration of this last attack is said to
be 6 weeks.

Mr. BorowMedical Certificate
No. 1.Dated Sept 24th
1901.

Tests indicating insanity observed. She says that she is a most wicked woman who committed every offence, has ruined everyone and everything, has caused a vile smell which can be smelt for miles, that she is not properly dressed.

Tests communicated by the Acting Surgeon of the Highlands District, who has said that she is essentially making the same complaint. That there is no fault in them, that she has injured nothing.

Signed: A. Warran Woodroffe,
District Surgeon.

Tests indicating insanity observed.

Medical Certificate
No. 2.Dated Sept 23rd
1901.

Patient in bed at the time of examination waving her hands and saying she has killed millions of people, says that she smelt emanating from her bed killed all the people round in less than a week.

C. Robert Payne
District Surgeon.
Surgeon

1901

Sept 28thMr. Borow

Condition on admission

Mental Patient is suffering from acute melancholia with delusions. Says that she is the most depraved woman in the world, the greatest sinner, has committed the most filthy offences, has ruined the St. Ninian's and that District is now desecrated for ever. Also says that the people are all dying since she came here and everyone who comes near her is doomed.

Physical Patient is tall and rather thin, eyes blue, hair grey and complexion pale. Heart sounds irregular and feeble. Arteries are hypertrophied and degenerated in St. Ninian's District who exam. her here in Feb 1901.

1904
Sep. 28th

Today Patient is very depressed and dull. Complains that she is so worried. Has caused so much misery to everyone. Has caused all her friends and relations. Has ruined everyone who has been kind to her in fact is the most degraded woman in the world. Her general health is good. She has a distaste for food at times and has restless nights also. Takes Pils. Sinaid $\frac{1}{2}$ J.A.A.

Sep. 29th

Today in the same depressed state and exhibits the same delusions. Says that she is not properly dressed, has no clothes and no money, that she can't pay for her food and that she has stolen poisoned several gentlemen at the Highlands since she came. Has taken her food well today. J.A.A.

Sep. 30th

Continues depressed and is constantly repeating her delusions. At night she is restless, immediately she wakes and keeps getting in and out of bed in an aimless way. Says she has no right to be here as she is doing so much harm. Takes 1 $\frac{1}{2}$ Pils. Sinaid daily. J.A.A.

1904
Oct. 1st

Mr. Brown still states she has no money. That she will never be any better and is not fit to associate with the lowest scamp. Is taking her food better and her physical state keeps good. Also sleeps fairly well with Pils. Sinaid $\frac{1}{2}$ each night. J.A.A.
Is not quite so depressed today but still says she is the vilest woman on earth. Has been reading the paper and went for a drive today. J.A.A.

Oct. 2ndOct. 3rd

Report sent to the Commission in Lunacy. Patient is very depressed, has many gloomy delusions e.g. that she is ruining the place that she makes it intolerable by the smells which she creates, that she has no clothes nor money. She is not at the least of times a sitting person having a weak circulation and delicate lungs. But her present condition has not affected her mind. J.A.A.

Oct. 4th

Had a good night, but this morning was rather more silent than usual and more depressed. Taking her food well now. J.A.A.

Oct. 5th

Mr. Brown is still very deluded, says that she has ruined everyone in the world. Is taking her food well keeps better. J.A.A.

1901

Oct 8: Mr. Barons remains depressed and her delirious
parox. asked me to leave her room today
as if I did not I should be poisoned by the
smell she made. Spasms daily. J.H.D.

Oct 10: Patient remains very delirious and depressed.
Still says delirious ruined everybody and
ought to be changed. Not taking her food well.
Sleeps fairly. Has Puls Grand $\frac{1}{2}$ each night and

J.H.D.

Oct 12: Mr. Barons still says she has ruined everyone
and is the worst woman in the world. Says
delirious people calling after her now when she
is out for a walk (which is not the case) J.H.D.

Oct 13: Patient manifest very little mental change
and expresses the same delirious. Has slept
better and is taking her food well. J.H.D.

Oct 14: Mr. Barons still says she has ruined everyone
of her relations and is not fit to live.
also keeps believing as if I got rid of
some awful smell as she says that
she thinks. Still taking her medicine daily
and Puls Grand each night, but she is
restless and sleepless. J.H.D.

1901

Oct 15: Mr. Barons is very depressed today, says she can't
live as she has been so worried. Also her hallucination
of smell cause her evident pain especially as she
thinks that it comes from her body. Has put her
on a "Sundae Ticket" today. J.H.D.

Oct 16: Patient still very low and miserable. Has weaned.
the dose of P. elapette m. to 1/2 as she is
so restless, also she is taking Puls Grand $\frac{1}{2}$
each night but she sleeps very little. Has not
taken her food quite so well today. J.H.D.

Oct 17: Had the best night since admission last night
sleeping 7 hours and today she is not so
restless, and her delirious are not expressed
quite in the same way. Has also taken her
food better than she has been for some time. J.H.D.

Oct 18: Had another good night and is rather more
contented. Still says she is not fit to
live. Has been out walking and takes
her food better. Taking her medicine in the P.M. J.H.D.

Oct 19: Continues to sleep better and her restlessness
is less marked. Still looks very depressed and
sad. Is taking her food well. J.H.D.

Oct 20: Is still very depressed but is sleeping better.
Spasms for walks and drives daily and is
taking her food with pleasure. J.H.D.

1904

Oct 24th

Is better a little today and does not look quite so dejected, also answered when spoken to at times. Has been out for a walk. J.H.H.

Oct 26th

Continues to improve a little Mentally and is sleeping and taking her food better. J.H.H.

Oct 27th

Had a very restless night and today patient is very depressed again, says that she is so wicked and is the worst woman in the world. Has not taken her food quite so well. J.H.H.

Oct 29th

Not quite so depressed and conversed a little quite rationally for a few minutes with mother today. Still has the delusion she will never be any better and that she is the greatest sinner in the world. Taking her food better again. J.H.H.

Oct 30th

Mr. Brown remains in the same acute state of Melancholia with delusions & hallucinations of small animals. Her delusion continues full she is taking her food fairly well with assistance. Still taking Morphine. J.H.H.

Nov 1st

Still states she is the vilest woman in the world, that she has ruined her family and is not fit to live. Taking her food better. J.H.H.

Nov 2nd

Had a very restless night and this morning is very dull and depressed. Has been out for a walk but is not taking her food well today. J.H.H.

1904

Nov 5th

Mr. Brown remains in a state of extreme delirium & is continually washing her hands and demanding the red feet of all belonging to her whom she has ruined. Taking Pills 4 times each night and sleeps fairly well. J.H.H.

Nov 7th

Her melancholic condition does not improve and she is restless, miserable and dejected. Have attended her medicine today giving her now 30 mins a day P. 3.00 P.M. and Pills 4 times each night. J.H.H.

Nov 10th

Is still very miserable & restless but has slept rather better and is less obstinate about her food. Has out daily for a walk. Continues to take her medicine. J.H.H.

Nov 15th

Mr. Brown is rather less depressed now the whole appears to be improving Mentally. She takes her food better. Has out for a walk daily. J.H.H.

Nov 20th

Patient still thinks she is the vilest woman in the world, that she has no money and that she is spoiling the lives of everyone here. Is now very obstinate with her food. J.H.H.

Dec 10th

Mr. Brown is still very depressed & has not gained a good deal. Her delusions are still troublesome with her food she has lost weight. Has some liquid diet for which she is having a portion of Pills 4 times each morning. J.H.H.

1901

Dec 23rd

Mr. Brown is still very depressed and has numerous delusions about herself. She sleeps badly. Has Puls. Triad $4 \frac{1}{2}$ each night. Also is taking 4 grains $\text{m} \frac{1}{2}$ three times. J.H.H.

Dec 30th

Patient is still very troublesome about her food. Will not eat: insists: constant fussing. Also she still thinks she will never get any better. Says she is the greatest dummy in the world. Thought not to be allowed to live.

Ordered today $\text{P} \frac{1}{2}$ Ammonium Bromide $\frac{3}{4}$ gr. $\frac{1}{2}$ anacardi $\frac{1}{2}$ gr. a grain $\frac{3}{4}$ gr.

$\text{P} \frac{1}{2}$ $\frac{3}{4}$ $\frac{1}{2}$ J.H.H.

1902

Jan 8th

Mr. Brown has been sleeping somewhat better since we: told her not been quite so depressed, but is still obstinate at times not taking food. Continues her medicine. J.H.H.

Jan 14th

Continues depressed and restless, says she is not fit to live. That she has disgraced her children: and that all the other patients are disgusted with her. Is still troublesome about her food goes out for a walk daily. J.H.H.

Jan 18th

Today she remained in bed as she had some pains of left foot. Still has the same delusions and does not be persuaded with anything she eats. Has Puls. Triad $4 \frac{1}{2}$ each night. J.H.H.

1902

Jan 22nd

Patient remains in bed in the same depressed state always saying she can never be any better as she is so wicked. Has the same difficulty with her food which is a great drawback to her. Is taking $\text{P} \frac{1}{2}$ Ammonium Bromide $\frac{3}{4}$ gr. $\frac{1}{2}$ anacardi $\frac{1}{2}$ gr. J.H.H.

Jan 26th

Mr. Brown remains in bed and her mental state is no better. Also she will now only take liquid nourishment with a good deal of trouble. Her heart is feeble and she feels weak. J.H.H.

Jan 29th

Patient has been up a little today and is rather less depressed, but she does not sleep much. Is very obstinate with her food. J.H.H.

Feb 2nd

Patient sits up a little each day, but is still restless and sleepless. Have given her today $\text{P} \frac{1}{2}$ $\frac{3}{4}$ Ammonium Bromide $\frac{3}{4}$ gr. $\frac{1}{2}$ anacardi $\frac{1}{2}$ gr. Noticed her face a little swollen today. Her urine cloudy & scanty. J.H.H.

Feb 3rd

Had rather a better night in taking her food better today. Urine $\text{Sp. Gr. } 1025$. Cloudy. Abdominal distention. Urinary $\text{P. } 4$ crystals on I every day. J.H.H.

Feb 6th

Patient is still restless and depressed. Also not obstinate about her food. The quantity of albumen in her urine is less and no cast can be found. Her pulse has improved, but she is in a weak feeble state both mentally and bodily. Is still taking digitalis. J.H.H.

1902.

Feb 12th

Patient is somewhat better mentally but still means during the day a good deal as if in pain, but will not say if she has any pain anywhere. Her urine is almost free from albumen & quite clear. Is still listless about her food and does not sleep well. L.H.D.

Feb 18th

Mr. Barnes is still very depressed and will not reply to questions, only means when spoken to. In talking I try not to say "I" and her pain is improving. Is still listless about her food but has slept rather better the last few nights. L.H.D.

Feb 20th

Today patient is much brighter & conversed quite rationally with me for some time says she can't remember things for the last 3 months. She has taken her food herself today (which is the first time this year) & has been reading the paper. In talking to her & has a bilateral perinephric kidneys. Albumen in urine less. L.H.D.

Feb 26th

Mr. Barnes continues to improve mentally daily. She now takes her meals herself without any assistance, reads, writes and has done some knitting. Her conversation is quite rational for at times she thinks of her past condition when she says she is still very unwell. She continues to take Digitalis & the albumen is less in her urine. L.H.D.

Mr. Barnes

1902.

March 10th

Mr. Barnes continues to improve in health and her mental state is better. Is now taking her food well and goes out daily. Sleeping better. L.H.D.

March 28th

Patient is not quite so depressed and does not exhibit so much mental pain. She is eating well & goes out daily for walks and drives. L.H.D.

April 8th

Patient is not so well again and says she will never get better - that God has forsaken her & that she is only fit to be buried. She is restless & nervous at night and does not take her food so well. Is taking Digitalis & Digitalis - The amount of albumen in her urine is less. L.H.D.

May 20th

Is still depressed and thinks she is a very wretched woman, but she will converse more rationally & is taking her food better. L.H.D.

June 15th

Is not quite so melancholic but still does not sleep well & keeps on groaning as she breathes. Says she will never get better. Is still on a suicidal belief. Still fair. L.H.D.

July 12th

Remains very depressed still but not sleeping or taking her food so well. Has had several late and night and morning dials. L.H.D.

Aug 10th

Patient is sleeping rather better again & is not so depressed and is taking her food better. Goes for walks daily & converses more. L.H.D.

Mr. Barnes

1902.

Sept 4th

Patient is still deluded, restless and suspicious at times about her food. Says she will never see any better unless her cat arrives. Her health is fair, is taking
 R. on 1000 3rd

 agent 2nd
 Ref. by J. G. G. G.

J.H.H.

Oct 11th

Patient has improved since last visit being more cheerful & not so deluded. Also she sleep better & goes out daily for walks.

J.H.H.

Nov 12th

Patient is still dull & depressed, says she does not want to go home. Her wishes must all be fairly & she can never be any better. Her health is better.

J.H.H.

Dec 10th

M. Brown has been less depressed, not so deluded and will now converse much more rationally. She still says she will never see well but now wishes to go home for Christmas. She is sleeping better and her health has improved.

J.H.H.

Dec 16th

Today left here with her nurse for a month's leave to her home in London. She was more cheerful today & looked better.

J.H.H.

1903

Jan 10th

Patient was today
 Discharged. Relieved

A number of blank pages follow
and have not been photographed.

Mrs. Eliza Sarah Hodges.

admitted Jan 2nd 1902.

1902.

Weight

Jan 2nd

Patient arrived here this evening at 6:30. She took a good dinner and retired at 10. pm.

Statement

of

Particulars.

Jan 21st
Condition
on
admission

Wife. On admission patient is seen to be very
depressed, restless and quite unable to carry on
a rational conversation without constantly referring
to her delusions. She states that she is an awful
sinner not fit to speak to anyone and ought to
be in Hell. But she is not alive at all & that
all her limbs and brain are black - that her
soul is lost and she is fast all hope, also she
hears people talking in the room who are not
there, and is constantly looking up at the top of
the room for some one to come & fetch her into
the streets and carry her to Hell.

Physicals. Patient is a stout looking lady in good
health but has an anxious expression as if very
troubled and a slight hectic flush. Her breath
sounds are normal also her heart sounds.
She has dark brown hair, brown eyes and a
somewhat congested complexion. Her urine is
faint, Sp. Gr. 1015. no albumen or Sugar present.
Her skin is pallid and her breath is very
offensive.

1902.

Prof. F. S. Hodges.

Jan 21st

Patent was very restless and depressed this evening and exhibited numerous delusions chiefly religious. She said one time she wished she was in that room in the world was as bad she had no hopes of getting better. She took a good dinner and slept the first part of the night after which she was restless. Sent Paul Conrad by and Paul Conrad
 J.F.H.

Jan 22nd

In restless and depressed this morning, says she wishes to be shot. Complaints of voices troubling her and has a habit of picking her fingers which are quite rough and covered with abrasions. In the evening she was not so restless. Made walk today when she felt better. Detaching P. Conrad from the 1st to the 2nd.
 J.F.H.

Jan 23rd

Had Paul Conrad by last night had rather a better night than the previous one. She remains rather depressed but has been doing a little reading and needle work today. She was so anxious about her room - she has not expressed her delusions so much she has rather more mental control. Still picks her fingers. Has been for a walk today and is eating her food very well. Looks better in the face.
 J.F.H.

1902.

Prof. F. S. Hodges.

Jan 24th

Patent and G.H. sleep rather tonight today and has been less deluded. Wants an entertainment in the music hall this evening which she enjoyed. Detaching her food very well.
 J.F.H.

Jan 25th

Patent restless again last night and rather more depressed and deluded to day but has been more cheerful this evening playing games with her nurse and reading a little.
 J.F.H.

Jan 26th

Slept part of the night but still has restless turns at intervals during the night. Today she has been bright and has written a letter also has been to chapel this evening. Her delusions are getting better.
 J.F.H.

Jan 27th

Patent sent to the Commission in Lunacy. Patent is more deluded many delusions as to her surroundings. That she is hot - that she is a mass of sin. That the bones of her skull are not bones but hardened tin. She also hears chains rattling - and she accuses of those who have become lost by her wickedness. Her good health & condition checked on admission after considerable discussion about her with some delusions on her own. These were she says caused by her herself - and it is apparent that it was so.
 J.F.H.

1902

Jan 30th

M^r. Hodges still thinks she is a wicked woman that people are afraid of her, but she is more cheerful & takes more interest in her surroundings. Is sleeping and eating well. J.P.H.

Feb 3rd

Patient is much less depressed and today in conversation did not exhibit any delusions or hallucinations. Is taking R. Anna Brand & T. in in die & S. S. S. 3i each morning. J.P.H.

Feb 4th

M^r. Hodges continues to improve mentally. She sleeps well, takes her food, goes out for walks daily and does a little needle-work and reading in the evening. J.P.H.

Feb 12th

Patient does not mention any delusions nor delusion asked about. She says she has quite got rid of her false ideas. She comes to all the social entertainments here & plays in Cards etc. J.P.H.

Feb 16th

Patient told Dr. H. Newington that she was not quite sure that people were afraid of her & that she was very wicked today. Goes out daily & now very cheerful reads poetry & plays the Piano. Cats sleeps well. J.P.H.

Feb 25th

Has been very bright & cheerful since last note. Reads, plays Cards, goes to all the entertainments here & says she is very comfortable. J.P.H.

1902.

March 2nd

She last few nights patient has not been sleeping so well, has looked rather worried, but says she feels quite well, also she has not consumed so much has been a little restless. Has given her R. Anna Brand & T. in die. J.P.H.

March 15th

Patient is sleeping better and does not look quite so depressed but she still says occasionally that she does not think she is quite like other people and that somebody is black inside, also she is very worried. Goes to all entertainments plays Cards & reads a good deal. J.P.H.

April 1st

Patient still exhibits symptoms of mental depression though she does not express her delusions. She sleeps better, takes more pride in her personal appearance and goes to all entertainments which she always enjoys. Is very fond of playing cards and does a good deal of reading. J.P.H.

April 10th

Patient continues to improve mentally & is in good health. Today she left here in charge of Miss (Haw) for a visit to her mother. J.P.H.

May 10th

Today patient was
Discharged & Released.

admitted Oct. 9th 1902.Weight

1902.

Oct. 9th

Today at 2.30 patient arrived with her father and sister who had lunch with her.

Stagnant
of
Particulars.

Patient is 20 years of age, single, Christian and this is the first attack of insanity the duration of which is said to be six weeks. The cause of her attack is stated to be hysteria but she has a family history of insanity her grandmothers and Cousin are stated to have suffered from insanity - She is stated not to be epileptic or dangerous but slightly suicidal. Before the Medical Certificate was received saying she had attempted suicide -

Medical.

Certificate

No. 1.

Dated Oct. 8th

1902.

Both exhibiting insanity and both showed intense nervous disturbance. At one time the former is enveloped in steam & can make out nothing, subsequently she said that she had been outside in all weathers & then "all is anxiety & I do not get any things done for the work". I was unable to get any concrete answer from her.

Both Cont. by Sister. I was informed by Miss Mary Bellam, the nurse in charge, that patient is always during day walks about in a restless aimless way. After talking to say the least a smell of blood about that there is a mystery about everything, that she cannot get her clothes and hands to do about washed. Signed. Wm. Pocklington M.D. 11, Bedford Row, London.

Medical.

Certificate

No. 2.

Dated Oct. 8th

1902.

Both exhibiting insanity. I found her restless & without any delirium or delusion was that I knew all the other about her so it was some relation to that everybody was after her, also delirious as she was so excited, & that her clothes were not her own for her work. Came back for the work but were then forgotten -

Both Cont. by Sister. She said informed me about 5 weeks ago she would be the nurse to attend her but she prevented her. After days afterwards she took a knife & tried to draw it across her throat - She then told me that after afternoon she needed to the fire & put her head in it but fortunately prevented her -

Wimborston.

1902.

Oct 9thMental
Condition

or

admission

Patient is silent, dull, listless, and silent suffering from an acute attack of melancholia. She answers questions very slowly and only after being asked several times. She says she feels ill that she has been very wicked, that all hope is over and she can never be any better, that she can smell blood & that she does not wish to live.

Physical
Condition

or

admission

Patient is seen to have well nourished body with fair hair, brown eyes and an anxious complexion. Her expression is quite flat and she appears to be looking into space quite aimlessly. Her breath sounds are normal. Her heart sounds irregular but no murmur is found.

Miss Churchill

Miss Churchill

1902.

Oct 9th

Patient arrived here this afternoon and was seen to be very ill and depressed, only speaking after being questioned several times. She said she might do have been fainted off before coming here, besides she could get a dose of Posa as she would state anything that would end her miserable life. Took her lunch, tea & drink with her. R. H. Cases - Say 31 & 32 - 1/2 - 1/2.

Oct 10th

Had a good night but remains very depressed today. Told me she was very wicked, that she is the cause of all the sin in the world and that everyone would be good if she were out of the way. She is on a Special Luncheon Ticket, is still constipated.

Oct 11th

Had a good night. Took Pulsatilla 2 grains night & day a course of Sarsaparilla this morning without any result. So gave patient an injection of 20 ccs followed by 20 grains of the same after 2 days, passed several masses of Sarsaparilla which had evidently been there some time, after that checked the food portion. She is still very dull, listless, says she can understand no one and she can't understand her. That she can't get better, that she has worked hard and caused numerous crimes. Has taken her food well today.

Oct 12th

Patient slept well & appears better somewhat today with no renewed attacks. Still very deluded that she feels ill about everything she does, says all kinds of mad things are mixed with her food but takes it well.

1902.

Oct 15th

Patient is not depressed and soon inclined like a little hysterical today. Had a sleepless night. She says it's putting herself about, but she had no doubt. Hallucinations still marked, still says she smells blood these dreadful looking animals about her. She has been out for a walk this morn'g as far as I believe 1/2. W.H.D.

Oct 14th

Slept better last night and is improved today being brighter but still inclined like hysterical at times. Still very deluded says she has done the King a great wrong. What she now can get better that she ought to be lauded. Publ. Serial 1/2, Sect. Supp. 30. W.H.D.

Oct 13th

Report sent to the Commission in Lunacy. Patient is insane. She has vivid hallucinations and many fearful ideas about the revolution. She thinks that she has ruined everyone etc. - She's almost blind in speech - She's in good bodily condition however, her health is satisfactory. W.H.D.

Oct 12th

Patient is somewhat better mentally but she still has the delusion that she is the cause of some fearful disaster to Louis XIII. W.H.D.

Oct 2nd

Mrs Churchill is still depressed at times & hysterical. Still says she has never got better because she has been so wicked, and has caused so much suffering. Deluding herself much & sleeps fairly well the act of R. Publ. Serial 1/2 each night. W.H.D.

1902.

Oct 24th

Patient is still confused and hysterical. Has the delusion that she is the cause of all crime, that she is like a wicked witch and she has an affliction. Does a little needlework but will not visit to her friends. W.H.D.

Nov 10th

Report sent to the Comm' in Lunacy. She is confused & somewhat silly. She says she laughs when spoken to & says that it is all a joke she confesses to having some depressing ideas, but wishes that might be caused by distress for her. One of her best she undoubtedly had vivid, especially had some hallucinations. She has retired or are in obedience. She's in good health. W.H.D.

Nov 20th

She has the same hysterical still constantly saying that only thing she wants is to die, that she will never be better, or will go home, all this is said in a laughing hysterical way. But she is never left day or night in a special hall. Health good. W.H.D.

Nov 28th

Today she was very hysterical & has not been sleeping quite so well and continues constantly to state of suicide - Publ. R. 1/2, Sect. 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100. W.H.D.

Dec 10th

Patient has attacks of depression every few days followed by hysterical excitability, in these attacks she says she wishes to end her life as she has caused some much harm in the world. She goes out daily to taking her food & medicine. W.H.D.

1903
Jan 10th

Patient's mental state does not improve and there is still hysterical excitability and nervous as a rule. She is slow and depressed at intervals. Still suffers from delusions and hallucinations - Health good. W.H.C.

Feb 8th

There is very little mental change. Dr. Vary consulted - Operated on Emma yesterday which brought away several hard masses of ~~Calcium~~ Today gave her Rob. Peck and two Enemas without any result. W.H.C.

Feb 9th

Patient was given an Enema this morning which has acted well and she says she feels more comfortable. Still very easily excited hysterical and says she wishes to die. W.H.C.

March 1st

Patient is slightly better mentally but is still very hysterical and extreme in what she does; that is she is as a rule in a constant state of laughing or crying, but she does not talk so much about suicide & caresses more in her quiet intervals of home & her relatives. W.H.C.

April 6th

Patient exhibits the same hysterical symptoms at times, but on the whole is not extreme in her ideas. She still has fits of laughing & crying but does not talk so much about wanting to remain here, but ^{often} says now she intends to go home soon good health. Takes Pills ~~twice~~ each night. W.H.C.

1903
April 14th

Patient was seen today by Dr. Savage who found her full of hysterical delusions, said she was only fit for very strict supervision, there is nothing in her case that may not pass off, but it is certain she has the seed of her fate for the present time better. W.H.C.

May 2nd

Patient has not been quite so hysterical since last visit, but still has occasional outbreaks of quiescence - laughing & crying. She in statement she makes can be relied upon, as she accuses herself by making deliberate false statements about everyone especially her own relatives - Health good - Sleeping fairly well but takes P. Pills ~~twice~~ each night. W.H.C.

May 16th

Since last visit patient has improved - She is not so hysterical, does much more self control & does not talk in the same wild way. She has wished to go home but has now begun a time to sleep in her room with few sitting up with her in the night very much & is much more stable minded. Health good. W.H.C.

June 20th

The last few days patient has relapsed into the same hysterical state she has been very excitable noisy & childish, also she has been very abusive to those who have charge of her & makes very rude & untrue false statements about them. She has not been sleeping so well. Takes Pills ~~twice~~ each night. W.H.C.

Miss Churchill

July 15th

Patient is still very hysterical & has developed
exaggerated ideas as to her personal appearance.
Says she is the most beautiful woman in England,
that all the men who see her fall in love with
her & that the reason she is detained here is
that the Dr^g thought she is love with them.
She is sleeping about 6^{hrs} at night with the
aid of Chloral. Salsin, Purgin Tablets which act
well to relieve her constipation - *L.H.H.*

Augth 10th

Yesterday Miss Churchill became very excited at
Lunch & accused Miss Dallas (Red Sep) for no reason.
In the evening she became morose, screamed
struggled and rambled incessantly all night long
requiring two Nurses to act up with her all night
to keep her in bed. She was also most abusive
this morning making the most unfounded
during disgusting language about most of the
staff & other patients here. She is now in
the habit of threatening everyone with the
Lunacy Court & Magistrate if they don't carry
out her every wish. *L.H.H.*

Augth 12th

Still excitable and restless - ordered today
R. Demer-Bromid. $\frac{gr\ \text{ii}}$
S. Valerian $\frac{gr\ \text{ss}}$ } *Zit* two in die
S. Amalium $\frac{gr\ \text{ss}}$
also Puls Brand $\frac{gr\ \text{ss}}$ each night - *L.H.H.*

Vide Page 62.

Miss Kathleen Deerington

Admitted Feb 20th 1902

Weight 8.5

1902.

Feb 20th

Today Miss Deerington arrived at Colaba with
her sister and two Nurses.

Statement

of

Particulars.

Patient was transferred from the care of Miss Alice
Hodgson where she has been under Certificate
since Jan 24th 1902. She is 28 years old, single,
Church of England and this is her first attack.
The duration of this attack is stated to be of
three months duration and the cause was
grief and anxiety. She is stated not to be
suicidal or epileptic but resorts to violence
with violence. Includes a history of insanity
a maternal aunt being afflicted with insanity.

Medical
Certificate
No. 1

Dated Jan 18th 1902

Facts indicating insanity - She is custom refuse food, makes false statements as to the food she has taken. She (the patient) tells me that she is spontaneously dead & that she will recover except in a hour time. Alice Hodgson, Nurse Wood, Sevenoaks says patient is fittly in her habits that she pulls up her dress in public, that she constantly refuses food herself being dressed. She also says that she is dead, has lost her sight & is becoming away. Signed, John Brown, Sevenoaks.

Medical
Certificate
No. 2

Dated Jan 20th 1902

Facts indicating insanity - She states that she has very little life in her, that she is nearly dead, & that in certain matters she takes the food well when as a matter of fact it is with great difficulty she can take it at all. She is calm & untidy in her habits. Alice Hodgson Nurse Wood, Sevenoaks (Nurse) states that Kathleen Bevington is very fittly in her habits having her eyes closed in the bed, & that she exposes herself indecently & insists that she has no teeth, is going blind and decaying away, all of which are quite untrue -

Signed, Arthur Wood
High Street
Sevenoaks

Feb 20th

Condition on admission

Mental - On admission patient is seen to be very restless and appears quite unable to control herself at times as she is suffering from hysterical mania. She refuses her food, appears afraid when anyone goes near her, keeps moving her body & limbs in all kinds of positions, keeping her face fixed to one side & then the other, clauding and quivering her teeth, will not speak at times and mostly her sentences are short & abrupt. Says that Poison is in her food, that she is the most poisoned female in the world, and her mind is variable. She is dumb in her habits & inarticulate speech. Physical - Patient is seen to be a short, slight girl but is well nourished though not fat. Her hair is dark, eyes brown, complexion pallid and her expression is very anxious. Her head: sounds are normal also her chest sounds. She has no marks or bruises. Her skin is hollow and moist. She masticates constantly and is dumb in her habits. Her Urine is cloudy with large deposit of Phosphates. Sp. Gr. 1015, no albumen or sugar present.

1902.

Feb. 20th

Mr. K. Bevington.

