# REPORT

OF THE

## Vestry of the Parish of Fulham.

FOR THE YEAR 1895-96.

---

CLERK'S DEPARTMENT,

27th May, 1896.

GENTLEMEN,

I beg to present to you the Annual Report of the Vestry for the year ended 25th March, 1896.

### POPULATION.

The following statement will show the rateable value, population, and number of houses, at various periods, from 1856 to 1896.

Date.	Rateable Value.	Number of Houses.	Population.
	£		
1856	47,492	2,350—estimated.	14,100—estimated.
1861	55,916	2,583	15,539—census.
1871	100,121	3,909	23,378 do.
1881	190,136	6,685	42,895 do.
1891	426,551	12,869	91,640 do.
1896	560,965	16,270	113,871 do.

### ADDITIONAL POWERS.

During the past year the Vestry, in the interests of the Ratepayers, decided to apply to the Local Government Board for an order conferring upon them the under-mentioned powers under secs. 33 and 34 of the Local Government Act, 1894, viz. : (1) The powers, duties and liabilities of the Fulham Burial Board ; 2) powers for the compulsory acquisition of land under the Land Clauses Act ; (3) all the powers with reference to the appointment of Trustees of Parochial Charities ; and (4) the custody of the public books, writings and papers of the parish, and all documents directed by law to be kept therewith,

other than the registers of baptism, marriages and burials, and Church or ecclesiastical charity books and documents. A petition embodying the above application was duly prepared, sealed by the Vestry, and sent to the Local Government Board, who—up to the time of preparing this report—had intimated that they would be prepared to make their order in respect to Nos. 1 and 4, but that they must decline to make an order for No. 2 ; also that they were in communication with the Charity Commissioners in respect of No. 3, and so soon as they heard from the Commissioners they would communicate further with the Vestry thereon.

Petition sealed and  
sent to Local  
Government Board.

Result.

#### ALTERATION IN COMPOSITION OF VESTRY.

Between the 15th December, 1894, the date of election under the Local Government Act, 1894, and the 16th May, 1896, the day of election for 1896, the following changes have taken place :—

Bennetts, Mr. W. Paul...	Resigned 1st January, 1896
Brand, Mr. W. H. ...	do. 15th April, 1896
Davies, Dr. T. ...	Seat declared vacant 27th November, 1895
Gibson, Mr. G. J. ...	do. do. 15th April, 1896
Greenwood, Mr. C. ...	do. do. 27th November, 1895
Harrison, Mr. H. T. ...	Died March, 1896
Millbank, Mr. E. L. G....	do.
Thelwall, Mr. W. H. ...	Resigned 15th April, 1896

The vacancies created by the Messrs. Davies and Greenwood's seats being declared vacant, were filled up on the 19th December, 1895, when Messrs. Job Walborn and Guillaume François Vallat were respectively elected. In May, 1896, Mr. Vallat resigned, and a casual election, to fill the vacancy thus created, was held on the 16th May, 1896, the same day as the elections for the ordinary vacancies.

#### AMALGAMATION OF CITY AND COUNTY OF LONDON.

On the 8th May, 1895, the Law and Parliamentary Committee reported to the Vestry that, having carefully considered the report of the Royal Commission and other papers and documents bearing on the subject, they deemed it advisable that a Charter of Incorporation conferring on the parish of Fulham the rights and privileges of a municipality should be obtained, whereupon the Vestry referred the matter to a general Committee of the whole Vestry, to obtain full information as to how this question will affect the Parish financially and otherwise. This Committee appointed Mr. F. A. Jewson as their Chairman, and Mr. Baker as their Vice-Chairman, and have held several meetings on the matter, but, as the London County Council in January last convened a Conference between representatives of the Council and of the various local authorities to consider and report what powers now possessed by the Council should be transferred to the local authorities in order forthwith to facilitate the carrying into effect of the recommendations of the Royal Commission on

Report of  
Law & Parliamentary  
Committee.

Action of Vestry.

Chairman  
of Committee.

London County  
Council Conference.

this subject, the Committee adjourned their deliberations, *sine die*, and the Vestry appointed Mr. E. Beal and Mr. F. Oscar Drew as Representatives at the Conference. The Conference met on six occasions and the result of its deliberations will shortly be published by the London County Council in book form.

### BARGING AWAY DUST AND SLOP.

The old contract for barging away the dust and slop having expired the Vestry instructed the Solicitor to draw the form of contract, which was approved on the 18th September, 1895, and he was instructed to get same executed, the term to be for two years at 2s. 3d. per load dust, and 1s. 9½d. per load slop, and, on the 2nd October, the contract duly executed by Messrs. Keep was sealed by the Vestry.

### BATHS AND WASHHOUSES ACTS.

The Vestry, having had their attention called to the want of swimming baths in this parish, referred the matter to the Works Committee who appointed a Sub-Committee consisting of Messrs. A. Williams, Harrison, Rev. C. Spooner, Devine, Drew, Green, C. King, Lacey, Lee, Marks and Sayer, to consider and report to them *re* the question of providing swimming baths in the parish. After holding several meetings and obtaining information from similar institutions, the Sub-Committee reported to the Works Committee recommending that, for the present, washhouses should not be dealt with, but that central swimming baths should be provided. The Works Committee having carefully considered the Sub-Committee's report, resolved to recommend the Vestry to take measures to bring into operation the Public Baths and Washhouses Acts in this parish, which recommendation was carried at the Vestry, and, at a special meeting of the Vestry held on the 13th November, 1895, on the motion of Mr. Drew, seconded by Mr. Sayer, it was resolved by 23 votes to 6, "That the Baths and Washhouses Acts, 1846 (9 and 10 Vic., cap. 74), and the Acts amending the same, be adopted for the parish of Fulham." The necessary documents embodying the above resolution, having been prepared and sent to the Local Government Board, they, on the 14th December, 1895, forwarded to the Vestry their formal order approving of the adoption by the Vestry of the Public Baths and Washhouses Acts, and on the 15th January, 1896, the Vestry elected Messrs. C. King, E. G. Easton, C. F. Hawker, S. Knight, W. R. Sayer, T. Whiteley and E. J. Lee, as the first Commissioners. At the first meeting of the Commissioners, held on the 27th January, 1896, Mr. E. G. Easton was elected Chairman and Mr. E. J. Lee, Vice-Chairman, and Mr. W. J. H. Denselow was elected Clerk to the Commissioners at a salary of £25, subject to the Vestry consenting to his holding such appointment, which sanction was given by the Vestry on the 29th January, 1896. On the 12th February, 1896, Mr. C. King tendered his resignation as a Commissioner, and 26th February, 1896, Mr. H. Terry was elected in his place.

## BISHOP'S PARK.

Laying out Pryor's Bank. Since the issue of the last report the Vestry have obtained the consent of the County Council to the plan of laying out Pryor's Bank, &c., and have also issued advertisements, and received tenders for carrying out the necessary works in connection with the building of the River Wall, that of River Wall. Messrs. Wimpey & Co., of Hammersmith, for the sum of £2,551, being accepted. At the time of preparing this report, the works are in progress and it is hoped they will be complete before the end of the summer.

Taking possession of Pryor's Bank. On the 24th April, 1895, the Surveyor reported to the Vestry that on their behalf he had taken over (from the representative of the Ecclesiastical Commissioners) the possession of Pryor's Bank, and suggested that the house could be converted into an "official residence," and that he might be considered in the matter a resident, whereupon the Vestry *resolved* that the Surveyor's request be acceded to during the time the works of laying out, &c., are in progress.

Refreshment Room. A refreshment room has also been provided in the south-western part of the Park, near the entrance from the Bishop's Avenue, where the public will be enabled to procure temperance drinks and light refreshments, at popular prices.

Bandstand. The Vestry have also erected a bandstand in the south-western part of the Park, on which one of the London County Council's bands will perform.

## BRANCH LIBRARY IN WANDSWORTH BRIDGE ROAD.

Opening of. This edifice having been completed since the issue of my last report, I have to chronicle the fact that on Monday, the 20th day of January, 1896, Mr. W. Haye Fisher, M.P., at the request of the Library Commissioners, attended and performed the ceremony of declaring the Branch Library opened to the public, when he laid great stress on the value, from an educational point of view, of such buildings. There were a large number of people present (including the Commissioners), who entered fully into the desirableness of such institutions, and appeared pleased with the one in question.

## BYE-LAW AS TO STRANGERS AT VESTRY MEETINGS.

Bye-Law confirmed. On the 30th October, 1895, the following Bye-Law viz.:—"33A. Any person not being a Vestryman who shall be guilty of disorderly conduct, or shall interfere with or interrupt the business or proceedings of the Vestry, and who shall not withdraw when called upon by the Chairman to do so, shall be liable on summary conviction to a penalty not exceeding Forty Shillings," was confirmed by the Vestry, and subsequently approved by the Secretary of State.

Approved by  
Secretary of State.

## CAB RANK, WALHAM GREEN.

Cab Rank. After considerable correspondence with the Chief Commissioner of Police, and interviews with deputations of the Cabmen's Union and others, the Vestry, on the

27th November, 1895, received from the Commissioner an order appointing the cab rank to be as follows :—

1. A standing for three hackney carriages in the Fulham Road, outside Broadway Buildings, Walham Green, commencing opposite the centre window of the bank and extending by the kerb in a westerly direction as far as may be necessary for three hackney carriages to stand, leaving a space of six yards between each carriage, horses' heads eastward.

2. A standing for five hackney carriages in three portions, viz. :—

*First portion*—One carriage to stand on the west side of refuge in centre of road at Broadway, Walham Green, horse's head westward.

*Second portion*—One carriage by the kerb on the east side of Effie Road, eight yards from the junction of Effie and Harwood Roads, and clear of the entrance to Harwood Mansions, horse's head northward.

*Third portion*—Three carriages by the kerb on the north-east side of the approach to Eelbrook Common, to commence three yards from junction of Effie Road, horses' heads westward.

The first portion to be fed exclusively by carriages from the second portion, and the second by carriages from the third portion.

#### CHURCHWARDENS.

Election of. At the meeting of the Vestry held on the 8th April, 1896, the Vicar of Fulham re-elected Mr. Frank Manby, of Wensum House, Napier Avenue, as Vicar's Warden, and the Vestry re-elected Mr. E. G. Easton, of 3, Auriol Road, as the People's Warden.

#### CROMWELL ROAD BRIDGE.

Improvement. At a meeting of the Works Committee on the 8th May, 1895, a deputation on behalf of a committee of ratepayers and owners of property in West Kensington (headed by Mr. Stuart-Barker as spokesman), attended and asked the Committee to recommend the Vestry to approach the London County Council, with a request to carry out the Improvement as a Metropolitan Improvement, at the same time promising they would do all in their power to support such application, and the Committee, having given the subject their careful consideration, resolved to recommend the Vestry accordingly. The recommendation of the Works Committee having been adopted by the Vestry, Messrs. Green, Harrison, Woods, Beal, Sayer, Terry, Parker, Baker and C. J. Williams and Rev. C. Spooner were appointed the deputation to wait upon the London County Council. The deputation waited on the Council on the 3rd July, 1895, and argued in support of the Council carrying out this work as a Metropolitan Improvement; and at the Vestry meeting held on the same evening the Clerk was instructed to write the London County Council informing them that the scheme at present suggested would not interfere with Mr. Whiteley's buildings, as shown by the plan deposited by Mr. Stuart-Barker, which letter was written, but up to the end of the year no reply had been received from the County Council.

Deputation to London County Council.

## EARL'S COURT EXHIBITION.

Drainage of.

The Vestry and its Works Committee had a great deal of its time occupied during 1895 by discussions on the state of the drainage of the Earl's Court Exhibition. The Works Committee appointed a Sub-Committee, consisting of Messrs A. Williams, Steel, Marks and Thomas, to accompany the Drainage Inspector and Chief Outdoor Assistant to see the drains properly tested, and the Sub-Committee accordingly attended at the Exhibition for that purpose. After having thoroughly tested all the drains in the Exhibition, the Sub-Committee prepared voluminous reports, setting out the action they had taken, and containing reports of the Drainage Inspector, Chief Outdoor Assistant and Surveyor, together with copies of the correspondence which had passed between the officials of the Exhibition and the Vestry thereon, which reports formed the subject of debate at the Works Committee on many occasions. However, on the 4th December, 1895, the final report was adopted by the Committee, and, on the 11th December, 1895, presented to the Vestry, with the following result :—

“That having fully considered the report of the Sub-Committee appointed to examine the drainage at the Earl's Court Exhibition, we express our approval of the same, and now *recommend* that the necessary work be completed as early as possible, and that the thanks of this Vestry be accorded to Messrs. Marks, Thomas, Steel and A. Williams for their services so ably rendered in connection with the inspection of the drainage. We further *recommend* that it be referred to the Sanitary Committee to make a thorough examination and serve notices as to the Vestry's requirements.”

An amendment was moved by Mr. Thomas, seconded by Mr. Marks,

“That before making his Report No. 11, on page 7 of the reports on the drainage of the Empire of India Exhibition (on which the Surveyor says he based his Report No. 12) the Chief Outdoor Assistant should have satisfied himself that such report was true in substance and in fact. That he did not do so has been amply proved by subsequent examinations and reports, and the Chief Outdoor Assistant having failed in his clear duty to this Vestry, he be and is hereby censured.”

On being put to the vote the amendment was declared *lost*, when a division was claimed with the following result :—

*For the amendment* :—Messrs. Comben, Cranfield, Greig, Hobbs, E. J. Lee, Maloney, O'Brien, Sayer and Terry. *Tellers*, Messrs. Marks and Thomas—11.

*Against* :—Messrs. Atkinson, Beal, Brand, Cook, Curtis, Devine, Drew, Foreman, Haines, Knight, Lacey, Lewen, Manby, Marchmont, Millbank, Moseley, Palmer, Parker, Pendlebury, Rooth, Squires, Steel, Thelwall, S. White, A. Williams, Wingrave and Woods and Dr. Lee. *Tellers*, Mr. Beal and Dr. Hill—30.

The amendment was declared *lost*, and the motion was put and *carried*.

In accordance with the above resolution, the Medical Officer of Health, by direction of the Sanitary Committee, has served the requisite notices and the Exhibition Company have been carrying out the work in accordance therewith.

On the 27th August, 1895, the Vestry took proceedings against Messrs. Doulton & Co., Mr. Bassett, and Mr. D. Charteris—the two former for breaches of the London County Council's Bye-laws, and the latter for breach of the Metropolis Management Acts, when they were respectively fined 20/- and 2/- costs.

#### ELECTRIC LIGHTING IN CONJUNCTION WITH A DESTRUCTOR.

The Vestry on the 24th April, 1895, resolved to appoint a Special Committee of 15 members to consider and report as to the advisability of applying for a Provisional Order to supply the Electric Light to the parish; also as to constructing a Destructor in connection therewith, and on the 8th May, 1895, Messrs. Cranfield, Comben, Green, Moseley, Sayer, Thelwall, S. White, Cook, Jewson, Lee, Bennetts, Harrison, Marchmont, Drew and Millbank were elected as such Special Committee. At their first meeting Mr. W. R. Sayer was appointed Chairman and Mr. R. E. Cranfield Vice-Chairman of the Committee. After various meetings, during which the Committee interviewed several electrical experts on the matter, Mr. Francis H. Medhurst, B.S., M.I.E.E., was selected by the Vestry to prepare a report with reference to the Electric Lighting of the parish in conjunction with a Dust Destructor, at a cost of £50. On the 24th March, 1896, Mr. Medhurst presented his report to the Committee, who received same, and resolved to recommend the Vestry to have same printed and a copy sent to each member of the Vestry, which recommendation was adopted by the Vestry.

#### FULHAM AND FREE LIBRARY.

On the 15th January, 1896, Messrs. F. O. Drew and A. Williams were re-elected Commissioners, and Mr. H. B. Palmer, of 219, New King's Road, was elected a Commissioner in the room of Dr. J. R. Hill, retired.

#### FULHAM BURIAL BOARD.

On the 19th June, 1895, the Rev. J. S. Sinclair, M.A., J.P., Mr. C. F. Hawker, of 32, Chesilton, Road and Mr. W. Paul Bennetts, 107, Dawes Road, were elected members of the Fulham Burial Board in the room of Dr. T. Davies and Messrs. W. G. March and J. H. Margrie, retired.

#### INCORPORATION OF THE BOROUGH.

(See Amalgamation of City and County of London.)

#### OVERSEERS.

On the 25th March, 1896, Messrs. Cranfield, Curtis, Lacey, Knight and Parker were re-elected Overseers for the ensuing year, and Mr. Frank Adams was elected an Overseer in the room of Mr. Ascott, retired.

## RECREATION GROUND.

Removal of swings      In consequence of the swings being principally used by young men and women, the children being thereby prevented from having the proper use of them, the Vestry *resolved* that they be taken down, and the swings have been removed accordingly.

Bandstand,      Messrs. Lovibond's band having expressed their willingness to play once a week at the Recreation Ground if the Vestry would have the band stand covered, and provide music stands, the Vestry resolved to cover the bandstand and provide music stands, as suggested.

## SANITARY DEPARTMENT.

Enquiry into working of      On the 18th September, 1895, the Vestry, on the recommendation of the Sanitary Committee, confirmed the appointment of a Sub-Committee, consisting of the Chairman of the Committee, Dr. J. R. Hill and Messrs. Drew, Jewson, Marks and C. J. Williams, to enquire into the work of the officers of the Sanitary Department, and that Sub-Committee, after having held several meetings and received a report from the Medical Officer of Health as to the work of the various officers of his department, submitted the following report to the Sanitary Committee on the 2nd December, who approved same, and recommended it to the Vestry for adoption, by whom it was, on the 11th December, confirmed :—

1. From time to time the attention of the Vestry has been unpleasantly drawn to the friction, the delays, the unsatisfactory results, and the unnecessary expense to the property-holders, resulting from the dual control in regard to House Drainage Reconstructions. We are strongly of opinion that the whole of such works should be carried out by the Officers of the Sanitary Committee under the supervision of its Medical Officer of Health, and we also recommend that one of the Drainage Inspectors be transferred from the Works to the Sanitary Department, so as to supervise and be responsible under the Medical Officer of Health for the proper carrying out of the house drainage works ordered by the Sanitary Officers of the Vestry. This is the more desirable as the Surveyor is already overwhelmed with detail work, which would thus, in part, be removed to the Medical Officer of Health—whose duties, we gather upon enquiry, to be by no means of a continuous character.

2. Whilst we are of opinion that the Sanitary Inspectors carry out their functions in a thorough and earnest manner; and whilst we recognise that their position under the Public Health and other Acts, as well as by the Vestry's Bye-laws, requires them, in many cases, to report and act under the Sanitary Authority immediately, we have clearly recognized that there is a loss of purpose, owing to a certain lack of direction and control by the Medical Officer of Health.

We, therefore, advise that the Sanitary Inspectors and the Drainage Inspector proposed to be transferred shall report daily to the Medical Officer of Health, on forms to be kept in books—separately assigned to each Inspector—as to their work on the previous day (see Form appended "A").

The Medical Officer of Health should also more closely direct and supervise their duties, and should be more responsible than at present for the working of the department, as, indeed, was, we believe, contemplated by the Vestry in appointing a Medical Officer of Health for whole—instead of part—time.

3. The Sanitary Clerk is engaged from 9 a.m. to 5 p.m., except on Saturdays, when he ceases work at 2 p.m. He is allowed an hour for lunch. His working hours are thus 40 only per week. We propose that his hours shall be extended by an hour each day, except Saturday, and that he shall no longer be required to attend the Sanitary Committee, where he is not needed. We think that for the extra service he should be allowed £10 additional per annum.

With this increase of clerical power, and with the very considerable lightening of the Sanitary Clerk's present work, which we detail below, we confidently state that not only the present merely clerical work can be done, but that no inconsiderable part of the copying and formal book entries at present performed by the Sanitary Inspectors can be carried out by Mr. Clarke, thus setting free the Sanitary Inspectors for more important duties.

*a.* Forms of letters should be as largely as possible printed, with blanks for insertions of details. The forms now in use are few, and could well be increased in number.

*b.* The duplicate Intimations which in future will be brought before the Sanitary Committee should be copied by the Sanitary Clerk from the notices served by the Sanitary Inspectors. The Form "A" shall be written as now by the Sanitary Clerk and checked and signed by the Inspectors.

*c.* The Continuous Record of Inspections Book, on which so much time (about two days a week) is now spent, is, in part, a simple repetition of the information given on the counterfoil of the Intimation Book. With details inserted on the counterfoils showing the decisions of the Sanitary Authority, and how the works have been carried out, &c., as set forth on Form "B" appended hereto, the requirements of the Public Health Act will be complied with, and much of the Sanitary Clerk's time saved. The Intimation Book should be indexed for simplicity of reference.

