ANNUAL REPORT

THE TO

MEDICAL OFFICER of HEALTH

1934

ACTOR DO NOT THE RESIDENCE

" Langtons"
Billet Lane,
Hornchurch.
3rd June, 1935

To The Chairman and Members of the Hornchurch Urban District Council.

MR. CHAIRMAN, LADIES AND GENTLEMEN,

I have the honour herewith to present my Annual Report on the Vital Statistics and Sanitary Circumstances of the District for the year 1934.

It is to be recorded that the long anticipated Essex Review Order dealing with the revision of boundaries of county districts was issued on the 1st March, 1934, and as regards this district became operative on 1st April, 1934.

The transference of duties and services in the 5 parishes added to Hornchurch from the late Rural District of Romford was accomplished with smoothness and efficiency owing to careful preparation which had gone on for some time previous to the change over.

The enlargement of the area of the District has required a much larger staff to cope with the increase in the work devolving on the Council and the office accommodation admirable in character as it is, will need to be considerably enlarged at an early date. In the following pages will be found a description of the more important activities carried on in the Health Department, and at the end is a report on the Rural District for the first quarter of the year.

I wish to acknowledge the ready assistance which I have received from my fellow officers in my work, and to thank the members of the Council for their support.

ALFRED BALL, M.D., D.P.H.,

Medical Officer of Health.

MEMBERS OF THE COUNCIL OF THE ENLARGED DISTRICT.

Councillor F. H. R. DAVIS, J.P., Chairman. Councillor H. H. WAKE, Vice-Chairman.

SECTION A

STATISTICS AND SOCIAL CONDITIONS OF THE AREA.

Area in acres (estimated and subject to revision)	19,082
Registrar-General's estimate of the resident population (mid- year) 1934	55,798
Number of inhabited houses (end of 1934) according to Rate books	17,782
Rateable value (September, 1934)	£431,570
Sum represented by a Penny Rate (September)	£1,650

Social Conditions.

The district is becoming increasingly residential in character and numerous building estates which are being developed continue to attract new residents and thus to increase the population by migration.

There are, however, still large areas in the District in which market gardening, dairy farming, etc., form the chief industries.

There are no conditions of occupation or environment which have had a prejudicial effect on health.

Vital Statistics.

Extracts from the Vital Statistics for the year.

	Male	Female	Total	Rate
Live Births-				
Legitimate	463	432	} 922	
Illegitimate	19	. 8	5 822

Death rate of infants under one year of age-

All infants per thousand live births		57.4
Legitimate infants per thousand legitimate live bir	ths	54.7
Illegitimate infants per thousand illegitimate live	births	148.1
Deaths from Measles (all ages)	6	
,, ,, Whooping Cough (all ages)	1	
,, ,, Diarrhœa (under 2 years of age)	5	

Note: The population figures estimated by the Registrar-General and used in computing the above rates is 52,256.

Area.

The acreage, population, and number of persons per acre as enumerated at the Census of 1931 are set out in the table below.

		Per	sons	Persons
	Acreage	Males	Females	per acre
Hornchurch wards-	0			
Harold Wood	 1,156	1,850	1,920	3.3
North West	 1,191	6,210	6,444	10.6
South	 2,877	1,939	1,631	1.2
Village	 1,559	4,068	4,355	5.4
Romford Rural Distr	ishes— 1,879	624	616	0.66
Rainham	 3,247	2,005	1,892	1.20
Upminster	 3,375	2,622	3,110	1.70
Wennington	 1,299	189	170	0.28
* Great Warley	 2,889	1,226	1,450	0.93
Total	 16,583	19,507	20,138	_

* A part only of the parish of Great Warley is included in the enlarged Hornchurch and the census figures of this parish are, therefore, not included in the totals.

The enlarged Urban District of Hornchurch as constituted on the 1st April, 1934, consisted of the above wards and parishes with the exception of a very small part of the North West Ward which was added to the Urban District of Romford; and with the addition of more than half of the parish of Great Warley.

The enlarged Hornchurch is divided into wards as follows:-

		No. of I	
		Electo	
Ward		October, 1	1934 Councillors
Cranham	 	869	1
Emerson Park		4,263	3
Harold Wood	 	2,744	2
North West	 	7,176	5
Rainham	 	2,779	2
Thameside	 	1,631	1
Town	 	5,700	4
Upminster	 	4,513	3

Rainfall during the Year.

