Dear Sir,

Your letter of the 22nd inst. duly to hand, and I thank you for your offer to loan the old book you mention to my forthcoming historical medical exhibition, but regret that lack of space will prevent my exhibiting any works published later than 1700. Otherwise, I should have been happy to have availed myself of your kindness.

Dear Sir,

In reply to yours just to hand, you are really asking too much for the articles in question, and if I am to buy more from you, you must accept a more moderate price. Under the circumstances, I will give you £1.5.0 (one pound five shillings) for the articles, including the old medical work of Dr Reed. If you do not care to accept this, then I will have the thing packed and returned to you.

Please let me know what you want for the old marble mortar as I have two or three that I have already bought at 2/- (two shillings) each and the two old books you can send me on approval with the print of Dr Cheeseman.

Yours truly,

Mr John Shaw.

Dear Sir,

Many thanks for yours of the 1st ult., in which you kindly offer to loan me several old medical books for my forthcoming historical medical exhibition. Although very interesting, I am afraid they are of too recent a period to include in the exhibition; as the number of medical books I have had offered is very great, I shall be bound to exclude any printed after 1700.

I have also to thank you for so kindly sending me the names of the other Liverpool medical men. I have already had the promise of the loan of several interesting historical medical objects from the Liverpool Medical Institution.

Extract from Mr. Ross' letter from Berne, dated June 24th, 1904, received here June 27th, 1904, folios 81/3.

"Mr. Schmidt, Chemist, Grande Rue, Fribourg, is in possession of a newspaper sheet, small, framed between glass, both sides are seen, showing French and German advertisements, and on this sheet is printed the permission to open the Pharmacie Muller, the first in Berne, (Mr. Schmidt is the same family), and to sell drugs and chemicals. The pharmacie has been in this same family since this date 15th September, 1786. Another manuscript letter authenticates Muller as a pharmacist in 1781. A book reprinted in French, a treatise upon medicine, with some formulae 1788, written by Dr. Joan de Herrenschwand, Berne.

"Mr. Schmidt is willing to let you have these on loan, insured and all expenses.

"He has also some small porcelain jars, about as large as a coffee cup of the same date.

Dear Sir,

I am informed by my representative, Mr Ross, that you have kindly offered to loan me some small porcelain pharmacy jars for my forthcoming Historical Medical Exhibition, syllabus of which I enclose. I shall be pleased to accept your kind offer and will advise you at a later period where to forward them. In the meantime will you kindly let me know upon the enclosed card the value to place upon them for insurance. I shall be pleased to bear the cost of packing and forwarding same.

* Exhibit No. I.
a.b.c.d.e.
o Exhibit No. II. a.f.

* Exhibit No. III.

From time immemorial it has been the custom with the people here (India) to use ANJAN to their eyes which form a part of toilet, but it has its ophthalmological use too. Of all ANJANS the SŪRMĀ and the Kajjali or Kājāl are the chief in use. I. SŪRMĀ, as generally used, is antimony sulphide very finely powdered; but there are several preparations of which it forms a basis; lead is also used with it. It is stored in pots of metal, wood or clay and is best applied with a lead pencil or with any metallic rod, which is dipped into the pot, and then shaken to get rid of the excess of Surma adhering to it, and is held between the eye-lids and drawn across the eye. The palpebral conjunctiva of the lower lid is thus thoroughly besmeared with it, that of the upper one getting a very little share. It had been introduced in India by the Mohomedans amongst whom it is extensively used in Arabia, Persia &c. like Kajjali in ancient India.

II. Kajjali or Kājāl is generally prepared from lamp black with little clarified butter or some bland and thick oil; sometime a little burnt garlic or tobacco leaf is rubbed with it, which is generally used in nursery toilet, and is prepared and kept in an iron or brass shell-like pot with a long handle.

When very finely applied it leaves a black line along the ciliary roots, which makes the eye-lashes look darker and more prominent, and to have dark eye-lashes is a beauty according to the oriental idea, it therefore formed a chief part of their toilet amongst the ladies in olden times, and in greater part of the country even now. But its application also soothes the irritable palpebral mucous membrane by its mild astringent effect.

