Distinsione XXV De Sivogo semplici e composti.

Ivoggo non è altro, che un Meticamento di corpo auni liquido appoens gli Antichi pon usitato ma dahadeoni inventato a vitionato la cui lage a fondamento è nevamente il Zuccava comporti d'arque stillate ouver d'undi interiori decetti di vasia legni, foglie, fouti et che quali core hette concenientemente e un deligenza S.I.A. fatti calati e fatti chiani, e quei cer mezo della digestione depuesatione e separatione dal puro dall'impuro ser mezo lel MB-licusce goria con fuccaro, ouve con mele acció giù longamente si conjevai e più quoto al gusto si vendi. Si divide in due distintioni cioè semelice e composto; si chiama il livogo demplice in one manieve, overo visgetto alla compositione, o in quanto yesto alla vivili et officacia d'esso. Quello sava semplice un la compositione che si pregava et congene con il succo maccustione dinfusione ouavo devottiona della gavte d'una pianto sola mercolondoni il Zucevo q. 6. et cuocadoto ad una giusta concistenza e corso . Si compone anche con la tota augua Milata che vier chiamato brincebbe del qual già ne ho parlato nella sua Distintione. Quel sivogo vier detto semplie gavimente per l'effetto, il quale venche sia congroto di molti l'emplis, esf ha nontimeno una sola intentione di operave : imperiiche, o che solamente taglia, incide cuevo che austiglia, ouevo che apre ouevo che inevassa o che viscala o che vefrigeva o che leveze per qualche altro scopo simile per satisfir ad una sola intentione. Sivogo composto si dice ener quello il quale vien formato di sivere Souti di tradicamenti, occeso di using succhi injieme megatati, meso con suchi dentro de quali sicurcono motto altre cose suevo con solo decotto fatto con varici leane legni, to alie fion frutti semi et c. fatti in puorisima acqua commune ouevo stillata con l'aggiorde tall hora di lino, et altre d'acets se ui entra acets in poca quantità cui si Deux porre nel fine ma evendo in notta quantità jong asi nel principio della cottuva a joca agoco il craso si di jicha o di tewa ban wekiat e non di metallo come revnicioso, sa uentra munchis Ambra, rallis prochota o alhi simili inquesionti, come ano l'opio, si veuro stimente e gentimente polucione e serza empito e for za con un poco di Lucano fino Leuato che sava il Sivogro dal fusco, a fatto tapido mendadi con quello overo (il che savamentio) dissoluti con un socio d'esso sivosso si mercolino dentro altri li sengono fatti in golutive in perza o tela vava et sottile e fatti in un grosso, o nedulo lo pongano nel sivogro, premertoto alle untre con la ditto - Lynesto si ossevuava quando si uorva arevomatinave alcun sivoque con carella gavofoi o alhi simili avomati ponendoui il avopro nes fine della cottuva e premendolo specio con le dita se questi Sivogoi lavanno con deligenza cotti esen shelti et in luoco conveniente pesti duravanno due Anni berche visia alcuni che dicono un sot Anno e quelli fatti con miele si confevuavanno anco gra

Sivonpo Alchermes Juco di Guana dib. i. Zuccavo fino libij. Poluerizato il Zucavo s'conica al suco con fuoco leuisime; vafresato si consuni il sivoso Dose da sei duamme a dodeci.

Alcuni overdono in uece del suco di quara la grara medeina e macinata in martano di pichra ne fan sivosso con quecavo Doue la guara non si ha tuesca aluni apoperare la secca e ne prendano due oncie jeu libra di Juciavo la por sollilissimamente et apeira con gicata portione d'oglio ditavtavo la universo al gillette sen caldo.

