DINELEY [n DINGLEY] (Henry) [d. obsin]

Medical receipts, and an Armorial, etc

(Dated) 1564 – 1633

Cobe eſt terme doth begyn

Be it knowe that eſt terme doth begyne all weyes the morrow day after the
Ascension day for one and endith the monday nexte after the assende days

Trinite terme doth begyn

All wey the frydaye nexte after Corpus christi day: and endythe
the wednesday fortnyght after

Michelmas terme doth begyne

All wey on the myntz or tonge day of October: and endyth
the eyght and thirty or myne and thirty day of November

hillary terme doth byggyne

The three and twenty or fowre and twenty of Januarye and endith
the twelfth or thyrtyne day of the monyth of februarij

Note thys that in eſt terme on the aſtemeyon dayz: in trinyte terme
on the natyvyte of seynt Jho the baptiſte: in mychelmas terme on
the feſte of allsaynte and on allsoules day: in hillary terme on candel
mas day: nor upon any sondaye: the kynge Juggs do not vse to sytt
in Judgmet

for the carpe siluer in yale or in the rynde

Take a herle that yo call a codde barbe & firſt put yo hocke thorowe the middle
of iij or iiij of the. then put one one of the poynte of yo hocke a longe lyne
and so angle w thys & the carpe will byte at it

to make a bay for to make a lake to fyll

Take thys sedewynde of harne: and gad ſtrynge wax to and bynde yo harne and yo wax to
geder tyll yt be as thyck as ij tylle: and the Ende it on the lynen of the clothe that ſhalbe
w in yo lake and the more it waſſe and the put yt into yo lake and ſo make it lap

Hervest begynnethe whan the sonne enteryth into the first degre of libra: & it induryth 90 dayes that ys fro the 14 day of september unto the 13 day of desember in that tyme the day & the nyght are evened: & the nyght begynneth to growe, & fallethe ye of the day. the eire waxith colde: the wyndys blowe: wat & rayne: the grene thinges of the yerthe vade: frute & levys falle: & the beauty of the yerth, trees & erbis are gone. foules fly into hote regions: wild bestes seke hir denes: & spend hir thynges whiche they gaderde to susteine the wynter. The fisshes drawe towardes the depe place of the rynd & watrs. Than the worlde is lykenede unto a woman of 50 yeres of age that hathe nede of clothes, for yowthe ys gone fro hir. Hervest is a time colde & drye: in that time blake color ariseth. Therfore it behovith us to ete: meats that are hote & moyst as shepis flesshe: chekins: yonge lambs: porke: & potage of ginger & drinke olde wine of depe collor: swete wine & ... And absteine fro all meats that engend malencoly: as beffe: gose: olde pygions: porpeis: & suche other. Than put in exercise the movynge of thy body more & rather than in somer. Use bathes in this time yf nede be: & take laxatives: & if a man nede to have a vomyte let it be but a litell & that in the hottyste hour of the day: for in suche houres of the day superfluites are gathered in a man. Also the purgin of the wome ys to be used in that time: with the pillis called ... & electuaries: lapis lazuli: & armeniacum: & suche other as purgyn or deymyn drede blake color: and also represse humors. Petra Philosophale Phrouant
against all diseases

℞ Salt nitre ℥ij. Roch allom, vitriall Romane ana ℥ij: first dry the vitriall in an earthen panne then beate it to powder and mix it with the other things, then putte Salt peme ℥iij, then put all in a gourd with a head & receiuer well luted, & mix aqua fortis ana ℥ij. Distill it in hot fier; kindle at first and encrease it according to arte & keepe well closed apon the head & receiuer, by reason the spirites shall not flye away: the receiuer close wax red lute blade: and after turne right and upon ye gourd it strong fier it will burn red at first: and beffore it will burne right again and then it is ended keepe this close stopte in glas to make the petra philos

℞ Mercury ℥ij quick lyme ℥ij common asses ℥iij mix them to gether in a morter of stone: put them in a retorte & distill it in a strong fier putting all the mercury into the retorte: then take it furth and keepe it in a glas to make the composition

℞ The water that was first made & put it in a gourd of glass well luted then put in the mercury that was distilled: then take silver in thin plates ℥ij some in fyne plates ℥ij gold quant ℥ij put them all to gether in the glas: and putte the helt on the head and receiuer, & set the glas into sand on the fier, & put the glas into a furnace. good fier puttle all the water be run furth into the fume: let it coole and keepe it close furth of the fume: let it coole and in the bottom is the petra philosophale. Breake the glas and in the bottom is the petra philosophale

Grind it finely, serse it, then wash it with distilled vinegar & grind it again then wash it with rose water, and grind it very well, still pour it over the fier: then keepe it in a glas

The water that was distilled from the stone, will serue for the same purpose again: But ye must take fine salt of the ashes of the foresaid matters:

When the water is again distilled keepe it close for infinite purposes

It resolues the Stomake

Phyrouante Balme

℞ Cumin bruised ℥ij, pseudo cost of Bayes ℥ij galbanum ℥ij in grind drobis ℥ij, olibanum in sorte electe, grum gedere ana ℥ij, liquid aloes, gallingale, cloues, roussolle & mindes cinamon, Nutmegs, Zedoari, ginger, depiamum albid ana ℥j musk, amber greece ana ℥j Beate all into powder, & put them in a retort of glas well luted: then put thereto, aqua vite rectified vinegar fragrant ℥ij & so let it stand ten dayes: then distill it in sande & after will forth white water mixed with oyle: kept the fier small vntill there no

flurte, a Blackye oile, then thanne the water, and putte an other, and mixe the fier vntill all the sperites be furth, then separate the oile from the water, and keepe it by them selues, and ye do not the firste water. The white water is called aqua del Balsame the separated from it is called olio del Balsamo, the Blacke is called water Balsamy, and the oile separated from itt is Balsamo artificiall vsing keepe of 4 proues fuche.

The vertues

The first water resolues the Lib, makes the hard faire, preserueth, putes, Beautifyes the Stoone in the reynes, prouoketh vrine, being stopt & vrinesthe, it helpeth all vlcers if ye wash them in the said water, and lay on plaster of in the same: it availeth much against the Ethsy, all ratarrh and coughs: reapes the Gratra ye vrine and vesit plaster apon, takes away the pain

Perfect

The other water called water Balsamy helpeth scabbes ring worme, ye vrine, and the white stacke, Lepry, all sorte of vlcers & dre not rose and many other things

The oile of Balme seruethe for an infinite number of things, Cattarr, wounds in the heade, it restoreth the sate, and it is most excellent against the pleurisie, giuing 3ij at a time in water of Balme Balme

The Balme distilled 3ij taken helpeth the sting Pestilu, the tongue, rather rotomb in the head, & stomake, & wormes in the heade. Annoint the head therewith outwardly, it profits to the brow, and the stomake & it is a Sondayne remedy for it restoreth the quation annoynting the parte with it. It is good for all Diseases of the head. Vale

Aromatico Phirouanti
against all diseases

℞ Sugar ℥iij, pure water, musk, amber Saffron, Lignum aloes Cynamon ana ℥j of petra philosophale ℥iij mix them together and in Rose water, make them into pouders and keepe in a box of wood vnder your S.a. in a keepe in a box of wood vnder your grub ℥iij ℥iij in Barly vnder or water, or made in any pills as before it wear nature the stomake is opressed & doth yelde all vnder misericord: if ye do good it in a potion drawn from the bottom and let the patient vomit so many as he will: but let them eate little meat dayes

De Succino seu Balsamo

~~Per descensum vehementi igne e Succino multo differentius prolicitur, hic vero vero nigrum oleum~~ fetidum asphalti quod odorem referens, crassum fluidum, liquidi bituminis colore, consistentia ~~[illegible]~~ vero oleo lini simile, depellitur.

Id in retortam conjectum ac clarum aurei coloris oleum odore suavis ac diaphanum longeque prioris tenuius petrolei instar promit. Hoc postea per balneum distillatum aqueo colore oleum tenuissimum & ad omnes generis obstructiones reserandas aptissimum, adque epilepsiam, apoplexiam, palysin et vertiginem, prohibendam et sanandam, calculos et hidropem sanandum preclaram prebet

Succini oleum aliter

℞ Succini pulueris quantitatem lexivio fortissimo intemperatum affundat, postea cucurbite crebro imponitur, easque apto igni committitur, sine supra ponitur illi alembicus ac testa, sive vase additur alter ~~alter~~ canalis vitreus, ut longiorem viam habeat oleum, ita enim melius extillatur. In cucurbite inditur alteri cucurbite addita aqua extillata qui committitur ~~[illegible]~~ max. aut arene, ita modeste quo committitur Bol. max. aut arene, ita modeste extillatur iterum & rectificatur. Quin etiam tertia vice a non nullis distillatur ut purius fit addito sale vel oleo Salis

Alij prima vice in spiritu vini solvunt, succinum macerant & deinde oleum extillant

Alij in arcto fecti vel distillato

Alij post lento igne distillant ac postea repetitis distillationibus per Balneum rectificant

A multis hic modus celebratur

℞ fragmenta Succini non subtiliter pulvi lb iij. adde pulueris silicum calcinatorum aut arene lb iij imponas ~~retorte~~ lutate eamque in furno prope committe luto, addito vitreo recipiente. Exige igne lento & prodibit primo cum aqua. Exige igne lento & prodibit albumque oleum in aquam demum. Dum flavum seu album oleum in aquam deciderit, illud seorsim excipe mutato recipiente, idque seorsim recollige alio recipiente alquod hoc modo tria sunt colligit alio recipiente aliquid hoc modo tria sunt bibes olea. Ab lb j oleum ex libra ℥ iij, flavi ℥ j ß rubei ℥ ij. ignis fortior esse vel debet eo tempore ut terra fundatur. Si maior fuerit requiritur ut terra fundatur. Si maior fuerit ebullit. post olea vasis fuerit colore illa rectificare & aque instar limpida efficient.

E Succino magisterium sic

Tunditur minutissime, huic affunditur spiritus ✳ vini ut solvatur, ac per mensem digeratur, postea aque omnes tinctae igni solvitur in aureis, ita in fundo relicto oleum magisterium est succini, quo circulatis in facie delentur ac vertiginis fugantur. valet ad omnia ad que oleum, ac eodem modo in usum adhibendum est. Verum olej guttae conica plus virium habent quam sex magisterij

Olei usus hic est

Ad aeris contagia, pectora ac catarros pellendos nares oleo inunguntur, aut aliquot gutte gossipino excipiuntur, quod sepe naribus olfaciendo adhibetur, ac efficacius est si gutta una olej gariophyllorum addatur

Eiusdem efficacie tabelle sunt ex solo Saccharo preparate additis guttis pauris olej succini

Preservat etiam tres gutte cum sale absinthij & aqua scabiose, acetose aut tormentille quotidie sumpte a peste. Ac curant septem cum aqua cardui benedicti & sale Arthemisia bibite, quia sudorem potenter vel urina movent ac virus omne expellunt

Ad Apoplexiam & palysin, vertiginem, incubum preservationis causa cum aqua Betonice, lavandule coronarum, cinamomi, tilie, vel solum aliquot gutte quotidie sumi possunt. Nam cerebri phlegmata resolvit oleum, si statim a illius gutte cum propria aliqua aqua offerantur: Finis

✳ Solutum transfunditur aliud affunditur quousque quod solui potest Soluatur ac per mensem [illegible] these wordes were left out in E Succ magist

De Succino

Imo integre curat Emuncta & membra eo inungat at paliquot dies ambus visus frequentes ac pulsus tempora eo inunguntur.
Oleum olcum unguento appropriato misceri, eo que membra paralitica aut nervi contracti ut curentur inungi.
Ad vesice vel Renum calculum ac primo suppositum cera aut due gutte cum aqua pimpinelle, Saxifragie, raphani, nasturtij, aut petroselini propinate calculos pellunt ac obstructiones solvunt, idque etiam fit si umbilicus et penis eo oleo inungatur.
Dum difficile partus procedit sex gutte cum aqua Artemisie & cinamomi facile foetum promovet ad quod etiam efficitur pinguedine Anguium misceatur eaque umbelicus inungatur.
Ad uteri strangulationem etiam iij gutte cum aqua menthe propinantur, ac nares umbilicus inunguntur, et omni modo facile restituitur uterus. Gutte iij cum aqua Anisi sumpta alba menstrua sistunt.
Septem vero etiam Spatio bis sumpte cum aqua pulegij retenta menstrua fluere faciunt ad eundem Scopum tabelle ex Saccharo cum aliquot guttis olei faciunt.
Si quotidie sumatur gutte iiij etiam caput frigidis catarrhis & vertiginis obnoxium curant & roborant ac aucta libidinem faciunt cordis robur non ac augmentum affirmatur augent
Syncope affirmatur augent
Dantur autem singulis Septimanis bis cum aqua appropriata ut dixi.
In declinio anni tertio, nares & pulsus tempora inunguntur, ad tum cum oris sicut Stomachi.
Dum Sanguinis Sputo quis corripitur tres gutte dantur cum aqua Solidagine, ad visus obscuritatem cum aqua Eufrasie
Ad Colicam cum aqua menthe aut cinamomi.
Ad febres cum aqua gentiane. Ad vermes cum aqua Tanaceti. Ad malancoliam cum aqua Rosmarini mirabile est.

De oculis Cancri

Cancrorum oculi ad sanguinis coagulati dissolutionem & expulsionem celebrantur. & pulverisatio potionemque magna utilitate exhibentur. calculos etiam rumpit, ac ac per urinam expellit. Calculos etiam rumpit, ac ac per urinam expellit, tum vino diuretico propinati cum in pulverem redacti

Essentia oculorum Cancri
Oculis Cancri in tenuissimum pulverem redactis, ac ac lacte vitro, terebinthino, obtura, Supra fundo aceti ad terebinthinae ... digere. Obtura, ac per noctem supra cineres calidos digere.
Sequenti die solutum effundo, aliudque affundo, idque tamdiu donec solutus videas. ad siccitatem aufer: ralcinatis affunde
aq dulcatam at abstracto tertio rolatione,
ut omnia auferatur acrimonia. Qua
ablata superfunde vini Rhenani quod aliquotis
rotundo acrimonia. Qua ablata
ex tuba, ut in liquorem olei simillimam
abeant. Spū halsch auferendo ita
in duplo remanet phlegma. Essentia
vero si p arenam distillabis rectificato
ter spiritu vini illi misceatur, & albumen
transcendit. Huius aliquot gutte mun
aqua appropriata propinantur, at si
spiritu Salis, olemi Salis aut vitrioli
affunderis, itaq congelabit essentia.

Licet omnia bone operationis
nota est, ex quibus plurima eadem flora,
que ex perlis possunt, negare minime
habent vitio, sed proprijs eadem

De Sapphiro

Color ipsius igne Sanie auferetur, ut in
adamantem vertatur, non verum, sed
tamen ita elegantem ut auro mediocri
a perito Gemmario dignosci non possit

Qualitate frigida & sicca predita
est Sapphirus ut roberet sexus omnes gemi=
ortulis in pulverem leuem redacta, ortulas
humiditates exsiccare, inflamationem arcere
et extinguere rolere exhibita aut butyro
lote superuncta, palpebris signo oblinitis suppositis
bus, potest.
flux. valet etiam pulus ad omnia alui
profluia, ad dysenteriam, fluxu stomachi,
et mouere sudoris, sanguinis recretiones, simil
simulatis vino aqua plantaginis, tormentille
aut alia rebus affectibus propria.

Integra Sapphirus frontis adgesta
honorariam sistit ac inflamationes applicata
eas extinguit.

In orbiculis redacta post magnitudine
ac porportia ortulis impositis, pulsus, ruliter, a
et quicquid in ortulis rendit aufert, inflamationes
sedat, detexaque oculorum pena eia aufert, et omn
los a vanolis & marbillis tubulis / vertu quoddam
sapphiri impiis dolet; si sapphirus quis sapphirus detineatur,
ortulos ab omni iniuria defendat, at ita tutabitur
ut malum illis aduersi rontingere possit.

Pulus eius exhibitus in lacte, salutem
at decora eterna sanare plebetur.

Ad cordis roborationem efficacissimus est,
pronde corpus vegetat membraq principalia mi=
= gra ronservat

Posita eius omnique venene, febribusque
malignis, animo aduersatur.

Cor lethyrat, Cardiacos at melancolicos
affectus quoris lenit, tollitque. ob eam rausam
adgibeatur antidoto de quibus.

Chimici in Salem sapphirum redigunt,
quem putant longe maiores vires habere.

Sapphirus

Sapphirum omne duplo ponderoso subiectum tamen in talcum aduruunt, quem domodo aqua stillatitia sepius abluunt rursus extrahunt, postea spiritu vini effundunt ac macerant, tum rursus distillant, quod quo in fundo remanet, iterum calcinant, distillant & toties, donec in puluinum stratum, minus mestax, tandem in roguendo Gallo prodeant quod in loto sumdo in liquore et magisterium solutur.

Elixirstat

Alij turturam Sapphiri et Cesuba extrahunt, quam putant ad plurimos affectus efficax, atque aiunt ad pondera et potionem roborationem esse praestantissimam.

Calcinatur Sapphirus hoc at post da oleo portioni solutur, domodo spiritu vini essentia extrahitur, ut Cinnabaris parabilis nobis est.

Olim Sapphiri multi ad plurima commendant. Sed plerumque a grauioribus dissimulant Cinnabarin inspectis. multi tamen pro Sapphiro oleo, obtinuerat olim damonilla, id enim a forte modo distillatum oleum probat Sapphiro omni rotundum, sed neque hoc simulatum tamen nullo oleo est, sed alcoranus vsi.

Floribus damonilla admiscent oleum album seu Spiritum Corallinum quod at sibi magnam pariunt solubilitatem mutationis facilitatem, sunt mixturae possitae quae nidum Cuiusdam aquam communem addunt, deinde distillant aquam et oleum praeter vulgari & communi modo.

Aqua distillata, oleum in superficie sua Sapphiro colorem similem continet: id oleum turbinatum est oleo camomillino imitatum (nam forte rosa aut flores forte aliquid olei probant) sed color a sole demonstrato est, qui ex eadem rougeum colorem cum oleo mediat

Ostatus fol. Dimissum plurium, color vt patet. fuit pa. 299 r. 2.

De Amantho Lapide sine Asbesto

Amanthus alumine fragili tham tam similis est, ut ex adulterine Ignis inuitatum auri mistum efficit, atque non solum vinum non potest, sed purius reddetur, unde assessit mirum quod dixit est.

Ait plinius amanthi duo, plumosum, tutie simile, at tale mantum, deinde pulueratum in pilo macerantur vt antea, ut quotidie per mensem materia agitatur sonetti; post mensem tollitur est primus fere quadrans, ut quidam minus deinde in clarostat: deinde alius atque alius quantitas

Frigide et Sitio naturo adeo est, ut crystallo, ut sub lingua positus sitim sedentium sedet, manibus detentus arata febres removet vomitus vomitos et sopit. gemot ebrietatem si satis magnus fuerit, sepius in aqua lotus mitigatur, vbi a manu exiit mitescit.

Crystallus in tenuissimum puluerem tritus at vino primo propinatus, disenteriam curat, at albos potum flueres sistit

Eum molle, primo aut ustulo exhibitus lactantibus, lactis plenitatem & copia a proprietate promouet.

Unguenta puluerius vino oleo admixtum vultum exhibentes: ex templo nitent eos quibus argentum sublimatum illitum est. Fluxum prohibent vasorum oleum Cristinum & a principio tangunt. Bezoar aliquot compositis, Galenus sumpsit et in vermam Expellit:

Crystallo rotundo appensus somnia pellit et peregrinos modotus

Ad talcum

Crystallus in pollinem redactus extandi facit ignis in fornam, at in aqua lapidum, enormes aut petrarolini, vim quatta pars oleo petroli aut sulphureum aridi additus extinguatur, id quo apud nostros reputatur: Postea lattaro optimo tuto effudetur: Postea lattaro optimo tuto effudebatur paulatim aqua pluuia, ut diligentior spatula ligneo mouetur huic lattharis effer quotidie manu et pestere quantum moderatas nuris fugiendis rapit potest.

Valet etiam ad omnes diuersos oculorum morbos. & qua tartari in hominum stuthones. & qua tartari in hominum vesicam, podagricis conducit, sinapi plerumque at rapidis noxis, qua robur confortat, asperimo conducit ni eum quantitas vino pari quantitate oleo resoluatur, donec bene fiat primo cinitiendi forma, eo mergitur raput puerorum oleum vt vino sanetur. ad tuba pulcrat. & scabiem & ulcera tibiae pestere pugnatur donec sanentur.

Si lapis est in aqua pluuia & lattaro solubilis, at exigua portione in aqua quotidie mulieri albo menstruo laboranti datur, mox sanatur.

Doalbatio Care Sit fill.
Reſoluatur terra in vaſe ſubtili; deinde
immargatur in aqua frigida: & ſit exhinc
terra ſubtilis et tenuis admodū follia arborū
& ſuper tabulam mundam expond ſoli; et
aſperga tur aqua: per alliuk dies. et
doalbatur ſicutt pānus. in oīm unguento ad
faciē in ſumonduū

To make Sumakes vayte waxe to melt
ſilke to hang hoſe &c
℞ Raſins ʒij terre ʒiij oxungie ℥ j melt
them: pour it into colde water then diuide
it & mixe it well. &c

To make muſtie veſſels ſweete
Dippe lymon cloute in melted Brimſton and
ſtrew upon the cloute pulder of rūmyng
& of cloues: ſett fire on the brimſton and
put it in the veſſell & ſtopp the Bung cloſe
& lyght not it burne to aſhes:

¶ delyghted m̃ doughtyngs
made my fodder my sleyghe

for wayte tyme Bandes But
dubble plate and putt it fitt for
yo̅ rant and let it a little to bigg
the wrappe the sides ouer on an
other and make them rounde and
bind them a bout wt a worde and
make yo̅ fitt and close to the rant

Then yo̅ must rut yo̅ Syluer
m̃ small peces no bigg̃ than
hils stroke — and lais it m the
inner side close apon the ioynte
and putt a little tynne water of
rasins apon the peces of Syluer

Then Solder the plate m the
flame of a candle and the rasins
will melte and the Syluer runne
wpon it is run it is faste

Then wasshe the smoke of the
candle of the out side and putt
it apon the rant: or stoure
it wt a route and sum Sande

yf yo̅ make boxes to put
m̃ spoones or other thinge

After Solder the bande: then mt
putt a square pece of plate a litle
to bigge for the ende: and m the
iiij corners stande iiij folds: then
take iiij litle peces of wyer and
make a hurte at on ende: put
that hurte apon the outer end of
the boxe and the other end thrunge
the folds: and so thrust them all
abroade to folde the boxe fast
then laie on yo̅ peces of Solder
and rasins then solder it ouer yo̅
candle So make it time m one
plate first then m an other whle
all be done then wt a paire off
Sceares rutt of the plate rounde
and so yo̅ may mak the rest

for ydalores bandes

Buy dubble latoy for yo̅ mat tage
rut them upon bande the edges to
gether wt wyre: then Sauder
together rut so much as need — or els
smaller and rost the brasse wt soddr
m the ioynte then put on yo̅ Sowder
in litle peces: then put on Borax
m puder a litle all a longe: then
laie it m Burning roales & blowe it
and yo̅ shall see it runne wpon: then
let it lie oute of the fier and roole
the stones yt remaine: apon a latge
is best wt a file: yo̅ may do it with
wt lotes brasse: yt must be made
bigger wt a file m a little latge

yt tymber holde nues that solder will runne and
holde ydalores bande wch Borax

Also yow of silid latoy
very fem will solder well as yo̅
may buy Silver solder at the
gold smithes waight for waight
it is iij pens siluer: one copper

wgte Solder is iij or vj
pens leade and one or twise as
tynne: a pece of an old greate
lande molded is the prised thinge
is opolent good Solder

There be other waies to do
wgte tynne bandes but theis
base and vnder ouonges

Both these Sorte of bandes must
be close m the ioynt as may be
but the wgte may be the vnder
of the leaves

a paire of olde Tailors sheres
will cutt both

The last lesson

Take xij crumbes of wgte bred putt
them to water rubbed ydalores
wch safferon: put it m a dishe
pun it wt a pestell untill it be
paste: putte thrise sugar m puder &
and pun it again (it must be
very softe) then put it m a cloute
box and hange it at yo̅ girdle

yf the water be rune from
the crumbes paste is better
yf fowle water, then paste
ydalores yo̅ paste

Note. yf yo̅ past be to stiffe then
it is not good: for vnles the finger
ogen ye pulle take some of the past
a waie ye will not turne it.

therefore make it so soft and
tender that yo̅ must take it out of
yo̅ box wt yo̅ sugar and hands
and put it wthout yo̅ trippes &
so rolle it and then gentle put it
apon the ioynt of the hooke: the
losse of the baggetts make the fyne
bigger the better

Take crumbes of wgte
bred and seeroes m̃ above m the
strange hogged yo̅ fishe: yo̅
must be liberall, and feed well:
and then they will be tresse must
past as a litle egge is ouonge
at large yf yo̅ feede them wt bread

A newe Inuention to take Forest 1632

a yong yreene peason, Boyle them so tender as you wolde Butter them: roast in Fleme, to Bayst with Salt and put an ayon yᵉ Hooke: when the Skinne is grone pulle hide the will not bite at them. but onlie wayle they be yong and tender. &c

yᵉ ruller yᵉ past vpon Sandbed or Boole, or Bed made in Sum places & fyste will byte the better.

