ANNUAL REPORT

OF THE

Medical Officer of Health and Public Analyst

FOR THE

Metropolitan Borough of Stepney.

1908.

REPORT

OF THE

MEDICAL OFFICER OF HEALTH AND PUBLIC ANALYST.

FOR THE YEAR 1908.

To the Mayor, Aldermen and Councillors of the

METROPOLITAN BOROUGH OF STEPNEY.

GENTLEMEN,

I have much pleasure in submitting to you my eighth Annual Report, which deals with the Vital and Sanitary Statistics of the Borough of Stepney for the year 1908.

Population.

The resident population of the Borough of Stepney was estimated at the middle of the year to be 310,706; distributed as follows:—

Limehouse District	 	58,822
St. George-in-the-East	 	52,674
Mile End Old Town	 	118,336
Whitechapel District	 	80,874

This is arrived at by a calculation, that the rate of increase ascertained at the census taken in 1901, as having taken place since the census taken in 1891, is still continuing. I am sure this assumption is an incorrect one. In 1901, there were very few empty houses in the Borough. Overcrowding was prevalent and it was most difficult to abate it due to the dearth of empty houses. It was almost impossible to have a house without paying a premium which was called "key money." This is altered now. In 1904, the number of empty houses became abnormal, and the number has been on the increase as is seen by the following figures which the Borough Treasurer has supplied me with.

In the quarter ending March 31st, 1904, the number was 1,073. In the quarter ending March 31st, 1906, the number was 1,670. In the quarter ending March 31st, 1907, the number was 2,865. In the quarter ending March 31st, 1908, the number was 2,944.

Rents have been reduced with the result that families which in 1901 could only afford to rent two rooms, are now able to rent three or more at the same price.

It will thus be understood that, after a certain period since the census was taken, the estimated population is liable to error. This will have the effect of making the birth-rate and the death-rate higher than that given.

Births.

The total number of births registered during the year was 10,124, which consisted of 5,257 males and 4,867 females.

1,926 belonged to the Limehouse District, or at the rate of 32.7 per 1,000 of the population.

1,982 belonged to St. George-in-the-East, or at the rate of 37.6 per 1,000 of the population.

3,914 belonged to Mile End Old Town, or at the rate of 32.8 per 1,000 of the population.

2,302 belonged to the Whitechapel District, or at the rate of 28.4 per 1,000 of the population.

The birth-rate throughout the whole Borough was 32.5 per 1,000 of the population, while that of London as a whole was 25.2 per 1,000, which is the lowest recorded in the Metropolis since registration was established.

The birth-rate in the Borough is lower than in the preceding year, and is in fact the lowest on record. It has been gradually declining year by year—with one or two exceptions—since 1896.

The birth-rate of St. George's is higher than that of the other three districts, but is lower than in the preceding years.

The birth-rate of St. George's has been abnormally high for many years. As mentioned in my last report, this is due mainly to the fact that in recent years, slum areas have been cleared by private enterprise, and large model dwellings have been erected. The latter have been occupied by a different class of people to those that have been displaced. They have invariably consisted of young families who have immigrated into that part of the Borough. The larger the number of persons of the child-bearing period in a district, the greater will be the number of children born, and the higher will be the birth-rate. As time goes on, these families will reach a stage beyond the child-bearing age, and the birth-rate will then have a tendency year by year to decline, and approximate more to the normal rate.

- 256 births occurred in the London Hospital:-
 - 59 belonged to Mile End Old Town.
 - 35 belonged to St. George-in-the-East.
 - 20 belonged to the Whitechapel District.
 - 19 belonged to the Limehouse District.
 - 123 belonged to outlying districts.
- 493 births occurred in the Mothers' Lying-in Home, Commercial Road:—
 - 107 belonged to Mile End Old Town.
 - 64 belonged to St. George-in-the-East.
 - 21 belonged to the Whitechapel District.
 - 127 belonged to the Limehouse District.
 - 174 belonged to outlying districts.
- 122 births occurred in the Whitechapel Infirmary:-
 - 83 belonged to the Whitechapel District.
 - 9 belonged to Mile End Old Town.
 - 1 belonged to the Limehouse District.
 - 8 belonged to St. George-in-the-East.
 - 21 belonged to outlying districts.
- 47 births occurred in St. George's Infirmary:-
 - 44 belonged to St. George-in-the-East.
 - 3 belonged to the Limehouse District.
- 57 births occurred in the Mile End Infirmary: --
 - 53 belonged to Mile End Old Town.
 - 1 belonged to the Limehouse District.
 - 3 belonged to outlying districts.
- 13 Births occurred in Poplar belonging to this Borough. All were children of residents of Limehouse.
- 7 births belonging to the Borough of Stepney, occurred in the City of London Lying-in-Home; 7 in the Queen Charlotte's Hospital; 7 in the British Lying-in-Hospital; 5 in the General Lying-in-Hospital, Lambeth; and 2 in the Salvation Army Maternity Hospital, Hackney.

Illegitimate Births,

- 26 illegitimate births were registered in the Limehouse District, or at the rate of 21.9 per 1,000 births.
- 30 illegitimate births were registered in the St. George's District, or at the rate 15.1 per 1,000 births.

68 illegitimate births were registered in the Mile End Old Town District; or at the rate of 17.3 per 1,000 births.

30 illegitimate births were registered in the Whitechapel District, or at the rate of 13 per 1,000 births.

The number throughout the whole Borough was 173, or 28 more than in the previous year. This number corresponds to a rate of 17 per 1,000 births, while that for the whole of London was 35 per 1,000.

The number of illegitimate births was the same in Mile End as in the preceding year. It was higher in Limehouse and Whitechapel, but lower in St. George's than in the previous year.

Marriages.

The marriages during the year numbered 2,363, or 397 less than in the previous year.

The proportion of persons married was 15.2 per 1,000 of the population, while that for the whole of London was 15.9 per 1,000.

- 373 marriages occurred in the Limehouse District, or at the rate of 12.6 persons married per 1,000 of the population.
- 273 marriages occurred in the St. George's District, or at the rate of 10.3 persons married per 1,000 of the population.
- 1,185 marriages occurred in the Mile End District, or at the rate of 20 persons married per 1,000 of the population.
- 532 marriages occurred in the Whitechapel District, or at the rate of 13.1 persons married per 1,000 of the population.

Deaths.

The total number of deaths occurring in the Borough was Deduct deaths occurring within the Borough among persons not	
belonging thereto	
Add deaths of residents that occurred outside the Borough	4,394
	5,176

The following table shows the death-rate throughout the whole Borough and in the various districts since 1890:—

the vari	ous dis	tricts since	e 189	0:-					T	he whole
		Limehouse.	8	st. George's.		Mile End.		Whitechapel.		Borough
1890		26.8		35.0		20.0		24.0		25.2

Small Pox.

This is the second year in succession that the Borough has been entirely free from Small Pox.

Measles.

The number of deaths from Measles was 264, or 109 more than in the previous year.

66 belonged to the Limehouse District, or at the rate of 1.12 per 1,000 of the population.

79 belonged to St. George's, or at the rate of 1.49 per 1,000 of the population.

75 belonged to Mile End Old Town, or at the rate of .63 per 1,000 of the population.

44 belonged to the Whitechapel District, or at the rate of .54 per 1,000 of the population.

The death-rate for the whole Borough was .84 per 1,000 of the population, which is higher than in any other Metropolitan Borough. The death-rate from Measles for the whole of London was .31 per 1,000.

Scarlet Fever.

2,114 cases of Scarlet Fever were notified during the year, or 733 less than in the previous year. 2,052 were removed to the various Fever Hospitals.

306 belonged to the Limehouse District, with 12 deaths.

455 belonged to the St. George's District, with 12 deaths.

881 belonged to the Mile End District, with 22 deaths.

472 belonged to the Whitechapel District, with 9 deaths.

The death-rate for the Borough was .17 per 1,000 of the population, while that for the whole of London was .11 per 1,000.

The case mortality was 2.5 per cent., that is, 5 deaths occurred in every 200 patients notified to be suffering from Scarlet Fever. In recent years the great majority of cases have been of a very mild type, and there is no doubt that Scarlet Fever is much less virulent than it used to be. Isolation hospitals have probably tended to produce this diminished virulence, as 97 per cent. of the cases in our Borough were removed to hospital in 1908.

Whooping Cough.

The number of deaths from Whooping Cough was 129, or 27 more than in the previous year. This corresponds to a death-rate of .41 per 1,000 of the population. The death-rate throughout London was .20 per 1,000.

44 belonged to the Limehouse District, or at the rate of .74 per 1,000 of the population.

19 belonged to St. George's, or at the rate of .36 per 1,000 of the population.

51 belonged to Mile End, or at the rate .43 per 1,000 of the population. 15 belonged to the Whitechapel District, or at the rate of .18 per 1,000

of the population.

Diphtheria and Membranous Croup.

492 cases were notified during the year, or 75 less than in the previous year.
452 were removed to the Fever Hospitals.

74 belonged to the Limehouse District with 16 deaths, which is equivalent to a death-rate of .27 per 1,000 of the population.

77 belonged to St. George's with 8 deaths, which is equivalent to a death-rate of .15 per 1,000 of the population.

240 belonged to Mile End with 37 deaths, which is equivalent to a death-rate of .31 per 1,000 of the population.

101 belonged to the Whitechapel District with 14 deaths, which is equivalent to a death-rate of .17 per 1,000 of the population.

The death-rate throughout the Borough was '24 per 1,000 of the population. The death-rate for the whole of London was .15 per 1,000.

Enteric Fever.

83 cases of Enteric Fever were notified during the year, or 24 less than in the preceding year. 68 were removed to the various hospitals.

23 occurred in the Limehouse District, with 7 deaths.

14 occurred in St. George's, with 2 deaths.

24 occurred in Mile End, with 3 deaths.

7 occurred in the Whitechapel District, with 2 deaths.

The death-rate throughout the Borough was .04 per 1.000 of the population. The death-rate for the whole of London was .05 per 1.000.

It is very difficult to trace the origin of this disease, but in the following cases there appears to be no doubt that the patients contracted the disease outside the Borough.

On October 15th and December 2nd respectively, Margaret Healey, age 8 years, and Georgina Healey, age 12 years, of 111, Ducket Street, Mile End, were notified to be suffering from Typhoid Fever.

I found upon making enquiries as to the source of infection, that the mother of the patients, as well as the rest of the family, had been employed hop-picking during September at Faulkner's Farm, Hadlow, Kent. I communicated with the Medical Officer of Health for that District, who informed me that several cases of Typhoid Fever had occurred among the residents of Faulkner's Farm Cottages. The outbreak was apparently due to a well from which the inhabitants obtained their domestic water supply which had become in some way polluted.

On October 17th and 22nd respectively, Timothy Neale, age 13 years, and Charles Neale, age 19 years, both residing at 11, Cayley Street, Limehouse. were notified to be suffering from Typhoid Fever.

Upon investigating these cases, I ascertained that the mother of patients had also been engaged in hop-picking at the above-mentioned Farm, and upon arriving home was taken ill and died on October 2nd; the cause of death was, however, certified to be Enteritis.

On October 27th, Ada Rayner, age 11 years, of 8, Repton Street, was notified to be suffering from Typhoid Fever. She also returned home from Faulkner's Farm on September 16th.

On October 27th I was informed of another case, viz.:—Rosina Faulkner, age 13 years, of 103, Elsa Street, Limehouse. She returned home from Dew's Farm, St. Malden, Kent, on September 28th, where she had been employed

hop-picking. She was admitted to the Poplar and Stepney Sick Asylum on October 5th, but the disease was not diagnosed until the date mentioned.

On October 30th I received a notification that Caroline Weeks, age 12 years, of 53, Brenton Street, Limehouse, was suffering from Typhold Fever. In this case also I found that the patient had been hop-picking at Noake's Farm, Hersmonden, Kent, and complained of the quality of the domestic water supplied at the Farm.

Typhus Fever.

2 cases of Typhus Fever were notified, both belonging to Mile End. Both recovered.

Erysipelas.

405 cases of Erysipelas were notified during the year, or 52 less than in the previous year. 77 were removed to various Hospitals and Infirmaries.

58 belonged to the Limehouse District. All recovered.

68 belonged to St. George's. One died.

148 belonged to Mile End. Three died.

