REPORT OF FIFTH ANNUAL REPORT OF THE MEDICAL OFFICER OF HEALTH.

OF THE MEDICAL OFFICER OF HEALTH

(EXTRACT FROM

THE VESTRY REPORT

FOR MARCH, 1860 - MARCH, 1861)

PARISH OF ST. MARY ABBOTTS, KENSINGTON.

SANITARY DEPARTMENT, VESTRY HALL,
KENSINGTON.

GENTLEMEN,

I beg to lay before you a short abstract of the Mortality which has taken place in the Parish during the year 1860, arranged according to the ages and causes of death, and an account of the proceedings taken for the removal and abatement of Nuisances, and for the general improvement of the sanitary condition of the parish.

The Mortality Tables are made up from the first week in January, 1860, to the first week in January, 1861; but the proceedings for the abatement of nuisances extend from March, 1860, to March, 1861.

I am glad to be able, through the kindness of Mr. Cornell, the Superintendent Registrar, to give you the results of the Census taken in April last: these Returns are not yet issued from the Registrar-General's Office; but I am certain they may be relied on for their accuracy.

REPORT OF THE MEDICAL OFFICER OF HEALTH.

TO THE VESTRY

OF THE

PARISH OF ST. MARY ABBOTTS, KENSINGTON.

SANITARY DEPARTMENT, VESTRY HALL,
KENSINGTON.

GENTLEMEN,

I beg to lay before you a short abstract of the Mortality which has taken place in the Parish during the year 1860, arranged according to the ages and causes of death, and an account of the proceedings taken for the removal and abatement of Nuisances, and for the general improvement of the sanitary condition of the parish.

The Mortality Tables are made up from the first week in January, 1860, to the first week in January, 1861; but the proceedings for the abatement of nuisances extend from March, 1860, to March, 1861.

I am glad to be able, through the kindness of Mr. Cornell, the Superintendent Register, to give you the results of the Census taken in April last: these Returns are not yet issued from the Registrar-General's Office; but I am certain they may be relied on for their accuracy.

	Inhabited Houses.	Uninhabited Houses.	Building.	Males.	Females.	Total.
Kensington Town	6,908	423	196	20,846	30,762	51,608
St. Mary Abbots' Workhouse	127	168	295
	6,908	423	196	20,973	30,930	51,903
Brompton	2,578	98	158	7,212	10,982	18,194
Total	9,486	521	354	28,185	41,912	70,097

Our total population is therefore 70,097, viz.:—

	Brompton.	Kensington.	Total.
In 1861	18,194	51,903	70,097
1851	14,870	29,183	44,053
Decennial Increase ..	3,324	22,720	26,044

The total number of deaths registered during the year, is—

	Males.	Females.	Total.
Brompton	226	257	483
Kensington.. ..	458	543	1,001
Total	684	800	1,480

Of this number, 80 males and 79 females (total 159), died in the Hospital for Consumption, only 7 of whom were inhabitants of the parish; and 3 males and 13 females (total 16) died, in the Cancer Hospital, only 1 being a parishioner: 1,317 parishioners therefore died in the parish during the twelve months, being 97 more deaths than occurred during the year 1859, and 219 more than in 1858. This gives a rate of mortality of 18.78 per 1,000 per annum; the average of London generally being for the year 21.93. About 127 persons died in excess of what is termed a healthy ratio, viz., 17 per 1,000.

The mortality from zymotic diseases is shown by the following Table, and the deaths are compared with those of former years :—

		Small-pox.	Measles.	Scarlatina.	Hooping Cough.	Diarrhoea.	Fever.	Total.
1860—1st Quarter	..	2	6	23	16	1	6	54
2nd	..	8	8	26	13	21	5	81
3rd	..	3	..	15	9	3	6	36
4th	..	5	15	22	18	10	8	78
Total, 1860	..	18	29	86	56	35	25	249
Of these there died—								
In Brompton	..	2	7	8	14	1	7	39
Kensington	..	16	22	78	42	34	18	210
Total, 1859	..	11	42	53	11	72	17	196
„ 1858	..	2	24	49	64	30	38	207
„ 1857	15	25	37	83	20	181

The total mortality from this class of diseases, is at the rate of 2·5 per 1,000 of those living in Brompton, and 4·004 of those living in the Kensington district; and shows a percentage 8·07 of all the deaths in Brompton, and 20·9 in Kensington, and for the whole parish a percentage of 16·6.

The number of deaths recorded from small-pox is very large when compared with former years, viz. (18); but you will remember that, at an early period of the year, London underwent a severe visitation from this disease; and had not very active measures been taken by you in causing all schools and homes of the poor where there were children to be thoroughly examined, to ascertain whether vaccination had been performed or not, the mortality, I doubt not, would have been very much greater.