Wheat flower water the yeolke off an Eyght and Pondes make them white paste but it will dere to fyste in the Sume.

a pot of white paste a quill

Wheate flower, water, Salt, and a little butter, is good paste

a pot of white paste a quill

The best Hawks be of three or my Hawks of rant on Bigger than the other and raysed it in a rase. the Hed may bed xij foote longe.

pryued wod is best for trappe

fyste wᵗ a small line vpon yᵉ past iij Inches at the Hooke a quill and Skinne of the Hart trapped and Leather Hawke Hawke Bonds but they muste be gathered in winter & kept to dries: they will Stande rooted or else they fyste passe a Hawke bond

Hawke Swannes quills thrust one into the other: that is Hooke in Downward & ij little pore shut off put on the quill. to yᵉ end the line no lat yᵉ quill be of a reasonable longth and Eignes

Hawke yᵉ Hed on yᵉ line & not a yon the line be covered the quill is Hanged & purged from the Hooke is Hanged

In a still water yᵉ may Bayte for the ground maste wet in the water in yᵉ Hande and throwe in: but in a Ryuer or Streme yᵉ can not do soe. and there where the water is Deepe the Fysh vsuall the Shoue & where the water is lowe for ofte the Floed.

In Aprill is the Hawke Feeds is best Fysinge of all Hymes

Fysh with three Hookes of the ground in Stearne and Hyester plume the depth.

and be Fysh at passage in Stearne is best that is Stand & rast in yᵉ Hooke vpp the Stream and let yᵉ Hawke Downe so fast as yᵉ can walke: and then Hyste in yᵉ Line Fysh Enough & it may Smoke

Hoss worme

yᵉ worme must be vpon right ground a Hooke or Hyer a bouche & lie still and then yᵉ must Hawke a quill or a Hooke the Hooke must be longe and put biggest into middle and ground stick upon [illegible] a quill Hyrust Hyrough and then put Hyrough & not to longe about the Hooke the Hawke out of the quill Downe wards to Hyrow vpwards.

The best water Hooke is that upon yᵉ Hyes: that is one inch of bige Hawke the Hooke put Hyrough and & pluck hard & then Hawke to Gether

rast plume the in a roffm of Hay and put upon a small Hawke stick and bow a hole in the toppe and Hyrust in a quill or a Hollowed stalke.

Boyle roaste Hawke yᵉ four water drink or milk and Fysh with the quilles & be rowdred & [illegible] bought yᵉ the other for yᵉ may rast plumelle in clay & Hyrstinge a mosse into the clay and stubble Hawke stick upright in the middest to make a Hooke for the Hawke will of & so Hyer is a Hawke

water yᵉ Fysh yᵉ Hawke worme make yᵉ Hawke of Silke and Hawke as my Hawke and Hawke Silke twisted & Hawke or my Hawke and in silke and at the Hooke of Hawke & my Silkes as I will

water rullers Hawke

my Hawke Hawke & on Hawke and yᵉ fingers twist the Hawke in the midest

Tobe drye ℔ ℔

Take the greatest Toad ye can gett
tye vpp him thrughe w^t a Sharpe
sticke and pynne him fast to the ground
then w^t a Wollen Cloth take him the
legge vnder foote and rube a sharpe
pynne rutt of the Clawes and gristles
fast on: the first and the laste bones & are
eyther

or ℔ ℔

Cutt a dead Toade in a Boyes fatt
of Hoggs and fatt the Boye into An
Ouens hott and the fatte will drawe
drawe the flyes & draue the bones

Cutt either of those bones and
the string to the Arme the Cocke
and the taile and hold the Cocke
contrary ways upon or sides and
he dare not run fight fall neare
and the after will stopp presently
I haue proued it 100 times ℔ ℔
the fatte out of the gristles & the bones take home
& keepe.

I read tolde ℔ 1618

Anent the tooke against the sawe
tooth in the Gnats of an Adder &
it Polypus presenthye I had tried
him in august 1618: But I wold if it
please god & vnto it worthy

ffor the tobe argo ℔ ℔

Take allom 3i long pepper 3ss
in finest pulder mix them well

Set a cuppe vppon coles
and a Draught of ale the cuppe
must haue a voide mouth: A
Blark beetle) put in sulfe
ye pulder and so must fume
as a Cockatrice Beetle or mole
stir them well to gether & lett
them Boile:

Then haue ready a little linnen
clouth so long as a finger put
them into the ale: and straining
forth wt a tosse take out an and
put into the tothe that ake
hang downe ye head on on side
and regard that clout is tooke
put in the other two do halfe
an houre to ring on clouts in
the ale the other in the mouth
the rest ye warme and to bed
This is most heroe thing
and I haue vsed often good
for one neuer fayled ℔ ℔

I read the Bones of a
Cinophia an Indian Bird
Buffons: Backwarde is Hyaena
write it Cinophia:

Dolo 3

3 vitrioli et dissolue in aceto fort in
patella, adde mercurij quantu vis &
decoquatur, et in mortario rube exactissime
in Amalgama: de alio Amalgama
pone in foramina dentis et digestat
strutt caput & valet in omni fortunia

Ad idem

Wasten neyther by expulsion by digestion nor purgynge will kyll the humor but that yt must be opened & broken then doth yt drye an ulcer or sore. and beyng not well cured vnto doth continue longe before yt be cured And many tymes turne vnto a fistola.

I shall therfore the lenger good for to followe my intended course for the maturation and the more of sure & assured humors of will not be expulsed

And those bee the tymes when the Corde is pulled runninge vomiten de rall taking: rose, roysell, black, or red fourde: beyng in dead nothyng but humor settled in a place, & will not be purged, nor cooled, because yf I shall putt thyrre scatteryng ayre moste to them and so suffered the humor to gett a ripe and therfore must be opened, and broken & so cooled. wch may be done by pultesses off sundry sorte wch must be applied hott & drye that the ache be greate paines or by other meanes off Maturatyues or dyspersyue medycynes

The first I did not loue but in tenuy hated yett because I see yt to bee a torment to the sicke & perhaps bee done yet I did finde many excellent pultesses as followeth.

A Pultes to assuage swellinges and take away payne

℞ Spryng water li iij Smallage mallowes and M ij roote them small and boile them well: then ad oatemeals and lynseeds beaten small M ij or M iij pinte and a little red wyne a yelk and almost so much milk from the cowe stirre them well by boile them and strayne them vnthill yet bee thicke and applie yett hott as may bee.

Alliter:

℞ Mallowes M ij violet leaues a fistfull ij. roote them small, then boile them in the water wherin a pullet was sod and thicke yt with barlie flower then ad yelke off egge ij mr all well and applie yett hott

To assuage greate swelles &c

℞ two fether foile, red sage aña M j or M ij roote them, then pun them small; then putte them into a pan & put them all to gether: then take oatemeale and milke reddy boiled & put them in the swelles and shift and eat them softly vnhill yt bee thicke and applie yett hott and dry iij swelles wherin hott & laye it on hott

Mrs L.

Pultesses

Mrs Travers Pultes in Baronetta.

℞ the leaues of the greate spurge M ij the leaues of wylde cittles M ij. stemmed & ye beaten small, Sweete creame milk and qs. boile it vnto a pultes: and being made vnto a little eyle of roses. But yf it bee an vlcer ad oile of bay & putte a little applie it hott

And washe yt wt hys water

℞ parsley leaues, Bayes leaues wax violet wodbind & planten aña M j boile them well in Running water then streyne yt & boile it wt wheate flowre & Allome & wash the sore warme

These are excellent

For Swellinge or Bruse:

℞ the grounde of the strongest ale a quarte of Smallage mallowes and Brake lynt aña M j roote them small ab mayd bee. then Boile them well & strayne them by little and little ote-meale or fine wrought Bramne & being hyrte applie it hott

Alliter:

℞ Otemeale greate, Bruse them then sethe them in milke vnthill yett be hyrte like pappe: then ad sope suet and boile and stir them well to gether and applie it hott

alliter:

℞ the grounde of good ale the grounde of Bridwell loue wodbind boile them & stir them well then spread it on a cloth & applie it hott

Against Inflamac:

℞ mirram pulu Siliquimib. q. uis pond in olla, adde rennisam: Bulliant my donec fiat pasta, extende super pannu de lana, et frictide applicetur et bene fastrete. resolvit vuborem & inflam

for impostumations

℞ Breake eyne li mutton suet li three yolkes of eggs small and put them to the suet and boile them vntill yt be redy, greene then ad Sallet oyle & aqua vite aña oz iij stir them well strayne yt: anoint the sore wt the liquor and bind the sorebee hott to the plase ab possible yo can. & lett all on hott

for a ring Sore & pultes

℞ Lynt seedes and woormwood aña the weight Bruse yo seedes in a morter, then yo woormwood: then boile it well in the beaten then take out the sorebee & put in the lynt sod & boild it and stir it vntill yt be thicke & stopinge lette vnto Bredly wt & your woormwood being small punned in

a.

H. Pultesses

m a morter and putte hym hymself and watter: and boile hym to gether. hym putte a quarte Bramt, and Bawdrobe ℞ greate. q.s. and stire hym to gether and ꝑ gott ab may be suffred applid gitt

ffor the same :-

breake it presently

An infallible medicine & ¶

when it is gathered vnto a head and
is almost ripe open yt wᵗʰ a knife
for it is better then lobing when it
will breake especially in Bubo. But
more safer yͤ rust yt moderately and sole
it with Bassilion: & yͤ may temper the corrosiues
oils of vitriol on drop vpon limbs after it is
open & then apply a limbe with a drawing plaist
on the hipp as dragion tu gummi: de minio &
mollibd

I haue knowne sum lie by day or two
vnder the roote Bubo & yͤ did
not breake it

Bubo is an ympostume in the
flanke is bigg as a Swannes egg
and is gotten of corrupte rooms in
many tymes is of diuers colours and
will stinke when it is opened

After a little kept mugg I found
it best to open them with a knife &
tente them & not to
mundifycat them and soldr
them as other sores with maturatiues
it is more safe to open them w̄ caustick medicines

After wᵗʰ the skin is burnt yt
is far better to open the boyle, bile,
Bubo, or ympostume then draw the
washers: for hereby the paunt is much
abated and eased

Before yͤ putt it anoint it with
oile of roses iij or iiij tymes and after
it is putt yͤ more anoint it also

Beware yͤ eat not pullone or
ratte flesh for they must not be
touched nor anye thing yͤ instrument
yet on may taste the Ointment will break
& sooner A cataplasme to vpon Bubo

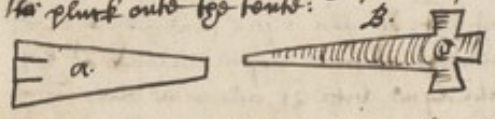
An Ospreall Roote ℂ ℂ ℂ

Not long after I had written, this before of fistula: I put my yard tent, into a plate, on the toppe of the knee, and into and a halfe deepe: upon twesday. 1. of xber 1612. and yt was friday, xj of the same moneth; before the ostar tamd out. I took notice so shrunk before, and found I note itt: Be not to hastie therefore to pluck out the tents:



a. is a pece of a plaster rutto. voidyd to make the tent off ℂ ℂ

B. is the teynte made forked otherwise y^e fingar and the thumb and iij ends that are turned of to stand at the mouthe of the sore to pluck it out by. ℂ ℂ

The tent may be made affe Lint twysted harde but I better Like this. and vsed non other ℂ ℂ.

Jesus promtly facit. deo gras

vide pa 30 & 2: m: g 4 Scorpioll of

To scale a fistula

4 the Horne of an ox or Bull for a man the Horne of a Roe for a woman fill the Horne with Sope and putt itt into the ashen pott and burnt itt to pulver the mingle the powder with the Sope and the with make an ointment: and make a tente of the pore mans salue & fould itt in this ointment and dresse itt so twise in a daie vide 59 in fine

Astonwarded in the yeare 1613 my tent drue among mee in the bosse of the hand being followed upon I used a quill w^t quick I roundedd and with my plaster & plastred yt so open upon the edges that yt did so close as might see. then did I strowde it w^t salue upon the toppe & so it in all points as before

ℂ ℂ Sumtymes I sounde it good to cleane the little ende of the quill & upon the plaster must be turned into the Quick. at the lower ende

ℂ ℂ The mouth or greate end of the quill may be rutt w^t a Taper or a knife into viij or more or les peces to lie as close as the tente

ℂ ℂ y^e maye put on the plaster upon the quick with glue yf y^e will and slitt the quill and turne 3 ends so small as y^e will

Breastes and fistulas differ sumtymes in theire healinge. and ye heales the Sores in breste as followeth / vide 103:

¶ When breste begin to be sare take an/applent plaster ¶

℞ Red lead m most fine pouder li j
of oyle li ij put the bile into an erthen
pott and put hereto the red lead & litle
and litle still stirringe itt and stroe
yt so halfe one pounde. then set itt
upon a gentill fier of coles and when
itt offreth to arise then take it from
the fier and stirr yt well: then set
it on the fier againe until it arise
then take yt of & stirr it the doe
until it be a Salue being dropped
upon a table dries & doeth Blatte/

Put Lynen cloths in hot and wet
them well then lay them
in a pott bordes & strowe them all
a broade and being wett in feire
water stirr them no a litle so
stopt upon coles / & make the pott
of the Salue / m Powles churchyard

Cut a plaster / so bigg as the
brest and rut a hole for the nipple
and laye it on xxmj grodes then
take yt of and warme it before
the fier then streame it / mollifie
and rub it as before then smoothe
yt wt a litle stone and stirr no
the other side & this doe until it
doth of peell for so long it will
do the good / then yf needs bid lay on
a newe plaster.. ℞ romonlis stroed and
Colde of this plaster vsed
in lyme water & salt anye the brest
wt out anye other / he may as often
often proue. made in letter plaster
and so proue them.

Yt will breake them & sodde
both yt nott, dissolue the humor
and being broken, will heale it
wt out anye more adoe ¶

Therefore note this in the beginninge
when the Brestes weare Broken, before I
I see them: then I took wyne vineger,
a pynte, and therin boiled Mirrhe ℥ij: m
fyne pouder. This wyne & I did sprinkle
in wt a Siringe: to make the bodies
redarre. and then touched them: wt longe
tente, as needs required in and stroke

often proofe put nere from tenting
any Brestes the plaster alone doth 29
it perfitly & well wt out tenting
Looke in folio 103. better instructions hereof
founde by proofe.

When Brestes are Broken and fun
or rodnighe to drye them vpp
and put them to healinge ¶

℞ A dryc harde white turde of a
dogge that may be made into pouder
fine gitt fynelie. put hereto of Redd
Sanders or synamon or bole of
both rubber and the taste good salt
a dragme. ℥ß. at a tyme fast night
wt beare or ale warme before
noone muste he goe hyer or iij dayes after
it wonderfull strange in stopping
the fluxe of Breste & pb. reuised

Then did I tent them wt ¶
℞ Terrestris lij deard sucke roote &
fry molt them together then streame
them and putte the streamed salue wt yolke
of one egge & j ℈ fine honie / whill they
be well minged of this make tente like
unto a rowe of pinaster apo tosh/

¶ Then drawne the breast all dower
wt this pile of Walldoes ¶

℞ Common Walldoes or garden Walldoes
iiij or v oile lij starche yo malloes so
small as ye can then putt them into yt
oile & let them stande in ye sonne then
barke the stile and malloes in a double
vessell (i in a glasse set in a vessell of
Sothing (water) whill the oile be al
greene as grasse then streame itt and
keepe it this mittigatinge pinne & doeth
temperate the plaster / this & makes my
grand mother / I vsed this oyle of malloes

upon the topp of all Layd hers
dataplasme ¶ ℞ I left them

Dry stitchinge of woundes.

When there doth happen greate rufte in fleshe to shed as in the calfe of the legge or shine, lurke the moutches and dogges of the wounde will be very wyde so that yll will be very longe tyme to fill them with fleshe: then drye stitchinge is extreamly good and greate ease to the partie and further wyll the healinge extreamlie

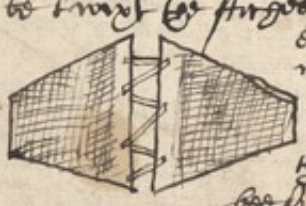
ffor in stitchinge the fleshe in the a greate wounde the skin will not folde to draw the wounde to gether and if yt doe yet yt will not folde long enoughe to be healinge.

In drie stitchinge ffe and after observed yett that the reaule laide on for plaister should be verie square and that the will fold the better.

To drie stitche withall CC

Take two peces of strong lynen cloth double them and cut them after the faeron of the square, and let them be longe and bigge enoughe for the plaie then.

Take good barpenters glue that is verie good and strong as ye can gett C and molt yt and put gitt upon one side of the plaister (but not neare the dublinge) after cruse all over, then put the pece to gether and a stitche stone rubbe it gentlie and smothe yt. (but put no glew upon the one side then put glew upon the under most side that is plaine) rufte and pelure the on above and the other under the rufte. then I must bind them fast on with a cloth and let them drie. then the next morninge stitche the cloathes with a double strong thridd and draw it gentlie to gether and strenghe the thridd draw the wounde or the muscle the stronger.



the edges must stand no glue because the needle will not bee thrust through it will bee so hard CC

This kind of stitchinge will holde verie fyne and not let good: yet it will do harte att all unto the wound as I have often proved CC

CC when ye will take it of Put some warme oile under on plaie and so remove it a little & little

℞ drie stitchinge

Take Dragaganti, Sang Dra, albam Sercocell, mastick aña ℥j figge Dust ʒij albu ouor q.s ad mixt pranda

Allter

Take mirrhe, thuris, mastic, sang Dra Sarcocell, pitte, milduste in pulder mix them with rogate of Egge

Allter

Take rogate of Egge iij rogate frankinc ʒij gum drober to the in fine pulder then mix them with the rogate &c.

Allter

Take rogate steepe it in aqua vite ij or three myghte then poure away the aqua vite & take the rogate to gether then Take ij fleshe grammes rufte them in fine pouder then in vinegr or aqua vite on myghte & stirre aña pour out the liquor & beate all to gether wt a stirke then ad pulder of Sarcocell a little rose heb for it will holde

A noble man

Take Strongo greate pinns wt greate greate to bende heades or Take good strongo needles and put the edges of the wounde to gether and thrust one pin or one needle strong betwixt bone and strongo thred bind it faste aboute. then put in soe many more as needeth, and bind them fast cross: then cut of the ends and pointe of the pins & so dresse them and scale them:

Dressinge Mr &.

Melt ffine grea. with litle colle and dresse about the wound and let it drie: melt the stinglas & apply hott:

At one stitche CC

Take Sang Draconis, Bole ueni, terrae, mastic Sarcocell, farina volatilis aña ʒij mirre aña ʒij ℞, sandrach olibani, masticis, mixed aña ʒij ℞, sanguis ℥ss lapis hematitis ʒi ffe pul mix it the rogate of an Egg spread it on a cloth &c

℥ Oile of roses li· of the roote of the herbe alcanett ii grosse or fine powder weight yͤ weight Boyle them vntill yt bee verye redd the redder the better. then straine yt and keepe yt. Alcanet ℥ß

Putt this warme into any wounde and wett lint therin and laye upon the topp of the wounde and vpon all a plaister. dresse the wounde at the first vnte in 24 houres after vnwrap the a deale this doinge so to vnclutt make yt vnte dressing will heale wounde

Oile of roses healeth best straight of the tempter: Butt Sallet oile will heale very well: and Sweet the wound oyle before made wch thexation or any of the Reliues being rubbed wch alcanett verye redd the redder the better

℔ For wounds in the head the Oile of terebintyne is best. wherin of the berying quickned yt hath in it

℔ For parts of oile take mayd buttes, capons greace, goose greace goose or hens greace, Bauzins greace or sheep Lignid being fresh without any Skelte and putto ℥iij of sheep greace wch alcanet ℥ij in powder and boile and stirr them vntill yt bee verye redd

℔ All these must be put into the sore or wounde verye redd and verye hotte so that yt scalde nott ex Andr. Braun pa 350 & 36.

℔ This healeth a rutt being dressed in Sherrid in verye sharpe sharpe and in hemorrhoides deepe and narrowe. I vsed itt as followeth the

℔ I had a pipe like a glister pype but fare lesser wch pype I did putt into the hemrist, and so farr in as I could: then did I putt the warme oile into the pype at the biggar ende: and turning the pype vnte gentlie the wound being rensed, gentlie the hott oile would goe to the bottome: so that a pipe of iij inches would dresse a wound of iij or iiij inches deepe wch the paine of a Sword pike, a poynard, or Rapier, or any sharp thing. and yͤ need nott wynd in the pype aboue vnte or ij at the moste. for wch gentle rolling the narrowe wound doth presently glue to gether wthout anie more a doe. As I haue often found doe God I nowe see and vse it here but my selfe ℔ ℔ for I found the Syringes to hott

lxxi

the pipe will stop in the nostrill or in the bottome put in a tuppe or tunde tuffe to restore itt pa 36 in fine

The rauenous I gott a wad pype wch for that an instrument of mettall would burne the Sore and so offend the pan and vnder the healings of the Sore as I tried verye often

many Surgions wch this haue vnwares stolne at first frome me yet they shunn it in wch a Surgeon (and I refuse that) and vent it, not wch standing the balme and keepe it long in digestion for drawne non of them finde the true vse of itt

℔ ℔ In a rutt stirred to get out the Oile warme and gentlie rensse the wounde that itt goe to the bottom.

℔ ℔ This will not arnate also yf yͤ put in the oile nott to hott. but yf to hott it will finde the grinding of the flesh exceedinglie.

℔ ℔ I am perswaded. God neuer did geue a greater Blessing vnto any thing for mans relieff in wounds then hee hath doone to this Alcanett: lett this suffice & thanke God for itt.

If the wound be nott stinging but be at a reasonable bigg bignd may good in then open the hole as a Sarde tents as in fistulas pa 26. and plucke further vent againe and fill the wound wch the Oile warme by dropping and rensing into the wound that the oile may goe to the Bottom and be filled full wch the oile then wett lint in the same & warme layd it upon the topp and ow all a plaister.

