Vaccination Officer—

Mr. H. J. ROYNON, 664, High Road.

Coroner's Officer—

Police-Sergt. V. BONN, Police Station, High Road.

INTRODUCTION

TO THE

ANNUAL REPORT of the MEDICAL OFFICER OF HEALTH.

Health Department,

Town Hall,

Tottenham.

April, 1927.

To the Chairman and other Members of
the Tottenham Urban District Council.

Ladies and Gentlemen,

The Report of 1926 is mainly statistical. The previous Report was of a comprehensive character, such as will be required once in five years only.

Reference therefore should be made to the larger (1925) Report for details of the Health Services.

My thanks are due to the Health Committee for their support, to my Colleagues for their co-operation and to my Staff for their loyalty.

I am, Ladies and Gentlemen,

Your obedient Servant,

David C. Kirkhope.

SOCIAL CONDITIONS OF THE AREA.

The social conditions of the area have not altered during the past year.

Population.

The 1921 census population was returned by the Registrar-General at 146,711.

The figure furnished by the Treasurer for 1926 is 159,500, and it is upon the Treasurer's estimate that the vital statistics have been calculated, as in previous years.

The declension in the Birth Rate has the effect of causing the population as a whole to become more aged. The meaning of this expression is seen by a comparison of the percentage Census figures for 1911 and 1921. It will be seen by reference to the accompanying Table that the percentages of persons over the age of 35 in 1921 exceed those in 1911, and that the percentages of persons under that age, with the exception of the 10 to 20 years' group, were materially reduced at the last Census.

(Faint signature and text at the bottom of the page)

Censuses 1911 and 1921.—Percentage of each sex in quinquennial age groups.

Age Group.	1911.		1921.

BIRTHS.

Births Registered:—Males	1,309
Females	1,292
Total	<u>2,601</u>
Including Illegitimate Births:—Male	53
Female	39
Total	<u>92</u>
Births occurring in the district	2,177
Births of Tottenham residents occurring outside the district	424
Total	<u>2,601</u>

Birth Rate, 16.3 per 1,000.

Births notified under the Notification of Births Acts:—

In district by Doctors	617
,, ,, Midwives	1,248
,, ,, Parents and other persons	233
Notified from outside Institutions	487
Total	<u>2,585</u>
Advised by Registrar	30
Total	<u>2,615</u>
Less Still Births	62
Total	<u>2,553</u>

DEATHS.

The total number of deaths registered in Tottenham was	1,090
Of these, the number of non-residents was	222
Deaths of residents registered in the district	868
Deaths of residents registered outside the district	677
	<hr/> 1,545
Deaths of residents under 1 year occurring in district	97
Deaths of residents under 1 year occurring outside district.. .. .	50
Total deaths of Tottenham infants	<hr/> 147

These deaths are distributed in age groups as follows:—

Deaths under 1 year	147
Deaths from 1 to 5 years	83
Deaths from 5 to 15 years	47
Deaths from 15 to 25 years	81
Deaths from 25 to 65 years	579
Deaths 65 and upwards	608
	<hr/> 1,545

The excess of births over deaths is 1,056.

The death rate equalled 9·6 per 1,000 of the population.

The death occurred, in the North Middlesex Hospital, on Christmas Day, of our oldest resident—aged 104 years.

Table showing the Population, Birth and Death Rates, in Wards, during 1926.

Ward.	No. of Births.	No. of Deaths.	Population.	General Birth-rate.	General Death-rate.	No. of Deaths Under 1 Year.	Infant Mortality per 1,000 of Populat'on.	Infant Mortality per 1,000 Births.

NOTES TO (M. of H.) TABLE I.

The nett rate is the true one, as it represents the deaths of all Tottenham people, whether they took place within or without the Parish, and is the rate adopted by the Registrar-General, non-residents being always allocated to the district to which they belong.

By the term "Non-Residents," is meant persons brought into the district on account of illness, and dying there; and by the term "Residents," is meant persons who have been taken out of the district on account of illness, and have died elsewhere.

1.—Institutions within the district receiving sick and infirm persons from outside the district:—

Prince of Wales's General Hospital, The Green.

Metropolitan Asylums Board (North-Eastern) Hospital, St. Ann's Road.

Jewish Home and Hospital for Incurables, High Road.

Nursing Home, Bruce Grove.

2.—Institutions outside the District receiving sick and infirm persons from the District:—

North Middlesex Hospital, Edmonton.

Enfield and Edmonton Joint Hospital, Enfield.

Clare Hall Sanatorium, South Mimms.

Middlesex County Hospital, Isleworth.

Middlesex County Sanatorium, Harefield.

Metropolitan Asylums Board Hospitals (other than the North Eastern).

Heatherwood Hospital, Ascot.

Royal Sea Bathing Hospital, Margate.

3.—Other Institutions, the deaths in which have been distributed among the several localities in the District:—

Hospitals, etc.:—

Guys', Southwark.

Middlesex, St. Marylebone.

St. Bartholomew's, West Smithfield.

Queen's Hospital for Children, Hackney Road.

University College, Gower Street.

London Temperance, Hampstead Road.

Hospital for Sick Children, Great Ormond Street.

City of London Maternity, City Road.
 County Mental, Devizes.
 German Hospital, Hackney.
 Manor House Hospital, Golders Green.
 Bancroft Lodge, Stepney.
 Darenth Training Colony, Dartford.
 Chest Hospital, Bethnal Green.
 Isolation Hospital, Bishop's Stortford.
 Colney Hatch Mental, Friern Barnet.
 London Fever Hospital, Liverpool Road.
 Children's Hospital, Paddington.
 London Jewish, Stepney Green.
 King's College, Denmark Hill.
 The Mothers', Clapton.
 London, Whitechapel.
 Westminster, Broad Sanctuary.
 Royal Chest, City Road.
 St. Columbus, Hampstead.
 Bethlem Royal, Southwark.
 Springfield Hospital, Wandsworth.
 Royal Free, Gray's Inn Road.
 Metropolitan, Kingsland Road.
 Hampstead General, Hampstead.
 Royal Northern, Holloway.
 Leavesden, Watford.
 Napsbury, St. Albans.
 St. Anthony's, Cheam.
 St. Joseph's Hospice, Hackney.
 Seamen's Hospital, Greenwich.
 Mental Hospital, Brookwood.
 Queen's, Chislehurst.
 West End Hospital, Gloucester Gate.
 St. Peter's, Westminster.
 Passmore Edwards Cottage, Wood Green.
 National, Queen Square, W.C.1.
 Mildmay Memorial, Newington Green.
 Elizabeth Garrett Anderson, St. Pancras.
 Hospital of St. John and St. Elizabeth, St. Marylebone.
 National, for Diseases of the Heart, St. Marylebone.
 Queen Mary's, Caterham.
 Royal London Ophthalmic, City Road.
 Epileptic Colony, Silver Street.

North Middlesex Hospital.

No. of cases admitted from Tottenham during 1926	2,701
No. of days In-Maintenance of these patients during 1926	101,867

THE CARE OF THE AGED.

Great difficulty is experienced occasionally in determining the proper procedure to adopt in the case of old people, living alone and unfit by reason of decrepitude to look after themselves or their homes. They resent the suggestion that they should go into the "Institution"; their relatives are none too eager to accept responsibility for the proper care of the old people; their neighbours' intervention is resented, or they (the neighbours) have sufficiently weighty responsibilities without accepting others.

Circumstances of the kind indicated come to the notice of the department with sufficient frequency to warrant sympathetic consideration being given to the problem, with a view of a satisfactory solution being found.

INFECTIOUS DISEASES.