Svattato de Preparationi necessarie ad ogni Sychiale Agp. Preparatione del Aloe. oleun gos Essendo vaire l'opinioni de gl'Autori civa la preparatione dell'Aloe, non pous à mero di ron difon: Permi per far wereve quali siano quelli che malamente habbino intero questa pregavatione We his Il Calestano unte che si suita l'Albe, con decottione fatta nell'aqua con uni ingredienti caldi, puri fauto ascingave e di nuono poluevizavlo, e quoi tornavlo arasingave, e cori seguitar sin alla consumatione jesta per Pando Suarto, et alhi suriumo, che si debba gigliar balor in poluere, a posto in uno di terra uchiato n vectifica s'ammellische con aque piouena, e quei al sole facto esicave e di nuous polucionavle e tornavle 1116. a bagnave, e goi favlo esicave, e cori fav si desta la tevra usta, e poi conservanto. queste a opinioni mi gaione più torto, che sia una nutritione dell'Alor ch'una preparatione. Buaganda Attuavio Mercuriale e Lodonico Settala intentono malamente quel nome di laure, perche Sciolo l'Alor lo lasciano alquanto viscoure, e poi gettano via l'agua, e cosi fanno tre wolke gettando ma l'alor che tien anessa, e lo fanno seccave senza colavlo. Antidotavij di Milaro, di Boma, Giovajo Melicchio, Donzelli accordano telli nella sequente manieva . solo di uaviano nella quantità dell'aqua chi lib y a chi lib ij per ogni libra d'alor. Diglia libi. Aloe poluevizato e gosto in uaso di terra netrialo, si penghi sopra libiji aqua calda e con seatola di Legno s'agiti den asieme a lasciasi alquento vigassave; poi si coli per tela di fino non motto densa, e si getti via ciò che sava vestato nella tela, e sopra le feccie vimaste nel vaso, si torni a goner sopra altri aqua calda, e si faccia come goima, e con si seguita sin tanto che vesti nel fondo del caso solo la terra allova tutte l'aque tinte si pompino asième in une di terra sparse, e coperto di tela s'espongial sole o in Shuffa ad ascingave, et ascinto si conservi per gli usi. Trate trancesso de Lavia tien in opinione the Lagua henche sia calla non word sciolger tutto I filose ma che nell'fondo del uno possa vestavui la gavte vesirosa del hedemo e questa si desta charge immin suotger con l'agua vita, e colavla, a goi univ ambe le specesse avanti che s'essichino Lodando il sudetto modo di prepararlo. n Septille Di gavia sempre di gregarar in questa quisa l'Albe Gratico, perche per logici contiene in meyohy se qualche miscuglio di sovoidezze; Lodando à Spetiali, che piglino s'Alor succorino instan per poner ne medicamenti che si danno per bocca perche questo non ha inse materia a que ambro inutile et é opinione neva dell Guercetaro, Melicchio et altri. gi wel

Pregavatione Sella Barice & Avone Denosi vacolgieve questa vadra quando a pena incomincia a germogliave laccandola berisino Agita di soi si tagli in videletti s'infonda in cum bianco esi jongi à macevaere in luogo fredo que le Spatio di hove 24 Soprananzando il uino 2 dita di trancerso, scorso il detto tempo, sigeti uia il uino, declinando il uaso, e si spavga di nuono alhe tanto cina bianco, vinouardo La macevatione istessa tante wolke sinche toccandola con la lingua non gunga giù, eque Sava segro ch' aveva pevra la facostà ulcevativa Doppo la maccustione si songhi asecun nel forme dentro il quale di fresco sia stato cotto il Pane, et dogpo se ne faccia golueve putto Sverowatione dell'Aussio Liglia autorio vargatto o tagliato minuto e conilo in uaso di terra non uchiato e si junga in tome De Clasari, sinche lia albruggialo, che sava quando sava dicercito più vioneo di grima e pargola alle detta : allova britalo sotismente e meschialo con agua vora e lascialo seccare all'omon. secco, si reglica come di sogua, e di nuono seccato si macina sogua il payido con aqua una sun tocandolo con la lingua non si senti cos alcuna, allova si forma gastellini et esicati al onin si vienne in uno di ucho den chieso per al usi. Iveravatione del Bot-Avmeno Lighia of armeno que e fallo in polucere, e gettani sopra quella quantità d'aqua comune che bati, e Lapiale cosi per tre giovni, poi decarta il chiavo vimettendori nuova aqua facento come prima vio sifa la terza uotta. Poni nel Uaro done sta il bolo una quartità d'aqua chiava emerina Si continuo per spatio d'un quarto d'hora, dogno lascia un socco possave, e goriuda l'aquein altro uaso, che uceva a pertar seco le savti giù subili del Bolo e così veglicarsi, finche rel Jondo del grimo uaso si ustranno solamente le parti pietrose e l'avere inutili Lubalan poi del secondo uno si lascia pasava finche si negga chiava es il bolo sia vidotto nel fort, allora si gitteva uia l'aqua diligentemente per inclinatione vestando il odo che doppo enensi seccato, si miscria con agua vosa, e se ne formano, pastelli che ben seccati si consumo Altra Tregaratione del Quercetano Dissolve il bol'avmero con la flemma accida dell'Alume sepavando la goi dal bolo per Bagra, e getto sogva del solo nuova flemma continuando l'operatione per tre ueste: allon il bolo si conventivà in oglio molto cuasso; il quale seccesai à pentissimo proce for che si viduca in polueve. Crious unlovoramente à fermar ilsongue, ch'esce da qual si usglia garte del corpo. Preparatione della Camphora. Polueriza la campora in mortaro, doue abbi pestato poima quatro amandele o joure abbient un una goccia d'oglio d'esse perche con facilmente si viduce in poluere la quale é campo a promo