Patient arrived at 1 o'clock with her usual and took a little lunch. She was restless during the afternoon wandering about in an aimless way, saying she was a great dinner. That her food had been poisoned, that she has no teeth and that her face had been changed. She would answer when spoken to at times at the times only not strike her face with her hands. She is dumb in her habits and has attempted to masturbate. Had very little sleep this evening and must sleep at 9 o'clock. *L.H.D.*

Feb. 21st

Patient was restless till 11 to 12 pm masturbating very frequently slept fitfully and was restless after. This morning she was very restless, said she had a face like a pig. That she was in a dreadful state of pain all over her body also that she was so unwell. Patient went for a walk with her nurse who found her very troublesome as she tried to undress in the road and expose herself. This afternoon she was very hysterical, impulsive, dumb in her habits, masturbating, exposing herself and trying to destroy her under garments. She took her dinner at 12 o'clock and had very little breakfast or lunch. Bowels have acted well. *L.H.D.*

1902.

Feb. 22nd

Mr. K. Bevington.

Had a better night is quieter and less hysterical today. This morning she went for a walk and was not so troublesome and did not attempt to expose herself till she got indoors when she attempted to masturbate. This afternoon she had another walk, and this evening she has been more talkative has been writing letters, reading and knitting. Her bowels have acted and she has taken her food better today. She has the same delusions. *L.H.D.*

Feb. 23rd

Had a good night and today is more rational also she is quieter, less restless, not attempting so frequently to masturbate or expose herself. Converses quite rationally for a few minutes then appears quite dumb and lapses into violence covering her face with her hands and weeping. She has been out twice today walking but not troublesome her bowels have acted she has passed plenty of urine but it contains a large deposit of phosphates. Has taken her food well today. Still thinks she has poison in her stomach. *L.H.D.*

Feb. 24th

Had a good night and is more rational again today not looking so worried and being able to converse better. Also she has not attempted to masturbate so much and has been playing games with her nurse and reading aloud.

1902.

M^r. K. Devington.Feb. 24th

She is taking her food better and she appears to be improving mentally. Needs not so much urine still contains quantity of theophyllin. L.P.H.

Feb. 25th

Patient had a good night and today has been out for short walks and is not so restless or hysterical. She weeps at times and says she has pains all over her and cannot rest at this morning but she looks her usual colour. Bowels obstinate. Took Pil. official to night. L.P.H.

Feb. 26th

Report sent to the Commission in Lunacy. She is depressed about sensitive. She has delusion of being more wicked than anyone else, that poison has been put in her food. Her habits are very indolent even filthy. Rattle thin but in other respects both health and condition are fair. L.P.H.

Feb. 27th

Patient had a good night and today has been less restless and not so hysterical as deluded except about her food which she says she does not require. Has taken her food fairly well today but still incontinence - attempted to masturbate this evening - started out for a good walk today & is writing letters this evening. Her bowels have acted well today. L.P.H.

M^r. K. Devington.

1902.

Feb. 28th

Patient had a good night. She is brighter and more talkative today. Has taken her food better but still requires forcement. Has attempted to masturbate occasionally during the day. Still thinks that she is being poisoned. Has had two good walks today. Bowels satisfied. L.P.H.

March 1st

Had a good night. Bowels OK after last night when bowels have acted since to day. Has not taken her food quite so well today. She has been rather depressed singing and yawning a good deal especially when food is mentioned. Has been very dirty again in her habits. L.P.H.

March 2nd

Had a good night and has taken her food well today. Mentally she is still deluded and now thinks she can never be any better. Has been out time & attended Chapel this evening. L.P.H.

March 3rd

Took Pil. after last night when bowels have acted well today. Today patient has been rather impulsive again & attempting to masturbate. L.P.H.

March 4th

Today patient is not so well and says she wants to be "cured" and tries to put her fingers in the fire. Also she has quite hysterical & impulsive today taking her meals by the street & walking her - has pulled on Special Ticket now looks left & special Cantrell taken in regard to fire. L.P.H.

1902.

March 8th

Patient did not sleep well last night and today she is more restless and delirious. Has taken her food well & looks a little better. J.H.D.

March 9th

Had a good night but she has not taken her food so well today. Says she does not want to eat at all only she wishes she "could", has been out walking today. J.H.D.

March 10th

Is not so bright today she evidently talked with delirium about taking food as she has had very little today. She has taken her walk as usual today but has not covered so much. She has not a little weight. J.H.D.

March 11th

Took very little food all day & this evening I attempted to feed her with a feeding cup but she spit most of it out & was very restless. Also she has been more depressed today, is dull in her delirium & little movement. She took the Oil of Cod Liver last night. J.H.D.

March 12th

Had a nurse to sit up with her last night as she was more depressed, she had a restless night & was constantly praying. Today she has taken her food well but under persuasion she says she does not want to be fed with the tube. Is very delirious & hysterical today. J.H.D.

1902.

March 12th

Is not sleeping quite so well but is taking her food rather better. Now says she expects to be down but does not want to die. Is still very dull in her delirium goes out daily & attends chapel & the kitchen. J.H.D.

March 13th

Patient is taking her food better on this whole but is more delirious. Says she is a "Dumb", that her soul is being roasted in Hell, that she has wronged someone in this world and that she will turn into a reptile. Still attempts to masturbate & is filthy in her habits. J.H.D.

March 14th

The last two days she has taken very little food & has been more depressed. She was continually going on her knees today, saying she is going to be killed. That her teeth are all gone out of her mouth & that she is being turned into a monkey. Is still dull in her delirium, masturbates, swallows her secret in bed. Is continually passing the finger up the rectum. Refuses to take all medicine except Oil of Cod Liver. J.H.D.

March 15th

Has been taking her food very well again since last night & has gained 14 weight. She is looking better but her delirium persists. Will go out for walks but at times resist going in again. Is not quite so dull in her delirium. Bowels open. J.H.D.

March 16th

Is still impulsive & violent at intervals but her delirium is rather better. She is taking her food well but not so bright in her delirium. J.H.D.

1902.

March 27th

Patient has been rather more sensitive again to day than not takes her food so well. Her head voice the delirious period. R.H.H.

March 28th

Is not so well mentally & refuses the food. Says that she does not require food as she is fed spiritually. Also she has been thinking most of the day of dying. Remains also terrified and she refuses all medicine. Pills etc. Today has started to menstruate. She was served with a notice two days ago (under 16 Dec) and she seems to have quite upset her as she keeps on saying that she is not a Lunatic & how dare they put it in paper she is, in fact she has had several friends of mental evidence leading from 4 to two hours over this word "Lunatic"

March 29th

Today she is hysterical, quite maniacal at times, sensitive, obstinate and noisy. She keeps on saying she has not done wrong, that she will not be killed and she screams & shouts at intervals. Also she has decided to fasten & keeps pinching her arms and legs, also pulling her lips down and pulling her fingers in her mouth. Today she has specifically refused all food & this evening at 8.40 pm. Dr. Kempster fed patient with the oxygenated

1902.

March 29th

Subs which she received a good deal. After this she was much quieter than 7th Dec. R.H.H.

March 30th

Today patient is again available and restless. Had a good lunch but has taken nothing else. This evening she is very delirious says that "God" has told her not to eat, that she will be turned into an animal & that she thinks she is going to be killed. Her bowels have acted well & she has passed plenty of urine. R.H.H.

March 31st

Left well during the night but this morning she is more restless, sensitive, noisy and maniacal. Keeps shouting "do have mercy, let me out, I won't be killed etc." She has taken no food to day so Dr. Kempster fed her at 6.30 pm with the tube. After being fed she remained quite quiet & slept for 8 hrs. Noticed today that she has several small marks on both arms & right leg which are caused by patient pinching & pulling at herself unless she gets into these maniacal states that last about an hour usually. R.H.H.

April 1st

Took half a pint of milk during the night but has refused her food again today so was fed with the tube this evening. She is very delirious, will not sleep, she is excited and raves incoherently chiefly in religious. Will be here for hours. R.H.H.

1902.

Mrs. K. Davidson

April 2nd

Patient continues to refuse food under the delusion that food does not want her to eat & that it will be wicked if she does. Was fed again to day with the tube. Her pulse is good & her tongue is clean. J.H.D.

April 3rd

Patient refused food again & was fed with the tube again today. She has been more excited today, saying "Oh Christ do save me" over & over again. J.H.D.

April 4th

Took her food fairly well today as was not fed. Went out for a walk in the grounds today. J.H.D.

April 5th

Refused food again as was fed with the tube again. Seemingly excited & resistive especially when being fed it. Talking five times to hold her. She has a few slight bruises on her arm the result of being held during frantic feeding. J.H.D.

April 6th

Took her food today but she has been very excited. Keeps on saying now "I will go to Exeter" and attempts to get out of her room each time the door is opened. Health about the same. J.H.D.

April 7th

Took some food this morning & went out for a walk at her express wish. When in the ground she made a sudden attempt to get away but both four nurses to bring her back. Very excited, unreasonable & incontinent today. Took Pil. Coloni. & she does not act. Sleeping rather better. J.H.D.

Mrs. K. Davidson

1902.

April 9th

Patient is taking her food better now but still resists some of it in portions. She is not quite so excited resistive as she was but keeps on "I will go home" for hours at a time. Took Pil. Coloni. & H. J.H.D.

April 12th

Patient has taken her food well since last week. She is not quite so resistive on the whole but still has intervals when she becomes very excited. On these attacks she will throw anything she can get at anyone, tried get out of the window and door, says she must go home and constantly calls on them to help her. Refuses all medicine except Pil. Coloni. J.H.D.

April 19th

Is now taking her food well & sleeping better. Is still very incontinent and has maniacal attacks lasting about 2^{hrs} at intervals. In these attacks she sticks sticks and pushes her nurses. She is taken out in the grounds each day by the nurses but never being brought in. Gaining weight. J.H.D.

April 20th

Has the same kind of maniacal attacks but they are not so frequent. Mentally she is very confused & is quite unable to carry on a rational conversation. Is now taking her food well & sleeping better. J.H.D.

May 1st

Continues to have maniacal attacks but very resistive at times. Will not undress herself at times & the emptying bow asks her to do she says "No". Keeps on repeating all day "I want to go home, gaining weight. J.H.D.

1902.

May 15th

Patient is gaining weight, sleeping well & taking her food but she makes still less out & insists much and she still refuses to take any medicine - Has slight maniac attacks at intervals. L.H.A.

June 3

Last night patient had a very bad night having just had a visit from her sister - During the night she was hysterical & restless and kept on repeating "don't go home" - This morning she looks worse if she did not go home she says "I am a lunatic" But he is a lunatic too. L.H.A.

June 8th

Still thinking to kill herself if she is not sent home. Had a handkerchief round her neck last night said she intended to hang herself. Hysterical & delirious. Malt. Drink Commenced today. Is looking better. L.H.A.

June 11th

Was excited and hysterical today & this evening she tried to hurt her head against the mantle piece in her bedroom - Still says she must go home or she will die. L.H.A.

June 14th

Today she is better & has been trying a good deal. Took P. Malt Linn. Co. It the first medicine she has taken herself since she has been here always refusing it before - also she is not so restless & hysterical & has been reading a little. L.H.A.

1902.

June 18th

Today patient was much more quiet and contented less worried her expression having altered. Said she felt better & would take anything to do her good. Gave her P. Malt Linn. Co. $\frac{3}{4}$ gr. Valerian $\frac{3}{4}$ gr. $\frac{3}{4}$ gr. Potash. $\frac{3}{4}$ gr. Amm. Bibl. $\frac{3}{4}$ gr. aquae $\frac{3}{4}$ gr. L.H.A.

June 16th

Was visited by her sister today and was much calmer than she has ever been before. also did not become excited & hysterical when she went away - Is taking her food well & sleeping well. L.H.A.

June 19th

Is now quite content. Has no delusions, says she is quite happy and does not wish to go away from here yet. Goes out for walks daily. L.H.A.

June 25th

Patient continues very well mentally & is free from all her old delusions. Plays Linn's Cigaret daily & goes for long walks. L.H.A.

July 1st

Patient continues very happy and contented says she does not wish to leave here yet. Is going out daily & is able to cycling. L.H.A.

July 10th

Continues in the same contented state and says she wishes to remain here till the end of the month. Sleeps well. L.H.A.

July 20th

Remains very well mentally and goes out daily cycling & to Linn's Cigaret. Sleeps well and she is not at all anxious to go away she says. L.H.A.

1902.

July 26th

Miss Bevington continues very happy and contented here and now appears quite well mentally. Goes out to tennis and loquet almost daily. Talks about the Country and says she feels as well as ever she did. Health excellent. *W.H.H.*

July 29th

Wednesday

Discharged Recovered.

Miss R. BevingtonMiss Ruttie Churchill

1903.

Aug^r 20th

Patient remains in the same hysterical, excitable, state making the most unfounded statements about people here whom she only knows by sight, and accusing everyone involved in any management of her of doing & saying things which are quite untrue. She has told me and my nurse she sleeps badly. *W.H.H.*

Aug^r 26th

Her nurse states she now uses filthy & disgusting expressions about the gentlemen & ladies here now, and continues to threaten all the staff with the Court & Magistrate unless everything is done she wishes. She still says people call her beastly names so that one fears she hears voices. She still sleeps badly as we are going down Portland to *W.H.H.*

Sept 21st

I have not tipped any of Miss Churchill's delusions but she certainly is very argumentative over trivialities & of a very fickle disposition, being apparently glad to see me, one day & the reverse the next.

She has told me that I am the most conciliated person she has ever seen & also that she is always glad to see me. *F.H.*

Sept 28th

Went out to the Col. in Lunacy. She is suspicious & uncertain in mind, at one time cheerful at another saying pessimistic views. She often looks the looks of the broken staff says unkind things while she is

From Page 45

Miss Ruth Churchill

Sept 28th

pleasur to the face. She has somewhat improved however, that it is proposed shortly to give her a trial at home on leave of absence. She has improved in health though at present rather run down by operation on her teeth. J.H.D.

Oct 12th

Patient continues to improve markedly, left Tuesday on a small trial. J.H.D.

Dear Sir
In the Congregational
Church of 75th and
there is reported a
case of one "Henry
Smith" charged
before you with being
drunk and disorderly
Lined 5/ 3/ each 76 D. L.
(1902).

Medical
Certificate

No. 1.

Date Nov 8 1901

Has been indicating himself to be suffering from partial dementia. He is slow in responding to any question. He mutters to himself & while admitting that he ought to do something for a living he does nothing. His father of the same address tells me he would do nothing, would neglect himself & lie in bed all day. He appears to have no evil passions and is showing weakness in mind.

Signed, Geo. H. Savage M.D.
3, Henrietta St.
London.

Medical
Certificate

No. 2.

Date Nov 11 1901

Has been indicating himself to be suffering from partial dementia. His speech is delayed, latent period from 1875 onwards. Speech at times incoherent, articulation imperfect, at times at times incoherent and left to dead. Complaint of vague pains in legs, appears to be somewhat muscular & cellular. Father about Haverhill Street, Haverhill, Mass. address patient described as stubborn, refuses to work, food taken irregularly, i.e. for some periods nothing for perhaps 40 hrs, at other times voraciously of food as much as 2 lbs. before 11 o'clock am. evidently regards his family with loathing & acts diametrically opposed to what is expected. Wives - leaves the house at meal times in order not to take food with them.

Signed, Stratton Chas. M.D.
Haverhill Park Cottage
London.

1902.

March 15th

Condition on admission

Mental. On admission patient is seen to be a weak minded man with evident symptoms of disease of the nervous system. He will answer when spoken to at times. One of his answers are as a rule stupid and not to the point. He talks to himself all the time, moves about the room fidgeting up bits of dust etc. is constantly busting off in loud laughter for no known cause and makes sudden violent statements. Also keeps taking off his coat & putting it on again. He takes his food and sleeps well. Says he likes the change here and everything is comfortable as far as

Physical. Patient is a short man, rather delicate looking but well nourished. His hair is grey and dark, complexion yellow, skin muddy looking, expression weak, and face looks not intelligent. His breath sounds are normal. His heart sounds are weak, his heart is dilated but no murmur is present. His urine contains no albumen. Knee reflex absent.

1902.

Mr. HowlandMarch 13th

This evening patient arrived took a good dinner and was very cheerful. He conversed a little with me in a childish way and kept laughing out with laughter every few minutes for no reason. Told me his body was out of time with his head, that his head goes to sleep by itself & that part of his body is dead but he said he did not know which part. He is very reticent to say he does not care about doing anything would be at 9.30 pm. L.H.A.

March 14th

Had a good night's sleep and is in the same excitable mood this morning - Has been out for a walk today and attended chapel in the evening. Set out of his time in his room doing nothing except smoke. L.H.A.

March 14th

Had a good night says that his relations are all healthy, that his attendant is disguised as a woman & that he never can remember anything for more than five minutes (which is not the case). Detailing his food very well. L.H.A.

March 15th

Slept well last night all day has been out twice. Continues to talk to himself in the same childish incoherent way but quite unable to make up his mind on any point. L.H.A.

Mr. Howland

1902.

March 19th

Patient continues to talk to himself and to wander about in an aimless way. This evening he was rather irritable and walked up and down stamping his feet & swearing without any obvious reason. He sleeps well & takes his food. Habits usually L.H.A.

March 20th

Patient remains in the same childish state & in the evening was irritable again. He smokes a good deal, sits in his chair doing nothing except talking to himself & does not take the least interest in anything. Takes his food well. L.H.A.

March 21st

Refer sent to the Commission in Lunacy. He is of unusual mind. He is decidedly weak in intellect. Confining his conversation to amusing questions in an unbecoming & oblique manner or to frequent trivial requests. He occasionally says his stamps & makes use of backslang. He says that his brain is weak because all the material goes to his legs. He has a deluded belief in the circulation of the blood & that his god is suggestive of overeating. Spins & spins his time reflexes are entirely absent. There is no local pain or tenderness. There is some reason to suppose he has had syphilis, but no distinct proof. L.H.A.

March 24th

Patient exhibits the same childish symptoms although in his room talking & laughing to himself - at times he is irritable & says what he will do to the Nurse etc. He is now taking P. Light. P. R. & L. to the sea. L.H.A.

1902.

Mr. Rowden

March 30th

Patient exhibits the same weak mental symptoms and is very incoherent in his conversation at times. He is untidy in his habits and collects all kinds of rubbish. *R.H.D.*

April 6th

Patient does not improve at all mentally. He is incoherent in his conversation, unstable and abusive at intervals, untidy in his habits and repulsive in his manner of taking his food. He is in good health. *R.H.D.*

April 12th

Patient is not quite so untidy in his habits but his mental state is no better. He continues to take R. L. M. T. R. J. *R.H.D.*

April 23rd

Today patient went for a walk as usual & went into a shop in the Village to buy some paper. Having spent his money he then would to take other things from the counter and when the shopkeeper protested he beat his fingers and used the most threatening language, kicked the dog in the shop and walked home again cursing the man the whole way. *R.H.D.*

May 1st

Since last note patient has been very unstable & threatening at times to the staff & the other gentlemen here - who he has made several complaints which when investigated have been found to be groundless. Health good. *R.H.D.*

Mr. Rowden

1902.

May 4th

Today patient complained of being assaulted by the Matrons when out walking. The Matrons examined patient and could find no trace of any marks or bruises. At Matrons stated patient attacked him and tried to strike him in the face & that when defending himself, he and patient fell on the grass by the road side. The Matrons investigated the circumstances of the case and could find no evidence that any assault or ill-treatment had taken place. *R.H.D.*

June 2nd

Patient does not improve mentally and is subject to violent attacks of mental excitement & delirium. In these attacks he directs his attendants and uses very abusive language. He is still taking R. L. M. T. R. J. Health good. *R.H.D.*

June 13th

Patient does not improve mentally, talks to himself, is very incoherent at times & unstable, is untidy in his dress & writes a good deal of incoherent rubbish. Takes his food well. *R.H.D.*

July 10th

Still easily excited & will not go out of the grounds now as he says he is afraid to. He collects all kinds of rubbish, still untidy in his habits and talks a great deal to himself. *R.H.D.*

July 29th

Has not been so volatile since last note but is still childish in his manner, conversation, habits. *R.H.D.*

1902.

Aug¹⁶

M. Hovenden has not been so well again since last
not being more excited, irritable and mischievous.
He was visited by his father a few 14th inst and
was very rude and hostile to him - J.H.H.

Sept. 5th

Patient continues in a restless state, very easily
excited, has been accusing him of himself of
late, also more irritable. Was visited by his Aunt
last month whom he quite upset by his foul
language just as she was leaving after a visit.
He was much pleased with her. Health good. J.H.H.

Oct 1st

Patient remains in the same irritable easily excited
state - He talks to himself a good deal in a railing
way whenever about himself, also he often shut the
shutter in his room during the day to keep out sunlight
except he will not say what (probably he has a
bad health & goes out daily - J.H.H.

Nov 1st

Report sent to the Comm^{rs} in Lunacy. He is much more
deficient. He is suspicious & evidently has fear of harm
coming to him from anyone outside the place, possibly
the Police. At night time he arranges his bed clothes
outside of furniture in an eccentric manner - His
temper is very uncertain & he behaves very badly
to his father & mother when they come. His
health is in a satisfactory state & has rather improved
in general health since he came - J.H.H.

1902.

Dec 15th

Patient since last visit has been less irritable and
restless, also has not been cursing & swearing so much
to himself, but he is still very childish & mischievous
at times - Health good. Talks a little - J.H.H.

1903.

Jan 20th

Patient continues less restless and excited but his
moral state is no better as he talks most of the
day incoherently to himself and wanders about in
an aimless way. Health good. Weights 10.4. J.H.H.

Feb 21st

Patient is still in the same less irritable state
and also is less restless and keeps more to
himself - Talks a good deal to himself. J.H.H.

March 20th

There is no marked improvement to report, in fact he
is more childish in his manner & conversation, but
not speak to his father when he comes to see him & says
he does not want his relations to come. Health good. J.H.H.

April 14th

He still extremely restless & irritable, in fact if spoken to
in any way will walk up & down cursing & abusing
for an hour or more, or if anything unusual occurs he.
Health good. Goes out by his walking daily - J.H.H.

May 4th

Has not been quite so irritable of late and has been
much quieter & more - wanders about the grounds by
himself in an aimless way seldom speaks to anyone. J.H.H.

June 10th

Is very restless & talks to himself. Goes
out by himself a good deal - Has excellent health. J.H.H.

1903

Aug²⁰

Patient is not quite so amiable & cheerful but is more demoralized. Talks a good deal to himself at times & his expression is weaker. Some good health. Goes out walking -

Sept 20th

Mr. Hovenden is in the same "silly" state, he does not like to be spoken to & he seems to be uncertain about everything "I'm sure I don't know" being the phrase he most uses even if questioned as to whether it is a fine day or not.

He had an attack of toothache a few days ago & said he would cycle into Cambridge Wells to see the dentist. He started off but soon took it into his head to leave the beaten track & to take his bicycle over fields & hedges through brake & through briar & finally reached himself, his attendant following. He returned safely & his toothache has since not troubled him. He has little outbreak of temper occasionally. M.

Nov 27th

Patient is now much more demoralized and more unobscurely vindictive or despondent and goes - He has his Parole in the grounds and wanders about in an aimless way talking to himself. Some good health. His habits are untidy.

Mr. Hovenden

1903

Dec 20th

Patient continues to become more childish and demoralized. Health good. Habits fair. J.B.W.

1904

Jan 22

Is demoralized - constantly talking to himself & evidently suffers from delusions as he has accused me on 2 or 3 occasions of doing something - which was quite untrue. Has occasional fits of temper - but is usually amiable. J.B.W.

Feb. 22nd

Has become unmanageable at table so have been obliged to give him all his meals in his own room. J.B.W.

March 24th

Is no better - in fact seems to be more childish & demoralized than formerly constantly talking & laughing to himself. J.B.W.

April 25th

There is no improvement & is at times very bad tempered & complaining. J.B.W.

June 1st

Has to-day gone away by his own desire to Bexhill with his attendant (Copper) for a change. J.B.W.

June 24th

Has returned to-day - his mental condition has not improved - he is very childish in his actions & incoherent in his talk. J.B.W.

August 14th

Remains in the same childish & demoralized state - wanders about the house & grounds. J.B.W.

Mr. Hovenden

1904.

Mr. S. C. Havenden

Oct. 1st

Nov 10-10

Dec. 21st

1905

Jan 31st

June 15th

July 7th

in an aimless manner, muttering to himself. J.B.W.

Mr. Havenden has been rather less irritable of late - but is very childish & demented in his behavior - running about the place - carrying a bundle of papers - & his tennis racquet - & waving his hands in the air. J.B.W.

There is no improvement - is very childish in all his ways - cannot carry on any kind of coherent conversation - has his parrot in the grounds - & goes out mowing & afternoon. Is in good health & putting on weight. J.B.W.

There is no change in note. Is childish & demented, & mutters to himself. Is in good health. J.B.W.

Is demented. He is irrational in his talk and weak and childish in his behavior. He is untidy and neglectful of his appearance. His health is fairly good and he goes out regularly. J.B.W.

There are no physical signs of organic disease in the heart or lungs. His appetite is not very good. Put on

1905.

Mr. S. C. Havenden.

Exprop. Boston twice a day. J.B.W.

Sept. 5th

Went to Brookline to-day on leave. There is no mental improvement, is demented and childish in manner, mutters incoherently to himself. J.B.W.

Sept. 30th

Returned to-day from Brookline in good health.

Special Report & Certificate 3rd Nov.

Is considerably demented and requires attention as to dress, habits and other matters. He can not converse freely, and hardly ever answers questions in a reasonable manner. Aural hallucinations are present.

Is in good bodily health and condition.

S. H. A. Huntington

1906

Jan. 4th

He continues in the same condition as is reported on Nov. 3rd 1905. J.B.W.

April 3rd

Is foolish and rambling in his talk. Nubby in his dress. Is at times restless and talkative, making foolish accusations against those about him. Health good. J.B.W.

1906.

Mr. S. C. Howland.

July 5th Returned from Boscill to-day in good health. He is foolish, rambling and disconnected in his talk. Dirty and untidy in his dress. S.H.R.

Oct. 11th Is demented, and quite unable to carry on a conversation. He is untidy in his dress. S.H.R.

Dec. 30th Examined the heart and lungs to-day. Both the heart sounds and the breath sounds are indistinct. The heart sounds at the apex are regular and there are no murmurs. The breath sounds are indistinct all over the chest but there are no rales. The patient does not give any assistance at the examination as he will not take a breath when requested to do so. Mentally there is no change to note, he is demented, cannot converse and is untidy in his dress.

1907

Mr. S. C. Howland.

April 4th Is demented. Wandering about the house in an aimless manner. Is untidy in his appearance and dress and rambling and incoherent in his talk. S.H.R.

July 8th There is no improvement. His condition is much the same as is stated in April 4th. He was visited yesterday by his father. S.H.R.

Oct. 28th There is no improvement in his condition. He wanders about in an aimless kind of way and talks incoherently. S.H.R.

Dec. 31st No change. C. v. p. 8

1908

Feb. 17 He is childish, demented and incoherent: untidy, and wanders about in a purposeless manner. Is eating and sleeping well and is in good bodily health. 11/11/08

May 17 There is no change in the mental condition: bodily health good. 11/11/08

July 20 He has gone today to Boscill for two days' leave. 11/11/08

" 22 Mr. Howland's leave has been extended for another week from today. 11/11/08

" 25 Mr. Howland returned today, in good health. 11/11/08

Aug. 17 He is in good bodily health, and the mental condition is unchanged. 11/11/08

1908.

W. S. C. Howenden. (Contd.)

Nov. 2. He is the subject of dementia. He is restless, incoherent and incontinent in speech, absurd in his actions. He hardly ever sits down to read or occupy himself. He is in fair bodily health. He is a little spare at present but this condition has been noted each autumn for years past. Otherwise his condition is good. (Signed) H. Hays having for a

He has gone down to Bechill today, on his day's leave.

4 Mr. Howenden has returned today, in good health. H.S.

1909

Jan. 5. The patient has varicose veins in both legs so elastic stockings have today been sent for him. His mental condition is as usual, his general health good. C.W.P.B.

" 15. Elastic stockings put on. C.W.P.B.

April 8. He is in good bodily health: no change mentally. C.W.P.B.

July 8. No change. C.W.P.B.

July 25. No change. He is somewhat excited but in good bodily health. C.W.P.B.

21st Sept. 1909. Patient went to Bechill today on leave of absence. He wanders about without any apparent object hiding his face behind a newspaper of which he always seems to have a supply coming from about with him. Occasionally goes for cycle rides. Health good. H.S.

1909

Mr. S. C. Howenden

Oct. 11. Patient returned to-day from Bechill and appears to be in his usual state wandering about aimlessly talking to himself. - physically he enjoys good health. H.S.

Nov 15. No change. H.S.

Decr 22. Is in good bodily health. Eats well and sleeps well. H.S.

1910

Jan 28. Although he appears to be too demented to notice things usually walks about with his eyes half shut or shaded by holding up a newspaper, while talking to himself, on questioning him, he appears to be pretty cute, knowing most of the things that happen. He told me within 2 days of the correct length of time I had been here, my relative height to the tallest in the place, saying also who was the tallest person in the house.

He is generally very good natured & amiable, expressing his obligation when things are done for him. His bodily health is good. (H.P.D.)

March 20. The patient remains greatly occupied with answering & obeying voices as usual. He has lately spent a week on leave at Bechill. He is in good health. (H.P.D.)

1910

Patient arrived here at 6 o'clock this evening with
 her nurse. She was transferred from "Belknap"
 yard.