Scarlet Fever.—The Metropolitan Asylums Board receive into their Institutions such cases of Scarlet Fever as have been referred to them by the Medical Officer of Health. During 1926, 93 cases have thus been received from Tottenham into the Metropolitan Asylums Board Hospitals and one patient was admitted into the London Fever Hospital. Two Tottenham cases were removed to M.A.B. Hospitals from General Hospitals in London.

In October the M.A.B. determined to limit the admissions to their Institutions of patients suffering from Scarlet Fever during periods of undue prevalence of Measles. This procedure is dictated by the relative mildness of Scarlet Fever as it is now met with.

In 1926—the third year in succession—no deaths of Tottenham patients were registered as being due to Scarlet Fever.

The determination of the Metropolitan Asylums Board appears to be justified by the experiences of this district.

Five years ago it was found expedient to limit admissions to hospital of patients suffering from Scarlet Fever to those who could not, without grave risk to themselves or others, be kept at home. It will thus be seen from the accompanying Table that of 481 cases notified, only 94 were admitted to hospital from Tottenham (including three who received a few days' treatment by the Council's Nurses prior to removal). Two Tottenham children were removed to Isolation Hospital from General Hospitals in London. 379 patients were treated to a conclusion by the Council's Nurses and six were treated privately in their own homes.

The patients treated by the Council's Nurses in their own homes were distributed as follows:—

298 premises in which 1 case occurred = 298 cases.

26 " " 2 cases " = 52 "

8 " " 3 " " = 24 "

1 " " 4 " " = 4 "

1 " " 5 " " = 5 "

—
334 premises.
—

—
*383 cases.
—

* The actual number of cases dealt with up to December 31st was 382. It will be seen however, that 383 are accounted for. From that number has to be deducted one, which occurred in 1927, but in the same premises as cases notified during 1926. This case has been included in order that a complete record may be given of the multiple cases.

Multiple Home Cases, 1926 (including one treated in 1927):—

		—
		49†
		—

* In 11 of these instances, dual notifications were received simultaneously, and in 1 instance triple notifications.

† This number includes certain cases wrongly diagnosed.

Number of cases removed to hospital after treatment commenced	..	3
Number of notifications withdrawn	5
Number of cases wrongly diagnosed or indefinite	57

There were complications in 63 of the cases (including cases wrongly diagnosed or indefinite).

The complications were as follows:—

Glands	21*
Otorrhoea	11
Albuminuria	11
Rheumatism	8
Rhinorrhoea	3
Rhinorrhoea and Glands	3
Rhinorrhoea and Otorrhoea	2
Gland and Rheumatism	1
Nephritis	1
Gland and Otorrhoea	1
Otorrhoea and Albuminuria	1
		—
		63
		—

* None of these suppurated.

Cases of Otorrhoea and Rhinorrhoea of long-standing before the onset of Scarlet Fever have been excluded, but all cases that have been definitely associated with Scarlet Fever have been included in this list.

All cases of complications arising in the course of Scarlet Fever have been periodically visited, and at the date of writing the Report (March, 1927) they had cleared up, with one exception (Albuminuria).

During 1926, 81 persons were discharged from M.A.B. Hospitals, having been admitted during 1924, 1925 and 1926 as suffering from Scarlet Fever. Their stay in hospital extended to the following periods:—

Under 30 days	4 cases.
30 and under 60 days	56 „
60 and under 90 days	13 „
90 and under 120 days	7 „
735 days	1 case.

The average duration of residence was 62.0 days. The shortest period of residence was 11 days and the longest 735 days.

Nine of the cases removed to hospital had been wrongly diagnosed, 3 being Erythema, 2 Tonsillitis, 1 Measles, 1 Measles and Bronchitis, 1 Flannel Rash and 1 "Not Scarlet Fever." The average residence in hospital of these patients was 41 days.

Diphtheria.—Commencing the middle of September, the incidence of Diphtheria rapidly increased from an average of 4 per week to 36 in the week ended October 6th. Thereafter there was a gradual declension, but at the end of March, 1927, the date of writing, the normal level has not been reached.

Of the 495 cases notified, 459 were removed to M.A.B. Hospitals from Tottenham, and 10 from General Hospitals in London. 1 case was removed to the London Fever Hospital. Deaths numbered 19.

11 cases were removed from the local general hospital; 7 were in-patients who came from other districts and 4 were nurses.

The duration of residence in hospital of those patients who were discharged during 1926, having been admitted during 1925 and 1926 as suffering from Diphtheria, was as follows:—

Under 30 days	47 cases.
30 and under 60 days	128 ,,
60 and under 90 days	73 ,,
90 and under 120 days	34 ,,
120 and under 150 days	13 ,,
150 and under 180 days	7 ,,
180 and under 210 days	4 ,,
210 and under 240 days	2 ,,
240 and under 270 days	2 ,,
270 and under 300 days	1 case.
300 and under 330 days	1 ,,
494 days	1 ,,

The residence of shortest duration was 9 days and that of longest duration 494 days. The average stay in hospital was 68.0 days.

Of the cases admitted to hospital as Diphtheria, 45 had been wrongly diagnosed, as follows:—Tonsillitis, 28; Measles, 3; Sore Throat, 3; ‘‘Not Diphtheria,’’ 3; Scarlet Fever, 2; Rhinitis, 2; Ulcerative Tonsillitis, 1; Pharyngitis, 1; Catarrh, 1; Catarrhal Sore Throat, 1. The average residence in hospital of these patients was 29 days.

The control of Diphtheria is, and is likely to continue, one of the most difficult propositions until immunization of the young becomes generally practised.

Before patients leave hospital it is required that six consecutive swabs from them shall prove negative. Nevertheless it is no infrequent experience to find that within a fortnight following discharge the bacillus of diphtheria is found in throat or nose, so that admission to school cannot be granted. Repeated weekly swabbings continue to reveal the presence of these organisms, which prove fatal to the guinea-pig when the virulence test is applied.

Your Medical Officer of Health does not suggest that a longer stay in hospital would add anything to the safety of the public.

The report on Diphtheria of the Ministry of Health, 1921, states p. 5 (a):—‘‘Notifiable Diphtheria.—The notification of cases of diphtheria under the Infectious Diseases (Notification) Acts should be limited to persons actually suffering from Diphtheria, i.e., those exhibiting clinical signs of the disease, with or without bacteriological evidence of the presence

of diphtheria bacilli. In the practice of some districts and of many medical practitioners, including, often, the Medical Officers of hospitals and residential schools, notification is frequently extended to include diphtheria carriers who themselves present no sign of illness. It is doubtful whether this practice is justifiable."

It is at least arguable whether it is justifiable to retain in hospital patients who have no longer clinical symptoms but have positive throat cultures, and at the same time exclude from hospitals, because not notifiable, persons who have positive throat cultures but no clinical signs.

The Council approved the application of the toxin-antitoxin method of immunization against Diphtheria to members of the public who sought it on their own or their dependents' behalf.

Information has been communicated to the public through the Press and otherwise, but the actual administration of the prophylactic was not commenced until February, 1927.

To residents of Tottenham no charge is made. Applications for the protection afforded by this means may be made to the Medical Officer of Health or at the School Medical and Maternity and Child Welfare Centres.

Diphtheria Anti-toxin may be had upon a Doctor's request at the Town Hall during office hours and at the Central Fire Station, adjoining the Town Hall, at all hours (day and night), when the Town Hall is closed.

The home address of the Sanitary Inspector on duty is posted at the front door of the Town Hall, and application may be made to him for his attention in respect of cases of infectious disease requiring removal at any time when the Town Hall is closed.

Smallpox.—No case of Smallpox has been notified during the year. Contacts are kept under observation until the likelihood of themselves developing the disease is passed.

The Vaccination Officer for Tottenham informs me that the number of Tottenham children vaccinated during 1926 was 1,050; the number of declarations of conscientious objection to vaccination received was 1,105.