Conjunctivitis is very common in upper northern India and Deccan, the dust and the glare of the sun being the chief causes, specially the first one. An attack of conjunctivitis generally leaves behind a chronic inflammation of the palpebral conjunctiva, being kept up by the constant irritation ^{caused by} of the dust and the glare. As the people did not know how to protect their eyes from the effects of the glare and the dust, they naturally found this means of keeping the irritation and its resulting inflammation down by its use. In provinces like Lower Bengal, where it is all green, people enjoy, as it were, a sort of immunity from the inflammation of the conjunctiva and there ^{fore} it is not so popular there, but ^{is more} ~~only~~ used in nursery.

It will be interesting to give here a short note about Mamira, which is popularly believed to be a specific for all the ills the human eye is subjected to. Even cataract, which it can cure, and it improves the eye sight, by curing amblyopia and presbyopia and night blindness. It is held in the same public estimation as Padma Madhū-lotus-honey (honey gathered by the bees ~~only~~ from lotus flowers) ^{only}—is held in Lower Bengal. The popular test of it is that it can bleach indigo coloured cloth, even the black crows feather. It is sold at Rs. 20/- per dram.

"It is a rhizome; the plant grows in highlands with
"fine round long yellowish white leaves, which are
"succulent and mucilaginous; the roots are knotted
"with fibrous and fine rootlets. Habitat-Teral in
"Indian, China and Persia. The Indian Mamira is
"blackish, the Chinese yellowish and the Persian
"blackish-green. The seeds are like till. The
"best are those which are knotted yellowish and
"fine. It removes the humours, is irritant to the

"skin and to the nasal mucous membrane. Pulveris-
"ed and applied to the eye, it removes opacity and
"night blindness and corrects defects in refraction
"by strengthening the ciliary muscles and others.
"When given with brandy (tincture) it cures jaundice.
"It is diuretic and it removes inflammation of piles
"flatulancy, dysentery and tenesmus. With vinegar
"it is used in skin diseases. It is contraindicat-
"ed in the diseases of the kidneys. Dose 35 grains"

Dear Sir

Your circular with
regard to Historical Exhibition
was duly received. It has not
occurred to me that I had
anything that might be acceptable
viz. - a sketch, 12 x 14. Water
colour, of my old chief Dr W.
J. Sandnes, for many years
Professor of medicine in Glasgow
University. A photograph

from this sketch appeared in
"The Book of the Jubilee" on
the occasion of Glasgow University
attaining its 9 jubilee in
1901. It shows Sir Wm. sitting
at a bedside reading the notes
of a case in the Journal of
the Ward.

I have a larger picture
showing him in the same
position but including also
the patient, his house physician,
chief de clinic, and one or
two more. It is altogether
more crude than the other and

Though some fancy it, yet an
artist would knock holes in
it at once.

I have also some smaller
sketches of Sir Henry Littlejohn,
Professor Wyllie, and Cunningham
(Edinburgh) and Sir Geo. Macleod
and Allan Thomson (Glasgow)
all in characteristic positions
and as I saw them when they lay
under them.

If you thought any of these
would be of service you are
heartily welcome to them.

I shall look forward to the
exhibition with great interest

Dear Sue,

I have sent on the exhibit this afternoon to Mr. Thompson at the News & hope it will arrive safely. I have attached labels & send you enclosed the description. The Great Duke's spelling is not faultless & writing a little difficult to read —

You must have had a great number of nice stamps sent from all over the world with parcels. Hope they have not been thrown away — my children would very much

have liked some

Dear Sir,

I am very sorry that
I have not long ago forwarded
my exhibit for your medical
museum; the fact is I couldn't
find it, only last week I came
across it when the house was
being cleaned - It's a letter from
the Duke of Wellington prescribing
piles for himself - I have now
had it framed & if you still wish
to have it I will send it at once -

Yours faithfully,

J'ai le honneur de vous adresser
réception de votre catalogue, circulaires,
et résumé d'organisation d'exposition médi-
cale et pharmaceutique.

Créoyant vous être agréable, j'ai
photographié en bloc, ce que je pourrais
de plus ou moins vieux sur ce sujet,
et en détail, les 2 livres faisant partie
de ce groupe. Je n'aurais pas si vous
trouverez dans cet ensemble quelque
chose qui pourra vous intéresser. Pour
tous les cas je m'ennuie pas mieux
que de vous confier ce que vous trouverez
vous être utile, si bien entendu vous
me garantissez la retour chez moi
en parfait état de conservation.