*d.* The work sheets might be written up by the Sanitary Clerk instead of by the Sanitary Inspectors.

*e.* Notices to Schools, &c., counterfoils should be numbered merely, and the details omitted.

4. Fee and other similar Books should be initialled and dated by the Medical Officer of Health. There should also be checks as to the different forms having been sent out. Whoever is responsible should invariably initial and date the items in the books.

We are thus of opinion, in answer to your reference, that a Junior Clerk will not be necessary.

We also recommend that the Sanitary Inspectors should leave the Committee Room as soon as their Sanitary reports shall have been con-

sidered, which should be at the earliest possible time after the reading of the minutes.

We are strongly of opinion that these alterations will strengthen and improve the working of the Sanitary Department of the Vestry and enable the work to be done more easily, more effectively, and more rapidly, while lessening the cost and annoyance to the public in carrying out Sanitary works. The additional cost would be really trifling.

All officers of the Sanitary Department have vied in assisting us in our inquiries.

## STANDING ORDERS AS TO DISORDERLY CONDUCT BY A VESTRYMAN.

On the 22nd April, 1896, the Vestry made the following Standing Order (p 64), viz. :—

“3. If any Vestryman shall be guilty of unseemly, rude or violent behaviour, which disturbs or interrupts the progress of the business or proceedings of the Vestry or any Committee thereof, or shall thereat make any noise or use any language as to cause any annoyance, the Chairman may, of his own accord, or on his attention being called thereto, call upon the Vestryman so offending to apologise for his offence. Should the Vestryman fail to do so in a manner satisfactory to the Chairman, the latter shall name him, and it shall thereon be competent for any Vestryman to move that the Vestryman so named be suspended from the service of the Vestry or Committee for that meeting. The Chairman shall, after opportunity has been given to the offending Vestryman to explain to the satisfaction of the Chairman, forthwith put such motion without amendment, adjournment, or debate. Upon such motion being carried, the offending Vestryman shall immediately withdraw from the meeting.”

Confirmation of. which was confirmed at the subsequent meeting of the Vestry held on the 6th May, 1896.

## STREET IMPROVEMENTS.

The following Street Improvements have been under consideration by the Vestry since March, 1895 :—

**Fulham Road.**  
Widening between Fire Station and Messrs. Stansfeld's  
By direction of the Vestry the Surveyor prepared a report giving his valuation of the various interests in the forecourts, &c., required to widen the Fulham Road between the Fire Station and Messrs. Stansfeld's, which was referred to the Solicitor to report upon; but as it appeared that, in the prices asked by the various owners, the improvement would cost considerably more than the original estimate, it was *resolved* that the London County Council be approached with a view to their increasing the amount of their promised contribution. The Council were written to accordingly, but to the time of preparing this report the Vestry had not received the decision of the Council thereon.

**Widening between Library and Wheatsheaf Alley.**  
In May, 1895, the Vestry *resolved* that the London County Council be requested to receive a deputation from the Vestry with reference to the widening of Fulham Road between the Library and Wheatsheaf Alley (a favourable opportunity having arisen to effect an improvement there), and that in the event of the Council agreeing to assist the Vestry the improvement be carried out, and the following gentlemen were appointed to serve on the deputation :—Messrs. Williams, Harrison, Boyton, Comben, Green, Sayer, Perry and Whiteley and the Rev. C. Spooner. The Council having agreed to receive a deputation, they waited on the Council, by appointment, on the 14th September, 1895, when the matter was fully set before the Council by Mr. Tom Green on behalf of the Vestry. Negotiations were also entered into between the Officers of the Vestry and the Surveyor employed on

behalf of the owners of the property, but in consequence of the price asked for the land required for the improvement being so very much in excess of the Vestry's Surveyor's valuation, the Vestry *resolved* to carry out the improvement under the provisions of Michael Angelo Taylor's Act, and instructed their Solicitor and Surveyor accordingly, and the plan of the proposed widening was sealed on the 1st January, 1896. Notices to treat were duly sealed by the Vestry on the 15th January, 1896, and served by the Solicitor on the Right Rev. Mgr. Fenton, the Rev. J. S. Sinclair, M.A., J.P. and Miss Byrne, on the 20th January, 1896, and the Vestry appointed Messrs. Fuller & Fuller, Valuers, of 70, Queen Street, E.C., to act in their behalf in this matter. At the date of this report negotiations were pending in this matter.

On the 3rd July, 1895, the Vestry instructed their Solicitors to proceed with the appeal against the Superintendent Architect's definition of the general line of building in Fulham Road by Munster Road, and on the 18th September, 1895, the Solicitor reported that the Tribunal of Appeal had confirmed the Superintendent Architect's report, and dismissed the appeal. The Vestry thereupon on the 16th October, 1895, *resolved* to carry out the Improvement at the corner of Munster Road under the provisions of Michael Angelo Taylor's Act, and instructed their Solicitor and Surveyor to that effect. The Clerk was also instructed to apply to the London County Council for their sanction to the Improvement, and also for a contribution towards the cost of effecting the same, and the plan of the proposed widening was on the 4th December, 1895, sealed by the Vestry. On the 11th December, 1895, the Solicitor reported that the respondent's costs in the matter of the line of frontage were delivered at the sum of £52 19s. 4d. and were taxed by Master Pollock down to £4 4s.; also that with regard to the improvement, he had served notices upon the freeholders, and upon Messrs. Lea & Grace in accordance with the Vestry's resolution of the 4th inst, but had not up to that date received the claims pursuant to the notice. The freeholder and leaseholders having protested against the Vestry withdrawing the notice to treat served pursuant to resolution of Vestry on 16th October, 1895, and substituting that served under the resolution of 4th December, 1895, the Solicitor was instructed to see the interested parties with a view to some agreement being come to, and power was given him to take Counsel's opinion if necessary. On the 15th January, 1896, the Solicitor reported he had been unable to meet the owners of the property with the view to an amicable arrangement, and had therefore taken the opinion of Mr. Channel, Q.C., which he produced, and the Vestry *resolved* to proceed in accordance with such opinion. A sealed tender on behalf of the Vestry was duly served on the leaseholders, and as the offer contained therein was declined, a Precept to the Sheriff, calling upon him to summon a jury to assess the compensation payable to such leaseholders, has been sealed by the Vestry and duly served.

The Vestry having *resolved* to carry out the Improvement in North End Road by Fane Street, under the provisions of Michael Angelo Taylor's Act, the Solicitor and Surveyor were accordingly instructed to carry the matter through, and the Clerk was directed to make application to the London County Council for their consent to the widening between Nos. 186 and 196, and for a contribution of half the cost of effecting the Improvement

Notices to treat were duly served, and tenders sealed and made to the different owners in respect of their interests. One of the persons interested (the owner of No. 182), having declined to accept the Vestry's tender, the Sheriff, at the request of the Vestry, summoned a jury to assess compensation, who viewed the premises on the 13th March, 1896, and at the trial on the 14th March, 1896, assessed the compensation to be paid at £26. As that sum was less than the Vestry had previously tendered, the owner in question had to pay the Vestry's costs in accordance with section 82 of the above mentioned Act, and the widening has now been carried out.

Widening by Beaufort House.

The Surveyor having been instructed to prepare a plan and an estimate of the cost of acquiring the necessary land to carry out the widening of North End Road by Beaufort House, the Vestry appointed a deputation consisting of Messrs. Lacey, Harrison, Sayer, Knight and C. King, to wait upon the London County Council and request them to contribute two-thirds of the cost as a local improvement. The deputation waited on the Council, and Mr. Harrison fully set before them the views of the Vestry thereon, when it was suggested that an amended application should be made by the Vestry on a larger scheme, and the Vestry, on hearing the result of the interview, instructed the Surveyor to prepare a scheme on the lines of the Council's suggestion, and appointed a Sub-Committee to confer with him in regard to the preparation of the scheme. The London County Council having written stating they had resolved to contribute one half of the net cost of widening between Nos. 197 to 203, such contribution not to exceed £526 10s., the Vestry *resolved* to accept such offer, and the Surveyor was instructed to interview the persons interested in Nos. 197, 199 and 201, and report whether they were willing to sell the land required to effect the improvement, and, if so, on what terms. On the 11th March, 1896, the Works Committee reported to the Vestry that they were of opinion that the widening of North End Road by Nos. 197, 199 and 201 and Beaufort House could be carried out in accordance with the plan prepared by the Surveyor for the sum of £1,100, and advised that the Law and Parliamentary Committee be recommended to instruct the Solicitor and Surveyor to take the necessary steps to carry out the improvement at a cost not exceeding £1,100, of which nearly one-half, viz. :—£526 10s. has been promised by the London County Council. This recommendation was carried by the Vestry, and on the 25th March, the matter was referred to the Solicitor to report as to the legal aspect of the case, and to the Surveyor to submit a plan shewing a proposed new line of frontage.

#### STREET NOMENCLATURE.

Orders. Orders were received from the London County Council for the renaming Streets, and renumbering houses in the following :—

Bishop's Road, portion of	...	...	Renumbered.
Road connecting S.E. end of Mornington Avenue with North End Road	...	...	Named Conan Street.
Crown Street	...	...	Renamed Novello Street.
Passage between North End Road and May Street	...	...	Named Kelway Place.

## TOWN HALL.

Lettings.

During the year ended 25th March, 1896, the Town Halls have been let as follows:—

Quarter.	Occasions hired.	Fees received.
		£ s. d.
April to June, 1895 ... ..	32	125 12 9
July to September, 1895 ... ..	12	18 18 8
October to December, 1895 ... ..	70	198 2 6
January, 1896, to March, 1896 ... ..	99	320 13 0
	213	£663 6 11

The fees received for year ended 25th March, 1895, amounted to	£	s.	d.
Do. do. 25th March, 1894, do.	616	7	
Do. do. 25th March, 1893, do.	526	2	1
Do. do. 25th March, 1892, do.	478	1	
	313	15	

Technical Education Lectures. During the past winter a special course of Technical Education Lectures (similar to those given the previous winter) was given by Professor Vivian Lewes, in the Large Hall, the lectures being highly appreciated and the attendance everything that could be desired.

Licenses for. As usual the Clerk to the Vestry—as Responsible Manager for the Town Hall—attended in October, 1895 before the Licensing Committee of the London County Council at Clerkenwell, and subsequently before the full Council at Spring Gardens, in support of the application for licenses for music, dancing and stage plays, when those for music and dancing only were granted, but he had no difficulty in being able to get “occasional” stage play licenses whenever they have been required.

Vaccination Station at. The Fulham Board of Guardians, having applied to the Vestry for the use of a room in the Town Hall once a week, for a vaccination station, the Vestry resolved to accede to the request of the Guardians and to allow them the use of the Committee room at a yearly rental of £30, which terms the Guardians accepted, as from the 29th September, 1895, and the weekly vaccination of children has been performed at the Town Hall since that date.

## UNDERGROUND CONVENIENCE BY ST. JOHN'S CHURCH.

Construction and Cost of. On the 10th April, 1895, the Works Committee reported to the Vestry that they had considered the three schemes prepared by the Surveyor for providing the above, and recommended that plan “A,” providing Conveniences for both sexes at an estimated cost of £1,450, be adopted. This recommendation was carried, as also was one that the work be carried out by the Vestry's workmen. The

Surveyor commenced the work on the 6th May, 1895, and the Convenience was completed and opened on the 18th November, 1895.

Financial aspect. During the quarter ended 25th March, 1896, the receipts have amounted to £43 19s., whilst the working expenses

Attendants. alone have amounted to £97 18s. 2d. Four attendants (2 male and 2 female) have been appointed, the men at £1 5s. per week each, and the women at £1 per week

Regulations, &c. each. Rules and regulations for the guidance of these attendants have also been adopted by the Vestry.

#### WHARF.

Putney Bridge. During the year the Vestry, being in want of additional wharfage accommodation, accepted the offer of the freeholders of the Swan Wharf, Putney Bridge (adjoining the Vestry's own wharf) to take same on a lease for seven years, at £130 per annum rent, with power to the Vestry to break it at the end of three years on notice.

Townmead Road. The Surveyor having prepared a plan and detailed report as to embanking a portion of the Wharf site in Townmead Road, the Clerk was instructed to make formal application to the Thames Conservancy for the necessary permission to embank and to construct a barge bed. On the 30th October, 1895, a notice was read from the Thames Conservators stating that upon payment of a fee of £6 6s. to the Assessor, and a fine of £50, payable to the Conservators, the Vestry could at once proceed with the construction of their embankment wall, and the Vestry accordingly ordered cheques to be drawn for those amounts, which was done, and on the 13th November the Clerk received the license, in duplicate, for the embanking of the Wharf. Advertisements have been issued inviting tenders for carrying out the work, and these were received on 29th January, 1896, when that of Messrs. Wimpey & Co., of Hammersmith, was accepted in the sum of £3,034. The work is now progressing and will be completed before the end of the summer.

#### CONCLUSION.

Appended to this report will be found the balance sheets, etc., of the various Charities of the Parish, of the Churchwardens and Overseers as regards precepts, and the Burial Board, all of which have been ordered by the Vestry to be printed with this report; and, in conclusion, I herewith tender my best thanks to the staff in my department for the ready and able assistance they have rendered me during the year.

I have the honour to remain,

Gentlemen,

Your most obedient servant,

W. J. HELLIER DENSELOW.

AUDITORS' CERTIFICATE.

Metropolis Management Rates, year ended 25th March, 1896.

ARTHUR ROBINSON,  
Vestry Clerk.

We have this day examined the Receipts and Vouchers in connection with the Overseers' Accounts for the year ended 25th March, 1896, and find the same to be correct. We have ascertained, upon verification of the Accounts with the Pass Books, that the Overseers have a balance in hand of £461 6s. 8d., and we have great pleasure in testifying to the excellent manner in which the Accounts have been kept and presented to us by the Vestry Clerk. We also desire to acknowledge the services rendered by the Overseers' staff on this occasion. Having regard to the very rapid increase in the number of assessments in the Parish of Fulham, we are of opinion that the collection of the Metropolis Management Rates has been carried out in a very expeditious and satisfactory manner.

in the Parish of Fulham in the County of London, of which the following Persons are the Trustees, viz., Vicar and Churchwardens,  
J. Wray, Esq., Arragon House, Parsons Green, S.W.

Frank Manby, *Hon. Treasurer*, Wensum House, Hurlingham, S.W.

ANNUAL REPORT

OF THE

PUBLIC ANALYST.

---

For the Year ended March 31st, 1896.

1885-86.

THE  
GOVERNMENT OF THE DISTRICT OF SOUTHERN

ANNUAL REPORT

PUBLIC AFFAIRS.

For the year ended March 31st 1886.

CHEMICAL LABORATORY,  
32, HOLBORN VIADUCT,  
LONDON, E.C.

*July 20th, 1896.*

*To the Chairman and Members of the Fulham Vestry.*

MR. CHAIRMAN AND GENTLEMEN,

I beg to report that during the year ended on March 31st, 1896, one hundred and fifty-seven samples of food were submitted to me for analysis under the Sale of Food and Drugs and Margarine Acts. Of these samples thirty-two were procured by Mr. Inspector A. A. Croucher; twenty-seven by Mr. Inspector W. H. Grigg; thirty-three by Mr. Inspector Chesterfield; and sixty-five by Mr. Inspector C. B. Jones. Also I received from the Surveyor to the Vestry, Mr. C. Botterill, two samples of creosote oil and one sample of asphalte (dates of receipt, October 26th, 1895, March 19th, 1896, and October 30th, 1895, respectively). Thus the entire number of samples analysed was one hundred and sixty.

By the census of 1891, the population of Fulham was found to be 91,640, and the samples subjected to analysis, in compliance with the requirements of the Sale of Food and Drugs and Margarine Acts, were equivalent in the aggregate to one sample for every 583 individuals.

The articles submitted to investigation included one hundred and four samples of milk, seventeen samples of butter, nine samples of coffee, four samples of cocoa, six samples of Demerara sugar, four samples of pepper, four samples of mustard, three samples of vinegar, and six samples of whisky.

Stated below (Table I.) are particulars of the numbers of samples of the several articles analysed during each quarter of the year:—

TABLE I.

Articles Analysed.	During First Quarter.	During Second Quarter.	During Third Quarter.	During Fourth Quarter.	Total for Year.
Milk ... ..	35	14	39	16	104
Butter ... ..	—	—	5	12	17
Coffee ... ..	—	3	2	4	9
Cocoa ... ..	—	4	—	—	4
Demerara Sugar ...	—	6	—	—	6
Pepper ... ..	—	1	1	2	4
Mustard ... ..	—	—	1	3	4
Vinegar ... ..	—	2	—	1	3
Whisky ... ..	—	1	—	5	6
Totals ... ..	35	31	48	43	157

Of these samples seventeen were certified to be adulterated; and in the next table (Table II.) the numbers of genuine and sophisticated samples for

each quarter are stated separately, as well as the proportions of adulterated to genuine and adulterated to total samples :—

TABLE II.

Samples submitted to Analysis.	First Quarter.		Second Quarter.		Third Quarter.		Fourth Quarter.		Whole Year.		WHOLE YEAR.	
	Genuine.	Adulterated.	Genuine.	Adulterated.	Genuine.	Adulterated.	Genuine.	Adulterated.	Genuine.	Adulterated.	Proportions of adulterated to genuine samples.	Percentage adulterated on total samples.

In the following table (Table III.) the numbers of, and ratios between genuine and adulterated samples for the year ended on March 31st, 1891 are compared with the corresponding figures (for Fulham) for the years 1887-90 (taken from the reports of the Local Government Board) and with the figures for 1891-92, 1892-93, 1893-94 and 1894-95 :—

TABLE III.

YEAR.	1887.	1888.	1889.	1890.	1891-2.	1892-3.	1893-4.	1894-5.	1895-6.
Genuine ...	72	139	121	76	164	89	64	102	0
Adulterated	13	10	14	6	48	12	16	21	7

Proportions of Adulterated to Genuine Samples.	18 %	7.1 %	11.5 %	7.8 %	29.3 %	13.5 %	25 %	20.5 %	1 %
Percentages of Adulterated on total Samples.	15.2 %	6.7 %	7.3 %	17.3 %	22.6 %	11.9 %	20 %	17 %	1 %

The results of the legal proceedings taken, with details of the adulterations discovered, are stated in Table IV. For the particulars relative to the legal proceedings, I am indebted to the Clerk to the Vestry, Mr. W. J. Hellier Denselow.

## REMARKS.

*Suggested articles for purchase.*—As on previous occasions, I take advantage of this opportunity to name various articles of food and drugs, of many of which no samples have been submitted to me, as Analyst to the Vestry, while of others included in the list, samples have not been brought to me for a considerable period:—

*Articles of Food.*

Bread  
Cheese  
Lard  
Flour  
Ground Rice  
Oatmeal  
Arrowroot  
Pea Flour  
Corn Flour  
Baking Powder  
Yeast  
Confectionery  
Jams  
Tinned Meats and Fish  
" Vegetables  
" Fruits  
Bottled "

*Drugs.*

Quinine  
Wine of Quinine  
Tincture of Quinine  
Citrate of Iron and Quinine  
Ammoniated Tincture of Quinine  
Antimonial Wine  
Wine of Ipecacuanha  
Sal Volatile  
Rectified Spirit  
Precipitated Sulphur  
Spirit of Nitrous Ether  
Cream of Tartar  
Syrup of Squill  
" Poppies  
" Senna  
Paregoric  
Rhubarb

*Articles of Food (continued).*

Sausages  
 Meat Extracts  
 Pickles and Sauces  
 Ground Ginger  
 Carraways  
 Allspice  
 Cinnamon  
 Cassia  
 Mace and Nutmegs  
 Candied Peel  
 Olive Oil  
 Aërated Waters  
 British and other Wines  
 Beer  
 Rum, Gin and Brandy

*Drugs (continued).*

Saffron  
 Mercury with Chalk  
 Solution of Perchloride of Iron  
 Jalap  
 Glycerine  
 Fluid Magnesia  
 Fowler's Solution  
 Compound Liquorice Powder  
 Liquorice  
 Acetic Acid  
 Castor Oil  
 Coca Wine

Another article, which might possibly receive attention, is beeswax, adulteration of which, with paraffin wax, on an extensive scale, is especially referred to in the recently-issued report from the Select Committee on Food Products Adulteration.

