ANNUAL REPORT
OF THE
MEDICAL OFFICER OF HEALTH
FOR THE
Metropolitan Borough of Stepney.

1902.

REPORT

ANNUAL REPORT

MEDICAL OFFICE OF HEALTH AND PUBLIC SAFETY

MEDICAL OFFICE OF HEALTH AND PUBLIC SAFETY

REPORT.

OF THE

MEDICAL OFFICER OF HEALTH AND PUBLIC ANALYST,

FOR THE YEAR 1902.

To the Mayor, Aldermen and Councillors of the

METROPOLITAN BOROUGH OF STEPNEY.

GENTLEMEN,

I have much pleasure in presenting you with my second Annual Report, which deals with the Vital and Sanitary Statistics of the Borough of Stepney for 1902.

Population.

The estimated population was 300,551, distributed as follows:—

Limehouse District ...	...	...	...	58,071
St. George's District ...	...	...	...	49,658
Mile End District ...	...	...	...	113,720
Whitechapel District ...	...	...	...	79,102

Births.

The total number of births registered during the year was 11,294, which consisted of 5,807 males and 5,487 females.

1,869 were registered in the Limehouse District, or at the rate of 32.1 per 1,000 of the population.

2,191 were registered in the St. George's District, or at the rate of 44.1 per 1,000 of the population.

4,425 were registered in the Mile End Old Town, or at the rate of 30.1 per 1,000 of the population.

2,809 were registered in the Whitechapel District, or at the rate of 35.5 per 1,000 of the population.

The birth-rate for the whole of the Borough was equal to 37.5, which is slightly below the average for the preceding 10 years.

It will be seen that the birth-rate varies in different parts of the District.

In the Limehouse District the birth rate is lower than in any year during the last ten years, with the exception of 1900. It has been gradually declining since 1895.

In St. George's, on the other hand, the birth rate was higher than in any year during the last ten years, with the exception of 1900.

It is a curious fact that the birth rate was lower in the Limehouse District, and higher in St. George's, during 1900 than it has ever been in any year since 1892.

The birth rate has been declining in Mile End Old Town since 1898, and in the Whitechapel District since 1899.

The birth rate is, however, far higher in the Borough than that for the whole of London, which was 28.5 per 1,000 of the population in 1902.

Marriages.

The marriages during the year numbered 2,713, or 11 less than in the previous year.

The proportion of persons married was 18 per 1,000 of the population.

509 marriages occurred in the Limehouse District, or at the rate of 19·2 persons married per 1,000 of the population.

272 marriages occurred in the St. George's District, or at the rate of 10·9 persons married per 1,000 of the population.

1,526 marriages occurred in the Mile End District, or at the rate of 26·9 persons married per 1,000 of the population.

406 marriages occurred in the Whitechapel District, or at the rate of 12·9 persons married per 1,000 of the population.

The annual rate of persons married per 1,000 of the population in the whole of London was 17·8.

Taking into consideration the fact that the relative number of marriages is below and the birth-rate is very much above that of London, it is evident that it is due, among other things possibly, to the immigration of families at the child-bearing period, and to the fact that these immigrants have, as a rule, a large number of children. This is more marked in St. George's, where of recent years there has been more immigration.

The birth rate is higher and the marriage rate is lower in St. George's than in any other part of the District.

Deaths.

The total number of deaths occurring in the Borough was ...	6,073
Deduct deaths occurring within the Borough among persons not belonging thereto	925
	5,148
Deaths of residents outside the Borough	1,015
	6,163

The deaths, exclusive of those of non-residents which occurred in Public Institutions situated in the Borough, but inclusive of those residents which occurred in out-lying Institutions, numbered 6,163. This corresponds to a death rate of 20·5 per 1,000 of the population.

1,374 occurred in the Limehouse District, or at the rate of 23.6 per 1,000.

1,100	„	„	St. George's District,	„	„	22.1	„
2,166	„	„	Mile End District,	„	„	19.0	„
1,523	„	„	Whitechapel District,	„	„	19.2	„

Though the death rate is higher than that for the whole of London (17.2), it is lower than that of any year during the last ten years, and is 2.1 below the ten years' average.

Compared with 1901 the causes of death were:—

Disease.	1901.	1902.	Increase	Decrease.
Small-pox	22	252	230	—
Scarlet Fever	41	26	—	15
Enteric Fever	47	33	—	14
Measles	155	158	3	—
Diphtheria	78	79	1	—
Croup	3	2	—	1
Whooping Cough	91	188	97	—
Diarrhœa	247	117	—	130
Enteritis	192	188	—	4
Rheumatic Fever	12	7	—	5
Phthisis	626	576	—	50
Other Tubercular Diseases	239	233	—	6
Bronchitis, Pneumonia, and other Respiratory Diseases	1,290	1,349	59	—
Heart Disease	481	444	—	37
Influenza	42	59	17	—
Injuries	260	288	28	—
Convulsive Diseases	348	304	—	44
Wasting Diseases	355	289	—	66
Premature Births	178	159	—	19
Old Age	345	260	—	85
Cancer	211	201	—	10
Alcoholism	100	102	2	—
All other Diseases	854	849	—	5
	6,217	6,163	437	491

The excess of births over deaths was 5,131.

The following is a list of the Out-lying Institutions and the number of residents that have died in them during the year:—

Bean Yard Infirmary ...	...	...	...	...	1
Bethnal Green Infirmary ...	...	...	...	...	6
Brook Fever Hospital ...	...	...	...	...	4
Bethnal House Asylum ...	...	...	...	...	3
Banstead Asylum ...	...	...	...	...	14
Belgrave Hospital ...	...	...	...	...	1
Cane Hill Asylum ...	...	...	...	...	4
Convent Hospital ...	...	...	...	...	2
Caterham Asylum ...	...	...	...	...	2
Clayhall Road Asylum ...	...	...	...	...	1
Camberwell Workhouse ...	...	...	...	...	1
City of London Asylum ...	...	...	...	...	1
City of London Infirmary ...	...	...	...	...	2
Colney Hatch Asylum ...	...	...	...	...	41
Claybury Asylum ...	...	...	...	...	35
Children's Hospital, Great Ormonde Street ...	...	...	...	...	15
City of London Chest Hospital ...	...	...	...	...	19
Charing Cross Hospital ...	...	...	...	...	2
Children's Hospital, Paddington ...	...	...	...	...	1
Cancer Hospital ...	...	...	...	...	2
Darenth Asylum ...	...	...	...	...	4
Dartford Asylum ...	...	...	...	...	14
Eastern Fever Hospital ...	...	...	...	...	8
Found dead in street ...	...	...	...	...	69
French Hospital ...	...	...	...	...	1
Guy's Hospital ...	...	...	...	...	1
Grove Hall Asylum ...	...	...	...	...	1
Gore Farm Small-pox Hospital ...	...	...	...	...	9
German Hospital ...	...	...	...	...	29
Hanwell Asylum ...	...	...	...	...	5

St. George's Hospital	...	...	...	...	1
Trinity Alms Houses	...	...	...	...	3
Throat Hospital, Golden Square	...	...	...	...	1

The following deaths of residents occurred in Public Institutions in the Borough:—

East London Hospital for Children	...	...	...	195
London Hospital	...	...	...	746
Mile End Infirmary	...	...	...	296
Mile End Workhouse	...	...	...	1
Ratcliff Workhouse	...	...	...	76
St. George's Infirmary	...	...	...	244
Whitechapel Infirmary	...	...	...	366
Whitechapel Workhouse	...	...	...	48

Small Pox.

The Small-pox epidemic which began in September, 1901, continued until the third quarter of 1902. During 1902, 1,242 genuine cases were notified, of which 252 died.

The total number during the outbreak in 1901 and 1902 was 1,410, with 283 deaths. In addition to this number, another 129 cases were notified which turned out not to be Small-pox.

Not only was this the largest number that occurred in any district in London (exceeding the nearest to it by nearly 850), but with one exception the rate per 1,000 was greater.

This was due to several causes. In the first place, vaccination before the outbreak had been neglected throughout the whole of the Borough, but greater in some parishes than in others.

In the second place, it was due to the large number of common lodging houses in the district, where it is most difficult to stamp out the disease once it has gained a firm foothold.

It will be seen later on, in giving particulars of the cases that occurred in these houses, that the lodgers wandered from place to place, and did not seek medical advice till the eruption had appeared. In fact, when asked when they were first taken ill, they often gave the date when the rash appeared, and until it had appeared they did not feel ill.

It was also due to the large number of prostitutes that contracted the disease. Some of these were the lowest of the low, and in the intervals of sleeping in common lodging houses, they slept in the streets, when they did not have sufficient money to pay for a night's lodging. Questions were asked in every instance as to the patient's

employment. Thirty admitted that they were prostitutes. A still larger number said that they were out of work, and in these cases it was more than suspicious that they lodged in houses known to be brothels.

In one common lodging house fourteen single women were removed, and seven of these admitted that they were prostitutes. In another, four out of the eight removed, stated that they were prostitutes.

Another cause that materially swelled the number was the outbreak at the Mile End Infirmary, which was responsible for 97 cases, 91 of them being nurses, patients and school-children, and five persons who worked in the Infirmary, as well as one discharged patient of the Infirmary.

The number in common lodging houses in Whitechapel was	...	221
" " " " St. George's was	...	25
" " " " Limehouse was	...	10
Total	...	256

The number in Mile End Infirmary was	...	91
" " Whitechapel Infirmary	...	24
" " St. George's Infirmary	...	7
" " Ratcliff House	...	2

There were in addition 91 cases in houses in Whitechapel which were let out in furnished rooms. These rooms are let out nightly, often in the same way as common lodging houses, except that they are let to families and not to single persons.

They are often let in conjunction with common lodging houses, and are owned frequently by the same owner.

This leaves 774 cases, which were distributed as follows:—

Limehouse District	...	142
St. George's	...	70
Mile End	...	457
Whitechapel	...	105

On the receipt of a notification of Small-pox, the Asylums Board was communicated with, and arrangements were at once made for the patient's removal to the Small-pox Hospital. I immediately visited the premises and endeavoured to find out from the patient, particulars as to the source of the infection, conditions as to vaccination, etc.

The names of the children in the house, and the schools where they generally attended, were obtained. The children were forbidden from going to school, and the headmasters were communicated with. When the children could again with safety attend school, certificates were sent direct to the headmasters.

The names and addresses of all persons that had been in contact with the patient and had been exposed to the infection, were obtained. The employers were informed of the circumstances, and if the contacts lived in other districts the Medical Officers of Health for those districts were also informed of the particulars of the case. The Public Vaccinator of the district was also informed.

I personally visited all the contacts living in our district, and examined all the persons living in the house where a case had occurred, at least twice a week for the succeeding fortnight. The Sanitary Inspectors visited these houses daily, and inquired whether anyone felt ill. If anyone appeared to be ill, the Inspector informed me.

In comparing my list of contacts with the persons actually in the house at the time of my visits, I often found that some of the children were playing in the streets. I always waited till they were sent for, and in twelve instances I found that children actually suffering from modified Small-pox were out. All the people in the house, as well as those that had been exposed to infection, were urged to be at once vaccinated. The rooms were closed and fumigated with sulphur as soon as the patient was removed.

The paper was afterwards stripped from the walls, and the clothing, etc., disinfected by steam. If the bedding and clothing were in a filthy condition, they were burnt. If the family occupied a few rooms only, they were asked to occupy rooms at one of the shelters, where food was provided for them. In addition to the shelters at Globe Road and Prospect Place, three others were acquired and furnished, two at Rose Lane, and one at Emmott Street.

By visiting contacts I discovered 205 cases of Small-pox. No medical man had seen the patients, and in 104 cases there was no intention of seeking medical advice. This caused a great deal of extra labour, but its usefulness was proved by the results.

I saw, in consultation with medical practitioners, 605 doubtful cases, of which nearly 300 were not suffering from Small-pox. Though this is not considered part of my duties, I was always glad of it, as it gave me the opportunity of having the patients removed sooner than if the medical attendant waited, till he was absolutely certain of his diagnosis.

By immediately visiting the premises on the receipt of the notifications, I saw an additional 500 patients, and obtained particulars of their illness, and, if possible, the source of the infection before they were removed to the hospital.

The Metropolitan Asylums Board were asked that during the epidemic someone should be on duty at their offices at night, to receive messages and arrange for the immediate removal of persons suffering from Small-pox. In common lodging houses especially, it was essential that the patients should be at once removed, as they were frequently sitting in the kitchen with scores of others. The lodgers often did not come in till late in the evening, when they were then discovered to be ailing

and a doctor sent for. When it was found that the sick person was suffering from Small-pox, and the information conveyed to me, his removal by telephone could only be done before 8 p.m. Between 8 p.m. and 11 p.m. he could be removed by sending a telegram from the Whitechapel Road Post Office. After that hour he could only be removed by sending a telegram from Liverpool Street Station or by going direct to Homerton or any other Ambulance Station. In either case, much time was lost and a great deal of mischief could be done during that time. The reply of the Asylums Board was to the effect that during the four weeks ended on January 11th, 1902, the daily average number of applications made to the Stations after 8 p.m. for the removal of Small-pox cases was 2.7. In view of the small number of cases and of the very considerable cost of maintaining a night staff at the office, the Board did not feel they would be justified in acceding to the request. Considering that a patient can be removed at any time after the usual hours by the method above mentioned, I fail to see that any very great increase in the staff would be required at the Ambulance Stations, and one officer only, would be necessary during the night at the Board's offices, to receive the telephonic communications. Even though the number of daily applications remained as low as 2.7, I think the extra expense would be more than justified. This number must have been materially increased afterwards, as at this time the epidemic had not by any means reached its height.

Early in the year I reported to the Public Health Committee that unavoidable delay was caused by the present system of vaccination. The Act requires that information is at once to be sent to the Vaccination Officer of the occurrence of any cases of Small-pox. The Vaccination Officer visits the premises, and obtains the names and ages of all those that want to be vaccinated. He reports to the Public Vaccinator, who then visits. In all instances I notified the Public Vaccinator at the same time as the Vaccination Officer, and, in the case of two of these officers, they visited without waiting for the report of the Vaccination Officers.

I suggested to the Public Health Committee the advisability of employing a qualified medical man, who would devote his whole time to visiting houses where Small-pox had occurred, and vaccinating all those who desired to be vaccinated, immediately the patient had been removed to the Hospital. It was decided by the Public Health Committee that an application be made to the Local Government Board to sanction the proposed appointment during the period for which the epidemic lasted, and also to ask the Local Government Board to contribute toward the expense by supplying the lymph free of charge. In reply, the Board intimated that as the administration of public vaccination is at present vested by law in the hands of the Boards of Guardians, the Board could not understand on what grounds it was proposed by the Borough Council to employ a medical practitioner, other than the Public Vaccinator, to carry out the work which that officer is appointed by the Guardians to perform. Unavoidable delay was, of course, the chief reason. At the same time, vaccination is a sanitary measure, and I fail to understand, why the administration of the Vaccination Acts was ever placed in the

hands of the Boards of Guardians. I hope, however, that the next Vaccination Act will remedy this, and that the powers and duties of the Guardians in connection with vaccination, will be transferred to the Sanitary Authorities.

Placards were posted throughout the district in January, calling attention to the spread of Small-pox, and recommending vaccination. The names and addresses of the Public Vaccinators in the various districts were given, together with the hours of attendance at the Vaccination Stations.

At the beginning of the outbreak all the Sanitary Inspectors, Clerks, and Disinfectors were re-vaccinated. During the height of the epidemic 21 men were employed in the removal of infected clothing and in disinfecting rooms. The driver of the disinfecting van was employed by the contractor, and he was the only man who was not re-vaccinated. He took no actual part in removing the clothing, as his duties consisted entirely in driving. He was the only one that contracted Small-pox. All the others escaped.

I had no difficulty in having persons suffering from Small-pox removed to the Hospital, with one exception only. In this case the parents wanted to isolate the patient at home. I applied to a magistrate at the Thames Police Court, and he granted me an Order to compel the patient's removal. This had the desired effect, and the patient was removed without further delay.

Callousness and carelessness amounting almost to criminal negligence were, however, responsible for a great deal.

The following instances will better explain what I mean.

(1) A case of Small-pox occurred in a house in Agnes Street and was removed to the Hospital on January 18th. A school mistress lodged in the same house, and as soon as she heard of it, she left the house, leaving no address. On February 3rd she called at the Public Health Offices, and asked me for a certificate, so that she could resume her duties at the school. I noticed that she wore a very thick black veil, and after asking her a few questions, I requested her to lift her veil, so that I could see her face. As she did not appear to be anxious to do so, I became suspicious, and lifted up the veil myself. I then saw that her face was covered with a Small-pox eruption, which had probably appeared more than a week before. I did not give her another chance of running away, but locked her in a room till the ambulance arrived to remove her to the Hospital.

(2) A man called to see a doctor at his surgery in the City. The doctor diagnosed Small-pox, gave the patient a notification certificate, and told him to take it to the Public Health Offices. I was in the office when he came, and he was detained until an ambulance arrived. I wrote to the medical man, calling his attention to the facts of the case, and pointing out to him that he had contravened the Public Health Act. In reply, he wrote that he had only recently come to the district, and was not conversant with the provisions of the Act. He was requested to take proper precautions in the future.

(3) On February 17th I received a communication that three children living at 65, Salmon Lane, were suffering from Small-pox. I visited the premises, and after examining them, they were at once removed to the Hospital. In investigating the origin of the disease, I learnt that the father had been unwell about three weeks previously. He had been attended for a fortnight by a medical man, who said that he was suffering from "influenza, and that his blood was out of order as well." He was apparently all right at the time of my visit, and had been at work for a week. He was employed by a dairyman, and in taking milk to the various customers, he supplied dozens of people with milk every day. I asked him to take off his clothes, when I found that there were unmistakable signs that he had recently suffered from Small-pox. Even at that time I considered he was in an infectious condition, and he was immediately removed to the Small-pox Hospital, where he remained for nearly a fortnight. On February 19th another case occurred, and on February 20th two more cases were removed to the Hospital. On February 21st and 24th two more cases were removed, making nine altogether.

(4) On March 25th, a female was removed from Dixon Street to the Small-pox Hospital. I visited the premises, and on examining the other people in the house I found that the patient's husband had been ill a fortnight previously, and was attended by a medical man, who said he was suffering from influenza. On inquiring, I found that on March 5th he had what in my opinion were all the symptoms of Small-pox. On March 8th a rash appeared. His wife was taken ill on March 19th, or exactly a fortnight afterwards. I had not the slightest hesitation in coming to the conclusion that the husband had suffered from the same disease, and his clothing was taken away and disinfected.

(5) A man living at 155, Ernest Street, was working in Epsom. He was taken ill on March 23rd, and on March 26th the rash appeared. On Saturday, March 29th, he came home in a crowded railway carriage, when the rash was in a purulent condition.

(6) No. 3, Dorset Street, is a house in which furnished rooms are let. It is similar to a common lodging house, except that the rooms are generally let to families and not to single individuals. The class of people is the same, and the tenants are frequently changed. Several cases of Small-pox occurred in this house during March. On March 27th I examined everyone in the house, and I found one child in the house suffering from Small-pox. On account of the condition of the skin it was impossible to say how long the child had been ill, and the people in the same apartments did not know, or pretended not to know, that the child had been ill at all. The child was in a frightfully dirty condition, and in addition to the eruption of Small-pox, there was another rash due to Scabies, or the Itch.