131 belonged to the Whitechapel District. Five died.

Cerebro-Spinal Fever.

2 cases were notified during the year, both having occurred in St. George's.

Puerperal Fever.

9 cases of Puerperal Fever were notified, or 8 less than in the previous year.

No case occurred in the Limehouse District.

3 belonged to St. George's. One died.

4 belonged to Mile End. Three died.

2 belonged to the Whitechapel District. There were three deaths, but the cause of death in the third was only discovered by a post-mortem examination. The case was therefore not notified in the usual way.

Notifiable Diseases.

3,109 were notified during the year, or 906 less than in the previous year. 2,657 were removed to various Hospitals and Infirmaries. This corresponds to a rate of 10.05 per 1,000 of the population.

464 belonged to the Limehouse District, or at the rate of 7.88 per 1,000.

623 belonged to St. George's, or at the rate of 11.82 per 1,000. 1,309 belonged to Mile End, or at the rate of 11.06 per 1,000. 713 belonged to the Whitechapel District, or at the rate of 8.82 per

1,000.

The greatest number of notifiable diseases occurred in the last week in September, when 105 cases were notified, which coincided with the greatest number of Scarlet Fever notifications in one week, viz.:—80.

Diphtheria reached its maximum in the last week in August, when 20 cases were notified. Curiously enough, this is the third year in succession when 20 notifications have been the highest number notified in any week during the year.

8 cases of Enteric Fever was the greatest number notified in any week; and which occurred in the first week in November.

The largest number of Notifiable Diseases occurred during the second week in July in the Limehouse District, the first week of October in St. George's, the last week of September in Mile End, and the third week of September in the Whitechapel District.

WRONG DIAGNOSIS.—334 cases of Infectious Disease were removed to the Hospitals of the Metropolitan Asylums Board which were subsequently returned home in consequence of the patients being found not to be suffering from the diseases certified upon admission, or any other notifiable disease. 172 of these cases were reported by the London Hospital.

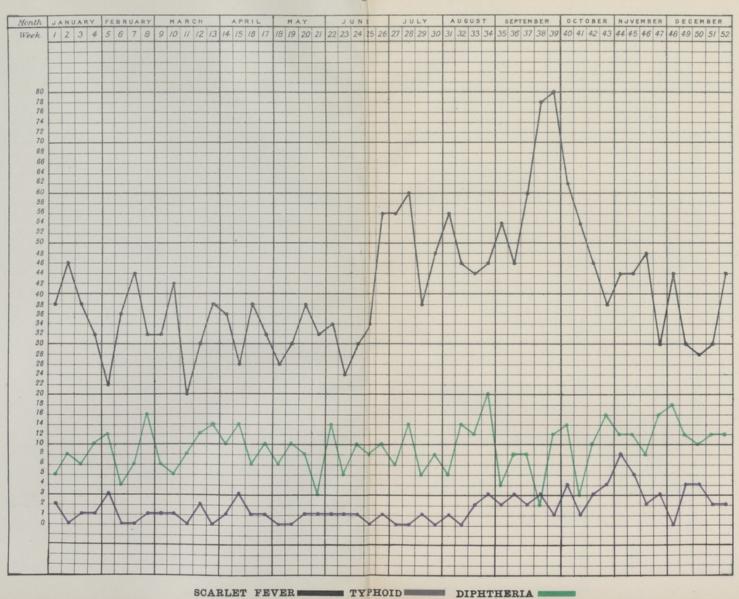

This number consisted of :—181 cases of Scarlet Fever, 14 cases of Typhoid Fever, and 138 cases of Diphtheria.

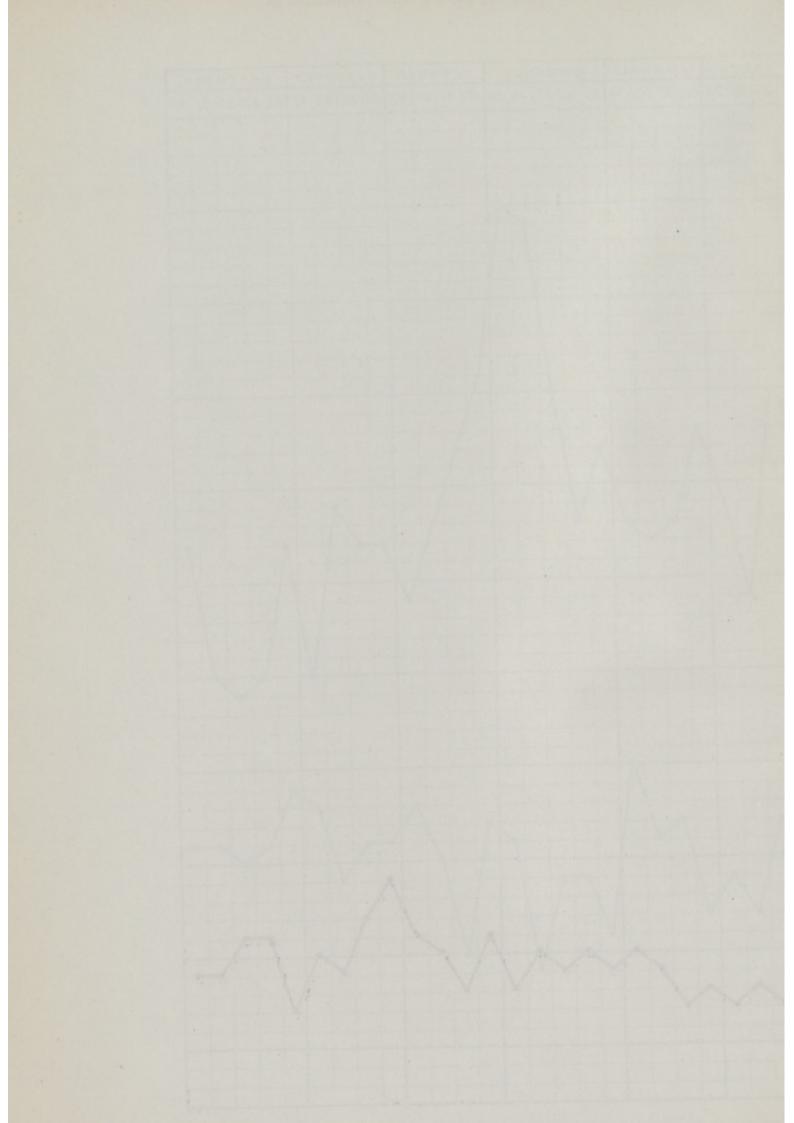

Bacteriological Examinations.

The number of specimens received during the year was 90. Of these 24 gave positive and 66 gave negative results.

59 specimens of sputum were examined for suspected cases of Consumption.

Chart showing the number of cases notified week by week in the Borough, of Scarlet Fever, Typhoid and Diphtheria during 1908