Scarlatina was also exceedingly fatal, especially in the northern division of the parish, whereas the mortality from diarrhoea and measles was comparatively small.

From diseases of the lungs there died—

	Phthisis.	Bronchitis.	Pneumonia.	Diseased Lungs, &c.
In the 1st Quarter ..	61	54	23	3
2nd „ ..	80	23	13	4
3rd „ ..	75	16	8	4
4th „ ..	80	43	18	7
Total	296	136	67	18

Therefore 517 deaths from all lung diseases were registered during the year. This is an increase of 81 over the year 1859 (436), and of 97 over 1856. The percentage this bears to the total numbers of deaths is 34·8.

The number of infants who died under 5 years of age, amounts to 585, or 39·4 per cent.; of the total deaths in 1859, the percentage was 36·8, and in 1858, over 42.

The number of deaths in the Workhouse was 33 males, 32 females. Total, 65.

The births registered, amount to 2,016.

	Males.	Females.	Total.
Brompton	214	196	410
Kensington	838	768	1,606
Total	1,052	964	2,016

This gives a gain to the parish of 699 over the number of deaths.

It is worthy of notice, that all the increase to the population by births, has again taken place in the Kensington district; this, I believe, is mainly owing to the fact that the registration of death is compulsory, of birth voluntary.

The waters supplied by the three Companies, viz., Grand Junction, West Middlesex, and Chelsea, have been of good quality, and vastly superior for drinking purposes to any to be obtained from the wells in the parish, excepting Artesian. The well waters are all foul, and nearly all of them have in solution organic matter derived from sewers or cess-pools.

I append a comparison of the average results obtained in the analysis of the waters supplied by the three companies, prior to their source of supply being removed from tidal influence, and during the last year.

		Grains of Organic Matter per Gallon.		
		1851.	1856.	1860.*
Grand Junction Water Company	..	3·07	2·03	1·74
West Middlesex	ditto ..	2·75	1·96	1·68
Chelsea	ditto ..	2·38	2·38	1·67

The Table showing the mortality of persons, according to their various occupations, does not show sufficient difference from that of last year, to need any remark.

The following is the list of Nuisances reported to the Works and Sanitary Committee, the orders passed thereon, and the result of the remedial measures adopted for their removal :—

PROCEEDINGS UNDER NUISANCE REMOVAL ACT,

From March 25th, 1860, to March 25th, 1861.

Number of complaints made	391
Notices served	346
Summonses heard at Police Court..	43
Magistrates' Orders made	31
Number of rooms cleansed and whitewashed	256

* Obtained from twelve Analyses, performed by Dr. R. D. Thompson.

Staircases and passages cleansed and whitewashed	174
Drains cleansed and repaired	46
Drains cleansed only..	39
Drains and sinks trapped	53
New pipe drains made	21
New drain pipes laid down under Inspector's Supervision	feet	724	
Privies panned and trapped	41
Privies cleansed only..	32
Privies supplied with water..	39
New privies erected	3
Dilapidated privies abolished	4
New cesspools made where there are no sewers	5
Cesspools emptied and abolished	27
Cesspools emptied only	13
Houses supplied with water	19
New cisterns or butts supplied	17
Large accumulations of dung, stagnant water, vegetable, or other offensive matter removed	93
Swine removed	43
New dust bins or ash pits erected	27
Yards repaved or repaired	7
Nuisances removed at the request of Inspector, by letter to owners			15
New dung pits erected	2
Ventilation of houses improved	7
Cases in which no Order for drainage could be made for want of sewers	8
Cases no Order made	15
Cases in which Inspector could not interfere	11
Cases referred to Surveyor	5
Unnecessary complaints	11
Offensive cab stand pitched and drained	1
Licensed slaughter houses under continual inspection	49
Cleansing, whitewashing, and trapping drains to do.	27
Summoned for killing in unlicensed slaughter house	1

G. LOVETT, *Inspector.*

The food supplied to the inhabitants has been, on the whole, of a good and wholesome character, though several Purveyors have been cautioned. I am happy to say no seizures of bad food has taken place.

Forty-nine Slaughter Houses were licensed by the Magistrates; these are under the constant supervision of Mr. Lovett, the Inspector; cow-sheds have also been frequently visited; and the localities inhabited by the poor periodically inspected.

I remain,

GENTLEMEN,

Your faithful Servant,

FRANCIS GODRICH,

Medical Officer of Health.

DEATHS REGISTERED IN THE PARISH OF KENSINGTON DURING THE FIRST QUARTER OF 1860.