Ivenavatione Sella Calce a berisin Agità la calce uiva nell'aqua, decanta l'aqua latea, via fondendouene dell'altra sinche weddi wenir chiava l'aque tinte d'inanco porte asième, si lasciano desoneve a l'aqua chiava si uota per inclinatione, e edob xulo Sogra la Cala deposta viafondi poi alto aqua merchianto per un sow di tempo, dogo si lastia viporave, no sigesti e il chiavo si decanta, e cosi si fa per sei unte et il comasto si forma pastelli e secrati si serviano. cinouaros giù egun Preparatione della Cerusa ghi asexum La Cevusa si pregava laccandola come la Calce, reglicando la lotione solamente quaho colte, e si Lueve 100 14 forma gastilli da seccarsi al ombra. Lugaratione delle Cantavelle a in Jones L'oni le Cantavelle in uaso di terra non metriato, e cuigni la socia d'ecro con tela vava involta goi a e pangith la bocca soto squa accomarardo il uaso topeso squa un albo uaso dentro ilquale sia dollendo all'omorn, aceto fortissimo, finche il uagore dell'aceto uccioa le Cantavelle : le quali per distere sobilmente ua vou sinh si fanno seccave al Sole per serbarle al uso. icah'al'anon Preparatione de conandosi Di ma cevano li Coriandoli in aceto fartisimo Gianco per bre giami continui : cauali poi all'aceto, e l'anali con agua vota laxiali secave e vizoriti per gli usi. che basi e Lugravatione del Corno di Ceruo usto Accomoda il Como di Cerio tagliato in persetti in una pianala di terra conda onon nechiata e primer eco e mejena porilo in tourace di Vasavi sinche si facciaro bianchi macinali goi con agua vora segva il l'aquein porfido sin alla total sottigliezza e ne favai gastelli di enendo secchi visovai per l'us. finche nel Lubal'agn Preparatione del Como di Cer. Tilaso fico. nel fonts le ponte di Covidi (ev. si sos pendono nel collo del Tambuvlano allovche stillansi aque cordiali come di melissa, bovagine Cando Santo, Scorzoneva et alha di tal natura finche ammoliti, e agendo he doppo s consevere mente purgan si possino dal midello e dalla corteccia: si seccano al Sole. Preparatione della Covallina. ew Bagra; Si gova La Covallina in unp or terra uchiato granso, con tant agua comune che sopramarzi he Ste: allon dita e la justani per un hova, si lanava in questa poi con alhebanta senza la juana in macevatione, fueces fin: Si lasci agiusave e uedendo esser asciuto, si spenzzava con tanta goutione di uin cianco generos, ch'agena sia sufficiente d'humestavla: falto questo si govoà à seccave, slavgantola all'ombra, et asuiuta sia genfeltamente si vipovoù nel suo vaso altions Preparatione de civalli bianchi, e vossi Schiascheduna di queste gietre si macina da gense con aqua vosa sopra il Portito e conorcevai glova prepant che savanno ben ovepavate, quando facendo il saggio della polueve con la lingua non si sente