*Milk and Butter.*—On reference to Tables I. and II., it will be seen that more samples of milk were obtained for analysis than of all the rest of the articles together, and that of the 104 samples of milk analysed, two only were returned as adulterated; that is to say, 11·5 per cent. of the number. When it is recalled that the corresponding percentages for 1893-4 and 1894-95, were 21·7 and 29·7, a great and important improvement becomes manifest. Nevertheless, though the proportion of adulterated samples diminished so materially in the year to which this report refers, the nature and extent of the sophistications observed, cannot but be regarded as very serious. Seven of the twelve adulterated samples had been deprived of fat, the percentages indicating the amount of adulteration ranging from 13 to as much as 95. The remaining five samples had been mixed with water, the lowest proportion of the adulterant being 13 per cent., and the highest, 23 parts. Apart from the twelve samples of milk here particularised there were ten instances in which the milk was found to be of "poor" or "inferior" quality; but as calculations must be based on very low limits, none of these could be certified as adulterated. It should be mentioned that at least one sample of milk was found to be of unusually good quality. Comparatively few samples of butter were submitted for analysis; seventeen in all, or nearly the same number as in the previous year; these were returned as of normal quality.

*Coffee.*—Nine samples of coffee were received during the year, and two of these were adulterated with chicory—the quantities of the extraneous substance being 14 and 68 parts, respectively. The number of samples of coffee having been so limited, it is not easy to form an opinion whether the admixture of chicory is carried on in Fulham as extensively as in past years, but it is noteworthy that of the five samples submitted to me in 1894-95, no one was adulterated, while in 1895-96, two out of the nine samples contained chicory. There would not seem to be much improvement here.

*Cocoa.*—Three of the four cocoas examined were mixed with starch and sugar, in the proportions of 33, 35, and 39 parts, respectively.

*Demerara Sugar, etc.*—The remaining samples submitted to analysis during the year, under the provisions of the Sale of Food and Drugs Act (Demerara sugar, pepper, mustard, vinegar and whisky), were found to be of average quality and purity.

*Additional Samples.*—The two samples of creosote oil, and the specimen of asphalte, received from the Surveyor to the Vestry, were of satisfactory quality and reported on accordingly.

*Nature and number of samples taken*—From Tables I. and II. it will be gathered that the samples purchased for analysis during 1895-96 represented a very limited number of articles of food; and of these in some cases very few samples were obtained. No sample of any drug was procured during the year.

*Fines.*—As in past years, the fines imposed in the cases of adulteration were mostly insignificant in amount, ranging from seven-and-sixpence to two pounds, with costs; one penalty of three pounds and two of five pounds, however, were inflicted. On the other hand, in a case of milk adulterated with thirteen per cent. of added water, a fine of sixpence, and costs, would seem distinctly inadequate.

*Comparative Statistics.*—The statistics of the Metropolis, and of the whole of England and Wales, for the years 1890-91-92-93-94, are quoted here from the Annual Reports of the Local Government Board, for the sake of comparison with the figures for Fulham already given in Table II., and it will be observed that the last-named figures compare much more favourably with the rest than was the case in 1894-95. It is apparent that adulteration has been less prevalent in Fulham during 1895-96 than in the preceding year. The following are the statistics referred to:—

#### METROPOLIS.

Year.		Samples Examined.		Samples Adulterated.		Proportion Adulterated.
1890	...	6,847	...	1,058	...	15.5 %
1891	...	7,295	...	1,163	...	15.9 %
1892	...	7,380	...	1,253	...	17.0 %
1893	...	7,989	...	1,365	...	17.1 %
1894	...	8,607	...	1,220	...	14.2 %

#### ENGLAND AND WALES.

Year.		Samples Examined.		Samples Adulterated.		Proportion Adulterated.
1890	...	27,465	...	3,069	...	11.2 %
1891	...	29,028	...	3,540	...	12.2 %
1892	...	32,447	...	4,009	...	12.4 %
1893	...	37,233	...	4,793	...	12.9 %
1894	...	39,516	...	4,060	...	10.3 %

*The Private Purchaser.*—It appears from the report of the Local Government Board for 1894-95, that of the 39,516 samples submitted for analysis in 1894, only 174 were obtained by private purchasers, and of these samples no less than 27·6 per cent. were condemned on analysis, as against 10·3 per cent. of the samples obtained by officers of local authorities. The fact appears to be that a private individual will only incur the cost of analysis, when there are very strong grounds indeed for suspecting adulteration.

*Report of the Parliamentary Select Committee on Food Products Adulteration.*—In May, 1894, a Select Committee was appointed by the House of Commons to enquire into the working of the Sale of Food and Drugs and Margarine Acts; and the report, which is of considerable length, has been published within the past few days, after an investigation extending over two years. It will not be inappropriate to bring my Annual Report to a conclusion, by quoting some of the many recommendations of what a leading journal has justly styled “one of the most important Committees that have ever been appointed by the House of Commons.” *Inter alia* it recommended:—

“That, in connection with the sale of mixed articles it should be obligatory upon the vendor to supply the purchaser with a label setting forth that the article is mixed.”

“That the statement of admixture on labels should be legibly and distinctly printed, and so as not to be obscured by any other printed matter. . . .”

“That, subject to the limitations indicated in the Report, invoices or equivalent documents should have the force of warranties in the case of articles to which the Sale of Food and Drugs Acts apply.”

“That the powers of section 3 of the Sale of Food and Drugs Amendment Act, 1879, as to the taking of samples of milk in transit, should be extended to other articles.”

“That the maximum penalty for refusal to sell a sample to an authorised officer be increased.”

“That samples should be divided into four instead of three parts, so that one of these parts should be at the disposal of the wholesale dealer.”

“That any person guilty of a second offence under the Sale of Food and Drugs Acts should be liable to a minimum penalty of £5, and that in respect of the third or subsequent offences under those Acts and the Margarine Act, 1887, the punishment of imprisonment without the option of a fine may be inflicted at the discretion of the magistrates, or court.”

“That magistrates should be authorised to make orders, at their discretion, requiring a person convicted of offences under the Acts to publish notification of his conviction in the public press of the locality where the offence occurred.”

"That the definition of the word 'food' as used in the Acts should be amended so as to include expressly all articles intended to enter into or be used in the preparation or flavouring of food."

"That an authority should be constituted who should act as a Court of reference upon scientific and other questions arising under the Acts, and who should be empowered, at their discretion, to prescribe standards and limits of the quality and purity of food."

"That the artificial colouring of margarine to resemble or imitate butter be prohibited."

"That the mixing for sale of margarine and butter be prohibited."

I would conclude by expressing my grateful acknowledgment of the courtesy and consideration extended to me by all my colleagues.

I have the honour to remain,

Mr. Chairman and Gentlemen,

Your obedient servant,

E. G. CLAYTON, F.I.C.,

ANNUAL REPORT

OF THE

OF THE

OF THE

OF THE

OF THE

OF THE

OF THE

## ANNUAL REPORT OF THE ACCOUNTANT,

TOGETHER WITH THE

CERTIFICATE OF THE AUDITORS OF ACCOUNTS,

*For the year ended March 25th, 1896.*

MR. CHAIRMAN AND GENTLEMEN,

I beg to present to you my Tenth Annual Report of the various matters connected and dealt with in my department relative to the finances of the Parish, for the period above stated, together with the Abstracts of the Accounts for the financial year, 1895-6, duly audited in accordance with section 196, cap. 120, of 18 and 19 Victoria; annexed also is a statement of the Contracts entered into by the Vestry from the 26th March, 1895, to 25th March, 1896. Appendix I. shows the rates levied in Fulham from 1876-7 to 1895-6, Appendix II. the amounts paid to all outside bodies during the same period, over which the Vestry have no direct control, and Appendix III. the Vestry's net yearly expenditure since its incorporation.

In conclusion, I have to thank the Members and Officials of the Vestry, especially Mr. Dimmock, my assistant, for the assistance rendered to me in the carrying out of my duties during the past year.

I remain,

Mr. Chairman and Gentlemen,

Your obedient Servant,

ROBERT H. MEYER, F.S.A.A.,

*Accountant to the Vestry.*

To the Chairman and Members  
of the Vestry of the Parish of Fulham.

## ASSESSMENTS, &amp;c.

The Parish of Fulham comprises an area of some 1,700 statute acres, with a rateable value on the 6th April, 1896, of £560,965; the following statements, showing the number of houses, population, &c., since 1856, the first year of the Metropolis Management Act (1855), will give the Parishioners some idea of the rapid growth of the Parish.

## I.—RATEABLE VALUE, &amp;c.

The Annual Rateable Value of Property in the Parish, as per County Rate Assessment or like estimate, and the amount rd. in the £ will produce.

Year	Rateable Value	Amount which would be raised by a rate of 1d. in the £ gross
	£	£ s. d.
1855—1856	47,492	197 14 8
1856—1857	51,154	213 2 10
1857—1858	51,428	214 5 8
1858—1859	51,528	214 14 0
1859—1860	51,739	215 11 7
1860—1861	55,916	232 19 8
1861—1862	58,296	242 18 0
1862—1863	58,944	245 12 0
1863—1864	61,964	258 3 8
1864—1865	62,882	262 0 2
1865—1866	77,236	321 16 4
1866—1867	77,565	323 3 9
1867—1868	83,238	347 4 0
1868—1869	91,725	382 3 9

1895—1896	511,738	2,132 4 10
1896—1897	560,965	2,337 7 1

## II.—HOUSES, POPULATION, &amp;c.

Year ending March 25th	Houses	Population	Average per House
1856	2,350	14,000—estimated	6 + empties
1861	2,583	15,539—census	6 "
1871	3,924	23,378 "	6½ "
1881	6,685	42,895 "	7 "
1891	13,666	91,640 "	7½ "
1896	16,250	113,871 "	7½ "

## TREASURER, BANKERS, &amp;c.

In conformity with the Metropolis Management Acts, the Vestry have appointed a Treasurer, who is Mr. M. H. Wilde, the Manager of the Walham Green Branch of the London and Provincial Bank, Limited, where, for facilitating the Vestry's financial business, five distinct banking accounts are kept, which are worked as follows:—

## No. 1.—GENERAL ACCOUNT,

*For the receipts and payments of Rates and general business of the Vestry.*

## No. 2.—NEW STREETS ACCOUNT,

*For the receipts and payments in relation to new streets.*

## No. 3.—LOANS AND PERMANENT WORKS ACCOUNT,

*For the receipts and payments in connection with loans, &c., for permanent works.*

## No. 4.—WAGES ACCOUNT,

*For the payment of weekly wages (drawn on by the Clerk and Accountant).*

## No 5.—PRIVATE WORKS ACCOUNT.

*For receipts and payments relating to deposits for connection of house drains, licences for hoardings, &c.*

In addition to which, temporary Deposits and other Accounts are opened, when the balances on the Current Accounts are considered excessive or as occasion requires.

## LOANS.

The total amount due on Mortgages, as per Register, at 25th March, 1895, was £94,290 7s. 3d., while at 25th March, 1896, it stands at £102,724 2s. (slightly over 18½ percentage of the rateable value).

The following statement will show the operations during the past year:—

	Amount borrowed.	Amount paid off.		Amount outstanding 25th Mar, 1896.	Remarks.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
GENERAL RATE ...	148,282 0 0	67,605 6 4	80,676 13 8		
Do. Amount borrowed during 1895-96 ...	19,875 0 0				
Do. Amount paid off during 1895-96 ...		11,451 11 10			
Do. Amount of Increase during 1895-96 ...			8,423 8 2		Increase
Total ...				89,100 1 10	8,423 8 2
VER RATE ...	24,432 12 0	10,818 18 5	13,613 13 7		
Do. Amount borrowed during 1895-96 ...	1,400 0 0				
Do. Amount paid off during 1895-96 ...		1,389 13 5			
Do. Amount of Increase during 1895-96 ...			10 6 7		10 6 7
Total ...				13,624 0 2	
als 25th March, 1896	193,989 12 0	91,265 10 0		102,724 2 0	

The net increase on the Loan accounts for 1895-96 amounts to £8,433 14s. 9d.

NOTE.—On the 26th March, 1886, the Vestry took over Loans to the amount of £44,014 12s. from the late Fulham District Board of Works, so that the net increase for the ten years amounts to £58 709 10s. out of which the Town Hall, stables, wharf, open spaces, river wall, Bishop's Park and other properties, together with miles of wood paving and numerous improvements, have been provided.

## PRECEPTS OF CORPORATE BODIES.

The Central Boards issuing precepts on the Vestry were the Metropolitan Board of Works and the School Board for London; now the latter only, as the precept of the London County Council, the successors of the late Metropolitan Board of Works, is made on the Guardians of Fulham Union, and so becomes chargeable on the Poor Rate instead of the Local Rates, as was formerly the case with the Consolidated Rate. The total amounts paid from the year 1857 to 1890 by the Fulham Parish through the late District Board, the Fulham Vestry, &c., to the Metropolitan Board, over which they had no direct control, was equal to £118,779 15s. 5d., and the approximate rate in the £ varied from 9 $\frac{3}{4}$ d. in 1857, to 3 $\frac{1}{4}$ d. in 1874, and to 9 $\frac{1}{2}$ d. in 1890.

The School Board precepts for the year 1895-96 amount £23,931 16s. 10d. This is chargeable on the General Rate, and is equal to a rate of 11 $\frac{1}{2}$ d. in the £, the amount being an increase of £3,086 14s. 9d. on the previous year's precepts, and allowing for an increase in the rateable value of £26,887, as against the increase last year of only £13,683, the Vestry are enabled—in the face of the excessive increase in the amount of the precept, equal to 1 $\frac{1}{2}$  in the £ on assessments—to make the approximate rate only 1d. in the £ more than that of 1894-5.

The following statement shows the approximate amounts paid by the Parish for the cost of Elections, and to meet the School Board precepts since its incorporation:—

Year	Total Precept	Election Expenses	Total paid for the Year	Gross Rate in approximately
	£ s. d.	£ s. d.	£ s. d.	d.
1871—1872	199 10 10	31 14 6	231 5 4	1 $\frac{9}{16}$
1872—1873	434 17 11	—	434 17 11	1
1873—1874	371 1 6	—	371 1 6	$\frac{7}{8}$
1874—1875	774 10 9	37 12 0	812 2 9	2
1875—1876	1,362 15 10	—	1,362 15 10	3
1876—1877	2,201 4 6	42 3 7	2,243 8 1	4 $\frac{5}{8}$
1877—1878	2,591 5 0	—	2,591 5 0	5 $\frac{1}{4}$
1878—1879	2,629 4 9	—	2,629 4 9	5 $\frac{1}{8}$
1879—1880	2,958 8 3	45 14 1	3,004 2 4	5 $\frac{1}{4}$
1880—1881	3,549 17 3	—	3,549 17 3	6 $\frac{1}{4}$
1881—1882	4,346 3 2	—	4,346 3 2	6
1882—1883	4,695 1 8	67 10 11	4,762 12 7	5 $\frac{7}{8}$
1883—1884	5,915 17 11	—	5,915 17 11	6 $\frac{1}{2}$
1884—1885	7,946 13 7	—	7,946 13 7	7 $\frac{1}{4}$
1885—1886	9,658 4 1	107 8 5	9,765 12 6	8 $\frac{1}{4}$
1886—1887	12,402 11 2	—	12,402 11 2	8 $\frac{7}{8}$
1887—1888	11,817 0 8	—	11,817 0 8	8 $\frac{1}{2}$
1888—1889	11,687 8 2	—	11,687 8 2	8 $\frac{1}{8}$
1889—1890	13,606 2 2	107 5 4	13,713 7 2	9
1890—1891	16,911 7 1	—	16,911 7 1	11 $\frac{1}{2}$
1891—1892	18,622 4 9	127 8 10	18,749 13 7	10 $\frac{3}{8}$
1892—1893	19,140 2 7	—	19,140 2 7	10 $\frac{1}{2}$
1893—1894	19,641 2 5	—	19,641 2 5	10 $\frac{1}{2}$
1894—1895	20,845 2 1	159 6 10	21,004 8 11	10 $\frac{1}{2}$
1895—1896	23,931 16 10	—	23,931 16 10	11 $\frac{1}{2}$
Total ...	218,239 14 11	726 4 2	218,965 19 1	

The precepts for 1896-97 amount to £27,610 5s. 5d., equal to 1/- the £ gross.

### TOWN HALL AND OFFICES.

The cost of the above, including the freehold land, building, decorating, &c., is made up as follows :

## CONTRIBUTIONS TO LOCAL IMPROVEMENTS.

Although the Vestry has carried out during the past year numerous improvements in the Parish, the only payment made under this heading from the London County Council has been one of £261, for Normand Road Widening; where other contributions were promised, the works have not been completed in the year ending on 25th March, 1896.

## LOANS ON SCHEDULE.

The only granted item outstanding on the last Schedule of £10,877 14s. 11d. was £575 for Works at Bishop's Road; this has now been taken up by the Vestry, and a new Schedule of numerous works executed, and to be executed, is in course of preparation.

## IMPROVEMENT ACCOUNT.

As previously stated, this account was opened in 1888, with a view of providing for small items of improvement works of a permanent nature instead of carrying them to a Loan Schedule Account to be charged to future rates.

The following abstract shows the total receipts and payments from the commencement to 25th March, 1896.

RECEIPTS.			£	s.	d.	PAYMENTS			£	s.

## LOCAL TAXATION RETURNS.

Under 23 and 24 Victoria, c. 51, and 40 and 41 Victoria, c. 66, and sub-section 7 of section I. of London (Equalization of Rates) Act, 1894, it is enacted that every Vestry, District Board, etc., shall make a return annually of the sums levied or received by or in interest of rates, taxes, etc., and of the expenditure thereof, to one of Her Majesty's Principal Secretaries of State.

Under the above Acts, the Statistical Department of the Local Government Board issue, during the month of July in each year, a form embracing the various heads of receipts and expenditure, and of loans, etc., employed by local authorities. In July, 1895, forms (in duplicate) for the Local Taxation Returns were received by this Vestry, and referred to me to fill up. This was duly done, and on my presenting same to the Finance Committee, they instructed the Clerk to return the form to the Local Government Board.

## LONDON COUNTY COUNCIL.

At various periods the London County Council have applied to the Fulham Vestry for particulars with respect to its receipts and expenditure on Rates and Loans. This information I have always supplied them with, by instructions of the Finance Committee. The result of their enquiries from the whole of the County of London, the Council have caused to be printed, and have circulated returns showing :—

I. Returns of Loans outstanding in the County of London at March, 1895.

II. Return showing annual charges in respect of Loans for 1893-94, and 1894-5.

RETURN I.—This return embraces the whole debt of London for Local Government purposes (excluding the City Corporation), and by it is shown the entire indebtedness of each parish for not only the loans contracted by the local authorities, but also for the proportion of the Central and County Authorities' loans.

With regard to the Parish of Fulham, this return tends to show that it is in the unenviable position of being the fifth highest, in point of total indebtedness, in London. The percentage of indebtedness on the rateable value of £484,851 being : for local purposes 31·41, and for both county and local purposes 119·89.

This will not hold good for more than the year mentioned, as will be seen by last year's report when the percentages were 31·13 and 116·11 respectively.

The figures extracted from the return are as follows:—

	£	s.	d.
Proportion of Union Loans, Poor Law Purposes ... ..	49,081	0	0
Vestry Loans, Local Management ... ..	94,290	0	0
Burial Board ... ..	2,917	0	0
Library Commissioners ... ..	3,683	0	0
School District Managers ... ..	2,304	0	0
<b>Total Local Loans ...</b>	<b>£152,275</b>	<b>0</b>	<b>0</b>
	£	s.	d.
Proportion of London County Council Loans ...	283,091	0	0
„ School Board for London ...	121,050	0	0
„ Metropolitan Asylums Board ...	19,734	0	0
„ Police Commissioners ...	5,125	0	0
	<b>429,000</b>	<b>0</b>	<b>0</b>
	<b>£581,275</b>	<b>0</b>	<b>0</b>

In the case of RETURN No. II. (Charges on Loans) the return is very useful, showing clearly to the ratepayers of each District in the Metropolis their proportion of the annual cost (divided between the various spending authorities) of the enormous loan burden of London, which in the case of the County Loans fall equally on all Parishes according to their rateable value.