Measles and Whooping Cough.—Complicated cases of Measles and Whooping Cough have been admitted to the M.A.B. hospitals. The complications in these institutionally-treated cases were as follows:—Measles and Pneumonia, 12; Measles, 3; Measles and Bronchitis, 2; Measles and ? Encephalitis Lethargica, 1; Whooping Cough and Pneumonia, 4.

Ophthalmia Neonatorum.—13 cases of Ophthalmia Neonatorum were notified during the year. In no instance was the vision impaired.

Puerperal Fever and Puerperal Pyrexia.—The Public Health (Notification of Puerperal Fever and Puerperal Pyrexia) Regulations, 1926, came into operation on October 1st, 1926. During the year, 4 cases of Puerperal Fever and 7 of Puerperal Pyrexia were notified and dealt with. 1 death was recorded as due to Puerperal Fever.

Dysentery and Malaria.—1 case of Dysentery and 1 case of Malaria occurred during the year. No deaths were attributed to either of these causes.

Enteric Fever.—7 cases of Enteric Fever were notified during the year, 5 of them from the local Hospital (2 being "non residents"). 4 cases were removed to Isolation Hospital, 1 being discharged as suffering from Influenza and not Enteric Fever. There were no deaths from this disease.

Poliomyelitis.—There were 2 cases of Poliomyelitis during the period under review. Neither was fatal.

Cerebro-Spinal Meningitis.—3 cases were notified during the year from Cerebro-Spinal Meningitis. There were no deaths from this cause.

Encephalitis Lethargica.—8 cases of this disease were notified, 7 in the District and 1 from an outside Institution. 2 of these were fatal, and a third death from this cause (a "resident" who died outside Tottenham) was debited to this District.

Erysipelas.—49 cases of Erysipelas occurred during the period under review, 7 of them being removed to Hospital. There was 1 death from this cause.

TUBERCULOSIS.

The County Council are responsible for the treatment of Tuberculosis. Notifications are made to the Medical Officer of Health of the District, who forwards the information respecting them to the County Medical Officer of Health.

The Tottenham Tuberculosis Officer has his premises at 140, West Green Road. The days and hours of attendance at the Dispensary are as follows:—

Monday, Men, 10 a.m.; Tuesday, Women, 10 a.m.; children, 2.30 p.m. Wednesday, Women, 10 a.m.; cases who are working and unable to attend during the day, 7 p.m. Thursday, Children, 10 a.m. Friday, Men, 10 a.m.

The number of persons suffering from Tuberculosis (all forms) appearing on the Register is 1,132.

GENERAL PROVISION OF HEALTH SERVICES IN THE AREA.

HOSPITALS PROVIDED OR SUBSIDISED BY THE LOCAL AUTHORITY OR BY THE COUNTY COUNCIL.

(1) *Tuberculosis*.—Provided by the County Council; Harefield Sanatorium. Subsidised by the County Council; Clare Hall Sanatorium.

(2) *Maternity*.—Maintenance charges of patients paid by Local Authority; North Middlesex Hospital and Mothers' Hospital, Clapton.

The Prince of Wales's Hospital, when accommodation allows, admit cases of Puerperal Fever.

(3) *Children*.—Maintenance charges paid by Local Authority; Prince of Wales's Hospital, North Middlesex Hospital, Central London Throat, Nose and Ear Hospital.

The London Heart Hospital receives fees for cases submitted for special examination. The Local Authority contribute towards the maintenance of children admitted to the London Orthopaedic Hospital, Great Ormond Street Hospital and Queen's Hospital, Hackney Road.

(4) *Fever*.—The Metropolitan Asylums Board hospitals provide accommodation for Tottenham patients, and the Enfield and Edmonton Joint Hospital Board have voluntarily accepted Erysipelas cases from Tottenham.

(5) *Smallpox*.—Tottenham is a contributory Authority to the Middlesex Districts' Joint Smallpox Hospital Board.

AMBULANCE FACILITIES.

The M.A.B. provide ambulances for the conveyance of infectious diseases.

The Council's ambulances are available for the removal of non-infectious cases to the Local and Metropolitan Institutions.

The following table furnishes particulars of the work done by the Ambulance Service during the past year:—

MOTOR AMBULANCE SERVICE, 1926.

Total Cases from 1915 to Date:
102,157.Total Mileage to Date:
309,329.

The Ambulances are equipped with Oxygen apparatus, which have been in use on 7 occasions during 1926; in 6 of the cases the efforts were successful.

LABORATORY.

At the Town Hall Laboratory, 3,526 swabs from the throats or noses of persons in contact with sufferers from Diphtheria, or themselves supposed to be suffering from Diphtheria, and 286 specimens of sputum from persons suspected to be suffering from Consumption, have been examined during the year. Of the swabs, 579 were positive, and of the sputa, 42 specimens.

Other bacteriological and serological examinations are made by arrangement with the Prince of Wales's Hospital.

CLINICS AND TREATMENT CENTRES.

Name and Situation.	Nature of Accommodation.	By whom Provided.
Infant Welfare Clinic, "The Chestnuts," St. Ann's Road, N.15	Consulting Room, Weighing Room, Waiting and Stock Room, Pram Room	Tottenham Maternity and Child Welfare Commit- tee.
Infant Welfare Clinic, Bruce Castle, Lordship Lane, N.17	Consulting Room, Weighing Room, Waiting and Stock Room, Pram Room	Do.
Infant Welfare Clinic, Town Hall, N.15	Weighing Room and Waiting Room	Do.
Maternity Clinic, "The Chestnuts"	Consulting Room, Dressing Room, Waiting Room, Dining Room	Do.
Maternity Clinic, Bruce Castle	Consulting Room, Dressing Room, Waiting Room	Do.
Day Nursery, 240, St. Ann's Road	Receiving Room, Dining Room, and Nursery for Toddlers; 2 Nurseries for Infants; Isolation Room; Shelter in Garden	Do.

PROFESSIONAL NURSING IN THE HOME.

General Nursing facilities are provided by the North London Nursing Association, 413, Holloway Road, N.7 (Telephone, North 3548) for the area on the western side of the London & North-Eastern Railway line, and extending northwards as far as Lordship Lane.

The Hackney District Nursing Association, 6 and 8, Lower Clapton Road, E.5 (Telephone, Clissold 929) deal with the area east of the railway line, and extending northwards as far as Lansdowne Road.

The Sisters of Charity of St. Vincent de Paul, 15, Church Street, Edmonton, N.9 (Telephone, Tottenham 3166) have undertaken the work in the area extending northwards from Lordship Lane and Lansdowne Road.

An effort is being made to establish a District Nursing Association for Tottenham.

HEALTH WEEK.

Health Week was observed by the writing of Essays by school-children. The following subjects were set:—"The Use and Abuse of the Bath"; "The Use and Abuse of Windows"; "The Use and Abuse of the Dustbin"; "The Spitting Habit"; "Rheumatism". Special lessons were given to 15,492 children, and 12,991 Essays were written. 15 prizes were distributed at a Public Gathering at the Municipal Hall, on November 15th, by the Countess of Warwick; and among the items upon the programme were Singing, Displays of Gymnastics, Physical Exercises and Eurhythmics by the School-children, and an exhibition of Folk Dancing.

LOCAL GOVERNMENT AND OTHER OFFICERS' SUPERANNUATION ACT, 1922.

All entrants to the Council's permanent service are medically examined for the purposes of the Superannuation Scheme now in operation in Tottenham.

In 1926, 47 examinations were made by your Medical Officer.

STATUTES, BYE-LAWS, ETC., ADMINISTERED BY
HEALTH DEPARTMENT.