Statement

of
 Particulars
 and
 History.

Patient was admitted to "Belknap" on Oct 14th 1901.
 when she has been a patient up to this date.
 Her 2 aunts suffered from insanity, one died in
 an asylum, latter alive, Mother died "Mad"
 when 9 years of age she sustained a severe
 fall, she fell about 16' striking her head.
 Some years ago she suffered from Congestion of
 the lungs. Frequently some fainting fits - inclined
 to lead a solitary life, spending much
 time over painting and books, apparently
 being rather ascetic, taking little food or
 exercise & seeking no society, at this time
 fancied herself an artist on the level of
 "Rose Bonart". Two years ago she inquired
 that a foreign architect wanted to marry
 her but his people opposed the match -
 she has gone abroad a good deal for
 one thing & another.

Miss Middleton.

History
of
Present
Condition

About 6 months ago the delusions about the Austrian Archduke recaptured gradually but suddenly got worse - when recently in Emma thought the people in the Hotel were bribed to keep the Archduke & herself apart. A few days previous to her going to the Retreat she left home in the evening took train for London. During the journey she behaved strangely - thought the people in the adjoining Carriages were talking about her suspicious increased she left Carriage by means of the window - when train stopped escaped into the Country - hid in a garden where she was found about home -

On
admission
to the
"Retreat"

On admission to the retreat she was very distressed at being brought to an Asylum - the following morning she talked freely about her affairs but was very suspicious & distrustful - later she became confused - heard voices about people being pushed with sticks. At night she was restless & unhappy, thought people were striking. When asleep, also heard the sounds after her - Her conversation is almost incoherent & very broken -

On admission to the "Retreat"

On admission to the retreat she was very distressed at being brought to an Asylum - The following morning she talked freely about her affairs but was very suspicious & distrustful - Later she became confused - heard voices about people being forced with blades - At night she was restless & unhappy, thought people were striking & killing others, also heard the sounds of her conversation is almost incoherent & very broken -

Medical Certificate No. 1

Dated Oct 1st 1904

While residing in London in conversation she tells me that in travelling to London a few days ago, she was informed that a conspiracy had been got up to get possession of her, that in order to escape she jumped out of the carriage & hid under a chair & that when she goes out she hears voices of people talking but does not see.

Said Com' by Mrs M. S. Middleton, Gentleman of Highfield
Refers to me that Mrs M. S. Middleton his wife came to him in the night & said she saw Satins with blood-hands forced round the house & begged him to shoot them - Signed, J. C. Reddiffe, Husband
Refers.

Medical Certificate No. 2

Dated Oct 2nd 1904

While residing in London she has been severely attacked with melancholic mania about constantly, looking round her as if fearing someone was after her. Has the impression that people in the Hotel she was staying were directed against her, that the assault & battery & other facts of the case at the time she was in the station tried to be managed -

Said Com' by Mrs M. S. Middleton had difficulty in restraining her from throwing herself out of the carriage, that she suffers from Insomnia & is unable to sleep in the house.
Signed, Arthur Scott, M.D.
Harrogate

Sketches of Particulars.

Patient is 33 years of age. Single, Roman Catholic, and this is patient's first attack. The duration of this attack is stated to be 3 months, cause Hereditary, said not to be Epileptic, Suicidal, or dangerous.

Condition on admission

Mental. On admission patient is seen to be a weak minded individual with a ruddy complexion, head is somewhat rounded, intellect is childish, answers are slow, expression is slow, reflexes are

Handwritten notes on a separate piece of paper, including dates like 'Jan 29', 'Feb 17', and 'Mar 9', and various medical observations.

Physical. On admission is seen to be a delicate looking lady, with somewhat sad looking expression, lack of energy, fair hair, blue eyes, and emotional expression. Her pulse is slow, regular and soft - Heart sounds are weak and not murmur can be detected. Her chest development is poor, clavicles prominent and breath sounds weak, especially on the right side where percussion note is inclined to be dull and the breath sounds are not so pronounced as on the left side.

1902.

July 3rd

Patient arrived this evening and took a good dinner. She put on her eyes on the same spectacles otherwise was rather depressed & silent. She stated she could not always see properly and things looked very curious before her eyes at times. J.H.D.

July 4th

Patient was rather restless the first part of the night but slept well after - very quiet, will just answer at times in rather a belated way and at times her replies are not coherent. Has done some needle work & some walking. J.H.D.

July 5th

Slept better last night but was restless at times. Can't get her to converse at present as she is suspicious and reserved. Had 1/2 pint of 31° brandy added. Can't do a "Littlet" match today that tea in the garden with the other ladies. J.H.D.

July 6th

Slept well last night & appears more cheerful today - Still will not talk much and does not at present exhibit any delusions. Says she is quite happy & enjoys the walks. Detailing her food well. J.H.D.

July 7th

Continues to sleep well & has been bright & cheerful today - but her answers to questions are childlike & she seems devoid of ideas unless suggested to her. Does a good deal of needle work. Is talking long walks daily - J.H.D.

1902.

July 8th

Patient is very bright today and more talkative than she was. Takes an interest in everything going on & says she is comfortable with all that requires. Saying long here is like Hotel life and appears to like the conduct of others. Detailing her food well. J.H.D.

July 9th

Report sent to the Commission in Quincy. Patient is very unacquainted - She takes along time to frame an answer to a simple question which she gives in a surprising way & often incorrectly. Her writing reveals an undigested & disconnected mind. Her appearance & gestures suggest unusual cerebral influence though it is yet impossible to get an answer from her. Her condition is good though for her height she is rather spare. The development of the dead Patient's intellect is not of the best type. Her health is apparently good though her appearance does not look like robust. J.H.D.

July 10th

Patient continues to sleep well and converses in a childish way - Says she is quite happy here. Goes out daily to see other houses, plays at games & appears to enjoy being talked to but has no suggestion to offer herself - Detailing her food well & looks better than when she came. J.H.D.

July 11th

Today patient said that voices blunder at times but did not recall what they said. J.H.D.

1902.
July 13th

Patient continues in the same abated state & this evening had an outbreak of weeping which lasted about 1/2 an hour - She said she often cried & could not stop it, said she did not know why she cried - Goes out daily - J.H.H.

July 15th

Cried a little yesterday but today is very bright. Goes out for walks, plays Croquet, talks to the other patient a little & appears generally contented. Sleeps best well. J.H.H.

July 17th

Was depressed again somewhat today also cried a good deal. Will not give any reason for these attacks of depression - J.H.H.

July 20th

Had a restless night crying a good deal. Also was very cheerful & bright all day played Croquet several out to dinner at one of the other houses - J.H.H.

July 24th

Has been more depressed and now does not wish to go out so much. Cries during the day now but will not give any reason for so doing. Health good & she likes her food well. J.H.H.

July 25th

She remains depressed, will not converse so much or go out so much also cries more than she did & can give no reason for so doing - J.H.H.

Aug 1st

Patient is still depressed & has lost weight the last ten weeks. Sleeps well & takes her food - J.H.H.

1902.
Aug 24th

Patient is more cheerful again although she weeps readily at times. Her letters have been attended to with regard to her condition. She is difficult to get at Monday. Asks when she is going to be discharged & when told she will go when fit, asks when she is to go to and what she is to do as she has no home and is not sure what such as any relatives, if she says her brother who visits her is not her brother at all. J.H.H.

Sept 3rd

Patient remains in a somewhat mixed state with very little improvement. Has been dining Fellowship Supper the last week & has gained 2 1/2 in weight. Goes out daily plays Croquet & Croquet - J.H.H.

Sept 20th

Mrs Middleton has not been so comforted mentally of late, weeping more often, more restless in her habits & not sleeping so well. Also talks to herself some is suspicious of her hearing voices. J.H.H.

Oct 14th

Patient has not been at all well Monday of late - Talks much about voices, which would do her harm. She says a voice told her a cab was waiting out in the road & that today she will go in it. She also has been very constipated. Intake of ^{Rough Bread etc} 3 1/2 loaves ^{of Pastry etc} & ^{of small etc} quantity. J.H.H.

Oct 20th

Patient is looking better, sleeping well and says she is not so troubled with the voices as she was - Talking about bread & wine & such - J.H.H.

1902.

Nov 22

Patient has not been quite so well as the Voices have been showing her a good deal & she has not slept so well - also has a good deal - goes out daily for walks -

Dec 20

Is sleeping better again but her mental state does not improve at all - is very childish in her manner & hears Voices constantly now - doesn't walk so better - taking her medicine

1903

Jan 20

There is no improvement: is report: mentally in this case but her general health is better & she sleeps and eats much better -

Feb 24

Patient still is troubled by the Voices she hears which cause her a good of anxiety as she is not quite sure what they say -

March 16

Patient remains very confused & says she can't understand the past or the present. It is quite difficult to get her to answer questions coherently at all. Still hears Voices. Some better health

April 9

Patient states very little interest in anything now & appears now to be listening to Voices a good deal. Some good health & goes out daily.

May 6

Patient is not quite so well as the Voices are showing her very much & she is not sleeping well - also is childish. P. S. D. 31
L. S. D. 31
as per 31
L. S. D. 31

1903

July 5

Is sleeping much better again and looking much less worried. But her mind is now vacant & she has more difficulty in expressing herself

Sept 20

Miss Middleton is in the same mental condition, she has lost all initiative of speech and action & if asked how she ^{has} slept will complain that she cannot wake. She went to a play "Miss Owen" at Cambridge Wells a few days ago & had a quiet wrap to herself in the theatre. When asked on the following day how she had enjoyed herself on the day before she replied "Old times are the best. She seems evidently distressed at not being able to think now though she is quite capable of seeing a joke & of joining in the general laugh

Oct 2

Report sent to the Com. in January. She is particularly disturbed occasionally she is subject to some hallucinations & is depressed. She finds a difficulty in giving direct answers to her wishes & answers questions on the subject by asking other of a mysterious nature. In good condition. Her health has improved of late

Nov 3

Today patient left here for Washleffe for a change. She is still deluded and childish mentally. Health fair

Miss Middleton

1904

May 4th

Remains at Westcliffe, where she is apparently contented & happy & she has ceased to cry at night time.

Her physical health has improved but her mental condition has got more hopeless. Quite recently, as she is a Roman Catholic her brother has considered the question of her going to Burgess Hill to get more religious ministrations, but was reluctant as to moving her, unless good was likely to follow - Dr. Percy Smith was sent down to see her & examine her without having any particulars as to her views & conduct, she expressed a distinct dislike to being forced to go to Roman Catholic services & then he was told that not only up here but also at St Leonards where her maid is a Roman Catholic, pressure had been put on her to go to service, but without avail & under these circumstances, he reported against the removal - quite recently she has fallen once or twice but evidently there is no connection with epilepsy - probably more functional. (vertigo) J.B.W.

Miss Middleton

1904

Aug. 14th

Is still at Westcliffe.

J.B.W.

Oct. 21st

I saw Miss Middleton at Westcliffe to-day she is as usual.

J.B.W.

Dec. 21st

Remains at Westcliffe.

J.B.W.

May 18th

Returned from Westcliffe to-day.

J.B.W.

May 24th

Shows considerable mental improvement. Her memory is very defective - she does not know her own age, and can not say about how old she is. Her general health is good.

July 5th

Memory is very defective. Displays but little interest in anything. Health good. Has returned to-day to Westcliffe.

Special Reportand Certificate30th Sept.

She is of unsound mind. She is to a great extent demented. It is difficult to get anything but monosyllables from her, nor can any expression of her wishes be obtained. She is cheerful and well ordered - but in matters such as food taking she often wants to be prompted lest she should be hindered from inattention. She is in good health & condition. S. H. H. Newington.

Miss Middleton.

- 1905
Dec. 18th Has sailed to-day at Westcliffe, there is no change to note in her mental condition, she is in good health.
- 1906
March 9th Has been much troubled recently with auditory hallucinations; is well ordered and is able to take a journey up to London with the Lady Superintendent at Westcliffe. She is in good health.

1902.

July 8thAdmitted July 8th 1902.Weight:

Patient arrived here this evening with two nurses having been transferred from St. Andrew's Hospital, Northampton.

Patient was admitted to St. Andrew's July 19th 1899 when she has remained since. Her first attack was at the age of 45 yrs so that the duration of existing attack was 2 years. Since she was in various forms under care for treatment. Patient is 51 yrs of age, single, Church of England & the cause of her attack is not known. Said to have no family history of insanity. Is not epileptic suicidal or dangerous.

Medical
Certificate
No. 1.

Dated July 16th
. 1899.

Each indicating insanity. General appearance very restless constantly talking to herself. Several men are outside in the room & can hear their voices & that they are going to kill her. Manic delirium is full of self-love & that she has a great deal of money that she has come to perform an operation. Says Peter is full in the food & that everyone is going to Paris in fact Com^{rs} by Otis Mather Parrott of Cambridge. Nursing Institute says that she is very restless is constantly talking to herself that she fancied she heard men discuss their voices & that they are going to kill her, that there are little women in the pillow & that she had a vision into the window at her head - Wm. G. Maxwell Farmer of Long Grove Putnam says she is very restless that she gets away from the nurse in the night time and comes into her bedroom and says people are about the premises to kill her.

Signed J. J. Wales,
High Street,
March
Camb.

Medical
Certificate
No. 2.

Dated July 16th
. 1899.

Each indicating insanity. Mrs Style's manner was peculiar, she muttered to herself when not conversing with me. She told me she continually heard voices that people spoke to her from the top of the house talking her of plots to kill her - She told me that poisonous matters were found down her from the roof - that her head was full of vermin that she was full of Sulphur that made her offensive to everyone - fact Com^{rs} by Otis M. & Maxwell of the Manor House Long Grove Putnam says that on two separate nights Mrs Style has rushed into the room occupied by herself & Wm Maxwell screaming and shouting that the nurse was going to murder her. By Wm Maxwell wife of Wm G Maxwell that Mrs Style has delirium as to her food being poisoned, that she believes the servant of James men Conring to kill her.

Signed J. J. Wales
33 Westgate
Putnam.

Condition
on
admission.

Mental. Patient on admission was in a somewhat agreeable restless state and very talkative especially about herself. Stated she wanted to be examined as she was sure she had things inside her which started her tonight not able to sleep. She says they come into her room at night and do something to her, that she was poisoned at St. Andrews Hospital and very badly treated and that people are under the floor of her room as she hears them talking about her. She has several other delusional hallucinations.

Physical
Condition
on
admission.

Patient is seen to be a well built lady in good health. Her hair is grey, eyes brown & her expression is childish. Her health sounds all normal - Her heart sounds are slower than normal & not very distinct but no murmur can be detected. She has a gaitic.

1902.

July 8th

Patient arrived this evening and took a good dinner. She was very talkative & wanted to be examined all once with the X-ray as she says she has something wrong inside her. Told me she was shocked with men in her room at night who did something to her. Says she has been very badly treated and not had.

July 9th

Had a restless night and is full of delusions today. Says that people are under her room that people come into her room at night & say things to her. Went to a "Cigaret" party today.

July 10th

Had a Pul. Throat etc last night and had a good night's sleep. Is cheerful today but says she wishes people would not impersonate others & come & disturb her when she is quiet. Has been for a walk today & says she likes being out.

July 11th

Had a Pul. Throat etc again last night which she says gives her just a good night's sleep. She is talkative today also suspicious of everyone.

July 12th

Says she does not like the presentation that is going on here from the people who have followed her from Chattanooga who make remarks about her but she can't see where they are. Getting her food well & goes out for walks daily.

1902.

July 13th

During the night patient was rather excitable and used bad language to imaginary men who she said were talking about her. So far she told me the people from Northampton were following her about. Takes her food well & enjoys going to the other house. *W.H.D.*

July 14th

Report sent to the Commission in Lunacy. Patient is glibly talks freely about herself & her affairs. Shows marked delusions of suspicion & persecution. She tells me today that many of the people have followed her from Northampton here - Criminal Lunatic patients & brother attendants. Shows complaints about such people being in the cells underneath her room. Health good except she has a moderate sized fistula. *W.H.D.*

July 18th

Patient is not quite so satisfied as she was and tells the complaints of the stool & that she always feels tired she is constantly wanting to go & visit the other house. She says that the food is excellent. *W.H.D.*

July 19th

Is still suspicious and talks about influences from Northampton still being exerted upon her. Sleeps well at night & goes out daily. *W.H.D.*

July 19th

Is not so contented as she was & has wanted change to another house. Health good. *W.H.D.*

Miss Stile.Miss Stile.

1902.

July 21st

Has been very unstable the last two days wanting to be moved to another house. Has decided and in fact nothing pleases her. Sleeps well at night with 9 Pills Lindell's. Goes for walks daily & attends the various lectures & talks and plays Croquet. Eats well. *W.H.D.*

July 26th

So far patient is not quite so unstable and unreasonable in her wants. Has evident fixed delusions of persecution. Goes out daily. *W.H.D.*

Augst 10th

Patient is very deluded and irritable at times. Says people come and annoy her at night to prevent her sleeping. Plays Croquet and is fond of going about constantly. *W.H.D.*

Augst 23rd

Miss Stile is much more contented & not so irritable now. But her delusions of persecution are as persistent as ever. Health good. *W.H.D.*

Sept 4th

There is no change in patient's delusions & she is contented as a rule, but now she says she has something wrong in her abdomen & wishes to be re-examined. Goes out daily. *W.H.D.*

Sept 29th

Remains in the same deluded state & says that people exert evil influences over her especially the nurses in the house. Is very restless. *W.H.D.*

Oct 8th

Today Miss Stile must be London & was examined by Sir John Williams who stated that she had nothing the matter with her abdomen which she has complained of some years. Is the same Mentally. *W.H.D.*

1902

Oct 2nd

Today left the Villa Grand Collet Mayard at her own request. She has not improved mentally and full of delusions - heart excellent. *J.H.D.*

Nov 8

Returned to the Villa today at her own wish as she said she did not like the change. She is still very deluded, constantly making complaints about nothing, is never satisfied with anything & now says that Dr. Williams has injured her body by leaving her. *J.H.D.*

Dec 15th

Mrs. Style does not improve at all mentally, in fact at present is more deluded than when depressed. Thinks she has something inside her skull under sitting room until her clothes and now holding her stomach most of the day. Is now taking $\frac{1}{2}$ pint Bicarb. & Pot. Iod. $\frac{1}{2}$ each night. Masturbation. *J.H.D.*

1903

Jan 20th

Patient is in the same deluded state and has been very moody of late complaining of everything without any real cause. Some good heart. *J.H.D.*

Feb 24th

Mrs. Style has been more excitable and abusive of late owing to her wanting to be moved elsewhere. Now she wants to return to Chalfont which she refused when she came here & says it is much better than other institutions - Thinks she delusi she has something inside her. Takes $\frac{1}{2}$ pint Bicarb. & Pot. Iod. $\frac{1}{2}$ each night - *J.H.D.*

1903

March 15th

Patient remains in a very unstable state & says she intends to complain that she is moved to Brighton. She now will seldom speak, but will be like fire most of the day complaining of everything from her delusions & has the delusion she has something alive inside her - her heart is entirely & she masturbates - Some good heart. *J.H.D.*

March 26th

Today patient left here for St. Andrew's Hospital under the authority of Sir W. & M. Style Bart.
Discharged not improved.

Admitted May 27, 1903.

Weight, $15 \frac{1}{2}$ lbs.

1903

May 22^d

This evening patient arrived with his attendant at 6.30 p.m.

Statement
of
Saliindas.

Patient is single, 38 years of age, child of England & of no occupation. This is stated to be his first attack but he has been of peculiar habits, very eccentric & of weak mind for some years, but has been much worse during the last month. The cause is said to be masturbation - his blood and bowels are both said to be of usual intellect. He is said to be neither epileptic, suicidal or dangerous.

Medical

Certificate

No. 1.

Dated May 27^d

1903.

Best indicating insanity. The bills of his house are always kept down, have noticed this on several occasions. Several answers of questions I put to him were given in an incoherent manner especially in regard to his servants. Best Cert. by Miss G. Henry Sinden of Salt Milling, gardeners, who told me that he will at times cut off the heads of all the flowers in the garden & also in the adjoining way he is very careful of the cabbins, also that he has on several occasions mistooked himself with them in an incoherent manner foraging them off the trees.

Signed, G. Lord,
Albion Street,
Leeds.

Medical

Certificate

No. 2.

Dated May 27^d

1903.

Best Cert. by Miss G. Henry Sinden, gardeners, states that on April 26th last he saw him allow a man to undo his door & pull out his fire as proceeds to the act of firing a gun, that such behaviour is stated to have been seen by several former gardeners & others. She could not tell what state he can get hitting definite for him & has accused him of incoherent behaviour without eliciting any reply except that he can pay for it.

Signed, J. W. Dow,
104 High Street,
Leeds.

1903

Condition

on

admission

Mr. Molinert.

Mental. on admission patient was in a somewhat confused, restless and semi-excited state. He did not reply to questions at once, some he did not reply to at all, and often he hesitated a good deal. His replies were not always coherent. His answers also were very undecided and agreed often to the said exactly the opposite. He stated he knew where he was when asked the reason of coming and it was a big question & we must not dwell about it. I have believed he has expressed is that he has nothing inside him. He is very suspicious especially about his food which he cuts up into little bits & examines it carefully.

Condition

on

admission

Physical. Patient is a robust, slight built man rather thin. His hair is fair turning grey, eyes brown, and his expression is serious. He keeps his eye downcast & does not look up when spoken to. His complexion is pallid. His breath sounds are normal. Heart sounds slow but no bruit is heard. He has no rales or bruits.

Mr. Molinert.

1903

May 22

Patient on arrival appeared very suspicious of everyone everything - also he did not offer any remarks at all unless spoken to and then only answered after a good deal of hesitation and then not always coherently. He said he had been advised to come here for a change but did not know why, agreed that he had had a nice drive when asked what he thought was the reason of his coming here said he must not enter into that on any condition. He appears to know where he is. He took some food on arrival but did not eat it.

May 23

Had a quiet night about 5th broken sleep. Today he is confused & does not appear very collected in his ideas. Said he was convinced here and would rather not discuss anything about his being here or going away. Said he had nothing inside him when I suggested an appeal: was rather excited & said he would take no medicine. He mutters to himself a good deal at times keeps looking up at the ceiling & following it round with his eyes. He is still very suspicious. Has taken his food fairly well today.

May 24

Patient had 5th broken sleep turning over in bed a good deal. Said he would not get up today as he required a rest & was comfortable when he was.

1903.

May 24th

Is still very suspicious about his food and is with a good deal of persuasion made to take sufficient. He remains in bed as he still says he wants a rest. Says he never reads and - Refuses to take medicine and quack medicine in his food. *W.H.D.*

May 25th

Was alone but sleep this time seems to be well taken. Still sleeps in bed muttering to himself softly steadily turning his head as if he heard voices. Still wishes to remain alone and says he would like to go back home but says very little about it. Will not talk unless questioned. *W.H.D.*

May 26th

Had a good night. Still very quiet & reserved - Still remains in bed today he does not want to get up and is inclined to become excited when the subject is mentioned. Still takes very little food & his attendant he did not like to eat too much as he could not afford to pay for it. - Bowels constipated. *W.H.D.*

May 27th

Report about Constitution, he is well minded & confident. He is not suspicious about the other things appearing against him. There is grave suspicion that he has some hallucinations. He is clear about eating food & has suspicion of poison. He faults his private staff about drinks in a way which suggest that his thoughts are centered on sexual matters. *W.H.D.*

1903.

May 31st

Has been very irritable and resentful being asked by Dr. Newington or asked any questions. Says that no one has any right to come into his room while he is left alone - never wants anything if asked & at the mention of his wishing to return home he at once becomes excited & refuses to go into the question. He takes just sufficient food & has to persuade him to take what he does. *W.H.D.*

June 6th

Is still available & irritable when spoken to but quiet in his room if no one goes in or speaks to him. He usually sits all day in the same chair with his feet on a stool or the bed being down. Never reads anything or even looks at a paper. Is very suspicious & examines every morsel of food. His chief diet is bread & coffee. Takes just sufficient food. *W.H.D.*

June 22nd

Report sent to the Com^{rs} in Lunacy he is well minded & takes more interest about his personal comfort than about acquiring his liberty. He has delusions of persecution e.g. that there is a conspiracy against him. He never asks a question straight but has a cunning calculating way of dealing with it which is commonly found with these kind of delusions. He requires urging to get him to see at a reasonable time to wash & dress himself & eat the good. *W.H.D.*

1903

July 13th

Mr. Prohman.
 Is still very irritable at times and is very quickly agitated if one asks him a few questions. He sits most of the day looking about his room and never takes up a paper or looks at books at all. He will not admit into any explanation as to his coming here or going away as he says we must not go into it. When Dr. H. Newmeyer asked him today how his dress suits him if open or not, he became very angry & refused to answer such vulgar questions - J.H.H.

July 16th

Went 8.15

Patient is in the same state of mental misery, repeats nearly every question he is asked and his reply is usually that he said so. He still becomes agitated if asked many questions and especially if one mentions his relatives. Says his brother said that he is here after Dr. Newmeyer has told him he has written the Constitution. He is still called troublesome about his food as he only just takes sufficient with paramecin. Attempted to run away today. J.H.H.

July 20th

Today he got up as usual & went for a walk but after getting about a mile from the house he started from his attendant to run away. His attendant stopped him & he struggled to get away as he asked a man who was passing to assist him which he did & patient

1903

July 20th

were quiet but refused to come back here. So another attendant must take him up at once & walked quickly down again. When Dr. spoke to him about it, he said he had no idea Dr. Newmeyer would not like his walking to Lewis. He has been rather more irritable with his attendant the last few days. J.H.H.

July 21st

Went 8.15

Has complained of an uneasy feeling about the Rectum the last few days & has been distressing himself with hot water and until today would not let anyone examine him. Found on examt. a hard swelling on the left side of the Anus which was about superficial. Found a lot of formation every four hours & gave him about Potassium injection. This evening he says he feels better & after the injection he had a Motion down examt. of it. Found some pus so that it is evidently a local process & is now discharging. Temp. 99. J.H.H.

Aug. 2nd

The abscess continues to discharge still a little but all the swelling is gone & patient does not complain of any pain now. Also sleep is normal. Has been taking plenty of diet in the way of beef tea etc. also is taking Milk & Cod Liver Oil. He is still mentally still very weak. J.H.H.

1902

Aug³¹ 7th

Patient is now going about as usual and all signs of inflammation are gone. Mentally he is very dull still & his lips move as though he was talking to himself often but not audibly. He still checks over every answer he gives and is very undecided in his movements. Satisfying his food much better now he's not so suspicious. Is still talking his Chinese. *L.H.D.*

Aug³¹ 14th

Today his lawyer clerk delivered him a summons (under 116). I took the clerk into the hospital room & told him that he had brought a paper for him - patient looked at the paper said he could not understand anything about it & he did not want it. After looking at it a few minutes he threw it on the table and told the clerk to take it back with him, so we left the room but patient followed us out with the paper in his hand & rolled up and threw it at the clerk's head saying "take it away with you it isn't healthy". I picked the summons up & took it back to him - he was rather excited over this & he told me the clerk ought never to have been allowed inside the front door. *L.H.D.*

M. HolmanM. Holman

1903

Sep²⁰ 20th

Patient remains in a very quiet state as a rule but at times will get very excited for some few minutes especially if any mention is made about his relatives or his property. He is not exhibiting tremendous in all his actions and requests, he asks for nothing one second & does not want it the next - when asked today if he missed his home said it was nothing like with him it was the people who sent him. He is looking well & takes his food well. *L.H.D.*

Oct 15th

Patient remains about the same mentally. He seldom goes out or takes any interest in anything. One day he will be quite cheerful & the next he will not converse at all. He will also suddenly go to the outside door & try if it is locked & asked to be let out in the evening and becomes excited and abusive when he's told that I can't be allowed. He is talking his food well. *L.H.D.*

Nov 20th

Patient remains in the same quiet state as a rule only getting excited occasionally usually on a question of discharge. He continues to sit in his room all day long doing nothing & will not associate with anyone. Health good. *L.H.D.*

1903.

Dec 20th

There is no mental improvement in this case and he becomes more demanding - He is often irritable & says that he hates doctors and would leave them in his room.

1904

Jan. 9th

He is eating his food better. J.B.W. Very difficult to please, & uncertain about his food - complains he cannot get what he wants - when asked what he would like he said "a roast chicken" - this was prepared & brought to him - but he refused to touch it & said he wanted a boiled one - this was supplied, but he also refused to touch it & was very abusive. J.B.W.

Feb 11th

Is much as usual, tho' fairly contented & tractable - will not go out & does not associate with anyone. J.B.W.

March 24th

Has been quiet & amiable until a few days ago when he became rather noisy uncertain & abusive. J.B.W.

May 2nd

Is very uncertain in his behavior - will not go out of doors or even come down from his own corridor. gets very abusive & threatening - if one remains talking to him too long. J.B.W.

No Delusions

Mr Philip Horace Minkins.

1904

May 9th

Report to Commr. etc.

He is suffering from dementia associated with delusions of suspicion. He often becomes suddenly irritable & refuses to listen to arguments or indeed any conversation. He has absolutely no desire to amuse or occupy himself - will read nothing & refuses to hear anything about outside matters, for instance the war in the East. He put his fingers in his ears to-day when I was giving him the latest news. He is in good health & condition.

(Signed) H.H. Newington.

Aug. 14th

There is no change to note in this patient's condition, resents interference in any way whatever - will often not answer when spoken to, & gets extremely irritable if one remains too long in his room - will not occupy himself in any way. J.B.W.