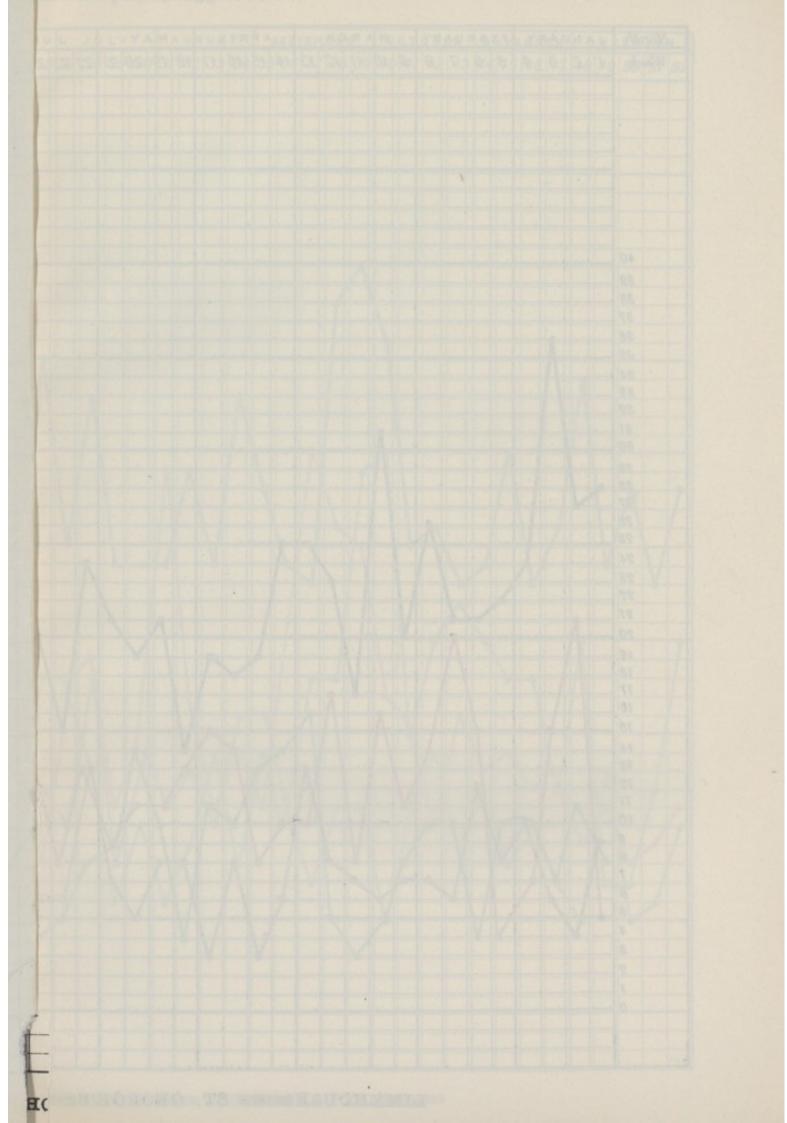

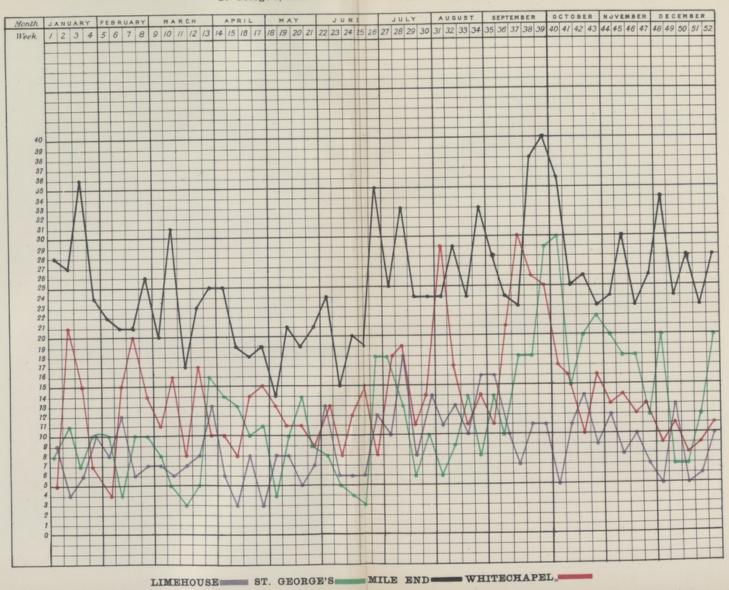

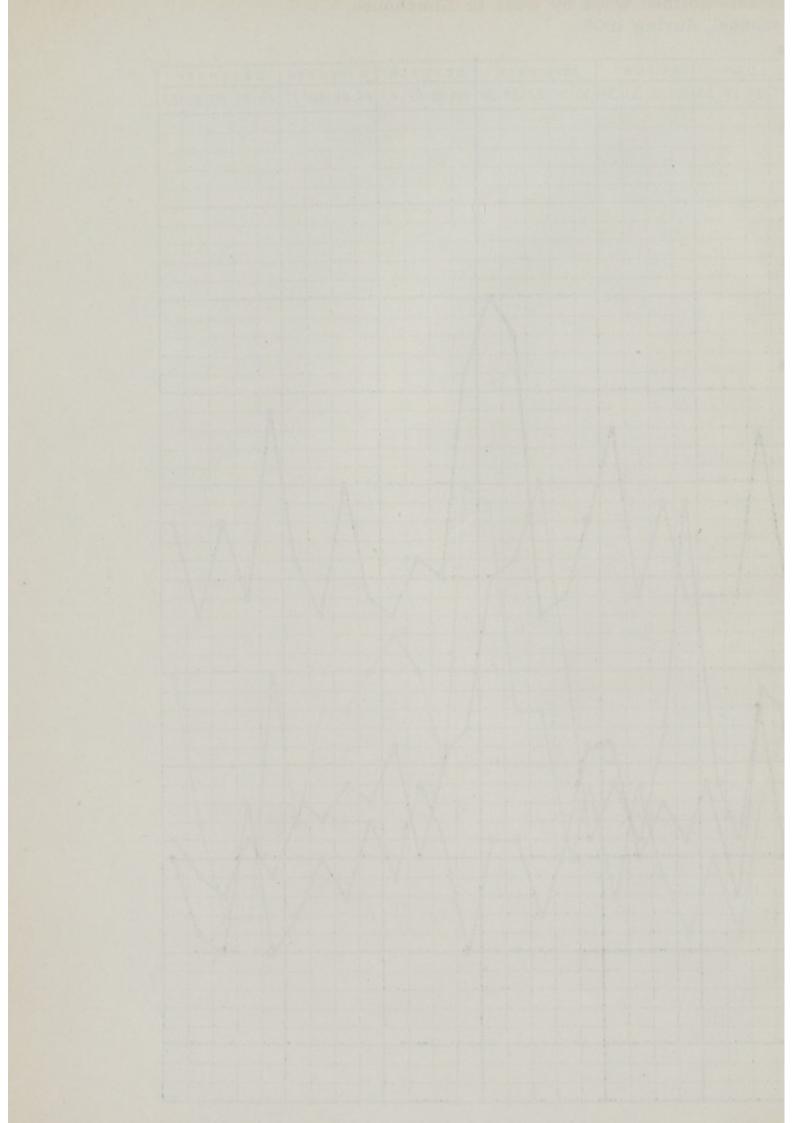

Chart showing the total number of cases of Infectious Diseases notified week by week in Limehouse, St. George's, Mile End and Whitechapel, during 1908.

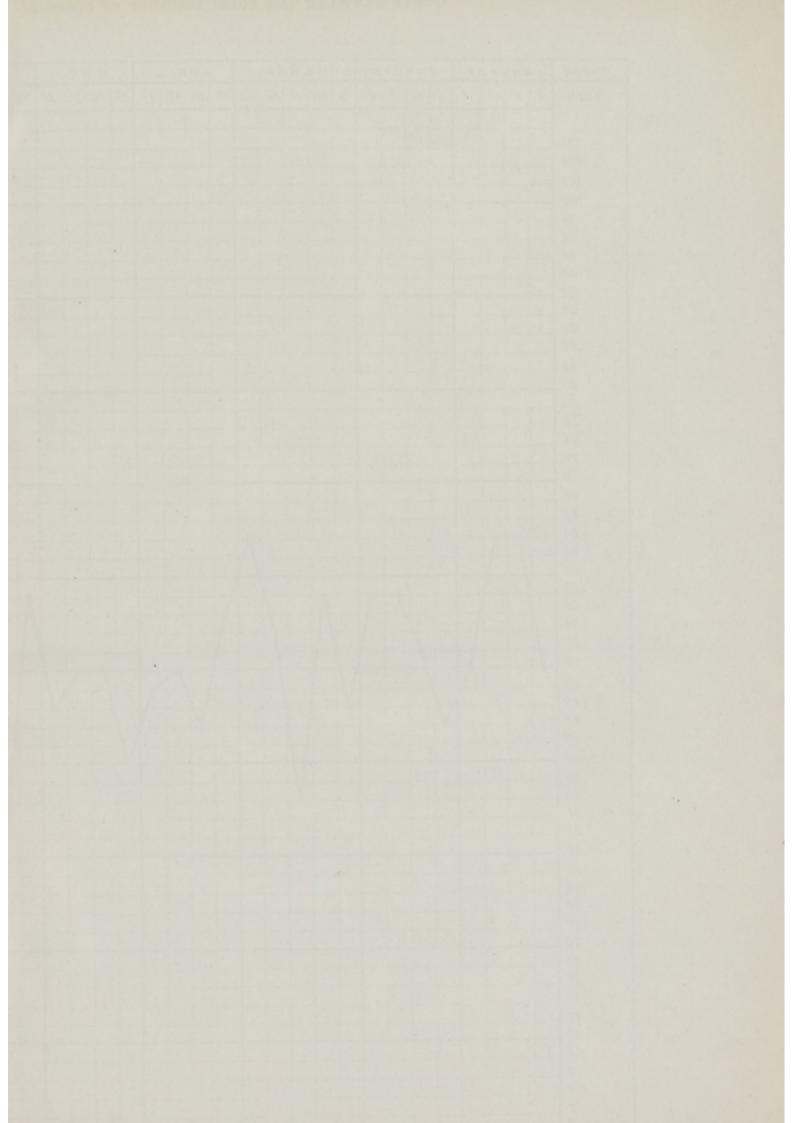

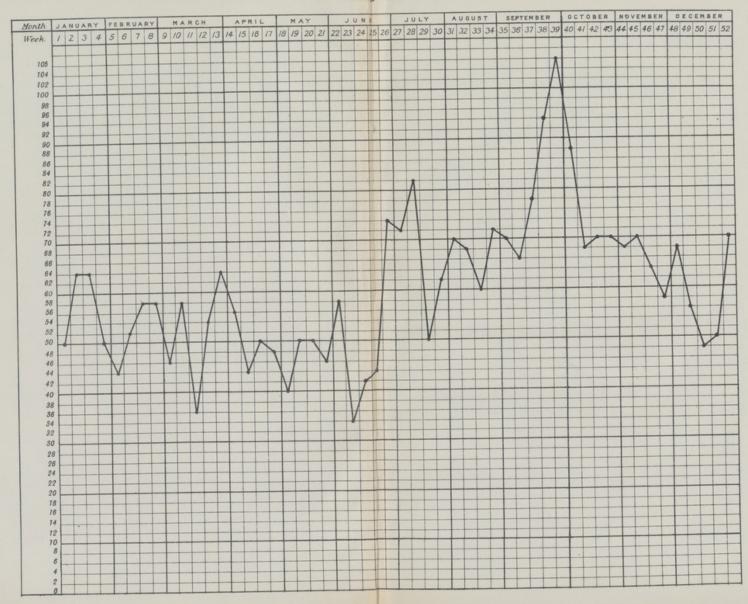

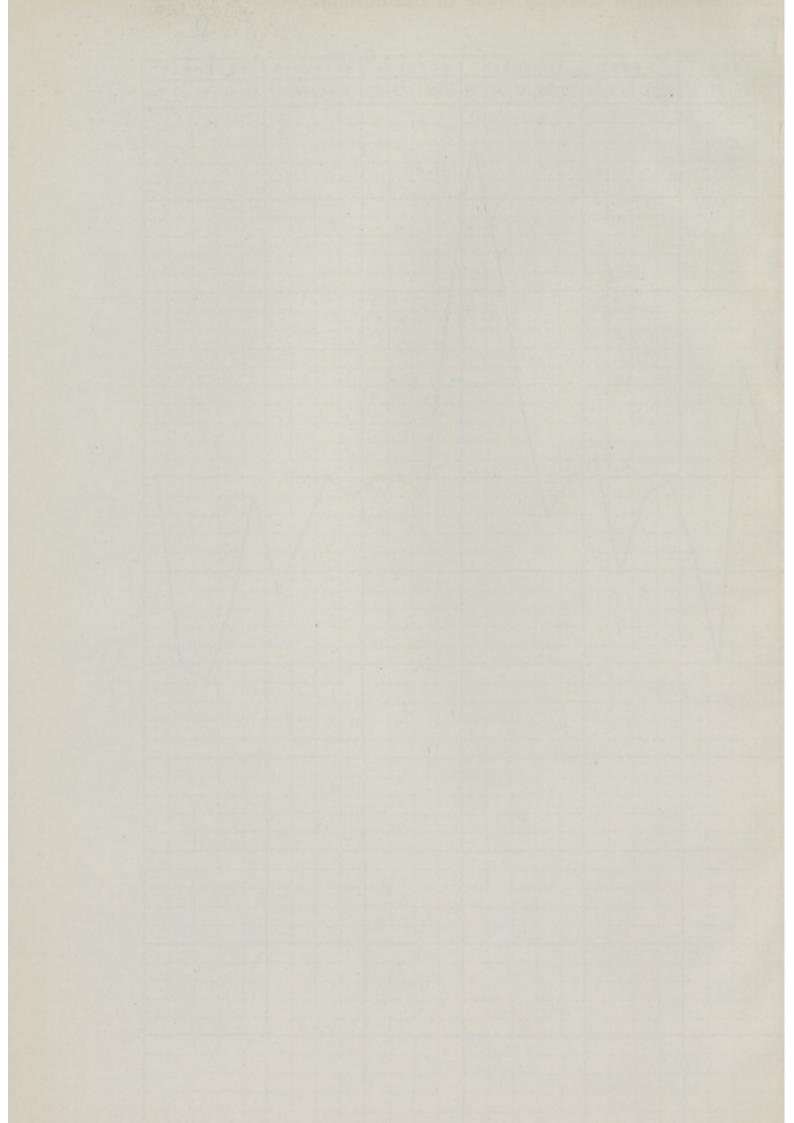

Chart showing the total number of cases of Infectious Diseases notified week by week in the Borough during 1908.

The early detection of the bacillus of tuberculosis should afford material help in diagnosing the disease, and thus direct the proper treatment.

Return Cases.

(1) On March 19th, Daniel Griffiths, 48, Copenhagen Place, Limehouse, was discharged from Gore Farm Hospital, where he had been treated for Scarlet Fever since February 29th. On March 21st, his sister—Hannah Griffiths—was taken ill, and on March 23rd she was removed to Hospital suffering from the same disease. When Daniel Griffiths returned home he was apparently in good health, but two days later he suffered from a cold in the head.

Experience has shown, that a recently recovered Scarlet Fever patient who develops nasal catarrh, is peculiarly liable to become a focus of infection.

- (2) Abraham Muscovitch was admitted to the South-Eastern Hospital with Scarlet Fever on February 10th, transferred to Gore Farm on March 7th, and discharged on April 2nd. Five days later, his younger brother "Barnett" was admitted to the Hospital with Scarlet Fever. The boy seemed to be in every way quite well, and completely recovered from Scarlet Fever when he returned home from Gore Farm. Subsequently he had some trouble with his nose which became blocked, so that he could not breathe through it. On examining the boy, it was found that he had adenoids and chronically enlarged tonsils, with recent acute inflammation of these parts. Such a condition explains the conveyance of infection by Abraham to his brother Barnett.
- (3) Percy Curtis, 14, Victoria Cottages, Albert Street, was admitted to the South-Eastern Hospital with Scarlet Fever on February 18th, and discharged from the same Hospital on April 8th. A week later, his brother Thomas fell ill with the same disease. It was stated by the mother that the boy was in the lest of health when he returned from the South-Eastern Hospital. He had no discharge from either nose or ears and no desquamation. He had, however, some chronic enlargement of the tonsils,

Whether Percy Curtis infected his brother—as seems probable—or not, there was nothing in the boy's condition to suggest that he was not fit for discharge at the time he left the South-Eastern Hospital.

- (4) George Taylor, 49, Dixon Street, was admitted to the Eastern Fever Hospital with Scarlet Fever on May 6th and discharged on June 25th. Two days later, his sister fell ill with the same disease. It was stated that the boy seemed quite well when he returned from Winchmore Hill. There appeared to be nothing suggestive of an incomplete recovery from Scarlet Fever. The boy was absent from home for seven weeks, which should have been long enough in an uncomplicated case, such as this, to secure a complete elimination of all infection.
- (5) Alexandra Chetland, 189, Katherine Buildings, was removed to the Fever Hospital on July 8th suffering from Scarlet Fever and discharged on August 27th. On September 3rd, her brother Thomas complained of feeling ill, and on September 4th, he was notified to be suffering from Scarlet Fever, and her sister May was removed on September 7th suffering from the same disease.