The child was removed to the Small-pox Hospital, and the whole house was at once closed and thoroughly disinfected before it was allowed to be re-occupied.

On April 2nd I received a notification from the London Hospital that another child in the same house, but belonging to another family, was suffering from Chicken

Pox. I had visited the house that morning, when the child in question was out. I again visited the house, and found that the child was suffering from Small-pox, and not Chicken Pox.

(7) A female living at 53, St. Thomas' Road, was taken ill on March 13th, and on the 16th a rash appeared. On March 17th she went to St. Bartholomew's Hospital, where she waited some time in the waiting-room. She was seen by the medical officer in charge, who prescribed for her, and she was told to go home. According to the patient's story, she was told to come again "if the spots became worse." She returned home partly by train and partly by tram. On March 21st she got worse and the rash became "milky" in appearance. She went to the hospital, taking the train at Aldgate as before. On this occasion the disease was diagnosed, and she was removed to the Small-pox Hospital. A few days afterwards two others in the house contracted the disease. The Hospital authorities on being communicated with, denied the statements made by the patient.

(8) On March 23rd I received a notification that a case of Small-pox occurred at 2, Brantridge Street. I visited the premises on the same date, and examined everyone in the house. Two of the children were out playing in the streets. They were sent for, and I waited till they came. On examining them I found that one, a girl aged 13, was suffering from Small-pox. She was at once removed to the Small-pox Hospital. On inquiring I found that she was taken ill on March 13th, and was seen by a medical man on the 14th. She was again seen by the same medical man on the 15th, when a rash had appeared. The doctor diagnosed Chicken Pox, but failed to notify me of the fact. I saw him afterwards, and his excuse was that he thought the child was suffering from Chicken Pox, and he did not know that Chicken Pox was a notifiable disease.

(9) Mr. L. A. Hince, living at 31, Portland Street, went to the Vaccinating Station to be vaccinated on March 13th. He was seen by the Public Vaccinator, who told him to go home at once, as he was suffering from Small-pox. The house where he lodged was visited the same night about 11 p.m. The patient had not then arrived home. His landlady was informed of the fact, and when the patient returned she told him that he was to go to his room and stay there till he could be removed to the Small-pox Hospital. He admitted to her, that he was suffering from Small-pox, but he would not stay in his room. In the morning he went out, taking a bag with him. He was removed to the Hospital on the same day. After his discharge, proceedings were taken against him for exposing himself in public while suffering from Small-pox. He was fined £5 and £2 3s. costs.

(10) A woman went to the London Hospital on March 20th. She was informed that she was suffering from Small-pox, and was detained in the isolation room till the ambulance arrived. Before the ambulance arrived she ran away, and tried to obtain admission to the Whitechapel Infirmary. She was seen by the Medical Superintendent, who diagnosed Small-pox, and detained till the arrival of the ambulance, when she was removed to the Hospital.

For wilfully exposing herself, well knowing that she was suffering from Small-pox, the Public Health Committee gave authority to prosecute her, but her address could not be found in order to serve the summons when she was discharged from the Hospital.

(11) On March 27th I received information that two people living at 109, Rhodeswell Road, were suffering from Small-pox. I visited the premises, and on examining the other members of the family I found that one man had been ill since March 2nd, and was treated for influenza by his doctor. In my opinion he had at the time of my visit just recovered from Small-pox.

(12) On March 29th I received a notification of a case of Small-pox at 28, Beaumont Square. On examining the other members of the family I found one son had been ill about a month previously, and another son a fortnight later. The appearance of the skin was such that, in my opinion, they suffered from Small-pox, but in such a mild form that they did not realise the nature of the disease. Their clothing, etc., were, however, disinfected.

(13) A woman lodging at 2, Flower and Dean Street, was taken to the London Hospital on April 4th about 11.30 p.m., accompanied by the deputy of Smith's common lodging house, who was "almost certain that the patient was suffering from Small-pox." She told the receiving-room officer of her suspicions, but he did not detain the patient. He gave her some medicine, and a card to admit her to the out-patients' department on the following day. The patient went on the following day, and after sitting for some time in the waiting-room with scores of others, she was seen by a physician, who diagnosed Small-pox. The receiving-room officer, on being informed of the statements of the deputy, emphatically denied them.

(14) On April 5th I received an anonymous communication that there was a boy at 122, Stepney Green, suffering from Small-pox, and that he was concealed at home. I visited the premises, and found that the patient had been home from work for three weeks. The patient informed me that he knew that one of the men working in the same workroom as himself had been taken to the Small-pox Hospital. The patient's father and mother said that he had been ill and that he had a rash, but denied that they knew that the rash was due to Small-pox. They added that the patient had been kept in one room for three weeks, and had not allowed anyone to go near him.

At the Police Court, where proceedings were taken against the father—Mr. Elias Simons—for failing to notify the existence of Small-pox, witnesses proved that the patient was seen in the yard at the rear of the house, and in other parts of the building. The father was fined the maximum penalty of £2 and £2 3s. costs.

(15) On May 14th I visited 46, Bridge Street, where a case of Small-pox had previously occurred, and found that a doctor was attending a child, and treating him

for Measles. I was of opinion that the case was one of Small-pox, and after communicating my opinion to the medical practitioner in attendance, I removed the patient to the Small-pox Hospital.

On the day after the patient was removed, the doctor notified the case as Small-pox. Two days afterwards, I again visited the premises, and found two children in bed. The same doctor, who had left the house ten minutes before my arrival, was in attendance. He had informed the parents that the children were suffering from Measles. I was of opinion that they suffered from Small-pox, and they were immediately removed to the Small-pox Hospital.

Two days after, the doctor, finding the children had been removed, sent a notification that they were suffering from Small-pox.

(16) A young man living at 82, Cressy Houses, was notified on June 2nd to be suffering from Small-pox. He was informed by his medical attendant of the fact, and was told to remain in the house till he could be removed. In spite of this, he went to the out-patients' department of the London Hospital, and of course came in contact with a large number of persons.

The Public Health Committee decided not to take proceedings against him, but instructed the Town Clerk to severely censure him for his conduct.

(17) When friends visit patients who are dangerously ill, they are urged to be vaccinated before they go on board the ships. In almost all cases they submit to the operation unless they have been recently re-vaccinated.

The following, however, refused, and a fortnight later they developed Small-pox:—

J. W.	...	...	31, Quaker Street.
E. W.	...	...	5, High Street, Wapping.
D. K.	...	...	26, Nightingale Lane.
C. K.	...	...	39, Perth Street.
L. T.	...	...	16, Maplin Street.

I. PERSONS VACCINATED IN INFANCY ONLY.

There were 881 cases of Small-pox, with 126 deaths, among persons vaccinated in infancy only.

	Number of Cases.	Number of Deaths.	Percentage.
Under 1 year of age ...	—	—	—
Between 1 and 5 years of age ...	—	—	—
Between 5 and 10 years of age ...	6	—	—
Between 10 and 20 years of age ...	189	3	1.5
Between 20 and 30 years of age ...	291	32	11.0
Between 30 and 40 years of age ...	201	31	15.4
Between 40 and 50 years of age ...	110	35	31.8
Between 50 and 60 years of age ...	47	13	27.6
Over 60 years of age ...	37	12	32.4

It is true that there were 6 cases between 5 and 10 years of age, but they were all over 8 years of age and showed 3 scars only.

The three deaths between 10 and 20 years of age occurred among persons between 17 and 20.

II. PERSONS UNVACCINATED.

335 cases occurred among the unvaccinated, with 122 deaths.

			Number of Cases.		Number of Deaths.		Percentage
Under 1 year	...	...	18	..	14	..	77.7
Between 1 and 5	...	...	97	...	41	...	42.2

Between 50 and 60	...	...	3	...	1	...	33.3
Over 60	...	...	1	...	—	...	—

III. PERSONS RE-VACCINATED.

There was one person who was between 20 and 30 years of age, and had been vaccinated in infancy, and who stated that he had been re-vaccinated a little over 10 years before the attack of Small-pox.

There were two persons between 30 and 40 years of age who were vaccinated in infancy and again re-vaccinated 24 years ago.

There were six persons between 40 and 50 years of age who were vaccinated in infancy; two were re-vaccinated 12 years ago, one was re-vaccinated 20 years ago (fatal), and three 25 years ago.

Three persons between 50 and 60 years of age were re-vaccinated, two 11 years, and one 32 years ago.

One person over 60 years of age was stated to be re-vaccinated ten years ago, but no signs of the scars could, however, be seen.

IV. PERSONS HAVING HAD SMALL-POX PREVIOUSLY.

One old lady of 91 contracted the disease. She was vaccinated in infancy, and had Small-pox 40 years ago as well.

V. DOUBTFUL CASES.

There were 12 doubtful cases, with 3 deaths.

Of the 1,410 cases of Small-pox that occurred during the whole epidemic, not a single child under 8 years of age, that had been vaccinated in infancy, contracted the disease. Not a single death occurred among persons under 17 years who had been vaccinated in infancy.

In comparing the two tables it will be seen that the fatality among the unvaccinated is similar to what it was in the pre-vaccination days, viz.: that it was exceedingly fatal among children under one year of age. It becomes less fatal until the period 20—30 years is reached. On the other hand, among the vaccinated it is nil under 10 years of age, and from 20 years of age onward it becomes greater.

During this epidemic the Jews have been exceptionally free from the disease, and there has been far less among the aliens than among the English-born Jews.

The number of aliens who had arrived in London within the last five years and who contracted Small-pox was less than a dozen. Considering that within two or three years of their arrival in Stepney from the Continent, they are almost totally ignorant of the rudiments of sanitation, and that overcrowding is relatively more prevalent among them, than any other class of the community, the immunity of aliens from Small-pox can only be explained by the fact that they are exceptionally well vaccinated, which is an undoubted fact.

SMALL-POX AT COMMON LODGING HOUSES.

There are in this Borough 84 registered common lodging houses, or one-sixth the total number in the whole of London.

These are registered to lodge 6,755. In addition to these houses there are other common lodging houses in the district, but as they give free shelter they are not yet registered.

Of the 84 registered houses, Small-pox occurred in 36.

Early in January I called the attention of the Public Health Committee to the advisability of having persons in common lodging houses kept under constant medical supervision.

As these houses are registered by the London County Council, and are under their control, it was decided to ask that authority to employ a medical man, whose duties would be to examine periodically at night, all the lodgers in houses where Small-pox had already occurred, with a view of detecting persons suffering from that disease.

The County Council soon afterwards employed a medical man for that purpose.

A large number of persons lodged in the same registered house and slept in the same bed, night after night for years. Others, unfortunately, changed from one place to the other, and in the intervals slept on doorsteps and in other places in the streets.

As can be seen in the particulars given below, they often did not complain of any pain, nor did they seek medical advice, until the eruption was well developed, and their attention had been called to it.

As they frequently did not sleep in the same house two consecutive nights, it was necessary to disinfect the premises where they were removed from, to the Hospital, as well as the rooms where they slept the two or three nights before that. This, of course, caused not only a greater amount of disinfecting work, but also a greater danger of spreading the infection.

In the particulars given below, I have given as far as possible the dates when the patients were discharged from the Small-pox Hospitals. Unfortunately they are not quite complete. The deaths and the dates thereof were, however, obtained from the returns of the Registrar-General, and are therefore complete, so that where no date is given to indicate the patient's discharge or death, it may be taken for granted that he recovered.

19 and 19½, BRICK LANE (registered for 69 males).

On Jan. 17th Edward Portoberry, aged 32, was taken ill, and the rash appeared on Jan. 21st. The patient was removed to the Small-pox Hospital on Jan. 31st.

He had been vaccinated in infancy only. He had slept at this address for the previous eight months.

On Jan. 17th Francis Casey, aged 32, was taken ill; the rash appeared on Jan. 20th, and he was removed to the Hospital on Jan. 21st.

He was vaccinated in infancy, and was discharged on Feb. 28th.

He had slept at this address up to, and including Jan. 19th; but on Jan. 20th he slept at 20, Dorset Street.

On Feb. 16th James Thomson, aged 39, was taken ill; he was removed to the hospital on the same day, where he died on Feb. 18th. He had never been vaccinated.

On Feb. 16th Samuel Collins, aged 23, was taken ill, the rash appeared on Feb. 18th, and he was removed to the hospital on Feb. 19th. He had not been vaccinated.

On Feb. 27th John Jones, aged 27, was taken ill, and he was removed to the hospital on Feb. 28th. He was discharged on March 16th. The patient was vaccinated in infancy only.

On Feb. 26th John Francis, aged 28, was taken ill, and the rash appeared on Feb. 28th. He was removed to the hospital on Feb. 28th and discharged on March 22nd. He was vaccinated in infancy only. He lodged at this address for seven months.

On Feb. 26th Walter Brooks, aged 17, was taken ill, and the rash appeared on Feb. 28th. The patient was removed to the hospital on Feb. 28th, where he died on March 12th. He said he had been vaccinated in infancy. He had lodged at this address for four months.

On Feb. 27th Albert Bayford, aged 16, was taken ill, the rash appeared on Feb. 28th, and he was removed to the hospital on the same day. He was vaccinated in infancy only. He had slept at this address since Feb. 21st.

On Feb. 28th William Matthews, aged 52, was taken ill, and the rash appeared on March 1st. The patient was removed to the hospital on March 1st, and was discharged on March 19th. He was vaccinated in infancy only. He had lodged at this house for three years.

On Feb. 28th George Davis, aged 45, was taken ill, and the rash appeared on March 3rd. On March 3rd he was removed to the hospital, where he died on March 7th. He had been vaccinated in infancy only. He had lodged at this address for 11 days.

On March 4th John Murphy, aged 37, was taken ill; he was removed to the hospital on the same day, and was discharged on April 10th. He had been vaccinated in infancy only. He lodged here for a few nights only.

On March 5th George Collins, aged 25, was taken ill, and the rash appeared on March 8th. The patient was removed to the hospital on March 8th, and was discharged on April 26th. He was vaccinated in infancy only.

He was a lodger at this house for a week. I could not ascertain for certainty where he had slept previously.

On March 14th George Bayford, aged 27, was taken ill and was removed to the hospital on the same day. He was discharged on April 8th. The patient was vaccinated in infancy only.

He slept in the streets from Feb. 28th to the time he was removed to the Small-pox Hospital. Previous to that date, he had lodged at this address.

On March 14th William Lothian, aged 35, was taken ill, and the rash appeared on March 17th. He was removed to the hospital on the same date, and was discharged on April 8th. The patient had been vaccinated in infancy only. He had lodged at this address for seven months.

On March 17th James Lyons, aged 32, was taken ill, and the rash appeared on March 19th. The patient was removed to the hospital on March 19th and was discharged on June 16th. He was vaccinated in infancy only.

On March 17th Frank Baker, aged 50, was taken ill, and the rash appeared on March 18th. The patient was removed to the hospital on March 22nd and discharged on April 8th. He was vaccinated in infancy only.

63½, BRICK LANE (registered for 63 males).

On April 18th Alfred Denmayl, aged 37, was taken ill. He was removed to the hospital on the same day, and was discharged on May 15th. He was vaccinated in infancy only.

He slept for two nights only at this address. He slept in several common lodging houses during the fortnight previous to his being taken ill.

213, BURDETT ROAD (registered for 51 males).

On March 16th John Whitehead, aged 30, was taken ill, and was removed to the hospital on the same day. He was discharged on April 7th. He had slept here for a few nights only. Previous to that, he had slept in several common lodging houses, as well as in the streets.

The patient was vaccinated in infancy.

On April 1st Alfred Hockley, aged 47, was taken ill, and was removed to the hospital on the same date. He died on April 5th.

The deceased was vaccinated in infancy only. He had slept in the same room as Whitehead.

39 and 41, COMMERCIAL STREET. VICTORIA HOME (registered for 544 males).

On Jan. 6th John Costelloe, aged 47, was taken ill, and the rash appeared on Jan. 8th. The patient was removed to the hospital on Jan. 11th and was discharged on Feb. 19th.

He was vaccinated in infancy only.

Other cases had occurred at the end of the previous year at this address.

On Jan. 13th William Webb, aged 33, was taken ill, and was removed to the hospital on the same day.

He was vaccinated in infancy only. He had slept at this address for three months.

On Jan. 12th William Arthur, aged 35, was taken ill, and the rash appeared on Jan. 14th. The patient was removed on Jan. 16th and was discharged on Feb. 4th.

He had been vaccinated in infancy only. He lodged at this address for three months.

On Jan. 13th John Williams, aged 58, was taken ill, the rash appeared on Jan. 14th, and he was removed to the hospital on Jan. 15th.

He was vaccinated in infancy only.

On Jan. 23rd Richard Pilkington, aged 50, was taken ill, and the rash appeared on Jan. 27th. He was removed to the hospital on Jan. 27th.

He had been vaccinated in infancy only.

On Feb. 28th George Summers, aged 26, was taken ill, and the rash appeared on March 2nd. The patient was removed to the hospital on March 2nd, and was discharged on June 16th.

He had been vaccinated in infancy only. From Feb. 15th to March 1st he had slept in the streets.

On March 5th William Spiers, aged 24, was taken ill, and the rash appeared on March 8th. The patient was removed to the hospital on March 8th, and was discharged on April 7th.

He had been vaccinated in infancy only. He slept at this address from March 3rd to March 6th.

On March 11th George Davis, aged 41, was taken ill, and was removed to the hospital on the same date.

He had been vaccinated in infancy only. Previous to March 10th he had slept at 18 and 19, Dorset Street, where Small-pox had occurred.

On March 12th Joseph Woolard, aged 65, was taken ill, the rash appeared on March 14th, and he was removed to the hospital on March 15th. He was discharged on April 21st.

The patient had been vaccinated in infancy only. He had been an in-patient at the Whitechapel Infirmary for one month, and was discharged from that institution on March 3rd. Since that date he slept at the Victoria Homes.

On March 30th Henry Bradshaw, aged 58, was taken ill, and the rash appeared on April 3rd. The patient was removed to the hospital on April 4th and died on April 10th. He had been vaccinated in infancy only. He lodged at this address for seven years.

On April 18th Henry Addis, aged 41, was taken ill, the rash appeared on April 21st. The patient was removed to the hospital on April 21st, and was discharged on May 8th.

He had been vaccinated in infancy only.

On April 28th Alfred Johnson, aged 38, was taken ill, and the rash appeared on May 1st. The patient was removed to the hospital on May 2nd, and was discharged on June 4th.

He had been vaccinated in infancy only. He had lodged at this address for 4½ years.

On May 2nd George Sargent, aged 42, was taken ill, and the rash appeared on May 4th. The patient was removed to the hospital on May 11th.

He had been vaccinated in infancy only.

On May 5th Frederick Thomas, aged 44, was taken ill, and was removed to the hospital on the same day. He had been vaccinated in infancy only.

On May 15th William Foskett, aged 23, was taken ill, and the rash appeared on May 17th. He was removed on May 19th and discharged on July 11th. He had been vaccinated in infancy only. He had lodged at this address for several months.

On August 19th James Good, aged 39, was taken ill, and the rash appeared on August 22nd. The patient was removed to the hospital on August 22nd and died on September 1st. He had been vaccinated in infancy only. He slept at this address from August 11th to August 16th. From August 16th to August 19th he was at the Whitechapel Workhouse, and on August 19th he was admitted to the Whitechapel Infirmary, when he was found to be suffering from Small-pox, and was removed to the hospital on the same day. Previous to August 11th he said he had tramped from Uxbridge.