In rutte and clitte that be not stirred to get them fill it not lincke yͤ is wastfull in the oile warme and layd the vpon a plaister &c no more

And yͤ may nott the rutt wch the Oile and put in sum Incarnative in the wounde wch lint and so rense the yong flesh

℔ ℔ All wounde healed on this manner do heale stat in quo primo: they are as quicke at the stemming as the first hyme they were dressed as hereafter I will shew yf itt please God. ℔ ℔

lxxi the tuppe must be in wsten seed at the bottom and put a rounde thy stoppinge But a probe is better vide pa 26 in fine

Broken Limbs

Smear ffor wett the last medicyne upon the outer side of the pin paper & bind the same with the paper formde as followeth:

How the paper is painted

The painters bind a blue rullor with their raule Linnen and that ground is water and tempred with a weake glew is laid on the paper and (when) blue they blow upon it is done: I see them do itt and knowe the rullor and bind is done almost halfe a yeares: But what Linnen is made of I cannot yet learne:

CC. 2 The know manner of Dressing the broken limb is this.

Let the patient wett the paper in his owne fasting Spittle very well: & lay it on bigger than the sore, and let it part let it stick (for it will not lightlie fall of) and take it not off but as the sore filleth w^th matter and a crust ariseth under the paper; you must rubb out the matter gentlie with yo^r finger upon one side and let the paper stick still. and as it falleth the edges will rise upp: & the rising by the sides must be cut of: but of the paper bread upon the sore: upon cut or a new paper wet as at the first but of a new fasting Spittle: So that to morrow or my papers shall lye layes. And upon it is wrapt up a little of the paper will stick on still: let it alone and then I never knowe by proofe to bee true: Deo gratias

And further yf there be an hold of a plaster lower than the rest. wet yo^r finger yo^u must thrust downe the paper as it doth stick on:

A Sanatyue for all wounds

ℨ the leaues of Daysies, woodbind, carpus, planten, Sinquefoile, sorde walter: sorde robert, wormwood, clouds all equall, eyebright oppenglasse & pauncies: or most of them and a ℳ j stampe them we may butter: make them in balls: let it lie right xx daies the sonne & then drobbe and boile it well & streane it let it cold & keepe it.

To heale a Sore

ℨ plaunten, wormwood, Smallage, sorde yue sorde walter, Bytony, pauncies & sage and ℳ j of woodbind leaues ℳ in stampe the and let them lie as the other next before them boile all, streane all into a bason of sweet water & upon it vs rose & shreed it of: dresse a sore wt this. upon linnen the mydle: and in the sore apple this ointment. ℨ Hitmy li j pulu^r great ℔ j Boile them with it be cold: lay on the in the Days. A plaster to dry and heale CC

CC ℨ Sallet oile ℥ ij ℔ yellow wax that is ℔ j and, Strutt, litharge of gold, and fluor, pound turpentine and ℥ iij. melt yo^u oile and wax: the for in the pulders by litle and litle & boile till to a plaster ℈ d. then put in the turpentine poure on a cold stone & make it in a roll: CC

hold. 63. r. 1. 1 To drye a broken shin

when time serveth into dry the fine pulder of flowrs Sulphure or of roman Vermyon CC

Broken Limbs

ffor was much troubled w^th Broken Limbs & it was that wch first made practise thereof: gery unto the healing wherein I used many practises as appeareth in the Books and ofgood.

first I used temple Douglas pa. 51 the Strong Salue: wch I did apply until no Sperke of blud did rise upon that plaster changing it 8 d. 24 howers: then I laid on the same plaster and under boile it of that it was all wasted: & that then added my turnes

after wardes I was taught to the right plaster pa: 79 and so but that was trobleshm: wch I will it shall do itt yf the report be it must be washed as heare & shard to w^th Allom water & yet will do itt in time

Then I used the plast^r pa 62

ℨ Sallet oile ℔ ij

Lastlie I found that all broken limbs were bruised and pulld the bruse was taken away they will not hold and then I used this

ℨ the plaster Henrici Mylor pa 63 and Spread itt then and lay on the broken limb and draw out the bruse: & let the plaster lie on or ij howers. wrapped: then applie the first plaster pa 62. ℨ old yo^u being the last plaster & the dredt tollume and applie itt and the thing it onto w^th 24 howers at the first: and after let it lie longer

And wash w^th this water

ℨ Lamb water like Sugar m^r pulter ℥ ij allom ℈ ij all in fine pulder. put them in a glasse: let the glasse m^r and water that the allom may dissolue

And when it beginneth to dry lay on the dry Clark paper ℨ. vj. Sallet paper the other side & bind it fast

the bones will heale a broken shin the bruse taken away:

Vnguentu Auxorum Sanatyue

What a Canker is and wherof it cumeth.

The Canker cumeth of mallencolye and dothe puffe or swell with hardnes, or elles rather it ys payne and greefe and an yll sower & sore most vehemente fleshe. Brymmes turned backwarde, lyfted upp, knobbie, of a wanne or blackish ruller. The cause is putrified malancholy humor with in, rysing into sum membar. or ells of sume bodyly or other cawse that ys ded.

To kepe a Canker from a Gangrene.

In the beginning a Canker is harder then any bile, burninge, and greate greefe in the mouth, and in tyme will prove unto a gangrene. The Canker is not so full of payne, but is harder, and dothe not so sone greeve to a gangrene, but freshly wasteth in the flesshe.

For a Canker wherein is dead flesh.

Take the leaves of wodbinde wash them not, but put them and stampe them with good white wyne then strayne out the juice (for it is best it will not strayne well out the wyne) take of that juice and of rhasis red gumy and boyle them in a bole the juice be consumed, then take it from the fyre and it is good for many causes in Surgery and especially in stinking filthy sores as in other place I have written. Item for this cause take in Sorel roote.

An Cantrum Gangrenam

Take salt gemme & pulver tostary mixed asshes of the pond rautrum ustum

Aqua ad idem

Take of rotten of talle fat ana ut bulliat: & liquefiat Alumen plume in alio vasse & cet exit ut aqua: tunc pone in arotro bullientis: & fac in cet & vtere.

For the Canker

Take rose mayne, alle gladi, thistle gorne and comon Salte, burne them & let them sholde severally, then make them in pouder and mingle them equally: then take wodbinde water plantein water, and a little good vinegar and therin put the pouder: and to bathe oftentimes the canker often.

For the Canker and fistula

Take the leaves flowers of Salt baron burne them make it into pouder, then wasshe the canker with rosate wyne and strew on the pouder and so for the fistula.

For a Canker in the lippe.

sall peter: Take the destilled water of wodbinde and dissolve therin Salt peter. q.s. wasshe the Canker therewith. once or ij tymes enoughe to heale it.

Canker in the nose

Borlis stald alle and stem it therwith: then put therin lisse stummy and allom & roaste them together.

Emplū Nigrū rural Cantrū & vlcr tantrosa

for the Canker

Take strong vengar lij, put it into a glasse put therto so many grapes roasted as a walnut & let it melt therin & wasshe the Canker therwith morning & evenings

To heale a Canker in the body or mouthe

Destille gumy Sutelle and to that water put a third parte of rhasis red gumy mix them and warme them a little and strue in or 4 sponefulls warme first and last and fast after it a good hyme, if it be in the mouthe wash with litle after hymes.

The Canker in the body

Take the roote of Dragons cut it in smalle peces, dry it and make it in pouder Take of that pouder 3j put it into white wyne Borlis it well and wash it therwith morninge fastinge or after if neede be

Canker in a fomite

Stampe the roote of Agrimonie so it good gumy and plaster wise applie it, and change often times

To heale a canker

Take a portion of leaves Baton, Burne it to pulder: wasshe the canker therwith white wyne & rost on the pulder

Aqua mortificans Cantrū

Take Colrom piscium & pone in aqua pura et fit fiet x dies, tunc cola: postea aqua pone in vitro: & Sulpheris pondus et liga in panno forti, pondo in vitro ita ut non tangat humid, et roquatur in aqua pluvia ad ℔ j: si aqua sit nimis rubra appone alumen pleni aque & roque quousque sit alba: extrahe Sulpheris & mundes albam, studia qua tu istis mundificare quid voluerit

To heale a Canker

Take viuj, auripigmenti, alkali Gutrary, tartari ppti aā, ana 3ij terantur & in aroto fortissimo retinat per iij dies: quarto die in igne roboretur & in impregnato bene obturato vitro reponatur in ij partibus mortificat cantrum aut fistula: for the canker

Take durpigment, verdigreas, salt gem, earth from Burnt, harts horne, marl, bones many dayes pulle of scarlet all Burnt, Sangdragon, tartar powdered lyme Black pepp, grind all in pouder fullers earth, old pent sacks Burnt alum and of allom glas dubble so much in pulder: first wash it with salt peter & let prime water and salt tender in thine and rost on the pulder as was written before. Item for the Canker & wart leaves that is Horsleekes Burnt

roast the canker with white wyne warme & rost on the pulder of Mirrh. & Garoll

for a sore breast yf ground swall & Daysies ana stam & straine them & geue her to drink first and last: then yf Sendie seedes ℥ij rubbis of a mastyf ℥ij drie figge iij, thumy & vinegar q.s. fe Emplū Note the more figge hurn and seedes the sharper the medcyne: the more Bred and vinegar the softer. Lay this to non but sure

Brestes

as haue bin long Sores: yf snaps ℥ij fici iij, mellis ℥ij arch ℥ij pamis ℥ij rotunde po

24 A sheepes head the wooll on & all Boile itt in faire water, a good quantitie three or fower howers then lett the cleare water run through a cleane cloth, and into the cleane water put in of cleane vinegar so much as will sharpen it unto the sharpnes of a sharpe pullis and vessell it is sharpe enough take it from the fire and strayne the yolkes of Eggs & hemy first beaten verie well with a Spoone full of oyle of Tammomill and mix them well all together. Then oyle his pultes verye warme but not to hott all over the sore being spread on a fine cloth with a holes in the cloth for the nipple to stande in the plaster three tymes in the 24 houres so that it may rise of wett and morning & not one in anye wyse. vide 184.

And whereas the breste is broken then you must have Goates Dunge dried very a gentle heate, and made into fine pulder and Tersed, and mixe of that pulder with pure Hunny but not made to hurt if the Hunny be hard then melt itt before you putte the pulder so that it may bee like a Syrop and liquid and make a plaster of the Hunny and the pulder with a Lolt for the nipples and so dresse it morninge and Eveninge that is twyse in 24 houres.

But you must note that Goates Dunge vide 102 in fine
in anye wyse.

If it so happen that in healing of the breste it groweth harde or doth then putte or Swell then you must aplie the pultes aymed: and when it is first broken you must aplie the pultes three or fower dayes after before you laie on your plaster of Hunye and Goates Dunge.

Who did stand by Sadie Killigrewes breste when the Surgeon failed of seeing itt & the breste sonke downe in to it: and she that did heald itt had an hundred pounds for her tender. vide 184.

For Sore Breste & rotten Nipp

24 fresshe new made Goate Dunge, putt it in a morter grind it with pure Hunny, then Boile them pull it so verye hotte like a plaster and applie hott warme: this seemes as good as is the pulder

After xxx or xl yeares practise I found that the often changing the plaster did hinder the cure, & then I changed itt, onte on euery fourte dayes: and when I did it gratis one dayes or vij the dayes and hir cured it better in my mynde & wt iij or iv plasters finished hir cure

Take two leade in fine pulber like and Serve it as Pisle. li. So that Lake Eore must leade ye have, you must have double as much eyle then put yo oile in hott you must to boyle itt in then put in ye lead by little and little vntill it bee all in then stirr itt all to gether the space of almost halfe an howre and the best hemy to stir it with a great no other stuffe so big as a mans thumbe the Lead being upon the stirr: then sett it on the fier and when it doth begin to rise; take it of the fier and stirr and it will change into many rulleres: But when it doth burne black itt will ready straite & dropp sum of it upon a cold sawser and let it coole to see if it be sodden enough or nott and when it is soe boyled wett a rib and take of a stone if cold, cold and make it into lobs: or if yo keepe it for yo dores use powre it into a stone pott & put it onte as yo needs: but yo tarry itt make it in lobs.

But a peice of the pot leggs big enough to rowl all the breste and spread on the plaster & leave a hole in the middest for the nipple:

when yo dresse itt anoint the breste with the oile of mallowes warme or anoint the plaster with the oile & warme it and laid it on

Let euery plaster lie on iiij howres or by doubt that it may worke & then renue itt: and at euery time anoint with the oile of mallowes pa 29.

And when it is nipple let the plaster lie on to set if it will gather againe or iiij dayes:

In pa: 319: yo maye reade what mischeife doth arise by often changing the plaster & letting in cleare

the wordes in are blotted & powre it out

This is written before, but that I am sure this is Excellent I wrote them together

See pa. 31. l. 1. for Rose steeped wyne And Rose and oile of Violette

wch should I not Boile Rose in white wyne and make the pulber soe: as well as in the water of a seeth pot studs: my mynde you see not it must needes do well

Goate Dunge in pulber mixed with pure Hunny applied warme helpe sist. rather. & dewnely out filth & rottenes pan & swellinge:

or Rose in new milk make it herbe enough as oile of violette &

ffor pymples in the yeard

℞ goose greace and wooden flour mix them to gether and therwith make a plaster: and apply it wch medicine is good wt hot and cold water change it often

And wash the postumes or pimples are turned into quitture with gentle diuretique wordes and scour the yearde and sprinkle in the warme vapour of Goats milk.

If the yearde be sodden

℞ the leaues and tender croppes of wyld hyssop pun them and boyle them in wyne and therwith bathe the yearde and let it lie and soake there in vntill the Swelling be yeoned.

Or elles

Champ Oynons & penny royall .i. pulegium veneris together and lay vnto the griefe: and it may abide upon the Ulcer verye.

.. CC If the yearde be rankrood

℞ Swynes greace li. powder greace in fine pulder ℥j boyle them to gether and therwith anoynt the place de laubit or not plagette the lute.

Beware ye wash not the ranker wt water but wt wyne or vrine: and rast theron the pulder of Burnt Salte for this poulder killeth the ranker in the yeards and in womens priuie membres.

If sweat be pimples yeatt will not awake wash them with water and Soape and let them out and put on them the yolke of an egge and salte: and seale them wt pulder of mirrhe, aloes mastick & olibanū

To seale yt comy wound

℞ Beanes boile them in water & salte: the pluck of the gulls and wt the pulders of mastick olibanū and roseus and the paste of the beanes and rose water make an oynt ment & anoint therwt.

for a postume in y yerde

℞ Pils off rose prolotte and of mandrake & ad bonigax mixe them well and therewith anointe the yearde And

℞ plantin, daysies, Sorrell, yrond shrill aña pun them then putto y womans milke and lay them to the yearde

And wash yt with the water of Ellarne flowers and that will seale it of yt selfe

or dissolue vgnto rose water and wash wt yt warme

If the yeard be burnte

℞ a fine lynen cloth burne yt make it into pulder anoynt the sore wt oyle of Egge and rast on the pulder.

ffor the same

℞ Herbe Robert herbe walter & bugle aña M.j may butter ℥iiij - put ye herbes small then purme them wt the butter then put them into an erthen pott & presse them downe that the air lie not hollowe stoppe the pott close and set yt in a moyst place .7. Dayes & 7 nights then boile and streine them & wt the anoynt the yeards and it will seale them.

ffor the same

℞ Lynd seedes boile them tender in faire water: then pun them in a morter wt rosyes smot: then boile or fry them to gether and as hott as may be shifted rownd yt about the yeards leaue them a hole to passe out att and let the plaster lie the more hole att

ffor the same

Boile roses rownd and Rosemary & allom to gether and therwt wash the Sores Diapompholigos exlt in virga viridi

ffor the same

℞ Blatte Soape and anoynte yt therwt. then wt oyle of roses & sanabitur. Or

wett a linen cloth in warme ale of Roses and anoint the Sores & laue on the cloth.

Dia plana for the same

℞ oleo ℞ chamomille, ol Rosarum, aquo Rosar ana litharyrin auri pull q/s. Boile them soft & salue

If the Stem be off

℞ Plantin water, woodbind water, white morell water, mel rosar ana allum robust pa[illegible] q.s. ad consistentiam ung[illegible] & sanabitur.

Off the yearde

To heale an Extrossens of flesshe growing vpp in the yearde of a mowe:

℞ the lees of distilled gumme yf you can gaue itt yf not

℞ Humo burne itt in a pott and put the blacke lees into a clene pott or pome saund and rale yt well itt in fur nise in or my daubs & then itt will yealde and make itt into pitche

℞ of this pitche ℔j of dogge roote resine and hard ℔j of barbary yf fine yf not ℔j allom burnte, tuba ana ℥j all in fine pitche serued. of the iorse of the daub of the greene bleche tree and of plantan ana q.s. Bet them on the fier in a little pott and putte of the said pitche by little and little: and a litle grene wax: not a little gumme resett: still stirring them vnto a liquid oynte mt and so kepe itt this for sumose all extrossens of flesh roteswelled. in the nose or in the yearde roote the extrossens wt rearme rosin rosine rosin dried rose & plantan put them sodden wt yolke of eoemans milke do it wt a Syringe vide xb 26.12: then laue a little small wax candell and anoint the end hereof wt the said oynte ment rearme: and putt itt down into the yearde pritle itt butte the extrossens or flesshe. and let it lie apon the hurte & in three daies it shall see a mudlouse orator.

The like for Polipe put in the nose

ffor Canker in the yearde

℞ Sutray primule veris, plantan, pelle morrell: ana putt them into hot molten butter. q.s. Boile them wt the butter gumme & rosen of eche q.s. vntill itt be thicke: and lay plaster therof vnto the Sore hole boleby the canker in the yearde.

ffor the same vide 208

℞ rosin wax, Stromoniu and sodd dock roote put out the pithe and boile them tender: pun them very fynelie and seeth: then mix itt wt the wax and yeaste against a seeth & yeatle fier & keepe it in boxed and well also in a vase of glasse.

℞ Poly poll quantum

℞ rosen, mastice, aloes pulverized ana ℥j sim albi & aq rosar an ℔ j. amidi ℥ij fiat basma not minute liquid not seeth & applied wt hut & destroy pone for Emplus.

℞ totum pery in mise: stampt a little and ℞ axungie porci q.s. at the fier fe rataplasm for the yeard sore by gentlenes.

℞ Bole, sang draconis, amidi, albumine ouj misce. ℔ simplr pon wille.

ffor the Skin bee off

℞ Sheepes suet, Barmston, quick silu mortified: beate them all to pouder in a morter: vnto an ointment and vse itt. hild dashy drie and Skin

To coole the heate

℞ Unguentu ℥ populeonis or sing like cold ointment & then wt anoint

ffor the Skin to off

℞ Barlie boile it in running water vntill itt breake: then strain it and putte gumme and boile it againe & if it bee to thicke add rosate rosin & vinegar wt itt.

Balme artificiall is good in this case

℔ ffor the yeard to hurt wt a wound

℞ Oxeymel and the fine pouder of oke moate boile them vntill they be thicke let it coole almost & then laue it to the Sore hole well itt hemps & put be fine q.s. folis

Swolling in the yearde

℞ Beane meale & rie mixe in pouder then take rose mosse & Smallage in beate them all to pouder in a morter the putt them into rosate rosin & boile them to pouder: and then make a plaste and laue there. This is a speriall medicine for Swollinge of all sortes about the yeards yf it be taken rawe it wil a little hinder.

ffor the same

℞ the leaues of molleyne & of penbane ana grind them small: and to the first vinegar the yeard: and laue the rest plaster wise apon the Sore

ffor the same

℞ Sorrell, red rose, Smyrnium ana grind them wt boles greene & vinegar about the yeards

ffor the same

℞ Smallage, yeard tobert, yeard walter, Diapensia Smyrnium wt penbane leaues, dock leaues, ana stampe them wt barrow of greene and sheepe suet. Sum boile them: and Sum fond them

Contra tumorem pedis ex rotu.

℞ malues trimally lij mercu pauis albi q.s. Boile those to a rataplasme where wt noint the axungie porci wt out ℥ij apple it hott. & ablett swolling of the yeards

How the patient must be vsed

The bodye being prepared by purging (and in morbo venereo by bledinge) let him then make a small nitalt about x a clocke & at ij warme his bed well and let him be wrapped in a blanket sodenly naked, from y wast vpwardes very warme: and lying so in his bed: let him annoint him selfe with ℥j of the ointment: first the palmes of the feete, his ancles, knees, groynes, fundament, elbowes, armepittes, and handes: But touch not his bellye in anye wise: Then Drinke him a pott hott butter, but nuged in muscle water: & pp. and wrapped in clothes: or els after he hath ordinarie Dined & rested let him arise: let his bed clothes be well

dried

dried: and after supper in like sorte let him goe to bed:

All the time of his keeping he must weare a muffler, and keepe his head warme and fauored very warme:

If he feare the sore drosse from the ointment after his sweat: Hee must scrape the fluxe of his mouthe with mirrhe: If the flux do not abate Then if he do not saliuate sufficiently let him scrape again, if the Saliuation stale before x or xij Dayes let him scrape again: And ouer night lie in the sheets he sweat in wrapped in a blanket by reason of a flux of the belly vntill time hath stayed by taking rootes: And in stead a rasp geue him milke boyled wherein bread hath ben steepe, by taking often & little at ones and soft.

Towardes the end vse xx' Daies purge him once or twyse & feede his sicke and bedmige

The drinke ye must geue him must be made of guaiacum wodde & for euery ℥j of the wodd ℥x of water & boile it vnto the halfe

This drinke may be mixed with small ale and geuen him: And ye may adde Sassafras if ye worke my boilinge but not if they will purge for the pilles & decoction will purge too much if ye take not heede And so will the ointment

The pilles & decoction will make him sick Scratch him and he may not sweat if flowers at ij hands in one Daie or two at a time

This is so excellent that all other receipts are nothing vnto it. Remember still to take no cooles and keepe him in a sparr dett as it before sett downe and see may take Drinke stale white bread & mingle the same as is afore said and drinke quarter water and ale mixed together: Deo gratias

I had this from sir a frende as tried and had the report of the most then I shall write hereafter. Hopkins Colchestr.

For the Smalle Pox

Make posset ale very weake: and put therein rose cornell &c: Boile them well then strayne it: & to the strained drinke put good handfulls of mugwort a nutmeg: Setwall & Tasaron in fine powder & geue it warme: pox nobbles purples &c vide 87. roll. 2. m. 2.

Englesh saffron ℥ j rubbe wth the spoone first, & dow first ℥ j quarter it to be pulverized, sowe them, and serue yt: and well that it to be molten, rost a sheepe fier, and stire them well to gether then put in yo[r] other Lemge and stir the well. And when yo[r] take it from the fier put in the rubbing of Little & Little stirring yt still: then put in yo[r] first and let yt boile a little. then powre it into a patme of faire water. Anoint the Cymbs wth the first & make it in Rolls

Spreade the upon Leather and Lay yt vppon the greefe. three plasters will serue for a may wipe the plasters and lay them on againe

The will drawe out mire water.

℄℄ ℣ gaue a spoonefull of the pulse Balsum wth white wyne or good sorke ℄℄ in Brusse in the Bodye

ffor a Bruse

Boile crumbes of wheaten bread in faire water & apply it warme

ffor ayle for Argo & Bruse
Take Sage, Savory, Smallage, Laudi
Sowthernwood, Rosemary, Rose buds,
Lavender cotton, Fenel, Feferfue, tansie
Spearmint, Camomill, Tyme, Mary
Baume, Pluriary, Origanye, Searcins
Hyssop, Tomayne mint, marigolds, laur
of Provence, Daysies, Bay leaves, ana M j
Shred yᵉ Herbs and grind them in a mort
then put them into a silver vessell & putt
them thrice Vin. ar. vj ℔ of white wine
Vj Boile all untill ye wine be clene
consumed: then strain out and keepe
for a treasure

ffor Ache
Take Black soape lik oyle of Bricks j℔ iij
yolke of Eggs: beate them all to gether
very well, then spreade it on leather
or apon canvas and let it lie 24 houres
then renewe 3ice & iij or iiij plasters will
do cure.