The Officers of the Metropolitan Asylums Board pointed out to the parents that fever experts are now agreed in holding the view that late peeling, such as was present in the case of this child, does not carry with it the risk of infection, and practical experience has proved this view to be correct. While it is possible that the infection of Scarlet Fever was brought home from Gore Farm by Alexandra, it was stated, that in some children, infection persists after every trace of the illness disappears, and that in the present state of our knowledge, we have no means of ascertaining when this is the case. Fresh cases may occur after the return of a patient from Hospital, despite the utmost care on the part of the Medical Officer of the Institution.

- (6) Rosalie Long, 111, Old Church Road, was removed to the Fever Hospital on July 26th said to be suffering from Scarlet Fever, and discharged on September 1st. On September 3rd, the mother discovered that she still had a rash and took her to the London Hospital. The mother was there informed that the child was in an infectious condition, and she was forthwith removed to the Brook Fever Hospital. She was detained until October 12th. It was afterwards ascertained that when she was admitted on July 26th she was suffering with Broncho-pneumonia and dangerously ill. She had no evidence of Scarlet Fever at the time of entering or leaving the Hospital on that occasion.
- (7) Cecil Charles Turner, 38, Walker Street, was admitted to the Park Fever Hospital with Scarlet Fever on August 24th, transferred to Gore Farm

on September 17th and discharged on October 9th. Five days later, Winifred Turner, aged 3 years, fell ill with Scarlet Fever and was admitted to the Park Hospital on October 17th. The boy apparently looked very well when he returned home from Gore Farm, and, as far as could be seen, had completely recovered from the Fever. He had, however, chronic enlargement of the tonsils, which may possibly have encouraged that persistence of infection which resulted in the illness of his younger sister.

- (8) Minnie Levy, 22, Cambridge Road, was admitted to the South-Eastern Fever Hospital on September 6th and discharged on October 12th. She was certified to be suffering from Scarlet Fever, but on admission was found to be suffering from Diphtheria. Two days after she left the South-Eastern Hospital, the child seemed unwell and was taken to the London Hospital, where she was found to be suffering from Scarlet Fever. She was at once removed to the Brook Hospital.
- (9) Dennis James Donovan, 1, Robeson Street, Mile End, was discharged from the Gore Farm Hospital on September 14th as having recovered from Scarlet Fever. On September 25th, his brother Michael was notified to be suffering from the same disease and forthwith removed to Hospital.

Diarrhoea.

The number of deaths from Diarrhœa, which includes Epidemic and Zymotic Enteritis, Dysentery and Dysenteric Diarrhœa, Cholera and Choleraic Diarrhœa, was 262. Of this number, 200 were children under 1 year of age.

- 98 belonged to the Limehouse District, or at the rate of 1.66 per 1,000.
- 69 belonged to St. George's, or at the rate of 1.30 per 1,000
- 66 belonged to Mile End, or at the rate of .55 per 1,000.
- 29 belonged to the Whitechapel District, or at the rate of .35 per 1,000.

The death-rate for the whole of the Borough was .84 per 1,000 of the population. The death-rate for the whole of London was .53 per 1,000.

Enteritis.

The number of deaths from Enteritis, which includes Gastro-Enteritis, Muco-Enteritis and Gastric Catarrh, was 130. Of these, 96 were infants under one year of age.

- 25 belonged to the Limehouse District, or at the rate of .42 per 1,000.
- 17 belonged to St. George's, or at the rate of .32 per 1,000.
- 45 belonged to Mile End, or at the rate of .38 per 1,000.
- 43 belonged to the Whitechapel District, or at the rate of .53 per 1,000.

The death-rate throughout the whole Borough was .41 per 1,000 of the population

Zymotic Diseases.

The total deaths from diseases of a Zymotic character numbered 806. This number corresponds to a death rate of 2.56 per 1,000 of the population. It includes deaths from Measles, Scarlet Fever, Whooping Cough, Diphtheria, Croup, Enteric Fever, Puerperal Fever, and Diarrhoea.

243 belonged to the Limehouse District, or at the rate of 4.1 per 1,000.

190 belonged to St. George's, or at the rate of 3.6 per 1,000

257 belonged to Mile End, or at the rate of 2.1 per 1,000.

116 belonged to the Whitechapel District, or at the rate of 1.4 per 1,000.

Diseases of Respiratory Organs.

There were 1,048 deaths due to Diseases of the Respiratory Organs, which corresponds to a death-rate of 3.37 per 1,000 of the population.

229 belonged to the Limehouse District, or at the rate of 3.89 per 1,000.

168 belonged to St. George's, or at the rate of 3.20 per 1,000.

399 belonged to Mile End, or at the rate of 3.38 per 1,000.

252 belonged to the Whitechapel District, or at the rate of 3.11 per 1,000.

Phthisis.

494 deaths occurred during the year from Phthisis, or 12 more than in the previous year. This corresponds to a death-rate of 1.5 per 1,000 of the population. The death-rate for the whole of London was 1.3 per 1,000.

- 98 belonged to the Limehouse District or at the rate of 1.6 per 1,000.
- 79 belonged to St. George's, or at the rate of 1.5 per 1,000.
- 154 belonged to Mile End, or at the rate of 1.3 per 1,000.
- 163 belonged to the Whitechapel District, or at the rate of 2.0 per 1,000.

Number of Deaths from Consumption from 1901 to 1908:-

	 imehouse District.	St.	. George	s.	Mile End.	W	hitechap	el.	Whole Borough.
1901	 125		186		107		208		626

1908	 98		79		154		163	***	494

Other Tubercular Diseases.

There were 167 deaths from Tubercular Diseases other than Phthisis, or 35 less than in the previous year. This corresponds to a death-rate of .53 per 1,000 of the population.

- 38 belonged to the Limehouse District, or at the rate of .64 per 1,000.
- 40 belonged to St. George's, or at the rate of .75 per 1,000.
- 64 belonged to Mile End, or at the rate of .54 per 1,000.
- 25 belonged to the Whitechapel District, or the rate of .30 per 1,000.

Infantile Mortality and the Appointment of Health Visitors.

The question of appointing women on the Staff of the Public Health Department has been discussed by the Sanitary Committee and Council on several occasions, and opinion has been so divided on the Council that no action has been taken.

In 1899, before the formation of the Borough Council, the late Limehouse District Board of Works resolved to appoint a Health Visitor to instruct mothers in the proper care of infants, and thus endeavour to reduce the high infantile mortality in the district, provided the Local Government Board paid half her salary. The Local Government Board, while sympathising with the objects of the District Board, could not sanction the payment of a portion of her salary. The project therefore fell through.

In October, 1902, a sub-committee of the Public Health Committee presented a report which was adopted by the full Committee, and submitted to the Council on November 12th, 1902. The Public Health Committee recommended that two Female Health Visitors be appointed for a period of two years at a salary of £100 per annum. Their duties were to include visiting the homes of the poor, and give advice upon matters of home hygiene, viz.: the proper feeding and clothing of infants. The Health Visitors were to visit houses in districts where Diarrhæa, Measles, Whooping Cough, &c., were prevalent, and give instructions as to the necessity and proper care of the sick, and to act generally under the Medical Officer of Health. The recommendation of the Public Health Committee was rejected by the Council by 29 votes to 17.

The matter was taken up by a society outside the Council, and a lady was appointed for five years, her services being paid for by a private individual. This Health Visitor worked for three years in that part of the Borough known as "Limehouse Fields," where the infantile mortality is, and has been for many years, abnormally high. Unfortunately, when she had become well known in the area, and her services were appreciated, she was transferred to another part of the Borough.

On October 24th, 1906, a letter was received from the Secretary of the Legal Committee of the Women's Industrial Council, asking for the appointment of a Female Sanitary Inspector. The communication was referred to the Public Health Committee, which deferred its consideration for twelve months.

On March 13th, 1907, a deputation from the Stepney Visitors Association came before the Council, urging the appointment of a Female Sanitary Inspector. The subject was referred to the Public Health Committee. I was instructed to obtain information from other Metropolitan Borough Councils on the matter, and the replies were submitted to a sub-committee. After carefully considering the experience of other Borough Councils, the sub-committee arrived at the conclusion that a Woman Sanitary Inspector and Health Visitor should be appointed for a period of twelve months. The report of the sub-committee was rejected by the full Committee, and it was resolved to recommend the Council to take no action

in the matter. On April 24th an amendment was moved at the Council meeting, that the matter be adjourned, and the full report of the sub-committee be circulated to the members of the Council. This amendment was defeated by 23 votes to 16. The recommendation of the Committee was adopted.

On March 25th, 1908, a deputation from the Stepney Council of Public Welfare, including the Lord Bishop of Stepney, addressed the Council on the same subject. The matter was again referred to the Public Health Committee. The Committee recommended that no action be taken and this was approved by the Council by 19 votes to 9 on April 8th.

In most sanitary districts with a population of over 100,000, women have been appointed as Sanitary Inspectors or Health Visitors.

The City of Nottingham was the first Local Authority to appoint a Woman Inspector of Workshops, which was made in May, 1892. Kensington was the pioneer in London, appointing two Women as Inspectors of Workshops in October, 1892, while Islington appointed the first woman with the status of a Sanitary Inspector.

22 Metropolitan Boroughs, together with the City of London, now employ 39 Female Sanitary Inspectors, while six Boroughs, including Stepney, have not yet made any such appointment.

The argument for such appointments is based upon the assumption that there are fundamental differences, not only in training, but in both the mental and physical capabilities of men and women, and due regard should be paid to these differences in allotting to them their respective roles in Public Health work. Roughly speaking, these appointments are of two kinds, Sanitary Inspectors and Health Visitors. In many districts, the duties of a Sanitary Inspector and Health Visitor are combined in one appointment, and it is worthy of consideration whether the Council will appoint a Health Visitor with duties limited to such appointment, or confer upon the appointment the additional status of a Sanitary Inspector.

The duties of a Female Sanitary Inspector include the visiting of:-

(1) Factories and workshops where women only are employed.

The Inspector is responsible for:

- (a) Cleanliness and ventilation.
- (b) Number employed in each room.
- (c) Suitable water closet accommodation.

- (2) Outworkers' premises.
- (3) Tenement houses.
- (4) Laundries.
- (5) Day Schools and Restaurants.

In 14 Boroughs, the officers seem to combine the duties of the Female Sanitary Inspector and the Female Health Visitor.

(1) Factories and Workshops.—The number of workshops in the Borough of Stepney where women only are employed is 172, employing 957 women.

The number where men and women are employed is 1,961. The number of women employed in these is 8,026.

(2) Outworkers' Premises.—The number of outworkers' premises where women are employed is 1,404.

The number of outworkers' premises where men and women are employed is 156.

The total number of women employed is 1,526.

The number of workshops (including laundries) where women are solely employed is comparatively small and the duty of visiting them by a special inspector would not be economical, nor would the inspection be more efficiently done than it is at present. The workshops are scattered throughout the Borough and much time and labour would be involved if special visits were paid to them. At the present time, the Inspector does not make special journeys for the purpose of inspecting these workshops. When other duties take him to a street, he inspects the workshops situated in the neighbourhood.

It is doubtful if any advantage would accrue from the appointment of a special Inspector for the outworkers' premises. These premises are frequently tenement houses, and as such, are visited by one of the Inspectors for Houses-Let-in-Lodgings, as well as by the District Inspector. Further overlapping of duties would only lead to complications in the serving of notices. The difficulty arising from the service of notices by different persons could be obviated by limiting the duties of the Female Inspector to the inspection only, and leaving the service of the notices to the District Inspector.

(3) Tenement Houses.—There are already two Male Inspectors whose duties are limited to the supervision of Tenement Houses or Houses-Let-in-Lodgings. One

of their chief duties is the prevention of overcrowding. It is impossible to have convictions for overcrowding without making night or early morning visits. Undoubtedly these night visits can be made by Male Inspectors better than by females.

There are not many restaurant kitchens in the Borough, and as far as the cleanliness of the kitchens and the quality of the food are concerned, the inspection can be as efficiently made by Male Inspectors as by females.

Female Health Visitors. — Nine Metropolitan Boroughs appoint Health Visitors and do not confer on them the status of a Sanitary Inspector.