cosa avenusa; allova formane pastelletti e come sono ben seccati, li vegovai in uno di wemen Je va Nels'istessa forma si rvegavano le seguenti Pietra Calaminave con agua vosa Judaica con aqua di Sassifragia . Lince con agua di malua " Nefritica con agua di Letroselino (vistallo con aqua di Buglossa · Grante con agua vosa · Hijacinhi con aqua vosa · Bubini con agua vota Zaffini con aqua vosa · Smarali con aqua voice Anto · Topaci con aqua vora · Peule con aqua vosa, tuto cero, melisa g · Madri perte con aqua vota ]- An · Occhi di Cancro con agua di Fraghe - (avade o sucino con agua o o bettorica Sunt et alia guzdam, eaque compluera que cui uis pro cuinslibet libito accustuntate pre pararhu - Diagnisio Cidoniato La Scamonea elletta e poluciosata si faccia cuoceve nelle melle cotogne scauate incole Mai nella pasta comune sinche siano cotte ponerede nel founo come mezo pri adaquato, allova si tolga la scamenea, e si secchi all'ombra. Si pregava anche unendo la scamanea potrevizata con succo de cotogni in uaso di pietaspos, Gio facendo pasta liquida e soqua lento fueco dimenardo sempre con instrumento di legne sintre Fra sia asciuta e gettoto cosi caso logra marmo onto con oglio d'amangole dolci e distera sottimente si taglij in taudetti e goi distesi sogra carta si lasciano seccare all'ombra e servasi: - Diagnidio Zolfovato, ocuero goluere grigia. Sifacua in sottilissima oslueve la scamonea elleta, e si stenda soqua carta girggia senon: Pola al nagove del Zolfo aspenso sopra carboni accesi, sinche la scamonea mont Over di color griggio. e se auenisse che à cagione del caldo un ove s'aggrumasse prime di fauti griggia, si plusini a di nuovo si ponga al un pre del zolfo. 10gri

Ruegavatione delle Davin d'Ellebovo nevo Le vadici d'elleboro giù grasse, si primaro schissandole das middlo, e s'infondono nel succo d'intrapi, o nell' aceto fortisimo per un giorno, estratte si seccano de omora. Ruepavatione dell' loca Voni à macerave le corteccie delle vadici dell'Este minove come più lodata nell'aceto fortissing per 124 hora, poi si cauano dall'aceto, si seccano, a rizongono, accelerdo sempre ch'esendo ovoinata I Gula, s'intende douevsi usave con pregavala Lugavatione dell Enfoubio. Tiva la gregaratione dell'enfortio ui sono infinite opinioni. Il Borgaruccio et altri dicono che si che non é passato un anno non si deue adopevave, perche per un Anno é uelenos onde la la prepa: Antonio de Sgobbis disce estraheve con spirito di uino à MB-la trahure con una seca portione d'aque vosa, suapovando questi mestrai e sopragonendoui al estratto del suceo de simoni e la juialoui per alhi winhi giovni doppo si segani il suco e si conservi l'estratto d'enforbio I Antidotavio di milano dice che si deue convegeve l'Infordio dalle sue male qualità con tagliava un (coro per mezo, a leuavali heto il suno, e quelle membrane bianche che lo sengono dentro et quel uacuo don eva il luce empirto d'afortio qual sia prima stato onto con oglio di mandole doli poi vidotto in polueve. The fatto viunive il Cedro e coposible di pasta assu soda e ponerto nel forno, e visto che la gasta sia cotta levarlo fuori, el aperto cavare l' inuste enfortio e farto esicare per servivsere. Mathia Amidei disce douce poner tale, e quale L'enforcio nelle compositioni doue vien ordinato, adaqueto perche nelli composti u anno messo li suoi corvettici e mettendoccelo preperdo si verebe ad indebalio Le richaspuso Sisteppe Donzeli dice non ener Suona vegota dar per bocca l'entorbio benche fore in pochisima quantità ano sinche Juste Francesco Sivena bice of extra vio, il qual sia payato un anno che sia colto, si deae zone in qualungue Sottilment comporto, oue si houa descritto senza ponto pregavarlo, ancovehe ne comporti non cui farevo posti alcuni · constitui. Hauendo lui preso in una uota osto grani d'sufortro e gli fece enacuar tanta mesteria gitui: tosa senz alun incomodo come se queso Rauene della manna el.c. I Simo devo convegge l'aportio sciol generale nel aceto vorato, e poi colato, et inscinato, l'ho sorufa d'aqua vora, et a fearen: esiccato lo conserva per gliui. nea high Duevo Solue I-lufavoio con il Flemma di ministo totalmente inquegnato del suo spirito onevo con aqua de cologni o de somi, e colato, et inquisato sin alla total seccità Lo conserva. vima di Opri cosa deue essere concidevata dal buon medico nel continado, ser quello viguarda alle comesitioni dece werka non son from d'opinione & operare Secondo Mathia Amidei e Lute Felice Sivera Jalana