Sept. 5th

Is not quite so irritable as formerly, tho' is still very reticent - goes out for walks, but will not talk, or employ himself in any way. J.B.W.

Mr. Philip Horace Molinoux

Oct. 16th Is quiet & amiable as a rule & goes out almost daily - Has had a sore throat for 2 days for which I have given him Pot. Chlor. lozenges - but he declines any medicine & resents interference. J.B.W.

Dec. 21st Has been rather better tempered lately & inclined to be more sociable - He now comes down stairs & at times wanders round to the front corridors He will not employ himself in any way J.B.W.

1905

March 1st

There is the intention in writing, that he is insane. He is uncommunicative as to his habits & how often he goes in his traps. As a rule he is quiet & pleasant, but when (as in instances on my visits to him to-day) he is in no good mood, abusive & even derisive or contemptuous. There is nothing near to delirious or hallucinations as yet noticeable in his behaviour. Physical condition good.

(Signed) H. Hays Newington

Report & Certificate to Commissioners May 10th 1905 His powers of conversation are very limited. It takes a long time to answer a question and then his answer is doubtful & inconclusive. He is of unsound mind, he does not occupy himself in any way, will not look at papers, books or join in games, on the other hand he keeps by himself and away from others.

1905. He easily loses his temper over trifles, when he quickly becomes abusive and threatening. He probably suffers from aural hallucinations. His habits are peculiar and eccentric. He is in good condition and health.

Signed H. Hays Newington.

June 20th His mental and physical condition is the same as reported on May 10th.

Sept. 20th He continues to behave and dress in an eccentric manner. He is solitary and will not reply when spoken to, but runs away. Health good. H.H.

1906

Jan. 4th There is no change to note in his mental condition. Health good. H.H.

March 19th He is of unsound mind being the Report and Certificate subject of dementia. He suffers from aural hallucinations. He is morose and solitary in his habits, keeping to himself and often hoarse and abusive when spoken to. His bodily condition and health are satisfactory. H. H. Newington.

1906.

Mr. P. H. Molinsek.

June 7th: Has a slight cold and is in bed. Is taking Quin Quin three times a day. Talks reasonably about his health. *S.H.*

June 28th: This morning he suddenly attacked Mrs. Preece on the stairs, taking hold of her shaking her and then throwing her down: this was apparently a sudden outbreak of temper. Mrs. Preece was not personally injured. *S.H.*

Oct. 11th: Is demoralized, solitary in his habits. As a rule he does not reply when spoken to.

Health good. *S.H.*

1907.
Jan. 5th: There is no change to note in his condition. He is solitary and as a rule does not converse.

Health good. *S.H.*

April 4th: Is still solitary in his habits and disinclined to converse, although he has been for the past few weeks rather less melancholic in appearance and has displayed

1907

Mr. P. H. Molinsek.

April 4th: Some interest in his dress, of which, as a rule he is quite respectful. Health good. *S.H.*

Special Report and Certificate. He is the subject of dementia. As never reads, he cannot keep up a connected conversation for any time.

April 29th: He is liable to periods of ill temper for no apparent reason, though there is ground for thinking that he is subject to aural hallucinations. He is peculiar in his habits in sitting: in keeping himself aloof from everyone and in his dress. In good condition and health. S. H. H. R.

July 5th: He is in much the same condition as reported above. *S.H.*

Oct. 28th: There is no improvement to report in his condition except that he now gets out willingly and shows some regard for his personal appearance.

Health good. *S.H.*

Dec. 31st: No change mentally, health good
C. W. I. B.

Molinsux, Philip Horace, (Cont.)

Feb. 17. He is demoralized, spurs the company of others, but is quiet and tractable, and is in good bodily health. *W.S.*

May 19. There is no change either in his mental or physical condition. *W.S.*

July 28. He complains of a crick in his back, probably lumbo-sacral. *W.S.*

Otherwise he is in good bodily health, and there is no change in his mental condition. *W.S.*

1st taking lora sal. p. 2 and 3. *W.S.*

lora - 100g: very pale: faintly acid: no albumen. *W.S.*

Aug. 17. After a few days' treatment the lumbo-sacral disappeared: he is in his usual health, and mentally there is no change. *W.S.*

Nov. 17. There is no change. *W.S.*

1909. Feb. 26th no change. *c.w.j.B.*

May 25th In good bodily health. *c.w.j.B.*

June 25th He is quite solitary & his habits are in good general health. *c.w.j.B.*

27 Sept. Patient appears to be in good bodily health - mentally nothing to note. *D.S.*

23 Dec. 1910. In good bodily health - mentally nothing to note. *D.S.*

April. 3rd. Is shy, reserved & bad tempered, he had to be held while his hair was cut the other day. Otherwise no change mental or physical. *W.S.*

May 4th Special Report
He is suffering from dementia with cruel hallucinations, he insists & searches; often not speaking for days, smiling in answer to question. He moves about the house like a phantom, hiding behind doors, pillars etc. His habits & habits in taking his food are different to those of others. *W.S.*

His food habits. *W.S.*

1910 Mr. Philip Horace Molinsux

July 1st no change

August 14th no change - he avoids others will not converse: general health good. *c.w.j.B.*

Nov 7th no change

1911. Jan. 3. no change at all. *c.w.j.B.*

March 18. He continues in the same way, avoiding everyone speaking to him, he walks out in the grounds but never goes far from the house. *c.w.j.B.*

June 6th no change. *c.w.j.B.*

August 24. Mr. Molinsux complains of faintness today. He says however now that he is quite well again now. *c.w.j.B.*

Oct. 26th His brother, the Rev. Molinsux, came to see him today. The patient received him well which he does not always do, and seemed pleased to see him & he says has not been so reserved lately and seems more sociable inclined to speak. *c.w.j.B.*

Nov. 27th no change. *c.w.j.B.*

1912.

Feb. 4th He had a cold & it difficult to manage as he will wander about the corridor, he is being kept in his sitting room & is taking a saline mixture. *c.w.j.B.*

Feb. 12th Has quite recovered from his cold. *c.w.j.B.*

Mr. Jaffe

Patient on arrival was seen to be a quiet
man with plenty of confidence in himself
and also well under self control. Stated
that he was of course not mad, that
the inquisition was all wrong & that the
witnesses against him had lied for the
sake of the money they could get - that
the Ramsey Cases were all wrong & he was
going to get them all fixed - that he was
writing a book that would show up all
private asylums which ought to be abolished
as the management was bad & justice was not
done to the patients. He abused the last asylum
he was at very much & boasted that he had
got several attendants discharged - he is
seen to be very inquisitive, wants to know
everything that is going on and says
he no doubt will be able to find something
to complain of here to the Commission as
has been done in other asylums. Also he is
egotistical & has exaggerated ideas of his
medical abilities & says he knows everything
& no one can stick him anything. He is
polite at present in his manner & has no
delusion that one can find yet.

Mr. Jaffe

1902.

Physical
Condition
or
admission

Patient is seen to be a short stout man with
flame. His hair is grey, eyes brown, complexion
pallid depression west. His heart sounds are
normal. His pulse is there full & strong but his
arteries are attenuated. His chest sounds are
not fine, over the right area his heart sounds
are loud after any exertion & the S₂ sound is
noticed to be of a blowing nature at times
though not always, over the lower end of the
Sternum ~~there~~ a murmur is heard with the
S₂ sound as the valves do not appear to be
competent. His back, hands and arms are covered
with freckles and he says he does not wish any
treatment for them.

1902.

July 14th

Patient arrived this afternoon and has taken his food well. He conversed in a rational manner on most subjects except on Aegleus which made several statements which were not true about them. He displayed no delusions. J.H.D.

July 15th

Patient passed a quiet night but wandered about his room on several occasions during the night. Today he is bright, says he has nothing at present to find fault with but would like to see later on - Says he is writing plays which he hopes to make money out of. Is untidy in his habits & does not take his food in his own room. J.H.D.

July 16th

Passed a quiet night & says he is satisfied with his treatment here. Talks a good deal and is most inquisitive and appears to be looking for something to find fault with. J.H.D.

July 17th

Patient conversed rationally today and at present has given no trouble. Goes for walks daily. J.H.D.

July 18th

Report sent to the Commission in Lunacy exhibits no marked evidence of insanity, being evidently under some self control which is better than as long as he is pleased with the change here - But he has many of the habits & mania of a chronic case & is not in my opinion of sound mind. His bodily health on the whole is good.

1902.

July 16th

But he suffers much from Osmosis. The anti Values are not some of the others are degenerated - J.H.D.

July 17th

Patient continues contented, amuses himself by making childish drawings, writing a good deal on the names of Aegleus & his chief object is to show all present Aegleus. Says that Aegleus are filled with Bismuth & Sulphuric acid and the people are not mad at all - Says he fears no man & he could besting anything - J.H.D.

July 20th

Patient displays the signs and symptoms of a chronic case in that he is very restless, tries by questions to find out the method of the management of things that don't concern him at all but is very untidy about his dress & does in his own room - Will to have his "Pavlo" - Sleeps undisturbed well. J.H.D.

July 25th

Continually asking for his "Pavlo" asks how he has done in the Aegleus, yet since he has been here he has given letters, the 1st day in the Village & another to the wife of a patient when visiting hospital for him - He fears letters he denied at first - Said he did not know it was not the right thing to do - J.H.D.

July 30th

Patient appears contented & does not complain at present, says this is the best Aegleus in England & everything is done for him that he wishes except his "Pavlo" is not given him - J.H.D.

1902.
Aug¹⁰

Patient has now been given limited "Dance", but he has again given an attendant a letter to stop with the balance of which after stamping he is to keep. He has not been so restless since last note and has been more relaxed and quiet. His only grievance is that he can't find one here to assist. He is in good health & sleeps well. *J.A.H.*

Aug²⁵

Is not so restless and fidgety in his symptoms as he was as to what other people do etc. In fact he sits more in his room & talks less. *J.A.H.*

Sept 7th

Is now very quiet and does not appear to want to converse. Is not eating so well & has lost 3^{lbs} in weight. Is taking Bishop's Tablets & has Pul. Sulfurid $\frac{gr. 25}$ occasionally. *J.A.H.*

Sept 26th

Since last note patient has been down and depressed taking very little meat & living chiefly on food & lozenges - also does not sleep well & has Pul. Sulfurid most nights. He goes out for walks daily, reads the papers & has had flesh - *J.A.H.*

Oct 14th

Patient is very quiet & seems depressed. Says he does not feel very well but it will soon pass off. Does not take very much food and is more fidgety in health. Sleeps badly & takes Pul. Sulfurid $\frac{gr. 25}$ each night. *J.A.H.*

Oct 20th

Patient is rather better again in health & is taking Pul. Sulfurid after meals - also is taking his food better. *J.A.H.*

1902.

Nov 10th

Patient is not nearly so depressed, takes his food better and his general mental state is improving. He continues to express himself satisfied with his treatment here and is taking Pul. Sulfurid Tablets. Plays a good deal of Chess & Billiards. *J.A.H.*

Dec 20th

Patient continues to improve both mentally and in his general health - takes his food better and his sleeping is more satisfactory. *J.A.H.*

1903

Jan 20th

Patient is very quiet and contented, saying he feels better and is satisfied with everything here. He has not read in three months and he talks very little interest in anything. Sleeps better, has Pul. Sulfurid occasionally. *J.A.H.*

Feb 26th

Patient remains in the same quiet state and he says that he feels rather better and is sleeping better. *J.A.H.*

March 20th

Mr. Jaffé remains rather depressed at times and does not sleep very well. Takes Pul. Sulfurid $\frac{gr. 25}$ occasionally & has Quinine daily. Goes out for walks & plays Chess. *J.A.H.*

April 6th

Patient remains very quiet & converses quite calmly. Was today given his parole by Dr. H. Ehrlich. *J.A.H.*

May 18th

Patient has been much as usual since last note. Is very quiet & goes out for walks now by himself. He plays Billiards & Chess mostly. Has Pul. Sulfurid $\frac{gr. 25}$ occasionally as he does not sleep well. *J.A.H.*

1903

July 10th

Patient remains quiet and contented. Takes walks by himself, sleeps better and is looking better. Has a Pilsener occasionally. J.B.W.

Sept 5th

Patient goes about by himself for walks in the country, plays chess and billiards daily, and makes no complaints whatever. Health good. J.B.W.

Nov 8th

Patient remains in the same quiet contented frame of mind & does not express any wish to go away. Goes about where he likes by himself. Has Pilsener about once a week. J.B.W.

1904

Jan. 22nd

There is no change to note - he is quiet & amiable - is taking a mixture of bromine, Colchici & Pot. Sod. J.B.W.

Feb 22nd

Is still taking the medicine. J.B.W.

March 24th

Remains quiet & amiable - has his parole which he makes use of - plays chess & billiards a good deal - is egotistical & will cheat at games if he thinks he is not observed. J.B.W.

May 2nd

Is as usual. Suffers much from eczema - internal drugs - such as arsenic - or Pot. Sod & Colchicum seem of no avail - is using Resin. soap & ointment. J.B.W.

1904

June 25th

Remains much the same - is troubled a good deal with eczema - his urine I have examined - but there is no sugar - is using Resin. soap - but is taking no medicine. Has an occasional 8 grain powder of bismuth.

Is quiet & looks depressed - walks about the country alone - a great deal. J.B.W.

Aug 14th

Is going on much as usual - his skin is rather better than formerly. J.B.W.

Sept. 30th

Mr. Jaffe has of late been having an occasional ball with a tin of Antiseptic Salts emptied into it - He is also taking a 3 grain tablet of Linnine Salicylate 3 times a day - & seems benefited by this treatment. J.B.W.

Oct. 16th

During the past week Mr. Jaffe has been slightly aggressive - & very much to the face generally. Talking loudly, writing letters & wanting his case enquired into etc. a few days ago he was interviewed by Sir James Crichton Browne, to whom he said that he was happy & comfortable here - but wanted his liberty - but that he would be willing to stay on here for 6 months more as a Voluntary Boarder if

1904.

Mr. Martin Jaffe'

they would take him of certificates - He is having a mixture 3 times a day of Ammon. Brom. & Jinct. Hyoscyamus - also an occasional dose of Calmel & Veronal.

J.B.W.

Oct 18th

Is still excitable, loquacious & interfering yesterday Dr. A. Newington (in the absence of Dr. H. Newington) stopped his parade for the time being - but he still wanders about the house as he pleases.

J.B.W.

Oct 20th

Mr. Jaffe' is now kept in his room as he is very noisy & aggressive, going into the private rooms of the other patients & being rude & unpleasant generally - Last Sunday - he went down to the service at the dissenting chapel & made himself conspicuous by talking loudly during the service - he also went to the Bell Inn where he was noisy & loquacious - On Monday morning he came to the page in the chapel here - & in the middle of the service shouted out to me "every word's fine". He is writing endless letters to all kinds of people. J.B.W.

Mr. Martin Jaffe'

1904

Oct. 22nd

Mr. Jaffe' is no better mentally, tho' being kept under supervision he is less trouble^{some}. By Dr. A. Newingtons order he had 1 gr of Icton Emetic, two nights ago - & 1/2 gr. each night since - Is also having 25 grs of Opium each night - & a man sitting up to talk after him - tho' not in his room - I have also given him a mixture containing Ammon. Brom. & Jinct. Hyoscy. but he will not take it regularly - He is full of complaints, mostly trivial, & writing many letters to the Commrs & others - He is in a very restless & excitable state - quite different to his normal state since he first came here - demanding all sorts of special attention as he says he pays a guinea a day & is constantly telling me this - & means to have it's value - Makes endless & groundless complaints about the place generally, & the staff, & attendants - & some of his statements are very far from truthful. J.B.W.

1904

Oct. 26th

Mr. Martin Jaffe

There is no improvement in Mr Jaffe's condition. He seems to be trying to give as much trouble as possible - requires two men in constant attendance on him during the day - & one to sit up with him at night - last night during the night he set fire to some h.c. paper in his bedroom - when remonstrated with on this offence - he replied - "Oh it was only some h.c. paper" & quite ignored the fact that he might have set the room & house on fire - He is very crafty in all his actions - of which the following is an instance - he has asked us every day to examine his urine - this I have done & found it quite normal - to-day he put some household sugar into it himself - hoping we should not discover it had been tampered with - This is characteristic of his actions, in every way - & he is always trying to discover some one breaking a rule - or doing something - which he can report to the authorities - & his statements are very overdrawn & often without

1904

Oct. 31st

Mr. Martin Jaffe.

any foundation of truth. J.B.W.
To-day Mr. Jaffe was found to have a bruise on the bridge of his nose - In a letter sent to the office Mr. Jaffe complains of having been assaulted by the attendants - on Dr. Herbert Herington inquiring into the matter - Mr. Jaffe denies that this was the truth & on 3 occasions emphatically says that no-one had touched him - & that he supposes he did it himself "tumbling about" - His condition has not altered & he is inclined to be destructive at times - His pulse sometimes is very intermittent. J.B.W.

Nov. 4th

Mr. Jaffe again to-day made a complaint that he had been assaulted by one of the attendants - & that he bore the marks, Dr. Herbert Herington investigated the matter & had him stripped for examination - as no marks were found - nor could Mr. Jaffe point to any - he then said that his mustache hairs had been pulled out. J.B.W.

Nov. 14th

Mr. Jaffe is rather better - not quite so aggressive & is only attended by one man when he goes

1904

Mr. Martin Jaffe

Nov. 17th

out - but is at times volatile & noisy -
spitting about the corridors etc. J.B.W.
For two days past Mr. Jaffe has been
trying to convince me that he had been
kicked on the leg by an attendant, I
investigated the matter & found it to be false.
To begin with, he says the bruise is in
front on his skin, but there is no sign of
it - & yet he said he was kicked from
the back going up stairs. This morning he
showed me his leg - with apparently a large
bruise upon it, but when I asked for
soap & water & used the same upon the
bruise - it all came off. He was very
angry & tried to kick me. J.B.W.

Nov. 19th

He is very dirty in his behavior, he
defecated in his fireplace during the night
& often spits in the corridors. J.B.W.
Mr. Jaffe this morning accused one of the
attendants of stealing his gold rimmed
eye glasses; but afterwards it was discovered
that he had broken them up himself - pushed
them into a little decanter & put it all
down a W.C. having secreted it under his

1904.

Mr. Martin Jaffe

Nov. 28th

dressing gown during a visit made there
in the night. J.B.W.

Has been until to-day rather better, & conducting
himself rather better - but this morning he
was bad tempered & because he couldn't get
his own way over something - he turned round
after he had passed thro' the front door &
struck the pane of plate glass violently
with his stick - shivering it into atoms.
He is having 10 grs Veronal every night. J.B.W.

Dec 5th

There is scarcely any change to note -
A.C. is taking the following mixture :-

Rx. Ammon. Brom. ʒi

Tinct. Hyoscy. ʒiv

aq. ad ʒiij. ʒi-℥ss. J.B.W.

Dec. 12th

Is fairly quiet on the whole - having
fair nights without any sedative. J.B.W.

Dec. 21st

Is about the same - but is at times inclined
to be uproarious - impulsive & indecent in his
conversation - will take no medicine now. J.B.W.

18th 10-7
1805 Jan 5^o

Mr. Jaffe has a considerable bruise on his left temporal region. He has
made a formal complaint against the attendant who of the latter striking him
there with a hair brush last night. On careful enquiry it is proved without
doubt that Mr. Jaffe was sitting in the chair on his bed room, & was

1905

Mr Martin Daffe

his hair brush on him. Miles thought he was going to throw his chair
 on several other articles & get near him. Mr Daffe seized & broke
 his watch chain. Miles then held his hands (Mr Daffe violently
 tried then he did this quite legitimately) on Mr Daffe becoming calm
 the incident ended. Alexander Austin was with him at night. He had
 him get out of bed to make water & also heard him knock himself against
 some article of furniture. After that Mr Daffe stated that Miles
 had assaulted him with the hair brush. Mr Daffe rubbed his own
 nose on the injury & indicated a threatening appearance. He desisted
 on being told that he ran a great risk of getting expelled & dying.
 The above is one instance out of many of his constant attempts to hurt us
 & any one else if he possibly can. He has no scruple as to the truth of any
 statements that he may make in support of his false accusations.

H. Hays Esq/Dr

Jan 13

Mr Daffe on walking yesterday wanted to take a stick from a stone
 breaker. On his attempt Pralley taking it from him, he took a stone hammer
 up to Pralley, this was taken from him also. Then he scratched Pralley in
 the face; on his return he went to Mr Jordan's room, threw his stone etc
 down & complained. A few minutes after he asked Mr Jordan not to report
 the matter. He had secured a stone which was found under his pillow
 this morning he repeats his complaint against Pralley as he rather is an
 idiot. He says that the stone was for my defence. He accuses Mr Jordan
 of breaking his speech etc

H. Hays Esq/Dr

1905

Mr Martin Daffe

Feb 24 Mr Daffe is very variable & uncertain in his mood. He frequently has sudden
 outbursts of temper for no adequate cause & is most abusive & threatening as if he
 were going to strike you & then air of a sudden calm down. At these times he is
 insolent & affable & full of his own good & very talkative. He plays at billiards & goes
 out to work. He usually has quiet nights with little or no sleep. He usually has
 a ^{normal} amount of food & 7 1/2 grains W.S.S.

18 Mr Daffe has on the whole been more quiet & rational & more amiable W.S.S.

March 24 Still remains in a more amiable mood. Always very talkative & full of the incompetence
 of all mental authorities & his own knowledge of medical & scientific matters. His bodily state is
 good & he sleeps fairly well & quietly. He is not the up and at night man. W.S.S.

May 6 1905 Mr Daffe has been very troublesome of late
 especially after patients and visiting them to
 break regulations. He has expressed his
 intention to do as much mischief as he
 can. Some time back I allowed him to
 have his pen ink again on his sacred
 promise to behave honorably. Of late
 I have found that he has been writing
 to other patients, relatives, paying hands
 and imitating their hand writing etc & as
 to give him his letters a chance of passing
 inspection at our office. I wd only feel but he
 has induced other patients to send letters

1905

In his address under cover to their friend. Having warned him in vain I have had to withdraw the ink from his nose, pin, in the reason yesterday. As I left the room he rushed to the ink pot with a broom - intending to throw it out of the window. His attendant stayed him, when he dashed the ink into the latter's face and made his nose bleed. Another attendant was panicking and wanted to help. I was close also and went in. Mr. Jaffe was on the sofa in a great rage - 20% how long he was told before. I told him the do was quiet. He at once smiled & said that he was all right. Of course he was released at once. He then told me that he had seen a woman assault committed that morning on young Mr. S. On leaving I at once saw Mr. S. who was and had been quite happy all the morning. There has never been any question of trouble between Mr. S. and his attendant Vidler. It appears that Vidler prevented Mr.

1905.

Jaffe going into Mr. S.'s room the previous day - because Mr. S.'s friend was there. Mr. Jaffe told Vidler that he would be revengeful on him - and apparently this groundless statement about an assault was the matter added. Mr. Jaffe when crossed or threatened turns pale and intensely excited. There is no question that at such times he is capable of reckless violence.

J. M. DeWitt

May 24th

As a rule is offensively abusive in his remarks. He goes out of his way to make insulting statements about his medical adviser. Is subject to outbursts of violent temper when he makes use of threatening statements.

His health is good.

He left Seehurst House to-day

Not improved

Transferred
to House No. Calford.

J. M. DeWitt

f

Miss Edith Downes Admitted Sept. 15th 1902
Wright

1902
 Sept. 15th

Today Miss Edith Downes was admitted at 6.40 P.M.

Statement of Particulars
 Patient has been on two previous occasions under care for short periods, fifteen years ago at Virginia Falls, private Asylum & in 1899 at Rochampton Asylum for about a year. The present attack has lasted for somewhat over a week past, & previous to that she has not been quite well for some time. She is not said to be suicidal or epileptic.

Miss Edith Downes

Medical
Certificate
No 1.

Dated Sept. 14th
1902

Facts indicating insanity. Speech almost incessant & extremely incoherent. Says she was taught mathematics by means of a rattle. In answer to a question what hospital she was working for she said she belongs to the society of Jackanapes. She talked in this way for 10 or 12 minutes with scarcely a rational observation. I observed similar facts when I certified her in 1899.

Facts cont. by others. Mrs. L. E. Downes, Schiller tells me that since last Tuesday she has been restless & sleepless & has been unable to apply herself to anything & been talking incoherently & incessantly. Mrs. M. Francis Maria Downes ^{since Tuesday} says she Edith Downes has been getting more & more for months has been in an unnatural mood, frightened of herself & of living alone, restless, sleepless & incoherent in speech.

Signed, James Gray Esq. M.D. &c.
25 Highbury Place N.

Miss Edith Downes

Medical Certificate
No 2
Dated Sept. 15th
1902

Facts indicating insanity. General manner & appearance rapid continuous & frequently incoherent conversation, rapidly changing the subject which was often indicated by the ending syllable of a previous word. She had decorated some baskets with little flags & odds & ends. Facts cont. by others. Miss Francis Maria Downes of St. Marys Rd. Canonbury, sister of patient tells me her manner is greatly altered. She is usually reticent. She is very nervous & irritable. She has had two previous attacks.

Signed, Edward Selig Esq.
48 Highbury Park N. London

Condition on Admission

Mental Patient on admission was restless and talkative, keeps on talking in a rapid disjointed manner, passing from one subject to another, & apparently having her ideas jumbled in a disconnected irrelevant manner. When having her dinner, if allowed would mix everything up together on her plate.

Sept. 16th

Patient with the exception of her hours that she slept keeps up a perpetual chatter all night.

Physical Condition on admission

Patient is well developed & very well nourished there is no evidence of any organic lesion outside the brain the lungs are healthy the action of the heart is rather quick but there is no valvular disease. She has a fresh complexion in every respect looks healthy & well physically.

Sept. 18th

Patient slept four hours last night but in other respects she is about the same

19th

Continues very restless & talkative had 4 grs of Lional last night & slept for about 4-5 hours. She is mischievous pulling things about & will tear her dress or any article of furniture if not watched.

Sept. 20th

Report sent to Commissioners in Lunacy - Patient is insane. She talks without ceasing more or less incoherently. She has little or no sleep in spite of narcotics. There is reason to believe that at times she has aerial hallucinations. She has to be washed & partly dressed.

21st

Slept for six hours last night having had a hot bath & 4 grs of Lional but shows no improvement in her mental condition.

Sept. 25th

Patient has been available restless and noisy all day, talking incessantly in a loud voice without any sense of meaning, and is unable to answer questions rationally. She talks to people who are not present, & looks at the wall & talks to people if they are there and is very untidy in her dress. Does not sleep well but now taking R. Pul Lional 4 grs each night. J.H.H.

1902.

Sep. 26th

Patient awoke this m. am after this was noisy and restless. Today she remains in the same mental state, has been out for this walk today walks all the time in the same rambling way. Is taking her food well but likes to mix it all up together in a dish way. Has a few spots on her face which she will pick. Has given her some medicine: for better - Shows acting well. J.H.D.

Sep. 27th

Patient continues to exhibit the same ram-
mantic state conversing in the same
rambling incoherent way all day long.
Is taking her food well & sleeping rather
better now she is taking 19 Pills 1/2 each
each night. Mentation set in on the 26th inst. J.H.D.

Sep. 28th

Had a good night but not quite so noisy
today, but still is quite unable to carry
on a rational conversation even for a
few seconds. Goes for long walks daily. J.H.D.

Sep. 29th

Left well last night and is talking to herself
in the same rambling way today - Is still
quite unable to reason or understand what is
said to her. Still picks her face. J.H.D.

Sep. 30th

Does not exhibit any mental improvement
at present. Goes out daily for walks, takes her
food well & has 19 Pills 1/2 each night J.H.D.

1902.

Oct 1st

Has been very restless and talking to herself all day
rambling from one subject to another incoherently -
But she now sleeps better & takes her food well. J.H.D.

Oct 2nd

Still in the same incoherent state and chatter
nearly all day long. Is taking her food sleeping
better & goes out daily. Still picks her face. J.H.D.

Oct 3rd

Patient is not quite so restless & has been doing some
needle work - Is still unable to converse rationally
talks to herself most of the day and still picks her
face. Takes her food & now sleeps well. J.H.D.

Oct 10th

Report sent to the Commission in Lunacy. This witness
She talks without ceasing in a disconnected, method - the
last words of a phrase being the start of the next phras-
e. - She can give no rational account of herself or
anything. Shows restless & fidgety. She requires attend-
ance in dressing - Takes for time to time pinches on her
face which she picks until she assumes
considerable proportions. J.H.D.

Oct 22nd

Patient still chatter incoherently all day & is still
unable to converse rationally. But she is sleeping
better, is not so restless now she takes is improving.
She goes for long walks & takes her food well. J.H.D.

Nov 20th

There is no improvement mentally to report - as
patient talks all day incoherently to herself. Her
health is good she goes out daily - J.H.D.

1902

Dec 20th

Patient is not so available and being, also is sleeping better, taking her food well and her habits are not so untidy. L.H.D.

1903

Jan 20th

Patient is now improving mentally and will now converse rationally for a few minutes but still rambles and is incoherent. Health good. L.H.D.

Feb 20th

Patient varies mentally one day is quite rational for a few hours the next day is quite incoherent all day long - Semi good health - L.H.D.

March 10th

Miss Downes is improving mentally & often she is very unstable and available ^{at times,} but she is as a rule coherent in her conversation. Talks as usual in music. Health good. L.H.D.

April 10th

Patient continues about the same mentally, she is still restless and unstable at times, and will incoherent letters at times especially when she is in an unstable state. Semi good health. L.H.D.