The duties of Health Visitors may be classified as follows:-

- (1) To advise expectant mothers on the management of their health and as to the influence of ante-natal conditions on their infants.
- (2) To follow up the notification of births, and to visit the homes when doctor and midwife have ceased to attend.
- (3) To note conditions of ignorant and improper feeding and to take steps to correct these evils.
- (4) To give advice on the proper feeding of infants; to warn mothers against premature weaning; to inculcate in particular, the importance of breast feeding until the teeth appear; and above all, of the avoidance of the use of foul feeding bottles.
- (5) To organise, instruct, and guide in their work the voluntary District Visitors who assist in health visiting.
- (6) To attend mothers meetings for the purpose of giving talks on the subject to which their qualifications and objects of their appointment relate.
- (7) Inquiries and instruction in the case of non-notifiable infectious diseases, e.g., Measles, Whooping Cough, &c.
- (8) To note any insanitary or foul conditions in any of the homes visited where infants have recently been born, and to report such matters to the Medical Officer of Health.
- (9) Visits to Phthisis cases, give instructions, and again visit to see if the instructions are carried out.
- (10) Inspection of public lavatories for women.

It will be observed that one of the chief objects of appointing a Health Visitor is the reduction of the infantile mortality. The following figures will show that although the efforts of the Council have been fairly successful in this respect, the infantile mortality yet remains at a high figure:—

	Limehouse District.		St. George's.			Mile End.	Whitechapel District.			The whole Borough.
1899		216		199		161		147		174
1900		227		141		166		140		166
1901		211		185		150		140		165
1902		197		160		163		117		155
1903		165		170		122		138		141
1904		208		161		145		143		158
1905		163		157		140		119		142
1906		168		141		126		123		136
1907		131		130		112		110		119
1908		171		141	***	-117		108		120

The infantile mortality throughout the whole of London was 113 per 1,000 births.

The enhanced infantile mortality of the Borough in 1908 was due almost entirely to the large number of deaths from Infantile Diarrhœa, and to a less extent to deaths from Measles.

A little over one-third of the total deaths occurred in the first month of life. It is generally acknowledged that three-fourths of the infants born throughout the country are healthy at birth. Among the causes of this high mortality in children during the first year of life are:—

- (a) Want of breast milk.
- (b) Want of a pure supply of milk in cases in which artificial feeding must be resorted to.
- (c) Breathing foul air.
- (d) Insufficient warmth.
- (e) Want of cleanliness and sleep.

Among the contributory factors are:-

Improper housing conditions,
Poverty,
Condition of work,
Drink,
Ante-natal conditions.

The Infantile Mortality was higher in the Limehouse District than in any part of the Borough. This is only what one expects, when it is realised that in the Limehouse District, there is a larger number of females working in factories, than in any other part of the Borough. The mothers, soon after their confinement, return to work, and leave the baby in the custody of one of their other children, which renders hand-feeding inevitable. Human milk is the best food, and no other milk can be made into a perfect food for infants. In infant feeding, nature is superior to art, and the artificial food should approximate as closely as possible to this ideal. It is possible, however, that human milk contains substances derived from the mother, which are carried by the milk into the infant's body, and protect it from the attacks of disease producing bacteria. It is, at any rate, extremely rare for infants on the breast to suffer from Measles, Scarlet Fever, or any of the infectious diseases. Premature weaning and the want of proper attention in the care of the infants seem to be the main factor in producing the high infantile mortality in the Limehouse District. Contrast this with the comparatively low infantile mortality in the Whitechapel District, where the Jewish population is greater relatively than in any other part of the Borough. The Jewish mother suckles her baby, and if she assists her husband at all in his employment, it is done by means of home work.

The disease which one would expect to be more directly caused by the improper feeding of infants than any other disease is Summer Diarrhœa. Diarrhœa is less fatal in breast-fed children than in hand-fed children. The death-rate from Diarrhœa was four times higher in the Limehouse District than in the Whitechapel District.

Measles is another disease in which neglect is the main factor in its ending fatally. Very few deaths were due, during 1908, to Measles per se. The deaths generally were caused by complications, such as Broncho-Pneumonia, due to catching cold while suffering from Measles. The death-rate from Measles was nearly three times higher in the Limehouse District than in the Whitechapel District. The same remark holds good to a great extent with regard to Whooping Cough. These facts are worthy of consideration, especially when the number of cases of notifiable diseases is relatively higher in the Whitechapel District than in the Limehouse District.

These deaths are to a great extent preventible, and the only practical suggestion that has been found of any use in this direction, is the appointment of Health Visitors. The experience of other Metropolitan Boroughs, where Health Visitors have been appointed, bears this out.

The Notification of Births Act, 1907, has not been adopted in the Borough of Stepney. It is undoubtedly of great advantage in districts that have Health Visitors on the Staff of the Public Health Department. Without these officers, I doubt whether the Act is of any great value. The time will probably come when the Act will be made compulsory.

The London County Council (General Powers) Act, 1908, enables the Council to pay a moiety of the salaries of Health Visitors to the Borough Councils.

It will be observed that there is a tendency in recent public health legislation to encourage local authorities to take steps to lower the infantile mortality by appointing Health Visitors.

I have enumerated above, certain duties that are often allocated to Health Visitors. If all these duties were to be systematically and thoroughly carried out, one health visitor would be inadequate in the Borough of Stepney. One health visitor could, however, be of great benefit if she was localised in a small area where the infantile mortality is abnormally high. In addition to visiting the mothers in this area, her time could be usefully employed in organising and assisting the work of voluntary health visitors who assist in health visiting in the Borough, visiting homes where Phthisis cases are notified, making enquiries and giving instructions in the case of non-notifiable infectious diseases, e.g., Measles and Whooping Cough, and in the Inspection for Public Lavatories for women.

Deaths of Illegitimate Children.

There were 53 deaths of illegitimate children during the year, or at the rate of 306 per 1,000 births.

15 belonged to the Limehouse District, or at the rate of 576 per 1,000 births.

15 belonged to St. George-in-the-East, or at the rate of 220 per 1,000 births.

9 belonged to Mile End Old Town, or at the rate of 300 per 1,000 births.

14 belonged to the Whitechapel District, or at the rate of 285 per 1,000 births.

Old Age.

244 deaths were due to Old Age. This corresponds to a death-rate of .78 per 1,000.

72 belonged to the Limehouse District, or at the rate of 1.22 per 1,000.

21 belonged to St. George's, or at the rate of .39 per 1,000.

106 belonged to Mile End, or at the rate of .89 per 1,000.

45 belonged to the Whitechapel District, or at the rate of .55 per 1,000

Table showing the ages of persons who died over 65 years of age and the

localities :—	Limehous District.	e . St. George's.		Whitechapel District.	Total.

Mile End Whitechapel District	 	 67	20	133
		382	67	503

Alcoholism.

The number of deaths due to Alcoholism and Cirrhosis of the Liver was 48, or exactly the same number as in the previous year.

- 14 belonged to the Limehouse District, or at the rate of .23 per 1,000.
- 7 belonged to St. George's, or at the rate of .13 per 1,000.
- 18 belonged to Mile End, or at the rate of .15 per 1,000.
 - 9 belonged to the Whitechapel District, or at the rate of .11 per 1,000.

The death-rate throughout the whole Borough was .15 per 1,000 of the population.

As I mentioned in a previous report, the death-rate from Alcoholism is gradually and steadily declining in the Borough, as is shown in the following table:—

In 1901 the death-rate was .33 per 1,000 of the population.

In 1902 the death-rate was .33 per 1,000 of the population.

In 1903 the death-rate was .25 per 1,000 of the population.

In 1904 the death-rate was .31 per 1,000 of the population.

In 1905 the death-rate was .21 per 1,000 of the population.

In 1906 the death-rate was .23 per 1,000 of the population.

In 1907 the death-rate was .15 per 1,000 of the population,

Cancer.

The deaths from Cancer numbered 223, or 10 more than in the previous year. This corresponds to a death-rate of .71 per 1,000 of the population.

- 52 belonged to the Limehouse District, or at the rate of .88 per 1,000.
- 25 belonged to St. George's, or at the rate of .47 per 1,000.
- 86 belonged to Mile End, or at the rate of .72 per 1,000.
- 60 belonged to the Whitechapel District, or at the rate of .74 per 1,000.

Homeless.

82 deaths of persons admitted from the street without any permanent address occurred in the Whitechapel Infirmary; 9 in the Mile End Infirmary; 3 in the St. George's Infirmary; 4 in the London Hospital; 5 occurred in the Poplar and Stepney Sick Asylum which were stated to belong to the Limehouse District. There were 20 deaths in His Majesty's Hospital (Dr. Barnado) which were credited to the Limehouse District, in addition to 10 deaths of persons unknown found drowned on the foreshore of our district.

There were 4 bodies of unknown persons found in the streets of the Whitechapel District and were included in the Whitechapel returns. Two similar deaths were credited to St. George's.

73 deaths occurred in various Lunatic Asylums of persons stated to have been removed from our Borough, but where no address could be given; 16 having been removed from the Limehouse District; 9 from St. George's; 10 from Mile End and 38 from the Whitechapel District.

There were, in addition, in the various public institutions 202 deaths of persons admitted from Common Lodging Houses in the Borough.

It must be remembered that there are 38 Common Lodging Houses in the Borough, with 6,900 beds, where 5,591 persons on an average sleep every night. In addition, there are 81 houses with 477 furnished rooms let out every night where 951 persons usually sleep.

Mortuary and Coroner's Court.

The number of bodies deposited in the Mortuary during the year was 640. Of these 563 were removed by the Coroner's order, 61 by the Police, 9 at the request of friends of the deceased and 7 on my instructions.

Four of the bodies were persons who had died from infectious diseases, and were placed in the infectious part of the Mortuary.

624 Inquests were held and 103 post mortem examinations were made during the year.

Canal Boats Acts 1877 and 1884.

Pursuant to the Third Section of the Canal Boats Act 1884, I have to report with regard to the execution of the above Acts and of the Regulations made thereunder, and as to the steps taken during the year to give effect to the provisions of the said Acts and Regulations, viz.:—

- 1. Canal Boats coming within the District are inspected by a Sanitary Inspector, who receives a sum of £10 per annum for the performance of this duty. His inspection is irrespective of the examination of Boats made prior to their Registration.
- 2. The number of Boats inspected in 1908 was 89, and the condition of the Boats and their occupants, as regards the matters dealt with in the Acts and Regulations was very good.
- 3. Infringements of the Acts and Regulations were discovered as follows, viz.:—
 - (a) Registration-Nil.
 - (b) Notification of change of Master-Nil.
 - (c) Certificates—One.
 - (d) Marking-Two.

- (e) Overcrowding-Nil.
- (f) Separation of Sexes-Nil.
- (g) Cleanliness-Nil.
- (h) Ventilation-Nil.
- (i) Painting-Two.
- (i) Provision of Water Cask-Nil.
- (k) Removal of Bilge Water-Nil.
- (l) Notification of Infectious Disease-Nil.
- (m) Admittance of Inspector-Nil.
- (n) Cabin top, not weatherproof-One.
- 4. No legal proceedings were taken.
- 5. In the case of infringements, notices were sent to the owners of the Boats requiring them to remedy the cause of complaint, and to forward to this Borough within a specified period a certificate signed by some duly appointed Inspector of Canal Boats, that the same had been duly done. Such certificates were afterwards received.
 - 6. No case of Infectious Disease occurred.
 - 7. No Boats were detained for Cleansing and Disinfection.
 - 8. The number of Boats on the Register on December 31st, 1908, was 45.
 - 9. No Boats were registered in 1908.

Glanders.

The Notification of Glanders Order, 1907, came into force on January 1st, 1908. Outbreaks of Glanders among horses are to be reported to the Medical Officer of Health by the County Council's Veterinary Inspectors. All the steps in connection with the slaughter of diseased animals, and the cleansing and disinfection of infected premises are to be carried out by, and under the supervision of these Inspectors.

During the year Glanders occurred in 42 stables, attacking 69 horses, 8 horses being attacked in one stable and 4 in another.

Unsound Food.

UNSOUND FRUIT AND VEGETABLES AT SPITALFIELDS MARKET.

It has been the practice of fruit and vegetable salesmen in Spitalfields Market to exhibit a notice that their goods were sold "subject to being sorted." During the summer months the quantity of unsound fruits in the parcels exposed for sale

seemed to be far above the normal. The fruit was usually shown in barrels, crates, and other packages from which the lids were removed, and only the top layer of fruit or vegetables could be seen. On one occasion, 110 barrels of pears were exposed for sale "subject to sorting." Of this number, there were only two barrels of sound pears amongst them. The following communication was sent to all fruit and vegetable salesmen in the market, drawing their attention to the provisions of the Public Health Act, with regard to unsound food:—

28th August, 1908.