The Health Department is mainly concerned with carrying out the provisions of the following Acts, Bye-Laws, Orders and Regulations.

From time to time, the Ministry of Health issue circulars relating to matters of outstanding importance, *e.g.*, Cholera, Smallpox, Cerebro-Spinal Meningitis, Diarrhoea, Anthrax, Rabies, etc. These Circulars are not enumerated in the following list:—

- Public Health Act, 1875.
- Infectious Disease (Notification) Act, 1889. (Adopted, 5/11/89).
- Infectious Disease (Notification) Extension Act, 1899.
- Infectious Disease (Prevention) Act, 1890. (Parts adopted, 16/12/90).
- Public Health Acts Amendment Act, 1890. (Parts adopted, 20/1/91).
- Tottenham Local Board Act, 1890.
- Cleansing of Persons Act, 1897.
- Tottenham Urban District Council Act, 1900.
- Factory and Workshop Acts, 1901, etc.
- Notification of Births Act, 1907. (Adopted, 17/12/07).
- Public Health Acts Amendment Act, 1907. (Parts adopted, 17/12/09).
- Diphtheria Anti-toxin (Outside London) Order, 1910.
- Public Health (Tuberculosis) Regulations, 1911 and 1912, etc.
- Rag Flock Act, 1911.
- Public Health (Cerebro-Spinal Fever and Acute Poliomyelitis) Regulations, 1912.
- Public Health (Milk and Cream) Regulations, 1912.
- Shops Acts, 1912, etc.

- Fabrics (Mis-description) Act, 1913.
 Public Health (Shell-fish) Regulations, 1915.
 Milk and Dairies (Consolidation) Act, 1915.
 Rent and Mortgage Interest Restrictions Acts, 1920 and 1923.
 Public Health (Acute Encephalitis Lethargica and Acute Polio-
 Encephalitis) Regulations, 1918.
 Public Health (Pneumonia, Malaria, Dysentery, etc.) Reg-
 ulations, 1918.
 Milk and Dairies (Amendment) Act, 1922.
 Milk (Special Designations) Order, 1923.
 Public Health (Meat) Regulations, 1924.
 Housing Act, 1925.
 Public Health Act, 1925.
 Housing Consolidated Regulations, 1925.
 Milk and Dairies Order, 1926.
 Public Health (Ophthalmia Neonatorum) Regulations, 1926.
 Public Health (Notification of Puerperal Fever and Puerperal
 Pyrexia) Regulations, 1926.
 Sanitary Officers' Order, 1926.
 Bye-Laws with respect to New Streets and Buildings, Cleansing
 of Cisterns, Common Lodging-Houses, Houses let in
 Lodgings, Nuisances, Slaughter-Houses, Tents, etc., used
 for human habitation.

SHOPS ACTS, 1912 to 1921.

HALF HOLIDAYS.

.. ..	Glucksberg, 3, High Cross Road
.. ..	W. E. Mills, West St., Walthamstow	Repairs, 61 and 63, Summerhill Road	Order made for payment of Council's A/c by monthly instalments of £1.
October ..	Luccarini, 728, High Road	Serving in Shop after closing hour	Fined 20s.
.. ..	Raphael, 1, Grand Parade
.. ..	Fisher, London Rd., Wickford	Repairs to drainage, 25 and 27, Corn- wall Road	Fined 10s. (Work subse- quently car- ried out by Owner.)
November	Edgar, 319, West Green Road	Not displaying re- quisite notices (Shops Act)	Fined 10s.
December	Cook, 16, Black Boy Lane	Removal of refuse, etc.	Order made for carrying out of work. De- fendants to pay costs of legal pro- ceedings.

WATER SUPPLY.

In last year's Report it was noted that the Metropolitan Water Act requires the provision of a cistern for the storage of water in all premises.

In many, probably most, houses in Tottenham the drinking water is derived from the storage cistern, which is seldom or never cleansed.

It is worthy of consideration whether these cisterns serve any useful purpose and their provision should be insisted upon, or whether in new houses or in those where water fittings are being overhauled, it would not be more advantageous to derive the household supply from the main pipe, without the intervention of a cistern.

PUBLIC SWIMMING BATHS—CONSTANT FILTRATION.

The closure of the Public Swimming Baths at the end of the season gave the Council the opportunity of installing a Bell Constant Filtration Plant.

When the Swimming Season opens in 1927, it may confidently be expected that the purity of the water of the Bath will add to its increased popularity and usefulness.

GENERAL SANITARY WORK.

Hereunder is specified in tabular form the inspections by the Sanitary Officers during 1926, and the nature of the defects discovered:—

	Late Harringay. Ward (Mr. Redston).	West Green Ward (Mr. West).	Late St. Ann's Ward (Mr. Smith).	Late High Cross Ward (Mr. Portman).	Late Middle Ward (Mr. Miller).	Late Lower Ward (Mr. Shillito).

Certificates granted during the year	—
In use at the end of the year	4

NOTE.—The Factory and Workshop Act, 1901 (*s.* 132) requires the Medical Officer of Health, in his Annual Report to the District Council, to report specifically on the administration of that Act in workshops and workplaces, and to send a copy of his Annual Report, or so much of it as deals with this subject, to the Secretary of State (Home Office).

PUBLIC HEALTH (MEAT) REGULATIONS, 1924.

The attention of your Medical Officer of Health was directed to a type of shop window that a butcher of the District was employing, so as to meet the requirements of the Public Health (Meat) Regulations, 1924, in the spirit as well as in the letter. An Officer of the Ministry of Health visited the premises with your Medical Officer of Health, and was so satisfied with the design of the window and the protection afforded to the meat from contamination that he advised that members of the Society of Medical Officers should be given the opportunity of inspecting the arrangements. It is claimed for the window that in the heat of summer there is a difference between the outside and inside temperature of about 40 degrees.

This effort to protect the food supply is in striking contrast to the open-windowed shops with stalls in front, exposed to the dust raised by wind and fast-travelling vehicles. The Public Health (Meat) Regulations, 1924, should be repealed, and adequate provision made for all articles intended for the food of man being properly protected from contamination.

UN SOUND FOOD.

The Sanitary Inspectors have seized, or had brought to them for condemnation, the following articles:—

Meat:—

- 2 Pigs.
- 3 Pigs' Heads.
- 89 lb. Pork.
- 264 lb Beef.
- 21 lb. Mutton.
- 5 Ox Livers.
- 1 case Rabbits.

Fish:—

- 12 stone and 1 box Skate.
- 4 stone and 2 trunks Cod.
- 2½ stone and 1 box Plaice.
- 1 trunk Hake.
- 6 stone and 2 boxes Haddocks.
- 2 boxes Whiting.
- 5 boxes Kippers.
- 1½ bags and 5 bushels Winkles.

Fruit and Vegetables:—

- 1 barrel Grapes.
- 38 boxes Apples.

FOOD POISONING.

American Canned Corned Beef caused the illness of a dozen or more residents in Tottenham. The meat was sold from a shop in a neighbouring district. Samples of the meat were sent to the Ministry of Health for examination, and serological tests of the blood of certain of the sufferers

were employed with a view of determining the responsible organism. As the result of the investigation it was concluded that the sterilization of the meat in the process had killed the germs, but that after ingestion of the food the poisons contained in the germs (endotoxins) were liberated by digestion, causing their harmful effects.

Several of the patients were acutely ill, but all recovered.