81, COMMERCIAL STREET.

On February 15th George Field, aged 1, was taken ill, and removed to the hospital on the same date. He died on February 26th. He had never been vaccinated. Previous to becoming a lodger at this address, he and his mother had slept in several common lodging houses where Small-pox had occurred.

On February 14th William Field, aged 2, was taken ill. The rash appeared on February 17th, and he was removed to the hospital on February 17th, where he died on February 19th. He had never been vaccinated.

9 and 10, DORSET STREET (registered for 134 males).

On January 1st William Anderson, aged 17—a street newsvendor—was taken ill, and removed to the hospital on the same day. He was vaccinated in infancy. Previous cases had occurred at other houses in this street.

On January 2nd James Corfield, aged 50, was taken ill, and was removed to the hospital on the same day, where he died on January 8th. He had been vaccinated in infancy only. He had slept at this address for twelve months.

On January 14th Edward Wallis, aged 29, was taken ill, and died at the White-chapel Infirmary, where he had applied for admission, before he could be removed to the hospital. He had never been vaccinated.

On March 18th John Green, aged 23, was taken ill, and was removed to the hospital on the same day. He had never been vaccinated. He was discharged on May 3rd.

On April 21st Michael Baunty, aged 38, was taken ill, and the rash appeared on April 23rd. The patient was removed to the hospital on April 23rd, where he died on May 3rd. He had been vaccinated in infancy only.

11 and 12, DORSET STREET (registered for 45 males).

On February 28th George Newman, aged 17, was taken ill, and the rash appeared on March 2nd. The patient was removed to the hospital on March 2nd. He was vaccinated in infancy only.

16 and 17, DORSET STREET (registered for 92 males).

On February 7th John Humphries, aged 39, was taken ill, and was removed to the hospital on February 10th. He had been vaccinated in infancy only. He lodged at this house for several weeks.

On February 18th Albert Pugh, aged 34, was taken ill, and the rash appeared on February 21st. The patient was removed to the hospital on February 22nd, and was discharged on March 18th. He had been vaccinated in infancy only. He had lived at this address for several months.

On February 18th Alexander Scott, aged 27, was taken ill, the rash appeared on February 22nd, and he was removed to the hospital on February 23rd. He had been vaccinated in infancy only. He had lived at this address for several months.

On February 20th Charles Brown, aged 17, was taken ill, and the rash appeared on February 21st. The patient was removed on February 24th, and was discharged on March 17th. He had been vaccinated in infancy only. Brown was employed as night watchman at this address.

On May 2nd John Lyons, aged 22, was taken ill, and was removed to the hospital on the same day. I could not ascertain whether he had been vaccinated or not.

19 and 20, DORSET STREET (registered for 95 males).

On March 6th James Mead, aged 32, was taken ill, and was removed to the hospital on the same day. He had been vaccinated in infancy.

On March 16th John Holland, aged 18, was taken ill, and the rash appeared on March 18th. The patient was removed to the hospital on March 18th, and was discharged on May 15th. He had never been vaccinated. Holland was employed as kitchen lad at the above address.

On April 1st Frederick Howell, aged 42, was taken ill, the rash appeared on the same date, and he was removed to the hospital on April 2nd. He was discharged on June 4th. He had been vaccinated in infancy only. The patient slept at this address for two nights only.

On April 14th John Blower, aged 29, was taken ill, the rash appeared on April 15th, and he was removed to the hospital on the same day. He was discharged on June 9th. He had been vaccinated in infancy only.

On April 11th Edward Shaw, aged 18, was taken ill, the rash appeared on April 12th, and he was removed to the hospital on the same day. He was discharged on May 18th. The patient had been vaccinated in infancy only. He slept at this address from April 7th to April 15th. Previous to April 7th, he had slept in the streets for a few weeks.

On April 12th John Sullivan, aged 30, was taken ill, and the rash appeared on April 15th. The patient was removed to the hospital on April 15th, and was discharged on May 13th. He had been vaccinated in infancy only.

On April 16th Joseph Montell, aged 25, was taken ill, and was removed to the hospital on the same day. He was discharged on May 17th. It could not be ascertained whether he had been vaccinated or not. He slept for one night only at this address.

On April 15th William Hill, aged 47, was taken ill, and the rash appeared on April 16th. The patient was removed to the hospital on April 16th, and was discharged on May 3rd. He had been vaccinated in infancy only. He had lodged at this address for several years.

On April 15th William Holding, aged 50, was taken ill, and the rash appeared on April 22nd. The patient was removed to the hospital on April 22nd, where he died on April 26th. Deceased had been vaccinated in infancy only. He had lodged at this address for several weeks.

On April 20th Michael Murray, aged 17, was taken ill, and the rash appeared on April 24th. The patient was removed to the hospital on April 24th. He had been vaccinated in infancy only.

On April 18th John Gunton, aged 28, was taken ill, and the rash appeared on April 24th. He was removed to the hospital on April 25th. The patient had been vaccinated in infancy only.

28 and 29, DORSET STREET (registered for 25 married couples).

On March 5th Mary Cosgrove, aged 28, was taken ill, and the rash appeared on the same date. She was removed to the hospital on March 6th, where she died on March 12th. The deceased had been vaccinated in infancy only.

30, DORSET STREET (registered for 47 males and 35 married couples).

On January 26th George Clark, aged 41, was taken ill, and the rash appeared on January 28th. The patient was removed to the hospital on January 29th, and was discharged on April 7th. The patient had been vaccinated in infancy only. He had slept at this address on January 28th. From the 25th to the 27th inclusive he slept at 20, Whitechapel Road. Previous to that date he had slept in the streets.

On February 19th John Colman, aged 54, was taken ill, and the rash appeared on February 25th. The patient was removed to the hospital on February 25th, and discharged on April 11th. He had been vaccinated in infancy, and re-vaccinated 11 years ago.

35, DORSET STREET (registered for 114 females).

On January 13th Lily Smith, aged 18, was taken ill, the rash appeared on the same day, and she was removed to the hospital on January 19th. The patient had been vaccinated in infancy only. She had lived at this address for three months.

On January 19th Ellen Shuttle, aged 30, was taken ill, the rash appeared on January 20th, and she was removed to the hospital on the same day. The patient had been vaccinated in infancy only. She had been employed as kitchen woman at this address for two months.

On January 30th Harris Nicholson, aged 32, was taken ill, the rash appeared on February 2nd, and she was removed to the hospital on February 4th. The patient had been vaccinated in infancy only. Previous to February 3rd she had slept for several nights in the streets.

On February 8th Isabel Miller, aged 48, was taken ill, and the rash appeared on February 9th. The patient was removed to the hospital on the same day, where she died on February 13th. She had been vaccinated in infancy only.

On February 8th Mary Collins, aged 23, was taken ill. On February 11th the patient was removed to the hospital, and was discharged on March 1st. She had been vaccinated in infancy only. She had slept at this address for several weeks.

On February 8th Frances Neville, aged 26, was taken ill, and the rash appeared on February 10th. On February 11th the patient was removed to the hospital. She had never been vaccinated.

On February 10th Louisa Jones, aged 18, was taken ill, and the rash appeared on the same day. She was removed to the hospital on February 10th, and was discharged on February 26th. She had been vaccinated in infancy only.

On February 9th Emma Surname, aged 42, was taken ill, and the rash appeared on February 12th. On February 12th the patient was removed to the hospital, where she died on May 10th. She had been vaccinated in infancy only.

On February 10th Ellen Lynch, aged 71, was taken ill, and the rash appeared on February 13th. The patient was removed to the hospital on the same date, and was discharged on March 13th. She had been vaccinated in infancy only.

On February 11th Elizabeth Carroll, aged 19, was taken ill, and the rash appeared on February 13th. On February 13th she was removed to the hospital, where she died on February 18th. She had been vaccinated in infancy only.

On February 11th Hannah Scott, aged 22, was taken ill, and the rash appeared on February 15th. She was removed to the hospital on the same day. She had been vaccinated in infancy only.

On February 12th Sarah May, aged 25, was taken ill, the rash appeared on February 14th, and she was removed to the hospital on the same day. She had been vaccinated in infancy only.

On February 13th Emma Delford, aged 17, was taken ill, and the rash appeared on the same day. The patient was removed to the hospital on February 14th. She had been vaccinated in infancy only.

On February 21st Annie Duggan, aged 22, was taken ill, and the rash appeared on February 22nd. The patient was removed to the hospital on February 24th. She had been vaccinated in infancy only.

On March 16th Mary Ann Hearne, aged 30, was taken ill, and the rash appeared on March 20th. The patient was removed to the hospital on March 20th, and was discharged on April 8th. She was vaccinated in infancy only. Previous to March 19th, she had slept at several common lodging houses where Small-pox cases had occurred.

On April 20th Mary Eastwood, aged 28, was taken ill, and the rash appeared on April 21st. The patient was removed to the hospital on April 22nd, and died on April 30th. She was vaccinated in infancy only. She lodged at this address for four months.

28, THRAWL STREET (registered for 177 men).

On February 23rd Thomas Baldwin, aged 26, was taken ill, the rash appeared on February 23rd, and he was removed to the hospital on the same day. He was vaccinated in infancy only. Previous to February 20th, he had slept at various common lodging houses.

On March 4th Timothy Dwyer, aged 17, was taken ill. He was removed to the hospital on the same day, and was discharged on March 17th. He was vaccinated in infancy only. The patient had lodged at this address for three months.

90, WENTWORTH STREET (registered for 391 men).

On February 14th George Giles, aged 67, was taken ill, and the rash appeared on February 16th. The patient was removed to the hospital on February 18th, and was discharged on May 12th. He had been vaccinated in infancy only. Prior to February 14th he had slept in various common lodging houses where cases of Small-pox had occurred.

On February 23rd Arthur Thompson, aged 28, was taken ill, and was removed to the hospital on February 24th. He had been vaccinated in infancy only. The patient lodged at this address for several weeks.

On February 24th Thomas Bosker, aged 52, was taken ill, and the rash appeared on February 25th. The patient was removed to the hospital on February 26th. He was vaccinated in infancy only. He was employed as a day porter at this place.

On February 24th Henry Righaw, aged 53, was taken ill, and the rash appeared on March 2nd. He was removed to the hospital on March 3rd, and died on April 22nd. He had been vaccinated in infancy only. The patient had lodged here for some considerable time.

On March 8th Nicholas Inker, aged 40, was taken ill, the rash appeared on March 11th, and he was removed to the hospital on March 11th. He was vaccinated in infancy only.

On March 16th Patrick Foley, aged 40, was taken ill, and the rash appeared on March 19th. The patient was removed to the hospital on March 19th. He was vaccinated in infancy only. He had lodged at this address for three years.

On April 8th Arthur Bodsworth, aged 46, was taken ill, was removed to the hospital on the same day, and discharged on May 3rd. He had been vaccinated in infancy only. He slept at this address on one night only.

On April 8th James Coffee, aged 78, was taken ill, and the rash appeared on April 13th. The patient was removed to the hospital on April 13th, and was discharged on May 5th. He was vaccinated in infancy only. He lodged at this address for eight years.

On April 13th Robert Goldby, aged 49, was taken ill, and the rash appeared on April 15th. The patient was removed to the hospital on April 15th, where he died on April 21st. He was vaccinated in infancy only. He had lodged at this address for 12 months.

On April 19th Albert Bowen, aged 21 (night porter at this address), was taken ill, and the rash appeared on April 21st. He was removed to the hospital on April 21st. He was vaccinated in infancy only.

On April 30th Daniel Evans, aged 40, was taken ill, and the rash appeared on May 1st. He was removed to the hospital on May 1st. The patient was vaccinated in infancy, and again 11 years ago. He had slept at this address for four weeks.

On May 16th William Hill, aged 28, was taken ill, and the rash appeared on May 18th. The patient was removed to the hospital on May 18th, and was discharged on June 14th. He was vaccinated in infancy only. He slept for one night only at this place, and previous to this, he had slept at various common lodging houses.

On May 30th Frederick King, aged 38, was taken ill, and the rash appeared on June 1st. The patient was removed to the hospital on June 1st, and died on June 7th. He was vaccinated in infancy only. He had lodged at this address since May 27th, and before that date he slept at the Victoria Home, 177, Whitechapel Road.

20, WHITECHAPEL ROAD, SALVATION ARMY SHELTER (registered for 232 men).

On January 6th James Holmes was taken ill, and the rash appeared on January 9th. On January 10th the patient was removed to the hospital, where he died on March 31st. He had been vaccinated in infancy only. He had been living here for a month before he was taken ill.

On January 16th Samuel Butler, aged 26, was taken ill, and the rash appeared on January 20th. On January 20th the patient was removed to the hospital, and was discharged on February 15th. He had been vaccinated in infancy only. He slept at this address on January 14th and 15th. Prior, and subsequent to, these dates, he had slept in the streets.

On January 17th Alexander Towers, aged 34, was taken ill, and the rash appeared on January 21st. On January 21st the patient was removed to the hospital, and was discharged on February 28th. He had never been vaccinated. He slept at this address on the 15th and 16th only. Previous to that date, he had slept for several nights in the streets.

On February 5th John Frost, aged 27, was taken ill. He was removed to the hospital on the same date, and was discharged on March 3rd. The patient had been vaccinated in infancy only. He had lived at this address for a month prior to his illness.

On March 8th John Dennis, aged 35, was taken ill, and the rash appeared on March 10th. On March 10th he went to the London Hospital, where he was given a bottle of medicine. On his return to the shelter, the superintendent saw him, and sent him to the Whitechapel Infirmary, where he was found to be suffering from Small-pox. He was removed to the Small-pox Hospital on the same day. The patient had been vaccinated in infancy only. He lodged at this address for a month.

On March 8th Edgar Coyle, aged 28, was taken ill, and the rash appeared on March 10th. On March 11th the patient was removed to the hospital, and was discharged on April 29th. He had been vaccinated in infancy only. He had lodged at the shelter for three months.

On March 8th Thomas Small, aged 20, was taken ill, and the rash appeared on March 12th. On March 13th the patient was removed to the hospital, and was discharged on April 18th. He had been vaccinated in infancy only.

On March 19th Charles Haywood, aged 24, was taken ill, and the rash appeared on March 20th. On March 21st the patient was removed to the hospital, and was discharged on April 17th. He had been vaccinated in infancy only. Until March 17th he had slept at 19, Brick Lane.

On March 18th Alfred Daw, aged 47, was taken ill, and the rash appeared on March 20th. On March 22nd the patient was removed to the hospital, where he died on April 1st. The deceased had been vaccinated in infancy only. Previous to being taken ill, he had slept at this address for three nights only.

On March 18th Henry Davis, aged 51, was taken ill, and the rash appeared on March 21st. On March 23rd the patient was removed to the hospital, where he died on March 28th. He had been vaccinated in infancy only. He had occupied a bed at this shelter for four months.

On March 26th Charles Fisher, aged 35, was taken ill, and was removed to the hospital on the same day in an unconscious condition. He was discharged on June 11th. I could not ascertain with certainty whether he had been vaccinated or not.

On March 23rd William Johnson, aged 33, was taken ill, and the rash appeared on March 26th. On March 26th the patient was removed to the hospital, where he died on March 31st. He had never been vaccinated.

On March 28th William Taylor, aged 40, was taken ill. The rash appeared on March 29th. The patient was removed to the hospital on the same day, and was discharged on April 17th. He had been vaccinated in infancy only.

On May 20th John Potter, aged 27, was taken ill, and the rash appeared on May 24th. On May 26th the patient was removed to the hospital, and was discharged on June 18th. He had been vaccinated in infancy only. He had lodged at this address for a long time.

177, WHITECHAPEL ROAD, VICTORIA HOME (registered for 628 men).

On January 11th Edward Bates, aged 37, was taken ill. The rash appeared on January 13th, and he was removed to the hospital on the same day. The patient had been vaccinated in infancy only. He was discharged on February 4th. He slept for a few nights only at this address. Previous to that, he slept at some chambers near the Rowton House, Vauxhall.

On January 26th Fred Gassney, aged 21, was taken ill. On January 29th the rash appeared, and he was removed to the hospital on the same day. The patient had been vaccinated in infancy only. He was discharged on February 17th. The patient's brother was removed from 1, Tenter Street, to the Small-pox Hospital on January 20th.

On February 8th Frederick Hopkins, aged 33, was taken ill, the rash appeared on February 11th, and he was removed to the hospital on the same day. He had been vaccinated in infancy only.

On March 7th Wm. Chubb, aged 36, was taken ill. On March 8th the patient was removed to the hospital, where he died on March 10th. He had been vaccinated in infancy only. He had slept at this address for three years.

On March 14th George Staples, aged 30, was taken ill, and the rash appeared on March 16th. On March 18th the patient was removed to the hospital, and was discharged on May 1st. He had been vaccinated in infancy only. He had slept at this address since January 21st.

On April 12th William Thorpe, aged 35, was taken ill, and the rash appeared on April 14th. The patient was removed to the hospital on the same day, and was discharged on May 3rd. He had been vaccinated in infancy only. He had slept at this address since April 5th. Previous to that date he had slept at a common lodging house in Dorset Street, but he could not give the number.

On April 12th William Harris was taken ill, the rash appeared on April 15th, and he was removed to the hospital on the same day. The patient had never been vaccinated. He was discharged on June 12th.

On April 24th Edward Creed, aged 27, was taken ill, and was removed to the hospital on the same day. He had been vaccinated in infancy only. He had lodged at this address for three months.

On May 13th Charles Gooday, aged 48, was taken ill, and the rash appeared on May 18th. The patient was removed to the hospital on May 19th, and was discharged on July 15th. He had never been vaccinated.

On May 26th George Pignell, aged 33, was taken ill, and the rash appeared on May 30th. The patient was removed to the hospital on May 31st. He had been vaccinated in infancy only.

On May 28th James Sheratt, aged 36, was taken ill, and the rash appeared on May 31st. Patient was removed to the hospital on May 31st, and was discharged on July 11th. He had been vaccinated in infancy only.

On May 29th Matthew Parker, aged 38, was taken ill, and the rash appeared on June 1st. The patient was removed to the hospital on the same day. He had been vaccinated in infancy only.

On May 30th George Williams, aged 18, was taken ill, and the rash appeared on June 1st. On June 3rd the patient was removed to the hospital, and was discharged on July 16th. He had been vaccinated in infancy only.

On May 30th Frederick Smith, aged 37, was taken ill, and the rash appeared on June 3rd. The patient was removed to the hospital on June 4th. I could not ascertain whether he had ever been vaccinated or not.

On May 30th Henry Allen, aged 32, was taken ill, and the rash appeared on June 3rd. On June 4th the patient was removed to the hospital and was discharged on July 15th. He had been vaccinated in infancy only.

On May 30th George Strange, aged 48, was taken ill, and the rash appeared on June 3rd. On June 4th the patient was removed to the hospital, where he died on June 7th. He had never been vaccinated.

On May 30th James Boxall, aged 37, was taken ill, and the rash appeared on June 3rd. On June 4th the patient was removed to the hospital, and was discharged on July 15th. He had never been vaccinated.

On June 4th William Harrison, aged 31, was taken ill, and the rash appeared on June 5th. The patient was removed to the hospital on June 6th, and was discharged on June 9th. He was vaccinated in infancy only.

On June 5th Daniel White was taken ill, and was removed to the hospital on June 6th. He had been vaccinated in infancy only.