Authority	Year 1894-5 £	Year 1893-4 £
Poor Law (Guardians) ... ..	3,116	3,552
Metropolitan Management Purposes (Vestry) ...	16,877	15,510
Special Bodies (Overseers) ... ..	nil	nil
Do. Burial Board ... ..	418	431
Do. Library Commissioners ... ..	421	431
Do. School District Managers ... ..	408	415
<b>Total Local Charges ...</b>	<b>21,240</b>	<b>20,339</b>
London County Council ... ..	15,824	15,187
School Board for London ... ..	6,651	6,102
Metropolitan Asylums Board ... ..	1,322	1,205
Police Commissioners ... ..	303	299
<b>Total County Charges ...</b>	<b>24,100</b>	<b>22,793</b>
	<b>£45,340</b>	<b>£43,132</b>

1894-5. Rateable value £484,851, and the charge for Loans amount to 10·51d. in the £ for Local purposes, and 1/10·44 in the £ for County and Local purposes.

1893-4. Rateable value £471,168, and the charges for Loans amount to 10·36d. in the £ for Local Purposes, and 1/9·97 in the £ for County and Local Purposes.

### HORSE HIRE *v.* VESTRY HORSES.

At a meeting of the Cartage Committee, in July, 1895, the question arose as to the cost of hired horses, and as to whether it would not be more economical for the Vestry to own the horses employed on its works. A report was ordered to be prepared by the Surveyor and myself, shewing the loss or saving on both methods; we accordingly prepared and presented the following report:—

*“ To the Chairman and Members of the Cartage Committee.*

#### HIRED HORSES *v.* VESTRY HORSES.

“ Mr. Chairman and Gentlemen,—The tabulated statement attached shews that the average cost of maintaining the Vestry’s horses is practically the same as shewn in previous reports (see page 228 of the eighth annual

report). It will be noticed that, hiring horses at the present prices, the Vestry would effect a saving (say) of £15 per horse per annum, and this without any risk of liability for damage done by collisions, &c.

"To erect new stabling a new site must be used. As there is no space for enlargement at Munster Road, this would necessitate the employment of a number of men as permanent staff, and taking into consideration that the minimum number of horses hired per day is only 12, which would be as many horses as the Vestry would be justified in economically owning, the cost of maintenance per horse would be much higher than at present.

"Therefore, the conclusion to be arrived at is that, under existing circumstances it would be advisable to continue under the present arrangements.

We are, Mr. Chairman and Gentlemen,

C. BOTTERILL,

*Surveyor to the Vestry.*

R. H. MEYER,

*Accountant to the Vestry.*

### REPORT ON HORSES.

				<hr/>		
				£606	3	11

The Committee thereon decided to discharge the matter, and continue the present system of hiring extra horses as required.

At the following meeting of the Vestry some of the members asked for a further report with more details, and I was accordingly instructed to prepare a tabular statement, shewing a series of half-years, for comparison. On presenting the following report, the Vestry approved of same and the matter was allowed to be dropped.

Statement showing approximate cost of keeping Horses against hiring them, for the Five half-years ending 29th September, 1895.

NOTE.—The variation in the amount saved on hired horses is principally brought about by the different prices in the Fodder Contracts each half-year, while the hiring charge has remained practically the same for the period covered.

(Signed) K. H. MEYER,

## EQUALISATION OF RATES ACT, 1894.

This Act, which came into operation on the 30th September, 1894, has been of great benefit to Fulham Parish.

The provisions of the Act are shortly as follows :

- I.—An Equalisation Fund to be formed by the London County Council, equal to a rate of 6d. in the £ per annum, upon the rateable value of the various Parishes in the Metropolis.
- II.—The fund is to be distributed half-yearly among the Sanitary Districts in proportion to their population as estimated by the Registrar-General, or by census.
- III.—The sums so distributed are to be applied in defraying—(firstly) the expenses of the Sanitary Authority incurred under the Public Health (London) Act ; (secondly) those incurred in respect of Public Lighting ; and the balance (if any), to those incurred in respect of Streets.

The total amount of the Fund for the Year 1895-96 was £855,638 5s. 6d., and Fulham Parish has contributed thereto and received therefrom as follows:—

	Half Year to 29th Sept., 1895.	Half Year to 25th March, 1896.
	£ s. d.	£ s. d.
Grant from Fund, equals $1/11\frac{3}{4}$ (about) per head on an estimated population of 108,049 ... ..	10,695 15 2	10,695 15 2
Contribution to, equals 3d. in the £ on Rateable Value of £511,738 ... ..	6,396 14 6	6,396 14 6
Difference in favor of Parish	<u>£4,299 0 8</u>	<u>£4,299 0 8</u>

The above sums, together with a small amount of £17 14s. 6d. (due to this Parish on previous year's return and brought about by an error in the return of the Parish of Alberwell), making a total of £8,615 15s. 10d., have been received and credited to the General Rates of the Parish, thereby reducing the amount called for by the Vestry from Ratepayers by more than a sum of 4½d. in the £.

### NEW STREETS.

With reference to the New Streets Accounts, during the past year there have been received the sum of £9377 9s. 6d. on account of apportionments &c. The amounts still due by contributors are—on old roads, transferred to this Vestry by the late District Board of Works, the sum of £124 3s. 7d., on the streets taken to by this Vestry during the past ten years the sum of £5,642 15s. 5d., making the total due on new streets to be £766 19s. 0d.

Statements of New Streets Account in detail will be found amongst Abstract of Accounts.

## LABOUR, &amp;c.—WAGES ACCOUNT.

The Parishioners will form some idea of the rapid developement of the Parish by the comparative statement of the Labour Wages Accounts for 1886 and that of 1895.

On the 27th day of January, 1886, the Vestry passed the following resolution, on the recommendation of the Works Committee :—

“That in order to efficiently carry out the works required in the making, maintaining, and cleansing of the streets and sewers in the Parish, a staff of Artisans and Labourers be employed as follows :—

30 Scavengers, 4 Spreaders and 1 Ganger	}	Average weekly wages, £76 0 0
12 Ground and Sewermen and 1 Ganger		
1 Bricklayer and 1 Labourer		
1 Mason and 1 Labourer		
6 Flushers and Gulley-men		
1 Storekeeper and 1 Watchman		
1 Steam Roller Driver		
Pecking Gang (about 4 men) when required		

At the same time the Stable Department staff was as follows :—

15 Dustmen (10 with horses)	}	Average weekly wages, £32 0 0
9 Carmen with horses		
1 Horsekeeper and 1 Stableman		
1 Yardman		

The following shows the approximate number of men constantly employed, and cost, in 1895-96 :—

## Works Department :—

70 Scavengers and 2 Foremen	}	Average weekly wages, £220 0 0
40 Spreaders, Flushers, Ground and Sewermen		
2 Gangers to ditto		
3 Men at Dust and Slop Shoots		
5 Masons and 5 Labourers		
1 Bricklayer and 1 Labourer		
2 Wood Paviers		
1 Asphalter and 1 Labourer		
1 Steam Crane Driver and 1 Roller Driver		
3 Followers (sweepers)		
5 Watchmen and 2 Dépôtmen		
2 Store Clerks and 1 Wharf Keeper		
Barge and Pecking Gangs as required		

## Cartage Department:—

32	Dustmen (24 with horses)
24	Carmen (with horses)
1	Stableman, 1 Watchman
2	Horsekeepers, 1 Painter
3	Wheelwrights, 1 Carpenter
4	Farriers, Smiths, &c.

Average weekly wag  
£ 110 0 0

In addition to the above, extra men are constantly being put temporarily for special works, or fall of snow, &c.

## PROPERTIES, &amp;c.

The properties, goods, chattels, etc., are not valued and shown as asset in the Balance Sheet, but approximately the chief items may be taken as follows:—

	£	s.	d.	£	s.
The Leasehold House and Stables, 637, Fulham Road, S.W....	500	0	0		
Munster Road Freehold Stables, Buildings &c.	7,500	0	0		
Freehold Wharf, near Putney Bridge, &c.	4,500	0	0		
„ Town Meadows	8,900	0	0		
Freehold Town Hall, opposite Walham Green					
Green Station, and fittings, furniture, &c.	32,800	0	0		
Munster Road Public Mortuary and contents...	1,000	0	0		
Carried forward				55,200	0

## SCHEDULE OF MOVABLE PROPERTY.

	£	s.	d.	£	s.	d.
Brought forward ...				55,200	0	0
46 Cart Horses at £60 each ...	2,760	0	0			
1 Nag Horse ...	30	0	0			
1 Steam Roller, Machinery, &c. ...	200	0	0			
1 Water Ballast Roller ...	8	0	0			
Timber ...	50	0	0			
26 Slop Carts, numbered 1 to 26, at £15 each	390	0	0			
20 Shoot Carts, numbered 1 to 20, at £10 each	200	0	0			
20 Dust Carts, numbered 1 to 20, at £16 each	320	0	0			
2 Water Carts, numbered 1 & 2, at £10 each	20	0	0			
1 Light Trap ...	5	0	0			
2 Spring Carts, numbered 1 and 2, at £6 each	12	0	0			
24 Water Vans, numbered 1 to 24, at £20 each	480	0	0			
1 Stone Bus, numbered 1 ...	20	0	0			
8 Road Sweepers, numbered 1 to 8, at £12 each ...	96	0	0			
8 Road Scrapers, numbered 1 to 8, at £10 each ...	80	0	0			
6 Sand Distributors, numbered 1 to 6, at £20 each ...	120	0	0			
1 Chaff Cutter, numbered 1 ...	10	0	0			
Rolling Stock, Tools, Implements, Fodder, Stores, &c., at Dépôt ...	500	0	0			
Sand, Gravel, Hoggins, York Stone, Granite Sets, &c. ...	250	0	0			
				5,551	0	0
				£60,751	0	0

Public Parks, Recreation Grounds and Open Spaces, Free Docks, Public Mortuary Land, Urinals, Fountains, Lamp Columns, and other properties of the Vestry in the Parish are not valued.

## ESTIMATES.

During the past year the Vestry estimated the amount required to be raised by Rates to meet its expenses, and the call of other bodies, to be as follows :—

General Rate, viz :—	1895-6.			1894-5.		
	£	s.	d.	£	s.	d.
Loans ... ..	14,500	0	0	15,000	0	0
Works Department ... ..	9,362	5	9	8,143	16	0
Cartage ... ..	17,776	18	9	17,948	1	0
Establishment Charges... ..	2,700	0	0	2,340	0	0
School Board for London ... ..	23,931	16	10	20,845	2	0
Sanitary Work ... ..	1,927	0	0	1,879	0	0

ROBERT H. MEYER,

*Accountant to the Vest*

# The Vestry of the Parish of Fulham.

TOWN HALL

WALHAM GREEN, S.W.

## AUDITORS' CERTIFICATE.

We, the undersigned, Auditors of the Accounts of	£	s.	d.
the Vestry of the Parish of Fulham, hereby certify that			
we have examined the books of the Vestry for the			
financial year ending 25th March, 1896, and have com-			
pared the vouchers with the cheques, and we find the			
balance of .. ... ..	18790	14	6
at the bankers on current accounts to be correct, and			
allowing for the outstanding cheques amounting to ...	1847	19	0
the balance to be... ..	<u>£16942</u>	<u>15</u>	<u>6</u>

We have also examined the Loan Account of the Vestry, and we find that the loans, including £21,275 borrowed during the year, amount to ... .. £102724 2 0

We note that £5,766 19s. is due from contributors on new streets, as against £8,973 17s. 11d. of the previous year, of which £1,131 14s. 7d. is due on the streets completed, and that the contributors who have not paid anything for 2 to 4 years amount to £382 9s. 10d. We consider further efforts ought to be made upon the owners of the properties for the further reduction of these outstanding amounts.

We note that the Solicitor to the Vestry has received the sum of £713 10s. 1d. for out of pocket expenses and professional services rendered during the year. We should suggest on behalf of the ratepayers that his bills of costs be taxed in the usual way

We have caused a circular letter to be written to the Clerks of the whole of the Metropolitan Vestries and District Boards, and from 31 replies we find that 28 Vestries audit their accounts by the "Elected Auditors" only, and 3 only have "Chartered Accountants," and one of these is employed to assist the publicly elected Auditors; but as far as we have ascertained not any of

the London Vestries have a bye-law sanctioned by the Local Government Board or any authority giving them power to employ Chartered Accountants to do what was already provided for by the "Elected Auditors," and some of the Clerks to the Vestries inform us they know of no legal authority incur that expense.

We protest against the sum of £36 15s. being yearly paid to a firm Chartered Accountants to audit the Vestry's accounts (see Bye-law 51, Sec. I. We have examined your Accountant and Assistant, and other officers of the Vestry under the powers vested in us, the "Elected Auditors" of the Parish of Fulham, and we find they have rendered them no assistance whatever and we consider their appointment and payment not only illegal and contrary to the Metropolitan Management Act, 18 and 19 Vic., cap. 120, Sec. 20, 1855, and confirmed under Sec. 31 of the Local Government Act, 1894, and consequently we consider the Vestry had no power to make Bye-law 51 confirmed by the Vestry 6th December, 1893, all penalties of same not binding, as the said bye-laws are not authorised or approved by the Local Government Board or one of Her Majesty's Secretaries of State.

We are fully aware of the fact that the Vestry may smile at what we consider we have a right to protest against.

We have very great pleasure in certifying that the accounts have been kept in a very clear and concise manner, and does great credit to Mr. Meyer the Accountant, and we have to thank Mr. Denselow and other officials of the Vestry for the kind way they have assisted us during the audit.

(Signed)      A. G. SPELLS,      }      *Auditors*  
                          WILLIAM VERE,      }

*Dated 1st day of June, 1896.*

## REPORT OF CHARTERED ACCOUNTANTS.

*To the Vestry of the Parish of Fulham.*

Gentlemen,

In accordance with your instructions we have attended at the offices of the Vestry, and examined the Books and Accounts for the year ending 25th March, 1896.

We have examined the accounts with the vouchers and documents relating thereto, and verified the balance at the Bankers and find that the summary Statements of Accounts prepared by your Accountant, to be a true abstract of the several accounts from the books of the Vestry.

We beg to state that every information with respect to the Books and Accounts has been freely given to us, and that we have been allowed every facility for completing our audit.

We are, Gentlemen,

Your obedient Servants,

(Signed) DRURY & ELLIOT,

Chartered Accountants,

11, Queen Victoria Street, E.C.

London, 14th May, 1896.

TENTH

ANNUAL REPORT

AND A SUMMARY OF THE RESULTS OF THE SURVEY

PRESENTED TO THE HOUSE OF COMMONS

BY THE COMMISSIONERS OF THE LAND REVENUE

IN RESPONSE TO A RESOLUTION OF THE HOUSE

PASSED ON THE 12TH MARCH 1883

LONDON: PRINTED BY THE STATIONERY OFFICE

1884

BY ORDER OF THE COMMISSIONERS

W. H. STUBBS, SECRETARY

# The Vestry of the Parish of Fulham.

## REPORT OF THE SURVEYOR,

FOR THE YEAR 1895-96.

MR. CHAIRMAN AND GENTLEMEN,

I beg to present the Tenth Annual Report of Works carried out in this Parish during the year from the 25th March, 1895, to the 25th March, 1896, with Schedules showing various details at the end. It will be seen that the works and expenses increase as the Parish becomes more densely populated, and consequently the work of the Surveyor's department increases proportionately. Various improvements have been effected, or are under consideration, and the maintenance of permanent works, such as roads, sewers, &c., has had close, careful and efficient attention.

### AREA OF THE PARISH.

The area of the Parish of Fulham is	...	1,700'324 acres.
Area of Foreshore	... ..	56'561 "
Area of Tidal Water	... ..	99'614 "
Total	... ..	<u>1,856'499</u>

### COMPARATIVE TABLE.

Showing the increase in the population, length of roads, footpaths, etc., of the Parish since the separation from Hammersmith in 1886. The population at the previous census in 1881 was 42,895. It will be seen that there has been a very large increase since 1891, in all respects.

## STREETS.

A list of the Streets of the Parish, with the lengths of carriageway and footways, and the particulars and average depths of sewers, will be found on page 229 at the end of the Report.

A summary of the length of the Streets is given below :—

## SUMMARY.

	Miles	Furlongs	Yards
Length of Public Roads=...	44	1	117
„ „ Private „ ...	8	0	124
„ „ Ditto (not 40 feet wide) ...	1	4	56
	53	6	77
<hr/>			
	Miles	Furlongs	Yards
Length of Public Footpaths=...	77	4	131
„ „ Private „ ...	15	3	85
„ „ Ditto (not 40 feet wide) ...	1	4	4
	94	4	0

## RE-NAMING STREETS.

The following streets have been named or re-named by the London County Council :—

Crown Street, ...	re-named Novello Street.
Road from Mornington Avenue to North End Road	named Conan Street
Passage from May Street, to North End Road	named Kelway Place.

## NEW STREETS.

The plans have been submitted to the London County Council and the Vestry for the following New Streets in this district :—

Case No.	Names of Street and Estate	Date submitted to Vestry	Date approved by L.C.C.	Length in feet
E 50	Elmdale Street} ...	Mar., 1896	May, 1896	345
	Playfair Street } ...	...	...	360
	Brandenburgh Road ...	Mar., 1896	May, 1896	370
E 43	Two new roads out of ...	...	...	
	Munster Road, by ...	...	...	
	Dawes Road ...	Mar., 1896	April, 1896 (Disapproved)	1100

Since the formation of this Vestry in March, 1886, 259 New Streets have been made up, as follows:—

Year	Made up by	Number of Streets	Length of Carriageway		
			Miles	Furlongs	Yards
1886-87	Trustees ...	9	0	7	9
	Fulham Vestry ...	7	0	5	47

## WOOD PAVING.

Schedule IV. represents the whole area of roads paved with wood, out of which it will be seen 6,161 superficial yards have been laid during the current year. The re-laying of Lillie Road is now in hand, and that of King's Road, from Stanley Bridge to Waterford Road, is to follow. The re-laying of North End Road, from Star Road to the "Cedars" Public House, is badly needed, but on account of the new sewer which is being laid by the L.C.C., cannot be done as the traffic could not be diverted. The plain deal blocks as first laid in the three above-named roads cannot be said to have been satisfactory, for after a time the wood becomes desiccated and saturated with water, &c., and in many cases affected by dry rot. With regard to creosoted deal this does not occur, as the process of abstracting the moisture from the blocks and forcing in, by pressure, of 10 lbs. of creosote to every cubic foot of timber prevents the evils mentioned, and in addition acts as an excellent deodorizer and disinfectant.

These pavements, in the hot weather, are watered with the Vans, which have in each load of water a small quantity of miscible creosote, which acts additionally as a disinfectant and deodorizer.

## SEWERS LAID BY PRIVATE PERSONS IN 1895-96.

Signed R. H. MEYER,  
Accountant.  
C. BOTTERILL,  
Surveyor.

26th June, 1895.

Surveyor's Estimate of the Cost	£403	1	3 11
Deduct for portion of sewer not laid	190	0	0
	384	1	3 11

On the 10th July, I submitted the following report to the Works Committee:—

I beg to submit dissected account of expenditure and nett cost of this work as printed on agenda. (Shewn on page 209.)

The estimate which was made by my predecessor, Mr. Norrington, is founded on the actual cost to the Vestry of Munster Road and Fulham Palace Road Sewers which were let out to Contractors and are both of very similar nature as regards depth, nature of sub-soil, quantity of sub-soil water and structural features.

The Vestry were at a disadvantage with regard to the possession of adequate plant, and the money expended in hire of plant is, of course, largely a loss, and the Vestry, in my opinion, certainly did not get so much value for the wages expended as a private individual would have done. As to the purchase of materials there can be no question that the Vestry is placed in an extremely favourable position, and can and does buy these as well and as cheaply as any Contractor.

I may say, that in the course of the sewer contracts previously mentioned, that the Vestry were paid for or took away the sand and ballast which was surplus material, and that the value of this, in the case of Wandsworth Bridge Road Sewer, would not have been credited to the Contractor.

The estimated cost of this work was, as stated above, £3,841 and actual cost £5,233, and I feel confident it might have been carried out by a good firm of Contractors for the estimated amount. This is a class of work which cannot well be done by a public authority, at any rate economically.

### DISTILLERY LANE SEWER.

This sewer caused a considerable amount of trouble this year, the reason on examination being found to be an obstruction in the shape of a large piece of timber which by some means had lodged in the sewer. Various kinds of false rumours were circulated as to this, and an owner of property made a claim on the Vestry for compensation. However, no further steps were taken. I only mention this to the Vestry as any amount of abuse was lavished upon me without cause, and before the facts could be ascertained by those who ought to have waited for them. This sewer, formerly known as the Black Bull Ditch, is on the boundary of the Parish, and half the expense of maintenance and repair is borne by the Hammersmith Vestry, and as usual, the half cost of this stoppage was paid by them on application.