May 8th

Miss Downes improves mentally but does not express any wish to return home. She walks daily & takes fairly well, also is very fond of music & plays in the band here & there as well. L.H.D.

June 20th

Patient speaks quite rationally and shows that she can return home if she wishes but elects to remain here. Semi good health. L.H.D.

1903

August 22nd

Patient remains here in the same contented state as her own wish - Goes about the grounds by herself. Health good. L.H.D.

admitted October 2, 1902.

Weight: $\frac{11-15}{165}$ 1902.

October 2.

This evening at 6.15 Patient arrived with his son and an attendant. He was received here on an urgency order.

Statement

of

Particulars.

Patient is married, aged 32, and has a family. He is an Insurance Broker by profession. This is stated to be his first attack and the duration is said to be five weeks. The cause of his attack is related to be overwork. He is said to be neither Epileptic, suicidal or dangerous. Has no family history of insanity. Member of the Church of England.

Medical
Certificate
No. 1.

Dated Oct 2nd 1902.

Best interesting incidents. He is restless, wandering about the house without any purpose. Says that he is the King of Monbarra & that I am Lord Ritcheson, the finest fencer player in the world. Thinks that I am also his son Elise.

Best Com. by others. Says that his eldest son is Lord Ritcheson & that his female nurse is the Queen Mother. Information received from his son Theodore John Hyelli, 73, Portland Place, N.W. No occupation.

Statement
accompanying
Urgency Order.

The reasons for the Urgency order are that he is becoming more & more restless and excitable; breaths profusely as China Vases and has almost succeeded in throwing himself out of a high bedroom at 73 Portland Place, W.

Oct 2nd.

Mental
Condition
on admission

Patient on admission was seen to be in a state of semi-acute mania with very exaggerated delusions as to his own power, wealth etc. He stated he was the King of England, knighted his attendants, promised them thousands of pounds, says all the Kings in the world belong to him & owns all the Kings of them. He is also very restless, wanders about his room aimlessly, talking all the time, going from one subject to another without the least meaning and is absent of picking up anything he sees & putting it in his pocket.

Physical
Condition
on admission

Patient is seen to be a well built, short man, with grey hair, blond, brown eyes, pale complexion and restless expression. His pupils are equal, slight tremor of tongue of protrusion, his speech is quick & lively though at times it is slightly hesitant & blurred. His three joints are light. His heart sounds are normal. His Head sounds are sweet but no Murmur. Cerebrals delirious. His pulse is 60, his tongue is coated and he has several bruisés on his legs.

Oct 2

Mr. McGill

This evening patient arrived about his dinner with his son. During the evening he was very restless, wandering about his room, moving the furniture from one place to another, pulling the table & chairs about, also constantly knocking at the door and wanting to go to Providence by special train that was waiting for him. He says that he has bought this institution which he thinks is the Carlton Hotel, that he is Lord Rillstone one minute and Desouchet the next, wants the Queen to come and dine at one when given order for the Government to be dissolved. Says that God will be quick also taken R. Pals. Oct 2 - 1/10/02

Oct 3.

Slept well all night but this morning he is very restless and quite incoherent. Today he has been out for a short time but would not walk, in his room he has been constantly moving the furniture, has pulled his curtains down, torn his sofa & smashed his window. Has been very disagreeable with his food taking it out of his mouth & throwing it about the room. Says he is the King of England & has been noisy this evening during very disgusting language. Has taken R. Pals. Oct 3 & 1/10/02

Mr. McGill

1902.

Oct 4th

Today he was visited by Col. Andrews, D.P. who signed his Reception order also was admitted under the same, Patrol & the Medical Certificate. 1/10/02

Oct 4th

Patient had a somewhat restless night arising frequently at times. Today he is very excited and restless more so in the morning and evening. He says today he is the King and keeps on talking, telling us he is reviewing the troops. Says he hears his wife talking in the next room & must go to her - Is still destructive & is constantly pushing the attendants about. Has taken his food well today but is very chafed with it. Took Pills 3 times tonight
L.H.D.

1902.
Oct 5thMr. Myrtle

Keeps well till 4 am after this was noisy and restless. This morning he was very excited. Says he was "kicking" Oswalds to Windsor & see the Queen at once - Went out a little but would not walk. In the afternoon he was quiet and sat in his chair looking over the papers telling us the millions he had made over the oceans. His words have acted well & he has taken his food better - Bruce not as marked has taken P. Pills 3 times tonight - L.H.D.

Oct 6th

Kept from 10 pm to 3 am after this was violent & shouting after this - Today he has been restless but not as restive or violent - Has been out for a walk. Is still in the same exalted state says he has made everyone's fortune & he is worth millions of dollars food well - L.H.D.

Oct 7th

Patient had an excellent night sleeping 8 hours. This morning he is very good tempered & has been out for a long walk - He says he has a million wives & every woman has his children at once now - Took P. Pills 3 times tonight - L.H.D.

Oct 8th

Patient had a restless night, but today has been quiet & had his good walks. Says he has made nine millions today, has been given 7 million pounds & is Lord Kitchener. Has taken his food well - L.H.D.

Oct 9th

Mr. Urie

Report sent to the Commission in London. States that the most exaggerated ideas. That he is the new King - that he has millions of money. His self conversation are frequently ridiculous. He gives wrong names to things about him + mistakes their identity. He is often restless, mischievous, noisy and impulsive. His mental condition is suggestive of General Parry of the insane. His bodily condition is good. His diet healthy apart from the physical condition usually associated with General Parry's inequality of pupils, general muscular weakness abolition of knee reflexes.

Oct 10th

Had two more light & a much quieter day with some 20 minutes on observations. Also has been sitting quietly for sometime reading the paper. Continues to talk of the millions he keeps on making for himself & everybody else. He takes his food well & goes out for a walk twice daily.

Oct 11th

Step fairly well all day is quiet & very good. Responds, talking to himself in a childish way. Making millions for everyone he sees, says he's the King today - He takes his food well at night.

Oct 12th

Rather more restless & excited today also very mischievous and inclined to be resistive. Still rambles in the same exaggerated way. His speech is hesitating at times. He walks better than he did but is easily tired.

1902.

Oct 14th

Subject is not as restless and excitable in the house but when out for a walk today he had an excited attack. He talks his attention, also that he had been - He has been about 6th sleep and night with Parry's sleep. He is still quite mischievous. Takes his food well.

Oct 17th

Life - I fought for my country - I have travelled round the world and married Eve but ever Adam and been in prison since 1864 -

Oct 21st

I must request you to institute an inquiry in the House of Lords. My name James Mackintosh of Arundel. Scotland near Killarny.

Oct 28th

Oct 12th
Rather more restless & excited today also very nervous and inclined to be resistive. Still rambles in the same exaggerated way - His speech is hesitating at times - He walks better than he did but is easily tired.

Mr. Uryelli.

1902.

Oct 14th

Patient is not so restless and excitable as the day before when out for a walk today he had an excited attack & talked his attendant, also tried to hit him - He has been about 60° sleep each night with Pab. Div. 1/2. He is still quite mischievous. Takes his food well.

Oct 17th
Patient is much quieter and less excited than he was also has short sleep intervals now for a night or two - He still rambles most of the day about his millions about being the King & about other is besides Castle - He talks Pab. Div. 1/2 & 1/2 each night.

Oct 21st
Has been rather more excitable again since last visit but is not so resistive as he was. Still mischievous and is always talking in the same exaggerated way as, "I'm the King of Kings", "I'm the millions of millions of millions" & that every thing that is his own are made for God.

Oct 28th
Patient continues to be very excitable at times but still same mischievous about - Takes his food well a good bit daily. Talks now daily.

Nov 2nd
Report sent to the Com. in Lunenburg. He is exhibiting extreme nervousness & excitation. His ideas are grandiose. He often says he is with millions, on alternate days he is noisy, noisy, shouting the night about the room now his rambles in a most disgusting manner - He presents most of the symptoms of General Paralysis as inequality of pupils, absence of reflexes & in the respect his health condition are good.

1902.

Mr. Venelle.

Oct 9th

Report sent to the Commission in Lunenburg. Patient has the most exaggerated ideas. That he is the new King - that he has millions of money. His cell conversation are frequently irrelevant. He gives wrong names to those about him + mistakes their identity. He is often restless mischievous noisy and impulsive. His mental condition is suggestive of General Parson's of the insane. His bodily condition is good his diet health apart from the physical condition usually associated with General Parson's inequality of fluids, absence of these reflexes.

J.P.H.

Oct 10th

Had less sleep light + a much quieter day exhibiting no restlessness or disturbances. Also has been sitting quietly for sometime reading the paper. Continues to talk of the millions he keeps on making for himself & everybody else. Detaching his food well & goes out for a walk twice daily.

J.P.H.

Oct 11th

Sept fairly well all day is quiet & very good. Sleeps, talking to himself in a childish way. Making millions for everyone he sees, says he is the King today. Detaching Pale fluid light at night.

J.P.H.

Oct 12th

Rather more restless & excited today also very irascible and inclined to be resistive. Still rambles in the same exaggerated way. His speech is hesitating at times. He walks better than he did but is easily tired.

J.P.H.

Mr. Venelle.

1902.

Oct 13th

Patient is not so restless and excitable in the same way when out for a walk today he had an excited attack & talked his attack out, also that he did better - he having about 6th sleep and night with Pale fluid light. He is still quite irascible. Talks his food well.

J.P.H.

Oct 14th

Patient is much quieter and less excited than he was also has about lunch intervals now for a minute or two. He still rambles most of the day about his millions about being the King detaching this is beside Castle - detaching Pale fluid light + Pale fluid light at night.

J.P.H.

Oct 15th

Has been rather more excitable again since last visit but is not so resistive as he was. Still irascible and is always talking in the same exaggerated way as "the King of Kings", "he has millions of millions" & that every chair & table in his room are made by gold.

J.P.H.

Oct 20th

Patient continues to be noisy & excitable at times in the same irascible state. Talks his food well a good deal daily. Talks now daily.

J.P.H.

Nov 3rd

Report sent to the Com^{mission} in Lunenburg. He is excited & restless irascible & impulsive. His ideas are grandiose. He often says he is with millions, on alternate days he is noisy, noisy, shouting the epithets about the room now his habits in a most disgusting manner. He speaks most of the symptoms of General Parson's as inequality of fluids, absence of these reflexes. In the respect his health condition are good.

J.P.H.

1902

Nov 20th

Patient continues much the same level quiet & fairly coherent: one day more detailed the best. This goes on quite regularly on alternate days - His appetite continues good & he takes the food well. He is taking 93 gr. of Chloroform 100 gr. and 100 gr. of Pot. Perm. 1/2 each night - Weight 11.7 ^{P. B.} L.H.H.

Dec 3rd Patient remained in bed today owing to slight swelling of left calf of leg owing to probably some thrombotic condition - In the evening his Temp. was 100.4 He was feeling fairly - Gooder P. 100.4 100.4 L.H.H.

Dec 6th Today his Temp. was 100.1 and he was very noisy excited & violent most of the day - L.H.H.

Dec 7th Had a good night, quiet this morning and the Temp. is 99.6 - Is still very incoherent and incoherent. L.H.H. P. 100.4 100.4 each night 100.4 100.4 L.H.H.

Dec 8th Had a very restless night and today is in a very dazed state, his face being congested & his expression more fixed. Does not eat - L.H.H.

Dec 9th This morning it was noticed that patient was in a state of confusion amounting to delirium in the day. It was evident that in this condition a mental change was taking place as his face was quite bright at times, his lips elevated, his pulse fast, his skin hot today, his muscles rigid at times with slight involuntary spasms at intervals, also

1903

Dec 9th

Lost muscular control especially of facial muscles - all these symptoms point to his having a Congestive retinopathy seen in cases of General Paralysis. L.H.H.

Dec 10th Today all these symptoms have passed and he is excited noisy and violent at intervals. L.H.H.

Dec 14th Since last note he has been very excited incoherent noisy and restless. Still delirious and incoherent this evening suddenly he became quite coherent & played billiards and conversed rationally for about 2 1/2 hours & then relapsed into his former state. L.H.H.

Dec 20th Today it was noticed that the right ear was swollen and red but no cause could be ascribed for it. Had full trial 1/2 at night - L.H.H.

Dec 26th Since sleep well all night and this morning it was seen he had a well marked Haematomia of right ear - He is excited and noisy today. L.H.H.

Dec 30th The Haematomia of right ear is much better but the left ear is swollen and it is obvious to become the same as right. Is still excited & noisy. L.H.H.

1903

Jan 2nd

The Haematomia of right ear is now almost gone but the left ear is still swollen and discolored. Has been very noisy today and he is now constantly delirious and noisy - He is taking his food well - Weight 11.7 ^{P. B.} L.H.H.

1903

Jan 14th

Since last visit patient has been very disagreeable and violent at times especially yesterday till 8:30 pm when suddenly he was quite coherent conversed quite rationally till about 9:30 when he relapsed again and became incoherent and noisy. He talks out loud.

Feb 9th

Patient continues very noisy violent and restless constantly striking and kicking anyone who goes near him. Has not had a lucid interval since last visit. Today patient was much safer and incoherently with his Companion I am attending near him suddenly his fingers of the left foot struck the window curtain and he - I saw it at once and foot bled in it. - J.H.D.

Feb 2nd

Dressed foot today and it appears better looking by first intention but he is often so rough and violent that one fears he will injure it. He is very noisy & excited today. - J.H.D.

Feb 11th

Dressed foot again today as he made it bleed again also bursting one of the stitches and it looks deathly. - J.H.D.

Feb 3rd

Patient very violent today the partially tore off his bandages so I dressed foot again. - J.H.D.

Feb 7th

Dressed foot again but it is not looking so well owing to patient being so rough. - J.H.D.

1903

Feb 9th

Dressed foot this morning and the graft has healed well but a small part is suppuring owing to his violence and his constantly striking his heel against the bed clothes. Is still quite incoherent restless and noisy. - J.H.D.

Feb 19th

Patient's foot continues to heal with the exception of a small part which discharges a little. Mentally still not excited and violent. Health good. - J.H.D.

March 13th

Patient remains in the same excited state as still incoherent. Says he is the King of England, that Charles Milburn of Michigan, that he never was better in his life & everything here is splendid. He is not so violent now but becomes excited & very restless at times. Sleeps well. - J.H.D.

April 3rd

Has not been so excited & restless of late and has had several lucid intervals, but he is still dirty in his habits & in his manner. Has a habit when the least excited of spitting all over the carpet so Collected. Looking well in himself. - J.H.D.

April 20th

Patient has been quiet & calm as a rule every alternate day, so the other day he is still very restless & violent. Has a fixed delusion his wife is in one of the Pillars of Queen Victoria in the street, so he would come down with them every night. Health good. Walks daily & plays Billiards at times. - J.H.D.

1905

May 18th

Mr. Myrland
 Patient is seldom restless now & not nearly so noisy. He is as usual quite happy in his exaggerated way of looking at things (talking about his "Millions") but has fits of crying now & again at intervals. He is sleeping better but his eruptions are advancing. *J.H.D.*

June 10th

Has been less excited and more playful and at times behaves more like the Sunbeam and does much better with me being quite rational in his behavior. But on other days behaves more noisy and exhibits his exaggerated ideas that he is "the King". He sleeps better but food well. *J.H.D.*

July 14th

Has still alternate days of unobscured excitement. Still says he is King of the world, owns all the houses in the world, and makes all the gods in the world. Is still in his habit and his language is very disgusting at times. He continues in excellent health, but does not quite so strong as he was this year is not as lively. Speech more stunted. *J.H.D.*

Augst 24th

Is in the same unobscured state very noisy and excitable at times. Also is dirty and destructive in his habits but some violent, much good. *J.H.D.*

Sept. 14th

Repeat sent to the Court in January he is less unobscured in conversation he expresses many absurd & extravagant ideas, he has delusions of grandeur

1905

Sept. 14th

Weight 11-10

and exhibits the general cerebral tone usually associated with general Paralysis. The latter disease is also suggested by his better condition. He is in good condition, the only abnormality his sluggishness amounting almost to complete fixation of the right pupil. *J.H.D.*

Oct. 2

Since last note patient has been very excited, restless & noisy at intervals - his manner changes very quickly also. First laughing then crying within a few minutes - He will be speaking quite rationally for a few minutes when suddenly he will accuse someone of doing something to some ^{body} (such as killing God, cutting his children to bits etc.) and without the least warning will strike, kick, or bite the attendant nearest him. He takes his food very well and says all the rivers & falls, plates dishes are made of solid gold. He is taking Puls Givral lys each night except every 5. night when he has P. Paedalyde lys instead. His diet is very little altered. *J.H.D.*

Oct. 20th

Patient has been more restless and unobscured during the last two weeks, also behaves not sleep so well and has been more noisy - He talks incessantly

1903

Oct 20th

He himself all day long without the least reason in what he says and his habits are very disgusting - He masturbates frequently, spits all over his bed, floor etc. and his language is very disgusting. He now takes R. Puls. Veronal^{1/2} each night which over him a fair night. He now taking his food so well. *L.H.D.*

Nov 10th

Patient's excitement continues and his disease is advancing rapidly - He seldom now has lucid intervals, he takes his food in his fingers and his manners and habits are most disgusting - He talks almost most of the day and is often noisy restless & violent at night. Continues to take his food fairly well. *L.H.D.*

Nov 19th

Today patient was very excited and ^{last night} violent, during the afternoon he made a sudden attack on att. Hallist causing them both to fall on the floor and in the struggle patient thrust his face against the sofa leg causing some contusion of left eye. Mr. Dodson was present when it happened. His cerebral state is worse. He is not eating or sleeping so well & his physical condition is not so good. *L.H.D.*

Mr. Huie

Mr. Huie

1903

Dec 3rd

Weight 10.10

Patient has been very excitable & noisy since last visit and his general condition both mentally & physically is not so good - He is not taking his food so well & does not sleep well. Has had ^{1/2} Veronal each night. *L.H.D.*

Dec 20th

Since last visit up to today he has only had a few hours lucid intervals, being very noisy, restless, answering voices and at times violent. But today he has had a very good day indeed and has conversed quite coherently all day, taken his meals with the other patients and attended chapel. His general health is not so good - *L.H.D.*

Dec 28th

Since last visit he has remained coherent most of the time, has conversed rationally and has expressed a wish to go home at times, but at other times he has been rather depressed and said he had no hope of ever being any better. He has not mentioned any of his excited ideas & has not been answering any voices the last 3 days so that on the whole he has been very much better but one fears it is only temporary - He is in good health but not so stable & looks now somewhat *L.H.D.*

1904.

Mr. Lyzelli

- Jan 12th Still remains fairly reasonable & coherent - but says he is very miserable & doesn't know what he has done to deserve such trouble. Is taking Veronal every night & has fair nights. Took his lunch to-day with the rest of the patients. J.B.W.
- WT 10-11
- Jan 22 Is still keeping rational - & has very good nights taking Veronal grise every night. goes out for walks daily. & plays billiards etc. seems in better spirits. J.B.W.
- WT 10-15
- Feb 22 Remains good tempered as a rule - but is very depressed delusional. evidently hears voices - as he reports to me, things he has imagined have been said to him - says he hasn't had any food for days, that pebbles wrapped up in soap have been put up his rectum etc. His companion Mr. Clements has been replaced by Mr. Gray. J.B.W.
- WT 11-6
- March 24 Is very uncertain from one day to another. Sometimes is quiet & fairly reasonable - but the next day is very delusional - talking & listening to imaginary persons
- WT 11-7

1904.

Mr. Theodore Lyzelli

- & difficult to manage; goes out twice daily for walks & plays billiards sometimes - & occasionally comes to the band - but ^{has} his meals in his own room - takes Trional or Veronal every night. J.B.W.
- May 3rd In the past 2 or 3 days has been rather troublesome about taking his food - taking perhaps his breakfast - & refusing absolutely everything else for the rest of the day - saying it was poisoned & ordering it to be taken away - on one or two occasions I have been obliged to have him held whilst I fed him with Benga from a feeding cup - Is having good nights - but his mental power seems less strong than formerly temporarily. J.B.W.
- WT 10-12
- May 16th Is now 2 days quite the same - on one he will be lying in the sofa - refusing his food, saying he is dead, & generally incoherent - perhaps the next day - he will be bright & cheerful - taking his food well & talking fairly rationally - & even joining in a game of cards - He is having good nights - but has &
- WT 10-8

1904

Mr. Theodore Lyell.

powder of Veronal 10 grains each night.
 On May 9th at 8^A ~~pm~~ I was sent
 for to see him as he was reported to
 be in a fit - but when I got up to
 his bedroom he had fairly recovered
 altho' there was indication of some foam-
 ing at the mouth, but he was able to
 speak to me. His attendant (Hallett) repeats
 the circumstances ~~at~~ follow - he was getting
 his bath ready for him, the latter having
 been peacefully talking as usual, when
 the bath was ready he said "your
 bath is ready, sir - will you get up"
 but receiving no reply he went to the
 bed & found him foaming at the mouth
 & his jaw twitching, but no twitching of
 the limbs was noticed at any time,
 & he has ^{had} no return of the symptoms all
 this week since. J.B.W.

June 6th

Is going on as usual, has had no
 return of the attack such as above - goes
 out for drives now 3 or 4 times a week.
 Is sometimes troublesome over taking enough
 food. J.B.W.

W^{ts} 10-9.

1904

Mr. Theodore Lyell.

Aug. 14th

Does not seem quite so strong as
 formerly - more shaky on his legs, & gets
 more easily tired - & his days of bright-
 ness are not so frequent. Is having
 8 grs of Veronal at night & sleeps well

W^{ts} 10-5

J.B.W.

Aug. 25th

A few days ago was taken upstairs to
 be changed as he had been dirty in
 his clothes - he did not wish to come
 down again but to go to bed instead;
 as it was quite early in the evening
 his attendant & companion brought him
 down - but he was very resistive, fighting
 & attacking them & making a great noise
 but he has been quite well since - &
 quite bright & amiable. Goes out for
 frequent drives - comes to the band & chapel

W^{ts} 10-2 1/2

J.B.W.

Sept. 5th

Going on satisfactorily - is usually bright
 & amiable - wanders much in his talk &
 is very confused in his ideas - goes out
 daily for walks or drives. Is sleeping
 well - has 8 grs of Veronal each night.

J.B.W.

1904

Mr. Theodore Lyell

Sept 6th

Rather fractious to-day & off his food.
Masturbated last night & did not sleep well.

J.B.W.

Sept. 9th

Last evening at 8-15, Mr. Lyell was found to have a cut on his chin - it was in the middle line - about $\frac{3}{4}$ of an inch long & $\frac{1}{4}$ inch deep into the fatty tissue - it was not known how he got it, but there had been some slight struggling with him during the evening but he was not known to have struck anything then, however it is possible he may have done it against his sofa edge - as he has there a great deal & often throws himself down suddenly - I have put on the wound some cyanide gauze - with strapping over it.

W.F. 10-2

J.B.W.

Sept. 12th

Wound has healed well. He has been very silent all day to day & yesterday.

J.B.W.

Sept. 13th

Last evening at 7 p.m. I was sent for to Mr. Lyell. I found him sitting at his dining table which he had not touched - in a collapsed state - cold, clammy & blue in color. I asked him if he would like to go to bed & he said he would. He was able to walk to his

1904

Mr. Theodore Lyell

bedroom - with an attendant holding on, on each side. He was slightly sick on the stairs & again after getting into bed - & retched several times as well - but he only brought up some brownish fluid - His temperature was found to be 104.8 but his pulse & respiration were not quickened - Restoratives were administered & a hot bottle to his feet - & two men sat up with him. I visited him ~~at~~ at 6 a.m. when I found his temp. was 107. Resp. 38 - Pulse 80 - & he had had hardly any sleep - at 8:30 an ice bag was applied to his head, & his temp. was taken every $\frac{1}{2}$ hour. During the morning his wife & son arrived & his wife stayed by his bedside - At 1:40 an enema was given with $\frac{1}{2}$ an ounce of turpentine in it. (having also had one last evening at 9 p.m.) This returned after a time - but there were no lumps. About this time there was Cheyne Stokes respiration for about 2 hours - but it returned to a regular condition after this, & remained so till his death at 7:50 p.m.

Jan 6thadmitted Jan 6th 1903

Weymouth 11-1

Patient arrived this evening with his father and two attendants who had some difficulty in bringing him as he struggled violently. He was admitted on an Urgency Order.

Statement

of

Patient

Patient is married, aged 24 yrs, clerk in dry goods, and this is his first attack, the duration of which is said to have been 14 days, and the cause death of father and mother. Has no family history of insanity. He is not suspected of epilepsy but is suicidal.

Medical Certificate No. 1.

Dated 5am 6th . 1902.

Red's condition is such. He says that it has been steadily improved since in the Police that he is satisfied & that the whole situation would be after him. He showed me a chapel in the Police that applied entirely to him. He says an awful thing is coming on him & that the only chance of the child's exchange being put right is by his remaining for ever at 80 Weymouth St.

Went down by other, Herbert Charles Hayes, attendant of 10 Essex St. W. says that last night patient went to the jail that his dressing gown on it said he must sacrifice himself & offer himself up to God & if not they would better let him die.

Reasons for an Urgency Order

He is getting steadily worse and his delirium is such that he may at any moment attempt suicide.

Signed R. Percy Smith
26 Queen's St.
London, W.

Mental Condition on admission

On admission patient was seen to be in a very confused mental state, restless, restless, and violent at intervals. During his quiet intervals he is very depressed. He is not for long a new. He is getting clothes.

Physical Condition on admission

Delirium is present. He is very weak. He has a thin, emaciated appearance.

I, Boston Boston Hurst am going to make a full confession of the crime for which I am charged & I do so because I feel that I have done wrong & I want to set my father & mother, brother & sisters at ease. I have one brother who works in a factory & one sister who is a nurse. I have one wife to whom I am married & one child.

Medical
Certificate
No. 1.

Dated 3 Jan 6th
1903.

Best information available: He says that it has been early
noticed to him in the Public that he is antipathetic
to that the worse condition would be after him. He
showed me a certificate in the Public that applied
entirely to him. He says an awful thing is coming
on him & that the only chance of the illness
exchange being put right is by his remaining
for ever at 80 Weymouth St.

Best Court by letter, Herbert Charles Hayes, attendant
of 10 Bray St. W. says that last night patient
went to the fire & put his dressing gown on &
said he must sacrifice himself & offer
himself up to God & if not they would kill
him in Hell.

Reasons for
an Urgency
Order

He is getting steadily worse and his delirium
is such that he may at any moment
attempt suicide.

Signed R. Percy Smith
26 Queen's St.
London, W.

Mental
Condition
on
admission

On admission patient was seen to be in a very
confused mental state, restless, restless, and violent at
intervals. During his quiet intervals he is very
depressed, says he had done great evil in the
World, had ruined all his friends, that he could
not possibly atone for his sins, and he could never
see any better. Also he said he must have been
born a Quaker as he could make out anything
new. He hears voices at times which prompt him to
sweeping and so refusing his food & taking all his
clothes off.

Physical
Condition
on
admission

Patient is seen to be a man of medium height, in delicate
health, thin build, complexion pale, cheeks hollow, hair
fair, eyes blue, speech slow, and one nostril expanded.
He has several small bruises on right and left arms
thrust also bruises on back on left chest.

1905

Jan 6th

On arrival this evening patient was very restless
 restless and violent for about one hour but
 did not speak & had to be watched by
 this attendant to prevent him injuring himself
 better - after a feed of about an hour he was
 quiet and now restless, but quiet in the chair
 and took some sleep. He continued to himself
 occasionally but would not converse except in
 short sentences such as, I have done well, that he did
 not show anything and spoke occasionally of his
 wife and brother. Took Pills Dr. Smith's W.F.

Jan 7th

Patient had 4th broken sleep getting up occasionally
 and walking about the room. Today he is very
 angry and confused has been excited & restless
 most of the day taking his clothes off & putting
 them on again, said things were all mixed
 that he must give himself up to the Police as
 he had ruined all his family & had killed
 God. This evening between 5 and 7 he was very
 excited & took his clothes off 15 times. After
 dinner he was quite rational for about an hour
 & conversed freely. When again said he was
 quite dazed & incoherent. Has taken his
 food fairly well. Took Pills Dr. Smith's
 and Dr. Chamberlain's W.F.

1905

Jan 8th

Patient had a quiet night sleeping about 4 hrs. Today
 he is very calm and he appears more composed - he
 has been wandering about his room most of the day
 talking to himself and appears unable to remain
 quietly in any position for more than a few minutes.
 He keeps saying I have done wrong, I have mistreated
 him and that he will never see any better. He will
 suddenly jump up and laugh, then in a few minutes
 will come out lying - He has taken his food well.
 Took Pills Dr. Smith's & Dr. Chamberlain's W.F.

Jan 9th

Patient slept well last night. Today he is not quite
 so depressed but still says I have done wrong and
 will never be forgiven - He must die for a while
 and at every quiet asked his attendant if this was
 his chance, and when asked what he meant could
 give no explanation. He was quiet all the afternoon
 but excited & restless in the evening. Had an hour
 which was quiet. Language still very dull - Took Pills Dr. Smith's
 and Dr. Chamberlain's W.F.

Jan 10th

Patient slept well again last night. Is still depressed
 and worried about himself says I have over eaten
 himself, treated his wife badly & killed his relatives
 & more. This evening he was again excited & attempted
 to take his clothes off & then when in the chair also
 he appears to be more calm. Has not taken his food so well.
W.F.

1903

Jan 11

Today Patient is still depressed and deluded - says he is in a very bad way - that he should not eat or take any medicine - also is very restless and wanders about aimlessly. Takes his food fairly well.