On June 2nd Thomas Reece was taken ill, and the rash appeared on June 6th. The patient was removed to the hospital on June 8th. He had been vaccinated in infancy only.

On June 16th Frederick Jones, aged 40, was taken ill. The patient was removed to the hospital on June 17th, and was discharged on July 11th. He had been vaccinated once when he was eight years of age.

On June 14th George Smith, aged 34, was taken ill, and the rash appeared on June 18th. On June 19th the patient was removed to the hospital, and was discharged on July 11th. He had been vaccinated in infancy only.

On June 14th Henry Reynolds, aged 35, was taken ill, and the rash appeared on June 16th. The patient was removed to the hospital on June 20th, and was discharged on July 11th. He had been vaccinated in infancy only. He had lodged at this address for five years.

On June 19th John Ryan, aged 43, was taken ill, and the rash appeared on June 23rd. On June 24th he was removed to the hospital, and was discharged on July 23rd. The patient had been vaccinated in infancy only.

8, WHITE'S Row (registered for 1 woman and 54 married couples).

On March 8th Mark Collins, aged 29, was taken ill, and the rash appeared on March 9th. The patient was removed to the hospital on March 10th. He had been vaccinated in infancy only. He had lodged at this address for several years.

The following are Common Lodging Houses, but are not registered by the London County Council, as they give free shelter:—

THE DORMITORY, CRISPIN STREET.

On December 26th Thomas Mellows, aged 51, was taken ill. The rash appeared on December 30th, and he was removed to the hospital on January 2nd. He had slept at this house since December 21st. No information could be obtained as to where he slept previous to that time. He was vaccinated in infancy only.

On January 7th Alice Jacobs, aged 25, was taken ill, and she was removed to the hospital on January 13th. She was vaccinated in infancy only.

On February 13th Lydia Lawrence, aged 33, was taken ill. She was removed to the hospital on February 17th, and discharged on March 2nd. She was vaccinated in infancy only.

On April 8th Elizabeth Minns, aged 41, was taken ill. She was removed to the hospital on April 11th, and was discharged on May 2nd. She was vaccinated in infancy and 24 years ago. She had slept at this address for a fortnight previous to being taken ill.

On April 10th Elizabeth Larkin, aged 62, was taken ill, and the rash appeared on April 14th. She was removed to the hospital on the same day. She was vaccinated in infancy only. She had slept at this address since March 30th.

On April 18th Reginald Barnes, aged 3, was taken ill. The rash appeared on April 19th, and he was removed to the hospital on April 20th. He had never been vaccinated.

On April 21st Ernest Wm. Barker, aged $1\frac{1}{2}$ years, was taken ill, and was removed to the hospital on April 23rd. He was not vaccinated.

MEDLAND HALL.

On January 18th Francis Williams, aged 34, was taken ill. He was removed to the hospital on January 22nd, and was discharged on February 14th. He was vaccinated in infancy only.

On March 8th Thomas Crompton, aged 49, was taken ill, and the rash appeared on March 11th. The patient was removed to the hospital on March 11th, and was discharged on April 24th. He was vaccinated in infancy, and again 40 years ago.

On March 8th William Brett, aged 56, was taken ill, and the rash appeared on March 11th. The patient was removed to the hospital on March 11th. He was vaccinated in infancy only. Both Crompton and Brett were friends of, and had been in contact with, Price, who was removed on March 1st from 8, Rose Lane.

On March 13th John Pelham, aged 52, was taken ill, and was removed to the hospital on the same day. He had been vaccinated in infancy only. This patient had also been in contact with Price.

Particulars of cases of Small-pox occurring in Poor Law Institutions in the Borough:—

MILE END INFIRMARY.

On January 15th, a woman was found in a dying condition in the street by the police. They took her to the Mile End Infirmary. She was admitted to the Infirmary in the afternoon, and died in a general ward during the night. There is no doubt, in my opinion, that she suffered from hæmorrhagic Small-pox. I traced her movements on that day, before she was taken charge of by the police, and wherever she went a case of Small-pox occurred there in nine to twelve days afterwards. She went into a small shop in Bridge Street, where she collapsed. A crowd of children collected round the door of the shop, and four of these developed Small-pox within the next 14 days. A few minutes after she was removed from the shop by the police, the first-floor lodger walked through the shop, and on January 29th she was taken ill, and removed to the Small-pox Hospital on February 1st. A man who was employed at the Infirmary, and called "the handy man," was working in the ward when the patient was admitted, was taken ill on January 25th and removed to the hospital on January 27th. Another man who was employed in the laundry was taken ill on January 26th and was removed to the hospital on January 29th. These two men were non-residents. Both died. In addition to these, one woman who was a patient at the Infirmary at the time but was afterwards discharged before the onset of the illness, and three other women who worked in the laundry, contracted the disease.

On January 25th, 6 cases were removed from the Infirmary to the Hospital.

At the Infirmary, there were actually on duty 40 nurses and two matrons. Of this number, 29 nurses and the two matrons had been re-vaccinated prior to the outbreak. None of these contracted the disease. Four were re-vaccinated on the first day of the outbreak; none contracted the disease. Seven nurses caught Small-pox; of these, four were re-vaccinated after the disease had been contracted. This was evident, as the Small-pox eruption appeared within a week after they were vaccinated. The eruption of Small-pox generally appears on the 14th day, but occasionally it appears on the 9th, but never in less than that time. The other three nurses refused to be vaccinated. It was stated at the time that one of the nurses that developed Small-pox had been successfully re-vaccinated two years previously. That statement was false.

RATCLIFF WORKHOUSE.

On March 16th George Hammond, aged 28, was taken ill. He was removed to the hospital on March 17th, and was discharged on May 17th. He was vaccinated in infancy only. He left Dover, where he was last employed, a fortnight before he was taken ill, tramped to London, and on the night of March 16th he slept on the Thames Embankment.

On April 18th Charles Donarth, aged 30—a tramp—was taken ill. He applied for admission on April 19th, and was removed to the hospital on the same day. He was discharged on May 8th. He was vaccinated in infancy only.

ST. GEORGE'S INFIRMARY.

On January 29th Michael Lynch, aged 70, was taken ill. He was removed to the hospital on January 31st, and was discharged on February 17th. He had been vaccinated when he was 30 years of age only. He was admitted to the Infirmary on January 13th, on the same day as John Warner, who came from 106, St. George's Street.

On January 30th Edward Harrison, aged 74, was taken ill, and the rash appeared on February 1st. The patient was removed to the hospital on February 2nd, and was discharged on March 1st. He had been vaccinated in infancy only. He had been an in-patient at the Infirmary since September, 1900.

On February 12th George Hartley, aged 69, was taken ill, and the rash appeared on February 14th. He was removed to the hospital on February 14th, and was discharged on February 26th. He had been vaccinated in infancy only. He had been an inmate of the Workhouse since December 31st, 1901.

On February 14th James Dynan, aged 26, was taken ill, and the rash appeared on February 16th. He was removed to the hospital on February 16th, and was discharged on March 17th. He had been vaccinated in infancy only.

On February 13th William Chinnery, aged 66, was taken ill. The rash appeared on February 15th, and he was removed to the hospital on February 17th. He was vaccinated in infancy only. He had been an inmate of the Workhouse since November 11th, 1901.

On February 15th John Kelly, aged 56, was taken ill, and the rash appeared on February 18th. He was removed to the hospital on February 18th. The patient had been vaccinated in infancy only. He burnt Harrison's clothing, and was urged to be re-vaccinated, but refused. He had been an inmate of the Workhouse since December, 1901.

On February 12th Henry Brady, aged 64, was taken ill, and was removed to the hospital on February 18th. He had been vaccinated in infancy only. He refused to be re-vaccinated. The patient had been an inmate of the Workhouse since January 29th, 1902.

WHITECHAPEL INFIRMARY.

On January 2nd Emma Holland, aged 40, was taken ill, and was removed to the hospital on the same day. She had been an Infirmary in-patient since September, 1898. She was vaccinated in infancy only. She died on January 10th. Previous cases had occurred at the Infirmary.

On January 1st William Douglas, aged 3, was admitted to the Infirmary from the South Grove Workhouse. His father had been removed to the Small-pox Hospital a fortnight previously. On January 4th he was removed to the hospital, and discharged on February 13th. He had never been vaccinated.

Mary Newman, aged 40, was admitted to the Infirmary on December 6th, removed to the Workhouse, South Grove, on December 18th, and re-admitted to the infirmary on January 3rd. A rash appeared on the same day, and she was admitted to the Small-pox hospital on January 5th. The patient was vaccinated in infancy only. She was discharged from the hospital on February 19th.

Annie Smith, aged 27, was admitted to the Infirmary on December 27th, suffering from an affection of the eyes. She was confined on January 11th, and on January 12th the Small-pox eruption appeared. The patient was removed to the hospital on the same day. She was vaccinated in infancy only.

Matilda Hart, aged 66, had been an inmate of the Infirmary since the previous July. She occupied a bed in the same ward as Annie Smith. A rash appeared on January 14th. She was removed to the Small-pox hospital on the same date, and was discharged on February 6th. The patient had been vaccinated in infancy only.

Elizabeth Ward, aged 9, was admitted to the Infirmary on December 20th, 1901. All the children in the ward were vaccinated but this one. She was missed. She was taken ill on January 16th and removed to the hospital on January 17th. She had never been vaccinated.

On January 19th William Hackwell, aged 65, was taken ill, and the rash appeared on January 20th. On January 21st the patient was removed to the hospital, and was discharged on February 25th. He had been vaccinated in infancy and re-vaccinated a little over 10 years ago. He had been an inmate of the Infirmary since July 29th.

Thomas Watson, aged 49, was admitted to the Casual Ward on January 17th, and from there to the Infirmary on January 18th. He was removed to the hospital on the same day, and was discharged on February 17th. He had been vaccinated in infancy only. Prior to being admitted to the Infirmary, he slept for several nights in the streets.

On January 25th Herbert Watson, aged 31, was taken ill. The rash appeared on January 27th, and he was removed to the hospital on the same day. He was discharged on February 13th. The patient had been vaccinated in infancy only. The patient had been an inmate of the Infirmary since October 22nd, and helped to carry downstairs Edward Wallis, who had died from Small-pox.

On January 25th James Mumford, aged 41, was taken ill. The rash appeared on January 28th, and he was removed to the hospital on January 28th, where he died on February 2nd. He had been vaccinated in infancy only. The patient had been an inmate of the Infirmary since April, 1901, and occupied a bed on the same floor as Wallis, who died on January 15th.

On January 25th John Joseph Smith, aged 17, was taken ill, and the rash appeared on January 27th. The patient was removed to the hospital on January 28th, and was discharged on February 26th. He had been vaccinated in infancy only. He occupied a bed in the same block as Wallis.

On January 28th, John Burns, aged 32, was taken ill. The rash appeared on January 31st, and he was removed to the hospital on the same day. He was vaccinated in infancy only.

On January 31st Kate Dow, aged 24, was taken ill, and the rash appeared on February 1st. She was removed to the hospital on the same day, and died on February 5th. The deceased had been vaccinated in infancy only. She was homeless, and applied for admission to the Infirmary. Her condition was recognised, and she was at once removed, but refused to give any information as to where she had been sleeping lately.

On February 2nd Annie Shepherd, aged 28, was taken ill, and the rash appeared on February 3rd. The patient was removed to the hospital on the same day, and died on April 11th. She was vaccinated in infancy only. She had been an inmate of the Infirmary since January 15th.

On February 2nd Ellen Dow, aged 42, was taken ill, and was removed to the hospital on February 5th. She had been vaccinated in infancy only. The deceased was a sister of Kate Dow, who was removed to the hospital on February 1st. Both had been together, and had walked about the streets for several weeks, sleeping on doorsteps. They were not in-patients of the Infirmary, but as they were homeless, the Infirmary address is the only one given.

On February 9th Daniel McKay, aged 24, was taken ill. He was found wandering in the streets by the police on February 10th, and taken to the Whitechapel Infirmary. He was removed on the following day to the Small-pox Hospital. He had been vaccinated in infancy only.

Rose Harris, aged 30, of no address, and had slept in the streets for some time was admitted to the Casual Ward on February 13th. She was removed on the same day to the hospital, where she died on February 23rd. She had been vaccinated in infancy only.

On February 13th Margaret Vogel, aged 43, was taken ill, and was removed to the hospital on February 16th, where she died on February 19th. She had been vaccinated in infancy only. She was destitute, and had slept on doorsteps for some time previous to her applying for admission to the Infirmary on February 15th.

On February 18th Agnes Cusden, aged 54, was taken ill, and was removed to the hospital on February 20th. She had been vaccinated in infancy only. The patient had been an inmate at the Infirmary from January 30th to February 10th.

On February 28th Emmanuel Cohen, aged 30, was taken ill, and was removed to the hospital on March 1st. He was vaccinated in infancy only. He had been an inmate of the Infirmary since January 14th.

Thomas Walsh, aged 31, applied for admission to the Infirmary on March 5th. He had slept in the streets for the previous 14 days. He had been ill since March 3rd, and was removed to the hospital on March 5th. The patient was discharged on May 1st. He had not been vaccinated.

On March 13th James Hurley, aged 38, was taken ill, and was removed to the hospital on March 13th. He was discharged on April 15th. He was vaccinated in infancy only. The patient was in the same ward as Harrison, who was removed to the hospital on March 1st. He had been an in-patient since February 10th.

Annie Barker, aged 18—homeless—was brought to the Infirmary on March 16th, and was removed to the hospital on the same day. She died on March 21st. She had never been vaccinated.

Emily Marsh, aged 31, lived at 31, Quaker Street—where other cases of Small-pox had occurred—till March 3rd. Since that date she had been wandering about the streets. On March 15th she was taken ill, and a rash appeared on March 18th. She went to the Infirmary on March 19th, and was removed to the hospital on the same day. The patient was discharged on April 18th. She was vaccinated in infancy only.

Measles.

The number of deaths was 158, or three more than in the preceding year.

41 occurred in the Limehouse District, or at the rate of .70 per 1,000 of the population.

28 occurred in the St. George's District, or at the rate of .56 per 1,000 of the population.

45 occurred in the Mile End District, or at the rate of .39 per 1,000 of the population.

44 occurred in the Whitechapel District, or at the rate of .55 per 1,000 of the population.

The death-rate for the whole Borough was at the rate of .52 per 1,000 of the population. The death-rate for the whole of London was .51 per 1,000.

Scarlet Fever.

954 cases of Scarlet Fever were notified, of which 828 were removed to the various Fever Hospitals. 191 occurred in Limehouse, with 7 deaths; 114 occurred in St. George's, with 1 death; 399 occurred in Mile End, with 10 deaths; and 250 occurred in Whitechapel, with 8 deaths.

The death-rate in the whole of the Borough was at the rate of .08 per 1,000 of the population, that for the whole of London being .12 per 1,000.

Whooping Cough.

The number of deaths was 188, which corresponds to a death-rate of .62 per 1,000 of the population.

52 occurred in the Limehouse District, or at the rate of .89 per 1,000 of the population.

24 occurred in the St. George's District, or at the rate of .48 per 1,000 of the population.

85 occurred in the Mile End District, or at the rate of .75 per 1,000 of the population.

27 occurred in the Whitechapel District, or at the rate of .34 per 1,000 of the population.

Diphtheria.

641 cases of Diphtheria were notified, and 527 were removed to the Fever Hospitals. 161 occurred in Limehouse, 100 in St. George's, 182 in Mile End, and 129 in Whitechapel.

79 proved fatal, which is equal to a rate of $\cdot 26$ per 1,000 of the population.

16 occurred in the Limehouse District, or at the rate of $\cdot 27$ per 1,000 of the population.

19 occurred in the St. George's District, or at the rate of $\cdot 38$ per 1,000 of the population.

26 occurred in the Mile End District, or at the rate of $\cdot 22$ per 1,000 of the population.

18 occurred in the Whitechapel District, or at the rate of $\cdot 22$ per 1,000 of the population.

The death-rate for the whole of London was $\cdot 25$ per 1,000.

Membranous Croup.

33 cases were notified; none were removed to any hospital.

3 occurred in the Limehouse District. All recovered.

4 occurred in the St. George's District. All recovered.

13 occurred in the Mile End District. Two proved fatal.

13 occurred in the Whitechapel District. All recovered.

Typhus Fever.

One case occurred in the Mile End District. The patient recovered.

Enteric Fever.

273 cases occurred during the year, of which 228 were removed to Fever Hospitals. 90 occurred in Limehouse; 50 in St. George's; 94 in Mile End; and 39 in Whitechapel.

33 proved fatal, which corresponds to $\cdot 10$ per 1,000 of the population.

17 occurred in the Limehouse District, or at the rate of $\cdot 29$ per 1,000 of the population.

3 occurred in the St. George's District, or at the rate of $\cdot 06$ per 1,000 of the population.

9 occurred in the Mile End District, or at the rate of $\cdot 08$ per 1,000 of the population.

4 occurred in the Whitechapel District, or at the rate of $\cdot 05$ per 1,000 of the population.

The death-rate for the whole of London was at the rate of $\cdot 13$ per 1,000.

Erysipelas.

437 cases were notified, of which 57 were removed to the various general hospitals and infirmaries. 80 occurred in Limehouse, with 3 deaths; 91 occurred in St. George's, with 6 deaths; 141 occurred in Mile End, with 1 death; and 125 occurred in Whitechapel, with 9 deaths.

Diarrhœa.

The number of deaths from Diarrhœa, which includes Epidemic and Zymotic Enteritis; Dysentery and Dysenteric Diarrhœa; Cholera and Choleraic Diarrhœa—was 117, of which 96 were deaths of infants under 1 year of age.

30 occurred in the Limehouse District, or at the rate of $\cdot 51$ per 1,000 of the population.

37 occurred in the St. George's District, or at the rate of $\cdot 74$ per 1,000 of the population.

39 occurred in the Mile End District, or at the rate of $\cdot 34$ per 1,000 of the population.

11 occurred in the Whitechapel District, or at the rate of $\cdot 13$ per 1,000 of the population.

The death-rate for the whole of the Borough was at the rate of $\cdot 38$ per 1,000 of the population.

SCARLET FEVER, TYPHOID AND DIPHTHERIA DURING 1902.

CHART SHOWING THE TOTAL NUMBER OF INFECTIOUS DISEASES NOTIFIED WEEK BY WEEK IN LIMEHOUSE, MILE END, ST. GEORGE'S AND WHITECHAPEL, DURING 1902.

CHART SHOWING THE TOTAL NUMBER OF CASES OF INFECTIOUS DISEASES NOTIFIED
WEEK BY WEEK IN THE BOROUGH DURING 1902.

Enteritis.

The number of deaths from Enteritis—which includes Gastro Enteritis, Muco Enteritis, and Gastric Catarrh—was 188. Of this number, 52 were those of children under 1 year of age.

39 occurred in the Limehouse District, or at the rate of $\cdot 67$ per 1,000 of the population.

54 occurred in the St. George's District, or at the rate of $1\cdot 08$ per 1,000 of the population.

54 occurred in the Mile End District, or at the rate of $\cdot 47$ per 1,000 of the population.

41 occurred in the Whitechapel District, or at the rate of $\cdot 51$ per 1,000 of the population.

The death-rate for the whole of the Borough was at the rate of $\cdot 62$ per 1,000 of the population.

Puerperal Fever.