I am indebted to Mr. F. Alderson, the Surveyor, for the subjoined information on rainfall as recorded at the Sewage Disposal works on the Rainham Road, and the Eastern Outfall works at Bury Farm, Great Warley.

Rainham Road Work	s			Amount of	No. of days
				rainfall	in which
				in inches	rain fell
January				1.08	15
February				.09	3
March				1.98	19

				1.23	14
November				1.56	9
December				4.06	25
Total				17.51	139
Eastern Outfall Work	s				
January				1.16	18
February	7.			.27	5
March				1.89	16
April				1.33	15
May				.37	4
7				1.09	7
Y 1	* *	- * *		.68	6
				1.98	11
August				1.07	8
September					
October				1.85	13
November	**			1.57	8
December			* *	3.32	22
Total			**	16.58	133

During the year 1933 rain fell on 141 days the total rainfall being 16.79 inches, and in the year 1932 the corresponding figures were 162 days and 19.15 inches. These figures were recorded at the Rainham Road works.

Population.

The census population of the different parts was enumerated in the years 1911, 1921 and 1931, as follows:—

			Yea	z r
		1911	1921	1931
Cranham	 	489	519	1,240
Hornchurch	 	9,461	10,891	28,417
Rainham	 	1,972	2,196	3,897
Upminster	 	2,468	3,559	5,732
Wennington	 	364	432	359
Great Warley	 	2,051	2,088	2,676

The population of the Enlarged District for the middle of the year as estimated locally was 60,800.

The Registrar-General's estimate of resident population for June 30th, 1934, is 55,798, but a figure modified to take account of the fact that the records do not wholly relate to the entire year has been calculated by the Registrar-General for use in connection with the statistical rates. This figure is 52,256.

At the 1931 census in the Hornchurch Urban District as then constituted the number of persons enumerated in dwellings occupied by Private families was found to be 96 per cent. of the whole.

In addition there were 53 persons (0.2 per cent.) in civilian hospitals; 639 persons (2.2 per cent.) in Poor Law Institutions; and 323 persons (1.1 per cent.) in Air Force premises.

In the Romford Rural District 96.5 per cent. of the total census population consisted of private families.

Births.

The number of births registered during the year was 728.

The figures supplied by the Registrar-General which take into account births occurring during temporary residence outside the District and correctly included in the Hornchurch figures are :—

			Males	Females
Legitimate	 	 	463	432
Illegitimate	 	 	19	8

The percentage of illegitimate births to the total registered was 2.9. The birth rate calculated on a population of 52,256 is 17.6 per thousand estimated population.

A comparison with previous years follows :-

1933	 	18.4	1929	 	17.0
1932	 	18.1	1928	 	14.9
1931	 	20.1	1927	 	16.3
1930		16.1	1926	 	17.3

Deaths.

There were 254 deaths registered in the District during the year, this number including 41 belonging to other districts.

The deaths of Hornchurch residents registered as having died in other districts was 231.

By subtracting the former and adding the latter a corrected total of 444 deaths is obtained.

The figures of Hornchurch residents' deaths which occurred in outside institutions was :—

Oldchurch Hospital, Romford		 	146
Other Essex General P. A. Hospita		 	. 7
Brentwood and Severalls Hospital	S	 	3
Victoria Hospital, Romford		 	9
Romford Isolation Hospital		 	15
Queen Mary's Hospital, Stratford		 	3
King George Hospital, Ilford London Hospital		 	7 8
London Hospitai	* *	 	0

Other Hospitals i	in Lond	on	 	 19
Nursing Homes			 	 3
Private houses			 	 11
				991

The percentage of deaths of Hornchurch residents occurring in-Hospitals or other public institutions was 48.8 per cent.

The crude death rate calculated on a population of 52,256 was 8.4 per thousand estimated population.

A comparison with previous years follows:-

1933	 	7.8	1929	 	9.9
1932	 	7.9	1928	 	8.4
1931	 	8.4	1927	 	9.4
1930	 	8.2	1926	 	10.6

Comparative mortality after allowing for differences in the population constitution.

The Registrar-General has supplied a comparability factor by which the crude death rate is to be multiplied in order to give a mortality figure which is strictly comparable with those of other districts to which the same treatment has been applied.

The adjusted mortality rate for Hornchurch in the year 1934 thus obtained is 9.3.

Coroner's Inquest or Enquiry.

Ca

Miscellaneous diseases

During the year 43 deaths (27 male and 16 female) which occurred in the District were investigated by the Coroner. They included the deaths of 8 persons belonging to other districts.

