## Early in 1913 . . . .

the year before the Great War, 'Bisurated' Magnesia, a convenient and effective treatment for stomach disorders, was perfected.

Many changes have taken place since that time, but the use of 'Bisurated' Magnesia, which is now issued in tablet form, has continued to increase year by year, and at the present time many millions of 'Bisurated' Magnesia tablets are made and used.

'Bisurated' Magnesia Tablets contain Bismuth subcarbonate, Magnesium carbonate and Sodium bicarbonate in suitable proportions, and give prompt relief in hyperacid conditions of the stomach. *Sample on request.*