21 cases of Puerperal Fever occurred, of which 14 proved fatal. Five occurred in Limehouse; 3 in St. George's; 5 in Mile End; and 8 in Whitechapel.

Chicken Pox.

On February 7th, Chicken Pox was made a notifiable disease by the London County Council. I considered it would not be to the best interests of the District, and the Borough Council petitioned the Local Government Board not to give its approval. They were not successful. My chief objection to it was, that instead of asking me to see doubtful cases of Small-pox, as the medical practitioners in the District had been in the habit of doing, they would, even in doubtful cases, notify the disease as Chicken Pox. This actually occurred afterwards. If the Local Government Board had at the same time extended the privileges of the Medical Officers of Health, and gave them power to visit and verify the diagnosis of the medical practitioner in attendance, there would not be so much danger attached to it. A Medical Officer of Health has, however, no right to question the accuracy of any notification certificate; but must accept it, whether he has reason to believe that the diagnosis is correct or not. I saw the danger there might be in not taking any action in the matter, and decided to visit and examine all cases of Chicken Pox notified to me, irrespective of their ages. I reported my intentions to the Council, and my action was approved. The result proved that my fears were well founded. I found that

18 persons notified to me as Chicken Pox were actually suffering from Small-pox. Some were adults and some were young children. I immediately communicated with the doctors in attendance in each case, and tried to persuade them to alter the notification certificates and substitute Small-pox for Chicken Pox. The doctor in attendance in each case refused, and maintained that he was still of opinion that the case was one of Chicken Pox and not Small-pox. I was therefore reluctantly compelled to remove the patients against their wish to the Small-pox Hospitals.

My opinion was confirmed by the Metropolitan Asylums Board officials in each instance. These 18 cases were directly responsible for another 25 persons contracting the disease in the same families.

1,548 cases were notified. 543 occurred in the Limehouse District; 317 in St. George's District; 543 in Mile End District; and 362 in the Whitechapel District.

Zymotic Diseases.

The total deaths from Zymotic diseases numbered 868. This number corresponds to a death-rate of 2.88 per 1,000 of the population. This number includes: Small-pox, Measles, Scarlet Fever, Whooping Cough, Diphtheria, Croup, Enteric Fever, Puerperal Fever, and Diarrhœa.

201 occurred in the Limehouse District, or at the rate of 3.46 per 1,000 of the population.

132 occurred in the St. George's District, or at the rate of 2.65 per 1,000 of the population.

322 occurred in the Mile End District, or at the rate of 2.83 per 1,000 of the population.

214 occurred in the Whitechapel District, or at the rate of 2.70 per 1,000 of the population.

Phthisis.

The question of the advisability of making Phthisis a notifiable disease was discussed by the Public Health Committee. I supplied a sub-committee, appointed to go into the matter, with a report of the results obtained in the various towns and districts where voluntary notification was in force, and the opinions of the Medical Officers of those districts, as to whether any benefits had been derived by its adoption.

After fully considering the matter, the Committee reported that where voluntary notification had been adopted, it was still in an experimental stage, and they therefore decided to postpone making any recommendation; although the Committee thought that the distribution of literature on the subject might be continued with advantage.

576 deaths occurred from Phthisis during the year, which is equal to a death-rate of 1.91 per 1,000, as compared with 2.09 in the previous year.

130 occurred in the Limehouse District, or at the rate of 2.23 per 1,000 of the population.

105 occurred in the St. George's District, or at the rate of 2.11 per 1,000 of the population.

168 occurred in the Mile End District, or at the rate of 1.47 per 1,000 of the population.

173 occurred in the Whitechapel District, or at the rate of 2.18 per 1,000 of the population.

The Phthisis death-rate for the whole of London was equal to 1.64 per 1,000.

In addition to the deaths from Phthisis there were 233 due to other Tubercular diseases. This corresponds to a death-rate of .77 per 1,000, that for the preceding year being .8.

43 occurred in the Limehouse District, or at the rate of .73 per 1,000 of the population.

49 occurred in the St. George's District, or at the rate of .98 per 1,000 of the population.

89 occurred in the Mile End District, or at the rate of .78 per 1,000 of the population.

52 occurred in the Whitechapel District, or at the rate of .65 per 1,000 of the population.

Diseases of the Respiratory Organs.

There were 1,349 deaths due to Respiratory Diseases, which is at the rate of 4.48 per 1,000 of the population.

288 occurred in the Limehouse District, or at the rate of 4.95 per 1,000 of the population.

270 occurred in the St. George's District, or at the rate of 5.43 per 1,000 of the population.

442 occurred in the Mile End District, or at the rate of 3.88 per 1,000 of the population.

349 occurred in the Whitechapel District, or at the rate of 4.41 per 1,000 of the population.

Infantile Mortality.

During the year, 1,707 infants died before they were 12 months old. This is equal to a rate of 150 deaths per 1,000 births.

369 occurred in the Limehouse District, or at the rate of 197 per 1,000 births.

351 occurred in the St. George's District, or at the rate of 160 per 1,000 births.

657 occurred in the Mile End District, or at the rate of 163 per 1,000 births.

330 occurred in the Whitechapel District, or at the rate of 117 per 1,000 births.

The infantile mortality was less than in the preceding year, the number in that being 165 per 1,000 births.

It was less than that of any of the other Eastern Boroughs, but higher than that of London as a whole, which was 141 per 1,000 births.

As in the previous year, the infantile mortality was higher in the Limehouse district than in the other districts. In fact, it was higher than that of any Borough in London during the same period.

The high infantile mortality in our Borough was considered by the Public Health Committee, and after some discussion, it was referred to a sub-committee, to report as to the advisability of appointing Lady Health Visitors, and also the practicability of organising the various sick visitors attached to places of worship and charitable organisations within the Borough.

The sub-committee could not advise the Council to undertake such organisation, although of opinion that it might be dealt with by voluntary effort. The sub-committee submitted their report to the Public Health Committee, which was afterwards agreed to, and this Committee recommended the Council to appoint as an experiment, for a period of two years, two female health visitors, whose duties would be as follows:—

- (1) To visit the houses of the poor, and give advice upon matters of home hygiene, viz.: the proper feeding and clothing of infants.
- (2) To visit houses in the districts where Diarrhœa, Measles, and Whooping Cough are prevalent, and instruct the relatives as to the necessity of isolation and proper care of the sick.
- (3) To report any insanitary conditions found during the course of such visits to the Medical Officer of Health, and to act generally under his direction.

The Committee suggested that the salaries should be £100 per year.

It was urged by the Committee that in view of the importance of these visitors being able to gain the good opinion and confidence of persons whom they visit, they should be both trained nurses as well as persons of tact and education. They should wear a distinctive dress (such as a nurse's costume).

The Committee thought that in view of the large number of foreigners in the Borough, one of the visitors should be able to speak Yiddish.

The Council, however, rejected the recommendations of the sub-committee as submitted by the Public Health Committee, and decided not to make such appointments.

Old Age.

260 deaths were due to Old Age, which is equal to a death-rate of 0·8 per 1,000 of the population.

76 occurred in the Limehouse District, or at the rate of 1·3 per 1,000 of the population.

19 occurred in the St. George's District, or at the rate of 0·3 per 1,000 of the population.

130 occurred in the Mile End District, or at the rate of 1·1 per 1,000 of the population.

35 occurred in the Whitechapel District, or at the rate of 0·4 per 1,000 of the population.

Notifiable Diseases.

5,150 notifications of infectious diseases were received. Excluding Chicken Pox, this number was 979 in excess of that of the previous year. 1,242 referred to Small-pox, 641 to Diphtheria, 33 to Membranous Croup, 437 to Erysipelas, 954 to Scarlet Fever, 1 to Typhus Fever, 273 to Typhoid Fever, 21 to Puerperal Fever, and 1,548 to Chicken Pox.

525 occurred in the Limehouse District.

362 occurred in the St. George's District.

1,138 occurred in the Mile End District.

851 occurred in the Whitechapel District.

Overcrowding.

The subject of overcrowding has received, and still continues to receive the considerable attention from the officials of the Public Health Department. During the year it has attained still more prominence among the public owing to the evidence given before the Alien Immigration Commission. Though overcrowding has existed for a large number of years in the Districts now comprised in the Borough of Stepney, there can be no doubt that it is more prevalent now than ten years ago. The census of 1901 revealed an increase of 13,308 during the ten years, as compared with 2,616 during the previous intercensal period. The increase has been due entirely to the increased number of foreigners.

The increase in the foreign-born population was over 22,000. Consequently there has been a decrease in the native population to the extent of 8,500. In 1881 to 1891 the increase affected Whitechapel and Mile End Old Town only; but the census of 1901 showed an increase in the number of inhabitants in all the parishes, St. George's having the highest proportional increase. The following table shows the population of the different districts in the Borough at census periods 1881, 1891, and 1901:—

TABLE A.

		1881.		1891.		1901.
Limehouse	...	58,543	...	57,376	...	57,937
St. George's	...	47,157	...	45,795	...	49,068
Mile End Old Town	...	105,613	...	107,452	...	112,827
Whitechapel	...	71,363	...	74,669	...	78,768
		282,676		285,292		298,600

The congestion resulting from this increase is more real than appears on the surface, as is evident from the following tables, which give the numbers of the inhabited houses, separate tenements, and families:—

TABLE B.—INHABITED HOUSES, 1881, 1891 AND 1901.

		1881.		1891.		1901.
Limehouse	...	8,004	...	7,122	...	6,974
St. George's	...	5,781	...	5,296	...	5,007
Mile End Old Town	...	14,039	...	14,171	...	13,746
Whitechapel	...	7,521	...	7,277	...	5,735
		35,352		33,866		31,462

For census purposes a block of model dwellings was counted as a single house, whatever may have been the number of separate tenements. At the census of 1891 in some cases the local registrars failed to observe this rule, and returned each tenement as a house; consequently the numbers of inhabited houses in 1891 and 1901 have not much value for comparative purposes.

TABLE C.—SEPARATE FAMILIES, 1891 AND 1901.

				1891.		1901.
Limehouse	...	...	...	12,425	...	12,485
St. George's	...	...	...	10,311	...	10,000
Mile End Old Town	...	...	...	24,668	...	24,558
Whitechapel	...	...	...	14,258	...	14,070
				61,681		61,113

TABLE D.—TOTAL TENEMENTS AND TENEMENTS OF LESS THAN FIVE ROOMS.

				1891.		1901.
Total tenements	...	...	...	61,681	...	61,113
One roomed	...	...	...	16,101	...	13,282
Two roomed	...	...	...	16,437	...	15,690
Three roomed	...	...	...	10,979	...	11,926
Four roomed	...	...	...	7,666	...	8,284
Five roomed and over	...	...	...	10,498	...	11,931

The number of inhabited houses has decreased from 33,866 in 1891 to 31,462 in 1902; this is partly due to tenement dwellings which are being erected, but this does not entirely explain diminution, as the number of separate tenements has decreased from 61,681 in 1891 to 61,113 in 1901. Part of the area has been taken up by the warehouses and business premises, and the increased population has thus been crowded on a diminished area and in a smaller number of houses. These houses, however, are much loftier, and of course contain a larger number of rooms. The number of separate families has also decreased. This relation of a diminution of the number of families in an increased number of inhabitants is most marked in those districts where the proportional increase of aliens has been highest.

Turning to the table giving the number of rooms in each tenement, the number of one-roomed and two-roomed tenements has markedly diminished, but there was an increase in the number of three, four and five-roomed tenements.

In Limehouse the number of separate families rose from 12,425 in 1891 to 12,485 in 1901, whilst the percentage of foreigners only increased from 2.1 to 3.7.

In St. George's was observed the greatest proportional decrease in the number of separate families, 10,311 in 1891 to 10,000 in 1901. The percentage of foreigners rose from 16.2 to 28.8. This is one element in the question of overcrowding which has been effected by the alien immigration. The birth-rate is higher among the foreigners, and their families are larger than the families of the native population. The death-rate is also lower, especially among infants.

In the Borough the percentage of the foreign-born population has increased from 11.3 in 1891 to 18.2 in 1901; this increase has affected all the districts, but most markedly St. George's, which is evident in the following table:—

TABLE E.—NUMBER OF FOREIGN INHABITANTS 1891 AND 1901.

					Males.		Females.
1891	...	...	...	...	18,033	...	14,251
1901	...	...	...	...	29,363	...	24,947

TABLE F.—PERCENTAGE OF FOREIGN BORN INHABITANTS TO TOTAL POPULATION, 1891 AND 1901.

					1891.		1901.
Limehouse	...	...	...	...	2.1	...	3.7
St. George's	...	...	...	...	16.2	...	28.8
Mile End Old Town	...	...	...	...	5.3	...	11.5
Whitechapel	...	...	...	...	24.1	...	31.8
Whole Borough	...	...	...	...	11.3	...	18.2

The question is naturally asked as to what extent has this alien immigration affected overcrowding. There is no district within the Borough where overcrowding does not exist to some extent. It exists in areas inhabited almost entirely by the native population. It is true that the evil is accentuated in the districts inhabited largely by the foreign population.

The fact that the number of inhabited houses has diminished, and that there is an increase in the population tends to cause overcrowding. Poverty and high rents are also important factors in the causation of overcrowding. The tenants can afford to pay and do pay a higher rent for a room if it is overcrowded. On the other hand, it is true that the tenants would be able to rent a larger number of rooms if the landlord did not demand such a high rent. The high rents cause overcrowding, and the overcrowding cause the high rents. They act and re-act.

During the year, 664 intimations were served to abate the nuisance caused by overcrowding. In 296 instances the nuisance was abated without serving a statutory notice. A certain time—at least seven days—must elapse before the second notice can be served, as it must be authorized by the Public Health Committee. As the Committee meet every other week, a fortnight may elapse before a statutory notice can be served. This notice demands the abatement of the nuisance within seven days. Unless abated within that period, proceedings are taken at the Police Court.

368 statutory notices were served during the year, but legal proceedings were taken in 16 instances only. Eleven only were heard in 1902, the other five summonses were heard on January 2nd, 1903, and will be dealt with in the report for that year.

From the time the overcrowding is discovered to the time that the summons can be applied for, three weeks must elapse. The summons is generally made returnable in seven days. The magistrate, if he convicts, and grants an order to abate the nuisance, generally allows seven days for the defendants to leave the premises. The excessive rent received by the owner before the overcrowding can be discovered and till proceedings can be taken against him, pays him to take the risk, especially if the magistrate does not impose a substantial penalty.

Section 7 of the Public Health (London) Act provides "that where two convictions for overcrowding have taken place within a period of three months, the magistrate may order the house to be closed for such a period as he may deem necessary." If it takes at least five weeks to obtain the first conviction, this is practically impossible.

The standard adopted is 400 cubic feet for each adult, and 200 cubic feet for each child under 10 years of age, if the room is used both as a living room and bedroom. If the rooms are used separately we measure the sleeping room only, and the standard is 300 cubic feet for each adult and 150 cubic feet for each child.

Number of intimations, statutory notices, and proceedings taken in the various districts during the year among Christians:—

			Intimations.		Statutory Notices.		Proceedings.
Limehouse	...	...	39	...	18	...	—

			502		301		12

Proceedings were taken against:—

On February 21st, Annie Rosenthal, 7, East Mount Street, was fined 1s. and 23s. costs, with an order to abate the nuisance.

On April 8th Gershon Harris was fined 1s. and 2s. costs for not abating overcrowding at 41, Booth Street Buildings, as well as an order prohibiting the same.

On April 8th Gershon Harris was fined 1s. and 2s. costs for not abating overcrowding at 66, Booth Street Buildings, as well as an order prohibiting the same.

On April 18th Lewis Senft, 29, St. John's Place, was fined £3 and 23s. costs, and an order to abate.

On May 23rd Joseph Cohenlask, 12, Union Street, was fined £5 and 23s. costs, and an order prohibiting the recurrence.

On May 23rd Hyman Bernstein, 32, Bromhead Street. Order to abate, and 25s. costs.

On May 23rd Isaac Israel, 8, Bromhead Street, was fined 40s. and 23s. costs.

On May 23rd Joseph Goldstein, 48, Princes Square, was fined £8 and £2 4s. costs.

On May 23rd Harris Edkin, 84, Cable Street, was fined £5 and 23s. costs.

On December 4th Isaac Levy, 2, Duke Street, was fined 1s. and 23s. costs.

On December 30th J. Krufston, 7, Winterton Street, was fined £3 or a month's imprisonment.

In addition, 107 notices were served for the abatement of overcrowding under the Bye-laws respecting houses let in lodgings. No Police Court proceedings were taken during the year.

In the St. George's District special observations were made by the four Inspectors allotted to this district. This special house-to-house inspection was continuous to that started in the year 1901. The inspections took place between 6 and 8 A.M. on Saturday mornings in Jewish houses, and on Sunday mornings in other houses at a similar hour. 32 streets were thus inspected. They consisted of 654 houses, and contained 3,217 adults and 2,061 children. Overcrowding was discovered in 174 houses, with 349 persons too many. 629 families occupied one-room tenements; 460 two-room tenements; 178 three-roomed tenements; 71 four-roomed tenements; 24 five-roomed tenements; 13 six-roomed tenements; and 3 seven-roomed tenements.

ARTICHOKE HILL.—In this street 11 houses were inspected. They contained 55 adults and 27 children.

12 families occupied one-roomed tenements.
 9 „ „ two-roomed tenements.
 2 „ „ three-roomed tenements.
 1 family occupied five-roomed tenement.

One house was overcrowded, and that was to the extent of one adult too many.

BOARDED ENTRY.—Four houses were inspected. They contained 20 adults and 7 children.

2 families occupied one-roomed tenements.
 5 „ „ two-roomed tenements.
 1 family occupied four-roomed tenement.

One house was overcrowded to the extent of one adult.

BREEZERS' HILL.—Two houses were inspected. They contained 10 adults and two children.

4 families occupied one-roomed tenements.
 2 „ „ two-roomed tenements.

There was no overcrowding.

BUROSS STREET.—Fifty houses were inspected. They contained 252 adult and 169 children.

27 families occupied one-roomed tenements.
 28 „ „ two-roomed tenements.
 30 „ „ three-roomed tenements.
 12 „ „ four-roomed tenements.
 5 „ „ five-roomed tenements.
 1 family occupied six-roomed tenement.

CABLE STREET.—Fifteen houses were inspected. They contained 112 adults and 84 children. 25 occupied one-roomed tenements; 22 occupied two-roomed tenements; and 3 three-roomed tenements. Eight were found to be overcrowded.

3 had a child too many.
 1 had two children too many.
 1 had three children too many.
 1 had one adult and one child too many.
 1 had one adult too many.
 1 had two adults and five children too many.

CHALLIS COURT.—Twenty-one houses were inspected. They contained 136 adults and 108 children. 48 occupied one-roomed tenements; 20 occupied two-roomed tenements; 18 were found to be overcrowded.

- 1 had one adult too many.
- 8 had one adult and one child too many.
- 1 had three children too many.
- 1 had four children too many.
- 2 had one adult and two children too many.
- 4 had two adults and one child too many.
- 1 had two adults and two children too many.
- 1 had three adults too many.

CHOPPIN'S COURT.—Six houses were inspected. They contained 25 adults and 9 children. Two occupied one-roomed tenements; 4 occupied three-roomed tenements; and 1 occupied a five-roomed tenement. Two were found to be overcrowded.

- 2 had a child too many.