Of the total of 43 in 19 cases an inquest was held; the Coroner certified the cause of death in 14 cases after autopsy; and in 10 other cases after enquiry alone.

The classification into stated age-groups was as follows:-

Age-group		Λ	Tumber	Age-grou	p	N	umber
Under 1 year	ar		3	45-54 y	rears		4
1— 4 year	rs		4	55-64	,,		5

MATERNAL MORTALITY.

There were 6 puerperal deaths 1 being due to Septicæmia and 5 to other puerperal causes.

Five deaths occurred in hospitals and one in a private registered nursing home.

The age at and certified cause of death were :-

Age	Cause
16 years	s Pulmonary embolism.
23 ,,	Obstructed labour; cæsarian section.
29 ,,	Eclampsia; Pulmonary œdema.
38 ,,	Streptococcal septicæmia; incomplete abortion.
40 ,,	Pulmonary embolism.
43	Obstructed labour: cæsarian section.

The maternal mortality rate, i.e. the deaths from puerperal causes per 1,000 total births was 6.3. The corresponding rate for the year 1933 was 1.3 and for 1932 was 4.7.

The maternal mortality rate for England and Wales per 1,000 total births was 4.41.

INFANTILE DEATHS.

During the year 1934 there were 34 male and 19 female deaths of children under one year of age.

The infant mortality or rate per 1,000 births was 57.4 .

The figures for the last 4 years are subjoined.

			No. of deaths	
Year			under one year	Rate
1933	 	 	37	51.8
1932	 	 	33	53.9
1931	 	 	37	62.5
1930	 	 	33	72.7

NEONATAL MORTALITY.

This term is applied to the deaths of children under one month. There were 31 of such deaths yielding a rate of 33.6 per 1,000 births for the year.

Prematurity was responsible for 12 of the total; 9 other deaths were due to congenital malformations and atelectasis.

Of the 22 infantile deaths over 1 month developmental and wasting diseases caused 6, and bronchitis and pneumonia 5 deaths.

The following table shows the deaths from stated causes at various ages under one year.

	Under one week	1—2 weeks	2—3 weeks	3—4 weeks	Total under 4 weeks	4 weeks —3 mos.	3—6 months	6—9 months	9—12 months	Total
Measles										
Whooping cough

SECTION B.

GENERAL PROVISION OF HEALTH SERVICES FOR THE AREA.

1. Officers of the Public Health Department.

MEDICAL OFFICER OF HEALTH.

(Wholetime in Hornchurch since 1st October, 1934.)

ALFRED BALL, M.D., B.S. (Lond.), M.R.C.S. (Eng.), L.R.C.P. (Lond.), D.P.H. (R.C.P.S.) Lond.

SANITARY INSPECTORS.

H. BOUSFIELD, San. Insp. Certif. R. San. Institute.

L. Ager, Assoc. Royal San. Institute.

E. H. LLOYD, San. Insp. Certif. R.S.I. & S.I. Joint Board.

CLERK.

J. BLAY.

2. Laboratory Facilities.

Under arrangements made by the Essex County Council sputum, swabs and other pathological material are examined by Dr. Beale, the County Pathologist, at the Laboratories, 91, Queen Victoria Street, London, E.C.4. Reports are sent to the Doctors submitting the sample, and a copy is forwarded to the Medical Officer of Health.

Water, Milk and other foodstuffs may also be examined in the Laboratories on the instructions of the Local Council.

The pathological specimens examined by the County Bacteriologist during the year included:—

368 throat swabs (50 positive, 318 negative).

7 nasal swabs (0 positive, 7 negative).

114 sputum for tubercle bacilli (21 positive, 93 negative).
1 sample of blood for Widal test (negative).

7 urine.

5 hair for ringworm (spores present in 4).

3 miscellaneous.

3. Ambulance Facilities.

(i) The Council have an arrangement with the Upminster branch of the St. John Ambulance Brigade for the use of an ambulance which is stationed in Upminster.

This is a temporary provision pending the provision by the Council

of a motor ambulance.

A reciprocal arrangement with neighbouring authorities is also under consideration.

- (ii) Public Assistance cases are removed to Oldchurch Hospital by motor ambulances provided for the purpose and kept at the institution.
- (iii) The Romford Joint Hospital Board remove cases of notifiable infectious diseases by motor ambulances which are stationed at the Hospital, Rush Green.