Jan 12

Today the attorney has taken up a Petition for a writ and 2 Medical Certificates were obtained.

Medical Certificate dated Jan 6

1903

Subscribing myself - he is depressed & confused - he says that owing to his delirium - many matters he should give himself up to the Police - he says that some of the men of the militia & some have avoided him - he says that he felt certain that grave charges of immorality had been made against him though he explained that he had gradually since a short while back had been ill - he says that he was very depressed and self accusing, that he had had his dinner given in the fire burned with it to offer himself as a sacrifice.

Signed - James Chambers & Mansfield St. Casualty Dept.

The 2 Medical Certificates is an exact copy of the one which I gave with the attorney's name. Signed J. P. Hunt

1903

Jan 11

Report sent to the Court in Quincy, Patient is depressed and dull - he says that he has been here a while, that he has committed this and that in the necessity of his father's estate - when pressed on the latter matter he gives quite inadequate answers for such a statement. He has the appearance of intense depression & mental dullness - he is carelessly run down & answers straight ahead to my questions -

Jan 13

Patient depressed and worried about himself says he has done wrong and ought to be sent to the workhouse instead of living in his room there. Sleep well and takes his food better.

Jan 15

Patient is still very confused and depressed, says he must give himself up to the Police as he has defrauded people of money -

Jan 17

Says he can't understand what is the matter with him as he is unable to think properly & has such dreadful ideas - also does not know how long he has been here and why he came.

Jan 20

Patient is still very confused and says he has been very wicked although he ought to have been instead of that - Today when out walking he met a Policeman who he stopped and asked to take him up for fraud - he talks of going to the Police and says he is a Policeman if he can help.

1903

Jan 24th

His mental condition is improving but he is still very deluded and distressed at times. Says he has been the cause of much misery and he ought to be made to suffer. Is sleeping better and taking his food well. *W.H.D.*

Jan 29th

Patient is still depressed about his own condition says that he has been such a wicked man and that God will never forgive him for his sins - also that he ought to die in jail and that he has no hope of getting better. *W.H.D.*

Feb 6th

Report made by the Col. in Charge patient is found mad. He has delusions of immortality chiefly in financial matters e.g. that in a recent transaction he misappropriated sums of money - when pressed for particulars the amount turns out to be \$1000 - 00 or so. He is confused and apparently cannot keep to any subject beyond his own troubles. He has improved however since admission. He is in good condition in fact *W.H.D.*

Feb 20th

Patient has not been so well since last week as was to be expected. He hears voices, and has hallucinations of sight, as he told me he saw things come out of his umbelium which he took in his hand on several occasions. His delirium is improving. He sleeps better. He takes Pills *W.H.D.*

1903

March 1st

Patient remains very deluded & makes very little mental improvement. He still thinks he is a great villain and constantly accuses the Policeman whom he meets here to take him in charge. He is sleeping better & takes his food well. Takes Pills *W.H.D.*

March 15th

Patient is rather more nervous & childish since last note and now is constantly laughing at himself without any reason. Also says he must go to Paris & think his friends there are all wrong. Also I have noticed so facial thinking of late that his facial expression is altering. *W.H.D.*

April 2nd

Patient still looks extremely ill. However, does not appear able to interest himself in anything except his own condition. Still has the same delusions. His speech is not quite so clear. Sleeping fairly well. Takes Pills *W.H.D.*

April 14th

Went day visited by Dr. Savage who reports that there was nothing from which he might not recover but in any case it would be ^{many} months before a change took place. *W.H.D.*

April 20th

Patient still drowns at times about money matters. Says he must give himself up to the Police. But on the whole he is not so depressed. Takes his food better. (He is taking medicine?) *W.H.D.*

1903

May 4th

Have tried R. amphetamine but it has only given patient 5 1/2 hrs sleep without now being taking of it again under which he sleeps well - L.H.D.

May 13th

During the last month patient has shown signs of mental improvement. He now walks quite rationally as a rule & seldom mentions his delusions (about money & Police now). He takes long walks & sleeps better. Health better - L.H.D.

June 10th

Patient continues to improve mentally but one fear has still deluded on certain points - asks inquisitive people about the ¹⁰⁰ inquisitive before marriage (he says the Bishop's suspension) also he is not sure that he has not stolen certain Cash that belongs to the church - Health better - L.H.D.

July 10th

Patient is now very much improved both mentally & physically. He continues quite rationally and has left off expressing any doubt as to his taking certain Cash that was not his, and his living an impure life. He has now got his Passé, and takes long rides on his cycle by himself. He plays cricket & Tennis almost daily. He takes his food well & does not suffer now from Constipation. He reads prayers in the chapel daily & attends the chapel on Sundays - L.H.D.

1903

July 20th

Wednesday patient preached at the service in the chapel. Patient now appears to have recovered but is still accustomed to strange cases of misanthropy which causes to fear that his recovery over his mental trouble is not absolutely complete & probably will not stand a very severe test at present - But it is hoped after 3 weeks trial with his wife his recovery may be assured. He left here today with his wife on trial - L.H.D.

Mental
Condition
on
admission

On admission patient's mental state was read like melancholia by her expression and the way she answered questions. She said that she was always thinking of the past which was most unpleasant. That she had nothing left in the world but regret, that nothing could be done for her and she wanted to die.

Physical
Condition
on
admission

Physically patient is a thin spare lady with fair hair, hollow face, pale complexion and sad expression. Her breath sounds are normal also her heart sounds.

1903

Jan 6th

On admission patient appeared to be suffering from acute melancholia with the delusion that it was useless attempting to do anything for her and was too late to help; saying "She says she wishes to die as she has nothing but regret to live for and that all her thoughts are wicked and make her feel miserable. She has been read a lecture & appears suspicious. She is put on a Special Diet & is never to be left." Launched February 10th - J.H.H.

Jan 14th

Patient had about four hours sleep last night and was on the whole restless but kept in bed. Today she is silent, depressed and keeps walking aimlessly about her room being unable to settle to anything. Also she has not taken her food very well. Has been out for a walk. Took the Trinid 2^{gr} & tablet let her see by J.H.H.

Jan 15th

Patient slept 5^{hr} and is not quite so depressed. Had also sufficient Opium this morning and the nurse acted there. Today she was restless and silent as a rule but this evening was rather more cheerful, conversed quite actively for a time on general topics but still says nothing can be done for her as she has lost her self control and the only thing left is to die. Took her food better. J.H.H.

1903

M. DouraneJan 19th

Had a somewhat restless night about 4th sleep. Today she is rather more alert and depressed. Says nothing positively can be done for her and that what she wants is to do away with the thoughts which are so bad. Has taken no food latter & is looking rather bright. Pulse 110-115-120. lftd.

Jan 20th

Patient slept 4 hr last night and slight less depressed this morning. Still has the same ideas about wishing to die, but to day has been reading, doing some needle-work and laughing at times. also has been out for two walks. Taking her food. Pulse 110-115-120. lftd.

Jan 21st

Went out to the Court in Lunacy Patient is depressed still. She says that her life has been so sad. That she is tired of it. She is desirous to occupy herself & prefers to remain quiet thinking over her thoughts. She needs supervision in doing it. She admits that she has been and is still mentally unwell. In a good condition and sweet. lftd.

Jan 22nd

Patient is still dull but she told me today she felt better since she had been here and sleeps better. Says she is afraid nothing can be done for her. lftd.

Jan 23rd

Continues to sleep better and has Pulse 110-115-120 each night also laughing as she is constipated. Takes her food well now, but is still depressed. lftd.

1903

M. DouraneJan 26th

Patient remains dull and depressed says she is very tired of life and wishes to night end. In conversation she will cheer up for a few minutes at times but quickly relapses into depression. Takes her food better and is sleeping well. lftd.

Jan 27th

Today patient was very depressed and refused to get up as has been in bed all day. She has hardly spoken to anyone and has not taken her food so well as she has been. Still takes Pulse 110-115-120 each night. lftd.

Feb 5th

She found it more over and patient is more cheerful. During the last few days has been most depressed and has taken very little food, in fact she has had little furnished to take any at all. She has also been abusive to the nurse and says she hates all females. Still wishes to die. Has been taking Pill Camp? 4/100 every 4 hr? lftd.

Feb 8th

Still in the same depressed state but is taking her food better. Is very troubled with constipation and having an eruption each morning. lftd.

Feb 17th

Went to the Court in Lunacy Patient is depressed, dull, absolutely idle refusing to occupy herself. She sometimes refuses her food but often receives when being dressed. She would not work herself without being obliged to by an attendant. She says, is tired of life would like to die. In good health except for marked lateness of constipation. lftd.

1903

Feb 16th

Patient was very impulsive and excitable today & refused to be dressed for driving, so when nurse pulled her coat on, she deliberately tore all the buttons off & threw her Muff at the nurse. U.H.H.

Feb 27th

Is quiet as a rule but has impulsive attacks at times. Today when driving she took off her hat & drove it up for no reason - U.H.H.

Feb 28th

In the whole patient is not so depressed & does not talk so much about wanting to die - also she is taking her food better & looks brighter. Her menstrual period is over this is the 2nd time admission - U.H.H.

March 10th

Patient is still very melancholic, does not like anything or anybody, she says that life is not worth living & she shall be glad when she end comes - Is very obstinate at times & has fits of temper often, when she will destroy her clothes and bang the furniture about - reclines on the sofa most of the day. U.H.H.

March 25th

Patient is still depressed & says she is tired of life & wants to go and live by herself in a hut alone on a mountain apart from everyone. Takes her food better & looks better in general. Goes for drives & walks daily. Talks each night of Pulver's mind ~~is~~ sleeps about 6^{1/2} hours. U.H.H.

1903

April 6th

Patient is still depressed & complains in a childish way of everything & everybody. Since last visit she had a lady companion who cheers her up more, induces her to take good walks & takes her meals better with her now. Also is sleeping better. U.H.H.

April 16th

Her general has improved mentally and her habit is better - She now goes out for long walks, calls at some of the other Villas, and will now play cards in the evening when at times she is quite bright & cheerful. She is still depressed in the morning - U.H.H.

April 20th

Patient is still depressed in the morning, says she only wants to die or live by herself away from everyone. In the evening she often shows up a flash of joy & laughs quite occasionally. Her general health has improved a little. U.H.H.

May 10th

Patient on the whole is a little better mentally but still has attacks of deep depression which said attacks are not quite so frequent - She is taking her food better & has gained in weight. U.H.H.

June 10th

Patient remains dull and depressed in the morning and until often day she is tired of life and wishes she could die, but as the day goes on she often now cheers up and will laugh a little. She continues to take her food well on the whole. Still suffers from Constipation. Sleeping fairly - U.H.H.

Wages 9.2

1903

July 15th

Since last visit patient has been more depressed again & is now very dull & listless, and says she is tired of everyone & everything. She spends all day in the sofa except when she makes a drive & complains of pain all over her body does not seem able to rest often. She is taking her food well & is about the same weight. Sleeps fairly well taking 4 pills each night. Takes a little sometimes - still constipated & she

Aug¹ 5th

Having suspected this day ago that the elements of Patient's urine were abnormal & appeared to contain some pigment, it was sent to the Clinical Research Dept

the following was the result.
 Reaction, acid. } Microscopic Exam The deposit was fine amount & contained numerous granules & a slight excess of leucocytes & on occasion red blood cells. Several casts were not found. Numerous bacteria were present.
 Sp. Gr. 1024.
 Albumin a trace only
 Blood. None seen
 Sugar. a trace.

Electrolytically The pigment is indistinguishable from Haemoglobin, in the patient taking Sulphonal.
 The Patient has been taking Mineral waters admission to the Hospital has now been stopped & she is taking R. Sodii Sulph 5^{gr} each morning. She sleeps well & is now taking R. Paraldehyde 5^{gr} each night. L.H.D.

Aug¹ 5th

Today another report was received from the Clinical Research Dept having tested another specimen of the urine after confirm the first report, saying the presence of Haemoglobin pigment is present. Patient does not complain of any pain over the region of the kidney. L.H.D.

1903

Aug¹ 11th

Today patient's mental period began. She still on one feels better and has not so much pain all over. Has been less depressed the last few days. Do now taking. } Microscopic Exam The deposit was fine amount & contained numerous granules & a slight excess of leucocytes & on occasion red blood cells. Several casts were not found. Numerous bacteria were present.
 R. Lig. amp. acid 3^{gr}
 Mag. Sulph. 5^{gr}
 Spir. chloroform 5^{gr}
 aqu. Mentha 5^{gr}

Aug¹ 18th

Since last visit the urine has improved & the colour is nearly normal. But the mental state is very little improved except that she has a desire to go back home at times instead of to die. She is still listless with her food but is only with permission that she can be induced to take sufficient. In taking her medicine 4 grains each + 5^{gr} each has been added. L.H.D.

Aug¹ 25th

Today was had another specimen exam. by the Clinical Research Dept and the following is the report. Microscopic Exam The deposit was fine amount & contained numerous granules & a slight excess of leucocytes & on occasion red blood cells. Several casts were not found. Numerous bacteria were present.
 Reaction, alkaline Sp. Gr. 1024. Albumin trace. Sugar. none. L.H.D.

Aug¹ 25th

Continues to take her alkaline medicine the urine has been for some days quite normal in colour. She is not taking her food so well & looks thinner. Complaints of pain in the left iliac region at times but on exa^mination nothing abnormal can be detected. Has been maintaining fairly good. L.H.D.

Report
 10th Sept 1903 Yesterday (Sept 9th) I visited M^{rs}. Ella Durance at Titchhurst House in consultation with Mr. K. Lloyd Smith.

1903

Sept. 10thM^{rs} Durance

with D^r Hayes Newington and D^r Marion Hunter.

I learned from D^r Newington that she had only two days previously made two attempts at strangulation and in conversation with her alone she told me that she wanted to die and had no desire to live and that when she wakes in the morning she is sorry she is alive. She told me she thought there was no use for her but to get out of life where she had been such a failure and hoped her life would not be a long one. She said she would be better out of the way of her husband and children. She told me she did not occupy herself, did not read or play the piano and did not take — interest in anything. She expressed no desire to go home, but merely a wish to be left alone.

In my opinion she is still suffering from mental disorder, is suicidal and requires the most watchful supervision and cannot be safely treated in any other place than a well found asylum.

M^{rs} Durance

1903

Sept. 10th

She is quite unfit for an ordinary house, and would in my opinion have a much smaller chance of improvement there than in an institution such as Lichurst.

Sept. 23rd

Patient still says she is tired of life and wants to die. She has attempted to choke herself with her hands, she has bitten her head also with her hands, and has on several occasions asked me to Poison her. She is taking her food better and goes out daily. Her urine is not red a week now, but she only passes on an average about one pint per day - sleeps about 5^{hrs} each night. Is taking P. Paralytic 3^{grs} each night. *W.H.N.*

Sept 24th

Note by

D^r H. Newington

Copied

Yesterday afternoon the patient washed down with some tea the saline part of the day day down on the sofa with champagne reading books. Suddenly she got up without warning to Miss C who noticed that her face was red. She quickly perceived that patient had her handkerchief twisted round her neck. She at once took it off & noticed that she was short of breath. I saw her a few minutes after & found no mark. I have little doubt that the attempt (a pretence of attempt) was partly due to impulse

1903

Sept 8th

Nov 6th

D.H. Newman

Copied

apparently to an hysterical idea of playing with suicide. She has been rather far out by being laced & ordered to abstain her food habit. She told me that she would die if she were left & could find some way of getting out of her life she would bequeath it to adopt it. Whether she would go right through with it is doubtful. Often she was much brighter & had a few nights. But this morning in front of the altar she tried to drink the water & remember work. She had a dose of 1/2 gr of 1/2 gr of 1/2 gr with good effect.

Sept 20th

Patient does not improve, in fact is more impulsive and attempts more often to act in a suicidal manner. She is continually trying to injure herself by putting things round her neck and sticking in her mouth. She is sleeping fairly well during P. Paddock's 3rd case night. She also is taking her food better. J.H.D.

Oct 15th

Patient is still in the same impulsive state & has to be most carefully watched to prevent her injuring herself as all her movements and actions are so sudden. These impulsive attacks are due to hearing voices on the part of the patient one is inclined to think though one can not say positively yet. J.H.D.

1903

Nov 12th

Nov 11th

st. No. Night 9-1

It is now evident that patient hears voices at times as she will say "Why do they tell me I must be dumb" - also she says she can hear people she knows talking to her and ask for something to send her to sleep for ever so that she should hear them - She is still very impulsive, attempts to choke herself with food, to drink her urine, to swallow her stool & blood or handkerchief, to throw her head against anything, to throw herself out of her carriage or strike herself down stairs. She is taking her food better & sleeping fairly well. Taking Pills several times a week. The voices are more pronounced and especially that of trouble she is like one that keeps on saying she "must be dumb". She says of course she must die in some other way as they are coming to down her if she lives she is therefore in dread of some coming to down her and please to be killed in some other way - She is eating better and has gained weight - also sleeping about 6 hrs. Today she was given P. Paddock's 3rd case night. J.H.D. also Pills several times a week at bedtime and night J.H.D.

1903

Nov 2nd

The voices are less marked and the ear-ache less frequent but which appears to have done good. She is now is not so anxious to die but expresses a wish to go home. She is sleeping better & taking her food much better. Taking $\frac{1}{2}$ Pulv. Nerval $\frac{1}{2}$ each night. J.B.W.

Dec 20th

Patient has improved mentally since last note and now seldom is troubled with the voices, although they said several times quite left entirely. She now is not so suicidal and expresses hopes of getting back home which is a good sign. Her health is better and she continues to gain weight. She will come to visitants & does attend chapel. Taking $\frac{1}{2}$ Pulv. Nerval $\frac{1}{2}$ each night and sleeps better. J.B.W.

1904

Jan 4th

Special Report & Certificate (mental) She is subject to melancholia, with recurrences from time to time of aural hallucinations & suicidal impulses. She is wayward & difficult & often neglectful of food. There has been some improvement of late. (Physical) She is in good health & condition. Her weight has increased lately to a considerable extent. J.B.W.

Signed by H.H. Kingston

1904.

Jan 22.

Is remaining much as usual. has had a slight cold but is now better. is at times very depressed & contradictory - but brightens up a good deal at other times - comes over to the band & entertainments. Her urine contains urates but is normal otherwise. Has 12 grs baral nightly. J.B.W.

Feb 5th

Has been very troublesome lately about her food - requiring a great deal of persuasion & occasionally threats of the tube to get her to take enough nourishment. For a few nights had $\frac{3}{4}$ of Paraldehyde but is now having 20 grs of Trimal. J.B.W.

Feb 12th

Is taking her food better again - & is going on much as before. J.B.W.

Feb 22nd

Is going on fairly satisfactory - without much trouble over her food - have had trouble with her water as she was not passing a sufficient quantity. but she is now taking a diuretic - also having 20 grs of Trimal nightly. J.B.W.

March 24

Is & rather better lately - more strong minded tho' very obstinate about everything. & at times rude to all around her. J.B.W.

1904

May 2nd

Has been very obstinate & perverse lately - refusing to do anything she was wanted to - such as going to chapel or the band - or walk out - also had considerable trouble for a few days in persuading her to take enough food - had to threaten her with the tube on several occasions - but have in the end managed to get her to take liquid food - Bengard

J.B.W.

June 6th

Is going on much as usual - tho' very obstinate & contradictory at times & sometimes exceedingly rude to all with whom she comes in contact - Also at times there is great difficulty to get her to take enough food, especially at her menstrual periods - Her companion has gone.

J.B.W.

Aug 14th

Not much change to note - is still very depressed - & troublesome as to taking her food - Masturbates a good deal at times for which she is given vaginal injections of Alum - her last menstrual period was very severe & long - Is having Veronal at night - in varying doses, in

Mrs Dewrance

1904

Mrs Dewrance

2, 4, 6, or 8 grs & doses. Goes out for drives in the evening - & has fairly good nights.

J.B.W.

Aug. 29th

The period has come on again 2 days ago - it is not so severe this time - She suffers a good deal from aural hallucinations, & the voice is chiefly that of her daughter who is constantly telling her - she must be burnt - it cannot be ascertained whether she has any visual hallucinations. She is sleeping well - last night she had 8 hours & 50 minutes, with only 4 grs of Veronal - which is the dose she has had for some time past.

J.B.W.

Sept. 5th

The period lasted a week - the hallucinations of hearing are still troubling her - she is dull & listless & will not employ herself in any way - Is sleeping well.

J.B.W.

Sept. 7th

Rather fractious to-day - wanting to stay in bed - saying she was tired & ached - because those men had been beating her again.

J.B.W.

Is having Morphine $3\frac{1}{4}$ to $3\frac{3}{4}$

Mrs Durance.

1904.

Sept. 20th

Mrs Durance is very suicidal & requires constant & very careful watching - the Mephi mixture has been dabbled in strength J.B.W.

October 1st

Rather brighter to-day - but still very suicidal & stubborn - a few days ago, she wished to go out on the roads - but she was not allowed to on account of the motor cars - so she got very angry & broke up her parasol. J.B.W.

Nov. 1st

There is no change to note - Is still taking the Mephi mixture - & having good nights with 3. or 4. grs of Veronal. Has hallucinations of hearing - hears people telling her that she is going to be burned - & that men are coming for her. J.B.W.

Dec. 5th

Mrs Durance is about the same - is taking the Mephi mixture & 4 grs of Veronal at night - Is having very good nights now. J.B.W.

1905

Jan 6th

Special Report + Cont. (mental) she is the subject of Melancholia with some hallucinations. She hears the voice of her daughter + she says she is often resistive + impulsive she frequently neglects her food. At recurrent periods she is extremely suicidal. (Body) she is in a stationary state. Her bodily health is good. Signed by H. H. Newington. W.S.S

Mrs Durance.

1905

March 3rd

Shows no improvement. Is full of delusions, that her leg is broken, that she is deaf or blind, that she has just been crushed, that she stands not firm when she moves, that she is moved. She often swings along as if she could not stand or walk, at other times she is on the floor. Seems very hysterical - is worse just before her periods. In the middle of the night she is restless. At times she is depressed & weeps. Will not talk to me & is often nervous. Sleeps well with 4 grs of Veronal. W.S.S

April 1st

Has at times been brighter & more rational in her conversation than when leaving. Was seen by Dr James Grayson Brown on the 1st & 2nd & 3rd & 4th & 5th & 6th & 7th & 8th & 9th & 10th & 11th & 12th & 13th & 14th & 15th & 16th & 17th & 18th & 19th & 20th & 21st & 22nd & 23rd & 24th & 25th & 26th & 27th & 28th & 29th & 30th & 31st. She is much better to-day. Is having excellent sleep. Has been seen by Dr James Grayson Brown on the 1st & 2nd & 3rd & 4th & 5th & 6th & 7th & 8th & 9th & 10th & 11th & 12th & 13th & 14th & 15th & 16th & 17th & 18th & 19th & 20th & 21st & 22nd & 23rd & 24th & 25th & 26th & 27th & 28th & 29th & 30th & 31st. W.S.S

June 20th

Has hallucinations of hearing. Requires a good deal of attention on account of her suicidal tendencies. Does not reply to her as a rule when I speak to her. Well to do, but she is a bad sleeper for which she has a Veronal powder at night. J.B.W.

Sept. 20th

Has fits of depression, when she says that she wishes she were dead: is destructive and foolish at times. Is a bad sleeper and has a Veronal powder at night and aperient medicine to keep the bowels regular. J.B.W.

1906.

Mrs. Durance.

Jan: 4th

Her behavior varies a good deal. Is at times depressed when she says that she wishes she was dead: at others restless and destructive. Sleeps badly and therefore has a Keronal powder gr $\frac{x}{2}$ at night. S.H.H.
 Health good.

March 22nd

Is very abusive and full of ideas of persecution. Is now using an ordinary soap & water Enema with two ounces of turpentine added as the bowels are very constipated. Has Keronal powder gr $\frac{viii}{m}$. at night & sleeps from 5 to 6 hours as a rule.

Is taking big marsh Meat 4xxv
 7m Podophylin 14 viij
 7m Chloroform 14 viij
 3 times a day. S.H.H.

April 2nd

Is still abusive and has ideas of persecution. Makes long rambling and confused statements in her conversation. Has a Keronal gr $\frac{x}{2}$ at night

1906.

Mrs. Durance.

April 22nd

Has insomnia. Is taking big marsh Meas 2vxxv. 3 times a day. The bowels require attention by the administration of aperients and Enemas. S.H.H.

April 27th

Has lost in weight recently. Is still excited and full of ideas of persecution.

S.H.H. 5th

June 20th

Has been very excited, restless, foolishly abusive in her language and violent for some days. Sleeps badly if she does not have a sedative. She states that she struck at her night nurse on the advice of the Almighty. Is menstruating to day.

July 10th

Menstruation lasted for 3 weeks. Is now quiet.

August 1st

The feet have been swollen for a day or two. The urine was examined and found to be healthy. There is no evidence of heart or lung disease. S.H.H.

Aug 12th

Her Keronal powder at night is discontinued. Has been very foolishly restless and destructive

1906.

Mrs Durance.

Aug 12th for three or four days. Passed
 88. 34. 16. little urine, but there was no
 albumen or blood in the
 specimen examined, was
 put on Paraldehyde 3ip at
 bed time but refused to take
 it.

Aug. 18th went over to ~~Land~~ ~~Sharrat~~
 yesterday with her sister and the
 Lady Sup^t to have lunch.
 She refused to take the food
 provided - had other things
 ordered & refused them.
 Was restless, noisy, mischievous
 and quite unable to control
 herself and expressed herself
 as pleased; when she found
 that the people at the inn
 were alarmed at her behavior.
 During her stay at the inn she
 lay on the floor and tried
 to turn Somersaults. She
 shouted and kissed her
 hands to some of the people

1906

Mrs Durance.

Aug. 18th they passed on the road. She
 was quiet and had some
 tea on her return. P.H.

Sept. 10th

78. 8. 16.

Oct. 11th

Has been very restless, excited
 and destructive recently. She
 had, if she does not take
 drugs and has in consequence
 to take Veronal at night
 frequently. She masturbates.

Health good. - P.H.

1907.

Jan. 5th

There is no change to note in her
 mental condition. She is at times
 restless, destructive, violent and
 obscene in her talk. She masturbates
 frequently and assumes indecent
 attitudes. Her ankles are at times
 swollen, the urine has been
 examined and has been found
 healthy, there is no disease of
 the heart. P.H.

Jan 8

Spinal Report 2 Oct. (Mental) She is a case of chronic
 mania with occasional mixed hallucinations, at one

1907
Jan 8

Mrs. Durance

moment she is cheerful, pleasant & somewhat
feeling, in a short time she becomes fume & turbulent
throwing things about and causing what she says
or does. She has many delusions of identity at times
asserting that one is Margart de Valois of daughter
of General Lafayette. She is in fair bodily health
and good condition signed by H. Druryton M.D.

April 4th

She continues in much the same
condition reported on Jan. 8th.

Does not sleep well for which
she has Chloral Hydrate occasionally.
She is, at times, restless, noisy,
destructive and obscene.

The feet and ankles are swollen
occasionally. The urine has been
examined from time to time with
a negative result: there is no
organic disease of the heart or
lungs, although the heart's action
is not strong with the exception
of this she is in good health
and condition. H.D.

1907.
July 5th

Mrs. Durance.

There is no improvement in her condition.
She is excitable, destructive, noisy,
untidy about her dress and
occasionally obscene in her
talk. She takes Liq. Marsh. Hum.
with Tr. Podophyllum three times
a day in 25 doses and 1/2
respectively. She has at times
swelling of the feet and ankles.
On these occasions the urine has
been examined but there has been
no albumen or blood. H.D.

Aug. 24.

Of late Mrs. patient has put on a considerable
amount of weight, and looks to be in better
health & more robust than at any time previous.
Since she came. There is very variable attraction
between silly childlike and proud & person
threats. She has recently told me that (I
learn the cat telling her to make away
with herself. Other voices have had
imitating influence over her. There is
hardly watched night & day.

H.D.

1907

Mrs. Deurance

Dec. 31st

no change morally: continues to be restless noisy & troublesome C.W.P.B.

1908

Feb. 17

She is troublesome and noisy at times, and also obscene in her language: occasionally destructive and dirty - She is in very fair bodily health.

May 17. She remains in good health: mentally there is no change.

July 31. Mrs. Deurance was visited by her sister last week, when she abused loudly, calling her an old cat and saying she did not want to see her at all. This morning, she at breakfast; she snatched the contents of the milk-jug over the table and some of the crockery out into the garden. She then threw a knife at Miss Kerridge, the Lady Superintendent, immediately afterwards savagely attacking her; also she attacked the six nurses who took her upstairs, at the time using the most filthy and obscene language. When asked as to the cause of the trouble she told me she had been attacked by six women who had been calling her by foul names all the morning.

Aug. 17. Since the last visit Mrs. Deurance has been quieter but is still very uncertain in her behaviour. She is in good bodily health.

Sept. 5th. She is in good bodily health & takes her food well. is noisy & obscene at times & takes several p.m. on alternate nights. C.W.P.B.

She is ^{the} Edith Isabella Georgina Fitzwilliam

admitted June 20. 1907

Wright

1903

June 26th

Patient arrived here this evening at 4 o'clock with her husband and two nurses.

Statement

re

Policies

History of

Patient

Admission

She Policies (W.D. Archer Esq.)

Called on St. M. Newington today and gave him special written authority to remove patient James DeLallemé Washwell Sussex.