### SURCHARGING OF SEWERS.

Surcharging of the sewers of the district took place on a few occasions during the stormy weather, causing great inconvenience to the inhabitants. In consequence of many complaints, the London County Council applied to me for detailed information as to the floodings, and a very full account was sent to them. The Council have passed a scheme, prepared by the Chief Engineer, to give relief in the shape of a Pumping Station to be erected on the bank of the Thames at the end of Imperial Road, but operations have not yet commenced. In several instances where the basements of houses are exceptionally deep, on my recommendation, tidal flap valves have been

erected between the house and sewer with excellent effect, but the expense of it is too great to be adopted for small properties. One has been fixed in Moth Place for the drain of the Underground Convenience, and has proved quite effectual, although the floor of this building is well below flood level.

### VENTILATING SHAFTS.

During the year 15 ventilating shafts have been erected (see page 258).

This makes a total of 57 ventilating shafts erected to ventilate existing sewers since March, 1886. The benefits received from these appears to be doubted, and the subject of ventilating the Sewers generally is receiving the attention.

### HOUSE DRAINAGE.

The proper construction of the drainage of houses has continued to occupy the attention of the Vestry, but the number of plans submitted shows a slight decrease on the preceding year.

### DRAINAGE PLANS.

1-2.	1892-3.	1893-4.	1894-5.	1895-6.	
69	757	772	1230	1036	Houses and Shops

—	—	20	7	13	Flats
—	—	—	—	—	
18	785	817	1252	1078	

In Schedule V. are set out the plans submitted to the Vestry and the decisions thereon.

### COMBINED DRAINAGE.

In consequence of the decisions of the Courts as to combined drainage, under certain circumstances, sewerage, and maintainable by the Vestry, several cases have been dealt with by relaying, at the Vestry's expense. Of course, the most serious phase of this matter is the question of permanent maintenance which must be taken as a liability and duty of the Vestry, but when one considers the difficulties experienced in prosecuting unauthorised persons interfering or tampering with sewers in public streets and ways, how much more difficult must it be to exercise due surveillance over those which are in the enclosure of private premises.

				<hr/>			<hr/>		
				£4,790	7	11	£4,653	15	6

In looking through these figures it will be noticed that the consumption of gas at the Bishop's Park has been greatly reduced; two burners were originally fixed in each globe lamp on the embankment wall, but on its being noticed that the heat was too great for the size of the globe and caused the glass to fracture, one burner from each was removed.

On the closing of the footpath along the moat, from the main entrance to Fulham Palace to All Saints' Church, the whole of the lamps on the enclosed portion of the Bishop's Park were disconnected from the street lighting, and are now all supplied through one meter. The closing of the footpath has increased the number of lamps chargeable to the Park from nineteen to thirty-four.

In comparing the maintenance by the Vestry with the maintenance by Contractors the two items—

Knockdowns	£14	4	10
Mason	...	8	13
	<hr/>		
	£22	18	3

should be deducted, which leaves approximately—

£160	0	0	for wages.
10	0	0	„ tools.
120	0	0	„ materials.

Total, excluding painting, £290 0 0

This compares favourably with £330 to £350, the amount *pro rata* payable to a Contractor for the past years' maintenance.

In painting the lamps, the Contractors were always very unsatisfactory, the work being done piecework, and being commenced late in the year when good weather was not to be expected. As it was not possible to commence the painting with the Vestry's workmen early in the past year, it was left to stand over, and commenced in the beginning of April, 1896, and is now complete at a cost of £123 11 6 for wages.

43 16 11 „ materials.

Total, £167 8 5

As the painting has now been thoroughly done with good material, there is no doubt it will last for two years at least.

## INCANDESCENT GAS STREET LIGHTING.

A resolution was carried on the 25th March, 1896, to light the Fulham Road from Stamford Bridge to the Fire Station by incandescent gas lamps as an experiment, but no limit was placed as to time. The result of the experiment has to be arrived at, but it is to be hoped it may prove successful.

The lighting of the Town Hall with these, has undoubtedly been an improvement on the ordinary gas lighting.

## IMPROVEMENTS.

In Schedule X. is shown the various improvements where land is given up to widen the roads under compulsory powers or otherwise, and in Schedule XI. the numerous lesser works which have been ordered by the Vestry.

### IMPROVEMENT, MUNSTER ROAD, BY BOARD SCHOOL.

The agreement to carry out this most necessary improvement has been entered into between the School Board and the Vestry, and the work of setting back is shortly to be done. This involves building a new boundary wall, taking down out-buildings and re-erecting them in altered position and will be a very expensive matter, the whole of which expenses might have been avoided, except the *pro rata* cost of land, if the two authorities had met each other in a proper spirit.

### IMPROVEMENT, NORTH END ROAD, BY FANE STREET.

The forecourts of Nos. 182, 184 and 186 have been purchased and setting back and necessary works of cellarage, &c., carried out, providing very much needed extension in the width of the footway at this part of the road. The improvement has been in hand for many years, and the provisions of Michael Angelo Taylor's Act have had to be enforced before the whole of these forecourts were obtained. In the case of No. 182 an offer of £60 was made as compensation to the owner for severance, and the Court awarded £24 with costs against the claimant. So that in these cases it would appear that the Vestries are protected against undue claims for compensation when they themselves offer reasonable amounts.

### IMPROVEMENT, BURLINGTON ROAD.

The widening of this road in front of Nos. 61 to 71 has been effected, the land given up being 54 sup. yards in extent, without charge, on condition the Vestry re-building the forecourt walls and paving the footway, &c. The works have been done at a cost of £143 and the road at this point is widened from 17 to 22 feet.

### IMPROVEMENT, MARGRAVINE ROAD BY "PEAR TREE" PUBLIC HOUSE,

A triangular projecting piece of land has been thrown into the carriage way, making a desirable improvement. The area of land acquired is 2 sup. yards, the work of setting back, paving, &c., was done at the cost of the Vestry in addition to the sum of money paid as compensation for the land.

## IMPROVEMENT, FULHAM PALACE ROAD, OPPOSITE Nos. 79 & 81.

These frontages have been set back, the paving and roadway widened, proving this part of Fulham Palace Road. The land acquired is 35 sup. yards, and the cost of this together with the works have been borne by Vestry.

## IMPROVEMENT, DAWES ROAD, BY VARNA ROAD.

A very good improvement has been carried out here, the footway previously being positively dangerous on account of its narrowness, and the large amount of traffic passing by it. The land acquired is 73 sup. yards, and the cost of this and the works have been borne by the Vestry.

## BISHOP'S PARK.

During the year a Band Stand has been erected, with canopy carried by ornamental cast iron columns and brackets, and covered by red Broseley tiles. The band using this are highly satisfied and the public appreciate the convenience, as last year the band had to play standing on the ground and consequently at a great disadvantage.

A Refreshment Stall has also been erected, built by our own workmen, and has been let to a refreshment contractor at a rent of £15 per annum, which will pay good interest on the outlay. It is an undoubted boon to the public. The tariff is practically that adopted in the open spaces of the London County Council, and is of a very moderate character. The grounds generally have been kept in a creditable way and the show of simple flowers has been most satisfactory.

It will be necessary this year to paint all the iron fencing as this has not been done since the opening of the Park. The West Meadow is still closed to the public, and it would be inadvisable to open it until the growth of the grass has become fully established. Sea shell should be used again on the gravel walks, as mentioned in my last Report.

## EXTENSION OF BISHOP'S PARK.

The scheme for building the river wall from the Bishop's Park to Putney Edge, facing Pryor's Bank, has been approved by the London County Council, and the work is now in the Contractor's hands, a contract having been entered into with Messrs. G. Wimpey & Co. for £2,551, my estimate for this being £2,900. The work is of some difficulty as the line of the new wall is studded with old piles and sheeting, also by reason of the confined space on the bank for working operations. Previous to the contract being made a timber flood bank was erected by the Vestry's workmen along the whole length to a height of 18.50 above ordnance datum, so as to comply with the Thames Flood Protection Act, and was necessary because the normal level of the garden ground at Pryor's Bank is some feet below that level.

A flight of steps, designed by the writer to form an access from Putney Edge, has also been approved and adopted by the Vestry and the London County Council to be built at an estimated cost of £1,350. These cannot be commenced until the works of the embankment wall are pretty well completed, the site for them is required for the workshops of the new wall contractors.

The laying out of the grounds will not be a matter of great magnitude : the proposal is to retain as much as possible the walks, shrubberies, &c., in their old form.

#### RECREATION GROUND, LILLIE ROAD.

This ground cannot be said to be as satisfactorily kept as that of Bishop's Park, but if the Vestry does not support their chief officer in his efforts by giving him proper and adequate attendants the result must be as it is. A school house and workman's w.c. has been erected in the south-west corner of the boys' play ground ; also, box edging has been placed around the whole of the borders facing Lillie and Fulham Palace Roads, to keep the soil during storm times from being washed on to the public footways. A request was made by and granted for a firm of builders to have the public urinal moved to another site on the grounds, but the negotiations fell through.

On account of the numerous accidents caused by the abuse of the swings, on my recommendation these were not fixed this year. This is an instance of the decent children having to lose a reasonable pleasure through the want of a capable attendant, as the accidents occurred from my information simply for want of control over the rougher elements. Several applications for leave to play cricket on the central space have had to be refused, for the area is so confined that the danger would be too great for the general public and children to risk.

#### VESTRY WHARF, TOWN MEAD ROAD.

A wharf wall and barge bed to the writer's design have been let by contract to Messrs. G Wimpey & Co. for £3,034, the estimated cost being £3,800. The work is in hand and should be completed in five months on the 9th March. The foreshore reclaimed is somewhat in excess of that shown on the deed of purchase, as it was considered the old line of foreshore must have extended further. Application was therefore made to the Thames Conservators for an extended line, and although the Vestry's full request was not acceded to it was in part, and the extra land reclaimed is accepted. There will be a depth of 16ft. 6in. from the coping of wall to barge bed so that barges will be able to load and unload at neap tides. The wall is formed of concrete with blue Staffordshire brick facing and the necessary fenders and anchor ties. The section and details of this work having been approved by the London County Council and the Thames Conservators.

#### SWAN WHARF.

It was found, through loss of shoots, necessary at the end of December to provide for barging away slop and road sweepings, and as the Toll House Wharf was totally inadequate, the adjoining wharf, named Swan Wharf, having a frontage of 94 feet, was hired at a rental of £130 for 3 years, with the option of extending the time for seven years. This has proved satisfactory, and in the future will undoubtedly be quite as much needed.

#### ELECTRIC LIGHTING AND DUST DESTROYER.

These large questions are under consideration, and a Special Committee of the Vestry is appointed for the purposes of investigation and report. An Electrical Consulting Engineer has made his report (for an agreed fee), which if adopted and the scheme therein laid down be carried out, his appointment

will continue until the work is finished. The matter of Electric Lighting this Parish is of such magnitude and the economical, or rather profitable, working of it so doubtful, that the Committee and Vestry act very wisely in hastening slowly, and there can be no doubt that, in reason, too much time cannot be spent in arriving at a proper conclusion.

A Dust Destructor is also a work not to be too hastily carried out, for a failure in this would involve a very heavy loss, and there are points to be carefully considered upon which more information is required than is at present in the Vestry's possession.

### UNDERGROUND CONVENIENCE.

An Underground Convenience for both sexes has been constructed near St. John's Church, Walham Green, this being considered the most suitable site next to that opposite the District Railway Station, which would undoubtedly be the best in Fulham, but, unfortunately, it was found to be impracticable, as the Railway tunnel is beneath the road at the required position. The work has been carried out at a cost of £1,400 (estimated cost £1,450), without the intervention of a Contractor. My report very distinctly states that the cost of maintenance would most probably be in excess of the receipts and that has been found to be so. However, the advantages to the public to a very great extent outweigh this loss, and that which was a public nuisance in the neighbourhood in question has been done away with.

### LINES OF FRONTAGE.

New buildings are closely watched to see that no infringements take place of the various lines of frontage, and during the year it has been necessary to draw the attention of the London County Council to three buildings, two of which were allowed

Schedule XII. is a full statement of all lines of frontage which have arisen during the year.

### VAULTS, PAVEMENT LIGHTS, &c.

In Schedule XIII. are particulars of the various vaults, pavement lights and cellar flaps, for private persons, which have been consented to and carried out during the year.

### CROSSINGS, &c.

In Schedule XIV. are the particulars of the various crossings laid for private persons.

### APPLICATION FOR ADDITIONAL POWERS TO LOCAL GOVERNMENT BOARD.

Amongst other matters for which the Vestry have asked the Government for extra powers is that of the compulsory acquisition of land under the Land Clauses Act. It may be pointed out that for the purposes of improvements this would probably be a disadvantage, as the powers now in vogue under 37 Geo. III., cap. 57, known as Michael Angelo Taylor's Act, are the best to act upon, for the owners of land are precluded from obtaining exorbitant claims by reason of the question of costs, which in every case must be paid by them as far as their own are concerned and to the authorities as well where the award is less than the amount of claim. Knowing this, most owners are amenable to reason and accept fair and reasonable compensation without litigation.

## WORKMEN EMPLOYED AND WAGES PAID.

Workmen in the employ of the Vestry during the second week December, 1895:—

1889-90	2,210 7 9	42 10 2	6,173 4 3	118 14 3	8,383 11 11	160 14 4
1890-91	3,436 9 5	66 1 8½	7,939 14 10	152 13 8¼	11,376 4 3	218 15 5½
1891-92	4,339 7 11	83 7 0¾	8,077 5 3	155 6 7¾	12,411 13 2	238 18 8½
1892-93	4,639 10 4	89 4 5	9,991 12 9	192 2 11	14,631 3 1	281 7 4
1893-94	5,068 0 10	97 9 3	9,984 18 11	192 0 4	15,052 19 9	289 9 7
1894-95	9,606 4 5	184 14 8	4,178 15 3	80 7 2½	13,784 19 8	265 1 11
1895-96	9,915 10 1	190 13 8	3,895 10 5	74 18 3	13,811 0 6	265 11 11

This table shows that the amount paid as wages have doubled since 1887.

From the Works Department wages the following amounts received for various works, may be deducted :—

	1891-92.	1892-93.	1893-94.	1894-95.	1895-96
	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
Private drainage works...	1,192 8 5	1,020 5 6	1,429 15 7	1,030 18 10	1,221 0 10
Gas and water trenches...	686 12 6	631 6 5	804 11 9	871 7 4	2,397 15 7
Total ...	1,879 0 11	1,651 11 11	2,234 7 4	2,002 6 2	3,618 16 5

The great increase of £2,000 in the accounts of the Gas and Water Companies, between the years 1892-3 and the present year, may be noticed as one of the examples of increased work in this department, and without the needed clerical assistance, as a matter of fact the quarterly accounts are frequently rendered four months after they are due.

## HORSES AND FODDER.

Particulars of the horses owned by the Vestry, and the cost of food, will be found in Schedules VIII. and IX. The cost of keeping horses varied considerably during the last three years, and the difference in the prices of fodder is shown below.

The prices per quarter and per load are for each half year.

	1892-93.	1893-94.	1894-95.	1895-96.
Oats	21s. 6d. and 21s.	19s. 3d. and 18s. 9d.	15s. 3d.	15s. 3d. and 14s.
Hay	72s. „ 105s.	90s. „ 147s.	60s.	60s. „ 67s.
Clover	85s. „ 110s.	105s. „ 155s.	77s. 6d. and 82s.	82s. „ 77s.

## CART HORSE PARADE.

On Whit Monday four horses were exhibited belonging to the Vestry; two of the drivers were successful in gaining first prizes and diplomas, and the other two obtained second prizes. The Vestry is in maintaining this matter of paying the entrance fee for the horses, the awards being made chiefly on account of the way in which they are attended to and the cleanliness of their harness.

## FROST, SNOW, AND UNEMPLOYED WORKMEN.

The winter was most exceptionally mild and consequently no extraordinary expenses were incurred in the removal and disposal of snow, also very light and infrequent frosts involved a great deal less than ordinary expenditure for sanding the roads.

The open weather also provided work for out-door operatives, so that I believe the distress in this parish through want of work was much below the normal point.

## DUST.

Table showing the number of loads removed:—

Year	Loads	Horses one day each	Average Loads per Horse per day	Cost of Horse and Cart per day	Cost of Horse and Cart per load	Wages per load	Cost of or bar per load
				s. d.	s. d.	s. d.

1895-96	24,584	6,252	3.932	6 0	1 6¼	1 9	2s. 3

Table showing the number of complaints, etc., from March in each year:—

		1893-94.	1894-95.	1895-96.
Requests for removal	...	539	846	642
Complaints	...	36	34	12
		<u>575</u>	<u>880</u>	<u>654</u>

### TRADE REFUSE.

The charge made for this is 2s. 6d. per load, but this is, as pointed out before, a dead loss to the Vestry, as the cost of barging alone is 2s. 3d.

### STREET CLEANSING AND SLOPPING.

For this work the following staff and plant are engaged:—

70 Scavengers,  
30 Horses,  
8 Horse brooms,  
8 Horse scrapers,  
16 Orderly hand-trucks,  
6 Sanding machines,  
35 Slop Carts,  
20 Shoot carts,  
26 Water vans,  
2 Water carts.

The wood-paved carriageways have had the usual and proper attention, as also the macadamized and flint roads in the matter of cleansing. A proposal is now before the Cartage Committee to have regular all-night scavenging so as to relieve the day work, and carry out the work with greater expedition and regularity, and there is but little doubt this is a scheme which will be an advantageous one.

	Vestry's Horses		Hired Horses		Total	No. of Loads	Value per Horse, Cart and Man per Day		Cost of Carting

This subject of the flushing and cleansing of the sewers has continued to receive a large amount of attention from the Vestry during the year, and a ganger and men are continually employed cleansing the brick sewers belonging to the Vestry, and in cleansing and flushing the pipe sewers.

### SUNDAY WATERING.

When the weather renders it necessary, the main roads in this Parish are watered on Sunday mornings and afternoons, and 159 horses have been engaged during the season.

### GENERAL CARTING.

## GULLIES.

The work of cleansing these have been carried out in a proper and disinfectants used when re-sealing is done. There is a fortnightly detailed report presented to the Works Committee and Vestry; the table shows the Summary of these.

There are about 2,500 gullies in the Parish :—

	Vestry's Horses	Hired Horses	Total	No. of Loads Removed	Approximate cost of Carting		
	Whole Days				£	s.	d.
1888-89	298	—	—	1192	126	13	0
1889-90	177	39	216	1080	91	16	0
1890-91	192	35	227	1135	102	3	0
1891-92	326	—	326	1630	163	0	0
1892-93	426	—	426	1704	213	0	0
1893-94	{ 358 277	Filling with Dis- infectant. Carting away.	635	1460	317	10	0
1894-95	{ 582 262						
		Filling with Dis- infectant. Carting away.	844	1872	422	0	0
1895-96	585	47	632	2171	312	9	6

Disinfectants are plentifully sprinkled about gullies and ventilators to the sewers during the summer months, and are also added to the water with which the gullies are filled in the proportion of 1 in 2,000.

## TOTAL COST OF CARTAGE.

The total cost of cartage for the year, including the wages of the drivers, has been as follows :—

	1891-92.	1892-93.	1893-94	1894-95.	1895-96
Scavengers ..	1,751 0 0	1,420 14 0	1,337 5 0	1,385 18 6	1,530 14
Cleansing Gullies ..	163 0 0	213 0 0	317 0 0	422 0 0	312 9
General Cartage ..	1,298 10 0	1,456 16 6	1,217 0 0	1,244 9 0	1,099 12
Watering Roads ..	779 15 0	920 19 0	1,210 0 0	1,176 19 0	1,016 3
Dusting ..	2,373 0 0	2,724 6 6	2,779 10 0	2,780 18 0	3,226 0
Brooms ..	188 10 0	128 10 0	360 10 0	358 0 0	426 0
Snow Scrapers, Roller, Sanding, &c ..	453 6 0	241 15 0	279 0 0	258 10 0	122 10
	<u>£7,007 1 0</u>	<u>£7,106 1 0</u>	<u>£7,500 5 0</u>	<u>£7,626 5 6</u>	<u>£7,733 8 1</u>

The price paid for a horse, cart and man, during the year, has been 9s. 3d. a day, but the work done by our own horses is priced out at worth 10s. a day.

## TREES.

The whole of the trees in the streets have been pruned this season by the Vestry's own workmen, and with satisfactory results. This is a work done every year of a certain magnitude and necessity, for the new wood made by the trees (which are nearly all plane trees) is surprisingly great, and in roads of the widths in which they are planted the obstruction to traffic and light and air compels annual and drastic pruning. In Wandsworth Bridge Road several young trees were destroyed by a run-away horse and van, but these and others which have died, have been re-placed.