CLIFFORD HOUSE, WELLCLOSE SQUARE.—Twenty-two tenements were inspected. They contained 48 adults and 71 children. Two occupied one-roomed tenement; 17 occupied two-roomed tenements; and 2 occupied four-roomed tenements. Four were found to be overcrowded.

- 2 had one child too many.
- 1 had two children too many.
- 1 had three children too many.

GROVE PLACE.—Six houses have been inspected. They contained 20 adults and 19 children. Two occupied one-roomed tenements; 3 occupied two-roomed tenements; and 3 occupied three-roomed tenements. Two were found to be overcrowded.

- 1 had one child too many.
- 1 had two adults and one child too many.

HUNGERFORD STREET.—Forty-two houses were inspected. These contained 199 adults and 163 children. 39 occupied one roomed tenements; 35 occupied two-roomed tenements; 14 occupied three-roomed tenements; and 7 occupied four-roomed tenements. Nine were found to be overcrowded.

- 2 had one child too many.
- 2 had two children too many.
- 3 had three children too many.
- 1 had four children too many.
- 1 had one adult and one child too many.

JOHN'S COURT.—Four houses were inspected. These contained 7 adults and 2 children. Two occupied two-roomed tenements; 1 occupied a three-roomed tenement. In no instance was overcrowding discovered.

KINDER STREET.—Thirty-four houses were inspected. These contained 124 adults and 97 children. Eighteen occupied one-roomed tenements; 19 occupied two-roomed tenements; 24 occupied three-roomed tenements; and 2 occupied four-roomed tenements. Fifteen were found to be overcrowded.

- 2 had one child too many.
- 4 had two children too many.
- 1 had three children too many.
- 1 had six children too many.
- 2 had one adult too many.
- 1 had two adults too many.
- 1 had one adult and one child too many.
- 2 had two adults and one child too many.
- 1 had one adult and three children too many.

LITTLE TURNER STREET.—Nineteen houses were inspected. These contained 110 adults and 97 children. Ten occupied one-roomed tenements; 21 occupied two-roomed tenements; 7 occupied three-roomed tenements; and 2 occupied four-roomed tenements. Six were found to be overcrowded.

- 1 had one child too many.
- 2 had two children too many.
- 1 had three children too many.
- 1 had one adult too many.
- 1 had one adult and two children too many.

LOWER FENTON STREET.—Sixteen houses were inspected. These contained 71 adults and 40 children. Seven occupied one-roomed tenements; 7 occupied two-roomed tenements; 4 occupied three-roomed tenements; and 7 occupied five-roomed tenements. One was found to be overcrowded.

- 1 had one child too many.

MAYFIELD BUILDINGS.—Twenty-two houses were inspected. They contained 151 adults and 100 children; 39 occupied one-roomed tenements; 19 occupied two-roomed tenements; 5 occupied three-roomed tenements. Eleven were discovered overcrowded.

- 1 had one child too many.
- 1 had three children too many.
- 4 had one adult too many.
- 1 had two adults too many.
- 1 had three adults too many.
- 1 had one adult and three children too many.
- 1 had one adult and two children too many.
- 1 had five children too many.

MEETING HOUSE BUILDINGS.—Five tenements were inspected. These contained 12 adults and 8 children. Four occupied one-roomed tenements; 1 occupied a two-roomed tenement. One was discovered overcrowded.

1 had one adult too many.

NORMAN BUILDINGS.—Seven houses were inspected. These contained 25 adults and 17 children. Eight occupied one-roomed tenements; 3 occupied three-roomed tenements. Four were discovered overcrowded.

2 had two children too many.

1 had two children too many.

1 had three adults too many.

PENNINGTON PLACE.—Five houses were inspected. These contained 22 adults and 4 children. One occupied a one-roomed tenement; 3 occupied two-roomed tenements; and 3 occupied four-roomed tenements. One was discovered overcrowded.

1 had one adult and one child too many.

PLANET STREET.—Fifty-four houses were inspected. These contained 293 adults and 207 children; 81 occupied one-roomed tenements; 41 occupied two-roomed tenements; 1 occupied a three-roomed tenement; 11 occupied four-roomed tenements. Eleven were discovered overcrowded.

2 had one child too many.

1 had two children too many.

1 had three children too many.

1 had four children too many.

1 had six children too many.

1 had one adult too many.

1 had two adults too many.

1 had three adults too many.

1 had one adult and three children too many.

1 had one adult and five children too many.

RYCROFT COURT.—Eleven houses were inspected. These contained 43 adults and 17 children. Two occupied one-roomed tenements; 2 occupied two-roomed tenements; and 2 occupied three-roomed tenements. Four were discovered overcrowded.

1 had one adult too many.

3 had one child too many.

RYGATE STREET.—Sixteen houses were inspected. These contained 87 adults and 47 children. Ten occupied one-roomed tenements; 23 occupied two-roomed tenements; 8 occupied three-roomed tenements; and one occupied a six-roomed tenement. No overcrowding was discovered.

ST. GEORGE STREET.—Forty-nine houses were inspected. These contained 302 adults and 159 children; 56 occupied one-roomed tenements; 24 occupied two-roomed tenements; 13 occupied three-roomed tenements; 10 occupied four-roomed tenements; 2 occupied five-roomed tenements; 6 occupied six-roomed tenements; and 2 occupied seven-roomed tenements. Eight were discovered overcrowded.

2 had one child too many.

1 had one adult too many.

2 had two adults too many.

3 had two adults and one child too many.

ST. GEORGE'S TERRACE.—Thirty-two houses were inspected. These contained 125 adults and 55 children. 31 occupied one-roomed tenements; 13 occupied two-roomed tenements; 12 occupied three-roomed tenements; and 1 occupied a four-roomed tenement. Ten were discovered overcrowded.

4 had one child too many.

3 had one adult too many.

1 had two adults too many.

2 had one adult and one child too many.

SHIP STREET.—Six houses were inspected. These contained 30 adults and 11 children. Four occupied one-roomed tenements; 2 occupied two-roomed tenements; 2 occupied three-roomed tenements; 2 occupied four-roomed tenements; and 1 occupied a five-roomed tenement. One was discovered overcrowded.

1 had one adult too many.

STARCH YARD.—Four houses were inspected. These contained 16 adults and 5 children. Four occupied one-roomed tenements; 2 occupied two-roomed tenements; and 1 occupied a three-roomed tenement. Two were discovered overcrowded.

1 had one child too many.

1 had two adults too many.

TAYLOR'S RENTS.—Five houses were inspected. These contained 18 adults and 2 children. Four occupied one-roomed tenements; 3 occupied two-roomed tenements. Four were discovered overcrowded.

3 had one adult too many.

1 had two adults too many.

UMBERSTONE STREET.—Sixty-seven houses were inspected. These contained 358 adults and 166 children. 76 occupied one-roomed tenements; 52 occupied two-

roomed tenements; 17 occupied three-roomed tenements; 4 occupied four-roomed tenements; 7 occupied five-roomed tenements; and 3 occupied six-roomed tenements.

3 had one child too many.

1 had two children too many.

1 had three children too many.

6 had one adult too many.

2 had two adults too many.

1 had four adults too many.

3 had one adult and one child too many.

WATERLOO PLACE.—Twenty-one houses were inspected. These contained 51 adults and 44 children. Twelve occupied one-roomed tenements; 15 occupied two-roomed tenements. Nine were discovered overcrowded.

3 had one child too many.

6 had one adult too many.

WILLIAM STREET.—Twenty-eight houses were inspected. These contained 165 adults and 96 children. 44 occupied one-roomed tenements; 28 occupied two-roomed tenements; 3 occupied three-roomed tenements; 1 occupied a four-roomed tenement; and 1 occupied a seven-roomed tenement; 9 were discovered overcrowded.

4 had one child too many.

3 had one adult too many.

1 had three adults too many.

1 had two adults too many.

WHITETHORN COURT.—Seven houses were inspected. These contained 33 adults and 15 children. Two occupied one-roomed tenements; 9 occupied two-roomed tenements. Two were discovered overcrowded.

1 had one child too many.

1 had two adults and one child too many.

WINTERTON STREET.—Forty-five houses were inspected. These contained 226 adults and 174 children. 47 occupied one-roomed tenements; 19 occupied two-roomed tenements; 18 occupied three-roomed tenements; 13 occupied four-roomed tenements; and 3 occupied six-roomed tenements. Five were discovered overcrowded.

2 had two children too many.

1 had three children too many.

1 had one adult too many.

1 had one adult and three children too many.

YORK BUILDINGS.—Nineteen houses were inspected. These contained 71 adults and 39 children. Nine occupied one-roomed tenements; 11 occupied two-roomed tenements; 4 occupied three-roomed tenements. Four were discovered overcrowded.

2 had one child too many.

2 had one adult too many.

Housing of the Working Classes Act.

On January 7th I made an official representation under Part II. of the Act, that the houses in a certain area in Great Pearl Street, Wheeler Street, and Quaker Street, Spitalfields, were unfit for human habitation. The narrowness, closeness, and bad arrangement of the groups of houses, together with the want of light, air, and ventilation, rendered them injurious to the health of the inhabitants. The evils connected with such houses and the sanitary defects in the area could not be effectually remedied, otherwise than by an improvement scheme for the re-arrangement and re-construction of some of the streets and houses within the area.

The area consisted of 76 houses, 38 facing the main streets, the remainder being situated in seven courts and squares, approached by narrow covered entrances from the streets adjoining. The whole area consisted of about 55,000 superficial feet, or 1.24 acres.

The distribution of the houses was as follows:—

Great Pearl Street	...	...	...	12 houses
Wilk Court	...	...	...	3 houses
Half Wilk Court	...	...	...	1 house
Wheeler Street	...	...	...	5 houses
Union Place	...	...	...	3 houses
Quaker Street	...	...	...	21 houses
Pope's Head Court	...	...	...	15 houses
Harrison's Court	...	...	...	4 houses
New Square ...	...	...	...	4 houses
Pool's Square	...	...	...	8 houses

The 76 houses contained 289 rooms, of which 260 were occupied at the time of visiting.

179 families, consisting altogether of 710 persons, were in occupation. The houses in GREAT PEARL STREET, WILK COURT, and HALF WILK COURT, were by far the worst on the area, three only being in a moderately good condition, and the remaining 13 houses being very old and dilapidated. One house, No. 24½, Great Pearl Street, was without sanitary accommodation of any kind, while at Nos. 26, 27, and 29, the w.c. accommodation was very inadequate. At No. 28A, Great Pearl Street, the ground floor room was almost in darkness, the dampness was very apparent on the walls up to a height of five feet above the floor level. The w.c. available was usually choked, and liquid filth was allowed to flow over the defective paving, immediately outside the small window which formed the only means of ventilation to the ground floor room.

Out of eleven houses in occupation in GREAT PEARL STREET, ten were let in tenements, consisting of 55 families. Of the 59 occupied rooms in these tenement houses, 24 were badly overcrowded. In one three-roomed house every room was overcrowded, and in another house containing nine rooms, each let separately, eight out of the nine rooms were found to be overcrowded.

In several instances there was no wash-house accommodation whatever, and no provision of any kind had been made for the accommodation of the tenants. The majority of these tenements were let as furnished rooms at rentals varying from 6s. to 7s. per week.

WILK COURT is a cul-de-sac approached by a narrow covered archway under part of No. 27, Great Pearl Street. There are three old cottages built back to back, the court dividing and forming a narrow passage in front of each of the houses. The walls were very damp, the woodwork generally was in an advanced stage of decay. Two w.c.'s were situated in this court for the common use of the occupants of five houses. The wall of one of the w.c.'s had fallen down. There was no flushing apparatus, and the pan was choked with filth. There were no receptacles for house refuse, and garbage of all kinds was deposited at the end of the court, rendering the atmosphere highly offensive.

The three cottages contained eight rooms, being occupied by six families. Four of the rooms were overcrowded.

(HALF WILK COURT contained one cottage only, which was structurally dilapidated. It had no through ventilation, and was quite unfit for human habitation. There was a workshop immediately in the rear of the house; the external walls of this structure being considerably bulged and in a dangerous condition. The cottage formed an obstructive building, hindering the access of light and air to the lower rooms of two of the houses in Great Pearl Street.

WHEELER STREET formed the boundary of the area on the west side, and included five houses, Nos. 25 to 29. One house, No. 27, was used as a timber store, and was in a ruinous condition. There was a large yard in the rear of No. 25, containing a series of sheds in which six men were employed in washing and storing bottles. The four occupied houses were all in a defective and insanitary condition. The floors generally were decayed and out of level, the sashes and frames were very defective, and there was no ventilation beneath the ground floors. The brickwork cracked or bulged, and the interior of the house was in a filthy condition. Overcrowding was also found in two of these houses.

UNION PLACE is a cul-de-sac, and is entered by a dark crooked passage at the side of 28, Wheeler Street. It contained three small two-roomed cottages, which faced the houses in Harrison's Court, from which they were divided by a high wooden fence. The houses were very old, and the front walls were considerably out of the perpendicular. The walls were damp and there was no ventilation beneath

the ground floors. The staircases were narrow and dangerously steep. The sashes and frames of the windows were generally defective, and not weather-proof. The yards were extremely small, having an area of from 60 to 75 superficial feet, and were enclosed by high walls. The interiors were fairly clean and no overcrowding was found.

QUAKER STREET formed the northern boundary of the area. The portion dealt with consisted of 21 houses having a total frontage of about 350 feet. The houses were three-storey buildings. Two houses—Nos. 1 and 17—were in an extremely dirty and dilapidated condition. In the case of No. 1, the floors were defective and considerably out of level. The ceilings were dilapidated. The sashes and frames of the windows as well as the stair treads were very defective. There was no ventilation beneath the ground floors. The interior generally was also in a filthy condition. A board on the front of the house announced that the site was offered for sale for building purposes. At No. 17, the building was shored up from the front and from behind. The walls were considerably bulged, the internal woodwork was very decayed, and the upper staircase was dangerously defective. Part of the interior was also in a very dirty condition. At Nos. 3 to 15, the light and air were obstructed by the houses in Harrison's Court and Pope's Head Court, the backs of these cottages being within five feet of the Quaker Street houses. The yards were extremely small, varying from 36 to 50 superficial feet. The staircases in these houses were very narrow and steep, and the ground floors were lying directly on the earth. The party walls were damp. At No. 25, the interior was generally dirty, and some of the floors and ceilings were defective. This house was also badly overcrowded. The remaining houses all exhibited defects which were more or less serious. One house—No. 31—was occupied by 12 families, with a total of 42 persons. One w.c. only was available, and at the time of visiting, it was choked, and filth was lying about the yard. The house refuse was thrown anywhere, there being no receptacle of any kind. Several of the floors and ceilings were also defective, and three of the rooms were overcrowded. In another house, the w.c. was choked, and the space under the staircase was used as a receptacle for house refuse and decayed vegetable matter, the stench being very noticeable throughout the house.

Out of a total of 62 families residing in this street 13 were overcrowded.

POPE'S HEAD COURT is entered by a narrow archway under No. 11, Quaker Street. There were 15 houses, 13 being in the main court, and two were situated in a small courtyard at the rear of Nos. 9 and 10. These two houses—9A and 10A—were shored up from the front and from behind; one was unoccupied, the whole of the back wall having been removed. The other—No. 9A—was in an extremely dangerous condition, being only fit for demolition. There were three rooms, each occupied by a separate family, and two of these rooms were badly overcrowded. The houses in the main court were fairly well kept. Each consisted of two small rooms and a tiny space at the rear, which contained the w.c. The staircases were very narrow and steep and the light and air were obstructed by buildings in the rear.

HARRISON'S COURT is entered through an archway under No. 3, Pope's Head Court, and contained four two-roomed cottages which abutted on the houses in Union Place. The courtway was very narrow, and the house had each a small space in the rear except No. 4, which had a small yard at the side. This house, which was unoccupied at the time of visiting, had no through ventilation, and was in an extremely dirty condition. The four cottages were within a few feet of the rear of the houses in Quaker Street, and obstructed light and ventilation.

NEW SQUARE is a large open space entered by a covered passage under 27 and 29, Quaker Street. There were four small two-roomed cottages which had no back yards, part of the open square being railed off to form front gardens. There was no through ventilation to the ground floor rooms. The upper rooms were provided with one window each in the rear, and which was boarded up. In No. 1 the walls were damp and dirty, and the light was obstructed by an adjoining building. The drainage was defective, and choked. Sewage was oozing through the joints of the paving.

POOL'S SQUARE is situated in the rear of No. 37, Quaker Street. There were eight houses, three having no back yards. No. 1 was an old detached house, partly timber built, the brickwork was badly bulged, and there was no ventilation beneath the ground floors. On the ground floor the inner room was used as a bedroom, it had no fireplace or means of external ventilation. No. 2, a house of four floors, was very old and decayed, one wall was bulged, and dampness was noticeable. The sashes, frames, and woodwork generally were defective. Nos. 7 and 8 had no ventilation beneath the ground floors, and the light and air were obstructed in the rear by the close proximity of a high building. The paving of the forecourts was very defective. One w.c. in the Square was choked. There was one case of overcrowding.

It will be seen from the foregoing report that while certain of the defects referred to admitted readily of abatement, yet in a large proportion of the area the decayed condition of the structures or the obstruction to light and air consequent upon the crowding of a number of cottages into small confined courts and alleys, rendered it impossible to effect any permanent improvement, unless the demolition and re-arrangement of such courts were undertaken.

The representation was considered by the Housing of the Working Classes Committee on February 4th. The Committee decided to send a deputation to interview the Housing of the Working Classes Committee of the London County Council, to ask the Committee to take up the scheme under Part I. of the Act. The Committee of the County Council desired us to procure closing orders against as many of the houses as possible.

The necessary steps were taken, and Nos. 24½, 25, 26, 28, and 28½, Great Pearl Street; Nos. 2, 3, and 4, Wilk Court; No. 1, Half Wilk Court; Nos. 9A and 10A,

Pope's Head Court, were all closed and demolished. At No. 17, Quaker Street, the front and back walls were pulled down and rebuilt. At 31, Quaker Street, an additional water-closet was provided.

In New Square the whole of the drainage system has been reconstructed, and the ventilation of the houses has been improved by removing the boarding from the back windows of the upper rooms. Most of the houses have been cleansed and repaired, and ventilation below the ground floors provided. Many other minor improvements were carried out. Under the circumstances the Borough Council decided not to proceed with the scheme.

General Sanitary Work.

The Sanitary Inspectors' Report Table will give some idea of the amount of work carried out by them during the year.

It was an exceptionally heavy year for the inspectors, as in addition to their ordinary work, a great deal of extra work devolved on their shoulders through the Small-pox epidemic.

28,690 houses were inspected during the year, 10,639 being the result of house-to-house inspections.

15,691 notices for the abatement of various nuisances were served, besides other communications to the owners and others, asking them to proceed with the work.

Proceedings were taken at the Police Courts in 224 instances.

3,584 houses and 522 workshops were cleansed, as the result of notices served on the owners.

6,768 drains were tested, and 3,931 were either constructed or re-constructed, cleansed or trapped.

574 new soil-pipes were fixed.

6,507 water-closets were either renewed, cleansed or repaired.

1,368 dust receptacles and 46 manure receptacles were provided, as the result of notices served on the owners.

769 offensive accumulations were removed.

125 smoke nuisances were abated, and in eight cases Police Court proceedings had to be taken against the persons causing the nuisance.

