On removing the bone both
 Brain and blood escaped - and
 a Coagulum lay between the Skull
 & Brain Matter.
 He became insensible three days after
 Operation - from that time he gradually

Wentall of R.G.
 Case of Ligamentum
 on 5th day after operation was successful
 - Patient of 5 years old with no remarkable
 disease into of brain. It was perpendicular
 to the spine.
 It was not possible to extract it without the
 use of the Trepan.
 He was quite insensible during the operation
 but became so sensibly the next day and
 still being blind.
