# R E P O R T

OF THE

## Vestry of the Parish of Fulham,

FOR THE YEAR 1892-3.

CLERK'S DEPARTMENT,

*June, 1893.*

GENTLEMEN,

I beg to present to you the Seventh Annual Report of the Vestry for the year ended 25th March, 1893.

### POPULATION.

The following statement will show the rateable value, population, and number of houses, at various periods, from 1856 to 1891.

Date.	Rateable Value.	Number of Houses.	Population.
	£		
1856	47,492	2,350—estimated.	14,100—estimated.
1861	55,916	2,583	15,539—census.
1871	100,121	3,909	23,378 do.
1881	190,136	6,685	42,895 do.
1891	426,551	12,869	91,640 do.

### ELECTION OF VESTRYMEN.

On the 24th and 25th May, 1893, the days appointed by the Vestry, the Annual Election of Vestrymen and Auditors took place at the undermentioned places:—

North End Ward.—Congregational Chapel, West Kensington.

Walham Ward.—The Hall under Congregational Chapel, Daves Road.

South Fulham Ward.—Town Hall, Walham Green.

The cost of the Election, as certified by the Churchwardens, amounted to £54 5s. 6d., and the Vestry passed the order for payment of same out of the Poor Rate of the Parish, as provided by Act of Parliament.

### OVERSEERS.

On the 4th April, 1893, the Justices of the Peace for the Kensington Division appointed Messrs. Stephen John Parker, Peter Lawson, and George F. Abery to be Overseers of the Poor for the year 1893-4.

## CHURCHWARDENS.

At the Special Meeting of the Vestry held on Wednesday, the 5th April, 1893, the Vicar re-appointed Mr. Frank Manby, of Wensum House, Napier Avenue, as Vicar's Churchwarden, and the Vestry elected Mr. Charles Thomas, of No. 569, Fulham Road, as the Peoples's Warden.

## BURIAL BOARD.

The Members of this Board who retired by effluxion of time in 1893, were Messrs. J. Long, J. H. Margrie, and H. T. Thistleton, and the Rev. W. C. Muriel, Mr. S. Knight, and Dr. T. Davies, were elected in their place.

## VESTRY AND COMMITTEE MEETINGS.

During the year the following Meetings of the Vestry and its Committees were held, viz:—

Vestry Meetings	...	...	...	...	...	50
Law and Parliamentary Committee	...	...	...	...	...	28
Finance Committee	...	...	...	...	...	25
Works and General Purposes Committee	...	...	...	...	...	37
Sanitary Committee	...	...	...	...	...	34
Cartage Committee	...	...	...	...	...	30
Town Hall Committee	...	...	...	...	...	26
Lammas Rights Committee...	...	...	...	...	...	24
New Streets Committee	...	...	...	...	...	31
Lighting Committee	...	...	...	...	...	14
Special Committees	...	...	...	...	...	9
Sub-Committees, &c.	...	...	...	...	...	64
						<hr/> 367 <hr/>

The ordinary meetings of the Vestry are held on alternate Wednesdays throughout the year (except during the vacations) at Seven o'clock in the evening, whilst the Standing Committees meet every fortnight, or more frequently, if necessary.

For list of attendances see pages 11 and 12.

## STREET NOMENCLATURE.

Orders were received from the London County Council for the re-naming Streets, abolishing subsidiary names, the re-numbering houses in the following, viz:—

Brecon Road, re-numbered and subsidiary names abolished.

Cow Lane, re-named as Colet Gardens.

Mulgrave Road, re-numbered and subsidiary names abolished.

# SALE OF FOOD AND DRUGS ACT, 1875.

One hundred and eleven samples were analysed during the period ended 25th March, 1893, under the provisions of the above and amending Acts, viz.:—

Milk ... ..	59	Port Wine ... ..	3
Coffee ... ..	24	Gin ... ..	1
Cocoa ... ..	2	Butter... ..	9
Pepper ... ..	5	Vinegar ... ..	2
Citrate of Magnesia ...	4		
Whiskey ... ..	2		
			<hr/>
			111
			<hr/>

Adulterations were detected in 13 cases, viz.:— 4 cases of milk (the proportion of added water being from 10 to 42 per cent.) 2 of cocoa, 2 of coffee, 1 of vinegar, and 4 citrate of magnesia. Summonses in respect to these cases were heard before the magistrates, when convictions were obtained in 6 cases, and fines and costs inflicted amounting to £40 7s. 6d., all of which have been recovered.

## LAMMAS RIGHTS.

Metropolitan  
Asylums Board  
Wharf.

The Solicitor having reported that the Metropolitan Asylums Board had enquired whether in the event of Lammas Rights being sustained the Vestry would accept compensation in respect of their property, the Vestry, on the 30th March, 1892, resolved that the Board be informed that the Vestry would accept compensation.

Fulham Vestry  
at Harwood.

The Solicitor having on the 3rd August, 1892, reported hereon, as follows:—

## FULHAM VESTRY *at* HARWOOD.

I have carefully perused and considered the letters from Mr. Sherry, of the 14th ult., and from Messrs. Last and Sons of the 22nd ult., and I am of opinion that the compensation mentioned in both those letters is not such as your Committee would be justified in recommending the Vestry to consider, as the actions have been defended, for the purpose of acquiring open spaces for the use of the public, and I think the County Council and others of the public might well complain if the Vestry were to receive mere compensation for the loss of their rights in lieu of those open spaces.

I think, however, that your Committee might well recommend to the Vestry to agree to an Order of the Court as proposed by Mr. Sherry, provided that if the Vestry are successful in the actions, and if Lammas Rights be established, then the Arbitrators are to award to the Vestry, by way of compensation for the enclosure proposed to be made, such a sum as will enable the Vestry to purchase, in an equally convenient place within the parish, a plot of ground prescribed as an open space for ever, equal in area to the plot of ground to be enclosed, and also for

the Arbitrators to award such further sum as they may think fit, in respect of the loss to the Vestry incurred by reason of the enclosure of the said plot dividing the Lammas Lands into two parts.

when it was resolved that the letters of Mr. Sherry, and Messrs. Last & Sons, together with the report of the Solicitor, be printed and circulated amongst the members of the Vestry, and a copy sent to the London County Council, on the 28th September, 1892, the Solicitor was instructed (1) to prepare a *precis* of the whole matter in respect to Lammas Rights, showing the present position of the Vestry, for submission to the London County Council; (2) to inform the London County Council that the Vestry renew their offer to subscribe £1000 towards the costs of the proceedings, upon condition that the Council take the case up; (3) to inform Mr. Sherry and Messrs. Last and Sons that the Vestry have approached the London County Council with reference to the conduct of the case *re* Lammas Rights, and feel that they cannot enter into negotiations pending their reply.

Mr. Sherry, Solicitor to the Plaintiffs, on the 14th July, 1892, served Mr. Blanco White, the Vestry's Solicitor, with notice of trial of action, and on the 21st December, 1892, the Law and Parliamentary Committee reported to the Vestry that they had appointed a Sub-Committee to confer with the Solicitor and report with reference to the case Vestry *ats* Harwood, which Sub-Committee reported on the 1st February, 1893, as follows:—

#### VESTRY *ats*. HARWOOD.

Your Committee having been requested by the Solicitor to give directions as to the employment of professional searchers, to examine the old Court Rolls of the Manor of Fulham and the Parliamentary Records, appointed a Sub-Committee (whose appointment was confirmed by the Vestry on the 21st December, 1892), who report that having investigated the evidence already obtained by the Solicitor and the pleadings of the action, directed the Solicitor not to employ professional searchers, but to proceed with the obtaining of the evidence, and to prepare a case for the advice of Mr. Elton, Q.C., Mr. Casson, and Mr. Macaskie. The Sub-Committee further reported that they had the advantage of a consultation with the Counsel named, who advised them that, while there is every probability of the existence of Lammas Rights being established over the Town Meadows, in an action properly brought, yet in the present action, they considered the Vestry must fail, as they did not hold within the parish the qualifications necessary to entitle them to the exercise of these rights. The Sub-Committee were further advised that by consenting to judgment in the present actions, they would not hereafter, assuming that they acquire a proper qualification, be barred from establishing the existence of Lammas Rights.

Your Committee, therefore, recommend that the Vestry do instruct the Solicitor to consent on their behalf to judgment in the several actions brought against them in the terms asked in the respective statements of claim.

That the question of Lammas Rights be further referred to your Committee to consider and report:

This case came on for hearing in the Royal Courts of Justice, before Mr. Justice Kekewick, on the 17th, 22nd and 23rd February, 1893, when the Vestry were represented by Mr. Marten, Q.C., and Mr. Macaskie of Counsel, instructed by Mr. T. Blanco White, and Harwood's Trustees were represented by Mr. Warmington, Q.C., M.P., and Mr. Swinfen Eady, instructed by Mr. Sherry, when, after hearing the evidence of a large number of witnesses and the arguments of Counsel on both sides, the learned Judge gave his verdict against the Vestry, with 40s. damages, and costs, on High Court scale, to be taxed. At the meeting of the Vestry held on the 1st March, 1893, the following report from the Solicitor was read:—

#### HARWOOD *v.* THE VESTRY.

On Friday, the 17th February last, Mr. Marten, Q.C., and Mr. Macaskie moved the Court on behalf of the Vestry, that the Vestry being advised that they were not at the time of the trespass alleged in the Statement of Claim the owners or occupiers within the Manor of Fulham of any commonable lands upon which commonable beasts, levant and couchant, could be, an injunction might be granted restraining them, their servants or agents, from wrongfully entering upon the plaintiff's land in the Statement of Claim mentioned, or from wrongfully pulling down or damaging any fences thereon, or from wrongfully depasturing any horses, cows or other animals upon such lands, or any part thereof, with costs to be taxed. The Court ordered that the Vestry by their Counsel admitting that notwithstanding the allegations in the Statement of Defence, they were not at the time of the acts of trespass complained of by the plaintiffs seised of any lands, the seisin whereof might justify such alleged acts of trespass, and that the acts complained of by the plaintiff were done in respect of such a seisin then alleged, the action to proceed to trial on the question of damages only, and that the counter-claim pleaded by the Vestry be withdrawn.

On Wednesday, the 22nd February last, the action came on for trial before Mr. Justice Kekewick, and after hearing the evidence submitted by Mr. Warmington, Q.C., and Mr. Swinfen Eady on behalf of the plaintiffs, and Mr. Marten, Q.C., and Mr. Macaskie on behalf of the Vestry, directed the Vestry to pay the sum of Forty Shillings damages, with costs to be taxed.

Fulham Vestry *ats.* Lowenfeld.  
 " " Tod Heatley.  
 " " John Johnson.  
 " " Metropolitan  
 Asylums Board.

} On the 1st March, 1893, the Vestry instructed their Solicitor to stay these actions on the same terms as the action Fulham Vestry *ats.* Harwood.

## BISHOP'S AND WEST MEADOWS.

Conveyance to  
Vestry.

On the 13th April, 1892, the solicitor was instructed with reference to the conditions of Transfer of the West Meadow and Bishop's Avenue to the Vestry, and on the 24th May, 1892, he produced the conditions upon which the Ecclesiastical Commissioners were willing to convey the West Meadow to the Vestry, and the same were approved, and he was instructed to submit a draft Contract for the consideration of the Vestry. The agreement with the Lord Bishop of London and the Ecclesiastical Commissioners for the transfer of the West Meadow to the Vestry was produced to the Law and Parliamentary Committee, by whom it was approved on the 1st August, 1892, and, on their recommendation, it was sealed by the Vestry on the 3rd August, 1892. On the 19th December, 1892, the Solicitor was instructed by the Law and Parliamentary Committee to engage Mr. Casson, of Counsel, to settle draft Conveyance of the Bishop's and West Meadows to the Vestry, and on the 21st December, 1892, the Agreement of Conveyance.

Fencing and  
laying out.

The Vestry on the 14th September, 1892, instructed the Surveyor to obtain Tenders for the necessary iron fencing to be erected on the Bishops and West meadows in accordance with agreement, the fixing to be done by the Vestry's workmen, and on the 28th September, he was further instructed to proceed with the formation of the raised bed adjoining the moat. On the 9th November, 1892, the tender of Messrs. D. Rowell & Co. to supply and fix the fencing at £211 8s. 4d., was accepted. The Surveyor was on the 24th January, 1893, instructed by the Vestry to proceed with the fencing at the Bishop's meadow by the moat, and have the bed adjoining the moat planted by Messrs. Fromow in accordance with their schedule of prices for planting the recreation ground, and on the 15th February, 1893, it was resolved that a footpath 12 feet wide—to be tar-paved—be constructed along the river frontage of the Bishop's and West meadows, and that the adjoining 20 feet be made up with gravel, a row of trees to be planted between the tar-paving and the gravel. The tender of Mr. R. Neal, for the supply of shrubs and trees was accepted by the Vestry on the 1st March, 1893.

River Wall.

The Vestry after advertising, and referring the matter back three times, finally accepted, on the 3rd August, 1892, Mr. J. Mears' tender at £12,800 for the carrying out and construction of the river-wall. On the 12th October, 1892, the Solicitor was instructed to see the Solicitor of the London County Council with reference to Vestry's application for a loan for the river-wall, and the Surveyor was instructed to prepare a statement as to amount of loan to be applied for, and, on the 23rd November, 1892, the Solicitor reported as follows :—

“That since the last meeting he had been in communication with the Solicitor to the London County Council, with reference to the proposed loan of £7,800 for the River Wall, and had now

heard from him, that upon the Ecclesiastical Commissioners entering into an agreement to confirm the Conveyance to the late District Board in the year 1884, and to do other matters suggested by Counsel for the Council, they (the Council) will be prepared to favourably consider the Vestry's application for the loan,"

and he was instructed to prepare the necessary deed.

The Vestry also approved the action of the Surveyor in offering Mr. Mears 10d. per load for using the surplus material on the Bishop's meadow for backing up the river-wall, and that Mr. Mears acceptance of that offer was agreed to. The Clerk was, on the 21st December, 1892, instructed to write to the London County Council asking them to expedite the loan.

#### EELBROOK COMMON.

Tar-Paving  
Footpaths.

On the 30th March, 1892, Mr. E. A. Cornwall, L.C.C., reported to the Vestry that the Committee of the Council had decided to view Eelbrook with reference to the Vestry's application to have the paths tar-paved, and on the 11th May, 1892, Mr. Cornwall reported that the Committee had that day viewed the Eelbrook. As the result of the Committee's view, and of the opinions expressed by the Members of the Vestry present, headed by Mr. Cornwall, the Council have tar-paved the whole of the principal footpaths across Eelbrook.

Approach to

During the year the Vestry have caused gulleys to be constructed, and the approach to Eelbrook to be channelled, and the London County Council allowed the Vestry to connect these gulleys with their new drains on the Common.

Urinal.  
Accommodation.

In June, 1892, the Vestry referred the question of providing urinal accommodation for both sexes at the junction of King's Road with Wandsworth Bridge Road, to the Works Committee with power to act, and on the 20th July, 1892, the Works Committee recommended that the Clerk be instructed to prepare memorial to London County Council pointing out the great need of a public urinal for both sexes on Eelbrook Common, requesting them to grant a site and subscribe a moiety of the cost, and praying to be heard by deputation, and on the 9th November, 1892, the memorial as prepared by the Clerk was approved and sealed by the Vestry, and a deputation appointed, who waited on the London County Council on Thursday, the 24th November, 1892.

#### RECREATION GROUND, JUNCTION OF FULHAM PALACE AND CROWN ROADS.

Loans.

The seal of the Vestry was affixed to the Mortgages securing Loans of £5,400 and £1,900 in respect of the acquisition and laying out of the Recreation Ground on the 13th April, 1892 and

on the 20th July, 1892, the Clerk read letter from the London County Council as to the re-payment of £5,400 above referred to.

The Finance Committee on August 3rd, 1892, recommended the Vestry to make application to the London County Council to re-borrow the sum of £5,400 until the 1st January, 1893, or such time as Council's promised contribution was received; and the recommendation of the Committee was adopted.

On the 26th October, 1892, the Vestry directed that application should be made to the London County Council for permission to borrow and they (the Council) to lend the sum of £2,000 for the purpose of completing the laying out, &c., of the Recreation Ground.

On the 23rd November, 1892, the Finance Committee reported that having carefully considered the additional estimate for completing the laying out, &c., of the Recreation Ground produced by the Surveyor, application be made to the London County Council for permission to borrow and they (the Council) to lend the sum of £3,300, which recommendation was carried.

*Laying out of, &c.* On the 13th April, 1892, the Solicitor was instructed to report as regards tar-paving the footpaths by the Recreation Ground, which report was submitted to the Law and Parliamentary Committee at their meeting on the 25th April, 1892, and was referred by that Committee to the Lammas Rights and Open Spaces Committee, who reported to the Vestry on the 11th May, 1892, that they had ordered the question of the tar-paving of footpaths to stand over until the paths had been viewed.

On the 24th May, 1892, the Vestry on the recommendation of the Lammas Rights and Open Spaces Committee, ordered that the footpaths in Fulham Palace Road and Crown Road, abutting on the Recreation Ground, be temporarily repaired by being tar-paved.