Vide quere for an excellent
plaster for argo & Black soape
mr Arden. & pa. 115 m.s. [illegible]
& [illegible] 132: m.

ffor Argo in Bones or Sinewes
& Stone pitrefy lik, vse water in wch
most hearbs be sodden; then add Singreen
dragons in most fine pouder ℥j & little
and little strawne cut ℥ss
& cast of all putt in of Barly flower
℥ij. Boile them and stir them well
Have a possitt of red water
redy by ye, that ye cut rumes out it
may runne ye rhe and being rosted &
boyled & strayned. poure all into rosted
water. Draw it well, ye more ye
better. Spread this apon leather and la
it on & change it outte in 24 houres
daies, build ye lab cut of to smoothe
cut before ye fibres: &
Hot it is good for all Argo of rotten or
Sprayne or Bruse &c.

ffor Argo and payne
Take Ammoniacke to waxe, of Rasins
ana lik; of Labany ℥j Litharg ℥iij off
Roman ℥ij Oyle lij pulder that is
to be pulvered & serse them. Then melt
yᵉ Oyle wax and Rasins in a small
possell then strow in ye pulders pouder
it will be hard being dropped apon a
colde Service: let it cool then ouer
board anointed wᵗʰ oyle or a Stone mak

For the Sciatica a plaister

Upon the outeside of the thigg in the garder place, there is a little pit set wrest if bonds there make an issue wt ℈ vsed so do here

℞ Lapidis mineralis, a fortnight ℈ij Sublimati. ni fine pulueris. first lay on the place a plaster of Salue in wt plaster cutt a hole so bigg as a penny or ye or as little a bigg as ye nowle. Lappe the bare places there. put pepulson or any sure like stinge & in that ointment ℈ put lay the fine pulueris of Sublimate and upon the lappe lay a plaster of good salue that will not feede a dayes, let it lie there 24 houres and ye will burne the skin so broad as the hole is and harder a little wet in hyme & taking out the ashes with a spone rinse and a bigg.

Then did I put in the same hole the iuice of an Onion or sharpe fennell that they call in my native Country Gallick, & after put in the hole. And this is an excellent fine way to keepe open an issue.

Sumbuck gocks seed ℈ vsed for to burne the flesh in the pulueris of tantarides. in that place I my cutt upon a plaster so broad as ye rounde of the issue stood vide

The issue made cutt a little peice of ye red round and there upon lay the yolke of an egg & prick vij of those q. fine of gold wt a needle: set the egg vpright in a plate and lie ouer most. let them lie ℈ dayes. Then put in an other peice bigger then the first & let it lie 4 dayes wt cloaths fasten of as before this do vntill the end fourth matt then anoint yet wt this ointment.

Coody

Anoyntm for the Sciatica

℞ Pentaria i. Rose smarte (that hath no black spotte upon the leaues) ye wt plucke oute of the ground roots and all the earth onlye shaked off rinse and the herb hanged on a gadge one one dayes in the Sunne. Upon the next day stampe them, & wringe oute the iuice. put that first in a pott wt a narrow mouthe of earth & couer the pott close wth leather, & bind yt fast, set the pott and iuice in Sothy my water Six houres. Then take yt from the fire & yt will be an oyntment

Anoint about the place 7. dayes to gether wt this oyntment but beware ye anoint not beside ye place in any wise.

Then ye must haue in readynes the like oyntment made wt Rose smarte that hath black spotte upon the leaues made as the other ys in all poynte.

Wth this ye must anoynte the place onte in ye dayes vntill that ye oyntment in hath drawne or of the same rubber that ye raw land ones, at the gold wyere the hole pegg wt put in. Then pluck oute the pegge and shake out the issue

℄ For the Sciatica & Lucas

℞ Hederæ terrestris i. Eye and Sage ana M. Neate yeales li. Nettle roots sylle li. Stampe the herbs together wt the stalk then ad the oyle and straine them then putte of good aqua vite li. then set it upon the fire and Boile yll & strin yt rising vntill yt be a pinte. And wth this Oyntment anoynt the place myld. Cymbals afore a good fire. And before ye anoint it rub the place as is sett downe in pa. 122. r. l. in fine and forwarde it vse as is there set downe

For the Sciatica & other aches

℞ Cost li. ij. pressed li ij, Rosmd li. ß, dove spott ℥ij, Red Sanders li ij, Camomill, sage, ana M. dimid, nutmegs, ginger, Brazell ana ℥j pulder all that is to be pulder well & boile all to gether. then strayne them and put in ye wax Rosmd dove spott and putt in ye wax, then putte Olibanum ana ℥ij Cloues, mace ana ℥j Saffron ℥j all in most fine pulder. & boile it well yet ye put not in ye Saffron at first ye must straine yll again for ye ye Saffron is full of strings &c

℞ Fellis bouini, Spiritus vini aut li Sapone modic & Theriacæ ana ℥ij Camphir ß. M. in Linimento & O add zinziberis ℈ß ad Dolorem Sciaticam vehementiu optimum.

Contra Sriatica Rosotram & nervos mferios.

In the middest of may gather fleers of Crowne, a good quantitie, make them cleane, stampe them verie fine, then some them wth may butter, untill yt be like a salue. Then putt all into an ox bladder that the same be but halfe full: then put the bladder into a pann of fayre water and boile yt like unto a puddinge and prick yt as a puddinge. And take the Crum that floteth upon the water & put yt into a porringer possit untill yt be colde. then presse that in the bladder unto the other and keep yt. This is good for veary many thinge.

ffor Sriattica or dryes ℔

℞ Contra good Butter fresh of the kyrn unsalted iij̃ watt mylke, Bay leaues & Salme ana M ij. stampe yᵉ herbes & bruse them well the butter and crum of the Butter milke, then putte the herbes and boile them, then straine all harde into a gratend ostis mont and anoynt her wth.

ffor the same Wᵐ Bysshop

℞ Sage herbe ana li j raw mutred Bay leaues ana lib ℔ stampe shutt stronge ab yt is colde & myxed small and rubbe ana li iij Sallet oyle li iij̃ upp yᵉ herbes small then crum them wth yᵉ crust untill no crust be perceaued but that all be of one nature.

Then putt them into a brasse pan and putte yᵉ oile and worke them wth your hands untill they be all of one fashion. Then let all stande and potte in an earthen pott close stopte by ye daies. Then Boile yᵉ in a brasse pott upon a softe fire

ffor the Sriattica & all agues

℞ Red nettles, Sorrell greene ana M j Scrankentrone, rumminyne ana ℥ j Clarke Sage li j pownder the rummy & scranke and grine the herbes small, Set the pan upon the fyre & latt yt melte, then putt in the other thinge, and let them boile untill yt be thicke. Then make thereof a plaster & lay to the grosse gutt ab ani from shoulder. Latt yt lie ℞ houres & then the plaster take off and lay on a newe plaster and let him lie xxj houres & no more

ffor the Sriattica

℞ Vrine a gallond, Sorrell gill and stirr yt verie well and, then latt it be colde, then poure the clearest from the dregge. And putt that cleare into a pott, and put hyde Clarke Snailes a quarte, and boile the untill the Snailes be consumed, then streine yt through a fine cloth. And keep that ointment amongst the fine eare and leggs.

ffor the Sriattica

℞ Powder of fenugreeke, Bene meale & mustard ground greate. Temper them wth good vinegar, and plaster reyle laid yt unto the greefe, three or iiij dayes to gether: And wash upon yᵉ ointment then unto more of the powders

ffor the Sciatica & dryes

℞ Blacke Snailes, rattle greene ana stamp them to gether and applie them a plaster yt cureth all sorts of sores and Synnes.

ffor the Sriattica

℞ Vrinę hominis Lagenam unam, roque ad ℔ rumminj li j terre & mitte in urina, de cuius fundo naturaliter mergi ℥ij put shall pond in vrina, and repe dies ℥ij̃ ft emplastum sine panno linteo & applica tam callide quam potest.

ffor the Sriattica

℞ of the hard berries that hang upon the Sorbe tree like rasall. ℥ pulv migrea li ij & grand them small: put them into an earthen potte wᶜʰ li j̃ aquę pluę & pownder li j̃ mix them well & let them stande xl dayes then streine yᵉ & keep it close stopped and anoynt therwth.

℔ Plaster for Sriattica

℞ the gumme of a Bull of good reede li j̃ boile them to gether to Salue, then put in of strong vinegar li j and of frankincense in fine pulver ℥j of rumminyne in powder & gumme ana li ℔. Boile all well yᵉ latt hyr be but lie. Spreade it upon leather and lay on yᵉ a linnen cloth. and lay to the sore. this plaster will ease yᵉ payne of the Sciatica & reste and heale my grandmother Eliz Stanihop.

Contra Sriat, dolorem podagr

℞ assafoetidam, Euforbij, Sulphuris uiu; ℈ addita resina nouę fe resolui, vel simplex exterius sine resina &c. et nisi potens sit vigor mutę impondus resinę & pinguedinum.

℄ ffor the Sriattica Elecampane

℣ Spere worte, reyperd, radofoote ferne erispleyr, adalwerte, fumiterde rubarge, Lenbane, fistmary, flowr & red worte leaues, red Dryone, Pillwoorte, Malldoch: Destill owyr one of theese by them selues. & for euery unce bff the Seuerall waters of dyr of the reste put of the Spereworte water ℥ff. mix them all wele and wasse the grieued place therewith before a good fire often hands & lett it drie in wele. ℄

ffor the Sriatica or any dyse

℣ Worke of a poggid for a man, of a Calue for le woman: put a mans all the fatt; pcoile the flesse in rene water till the bludde bee rene oute. Then put the same flesse in stale and strong ale: and boile it vntill it be tender. Then grynd the flesse small in a morter. the temp it wyr the broth of the ale that it was boiled in. destill it all in a pelitory, wt a softe fire. And yt that water wasse the yrkes; iij or iv hands (iij Spoonefulls at ones well drawn) bee fore a good fire.

ffor the Sriattica or Sysse

℣ of the pryme of men, tony or nyne dais olde, a ffalconde, Seeth it and skim it rele and vntill it be into pottes: then putt therto, Eggs yeaues iij, of nutmy in fyne pulder iij; and the gall of an oxe Boile them and strayn them vntill they bee redde: let it thenne passe through a strayned into an erthen pott or double glasse A Sawser full of the ointment or lesse, being heated, and vsed in: after rubbing the place before a good fire lam pa ℔122.

ffor Sriattica or Sysse

℣ yolkes of Eggs, Blak soppe and Snailes that gaue spall the shell taken awaye iij in number: let the yeaue Lyquor droppe apon the Sope and Eggs: then take iiij Sruggs and put them in a lynen rolle and gold them in pott Standing water a wyle. then grynde all to gether in a morter very small but Strayn them nott. Spread this ointment vpon a lither then apply it

℣ the yeaues of the eggs and yeaten ffether, and mix them to gether, And spread it apon tenter and lay the vpon the toppe of the ointment plaster and let all the three Sax dayes and remoue it nott.

℔ro Sriattica

℣ terebint ana ℥ij Hermodactilorum pulu ℥ij mistedutur fe unguent.

ffor the Siatica 54:12 fino

Hipocarta & Leucost

℥ the yong radds of Ebulus, & fennell roots make them rebaue & pun them to gether then take the drawes & drumpes of Eldars water cresses, celidony, ladwarts, hedg rysomarys, cresses, rue mirrod, maidenhere & Sage ana Sodd them in rayne to ℔ stramo gitt. pretto Sugar. drunk gitt at all times strong et moste

ffor the Dropsie

℥ Parsnep, horse fennell, gard yard, Sage, fennell, ana Boyle them in water. Let the pan them so gett ab god rain sprinkle gitt: rose hips dwy other dene unha the Syrupp & sprinkle

ffor the Dropsie

℥ walworte, rue mrod, pelmoss, Smalage, fennell roots, pebbles roots pulped & sifted ana / roasse them reboue & stred them small and put them into a new drigen pot with a gallond of Red rayne or stale ale that is rearshed & fermet & / Boyle them to halfe: strayne gitt & keepe it close stopt drunk of this x dayes to gether colde at morning gett at myghte.

ffor the same

℥ rosary a gallon roorte liij gumy & / the roote of water cresse for iij the roote of Elsope for iiij Boyle this to halfe be roasted: then ad the powder of Spurt nardo & drink thereof morne & nighte & not drunk on Gother after at leaste

ffor the dropsie in the Body

℥ vegetor feloris and the roote of this make ix. pilles of gitt roote the roote of Lyuerwort & dwy daies dalt on tracke: then mix the juice of Sedge stiffe & olde milke and drunk to the tracke: Galfira nup full at once

ffor the same

drunke the roote of Horsmint on ye daie & it will drawe the phlegme

℥ Dorredy for the Dropsie

℥ Goose liuer, mutte, water cresses ana and roy mutton or a yonge make porredg of these herbes and take of the same often times

ffor the Dropsye a good medicine

Take water cressed put drawe the juice in the roote and the flowers then drinke the herbes & take of the iuice & gallond Barly put and stirr it reason putt it red into a pottle: then putte yt of good swimmy ale: stirr them well and stirr them reason and so yett as it can possible putt it into a pott, and stoppe the pott close that no aire goe further and reason it vp rob, drinke of yt euy daye fiste and laste a good draft and strayne the herbes and the dropsie will fall into the legge. then make an issue & drawe it out & so heale it

To helpe the Dropsie
Gott or colde yt outh

Take Pettmorell wormwod feberfue and the roote of walworte and the Eisope Anis Sage Smallage mille water cressis, Joyne all ordinge in liquor wordes, pricke the small barke of the Elderne tree and stirr them reason keepe them in them seuen dayes then strayne & put all in to an Earthen pott that never was occupied & put thereto of good wyne before it be vinegor two gallons & let yt stande to cleare, then let it run through a fine sieve into a reasonable pannie: then cleanse the pott cleane & put in the liquors again & cover yt close: Let the parson drinke of this liquor at noone tyme & last at nighte Gott. And for iij daies let him eate no meate but bread & porredge made wt water cressis & white wyne And Sage like and ye must have the Red Sage put yt into wastell dough & bake it as bread, then ye must breake the cake in a brasse morter. then put yt into a Lymon Bason and stirr wayghed to make it Sinke and strayne it in a vessell of about of a gallonge in a vessell close: Let the sicke drinke cold yt close: Let the sicke drinke all daye against supper be spent two pinte more and so keepe the first iij daies Let him eate good meate & vse the course therein for xl daies to gether. & drinke non other drinke but as afore saide.

Nota you may vse white wyne for want to get for ale. yf ye will:

To heale the dropsie in a feeble tyme

Take of the iuice of water cressis a pottle of Ewy iuice a quarte and boile them to halfe then put to them a gallond of good white made of Barley malte, boyle all vnto a pinte. Then put into the liquor of Sugar and the roote of galangall in fine pulder and ginger and myxe the well to gether. then let it stande vncouered a reasonable space of howres Drinke of this iij spoonefull at a time euy daye, to gether & fast on fishe after.

vide 135. f. 1. in fine & f. 2
& speadinge of the Elder leaves &c
and 136 f. 2.

Take Sperage roote the most of the water out of Swallow Sage &c

For the Dropsie

Take Aleggoes Dates gratte yt into pulder put yt into an Exportas Bagg powder wyne therunto the Bagg in the liquor and drinke it

To oppen water

Take worme wood &c. steepe it in white wyne or in bere: in the most morninge Barly ale or Sider fasting drinke of this wyne warme and Sweate vpon it

Take turnep tops & slice them then Boile them in water & drinke the water bothe morninge

A fine Experimt for the Dropsie

Take of the fatt of a golden dogge & mingle it with a walnut mosse put and drinke it in a draught of warme Beare. Bast give meate & dresse it wt the same fatt the more the better. And this is good for the yelow Jaundice.

for the Jaundice Dropsie

Take gratte & dry worme mak them into pouder & drinke them with the Destilled water of Cinquefoile

ffor the Dropsie

Boile pigeon Dunge in smoke or Sparrowe Eyes & them wt waste the Swelling legge & wett lynnen cloth in the liquor and vnto the Sorelegge &c

ffor the dropsye :-

Drynke the wayne wherin yͤ hyppe hath ben boyled: & thus doinge burneth it dryeth all humor; so that it can not ingender to a dropsie head

One maie helpe him by taking the pisse of a blacke bull for xx dayes in the wast yͤ hee doeth eate Blacke seede & garlick

For the dropsie

Take of the redest Sage & hyssope aña m.j. and as strong ale as yͤ can get a pottle: chopp yͤ herbes & boyle them in the ale into a quart. then streine yͤ reason & put hereto of yͤ rounde nuts Spignards & Safron in fine pulder aña ob: & let them boyle a little. drinke of this ale cold and non other so long as it doth laste. yͤ it be so strong putte neare all wherin yͤ nuts were sodden then take two fenell rootes wash and scowre them then them all together and bruse them to the Temples and the noddle of the neck behynde

ffor the dropsie

Take Greene worme wood leaues handfull of the best Sugar lumpe stamped yͤ herbes small, then ad the Sugar beat them to gether untill they bee all one pultes & substance kepe it in a galley pott or glasse close and bake it in the ouen duringe three houres before nicate.

Let them vomite, haue the dropsie vse to drinke the water wherin Briony hath ben boyled

And Boyle Ebulus. j. Dandelion in wyne and water & drinke it first and last xxx daies to yͤ howre. tost

ffor the same

Take Sutton Briome, mollis qs Misce cum aceto

ffor the same

Fill a pott almost full of the Iuice of planten: Bind a lynnen cloth ouer the pott mouthe & lay therin assod then boile it to halfe & use too take thereof

For the dropsie

Take one handfull liquorice pelle seede, rootes Safron aña ʒij. raisons of seede, fennell seede & sperknard aña ʒj make them into fine pulder take of that pulder in parcelys: & drinke of it an hower after dyner & supper all a fortnight

ffor the dropsie

Take Sage & rosmary aña a good quantitie: make a rosten of flowre inough dough till yt no the herbes repel lab it well: then breake yt into heapes yt all rounde of like all yͤ same and rounde the drinke rose and keepe in the fume & drinke hereof at yͤ old assize nec cocet.

Ob pedimis is the shaarebone

Watt my Rupture

Take fyne garfold flax & make therof a broad playett then spread theron the white of an egge well beaten: theron strawe the fine powder of Bole vnto Ett bee stronge & rodd. then my middest of the playet rutt a hole to thrust the yeards through

make also a longe of the almost so bigge as a mans little fingar, wch a longe thronge att the ende and drosse it with the playett wch Bole to the longe thronge dole, serue to plucke out the tonke furth of the rodd.

Then take vpp the rodd wt rowt the fingar and the thumb & hold it fast wch the leffte hand and lett go the other side faste and straine Ett hard a brodt: then wch the mise rutt a good rodd Lett in the stem of the rodd.

Then let the rodd be laide abroad flatt.

Then open the gold and gather vp the tryppe arke wt the fingars and holde it faste in the hande

The gold rogers the guttle round out bee mge take vpp gather it all towards the mark of the yeards wayte it is fastned and there wch the bonde naile break Ett off wch the pece of the yarstle & gnawe the heare: this is the greatest pame to endure.

Then be sure the gold faste be tryppe arke.

Then hand the lugatures adding it is fastned with a pinse or two of treble folde of good thread (well waxte) & yeelde waxe) and hold it fast at one end wt youre tuggte hand: and let on other hand hold the other ende and cast Ett about the tryppe arke wt the holde in the leffte hande so neare the before de the raw & pluck Ett so hard as may bee and cast Ett a bonde crosse or thrise & knit it fast then rutt the thread long of and let it lie in the rod or pinse.

Then put in ye longe nutt the rodd and
lett the little trusse hange out: and
put on the plaget to stope the bludde
and put onne iij or iiij lynon clothes
upon the plaget nutt as fast as.

But fyrste nutt of the stronge
veyne yt did bett in ye lyttle hawde
close by the bryndle of the Ligature
as yt can possible even hard to the
knott of the Ligature

Note well whether the stone
runn with the veyne or nott yf it
do keepe him close for hongre sake

And this lett the pacyent lye all
that dayes and nyghte
upon the mordre bathe him with sod
mallowes in water typpid & pressed
warme and smeringe gott to keep
it from Swellinge and so ye
must doe other dayes.

Then ye must applie a dyge[sti]ue
wt the yelke of an eyge and turpentine
beaten to gether or fyne lynt or lynt
or tow spredge and still keep the rodd
upon with a sponge

upon the 9 daye some or xth daye
after assone the Ligature wasshed it
will runne all daeple or nott. yf
yt run of with stronge yt keepe it
as ready yf not stand and ensure
for smitinge the Ligat[ur]e runneth
of sunder yeat some other.

The Ligature and sponge must be doone
then shald lye nutt in the purse
with mollocke plaster, Diapal[m] lyttl
Basilicon, and greene hartes ease
bate a litle mirr: or ane ij mingle
them to gether upon lyes to all
molted and applid yett.

This is comonlie doone in xij or xiij
daies or lesse or more

During yt time lett him keepe good
diett and lye in his bed warme
and yt is good to purge & emptie
his bodye before ye nutt com
Beware of cold drinke and taking
cold in a my wyse.

This was troubled to most & one
that was sterge his man and
I see forge good gitt to have
effected. but by cause I was
informed yeat I could not do itt
for ondy resisting ye hand a bonke lye
I prepared yt must make a drawinge
knott roging the wax will hold from
slipping.

And lye sand wax will cause yeat ye
Ligature will hold it selfe and
it will not of[fe]nd a sharp oude.

For the Rupture. C. C.
Take Comfery, smallage, daysie tops,
aua a good quantitie: Bate them & make
them into pulder: & so much of this
pulder as will lie upon a sillinge
put it into youre mowte shaking and
presently drinke it downe with small
ale: and fast one houre after it be
downe: and take a thinne lastat nigh[t] to
supp.

And lie upon the chest side so
much as ye can the bodye kept
and close trussed: and lie on your
back for the most pte.