Car si je vous expliquerois
commençant par le haut les diverses parties
de mon exposition, en ne pourrions que
passer rapidement sur vos en Relief blanc et
blanc qui ne offrent rien de bien intéressant
comme forme.

1: L'oppression de distiller et vos échantillons: sans
être très vieux ils offrent cependant un
intérêt. En encombrent environ 100 litres.

2: Pharmacie extemporanée: les photogra-
phes de Vitrolles vous expliquera cela mieux
que toute une page. Le coquet de cire rouge
que vous y voyez est le sceau de l'œuvre =
certaine collaboration de S. S. Corne et de =
mon de notre ville fondée en 1474 et
sur les quels feu L. Crétien de Bruxelles
et M. Devocht, Phⁱⁿ à Anvers, ont
fait un traité historique très intéressant
En outre M. Devocht possède une collec-
tion de vases, potiches, portulques, etc. qui
font l'admiration des connaisseurs,
et spécialement de M. de la Roche

notre dépositaire à Bruxelles.

3:4 fioles à médicaments dont les
remèdes surtout en verre vert foncé,
sont curieuses. Elles marquent bien.

4: collection complète de vieux poirs
médicinaux par: 1^{er} - 3 - 3 etc

5: petit mortier bronze ^{jeune} en cuivre sans
sculptures ni inscriptions.

6: vieux microscope en bois-écorce -

7: vieux mortier en grès sans pilon
original de forme. Je crois en
posséder un plus grand, à anses

Je m'occupe assez bien de

de une zoologie, je ne vais donc pas
loin, ce qui pourrait vous intéresser.
Si M. Dewacht ne vous envoyait
rien, est-ce qu'une photographie
de son officine vous viendrait à
l'esprit. Je l'ai photographiée avec
les 4 phos. d'une œuvre, en mettant
à l'avant-plan ce qu'il y avait
de curieux. J'en ai un cliché 18/24

Translation of letter from L. Van Seymortier, Vrijheidstraat,
Oudenarde, dated 24th Jan. 1905, received here 26th Jan. 1905
addressed to Henry S. Wellcome, London.

I have the honour to acknowledge receipt of your catalogue, circulars,
and account of the organisation of the medical and pharmaceutical
exhibition.

Thinking it will be agreeable, I have photographed together what
things I have of more or less interest in this connection, and
separately, the two books forming part of this group. I do not
know if you will find anything among this collection which will be
of interest to you. In any case, I shall be glad to lend you
anything you may find useful, it being always understood that you
will guarantee its return in a perfect state of preservation.

Having said this, I will explain, ~~beginnings~~ at the top
of the various parts of my exhibition, by only speaking ~~now~~ ⁱⁿ
~~memory~~ of the blue and white Delft vases which are of no particular
interest as regards form.

1. The apparatus for distilling and the Florentine vase; without
being very old, they are of some interest. The cucurbit contains
one dozen litres.
2. "Pharmacopeia extemporanea." The separate photograph will
explain this to you better than a whole page. The red wax seal
which you see is the seal of the old corporation of S.S. Coene and
Damion of our town, founded in 1474 and about which the late L.
Criteur of Brussels and Th. Devocht, Chemist of Oudenade, have
written a very interesting historical treatise. Mr. Devocht,
by the way, possesses a collection of vases, Chinese vases, spatula
etc., which are the admiration of all connoisseurs, and especially
of Mr. Delacre, your agent in Brussels.
3. ⁴ Phials for medicaments of which the circles specially in dark
green glass, are curious. These show well the transition to our modern
phial.
4. Complete collection of old medicinal weights for lbs. oz. drachm
etc.
5. Small yellow bronze or copper mortar without ~~mark~~ ^{design} or inscription.
6. Old microscope in carton box and horn.
7. Old ware mortar without pestle, original in form. I think
I possess a larger one ^{with handles} in porphyry or reddish marble.
8. Cruidtboeck (date 1743) giving ~~according to~~ the description,
the practice of medicin, engravings coloured by hand, and manuscript
annotations of the time. In small folios of 350 pages.

That is the whole of my treasure, it is not very great
as you see, but it will be lent to you with very great pleasure. I
shall make further research in attic and shop in order to find old
preparations and old products.