The Public Health Committee of this Council have been informed that it is the practice amongst the salesmen of Spitalfields Market to offer fruit and vegetables for sale "subject to being sorted," and that this year the quantity of unsound fruit contained in the barrels and other packages appears to be abnormally high.

The Committee, therefore, desire to draw your attention to section 47 of the Public Health (London) Act, 1891, relating to unsound food, which (inter alia) provides that—

- " Any article, whether solid or liquid, intended for the food of man,
- ' and sold, or exposed for sale, or deposited in any place for the
- " purpose of sale or of preparation for sale,"

and which appears to the Medical Officer of Health or Sanitary Inspector

- "to be diseased, or unsound, or unwholesome, or unfit, for the food
- " of man"

is liable to be seized and condemned by a Police Magistrate, and legal proceedings may be instituted for the necessary recovery of heavy penalties against persons to whom any unsound articles of food belong, or on whose premises such articles are found.

The Committee are extremely anxious to stop any attempts to sell to the public unsound fruit or vegetables, which, if eaten, are likely to have serious effects, especially at this period of the year, and you are therefore asked to assist the Committee in their efforts, on behalf of the health of the people, by seeing that no unsound fruit or vegetables are disposed of for the purpose of human consumption.

Your attention is called to the fact that the Council are required by the Act mentioned, upon receipt of written notice, to remove any unsound food as if it were trade refuse. Such notices should be sent to the Public Health Offices, 43, White Horse Street, E.

This circular undoubtedly had a good effect, less unsound fruit being deposited for sale and a larger quantity being surrendered voluntary than before it was issued.

Slaughter House Inspection.

During the last three months of the year a more careful and systematic inspection of the slaughtering of animals in the Borough was inaugurated.

55 cows were killed in one slaughter-house. These animals had been taken directly from cow-sheds in London and the surrounding districts. The examination after slaughter showed that 37 were affected with localised Tuberculosis and two with diseased udders.

Disposal of Unsound Food.

The methods of disposal of unsound food stuffs were revised during the year, and are now as follows:—

- (a) Canned meats, such as beef, mutton and tongues, salmon and sardines, are taken to Duke Shore Wharf, where the tins are cut open with a large knife. The contents of the tins are thrown into a barge containing road sweepings. They are then taken in the barge and sold to farmers as land manure in the neighbourhood of Sittingbourne. There are also thrown into the barge condemned bananas, fish, fruit, vegetables, &c.
- (b) Canned goods of a liquid nature, such as milk and soups, are spiked at the Depot. The tins and their contents are then deposited in the barge containing house refuse. As a result of the spiking the contents gradually run out of the tins, and become mixed with the house refuse. This is then taken to the barge owner's wharf, and it remains there for some time on a heap to rot, the resulting material being used for trade purposes.
- (c) Condemned carcases of meat, and foodstuffs of a fairly dry nature are burnt at the Destructor Yard. If they consist of small quantities only they are destroyed in the incinerator at the Disinfecting Station.

Unsound Food Destroyed during the year.

Police Court proceedings were taken in the following:-

(1) On January 28th, Mr. Samuel Noah, of 1, South Grove, Mile End, was summoned for having deposited for the purpose of preparation for sale, 6 cases of dried egg albumen which was unfit for the food of man.

He was fined £50 Os. Od. with £5 5s. Od. costs.

(2) On March 26th, Mr. Barnet Kirschenbaum, of 2, Montague House, Old Montague Street, Whitechapel, was summoned for having 265 eggs which were unsound and exposed for sale for the food of man upon his premises on the 23rd February, 1908.

He was fined £5 0s. 0d. or in default one month's imprisonment.

(3) On December 9th, Mr. Joseph Millar, of 8, Bishop's Avenue, Upton Park, was summoned for exposing for sale 381 lbs. of tuberculous and dropsical beef and dropsical mutton on a Stall in Bow Common Lane.

He was fined £40 0s. 0d. with £5 5s. 0d. costs or two month's imprisonment.

Dairies and Milkshops in the Borough.

At the beginning of 1908, there were 1,037 premises registered for the sale of milk. A large number, undoubtedly, were quite unsuitable to store such a commodity as milk. I have on many occasions called the attention of the Borough Council to the absurd position in which the Public Health Authorities were placed under the Dairies and Cowsheds Orders. Anyone could apply to have his premises registered, and the Local Authorities had no power to refuse registration, even if the premises were very dirty, and quite unsuitable in every way. The only remedy—if it was a remedy at all—was to take proceedings against the occupier whenever the milk receptacles were discovered to be in a dirty condition. The Borough Council, on two or three occasions, asked the London County Council to introduce legislation to give power to Borough Councils to refuse registration, if the premises were in their opinion considered to be unsuitable.

The London County Council obtained these powers by the General Powers Act, 1908, which came into force on August 1st.

By this Act," notwithstanding anything contained in the Dairies, Cowsheds and Milkshops Order of 1885, or in any subsequent order, any Sanitary Authority may remove from the register kept by them of persons from time to time carrying on in their district the trade of cowkeepers, dairyman or purveyors of milk, or may refuse to enter upon such register, the name of any person carrying on, or proposing to carry on, the trade of a dairyman, or purveyor of milk upon premises, which are in the opinion of such Sanitary Authority for any reason unsuitable for the sale of milk therein.

Provided that for the purposes of this section, premises shall not be deemed unsuitable for the sale of milk therein on any ground inconsistent with the provisions or requirements of any order or regulation made under any enactments for the time being in force and applicable to such premises."

Any person who thinks himself aggrieved by the decision of the Sanitary Authority may appeal within 21 days from the date of such decision to a Court of Summary jurisdiction.

The Metropolitan Branch of the Society of Medical Officers of Health fully considered the matter contained in the above section with a view of formulating the conditions which would justify a Local Authority in refusing to register premises for the sale or storage of milk, or in removing such premises from the register, in order that the procedure in the Metropolis may be as uniform as possible.

(1) Structure of Premises.

The Branch was of opinion that particular attention should be paid to the structural condition of premises in respect of which application for registration has been made.

It was not thought necessary to specify minutely the structural conditions which should be required, as it was thought this should be decided by each Medical Officer of Health.

Generally the Branch was of opinion that no premises should be registered for the sale or storage of milk unless the following structural conditions are complied with:—

The lighting and ventilation should be sufficient.

No room which is capable of use as a sleeping room should communicate directly with the room or shop where which the milk is sold or stored.

The premises should be so constructed that every part of the interior is capable of being maintained in a satisfactory state of cleanliness.

There should be no inlet to any drain in the room or place in which the milk is sold or stored.

- (2) Efficient means of cleaning the milk vessels either by steam or hot water, should be available.
- (3) A plentiful supply of water should be provided, and where a storage cistern is necessary such cistern should be properly covered and ventilated, and so placed as to be readily accessible.
- (4) No premises should be registered where it is possible that milk may be stored in close proximity to any article capable of contaminating such milk; as for instance:—paraffin, fish, coal, vegetables, &c.
- (5) No premises should be registered if there is a manure pit or other offensive accumulation in close proximity.
- (6) Efficient means for the storage and removal of house or other refuse should be provided,

Any premises not complying with the above conditions might justly be removed from the register. Such action will probably result in a decrease in the number of chandlers' or general shops registered for the sale of milk, and in the interests of the public such decrease is desirable unless provision can be made for the storage of the milk in a suitable place other than in the shop itself, where there would be no risk of contamination.

It was also agreed that in the majority of general shops registered for the sale of milk, contamination cannot be avoided owing to the crowded condition of the articles sold; and it is undesirable that the storage or sale of milk should be allowed under these conditions.

A large number of premises in this district registered for the sale of milk consisted of a front parlour being converted into a shop. These small general shops were usually quite unsuitable and could not possibly be kept clean. The shop was generally so crowded that no attempt was ever made to dust the shelves or the articles on them. The floor was usually washed or scrubbed once a year only. In was generally considered satisfactory if the shop was swept occasionally and the floor afterwards sprinkled with sawdust.

A supply of hot water and other conveniences for keeping the milk utensils clean was generally most unsatisfactory.

In addition to the unsuitable condition of the premises, certain articles were sold in the shop which had a tendency to make it difficult to keep the premises clean.

In 420 registered milkshops paraffin was sold and in 54 vegetables were sold as well. In 284 shops paraffin, dutch herrings and smoked fish were sold.

41 milkshops sold paraffin and coal, 5 selling paraffin, fish, vegetables and coal.

Milk was sold in 393 shops in which dutch herrings in barrels and smoked fish were also sold.

Vegetables were sold in 63 milkshops either alone or with paraffin, dutch herrings and coal.

Coal, coal blocks or coke were sold in 42 milkshops.

In 63 milkshops, a bedroom communicated directly with the shop; in 47 of these paraffin was also sold. Dutch herrings and smoked fish were sold in 50 of them; vegetables in 16 and coal in 3.

Fish, such as plaice, soles, &c., was sold in one milkshop; old clothes and furniture in another, and another milkshop combined the sale of tobacco and wall papers.

32 shops though not selling any objectionable articles were so structurally defective as to be quite unsuitable to be on the register.

Registered Milkshops in the Borough, with a list of articles sold, which partly rendered them unsuitable for the sale of Milk:—

them unsuitable for the safe of Milk.

Butter and Margarine Act, 1907.

This Act came into force on January 1st, 1908.

It requires that all premises used for the blending or reworking of Butter shall be registered.

If it is suspected, or there is reason to believe, that butter is being blended or reworked in unregistered premises, it is requested to communicate with the Board of Agriculture, so that the Board may authorise one of their Officers to enter and inspect the premises.

Premises, which cannot be entered direct from the public street or road shall not be registered; but if registered as such prior to January 1st, 1907, then the application for registration should be forwarded to the Board of Agriculture, so that they may consider whether they should exercise in favour of the applicant the power conferred on them by the Act.

Any Officer of the Board of Agriculture, Local Government Board and any Officer specially authorised by the Local authority to procure samples under this Act, have power to enter any registered butter factory, and to inspect any process of manufacture, blending, reworking or treatment used therein. He may take samples for analysis of any butter, margarine, margarine cheese, milk blended butter, or of any article capable of being used in the manufacture, treatment, or adulteration of any such article.

Articles capable of being used to adulterate butter are prohibited from being kept in any butter factory. If any oil or fat capable of being so used is found, it shall be deemed to be intended to be so used, unless the contrary is proved.

The amount of water in factory butter and margarine must not exceed 16 per cent; unless the occupier of a factory or consignor proves to the satisfaction of the Court that the butter or margarine was not made, blended or reworked or treated in the factory.

It also limits the amount of water in milk blended butter to 24 per cent.

The Local Government Board has the power to make regulations prohibiting the use of certain preservatives.

If in the course of sampling under the Food & Drugs Act, it is found that butter is being retailed which contains more than 16 per cent. of water and which appears to have come from a butter factory outside the district, or to have been imported from abroad, the Board of Agriculture desire that the circumstances be reported to them.

The Act regulates the use of names in connection with margarine on wrappers, packages, labels, advertisements and invoices. Every such name must include the word Margarine, printed in the same colour and in type as large as the rest of the name. It is also required that the fancy or descriptive name shall be approved by the Board of Agriculture.

Milk blended butter shall be dealt with under such name or names as may be approved by the Board of Agriculture and under the conditions applicable to the sale or description of margarine, with the substitution of an approved name for the word "Margarine."

There must be printed on the wrapper in addition to the approved name such description of the article setting out the percentage of water or moisture contained therein.

A name shall not be approved by the Board of Agriculture for use in connection with Margarine, if it refers to, or is suggestive of butter, or anything connected with the dairy interests; nor shall such a name be approved as a name under which milk blended butter may be imported, or dealt with.

Under this Act it is illegal for any person to manufacture, sell, expose or offer for sale, or have in his possession for the purpose of sale, any mixture of butter with milk or cream containing more than 24 per cent. of water. In addition to taking proceedings against the vendor of milk blended butter with more than 24 per cent. of added water, the Board of Agriculture will take further samples at the factory where the article was produced.

A penalty not exceeding £20 is provided for the first offence and a fine not exceeding £50 for the second and not exceeding £100 for the third offence.