C. C. The plaster parlous.

Take Pellitorie of the Walle, smallage
Comfery, & wilde Daisie roote aua
Bruise them well, Boile them in
pinte of Oile do Boyle verie well
and applie it with lynt & so truss them
close wt a truss of yarne & so to
lynon and fustian. and keepe quiet
Diet & so quiet &c.

of Hurtt Lanford ℄

If the clarified greace of a stag
y take that nowder had ye gt ye
of a roan hyne hyne leg a roan
or ye yn weare, of may Butter
and ℔ of deare suet ymong the
took of Turkmpane roote scrad
washed and dried in an oven and
made in fine pouder ℥ij or les

Boile all these in a bottle
and clarefie them with a spoone
and be my roote take hym from
the fier and let them cool a
litle. Then take rosemary
more ye leaves, ye gt small and
beaten in a morter like grone
sarott ij great handfulls and of
smallage smalle ye gte smalle &
new gathered ye mary as much
a gridall fulle. The liquor comyd
litle roted put in ye Rosmary &
& smallage ye litle and litle stirr
stirringe yt not a fyre vnder all
be in and mingled. Then may yo
poure all into ye pane of faire water
and draine it wode & make it into
bals. But if wold be made yt into
wgout powringe into water & yt
will kepe ye better ℄

Spreade of this salue upon ye flesh
side of ye bocked leather; and let it
ye plaister vpon ye flesh
or Brotte and ointe in from ye pore
ye change it. Wth this I haue cured
men, women & children

Yt drinke for ye same ℄
In May or June, and take at last
after ye haue vsed ye plaister
to ye patient this Drinke

℄ Of ye leaues and rotes of
ye red roses dryed (but not ye
flowers) columbine leaues & flow
ers and ℔ of fennel roote and
stalkes from white stalks & ye
barke it first and laste tyed
daide or more ℄ ℄

To finde out whether a man
shall a liue or nott ℄

In a cold fever fasted man shaking
and trembling. Let him drinke
as much

But a pale or shorte lead
sate and sanguine may be cured
And ye Sickness ℄ ℄

℄ ℄ How yt gott in ye Bowells
wgin they wonte yarde &
very painefull ℄ ℄

Spreade some of this Sarcocolle
plaster upon a Cabbo napkin
of fyne litle hemps. And then
warme yt a litle & wrapp
ye rodd therein. Then lett one
or 2 ffete hands stretch ye rodd
and ye gutte will retire into ye
body in a short space by ℄ ℄

But yf ye patient be fatt and
ye gutte so out that there
is no hope for him or yffe
he stond lanching in ye rodde
let gott observe yt ye gutte ye
hee will under ni or nott turn
in by any meanes ℄ ℄

But yf ye gutte bee out mixe &
be wash with wyne or rold and
let him stand and smell of pane
or gett or Burninge this plaist
wth & putt ye hand a way ℄ ℄

Or yf ye hand nott ye plaist wth
him Rosmary & smalage
bring first wash out ye
gutte and applie yt
as afore saide and yt will do yt
as if hand often proued ℄ ℄

And smithes be wash with
instruments if ye put ye gutte
with hand and painefull. Then
ye must be mad stubbs ut in page
f. 22 gutte shew yo ℄ ℄ for this
purgeth him wth on pouder And
bring and afterward nodrish may
dead at any time wthout drott.

An other way to get vpp
ye gutte

If a hyde ston. a liue ratt, or a
hyde wesell; slitt him through
ye middle and applie yt all gott
and when it is cold put it into
gott water and apply it agains
and this do vntill it bee vpp.
I also vse that before.

xmy dayes then open it and dresse it againe

I haue written this in pa 22. 79. &c
and in this place and there yo may perceve
why, on the one syde Sum vitrioll, and
w pt small water Sum of Allom, and all
this I doe at on marke & sett all: I found
this I doe to produce them all: and I write best that
is made of vegitable flowers: their differance
is but litle in making and working

yt it be put in a morter a litle warm
and the pestell warme it is done quickly for
dronie sticke stirred, and yo may keep it stiffe
and high enough: But the vegitable flowers will
not dure harde, as stone as thalbo

To heale a wounde new and new sore
℥ Romane portnoll or of Hungary
& thryse pitrioll ℈ j pulu or it: put
℈ ij of this pulour in fare water &
stirr it with yo hand: then put into
water a Bludy clouts of the same Blud
& wash the your handes: then lay this
Bludy Clouts in the water: if the
wounde be not mortall, it will cure

yf the pulour do consume the blud,
and stick upon it: it is curable: if not
it is mortall. wash it betwen yo hands

this must be don iij or iiij dayes

In pa 79 & do I haue written
of the waste Sinaty and &
there I sett downe an other
way to make it weare &
more counted for better

℥ wgte lead in fyne pulour & sarsed
or Boulted as in pa 79. & do: mesure
yo loade by a Spoone or sure like my
and looke how much lead yo haue take
first so much water & vgte vegitable
flower, putte hard & hard stirred
& ℈. worke it yo handes as in 79 & do
and make more all onte then roule
and bruse: lay it on and bind fast it
a poore of new cloth and sire it fast
and sett it to dry. And many tymes on
and sett it to dry. And many tymes on
plaster doe Scale the Sore

vide pa 22: 79. 80.

Note the lead and the flours
must bee equall by measure and nott
by waighte: therfore measure them in
sum small thing as a Spoone or sure
To temper the plaster
first mix the poulders well: then temper
them into a stiff salue and make it nott to
thine, vse Bores greace: and applie it
as before: and when it is hardd it must be
tempered wt more Bores greace as in
22. 79. do.

Dyscenteria

Here be iij maners of flyxes

1 Dyscenteria is when one doth bludd mingled wt dr it come the substance of Gutte

2 Diarhoia the bludd flixe is when bludd passeth from a man wtout mynglinge wt any hynge like substance

3 Lyenteria is when hee meate rumeth from a man all whole and undigested

4 Symple flixe is when ther is no dolour at all eatinge or gone ar it is digested and lyinge

There be three maners of Dyscenteras

1 In the ouer gutte
2 In the middemest Gutte
3 In the nether most gutte

In on it is like the substance of flesshe & is sone sodde

In one other like substance of gutte is more tender

In the third it rumeth like the gobbette & is ofter hy[n]dred

Mr Wodall pa. 31. titles Barns Box

In new wounds let the flesh grades as prdicte as
it will the ground being cleared and no fellon
or putrified bone in the wounde And when ye
well syringe it lay on a little burnt Allom
or white lute in vinegar water and let it lie
and dry against ye lay on that dryes lute
Looke in pa 139 r. 1. in fine

Mallots plaster Simplex good in greene wounds
it drawes & healeth well and ye prayse it
for hyde in Gerlds

Hee also prayse de minio a good ointe distruser
of ye humors a Stayer of payne, mollifier
wonderfully Cum myrrha and in raw Scindulas for
fer wounds and vlcers & yee wherein all is not
gald yrs note in yt Dispensatyr

In page 68

Make hys for a generall rule in openinge of
tumors that bee full in greate Ease to the
patient: But neuer presse onto the matr
to forcably nor seeke to mingle out at once
Straine it rather with naturall heate & sweet
Spirite & sudden Euacuation is not good
therefore leaue it to nature to worke upon
And for the prolonging of the fall of the Ester
it is more safety: for yee sute the longer
hole on the pallate yee hide it so ye sute
ye can not hope on the Ester & lack of that
nature will cast him off

Ester

Also sute that vpon an Apostume by
a Caustyk medicyne is better, and safer
then a knife for the Apostume bee hye for
the Caustyke can pearce no further the
the vrine entis by cause the matter will
choke the Caustyk: then may ye vse bdellium
Galbanum sprinkled upon lytle or mastiche and
as Diachilon cū gūmis or a mixt pultis
of the decoction of Althea roots, or lyne seed:
of the cause bee rather ad pinguedinē
lytle: or apply the pultis pa. 35: r. 1. in
fine & water warmed ye and those warme
hot salt or some other pultis: And it is ofte
ye apply the Basilicon warme: and rubb
and then Send light and Smithys bellowes
mody warme: And hold of Sol all the
little light not hyer in to touche the vlcer
onely as I say no more

An Apostume opened by Caustyk follows
wth in 6 days put in no tente but dresse it
wth Basilicon warme, put a little wth in
the tente ontō until ye dressinge: and lay
on ye warme pultis for Basilicon alone
warme applied will send & suck out and
loosen it well and it well calls out the pus
for nature ever intends the healing of the pus

Toone mutt Blud in the matrice mary rum of wekenes, Breakyng of a vayne or Labundante of Bludde.

To stoppe the flowes

vnct vitrioli ⊕. ol. vitrioli

Acerrum at non dilutum, neque debet neque potest infra corpus sumi: nam praeter[extremam] acrimoniam, quomodo inferendo, et quicquid attingit adurit: omnia nempe corrodit praeter vitrum ~~praeter vitrum~~ et pinguia, veluti ceram, [illegible], sevum, et ligneorum etiam oleorum colorem immutat, [illegible] maris, cui si misceatur, Sanguineum reddit colorem, Si etiam in duobus continebatur quamvis frigidus, et repente sibi ipsi misceatur, adeo incalescit sua sponte, ut manibus vix teneri queat. In terram effusum ebullit, quemadmodum pura Malenecolia: quare etiam ~~[illegible]~~ malenecolia artificialis appellatur. Quemadmodum enim pura malencholia, ita etiam hoc oleum ventriculum confortat, et ad cibi appetentiam incitat ac stimulat, frigidum ventriculum calefacit, phlegma consumit, crassos & viscosos humores incidit, colica et dissenteriae opitulatur, sitim et fervorem interaneorum in febribus extinguit. ~~et cibi abominationem avertit~~ Singultum prohibet confestim et nauseam ac cibi abominationem avertit, sed temperandum est cum aliquo [illegible]

ad calorem et sitim in febribus

℞ Sirup ex succo aut infusione violar ℥i aquae Cinamomi ℥i [illegible] ℥iii aut [illegible] olei vitrioli guttas iij aut iiij misce. detur.

off ⊕ his [illegible]

I see it applied unto a [illegible] [illegible] [illegible] and it caused a greate Eschar [illegible] was well [illegible] oleum ⊕ once in ij dayes that did nothing els. it did heale it at length

ffor heat in hott agues

℞ faire water ℥iij oile of vitrioll [illegible] or iij droppes, sugar a little, rose water iij droppes [illegible] vinegar as much. mix them drinke it after

℞ ⊕ oleum guttas iiij in plantan, Sorrell, or in any other coling water

By mr Roger Longmore

24 aug 1631 — To a greate excrescens upon the syde of his knee was imployed ⊕ drunk in august 1631 [illegible]

This Excrescens was very great and so bigg as a good apple and Oile of vitriell was imployed & [illegible] very much in [illegible] dressings [illegible] cure was begun upon or aboute the [illegible] of August 1631 and what became of it I will sett downe if please God for I account it worth the markinge

In the meane tyme I haue sett downe theise things followinge by cause I thinke they will all or the greatest [illegible] that ⊕ will doe:

The white water

℞ mercury Sublimatū ℥i make it into fyne pouder, putte as much mercury crude in a broad shallowe dyse of glas. putte [illegible] water. stir it harde wth your finger rounde [illegible], untill ye water be white as milke. then powre it into a viell, & putte more water & stir it againe, & againe, so long as the water

will be made more and white: this water will be stronge for the [illegible], and I [illegible] my white water

CC A blacke Ointmt and water

℞ Sublimat ℥i in pulder putt ʒij of that pulder into ℥iij or ℥iiij of [illegible] [illegible] [illegible] [illegible] into a stone pott sett it to the fier, let it Boile: stir it ofte and when it is blacke take it from the fier stir it and lett it [illegible]

put the other ʒ. ij of Sublimate into a pinte of Spring water and let it boile in an Earthen vessell or glas untill the water [illegible] [illegible] [illegible] [illegible] that it may be stronge [illegible] water

wett a [illegible], [illegible], [illegible] or such like wth this water and let it drie diuers tymes in the dayes. then anoint it wth the blacke Ointment and it will make them scale and fall off: this I [illegible] [illegible]

And this worke like the [illegible] of vitrall and therfore I sett it in this place to haue them together And I may demande wt good reason [illegible] my white water may not doe the same seing there is both [illegible] and [illegible] [illegible]. Sublimate and quick Silver: And the [illegible] white: the more admired and Strange: for I [illegible] see any such [illegible] [illegible] any one: nor is it not knowne. vide 39.

The Eschar once made must [illegible] of without blud or it will growe againe

The greate Excressens in the knee, written on the other side, was drest euery morning and night: And at euery dressing was wt an instrument [illegible], take of ~~[illegible]~~ scraping and so did growe lesse and lesse

In October it was drest wt vitrioll oile wt having made an Eschar: it was taken of then the flesh growing [illegible] [illegible] Sublimate was applyed: to sinke the flesh [illegible]

In November [illegible] [illegible] a greate [illegible] [illegible] in length ij [illegible] at least & ij [illegible] broad as I conjectured

In theise ij monethes the [illegible] [illegible] had [illegible] [illegible] at euery dressing [illegible] [illegible]

In December I see it and [illegible] the patient began to bee weake, troubled wth [illegible] & the breath stinking, his [illegible] blacke [illegible] he had many qualmes as [illegible] [illegible] [illegible] [illegible]: And the Smell of the [illegible] in the mouth from his stomake as he told me which I conceiued [illegible] [illegible]: [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] to [illegible] or [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] his mouth & [illegible] long [illegible] [illegible]

1632 In february it was like unto an [illegible] [illegible] upon both sides, wth a long [illegible] ij [illegible] broad & iij [illegible] long, within [illegible] [illegible] [illegible] [illegible]

In may the oile had eaten to the bone through under the knee upon the inside as it was credibly reported and there [illegible] [illegible] he died in the end of August 1632:

The vertues of the herbe Pellitory of the wall

It coleryth the infirmytes of the Lyuer, w^t stomak or fumatory water. It doth put away the malencolyke humors from the Stomake, w^t Balme water. And doth comforte the Stomake after a wonderfull maner, and doth defende the vegyll body from forwarde apostumes & mala-dyes. And therfore w^t oyle & vynegre and w^t wormod & rubes & aprocis good for the same thinge the blud wonderfully, and defendeth the yll from gangrena and yll accidentes

It ryueleth & vnyteth the ruptures of beastes and veynes; and comforteth & strengthe all the lyths of the body & fastenyng of the synewyall vaynes

It prouoketh the Storke bud take muche w^t wyne or water & is good in the Chalmys but it must be dayly vsed in a mornyng

It taketh away & dryueth all ylles in the raw tyme & medicynes taken in Plaister Surrell & medicynes taken in Salmon water or in sperme whale any other holsome water or in sperme whale by the which bring lose bodyes & purgacions easily & soften and putrefyed humors to purge the grenes gently out of the yll: but bowes not the whole feces

In fluxes and vlcerations in the throte and mouth, that will not obey other medicynes it ouercometh w^t the oyle warely & soft it will heale w^t any medicyne

It is good for Inflamations in the throte as Squinancie or fluxes & sore throte as Cynanche or fluxes & lichen. to make fatt in a fatt Surgery salue or lichen. to make fatt smothe my salue: wyt a sore throte. And the body to the Collicke

In vlcers and fistules to enlarg an harden, to remoue a callosyte, to purpose & brete to purge: Quick lyme & w^t lute wort the oyle agen & probek fistule

It is good in all purgacyons medicynes and it retaineth nourishment

It is good for a weak stomak oppression of flegme or thynne and in ouerthrowes of stoole a sore throte to turne the vnlike it is excellent in that case

In pestilent hall feuer it is excellent as my pallbuterd a bud saide aparelle & on the other side

The tricke doth is must ab wort mate it that some what serue. But pestilent hall feuers and pallbuterds ye may good and but remember to shake it well before ye gene it for it will sinke to the bottome

Here endeth other vertues

The mark for oyle of pellitory wall.

A prayed restauratyue

℞ the kernells of the pynoapple and take of them stremed then pun them small: then straine them w^t Strongo wyne (as I shewed) and let ye wyne rouer them three fingars at least and date them

To restore the complexion lost by stroke or women

℞ fferme Seedes, Skirret rootes Lyne rootes aña ℥ij grind them well temp them w^t three yelkes of Eggs make them in Balls so bigg as Eggs and take iij first & iij last

To make a restauratyue of a Cork

℞ the olde Corke dresse him cleane, rase him nott put him in a viere extreem pott without any liquor: putte him Galengall myce & nutts pouder all in pouder stoppe the pott close: and sett it in a possnet of Scheinge water & boile it ℔ 4d & then date the liquor that rusteth of the Cork

To dresse a Corke

℞ a Corke pluck him a lyne & let him remaine so one ℔ space: then kill him, cleane him take out his Bowells wipe the Blud so cleane as ye can w^t a cleane cloth (but rasse him nott) then scrape the flesh and bones to gether so small as ye may: and putt all into a good water glasse w^t a narrow mouth: stopp it close: put ther to xij Spoonefulls of pure old Rye water, xij good dates mingled glasslike, xij Raisins of Maug Christi: or so much fine sugar but Maug Xpi is better: of all good ad plantis: Stopp ye glasse close & lowe a little cold for aire for the Cork may lye glasse couerye ye glasse in Ley and let him stue in a pott of pott water ℔ 4 houres then straine all harde and let it rest & it will be a gelly keepe it cleane. And ye may ad Cinamon & Nutmegge in pouder if ye will 3 spoonefuls will serue at one time w^t enough

To Stue a Corke post CC

℞ a Corke dresse him cleane put him whole into an extreem pott: putte him cleane water & no salte ysoppy roots some Rocke, Turney rootes, cleane scraped washed (ye pithe past a waye) & sliced: Borage leaues, Drage leaues Bugloss leaues, a little thyme a sprig rosemge of the Crumb & a few prunes

Barle

Cxlviij

Barle all broke the Bones fall from the flesh keeping the pott close stopped straine all thro & the liquor & drink it warme. Before ye drink it let it settle and skim of the fatt w^t a Spoone.

℔t neede be ther be to get it in Angler Brooke in ye spoonefuls. As before.

To make a Restauratyue of a Pigge

Dresse a pigge cleane put him in fower quarters and boile them in fayre water & ℔ pinte of water: Strain it cleane & ad Sage that small Mynce all into ad Sage that small Mynce all into ad a pottle Strained thinge and season ad Sage or a sprig close & drink it all ye cleansure warme

To dresse a Pigge

℞ a young Suckinge pigg that is nott to fatt: Dresse him cleane & quarter him Loade and Poche and all putt him into extreem pott w^t a pinte water put in dates pruins aña ℥iij Cinamon Cloues mace aña ℔ss Sugar two ℥ij nutmegs Mynced garlick Sweet herbs Bindweede Partlesinge pickt cleane Shredded cleane aña Mj fenell seed ℔ss pickt date ij or iij Sticke margerom Sauge ad Bags aña ℔j fine Spic mge water a quarte putt all together into extreem pott: put ye pott close stirr it in a little or pott of Barlinge water & stope close it ℔ 24 houres and as the water sett it ℔ 24 houres and as the water in ye holes consumeth put in more water strained it as before stope it close stopped put ij or iij spoonefuls of the broth or a candle & bake it

Miss Tomkis Receipt might be put into a glasse pot good and Rotunder & described in water as ffreshly

CC Restauratyue Excellent

℞ xxx yelks of new laide Eggs and saue them in a platter of fayre water one ℔ouer then take them furth & putt a cleane big stronge and put them in that quarte of milke gott from the cowe a pinte of rose water and the crumbs of a new manchet: Beat them all to gether then put them in a glasse Bodye and set on ye coales & set him in Lewke warme & a spoonefull close stopped & doe not open it ℔ 4 houres: keep off Eastinge: Ffraid soone yeast ouer off the water: yt may be dressed in the water. yt may be dressed in an other Restatory vessell set in sande and ashes. CC

Restauratyue

℞ yong pigeons and roskins aña cut them in peeces then Boile them in wyne & water & the fatt they skim fall from the bones ad mithridate, Cloues & Cinamon in pinte & drinke them often

CC An excellent Restaurat

℞ Capons dates ℥iij of w^t

℞ Cappod dates ℥iij masse them rend
in ale take out thone stones & pikes
them rub them small, stamp them in
a brasen morter, untill they be
verye tuggie let be wax: then put
them into ℥iij of clarified hunny
and stir the whole untill they be
dissolued: then put therunto of
Ginger pepper, cloues, mace and
nutmegge all in fine pulder and
℞ Set all on the fier againe and
coll them softly possible and stir the
rocke and put in the pulders & kille
and kille untill all be well stirred
in them, let it boile untill yt be
sufficyently thicke, then put in ℥j of
fine ginger, in pulder and stirre
it as before: take them from the fier and
taste: if it be not yet strong inough
put in more ginger &c. & so keepe it &c

To Restore a Man

℞ the iuice of Abotes of Saturdon &
of the pulder of Bletes pepp and
Cummyn q℈ make an Electuary of

ffor an old man

℞ Cappod dates iij take out thone
stones and pikes, trim them make
them boile them in a quart of good
mustard untill it be somthinge thicke
reasted: keepe it in a glasse close
stopped: take euery mornynge
fasting iij or iiij spoonfull at ones

ffor the same

℞ ffennell seedes parsley seedes ra-
= dishe seedes, rue dame wort, anis of
Rubarbe, dilom anis ana ℥j of
all in fine pulder: then melt sugar
q℈ and stir in the pulders with a
spare untill all be drie: & keepe
sugar: then put it in boxes and
take them fastinge: it is good
for a Surfeite

Yet good Restauratyue

℞ the iuice of Saturdon heat well
unto, and then in the Gumes &
make them into pulder: yet heat
pulder yet. Borax in pulder ℥ij of
Sugar ℥iij melt your sugar &
strain yt alone then stir in Borax
in fine pulder & let them boile a
little upon the Saturdon & stir
them well and when it is stirke
standing it is enough take it off
at midds: and drinke Sperma
ceti and Borax together & drinke
it not ale or Mustarde.

A Restauratyue sause

℞ Good pmogar and put them to the
fine pulder of Galongale and nutmegs
of Bred grate all on a grate mydyse and
take it not a peece of mutton boiled &
water grewell made not hee boylinge

ffor a weake man

℞ a peece of mutton and hee yt make
water grewell: & putte hee same pulder
Spermaceti and hee pulder of Cinamon
grounde long peppe & valia mus- muss
of hee valiamus and taste of hee pep and
bake them

ffor the same

℞ A knuckle of veale boile yt in fine
Spring water, yn sowell take hee pith
taken into the inge of the Sun hee stones
taken dode and Mr. Boile yt verie
well, strayne it hard keepe it warme
and drinke it not Claret wyne warme

ffor a great consumption

℞ Liquorice ℥j dulsedd ℈ij
and Mr. water hi boile all to gether
then ad Sugar ℥vj: let ye drinke
hee then grewell from dia pomedion or
dia tragacanthu and hee is good for
them that have payne in their breste
side about the breste yt hee grewell
heate good then milke to drinke
and make them Suppe thaidd of salte
and Cummyn

yt Restauratyue Broth

℞ A knuckle of veale boile it in water
dest Borage Langue de Beef, Cyuor-
rey to, Bugles, water cressis, parsley
and sowle Leeke, hee pikes taken out
dates & gote rosinge stones out and
take gote rosinge stones out and
small: Boile them untill hee flesh
falle from hee Bones: drinke it seasing

To Restore kindly mestrues

wounds nott ſpond

The Epilentry or fallinge sicknes
ryseth of a myxte humor that
filleth those places of the heade
shoulde be voyde, & stoppeth the
vnder parte of the heade, there
as is the beginninge of the sinnes
and filleth the Synnes: and therfore
vpon the acte of the Sickenes
doth ryse to a man it maketh him
for a tyme to loose his feelinge,
and his movinge

Otherwyse his sickenes
ryseth of an humor in the heade
and then it is called Epilentia

Sumtymes yt ryseth of
fumes that flie into the heade
out of a feble and sick stomache
and then it is called analeptia

Yf yt be of infirmyte of
other membres then it is called
catalepptia

There are iij Sortes of Epileptia
the greater &
the lesser

In the greater the principall
places of the Brayne are stopped
wherfore in there acte they
feele nothinge and foome at the
mouth, and all the body quakes
& they are hard to holde

In the lesser the principall places
are not altogether stopped & ther
fore in there acte they feele sum
thinge and all the body quakes
but the vnder parte of the hed

The tremblinge of the body is an evill
Signe in the Epilepsie and yf they do
fall often and arise quickly it is signe
it is the better for their helpe

Yf a woman have his Sickenes and
did not feele before she have her
Sickenes and naturall courses she
withe never be holed this is yf yt
be for in her vtilde goods

Yf the Sickenes be of fumes
in the heade these are the tokens

Headymes of the head, the
confusion of his wytte, Stoukefulnes
dymnes of his eyes, Bytinge of the
tonge: there water, natures, & theye
passe inpoluntarye, and in the acte
& fitt these they ffall and feele nothinge

yf his sickenes be of flegme yt is knowen
yt is knowne by the Signes, vgelynes
slouthe and murye slepe

yf of malencolie by blacknes
leanes, & fury eurke

yf it be of Both then the Signes are
mixed of bothe

Analeptia is when of fume or
Smoake in the Stomake: or bith off
malencolie: the tokens are

Abhominacon to meate and drink
the tremblinge of the harte: parting
of the Stomake:

ffleg matique meates and meate
that bin malencolie do theym muche
hurte:

Sumtymes they fall nott but are
feeble and weake aboute the hyne of their
actes

This Sickenes may be of flegme
choller and malencolye and yeare
may knowe of, vgelye by theire signes

Cataleptia is of Smoake that
ryseth farre of into the heade and there
yt is rolled: and this Smoake ryseth of
a Bludde wch maketh a man gett and
burninge hoy out harde: and to have
a Swifte pulse: and often times yt
maketh him Sounde: and sumtymes
they have a fever wth itt: and dowmber
nott, vgelye they are spoken vnto, and
yt is hard to them to speake: there
eies water, they Sighe muche: And
sumtymes there bothe Stumbly:

In cure of these three Sickenes if the
par foome muche and vgelye, and strame
there feete hard vgelye they are fallen
vpon the disease is of flegme

yf the close his eies as thoughe he did sleepe
and fome nott, and arise quickly it is of
choller.

yf he wax starke & harde his mouthe a shee
and strame his hands to gether: and lie
still as thoughe he were deade and
foome a litle then it is of malencolly

They we gave the Epi ordina
tion shoulde be Dieted wt meate
tonypate Potte

thus

Hewes, foxfaut, ptrings, Cyclamus, & swyte hirt are good meates for the Analepsie and Stale fysse of fraudulie waters: Borage Bugloss, fenell: good rede wyne &c

Lett them not fayle the Catalepsie catemeate tempatlie rotes and abstayne from malburd meates as beefe yarbs flesshe yards feegges & swine Furbe: Colerabbes, Caules, pearsen, beese, Marte. vyolemeate, Sower meate Salt meate, water foules, fysshes of muddy waters, Groyndes sleepe, mylke apples bird of barlie, Rye, Oates, and pease: from Bathinge, dauncinge, trayninge & lothgerye

Youe yim Oxmell shullet or Oxmell radisse or these followinge

2 Seedes of Fenell, Sage, nettles, wormwood, avence, Egrimonie, Laududes, rarsh and Zoedo & make of them an oxmell & pull theise fower Seedes that breake the ston

To the Catalepsie yent may youe these herbes: Borage, Bugloss, rusticke & Epithimo

An other Oxmell

2 Euforbie m pulter, pyretre, Steepe & agree, Epiliall, ana and fyne dyce seethe them m Smetgar wyne and Gummye and then make yr Oxmell

After geue yim a purge

2 Aloes, Colloquint, Bdolly, Opopanax Epilobij nigi, Gumi dragaganthe ana 3ij of Euforbiu nijd make pills he drynke the Forme of Egrimonie and youe of it.