I (the Resident Medical Officer) drove over to the Colliers, Washwell, to remove patient at St. M. Newington's request. Taking with me the various legal papers and special written authority from the Policies for the removal of the patient. When I arrived at DeLallemé's I was met by patient who came running out of the house in her bed-gown to meet me followed by a nurse. She (the patient) shook hands with me, said she was so glad to see me, and asked me to take her in the carriage for a drive to which I assented. I suggested she should put on a hat & cloak but she said it did not matter. By this time Mr. & Mrs. DeLallemé (the husband of patient) arrived and at once asked me who I was, where I came from, and what I wanted. I informed him I was about

1903.

June 26thHistory of
Patient's
admission

that I came for Seelhurst and that I had authority to remove his wife to Seelhurst. He replied that I should do nothing of the kind as he intended her to remain where she was & no one had any right to take her away etc. Whilst we were discussing the point patient rushed down the drive and jumped into the Carriage followed by her two nurses, and when patient's husband and myself arrived at the Carriage she was comfortably seated and requested me to start at once. Patient's husband stood holding the door of the Carriage for a few minutes objecting to his wife going saying it was not legal etc. However he said she should not go without him, so at her request and I making no objection he got into the Carriage with the patient & her two nurses and we drove at once to Seelhurst.

During the interview with patient's husband at the Colliers he did not ask me to produce any authority for the removal of his wife - On arrival at Seelhurst patient went to her room and I called patient's husband into the consulting room where I had an interview with D. H. Hamilton.

W. H. Hamilton

1903

June 26thStatement
of
History &
Particulars

Patient is 37 years, married, Protestant and this is not her first attack of insanity. From 14th Sep. 1901 to 26th Sep. 1902 Patient was under the care of St. Charles of the Sirey, Southampton and since 24th Sep. 1902 to the 14th June 1903 under the care of Mr. Leigh at Craigish St. Leonards-on-Sea and afterwards at the Colliers Roadhurst, Surrey - The duration of existing attack is stated to be one year and nine months. She is not suicidal or subject to Epilepsy but is violent at times -

Medical

London, W. 1.

Mental
Condition
or
Admission

In admission patient was seen excited, restless and frantic. She behaved in the most childish hysterical & purposeless way, laughing out loud without any cause, making all kinds of faces, grinding her teeth & quite unable to control her movements or impulses - also she suffers from evident delusions of hallucinations, says she is Christ and the next minute she is the Devil - uses the most disgusting & profane language, behaves in a manner regarding her person without the least sense of decency & her habits are dirty in the extreme - also she is subject to impulsive attacks of violence of homicidal nature - Spelt across the floor -

Physical
Condition
or
Admission

In examination patient is seen to be about average height, slight fair hair, brown eyes and rather complexion - She is slight in build and fairly well nourished - Her muscular sounds are normal, chest sounds small & there are definite murmurs, but her action sounds are rather better normal & the 2nd aortic is not quite normal.

1903.

June 26th

On arrival patient jumped out of the Carriage and ran into her room, sat down on the Sofa & commenced spitting all over the Carpet. Dr. J. Newington Nield then on her arrival of course asked the patient - She asked him for some paper, said she knew where she was & had been here 50 years. She also made several unbecomingly suggestive remarks - Later in the evening she laughed & talked to herself a good deal & used the most filthy language. She continued in the same hysterical incoherent way till bedtime. She took a good dinner. She has the delusion she is Christ. *J.H.D.*

June 27th

Last night patient took 9 Pills of Phosphorus & had 4 hours sleep. This morning she is more excited, talking and swearing continually and more incoherent about 7.30 am she stood up suddenly and walked straight out at the nurse into the fields, caught a snake on the side of her head, pulled her on the head & put her foot on her throat. In the afternoon had another impulsive attack of Violence, suddenly struck the nurse who was sitting by her in the garden & gave her a severe shock up. She has taken her food very well all day, has been quiet in her habits considerably spitting everywhere and is very untidy. She has numerous delusions & hallucinations. Nurses have acted - Has taken 9 Pills of Phosphorus & had 4 hours sleep. *J.H.D.*

1903

June 26th

Patient had a good night sleeping $7\frac{1}{2}$ hours. She has been talking incessantly all day, laughing most immoderately, making noises & answering them, making objects that don't exist and insisting to be violent but has restrained herself. She has taken her food well, her bowels have acted, she hasn't been quiet so long today - She looks at pictures but does not appear able to understand what she is looking at. Has been out in the garden most of the day. *J.H.D.*

June 27th

She is well on the whole but restless at times, less quiet in the early morning but was rather excited later. She threw a glass of milk over her head that was given her thinking she felt all uncleanly persons, evidently being objects that don't exist & these Voices that annoy her by telling her unpleasant things - such as that she has some other woman's body, that she has been unwell, that she has a quibbling look and that she has an evil spirit. These Voices cause her great distress and account for her violent impulsive attacks. She also said that in the glass without being very indistinct as she says she has got another woman's face & that the face she sees is not her. She requested that looking glasses be taken out of her rooms which has been done. Has taken her food well. *J.H.D.*

1903

June 30th

Left 6 1/2 hours was troubled with the Voices at times. Was rather quiet this morning as she imagines she sees someone's face in nearly every object such as the tea pot, cups, vases etc. Has been answering the Voices a good deal today also been laughing a good deal in a childish hysterical way. Says she is comfortable here & has all she wants. *U.F.A.D.*

July 1st

Today Dr. H. Newington was patient and very kind. He asked her if she liked being here as well as at Woodhurst & she answered she liked being here best. Later in the interview he reversed the question & she still said she would rather be here. Asked if she would like to see her husband she replied not that she was better. Told us an odd spittle kept falling her unpleasant things about herself & that she would never get better. Also she said she kept on seeing a second Mr. Hilyard when she looked at anything. Today she has been very quiet & has kept her handkerchief over her eyes all day. *U.F.A.D.*

July 2nd

Report sent to Mr. C. in London. She is often mischievous & at all times the subject of delusions & probably hallucinations. She thinks that she has a double nose & all kinds of faces & she says that she saw something other with glances of her eyes. Therefore she covers her eyes w/ her handkerchief. She has asked for the miniature removed

1903

July 3rd

For the first time I found unknown people looking into it. She is rather better but otherwise in good condition & in good bodily health. *U.F.A.D.*

July 3rd

Delirium is not so restless and excitable as she was. Still laughs a good deal at herself & makes allusions of Quinine. Says she still spits & has not started her so much but evidently she keeps on listening to the Voices. Still spits about the room at times. Is constantly vomiting alcohol and is angry for a little after it has been refused her. She takes 1/2 t. of food daily. Sleeping fairly well. *U.F.A.D.*

July 3rd

Yesterday the Period commenced, as scheduled. The day in bed also remains in bed today. In quiet and has spoken very little today except to the Voices. Takes her food very well & has bowel and sleep. Takes Pills 2 or 3 each night. *U.F.A.D.*

July 10th

Delirium is not quite so troubled with the Voices and is not so irritable and violent. She still talks to the Voices at times and shudders her fist at any imaginary Woman's face she says she sees and uses disgusting language. Also she still spits about her room & "mistakes" on the Carpet in her room at times. She takes her food very well. Has 9 Pills 2 or 3 each night. Goes out daily. *U.F.A.D.*

1903

July 18th

Patient will often shake her feet at some unknown
fears she is under, does, talks to herself a good deal
at times and has fits of mental excitement but
it is not so violent. Still after about her room she
sings in her bed. Taking her food well and goes
out for walks daily. Takes Pills 4 or 5 at night. J.H.D.

July 19th

Patient continued to improve somewhat and is
not so much excited as she was. Says now she
wants to get well. Today patient heard her
husband's voice (who was across the garden)
got up and looked out, then sat down again
and exclaimed "My God they have got Ray
and he is like looking like that woman
who has lived for 100 years, and that she
wanted her eternal being. She was rather
excited for a little after. J.H.D.

July 22nd

Had a day in bed at her own request, talked a
good deal to the voice and laughed a great deal
in a childish way and constantly making quizzical
remarks fairly well. Still after chamber room. J.H.D.

July 24th

Was a little excited in the morning, but was quiet
in the afternoon & attended the "Piano Practice"
in the Music Hall with the other patients for
an hour & a half. Was very quiet & said she
enjoyed it. J.H.D.

Sept. 8. 9

1903

July 27th

Ref. sent to the Com. in Law, she is now she has
many hallucinations & delusions. She hears voices &
converses with them. She believes in her leaving a doll
who she says is after her husband and the cause of
her troubles. She is impulsive & decidedly dangerous at
times. Her good health & condition. J.H.D.

July 30th

This afternoon when out for a walk was visited by her
nurse suddenly without the least cause which startled
her & fell on her out. Said after she was down
but could not help it. Continued to be startled with
the voices most of the day. Sleeps fairly well with
Pills 2 or 3 at night. J.H.D.

Aug. 2nd

Since last visit she has been very uncertain in her
manner, restless, and not so well, this is caused
by the coming on of the period which commenced
today. She is having a day in bed. J.H.D.

Aug. 5th

Patient is going on more quietly attends the band.
Practices music usually & chapel on Sundays.
She hears voices & sees faces which annoy her &
she says she can't at times control herself. Is
well at times. Is now taking Quinine 5 grains. J.H.D.

Aug. 12th

Since last visit she has been violent & her nurse tells
stories of her suddenly without the least warning. Still
hears voices which annoy her much & work her up into violent
paroxysms. Is still well at times. Takes her food well. J.H.D.

Sept. 8. 11

1903.

Aug²¹

Since last visit patient has been very troublesome at times trying to get away from the nurses when out walking, rushing out of her room suddenly when nurses are standing at the foot of her bed, and allowing herself to run away. Still hears the voice. It was talking to her again at night. *J.P.W.*

Aug²⁴

The voice continues to trouble patient very much indeed. She certain woman when therapy is just like her husband. She frequently causes disturbances violent, abusive and dangerous, in fact no other does this occur that one is inclined to think this is a fixed delusion. Talks to herself $\frac{1}{2}$ each night. Seldom sleeps fully. Health good. *J.P.W.*

Sept 20th

Patient is still troublesome & occasionally fights with her attendants. She seems to be a pretty athletic sort of woman a judge from her ability to catch & throw a ball was probably at one time a good cricketer.

Sept. 28th

Patient has been rather more excitable the last few days & violent at times this usually occurs just before menstruation which has come on today. The voice of the woman inside her still troubles her. Still talks to herself $\frac{1}{2}$ each night. *J.P.W.*

1903.

Oct 10th

Patient has been very troubled by voices at intervals of late who say the most horrible disgusting things to her which she thinks are said by the nurses who are with her, and she will attack them suddenly in a most savage way, pulling them down often by the hair. She goes out daily and often becomes excited when out walking shouting & cursing & swearing. Health good. *J.P.W.*

Nov 20th

The delusions and hallucinations persist and the attacks of sudden violence and abuse are as frequent. Patient has R.P.S. $\frac{1}{2}$ once a day and talks to herself $\frac{1}{2}$ each night. Sleeps about $\frac{1}{2}$ hour each night. *J.P.W.*

Dec 19th

Patient is still very troubled with the voices which cause her to be restless and violent at times. She says that the most horrible woman is persecuting her and living with her husband. Her good. *J.P.W.*

1904

Jan 22

Very uncertain - sometimes quiet & amiable, at the times very excited & troublesome - a day or two ago she said to me "do you know I am Christ & have been tortured here for 3000 years"

J.P.W.

1904.

Jan 28th

Is remaining in bed - as she is complaining of pain in her left side - (which she says is due to a ripper) she is evidently in pain - as her expression is painful & anxious - her temperature is slightly raised 99.2 - & her respiration & pulse are quicker than normal - On examination - nothing is found to account for it - no bronchitis & no pleuritic rub - a belladonna plaster has been put on.

J.B.W.

Jan 29th

A bad night - only 3/4 hour sleep - pain in the side still remains - but temp not raised -

J.B.W.

Jan 31st

Is better again - pain gone & temperature normal - Have had trouble with the bowels - Have given 2 Tallads (5 grs in each) Cascara - followed next day by 2 drachms each of Liquid Ext. Cascara - & Liq. Ext. Sassafras - but without effect - so a glycerine suppository was given followed by 1 gr of Calomel - which have since acted.

J.B.W.

Feb 12th

Is about again as usual - & her bowels not so troublesome - is having 2 or 3 dreams nightly - which answers well.

J.B.W.

1904

March 24th

Has been rather troublesome again lately - wanting to fight etc - but her period is expected shortly - & also her husband has been to see her recently - her temperature occasionally goes up slightly - last night it was 99.8 at 8-30 - but this morning it was 98.8 - but she complains of no pain & has no cough.

Is taking Scott's Emulsion. J.B.W.

May 31st

Very uncertain from one minute to another - is very full of delusions - & also has various hallucinations - have stopped the Scott's Emulsion as it made her sick - Seems in better health.

J.B.W.

June 6th

Is going on much the same - her health seems better - tho' there is at times very obstinate constipation - she has 12 grs of Berberol lately at night & gets about 7 hours sleep.

J.B.W.

June 15th

Report sent to Commr etc - She is the subject of auditory hallucinations which prompt her to make sudden & violent attacks on those around her - she often states that she is Christ & has

1904

Ms^s Edith Isabella Georgina Fitzwilliam

been crucified (Physical) She is in good health & condition - though at times her circulation is weak.

(Signed) H. H. Newington

June 17th

Has had a day or two in bed, as her period has been on - & she has also suffered a good deal from hay fever - for which Dr. H. Newington prescribed inhaling a few drops of fennel dipped on a handkerchief, has been however placid & amiable throughout

J. B. W.

June 20th

Report made by Dr. H. Newington:-
Ms^s Fitzwilliam has had a quiet & restful week after natural events. On Saturday June 18th she was out walking in her usual state. On Sunday morning she complained of feeling heavy with hay fever by which she was attacked last year as well. She remained in bed all day cheerful & apparently stronger than usual. In the evening, she sang some of the hymns which she could hear thro' her open door from the Chapel, where evening

Name of Asylum, Hospital, or House.

TICEHURST HOUSE

NOTICE OF DEATH.

Date of Reception Order, the 26th day of June 1903.

I hereby give you Notice that Ms^s Edith Isabella Georgina Fitzwilliam a (a) Private Patient, received into this (b) House on the 26th day of June 1903, died therein on the 19th day of June 1904.

Signed H. H. Newington
(c) Joint Medical Officer

Dated the 20th day of June 1904.

To the (d) Com^{rs} in Lunacy, Clerk of the Peace for East Sussex, & Messrs. Burt, Brewer, Balle, & Taylor, Rungbar & Co., 11, St. Andrew's Place, Brighton, as witnesses.

STATEMENT RESPECTING THE ABOVE-NAMED PATIENT.

Miss Edith Williams
Died
Notice of Death

1904.

Mrs. Edith Isabella Georgina Fitzgerald

Service was being performed. About 8 o'clock she got out of bed to have it made. & she ~~remade~~ washed herself etc. Then she jumped into bed & a minute afterwards the nurses with her noticed a sudden collapse - one ran for assistance & Dr. Walters with the Lady Superintendent arrived at once. Restatives were administered which were of no avail & she passed away quite peacefully in about 15 minutes from the commencement of the attack.

J. B. W.

Death from Heart Failure.

Feb. 3. To-day when in the grounds Mrs. Deurance pulled of her dress in an obscene manner, and on being corrected by Nurse Pym, she attacked the nurse and pulled out a handful of her hair. She is now quiet, but still requires careful watching -

Jan. 17. She is still in the same mental condition, but has not assaulted any of the nurses since the last date. She is in good bodily health.

1909

Jan. 26th Mrs. Deurance threw her shoe across the room and hit a picture, breaking the glass: the nurses asked her to move away from the broken glass whereupon she seized one of them by the hair, and had to be held down in a chair.

Feb. 5th When out driving today one of the horses of Mrs. Deurance's carriage began plunging about & pushed the other horse to the side of the road and into the hedge: Mrs. Deurance's nurse got her out and she waited in a shop while another carriage was being sent for. The patient did not seem much upset by the occurrence at the time & was quite

Feb. 7th Since the mishap on the 5th she has been excitable & uneasy & is constantly talking about it: she accuses Nurse Forbes of having given

1909

the horse the "stagger": this morning at breakfast she poured cream on to her bread & butter & threw the lot at the window & this was followed by an egg & a cup of tea.

May 15th Mrs. Deurance seized a flower vase & banged it against the wall cutting one of her fingers with it: it was dressed with Dr. Boie's lin.

- 20th The finger has healed: she is in her usual condition.

June 23rd She is in the same mental condition but has behaved, for her, quietly of late: she takes her morphine mixture & fr. of veronal every night.

July 25th Mrs. Deurance has shown no violence lately - is in good bodily health.

- 27th Mrs. Deurance today attacked Dr. A. Hewings while he was in her room talking to her sister who had called to see her: she flew at Dr. A. with her fists striking him on the head and calling him a "bad wicked man". She told her sister many things which are untrue, e.g. that her books & other property had been destroyed.

293 1909

29 Sept.

Mrs Devrance

There is no account of any unusual occurrence since that recorded on 27 July. She does not sleep well and so is given on alternate nights if needed a powder Veronal gr. viii which appears to assist the sleep function. Patient goes out daily for drives and seems to be in good bodily health. Mentally her condition remains unchanged. *D.E.*

30 Sept.

This morning at 10.30 am. patient became excited - in fact for the last week she has been threatening "to fight". She began by using bad language then became abusive to the nurses, and wanted to attract the attention of the painters at work outside. She made an attempt to reach them & on being intercepted by one of her nurses she (the patient) sprang at the nurse & tore her blouse to pieces. She had to be held for about 5 minutes, after which she quieted down. It is noteworthy that often when patient is in this excited state she has involuntary evacuation of bowels & bladder. *D.E.*

1909

Mrs Devrance

294

Oct. 1

Patient had a good night's rest and to day appears to be in her usual condition when spoken to, on the subject of the previous day's performance - she did not deny it - but made statements about her nurses which on inquiry were found to be untrue & groundless. *D.E.*

Oct. 15

This morning patient bolted through her door & then along the corridor in the direction where the painters were working. her object, it appears, is to solicit the aid of these men in effecting her escape. She would not return to her room so it took several nurses to bring her there as she was very violent, resisting with all her strength. At such times patient is dangerous to her nurses. *D.E.*

Nov. 12

This morning when patient woke she became very irritable and noisy. She threw the furniture about, was violent and had to be controlled for some time. She continued to be noisy during the remainder of the day but quieted in the evening. She is troubled with nerves. *D.E.*

295
1909

Mrs. Durance

- Nov. 13 As patient is having better nights the administration of Veronal gr. \frac{viii} is now given only on every third night. Had a quiet day. D.F.
- Dec. 3 This morning was not comfortable, was throwing things about. After breakfast when asked to put on her jacket for walking she struck Nurse Forbes with a book and then kicked her. She had to be restrained for about 5 minutes when she quieted. D.F.
- Dec. 4 This morning patient was very troublesome and quarrelsome and was about repeating the previous days performance but was prevented by the assistance of 4 nurses. She states that "the spirit of God is in her" and she was to kill her nurses then she would be free. She very frequently threatens her nurses and that if not allowed out she will smash the windows. She often uses very bad language & is very abusive. D.F.

1909

Mrs. Durance

296

- Dec. 17 Is getting on now quieter than had 409
no outbreaks since last note. D.F.
- 20th Special Report - see Report.
- 1910
Feb. 13th She is the subject of dementia, under the influence of aural hallucination, she readily becomes impulsively dangerous. She cannot talk for a few minutes without becoming increasingly excited, domineering & threatening. She uses foul epithets to all about her. Bodily she is good in health condition. (S. H. H.). (M.P.S.)
- Except for some trouble in getting the patient to come into the house from the garden, she has been fairly quiet since the last note: on Feb. 10th she went for a motor run to Tunbridge Wells, Tunbridge back by Lambethurst. She told me that she went to Brighton & other places, but was sorry she was nude, to someone she did not know: she really behaved well on the drive.
- July 10th The patient has been getting on fairly well of late when has been no violent outbreaks. M.P.S.
- August 10th Very variable, but on the whole fairly quiet. She is in a state of excitement uses bad language and foul epithets. She has good night. D.F.
- September 15th Mrs. Durance became excited - violent today, saying a chain extending to Thorpe it at a house. American was summoned & she was led down to quiet. D.F.

1910 Mrs. Deurance

Oct. 2^d The patient has not been in a very good mood for the last few days and this morning she attacked her nurses in the grounds: they whisked for assistance and four more came to their aid. The patient submitted soon became quiet again. C.W.P.B.

Nov. 7^d No change other than has been so mentioned outburst since the last note. C.W.P.B.

1911.

Jan. 3^d The patient is much as usual mentally: her general condition is good: she has several times lately been on the verge of an outbreak but it has passed off. C.W.P.B.

• 27^d She has not been in a comfortable mood of mind since her brother died two days ago but there has been no actual outbreak. C.W.P.B.

Feb. 27^d Mrs. Deurance attended evening service in the Chapel and was very well. C.W.P.B.

March 1^d She has gone to Hawkhurst for a few days or less. C.W.P.B.

• 7^d She came to the beach practice this evening but became excited & noisy and to be calm back to the Highlands. C.W.P.B.

• 30^d The patient became excited while out driving

1911 Mrs. Deurance

August 6^d yesterday broke one of the carriage windows. ^{C.W.P.B.} She has had a long period of comparative quiet but today she attacked her nurse "back striking" her on the back of her head with her fist & calling her out with the crowd she was seeing: her husband came to see her & seeing she patient made many complaints to him, among them that her one of her nurses had been abusing her & calling her "bitch", also that she (Mrs Deurance) was suffering from troublesome constipation which is not the case: she afterwards apologized to her nurse for "telling all those lies". She has had a cold lately. C.W.P.B.

Sept. 15^d She has been quiet lately: she was visited by her sister a few days ago. C.W.P.B.

• 11^d Mrs. Deurance today attacked her sister in the grounds because the latter would not allow her to go out & post a letter: nurses came to the scene & no damage was done. C.W.P.B.

Nov. 15^d The patient has been very quiet & amiable lately and has written several affectionate letters to her husband. C.W.P.B.

1912. Jan. 29^d Mrs. Deurance took three colds & had

1912

Mrs. Deurance

from the soiled linen basket & concealed them in her pocket. She was angry with her nurse when the latter asked her to give them up & said the nurse had stolen them, also that she would ask Dr. H. to let her have larger ones. The next evening she said "they kept telling her to kill herself, but she did not see why she should see did not know how she could. She then asked the nurse if she thought she could kill herself if she threw herself on the floor violently. c.w.p.B.

April 5th Has been quite quiet & well behaved lately. She has not even taken her napkins mixture for a long time as she refused to take any more of it. She seems to get on much better without it. c.w.p.B.

May 21st Mrs. Deurance has been staying at the Queen's Hotel Hawthorn with her mother & returned today.

July 26th She had not been very comfortable lately. She said she would like to kill somebody. She struck one of her nurses a few days ago. c.w.p.B.

July 30th Fairly quiet but not in a very comfortable

1912

Mrs. Deurance

state mentally. Day she asked that Miss Merridge should come & measure her for her coffin. c.w.p.B.

Nov. 15th The patient had not been well lately. She had had St. of pneumonia. told Dr. Fowler (Lombard Street) that she had been ill-treated by her nurses & others; that they had behaved most cruelly to her, tearing out pieces of flesh &c. c.w.p.B.

To St. Paul

Certificate no 1.

Mrs Sarah Burgess

"She talks in an incoherent & rambling manner she says she is not Sarah Burgess as they broke her ring by sending her through the pauper way, she is under the delusion that she is a friend of royalty & says if she asks for the Queen it is her own life, her French Garter she understands, if she asks for the King it is the Catholic & that the last time she was here Lord Kitchener came & took her away.

Facts
Communicated
by others

Police Constable Hayter 415. States that Sarah Burgess came to him at South Gate Buckingham Palace & said she had to attend a Danish Prince at Windsor & wanted to know where she had to go & made other rambling statements & presented her card bearing "La Grande Duchesse Sarah Burgess"

(Signed) A. G. H. Cornelius Hallen.
25th May 1904.

1904

Copy of
Medical
Certificate no 2.

Mrs Sarah Burgess

She is incoherent in her conversation & states that Lord Kitchener gave her woman's rights, & that the King has given her permission to go all over Buckingham Palace from roof to cellar & that she has a title, but married a commoner. She also states that the intellect of Croydon & London persecutes her to take up her title.

Facts
Communicated
by others.

Sarah Butler, day attendant, St Giles Workhouse states that she is very rambling in her talk & that she says that the King called at her house one morning at 8 o'clock & that when she goes to church & other places, the Prince & Princess follow her & that the late Queen wished her to marry someone else than her husband.

(Signed) Patrick M^r Elwaine

History of
Case

Mrs Sarah Burgess

Was in Diekhurst House from March 18th 1897 to July 15th 1897. when she was discharged "Relieved". Last Sunday she attended the service at the Guards Chapel & afterwards attempted to call at Buckingham Palace but was taken up by the police on duty & taken to the St Giles Workhouse.

See Case Book 39 - Page 1.

Physical condition
on admission.

Is a tall slender woman, of a pleasant aspect & rather fascinating ~~aspect~~ manner. Seems apparently in good health. Heart & lung sounds normal. Pulse 80. Tongue furrowed - was ordered 2 grs of calomel.

Mrs Sarah Burgess

1904

Mental
Condition on
admission

Was admitted in the evening (May 25th) by Dr Herbert Kevington. I saw her soon afterwards - she was in a pleasant & agreeable frame of mind - voluble in her talk - & exalted in her ideas - remembered her former visit here - & asked after certain people & noticed the changes - She was full of delusions of grandeur - how the King comes down to Crigden has tea with her - & what he had said - how that the Duchess of Marlborough had herself brought her a dress in a box - & given it to her herself at a railway station - so that she might go to the best drawing room - but that she didn't go & the King had said it was her temper.

J. B. Walters.

May 26th

Has had a good night - said she attended a debate in the House of Lords during the night. "it was an all-night sitting" Tells me of various things that the Archbishop of Canterbury has said to her - & that the King had given her a

Has had a good night. When I saw her
she told me that she had just been
attending "a Jewish exchanist" - also she
informed me that Prince Christian had
told her she wanted her corners rounded off
D. H. Newington is allowing her to
go into the garden unattended. as she
has promised to go no further.

May 28th

J. B. Walters
Is settling down well - told me to-day
that she had been invited to the late
Queen Victoria's funeral by Princess Beatrice
at the Isle of Wight - but that she did
not go - but assisted the body at Victoria
station etc etc.

May 29th

J. B. Walters
Still full of the usual delusions - but is
very quiet & nice - says to-day that
she attended the service at the Guards
Chapel - by the imitation of Lord Roberts
& sat in his seat, she did attend the

1904

Mrs Sarah Burgess

service - but not at the imitation of Lord Roberts
J. B. Walters

May 30th

Report sent to Comm^{rs} etc
She is of unsound mind, she talks
without ceasing & quite irrationally, she
tells me that her husband has a
Secretary who is paid £400 a year - tho'
only worth £150. He gets an extra £100
a year for each fresh mistress he obtains
for the Duc d'Orleans. She maintains that
she & the King are excellent friends &
that he often calls on her at her own
home - She considers that she was sent
here as the result of a conspiracy on the
part of the police, & others about the
Royal Household. (Physical) She is in
good health & condition.

(Signed) H. H. Newington.

May 31st

Remains in precisely the same state
tells me this morning that the Duc
d'Orleans has visited her every day
for the past 3 months - sometimes 3
times a day & that he will certainly
wonder what has become of her J. B. W.

1904

Mrs Sarah Burgess

- June 15th There is nothing fresh to note - she is full of her usual grandiose ideas. J.B.W.
- June 8th Remains quite the same. J.B.W.
- June 14th Is as usual full of her ideas of royalty - told me to-day of various things that the King & Queen - Duke of Orleans & others of that standing had said to her. J.B.W.
- June 25th There is no change - full of these same ideas - writes letters every day to those people holding high social positions. J.B.W.
- June 27th Report sent to Commissioners etc. She is of unsound mind, she talks in a cheerful purposeless way - she is entirely possessed & with delusions of grandeur, she maintains that the King takes a personal interest in her & frequently calls at her home to see her - To-day she told me that people called her a slowcoach, because she had to wait the King's time (Physical) She is in good bodily health & condition.
[Signed] H.H. Kensington.
- Aug 14th There is no change in this patient's condition. She continues to suffer from the same delusions

1904

Mrs Sarah Burgess

- but she is bright & cheerful - & in good health. J.B.W.
- Sept. 15th Remains in the same condition precisely & is in good bodily health. J.B.W.
- Oct. 15th Delusions as before stated remain very fixed - Mrs Burgess is very indignant at being detained here - & says she is being kept here on account of her name, for an advertisement (she thinks herself a duchess) A few days ago she announced her decided intention of leaving on the morrow. J.B.W.
- Oct. 27th Has been discharged to-day Released by the authority of Her Husband. J.B.W.

1904.

Miss Marie Rose de St Jullien

Admitted July 2nd 1904
 Date of onset July 1st 1904
 Age etc 17. Single - Female.
 It is the first attack.
 Duration 3 weeks
 Causation Unknown.

No history of insanity.

Is not suicidal - but will attack those around her during her fits.

History.

Is a very bright, intelligent looking girl of a dark type, with a pleasant smile & vivacious manner. She started to menstruate at the age of 11 - She had been well until six months ago - when she was ill for a few days as she is now - but this cleared up - until within 3 weeks ago - when her condition became as described in the Medical certificates - She is also reported to have some spinal complaint & to have a tender spot on her spine - & has arrived with an elaborate spinal instrument. She tells me herself that she

Miss Marie Rose de St Jullien

had a fall on the ice about 18 months ago - & was stunned for a short time, but went on skating afterwards.