Schedule VII. is a detailed list of the trees in the Parish streets.

## LICENSES FOR HOARDINGS, &c.

The Vestry charges a nominal fee of 1s. for a hoarding license in a street not taken to by the Vestry.

A deposit is required in proportion to the area enclosed for licenses for hoardings for buildings and other purposes.

Date.	No. of Licenses granted.	Amount paid in.					
		£	s.	d.	£	s.	d.
1890-91	110				68	12	9
1891-92	158				86	5	8
1892-93	180				141	9	10
1893-94	179				170	10	0
1894-95	365				368	0	0
1895-96	Water Service Pipes 306	316	12	0	509	0	0
	Hoarding ... 29	164	5	0			
	Miscellaneous ... 29	28	3	0			

The charge for a license to erect poles in tubs is 1s. each pole.

The charge for renewal of licenses is 5s. each.

The charge for a license to use a hoarding in the street for advertising purposes is at the rate of 1d. per superficial foot per month. This charge is nearly prohibitive.

## OPENINGS MADE BY GAS AND WATER COMPANIES.

The following table shows the number of openings in streets made by the various companies, and the charges for the repairs of same:—

Date	Chelsea Water Works Company			West Middlesex Water Works Company			Gas Light and Coke Company			Totals		
	Open-ings	£	s. d.	Open-ings	£	s. d.	Open-ings	£	s. d.	Open-ings	£	s. d.
1889-90	1008	116	12 8	370	38	9 9	603	141	5 1	1981	296	7 6
1890-91	661	142	10 9	356	52	12 4	743	179	7 11	1760	374	11 0

1895-96	330	225	80	11,919 16 8	3,932

The work done by this department during the year has been very heavy and we are undoubtedly under-staffed, and matters have been delayed or left in abeyance by reason of the need for more help. My thanks are due—are given—to the members of my staff and to the members of the Vestry for their assistance and co-operation in carrying out the duties and work imposed on my department.

I am,

Mr. Chairman and Gentlemen,

Yours obediently,

CHARLES BOTTERILL,

*Member of the Incorporated Association of Engineers.*

*Engineer and Surveyor to the Vestry.*

TOWN HALL,

FULHAM, S.W.

*To the Vestry of the Parish of Fulham,*

GENTLEMEN,

I beg to submit to you my Annual Report on the vital statistics, and the conditions affecting the health of the district for the year 1895. The statistics of Marriages, Births, Deaths and Infectious Diseases relate to the 52 weeks ending December 28th, 1895.

### POPULATION.

The population of Fulham as enumerated at the Census taken in April, 1891, was 91,640, having increased from 42,900 during the preceding ten years. The population in the middle of 1895 as calculated in the usual manner on the assumption that the rates of increase which prevailed between 1881 and 1891 have been maintained since, was 117,773, but there is reason to believe that this is somewhat too high, and calculating from the number of inhabited houses on the rate books, the population in the middle of 1895 may be estimated at 111,150, and on this figure the statistics in this report are based.

A Census of the population of the County of London will be taken, in accordance with the provisions of the Equalisation of Rates Act, on March 29th of this year, so that our population as enumerated will shortly be known.

### AREA AND DENSITY OF THE POPULATION.

The area of Fulham is 1,701 acres, and there are 65 persons to the acre. The County of London has an average density of 58·8 persons to the acre, ranging from 211 and

197 in St. George's, Southwark, and Whitechapel, to 18, 5 and 9 persons to the acre in Wandsworth, Lewisham and Plumstead respectively. The four most crowded enumeration districts in Fulham, with an area of about 33 acres, contained in 1891 a population of 8,880 persons, or 269 to the acre.

### AGE AND SEX DISTRIBUTION.

The following Table gives the estimated number of persons living in Fulham at different age periods :—

Under 5 ...	...	...	...	...	15,672
5 to 15 ...	...	...	...	...	25,009
15 „ 25 ...	...	...	...	...	19,118
25 „ 35 ...	...	...	...	...	20,007
35 „ 45 ...	...	...	...	...	14,116
45 „ 55 ...	...	...	...	...	8,670
55 „ 65 ...	...	...	...	...	5,002
65 „ 75 ...	...	...	...	...	2,667
Over 75 ...	...	...	...	...	889

111,150

The following Table gives the number of persons at different ages in Fulham, London and other areas, expressed in percentages of the total population :—

	Under 5	5-15	15-25	25-35	35-45	45-55	55-65	65-75	Over 75
Fulham ...	14.1	22.5	17.2	18.0	12.7	7.8	4.5	2.4	0.8
London ...	11.9	20.5	20.1	17.3	12.4	8.7	5.2	2.9	1.0
Rural Districts	12.3	23.7	17.8	13.4	10.7	8.8	6.7	4.6	2.0
Urban Districts	12.3	22.5	19.9	15.7	11.8	8.5	5.3	3.0	1.0
England & Wales	12.3	22.8	19.3	15.1	11.5	8.6	5.7	3.4	1.3

The differences in the age constitution of the districts given in the above table are considerable, and similar

differences will be found in comparing the age and sex distribution in the various London districts ; and as age and sex constitution has a considerable influence on the death-rate of a community, the recorded death-rates require correction before they can be used for purposes of comparison. The age and sex distribution in Fulham is more favourable to a low death-rate than that of England, but not so favourable as that of London as a whole, nor as that of the adjoining parishes.

## MARRIAGES AND MARRIAGE RATE.

809 marriages were celebrated in Fulham during the year, against 759, 735 and 789 in the three preceding years. The marriage rate, *i.e.*, persons married per 1,000 inhabitants, was 14·5, the rate for the whole of London being 17·1, and for England and Wales 15·0.

## BIRTHS AND BIRTH RATE.

The births registered in the year numbered 3,930 ; 1,993 males and 1,937 females. There was one birth to every 28 inhabitants, and 100 births of males to 97·2 of females.

The 3,930 births correspond to a birth-rate of 35·3, which was lower than the average of the last ten years, but considerably higher than that of London, which was 30·5, and that of the western group of sanitary areas excluding Fulham, which was 23·5.

In the other Sanitary Districts the rates ranged from 46·8, 43·7 and 38·9, in St. Luke's, St. George's-in-the-East and Mile End, to 18·8, 16·4 and 14·0 in Hampstead, the City of London and St. Martin's-in-the-Fields respectively.

Among the 33 large towns of England and Wales the highest rates were those of Liverpool, 36·9 ; Wolverhampton, 35·4, and Sunderland, 35·1 ; and the lowest those of Croydon, 25·3 ; Halifax, 23·1, and Huddersfield, 21·7

The following Table gives the number of births registered in Fulham, together with the birth-rate during the last 10 years :—

		Males.	Females.	Total.	Birth R.
1886	...	1395	1285	2680	39·4
1887	...	1412	1458	2870	39·3
1888	...	1577	1406	2983	38·2
1889	...	1522	1567	3089	37·2
1890	...	1551	1593	3144	35·7
1891	...	1814	1733	3547	37·4
1892	...	1835	1761	3596	35·4
1893	...	1860	1851	3711	35·4
1894	...	1937	1826	3763	34·9
1895	...	1993	1937	3930	35·3

The erection during the last four or five years of a considerable number of moderate-sized "flats" tenanted largely by unmarried persons or by those with small families probably accounts for the diminution of the birth-rate.

#### EXCESS OF BIRTHS OVER DEATHS.

The natural increase of the population by excess of births over deaths was 1735, compared with 1428, 1671 and 1866 in the three preceding years.

#### ILLEGITIMATE CHILDREN.

The births of illegitimate children numbered 141—7 males and 66 females, forming 3·6 per cent. of the total births.

#### STILL-BORN CHILDREN.

182 still-born children were buried in Fulham Cemetery being in the proportion of 1 still-born child to every 210 births.

It is to be regretted that no steps have yet been taken to carry out the recommendations of the Select Committee of the House of Commons for the improvement of Death Certificates and Registration, mentioned in previous reports that still-births should be registered upon the certificate of a

registered medical practitioner, and that it should not be permitted to bury or otherwise dispose of the still-birth until an order for burial has been issued by the Registrar.

## DEATHS AND DEATH RATE.

The deaths of 2337 persons—1140 males and 1197 females—were registered in Fulham during the year; but of these 360 were of persons not belonging to the district, who died in public institutions within the parish, while the deaths of 218 persons belonging to Fulham occurred in institutions situated outside the parish. There were therefore 2195 deaths of parishioners of Fulham, compared with 2,068, 2024 and 1897 in the three preceding years, the mortality being at the rate of 19.7 per 1,000 living, the death-rates for the preceding three years having been 19.9, 19.3 and 17.6. The rate for the whole of London was 19.4, or slightly below the average for the ten years, 1885 to 1894, which was 19.8

The lowest rates in the 43 sanitary areas were 12.0 in Hampstead, 13.4 in Stoke Newington, 14.4 in Lewisham, 14.5 in Lee, 14.8 in Wandsworth, 15.2 in Plumstead, and 15.9 in St. George's, Hanover Square; and the highest 25.2 in Holborn, 25.3 in the Strand, 25.4 in St. George's, Southwark, 25.5 in St. Saviour's, Southwark, 27.3 in Limehouse, 29.5 in St. George's-in-the-East, and 30.2 in St. Luke's.

Among the 33 large towns in England and Wales the lowest rates were those of Croydon 14.5, Derby 16.7, Huddersfield 16.8, Leicester 17.2, West Ham 17.8, Bristol 18.0, Cardiff 18.2, Swansea 18.38, Brighton 18.9; and the highest those of Bolton 24.0, Wolverhampton 24.3, Blackburn 24.3, Manchester 25.2, Salford 25.6, and Liverpool 28.7.

## CORRECTION FOR AGE AND SEX DISTRIBUTION.

The death-rate of Fulham corrected for Age and Sex Distribution was 20.6, and that of London 20.7.

The following Table gives the death-rates of Fulham and of London during the past 10 years :—

			Fulham Death-rate per 1,000.	London Death-rate per 1,000.
1886	...	...	19'0	20'5
1887	...	...	19'5	20'3
1888	...	...	19'1	19'3
1889	...	...	18'8	18'3
1890	...	...	21'7	21'5
1891	...	...	19'7	21'0
1892	...	...	20'0	20'3
1893	...	...	19'3	20'9
1894	...	...	17'6	17'4
1895	...	...	19'7	19'4

### SEASONAL MORTALITY.

736 deaths occurred in the first quarter of the year, 429 in the second, 518 in the third, and 512 in the fourth—the effect of the severe weather in the early part of the year being very marked.

### MORTALITY AT DIFFERENT AGES.

#### INFANTILE MORTALITY.

Of the 2195 deaths registered, 735 or 33 per cent. were those of children under one year of age. The rate of infant mortality measured by the proportion of deaths under one year to births registered was 187, as compared with 166, 177 and 149 for the previous 3 years. The rate for the whole of London was 165, ranging from 116 in Stoke Newington, 132 in Wandsworth, 133 in Plumstead, 135 in Hampstead and Lewisham, and 138 in St. George's, Hanover Square, to 201 in Newington, 202 in Limehouse, 205 in St. Saviour's, Southwark, 212 in Holborn, and 265 in St. Martin-in-the-Fields.

In the large provincial towns the lowest rates were 134 in Croydon, 143 in Bristol, and 158 in Halifax and Huddersfield; the highest were 236 in Blackburn, 242 in Burnley, and 248 in Preston.

Between the ages of 1 and 5 years 366 deaths were registered, so that the deaths of children under the age of 5 years numbered 1,101, or 50 per cent. of the total number of deaths. These deaths were equal to an annual rate of 70·2 per 1,000 of the population estimated to be living at this age.

#### DEATHS OF ILLEGITIMATE CHILDREN.

67 of the children who died before attaining the age of one year were illegitimate, the mortality among them being in the proportion of 475 deaths to 1,000 births, or nearly three times as heavy as that of children born in wedlock.

#### INSURANCE OF INFANTS.

Certificates under the Friendly Societies' Acts were issued during the year in respect of 481 children under the age of 5 years, and 55 in respect of those between 5 and 10; thus 43 per cent. of the children who died before attaining the age of 5 were insured. In 1893 the proportion was 48 and in 1894 50 per cent.

#### MORTALITY AT SCHOOL AGE.

At the age of 5 to 15 years, which is approximately the school period of life, there were 86 deaths, corresponding to an annual rate of 3·5 per 1,000 of the population estimated to be living at that age.

#### MORTALITY AT ADOLESCENCE.

At the age of 15 to 25 years 57 deaths were recorded, the rate of mortality being 2·9.

#### MORTALITY AT MATURITY.

At the age of 25 to 65 years there were 623 deaths, a number equivalent to a death-rate of 12·7.

#### MORTALITY AT DECLINE.

At the age of 65 and over, 328 persons died, the death-rate at this age-period being 92·5.

# DEATHS AND DEATH RATE FROM ZYMOTIC DISEASES.

343 deaths were due to the seven principal Zymotic Diseases, viz. :—

Smallpox	...	...	—
Scarlet Fever	...	...	21
Diphtheria and Membranous Croup			77
Enteric Fever	...	...	12
Measles	...	...	50
Whooping Cough	...	...	50
Diarrhœa	...	...	133
			—
			343

These 343 deaths correspond to a death-rate of 3·1 per 1,000.

During the past 10 years the number of deaths and the death-rate from these diseases have been as under :—

	Deaths.	Death Rate.
1886	253	3·7
1887	269	3·6
1888	252	3·2
1889	243	2·9
1890	379	4·3
1891	211	2·3
1892	448	3·5
1893	344	3·3
1894	426	3·9
1895	345	3·1

the average for the 10 years being 3·4.

The Zymotic death-rate for the whole of London was 2·6, and the average rate for the last 10 years 2·7.

In the various sanitary areas the rates ranged from 1·0 in Hampstead, 1·1 in Stoke Newington, 1·3 in St. James, Westminster and in Wandsworth, to 3·8 in Shoreditch, 3·9 in Clerkenwell, 8 in Mile End, 4·0 in Poplar, 4·6 in Limehouse, and 5·5 in St. Luke's and St. George's-in-the-East.

Among the 33 large towns the lowest rates were those of Huddersfield 1·2, Bristol 1·3, Croydon 1·3, Halifax 1·3, Brighton 1·7, and the highest those of Liverpool 4·0, Wolverhampton 4·2, Bolton 4·4, Salford 4·9, and Blackburn 5·6

### EXCESS OF ZYMOTIC DISEASES IN FULHAM.

The excess of Zymotic Diseases in Fulham as compared with London and the adjoining parishes will be seen from the following Table :—

DISEASE.	Actual number of deaths in Fulham.	Fulham's proportion if mortality was the same as in London.	Fulham's proportion if mortality was the same as in 3 adjoining Western districts viz., Hammersmith, Chelsea & Kensington
Smallpox ... ..	0	1	·6
Scarlet Fever ... ..	21	21	22
Diphtheria and Membranous Croup	77	57	57
Enteric Fever ... ..	12	14	11
Measles ... ..	50	66	22
Whooping Cough ... ..	50	36	33
Diarrhœa ... ..	133	90	88

But in considering these figures the relative proportion of children under 15 in the respective population must be taken into consideration, as all these diseases, with the exception of Enteric Fever and Smallpox, are mainly fatal to young children. In Fulham 26·6 per cent. of the population are under the age of 15 years, whereas in London and the other western districts under consideration, the respective proportions are : 22·4 and 20·1 per cent.

## NOTIFIABLE INFECTIOUS DISEASES.

The following Table gives the number of cases of infectious diseases notified in Fulham since 1890, when compulsory notification came into force, excluding duplicate notifications :—

	1890.	1891.	1892.	1893.	1894.	1895
Smallpox ...	—	—	3	32	40	2
Scarlet Fever...	286	118	517	701	529	339
Diphtheria ...	70	69	96	230	329	368
Membranous Croup	23	13	15	20	13	18
Enteric Fever	72	51	41	58	37	57
Continued Fever	—	—	—	6	2	3
Typhus Fever	2	3	—	1	—	—
Cholera ...	—	—	—	5	—	—
Puerperal Fever	6	9	10	18	10	6
Erysipelas ...	114	67	104	153	113	94
	<hr/> 573	<hr/> 330	<hr/> 786	<hr/> 1224	<hr/> 1073	<hr/> 887

## SMALLPOX.

Two cases were notified. In one case the disease was contracted in Shoreditch ; in the other the source of infection could not be traced.

1,076 cases were notified in London during the year, Fulham being conspicuously free from the disease.

## SCARLET FEVER.

339 cases were notified of this disease, which was less prevalent in Fulham than during the three preceding years. There were 2·9 cases per 1,000 inhabitants, as compared with 4·9 per 1,000 in the whole of London, and 6·4, 4·0 and 3·1 for the neighbouring parishes of Chelsea, Hammersmith and Kensington.

The distribution of the cases was as under :—

	Population in 1891.	Cases.	Deaths.
Barons Court Ward ...	12,051	23	0
Hurlingham „ ...	3,710	15	0
Lillie „ ...	16,096	47	5
Margravine „ ...	13,592	79	4
Munster „ ...	10,295	52	5
Sands End „ ...	11,740	46	2
Town „ ...	8,524	24	1
Walham „ ...	14,525	53	4
		—	—
		339	21
		—	—

237 or 70 per cent. of those suffering from the disease were removed to the Hospitals of the Metropolitan Asylums' Board.

*Mortality.*—The disease was the cause of 21 deaths, representing a case mortality of 6 per cent. Of the 237 removed to Hospital, 19 or 8·0 per cent. died, and of the 92 who remained at home, 2 or 2·2 per cent. died.

#### WANT OF ACCOMMODATION IN THE HOSPITALS OF THE METROPOLITAN ASYLUMS' BOARD.

The number of cases removed would have been larger had the accommodation at the Hospitals of the Managers of the Metropolitan Asylums' Board been adequate, but about the middle of July the accommodation for Scarlet Fever patients in the Board's Hospitals was exhausted, and patients could only be removed as vacancies occurred through death or recovery, so that although the removal only of the most urgent cases was requested, a delay of several days often occurred before this could be done; in some instances the removal was deferred so long that ultimately the patient remained at home until recovery. There were also many cases where removal was desired by the parents, but no application was made for removal as other more urgent cases were awaiting admission.

Some idea of the number of these cases may be gathered from the fact, that, during the first six months of the year, when the accommodation was ample, over 80 per cent. of the notified cases were removed as compared with under 60 per cent. in the last six months.

When it was evident that the accommodation at the Board's Hospitals was inadequate, the Clerk to the Asylums' Board wrote to the Vestry, stating, "that as the available accommodation at the Board's Hospitals was nearly exhausted, new cases could only be admitted as vacancies were occasioned by discharges and deaths, and expressing a hope that instructions would be given by the Vestry to the officers concerned, to arrange for preference being given to the removal of those patients who, as a consequence of their surroundings and conditions of life, are most in need of hospital treatment."

In reply to the Board's request respecting the "selection of cases," the Vestry pointed out that it was of little use for their officers to endeavour to select the most urgent cases, if the officers of the Asylums' Board use their own discretion in the removal of patients, as was the case when the hospitals were full in 1893, as then patients were removed from this Parish in spite of the Medical Officer of Health having telegraphed to the Board that he considered them well isolated, and that other more urgent cases were awaiting removal. The Vestry informed the Board that they were of opinion that when the available accommodation at the Managers' hospitals is so limited, no cases should be removed except at the request of the Medical Officer of Health, for the district, as he was in a position to know the circumstances and surroundings of all the patients notified to him as suffering from infectious diseases, and could therefore form an opinion as to which were really the most urgent cases.

It is, however, to be regretted that the Managers of the Asylums' Board persisted in having the selection of patients for the beds becoming vacant daily by deaths or discharges, made by the officers employed in the Ambulance Department of the Asylums' Board. To the request of the Vestry that their officials should be consulted with as to the

urgency of cases, the Clerk to the Asylums' Board replied that "it is quite impossible for them to take counsel with the Medical Officer of Health or any local officials as to the selection of the most urgent cases. The Managers' own officers must determine to the best of their ability, from the information supplied to them, which cases, wherever situated; and without in the least claiming that this arrangement works absolutely faultlessly, I am satisfied that on the whole the best selection possible is arrived at."

One fails to see why it should be impossible for the Asylums' Board to take counsel with the local officials as to the selection of urgent cases, for since the majority of the Sanitary Authorities are in telephonic communication with the Board, it would apparently be a very simple matter.