Lapis Armenij is profitable for

After my Dauds let yim blud in the good veyne: yf the Gaue must blud let yim bee ruppes in the norke

At dynner for the same disease

2 Sage a portion, of Rosmet a less & quantitie; of Castorie lesse then that and of Antimonie lesse of all.

Allutor

2 Opopanax, Castor, Sangdragon, antimon ana youe it m any manner that ye may fynd it good for reteyven

Speriall tenge for these sickes

Rodode & the tetyn, Antimony, pronye the milke in the mayo of a young Goate not tayne the Paste of a rooste for reteyven

Yrony, & Esoppe are most profitable the first to Gaug about the norke the last to eate or Drinke

Let them Smell to Rose often.

At Gnat up for Epilepsie

2 the seedes of Pionye, Sage, wormwood nettles, Egrimonie Bolus them in wyne the Clarishe the Iorse of them and make it no wyne and youe it to drinke

The regyme of Eye & the feete

Note if he be rostie youe yim a tiste of Contrayye, Annet, Camomill Medi Rote yo bid in the liquor

Yr make yim a Clysterye Suppositorye

Note that Bitter medicynes are good for the Epilepsie and for the Stomake naughtye as Gaud aloes m Lotm

Muge, fistyng Cyprisse them that gaue the Epilepsie, and Clysterye m a glasse no naught for them: Cuttle Smoke and smoke and blacking on the pulse of Gilly h. migello make full

But on Gilly migello powder them the Saonor.

Yet is good for them that gaue the Epilepsie to lett blud in the Ryght veyne be warye the fyng and the thumbe next to yelow

After cyntment that takes away and dysbludy cold Humors

2 Bay leaues li stamp them: then boile them m a pynt of wyne and of good oyle li pentill let wyne be reated

In the Epilepsie amount there is good In duo lepsie yis stomake

In Catalepsie the place not the stomake from Also this is good for ant m the yis of rotten rause: for the palsie Cramp that tooke of the rine of the more A Goute the Cymbs and for cold Goute

Dysease of the lyuer of heate

Geue hym Syrupe of violette and let hym vse Sumtymes Dia Citomon for to restore moystuse: and dia Prunis, Sugar of violette: Rosata nouelle: ~ Tria Sandalina: & Dia Rhodon abbas or any of them

Geue hym no medcyne vsyng in the grudio or Stramonye.

In heate of the Lyuer make hym syrupe of Diuretique Perles: heat is of herbes that geue vapour to open the pores Stopped wt Hartestongue: maidys heare: Cytroyl &c.

Annoint hym

wt Infrigidans gallonj or

wt vngt Populeon, oll. Rosat and violat Instrumentum vin past ath & albumen ouor

Yf he restisse make a glesster

wt Barme, herbe, hymosed sod in water. for a Suppositorye

wt Stramonie & Sugar fe Syrupe

Dia Anthos is good for this Sickness 3 ij at a time and for fowlnes after Longe Sickness

To purge the lyuer of reples

wt fine Rubarbe 3 iij in pudor Seund 3 viij. Spirituales 3 ß Lay hit to steepe in xij greate Spoonefuls of rosand or Borage water xij houres at laste then Strayne hit harde: drinke it fastinge and faste after hit xij houres then take hym warme Brothe

for weakenes the lyuer and for the Cowlye

wt Dia Pemedion, tria Sandalina ana 3 iij: the three pugil gallonj 3 ij sug 3 ij mixe them well and take three Clisters

wt tria Sandalud 3 ij Dia Rhodon abbas 3 ß Dia tragacanthe frig 3 ß. Sugar 3 iij conserue Rosat & violat ana 3 ß mixe.

The Lyuer inflamed

wt Conserue Rosat 3 ij Cesorue Nenufhar 3 ß. muste take these in yo bed in houres before you eate: and iij houres after meate at myghte: and drinke not on houres or moore after.

for the Lyuer rosted

wt Hyssope, parsley, Hartestongue ana herbe them in good wortes: let it take drinke hereof first and laste it is a good restorer

Lyuer

Yf the lyuer or longe do waste

wt of Persley roote and Fennell roote Scraped and washed & the yelowe taken owte ana M j Sprod them Small put them into three quarte of water with figge minced small, liquorisse pulured and a handfull of Scarlet braised: Boile them vnto three pinte: herbe ad finem Strayned &c: Boile all a litle strayte and lett yt runne through a clothe: kepe yt close stopte & drinke it first & last

for heate of the Lyuer

wt Lyuerworte, Smyrnium & plantayne ana Stampe them Stramine them & to the Iuice ad Barley flour. q.s. & a litle Lycor: make therof a plaster, lay yt on the right side and when it is gott put on a newe one

for wastinge of the Lyuer

wt Cicer rosede, Smyrnium, & lyuerwort Stampe & Stramine them ad to theire Iuice Barley meale. q.s & plaster wise vse yt: and when it is drie thryng hitt this iij tymes: And vse the drinke wch is last written ni the last rollinge wt heate regarde yo weare the plaster

To roole the Lyuer

wt the distilled waters of Endyue, Fumitory pendrall, fumatorye, Scabius, Scarlet water Hylles, Borage, lettis, Purslane violate, Sandis, red Sumbras and distill them to gether and drinke the water first and last.

for obstructions of the Lyuer

wt Beefes Boile them & take them with Pepper or Mustarde it helpeth the stoppinge of the Lyuer more then the Holly Sorte:-

A comfortable drinke for all inwarde heate & burninge

wt A quarte of fayre water Boile yt & skim it reserue put therto of Borage Buglos and Endyue a good handfull reserue them and bounde in a bundle: and when the Pullen be well boiled put in wt of Prunes & of Fig the stones oute and three Liquorice rootes roasted wt let all boile a while: then take out your herbes and put in some good Pepper & it will make it taste good and when yo Prunes be plumpe put in some Sugar & it will make it of a good taste to yo Lykinge your Broth is the patient tolde

To purge the Lyuer

wt Rubarbe in fine pulued and drinke a quarter of a Spoonefull troysen in A rosat with Aloe putte yo two into this is good for Dryncke of the Lyuer

Dicunt quidam quod arotum forte lapide guttatim in ferino auribz instillatu plus reforis medicaminibz auditui confert qua auditus instrumenta confortat & proinde volumus ne ad ipsum de foraneo desendat

Si autem in ipso arcu sanies manifesta sit: & domum auribz grossis ipsum depilantibz, quo mediante auditu struat Et in auribz diuersas egritudines generatt

Item oleum amigdalarum amarum & nucleatt pistatt, auribz tepidu instillatu motus aperit et confortatt

Et modici dicunt quod iste quod pro cotidiano auditu conseruatt et seruatt est sufficiens auxilium sumpta fumum aque ferventis: et si in ipsa aqua bulliorit absinthium vel pulegium vtile erit

Cauendum est summo opere ab omni tumultu, omnique strepitu molendini uel aqua ab alto cadentis & ne Balneetur in aqua lutosa et immunda ne aures intrat

ffor Deffnes

A dysa fohda yat it good so many ab a plume: halfe a pint of malmesey put in yo assa fohda set them apon ye fier vntill ye dysa be molted and still kepe it close couered: yen straine ye lyquor into a cleane dysshe / put yis eares cleane and dropp ye liquor into ye eares & make pellote of lint and putte into yis eares: couer yem warme in yis bed. Doe yis iij dayes to gether and it woare good to kepe yis yeare

ffor ye same

A greate onion take out ye coare; fill yt hole with aqua vite and oile of Baye & frankincense yen it straine it & dropp it warme into yes eares x dayes to gether and lie apon it:

Surditas

An oxen als godgeon get take of ye skin: yen slit it & dry it and put ye eares warme into yes eares

ffor ye same

A red onion Bruse them and ranne into ye fysshe: dropp in or iij drops therof into into yes eares in yis bed yis is painefull at first but expedient

ffor Deffnes

A greate onion put out ye coare fill ye hole with aqua vite & oile of Baye & frankincense yen it straine out ye lyquor kepe it close and put yerof in ye eare in ye bedd x dayes to gether

yet an onion in yes same manner and putt in Causons greate &c

ffor noise in yes eares

Dropp in yes Juice of Bay Leaues warm

ffor ye same

ffirste purge ye goade with pilles and then sure ye nigh yen put into ye eare oile of Bayes or oile of Ladyes slipper

ffor Deffnes

A yes greate of a Grey, Causon, Brock or Badger: clarified yett: Dropp in drops warme into yes eare ab yes lieth in bed stoppe yes eare vp Blank Wooll: Do yis iij or iiij nights apon one side yen apon ye other: forbeare yeare a hyne & yis nedes doe yet againe

ffor ye same

Corpa mundentur priusquam medicamina aduhibe requantur sub tribz exceptis Sunt auribz instillatus

Aliter

Simple repam magnam pub in oleo vite pulueri Iyris, Barrat lauri, ana si nimis ana yis rasuri Ij Bulliantur super prunas: exprime, seruet usui phisicum Distilla aliquott gutte in auro & eande retorno nostrato

ffor deafnes, Lumbrigo &c yet eares wormes Lodging in yes Eares

A Elud roote, and wormewood: ana stampe yem and straine onte yes Iuyce: set ouer yes fier and let it boile and season ye same Lyme stem of yes fysshe eleand: Dropp iij or iij droppes iij or iij droppes in yes eare Elud warme exellent

ffor Deafnes

A roote of Misselltoe, th peare ana iij barlie corne in a quarte of Lyme water to a pinte then strained yet & so yes stody mingle put malmesey and aqua vite ana ij & iij or iij spoonefull of yes water yat dropped out of Sallet stirred Lyme Lead on yes fier. Dropp iij or iij drops warme into yes eares stoppe it close and of yis water in yes eares stoppe it close and lay on a plaster of yes roote of an Egg and flax

and lay

and make a plaster and lay all about the eare and bind it fast wyne nyght to gether. This was my grandmothers Rule & myselfe and many praised for hearing ayde.

ffor deafnes

Take the white of the egge beate well a wey all the greene & the rest destill them rose water & white wine: to this water put a little aqua vite and use to dropp it in your eares when ye goe in your bed

Si est aurig vbrus in aure

Instilletur ydromelle tepidum in aure, & quantu poterit ophagus: & postea mingat totum in ydromelle et mouetur in isto puluere

Take Sorrell, Sauge dragons, houseleeke, Sowe thistle, Fenel rindes green aña Take & stampe them et fe pulue Subtilio. Si Sordes sit tunc purgatur tota ru ptea Postea & mittat et quando Sordes fuerit mollificata extrahatur ru instrumento apto: vel quadam pili psona fugatur: & ru Bombaco intromittatur terebintina tepida in aurem

Si rauter fuerit ibidem

Comburatur pira aurig et intromittatur eig rinib: Tunc tota enim rauteru pbtur

Ayen excelent medycine for deafnes

Take Joyste of Rue and of fenell leches aña 3ij of Dille 3ij mix. reduse the eare with a fether very rotten and then putt in of the oile & Joyse: stoppe the eare with wooll and lay on syght ü parcelle or stuf Linke and the eare: Ista m ⁊ mixtura Lillestan bloe nut and dunke of this water not distroubs whill the wax readye to die: and yt is exelent ⁊

Against infirmities of the Eares

Take Earth wormes & Boyle them in a quart graste strayne it and dropp it warme into the Eares of what paine so ever /

Maturati ü apostema in aure

Take Fitig Sutrab, Semen lini de rogue aliquantulu in molle destu mato & postea ü axungie porcini in tropa

ffor the same

Bruse radish rootes and put into the hole of the eare it breakes the impostume: exell.

Ad dolore aurig

Ruta Sutrg si mittatur nunc

Oleum Rose ru addipe auscrma in fmd: & bañ sit Cauñ lat in auriß mitto dolorem tollit

Ysi rauitate rogat mitte oleum Rutelinu & Bulli. at sinx paru nas die vela & tepido infilla aym aurig. Boyle Earth wormes not o'ild strayne it & boyle it in the Follow of an oxen & lyquor a sponge rubb dropp it into the wormes into the Eare

ffor the paine in the Eares

Take Rutam & album oyl multum oleum & postea Take Sinuell & postea Take panne extract in the eare put in rotten contrata impond & sponge lignum Bulli aubine & rall in pone:

ffor Eare wigg or worme in the eare

Take of the Jorsell of blue worte and worwood Boyle them and let in them reins & lue water dropp them in yor eare dropps into the eare so often as needs shall require. This is also good for Ringing eyes in the eare giues the medicine Exell.

ffor deafnes

Dropp into the eare iij or iiij dropps of the Joyse of a red onion & into the deafe eare: lye or 4 nights to go there it may put ye to pane at the first but feare it not:

ffor noyse in the Eares

Bruse Corona Terre and put into the eares and rose fitt.

ffor ache in the Eares

Take the Joyst of Smyrnium & olio of Roses aña Bull ad consumpc Sutn & fiugrec & pone in aure it helpeth Germyn.

Eare wiggs or wormes

Put sugg Lemon into the eare as are bitter and that will kill them as Oyle of Bays put into the eare this Boile mirre, and aloes in vynegar and putt into the Eare. ℈. or ij dropps of the Joyst of Radish or nepp. put in the eare and sleeps the worme or The Joist of wormwood, tansey, of Bathe Gelebore doth it

Nota

Yet it good to make the par smoothe after lemon putt into the Eares. &

and to put mundifiers in the eares after the worme is out

Lay a ripe mello apple to the Eare all night being warmed at the fier & they will creepe into the apple therfore make a hole about the stucke of the apple /

To kill wormes in the eares

Take the greene Bougets of Asse and lay on the fier keepe the water that dropps out: putto ℥ vny and dropp it warme in to the eares

ffor the same

Take the tender rootes of woodbind ℔ ß of the flowers ℔ ß pmd and strayne & lyquor and dropp it into the eares

Or the Joiste alone will doe it

Qua formicat contrita & in oleo ammyda Eare away. positd in solo. & guta ℈. vel ij in aure instilat. so optend cett.

Bludd & spotted kine

Take the mudd pudder of sugar and rannd and putt into the kine

For the same

Take the iuice of wormewod water cressis and rose water ana mixe them together and wash the kine therwith: and wett a cloth therin & lay upon the kine and thus taketh away Bludd and spott and payne

Swynes blud or pigeons blud doth the same put warme in to the eine

For bludspotted kine

Take wormewod greene pun fit small strayn with the white of an egge and lay itt on: it doth it in one nights

For the same

Take white of an egge fowre water ana ad hoc the iuice of smalage beate them well together and of that water putt into the eine

For bludspotted kine

Take pinke of white wyne rummy & mingle them well together in a basen & it be round trowed or a deepe dish & put therto xv or xvj yeres of saffron pounded & bigge as a groate & so hurle & trouble it wt a rod and drinke and so let all stand untill the water be greene let the greene water drawne through a rod and with a cloth stopp & let close drop the eine rubbing & moisten with dawes tongue

Bludd or heate in the eine

Take the iuice pudder of Aloes and beate fitt with the white of an egge: optime

For the same

Take Celandyne stampe it small then beate it with the white of an egge and with flax bind fitt to the eine it puttith away swelling

Bludd congealed in the eine

Take rue and fennyll stampe them together the mingle therwith the yolke of an egge then rub with the eine

For the same

Stampe fennyll: then drie fitt by the fire then mix fitt with the white of an egge and crumbs of white bread and lay upon the eine it removith swelling

Running eine

Take mustilage of quince wett a cloth therin and lay on the eine and browes

For watering eine

Take thumy out of the coombe and rasen fitt in roses: then putte double so much of the iuice of dayses leaues and take bind them a little strait them well and keepe it in a glasse warme a little of fitt and putt in the eine and wett a cloth therin and bind to the eine and bolster it well

Running fitt eine

Take tuba wash it in the waters of orrigat, Celandyne, or so much untill the water do change & rubbe then putt it into the eine

Burning watering and ytching

Take vinegar and barly therin Balustine or of plaken leaues and make a fumigation fitt it doe out

watering eine

Take rodd role leafe and annoint fitt with the white of an egge and lay on the eine then yo goe to bed

Running eine

Take milfoile bruise it putt it into white wine let lie x daies and more strayne fitt and and drop ij or iij drops in the eine

Euill humor in the eine

Take fuskel leaues beate them wt the white of an egge & rub it on the temples and bathe with white wine & leaue to healthe smitten eine

Tuba doth drie and redare then eine more then any other hurte and keepeth bake matter from the eine

DD

Lepra est infectio et corruptio humoris, et membrorum, incipiens in venis et terminat extra

Dieta leprosi

Bibat vinum priscum, et omnes res pallidas: et caseos, porra, piper et primum forte, legumina et res malentes has, et ova salsa indurata, car pisces, raucos portinas: bibat vinum mediocre, labor, frigus, & minimum calorem, fugiat locos sordidos et omnes fructus, frixa, assata et pasta deformata.

For the leprous or diseased throat

Take the juice of Grabias & Sallot oile and vinegar ana lib ss. the gum and boile them until it be somthing thicke then anoynt the gross thereof

Bathe him in a bath made of Grabias and molleyne and goose strong purged as Catapucia &c

Pilules medius valent et sunt quasi triacle ad lepram

Gouse emi his drinke

Take the iuice of Sage, Bitony, milfoile, tansy, Sinquefoile, Radish roote or leaues, Pelemary, Pellitory, origany, worme wood, Ellarne leaues, mousears, Dant de lion, red marry, ana M j of Grapes & Grabias ana M y vppe them small and presse them in cast as peeny loues, and all hott breake them into iij gallonds of ale smale: stopp the possible close, and let him drinke thereof at all times

Ointment for his ointment

Take Herbe bennet .i. dueno, galtper gum on Midsomer eue: and grind it small with hay butter and so lett it stand &c' Daube in balls, then boile them and straine them harde: then putte halfe ß mutton Bacon fryed as butter: and boile all againe and vppon it as almost rotte strew in a good quantitie of Brimston in fyne pouder and stirr it well: and vse this ointment about the leprosie.

For the same

Take destilled water of strawberies & in Ball. marie ℥iij good aqua vite ℥j & drinke therof euening and morninge and the iuice of this drinke is a remedy

for the Leprosie

Make a tosse of white bread and drinke it in the same water and eate it fast: it purgeth: keepe yo mouth, the Grease that is apon the flesh vse to take away euery morning fasting put it in yo meates and drinkes: and the Leaues will a waye:

For or diseased to the leapre

Take the destilled waters of Grabias, fumatorye violette, Lupyrow & Broome flowers mix them all to gether and drinke therof first and laste, yf the Gurle be not inforced it will go no further/

Take pulverem Epithimj vnm portion in Latte ragrino Sero rubio est optimus

For the leprie

Take milium extracte and dry interiora, corpus bene lota, mitte in olla nova terrea, et bene cooperatur ut nigil vesperet: romburd & fiat pulvis

Quoque alium mihiu in aqua sola et da pan cum tax nec dig: et sic operata alios milios ita quod patiens nigil vodat sed milius & grindet in dict: et caput vinum album in quo pone pulveris nuley rombush, quibus

For the same

Take also ij or iij stonefies, rolandyne, tuo ana iij in y bruse Salt y leaues Gartnard of Spayne & wraste them then & strayne them and drinke fast myce in or in Dauis to gether this will dryue it out then Take the greate of a blark dogge & lob Worm Take greate and beate small and ℥ij of Brimstone in pouder finy: molle these ow the fier stirr them well and anoynte the part, & laide to gether in the Sunne and at the beginning put them on a release harte and change it nott in y rockes in any worse Case to take nepte &c nt anie

vide pa. 218 r 2. in fine & 9. r 2

For the leapre done by a Jewish apon an English man.

Boyle lilly rootes in white wyne very tender: Anoint the grosse vp the Roote & in the morninge wayght not the Nayle festene Dues to gether: And after warde rose it onte in a mouthe vs Suffranout

For the leaprosie

Take an Adder out of his skinne and faste and lett bleed well: take out his guttes & Boyle the flesshe in fayre fayre water and youe him ℥j of the flesshe to take out of Broth and lett him drinke of the water Nutmell his bed Sweete: then sweate him a bed and geve him white pill: then put him in a sweete Anoint him with old veruen on Adder head broken

For the same

Take an Adder in March and boyle in a good quantitie of water vp a good store of Bittle pour vppe a pan and soode her vp that halfe be Consumed and youe her the water it was boyled in to drinke white she be fatt: dresse her & put her in paper and Butter Sage with Sage ana M ß pepper make powder and let him eate of the flesshe & drinke the broth it will wast the bad flesh and

[illegible] white wine &c

In pa: 337 I wrote of fractures but sonne I see other practised and heare I have written them vnfaunsonlie I thought fitt to wryte them together

ffirste take me aste of the bignes of the legge: then prouide Splints rutt them and of conuenient length to the place then arme the splints with flax wrought fitt for purpose the legge: and make Lyenge to rumpar the legge forwarde aboute: but on splint must not towche an other but there must bee a little spare betweene:

Then your must haue sum Polipers as in pa 337

you must also haue a strong lie made redd ye of fresh water, with water ye must make Seething hott besat ye put in your lyes, with sum of these herbes following: St Johns worte, rosemary, wormwod, rose mary, Sage, camomile flowers, or melilote flowers: or sum of these: then put in ye lyes and so make ye lie slippie: then Drawe ye herbes and lyes from the lie and put in good store of Salte when the lie is cooled and cast before

Then take a good cloth in folde, and wett in the lie hott and wring the cloth hard: the latt hot cloth lie smothe, wrapped about the broken legge very smuth without sweat or wrinkles and bynde

Besides the cloth put in the outer the former placed right vpright it shold bee: and then ye Polipers fitt it nott.