On the 3rd August, 1892, the Vestry instructed the Surveyor to cause the paths and playground at the Recreation Ground to be tar-paved, and that so soon as the beds at the Recreation Ground between the proposed paths and the Fulham Palace and Crown Roads had been formed, to have the same sown with grass seeds.

On the 12th October, 1892, the Vestry on the recommendation of the Lammas Rights and Open Spaces Committee, directed advertisements to be issued for tenders for the supply and planting of the trees and shrubs required for the Recreation Ground, and on the 26th of the same month, the tender of Messrs Fromow and Sons for the supply and planting of trees and shrubs was accepted, and on the 9th November, 1892, the Surveyor's plan shewing the proposed position of the trees and shrubs was approved, and he was instructed to have the same carried out.

Extension of time  
for the laying out  
&c.

On the 30th March, 1892, the Chairman of the Vestry (Mr. Cornwall, L.C.C.) informed the Vestry that their application for the extension of time for the laying out of the Recreation Ground had been considered by the Parks and Open Spaces Committee of the Council, who had decided to recommend the Council to accede to the Vestry's application, although a letter had been addressed to the Council by the Metropolitan Public Gardens Association, pointing out that the Vestry were excavating sand.

The Lammas Rights and Open Spaces Committee reported to the Vestry on the 27th April, 1892, that having considered the following letter from the London County Council—

The Council has had under consideration the request of the Vestry of Fulham for an extension of the time for the laying out as a recreation ground of certain land at the corner of Crown Road and Fulham Palace Road, which was a condition attached to the Council's contribution of £5,625. The Council is willing to extend the time for six months from the 30th June next, but having regard to the circumstances which induced it to attach such a condition to its promised contribution, the Council can only accede to the extension on the distinct understanding that the Vestry is not at liberty to remove any gravel or sand from the ground, or to deposit thereon any dust bin or other offensive refuse, and the Council has directed its Architect to see that such conditions, if accepted by the Vestry, are adhered to. they requested the Chairman with the Surveyor to see the Superintending Architect on the matter, and if necessary authorised the Surveyor to discharge the men excavating the sand and ballast.

Mr. Cornwall as Chairman of the Vestry on the 11th May, 1892, reported that the Parks and Open Spaces Committee of the Council had that day viewed the Recreation Ground and were extremely indignant at the action taken by the Vestry in excavating the sand and filling up with slop and rubbish, and it was resolved—

“That the Vestry do at once refrain from taking out more  
“sand from the Recreation Ground, and that they at once fill in  
“the trenches and inform the County Council accordingly, and  
“further that the County Council be asked whether they are still  
“willing to give the Vestry extended time for laying out the  
“Ground, and their promised contribution.”

The Lammas Rights and Open Spaces Committee reported to the Vestry on the 20th July, 1892, that they had received a letter from the London County Council requesting the Vestry to furnish an account shewing the quantity and value of all gravel removed from the Recreation Gound, and to satisfy the Council's Medical Officer of Health as to the harmless nature and condition of the rubbish used for filling in the ground at the points where the gravel had been taken out, and having heard the form of reply submitted by the Clerk, they approved same and ordered it to be sent off at once so that a definite reply might be received from the Council before their vacation, which report was adopted by the Vestry.

On the 3rd August, 1892, the Lammas Rights and Open Spaces Committee reported that they had viewed the Recreation Ground and had given the Surveyor instructions as to the position and levels of the footpaths, and on the 21st September, 1892, they further reported that they had instructed the Surveyor to have such sand as he could carted from the Recreation Ground to the Vestry's Depot in Munster Road, and to report the quantity at the next meeting of the Committee, no special labour to be employed in carrying out the work. Both these recommendations were adopted.

On the 12th October, 1892, it was resolved that the Carmen of Slop Carts be paid 4d. per load for each load of sand carted from the Recreation Ground to the yard at Munster Road, the sand to be loaded *after* the last load of slop has been shot, and that the matter be reconsidered at the next meeting of the Cartage Committee.

At the next meeting the Cartage Committee ordered the carting of the sand to the Vestry's yard by the slop carts to be discontinued, and instructed the Surveyor to employ all the spare horses in carting away the sand.

At the Vestry Meeting on the 23rd November, 1892, a letter was read from the London County Council informing the Vestry that provided they adhered strictly to the undertaking that no gravel should be dug up and removed from the Recreation Ground, and no offensive materials deposited there, and also that the laying out and planting should be completed by the 30th December, 1892, they would pay their promised contribution towards the purchase and laying out of the ground.

On the 1st March, 1893, the Lammas Rights and Open Spaces Committee reported to the Vestry that they had viewed the trees supplied by Messrs. Fromow at the Recreation Ground and found same satisfactory.

Gymnastic  
Apparatus, &c.

At the Meeting of the Vestry on the 9th November, 1892, the Clerk produced the following tenders for the supply of Gymnastic Apparatus for the Recreation Ground:—

	£	s.	d.
Mr. G. Spencer .. .. .	73	0	0
„ R. Cruwys .. .. .	75	0	0
Messrs. Heath and George .. ..	88	10	0

and it was resolved that the tenders be referred to the Lammas Rights and Open Spaces Committee with power to act, and at the same meeting the Surveyor was instructed to obtain prices for 2 giant strides, 4 swings, 6 horizontal bars, and 4 sets of parallel bars, and on the 23rd November, 1892, the Lammas Rights and Open Spaces Committee reported that they had accepted the tender of Mr. Spencer at £73.

Formal  
Opening of

At the Meeting of the Vestry on the 21st December, 1892, the Lammas Rights and Open Spaces Committee recommended—

“That the Recreation Ground be formally opened on Friday, the 30th December by the Chairman of this Committee, and that the London County Council, the Hammersmith Vestry, and the Kensington Vestry be notified to that effect,”

which recommendation was carried and the ground was accordingly formally opened on Friday the 30th December, at 2.30 o'clock in the afternoon by Francis Toovey, Esq., the Chairman of the Lammas Rights and Open Spaces Committee.

Bye-laws and  
Regulations for  
Control of  
Ground.

On the 24th January, 1893, the Lammas Rights and Open Spaces Committee reported that they had appointed a Sub-Committee to prepare Bye-laws for the Control of the Recreation Ground, and on the 1st March, 1893, it was *resolved*—

“That for the present no games be allowed at the Recreation Ground, except in the playground.”

Ground Keeper.

At the Meeting of the Vestry held on the 1st March, 1893, the Lammas Rights and Open Spaces Committee reported that the time had arrived when a Ground Keeper should be appointed for the Recreation Ground, and recommended that it be referred to them to settle the terms of appointment and issue the necessary advertisements inviting applications, and the recommendation of the Vestry was adopted, and on the 29th March, 1893, the Committee reported that in accordance with the instructions of the Vestry, they had ordered the Clerk to issue advertisements for a Ground Keeper at a salary of 30s. per week, the person to be appointed to be a practical gardener between 25 and 45 years of age.

#### MEDICAL OFFICER OF HEALTH.

Appointment of.

At the meeting of the Vestry on the 30th March, 1892,

It was *Resolved* :—

“That it be referred to the Sanitary Committee to consider and report in reference to the appointment of a Medical Officer of Health,”

and on the 13th April, 1892, that Committee reported

That, as twenty members of the Vestry had requested the Clerk to place on the Agenda for the next Vestry Meeting, notice as to the re-appointment of the present Medical Officer of Health, they had adjourned the question of the appointment of a Medical Officer of Health until further instructions have been received from the Vestry.

And at the same meeting it was *Resolved* :—

(1) That notice is hereby given to the Vestrymen of the Parish of Fulham under article 8 of "The Sanitary Officers (London) Order, 1891," this 13th day April, 1892, at one of the ordinary meetings of the said Vestry, that on the 27th day of April, 1892, at the next ordinary meeting of the Vestry, the proposed re-appointment of Dr. J. Edwin Cooney, D.P.H., as Medical Officer of Health for Fulham, under the aforesaid Order, will be made on the same terms of appointment as now existing, viz.:—at a salary of £400 a year, and the said Officer to give such time as is necessary to perform the duties of the office. The re-appointment to take effect on the termination of the present appointment on 8th June, 1892.

(2) That the Clerk be instructed to place the foregoing proposed re-appointment on the Agenda Paper, for the Vestry Meeting on the 27th April, 1892, and that such business to be taken at 8 p.m. or as soon after as possible.

On the 27th April, 1892, it was *Resolved* :—

"That Dr. J. Edwin Cooney, D.P.H. be re-appointed as Medical Officer of Health for Fulham, under "The Sanitary Officers (London) Order, 1891," on the same terms of appointment as now existing, viz.:—at a salary of £400 a year, and the said Officer to give such time as is necessary to perform the duties of the office. The re-appointment to take effect on the termination of the present appointment on 8th June, 1892.

And the Clerk was instructed to submit this resolution to the Local Government Board, together with the Vestry's resolution of the 13th April, 1892.

On the 24th May, 1892, the Clerk read letter from the Local Government Board, drawing attention to their letters of the 14th and 29th April, 1891, and stating that they were still strongly of opinion that having regard to the increasing population of the Parish, it was very desirable that the Medical Officer of Health should be required to devote his whole time to the discharge of his duties, and requesting the Vestry to give the matter their careful re-consideration, the question being of greater importance as the Officer appointed would hold the office permanently, when

It was *Resolved* :—

That the Local Government Board be informed in reply to their letter of 19th inst., that the Vestry of Fulham have already on two occasions—of which resolutions have been recently forwarded to the Board—considered the Board's letters dated 14th and 29th April, 1891, (written before the appointment of the present Medical Officer of Health) and the advisability of appointing a Medical Officer of Health to devote his whole time to the discharge of his duties, and acting on the Local Govern-

ment Board's request, they have again given the matter their careful consideration, and have resolved to abide by their previous decision in re-appointing Dr. J. E. Cooney the present Medical Officer of Health, at the same salary as before; he to devote so much of his time as may be necessary to the proper performance of his duties. The Vestry are aware that the present Medical Officer of Health cannot now be appointed for a limited period, and are convinced that with Dr. Cooney as Medical Officer of Health, the public health work of the Parish, as evidenced by the work done by him, and his annual and several special reports, would be well performed without his being required to devote his whole time to his duties.

The Vestry are of opinion that if it be necessary to appoint a whole-time Medical Officer of Health at the present time, according to the rate of increase of population in Fulham, it will be necessary to appoint an additional Medical Officer of Health, with whole time, every nine years.

Should the Vestry in the future find that the duties appertaining to the office of Medical Officer of Health are not being satisfactorily carried out on account of sufficient time not being devoted to the performance of the duties or other cause, they will not hesitate to make a change in the duties of such officer, Art. 12 of the Sanitary Officers' (London) Order, 1891, so as to require him to devote his whole time to the duties of this office, and in the event of his not acquiescing thereon, to determine his appointment.

But the Vestry are of opinion that the time has not yet arrived for them to require their Medical Officer of Health to devote his whole time to the duties of the office.

At the meeting of the Vestry of the 22nd June, 1892,

*It was Resolved:—*

That, having considered letter from the Local Government Board enclosing copy of letter from Mr. T. Weatherley, with reference to the re-appointment of Medical Officer of Health, the Clerk be instructed to forward extracts from the minutes of the Vestry in reference to the re-appointment of Medical Officer of Health to the Local Government Board, and further, that the Local Government Board be informed that the Vestry in no way agree with the observations of Mr. T. Weatherley, and do hereby confirm the resolution of the Vestry of May 24th, 1892, the view therein expressed being the result of most careful and deliberate consideration of the Vestry for some time past.

On the 3rd August, 1892, the Clerk read a letter from the Local Government Board, in which they stated, that while they regretted that the Vestry had not seen fit to appoint a person to devote his

whole time to the duties of the office, they had decided to offer no further objections to the proposed arrangements, and accordingly consented to the re-appointment of Dr. Cooney, and approved of the payment to him of a salary at the rate of £400 per annum for his services.

Complaint against  
re 30 to 40 Moore  
Park Road.

On the 9th November, 1892, the Law and Parliamentary Committee reported as follows, viz. :—

That having considered a reference made to us by the Sanitary Committee with regard to a letter of complaint *re* houses 30 to 40 Moore Park Road, which this Committee were requested to investigate, we report and recommend :—

That the authorship of the letter having been acknowledged by the Medical Officer of Health, the Vestry do accept the ample apology made by him for it,

and further state that the Medical Officer of Health agreed to tender a written apology to Mr. Warne in the matter.

After a very long discussion it was ultimately decided to appoint a Committee of the whole Vestry, to enquire into the whole of the proceedings concerning the Medical Officer of Health.

On 23rd November, 1892, the Special Committee reported :—

That the Vestry find that the removal of Dr. J. Edwin Cooney from the office of Medical Officer of Health of this Parish, is necessary, in the general interests of the district and because of his misconduct, that he is hereby requested to resign the office of Medical Officer within a month from this date ; and that in accordance with the Public Health (London) Act, 1891, section 108, sub-section 2, clause " b," representation of the complaints against Dr. Cooney be made to the Local Government Board and their assent be asked as to the course adopted by the Vestry. Provided that the Local Government Board be further informed, that if their Honourable Board are of the opinion that it is more desirable that a public enquiry should be held by them at the Town Hall, Fulham, into the charges against Dr. Cooney, the Vestry would offer no objection to their so doing.

Which report after considerable discussion was carried on a division by 37 to 16, and as an original motion by 46 to 1.

The Special Committee also presented for adoption by the Vestry, the representation to be made to the Local Government Board, which was approved.

On the 13th December, 1892, the Clerk read the following letter from the Local Government Board, viz.

Sir,

Whitehall, S.W.,  
7th December, 1892.

I am directed by the Local Government Board to acknowledge the receipt of your letters of the 25th ultimo and the 2nd instant, with reference to the proceedings of Dr. J. E. Cooney as Medical Officer of Health for the Parish of Fulham.

I am directed to state that the Board think it desirable that, in the first instance, the specific circumstances which have led the Vestry to request the Board to assent to Dr. Cooney's resignation of the above-mentioned office being required, should be stated in a more definite form.

I am, Sir, your obedient Servant,

(Signed) WILL. E. KNOLLYS,  
Assistant Secretary.

W. J. H. Denselow, Esq.,

Clerk to the Vestry of the Parish of Fulham.

And it was *Resolved* :—

That the resolution and representation passed by the Vestry on the 23rd November, 1892, be referred to the Solicitor to prepare in a definite form in accordance with the letter from the the Local Government Board.

On the 19th December, 1892, the Solicitor presented the statement prepared by him which was sealed and ordered to be forwarded to the Local Government Board.

Suspension of      At the meeting of the Vestry held on the 18th January, 1893.

It was moved by Mr. Lawrence and seconded by Mr. G. Williams :—

“ That having further considered the matter, together with letter from the Local Government Board, asking for the Vestry's observations on a letter from Mr. W. Firth, the tenant of No. 21, Tournay Road, complaining of the inaction of the Vestry and its officials, and having also considered the report of the Medical Officer of Health on the subject, your Committee have given the Solicitor and Clerk instructions as to preparing the Vestry's observations for consideration at an adjourned meeting of this Committee, to be held on Tuesday, the 17th January, at 7 p.m., and *recommend* that Dr. J. Edwin Cooney be suspended from the office of Medical Officer of Health pending the decision of the Local Government Board.

After a long discussion the motion was carried by 32 votes to 24, when a division was claimed when there voted : For the motion, 33 ; against, 26.

The motion was therefore declared carried, and on the same date the Vestry adopted a Supplemental Report from the Sanitary Committee, recommending that Inspector Croucher should be censured by the Chairman of the Sanitary Committee, and also submitting the Vestry's observations on the letter from the Local Government Board, *re* 21, Tournay Road.

Resignation of. On the 15th February, 1893, the Clerk read the following letter from Dr. J. Edwin Cooney, resigning his position as Medical Officer of Health for Fulham:—

Town Hall, Walham Green, S.W.  
February 10th, 1893.

Sir,

As you are aware, the Sanitary Authority of Fulham having made certain allegations against me, and without waiting to hear the result of their representations to the Local Government Board, suspended me on the 18th January, 1893, on a frivolous charge, which even the Magistrate, by his action, shewed arose through no fault of mine, and which charge the Local Government Board have apparently considered so unimportant and unnecessary, that I have not even been troubled for my observations on or reply to such.

After this unjustifiable action on the part of the Vestry, and after having waited for four weeks without having heard from the Local Government Board, before whom I have so completely defended myself against the previous allegations, there is no course open to me but to place this, my resignation, in the hands of the Vestry, as it would be impossible for me—who have been denied the barest justice by such body—to continue to serve as the Medical Officer of Health of Fulham in the interests of the public.

I am, Sir, yours faithfully,

(Signed) J. EDWIN COONEY,

To the Clerk to the Medical Officer of Health of Fulham.  
Vestry of Fulham.

It was *Resolved* by 28 votes to 2:—

That Dr. J. Edwin Cooney's resignation be accepted by the Vestry, in accordance with the resolution passed by the Vestry on the 23rd day of November, 1892, with charges already formulated and sent to the Local Government Board, but the Vestry entirely disclaim the reasons set forth in the letter of resignation dated 10th February, 1893, and that a copy of such letter be forwarded to the Local Government Board for any observations they may wish to make thereon.