FOOD AND DRUGS:-

I am obliged to the County Council (who are the Authority for administering the provisions of the Sale of Food and Drugs Act, 1875), for the following information respecting samples taken in Tottenham:—

Name of Article.	Samples.	
	Taken.	Found Adulterated.
Milk	614	19
Butter	20	—
Cream	4	—
Apples	8	1
Arrowroot	6	—
Cinnamon	1	—
Egg Powder	2	—
Gin	20	12
Ginger, ground	1	—
Lard	2	—
Margarine	1	—
Mineral Water	1	—
Mustard	13	7
Oatmeal	2	—
Olive Oil	1	—
Pepper	4	—
Sweets	1	—
	701	39
Number of Prosecutions		3
Number of Convictions		2
Fines and Costs imposed		£6 2s.

The figures given for adulterated samples include some adulterated informal samples, in respect of which no proceedings could be taken.

DISINFECTION AND DISINFESTATION.

- 1,713 rooms were disinfected.
- 16,787 articles were disinfected or destroyed.
- 164 library books were disinfected.
- 2 persons were bathed.

EXHUMATIONS.

1 exhumation took place at the Tottenham Cemetery, under the supervision of the Sanitary Inspector. The Home Office requirements were complied with.

SMALL DWELLINGS ACQUISITION ACT.

The Sanitary Inspectors are required to report upon the condition of properties proposed to be acquired under the Small Dwellings Acquisition Act. The sanitary conditions of such properties have been the subject of 6 reports during 1926

PREMISES AND OCCUPATIONS WHICH CAN BE CONTROLLED BY BYE-LAWS OR REGULATIONS.

SLAUGHTER HOUSES.—There are 12 private Slaughter Houses in the District, 5 being registered and 7 licensed. They are periodically visited, and it has not been found that any offence has been created.

DAIRIES, COWSHEDS AND MILKSHOPS.

16 applications for registration from retail purveyors of milk were received during the year. These were acceded to.

There are at present 139 retail purveyors on the register.

4 purveyors were licensed for the sale of "Grade A (Tuberculin Tested)" Milk, 2 for the sale of "Certified" Milk, 1 for the sale of "Pasteurised" Milk (supplementary license), and 1 for the sale of "Certified" Milk (supplementary license).

Periodical inspection is made of the premises where Graded Milk is bottled, and samples are taken in accordance with the Ministry of Health's scheme.

No action was required to be taken under the Public Health (Prevention of Tuberculosis) Regulations, 1925.

COMMON LODGING HOUSES.

There are 5 Common Lodging Houses in the District. All have been kept under observation, and appropriate action was taken to remedy any defects found.

HOUSING.

At the end of the year, approximately 3,500 families were registered by the Treasurer as seeking accommodation on the Council's housing estate. As there are no more than 160 acres available for building purposes, it is manifest that with dwellings built 12 to the acre, space is not available in Tottenham for the housing of that number of families. In the meantime these families are lodged somehow in the district, resulting in serious overcrowding, in many instances without visible means of remedy.

New Houses and Tenements erected during the Year.

By private builders (no State assistance)	..	(Houses)	290
By the London County Council	(Tenements)	132
By the Tottenham Council..	(Houses)	64
			<hr/>

Tottenham Education Committee.

ANNUAL REPORT

OF THE

SCHOOL MEDICAL OFFICER for 1926.

MEMBERS OF THE COMMITTEE.

(As constituted in October, 1926.)

Mr. A. E. JAY (Chairman).
Mr. A. J. WRAMPLING (Vice-Chairman).
Mr. J. BRISTOW.
Miss R. F. COX.
Mr. I. DAVIS.
Mr. E. G. DICKIN.
Mr. T. ELDERFIELD.
Mrs. E. L. FINCH.
Mr. E. FROST.
Mr. E. C. HARRIS.
Mr. A. E. HARVEY.
Mr. T. INGLIS.
Mrs. A. KITCHENER.
Mrs. J. D. LYNCH.
Major P. B. MALONE, M.P., J.P.
Mr. A. MANSFIELD.
Mr. W. E. MONTAGUE.
Mr. D. NOTT.
Miss L. B. PRESCOTT.
Mr. A. REED, A.F.I.
Mr. C. WISE.
Mr. F. E. SHARLAND.

INTRODUCTION.

School Medical Department,

Town Hall,

Tottenham,

March, 1927.

To the Chairman and other Members of the Tottenham
Education Committee.

Ladies and Gentlemen,

The only outstanding event during 1926 in relation to the School Medical Service was an epidemic of diphtheria commencing soon after the Summer Holidays.

The 1926 report has been condensed, as far as possible, into tabular form.

The Staff have fulfilled their duties loyally, and the success that has attended their efforts is attributable, in large measure, to your Committee's constant anxiety for the welfare of the school children.

I am, Ladies and Gentlemen,

Yours faithfully,

David C. Kirkhope.

SCHOOL HYGIENE.

The following report of the Surveyor indicates the improvements effected to school premises.

SURVEYOR'S REPORT OF IMPROVEMENTS CARRIED OUT FROM 31st MARCH, 1926, TO 31st MARCH, 1927.

All Hallows' School.

Improved method of artificial lighting.

Allison Road School.

Alterations and additions to W.C. accommodation.

Belmont Road School.

Improved method of artificial lighting.

School for the Deaf.

Provision of blinds to Caretaker's house.

Devonshire Hill School.

Provision of blinds to Caretaker's house.

Provision of dark blinds and fittings for lantern rooms and classrooms.

Installation of chemical fire appliances.

Down Lane Central School.

Removal of galleries in Room G and levelling floor.

Earlsmead School.

Installation of new heating boiler.

Page Green School, Boys', Girls' and Infants'.

Internal and external redecorations.

Installation of new gearing.

Improved method of artificial lighting.

New sliding partition in Infants' School.

New doorway into Infant's classroom.

Parkhurst Road School, Boys', Girls' and Infants'.

Improved method of artificial lighting.

Risley Avenue School.

Internal and external redecorations.
Improvements to heating at East end of school.

St. Katharine's School.

Improved method of artificial lighting.

Seven Sisters School, Boys', Girls' and Infants'.

New pans and water supply on the gravity system to Infants' latrines.
Infants' corridors relaid.
Internal and external redecorations.
Improved method of artificial lighting.

Stamford Hill School, Boys' and Girls'.

Installation of new heating boiler and alterations to heating system.
(Old gas radiators removed.)
Installation of "Kalor" boiler.

Stamford Hill School, Infants'.

Installation of new heating boiler and alterations.

Vale Road School.

Land in front of school dug over, levelled and grassed.
Alterations to furniture and fixing pin rails suitable for conversion to Infants' Department.

Woodlands Park School.

Installation of new heating boiler.
Improvements to heating of old cookery.

Woodberry Down School.

Internal redecorations.

Offices, Philip Lane.

External redecorations.

Additional heating.

Music and Dancing Licences.

Alterations to the structures, secondary lighting and the lighting of W.C.'s and latrines to comply with the regulations of the Middlesex County Council at the undermentioned schools:—

Belmont Road School.

Crowland Road School.

Downhills Central School.

Down Lane School.

Risley Avenue School.

Woodlands Park School.

Asphalt Repairs to Playgrounds.

Attention has been given to the playgrounds of the following schools:—

Coleraine Park School, Boys'.

Seven Sisters School, Boys' and Girls'.

Furniture.

In addition to the repairs and renovations to the school furniture, new furniture has been supplied to many of the schools, i.e., blackboards, tables, remedial forms, needlework boxes, cupboards. Devonshire Hill School Infants' Department has also been fitted with sliding wall blackboards.

MEDICAL INSPECTION.

The details of medical inspections and the subsequent following-up and treatment of children found to be defective are set out in tabular form at the end of this report.

INFECTIOUS DISEASE.