Then fower sticked rodd must bee so long that the Ende of the Splint must lie upon fitt and nott upon the bare legge.

The Edges of ye cloth must be meete to gether and wrapp outer most upon the topp of the sum boone with out seames knotte or blinges

Then take an ayer dubbed egg broth in water and vinegar (after broth is rawe) wring it hard and lay hot rawe: wring it hard and lay it so that it smoke upon the other, & latt it be so long as the first or latter longer

Now all these things being made redd y: put in good strong splint vnder the legge: and bind it all the outer Ende starde: then lay a wonde fine furle stringe: and the rest of the splints first put the End of on splint vnder the hand above starting the thrittle: and so proceed vntill all the Splints bee on the knitt the ynder first at the other End ij and ij in the middle

Remember your stringe nott on the other: yf they be a wound then shadow the water in pa 337 &c.

And sum of the ordinarye grounde rules for Soare vlcers ffollowinge

To cure ye Fistule and other nott ana ye dripp ye in course Cowrse & make yowr of ye Soard cloth and applie fitt cloth vpon the fracture now rear me: And bind it on fitte as aforesaide And let ye Sore thereof bee longer then Splints as aforesaid

ffor approuing the fracture & bind= ing fitt vp ag and fitt rules bee att ye or ye Saide Ende as in 337

And when ye open the laggs see ill bee streyghte & bind it vpp as fitt rules at the first to hynde in all the myght make a paire of Sumthe of ij handfom straight sticks rolled in a towell or sume like and long enoughe to rid a about the knee and vnder the foote and bind them about all the rest in by or fyve bandes yor

If the patient bee very costly yo may vse sum a Surgeon as in pa 343. of allom &c

If we lack ould groom & other things in fell 337 Then follow this course &c

ffor a feble & weak lyt lymb

℞ so many yolkes of Eggs as shall suffice to halfe fyll a vyoll wch if thou m wyshst yᵗ the member bee rolled: yᵗ yt bee put thon put all the vyalles to the yolkes or moore vyalles then yolkes: And yf it be very yott then put to the yolkes only not any yolke at all: And put to those yolkes or vyalles yᵒ take. ℔ mirr: ole thise ad yᵒ Eggs: Boate them m a platter wth a tinsell spritle they bee all ad one matter: then take flaxe and make thy ℞ plaggs and plaster so broade as yᵒ work and make notwithstanding thou him apply hoose plaster warme so fast as the vyalles will hold: Then take of those water and sumbyar mixed to gether but most sumbyar warm then to gether worr: roott a lymon rinde thereof and worr them roott and wrapp that rinde about the plaster and lymbe: And well yᵗ wroller m the same & worrmy itt and roll it upp. yf there be sores put sume of the moderyme wᵗ lymbe or flaxe m the sores for w ch y daubs this plaster doth marvellously resolue wthin the matter and restore the member and causeth quick blud to rwn to refresh the members discoloured yt to health But yf there be dead flesh m the sores ad to ch y daubs take it oute This is good when the ruller of the lymbe dothe forwards blathnes: or fistuls or rottenes & rotinds or corrupt & stalle then lay on this plaster fresh ch y daubs & dresse itt ad discussed outo ma day: Mr Browne

Pills of Mastick for the same

℞ Mastiche, Olibanum aña ℥j ℔ m fine powder with oyle liij Boile them until a third be wasted: this is good for weaknes m lymbes of the cause, the wape and restorethe the lymbes of the men: & it good for the Sciatica

Pills of Castoreu

℞ Castor ℥j Pils liij Boile them ad the last pills: it is had m all rotten causes for the Illiaca & Sollita passion, the factuge Lucia &c.

ffor a dide wrtgoard and deraud lymbe

℞ Seales that nere put into yuke & steept them m good wyne vinegar and let them soak well: then beat them grossly: put of them ℔ss upon Bre mug rather hold yᵉ hand under the smoake, & bouy well gathered ne yᵉ hand rubb the lyml well that rate a good while then wrape it up warm and give that lymbe to rest many hand by recouered Jarott

ffor the Lucia

℞ Dogs realmes Tormoth, Boate them m aque pontic put a sticke to pappe: spread it upon a rule or on table & bind it fast on the diseased of the hand. But if it bin long before and grown putto hath realmes & it will do itt

ffor the same

℞ Rhew, frayed that is very white & make a fine powder & mix therof a little w rosemon & powder & gard it upon the Lucia

ffor the Lucia

The causes of gangrena in y Body

External or outward cauld prym tiuus: or internall cauld antecedent

By external as by the but mor of fire, gunpowder, scalding fire water, pyke, Arms &c

Or by causes internall

moderate, extreme cold, frantasie impatient, stinging of venomous beste

By inward cauld ants rod ent cauld, amongst red are plenk full slow of gott, rotte or malignant humors, men upon nat nrs of gaile to fuls, or by strength of the pte, to sustain or digest

Or by reason neauds the nigri of pte is extinguished, through the of the debitor, that the ran not distri or rout nature upon fluds. externall as hyer bee a venomous matter inyct in all

The Signes of gangrena & Epastellus

The Signes of gangrena caused by an inflation or gott apostume are the diminished or moderate away of the pte: paine & beating or throbbing,

wtiout any manifest cause, he
tarrieth not long to suffocate, suppurate
and gangrene the whole substance
of the part, nature
seeketh help for the
and by the mischief
then ariseth on the mischief
feeleth, and then the pain, beating, pulsation
of the arteries ceaseth, by reason of the
and the
found. And the sooner he
Blasphemy, rage, folly, and franzy doth ensue.
And presently the fingers of the hand
and the leg
and the nine orifices, especially the
the sooner
expected and not any more gangrena.

+ The cure

If this disease be taken in the beginning
when he ariseth first no more but ariseth
in the arme, hand, finger, legge
feete or foote: the onlie rubbing and
chafing thereof with good aqua
aqua vite warmed both, take salet oyle
therin going to your bedde. And if
after such dressinge the ache do
worse then let him bleed the vaine
if the ache encrease through the body
fit to be let bludo

+ If the disease begin in the arme
and hande let the veyne Saphena on
the same side under the ancle bone be
opened: or the veyne Popletica in
the ham to turne the course of the
offending humor

+ But it is better to purge then
bloode (except there be great needs)
wherefore the cause resteth in the impu-
rities: by reason of the which it is more
apte to descend and fall into the legge
and feete then elsewhere about

+ But if it begin in the lower parte
as feete or legge, then let bludo in the arme
as good as nie the ache, if the legge be infected
then let bludo upon both armes: as one
the one upon one day and the other on the
nexte

+ And your lenatyues that worke
rarefie a waie phlegme, and melancholie
and then upon the second drinke of

+ If great obstructions open the
and purge againe so many as shall be
tonguette meete and requisite.

+ In Cacochimia or very trouble
bodies, bleeding is to be omitted and purg-
inge vsed

+ After sufficient purginge and
the patient the quantitie of a hundredth of
good mithridate; the next day in the
euer minde fast night: and after prouident
fomentations before a good fire let him
be carried to stoole in his bedde: after
all the affected place, as armes & legge
and upon the stoole is sudden wrapt
it worke in warme & new clothes: with
wrappe it worke in compassed worke &
keepe it warme whilst the tongue stole
rotte humors be dissolued scattered
or

+ or Euaporated. And therefore the patient good
meates, and forbeare all strong rotte. Least
therby the stinking matter be cause
neglecte the whole ymmoderate exercise

Duringe the time the body must lie
+ open by lenatyues, glisters, or suppositories
in rotte grosse pilles to the purpose

+ If the malignitie of the grosse hu-
doppe and will not be brought outwarde
then spread ointment upon leaues, and after
sweat inge wrappe it about the grosse
all night: and take it of in the sun, least
it drawe downe humors to feete: but let
it still in the night.

+ Greene vnguents are good when the
Grosse is in the bulke and rotten

Butt when it beginneth in greate heate and
red not, then before the heate and redne
be ouded, let him bloode accordinge to his
strenght: and purge him gentlie
vnguent following in this sorte: the mist be well
stood looked vnto: for it will quickly bring
the member into a dispurate case.

+ Yet note this that the ouerplus quan-
titie consisteth in the due ordering & purging
of the abouenamed humors, fomentations, sestuge
in due order and time ordained. In good
corroborations to amend the poysonous
dispositions and qualities that cleaue in the
malady: and not in bleeding only.

+ All this not withstanding if the matter
grow to putrefie, and sinke in deepe of
rubor upon the place must be searched
and stopt as in first curation: and washed
with rum sharpe and ouer medicines
with sume as ioue qualified to heale, drie,
resolue, repulse, and open. That the wounded
matter may be pulled and restrained so
much as is possible.

+ For that your poss
If lie made of the asshes of oaten wadde

Strald Head

ffor the white Strall

First strayn the heade and wasshe itt
ritt warr: then wasshe it w^t rose pisse
tubey Dent: to kill itt. Then take sweete
Stynt rearbitt, and straw them of
new wax out of the Eyst that bid
vtter Swarme: melt them to gether
and anoint the Head therw^t: / this will
strale it verry Soone: but it will brik
out againe halfe a yeare after. And if
it dost kill it do nott pisse at it doe
anythinge whilst it is perfitlie hidde

To strale a Strall heade

Take the liver of a Tyrme burk and
sethe it & it selfe: and sethe the roote
of Enula campana & them shrub in
warm water: w^t hott hand pulle off
Gregstone whilst the roote is sethe
stampe the liver and all so gether and
strane itt heade: and therw^t anoint
the Soore: if the heare goe of burne
wash. and w^t that made into pitter rub
the balde place & heare will gradu^ally

ffor the same

Take gretone croppe of Broome, and
red Dirt bothe straped right ana iiij
stampe them Small. then take fresh Calf
and Doues shitt or other shitt ana li & ß
Boile them or frie them well; then let
them cold, and put into them of the fine
pitter of Brimston iij: stir all to gether
whilst it be rolde and then anointe
the Soore.

Unguentu Catesden for the same

Take fuligines, oldi, pur liquide ana
iij: terebinth oia ß fiat unguentu & capille
cadi in pone: & mirab. dissert in sanando
& redundantia Samtatem & y capillos
sed maxime fetat.

Unguentu Aristotile ad idem

Take Suette, Bay salte, oyle, & tarr ana iij
stampe yo salt and suett to gether, then
melt them oyle tarr, and rosen iij togeather,
then putte yo salt, and suett; and stir all
well: and being well boyled, strayne itt
& putt it in a galli pott: Clippe the heade
close, and anoint therw^t and upon the
ointement cast the pitter of Elde burnt
And when yo wasshe it made of
the greene of Elder that was made before
and Nettle Seede: and to that lie ad yelke
of Eggs & Turnype & wasshe it twise a
Daye.

ffor the same

Take Lampe shelle ib. fure water lib. stir &
boile them well: let the roote ad quart
Silver morfeed: stir them & anoint
therewith the heade.

ffor the same

Take Gomlorbes stampe them small upon a tyles
warm rayme, and stamp them Egrand: then
strane itt. Anoint the Sores therewith
bynde. Then washe the heade w^t hott rose
pisse, then the Scurfe will go off: then do
y anoint it w^t the Ointment whilst it bee
warme

ffor the same

Take ffrogge Butter, Black Soape, and Brimst
anoint the Sores to make them supple: then
put fure water in a pott, and when it is
boyling to Heate, putt in aurpigment in fine
pitter ℥ß stir it whilst the water seaugh
trillon: then put in quick sillver: soaste
the heade w^t this water whilst it be warme.

ffor the same

Take croppes of new greene Broome ly rutt
it Small of pure greate ana ly Beate the
to gether whilst it be greene: Clett it lib &
Boyle: and boile it to a greene ointment
& strane it harde.

ffor the Same

Take greate of Sesamabes pterib: temper
them w^t pitter of Brimston Scrape the Sore
and anoint therw^t

ffor the same

Take first wasshe the heade w^t strong lie & ad
rose pisse then Scrape itt: and rast on the
pitter of greene croppes & dresse it so
whilst it bee warme.

ffor Sores in the heade Sovereigne

Take Eredymus and anoint the Sore therewith
evening and morninge: after it is thus
Scraped & cleansed dense wasshe the heade
w^t strong lie warme xx^ti dayes: then
rense the heade w^t rose lie: & that dryeth
out the Sores: then lett it dry and a
noint it w^t therbyme: and it will heale
no more.

Ad tineam Capitis

Take Olleum Laurini ℥ß Lardi veteris ℥ß
mistr. & simul coque, adstrando iij in septi
mana & abluatur forma pregnia

Ad idem

Take puluis Bryonie trium mell mistr & applita

Idem

Ablue pa: rapuit rad forma. q. dieb & forma
columbinu & pone in olla rad cattle forth;
Bullientes ad spissitud mell & emplastretur
in vase in dieb

ffor the same vnguentū

putte into 200 gallonds of water if
youre Sirk not be bigg enoughe, or
more; let them boile fodor Edward
at the least, then rense your water
from yo fet rotes bringe a Sypo m
to a watte. Then make redand yo furnes,
& put in your liquor againe: And for
every three gallonds of water put in
one gallond of Cummy: Then let all
Boile gentlie, and still Skim of that ri
ascithe, and especially a Bearbis skum
so longe as any skum it to be seene on it
litt. Then abate yo fyre and put youre
Liquor in steeles to coole: and let it stand
3 tooms dayes at the leaste.

Then put it into youre vessell and putt
to eyt of good Barme & gallond at last
and stirr all to gether, and so let them
stand a daie or ij, then skimm of the
Barme, and let it stand and stirr eftes
so let it stand an other daie.

Then putt it into your vessels, and dresse
them with clayes litt vessell & fill them to the bonds, and hang lett
purge: And when it hath done purging
and Emptings stopp them the Bunge
sessell. And in one months it will be
dyr to drinke. yo vessells must be fild
after purging att the same liquor.

This was the Receipte of the abbe,
of greate Malverne who paid the
fine for his Sexton Tunes of the
Meth-Eglin. note to water & Cummy
and Eglew to Eglantyne.

Ffor a mans pounds of the Meth-
Eglinge for one Eggeshedd

Of Eglantyne, Rosemarye, garden hyme
wylde hyme, Sythens woorte, marigold
flowe and all, yarrowe, Betame, Lyverwoord
Parlestonge, ana M ij. Maidenheare
Egrimonie, raisins Benedictus, fenell
seede, ana M ij prolette, Ludwoorte,
Borage, Bleawbottles, ana M ij. Rotes
of Angelica, Elecampane, galengall
ana 3ij. graynes 3ij. Cummy ij gallons
water one Eggeshedd & Sixe gallons

Bmde

Bmd your herbes in Bundles, Bruse yo roote &
boile all in the water vntill they be verie soft
and tender: Then let yo liquor run through
a Sparke sieve into vessell to coole vntill it be
blud warme. In the meane time have yer
yo Cummy in some pote of your warme liquor

Then putt all into yo pate and
worke them to gether verie a Bowle a good
space: then asswage of a nutte end egge wall
som therein, yf it rise it is then perfect, yf
not put in more Cummy and gentle it
to gether vntill it rise heard an Egge

Then boile it againe and skimm it
so longe as anye froth will arise, then
let it coole blud

Have redy a Eggeshedd vessell in
here shall bin rye nie or heard, and on of
the Spades must be oake, yo vessell must
be first Seasoned with some of the first
liquor Sett here vessell upon the ende &
fill them with the liquor, and let it coole
and then when it is cold couer yet with
a cleane cloth; and on that bordes. And here
let it worke fifteene or Twenty daies
or vntill yo see all the froth cast to the sides
of the vessell: then take a coard that froth

And put in of good Barme a
pottle at leaste; and worke them to gether
with a dresse a good vessell

Then couer it againe and let it
worke iij or iiij daies, vntill yo may
Smell it eger and spreade yo Barme
loose Starke

Then take that Starke Barme a spoone and
put in mault and stirr putt as yo did
before: And then let it stand against
vntill yo may Smell it eger and lay
Barme as before

Then taste it yf yet be to sweete
of the Cummy, put in more barme and work
it mall thinge as before

In this doing yo may stand the taste into it
mylde & when it pleaseth you pearte
the Eggeshedd heare Hand boards about
bottom and draw of into your liquor &
putt it over yo vessell keepe it
yet must stand scant for a hyne after it is put
in the vessell and then stopp it faste
This may be kept fyve or Sixe yeares

By doeinge this preparation yo
may make a little at ones

Pulvis sine Pari

℞ Auri pigmenti, spumæ aeris ana ℥j, boli rosei combusti ℥ij, aluminis catinensis combusti ℥iij: quilibet per se subtilissime teratur sine lapidem molarem: quibus bene tritis simul molarem inuicem conterantur, donec bene commisceantur, et in satculo de corneo reponantur et bene reseruentur. Quamquis et diutius seruare possit in magna officinis carnem mortuam aut superfluam, aut putridam, mortificat et odorem.

Si quis quis in plaga uel ulcere passus fuerit, carnem mortuam non habentem, non facit damnum: sed pulvis sine alio adiutorio optime consolidabit, desistet abire, et sanabit: non tamen sine morsicatione: quia pro certo, si iste pulvis non esset mordicans, omnis corroderet potius modo quo.

Quando iste pulvis donatur in ulcere uel plaga, mediante spica donatur si carnem. i. humo, aut stupa lini in fortioribus minutim in spica: et spica donatur cum emplastro: et bene ligetur et sit primo per 48 horas aut amplius sine removione

Cum autem emplastrum removetur, et carnem uel superfluitas lini pulvis spica ponatur, si pulvis per se in caro morte curata gratis non, bene expeditus est in gorio.

Item debes imponere pannum de sanguine, pannis, in carnem, vel stupa, lini, donec fouea vel ulcus in toto fuerit carne

Si vero in prima removione pulvis, pulvis impositus, in carne mortificata non curet gratis; tunc impone pannum de sanguine sicut ante dictum est: et spica pone emplastrum, et sit removatio ut 24 horas

Et nota bene quod carnositas pulvis in pulvis, vel plaga, vel ulcus positus, non removetur antequam ponte operet: ut on lake pa. 19. 20. 90 and so thalo upon ni title fistulas pa. 23. 24 90.

Qui must for sine pari tonge Et bee written before out of ye order in thy auct Dolore Et hee lookes Adhibet instant ni drossinge of wounds and sores, wine Et saue observe as in pa. 24. Et saue written

Ye seon order of often re moving & drossing of sores, doth varie as followeth, when I do see ye done words. in ye chapte of sine pari next

Est etiam alia regula in qua sole debet practicari moderni: non detrahentes sed stolidos, ne tempore tali error subsidi: in trebia removendo plaga et ulcus, sed et tales cyphonem non expedit sed impedit in rationibus offerendum deum. Et sit ratione quia calor naturalis in corpore, qui principalis curationis est actor, ex trebia removendo a plaga et ulcere, operatur et sit impeditus digestio humorum ad plagas vel ulcus remittendum quare

quare non potest fieri sanies generata, et per quem non plagam purgatio sed humores superflui ad plagas manentes retinentur, et agravantur magis: fit magis pus tumor in plaga augmentatur et summus dolor. Quia alter alterius est offensio quare pulvis vel plaga mundus esse, et tabescit et tabescit. Et pro tanto quia in iuvo natura debet obsidow quasi aequalem, et superfluum humorem emittit

Et sic multotiens de lapidibus nisi sonorum, mirabilia mala expectantur.

Pudo Gallong non rendabe sit plaga quia sepe transfertur: Et hoppo riat. Dunk pro rout pulvis ad curationem; in quo nudi animi frequenter removentur.

Pulvis tamen abigant causam deputant tales sed obs Diligentes, et sedulos ad opus suum magis proficerent ut in paucum laborare requisserent.

Item tu tempus validum et plaga fortior curit, quod separ removeri debet ut post dies vel ter in die, quia tales capaces spatium sine mundi et in rudi, quare pulvis vel pilus non tantam sedes emittit nec fetorem facit et tanto pejus: mala sunt pulvinaria ad que curant humores atri, calor ibi abundans ad recurrendum in faciem; Sanies enim est maxima assumptio Sanitatis.

Quando omne tu pus, sanguis in humoribus remotis et calor naturalis digesta est, ergo quippe pulvinaria bona

Unde vero et malignitas mala Est etiam alter error in trebia removendo plaga vel ulcus: quia abscindit pulvis, pilus et se consequi plagas pejus; mutat colorem et se consequi plagas pejus; mutat colorem et se consequi monstruosis, dilia, tela, cometa. &c

Quando plaga vel ulcus bene sine omni errore videtur: et tumorem in eis qui exsistente evanescere, et dolorem, mitigari, et ad sitis evanescere, et calorem removendum: non exeat prestidem et calorem removendum: non exeat Dubium quin si par bene regatur (ut dictum) salvus est personibus. Per et pus in nostris bene determinet. In somnus enim operatur natura malig intra digestionem rationis tabett natorum corpore aut in membra exsistentis.

Itaque uter impeditur summus dolore, et ideo laboratur pro omnibus ut dolor mitigatur.

Et sicut quod in omnibus natura est operatrix, moderna vero ministra

Commendatur prima bene memoria qui per duka sunt de removendo plagas sine pluribus rasuris non solebam removere. nisi de sordis in terra et per prolixum in tribunis tibiam pro nos pejus ordinem in capitis sine pari.

Yet pla. Treacle, wole pauntya plaster taken of & and pipe and on ye same manner & day

But of mirone expendunto Et saue set forme that often dressing and dressing re quisite as a sore ulcus Et saue written and sicut true

vide 335. ffor the Sweating English sickness we of warrillon shall make mage and therfore I wrote it here and all to gether where turning the leafe to looke it

Take one handfull of Rue Ellarne leaues of

the bygger leaues of sage M[a] of Sage M[a] mill them small bruse them in a mond but the first put the Iuice so strayned into a quarte of white wyne and put also them of the muste grated a groth quantitie. Let stande all to gether one night: Drink of this wyne fasting Rynd morninge to gether then

Thus to heare set further in print do 1562

for a Disorder of the Stomake.