Cont

Cont.

-2-

I possess also the "Pharmacopea gandenensis of 1787" one part Latin one part Flemish. There is a quite modern work from the point of view of popular medicin, or medical folklore, written by Mr. Decock, Instructor at Brussels, very interesting. Some time ago, I gave Mr. Van Schwan, Chemist, Rue Vondel, Antwerp, five in small folios, forming the "Commentarie Boerhoir.

Mr. Comyn, Chemist, Antwerp has a fine collection of all that is of interest in the way of ancient pharmacy.

I think you will be able to make use of these various pieces of information.

I do a good deal of photography and especially of microscopic photography, but specially from a zoological point of view, but do not see how this can be of interest to you. If Mr. Devocht does not send you anything, would a photograph of his establishment be of any use to you. I photographed it with the four chemists of Oudenarde, placing in the foreground anything there was of interest. I have an ^{plate} ~~electra~~ of it, 18 x 24, and you will find enclosed an article which appeared in the March 1898, in the "Bulletin de la Pharmacie Centrale de Belgique à Hol."

I think it is not necessary for me to tell you that I am entirely at your service to take all the steps necessary in my district or even further, if you wish, to make your enterprise successful, or can accompany and introduce any representative if you prefer to send one in my place for the same object. I have read with interest your historical leaflet on the Cymric Medicine and hope you will be kind enough to send me any ~~similar~~ articles of similar or purely pharmaceutical interest, for my use. Would it be abusing your kindness if I ask you to send me the various advertisements of which you make use? I thank you for them in advance. Awaiting your reply, I remain, etc.

LES PHARMACIENS D'AUDENARDE.

En ces temps de lutte pour le redressement de nos griefs et de combats acharnés que livrent les dirigeants de la profession contre les accapareurs coopératifs, mutuellistes et autres, il est bon de montrer au pays ce que peut l'union dans l'action.

La ville d'Audenarde avec ses quatre pharmaciens est un exemple frappant de ce peut l'union des cœurs et des intérêts. La vue de cette photographie vous dit assez que les confrères d'Audenarde sont des amis et que dans la défense de leurs intérêts ils sont en communauté d'idées entre eux.

Continuateurs de la vieille corporation des SS. Côme et Damien fondée en cette ville au 16^{me} siècle, ils ont gardé l'esprit de corps qui animait cette ancienne société. Laissez-moi vous retracer en quelques mots la carrière du Président de la Société des SS. Côme et Damien, M. Devacht.

M. Van Seymortier. M. Devacht.
M. Verwee. M. Noll.

Figure sympathique. Tous ceux qui l'abordent trouvent en lui le véritable caractère flamand, énergique et bienveillant.

Membre de la Croix Rouge de Belgique il sut déployer son activité et son dévouement sur les champs de bataille franco-allemande. Ecrivain de talent, il fit en collaboration avec M. Gréteur, l'Histoire de la Corporation des SS. Côme et Damien, dont le sceau datant de plusieurs siècles est précieusement conservé à l'hôtel-de-ville de l'antique cité d'Audenarde.

M. Devacht a eu l'honneur d'être nommé par ses confrères délégué à la Commission Médicale Provinciale.

Les services qu'il y rend à la cause pharmaceutique sont importants et nombreux.

Il sut grouper ses confrères et former le Cercle d'Audenarde qui est un exemple pour les pharmaciens des autres villes.

Dès 1893, et certainement un des premiers, le Cercle d'Audenarde organisa le repos dominical et jusqu'ici cette innovation n'a jamais donné lieu à un abus.

M. Devacht organisa également une caisse d'épargne qui est plutôt une caisse de résistance et dont les intérêts servent en grande partie à organiser des fêtes intimes, touchantes de cordialité et de fraternisation professionnelles. Nos confrères d'Audenarde s'entendent sur un «a» if qu'ils perfectionnent constamment. Tout modestes qu'ils sont, ils peuvent revendiquer l'honneur de collaborer avec leur Président à la grande cause de la profession. Ils montrent que par l'Union, on arrive aux plus beaux résultats et que sans l'Union on n'aboutit à rien. Honneur à eux et que leur exemple soit suivi partout. L'avenir peut qu'y gagner.