Notifications under the Infectious Disease Notification Acts, 1889-1899, were received in respect of the following diseases occurring amongst children of school age, with the noted frequency:—

Scarlet Fever	294
Diphtheria..	327
Enteric Fever	5
Erysipelas	2
Pneumonia	24
Poliomyelitis	1
Cerebro Spinal Meningitis	1

Voluntary Notifications.—The following cases were voluntarily notified by teachers and attendance officers during the year:—

Measles.. ..	1195	Rash	14
German Measles ..	25	Sore Throat	65
Mumps	402	Tuberculosis	6
Whooping Cough ..	159	Influenza	50
Chickenpox	313	Eye Diseases	6
Scarlet Fever	113	Ringworm of Head ..	28
Diphtheria	206	Ringworm of Body ..	8
Scabies	10	Sores and Eczema ..	47
Skin Diseases	13	Impetigo	24
Verminous	5	Other Diseases.. ..	94
Tonsilitis	16	Children excluded owing to infectious disease	
Chorea	15	in house	642
Pneumonia	3	Rheumatism	5
“Colds”	52	Otorrhoea	4

These cases were followed up by the School Nurses and were not re-admitted to school until they were free from infection and the possibility of communicating the disease to others.

Bacteriological Examinations.—Swabs have been taken from children discharged from Isolation Hospital after diphtheria, and from children who have been in contact with cases of diphtheria, and examined bacteriologically. 2,056 such examinations were made, 243 were found to be positive, 1,768 negative, and 45 contained bacteria morphologically similar to Klebs Loeffler bacilli.

Microscopical Examinations.—Hairs were taken from children who were suspected to be suffering from ringworm in 27 instances and submitted to microscopical examination. 16 were positive.

FOLLOWING UP.

My last Report describes the system of following up school children who have been found to be defective, also the method employed for dealing with children found to be in a verminous or uncleanly condition.

The School Nurses paid, during the year, 6,848 home visits.

MEDICAL TREATMENT.

Dr. Friel has furnished the following table in relation to Otorrhoea cases dealt with at the Aural Clinic:—

Cause of Suppuration.	Total Ears.	Cured.	Lost Sight of.	Under treatment.	Sent for operation.
ACUTE SUPPURATIVE OTITIS MEDIA ..	27	25	—	2	—
CHRONIC SUPPURATIVE OTITIS MEDIA, DUE TO					
1. <i>Tympanic Conditions:—</i>					
(a) Tympanic Sepsis	58	57	1	—	—
(b) T.S. and Granulations ..	21	21	—	—	—
(c) T.S. and Polypus	7	5	—	—	2
(d) T.S. and Caries	—	—	—	—	—
(e) T.S. and Other Conditions ..	1	—	—	1	—
2. <i>Tympanic Conditions, plus</i>					
(a) Tonsils and Adenoids	2	1	1	—	—
(b) Nose Conditions	3	—	2	—	—
(c) Mouth Conditions	—	—	—	—	—
3. <i>Tympanic Conditions, plus</i>					
(a) Attic Disease	26	3	5	8	10
(b) Mastoid Disease (No Operation)	16	8	4	3	1
(c) Mastoid Disease (Operation Already)	2	1	—	1	—
EXTERNAL OTITIS—Diffuse	11	—	3	8	—
Localised	7	7	—	—	—
Totals	181	128	17	22	14

Tonsils and Adenoids.

Similar arrangements have been made with the Prince of Wales's Hospital, as were noted in my report of last year as obtaining at the North Middlesex Hospital, for the operative treatment of children suffering from enlarged tonsils and adenoids. These include provision for retention of cases in hospital, when necessary.

OPEN-AIR EDUCATION.

The following Report with respect to Open-Air Education, Physical Training and Provision of Meals has been received from the Director of Education:—

(a) Playground Classes.

Open-air shelters have continued in use at Page Green, Stamford Hill, and other schools. In most schools, playsheds, and the playgrounds generally, have been freely utilised in suitable weather for open-air classes.

NOTE.—The proposals with respect to Woodlands Park Girls' School were postponed by the Board.

(b) and (c) School Journeys and Camps.

For the year 1926, the Board of Education sanctioned the expenditure of a sum not exceeding £120. The actual expenditure was as follows:—

	£	s.	d.
Down Lane Central School	76	0	0
Risley Avenue Central School	25	0	6
St. Paul's Girls' School	30	0	0
	<hr/>		
	£131	0	6
	<hr/>		

The following table shows the expenditure on School Journeys since the Committee decided to aid them:—

Year.	Amount Sanctioned.		Amount Spent.	
	£		£	
1920	..	300	..	221
1921	..	250	..	209/10
1922	..	187/10	..	138/17
1923	..	187/10	..	185
1924	..	210	..	210
1925	..	190	..	168/3
1926	..	120	..	131
		—		—
		£1,445		£1,263/10
		—		—

The following are brief particulars of the Journeys carried out during 1926:—

1. DOWN LANE CENTRAL SCHOOL.

All the pupils of the First Year, numbering over 80, spent a week at Tankerton, near Whitstable, where they were lodged in the Marine Hotel. The time fixed for the visit unfortunately coincided with the General Strike. Considerable difficulty was, therefore, experienced in securing the conveyance of the girls. In order to carry out her undertaking with the hotel proprietors, and to avoid disappointing the girls, who had looked forward to the outing, the Head Mistress thought it advisable to carry out her programme. Additional expense was entailed for conveyance, etc., and the Committee made an additional grant of £16 to meet this outlay.

Excursions were made to Dover, Sandwich, Canterbury and other places, and a visit by motor-boat was paid to the Fleet, then stationed near Dover.

In spite of the difficulties encountered, the journey was carried out, and the girls derived much educational benefit and enjoyment from it.

The total cost was £202 10s. 10d., towards which the Committee contributed £76.

2. RISLEY AVENUE CENTRAL SCHOOL.

A party of 21 senior boys and two teachers spent a week at the Rockland Boarding House, Swanage, in May. They made a thorough study of the interesting geology and geography of the Isle of Purbeck and its surroundings. Visits were made to Corfe Castle, Studland and Agglestone, and to Lulworth Cove.

An excellent guide book was compiled by the School Staff, and the arrangements made resulted in an excellent week's work and pleasure.

The total cost of the journey was £54 4s. 6d., towards which the Committee contributed £25.

3. ST. PAUL'S GIRLS' SCHOOL.

A party of 24 girls, in charge of the Head Mistress, spent a fortnight at Folkestone. They were favoured with excellent weather, and their programme was carried out with complete success.

The total cost was about £80, towards which the Committee contributed £30.

(d) Open-Air Classrooms.

Last year's report stated that a school of two departments, on open-air lines, to accommodate 800 children, was in course of erection. This school (Devonshire Hill) was opened in April, 1926. Although it is too soon to judge the permanent effects of open-air conditions on the children in attendance, the first year's working of the school shows promising results. The school is already over full, and the Board of Education have agreed to its extension by the erection of another department for 500 children. This will be planned on the same lines as the existing departments.

(e) Day Open-Air Schools.

The Open-Air Class, which has been held for several years during the Spring and Summer in the bandstand at Downhills Park, was continued in 1926 with the usual very satisfactory results. The admirable situation of the Class, providing open-air conditions in beautiful surroundings, permits of very good work

The Class at Orchard House was continued up to October, when, by permission of the District Council, it was transferred for the winter to a more suitable position in Bruce Castle Park, where it has been possible for the Class to work under improved conditions.

It will return to Orchard House in April, and will probably be accommodated in a marquee placed in such a position as will secure the maximum amount of sunshine and fresh air.

The Three-Year Programme of the Local Education Authority includes the provision of a permanent Open-Air School for about 120 pupils. It is hoped that the consent of the Board for the establishment of this school may soon be obtained.

PHYSICAL TRAINING.

Physical Training in the schools receives much attention. In addition to the courses of instruction following the Board's syllabus and regulations, many schools give instruction in Folk Dancing, Eurythmics and other forms of Physical Exercises.