She has been in bed for the past 3 weeks & is reported to walk only with difficulty & was brought here from Littlehampton & carried to & from the various carriages. Nurse Gordon who has been with her during her illness has remained here with her for the present.

Lung sounds normal - heart rather rapid - with some roughness of the first sound over pulmonary area - but no definite bruits.

Further history from Nurse Gordon.

Bruises

Menstruation was perfectly regular until 1903 when she had 16 periods. This year periods began on the following dates - Jan 6th & 30th Feb 27. March 22. April 19. May 16. June 13.

Arrived here with several small bruises on both forearms & wrists - which she herself says ^{were made} were done by her previous nurses - whilst she was being restrained.

Miss Marie Rose de St Jullien

"She imagines that a woman whom she saw in Paris comes to annoy her & she fights madly with her I have attended here since July 12th & have seen her injure her arm against the iron bedstead & hold on to an open window ledge."

(Signed) Robt M. Young FRCS.
1st July 1904.

Facts
communicated
by others :-

by: - Margaret Gordon Nurse of Beach House, Littlehampton :-
She has violent attacks & fights with an imaginary woman & is quite unconscious during the attack & would injure herself if she was not restrained.

Miss Marie Rose de St Julien

1904.

July 3rd

This patient was carried to her bed yesterday as soon as she arrived - (about 3 p.m.) soon afterwards she had one of her attacks between 4 + 5 p.m. which lasted about an hour. She requires 2 nurses with her on these occasions to prevent her improving herself. Between the attacks she seems quite sane; very bright + intelligent. She is quite unconscious during the fit - but is cognisant of their existence - & says she can tell when they are coming on - she feels a dead weight on the top of her head - & then this imaginary Arab woman appears to her - & comes & sits on her - & she is obliged to fight with her - after which she knows no more. She slept 5 1/2 hours last night which she says is about her usual time - she had a slight fit this morning early - lasting about 20 minutes - She is not eating very well as she is reported to suffer much from indigestion - her bowels are much constipated & her tongue is furred.

G.B. Walters

Miss Marie Rose de St Julien

1904

July 4th

Had a good night - no attack since yesterday morning early - bowels confined.

Miss de St Julien.

Menstruation perfectly regular until 1903. when she had 16 periods.

1904.

1904

July 4th

Had a good night - no attack since

the doctor touched her back bone. she also seemed conscious of abdominal pain. Very constipated very difficult to feed. kept on saying "go away" to an old woman she said. Face pale eyes shut or eyelids blinking on. going to sleep all this jerking ceased. & she threw a good deal in her sleep but her limbs were still. When spoken to clutched at you & felt you with her eyes shut & pushed you away unless you were cups stretched appeared several times - ever getting she ate some water forced in any way to take food. jerked & winted. went fit to the floor almost falling out of bed. ^{single nurse in bed} ^{one fit on the 21st (Wed)} until the 29th of June when the fit showed signs of returning dangerous always conscious of the attack before it came on during the attack she would clench her mouth high back & when held down, draw herself about in a great dangerous way. After 12 hours in the case, triple the disease quite conscious again only to be perfectly inexcitable. ^{more or less until the 3rd of July} ^{when they seemed to cease. & that}

J. B. Walters

1904

July 4th

Miss Marie Rose de St Jullien

Had a good night - no attack since yesterday morning early - bowels confined -

became more natural & got up after several days. Seemless for an occasional jerk loss altogether different not complaining of back or limbs but controlling herself more. She always saw an imaginary woman in these attacks. As the 28th approached she felt inevitable and desired a return having a good deal of the morbidness in her arms. She was turning morose & had a feeling of faintness in the morning could not stand any excitement at all. Music especially of a diatonic seemed to be out of order. Her eyes squinted very frequently & blinked & she had a good nervous movement about her eyebrows.

July 5th

On the 19th August the fit did not anticipate her period but seemed depressed in the morning & seemed torpid. She fussed over saying her back was aching she could not walk etc. but on being told she must control herself she got up & did things as usual & seemed natural & had no jerking movements. She looks less pale - eats & sleeps well. did not sleep so soundly for 2 nights before it commenced. She went & listened to the music & watched the clock things which she avoided the time before as being too exciting.

July 6th

bowels opened well to-day with enema will give oil - Dr. H. Newington has to-day ordered Pul. Aloes et Ferri, one to be

1904.

J. B. Walters

1904

July 4th

Miss Marie Rose de St Jullien

Had a good night - no attack since yesterday morning early - bowels confined - had a glycerine suppository yesterday afternoon - but without any result - so was given a soap & water enema to-day which procured a motion - which was very hard - sat up to-day for a short time & also walked as far as her sitting room - taking her food well.

J. B. W.

July 5th

Is going on well - no more attacks - has had 2 soap & water injections to-day with some olive oil in them - but the motions are still hard - has sat up again to-day & walked about the corridor a little - has told me that she does not think the Arab woman is coming back again - menstruating to-day.

J. B. W.

July 6th

No attack since the early morning of the 3rd & this was not a severe one - bowels opened well to-day with enema with olive oil - Dr. H. Newington has to-day ordered Pul. Aloes et Ferri, one to be

1904.

Miss Marie Rose de St Julien

July 7th

taken 3 times a day. Is eating & sleeping well - but requires coaxing with her food

J.B.W.

Report sent to Commissioners etc signed by Dr. H. Newington:

"She came in with a daily tendency to well marked neuritic seizures. She had two such in the first four & twenty hours but has had none since. By her own description these started with optical hallucinations, she saw approaching her a little old Arab woman who came at her & threatening her hustling her & trying to sit on her chest.

"In her fear the patient tried to get away hitting out at & even biting those who had to restrain her. The hallucination passed ^{away} after some time & the attack ceased.

"There has been a definite premonition of the seizures in a weight & pain in the head. There is a history of antecedent neurosis.

"The patient is a bright, vivacious girl, somewhat unstable & emotional. Taking her mental & bodily condition together it is probable that the above mentioned attacks are hysterical.

Miss Marie Rose de St Julien

1904

"epileptic in character, but may be of the more serious nature."

Physical She is anaemic, the heart is somewhat rapid & uncertain in action & there is a tendency to a haemic murmur. There was marked hyperaesthesia over the lower dorsal spinal prominences when she came in. This has quite disappeared. There has been very marked constipation & tendency to amenorrhoea. There were some bruises on admission on her arms where she had been held.

J.B.W.

July 8th

Has been up & out walking for the last two days - & playing croquet - has had no more attacks - & the one nurse now sleeps in her room instead of having two sitting up. Has a daily enema in the morning.

J.B.W.

July 9th

Is going on well. attended the cricket match to-day - & the band yesterday. & seems none the worse

J.B.W.

1904

July 1st

Miss Marie Rose de St Julien

Examined Miss de St Julien this morning medically. Complain of afebrile approaching the skin type, conjunctivae pale. Pulse fair volume & tension not quickened uterus healthy.

Chest well covered, but that of an adult woman.

Thorax moves equally on inspiration on both sides

On palpation tactile femoral normal. Apex at 5th space in midclavicular line.

On percussion, cardiac dulness from upper border of 4th rib to left margin of sternum to apex.

Percussion note normal over the rest of the chest.

Auscultation, heart sounds normal no admittance sounds.

Heart. Sounds normal but soft feeble, heave minimal on palpation base increased on lying down.

Yenon marks on right femoral vein.

Aug. 24th

Between the catamenia, which occurred in early July and again in late July the patient has been quite rational in manner and of normal bodily condition except for a little twitching occasionally and once or twice inclinations to faint.

On July 18th Dr Percy Smith saw her with me in consultation, and confirmed the opinion which I had formed of the case, that it is

Miss Marie Rose de St Julien.

one of hysteria - with complications (probably passed off) with hystero-epilepsy. The treatment has been confined to Iron & aloes at first subsequently changed to Bland's pill, and occasionally small doses of Pot. Brom. and Hyoscyamus.

As the period (which eventually came on, on the 28th) approached, the patient became apprehensive & a little querulous. As soon as the time came she had a pill of Camphor & Ext. Hyoscyami a. a. gr 2℥ with the best effect. The usual pain was entirely absent. The discharge was slight but not offensive as had been the case previously. Subsequently there was considerable progress, though occasionally faintings and other evidences of instability occurred. But it has been found that Miss de St Julien could stand more excitement and company without bad effects.

The period reappeared on the 19th of August unexpectedly, there having been however some little depression and querulousness. The Camphor & Hyoscyamus pill was repeated with excellent effect. The flow was more normal

1904

Miss Marie Rose de St Julien

in quantity and quite natural in other way.
There have been no after effects and
apparently the patient is convalescent.

The digestion is not strong and some sorts
of food appear to pass through the alimentary
canal with but little change & too rapidly.

Dram is still being taken & also Must.
Bismuth. Co. (Mackey)

H. Hays Lewis

Sept. 5th

Is going on satisfactorily, but doesn't sleep
very well: wakes rather early & not going
to sleep again. J.B.W.

Sept. 13th

Menstruation commenced again mid-day on
the 9th & ceased to-day. It has been
more normal in all respects & she has
passed thro' the time with ^{but} very little trouble
under treatment as before. J.B.W.

wt 8-11½

Sept. 20th

Is going on very satisfactorily - is now
taking each night before dinner the following

pill R. Ext. Aloes Soc. 2 grs
Ext. Nucis vom 1/4 gr
Ext. Bellad. bin 1/4 gr. It is
J. Hingedi Water in the morning.

J.B.W.

1904

Miss Marie Rose de St Julien

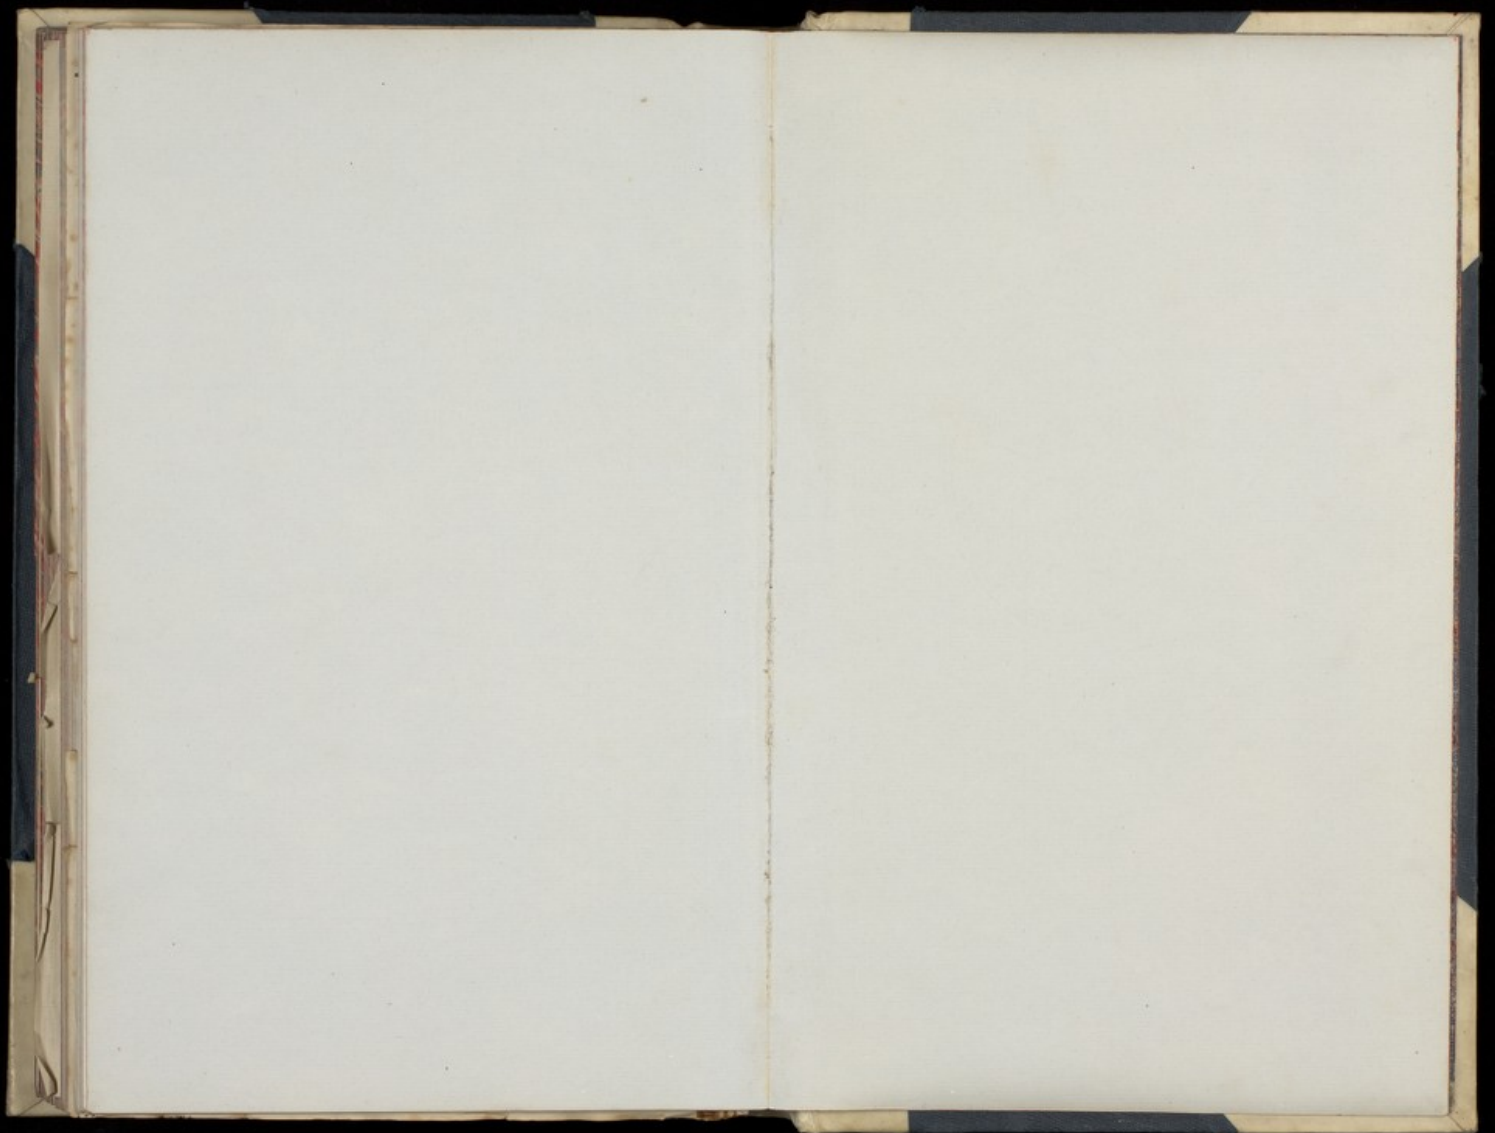

Sept. 23rd

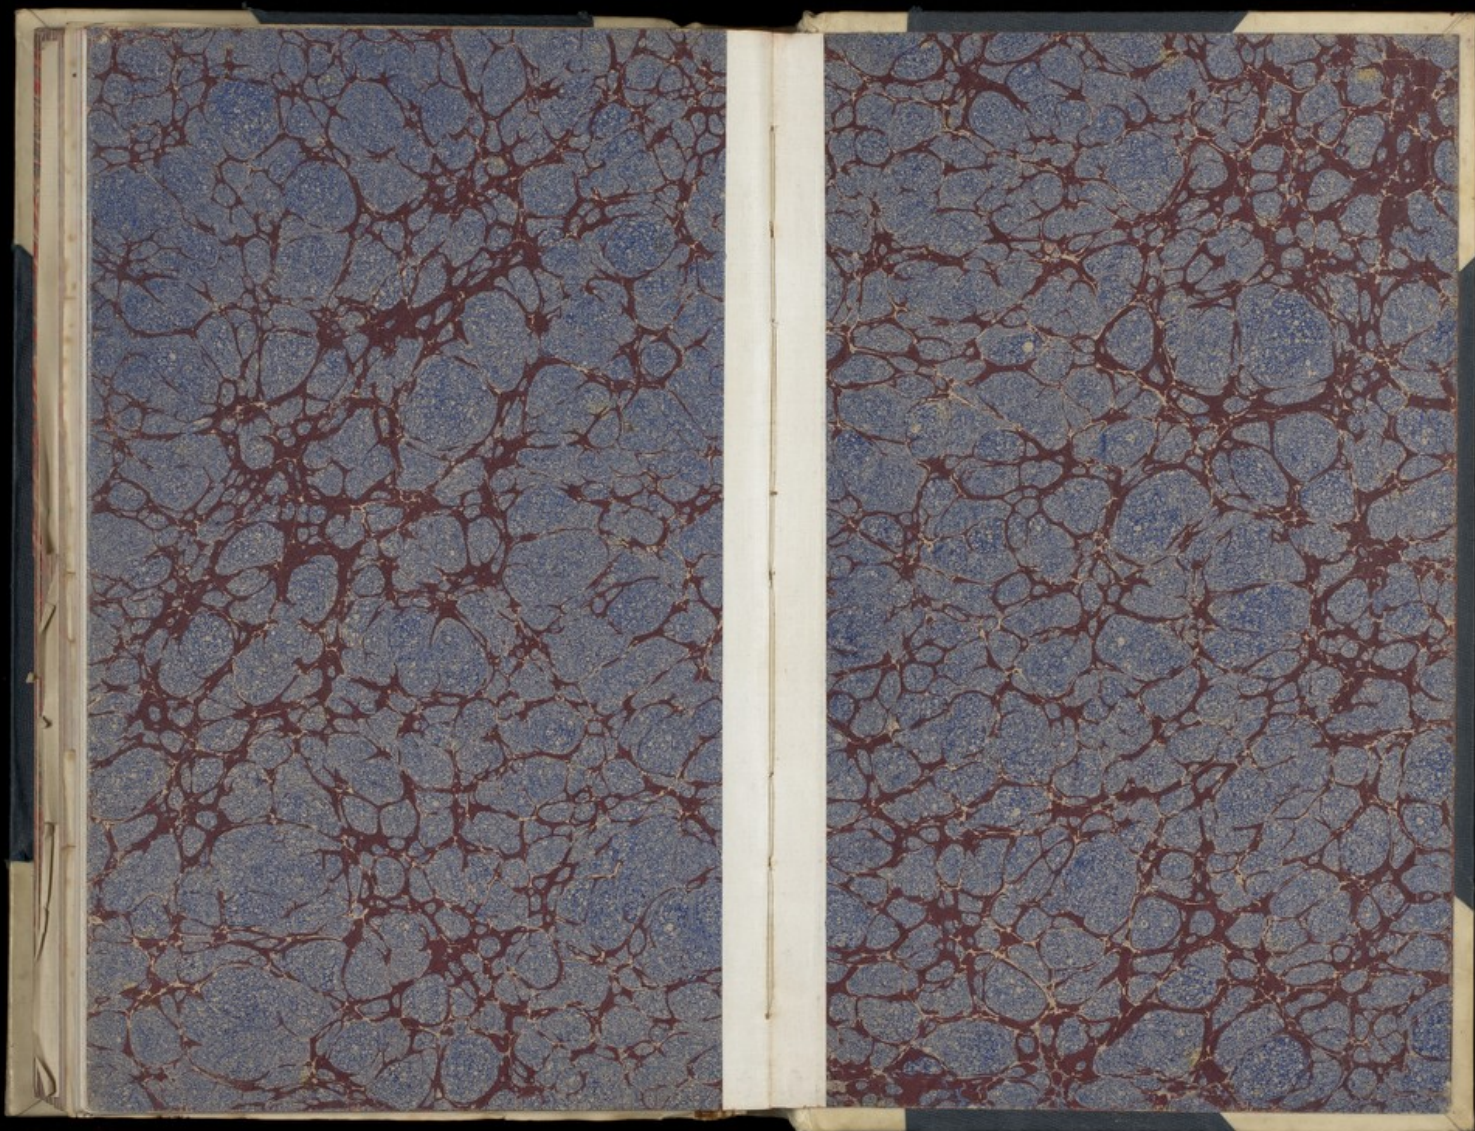

Has to-day left here for 1 Mount
Ephraim Mansions. Dunbridge Wells in the
charge of Nurse Gordon. on leave of
absence. J.B.W.

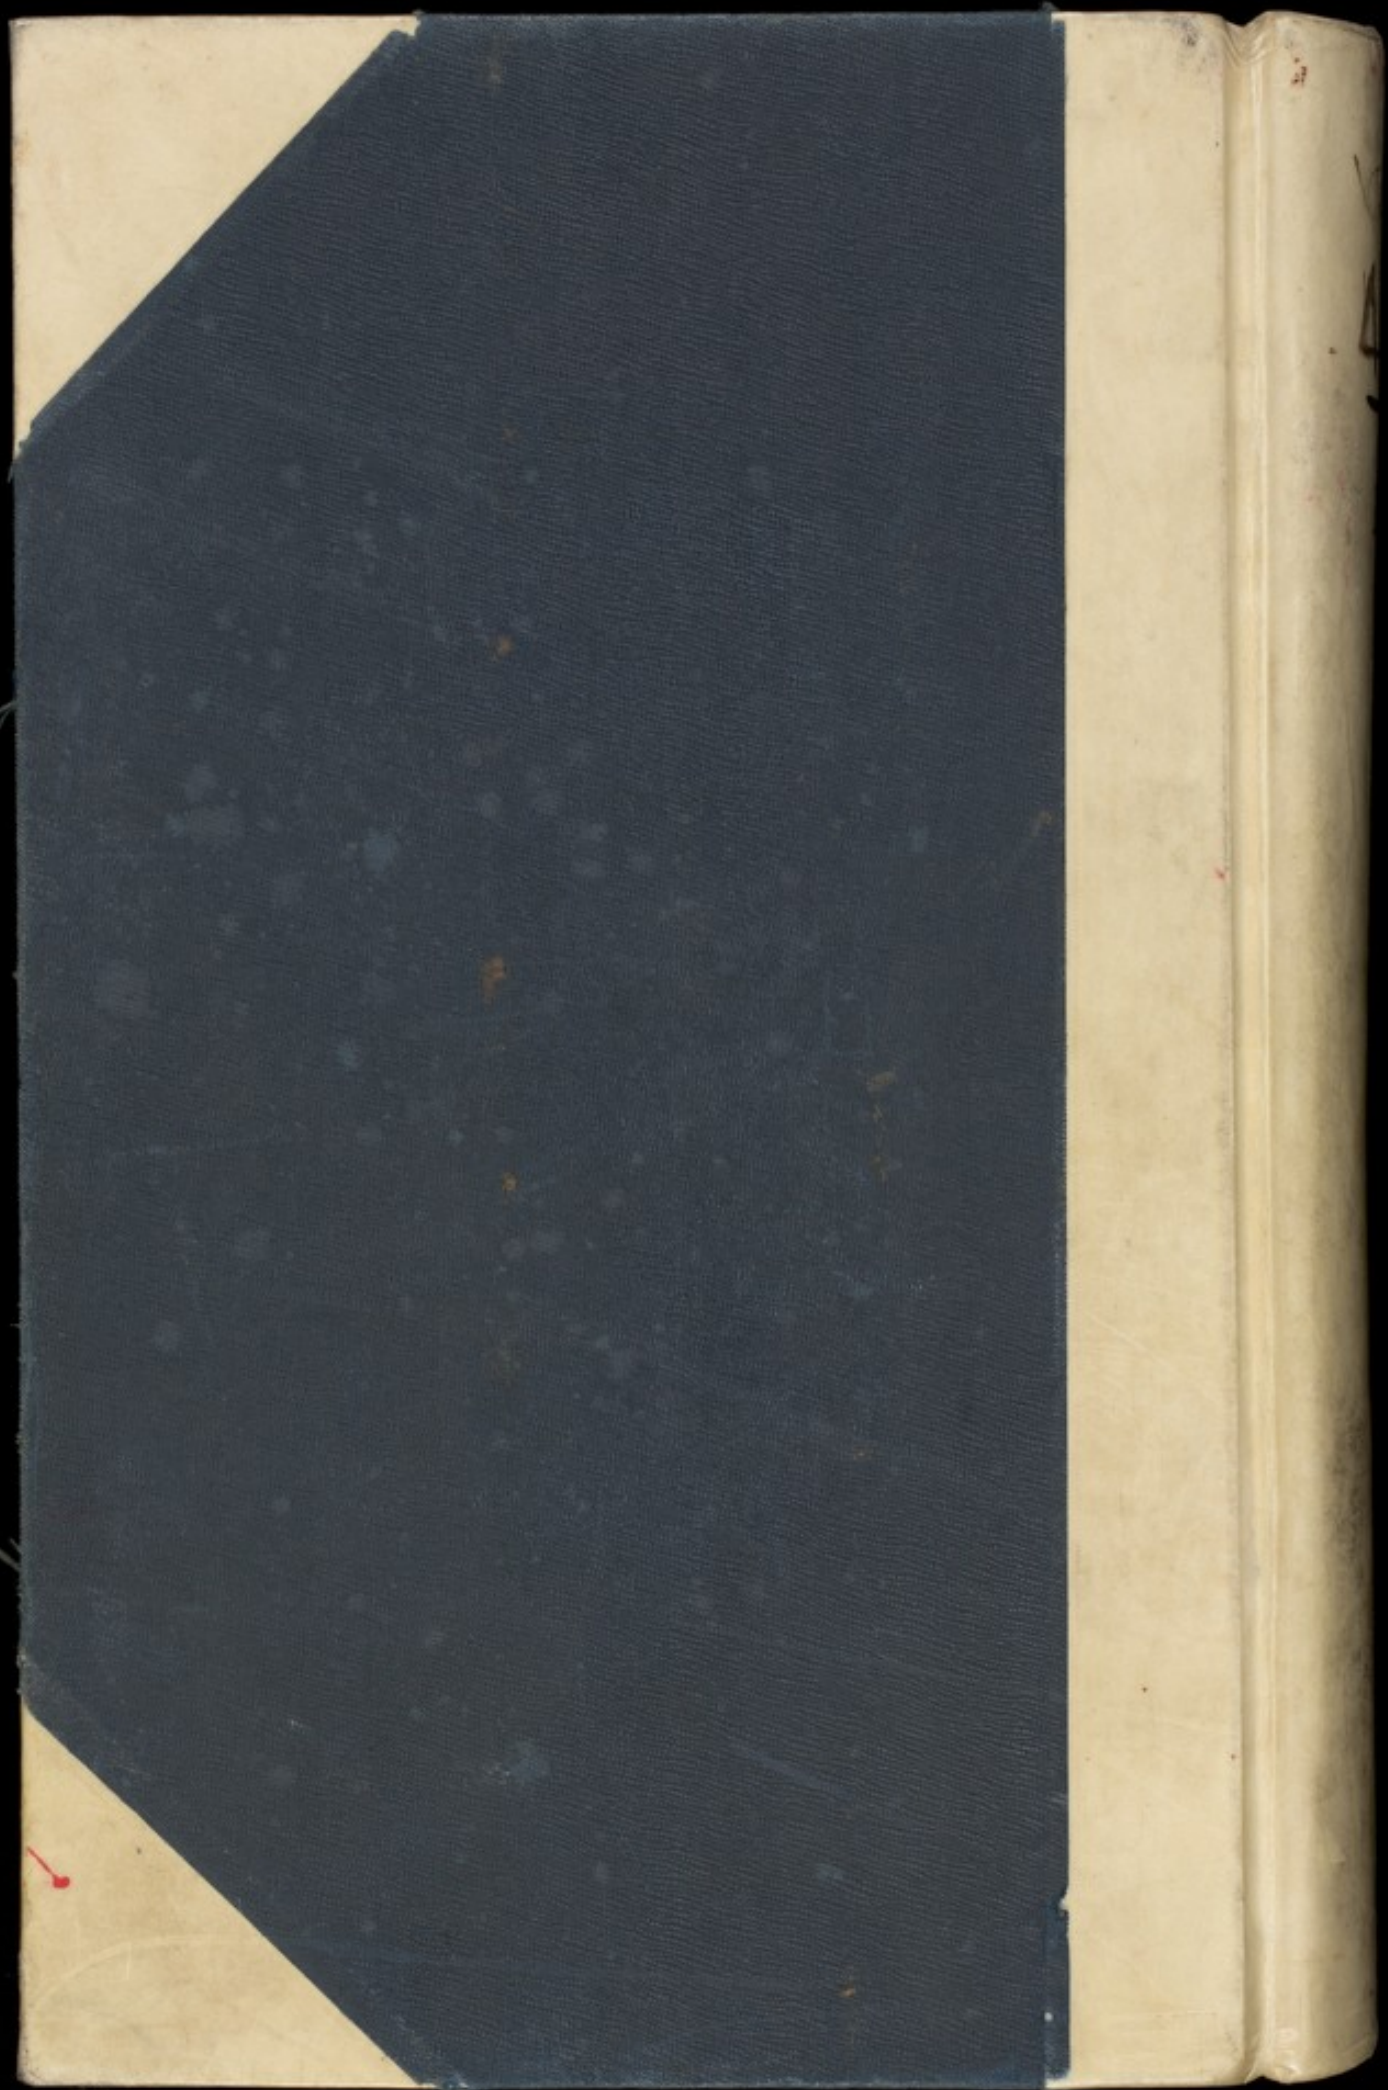

Oct. 7th

Has to-day been discharged Recovered by
order of her Mother - under section 72 of
The Lunacy act 1890 - the Petitioner being
now resident abroad. J.B.W.

A number of blank pages follow
and have not been photographed.