The order how to rest them that

be sicke is treated set downe in folio 336

and must bee strictly followed

And to hand shun about the sicke

that work on them if the haue or bee

longinge in the sickness to keep them be not

too earnest with neither drinke nor eatinge

nor suffer them to sleepe for if the sleepe

retayne by forced after ye recouering the

euill by eatinge suffer them to eate no

meat stronge as the Dutchmen for it will kill

them if they eate before the stomake shall

then if they eate after they will by force of the meat

abate the taking of the meate & the body

dryed then the may sleepe a litle

The Sweating sickness

The Sweating or notenge sickenesse

as the Dutchmen call it is not minute

about iij or iiij houres before the

Sweating vnto which take good to the

patient, for one shalbe in greate

perill for iij houres or there about

and be not to be medled to the before the

Sweating: And then ye shall see

the pacient to towards the goeth then

geue him a Spoonefull of good aqua

vite mixed with sum treacle and the

vnto mixed with sum treacle and

aque vite then ij or three tymes and

by to rouse him to sweate: if then

he bolle vpward or downe or doune

wards it is a good signe of sweat

then and alwaies keepe head and all the

parts of his body warme & let none

of the be bare but his face: And then

he be bare but his face: And then

he gate sweat make abate the heate

by litle & litle but not suddenly

by litle & litle but not suddenly

and let him take very litle or no

nothing at all at his best

To make him sweate

Make a possett ale cold let the drinke

run through a reasy sieue into the

same drinke put many yolkes and

almonde mylke formelle & boile litle then

let it run through a reasy & your

sweat possett drinke warme & reasonable drought to make him to

sweate: then in the sweating

Take Borage Ladys fumitory

Dandelion, Scorzell, violet leaues

Sinquefoile & boile them in possett

ale as you did the other & your hand

of sweat ale in the sweating warme

or these maner of

Take a quarte of ale sette it to

it to and put in sum sugar & marigolds

M[i] of fennell M[i] the yolkes of eight

M[i] of fennell M[i] the yolkes of eight

hartes yonny leafes of violet leafes

boile all in the ale pulle them

als be wasted then strayne it and

geue a good draught warme

Remember that during the

sharp of sweating drinke the pacient

small nothing else nor drinke but

of the drinke about written

And shut in the sickness

Roate Egge Sinfoile: yo not fume

parsly Earle nor eate at night and

gather the Grapes in the wane of the

Moone: keepe the head warme and

sweate your face or neare sleepe

sleepe not double yo is sickenesse

nor ffire abroade shunne all

ffor the Sweating sickness

Take the medicine in the next page

2 Rudues turmerike the weight

of a rounded groate & shredden fine

I did geue the medicine that

doth next follow for all agues

Lett and tolde: and it tooke

very good effect to her & doth

purge & coller well

In the Books written by one Anselmo Doctus de geminis hoc ſtone cauled Gerald ostracola: is ſ must vſed for knitting Boones astracola: and lapis zabulosus.

℄℄ In Broken Boones there must bee one to folde the body & one to folde the member & ſtrayne it att one length that it may be platt as it was before the breaking

Then the ſetter not both his thumbs must put downe the bones and place them right to and ſo placed putte the plaster close to the legge, as ſmoth as the ſkin.

℞ wax, proſmo ana ℥ij melte them together, ſtir them well & ſtraine them: then make it a roll.

Annoint this Salue upon a linnen cloth vppon them: then cauſe bodie rubb Bole in pulver ℥j and mixe it on a trayy upon the plaster, then make a round hole in the Bole, and therin powre of oile of roſes, and of lynd ſeeds, ana q.s. to temper the bole and oyle wt a knife or ſpatter like to a pultes knitt: then couer the plaster all over wth the Bole knitt: but the plaster muſt bee plated upon the topp & bottom to lye Smothe upon the Lymbe and that it may moiſte ouer all the edges (wch muſt bee very ſtill kept) the legg ſtrayght: then ye muſt ſplint them rolonde with thin ſplints wrapped in flocks and then bind it hard wth ℥ij ij or iij bands ſtrong and good &

When Dayes after take off the ſplints and plaſter & ſee the leg be ſtrayght & bynd it faſt as it did before and meaſure the Lymbe juſt as longe as the ſound one

If there bee a wound in the fracture bind it ſplints laſt & a fold in the plaſter to ſtand and dreſſe the ſore & ſue day you may dreſſe it and not take off all the ſplints &c

The plaſter being put on you need to board nothing: for itt doth make the ſtaffe ſtrong and defendeth the lymb from all evill accidents as I haue often proued & now ſet it forth to gods glorie ℄℄

The reaſon ſo ſubtle that I need not add any other: yet I did thinke it needfull to ſet it

Ad fracturas oſſium

℞ Dus gabo, raſur, roob, axungiæ opopon, pruduc acet, dragacanth albam, pulv pinoll, ana ℥j mirrhæ ℈ß Lmaſt ℥j. Diſſolue gum in acetto forte ſoſpue ad atth ſtrepor poſſe addere roſ mand, et puluis pulu, rorida et ocy ollmaſt ℥ij. Diſſolue anthr bulk ſ= ſime igne ut roburet unitz ſpiritib volat mis adde gum & mox ubi ſtet olido Linj & malaxando ſe cumpl

conſolidat ona vlcera & vulus et fracturas in brevi ſpatio temporis

To set broken Bones

℞ milk duſte like maſtick, dragagant, gum Arabick and ℥j momia, Bole Armow ana ℈ß all in fine pulver mix all wt eggs of Eggs, to the hart nes of Gummy & apply itt

A ſtanter for broken Bones

rogues of Eggs ℞. Bole ℥j mix well ℈ß, turob nut mod a little conſiſtence ſpread it upon a linnen cloth and apply itt. vide 262. r. 1. m 2

Stamp wood wt the rogues of Eggs and apply itt, to the bone; it dose heale and reaſe the ache

The plaſter Oxitorum is as good as any but it will not turne of baſelye and my firſt will not ſtick: dureth the plaſter two dayes ſhift to ſee if a fracture in the arme take the hand ſtand on a bord or table and the fingers ſtretched out ſtraight.

Take 3 quarte gallondes of Nere beare from the vate: put it in a vessell fe at with gode mr or 6 gallondes put therin Swecte marjorom yssope, fumatory, wormewod, ludwort docwnt, wod Betonye, Strabia, tyrrinony ana M j Dock rote & be yealow the rotes taken oute, the rote of madder ana 3ij polypody rote, Sarsa perilla ana 3ij her= modartibs, Cytisimū, liquerisse ana 3ij Lignū Sanct 3ij, fenell sedds 3ij, fetnig galingall, Setwall, mace, nutmegges & cloues ana xij d waight: Bruse that is to be bruised, and put it in the beare: in the forste of Stroxbye grab and water vessels and a pype, Seeth 3ij: let it coole in a vessell. stopp it close wethin it 9 daie: let it stand by daies: then drinke it: in the morninge a gradale draught fasting in weight yo must put the pulder of fowrd stepped in a little cloute in pottes iij draught at 5 graines:) in stead of the same drinke all night & trussed oute harde: and drinke an other draft at noone

ffor the Stroxbye

Take a pottle of rosey rearefied but therin Seeth 3ij let it infuse in the ymbers tooke forword: then put in water vessels M j toppe of hipt a fore & rosemary; of the rindes the dried the out side pared of, of liquerisse & anisseeds, ana 3ij Sassafrab 3ij: roseno the stones oute or rather of the Sume stoned M j, prunes the stones quarte viij marden Beard 3ij Boile all to a quarte: take of this ordey 3ij Scondfulls of the forst of Stroxbye graby iij Scondfulls mix them and drinke it fastinge: and ab mitt last at night & a gainst this be stout make merie.

Stroxby Ale for the same.

Take polypodie, Spikenard, Sqinanthi, gras margarin, Setwall ana 1/2 d waight of dry seedes, Saxifrage & plantin 1/2 d wai= ght of eache, Cinamon xij d waight. Seeth loaues and rodds ab mitt as all the rotte grosse beaten into pulder: of Stroxbye grab stamped halfe a pott: put all into the gallondes of Ale strong and good: & in the mr day tender the Ale with fresh Barme and drinke fast xiij dais: it purgeth & cle= nseth the body, purifieth the blud, helpeth stagnat colde rotten & maligne, and helpeth all ouer dispotion of the bodye, it purgeth the veins defendeth the stomake: Let sober wise youth make a good pulder &c.

To cleanse the Bludes & the Stroxbye.

Take Stroxby grasse, Samfe, ana M ij Betony M j worme wood M ß cloues pulred & a little waysted the rinde of the Sume stoned lett put the into a quarte of Beare stoppe it close: when yo drinke it strayne of the strayne &c

ffor the Stroxbuthem

Sumtymes the disease is in the mouth and proceedeth of infection of the Longe and is caused the Stubucke Distill Stroxby grasse and brooklime and drinke the water cold mor= ning and fast morning

The greene salue for all Sores

Ꝛ the Herbs Balme, Bitony, Rue, worm wod, Feldrand, Smallage, wodbind leaues, Camomill, Sage, Samuel, mille morbia, Bredon worte, Clouers all heale, Herbe walter, rose wortes,

stampe and put ye Herbs small to you take may, Butter vnsalt vnsalted and fine sheare shot, shut of ye pipe or of a Goate, or of a heifer new kilde: and Boile ye Butter shut and Herbes verye well: then straine it & to ye strained liquor put wax, Rosin, and Turpentine Ꝛ of each an vnce, set all on the fire & when ye wax and Rosin is melted and boiled well power all in a pott or in a Basin they first anointed wᵗ Creame

Lab in pa. 53. for ye Ladies Edwardes and Lords. salue of Sores

A greene Oile

Ꝛ Oile Olyue a quarte and put to it to melte wayne ly[ttle] & take wormwood, sothernwood ramonik, Fenn, and Sorgeante tongs of each My put yᵉ in small as yᵘ can & bruse them and put them in ye Oile wᵗ Milk rose leaues rew yᵗ rose and let yᵉ all stand and Drye Seeds then Boile it softly putting it to ground then straine it and keepe for yᵉ use

Sr Edmund Bruges folens sfriends & Contembes

For wordes to be not for any greate Lickinge Ꝛ God vnto them but for that he hathe put any on may make a greene Salue and Oile those bee olde: But new better Herbes are knowne

pide folio 117 And to make a greene oile for bruses according to ye Oile aboue written.

Ꝛ mallowes: grounsill, nettles, Ellarne leaues: nettles Bitony, and the follow Operatiue and Mij and make it as ye greene is made in all points it must needes be good.

To make oile of Herbes

Ꝛ the Herbes bee them in the shadowe to wither put the withered Herbes in a strong glasse or a tynne possell the same being full put in oile and let ye glasse and oile in a pott of water and Coare let it boile my Herbes let it coole take out Herbes & put in fresh more & boile it again and for to coole, Lynseed oile is best: and vnto those, vnto pony and violets are good for inflamations made wᵗ Lynseed oile & or as in ye next folium. 3.

For wombes inflamed

Ꝛ Lynseedes in fine powder mixe & put to Plantan water vnto a pultis: yf ye inflamation be greate ad to mucilage in pulis and make a thin pultis spread it upon a cloth: put a cole in ye middest & lay it on ye womb & pultis ye inflamed round

For Inflamations

Ꝛ Olde fine thing ye put therin mingle Sheep suet small My, let it boile an hower, let it cole strayne it: put to ye ld Sallet oile & stir it qᵗ pultis fitt to looke white like milke wet & louke in ye same and apple & vngen ye Sore rubb them a whyle

For to cole inflamation & CC

Ꝛ pomy wortes .i. pmbolion ponewes Oxeyes, Singreene, potte mosse, Stramonia, lettis, ram leaues that grewe in Lynd either that wᵗ ye vegetis or yealowe flowes Camocks Nimphea: violet leaues: Henbane leaues and Mij pun them with Lege greate and let them lie & cord being made in Balls then Boile them, then straine them Curde & boile ye straynes & put it with a nuce nuce: and yᵗ may be boile wᵗ ye same and Lege greate or ye Curds may be pmd & strained & ye first boiled wᵗ ye greate: and ye white mosse being put in it wilbe ye colder: ye Balls must be kepte close couered, vnder they lie and presse: & yᵉ may make it wᵗ Butter for ye: or wᵗ oile but I like best Axungia & yᵉ may put in a little waxe & sumᵉ Suett: it is better then pomkeon C

Vngentu Rosatum Refrigerett

Ꝛ terure, albumi ouorum ana Ꝛ oley Rosat ℥iij rose Ꝛ m ostate, Camphire vnce ij ℈ ij must fit: ye iij aboundge rose and pared put in a mortar, take out leaues and pound in a mortar, take out leaues and pound them, then put in yᵉ terure, and oile Camphire, grind them to gether then temper it, grind them to gether then set all on the fire and melt them with stir and mixe them well: and when it is colde put in the vnguentes of Lyme and mix all well: it cooles ye Sore Scorbs and burning and stalding: and ye Emrods cooles oile of Roses 230. and 34 bi

CC For Inflamations or Takings.

Ꝛ plantaine mallowes, Daisy leaues & roote, Elder leaues or Inner barke, and Wilde leaues ana Mij Rhose thrum small & boile them wᵗ Rose Liquor and Mij of Goat tallow two wood fide, strayne it and Linen cloth & agayne it twice & Sugar will serue, Ꝛ Rubb bone oile howle a woman vsed this to cure Rotten hand/

To make oyle of Euphorbiū

℞ Euphorbiū Elect ℥ß make yt into fine
pulder. put to yorto of yeard oile ℥m an off
malvasie ℥ m a strong bottle of glasse put
to ye bottle in water and let ye water boile
vt ye bottle and oile on ye fier and a glesse
and it will be ffitte

An Excelent pyle of wormes

℞ of ye greatest and fattest wormes you
can gett m a yeare yeard m Aprill or
maye: wash them well in cleane water
put in a cleane Basen: putte them dun
masse of a foot & more let them lie in
ye same dayes: then put them in a strong
glasse that will holde a quart or more
ß that ye glasse may be but halfe full
stop it close and aboue ye mouth bynde
double Bladders very close and fast ye
couer ye glasse wt fyne paste that it
bee ij inches thicke at least: sett into
an Ouen wch Bread is wthdrawen & take out
ye Bread let ye glasse stand untill yt be
colde: Sum out ye glasse in after Bread
drawne out & ß from hand to hand
vntill ye wormes be runne mad. And
then strayne it: through a strayner
and like of this liquor put a Sawcer
m pulder ℥ß stop ye glasse close and
sett it m̄ some cleane plate for gilbostlie

An other ℞ of wormes for wood
and Tyderwyd water

℞ ye greatest wormes ye can gett
putte them masse to clense them bloud
then keep m or my Eggs rosey yeards
& crumble ye yolke very Small upon
& amongst ye masse for ye wormes
to feede upon: Then yme ye ffoss some
wormes & put them m lij ℔ of oyld ale
Rosbs. Boile them gentlie vntill ye sub-
stance of ye wormes bee m ye oyle
then strayne it: And take a pounde
of this pyle putt Fennell & Saxefrage
m fyne pulder ana ℥ß: & ß hyssop
rosey waine and it stoppeth ye Sinue
water: yf it were destilled it were
ye better vide 346. r. 1 in fine
vide .74: r. 1. & 2: 156. r. 2: 146. r. 1. fine

For Synnewes vntt

℞ ye greatest wormes ye can gett and
bind them to ye Synue and Sore lett
them lie vntill they dye then applie
more hyssop wormes so long as ye Sore
and when they lyue ye Synue to vntt

For Sore Ioynte

℞ ye greate wormes put them into a
glasse stopp it close: couer ye glasse wt
past: sett it m ye Ouen wt Bread. Draw
out ye Bread and let ye wormes stande
vntill ye bee cold: Anoint wt ye
oile wiped wt Shiculus oile

Luratello his Ballsome.

℞ Iuy vntt Small, & put in a pann
ouer a gentle fire to melt ℔ß ye best
oile ℔ij being well beaten wth out ye
ye Sarke of Roots Turpentine ℔j
washt in Redd Rose water ℔ß: let ye
boile well together stirring them conti-
nually wth a wodden flice then put
in Redd Sanders ℥ij in fine pulder: &
let all these boile wth continuall stir-
ing, till the wine and water be quite
consumed, And when ye see not much
fume arise it is enough, take it from
the fire & strayne it into Galley potts &
elder it is the better:

It tryed any bruise outward
by anoynting the place very warme:
Inward by drinking the quantity of
a Wallnutt molted in a Draft of Sacke
warme or broth 3 or 4 mornings fasting

It tryed ye bitinge of Mad Dogg
or any other venemous beast Drunke
in the like quantity & manner, & the
place stunge or bitten anointed wt it.

It tryed ye Sciatica, Stitch, or any
paine coming of coulde, by anoynting
the place by a fire, & then laying a bagg
of warme ashes on it as hott as ye can suffer

It is good against ye Plaque Drunke
in Sacke & anoynt the nostrills wth in before
ye goe abroad, & burne it as a perfume:

It will stopp bloud by dipping
linnen in it warme & binding it reso-
nable hard to the place

It helpeth Digestion after Surfity
being Drunke in warme Sacke.

It tryed Burning and Scalding
after ye fire is taken out by anointing
the place or dipp linnen therin clapse
it, it healeth wout a Scar:

It tryed any wound or Cutt
wt out Scar, applied as a plaister and
ye wounde & anoynting the plaister, if ye
wounde be Deepe ye may put in a bed
of linnen tornyed wt ye Ballsome, & lay
a cleth dipt therin on it.

℞ Depigment m fmo poulderi, pustartt tyme grind them to getger, and temper them with the white of an Egge with out to hurt nor to them: put this upon the place wch yᵘ wolde have the heard away and there let it dry: then wet a clothe in Gott water and with yᵉ finger take away the heard

For the same

℞ Stronge lie, ℈ or pigment ℥ j. pustartt tyme ℈ m iij, ab a Spoonfull Eggs make them into tyme platter put them in the lie & let them boile until it wax blewe: then take it off and let it coole: And therewith anoint the place wch yᵘ wold have the heard away: it will in a day

Ad pilos deponendum
Pistotrum

℞ Sabin, talcin ana m ss, auripigmenti ana pulverentur: roque diligenter in lixivio forte, digitando forniter ut bene incorporentur, ℞ quatuor vel quinque ebullitiones: ab igne deponere ut calor non sedeat. Et inde loco depilando in aqua calida fumiga, et fomenta, ut pora cutis aperiantur: postea loco depilando in loco remoto ab aere frigido, ne pannus illinatur: postea in aqua tepida pilos ita humectatos, polenta tepida: Et caue ne pistotrum minus diu maneat sup locu, sed apposito cito tollatur, ne cutis pilos simul cum cutis auferatur.

For the same

yox Smgultus

Smgultus yox inge rumote dyuers
wayes. as of to mnig that ng and drynk
and hys yox inge rumo ys romonly ossed
hys that ng and dr mke nge: this may
holpe by making hys pte agast, affrayd
or astamed, asshamed. or sygh gladd or
by thrustyng hys fing ar nte hys throate
holdyng hym towarde a thyg vngle
and yox ng may rn of corupt humo
ni the stomake; that makyth the stomake
reaks e folde and hys yat rumoke vnder
before meate tyx after and then may
be holpen by vomityng or pvokyng
the offendyng humor. And then after
ye ue hym good meates and drinkes e
lett hym beware of surfet nge:.

Sumtymes it rumoth of colde
in the ouer pte of the Stomake
and makyth that parte not table to
dolyuer the corupte humors that
are in the Stomake

Sumtymes of wynd and fooldnes
in the stomake and that may bee in too od
na mors. either of cholde wynde grauels
or of sum sickenes, as a flux or a feuer
and vppon it yf of a few it is daungerous
And yf it rn of a long flux the
ye ue hym romforlable meates as
Broathe made of hens flesh capon or
And then geue hym dia pondion
or dia tragacanthu: and sprede
of prolette on the mustelage of ysop
And ysame And apply vnto his stomak
Lynnoden and fomentt with oyle
plaister long in oyle and anoynt the stomak wt
Oyle of prolette and oyle of Roses and
yf the yox rn of sharpe meates the same
lenge are good
yf it rn of Emptnes geue hym sugar Roset
and rolde pordes as purtelan or lettis
or geue hym Sewer plumbes e such like
Borlo Cortis and prolette in mak
and wett a cloth in hot water and apply
it warme from the mouth of the stomak
downe to the nauell all ouer the belly
yf it rn of cold humors geue hym
role lenge and purg hym
yf it be of rolde geue hym ox inoll Rosmarie
first and after purge hym: then geue
hym the Iuce of wormwod wt sugar a litle
or two boyled in whyne and put Cloue nuttes
and anoint the Stomak wt hott oyle as oyle
of Bawes e such other
yf itt rn of Blude purg hym wt
Cassia fistuld e warme water
yf the Stomake be hard
And dabbe take out the Stoundes grind them
wt frose greate and plaster wyse layd
it on the Stomake:— and it shalbe gett:
and the yoxe

for the yox
Make hym Snesse or
hot geue hym gold hys breath
for the yox
And a good handfull of Sage pun hitt &
Straynes ouer the fyre and wt hot
fyre and als make a possett & Smit
the als gott
for the yox
mix the fine pulder of Bytony wt Suny
and bake them
Borlo Sage in water and thrust hands
vpp aboue the water in the mans bason
And mussedes dryed and Smolled vnto dep
Colpe the yox

et stro / or fresh to the body
Or apply a Cappyglass to the
Regio of the stomak it shalt

The Dropsie of the mother

This disease may rise for want of her naturall purgation: and then she must seeke for purgations or she will not be healed

And it may rise of flegmatike humors: and of winde in the mother and then may swell as it were a woare or tylde. And this swelling is easily sodden from being unto tylde.

For this swelling ariseth suddenlie: and the tylde swelleth by degrees: and this swelling ariseth and falleth againe: the other manner this swelling remoueth from place to place: the other doth not soe: And vnto this manner vnderstands: the other rotten both by day and night

In the dropsie the woemans breastes are sette and ill rulliered: in ordinary tymes the breastes are fill and rose rulliered

And there is greate differs betweene the dropsie of the mother and winde in the mother: for winde will cause lie swelling away the dropsie will not: for the wynde is apon on side: the dropsie goeth all the mother to get all this infirmitie looke in the precipitation of the mother.

A Suppositorie to purge the mother.

℞ the meale of barlie and myxe it with Gummy thrift like paste for bread and rowle it in a fine linnen cloth and put it vpp into the matrix and let it lie there all night or longer if need be: yf it make the place smarte or long lying there: annoint the place with oyle of roses or oyle of violette.

Cleaning of the mother doth rid of a collerique humor in the mother and the signes are burning pricking and smarting within:

And the mother may have pimples scabbes and blaines with mirth stinging within then wash those pimples with a paste of wodbind and milke mixt to gether or put it into a pessarie.

CC ℈ did giue a woman that had little red pimples no bigg then the heades of little pynnes with much smarting and burning: quick water with a little tramper and for being washed there it was healed: ℈ bruke for sure for ℈ did neuer heare for tromplane against.

And sum giue the marrow raised fyste to annoint it with all: And some with fresh or may butter

Cleaning of the mother doth rid of sharpe rolling humor in the mother: and the tokens are of smarting, pricking and burning in the place.

For the Matrixe

℞ album graecum ℥j or ℥ij giue it with Lilly water.

Ad praecipitationem Uteri quaerit

℞ fol: lauri, mirtillorum ana ℈ß Sem: pastinacae domesticae ℥ij mascerentur, postea quoquantur cum vino generoso: de colatorio exhibe mulieri ℈ij reiteretur ac potio si opus fuerit/

Suffocatio Matricis Quaeritur.

℞ fetida bryoniae q.s fingatur pillula 10 vel 12 granorum pondere, ad misendo ac pauxillum Castorei vel assam fatidam: fumum et praetiquum remedium est contra omnes matricis suffocationes, et singulare est mundatium matricis &c

Emplast: ad destrictum matricis

℞ Mastices, laudani ana ℥ij galbani ℈ß quae simul tritis ℥ß ℞ Empl: et applicetur super umbellicum. ℞ Sadler/

Pill: ad Suffocationem Uteri D: S:

℞ Theriacae Venetae ℈ß castorei ℥ij olei succini ℥j cum syr: Stachad: misce fiat mass pillu

This yere of o Lorde god: 1564: was the coldist spryngs & the wyndyst that ever I: h: d: dyd se / & it was the gadhopste yere of blossomes of all kinde of frutes trees and grete plenty of frutes and the most p of apprill & dyd myse in the wynter folldowynge by reson of the frost hit