Remedial Exercises are given in nearly all schools by specially selected class teachers, acting under the direction of the School Medical Officer and of an expert adviser, who is engaged for half-time for this work. Children are selected and inspected and the exercises are prescribed by the Medical Staff.

Organised Games are a regular part of the curriculum of all the schools. Valuable assistance in these is given by a flourishing Schools' Sports Association, which organises Cricket, Football and Netball Competitions on a League system; and an Annual Sports Meeting, in which school representatives, chosen on the results of their own School Sports Meeting, compete for challenge shields or cups. Combined displays of Physical Drill and Country Dancing are features of the Annual Sports.

Swimming Instruction is given to Senior boys and girls, who attend at the Public Baths during school hours. Under the direction of the School Swimming Association, scholars are encouraged to take examinations for certificates issued by the Association and by the London Schools Swimming Association. In 1926 nearly 2,000 certificates were awarded, these being shared almost equally between girls and boys. These included a large number of certificates for proficiency in life-saving.

PROVISION OF MEALS.

During the year 111,369 school meals (dinners) were provided.

Necessitous children only, with the exception mentioned below, were provided with meals and no charge was made. The income of the parents must be within the scale fixed.

The dietaries at the various Cookery and Feeding Centres are submitted to, and approved by, the School Medical Officer who periodically visits the Centre.

Dinners are provided for payment at the Down Lane Central Girls' School, but part payment is accepted in cases where the parents are in poor circumstances.

The following are the menus of the meals supplied at the Down Lane and Lancasterian Centres:—

Down Lane Centre.

MONDAY.	Boiled mutton, pearl barley and potatoes. Jam tart.
TUESDAY.	Minced meat, baked potatoes and green peas. Rice pudding.
WEDNESDAY.	Shepherd's pie and butter beans. Currant pudding.
THURSDAY.	Meat pudding, green peas and potatoes. Tapioca pudding.
FRIDAY.	Leg of beef stew, dumplings and potatoes. Apple tart.

Lancasterian Centre.

MONDAY.	Meat, potatoes and plain pudding.
TUESDAY.	Hashed beef, potatoes and butter beans.

WEDNESDAY.	Meat pudding and potatoes. Baked rice and custard.
THURSDAY.	Hashed beef and potatoes. Rice pudding.
FRIDAY.	Pea soup and bread. Date, currant or jam pudding.

The Education Committee have now decided to re-establish a meals' centre at Culvert Road School for the use of children who now have dinners at local dining rooms. The Committee are of opinion that this plan will result in the supply of more suitable meals under improved conditions.

CO-OPERATION OF PARENTS, TEACHERS AND ATTENDANCE OFFICERS.

The parents, teachers and attendance officers have co-operated with us in the past year as hitherto.

CO-OPERATION OF VOLUNTARY BODIES.

The Invalid Children's Aid Association has provided for the maintenance of children at Convalescent Homes and the supply of surgical instruments, as follows:—

Convalescent Home Treatment.—During the year, 375 children were sent away for varying periods, namely:—

No. of Weeks ..	1	2	3	4	5	6	7	8	9	10	11	12	13
No. of Children ..	6	16	18	102	46	61	27	38	11	15	9	6	6
No. of Weeks ..	14	15	16	—	19	20	21	—	27	29	—	—	—
No. of Children	4	1	2	—	2	2	1	—	1	1	—	—	—

In 30 of these cases, the treatment has been continued in 1927.

The following table gives the affections on account of which children received convalescent treatment:—

Nervous Debility 10	Peritoneum 1
Pre-tubercular Debility .. 27	Hip 1
Debility aft. Infectious Disease 36	Chorea 37
Post-operative Debility .. 23	Enlargement of Glands .. 10
Post-Pneumonic Debility .. 7	Rheumatism 7
Anaemia and Debility .. 46	Tonsilitis 3
General Debility 47	Dyspepsia 5
Heart Affections and Anaemia 19	Paralysis 4
Bronchitis and Bronchial	Empyema 2
Catarrh 35	Rheumatic Fever 3
Asthma 7	Marasmus 4
Other Non-tubercular Lung	Nephritis 1
Disease 6	Encephalitis Lethargica .. 1
Gastric Catarrh 2	Malnutrition 7
Gastric 5	Appendicitis 3
Tuberculosis:—	Other Cases 14
Glands 2	

Provision of Surgical Instruments.—Surgical appliances were supplied, and repairs and replacements effected in 218 instances. This was in respect of 80 children who were found to be suffering from the following defects:—

Infantile and other forms of	Club-feet 2
Paralysis 36	Pes Cavus 1
Tuberculosis:—	Other forms of Deformed
Hip 3	Feet 5
Knee 3	Amputated Leg 1
Ankle 1	Rickety Deformities .. 4
Spine 1	Weak Ankles 4
Flat-foot 9	Other cases 10

BLIND, DEAF, DEFECTIVE AND EPILEPTIC CHILDREN.

Residential Schools.

There are 42 children from this district being maintained in Special Residential Schools. 5 of these are crippled and physically defective children, 12 blind, 17 mentally defective, 5 epileptic and 3 deaf and dumb.

School for Deaf Children.

At the end of 1926 there were 66 children on the register at this school, 35 of these being Tottenham children.

Myopic School.

20 children suffering from defective vision (myopia, etc.) are in daily attendance at the Wood Green Special School for children with defective vision.

School for Physically Defective Children.

During the year 60 children have been in attendance, the number on the register at the end of the year being 52. The defects from which the children suffered were as follows:—

Infantile Paralysis	25
Congenital Deformities	2
Cerebra Diplegia	4
Fragilitas Ossium	1
Heart Disease (Congenital)	5
Double Congenital Dislocation of Hips	1
Hydrocephalus	1
Tuberculosis:—	
Spine	11
Knee	5
Hip	5

Oak Lodge Day Special School for Mentally Defective Children.

Children attending Oak Lodge Special School for the Mentally Defective have been increased in numbers from 20 to 42. This has been rendered possible by causing them to be assembled at collecting points convenient for their conveyance by ambulance. The cost per case of conveyance has thus been reduced.

Open-Air Class.

There are 37 boys in attendance at the Open-Air Class. In accordance with the new arrangements the boys attend at Orchard House during the summer months and at the pavilion in Bruce Castle Park during the winter.

These boys, who are selected by the medical officers, are re-examined at frequent intervals in order to ascertain what progress has been made.

SECONDARY SCHOOLS.

Table I, below, sets out the number of children, under their separate ages, examined in the secondary schools during the year.

Tables II-IV, pages 17-19, show in detail the defects discovered during the inspections, and the number of defective children who were subsequently found to have received treatment.

FOOD ACCESSORIES AND DRUGS.

During the year, Cod Liver Oil, Malt and Oil, Parrish's Food, Syrupus Ferri Iodidi, and Syrupus Calcii Lactophosphatis have been supplied at the Treatment Centres to necessitous cases recommended by the Medical Officers.

The following quantities have been dispensed at cost price, at less than cost price, or gratuitously, according to circumstances:—

Cod Liver Oil and Malt	2,035 lbs.
Parrish's Food	1,567 lbs.
Cod Liver Oil	1,617 ozs.
Syrupus Ferri Iodidi	3,566 ozs.
Syrupus Calcii Lactophosphatis	3,591 ozs.

EXAMINATIONS BY THE MEDICAL OFFICERS.

14 teachers, 2 caretakers and 1 junior clerk have been examined by the Medical Officers.

6 children have been medically examined and licensed to take part in entertainments.

SECONDARY SCHOOLS.

TABLE I.—NUMBER OF PUPILS INSPECTED 1ST JANUARY, 1926, TO 31ST DECEMBER, 1926.

Ages.	Routine Inspections.										Total.