List of Proceedings taken under the Public Health (London) Act, 1891.

On January 10th Mr. A. Davis, of Aldgate House, was fined £5 and 23s. costs for letting a dwelling house—7B, Christian Street—without first obtaining a certificate that the premises were supplied with a proper water supply.

On January 24th the owner of 58, Repton Street, was fined £5 and 23s. costs for not complying with the Council's order to provide a proper and sufficient water supply.

Two summonses were taken out against Annie Rosenthal, of 7, East Mount Street, for illegal occupation of an underground room.

On February 21st the full penalty of 20s. in each case was imposed with 23s. costs in the first and 2s. costs in the second case.

The owner of 115, Eastfield Street, was summoned for failing to remedy a defective drain.

On March 21st an order was granted, compelling the owner to remedy the defects within 14 days, and to pay £1 8s. 6d. costs.

On March 21st the owner of 117, Eastfield Street, was fined £1 and 12s. 6d. costs, and an order was made to remedy a defective drain for which he was summoned.

Mr. Staines, the agent for the owner of 5, West Arbour Street, was summoned for failing to abate a nuisance caused by defective yard paving.

An abatement order, with 25s. costs, was granted on March 21st.

On April 25th Mark Specterman, of 2, Alie Place, the owner of 54, Smith Street, was summoned for non-compliance with the Council's order to remedy a defective drain.

The magistrate granted an order for the completion of the work, with 23s. costs.

On May 8th Mark Specterman, of 2, Alie Place, was summoned for non-compliance with the Council's order at 10, West Arbour Street, to remedy a defective drain.

The Magistrate granted an order to complete the work, with 25s. costs.

On May 23rd Mr. Sprung, of 35, Patherton Road, was summoned for non-compliance with the Council's order to remedy a defective soil-pipe at 42, Old Church Road. An order was made, with 25s. costs.

Mr. Sprung was also summoned for refusing to ventilate the soil-pipe at 44, Old Church Road, but the hearing of the case was adjourned for 21 days.

On May 23rd Harris Etkin, of 84, Cable Street, was fined £1 and 30s. costs for allowing the cellar to be illegally occupied.

On May 28th Mr. Gershon Harris, of 459, Mile End Road, was summoned for general nuisances at Nos. 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 Blocks, Booth Street Buildings. The nuisance consisted of the dirty condition of the stairs, passages, etc., and the filthy condition of the water-closets.

An order to abate, with 25s. costs, was made in each of the 10 summonses.

On June 13th the adjourned case against Mr. Sprung *re* 44, Old Church Road, was heard. Mr. Sprung did not appear. An order was granted to ventilate the soil-pipes within seven days, with 27s. costs.

On June 13th the owner of 41, Smith Street, was summoned for failing to comply with a notice of the Council to remedy a defective drain. Order granted, with 25s. costs.

On July 16th Mr. Zigman Isaacs was fined 20s. and 40s. costs for illegally occupying underground rooms at 67, Wilkes Street, as a dwelling.

On July 16th Mr. J. H. Bishop, of Braeside, Westcliff-on-Sea, the owner of 28, Great Pearl Street, was summoned for general nuisances caused by the dilapidated condition of the premises. A closing order was made, with 4s. costs.

On October 2nd Mr. Joseph Donn, of 25, Princelet Street, was summoned for general nuisances caused by the dirty condition of Nos. 1 to 8, Montague Houses.

The necessary work having been done, and the nuisances abated, the summonses was withdrawn on payment of £2 4s. costs.

On October 15th the Magistrate ordered Mr. Leschalles—the owner of 11, East Arbour Street—to remedy a defective drain at the above premises within 14 days, and to pay 25s. costs.

On October 15th the Magistrate ordered Mr. Woolrauch—the owner of 35, Blount Street—to remedy a defective yard paving within 14 days, and to pay 25s. costs.

On October 28th Mr. Abrahams, the owner of 84, Salmon Lane, was summoned for failing to remedy defective roof, floor, and window sashes.

The Magistrate granted an order for the work to be done within seven days, with 25s. costs.

Mr. Abrahams, of 191, City Road, the owner of 24, King John Street, was summoned for failing to remedy defective drains.

The Magistrate granted an order for the work to be done within seven days, with 25s. costs.

The owner of 23, King John Street, was summoned for failing to remedy a defective drain.

The Magistrate granted an order for the work to be done within seven days, with 25s. costs.

The owner of 208, Mile End Road, was summoned for allowing premises to be occupied without a satisfactory water supply.

The supply having been reinstated, the summons was withdrawn on payment of 23s. costs.

On November 20th Mr. Morris Cohen, of 15, Finch Street, was summoned for keeping live fowls in the yard in such manner as to be a nuisance.

The summons was withdrawn on payment of £2 2s. costs, and undertaking not to keep fowls in the yard again.

On November 20th Mr. Phillip Reuben, of 32, Finch Street, was summoned for the offensive condition of the fish barrows in the yard of the premises.

The Magistrate granted an order to abate the nuisance within three days, and to prevent its recurrence, with 25s. costs.

On November 27th Mr. Gershon Harris, of 459, Mile End Road, owner of Nos. 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 Blocks, Booth Street Buildings, was summoned for further disobeying Magistrate's order made 28th May, 1902.

The summons was adjourned for five weeks to enable the owner to rectify the whole of the yard and wash-house pavings and to commence the work of the trough closets.

On November 27th Mr. Goode, of 1, Theydon Road, was summoned for non-compliance with the Council's order with regard to 11, West Street, to remedy a defective drain and general dilapidations.

The Magistrate granted an order to complete the necessary work within seven days.

On November 27th Mr. Staines, of 200, Cambridge Road, was summoned for non-compliance with a notice of the Council with regard to the premises, 2, Sceptre Street.

The necessary work having been completed, the summons was withdrawn on payment of 25s. costs.

On November 21st Mr. Simons, of 59, Nelson Street, owner of 45, Rhodeswell Road, was summoned for not complying with the Council's order to provide a proper water supply, etc.

The Magistrate granted an order for the necessary work to be done within 14 days, with 25s. costs.

On November 28th Hyman Reinis, of 71, Cable Street, was summoned for permitting the basement of the above house to be occupied as a dwelling on November 15th. He was fined £1 and 23s. costs.

On December 4th the owner of 13, Bell Lane, was summoned for non-compliance with notices to remedy a defective drain.

The Magistrate granted an order to remedy the defects within 14 days, with 25s costs.

On December 4th the owner of 31, Lamb Street, was summoned for non-compliance with notices served to remedy a defective drain and yard paving.

The Magistrate granted an order to complete the work within 14 days, with 25s. costs.

On December 11th the owner of 71, Commercial Street, was summoned for non-compliance with notices served to remedy a defective soil-pipe and drain.

The Magistrate granted an order to complete the work in 14 days, with 27s. costs.

Mr. J. Moss, the owner of Nos. 25, 26, 27, 28, and 29, Wheeler Street, and 1, Quaker Street, was summoned for allowing the premises to be in such a state as to be unfit for human habitation.

Summonses were withdrawn on payment of £6 18s., on his undertaking to put the premises into habitable condition.

On December 19th Mr. Grotski, of 43, Grafton Street, the owner of 45, Repton Street, was fined £5 and 23s. costs for not complying with the Council's order to remedy the defective waterpipe.

On December 24th Mr. Cohen, of 1, Bancroft Road, owner of 21, Durham Row, was fined 20s. and 23s. costs for not complying with the Council order to provide a proper and sufficient water supply.

Legal Proceedings under Bye-Laws.

On May 22nd Mr. J. H. T. Keeves, of 14, Highbury Terrace, was summoned for failing to give notice before constructing drainage works at 68, Nicholas Street. He was fined 20s. and 23s. costs.

For non-compliance with Section 14 of the London County Council Bye-laws, by not giving notice, at 62, Nicholas Street, Mr. Keeves was fined 20s. and 2s. costs.

On September 20th James Kelsey, a registered milk-seller, of 66, Salmon Lane, was summoned for having in use a dirty milk measure. He was fined 20s. and 12s. 6d. costs.

On October 3rd Isaac Leventon, of 242, Oxford Street, was summoned for having dirty milk utensils on the premises. Defendant did not appear. The summons was adjourned to October 10th, when defendant was fined 25s.

Smoke Nuisances.

A great deal of attention was devoted to the abatement of black smoke during the year, and notices were served for its abatement on 125 premises. Most of these had no smoke consumers of any kind, and in others the nuisance was caused by the carelessness of the stoker.

I am glad to say that in nearly all of these, smoke consumers, of the most modern type, have been constructed, and towards the end of the year there was great improvement in this respect.

Police Court proceedings were taken against the following:—

On January 20th Mr. Harris Grodzinsky, of 20, Bedford Street, was fined £5 and 23s. costs.

On July 20th Mr. Robert Ellis, 76, Copley Street, was fined £4 and 23s. costs.

On October 10th Mr. Nicholas Louis, 146, White Horse Street, was fined £3 and £2 2s. costs.

On October 24th Messrs. Durell & Co., Saw Mills, Globe Wharf, were fined £5 and 23s. costs.

On November 7th Messrs. Yeatman & Co., 9, Denmark Street, were fined £6 and 23s. costs.

On November 14th Messrs. Allen & Son were fined £3 and 23s. costs for permitting black smoke to issue from their chimney at Canal Road. They were also fined £3 and 23s. costs for permitting black smoke to issue from their chimney at Copperfield Road. Also for a similar offence at Emmott Street they were fined £3 and 23s. costs.

Canal Boats Acts, 1877 and 1884.

61 Canal Boats were inspected during the year. Their condition was very good.

Infringement of the Acts and regulations were discovered as follows, viz.:—

Certificates	1	Overcrowding	2
Marking	1	Painting	5

Whenever there was an infringement of the Acts, a notice was sent to the owner of the Canal Boat requiring him to remedy the cause of complaint, and to forward within a specified period a certificate signed by some duly appointed Inspector of Canal Boats, that the same had been done. Such certificate was afterwards received.

One boat was registered during the year.

Houses Let in Lodgings.

New Bye-laws made under Section 94, Public Health (London) Act, 1891, were submitted to the Local Government Board early in 1901.

After several alterations were made by, and as the result of, a Conference between that Board and a deputation from the Public Health Committee, the Bye-laws were confirmed on July 24th.

They had to be advertised in the local papers before they came into force on September 1st.

At the end of the year, 1,669 houses had been registered.

6,831 visits and re-visits were made to these premises during the year, and 295 intimations were served. It was necessary to serve 108 statutory notices.

Nuisances caused by 107 cases of overcrowding were abated.

Police Court proceedings were taken under the Bye-laws against:—

- (1) Mr. Saul Lyons, the owner of 5, Cox Square, was summoned for non-compliance with Bye-law 4. The defendant having complied with the Bye-law, before the date of the proceedings, the summons was withdrawn on payment of £2 4s. costs.
- (2) On December 5th Mr. Charles Filer, 89, Gore Road, Victoria Park, was fined 1s. and 23s. costs for failing to furnish particulars for the registration of 26, Eastfield Street. The defendant gave notice of appeal.
- (3) The landlord of 214, High Street, Shadwell, was summoned under Bye-law 14, for failing to cleanse the premises. He was fined 10s. and 23s. costs.

Serving the landlords or keepers with forms requiring particulars of letting and the number of occupants of the various rooms, entail a great deal of work. Many of the forms have to be returned several times before anything like a correct return is obtained. About 10 per cent. only of the forms when they are first sent in, shew the correct number of persons occupying the premises.

The fact that premises are registered has had a good effect in several ways. A large number of houses large enough for a moderate-sized family, but occupied by two or more families, have been emptied as soon as the landlords are informed of our intention to have them registered. They are afterwards let to one family on the understanding that there is to be no sub-letting. This objection on the part of the landlords to have their houses registered is due partly to the fact that they are looked upon as registered lodging houses, and it is difficult to convince them of the difference between that and common lodging houses. The landlords also want to be relieved from the responsibility of annually cleansing the premises, which is required by the Bye-laws. Allowing these small houses to be occupied by one family each, has materially reduced the overcrowding which formerly occurred in them.

BY-LAWS.

Made by the Council of the Metropolitan Borough of Stepney, with respect to Houses let in Lodgings or occupied by members of more than one family, in the Metropolitan Borough of Stepney.

1.—In these by-laws, unless the context otherwise requires, the following words and expressions have the meanings hereinafter respectively assigned to them: that is to say—

“Council” means the Mayor, Aldermen and Councillors of the Metropolitan Borough of Stepney.

“Lodging-house” means a house or part of a house which is let in lodgings or occupied by members of more than one family.

“Landlord” in relation to a house or part of a house which is let in lodgings or occupied by members of more than one family, means the person (whatever may be the nature or extent of his interest in the premises, and whether he resides on the premises or not) who receives or is entitled to receive the rack rent of a lodging-house.

“Keeper” in relation to a house or part of a house which is let in lodgings or occupied by members of more than one family, means the person (whatever may be the nature or extent of his interest in the premises) by whom or on whose behalf such house or part of a house is let in lodgings, or for occupation by members of more than one family, or who for the time being receives or is entitled to receive the profits arising from such letting, whether on his own account, or as agent or trustee for any other person, or who would so receive the same if such house or part of a house were let at a rent.

“Lodger” in relation to a house or part of a house which is let in lodgings or occupied by members of more than one family, means a person to whom any room or rooms in such house or part of a house may have been let as a lodging or for his own use and occupation, or who, not being a member of the family of such person, may occupy or use any such room or rooms by permission of the person to whom the same may be let.

2.—The keeper of a lodging-house or a lodger therein shall not knowingly cause or suffer a greater number of persons than will admit of the provision of three hundred cubic feet of free air space for each person of an age exceeding ten years, and of one hundred and fifty cubic feet of free air space for each person of an age not exceeding ten years to occupy, at any one time, as a sleeping apartment, a room which is used exclusively for that purpose, and which is under the control of such keeper, or which has been let to such lodger, respectively, as the case may be.

3.—The keeper of a lodging-house or a lodger therein shall not knowingly cause or suffer a greater number of persons than will admit of a provision of four hundred cubic feet of free air space for each person of an age exceeding ten years, and of two hundred cubic feet of free air space for each person of an age not exceeding ten years, to occupy, at any one time, as a sleeping apartment, a room which is not used exclusively for that purpose, and which is under the control of such keeper, or which has been let to such lodger, respectively, as the case may be.

4.—The keeper, or when there is no keeper the landlord, of a lodging-house, within a period of fourteen days after he shall have been required by a notice in writing signed by the Medical Officer of Health to the Council and duly served upon or delivered to such keeper or landlord to supply the information necessary for the registration of such house by the Council, shall himself, or by his agent duly authorised in that behalf, sign and furnish to the Council a true statement of the following particulars with respect to such house, that is to say—

- (a) The total number of rooms in the house.
- (b) The total number of rooms let in lodgings or occupied by members of more than one family.
- (c) The manner of use of each room.
- (d) The number, age, and sex of the occupants of each room used for sleeping.
- (e) The Christian name and surname of the lodger.
- (f) The amount of rent or charge per week payable by each lodger, and
- (g) The Christian name and surname of the landlord of the lodging-house.

5.—In any case where the landlord of a lodging-house occupies or resides in any part of the premises, or retains a general possession or control of the premises, such landlord, and in any case where the landlord of a lodging-house does not occupy or reside in any part of the premises, or retain a general possession or control of the premises, every keeper or lodger who is entitled to have or to exercise control of the outer door of the premises shall, at all times when required by the Medical Officer of Health, the Sanitary Inspector, or any other officer specially appointed or authorised by the Council in that behalf, afford any such officer free access to the interior of the premises for the purpose of inspection.

6.—Every lodger in a lodging-house shall, at all times when required by the Medical Officer of Health, the Sanitary Inspector, or any other officer specially appointed or authorised by the Council in that behalf, afford any such officer free access for the purpose of inspection to the interior of any room or rooms which may have been let to such lodger.

7.—Where the Medical Officer of Health, the Sanitary Inspector, or any other officer specially appointed or authorised by the Council in that behalf, has, for the purpose of inspection, obtained access to the interior of a lodging-house, or to the interior of any room or rooms in such house, a person shall not wilfully obstruct any such officer in the inspection of any part of the premises, or without reasonable excuse, neglect or refuse, when required by such officer, to render him such assistance as may be reasonably necessary for the purpose of such inspection.

8.—In any case where a lodger in a lodging-house is entitled to the exclusive use of any court, courtyard, area or other open space within the curtilage of the premises, such lodger, and in any case where two or more lodgers in a lodging-house are entitled to the use in common of any court, courtyard, area or other open space within the curtilage of the premises, the keeper shall cause such court, courtyard, area or other open space to be thoroughly cleansed from time to time, as often as may be requisite for the purpose of keeping the same in a cleanly condition.

9.—The landlord of a lodging-house shall cause every drain or means of drainage, with which any water-closet belonging to such house may communicate, to be maintained at all times in good order and efficient action.

He shall also cause all such means of ventilation as may be provided in or in connection therewith to be maintained at all times in good order.

10.—Every lodger in a lodging-house shall cause every solid or liquid filth or refuse to be removed once at least in every day from every room which has been let to him, and shall once at least in every day cause every vessel, utensil, or other receptacle for such filth or refuse, to be thoroughly cleansed.

11.—In every case where a lodger in a lodging-house is entitled to the exclusive use of any staircase, landing or passage in such house, such lodger shall cause every part of such staircase, landing or passage to be thoroughly cleansed from time to time as often as may be requisite.

12.—A lodger in a lodging-house shall not cause or suffer any animal to be kept in any room which has been let to, or is occupied by, such lodger, or elsewhere upon the premises in such a manner as to render the condition of such room or premises filthy or unfit for human habitation.

13.—The keeper of a lodging-house shall cause every common passage or staircase in each house to be thoroughly cleansed from time to time as often as may be requisite.

14.—The landlord of a lodging-house shall, in the first week in the month of April in every year, and at such other times as the condition thereof may render it necessary, cause every part of the premises to be cleansed.

He shall, at the same time, except in such cases as are hereinafter specified, cause every area, the interior surface of every ceiling and wall of every water-closet belonging to the premises, and the interior surface of every ceiling and wall of every room, staircase and passage in the house to be thoroughly lime-washed.

Provided that the foregoing requirement with respect to the lime-washing of the internal surface of the walls of rooms, staircases, and passages shall not apply in any case where the internal surface of any such wall is painted, or where the material of or with which such surface is constructed or covered is such as to render the lime-washing thereof unsuitable or inexpedient, and where such surface is thoroughly cleansed and the paint or other covering is renewed, if the renewal thereof be necessary for the purpose of keeping the premises in a cleanly and wholesome condition.

15.—The landlord of a lodging-house shall provide adequate means of ventilation in or in connection with every common passage or staircase in such house, and shall cause such means of ventilation to be maintained at all times in good order.

16.—The landlord of a lodging-house shall cause all such means of ventilation as may be provided in or connection with any room in such house to be maintained at all times in good order.

17.—The keeper of a lodging-house in which furnished rooms are let shall cause the bedding, furniture, and other articles in such rooms to be at all times maintained in a clean and wholesome condition, and free from insects.