On the 1st March, 1893, the Clerk read a letter from the Local Government Board as follows, viz. :—

Local Government Board,  
Whitehall, S.W.  
21st February, 1893.

Sir,

I am directed by the Local Government Board to acknowledge the receipt of your letter of the 16th instant, and, in reply, to state that, as Mr. J. E. Cooney has resigned his appointment as Medical Officer of Health for the Parish of Fulham, it does not appear to the Board necessary for them to offer any comments on his letter of the 10th instant.

The Board request that the particulars of the appointment of a successor to Mr. Cooney in the above mentioned Office, may be communicated to them in one of the enclosed forms.

I am, Sir,

Your obedient Servant,

W. J. H. Denselow, Esq.,  
Clerk to the Vestry of the  
Parish of Fulham.

WILL. E. KNOLLEYS,  
Assistant Secretary.

### TOWN HALL.

Lettings. During the year ended 25th March, 1893, the Town Halls have been let as follows :—

Quarter.	Occasions Hired.	Fees Received.		
		£	s.	d.
March to June, 1892 ... ..	16	72	4	0
June to September, 1892 ... ..	9	25	0	0
September to December, 1892 ... ..	57	164	11	2
December, 1892 to March, 1893 ... ..	76	216	6	6
Total ... ..	158	£478	1	8

The fees received during the year ended 25th March, 1892, amounted to £313 15s.

Living Rooms in  
the Basement.

On the 21st September, 1892, the Town Hall Committee reported to the Vestry, that, having received a notice from the Public Health Department, requiring the Vestry to discontinue to allow to be occupied the Caretaker's room in the basement of the Town Hall as sleeping rooms, the Hall-Keeper be given notice to quit the rooms and a Night Porter be appointed at a salary of 30s. weekly, which report was adopted.

On the 12th October, 1892, the Vestry instructed the Clerk to issue advertisements for a Night Porter, the hours to be from 6 o'clock p.m. to 7 o'clock a.m., Sundays excepted.

Hall Porter and  
Messenger.

On the 1st March, 1893, a notice of motion by Mr. Thomas for the appointment of a Hall Porter and Messenger was referred to the Town Hall Committee, and on the 29th March, 1893, the Town Hall Committee recommended that an officer should be appointed to act as Hall Porter and Messenger at a salary of 25s. a week and uniform, which recommendation was adopted by the Vestry, and on the same date the duties of the Hall and Assistant Hall-Keeper and the Hall Porter and Messenger were produced by the Committee and approved by the Vestry.

Insurance.

On the 13th April, 1892, the Town Hall Committee reported to the Vestry that they had instructed the Clerk to at once obtain from the Royal and British Mercantile Fire Insurance Offices, the terms upon which they would insure the Town Hall Furniture and Fittings for £3,000, and to report the result of his enquiries at the Vestry Meeting on the 13th April, 1892. The clerk produced the replies which he had received, and it was *Resolved* :—That they be referred to the Town Hall Committee; who reported to the Vestry on the 27th April, 1892: that the tender of the North British and Mercantile Insurance Company for the Insurance of the Furniture and Fittings of the Town Hall, as per inventory prepared by the Clerk to the Vestry, for the sum of £3,000, at £3 per annum be accepted, and that the Company be asked to submit draft policy for the inspection of the Committee. This was unanimously adopted, and on the 11th May, 1892, the Law and Parliamentary Committee reported that they had approved of the form of policy for the Insurance of the Town Hall Furniture and Fittings.

On 6th July, 1892, the Town Hall Committee reported that they had given instructions for prices to be obtained for the insurance of the glass in the Town Hall, but, subsequently, in consequence of the quotation being higher than the Committee had anticipated, no action was taken in the matter.

Hall Keeper.

On 7th December, 1892, the Clerk submitted a Medical Certificate accounting for Hall Keeper's absence from duty from 14th to 17th December, and reported that he had employed one of the Vestry's workmen as a temporary assistant during that time. The Vestry approved of the Clerk's action, and authorised him to employ the man when necessary, but only for the ordinary hours.

Decoration, &c.,  
of.

I should like as responsible Manager for the Town Hall to call the attention of the Vestry to the unfinished condition of the interior of the Town Hall and Offices, in consequence of their not having been decorated, and to state that I feel sure that the building would let infinitely better were it properly decorated.

## CONCLUSION.

Appended to this report will be found the Balance Sheets, &c., of the various Charities of the parish, of the Churchwardens and Overseers as regards Precepts, the Burial Board and a report of the Public Analyst, all of which have been ordered by the Vestry to be printed with this report.

I cannot, however, close this report without tendering my best thanks to the whole of the officers in my Department for the able assistance they have rendered me during the past twelve months.

I have the honour to remain,

Gentlemen,

Your most obedient Servant,

W. J. HELLIER DENSELOW,

*Clerk to the Vestry.*

# STATEMENT OF THE ACCOUNTS of the CHARITY called the FULHAM CHURCH HOUSE.

In the Parish of Fulham, in the County of London, of which the following Persons are the Trustees, viz., Vicar and Churchwardens,  
J. Wray, Esq., Aragon House, Parsons Green, S.W.

Frank Manby, *Hon. Treasurer*, Wensum House, Hurlingham, S.W.

**AUDITOR'S CERTIFICATE.**

*Metropolis Management Rates, 25th March, 1893.*

We have this day examined the accounts of the Churchwardens and Overseers, for the year ending 25th March, 1893. We find the balance due to the Overseers to be £206 14s. 10½d., and note that the amount to be collected for the last half-year was £42,807 2s. 10½d., but there was only a collectable amount of £463 8s. 10½d. outstanding at the close of the Rates.

We consider the manner in which the Books have been presented to us for Audit by Mr. ROBINSON, have most considerably diminished the duties devolving upon us, and we would further take the opportunity of expressing our appreciation of the most efficient manner in which Mr. ROBINSON carries out the duties of his office.

Dated this Eighteenth day of May, 1893.

(Signed) A. G. SPELLS, } Auditor under the Metropolis

We have examined the Accounts of the Burial Board for the year ending March 25th, 1893. And it is our pleasure as in former years to express our satisfaction with the admirable manner in which the Accounts are kept, and the books presented to us for Audit, more particularly when we consider the enormous amount of labour involved in such an increasing Parish, where the Burials alone have more than doubled during the past six years.

5th May, 1893.

(Signed) A. G. SPELLS,  
HENRY T. HARRISON,  
WILLIAM DARBYSHIRE,

Auditors of Accounts  
for the  
Parish of Fulham.

Chemical Laboratory,  
43 and 44, Holborn Viaduct, E.C.,  
London, June 24th, 1893.

To the Chairman and Members of the Fulham Vestry.

Mr. Chairman and Gentlemen,

I beg to present to you my report, as Analyst to the Vestry of the Parish of Fulham, for the year ended on March 31st, 1893. During the year, one hundred and one samples of Food and Drugs were received by me for analysis. Of these samples, thirty-one were obtained by Mr. Inspector A. A. Croucher, thirty by Mr. Inspector W. H. Grigg, and forty by Mr. Inspector C. B. Jones. The Surveyor to the Vestry, Mr. J. P. Norrington, A.M.I.C.E., also submitted to me for analysis one sample of white lead (date of receipt, May 6th, 1892), and two samples of creosote oil (dates, August 9th, 1892, and March 27th, 1893). The total number of samples analysed and reported on was therefore one hundred and four.

Taking the population of Fulham, shown by the census of April, 1891, namely 91,640, the number of samples obtained during the year, for analysis under the Sale of Food and Drugs and Margarine Acts, was equivalent to one sample for every 907 persons.

The samples of food and drink comprised forty-nine of milk, nine of butter, twenty-four of coffee, two of cocoa, five of pepper, two of vinegar, three of port wine, and one each of gin, Scotch whiskey and Irish whiskey. The only drugs received for analysis were four samples of citrate of magnesia.

Below (Table I), is a tabular statement of the numbers of the several articles submitted to analysis during the four quarters of the year :—

TABLE I.

Articles Analysed.	During First Quarter.	During Second Quarter.	During Third Quarter.	During Fourth Quarter.	Total for Year.
Milk .. ..	7	20	22	..	49
Butter .. ..	..	3	6	..	9

The numbers of genuine and sophisticated samples during the year ending March 31st, 1893, are compared in the next table (Table III.) with the corresponding figures for the years 1887—90, taken from the reports for those years of the Local Government Board, and with the figures for 1891—92:—

TABLE III.

YEAR	1887.	1888.	1889.	1890.	1891—92.	1892—93.

Adulterated ...	13	10	14	6	48	12
Totals.....	85	149	135	82	212	101

The degree and kind of adulteration and the magisterial decisions given during the year, with the penalties inflicted, are briefly set forth in Table IV. For the particulars relative to the proceedings taken by the Vestry, I am indebted to Mr. W. J. H. Denselow, the Clerk of the Vestry.

The samples of creosote oil, received from the Surveyor to the Vestry, were reported to be of satisfactory quality, but the sample of white lead was found to contain an admixture of sulphate of barium.

## REMARKS.

As on the occasion of my report for the year ended on March 31st, 1892, I avail myself of the occasion to name some articles of food and drugs, samples of which might well be submitted to analysis from time to time. Among articles of food, bread, cheese, condensed milk, flour, oatmeal, lard, yeast, confectionery, tinned meats, meat extracts, pickles, sauces, olive oil, mustard, preserves, soda water, beer, rum and brandy; and among drugs, cream of tartar, precipitated sulphur, syrup of squill, syrup of poppies, syrup of senna, rhubarb, glycerine, paregoric, spirit of nitrous ether, compound liquorice powder, antimonial wine, wine of ipecacuanha, saffron, sal volatile, wine of quinine, tincture of quinine, ammoniated tincture of quinine, citrate of iron and quinine, mercury with chalk, Fowler’s solution, fluid magnesia, solution of perchloride of iron and rectified spirit, occur to me as articles which might undergo investigation. From the parti-

culars given in Tables I and II of this report, it will be seen that no samples were obtained for analysis during the fourth quarter of the year, ending March 31st, 1893; but I believe that arrangements have been made by which samples will in future be more regularly and systematically purchased for analysis. To the desirability of this I ventured to call attention in my report for the previous year. Apart from the punitive effect of the legal proceedings in cases of proved adulteration, the moral influence of an organised system of periodical collection of samples (of *all* kinds of foods and drugs in common use) is doubtless distinctly protective to the inhabitants of a parish. And the practice, which is customary in some districts, of sending letters of caution to vendors of samples certified to be of a suspicious character, or of a poor or of an inferior quality, and of articles found to be *slightly* adulterated for the *first* time ("first offences"), might with advantage be adopted.

The Annual Reports of the Local Government Board show that but little advantage is taken of the clause of the Sale of Food and Drugs Act, 1875, by which private purchasers are enabled to submit samples to Public Analysts: thus, of the 29,028 samples analysed throughout England and Wales during the year 1891, all but 177 were taken by officers of local authorities. No samples coming under this clause have been submitted to me during the year ending March 31st, 1893.

It is satisfactory to observe that the proportion of adulterated to total samples analysed (all articles together) during the year ended on March 31st, 1893, as shown by Table II, is much lower than in the preceding year; but due regard must be had to the circumstance that the total number of samples examined in 1892-93 was very considerably less than in 1891-92. Had the total number for 1892-93 been greater, a very different ratio might have resulted; and the value of the comparison between the two years is thus somewhat discounted. Nevertheless, the figures are clearly indicative of a decided improvement, as regards purity, with respect to several of the articles examined. This applies especially to milk and coffee, of each of which a considerable number of samples received attention; also, in some degree, to butter, of which, however, fewer samples were analysed. The improvement in the case of coffee was so marked, that reference was made to it in my quarterly report, dated December, 31st, 1892. Further remarks on this subject will be found below.

*Milk.*—Of the forty-nine samples of milk submitted to analysis, three samples were certified to be adulterated, and eight samples were reported to be of poor or inferior quality. The proportions of added water in the samples returned as adulterated were, respectively, 18, 26 and 42 per cent.; and the sample containing 42 per cent. of extraneous water had also been deprived of 42 per cent. of fat. It is probable that some of the samples described as "poor" or "inferior" were not free from sophistication: but as Public Analysts are compelled, by circumstances beyond their control, to form conclusions

from calculations based on very low limits of quality, it is not possible to return samples of this class as adulterated.

The addition of water, and removal of fat, continue to be the customary forms of milk adulteration; but other substances than water, such as starch and sugar, are occasionally added; and the use of one or another preparation of boracic acid, introduced as a preservative, is prevalent; though much difference of opinion exists as to whether boracic acid should or should not be regarded as an adulteration.

It is evident that a distinct improvement may be recorded in the quality of the milk vended in the Parish of Fulham, for the year ending March 31st, 1893, as compared with the previous year. This may be explained partly by the greater adequacy of the fines imposed, in most of the cases of food adulteration, particulars of which have been given in Table IV. It may be remembered that in my report for the year ending 31st March, 1892, attention was drawn to the smallness of the fines so often inflicted, and to the remarks upon this subject in the Report of the Local Government Board.

It is pleasant to be able to record that, in at least two cases, the samples of milk submitted to me were above the average in point of quality.

*Butter.*—Only nine samples of butter were subjected to analysis, but it is satisfactory to be in a position to state that all were genuine and of fair quality. As far as a judgment can be based upon this somewhat small number of samples, there is here an improvement as compared with the previous year.

*Coffee.*—Of the twenty-four samples of coffee examined, two were certified to be adulterated with chicory, the quantities of the extraneous ingredient being 16 and 55 parts respectively. These results may be fairly compared with those for the preceding twelve months, during which period twenty-nine samples of coffee were analysed, no less than eight of which were adulterated; and more than 50 per cent. of chicory was present in most of the adulterated samples. Here, then, is a very marked improvement indeed, the proportion of adulterated to total samples being, for 1892-93, less than one-third of that for 1891-92 (*v.* Table II: *cf.* Table II, Report for 1891-92.)

*Cocoa.*—The two samples of cocoa submitted to analysis contained large proportions of added starch and sugar: but proceedings were successful in one instance only (Table IV).

*Vinegar.*—One of the two samples of vinegar was certified to contain an insufficient amount of acetic acid: the quantity present was, in fact, only  $2\frac{1}{2}$  per cent., or less than half of the per centage of acetic acid which "vinegar" contains, according to the British Pharmacopæia.

*Citrate of Magnesia.*—All the samples of this drug were found to contain unduly large proportions of sugar; quantities so great, indeed, as to interfere with the effervescent property of the mixture: the samples were therefore considered to be not of the nature, substance and quality of the article demanded by the purchaser.

The rest of the samples of food were certified to be genuine, and need not be further referred to.

SALE OF FOOD AND DRUGS ACT (1875) AND MARGARINE ACT (1887)  
AMENDMENT BILL No. 213).

In a separate report dated April 25th, 1893, I have already dealt with the merits and demerits of this Bill, which is a modification of, and in some respects an improvement upon the "Sale of Food and Drugs Act (1875) Amendment Bill" (No. 168), to which I called the attention of the Vestry in my report, dated June 10th, 1892, for the year ended on March 31st, 1892.

In conclusion, I would acknowledge the courtesy uniformly extended to me by all the officials of the Vestry with whom I have been in communication.

I have the honour to be,

Mr. Chairman and Gentlemen,

Your obedient Servant,

E. GODWIN CLAYTON, F.I.C., F.C.S.

*Public Analyst to the Vestry; Member of the Society of Public Analysts;  
Gas Examiner to the City of Coventry, etc., etc.*

## ANNUAL REPORT

ON THE

ACCOUNTS TO THE VESTRY

FOR THE YEAR 1892-3

PRESENTED AT

THE ANNUAL MEETING OF THE VESTRY

HELD ON THE 14TH DAY OF

SEPTEMBER 1893

FORNIT H. MEYER

OF THE PARISH OF ST. ANDREW

PRESENTED TO THE VESTRY

# ANNUAL REPORT OF THE ACCOUNTANT, TOGETHER WITH THE CERTIFICATE OF THE AUDITORS OF ACCOUNTS.

*For the Year ended March 25th, 1893.*

---

MR. CHAIRMAN AND GENTLEMEN,

I beg to present to you my Seventh Annual Report of the various matters connected and dealt with in my department, relative to the finances of the Parish, for the period above stated, together with the abstracts of the Accounts for the financial year, 1892-3, duly audited in accordance with section 196, cap. 120, of 18 and 19 Victoria; annexed also is a statement of the Contracts entered into by the Vestry from the 26th March, 1892, to 25th March, 1893. Appendix I. shows the rates levied in Fulham from 1876-7 to 1892-3, and Appendix II. the amounts paid to all outside bodies during the same period, over which the Vestry have no direct control.

In conclusion, I have to thank the Members and Officials of the Vestry for the assistance rendered to me in the carrying out my duties during the past year.

I remain,

Mr. Chairman and Gentlemen,

Your obedient Servant,

ROBERT H. MEYER, F.S.A.A.,

Accountant to the Vestry.