DAY NURSERY, 240, St. Ann's Road.

Open Daily from Monday to Friday inclusive, from 8 a.m. to 6 p.m.

In addition to the above Clinics, a Sewing Class for Mothers who attend the Centres, is held on Wednesday afternoons, at The Chestnuts, and at Bruce Castle.

MOTHERS' WELFARE CLUB.—A Social is held at each Centre once a month:—

The Chestnuts Centre—Third Wednesday of each month.
Bruce Castle Centre.—Last Wednesday of each month.

*Lady Doctor in attendance.

INTRODUCTION.

Medical Officer's Department,
Town Hall, Tottenham, N.15.

To the Chairman and other Members of the
Maternity and Child Welfare Committee.

April, 1927.

Ladies and Gentlemen,

The Infant Mortality Rate and the Birth Rate are lower than last year.

The mothers attending the Welfare Centres collected a sum of money for the purchase of one or more ultra violet ray lamps. The Ministry of Health have advised that their installation be deferred until more is known about the type of case ultra violet rays may be confidently expected to benefit. In the meantime arrangements for light treatment have been made with the North Middlesex Hospital, which has an efficient installation and competent staff.

During the year new regulations came into operation respecting Ophthalmia Neonatorum, Puerperal Fever and Puerperal Pyrexia. Endeavours have been made to find hospital accommodation for patients suffering from puerperal fever, but they have not yet met with entire satisfaction.

Medical Officers from the Ministry of Health have visited the Centres on various occasions. It is gratifying to report that the work conducted in the department over which your Committee exercise control has been favourably commented upon as the results of these visits.

The Centres also afforded facility to the Ministry for an enquiry into the physical condition of children of pre-school age.

I would again express the thanks of the Staff to your Committee for kindness shown and encouragement given.

I am, Ladies and Gentlemen,

Yours faithfully,

David B. Kirkhope.

Medical Officer of Health.

BIRTHS, 1926.

LIVE BIRTHS.

Registrar-General's Figures—M.	1,309
F.	1,292

					*2,601

Local Information:—					
Total Births notified	2,615
Less Still Births	62

Total Live Births	2,553

*Births outside the District included in above:—

Council cases in District Maternity Home and Mothers'					
Hospital	54
Other cases notified from District Maternity Home	230
Notified from other Outside Institutions..	203

					487

The Registrar's and the local figures do not agree because they relate to different periods. The local notifications are those of children born within the year. The Registrar's figures are those of children registered within the year.

BREAST FEEDING.

As the result of the Health Visitors' enquiries, it was ascertained that the infants have been fed as follows:—

Breast-fed for 6 months or over	1,968
Part breast-fed—plus milk, dried milk or condensed	187
Bottle feeding—Cows' milk	112
Dried milk	92
Other artificial foods	68

					2,427

Not included in Feedings.

Deaths under one month.. .. .	75
Information refused, and removals	52

	127

MATERNITY AND CHILD WELFARE.

The work of the MATERNITY AND CHILD WELFARE STAFF is set out in tabular form hereunder:—

HOME VISITS MADE UNDER THE NOTIFICATION OF BIRTHS ACTS AND MATERNITY AND CHILD WELFARE ACT.

DINNERS TO EXPECTANT AND NURSING MOTHERS.

Dinners to expectant and nursing mothers, and to children under 5 years of age, in necessitous cases, have been given as follows:—

Number of Dinners Served:—			In respect of—
To Expectant and Nursing Mothers.	To Toddlers.	Total.	
716	618	1,334	15 mothers 11 toddlers

MATERNITY HOMES AND HOSPITALS.

The arrangements with the Guardians, whereby Tottenham patients are admitted to the Maternity Home are still active and satisfactory.

The following table sets out the number of cases treated in this Institution and the Mothers' Hospital subsidised by your Committee, and the details relating to them:—

District Maternity Home, Edmonton	Mothers' Hospital.	Total	Discharged before Confinement	Confinements		Total	Mothers Delivered by:—		Total
				Live Births	Still Births		Mid-wives	Doctors	
50	4	54	—	53	1	54	52	2	54

Notified as Puerperal Sepsis.	Maternity Deaths.	No. of cases in which temperature rose above 100.4 for 24 hours	Notified as Ophthalmia Neonatorum.	Inflammation of the eyes.	Not Entirely breast-fed.
—	—	—	—	—	1

	£ s. d.
Cost of patients admitted to Maternity Home ..	256 4 0
Contributions by patients towards maintenance ..	209 4 6
Net cost to Council	£46 19 6

Average duration of stay, 15.94 days.

CRÈCHE ATTENDANCES.

The attendances from 1st January to 31st December, 1926, were as follows:—

Number of days on which the Crèche was opened, 248.

Quarter.	Attendances under 3 years of Age.	Attendances over 3 years of Age.	Total.
1st January to 31st March ..	828	581	1,409
1st April to 30th June	971	713	1,684
1st July to 30th September ..	1,140	638	1,778
1st October to 31st December ..	785	635	1,420
	3,724	2,567	6,291

Number of children admitted:—

Under three years (when admitted)	79
Over three years	29
	—
Total	108

Average daily attendance, 25.26

Applications for assistance have been dealt with as follows:—

Assisted Milk Supply.—689 families were assisted in the supply of milk on behalf of expectant and nursing mothers and children under 5 years of age. The amount of milk distributed (fresh and dried milk) was 62,582 quarts or their equivalent.

Assistance has been given towards the payment of Midwives' Fees on 9 occasions, and for Home Helps in 1 instance.

CONVALESCENT HOME TREATMENT.

The arrangement with the Invalid Children's Aid Association for the maintenance of children at Convalescent Homes has been continued during 1926 as follows:—

27 children were sent away for varying periods, namely:—

Number of Weeks ..	1	2	3	4	5	6	7	8	9	10	11	12
Number of Children ..	2	—	1	6	3	2	1	3	—	3	1	2

Number of Children ..	—	1	—	—	—	1	—	—	—	1	—	—

HOSPITAL TREATMENT FOR CHILDREN UNDER 5 YEARS OF AGE.

Children referred to the Prince of Wales's and North Middlesex Hospitals from the Welfare Centres:—

Number of Children.	Number of Consultations.	Treated as In-Patients.	Operations for Tonsils and Adenoids.
33	61	3	8

VOLUNTARY SERVICES.

It is reported with regret that Mrs. Pickford, who has conducted the sewing class at The Chestnuts, has been compelled to resign owing to ill-health. The supervision over the class is exercised by one of the health visitors.

Miss Cremolina continues to give her services for part of the sewing at the Day Nursery.

The Committee are indebted to the following donors, for gifts to the Centres and the Creche during the year:—

Towards the Sunlight Lamp.—From M. Hollison, Esq., Potters Bar, per Mrs. Byers, £2 2s. 0d. From Mrs. G. Lindsay Blee, Eastbourne, per Mrs. Byers, £1 1s. 0d. From Edward Ward, Esq., Secretary, Tottenham and Wood Green Philanthropic Society, £2 15s. 0d. From the North Tottenham Labour Party, West Green Ward, Women's Section, 10s. 6d.

To the Welfare Centres.—From the Haringay Scouts' Association, per Mr. B. Inwood, Christmas Parcels for poor families. From the Dorcas Society of the High Schools for Girls, several gifts of baby clothing. From Mrs. Fred King, baby clothing.

For the Creche.—Gifts have been received from Miss Boar (Crouch End), Mrs. Stanley Brown, Mrs. Cheetham, Mrs. Devereux, Mrs. Dicks, Mrs. Grytoin, Mrs. Kolte, Mrs. Matthias and the Co-operative Ladies' Guild.

The Matron of the Creche and the Staff provided a party for the children.