18.—In every case where, in pursuance of any statutory provision in that behalf, an order of a justice has been obtained for the removal from a lodging-house to a hospital of a person who is suffering from any dangerous infectious disease and is without proper lodging or accommodation, the keeper of such house and the lodger to whom any room whereof such person may be an occupant has been let shall, on being informed of such order, forthwith take all such steps as may be requisite on the part of such keeper and of such lodger, respectively, to secure the safe and prompt removal of such person in compliance with such order, and shall in and about such removal, adopt all such precautions as in accordance with any instructions which such keeper and such lodger, respectively, may receive from the Medical Officer of Health of the Council may be most suitable for the circumstances of the case.

19.—Every person who shall offend against any of the foregoing by-laws shall be liable for every such offence to a penalty of five pounds, and in the case of a continuing offence to a further penalty of forty shillings for each day after written notice of the offence from the Council.

Provided, nevertheless, that the justices or court before whom any complaint may be made or any proceedings may be taken in respect of any such offence, may, if they think fit, adjudge the payment as a penalty of any sum less than the full amount of the penalty imposed by this bye-law.

20.—From and after the date of the confirmation of these by-laws, any by-laws with respect to houses let in lodgings, or occupied by members of more than one family, in force in the Metropolitan Borough of Stepney, shall be repealed.

Unsound Food.

On account of the large number of prosecutions at the end of 1901, the condition of the food exposed or deposited for sale in the Borough greatly improved.

Notices were served on the various Wharfingers, Importers, Brokers, etc., calling their attention to the fact that unsound food, whether exposed for sale or not, was liable to be seized. This I have no doubt caused the surrender to us of a large quantity of canned goods, which in former years found its way on the market.

The following were destroyed under our supervision:—

- 1 barrel Apples.
- 94 tins canned Apples.
- 3,371 tins and 5 cases Apricots.
- 5,603 tins Apricot Pulp.
- 49 drums Anchovies.
- 47 tins and 9 cases Asparagus.
- 1 tin Black Currants.
- 14½ bodies diseased Beef.
- 1½ cwt. diseased Beef.
- 4,167 tins Canned Beef.
- 341 tins Beef and Mutton.
- 11 boxes Bloaters.
- 22 tins Brawn.
- 1,291 cases Bananas.
- 1 Cask Red Cabbage.
- 6 lbs. Ox Cheeks.
- 106 Chickens.
- 6 bags Cocoa.
- 2 carcasses Calves.
- 220 baskets Gorgonzola.
- 69 lbs. Cheese.
- 39 seives and 1 tin Cherries.
- 5 bags Cocoanuts.
- 3 boxes Cucumbers.
- 1 hogshead Pickled Cucumbers.
- 18 cwt. Dates.
- 250 Eggs.
- 43 cases and 836 tins Liquid Eggs
- 10,963 tins Fruits (various).
- 51 cases, 27 tins, and 6 cwt. Fruit Pulp.
- 113 Fowls.
- 56 Ox Feet.

13 cwt. Dried Fish.
 38 boxes, 2 baskets, 2 barrels, and 72 lbs. Fish.
 2 hogsheads Gherkins.
 160 Geese.
 2 sieves Gooseberries.
 565 cases and 2 barrels Grapes.
 63 cases and 30 tins Canned Greengages.
 221 cases Greengage Pulp.
 14 Hearts.
 14 Heads.
 1 barrel Herrings.
 56 lbs. Isinglass.
 28 diseased Ox Kidneys.
 1 cwt. Pigs' Kidneys.
 14 diseased Ox Livers.
 7,710 tins Canned Lobsters.
 16 diseased Ox Lungs.
 3 diseased Sheep's Lungs.
 285 bales and 45 bags Liquorice Root (about 70 tons).
 2,818 tins Canned Milk.
 3,947 tins Mackerel.
 200 cases and 2,055 tins Canned Mutton.
 5 bags Mussels.
 19 cases Oranges.
 81 bags and 135 cases Onions.
 30 casks Pickled Onions.
 3 tins Canned Oysters.
 27½ sieves Pears.
 31 cases and 330 tins Canned Pears.
 2 cases Peach Pulp.
 12 tins Canned Peaches.
 3 tins Canned Peas.
 7 tins Canned Prawns.
 100 Pineapples.
 38,828 tins Canned Pineapples.
 17 sieves Plums.
 1 bottle and 1 basket Mixed Pickles.
 4 tons Potatoes.
 3 boxes Pomegranates.
 6 Rabbits.
 857 tins Canned Rabbits.
 4,090 tins Raspberry Pulp.
 3 baskets Radishes.
 3,651 tins Canned Sardines.

106 tins Salmon and Sardines.
 7,980 tins Salmon.
 1 diseased Ox Spleen.
 23 cases and 9 tins Soups.
 8 tons of Sugar.
 200 lbs. Shrimps.
 5 cases Strawberries.
 4 tins Syrup.
 19 bags Tapioca Flour.
 22 boxes Tomatoes.
 156 tins Tomatoes.
 216 Turkeys.
 14 Ox Tails.
 1 ton 13 cwt. 8lb. Tripe.
 14 diseased Ox Tongues.
 4,922 tins Canned Tongues.
 1 hogshead Walnuts.

TOTAL WEIGHTS OF UNSOUND FOOD DESTROYED.

Legal proceedings were taken against the following:—

On May 9th, Mr. Percy Cragg, trading as Overali & Co., fish merchants, was fined £20 and £10 costs for having deposited for sale upon his premises, 88, High Street, Wapping, 3,948 tins of Mackerel in an unsound and unwholesome condition.

On December 19th, Mr. Davis Lederman, baker and confectioner, 157, Cannon Street Road, was fined £10 and 23s. costs for having deposited on his premises for the purpose of preparation for human food 192 eggs and 3 gallons of liquid eggs, the whole of which were unsound and unwholesome.

On December 19th Miss Leah Levy, 111, Cable Street, was fined £8 and 23s. costs for having deposited on the premises for the purpose of preparation for food, 108 rotten eggs.

The Mortuary.

The number of bodies deposited in the Mortuary during the year was 722. 661 were removed by the Coroner's order, 33 by the Police, 2 by order of Relieving Officers, and 10 by request of friends, and 16 were persons that had either died from infectious diseases, or I did not consider their dwellings to be suitable.

13 bodies were deposited in the Infectious Mortuary, and 4 in the Jewish Mortuary for watching purposes.

713 Inquests were held, and 62 Post-mortems were made.

Factory and Workshops Act, 1901.

This Act came into force on January 1st, 1901, and consolidated with amendments all previous Acts.

This Act requires the Council to "keep a Register of all workshops situated within the district."

It also requires the Medical Officer of Health in his Annual Report to the Council to report on the administration of the Act in workshops and workplaces, and to send a copy of the Report to the Secretary of State.

Workshops include (a) ropeworks, bakehouses, carpet-beating works, etc.; (b) any other premises in which manual labour is exercised by way of trade or for purposes of gain, in or incidental to the making, altering, repairing, etc., of any article, and over which the employer of the persons working there has the right of access or control; (c) any workshop in which, "with the permission of, or under agreement with the owner or occupier, two or more persons carry on any work, which would constitute the workplace a workshop, if the persons working therein were in the employment of the owner or occupier."

LAUNDRIES are also treated as workshops unless worked by inmates of a religious or charitable institution, or by the members of one family, with or without the assistance of two others.

A WORKPLACE includes a stable, the kitchen of a restaurant and other places where people assemble together to do work permanently of some kind or other.

DUTIES WITH REGARD TO WORKSHOPS AND WORKPLACES.

(1) The sanitary condition of workshops and workplaces refers to:—

(a) Cleanliness.—The Act provides a penalty for refusing to comply with the Council's notices to have the workshop limewashed or cleansed.

The workshops were all cleansed during the year, most of the owners doing it voluntarily, but in 522 cases, notices had to be served before it was done.

(b) Air Space.—250 cubic feet is allowed for each person, and 400 during overtime. Overcrowding occurred in 79 cases. In 77 instances it was abated as a result of notices that were served. In two cases Police Court proceedings had to be taken.

(c) Ventilation.—Any workshop not properly ventilated may be dealt with as a nuisance.

Alteration had to be made in 107 workshops to effectually ventilate them. 29 hoods were provided to the gas-stoves.

(d) Drainage of Floors.—If any process renders the floor liable to be wet to such an extent that the wet is capable of being removed by drainage, adequate means shall be provided for draining purposes.

(e) Sufficient sanitary accommodation must be provided. Additional w.c. accommodation had to be provided in 165 workshops.

(2) HOMEWORK.—New and important powers are given which aim at the prevention of homework being done—

(a) In dwellings which are injurious or dangerous to the health of the workers themselves, *e.g.*, through overcrowding, want of ventilation, or other insanitary conditions.

The Council may prohibit the occupier of the workshop or contractor from giving out work to be done in that place. This power may be exercised in the case of work given out from laundries, warehouses, shops, etc., and applies to—

(i.) The cleaning, making, washing, altering, and repairing of wearing apparel, etc.

(ii.) The making, ornamenting, mending, and finishing of lace and lace curtains, and nets.

(iii.) Cabinet and furniture making.

(iv.) Making of electro-plate.

(v.) Making of files.

(vi.) Fur pulling.

(b) In infected dwellings.—If any inmate of a house in which homework is being done, is suffering from any infectious disease, the Council may, by order served on the occupier of any factory, workshop, or other place from which work is given out, or on any contractor employed by such occupier, prohibit him from giving out such work to any person living or working in the house during such time as the Council may fix. In an emergency the power may be exercised by any two or more members of the Council, on the advice of the Medical Officer of Health.

This power is applied to—

Wearing apparel.

Lace and lace curtains.

Upholstery work, and

Fur-pulling.

All occupiers of factories, workshops, or any place from which work is given out, and contractors employed by such occupiers, are required in regard to the above classes of work, to keep lists showing the names and addresses of all persons employed by them, either as workmen or as contractors outside such factory, workshop, or place, and the place where they are employed, and to send to the Council twice a year (*viz.*, on or before 1st February and 1st August) copies of such lists.

It will be the duty of the Council to have the lists examined, and if the place of employment of any outworker is in another district, to furnish his name and place of employment to the Council of that district.

DOMESTIC WORKSHOPS will be subject to the ordinary provisions of the Act, but are specially exempted from the special provisions as to means of ventilation and the drainage of floors.

POWERS OF BOROUGH COUNCIL.—The Council and their officers are given the same powers of entry, taking legal proceedings, or otherwise, as a Factory Inspector possesses. These powers, in the case of workplaces, are given for the first time by the Act of 1901.

MATTERS REFERRED TO COUNCIL BY FACTORY INSPECTORS.—The Factory Inspector will—on finding in a factory or workshop any act, neglect, or default in relation to a drain, water-closet, ashpit, water supply, nuisance, or other matter which is punishable or remediable under the Public Health Acts, but not under the Factory Act—give notice to the Council of such act, etc. It will be the duty of the Council to make inquiry into the matter, take such action as may seem proper, and inform the Inspector of the proceedings taken. If proceedings are not taken by the Council within one month, the Factory Inspector is authorised to take the same proceedings as the Council might have taken, and to recover from the Council the expenses incurred by him.

On May 23rd Eva Cohen, 1, Berner Street, was fined £5 and 27s. costs for failing to abate overcrowding in the workshop.

On November 14th Morris Vitzen, 92, Sidney Street, was fined £3 and 23s. costs for failing to abate overcrowding in the workshop.

On November 14th Jacob Mann, 104, Newark Street, was fined £3 and 23s. costs for failing to comply with a notice requiring him to limewash and cleanse the workshop.

Bakehouses.

The Factories and Workshops Act, 1901, contains the following provisions for the regulation of bakehouses:—

(a) A bakehouse must not contain or communicate directly with a water-closet or ashpit. A drain must not have any opening in the bakehouse. The penalty for contravening either of these is a fine of £2 on the owner or occupier.

(b) The inside walls and ceilings must be limewashed every six months, or coated with three coats of paint or varnish every seven years, and washed with hot water and soap every six months.

(c) Places on the same level with a bakehouse and forming part of the same building must not be used as sleeping places unless effectually separated from the bakehouse by partition from floor to ceiling, and provided with an external glazed window, 9 square feet, of which $4\frac{1}{2}$ feet must be made to open.

(d) No underground bakehouse shall be used as such, unless it was so used on August 17th last.

(e) After January 1st, 1904, it will not be lawful to use any underground bakehouse (whenever established) unless the Borough Council are satisfied that it is suitable for the purpose in regard to construction, light, ventilation, and in all other respects, and have given it a certificate of suitability. This provision will apply to all bakehouses, whether wholesale or retail.

Every bakehouse will be deemed an underground bakehouse if any room used for baking is so situated that the surface of the floor is more than three feet below the surface of the footway of the adjoining street, or of the ground adjoining or nearest the room.

(d) and (e) are new provisions entirely.

In order to carry out the requirements of the Act, the following suggestions were approved by the Public Health Committee. They were printed and distributed among the owners of bakehouses. The Public Health Committee will consider the condition of each bakehouse on this basis before granting a certificate.

(a) CONSTRUCTION.

(1) The bakehouse shall be of a minimum capacity of 1,500 cubic feet, and shall be at least eight feet high in every part thereof, measured from the floor to the ceiling.

(2) The floor and walls shall be constructed of hard, smooth, durable, and impermeable material.

(3) Provision must be made for suitable means of access—other than by a ladder—to the underground bakehouse, in the form of convenient stairs. No entrance from the shop floor will be allowed.

(4) All areas must be constructed of white glazed bricks or tiled faces.

(b) LIGHT.

(5) The bakehouse shall be supplied with one or more windows, so as to be efficiently lighted, by means which shall exclude the entrance of street dust. Such window or windows must have a total superficial area, clear of the sash frame, equal to one-tenth of the floor space.

(c) VENTILATION.

(6) The bakehouse shall be properly ventilated by permanent inlets and outlets—other than the windows—communicating directly with the open air. If necessary, artificial means of ventilation must be provided.

(d) ALL OTHER RESPECTS.

(7) Proper provision shall be made for the storage of flour elsewhere than in the underground bakehouse itself.

(8) Conveniences for personal ablution shall be provided in a suitable position, and shall include a water-tap and sink or lavatory basin of an approved pattern. (These conveniences should be outside the bakehouse.)

(9) Proper provision shall be made for the depositing of wearing material outside the underground bakehouse.

(10) All troughs, tables, or other furniture standing on the floor of the underground bakehouse shall be provided with strong, ball-bearing castors.

(11) An underground bakehouse shall not be in communication with a wash-house, nor with any room, cellar or area containing objectionable materials.

(12) An underground room, not entirely separated from the underground bakehouse, shall be well lighted throughout, shall be sufficiently protected against the entrance of ground air, shall be properly ventilated, and shall be at all times clean.

(13) Before making any alterations with a view to meeting these requirements, the owners or occupiers of underground bakehouses shall submit to the Sanitary Authority a specification (and plans) of the alterations which they purpose making.

There are in our Borough 201 retail bakehouses, 93 of them being underground. I personally visited every bakehouse during the last week in September and the first week in October. Some of the underground bakehouses were so structurally defective that it will be impossible for the owners to remedy them, in order to bring them within the requirements of the Public Health Committee. They will therefore have to be closed. I indicated to the owners of the others on what lines structural alterations should be made.

Public Analyst's Annual Report.

During the year 1902, 1,187 samples were examined under the Sale of Food and Drugs Acts, consisting of 550 Milks, 209 Butters, 9 Cheeses, 3 Margarines, 6 Lards, 1 Tea, 71 Coffees, 2 Chicories, 7 Cocoas, 4 Breads, 4 Flours, 13 Oatmeals, 4 Ground Rices, 1 Sago, 3 Cornflours, 1 Baking Powder, 86 Peppers, 74 Mustards, 6 Vinegars, 8 Ground Gingers, 1 Brandy, 5 Gins, 3 Rums, 20 Whiskies, 4 Porters, 60 Demerara Sugars, 5 Sweetmeats, 1 Olive Oil, 2 Castor Oils, 5 Camphorated Oils, 2 Sweet Spirits of Nitre, 3 Milk of Sulphurs, 11 Crushed Linseeds, 1 Powdered Rhubarb, 2 Cream of Tartars.

260 samples, or 21.9 per cent., were found to be adulterated, as compared with 15.4 per cent. in the preceding year. These consisted of 167 Milks, 45 Butters, 4 Coffees, 3 Cocoas, 1 Sago, 1 Pepper, 5 Mustards, 1 Ground Ginger, 7 Whiskies, 1 Vinegar, 24 Demerara Sugars, 1 Sweet Spirit of Nitre.

Proceedings were taken in 118 cases, 113 of which were successful; one summons was withdrawn; one was adjourned "sine die"; and three were dismissed. One was dismissed owing to an informality in the purchase; in one case the defendant produced a warranty, the other case was referred to Somerset House, and as their figures did not agree with the official certificate, and the certificate of the defendant's analyst, the case was dismissed.

In four cases of Spirits the vendors displayed a notice to the effect that the Spirits were diluted, consequently no action was taken.

No action was taken in two cases where Margarine was supplied for Butter, owing to informality of purchase.

No action was taken in a Mustard which contained a small quantity of Starch, the adulteration probably being accidental.

Five samples of Milk were examined unofficially; one was 7 per cent. deficient in Milk Fat, two contained 9 and 4 per cent. respectively of added water, and two were genuine.

The samples of Porter were specially tested for arsenic. None was detected.

The fines and costs amounted to £332 8s.

The fines and costs allowed by the Magistrate under the Public Health Act amounted to £245 5s. 6d.

Total fines and costs, £577 13s. 6d.

I beg to express my indebtedness for the assistance that I received from the Sanitary Inspectors and Clerical Staff during the year, and the readiness with which they worked long after office hours and on Sundays during the outbreak of Small-pox.

I have the honour to be,

Mr. MAYOR AND GENTLEMEN,

Your obedient Servant,

D. L. THOMAS.

PUBLIC HEALTH OFFICES,

43, WHITE HORSE STREET,

COMMERCIAL ROAD EAST, E.

June 18th, 1903.

SANITARY INSPECTORS' REPORT.

1. The first part of the report is a general introduction to the subject of the study. It discusses the importance of the study and the objectives of the research. It also provides a brief overview of the methodology used in the study.

2. The second part of the report is a detailed description of the study area. It includes information about the location of the study area, the climate, and the vegetation. It also discusses the history of the study area and the reasons for its selection.

3. The third part of the report is a description of the study area. It includes information about the location of the study area, the climate, and the vegetation. It also discusses the history of the study area and the reasons for its selection.

4. The fourth part of the report is a description of the study area. It includes information about the location of the study area, the climate, and the vegetation. It also discusses the history of the study area and the reasons for its selection.

TABLE I.

* Rates in Columns 4, 8 and 13 calculated per 1,000 of estimated population.

NOTE.—The deaths to be included in Column 7 of this table are the whole of those registered during the year as having actually occurred within the district or division. The deaths to be included in Column 12 are the number in Column 7, corrected by the subtraction of the number in Column 10 and the addition of the number in Column 11.

By the term "Non-residents" is meant persons brought into the district on account of sickness or infirmity, and dying in public institutions there; and by the term "Residents" is meant persons who have been taken out of the district on account of sickness or infirmity and have died in public institutions elsewhere.

The "Public institutions" to be taken into account for the purposes of these tables are those into which persons are habitually received on account of sickness or infirmity, such as hospitals, workhouses and lunatic asylums. A list of the Institutions in respect of the deaths in which corrections have been made should be given on the back of this Table.

TABLE II.

Vital Statistics of separate Localities in 1902 and Previous Years.