To the Chairman and Members  
of the Vestry of the Parish of Fulham.

---

## ASSESSMENTS, &c.

The Parish of Fulham comprises an area of 1,716 statute acres, with a rateable value on the 6th April, 1893, of £471,168; the following statements, showing the number of houses, population, &c., since 1856, the first year of the Metropolis Management Act (1855), will give the Parishioners some idea of the rapid growth of the Parish.

### I.—RATEABLE VALUE, &c.

The annual Rateable Value of Property in the Parish, as per County Rate Assessment or like estimate, and the amount 1d. in the £ will produce,

Year.	Rateable Value.	Amount which would be raised by a rate of 1d. in the £ gross.

1891	13,666	91,640 „	7½ „
1893	15,000	100,000—estimated	7 „

## TREASURER, BANKERS, &amp;c.

In conformity with the Metropolis Management Acts, the Vestry have appointed a Treasurer, who is Mr. M. H. Wilde, the Manager of the Walham Green Branch of the London Provincial Bank, Limited, where, for facilitating the Vestry's financial business, five distinct banking accounts are kept, which are worked as follows:—

## No. 1.—GENERAL ACCOUNT,

*For the receipts and payments of Rates and general business of the Vestry.*

## No. 2.—NEW STEETS ACCOUNT,

*For the receipts and payments in relation to new streets.*

## No. 3.—LOANS AND PERMANENT WORKS ACCOUNTS,

*For the receipts and payments in connection with Loans, &c., for Permanent Works.*

## No. 4.—WAGES ACCOUNT,

*For the payment of weekly wages (drawn on by the Clerk and Accountant).*

## No. 5.—PRIVATE WORKS ACCOUNT,

*For receipts and payments relating to deposits for connection of house drains, licenses for hoardings, &c.*

In addition to which, temporary Deposits and other Accounts are opened, when the balances on the Current Accounts are considered excessive, or as occasion requires.

## LOANS.

The total amount due on Mortgages, as per Register, at 25th March, 1892, was £83,780 8s. 0d., while at 25th March, 1893, it stands at 91,782 17s. 4d. (under 19½ per centage of the rateable value). The following statement will show the operations during the past year. :—

	Amount borrowed.			Amount paid off			Amount outstanding 25th Mar.. 1893.			Remarks.			
	£	s.	d.	£	s.	d.	£	s.	d.	£	s.	d.	
GENERAL RATE. . .	101,282	0	0	29,638	0	0	71,644	0	0				
Do. Amount borrowed during 1892-93 ..	24,200	0	0										
Do. Amount paid off during 1892-93 ..				14,945	13	4

Total ..							80,898	6	8	Increase	9,254	6	8
SEWER RATE ..	19,132	12	0	6,996	4	0	12,136	8	0				
Do. Amount borrowed during 1892-93 ..	Nil												
Do. Amount paid off during 1892-93 ..				1,251	17	4							
Do. Amount Decrease during 1892-93 ..							1,251	17	4	Decrease	1,251	17	4
Total ..							10,884	10	8				
Totals 25th March, 1893..	144,612	12	0	52,831	14	8	91,782	17	4				

The net increase on the Loan accounts for 1892-93 amounts to £8,002 8s. 4d.

NOTE.—On the 26th March, 1886, the Vestry took over Loans to the amount of £44,014 12s. from the late Fulham District Board of Works, so that the net increase for the seven years amounts to £47,768 5s. 4d., out of which the Town Hall, stables, wharf, open spaces, river wall, Bishop's Meadows and other properties, together with miles of wood paving and numerous improvements, have been provided.

## PROPERTY ACCOUNT.

This account, which was opened in March, 1887, with a view of keeping separate from the Rate Accounts, as far as possible, the cost of purchasing and providing stables, wharf, mortuary, &c., has now been closed, and the following details are extracted therefrom:—

DATE.	RECEIPTS.	£	s.	d.	DATE.	PAYMENTS.	£	s.	d.
1887	Trustees of the late Fulham District Board for part of their cash assets	774	15	0	1887	Cost of Freehold site for stables, Munster Road	1,500	0	0
1888	Do. do. (paid by the Hammersmith Vestry)	7,241	3	1	1888	Do. do. wharf, Putney Bridge	1,500	0	0
„	Metropolitan Board of Works, for stable and wharf site loan	3,000	0	0	„	Do. do. Town Hall site Fulham Road, S.W.	2,890	0	0
1889	London County Council for loan to erect stables	5,100	0	0	1889	Cost of erecting stables, paving and draining yard, building workshops, &c. (total cost £5,826 1s. 8d.) charged to this account	5,563	14	4
1890	Do. do. to construct wharf	2,500	0	0	1890	Cost of erecting public Mortuary, Coroner's Court, &c., charged to this account	1,023	11	7
1892	Bowden & Co., for half cost of party wall at Toll House Wharf, s.w.	35	18	11	1891	Cost of constructing wharf at Old Toll House site, erecting a steam crane and building party wall, &c., charged to this account	2,560	5	10
					1892	Balance transferred to the Town Hall Building Account to reduce the excess of expenditure over receipts on that account	3,614	5	3
							<u>£18,651</u>	<u>17</u>	<u>0</u>

## TOWN HALL FUND.

During the year 1892-93 the Vestry have expended sundry amounts out of the Revenue Account for repairs, &c., but the Building Account is now finally closed, and the necessary decorations, &c., will have to be provided for out of the current expenditure, or done at the expense of the Improvement Account. Annexed is a statement of the cost incurred in the erection, furnishing, &c., of the building:—

## STATEMENT OF COST OF TOWN HALL BUILDING, &amp;c.

## IMPROVEMENT ACCOUNT.

As previously stated, this account was opened in 1888, with a view of providing for small items of improvement works of a permanent nature, instead of carrying them to a Loan Schedule Account to be charged to future rates.

The following abstract shows the total receipts and payments from the commencement to 25th March, 1893.

RECEIPTS.			PAYMENTS.

## CONTRIBUTIONS TO LOCAL IMPROVEMENTS.

The only item under the heading received by the Vestry during the past year, is on account of purchasing and laying out Recreation Ground at corner of Crown Road and Fulham Palace Road, London County Council, £5,529.

## LOAN SCHEDULE.

During the past year no application for a Loan for Scheduled works was made to the London County Council, but on last year's Schedule the Council has granted Loans to the amount of £2,600, being less than one half of the amount applied for.

## HAMMERSMITH VESTRY.

During the year 1892-93, the total sum of £541 17s. 4d. has been paid to the above Vestry, being for the year's superannuations to retired officials of the late Fulham District Board of Works, and for part maintenance of Hammersmith Road.

## LOCAL TAXATION RETURNS.

Under 23 and 24 Victoria, c. 51, and 40 and 41 Victoria, c. 66, it is enacted that every Vestry, District Board, &c., shall make a return annually of the sums levied or received by or in interest of rates, taxes, &c., and of the expenditure thereof, to one of Her Majesty's Principal Secretaries of State.

Under the above Acts, the Statistical Department of the Local Government Board issue, during the month of July in each year, a form embracing the various heads of receipts and expenditure, and of loans, &c., employed by local authorities. In July, 1892, forms (in duplicate) for the Local Taxation Returns were received by this Vestry, and referred to me to fill up. This was duly done, and on my presenting same to the Finance Committee, they instructed the Clerk to return the form to the Local Government Board.

## PRECEPTS OF CORPORATE BODIES.

The Central Boards issuing precepts on the Vestry were the Metropolitan Board of Works and the School Board for London; now the latter only, as the precept of the London County Council, the successors of the late Metropolitan Board of Works, is made on the Guardians of Fulham Union, and so becomes chargeable on the Poor Rate instead of the Local Rates, as was formerly the case with the Consolidated Rate. The following statement will show the amounts paid by the Fulham Parish through the late District Board, the Fulham Vestry, &c., to the Metropolitan Board, over which they had no direct control.

Year ending March.	£	s.	d.	Rate of £ approximately.
1857	1,927	18	0	$9\frac{3}{4}$
1858	2,089	5	3	$9\frac{3}{4}$
1859	1,878	12	6	$8\frac{3}{4}$
1860	1,886	6	5	$8\frac{3}{4}$
1861	1,977	7	2	$8\frac{1}{2}$
1862	2,307	11	0	$9\frac{1}{2}$
1863	2,271	16	0	$9\frac{1}{4}$
1864	1,936	7	6	$7\frac{1}{2}$
1865	1,637	11	1	$6\frac{1}{4}$
1866	2,091	16	2	$6\frac{1}{2}$
1867	2,262	6	3	7
1868	2,690	16	0	$7\frac{3}{4}$
1869	2,584	18	10	$6\frac{3}{4}$
1870	1,502	3	2	$3\frac{1}{4}$
1871	2,317	0	8	$5\frac{3}{4}$
1872	1,564	7	10	$3\frac{3}{4}$
1873	1,420	14	6	$3\frac{1}{4}$
1874	1,439	5	9	$3\frac{1}{4}$
1875	1,879	12	0	$4\frac{3}{4}$
1876	2,374	4	6	$5\frac{1}{4}$
1877	2,194	4	3	$4\frac{1}{2}$
1878	2,292	5	3	$4\frac{3}{4}$
1879	2,395	17	9	$4\frac{3}{4}$
1880	3,041	13	3	$5\frac{1}{4}$
1881	3,474	2	5	6
1882	4,594	16	2	$5\frac{7}{8}$
1883	4,895	6	2	$5\frac{7}{8}$
1884	5,352	2	6	$5\frac{3}{4}$
1885	6,434	10	3	6
1886	8,180	17	0	$7\frac{1}{2}$
1887	9,626	1	4	7
1888	10,516	2	8	$7\frac{1}{2}$
1889	11,953	12	9	$8\frac{1}{2}$
1890 (1 quarter)	3,788	3	1	$2\frac{7}{16}$
TOTAL .....	£118779	15	5	

The School Board Precept for the year 1892-93 amounts to £19,140 2s. 7d. This is chargeable on the General Rate, and is equal to a rate of  $10\frac{1}{4}$ d. in the £, the amount being an increase of £390 9s. 0d. on the previous year's precept, and allowing for an increase in the rateable value of £25,535, as against the increase last year of £41,144, the Vestry are enabled—in the face of the increase in the amount of the precept, and decrease in the amount of the extra assessments—to decrease the rate by  $\frac{1}{4}$ d. in the £ on that of 1891-92.

The following statement shows the approximate amounts paid by this Parish for the cost of Elections, and to meet the School Board precepts since its incorporation:—

Year.	Total Precept.	Election Expenses.	Total paid for the Year.	Rate in £ approximately.
	£ s. d.	£ s. d.	£ s. d.	d.
1871—1872	199 10 10	31 14 6	231 5 4	$\frac{9}{16}$

TOTAL . . .	153,821 13 7	566 17 4	154,388 10 11	

The precepts for 1893-94 amount to £19,641 2s. 5d., equal to  $10\frac{1}{2}$ d in the £ gross.

## NEW STREETS.

With reference to the New Streets Accounts, during the past year, there has been received the sum of £19,747 6s. 2d. on account of Apportionments made. The amounts still due by contributors are—on old Roads, transferred to this Vestry by the late District Board of Works, the sum of £130 11s. 10d. and on the Streets taken to by this Vestry during the past six years the sum of £15,075 6s. 2d., making the total due on New Streets to be £15, 205 18s. 0d.

Statements of New Streets Account in detail will be found at the end of the Accounts.

Since the incorporation of the Vestry of Fulham, in March, 1886, there have been sealed 236 original apportionments for "New Streets" Paving and Sewering works, amounting to £129,856 6s. 5d., of this number, eighteen have been declared bad and irrecoverable through sundry causes, by the magistrates, and the apportionments thereon amounting to £11,228 14s. 2d., have been rescinded, and where money had been paid by contributors, it was refunded in full, of this number eight have been re-apportioned, and works proceeded with.

Of the 224 good apportionments, the works have been completed in 182 cases, with the result that the estimate was exceeded in 45 cases, necessitating the sealing of additional apportionments to the amount of £2,949 4s. 0d., while in 124 cases the estimate was more than sufficient and allowed a return to be made to the owners of £12,251 3s. 1d., and in the remaining 13 cases, the estimate just covered the actual cost of the works.

To show the magnitude of the New Streets work, and that the property of the Fulham Parish is not held by a few individuals, I may mention that the details of the numerous apportionments, &c., necessitated the opening of some 5,000 ledger accounts, entailing a large amount of clerical labour.

## LABOUR, &c.—WAGES ACCOUNT.

The Parishioners will form some idea of the rapid development of the Parish by the comparative statement of the Labour Wages Accounts for 1886 and that of 1893.

On the 27th day of January, 1886, the Vestry passed the following resolution, on the recommendation of the Works Committee:—

"That in order to efficiently carry out the works required in the making, maintaining, and cleansing of the streets and sewers in the Parish, a staff of Artisans and Labourers be employed as follows:—

30 Scavengers	
1 Ganger	
4 Spreaders	
12 Ground and Sewermen	
1 Ganger	
1 Bricklayer	
1 Labourer	
1 Mason	
1 Labourer	
6 Flushers and Gullymen	
1 Depôt Watchman	
1 Storekeeper and Messenger	
1 Engine Driver	
Pecking Gang, averaging 4 men, as required	
	Average weekly wages, £76 0 0

At the same time the Cartage Department Staff of Labourers consisted of the following:—

10 Dustmen, with horses	
5 „ without horses	
9 Carmen, with horses	
1 Odd Man	
1 Horsekeeper	
1 Stableman	
	Average weekly wages, £32 0 0

The following shows the number of men, and average weekly cost in 1892-93:—

Works Department:—

66 Scavengers	
1 Foreman of ditto	
30 Spreaders, Ground and Sewermen	
1 Ganger of ditto	
3 Men at Dust and Slop Shoots	
5 Masons	
5 Labourers	
1 Bricklayer	
1 Labourer	
2 Wood Paviours	
1 Asphalter	
1 Labourer	
1 Engine Driver	
1 Steam Roller Driver	
3 Followers (Sweepers)	
5 Watchmen	
1 Depôt man and Messenger	
4 Flushers and Gullymen	
1 Wharf Keeper	
Barge and Pecking Gang, average 4 men, as required	
	Average weekly wages, £185 0 0

## PROPERTIES, &amp;c.

The properties, goods, chattels, &c., are not valued and shown as an asset in the Balance Sheet, but approximately the chief items may be taken as follows:—

	£	s.	d.	£	s.	d.
The Leasehold House and Stables, 637, Fulham Road, S.W. ....	600	0	0			
Munster Road Freehold Stables, Buildings, &c. ....	7,600	0	0

## THE VESTRY OF THE PARISH OF FULHAM.

TOWN HALL, S.W.

## AUDITOR'S CERTIFICATE.

We, the undersigned Auditors of the Accounts of the Vestry of the Parish of Fulham, for the financial year ending 25th March, 1893, hereby certify that we have examined the books of the Vestry, and have compared the vouchers with the cheques, and we find the balance

	£	s.	d.
of .. .. .	10378	7	3
at the Bankers on Current and Deposit Accounts to be correct, and, allowing for the outstanding cheques, amounting to .. .. .	924	19	2
the balance to be .. .. .	£9453	8	1

We have also examined the Loan Account of the Vestry, and we find that the Loans, including £24200 borrowed during the year amount to .. .. . £91782 17 4

We note that £15,205 18s. 0d. is due from contributors on New Streets, of which we observe £3,523 0s. 5d. is due on streets completed and that on the whole a large proportion of the amount is due from a few owners, and we think that some strong steps should be taken to get in these outstanding amounts.

We see that the Vestry have paid £594 7s. 3d. for disinfecting goods during the past year and we think the time has arrived when the Vestry should build for the parish a disinfecting apparatus, as we are of the opinion that a great saving would result thereby.

We have much pleasure in stating that the accounts have been kept in a very satisfactory manner and presented to us much earlier than usual, and must thank Mr. R. H. Meyer the Accountant and other officers of the Vestry for the courteous manner in which they have assisted us during the audit.

<i>Signed</i>	A. G. SPELLS,	} Auditors.
	HENRY T. HARRISON,	
	WILLIAM DARBYDHIRE,

AND IN THE COLONIES

AND IN THE FOREIGN COUNTRIES

TO WHICH IS ADDED A LIST OF THE

# Vestry of the Parish of Fulham.

## SEVENTH ANNUAL REPORT OF THE SURVEYOR, FOR THE YEAR 1892-93.

MR. CHAIRMAN AND GENTLEMEN,

I have the pleasure of presenting to you my Seventh Annual Report on the works executed by my department, for the year commencing on the 25th March, 1892, and ending on the 25th March, 1893.

As in my former reports, the corresponding figures for the previous years are retained in the tabulated statements. Many of the schedules are placed in the manner adopted last year at the end of the Report.

As many of the recommendations in my previous reports have not yet been acted upon, I have again repeated them. Those, therefore, who are acquainted with my previous reports must excuse this repetition, and I again ask their assistance in rendering it unnecessary.