That the best selection possible is made by the present system is more than questionable. As the Vestry are aware cases have been removed in spite of the Medical Officer of Health having telegraphed to the Board that he considered them well isolated, and that other more urgent cases were awaiting admission.

On another occasion, when vacant beds were in great demand, a child was removed from this parish to the hospital four days *after* I had received a certificate from the medical practitioner in attendance that the child had recovered and that the premises were ready for disinfection. Again, on telephoning for the removal of a case I have been informed that it was impossible for any cases to be removed that day and that it was useless to give particulars, and yet within two or three hours on the same afternoon a child was removed on the application, subsequent to my telephoning, of a private individual.

I would further point out that complaints respecting the Managers' method of selection of cases are by no means confined to this parish, but are general throughout London. The Medical Officer of Health for Islington has drawn the attention of the Board to the unsatisfactory selection of cases by the existing method.

The Medical Officer for Camberwell points out that cases have been removed to the hospitals which have never appeared on the lists of patients urgently requiring removal,

which he has sent to the Metropolitan Asylums' Board, and this has occurred while he has been asking for the removal of other cases where it was specially necessary that the person suffering should be treated at a hospital.

The Medical Officer for St. George-the-Martyr states "There is reason to suspect that cases which might have been fairly isolated at home have gained entry in the Asylum Hospitals to the exclusion of members of families living in one or two rooms, often situated in large block buildings."

From this it is pretty clear that with the existing method "the best selection possible" is by no means attained, but the Managers apparently wish to maintain a position of autocratic independence of the Sanitary Authorities.

#### RETURN CASES.

In 9 instances the disease occurred within 10 days of the return of another member of the family from the Hospital after a similar attack. The occurrence of these "return" cases has attracted considerable attention of late and in June last I submitted a return, to the Vestry, of the cases of Scarlet Fever and Diphtheria that occurred in houses, in Fulham, within ten days of the return home of a discharged patient from one of the Hospitals of the Metropolitan Asylums' Board, between January 1st, 1894, and May 15th, 1895, giving particulars of 33 cases.

A report of a Sub-Committee of the Asylums' Board, appointed to inquire into the matter, was issued towards the end of the year.

As the result of their consideration of the whole question, the Committee have arrived at the following conclusions:—

(a) That there is no evidence to show that any appreciable number of patients admitted to the Board's Hospitals during the past two years have contracted infection from patients previously discharged therefrom.

That there is reason to believe that of the so-called "return" cases some have been due to the re-introduction of infection into households owing to the disturbance of insufficiently disinfected clothes, etc., left at home and stored away during the patients' stay in Hospital.

(b) That it is desirable that those Sanitary Authorities in the Metropolitan District who have not yet provided themselves with steam disinfectors should be urged to do so with the least possible delay; and, further, that the Authorities who still entrust the work of disinfection to contractors should be advised to discontinue the practice, and to have the work carried out by responsible officials.

With regard to their statement that there is no evidence to show that any appreciable number of cases have occurred, I would point out that the conclusions of the Sub-Committee are based upon inaccurate figures.

They state that they find from evidence supplied by the several Metropolitan Medical Officers, as to the outbreak of illness in households after the return home of recovered patients from the Board's Fever Hospitals, that only 165 cases of alleged infection from discharged patients were recorded. Of these 165 cases, 49 occurred during the first half of the present year, 1895, and 10 during the year 1891-1892, leaving 106 for the two years 1893 and 1894, during which time 30,227 patients who had been suffering from Scarlet Fever and Diphtheria were discharged from the Hospitals of the Board. This gives one case of infection for every 285 discharges. But on looking through the abstract of the replies given by the Medical Officers of Health, it will be seen that this by no means represents the true proportion, as in the first place, several Medical Officers of Health state, that though many such cases have occurred in their districts, they are unable to give details, but in the Committee's report it is assumed that no cases have occurred in these districts. Again, the figures given by the

Committee are based on the proportion of return cases to discharged patients in 1893 and 1894, but there is nothing in any of the abstracts of the reports of the Medical Officer to show that they have given all the "return" cases that came to their knowledge in these two years; in fact, in the return I sent, only those were given that occurred in 1894 and the early months of 1895, while the number of such cases in 1893 was, proportionately, quite as great. Similarly in the return from Chelsea, particulars are given of the "return" cases that occurred in that parish from February, 1894, to April, 1895, and none are given that occurred in 1893, though from a footnote in the report one gathers that they were more numerous in that year. Another remarkable feature of the Committee's report is that they have omitted to take into account any of the cases that occurred in Islington. The report states, with regard to this parish, that the Medical Officer of Health, having been previously in correspondence with the Managers and the Local Government Board on the subject, was not written to, and consequently the Committee actually assume that in this parish, which is the largest in London, having a population thrice that of Fulham, there were no "return" cases, whereas it was largely owing to the action of the Vestry of Islington, consequent on the number of cases that occurred in their parish, that this enquiry was instituted. It must be evident from the above that the proportion of "return" cases to discharges is really much higher than that given by the Committee.

As to the other conclusions of the Committee, I pointed out in my last annual report when dealing with the "return" cases of Scarlet Fever, that "in some instances it is quite possible that the infection was conveyed by some article of clothing which had been worn by the first patient at the commencement of the illness, put away without being disinfected and on his return again brought into use." For although the disinfectors are most careful to remove every article from the room occupied by the patient, and always enquires for anything that may have been removed from the room, it is clearly impossible to ensure the removal of every article that has been in contact with the patient.

There is, however, not the slightest evidence in proof of the suggestion of the Committee, that the disinfection of infected articles is inefficiently carried out in this parish. True, the disinfection is done by a Contractor, and although, as I have stated in a report to the Vestry, "it cannot be regarded as entirely satisfactory that the arrangements for disinfection should be in other hands than of those who are responsible for the prevention of disease, there can be no doubt but that the work is thoroughly well done, and the existing plan has the advantage that it is always equal to any demands made upon it, whatever the amount of work required to be done, be it great or small."

The portion of the Committee's report giving the Abstract of the Replies of the Medical Superintendents of the Board's Fever Hospitals to the enquiries of the Sub-Committee, as to what precautions are taken with the patients before the discharge, is eminently satisfactory, and it is evident that every precaution is taken by the Medical Superintendents to insure as far as possible that no patient shall be discharged until free from infection. But that a certain number of these "return" cases should occur seems to be unavoidable, for their occurrence in a certain proportion is universal wherever hospital isolation is practised.

As Dr. Caiger, the Medical Superintendent of the South Western Hospital, remarks: "We are unfortunately unable to sterilise a human being by passing him through a steam disinfector as one does his clothes, and I am firmly convinced that until infection can be demonstrated as a visible quantity, even with the exercise of the greatest care on the part of Hospital and Sanitary Officers alike, the so-called 'return' cases will from time to time arise."

#### DIPHtheria AND MEMBRANOUS CROUP.

368 cases of Diphtheria and 18 of Membranous Croup, which is identical with Laryngeal Diphtheria, were notified during the year, as against 96, 250 and 342 in the three preceding years.

The distribution of the cases was as under :—

	Population in 1891.	Cases.	Deaths.
Barons Court Ward	12,051	27	2
Hurlingham	3710	21	6
Lillie	16,096	66	8
Margravine	13,295	64	12
Munster	10,295	60	10
Sands End	11,740	94	20
Town	8,524	14	1
Walham	14,525	40	18
		—	—
		386	77
		—	—

284 of those suffering from the disease were removed to the Hospitals of the Metropolitan Asylums' Board, and 11 to other Hospitals, or in all, 74 per cent. of those notified. During the first six months of the year, when there was ample accommodation in the Hospitals of the Metropolitan Asylums' Board for all cases needing admission, 88 per cent. of those notified were removed.

*Mortality.*—The disease caused 77 deaths, giving a case mortality of 20 per cent., as compared with 26·1 per cent. in 1893, and 31·6 per cent. in 1894, so that looking at the figures as a whole the type of the disease would appear to have been milder than in the two previous years, but it is remarkable that the reduction in mortality has been entirely amongst the cases removed to Hospital, that of the cases treated at home being practically the same as in last year.

The figures for the preceding years were :—

		Cases notified as Diphtheria removed to Hospital.	Deaths.	Mortality.
1893 ...	...	119	37	31·0 per cent.
1894 ...	...	237	74	31·7 „
1895 ...	...	284	46	17·0 „
		Cases notified as Diphtheria treated at home.	Deaths.	Mortality.
1893 ...	...	131	28	21 per cent.
1894 ...	...	105	34	32·4 „
1895 ...	...	102	31	30·4 „

The difference in the relative fatality of "Hospital" cases and "Home" cases is still more strikingly shown in the following Table, which compares the fatality at different age-periods of the cases treated at home and of those treated in Hospital :—

Age.	Cases Removed to Hospital.			Cases treated at Home.		
	No. of Cases.	Deaths.	Mortality. per cent.	No. of Cases.	Deaths.	Mortality. per cent.
Under 1 year	3	1	33·3	1	1	100
1 to 2 years	21	6	28·6	7	3	42·8
2 " 3 "	17	4	23·5	8	5	62·5
3 " 4 "	40	12	30·0	14	8	57·1
4 " 5 "	33	7	21·2	8	4	50·0
5 " 10 "	110	14	13·6	28	8	28·6
10 " 15 "	25	1	4·0	6	1	16·6
15 " 25 "	15	1	6·6	9	—	—
25 " 35 "	13	—	—	15	1	6·6
35 " 45 "	6	—	—	4	—	—
45 " 55 "	1	—	—	1	—	—
55 " 65 "	—	—	—	1	—	—

It will, of course, be remembered that the above Tables give all the cases certified as Diphtheria, but that in a considerable proportion the diagnosis was erroneous; for instance, of the 198 patients who were admitted into the Western Hospital certified as suffering from Diphtheria, 30, or over 15 per cent., were found, after sojourn in Hospital, to be suffering from other diseases, viz. : 8 from Scarlet Fever, 18 from Tonsillitis, and 4 from other diseases ; but this, however, would certainly apply equally, if not to a greater extent, to the cases certified as Diphtheria that were treated

at home, as it is not an uncommon thing for removal to be refused on the day of notification on the ground that the child has recovered. The marked decline in the fatality of cases treated in the Hospitals, while that of the cases treated outside remain practically the same, naturally call attention to the treatment of Diphtheria by Anti-toxic Serum, which has been used in all cases of Diphtheria excepting those of a very mild type, that have been admitted into the Hospitals of the Metropolitan Asylums' Board during the year, while it was, I believe, used in only one case that remained at home. One cannot, of course, from the number of cases dealt with here, draw definite conclusions as to the value of the Anti-toxic Serum, but it is certainly most significant that there should have been this reduction in the mortality in the Hospitals when the only new factor in the treatment is the use of Anti-toxic Serum and judging from the mortality of those treated at home the type of the disease has remained the same.

Since the above was written, the Medical Superintendents of the Hospitals of the Asylums' Board have presented a report upon the use of Anti-toxic Serum in the treatment of Diphtheria.

The report is too lengthy to be dealt with fully here. A number of tables are given in the report showing the results obtained with the Serum, as compared with those of former years, and summarising the results observed, the Medical Superintendents state that :—

The improved results in the Diphtheria cases treated during the year 1895, which are indicated by the foregoing statistics and clinical observations, are :—

- (i.) A great reduction in the mortality of cases brought under treatment on the first and second day of illness.
- (ii.) The lowering of the combined general mortality to a point below that of any former year.
- (iii.) The still more remarkable reduction in the mortality of the laryngeal cases.
- (iv.) The uniform improvement in the results of tracheotomy at each separate Hospital.
- (v.) The beneficial effect produced on the clinical course of the disease.

A consideration of the foregoing statistical tables and clinical observations, covering a period of 12 months, and embracing a large number of cases, in our opinion sufficiently demonstrates the value of anti-toxin in the treatment of Diphtheria.

It must be clearly understood, however, that to obtain the largest measure of success with Anti-toxin it is essential that the patient be brought under its influence at a comparatively early date—if possible, not later than the second day of disease. From this time onwards the chance of a successful issue will diminish in proportion to the length of time which has elapsed before the treatment is commenced. This, though doubtless true of other methods, is of still greater moment in the case of treatment, by Anti-toxin.

Certain secondary effects not infrequently arise as a direct result of the injection of Anti-toxin in the form in which it has at present to be administered, and even assuming that the incidence of the normal complications of Diphtheria is greater than can be accounted for by the increased number of recoveries, we have no hesitation in expressing the opinion that these drawbacks are insignificant when taken in conjunction with the lessened fatality which has been associated with the use of this remedy.

We are further of opinion that in Anti-toxic Serum we possess a remedy of distinctly greater value in the treatment of Diphtheria than any other with which we are acquainted.

The fact that the treatment was successful in proportion as it was adopted at an early stage of the disease, is very clearly shown by the statistics given.

Of the 86 treated with Anti-toxin on the first day of the disease only 4, or 4·6 per cent., and of 403 treated on the second day, 60, or 14·8 succumbed, the rate rising to 35·7 per cent. in those treated after the fifth day ; while in 1894, of 133 admitted on the first day of the disease, 30 or 22·5 per cent. ; and of 539 admitted on the second day, 146, or 27 per cent., died, the rate rising to 31·6 per cent. in those admitted after the fourth day.

But the report of the Medical Superintendent of the Northern Hospital which is appended to the general report, is a still more striking illustration of the value of Anti-toxin, especially when used in the early stages of the disease. He states that of 119 cases of post-scarlatinal Diphtheria occurring in this hospital, 58 (being the severer cases) were treated with Anti-toxin, of which only four died.

The mortality in 1895, as compared with that of previous years, shown by the following Table, which gives the age incidence and mortality for the past six years :—

AGE.	1890-94.			1895.					
	Cases.	Deaths.	Mortality per cent.	All Cases.	Deaths.	Mortality per cent.	Anti-toxin Cases.	Deaths.	Mortality per cent.
Under 5	56	48	85.7	31	2	6.4	18	2	11.1
5 to 10	81	46	56.7	60	2	3.3	29	2	6.9
10 „ 15	22	7	31.8	22	0	0.0	9	0	0.0
Over 15	9	3	33.3	6	0	0.0	2	0	0.0
Total ...	168	104	61.9	119	4	3.3	58	4	6.8

There is no reason to suppose that there has been any change in the type of disease coincidently with the introduction of the Anti-toxin treatment. The cases of 1895 were in the irrearliest symptoms similar to those of previous years, and the fact that the local and constitutional conditions which were formerly so fatal have not supervened, may reasonably be ascribed to the new treatment employed.

This opinion is confirmed by the recovery of cases which, both from laryngeal obstruction and severity of constitutional symptoms, would in pre-anti-toxin days have been regarded as hopeless.

Dr. Hume also remarks :—

“ That the mortalities of the laryngeal cases in the last two years are in striking contrast ; in 1895, 7 out of 8 recovered, in 1894 of 9 cases, all died, and the only new factor in the treatment of post-scarlatinal Diphtheria at their Hospital is Anti-toxin. It is difficult to resist the conclusion that there must be some connection between the new method of treatment and the great reduction of mortality.”

## SCHOOL INFLUENCE.

The following Table gives the number of children attending the Board and other primary schools in Fulham, who were notified in each month as suffering from Diphtheria.

School.	Jan.	Feb.	Mar.	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total.

Two outbreaks, viz. : that in July, among the children attending Halford Board School, and that among children attending Hugon Road School in December, were apparently due to a child attending school when suffering from the disease in an unrecognised form.

#### PREVALENCE OF DIPHTHERIA IN FULHAM.

Diphtheria, though not so fatal as in 1894, was more prevalent in Fulham than in the Metropolis as a whole, the rate of incidence per 1,000 inhabitants being 3·4 as compared with 2·5 for London. The rate was also in excess of that of the neighbouring parishes, but it may be remarked that it was slightly below that of Chelsea, if the outlying portion of that parish, Kensal Town, be excluded, the rate for Chelsea Home District being 3·5. The death-rate from Diphtheria was for Fulham, 0·7, and for London, 0·5.

The following table gives the rate of incidence of Diphtheria in Fulham, London, and adjoining parishes for the past five years :—

		Rate per 1,000 Inhabitants				
		1891	1892	1893	1894	1895
Fulham	...	·71	1·03	2·21	3·15	3·4
London	...	1·42	1·85	3·02	2·44	2·45
Hammersmith		2·92	2·75	2·65	1·74	1·83
Chelsea	...	1·80	1·74	2·31	2·56	3·3
Kensington	...	1·11	1·04	2·14	1·61	2·18

#### ENTERIC OR TYPHOID FEVER.

Fifty-seven cases were notified, the numbers for the three preceding years being 41, 58 and 37, and the disease was the cause of 12 deaths, the case mortality being 21 per cent. In at least 12 cases the disease was contracted outside the parish.

The death-rate in Fulham from Enteric Fever was the same as that of London, viz. : 0·1 per 1,000.

#### CONTINUED FEVER.

Three cases were notified, one of which proved fatal.

## PUERPERAL FEVER.

Six cases were notified, of which four proved fatal, the deaths from septic poisoning after childbirth being in the proportion of 1·0 deaths to 1,000 births. Each of the six patients was attended by a different medical practitioner and nurse.

## ERYSIPELAS.

Ninety-four cases of this disease were notified, and it was the cause of six deaths, three being of children under one year of age.

## NON-NOTIFIABLE ZYMOTIC DISEASES.

## MEASLES.

This disease was the cause of 50 deaths, the average for the preceding 19 years, allowing for the increase of population, being 88.

The death-rate for Fulham was ·4, and for London ·6.

The question of the advisability of adding Measles to the list of notifiable diseases, I dealt with in my report for 1894.

## WHOOPIING COUGH.

Whooping Cough was the cause of 50 deaths, the average number for the preceding eight years being 57. Of these, 29 were children under one year of age, and 29 of children between one and five years. The death-rates for Fulham and London from this disease were 0·54 and 0·48 per 1,000 respectively. Although the case mortality of Whooping Cough is low, the disease kills more children than any Zymotic disease except Diarrhœa. Unfortunately, it is always looked upon as a very trivial ailment, and comparatively little care is taken of the sufferers, who usually succumb to one of the pulmonary complications of the disease induced by neglect.

## DIARRHŒA.

Under the heading Diarrhœa are included several different affections, confounded with one another on account of the presence of Diarrhœa as a symptom, but there is no doubt that Summer Diarrhœa, which is so fatal to young children, is essentially a specific disease.

133 deaths were ascribed to Diarrhœa, the average for the nine previous years, allowing for the increase of the population, being 107.

In addition to these deaths, the majority of the deaths of infants, 32 in number, ascribed to Gastro-Enteritis, or Gastro-Enteric Catarrh, were probably of the same nature.

The death-rate from the disease was 1·2, and for the whole of the Metropolis ·8.

In the 33 large towns the mortality caused by Diarrhœa was 1·2, and considerably exceeded the average rate, ·8, of the preceding 10 years. The lowest rates were ·48 in Huddersfield, ·52 in Plymouth, ·56 in Croydon and ·58 in Halifax; the highest rates were 2·1 in Burnley and Blackburn, 2·4 in Hull and 2·5 in Preston; the high mortality being mainly due to the hot summer.

With but four exceptions, all the infants who succumbed were hand-fed. Although the atmospheric heat by its depressing influence acts directly as a predisposing cause, it is mainly harmful indirectly by facilitating the putrefaction of the milk, and other artificial foods on which the infants are fed. The agency which in midsummer, in our crowded districts, causes fatal Diarrhœa among hand-fed children, does not reside in the animal milk *per se*, but must be sought solely in the alterations of the drawn milk, resulting from the access of atmospheric air more or less polluted with emanations from sewers and decaying refuse, and from the imperfect cleansing of the vessels in which the milk is kept, and of the bottles, tubes and mouthpieces through which it is administered.

Most of these conditions are dependent on the habits of the parents of the children; still, much can be done by the Sanitary Authority by a more frequent removal in summer of house and other refuse, and by the abolition of that fertile source of danger, the present system of sewer ventilation.

But in connection with the contamination of milk, the results of a bacteriological examination of samples of London milk by Mr. Sydney Rowland, recently published, are of the greatest interest. His investigations clearly show that milk is largely polluted before it reaches the consumer. Normal milk, as it exists in the udder of the healthy cow, is perfectly sterile, while the average number of organisms found in the samples examined was 500,000 per cubic centimetre (about 15 drops), but the most significant fact is that the organism found in the greatest abundance, constituting 90 per cent. of all the forms found, was that known as the *Bacillus Coli Communis*, which is unquestionably diagnostic of fœcal contamination, and finds its way into the milk from the unclean bodies of the cows and from the polluted air of the stables and stalls in which the milking is carried on.