4. Nursing in the Home.

Local Nursing Associations are carrying on excellent work in the following centres:—

Harold Wood Hornchurch Town Rainham and Wennington Upminster and Cranham

The local associations are affiliated to the Essex County Nursing Association.

5. Clinics and Treatment Centres.

The County Council is the Local Authority for Maternity and Child Welfare and for the medical services among school children.

NURSING AND MATERNITY HOMES.

There are 5 registered Nursing and Maternity Homes in the District.

MIDWIVES.

The number of midwives practising in the District, some of whom live just outside, is 19.

6. Hospitals.

INFECTIOUS DISEASES.

The Romford Joint Hospital District was constituted in the year 1899. It includes the Urban Districts of Hornchurch, Dagenham and Romford. The Joint Hospital Board consists of 4 elected representatives from Hornchurch, 5 from Dagenham and 3 from Romford and in addition the Chairman of each District is *ex-officio* a member.

The Hospital Board has provided an Isolation Hospital at Rush Green containing approximately 150 beds. A scheme to provide about 100 additional beds is now under consideration.

During the year 255 patients were admitted to the Isolation Hospital from this District including 134 cases of Diphtheria, 112 cases of Scarlet Fever, 2 cases of Cerebrospinal Fever, 2 cases of Meningitis, 1 case of Measles, 1 cases of Pneumonia and 3 others.

Furthermore 13 cases of Diphtheria and 7 cases of Scarlet Fever were sent for treatment to the London Fever Hospital or to London County Council Fever Hospitals, owing to lack of accommodation in the Romford Isolation Hospital.

SMALLPOX.

The Romford Joint Hospital Board has an agreement by which cases of Smallpox may be sent for isolation and treatment to the Orsett Smallpox Hospital.

The Board paid the sum of £99 as a retaining fee during the last financial year.

No case of Smallpox occurred in this District during the year.

7. Legislation.

Byelaws which are in force in the District have been made with respect to :—

- (1) Nuisances in connection with the removal of offensive matters.
- (2) Common Lodging houses.(3) Houses let in lodgings.

- (4) Nuisances from filth, dust, etc.
- (5) Slaughter houses.(6) Tents, Vans, Sheds.
- (7) Certain offensive trades.

The following adoptive Acts are in force :-

- (1) Infectious Disease (Prevention) Act, 1890.
- (2) Private Street Works Act, 1892.
- (3) Public Health Act, 1925.

PUBLIC HEALTH ACTS AMENDMENT ACT, 1890.

Part III of this Act as amended by the Local Government Act, 1933, was adopted by the Council and came into operation on the 1st November, 1934.

SLAUGHTER OF ANIMALS ACT, 1933.

The Council resolved on the 18th September, 1934, that section 1 of the Act shall apply to sheep, ewes, wethers, rams and lambs.

ESSEX COUNTY COUNCIL ACT, 1933.

Section 158 of the Act was adopted by the Council by resolution on 20th February, 1934, and came into force three months later.

This section requires the registration of every manufacturer or vendor of ice cream and also of any premises used for the manufacture, storage or sale of ice cream. Power is given to the Local Authority under certain circumstances either to refuse an application for registration or to remove premises from the register.

SECTION C.

SANITARY CIRCUMSTANCES OF THE AREA.

Water.

The South Essex Waterworks Company provide a constant supply of water which is satisfactory in quality and has been equal to all demands made on the Company.

A drought was experienced in some parts of the country but in this District it was not found necessary to impose any restrictions on the use of water for domestic purposes or for watering gardens.

Sewerage and Sewage Disposal.

Further consideration has been given to the problem of sewage disposal with the object of abolishing small works and at the same time making full provision for the needs of the District.

Negotiations were carried on with the Romford Council for the enlargement of their disposal works situated in Hornchurch and for the construction of main sewers which would serve the needs of both Districts.

Finally an Agreement was drawn on the 17th January, 1934, by which a Joint Committee known as the Romford and Hornchurch Joint Sewerage Committee was established consisting of 5 members from each Authority.

This Joint Committee will exercise the functions of a Local Authority relating to the management and control of the disposal of sewage and the common sewers upon the terms and conditions described in the Agreement. The common sewers which will be under the control of the Committee are:—

- (1) High Level 48 ins. sewer in length about 1,382 yards from the Sewage Works.
- (2) Low Level 18 ins. sewer in length about 2,168 yards from the Sewage Works.
- (3) Ravensbourne Valley sewer from Gallows Corner to the point where it joins the main sewer.
- (4) Ingrebourne Valley Sewer.