Dear Sir,

I have been extremely interested in your kind letter of the 26th ult. I beg to thank you most cordially for the photograph of the medical and pharmaceutical antiquities you have sent me. They are extremely interesting, and I shall be glad to have the loan of the same for the forthcoming historical medical exhibition.

If in your further search you find any other objects of interest, especially old preparations and products of bygone days, they would add to your most interesting collection.

Should I be able to send a member of my staff over to your country before the exhibition takes place, he will call upon you, and by your good offices, may be able to collect a considerable number of ^{Belgian and} early Dutch specimens connected with ^{Belgian and} Dutch pharmacy and medicine.

I am forwarding you a selection of our advertisements depicting scenes in the history of medicine, etc., trusting they are what you want. If not, will you kindly let me know.

Again thanking you for your kind offer of loans, and of your good offices in connection with the historical medical exhibition,

I am,

Monsieur,

J'ai été bien intéressé par votre aimable lettre du 26 de l'écoulé. Je vous remercie bien de la photographie des antiquités médicales et pharmaceutiques que vous avez bien voulu m'envoyer. Ils sont on ne peut plus intéressantes et je serai heureux de les avoir dans l'exposition historique médicale devant se tenir d'ici peu.

Pour le cas où vous auriez d'autres objets d'intérêt, surtout ceux qui concernent des préparations ou produits d'autrefois, votre admirable collection ne saurait qu'en profiter.

Pour le cas où je pourrais envoyer quelqu'un de ma maison en Belgique avant que l'exposition a lieu, il vous rendra visite et avec votre aimable appui pourra peut-être obtenir un nombre considérable de spécimens belges ^{et hollandais} ayant rapport à la pharmacie et aux médecines belges et hollandaises.

Je vous envoie une sélection de nos réclames qui représentent des scènes dans l'histoire de la médecine et espère que ~~ce sont~~ celles-ci que vous désirez avoir. Sinon, prière de me faire savoir.

En vous remerciant encore une fois de votre aimable offre de me prêter les objets, et de votre aimable appui par rapport à l'exposition historique médicale, je vous présente, Monsieur, mes salutations empressées.

My dear Lili

I must thank you
much for sending me the
copy of your small book on
ancient Chinese medicine
which interests me much.
Possibly you already know
the very interesting old
book called *Hortus Sanitatis*
but since it is rare you
may not have seen it.

The name you give for
Stone Lunge is new to me. In
the *Troads* it is called *Car*
Canadaug "which I take to
mean "the lonely city". The medicine

Welsh dictionary meaning for
Cor is "creek" but I cannot
make out any modern word
corresponding to "Cyroeth". Is
this an obsolete archaic
word? What is the authority
for "Cor mawr Cyroeth"? Is it
a more recent name than
the date of the Triads? I do
not know anything of archaic
Welsh. I have studied the modern
mainly to enable me to un-
derstand Welsh maps when
working out the geology of
some parts of the country

Dear Sir,

I desire to thank you for your kind offer to loan me the Manuscript of Medical Treatment, 14th century, and the old Medical Prescription and Rare Photos for the forthcoming Historical Medical Exhibition. I need hardly say I shall be most pleased to have the same, and as soon as the date of the exhibition is fixed, I will at once advise you of the time and place to which these articles should be sent.

When sending, if you are open to dispose of the same, I should be glad if you would state a price.

Again thanking you for your kind interest in the matter,

Dear Sir,

Your favour of the 3rd inst. is duly received. The instrument you refer to will I am certain be of material interest, and I shall be very glad to include it in the Historical Medical Exhibition, the date for which is not yet fixed owing to the large amount of work involved in its arrangement, and the large number of exhibits which are being sent from all parts of the world.

I will make a special note of your kind offer and let you know in good time so that it can be sent before the exhibition takes place.

Gentlemen,

I desire to thank you for your letter of the 7th inst., asking for particulars of the Historical Medical Exhibition which I am at present organising in London.

The object of the exhibition is to illustrate the history of the art of healing from the earliest ages throughout the world. The exhibits will be mainly of an antiquarian character, as will be seen from the enclosed syllabus. It will not be in any way a trade exhibition, nor include drugs of modern manufacture.

If you could give me any assistance in the way of obtaining loans of antient objects of interest connected with medicine, pharmacy, or the allied sciences, it would be greatly appreciated.