### AREA OF THE PARISH.

The area of the Parish of Fulham is	...	1700·324 acres
Area of Foreshore	... ..	56·561 „
Area of Tidal Water	... ..	99·614 „
Total	... ..	<u>1,856·499</u>

### COMPARATIVE TABLE.

Showing the increase in the population, length of roads, footpaths, &c., of the Parish since the separation from Hammersmith in 1886. The census taken on the 5th day of April, 1891, gave the population at 91,640, being 42,850 males, and 48,790 females. The population at the previous census in 1881 was 42,895.

	Length of Carriageway.			Length of Footways.			Length of Public Footways where no Carriageway.			Estimated Population.	Inhabited Houses.	Rateable Value.
	M.	F.	YDS.	M.	F.	YDS.	M.	F.	YDS.			
1886	35	1	144	63	6	166	7	2	0	72,142	11,265	£336,674
1887	36	5	199	66	6	132	7	1	22	77,997	11,277	£343,572
1888	38	2	112	70	6	125	6	7	215	79,605	11,890	£360,354
1889	40	5	41	75	1	118	6	6	183	86,124	12,181	£373,159
1890	44	6	102	83	2	118	6	6	183	91,000	12,620	£385,407
1891	45	3	173	84	5	22	6	6	183	91,640*	13,496	£426,551
1892	46	1	108	87	1	58	6	6	183	96,514	14,447	£471,074
1893	50	1	75	88	1	169	6	6	183	101,889	14,906	£483,909

\*Census.

## MACADAMISED ROADS.

These have continued to receive careful attention. Schedule I. at the end of the report will show the amount of macadam that has been used on them.

## COMPARISON OF EXPENDITURE OF MACADAM.

Date.	No. of roads maintained with Granite.	Old C. Yards.	New C. Yards.	Total C. Yards.	Cost of New per yard.	Cost of New.	Estimate as modified by Vestry.
					s. d. s. d.	£ s. d.	£ s. d.
1886-87	24	1680	3145	4825	11 0 & 11 4	2,374 1 7	2,400 0 0
1887-88	42	nil.	3080	3080	11 4 & 10 8	1,694 18 2	2,400 0 0
1888-89	56	2856	3327½	6183½	10 8	1,758 7 0	1,000 0 0
1889-90	63	912	4312	5224	13 5	2,892 12 8	2,000 0 0
1890-91	85	4519	2710½	7229½	13 9	2,084 13 8	1,500 0 0
1891-92	93	2316	3392	5708	14 3	1,900 14 3	1,137 10 0
1892-93	112	1778	3555½	5333½	14 4	2,548 2 2	2,075 1 8

The above Table shows how inadequate the estimates for the granite have been, and I have to repeat the complaint that the Vestry frequently has no granite in stock, so that the roads cannot be repaired immediately they show signs of wear.

The traffic in the district continues to increase enormously.

## ASPHALTE AND TAR PAVING.

Tar paving has been laid around the Recreation Ground and the paths outside in the Crown and Fulham Palace Roads, also in the Rylston Road, the only asphalt required has been for repairs to trenches made by the Gas and Water Companies.

## FLINTS.

Date.	Cubic Yards.	Cost per Yard.	Total Cost.	Estimate.
		s. d.	£ s. d.	£ s. d.
1888-89	1356	3 6	237 6 0	200 0 0
1889-90	1041½	4 0	208 7 8	250 0 0
1890-91	29½	4 5	6 6 3	200 0 0
1891-92	968	4 5	213 15 1	110 0 0
1892-93	None	used during	the year.	168 15 0

## HOGGIN, BALLAST, AND SAND.

	Cost.	Estimate.
	£ s. d.	£ s. d.
1888-89 ... ..	263 13 7	250 0 0
1889-90 ... ..	122 15 9	150 0 0
1890-91 ... ..	40 17 5	85 0 0
1891-92 ... ..	42 2 0	100 0 0
1892-93 ... ..	310 17 0	100 0 0

A good stock of sand and fine gravel for spreading over the roads has been obtained from the Recreation Ground, Fulham Palace Road.

The Vestry has five sanding machines, used for sanding roads in frosty weather.

### WOOD PAVING.

Locality.	Area.	Date Laid.	Description.	Cost of Wood Paving.	Cost of Work to Footpaths.
				£ s. d. Loan of	£ s. d.

Harwood Road . . . . }	6,055	Sept., 1892	9" × 5" × 3" creosoted deal blocks	3,464 7 0	55 13 0
Broxholme Road . . . . }					
	74,370	—		36,539 17 5	1,772 2 0

During the year the wood paving in the Fulham Road, laid with plain deal blocks in 1885, has given out very badly, and I have repeatedly advised the Vestry to have it entirely relaid before the winter. The Vestry, however, on the 14th September, 1892, ordered the matter to stand over for six months. Owing to the increasingly bad state of the road, two efforts were made without success by members of the Vestry to have this resolution rescinded, and in February, 1893, large patches of the wood came up and the holes had to be filled in with macadam.

On the 1st of February, 1893, instructions were given for plans and specification to be prepared for paving the Crown Road, from the Police Station to the Fulham Palace Road, and on the 1st March tenders for doing the work were received, the lowest being £1,650.

On the 22nd March, the Works Committee passed a recommendation that the portions of Sherbrook and Rylston Roads, much used by omnibuses be wood-paved.

At a largely attended meeting of the Association of Incorporated Municipal and County Engineers, held at the Bishop's Meadow, on the 4th March, the following paper was read on the use of the Western Australian Woods, Karri and Jarrah for wood paving.

MR. PRESIDENT AND MEMBERS OF THE ASSOCIATION OF  
MUNICIPAL ENGINEERS AND SURVEYORS,

The expenditure on the paving of streets is so considerable, that any information which can be laid before this Association in reference to materials that can be economically used for such work, will no doubt be welcomed.

The Vestry of this parish has alone spent £36,542 2s. 6d. on 74,370 square yards of wood paving during the last seven years, and further large sums will have to be spent shortly for new works and repaving.

The present practice is to use creosoted deal blocks, costing about 12s. a yard, including 6" of Portland cement concrete underneath, these blocks being on account of their greater durability, cheaper and more sanitary than plain deal blocks.

In June, 1889, a trial strip of Jarrah was laid in Lillie Road, 6' 6" wide. This strip is now after  $3\frac{1}{2}$  years' wear,  $\frac{1}{2}$ ",  $\frac{3}{4}$ " and 1" above the plain deal blocks adjoining, although four of the Jarrah blocks show signs of wear or decay to the extent of  $\frac{3}{8}$ ",  $\frac{5}{16}$ " and  $\frac{7}{8}$ "; also in February, 1892, about 542 square yards of Jarrah wood were laid in Jerdan Place, at the cost of 19s. per square yard.

Karri wood (*Eucalyptus diversicolor*) is abundant in Western Australia, growing in forests intermixed with Jarrah and Red Gum, and can be delivered at our wharf, close to Putney Bridge, in blocks 9" by 3" by 4" deep, at a cost of 185s. per 1,000. This wood does not appear to have been known in this country except to a very few persons until the end of 1892, and it is possible that some of it has already been laid under the name of Jarrah.

Jarrah wood (*Eucalyptus marginata*) also growing as above, can be delivered at our wharf, in blocks 9" by 3" by 4" deep, at a cost of 207s. 6d. per 1,000.

This wood has already been considerably used for wood paving for some years in London.

The blocks of both these woods at the prices quoted are guaranteed 4" deep, but not precisely 9" long or 3" wide although 1,000 of them would cover a larger area than a 1,000 exactly the size specified. The slight variation is due to imperfect sawing arrangements in Australia.

At higher prices they can both be delivered the precise size required.

The woods belong to the same class of tree, and appear from the plan of the forests which have been shown to me to grow side by side. Their appearance is very similar, and their similarity would also probably extend to their durability, and to the special immunity from decay which has been claimed on their behalf. As far as the experiments hereafter referred to have extended, one great difference appears to be that Karri sinks in water and Jarrah floats, showing Karri to be denser.

Great virtue is claimed for Eucalyptus oil,—prepared from a tree of the same class (*Eucalyptus Globulus*)—as an antiseptic, and it has occurred to me that perhaps the lasting properties of these woods may be to some extent due to the presence of this oil.

The following information is placed in a tabular form for purposes of comparison. The figures are obtained from *Timber and Timber Trees*, written by Mr. Thomas Laslett, Timber Inspector to the Admiralty.

TABLE I.—AVERAGES.

Description of Work.	Deflection in Inches.			Weight in lbs. required to break each piece.	Weight in lbs. required to break one square inch.	Tensile Experiment. Direct Cohesion in lbs. per square inch.	Crushing Strains		Classed at Lloyd's.
	With apparatus weighing 390 lbs.	After weight removed.	At crisis of breaking.				In Tons.	In Tons, per square inch.	
Karri .....	1.01	.04	6.06	862	215	7,070	6" cube 185	5.14	12 yrs.
Jarrah .....	3.21	.133	4.71	685	171	2,940	2" cube 12.762	3.198	12 "
Teak .....	1.65	.083	5.37	912	228	3,301	2" cube 11.35	2.828	14 "
English Oak .....	3.37	.189	7.35	776	193	7,571	2" cube 13.625	3.406	9 "
Fir .....	1.62	.066	5.14	876	219	3,231	2" cube 12.687	3.172	

The results in the following table are obtained from experiments made with blocks shown to you to-day.

TABLE II.

	After being kept in office several weeks near fire shewed.	Contents of blocks dry.	Weight dry.	Weight in lbs. per cube foot.	Specific gravity.	Increase in weight per cube foot after 72 hours immersion.	Increase in bulk of specimens after immersion.	Proportionate increase in bulk from expansion after immersion.
Karri blocks 9" × 4" × 3" ....	Numerous small cracks.	c. in. 418.6	lb. oz. 15 4	62.911	1.0077	lb oz. 2 13	in. 9.7	.0231
Karri block 9" × 5" × 3" ....				65.00	1.0412			
Jarrah blocks 9" × 4" × 3" ....	Some fine cracks.	434	13 13	51.96	.832	4 12	16.0	.0368
Jarrah block 9" × 5" × 3" ....				56.00	.897			
Deal blocks 9" × 4" × 3" ....	Large openings extending across blocks, and blocks warped.	432	8 4	33.00	.52	5 12	10.0	.023
Deal crosoted blocks 9" × 4" × 3" ....		440	11 4	45.00	.72	4 0	25.0	.056

The results show Karri to sink in water, Jarrah to float, and that Jarrah absorbs more water and swells more freely than Karri. The author calls attention to the extraordinary expansion of the creosoted blocks. No doubt these blocks lost a great deal of creosote during the weeks they remained in a warm room, and perhaps the pressure they had been subjected to in the cylinder during the creosoting process in some way accounts for their greater expansion.

Considerable feeling appears to exist in Australia as to the relative capabilities of the two woods, Karri and Jarrah, and a Commission on the subject was appointed in 1887, which arrived at the following conclusions:—

#### CONCLUSIONS ARRIVED AT BY THE COMMISSION.

1. It is very certain that the usefulness and durability of both timbers depends very much upon the locality where grown, and the season of the year in which it is felled. The Commission consider that from November to May or June, or when the sap is down, is the best time to undertake this work; this applies equally to Jarrah or Karri.

2. From the lengthened tests and life in works to which Jarrah has been subjected, it appears to be a timber suitable for piles in marine structures. Karri piles, as compared with Jarrah, can scarcely be regarded as having passed the experimental stage; and the Commission would suggest that a series of experiments be commenced and continued year by year with both timbers under exactly similar conditions, careful inspection being made from time to time, and true records kept.

3. From the evidence appended, it appears that the advantages of Karri over Jarrah are:—That piles can be obtained of greater lengths, straighter, they drive better and resist a heavier strain. For the superstructure of bridges, jetties, &c., or where severe strains or crushing weight has to be considered, Karri, in consequence of its greater strength (see appended Tables), should be preferred and used before Jarrah.

4. It does not appear from the evidence before the Commission that there is much to choose between the two timbers as far as their anti-resisting properties are concerned.

5. From the evidence before the Commission, and the appended Tables of Tests, we are of opinion that Karri is most suitable for works of construction, railways, and public works generally; but as regards the timber resisting the action of salt water and sea worms in marine works it has yet to be proved.

6. It appears, from structures that have been examined, and from the evidence taken, that, as a general rule, round piles should be used in preference to square, and they should be charred and tarred before being driven.

## TEST OF KARRI AND JARRAH AS WOOD PAVING.

In July, 1888, strips of Karri and Jarrah were laid side by side in the King's Road, in front of Messrs. Ransome's premises. These blocks were all exactly 5" deep, and Messrs. Ransome have kindly shown me samples which have been retained by them. The Karri blocks were  $2\frac{1}{8}$ " wide, and the Jarrah  $2\frac{7}{8}$ ". These blocks have been down now  $4\frac{1}{2}$  years without being disturbed, and Mr. T. W. Higgins, the Surveyor of Chelsea, writes me that the Karri is a quarter of an inch above the Jarrah, and the Jarrah is about three quarters above the yellow deal.

On the 14th day of December, 1892, the importers of Karri wrote this Vestry, saying that they would be prepared to guarantee that 4" Karri blocks shall last twice as long as the deal blocks (laid in July, 1885, in the Fulham Road), which are not yet taken up, though in a very bad condition. Judging from the blocks in the King's Road the offer appears a safe one, and in the following Table the duration of Karri wood is calculated at 16 years.

The importers also claim that a  $3\frac{1}{2}$ " wood block is equal to a 4" Jarrah.

In a report to my Vestry, dated the 11th day of January, 1893, the following Table and conclusions appeared showing the relative cost of using the woods named

Table III.  
COST OF REPAVING FULHAM ROAD, CONCRETE ALREADY IN.

Description of Wood	Area Square Yds	Price per Yard	Total Cost	Probable duration. Years.	Average Annual cost of repayment of loan at $3\frac{1}{2}$ p.c. spread over period of duration of wood
Karri Wood, 9" $\times$ 3" $\times$ 4" deep	12,500	10s. 6d.	£ 6562	16	£ s. d. 534 12 0
Jarrah, 9" $\times$ 3" $\times$ 4" deep ....		11s. 6d.	7187	14	649 5 0
Deal creosoted, 9" $\times$ 3" $\times$ 5" deep		7s. 6d.	4687	8	680 0 8

## CONCLUSIONS.

1. Karri is cheaper than Jarrah.
2. Table I. shows Karri to be generally superior to Jarrah, and the equal or superior of all the other woods given in the Table. The fact that Lloyd's already class both woods as nearly equal to Teak is a strong certificate in their favour.
3. Both woods belong to the same class, and probably possess a natural oil in some degree equivalent in its action to the creosote forced into the deal blocks.
4. The Kings Road experiment shows Karri to be more durable as a paving material than Jarrah,
5. Table II. shows Karri and Jarrah to be both cheaper in the end than creosoted deal, and Karri the cheaper of the two.

6. A hard wood road is superior to a soft wood road for sanitary reasons, as it throws off the wet better, and is dryer and cleaner.

7. If the harder woods are used, the disturbance of traffic, &c., caused by repeated relaying and repairs will be reduced to the minimum.

The London County Council have already offered to lend money for Jarrah wood paving for seven years to the St. George's Vestry instead of five years, which is the usual term for which loans are granted for wood paving works. If the London Surveyors would combine, no doubt the Council could be induced to lend money for paving with these hard woods for terms of ten or twelve years, which, at present prices, would make the annual cost of hard wood paving much lighter than deal.

One objection raised to the hard wood roadways is that they are more slippery than deal. It is admitted that they are cleaner, and as slipperiness is generally the result of dirt, proper scavenging should obviate the complaint.

A further objection is that the hard woods wear, as Mr. C. Mason, the Surveyor of the St. Martin's Vestry, describes it in a letter to me, like "ripples on a sea shore."

In order to overcome this tendency, the wood paving in Jerdan Place is laid quite close jointed, and I suggest that this tendency can be further overcome by laying the lines of wood diagonally across the road.

In conclusion, I suggest that when Surveyors are desirous of obtaining blocks for wood paving, they should obtain alternative prices for Karri and Jarrah. This course will enable them to obtain the benefit of the competition for the supply of these woods.

JAMES P. NORRINGTON, A.M.I.C.E.,

*Surveyor to the Vestry of Fulham.*

March 1st, 1893.

## STREETS.

A list of the Streets of the Parish with the lengths of carriageways and footways, and the particulars and average depths of sewers will be found in Schedule II., at the end of the report.

A summary of the length of the Streets is given below:—

### SUMMARY.

		Miles.	Furlongs.	Yards.
Length of Public Roads =	....	38	7	154
„ „ Private „	....	9	1	158
„ Ditto (not 40 feet wide)	....	1	7	202
		50	1	174

Length of Public Footpaths =				Miles	Furlongs.	Yards.
"	"	Private	....	....	69	2 88
"	"	Ditto (not 40 feet wide)	..	....	16	5 183
				....	2	1 178
					88	1 169

## SIDE WALKS.

During the year the following quantities of paving were supplied to the Vestry for the repair of pavements in the parish, and were laid by the Vestry's workmen.