The Agreement provides for the construction of the Ravensbourne Valley sewer under the direction of the Romford Council. The contract price which has been accepted is £19,920.

Contracts have been signed for the construction of the Ingrebourne valley sewer at a cost of £16,292 19s. 0d. and the extension of the Sewage works at a cost of £47,911 under the direction of the Hornchurch Council.

When the extensions to the Outfall works at Bretons Farm have been completed and the Ravensbourne and Ingrebourne Valley sewers constructed and connected, the Harold Wood, Upminster, and Rainham Road works will be abolished and the whole of the District will be drained to two works, viz. Bretons Farm for the western part and Bury Farm for the eastern.

BRANCH SEWERS.

The Surveyor has kindly supplied the following list of new sewers or extensions of existing sewers completed during the year:—

Rivers.

No action was taken.

Closet Accommodation.

Most of the houses are provided with water-closets connected with sewers.

Public Cleansing.

The collection and disposal of house refuse is carried out under the direction of the Surveyor. The house refuse is removed weekly in horse-drawn closed-in vehicles to a tip which is under the control of the Council and where it is covered with earth.

Sanitary Inspection of the District.

Report of the Sanitary Inspectors under Article 19 of the Sanitary Officers' Order, 1926.

The following information supplied by the Sanitary Inspectors is a classified statement of the number of premises visited, the defects or nuisances discovered, and the action and result of action in regard to these.

Schools.

The sanitary condition of the schools is satisfactory also the water supply which is from the South Essex Waterworks Company.

Cases of notifiable infectious diseases occurring amongst school children and any contacts which there may be in the same house are dealt with by exclusion from school, in accordance with the Memorandum on Exclusion from School, 1927. An intimation is sent in every case to the Head Teacher of the school concerned.

Furthermore, the names of the children absent from school stated to be suffering from Infectious Disease are reported on Form M.I. 13, by Head Teachers to the Medical Officer of Health.

Following is a list of Public Elementary schools in the District:—

SECTION E.

SUPERVISION AND INSPECTION OF FOOD.

1. Milk Supply.

There are 16 dairy farms registered for the production of milk in the District at 8 of which the producers are also registered as retailers.

In addition there are 15 persons registered as milk retailers who retail from premises in the District also 20 persons retailing from premises outside.

Dairy farms and dairies are inspected frequently to see that the trade is being carried on in accordance with the requirements of the Milk and Dairies Order, 1926.

Dairy farms registered				16

Pasteurised milk				3

In addition 7 supplementary licences, 4 for Grade A (Tuberculin tested) milk, 2 for Pasteurised milk and one for Grade A milk, were issued these being licences required by retailers who hold principal licences in another district and wish to sell the milk in this district from premises elsewhere.

MILK SAMPLING.

During the year 28 samples of milk were examined for cleanliness and bacterial content by the County Bacteriologist. They included 10 samples of graded milk all of which were satisfactory and 18 samples of raw milk of which 13 were satisfactory. An excerpt from the report on each sample is given below.

When an unsatisfactory report is received the retailer is cautioned and investigations are made with a view to obtaining better results.

2. Ice Cream.

ESSEX COUNTY COUNCIL ACT, 1933. PART XI.

Ice cream manufacturers or vendors are required to be registered by the local council under section 158 of the Act which was adopted by the Council by resolution on 20th February, 1934, and came into force three months later.

During the year 63 applications for registration were granted.

At the end of the year 62 persons were registered as vendors in the District and 1 as a wholesale manufacturer only.

3. Meat.

There are 6 slaughterhouses, 4 registered and 2 licensed, which are visited regularly by the Sanitary Inspectors and the carcases inspected.

2 heifers' carcases and all internal organs (emaciated); 11 sheeps' carcases and all internal organs (aged and dropsical); 18 lbs. mutton (bruised); 25 lbs. pork (tainted); 2 beasts' livers, 2 beasts' heads, 9 pigs' heads, 2 pigs' plucks, 1 pig's liver, 1 pig's mesentery (tuberculosis); 7 beasts' livers, 4 lbs. ox liver (fluke); 1 beast's liver (cirrhosis); and 2 beasts' livers (hæmorrhages), were surrendered and destroyed.

SLAUGHTER OF ANIMALS ACT, 1933.

This Act requires animals to be stunned or slaughtered by a mechanically operated instrument so that they shall be rendered insensible to pain until death occurs.