Egregi Signori,

943 / Vi ringrazio sinceramente della vostra grata del 7 cte., chiedendomi detta li dell'esposizione storica medica che sto per organizzare a Londra.

Lo scopo dell'esposizione è di dare una descrizione ed illustrazione dell'arte curativa, cominciando coi secoli più lontani, in tutte le parti del mondo.

L'esposizione sarà per la maggior parte d'un carattere antiquario come vedrete dal sommario qui acchiuso. Non sarà in nessun modo un esposizione commerciale e non conterrà droghe di fabbricazione moderna.

Si potreste prestarmi la vostra cooperazione per mezzo d'imprestito d'oggetti antichi con relazione alla medicina, farmacia e le scienze unite, vi sarei molto obbligato.

I duly received together with your catalogue an invitation to a
historical exhibition of objects of interest to medicine, chemistry,
pharmacy and the kindred sciences. We shall be very much obliged
if you will give us a few further explanations relative thereto
i.e. whether remedies which have a historical importance may be
accepted there, for instance, lecitina (lunitina?) which we were
the first to introduce in therapy in April 1897 through our Dr.
Serono, as is proved by the publications which we possess.
Awaiting the favour of your reply and asking you to excuse the
trouble we are giving you.

Ricevuto la sua stimata lettera del 22 corrente

preferisco piuttosto, se il prezzo Le ha convinto, vender-
gliela, come si trova in vetrino, e precisamente
descritta nella sua monografia, e ritirarla a suo
ordine, nel mio studio in Bologna via Zamboni 3,

reasonable. I would let you have ^{the collection} it as
it is in the glass case and exactly as
described in the monograph. You could

the price would be Lire 7000. —

Lei mi deve perdonare se anche con sua lettera
14 maggio corrente, che mi domanda cortesemente se le
posso inviare la collezione per ispezione e darle il suo
valore - non posso favorirle. Le mie molteplici oc-
cupazioni professionali non mi danno tanto tempo
onde poter accudire anche alla collezione che ormai è
nella storia. Io sono un professionista e studioso nel
campo della Odontojatria e niente altro; e se volli appunto
esplorare nel campo dell'arte antica per circa dieci
anni fu precisamente per scoprire molte cose che non
si conoscevano, e non per scopo di lucro; e a Berlino 1909, avrei
potuto venderla, ma non ne volli sapere.

Gli strumenti sono tali e quali descritti nella Monografia
e dalla tavola fotografica numerati e illustrati.

Ora se a Lei le fa piacere possederlo, ripeto, che volentieri
glielo cedo, con una certa simpatia, lasciando alla sua
serietà e giustizia il dare quel valore che merita perché sono
certo Ed ho fiducia che la conserverà nel suo museo, e quindi nella

Dear Sir,

I am sorry to refuse again (in answer to yours of 14/5/12) to your asking me to send the collection for inspection, ^{so} and as to ascertain its value. My professional engagements do not leave me much time to attend to the instruments, which are by now recorded by History? I am a professional & a scholar in the dentistry & nothing else - if I dedicated ten years to the study of ancient art it was not done in view of profit, but to discover many things which were unknown; indeed in Berlin ^{collection} 1909 I could have sold them, but I had ~~at~~ no intention of doing so.

The instruments are exactly as they are described and illustrated in the monograph.

Now if you care to have them, I shall be pleased to sell them - leaving to your earnestness and justice to give state the value they ^{fetch} ~~are worth~~, because I feel sure & I trust, that you will keep them in your Museum in the great Metropolis where many and beautiful Italian objects are preserved. -

Yours of 26th ~~ult.~~ ^{archaeologie} at hand, re loan of my collection. My collection is already well known and is unique in the world, at least in its kind, as you may see from the Monograph - 2nd ed.

But now as you were one of the first to give a certain importance to this work of mine since many years ago, and so that to my collection should not pass into the hands of other people, if you think of purchasing it, I would sell it to you, should you offer me a reasonable equivalent, as much as an intelligent mind would give, and of which is not lacking on your side. -

Dear Sir,

In reply to your letter of the 13th inst I shall be most pleased to avail myself of your kind offer to loan all your collection of archaeological, surgical, and dental instruments for the forthcoming historical medical exhibition.

With respect to your query no expenses whatever need be incurred by you as I shall be pleased to pay cost of packing and carriage both ways, and insurance in transit, if necessary.