2,110 feet super York stone, supplied only, at 9d.	£	s.	d.
1,648 do. Victoria stone, supplied at 7½d.	79	2	6
	49	15	11
	£128	18	5

For repairing Asphalte pavements :—

10 tons Asphalte	£	s.	d.
1 ton 18-cwt. 3-qrs. 14-lbs. Bitumen ..	37	5	0
	17	3	0
	£54	8	0

were ordered, and also tar and top dressing for the few tar pavements.

## NEW STREETS.

The plans have been submitted to the London County Council and the Vestry, for the following new streets in this district :

Case No.	Names of Streets and Estate	Date submitted to Vestry.	Date approved by L.C.C.	Length. in feet.
E 38	Rostrevor Road, continuation .....	Mar. 1892	March 17	565

				710	12" pipe.
			TOTAL.....	3,345	

The subject of the cleansing and ventilation of the sewers has received a good deal of attention from the Vestry during the year, and it will be seen that no less a sum than £422 6s. 3d. was spent for water alone for flushing the sewers during the period.

Acting on the instructions of the Vestry, on the 8th October, 1892, I prepared a report on the sewers in the district, a copy of which is appended.

The report included a table giving the length, depth, size, number of ventilators, distance apart of same, and other particulars, in reference to the sewer in every street in the district. As this is of course very lengthy, and can always be referred to at my office, I have not repeated it in this report.

## THE VESTRY OF THE PARISH OF FULHAM.

TOWN HALL, FULHAM,

October 8th, 1892.

*To the Chairman and Members of the Vestry of Fulham.*

MR. CHAIRMAN AND GENTLEMEN,

### REPORT ON THE SEWERS IN THIS DISTRICT.

Having been instructed by a resolution of the Vestry, passed on the 3rd of August, 1892, to report on the sewers in the Parish.

I beg to point out that, although I propose to condense the report as much as possible, it will necessarily be somewhat lengthy. Many details have also been unavoidably omitted, which can be easily supplied to any committee dealing with the report.

I propose first to give some particulars relating to the sewers of Fulham generally, then to supply a detailed descriptive list of all the sewers in the Parish, adding recommendations where desirable.

Much of the information, and many of the suggestions in this report have already appeared in former Reports to the Vestry, but as all of these suggestions have not been fully carried out, they are repeated here.

#### AREA AND POPULATION.

The area of Fulham is 1700·324 acres (exclusive of foreshore and tidal water), and the population is estimated to be at the present time 97,730.

#### OWNERSHIP OF SEWERS, &c.

The sewers belonging to this Vestry discharge into the Western sewer, belonging to the London County Council. This sewer conducts the sewage from Hammersmith through the Fulham Palace Road, Dawes Road, Harwood Road, Imperial Road, and the Gas Company's Works into Chelsea, where it also receives the whole of the sewage of Chelsea, and from a great part of Kensington.

It discharges at the Victoria Pumping Station on the Chelsea Embankment, where the whole of the sewage is lifted up 20-ft. by four engines, working eight pumps, into the Low Level Sewer, which follows the course of the Victoria Embankment. These pumps raised 9,322,551,110 gallons of sewage in 1891, the lowest daily record being 14,627,000 gallons, and the highest, 54,795,000.

The sewer running through High Street, Church Street, and the King's Road, joining the Western Sewer in Broxholme Road, also belongs to the London County Council.

All other sewers in the district belong to the Vestry, and have been laid either by the Vestry or private persons, and handed over to the Vestry.

It will be seen from the above that the Vestry has not full control over the sewers of the district, and I shall shew that their condition is very much dependent on the state of the main Western sewer.

#### LEVEL OF PARISH.

##### *Surcharging of Sewers.*

The level of the surface of this Parish is only a few feet above Thames high water mark, consequently this Western sewer, which has to receive the sewage of Fulham and Hammersmith, is itself many feet below high water level, and in times of heavy rain it becomes surcharged to such an extent, that on Sunday, August 28th, 1892, the water from the sewers flooded the cellars of a great number of places in the district to various depths, including the basement of the Town Hall, to a depth of 6 inches (list given hereafter).

I am informed that 1.51 inches of rainfall took place on that day, that the worst of the fall occurred at high water, so that the storm overflows could not be opened; and that it occupied 19 hours for the four large engines, previously referred to, at the Victoria Pumping Station, to raise the sewage into the Low Level sewer.

This gradual pumping away of the sewage, extending over so long a period, must cause a large deposit in all the sewers of the district. The Vestry will therefore see that this flooding is by far the most important draw-back to the condition of their sewers, besides being one entirely beyond their control.

The following letter on the above subject was written to the London County Council on the 28th November, 1891:—

#### LETTER ON SURCHARGING TO LONDON COUNTY COUNCIL.

DEAR SIR,

"I am directed by the Vestry of the Parish of Fulham to ask you to lay the following information before the Main Drainage Committee:—

On the 11th November, the Claybrooke Road sewer was surcharged, so that the water rose 3-ft. in the manholes.

This was due to the surcharging of the Western sewer, which passes through the Fulham Palace Road and Dawes Road. This sewer was charged to within 13-ft. of the surface of the roadway, or about 8-ft above the crown of the sewer.

It was also found that the nearest ventilator in the Fulham Palace Road, to the end of Claybrooke Road sewer, was stopped up, so that the ventilator in Claybrooke Road acted as a ventilator to the Fulham Palace Road sewer.

Acting under the instructions of the Vestry, I wrote you on 30th July last, calling the attention of the Council to the inadequacy of this Western sewer, and stating that, on the 26th July, the sewer was surcharged to the height of 9-ft. 6-ins. above the crown, causing the Colehill Lane sewer, belonging to the Vestry, and situate at a distance of 2,400 feet away, to be surcharged.

You replied to that on the 5th October, stating that the "Council's officers did not remember any flooding of houses," and that under existing conditions the capacity of the sewer appears to be sufficient.

With respect to the flooding of houses, I beg to inform you that shortly after my appointment in 1886, I received a complaint of certain basements of the houses in the Broadway, Walham Green, being flooded to a depth of 6-ins.; since that date I have received repeated complaints of these cellars being flooded, and on the 19th July last they were again flooded to about the same level. I have also received complaints of flooding of cellars of houses in Hatfield Street out of Field Road.

With respect to the capacity of the sewer, I beg to state that the Western sewer in this District is surcharged at every heavy rainfall.

It is manifest that when such surcharging takes place the subsidence of the sewage in the sewers of the District must be very gradual; (I have been informed that it takes 10 hours to raise the sewage from this Western sewer into the Low Level sewer) and that such gradual subsidence must lead to large deposits of solid matter in the sewers.

The statements contained in this letter my Vestry consider indisputable, and it consequently fails to see that the Council can consider either the capacity of the sewers in the Parish, or the pumping power at the Victoria Pumping Station adequate.

This Vestry further trusts that your Council will give this matter the serious consideration which its importance merits, especially having regard to the enormous growth of this and neighbouring Parishes."

I remain, yours faithfully,

JAMES P. NORRINGTON,

*Surveyor to the Vestry.*

H. DE LA HOOKE, Esq.,  
*Clerk to the Council,*

## DEFECTS OF SEWERS.

*Change in opinion as to method of construction of Sewers.*

The other drawbacks are of a less important character, and many are within the control of the Vestry, they may be briefly summed up as occasioned by insufficient ventilation of the sewers belonging to the London County Council, defective construction, damaged sewers, insufficient fall, dead ends, want of ventilation, inadequate flushing, and in this district the use of peat moss litter.

As the plans and sections shewing the size, level, and fall of all the sewers in the district have been submitted and approved by the Metropolitan Board, the London County Council and Vestry, nearly all these sewers have been constructed under proper supervision, there are not, therefore, many that can be said to be defectively constructed or to want proper fall, but in former days such things as numerous ventilators, flushing chambers, &c., were not considered necessary; and many of the oldest sewers, such as those belonging to the London County Council, although most carefully constructed, have the least ventilation.

As illustrating the change of opinion on these subjects, many engineers, if constructing an entirely new system of sewers, would now adopt the dual or separate system, keeping the rainfall distinct from the sewage.

In 1886 I reported on these matters and made the following recommendations:—

## RECOMMENDATIONS IN 1886.

*"Fall of Sewers.*—That particular attention be paid to the fall of sewers.

*Manholes and Ventilation of Dead Ends.*—That manholes and ventilators be provided at all dead ends, and that they be connected with the nearest adjoining sewer by a 9-in. pipe

*Steam and Obnoxious Matters.*—That steam should not be allowed to be discharged into the sewers, or any obnoxious matter from factories, unless it has been previously specially treated and deodorised.

*Manholes.*—That a 2-ft square manhole cover with a ventilating area of 62 square inches, be placed on all the manholes which are now covered with an iron plate.

*Surface Ventilators 60 yards apart.*—That surface ventilators be fixed to all old sewers not more than 60 yards apart.

*Rest Lamps as Ventilators.*—That all rest lamps be used as ventilating shafts.

*Special Shafts.*—That special ventilating pipes or shafts be erected wherever practicable.

*Flushing.*—That the present system of flushing be continued; that the owners of courts and other properties be encouraged to have their private drains flushed, and that the Vestry undertake to do the work on payment of a small fee.

*Catchpits to Ventilators.*—That all ventilators be provided with an arrangement to prevent dirt passing through them into the sewers.

*Flushing Tanks, &c.*—That flushing tanks, shafts with fires in them, or connected with factory shafts, shafts with cowls on top, and special deodorizers can be used with great benefit in special cases, and that such special cases be dealt with individually as they arise,

The above recommendations have been repeated from time to time, some hundreds of new ventilators have been fixed, special attention has been given to cleansing and flushing, and of course all sewers constructed during the last six years, about 10 miles in length, have been constructed on these lines. In the third special report of the Medical Officer of Health he states that the sewers in the District, constructed during recent years, "*are all that can be desired.*"

The following is the list of the basements flooded on Sunday, August the 28th, 1892:—

#### BASEMENTS FLOODED.

Vernon Street	.....	2	manholes and ventilators required, and sewer should be relaid.	

Upper Moore Park Road 1 manhole and ventilator required.

Total—46 required. Estimated cost, £736.

The following sewers have ventilators rather far apart, and I recommend that the number of ventilators with manholes be increased.

Avonmore Road	Garvan Road
Bayonne Road	Gilstead Road
Beaumont Road	Greyhound Road
Brookville Road	Gunterstone Road
Britannia Road	Halford Road
Comeragh Road	Kempson Road
Cumberland Crescent	Lisgar Terrace
Delaforde Street	Matheson Road
Devonshire Street	Mendora Road
Dieppe Street	Parson's Green Lane
Dimsdale Road	Rectory Place
Dymock Street	Rosaville Road
Edith Road	Sotheron Road
Elthiron Road	Talgarth Road
Farm Lane	Waterford Road
Favart Road	Walham Grove
Fulham Park Road	

## NEW STREETS.

All streets in the list of those not yet taken to, can and should be dealt with at the time the street is made up by the Contractors, previous to being taken over by the Vestry. Roads with no sewers in at present are not mentioned in this Report, as the Vestry is in the habit of dealing with these as occasion arises.

## ANSELM ROAD.

The Anselm Road sewer will be extended in the future, when additional ventilation, &c., will be provided.

## BARCLAY ROAD.

Barclay Road sewer is exceedingly well ventilated, but many complaints are received of these ventilators. It joins the Fulham Road close to the junction of the Dawes Road sewer belonging to the London County Council. The Vestry receives numerous complaints of this Dawes Road sewer, which is badly ventilated, and I think the gases from the Dawes Road escape through the Barclay Road ventilators. There is one ventilating shaft in the Barclay Road, and an offer has been made to allow another to be fixed. I recommend this offer being accepted.

## BROUGHTON ROAD.

This sewer is well ventilated, and in good condition, complaints have been received of the ventilators smelling, and I recommend shafts being erected where this occurs.

## WANDSWORTH BRIDGE ROAD.

The construction of a new sewer in the Wandsworth Bridge Road, which is absolutely necessary, will relieve all the sewers in that district.

The following report concerning this sewer was entered on the Minutes on the 9th September, 1891.

"I beg to report that the sewer to the Wandsworth Bridge Road, which is 3,880-ft. long, with a gradient of 1 in 287, is only a 15-in. pipe. This sewer has running into it at the present time 330-ft. in length of 15-in. pipe, and 4065-ft. in length of 12-in. pipe sewers."

"In a few years time about 9,000-ft. of additional sewers will in all probability have to drain into it."

"In dry weather this sewer runs quite half full, and in wet weather it is surcharged."

"On the 30th day of June last, the water backed up into the sewer being laid in Cresford Road."

"Mr. Jones informs me that this sewer was laid with the idea of being only sufficient to take the surface drainage of the roadway."

"Taking into consideration the enormous amount of pipe sewers discharging into it and the great number of new houses and new streets that will ultimately drain into it, I am of opinion that it is necessary to construct a new brick sewer in place of the present 15-in. pipe."

"The outfall will be the brick sewer in King's Road, 4.ft. 6-in. by 3-ft."

"My estimate of the cost of the new sewer is £3,500, and the necessary plans have been commenced."

#### NORTH END ROAD SEWER.

Many complaints are received of offensive odours arising from the ventilators of this sewer, which brings through the whole length of the North End Road the sewage from a great part of Hammersmith, and joins the Harwood Road at Walham Green:—

This sewer is insufficiently ventilated, the present distance apart of ventilators averaging 348-ft., whereas I have always recommended them being placed from 180 to 200-ft. apart.

A portion of the sewer is, as the Vestry had pointed out by a section submitted to them in 1888, depressed from the end of Talgarth Road to Gibb's Green. The current through this portion in dry weather is at the rate of a mile and a half an hour, which is equal to 2.2 feet per second, and twice as rapid a flow as a 12-in. pipe sewer,  $\frac{3}{4}$  full with a fall of 1 in 100. This part of the sewer has never failed to do its duty, and the flow is sufficient to keep the sewer clear, although there is a deposit of clean grit and sand at the bottom of the depressed portion.

I do not propose to recommend the Vestry to re-construct this portion of the sewer until I have an opportunity of examining it in detail. This can only be done by constructing a flushing chamber and penstock just above the depressed portion, the sewer can then be entered, the condition of it examined, and it can also be cleared periodically.

A chamber and penstock can be constructed at a cost of £60, and I recommend the work to be carried out *at once*.

Additional ventilators should also be constructed at suitable distances, and shafts erected wherever possible.

As this, however, drains two Parishes, the London County Council might be approached with a view of their taking over the control of it as a main sewer, but the work recommended should not be delayed on that account.

#### VERNON STREET.

An old barrel drain in Vernon Street which discharges into a 12-in. pipe should be at once taken up and a 12-in. pipe substituted.

#### LETTICE STREET.

There are six dead ends in this street, each of which should have a manhole and ventilator.

#### FARM LANE, STAR LANE, & NORTH END ROAD.

I recommend that the Road Car Company should be requested to provide a grating and catchpit to their drains to prevent the peat

moss litter entering these Sewers as this litter is to a large extent responsible for the sewers smelling offensively, and it causes considerable extra trouble and expense in cleansing them.

#### ELI & MUND STREETS.

Complaints have been received of the ventilators in these streets, and if permission can be obtained I recommend shafts being erected.

#### HALFORD ROAD.

There is a ventilating shaft at the junction of this sewer and the North End Road, which should be altered to a manhole to give easier access to the sewer.

#### SIMULTANEOUS FLUSHING.

I again recommend that arrangements be made for householders to flush the drains of their houses simultaneously at 11 o'clock in the morning, also that the County Council be asked to arrange for flushing in Hammersmith the sewers that pass through Fulham.

#### SHAFTS & COWLS.

I also recommend that wherever upright shafts are fixed cowls be placed upon them, so that the force of the wind will create a current from the sewer and assist ventilation.

#### ANEMOMETER.

I recommend that I be allowed to purchase an anemometer so as to be enabled to make tests in reference to the ventilation of sewers.

#### NEW STREETS.

I further recommend that before new streets are apportioned a special examination be made of the sewer, and that any improvements which can be made in the ventilation be made before the street is taken over.

#### CONCLUSION.

In conclusion I again strongly recommend that continued efforts be made to induce the London County Council to increase the necessary pumping power, or otherwise to facilitate the discharge of the sewage of the district, also to increase the ventilation, or by other means to improve the condition of their Sewers in this district.

I remain, Mr. Chairman and Gentlemen,

Your obedient Servant,

JAMES P. NORRINGTON, A.M.I.C.E.,

*Surveyor to the Vestry.*

## SURVEYOR'S DEPARTMENT, TOWN HALL.

October 8th, 1892.

REPORT ON MR. R. HARRIS REEVES' PROPOSAL  
*Re* DEODORIZATION OF SEWAGE, NORTH END ROAD.

I have been asked to report on the proposal made by Mr. R. H. Reeves to deodorize the sewage flowing through the North End Road sewer in this district.

## PROPOSAL.

His suggestion is to fix in some of the manholes of this sewer a number of automatic apparatus for applying manganate of soda and sulphuric acid (which, I am informed, is a similar but stronger preparation than Condry's Fluid) to the sewage.