It is now necessary for all slaughtermen to be registered by the Council under section 3 of the Act.

16 applications for licences under the Act were received during the year and all were granted.

SECTION F.

PREVALENCE OF AND CONTROL OVER INFECTIOUS DISEASE.

Summary of Notifiable Diseases (other than Tuberculosis) during the year 1934.

Disease			Cases Notified	Admitted to Hospital	Total Deaths
Smallpox			 0	0	0
Scarlet Fever			 226	123	2
Diphtheria			 158	151	12
Enteric Fever (inc.]	Paraty	phoid)	 1	1	0
Puerperal Fever			 1	1	1
Puerperal Pyrexia			 5	2	1
Pneumonia			 26	7	
Erysipelas			 19	3	1
Cerebrospinal Fever			 2	2	0
Malaria			 1	1	0

Included in the above are 4 cases of Diphtheria and 4 cases of Scarlet Fever which occurred among the children in the Hornchurch Children's Home and were removed to a London County Council Hospital.

The following table shows the number of notified cases of Scarlet Fever and Diphtheria in stated age-groups:—

Years				Scarlet Fever	Diphtheria

			,	226	158

Scarlet Fever.

226 cases of Scarlet Fever giving a rate of 4.3 per 1,000 of the population were notified as compared with 209 and a rate of 5.4 in the year 1933.

The case rate in England and Wales was 3.76.

Most of the cases were mild in character.

There were 2 deaths, one child aged 7 dying in hospital from nephritis and a male adult dying at home from septicæmia.

The uncomplicated cases were detained in hospital about 28 days. Antiscarlet serum was administered to all severe cases and to other cases admitted early in the disease.

The following table shows the number of cases notified in each ward during each month of the year :—

	Total	Cranham	Emerson Park	Harold Wood	North West	Rainham	Thameside	Town	Upminster	
January	 29		5	2	12	[5]	1	9	[4]	
February	 19	[1]	2	3	4	[3]		10	[4]

There were 12 deaths from Diphtheria giving a case mortality of 7.5 per cent.

Of the fatal cases 4 were males aged 5—9 years; and 8 were females one being 4 years, 4 being 5—9 years, and 3 being 10—14 years of age.

Serum is available for the use of medical practitioners on application, but it is usually administered at the hospital on admission.

Cases are admitted to the Isolation hospital on a clinical diagnosis and practitioners are advised not to wait for a report on a swab.

SCHICK TESTING AND ARTIFICIAL IMMUNISATION.

Cases of Diphtheria having occurred in a residential school Dr. E. James, Medical Superintendent of the Isolation Hospital, very kindly schick-tested 23 boarders and administered immunising doses of T.A.F. to 18 of the 20 children who were found to be positive to the test. At the end of the year these children had not been retested as a sufficient period had not elapsed since the last immunising injection.

Measles.

During the year 731 cases of Measles were reported by Head Teachers as occurring among school children.

There were 6 deaths from Measles, the rate per 1,000 population being 0.11.

The ages at death were: 17—20 months in three instances: one 3 years: one 6 years: and one 13 years.

The complications stated on the death certificates being the determining causes of death were: Broncho-pneumonia (3): Purpura (1): Otitis Media (1): Adenitis (1).

Five of the six cases were treated in hospital.

When the new wards to be provided under the scheme now under consideration by the Joint Hospital Board have been built it is hoped that it will be possible to admit all cases of Measles and Whooping Cough with complications needing hospital treatment.

Whenever the accommodation in the Isolation Hospital permits such cases will take precedence over mild uncomplicated cases of Scarlet Fever when the latter can be isolated at home satisfactorily.

Whooping Cough.

The incidence of Whooping Cough was low. One death, that of a child aged 16 months was certified.

Abortus Fever.

One case, that of a person being treated in a general hospital outside the District, was reported to be suffering from this infection. The source could not be traced.

Ophthalmia Neonatorum.

There were 2 cases of Ophthalmia Neonatorum during the year. Both were treated at home and recovered with no scarring of the cornea.

Tetanus.

One death, that of a man aged 23 years was certified to be due to Tetanus, following an injury to the leg.

Public Health Act, 1925.

No action was taken during the year under section 66 of this Act.

Tuberculosis.

The notifications of cases of Tuberculosis included 34 males and 30 females suffering from Pulmonary and 11 males and 12 females suffering from Non-Pulmonary forms of the disease. The 37 deaths included those of 3 pulmonary cases and 1 meningitis which were not notified.