The actual collection of objects would be required and not monographs or photographs of the same. The diploma obtained at Naples need not be sent unless you wish.

As soon as the date of the exhibition is definitely fixed I will advise you in due course of the time and place to which these objects should be forwarded.

I return the photograph herewith.

Egregio Signore,

In risposta alla grata vostra del 13 cte., mi sarà cosa aggradevole valermi della vostra gentilissima offerta di prestarmi tutta la vostra collezione archeologica di strumenti inerenti alla chirurgia dentaria per la mia esposizione storica-medica.

Per ciò che riguarda la vostra questione intorno alle spese, non è necessario che ne risulteranno per voi essendo io disposto con piacere a prendere sopra di me le spese d'imballaggio e di trasporto (andata e ritorno) e d'assicurazione durante il viaggio se necessario.

Per la vostra norma sono gli oggetti stessi che sarebbero da mandar qui e non monografie o fotografie di quest'ultimi.

Non occorre inviare il diploma ottenuto da voi a Napoli se no che non vogliate farlo.

Subito che sia fissata l'epoca definitiva dell'esposizione vi avviserò in quanto al tempo della spedizione degli oggetti e la loro destinazione.

Vi rimando in seno la fotografia che mi avete inviata.

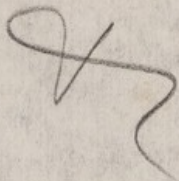

Gradite i miei distinti saluti.

I received your esteemed communication for the forthcoming historical exhibition of medical articles, The writer of this possesses an archaeological collection of instruments belonging to surgery and dentistry, which obtained a prize at the exhibition for hygiene in Naples in the year 1900. Before complying with your kind invitation, I shall be obliged if you will let me know if my collection must be marked with the letter "D" or "F" Section 5, or 7? letter C, as per programme. What would be the expense incurred by me, whether monographs and photographs of the objects are required, as per specimen which I am transmitting to you and if also the diploma obtained at Naples would be necessary? After having received this information from you, I shall have the honour to make this small contribution to your great metropolis.

Illustrissimo Signor Dottore,

La nostra succursale di Milano mi ha inviato la di Lei stimata del 4 cte., che si riferisce alla siringa che Ella gentilmente ha prestato per l'Esposizione Medica Storica. Mi rincresce d'aver trattenuto l'oggetto per tanto tempo, ma varie circostanze mi hanno indotto a tenere l'Esposizione a Londra nel 1913, quando avrà luogo in questa città il Congresso Medico Internazionale, ed io spero che Ella vorrà venire a ⁱvisitarla.

Permetterebbe che io conservi la siringa fino alla complezione dell'Esposizione, o desidererebbe che la rimandi avanti quell'epoca.

Gradiasca accettare i miei cortesi essequi.

Dear Sir,

Our Milan depot has forwarded me your letter of the 4th inst., with respect to the syringe which you so kindly loaned for the Historical Medical Exhibition. I regret the delay in ~~xxxx~~ having held it so long, but arrangements have now been made for the Exhibition to be held in London in the year 1913, when the International Medical Congress meets in London, when I hope you will be able to come and see it.

May I hold the syringe until after the Exhibition is over, or would you like me to return it to you before?

Yours very truly,

H.S.M.

Mr. C.J.S. Thompson.

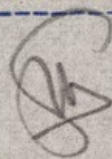

The following is copy of a letter received from our Milan House under date 5th Oct. 1911.

"We are enclosing herewith an original letter received from Dr. Guiseppe Soffiantini of Milan, for your attention.

In acknowledging receipt of same we have limited ourselves to advising the doctor that the 'Wellcome' H.M. Exhibition has now been fixed to take place in 1913, and that we hope he will be willing to leave the syringe in question in Mr. Wellcome's care until the conclusion of the Exhibition."

The original letter mentioned, with translation is attached herewith, and I shall be glad if you will give the matter attention.

dated 4th Oct. - recd. 9th Oct. 1911.

Your esteemed firm in a letter dated 6th January 1908
informed me that as soon as the Exhibition was closed you
would return to me the old syringe "Scarenzis" for injections
of Calomel and the frequasto (?) sent from Milan to London.

As I have not received anything, I should be very much
obliged if you would kindly let me have some news regarding
them.