A new definition of Margarine is given in this Act which shall mean "Any article of food, whether mixed with butter or not, which resembles butter and is not milk blended butter."

The Council appointed the whole of the Inspectors as special officers under this Act and not merely those inspectors in whose districts premises which are liable to be registered are situate.

There are eight premises registered as butter factories, wholesale dealers and manufacturers of milk blended butter in the Borough, and five registered as wholesale dealers in Margarine.

Proceedings under the Butter and Margarine Act, 1907.

On February 14th, 1908. Mr. Lewis Foonk, of 80, White Horse Street, was summoned for selling margarine as butter.

He was fined £4, with 23s. costs.

On February 14th, 1908. Mr. Lewis Foonk, of 80, White Horse Street, was summoned for selling margarine as butter.

He was fined £4, with 23s. costs.

On April 24th, 1908. Mr. Marks Kahan, of 21, Bedford Street, was summoned for keeping an unregistered Butter Factory, and also for selling Butter containing 14 per cent. excess of water and 12 per cent. of foreign fat.

He was fined £10, with 25s. costs. The summons for adulteration was with-drawn.

Cleansing of Verminous Persons.

58 adults, 44 schoolboys and 20 schoolgirls were cleansed at the Shelter during the year, and their clothes disinfected.

In May last, the London County Council called the attention of the Borough Council to the provisions of the General Powers Act of 1907, which gives statutory power to the County Medical Officer or other authorised persons:—

- 1.—(a) To examine the person and clothing of school children to ascertain the existence of vermin or other filthy conditions.
- (b) To serve notice requiring that the person and clothing of a child shall be properly cleansed by the parent or guardian within 24 hours.
- (c) In default of compliance with such notice, to remove the child from school, and to cleanse the person and clothing of such child in suitable premises and with suitable appliances.
- 2.—(a) To examine persons in lodging houses suspected of being infested with vermin, or in a foul and dirty condition.
- (b) To require by notice, any such person to submit his person and clothing to be cleansed at specific suitable premises within 24 hours.
- (c) In default of compliance with the notice to remove such person and cleanse him.

The London County Council, in their communication, intimated that they believed that the Borough Council would agree that the arrangements made for giving effect to the Act should provide for dealing separately, not only with men and women, but also boys and girls, and they recognised that the children in most cases would belong to an entirely different class from that of the adults, and that, therefore, separate days or hours should be appointed for the reception of the children, or particular rooms should be allocated to them.

Before making any definite arrangements for putting the Act into force, the London County Council asked to be supplied with the fullest possible information as to the extent of the provision already existing and the facilities which the Borough Council are prepared to afford them in the matter.

The Act authorises the London County Council and Borough Council to enter into agreement

- (a) for carrying out the provisions mentioned above.
- (b) for the use by the County Council of any premises or appliances adapted for the purpose belonging to, or used by a Sanitary Authority.

On January 30th, 1907, the Public Health Committee presented to the Borough Council a report by a Sub-Committee upon the subject of the cleansing of school children infested with parasites. The Sub-Committee intimated that they were unable to advise the adoption of an extensive system of free baths for verminous children, but recommended that the Medical Officer of Health should continue to inspect and disinfect uncleanly rooms notified to him, and offer to families affected, the cleansing facilities possessed by the Borough Council.

At the shelter attached to the Council's mortuary in Horseferry Branch Road, there is one bath, which is used on occasions when the shelter is not occupied on account of infectious diseases, by persons applying for cleansing under the Cleansing of Persons Act, 1897, or persons whose rooms are being fumigated on account of verminous conditions under section 20 of the London County Council (General Powers) Act, 1904. This bath has also been used to a limited extent for the cleansing of verminous children from the elementary schools in the district.

The task of dealing effectually with the cleansing of verminous persons in the Borough of Stepney is not a light one, and will be realised when it is stated that the London County Council have knowledge of some 6,000 children in the Borough who require cleansing on account of their verminous condition. In addition to this, there are between 6,000 and 7,000 persons sleeping each night in common lodging houses in Stepney, and many of these are persons of extremely dirty habits.

It is quite futile to merely clean the bodies and clothing of persons, if their bedding and the homes from which they come, are infested with parasites.

The whole matter should be dealt with by the London County Council themselves on the grounds that they are the Education Authority and the Authority for licensing common lodging houses. Further, the cost should be borne as a charge upon the whole Metropolis, and not upon individual Boroughs, as in the latter event, Stepney would be called upon to bear an extremely heavy and inequitable share of the expense.

It was suggested by the Borough Council, that the London County Council could probably make some arrangements with the Boards of Guardians to utilise the baths and disinfecting machinery at the casual wards, for dealing with the children during the daytime, when the baths are not at present used, and with the adults from the common lodging houses at other times. The cost thus incurred might be charged to the Common Poor Fund. The adults and children undoubtedly should be dealt with at different times.

Other suggestions which have been made for dealing with the children are that the baths should be constructed at each school, or group of schools where necessary, or that special establishments should be provided and maintained by the London County Council.

It has also been suggested that part of the Borough Council's public baths might be used for the purpose, but the objections to this are obvious.

The Public Health Committee recommended the Council:-

- (a) To inform the London County Council that this Council are of opinion that the execution of the provisions of the London County Council (General Powers) Act, 1907, should be undertaken by the London County Council and the cost spread over the whole Metropolis.
- (b) To suggest to the London County Council that probably arrangements could be made with the several Boards of Guardians in the Borough for dealing with the adults and children at the casual wards, the costs being defrayed out of the Metropolitan Common Poor Fund.
- (c) To inform the London County Council that this Council has no facilities to offer in connection with the carrying into effect of the section of the Act referred to, as the bathing accommodation at the shelter attached to the mortuary is required in connection with infectious diseases and for other purposes connected with the sanitary administration of the Borough.

Public Analyst's Annual Report.

During the year 1908, 1,210 Samples were examined under the Sale of Food and Drugs Acts, consisting of:—779 Milks, 305 Butters, 2 Butters (Milk blended), 10 Margarines, 2 Lards, 4 Cocoas, 11 Coffees, 20 Mustards, 38 Peppers, 6 Oatmeals, 2 Ground Rices, 1 Ammoniated Tincture of Quinine, 6 Camphorated Oils, 2 Castor Oils, 4 Creams of Tartar, 3 Lime Waters, 3 Crushed Linseed, 1 Olive Oil, 2 Powdered Rhubarbs, 5 Milks of Sulphur, 3 Tinctures of Iodine, 1 Tincture of Iron.

190 Samples, or 15.7 per cent. were found to be adulterated. These consisted of:—128 Milks, 51 Butters, 1 Butter (Milk blended), 1 Margarine, 2 Cocoas, 1 Ammoniated Tincture of Quinine, 2 Lime Waters, 1 Powdered Rhubarb, 1 Milk of Sulphur, 1 Tincture of Iodine, 1 Tincture of Iron.

Proceedings were taken in 84 cases.

SUNDAY SAMPLES.

73 Samples were taken on 15 Sundays. Of these, 10 were adulterated, and 5 prosecutions resulted. The adulteration of Sunday Samples was 13.7 per cent. as compared with 15.8 per cent of week-day Samples.

DRUGS.

During the year Samples were purchased from most of the Chemist shops in the district, 31 Samples in all, and of these 7 were found to be adulterated, and 1 prosecution resulted. The adulteration of Drugs was 22.6 per cent. as compared with 15.3 per cent. for the Food Samples.

The total fines secured on the prosecutions amounted to £301 4s. 0d., and £71 11s. 0d. was allowed in costs.

The average fine secured on the prosecutions was £3 11s. $8\frac{1}{2}$ d.

Compared with previous years the adulteration, &c., was as follows:--

YEAR.	Samples Examined.	Number Adulterated.	Number of Prosecutions.	per cent. of Adulteration.	per cent. of Prosecutions.		Amount secured in Fines.			Average Fines.	
1901	693	107	66	15.4	9.5	£ 135	s. 17	d. 6	£	s. 1	d. 2

ADDITIONAL ANALYST'S REPORT.

During the year 1908, 126 Samples were examined in addition to those examined under the Sale of Food and Drugs Acts.

They consisted of :-

FOR THE PUBLIC HEALTH DEPARTMENT-

- 1 Sample of Milk.
- 18 Samples of Butter.
 - 6 Samples of Margarine.
- 31 Samples of Canned Goods.
 - 1 Sample of Water.
 - 1 Sample of Butter Colouring.
 - 4 Samples of Dried Fruits.
 - 1 Sample of Carbolic Powder.
 - 1 Sulphur Candle.
 - 1 Sample of Beer,
 - 1 Sample of Tea.

FOR THE WORKS DEPARTMENT-

- 15 Samples of Carbolic Fluid.
 - 4 Samples of Carbolic Powder.
 - 1 Sample of Sewer Deposit.

FOR THE ELECTRICAL DEPARTMENT-

2 Samples of Lime.

FOR THE GENERAL PUBLIC-

- 28 Samples of Milk.
 - 3 Samples of Butter.
 - 3 Samples of Rum.
 - 1 Sample of Dessicated Fish.
 - 1 Sample of Insect Powder.
 - 2 Samples of Cheese.

Inhabited House Duty.

During the year, 15 applications were received for certificates under the Revenue Act, 1953, for the purpose of securing remission or reduction of inhabited house duty. These referred to 116 tenements, of which 78 were satisfactory and 38 unsatisfactory. Certificates were refused for the latter.

General Sanitary Work.

In the Sanitary Inspectors' Report Table will be found the amount of work carried out by each Inspector during the year, together with its nature.

29,693 houses were inspected, 7,003 being the result of house to house visitation.

12,477 intimation notices were served for the abatement of various nuisances, and it was necessary to serve 6,970 statutory notices before these defects were remedied.

68,774 re-visits were made to supervise the abatement of the nuisances complained of.

Police Court proceedings were taken in 41 cases where the statutory notices were disregarded. This does not include proceedings under the Food and Drugs Acts.

7,326 drains were tested by smoke, and 2,414 were either constructed or re-constructed, cleansed or repaired, and 901 were trapped.

259 new soil pipes were fixed and ventilated; 1,674 new closet pans and traps were fixed, and 3,929 closets were either cleansed and repaired, or provided with additional light and ventilation.

3,181 yards, forecourts and areas were paved or repaired.

Notices were served to provide 1,914 sanitary dust receptacles and 23 manure receptacles were provided; 892 offensive accumulations were removed from the rear of dwelling houses.

396 houses were ventilated underneath the lower floor.

78 underground rooms, which were illegally occupied, were discontinued from being used as such.

119 notices were served for the abatement of smoke nuisances.

346 bakehouses were visited, and 295 cleansing notices were served.

Overcrowding.—13,686 inspections were specially made for the purpose of detecting overcrowding, 585 living rooms were found to be overcrowded. The

nuisance was abated in 432 cases without its being necessary to serve statutory notices. Police Court proceedings were taken in one case only.

Verminous Rooms.—928 rooms were dealt with, due to the presence of vermin.

Police Court proceedings under the Public Health (London) Act, 1891.

On January 10th, 1908. Mr. William Park, of 332, Wick Road, South Hackney, the owner of 10, Market Street, was summoned for not supplying a dust receptacle. The receptacle being supplied before the summons was heard, the defendant was ordered to pay 23s.

On January 13th. Mr. Tobin, of 128, Mile End Road, was summoned for failing to comply with the Magistrate's order to remedy a defective drain at 3, Brunton Place.

He was fined £3, with 23s. costs.

On January 24th. Summonses were taken out by the Owner of Booth Street Buildings to show why the Closing Orders made on Nos. 1, 2, 3, 4, 5, 6, 7, 8, and 9, Blocks, Booth Street Buildings, and 32, Booth Street, Spitalfields, should not be cancelled. The sanitary work having been carried out, the orders were cancelled.

On February 14th. Mr. Caro, of 80, Cannon Street Road, was summoned for failing to abate a nuisance at 8, Elsa Street, arising from the dirty and dilapidated condition of the water-closet and washhouse.

He was fined 40s., with 23s. costs.

On February 28th. Mr. William Craze, of 2, Watney Passage, the occupier of 27, Upper Chapman Street, was summoned for failing to abate a nuisance caused by smoke escaping from the herring curing dee in the yard.