## EXPERIENCE AT FROME.

The system appears to have been working at Frome for some years in a satisfactory manner, and Mr. Phillip Edinger, the Surveyor to the Frome Local Board, writes—"That we have had them in use several seasons, and at every manhole in which they have been fixed no smell has been complained of from the open gratings; while in other parts of the town we are obliged to close those manholes not having the system in or near them."

My first enquiries have been made with a view of ascertaining how far the chemicals adopted by Mr. Reeves would effect the proposed object.

## REPORTS BY METROPOLITAN BOARD.

*Effect of application during Smallpox Epidemic.*

For this purpose I called upon Mr. W. J. Dibdin, the Chemist to the London County Council, who has used the chemicals for many years for a similar object, and I find that they are spoken of in the report to the Sanitary Committee of the Metropolitan Board, dated January, 1886, as having been "applied by the Board to the whole of the metropolitan sewage with successful results," when the epidemic of smallpox occurred in the summer of 1885.

The death-rate in 1885 from small-pox was 224 per million. The treatment was continued during 1886 and 1887: deaths from small-pox in 1886, 1 per million; and in 1887, 2 per million.

These chemicals were applied on the main sewers in the various districts and at the outfall.

This report to the Board points out the great benefit which would arise from "a complete system of sewage deodorization within the metropolis."

*Recommendation to generally adopt system of deodorization.*

It finally recommends "that the system of deodorization during the summer be arranged for the main sewers on the plan adopted by the Board during the past summer and that Local Boards be requested to adopt a similar system with local sewers."

# MANUFACTURE OF MANGANATE OF SODA BY METROPOLITAN BOARD.

The Board seems to have been using these chemicals for some time previous to this report in 1886, for I find that in 1884, Mr. W. J. Dibdin reports "that the works for the manufacture of manganate of soda were completed at Crossness, and a considerable saving in price effected."

## EXPERTS CONSULTED BY BOARD.

The Board has consulted, as experts on this subject, Messrs. A. Dupré, F. A. Abel, William Odling, Alex. W. Williamson, and Sir Henry Roscoe, and all the experiments carried out point to satisfactory results having been obtained from the use of the chemicals in question.

In December, 1887, Sir Henry Roscoe experimented on the deodorization of the London sewage on a large scale with various chemicals, the results being in favour of manganate of soda.

## REPORT FROM ENGINEERS' DEPARTMENT.

The reports by the officers of the engineering department of the London County Council also shew that the use of these chemicals has considerably diminished the number of complaints of the street ventilators.

## PRESENT USE BY COUNCIL.

Notwithstanding all these experiments and results, this recommendation of the Sanitary Committee to the Board, of January, 1886, does not appear to have been *fully* acted upon, although the manganate of soda and sulphuric acid has been used by the Board and Council at various periods since that date, and is being used at the present time at Hammersmith, to deodorize the sewage passing through the Dawes Road Sewer, and in a number of other places in London.

If the Vestry adopt the chemicals proposed to be used by Mr. Reeves, it has before them the example of the Metropolitan Board and Council; it will also be acting in accordance with the advice of Mr. Dibdin, the Chemist to the Council, who has for many years advocated their use.

## ADVANTAGE OF APPLICATION OF CHEMICALS BEFORE DECOMPOSITION.

It is also manifest that the application of these chemicals to the sewage before it has had time to decompose is a better course to adopt than to wait until it has reached the outfall.

Mr. Reeves, in one of his books, points out that otherwise "you allow putrefaction to begin at the extreme end of the system, and continue the whole length of the sewers (some seventeen miles), consequently when the sewage *decomposed thoroughly* at its arrival at the outfall the process of treatment is heavier and more costly."

## RECOMMENDATION.

Having read a great quantity of evidence, and numbers of reports, &c., on this subject, I have come to the conclusion that the application of manganate of soda and sulphuric acid to the sewage at different points in the sewers is a very proper course to adopt, and if applied in sufficient quantities would remove the constant complaints of the sewer ventilators.

## REDUCTION OF DEATH RATE

I believe a thorough application of it would also tend to reduce the sickness and death-rate from zymotic diseases.

## DETAILS OF SCHEME.

Mr. Reeves claims to have arranged an apparatus which applies these chemicals in the best manner to the sewage, and having seen it at work, it certainly appears to me to fulfil the object he aims at.

Having heard that the Vestry receives many complaints of offensive smells arising from the ventilators of the North End Road sewer, he has submitted a sketch plan, shewing a number of positions where he suggests that his apparatus should be fixed in the manholes of this sewer.

He thinks that 7 of his large apparatus, and 16 of the smaller ones would effectually deodorize the sewer; he also would require some new manholes to be built at different positions, and it would also be necessary to enlarge or build chambers to some of the existing manholes.

## COST OF PROPOSED WORK.

The total cost of the suggested work would be £535, with an estimated annual outlay for chemicals and attendance of £88.

Mr. Reeves has proposed to place all his apparatus in manholes in the North End Road sewer, while I think that many of them could be placed with more advantage in the sewers leading into the North End Road. As complaints are often received of the ventilators in the side roads, I should prefer to receive instructions to prepare a scheme for dealing with the whole system of the drainage leading into the North End Road, which I do not think would be more costly than the scheme of Mr. Reeves.

## SUGGESTED JOINT ADOPTION WITH HAMMERSMITH.

This sewer, as I have already pointed out, drains a very large part of Hammersmith, and I recommend that representations should be made to the Hammersmith Vestry, asking them to treat the sewage flowing from their district into ours in a similar manner.

## INCREASED ADOPTION OF SYSTEM BY LONDON COUNTY COUNCIL.

The London County Council might also be asked to treat the whole of their sewers in the district in the same manner as they have been dealing with the Dawes Road.

## HOSPITAL, SEAGRAVE ROAD.

As there is a large Fever Hospital in Seagrave Road, the sewage of which of course passes through this district, I think that representations should be made to the Metropolitan Asylums Board, asking them to thoroughly deodorize all sewage from the Hospital before it reaches our sewers.

## STABLES IN DISTRICT.

I also recommend that the owners of large stables where peat moss litter is used be called upon to use these disinfectants.

## TEMPERATURE OF ATMOSPHERE AND SEWERS.

The Vestry should know that it is more imperative to use these chemicals at those times when the temperature of the external atmosphere is higher than the temperature in the sewers. This chiefly occurs during the six hottest months of the year, viz., April May, June, July, August, and September. The temperature in the sewers is found to be very equable throughout the year, and may be taken at 52°.

## CONCLUSION.

It must be understood that the recommendations in this report are in addition to those already made in the preceding report on sewers, as the carrying out of this scheme in its entirety would not affect my previous recommendations, which chiefly have reference to the *construction* of the sewers.

I wish to express here my obligation to Mr. W. J. Dibdin, the Chemist, and many other officers of the London County Council, for much of the information I have utilized in this report.

I remain, Mr. Chairman and Gentlemen,

Your obedient Servant,

JAMES P. NORRINGTON, A.M.I.C.E.,

*Surveyor to the Vestry.*

Since my appointment, 170 large ventilating manhole covers have been fixed to the existing sewers in the Parish, exclusive of those fixed to new sewers and streets taken over, and 11 shafts have been carried up the sides or fronts of houses in order to obtain additional ventilation to the sewers. During the year, 13 new manholes have been built to existing sewers.

## DRAINAGE.

The proper construction of the drainage of houses has continued to occupy a great deal of the attention of the Vestry during the year and the supervision of the work has been much increased. The water test is applied to each drain and it is not covered in unless perfectly water-tight.

On the 29th July, 1891, the Vestry appointed a sub-committee to consider the existing regulations of the Vestry relating to the drainage of houses, and on the 15th February, 1893, the following regulations were adopted.

VESTRY OF THE PARISH OF FULHAM, IN THE COUNTY OF LONDON.

Metropolis Management Acts, 18 and 19 Vic., c. 120, s. 73 to 79, 82 to 85; 25 and 26 Vic., c. 102, s. 88, Public Health Act, 1891, 54 and 55 Vic., c. 76, s. 37.

REGULATIONS AND DIRECTIONS OF THE VESTRY OF THE PARISH OF FULHAM AS TO DRAINAGE.

7 days notice. 1. Every person who shall intend to erect any house or building, or to rebuild any existing building, or to make any drain for the purpose of draining directly or indirectly into any sewer in the district, or to alter or amend any existing drain, shall give 7 days notice in writing to the Vestry of such intention, and such notice shall be delivered at or sent to the office of the Surveyor to the Vestry, at the Town Hall, Fulham.

Plans and sections. 2. The notice shall be given on a printed form to be obtained at the Town Hall, Fulham, from the office of the Surveyor to the Vestry, and shall be accompanied by one complete set of plans and sections of such intended buildings or drainage works drawn to a scale of not less than one inch to every 16 feet, shewing the locality and particulars of the intended building or works, together with the position, form and particulars of every w.c., sink and bath wastes, ashpits, cistern, and all other connected work and apparatus, the course of the new drains being shewn by red lines, and any existing drains by black lines on such plans or sections; also shewing the depth of the lower floor of the premises below, or its height above the level of the pavement outside the said premises.

Level of foundation. 3. Every foundation of a house or dwelling shall be laid at such level as will permit the drainage of such houses or building to be effectually carried out.

Drains of each house to be separate. 4. All drain pipes in connection with a building shall be of approved glazed stoneware or other approved material. Each house or building shall have a separate drain connected with the main sewer, and all drains shall be, where practicable, laid in straight lines between the points of inspection.

Size and fall. 5. The main drain of the house shall be at least 6 inches, and the branch drains at least 4 inches in internal diameter, and be laid in a bed of Portland cement concrete, with a proper fall of not less than 1 in 40 for 6-inch drain pipes, and 1 in 30 for 4-inch drain pipes, and with water-tight joints.

**Jointing of pipes.** 6. Unless patent jointed pipes of an approved pattern are used all joints shall be made with neat Portland cement, and each pipe after being laid shall be cleared internally of all projecting pieces of cement or other obstructions.

**Junctions.** 7. All junctions of one line of drain pipes with another shall be made only at the sides of the pipes, by means of properly curved or oblique junction pipes, no T or right angled junctions being permitted. Taper pipes shall be used where the size of a drain is reduced in the general run.

**Pipes bedded in 6-in. concrete.** 8. All drains beneath a building shall be completely embedded in and surrounded with good Portland cement concrete at least 6 inches thick, made in the proportion of 4 parts of ballast, 1 of sand, and 1 of Portland cement.

**Syphon trap.** 9. Every main drain which may directly communicate with any sewer shall have a water syphon trap at a point within the premises of the said building, as far distant as may be practicable from such building, and as near as may be practicable to the sewer, and such trap shall have a cleansing branch connected with the inspection chamber hereafter described.

**Front inspection chamber.** 10. There shall be provided in connection with such trap, a suitably constructed water-tight inspection chamber at least 3 feet by 2 feet internal measurement, with walls of  $4\frac{1}{2}$ -inch brickwork, built in cement on a concrete foundation, and rendered with cement  $\frac{1}{2}$ -inch thick, provided the depth of such chamber does not exceed 3 feet; if exceeding this depth 9-inch brickwork to be substituted for  $4\frac{1}{2}$ -inch. An open glazed channel shall be provided at the bottom of same, and it shall be covered with an approved moveable air-tight cover.

**Back inspection chamber.** 11. There shall be provided at the upper end of the main drain in a straight line with the front chamber (and in a position to take as many connections as possible) another similarly constructed water-tight inspection chamber, at least 3 feet by 2 feet internal measurement, with an air-tight cover as above.

**Additional chambers.** 12. Additional inspection chambers as described above shall be provided where directed.

**Inlets to be trapped.** 13. Every inlet to any drain, not being an inlet provided in pursuance of the regulation in that behalf as an opening for the ventilation of such drain shall be properly trapped.

**Ventilation of drains.** 14. There shall be provided at least two untrapped openings to the drains, as follows:—

**Air inlet.** a. One opening to act as an inlet for fresh air shall be at or near the level of the surface of the ground, communicating by means of a 4-in. iron pipe, with the front inspection chamber already provided, the opening of which pipe shall be guarded by an approved grating.

Air outlet.

*b.* The second opening shall be obtained by carrying up from a point in the drains, as far distant as may be practicable from the front inspection chamber an iron or lead pipe or shaft, not less than 4 inches in diameter, vertically, to such a height, and in such a manner as effectually to prevent any escape of foul air from such pipe or shaft into any building in the vicinity thereof, and in no case to a less height than 10 feet.

Alternative plans.

*c.* In every case where the foregoing arrangement of the ventilation of the drains is impracticable, there shall be substituted such an arrangement as the Vestry shall direct.

No bends or angles.

*d.* No bend or angle shall (except where unavoidable) be formed in any pipe or shaft used in connection with the arrangements hereinbefore specified.

No air inlet under building.

*e.* No air inlet to the drain of a building shall be constructed within or underneath any such building.

Soil-pipe and ventilation of same.

15. Every soil-pipe from a water-closet shall be not less than 4 inches in diameter, and be fixed outside the building, and be continued upwards without diminution of its diameter, and, if possible without any bends, to such a height and position as to afford by means of the open end of such soil-pipe a safe outlet for foul air.

Soil-pipe connections and materials.

16. The connection between the water-closet and the soil and ventilating pipe shall be of lead. Soil-pipes are not to be used as rain-water pipes; they shall be constructed of drawn lead, at least 7-lbs. in weight to the superficial foot, when inside, and galvanized iron when outside the house, with air-tight joints.

Anti-syphons.

17. When one or more water-closets are placed one above another, delivering into a common soil-pipe, the traps of each closet must be specially ventilated by means of a 2-in. lead pipe turned into the main ventilation-pipe. All ventilation-pipes are to be made of iron or lead, with air-tight joints.

Soil-pipe not to be trapped.

18. There shall not be any trap between any soil-pipe and the drains.

Waste-pipes.

19. The waste-pipe from every bath, sink or lavatory shall be taken through an external wall and discharge into the open air immediately over a trapped gulley-grating.

Slop-sink waste pipe.

20. The waste-pipe from any slop-sink (as distinct from an ordinary scullery or kitchen sink) within such building shall be constructed in compliance in all respects with such of the provisions of these regulations as are applicable to the soil-pipe of a water-closet.

Water.-closets.

21. Every water-closet in connection with a new building shall be constructed in such a position that one at least of its sides shall be an external wall, and it shall have one window of not less dimensions, if possible, than 2 feet by 1 foot, and opening directly into the external air. Its roof shall not form the floor of any living room, and it shall be separated from any living room by an intervening lobby.

Flushing apparatus.

22. Such water-closet shall also be furnished with a flushing rim or suitable apparatus for the effectual flushing and cleansing of the pan, basin, or other receptacle.

Flushing cistern.

23. Each w.c. shall be provided, where necessary, with a 2-gallon flushing cistern and a lead conducting pipe, not less than  $1\frac{1}{4}$  inch internal diameter.

Pan.

24. The receptacle of such water-closet shall be constructed of non-absorbent material.

Containers not permitted.

25. No apparatus known as a "Container" or other similar fitting shall be constructed under such pan or receptacle nor shall a long hopper-shaped pan with spiral flush be used.

"D" traps not permitted.

26. No trap known as a "D" trap shall be constructed or fixed in connection with any water-closet.

Rain-water pipes.

27. Every person who shall erect a new building shall provide an adequate number of suitable iron properly jointed rain-water pipes with hopper heads where necessary, to conduct the water from the roof of such building, and such rain-water pipes shall discharge over an open gulley connected with the drainage of the premises. In no case shall rain-water pipes discharge over any public footway or carriageway.

Yard gullies.

28. Yard gullies shall be at least 6 inches in diameter, and shall have an outlet connected with the drain at least 4 inches in diameter, and shall be covered with an iron grating. Traps known as "Bell Traps" shall not be used.

29. Every forecourt, front area and back yard shall be provided with a gully or gullies of the size above described for the sufficient drainage of such area or yard.

Deposit for connection.

30. The connection between the house drain and the public sewer and the portion of the drain that is beneath the public way shall be made by the workmen of the Vestry; and the party requiring the drain, shall deposit with the Vestry a sum of money, to be estimated by the Vestry's Surveyor, prior to the commencement of the work to pay the expense of such connection and length of new drain, and any other works in connection therewith, and also the cost of the reinstatement of the public way disturbed by reason of the works.

31. No drain shall be laid on any premises until the drain from the premises to the existing sewer has been laid in accordance with the above regulation.

*Supervision.* 32. The whole of the works in connection with the drains shall be executed with the best materials and in the best and most workmanlike manner, in accordance with the directions herein set forth, and to the complete satisfaction of the Surveyor, Inspector, or other officer appointed by the Vestry, and his instruction in all matters relating to the work as to the lines of drains, their depths, sizes, inclinations, mode of trapping, quality of materials or workmanship shall be strictly carried out. No portion of any drain or works in connection therewith shall be covered in until it has been inspected, tested with water, and approved by such officer of the Vestry, and at least 24 hours' notice shall be given at the Surveyor's Office by the person forming the drain, when the works are ready for such Officer's inspection; and if any drain is covered in without such notice being given, the Vestry will, by its own workmen, proceed to open up and uncover the said drain and charge the expense of doing so, and of subsequently making good the same on the person so neglecting.