An order was made to abate the nuisance within seven days, with 25s. costs.

On February 28th. Messrs. Newell and Hamlyn, of 478, New Cross Road, Deptford, the owners of 3, Wapping Wall, were summoned for not complying with a notice of the Council to remedy the defective condition of the water-closet, yard paving, etc.

The Magistrate made an order to abate the nuisance within seven days, with 25s. costs.

On March 13th. Mr. Cohen, of 25, Fournier Street, was summoned for failing to comply with a Council's notice to abate a nuisance at 28, Fairclough Street, due to the defective condition of the roof, etc.

The work having been done at the hearing of the summons, the case was withdrawn, on payment of £2 4s. costs.

On March 27th. The owner of 52a, Bancroft Road, was summoned for non-compliance with the Council's notice to abate a nuisance caused by the defective condition of the drain at 52a, Bancroft Road.

An order was made for the work to be done within 28 days, with 25s. costs.

On April 10th. Mr. F. K. Abrahamsen, of 152a, Commercial Road, was summoned for letting an underground room at 7, Christian Street.

The summons was dismissed, because it was proved to the satisfaction of the Magistrate that the room was let with other rooms, which were not underground.

On April 10th. Mr. Isaac Davis, of 62, High Street, Whitechapel, was summoned for failing to abate a nuisance due to the dirty and damp condition of the walls and ceilings at 12, Tenter Street South.

The work having been done at the hearing of the summons, the case was withdrawn on payment of £1 3s. costs.

On April 10th. Mr. Isaac Davis, of 62, High Street, Whitechapel, was summoned for failing to abate a nuisance due to the dirty condition of the walls and ceilings at 13, Tenter Street South.

The work having been done at the hearing of the summons, the case was withdrawn upon payment of £1 3s. costs.

On April 16th. Mr. William Clark, of 11, New Gravel Lane, was summoned for not complying with the Council's orders to abate a nuisance arising from the drain and yard paving being defective at 12, Chandler Street.

The work being in hand at the time of the hearing of the summons an order was made to complete the work in 10 days, with 25s. costs.

On May 6th. Mr. Levy Wolmark, of 7, Tredegar Square, was summoned for failing to comply with Council's notice to provide suitable w.c. accommodation at 83, Cannon Street Road.

The alterations having been done at the hearing of the summons, he was ordered to pay 23s. costs.

On May 12th. The owner of 1, Britten's Court, Prince's Square, was summoned for failing to abate a nuisance arising from the defective condition of the drain.

An order was made to abate the nuisance within 14 days, with 25s. costs.

On May 12th. The owner of 134, Cable Street, was summoned for failing to abate a nuisance arising from the drain being stopped, and the yard paving being defective.

The work having been done by the time of the hearing of the summons

the case was withdrawn, on payment of 23s. costs.

On May 13th. Mr. Isaac Barnett, of 81, Hanbury Street, the owner of 15, Gray Street, was summoned for failing to abate a nuisance arising from a defective drain.

Part of the drainage system was found to be a sewer, and the summons was, therefore, adjourned sine die.

On May 19th. The necessary work having been completed to our satisfaction at 93, Maroon Street, the closing order was rescinded.

On May 20th. Mr. W. F. Laing, of 148, Whitechapel Road, was summoned for failing to comply with Council's notice to abate a nuisance at 21, Pinchin Street, due to the defective condition of the roof, etc.

The work having been done at the hearing of the summons the defendant was ordered by the Magistrate, to pay 23s. costs.

On May 20th. Mr. W. F. Laing, of 148, Whitechapel Road, was summoned for failing to comply with Council's notice to abate a nuisance at 22, Stutfield Street, due to the defective condition of the roof, etc.

The work having been done at the time of the hearing of the summons the defendant was ordered, by the Magistrate, to pay 23s. costs.

On June 3rd. Mr. Arthur D. Sturley, of 130, Strand, W.C., was summoned for non-compliance with the Council's notice to abate the nuisance caused by the defective condition of the drain at 50, Stepney Green.

The Magistrate made an order for the necessary work to be completed

within 28 days, with £2 6s. costs.

On June 29th. The owner of 167, Cannon Street Road, was summoned for failing to comply with Council's notice to cleanse the drain.

An order was made to complete the work in three days, with 27s. costs.

On July 3rd. Messrs. Frost Bros., of 340 and 342, Commercial Road, were summoned for allowing dense black smoke to issue from their shaft.

They were fined £2, with 23s. costs.

On July 13th. Mr. Specterman, of 320, Commercial Road, was summoned for failing to abate a nuisance at 3, Barnet Street, arising from the damp condition of the walls of the washhouse, and the defective state of the paving.

He was fined £4, with 23s. costs.

On July 13th. Mr. Specterman, of 320, Commercial Road, was summoned for failing to abate a nuisance at 35, Kinder Street, arising from the defective condition of the yard paving, and the roof and eaves gutter of the back addition.

He was fined £2, with 23s. costs.

On July 20th. Mr. Barnett, of 114, Brondesbury Villas, Kilburn, was summoned for non-compliance with Council's notice to cleanse and repair 46, St. Dunstan's Road.

The Magistrate made an order to close the premises, with 23s. costs.

On July 20th. Messrs. Harris, Chetham and Cohen, of 25, Finsbury Square, were summoned for failing to comply with Council's notice to abate a nuisance arising from the defective paving and draining of the laundry floor of 99, Cable Street.

They were fined 40s., with 44s. costs.

On September 18th. Messrs. C. C. and T. Moore, of 33, Mile End Road, were summoned for not complying with a Council's notice to abate nuisances due to the dilapidated conditions generally of 1, Lavender Place, Pennington Street.

The Magistrate granted an order to close the premises, with 23s. costs.

On October 13th. Mrs. Rosa Specterman, of 320, Commercial Road, was summoned for failing to comply with Council's notice to repair the defective roof of 165, Cannon Street Road.

The work having been done at the hearing of the summons, the Magistrate ordered the defendant to pay £2 4s. costs.

On October 19th. Mrs. Israel, of 49, Romford Road, was summoned for not complying with the Council's notice to render weatherproof the roof of 45, Repton Street, and to provide a supply of water for sanitary and domestic purposes.

The defendant was fined 10s., with 23s. costs

On November 10th. Mr. Simon Busener, of 4, White's Row, was summoned for allowing his premises to be overcrowded.

He was fined £1 14s., with £1 3s. costs

On November 17th. Mr. Robert Barnett, of 81, Hanbury Street, was summoned for failing to comply with Council's notice to supply 105, Grove Street, with a sufficient and proper water supply.

A closing order was made, with 27s. costs.

On December 2nd. Mr. John Curran, of "Ventnor House," Myatt's Park, Camberwell, was summoned for non-compliance with Council's notice served to remedy the defective drain at 12, Waley Street.

The work having been done at the hearing of the summons the case was

withdrawn, by order of the Committee.

On December 4th. Mr. Myer List, of 91, Downs Road, Hackney, was summoned for failing to comply with the Council's notice to cleanse the floors, stairs, and yard of Berney's Buildings, Burslem Street.

An order was made prohibiting the recurrence of the nuisance, with 25s.

costs.

On December 7th. Mr. James Webster, of 64, Chancery Lane, W.C., was summoned for not complying with the Council's notice to provide a sufficient water supply at 12, Old Gravel Lane

Part of the work having been done at the hearing of the summons he was fined 10s., with 25s. costs., and an order was made to complete the work in

seven days.

On December 18th. Mr. James Pealing, the owner of 31a, Smith Street, was summoned for failing to provide a proper water supply to the premises. A closing order was granted by the Magistrate, with 25s. costs.

Police Court Proceedings under the Metropolis Local Management Act.

On January 10th, 1908. Mr. Evan Lloyd, of 25, Norfolk Street, Mile End, was summoned for not keeping the drains of 18, Fairclough Street in good order.

The work having been done before the hearing, the summons was withdrawn, on payment of £2 4s. costs.

On March 3rd. Mr. G. P. Light, of 4, Dixon Street, Limehouse, was summoned for failing to submit plans for the drainage work which was executed at 151, St. George Street.

He was fined £1, with 23s. costs.

On March 6th. Mr. J. Donn, of 25, Princelet Street, was summoned for keeping the drain of 108, Back Church Lane in bad order and condition.

He was fined 40s., with 23s. costs.

On March 6th. Mr. J. Donn, of 25, Princelet Street, was summoned for keeping the drain of 114, Back Church Lane in bad order and condition.

He was fined 40s., with 23s. costs.

On March 6th. Mr. J. Donn, of 25, Princelet Street, was summoned for keeping the drain of 97, Christian Street in bad order and condition.

He was fined 20s. and 23s. costs.

On July 13th. Mrs. Emma Simmons, of 45, Ascalon Street, Battersea, was summoned for conveying fish offal in unsuitable and uncovered receptacles in New Road, Whitechapel.

She was fined 40s., with 23s. costs.

On July 14th. Messrs. Hind and Sons, of 122, Cannon Street Road, were summoned for failing to comply with the Council's notice to abate a nuisance due to the defective condition of the drain of 29, James Street.

They were fined 40s., with 23s. costs.

On July 20th. Messrs. Harris, Chetham and Cohen, of 25, Finsbury Square, were summoned for failing to comply with the Council's notice to abate a nuisance arising from the defective condition of the drain at 99, Cable Street.

The defendants were fined 40s. and 23s. costs.

On September 18th. Mr. Charles Wilson, of 277, Cable Street, was summoned for failing to deposit plans of drains which he had re-constructed at 29, Burslem Street.

The plans having been submitted before the hearing of the summons the case was withdrawn, on payment of £2 4s. costs.

On November 27th. Messrs. Trafford and Carter, of 84, Mile End Road, were summoned for failing to comply with Council's notice to keep the drains 26 and 26a, Wicker Street in good order and condition.

FACTORIES AND WORKSHOPS.

The total number of workshops on the Register was 2,810, but this does not include factories, workplaces and outworkers' premises.

4,445 inspections revealed defects which required the service of 815 written notices, 26 of these referred to factories, 771 to workshops, including workshop laundries, and 18 to workplaces other than outworkers' premises.

Cleanliness.—568 notices were served to properly cleanse workshops.

Ventilation.—The ventilation of 59 workshops was improved.

Overcrowding. - Overcrowding was abated in 32 workshops.

Sanitary Accommodation.—The sanitary accommodation was improved in 82 workshops by providing additional and suitable water closets.

Outworkers' Premises.—5,455 inspections were made to outworkers' premises during the year. 361 premises were found to be insanitary. Notifiable diseases occurred in 22 outworkers' premises during the year.

I beg to express my indebtedness to the Sanitary Inspectors and Clerical Staff for the manner in which they have assisted me in carrying out the duties of my office.

I have the honour to be,

MR. MAYOR AND GENTLEMEN,

Your obedient Servant,

D. L. THOMAS.

Medical Officer of Health and Public Analyst.

Public Health Offices,

^{*} Rates in Columns 4, 8, and 13 calculated per 1,000 of estimated population.

Note.—The deaths to be included in Column 7 of this table are the whole of those registered during the year as having actually occurred within the district or division. The deaths included in Column 12 are the number in Column 7, corrected by the subtraction of the number in Column 10 and the addition of the number in Column 11.

By the term "Non-residents" is meant persons brought into the district on account of sickness or infirmity, and dying in public institutions there; and by the term "Residents" is meant persons who have been taken out of the district on account of sickness or infirmity, and have died in public institutions elsewhere.

The "Public institutions" to be taken into account for the purposes of these Tables are those into which persons are habitually received on account of sickness or infirmity, such as hospitals, workhouses, and lunatic asylums. A list of the Institutions in respect of the deaths in which corrections have been made are given on the back of this Table.

I. Institutions within the District receiving sick and infirm persons from outside the District.	II. Institutions outside the District receiving sick and infirm persons from the District.	III. Other Institutions, the deaths in which have been distributed among the several localities in the District.
London Hospital. East London Hospital for Children. Jewish Home. Mothers' Lying-in Home. Mile End Infirmary. Whitechapel Infirmary. St. George's Infirmary.	Stepney Workhouse. Poplar and Stepney Sick Asylum	The Fever Hospitals. The Lunatic Asylums, &c., see pages 10 & 11.

Is the Union Workhouse within the District? Three within and one without.