*Disused drains.* 32. All old brick and other disused drains shall be broken up and destroyed, and the materials forming them and all foul and sewage-charged earth and other substances carefully removed from the premises, dry earth or ballast, or brick rubbish being brought in, if necessary, in place of them.

*Positions of cisterns.* 33. No cistern from which the water is used for drinking and culinary purposes, shall be placed in any sleeping room or w.c., or in any position not accessible for cleansing purposes.

*Testing drains.* 34. All main and branch drains and junctions connected with the drainage of any house or premises are to be tested by charging with water for 30 minutes. Rainwater, soil, ventilating and other pipes are to be tested by the smoke test. All joints shall be perfectly air-tight and water-tight under their respective tests.

By Order of the Vestry,  
JAMES P. NORRINGTON, A.M.I.C.E.,  
*Surveyor to the Vestry.*

NOTE.—The Vestry urge on Builders the desirability of providing and fixing ventilators up the fronts of the houses, and connected to the main drains of the houses between the syphon trap and the sewer.

TOWN HALL, FULHAM.

*February 15th, 1893.*

I again beg to repeat the recommendations I have made in my previous annual reports, viz. :—

- 1st. That after the drains of all new houses have been tested, a certificate of their efficiency, signed by the Surveyor to the Vestry, should be given to the owner before any such house is occupied.
- 2nd. That it should be an offence for an owner to allow a house to be occupied until he can produce such official certificate.
- 3rd. That additional Inspectors be appointed so as to enable this work to be carried out.

Such a certificate would be of great value to the owner of a property, and a charge should be made for it, so as to cover the cost of the extra staff required to carry out the work, and as a consideration for the increased responsibility thrown on the officials.

A list of the plans for the drainage of houses submitted to the Vestry, will be found in Schedule III., at the end of the report.

The number of new buildings proposed to be erected in the parish, for which plans have been submitted are given in the following Table.

### NEW BUILDINGS.

Plans have been submitted for the drainage of new buildings, &c., as follows :—

1889-0.	1890-1.	1891-2.	1892-3.	
1002	920	969	757	Houses and Shops
—	1	5	4	Manufactories
2	—	4	1	Churches and Chapels
2	3	5	2	Schools
6	6	18	10	Stables
—	2	4	—	Hotels and Public Houses
—	1	—	3	Infirmery, Workhouse, and Hospital
4	19	14	8	Miscellaneous
—	—	—	—	Flats
<u>1016</u>	<u>952</u>	<u>1018</u>	<u>785</u>	

To cover the cost of the 761 connections to the buildings set forth above, different sums, amounting to £1,020 5s. 6d., have been passed over to the Accountant through this Department.

## DUST.

The Vestry has, during the year, had the dust barged away at a cost of 2s. 3d. per load.

Efforts have been made to obtain a wharf exclusively for the purpose of accommodating the barges which remove the dust, and on the 1st February, 1893, an agreement was made to hire a wharf at Crabtree, at a rental of £60 a year, for 7, 14, or 21 years. This wharf will, I hope, be soon in use, so that the existing wharf will be free for the reception of the materials required for repairing the roads as originally intended.

The dust has, generally speaking, been removed throughout the Parish once a week. It has not, however, always been possible to clear each district on the day set apart for it as intended, because, as I pointed out in my last annual report, the work of the dustmen is frequently interrupted by the weather, whilst at other times the work seems to fall light, and the men clear the Parish in five days instead of in six.

It is satisfactory to note that the number of complaints of non-clearance of dust has considerably diminished (see below).

Table showing the number of loads removed :—

Year.	Loads.	Horses, one day each.	Average Loads per Horse per day.	Cost of Horses per day.	Cost of Horse per load.	Wages per load.	Cost of Tip or barge per Load.

## TRADE REFUSE.

I have again to call the attention of the Vestry to the charge of 2s. 6d. a load for the removal of trade refuse. This is not at all sufficient, as the men receive 1s. 9d. a load, the cost of barging is 2s. 3d., and the cost of carting is about 3s. a load, making the total cost 7s. per load.

## STREET CLEANSING.

The Vestry employ for this work 62 scavengers, 42 horses and carts, 6 sweeping machines, 8 road scrapers, 12 orderly hand-carts, 5 sanding machines, and 47 sloop shoot carts, and 2 gulley carts.

I beg again to call attention to the great inconvenience caused by the omnibus companies using the public streets much as a stable yard. I have seen as many as eight pairs of horses at a time about Jerdan Place, either just taken out of the omnibuses or waiting to be attached.

## SLOPPING.

The Vestry should employ street orderlies on the Sundays as well as week days. In certain parts of the Parish some of the roads become quite in a state of nuisance before the end of a hot day, as the Sunday traffic in some of the main thoroughfares in the Parish is very heavy.

	Vestry's Horses.		Hired Horses.		Total.	No. of Loads.	Price per Horse.	Cost of Carting.

„ 14th	201	25	17	9	87	18	17	0	41	7	0	0	51	14	9
„ 18th	436	90	5	6	103	22	14	11	59	13	5	0	126	5	5
Totals...	1012	184	8	3	349	75	8	5	185	34	5	0	294	1	8

The extra men were paid at the rate of 6d. per hour.

Section 29, Public Health (London) Act, 1891, requires local authorities to remove snow from the footpaths. This responsibility formerly fell upon the occupiers of the adjoining property (see Sec. 63, Geo. III., c. 29).

The new Act does not work satisfactorily, as the Vestry cannot at a moment's notice command the services of a staff of men sufficient in number to immediately clean the footpaths as well as the roadways. The staff of the Vestry has first to concentrate its attention on the roadways in the main thoroughfares, and in the meanwhile the footpaths throughout the district are liable to become caked with snow, which often freezes and becomes almost impossible to remove.

Year.	Extra Wages Paid.			Loads of Snow Removed.	Total Cost.		
	£	s.	d.

1892-93	184	8	3	185	294	1	8

## CLEANSING GULLIES.

Two gangs of 2 men each, with 2 carts, are continually employed at this work, and the number emptied and water-sealed, averaging between 700 and 900, is reported to the Committee every fortnight

There are about 2,400 gullies in the Parish :—

	Vestry's Horses.	Hired Horses.	Total.	No. of Loads. Removed.	Approximate cost of Carting.
	Whole Days.				£ s. d.
1889	298	—	—	1192	126 13 0
1890	177	39	216	1080	91 16 0
1891	192	35	227	1135	102 3 0
1892	326	—	326	1630	163 0 0
1893	426	—	426	1704	213 0 0

Disinfectants are plentifully sprinkled about gullies and the ventilators to the sewers during the summer months.

#### HOARDING LICENCES.

Date.	No. of Licences granted.	Amount paid.		
		£	s.	d.
1888-89	71	94	9	3
1889-90	98	134	9	7
1890-91	110	68	12	9
1891-92	158	86	5	8
1892-93	180	141	9	10

#### HOARDINGS.

The Vestry charges a nominal fee of 1s. for a hoarding licence in a street not taken to by the Vestry.

## TREES.

Schedule VI. gives a list of trees belonging to the Vestry and planted in the streets in the Parish.

## HORSES AND FODDER.

Particulars of the horses owned by the Vestry, and the cost of fodder will be found in Schedule VII. and VIII. The cost of keeping horses has considerably risen during the last three years, and the difference in the prices of fodder is shown below.

The prices per quartern and per load are for each half year.

	1890—91		1891—92		1892—93	
Oats	19/-	and 20/3	21/-	and 22/6	21/6	and 21/-
Hay	63/-	„ 67/-	72/-	„ 103/-	72/-	„ 105/-
Clover	67/6	„ 79/-	85/-	„ 110/-	85/-	„ 110/.

## STABLES AND WORKSHOPS.

These were visited on March 4th, 1893. by the Members of the Incorporated Association of Municipal Engineers and considerable satisfaction was expressed with the arrangements of them.

## WHARF, OLD TOLL HOUSE SITE.

This wharf principally intended for the landing and storage of materials required for the repair of roads, &c., has been converted into a wharf for the discharge of the dust of the Parish into barges.

## TOWN HALL.

Handrails to the back staircases of the Town Hall were fixed in accordance with the requirements of the London County Council, at a cost of £33 10s.

## FULHAM RECREATION GROUND.

This piece of land area, 8 acres, 2 roods, 29 perches, 23 yards, was laid out and planted during the year, and opened on Friday December 30th, 1892. The whole of the work of laying out, arranging, levelling, forming footpaths, &c., was done by the Vestry's workmen.

A portion of the ground is laid out as a playground, this is divided into two parts, one for boys and the other for girls, each part being supplied with swings and gymnastic apparatus.

## BISHOPS AND WEST MEADOWS.

The work in connection with laying out the land has proceeded during the year. Tenders for constructing the River Wall were

received by the Vestry on the 6th day of July 1892, and finally that of Mr. Jos. Mears, undertaking to carry out the work for the sum of £12,800, was accepted and the work commenced. The Wall is constructed entirely of concrete and faced with concrete blocks.

## ASSOCIATION OF MUNICIPAL ENGINEERS.

The works at Bishops Meadows were visited by a great number of the Members of the Association of Municipal and County Engineers on the 4th March, 1893, and a full description of the construction of the River Wall, &c., read to the members. A considerable amount of satisfaction was expressed with the construction and appearance of the Wall.

## CROMWELL ROAD BRIDGE.

The construction of this Bridge is still being delayed owing to the failure of the London County Council to obtain the sanction of Parliament to the principle of betterment.

The proposals were to levy a special rate to cover one-third of the cost of the Bridge, the Vestry also to pay one-third, and the London County Council the remaining third.

If the Bridge is not constructed the injury to the North End of the Parish will be very serious. I, therefore, again beg to call the attention of the members of the Vestry to the importance of this improvement.

## LAMMAS LANDS.

The Vestry unfortunately lost the action which was brought against it for trespass on the land known as Lammas Lands in this Parish.

The action came on for trial on the 22nd of February last before Justice Kekewich, when the Vestry was directed to pay the sum of 40s. damages and taxed costs.

## EXCAVATIONS ON THE SITE OF PROPOSED ROADWAYS.

On the 8th July, 1892, a builder was fined £5 and 2s. costs for excavating and removing sand gravel and subsoil from Dorncliffe Road contrary to the regulations made by the Vestry under Sec. 6, 53 & 54 Vic. chap. 66 of the Metropolis Management Act, 1890.

## IMPROVEMENTS WHERE LAND IS GIVEN UP,

Position.	Name of Owner of Land.	Area of Land Given up. Sq. yds.	Cost of Land.	Cost of Work.
			£ s. d.	£ s. d.
Star Road widening (North side) . . . .	Mr. C. Beeton . .	187 $\frac{2}{3}$	Nil	374 16 3
Crown Road widening, opposite Recreation Ground. . . .	Vestry of Fulham	2680	Nil	15 10 0

Other improvements will be found in Schedule X.

## APPLICATIONS FOR LOANS, CONTRACTS, LIST OF STOCK.

These particulars will be found in Schedules XI., XII., XIII.

## MEETINGS, CERTIFICATES AND LETTERS.

	No. of Meetings held.	Attended by Surveyor.	Certificates to Contractors.			No. of Letters sent by Surveyor.	
			No.	Amount.			
				£	s.	d.	
1888-89	233	180	111	22,177	8	9	1,628
1889-90	283	200	74	12,658	17	3	2,251
1890-91	392	250	20	13,775	2	9	2,979
1891-92	441	350	55	16,885	10	3	3,106
1892-93	367	258	42	13,086	2	10	3,860

The above table shows the number of Vestry and Committee meetings held. These are almost entirely held in the evening, and many of them last until a very late hour. The attendance at them is a very severe strain, and I should be glad if some arrangement could be made to lessen the number that I have to attend, in the same manner as has been arranged in the Clerk's Department.

## STAFF.

Various changes have taken place in the staff in my department. On the 6th July, 1892, Mr. W. F. Owsley was appointed Junior Assistant. On the 14th September, 1892, Mr. T. Vercoe was appointed Temporary Clerk of Works, and on the 28th September, 1892, Mr. E. Dakin was appointed Assistant Clerk of Works.

On the 24th January, 1893, Mr. D. S. Matthews resigned his appointment as Assistant Clerk of Works, and a testimonial was granted him under the Seal of the Vestry.

## CONCLUSION.

I have again to call the attention of the Vestry to the following matters requiring more or less urgent attention.

- (1.) The construction of the Cromwell Road Bridge.
- (2.) The permanent relief from surcharging of the sewers of the district.
- (3.) The deodorization of the sewage in the district, as recommended in my report on sewers.
- (4.) The construction of a new sewer in Wandsworth Bridge Road.
- (5.) The provision of a large and suitable wharf.
- (6.) The improvements of the approaches to the Parish over Stanley Bridge, Stamford Bridge, Lillie Bridge, to the junction of North End Road and Hammersmith Road.
- (7.) The various widenings of the North End Road.
- (8.) Do. do. Fulham Road.
- (9.) The widening of Bagley's Lane.
- (10.) The relief of the various thoroughfares from the nuisance and obstruction caused by the practice of the Omnibus Companies changing horses in the streets.

I have again the pleasure of expressing great satisfaction with the Officials in my department, Mr. William P. Jones, the Superintendent of Roads; Mr. Charles Botterill, Assistant Surveyor; Mr. J. A. Webb, Chief Clerk of Works; Mr. E. Dakin, Assistant Clerk of Works; Mr. T. Vercoe, Temporary Clerk of Works; Mr. W. F. Owsley, Junior Assistant, and I desire to thank them for their able assistance.

I also beg to repeat my thanks to many of the other officials and members of the Vestry for their co-operation, assistance, and courtesy during the year.

I remain, Mr. Chairman and Gentlemen,

Your obedient Servant,

JAMES P. NORRINGTON,

Assoc. Mem. Inst., C.E.

Member of the Incorporated Association of Engineers,

*To the Chairman and Members of  
the Vestry of the Parish of Fulham.*

*Surveyor to the Vestry.*

# VESTRY OF THE PARISH OF FULHAM,

IN THE COUNTY OF LONDON.

---

NEW STREETS SURVEYOR'S DEPARTMENT,

TOWN HALL, WALHAM GREEN,

*July, 1893.*

MR.\* CHAIRMAN AND GENTLEMEN,

I beg to present my Fourth Annual Report on matters connected with my department for the year ending 25th March, 1893.

During the year 307 summonses have been issued for amounts due for apportionments; the following of which have been contested:—

## MORNINGTON AVENUE.

This summons was issued to recover the estimated expenses of paving opposite a strip of land in Mornington Avenue. The defendant argued that he had a very short interest in the land in question, and merely used it as a passage to the back part of his premises, and that he was not during the continuance of his interest in the property allowed to make any access to the road in question, the Magistrate made an order for the amount claimed, but expressed his opinion that the claim should be allowed by the Vestry as a flank.

## NORMAND ROAD.

It was contended in this case that the Vestry had charged for paving expenses, and proposed to pave on portions of land that had not been dedicated to the Parish. Evidence was given to shew that the public had had a right of user over the land in question for a considerable period. After a lengthy hearing the Magistrate made an order for half the amount claimed; the defendant dedicating the land in question to the Parish.

## ST. ALBANS TERRACE.

These summonses were issued against the occupiers to recover the estimated expenses of paving St. Albans Terrace. The Magistrate

dismissed the summons on the ground that it had not been proved in evidence that the judgement of a Court of Competent Jurisdiction had been obtained against the owner prior to the proceedings against the occupier.

### SALISBURY MEWS.

The Magistrate after hearing the evidence in this case, held as a fact, that as Salisbury Mews had only one entrance, and was built over on only two sides of the mews, there being no entrance from the mews to the premises on the other side, but simply a blank wall, it was not in fact a new street within the meaning of the Act, and dismissed the summons.

### EFFIE MEWS.

The Magistrate held in this case that Effie Mews was not a new street within the meaning of the Act, there being no evidence of user on the part of the public, and accordingly dismissed the summons.

### FILMER ROAD.

These summonses were issued to recover the estimated cost of paving Filmer Road, which included a portion of the roadway opposite 6 to 10 on plan. It was argued that the late District Board of Works had already taken to this portion of the road, and that having done so, the Vestry were not entitled to charge for the portion in question. After hearing the evidence the Magistrate made *no* order.

The Vestry appealed on this decision before the Lord Chief Justice and Mr. Justice Cave, when they dismissed the special case, holding that a Vestry having once taken to a new street, or part of a new street, were afterwards bound to maintain the whole of the new street and any addition thereto longitudinally.

### GREYHOUND ROAD, SEC. V.

It was argued in this case that Greyhound Road was not a new street. Evidence was given as to the widening that had taken place, and the erection of new buildings. The Magistrate after having viewed Greyhound Road, decided that it was a new street, and made the orders for the amounts claimed accordingly.

I remain, Mr. Chairman and Gentlemen,

Your obedient Servant,

W. SYKES.

# ADDITIONAL APPORTIONMENTS.

The following additional apportionments have been sealed, the roads having exceeded the original estimate.

Name of Road.	Rate per foot.		Amount.			Original Rate per foot.		Total Rate per foot.		Date of Sealing.
	s.	d.	£	s.	d.	s.	d.	s.	d.	1893.