Mr. Rowland remarks :—

“With regard to this extraordinary number of Bacteria, it is not difficult to imagine their source if, for a moment, one recalls the usual conditions of the cows in even the cleanest and most hygienically managed of our dairies. The stable or cowshed in which the milking is carried on is itself saturated with excremental matter; the very straw the animals stand upon is too often but an incubating ground for micro-organisms, for, warmed by fermentation and saturated with fœcal matter, it offers all the conditions of warmth and nutriment material for their best growth. The restlessness of the animals and the walking of the milkman disturb at each moment myriads of these micro-organisms, some of which, passing into the open air, find in the warm milk all the conditions for life and active multiplication.”

Since the determining influence of the *Bacillus Coli* in cases of Infantile Diarrhœa and other intestinal complaints has been clearly shown, its presence in milk, especially in milk used for infant feeding, cannot but be a grave source of danger. Numerous other organisms were also present, such as are found in putrefying organic matter of all descriptions, which show either direct contamination with putrefying matter, or exposure to an atmosphere containing particles of decomposing matter.

It is clear from this it is necessary, that in addition to a rigid supervision of the retailing shops, steps should be taken to enforce an improvement in the surroundings of the cows, and in the conditions under which milking is carried on, so as to secure, as far as possible, absolute cleanliness

both in the milking, and in the subsequent conveyance of the milk to, and its sojourn in, the shop of the retailer. Meanwhile the necessity for boiling milk, especially that intended for infants, cannot be too strongly urged, though that this should be essential constitutes a serious indictment of the methods under which the milk trade is carried on.

### INFLUENZA.

Sixty-six deaths were directly attributed to Influenza, the highest number recorded in any year. The outbreak of this disease in London arose with its characteristic suddenness about the middle of February, rapidly culminated, and then steadily subsided, as may be seen from the following Table, which gives the deaths in Fulham and in London during the weeks when it was prevalent :—

						Fulham.	London.
Week ending	Feb. 16	...	...			1	24
"	" " 23	...	...			6	111
"	" March 2	...	...			15	296
"	" " 9	...	...			17	473
"	" " 16	...	...			9	349
"	" " 23	...	...			4	225
"	" " 30	...	...			4	116
"	" April 6	...	...			1	63
"	" " 13	...	...			1	46
"	" " 20	...	...			1	32

The disease was proportionally somewhat more fatal in Fulham than in the rest of London, the death-rates being 0·6 for Fulham and 0·5 for the whole of London. The mortality among elderly people from the disease showed a marked excess, 18 of the deaths being of persons over 65 years of age. This corresponds to a death-rate of 5·0 per 1000 persons estimated to be living at that age, while the remaining 47 deaths occurring among persons under 65 years of age were equal to 0·4 per 1000 persons living at that age period. In other words among equal numbers living, to one death from Influenza among persons aged under 65, there were 13 deaths among persons aged upwards of 65.

Since the disease reached this country from the East, at the close of 1889, there have been in all six marked outbreaks in London, viz., (1) in the winter of 1889-1890; (2) in the spring and summer of 1891; (3) in the winter of 1891-1892; (4) in the spring of 1893; (5) in the winter of 1893-1894, and the present one. It would appear that the Influenzal germ or virus still persists in places where it was introduced, and that some local conditions serve from time to time to bring about its renewed activity and virulence. Last year the outbreak coincided with the prolonged and severe frost, but hitherto no concordance has been established between Influenza and any special climatic condition.

It is possible that the general insanitary state of the majority of the houses, owing to the accumulation of filth consequent on frozen soil pipes, waterless closets, and the difficulty of promptly removing the house refuse, owing to the barges not being able to leave the wharf, may have had some influence in promoting the spread of the disease.

#### SEPTIC DISEASES.

From Septic diseases, other than Erysipelas and Puerperal Fever, there were three deaths.

#### VENEREAL DISEASES.

Eighteen deaths were attributed to these diseases, of which 16 were due to Congenital Syphilis.

#### CLASS III.—DIETETIC DISEASES.

Nine deaths were stated to be directly due to alcoholic excess. Probably, if the recommendation of the Select Committee of the House of Commons for the improvement of death certificates and registration, "that medical practitioners should be required to send certificates of death to the Registrar, instead of handing them to the representatives of the deceased," were carried out, the number of deaths in this class would be materially increased.

## CLASS IV.—CONSTITUTIONAL DISEASES.

The number of deaths from diseases in this group were 365, being 16·6 per cent. of the total number of deaths. Of these, 153 were due to Phthisis and 93 to other tubercular diseases, as Tubercular Meningitis, Tabes Mesenterica and General Tuberculosis, these diseases thus accounting for 11 per cent. of all the deaths ; and it is probable that many of the deaths ascribed to Marasmus, Debility and Convulsions were also of a Tubercular nature.

Eighty-one deaths were registered from Cancer, 66 being of persons of 45 years and upwards.

Rheumatic Fever was responsible for seven deaths, and Chronic Rheumatism and Gout for six.

## CLASS V.—DEVELOPMENTAL DISEASES.

From diseases of this class 162 deaths were certified, 112 being of infants from premature birth, atelectasis, or non-inflation of lungs, and congenital malformation ; and 50 deaths were returned as due to "old age."

## CLASS VI.—LOCAL DISEASES.

The diseases of this group were responsible for 998 deaths, or 45·5 per cent. of the total number, the following being the principal classes :—

### 1.—DISEASES OF NERVOUS SYSTEM.

From these there were 193 deaths, 65 being from Apoplexy, etc., 29 from Insanity and General Paralysis of the Insane, and 38 from Convulsions.

### 2.—DISEASES OF THE CIRCULATORY SYSTEM.

Diseases of the Heart and Blood-vessels were accountable for 115 deaths.

### 3.—DISEASES OF RESPIRATORY SYSTEM.

From these diseases, Phthisis being excluded, there were 498 deaths, or 22 per cent. of the deaths from all causes.

Of these Pneumonia was responsible for 199, and Bronchitis for 281 deaths. The heavy mortality from these diseases during March and April, will be noticed in referring to Table.

#### 4.—DISEASES OF REPRODUCTIVE SYSTEM.

Eight deaths were registered in this class, four being due to diseases of parturition.

The total number of deaths recorded as occurring within 21 days of childbirth was 15, the causes assigned being the following :—

Septic Diseases	...	...	...	...	4
Flooding and other Accidents of Childbirth					3
Pneumonia and Bronchitis			...	...	3
Scarlet Fever	...	...	...	...	1
Influenza	...	...	...	...	2
Cerebral Hæmorrhage		...	...	...	1
Peritonitis (Non-septic)	...	...	...		1
					—
					15

Or one death to 262 births.

From the other classes of local diseases there were 184 deaths.

#### CLASS VII.—DEATHS FROM VIOLENCE.

Different forms of violence caused 82 deaths.

##### ACCIDENT OR NEGLIGENCE.

Fractures and Contusions	...	...	...	30
Burns	...	...	...	8
Drowning	...	...	...	5

## SUICIDE.

Cut, Stab	...	...	...	...	2
Gunshot Wounds	...	...	...	...	2
Drowning	...	...	...	...	1
Poison	...	...	...	...	2
Hanging	...	...	...	...	3
Otherwise	...	...	...	...	1

## HOMICIDE.

Murder	...	...	...	...	1
Manslaughter	...	...	...	...	1

— 82

The death-rate from violence was 0·74, as against 0·71 for London.

### CLASS VIII.—ILL-DEFINED AND NOT SPECIFIED CAUSES.

Under this heading there were 139 deaths, the great majority, viz., 125, being certified as due to Debility, Inanition, or Marasmus.

### CERTIFICATION OF THE CAUSES OF DEATH.

Of the 2195 deaths registered, 1989, or 90·6 per cent., were duly certified by registered medical practitioners, and 196, or 8·9 per cent., by the Coroner after inquest, while the causes of 10, or 0·5 per cent., were uncertified.

### INQUESTS.

Of the 196 inquests held on parishioners, 167 were held in the parish, and 29 at institutions outside.

The subjects were, males, 108; females, 88; and their ages—

Under 5	...	...	...	...	89
5 to 60	...	...	...	...	76
Over 60	...	...	...	...	31

114 deaths were due to natural causes and 82 to violence.

Those due to natural causes may be classified as follows:—

Zymotic Diseases	...	...	...	...	12
Tubercular	...	...	...	...	4
Diseases of Respiratory Organs	...	...	...	...	29
Diseases of Circulatory System	...	...	...	...	24
Convulsions and other Diseases of the Nervous System	...	...	...	...	17
Alcoholism	...	...	...	...	4
Improper or Insufficient Food	...	...	...	...	3
Other Diseases	...	...	...	...	19
Cause not ascertained	...	...	...	...	2

---

114

The deaths due to violence have already been classified.

### UNCERTIFIED DEATHS.

Six of these were of prematurely born infants who only lived a few hours ; of the others three were ascribed to heart disease, and one to pneumonia.

The proportion of uncertified deaths was, in London, 0·9 per cent., and in England and Wales 2·5 per cent.

### DEATHS IN PUBLIC INSTITUTIONS.

#### FULHAM UNION INFIRMARY AND WORKHOUSE.

This institution situated in Fulham serves for the two Parishes of Fulham and Hammersmith. 417 deaths occurred in the Infirmary and 10 in the Workhouse ; of these 240 were of parishioners of Fulham, and 187 of persons belonging to Hammersmith. Their ages and causes of death will be found in Table A.

#### WESTERN FEVER HOSPITAL.

215 deaths occurred at the Western Fever Hospital. Of these 51 were of parishioners, and 164 of persons belonging to other districts. Their ages and causes of death will be found in Table A.

Of the 2195 deaths registered, 504, or 22·9 per cent., took place in public institutions, the proportion in London being 26·8 per cent.

The percentages in the several classes of institutions were as under :—

	Fulham.	London.
In Workhouses and Workhouse		
Infirmaries ... ..	11·1	13·5 per cent.
In Metropolitan Asylum Hospitals	3·1	1·9
In other Hospitals...	7·0	9·4
In public Lunatic and Imbecile		
Asylums ... ..	1·7	2·0

#### DEATHS OCCURRING OUTSIDE THE DISTRICT AMONG PERSONS BELONGING THERETO.

The deaths of parishioners at public institutions and other places outside the parish numbered 218, and occurred in the following institutions :—

St. George's Hospital	...	...	52
West London	"	...	33
Middlesex	"	...	1
Charing Cross	"	...	4
King's College	"	...	3

### VACCINATION.

The following Tables, furnished by Mr. Collins, the Vaccination Officer, gave the Vaccination returns for 1894, and for the first six months of 1895, those for the last six months not being yet complete :—

#### SUPPLEMENTAL RETURN FOR 1894 FOR THE PARISH OF FULHAM.

No. of Births Registered from 1st Jan., 1893, to 31st Dec, 1893.	Successfully Vaccinated.	Insusceptible of Vaccination.	Had Small Pox.	Dead.	Postponed by Medical Certificate.	Removed.	Outstanding.
3792	3068	22	—	333	46	310	13

# RETURN OF VACCINATION FOR THE PERIOD FROM JANUARY TO JUNE, 1895, PARISH OF FULHAM.

No. of Births Registered from 1st Jan., to 30th June, 1894.	Successfully Vaccinated.	Insusceptible of Vaccination.	Had Small Pox.	Dead.	Postponed by Medical Certificate.	Removed.	Outstanding.
1966	1539	9	—	220	69	122	7

The return for 1894 is more satisfactory than that for 1893, only 8 per cent. of the children remaining unaccounted for, as against 10 per cent. in 1894, but in no other year has the number been more than 7 per cent. The Royal Commission on Vaccination, which has been sitting for nearly 7 years, has not yet issued its report, but there is every probability that it will be forthcoming this year.

## DISINFECTION.

Infected articles were disinfected by the contractor, Mr. Lacy, Townmead Wharf, by whom the articles were also collected. Mr. Lacy's disinfecting plant is of the most approved pattern, and has proved fully equal to all demands made upon it. The infected articles were always promptly removed, and the work most efficiently done. The weight of the articles disinfected was 1022 cwt., and the amount paid by the Vestry to Mr. Lacy £638.

Although, as I have stated, there can be no question that the disinfection is thoroughly and efficiently done by the contractor, it cannot be regarded as entirely satisfactory that the arrangements for disinfection should be in other hands than of those who are responsible for the prevention of disease, and as the Vestry have now under consideration a scheme for the destruction of refuse, it will be advisable, should this be carried out, for disinfecting plant to be provided on the same site, as doubtless if this were done considerable economy would result both in the initial cost and the subsequent working.

## SHELTER.

No shelter has yet been provided by the Vestry for the use of persons during the period necessary for the disinfection of their dwellings, and I would advise the Vestry to take this matter into consideration when dealing with the scheme for a Dust Destructor and Disinfecting Station, as the necessary rooms could easily be provided in connection with the latter.

## WATER SUPPLY.

Reference was made in the report for 1894 to complaints of insufficient pressure in the West Middlesex Company's main, supplying the Queen's Club Gardens' Estate, and the Company have since then laid down an additional main, which has materially improved the service in that district.

In common with the rest of London great discomfort was experienced by a large number of householders owing to the failure of the water supply consequent on the severe frost. There can be no doubt that many would not have found themselves without water if they had taken a few common-sense precautions, as it was not uncommon to find one or two houses in a street where a little trouble had been taken, supplied with water, while their neighbours, living under precisely similar conditions, were frozen out. There is, unfortunately, a great tendency for householders to do little or nothing for themselves, and then when anything goes wrong to abuse either the Local Authority or a Company, as the case may be.

In many instances, however, the failure of the supply was due to the freezing of the communication pipes and the mains of the Company, owing to their having been laid at an insufficient depth.

By the Regulations made by the Companies and approved by the Board of Trade as directed by the Water Act of 1871, Sec. 17 to 25, it is ordered (Regulation 10) that "every pipe hereafter laid for the conveyance of or in connection with water supplied by the Company shall when laid in open

ground be laid *at least 2 feet 6 inches below the surface*, and shall in every exposed situation be properly protected against the frost."

This clause, it will be noticed, deals with the communication pipes, but it is obvious that if the service pipes should be laid at a depth of 30 inches, the mains also laid since 1872 should not have been laid at a less depth; but this is not the case, as some have been found to be at a depth varying from 15 to 28 inches, and there can be no doubt that if the regulations had been duly carried out many householders would have been spared great inconvenience. Careful temperatures taken by Mr. Sowerby, at the Botanical Gardens, show that the frost in that locality did not penetrate to quite 2 feet in the ground, so that although, of course, the nature of the soil in other places would cause a difference in the penetration of cold, probably if all main pipes had been laid at a depth not less than 30 inches, few would have been frozen.

It was stated by the President of the Local Government Board in the House of Commons, "that on the assumption that the failure of the supply was due to the fact that the water had been frozen in the Companies' mains, and that that had been due to the pipes being laid at an insufficient depth, the Legislature appeared to have provided a course which might be adopted by those affected. The Metropolitan Water Act enacted that if at any time complaint as to the quantity or quality of the water supplied by a Company in London was made to the Local Government Board by memorial in writing signed by not less than 20 inhabitant householders, paying rents, and supplied with water by a Company, it should be lawful for the Board within two months after the receipt of the report of such complaint to appoint some competent person to inquire into the ground of such complaint and report to the Board. The Act also provided that if after the receipt of such report it should appear that the complaint was well-founded the Board should give notice in writing to the Company and that after the receipt of such notice the Company should be required to remove, within a reasonable time, the ground of such complaint. He was advised that the provisions of the Act which

exempted the Water Companies from penalties where the failure of the supply of water was due to frost, would not affect the provisions he had referred to. If, therefore, complaint was made to him by 20 householders in any district in London he would be prepared to entertain it, subject to the opinion of Law Officers."

The Vestry had under their consideration the question of petitioning the Local Government Board to hold an inquiry into the cause of the failure of the supply, but were unable to obtain sufficient evidence to justify them in taking this course.

Numerous complaints were received of the inadequate supply of stand-pipes provided by the Companies for the use of consumers whose supply had failed owing to the frost, and also of the insufficient time that the stand-pipes were available for use, and letters were written to the Companies asking them to arrange for as many stand-pipes as possible, to be available the whole day, as the hardship to the rate-payers generally, and especially to the poor, who had not sufficient receptacles for storing the water, was very great. The Companies expressed their wish to do everything in their power to lessen the inconvenience, and appear to have extended the time that the stand-pipes were available, and also supplemented them by the use of water-carts which they hired from the Vestry.

### QUALITY OF THE WATER.

A sample of water taken from the main of the West Middlesex Company in January was pronounced by the Public Analyst, Mr. Clayton, "to be of inferior quality, and the evidence of organic contamination to be too distinct to allow him to view the sample as desirable for dietetic use." With this exception the other samples taken were found to be suitable for drinking purposes.

### WATER CUT OFF BY THE WATER COMPANIES.

During the year notices under Sec. 49 of the Public Health Act were given by the Companies in respect of 740

occupied houses from which the water had been cut off in a large proportion the supply having been cut off on account of burst pipes during the long frost.

I have again to report that the Vestry have persisted in refusing to carry out the provisions of the Public Health Act, in respect of houses without a proper supply of water.

### SEWER VENTILATION.

Constant complaints have as usual been received of the offensive smells arising from the manholes and surface ventilators, and a Committee has been appointed by the Vestry to enquire into the best method of ventilating the sewers, and is dealing exhaustively with the question, so that I hope that means may be devised to remedy the present admitted nuisance.

Several shafts have been erected in various parts of the parish, with apparently satisfactory results, and extended use has been made of Syke's intercepting trap, to which I alluded in my last report, in some of the new streets near Wandsworth Bridge Road.

### HOUSE REFUSE.

A weekly visit is made to all premises for the collection of house refuse, and the service has been fairly satisfactory, but it would be better if it could be arranged that each street should be visited on a specified day, which is not at present done. The Assistant Medical Officer of Health to the London County Council, in his report on the Sanitary condition and administration of the Parish of Fulham, remarks, with regard to the collection of refuse, that the "result generally seems to be satisfactory, and during my inspection I seldom noticed any accumulation of house refuse."

The Vestry have now under their consideration a scheme for the erection of a "Dust Destructor," which if carried out will in my opinion be of distinct advantage to the parish.

## PUBLIC MORTUARY.

173 bodies were removed to the Mortuary during the year and were admitted as follows :—

At the request of the Coroner	...	...	145
Brought in by the Police	...	...	19
At the request of the Medical Officer of Health	...	...	9
			<hr/>
			173

Eight of the last being cases of infectious disease.

Inquests were held on 164, and post-mortem examinations were made in 85 of the above cases.

## BAKEHOUSES.

There are 77 bakehouses in Fulham, which have been regularly inspected during the year and have generally been found in a fairly satisfactory condition. Intimations were served in respect of eight bakehouses, and in one instance the owner was prosecuted on account of the dirty condition of the bakehouse, but as the nuisance had been remedied before the hearing of the summons, only a nominal penalty was inflicted.

## UNDERGROUND BAKEHOUSES.

Allusion was made in last year's report to the fact that in new districts underground bakehouses are still being erected, and that legislation was needed to provide that no newly erected bakehouse should be permitted to be underground.

The Factory and Workshop Act, 1895, which came into operation at the beginning of this year, provides for this, as Section 27 (3) enacts that "a place underground shall not be used as a bakehouse unless it is so used at the commencement

of this Act, and if any place is so used in contravention of this Act it shall be deemed to be a workshop not kept in conformity with the Act of 1878."

### SLAUGHTER-HOUSES.

The licences of the undermentioned slaughter-houses were renewed in October last by the County Council, no objection to the renewal being raised by the Vestry. They are but little used, the parish being mainly supplied by the dead meat trade, and have always been found well kept.

Situation.		Licensee.
62, Melmoth Place	...	T. H. Belcher.
603, King's Road	...	H. S. Jones.
611, Fulham Road...	...	J. Cragg.
88 and 90, High Street	...	E. and G. Kingston.
640, King's Road	...	H. E. Shalders.
105, Hammersmith Road...		H. Boughton.

### COW-HOUSES.

The licences of the following Cow-houses were renewed by the County Council in October, the renewal of the licences being unopposed.

Situation.	Licensee.	Average No. of Cows kept.
36, Burlington Road ...	E. Evans ...	5
2, Haldane Road ...	W. Pettitt ...	15
42, Waterford Road ...	Willison & Co.	4
28, Vanston Place ...	R. Turvey ...	5

### COMMON LODGING HOUSES.

The following are the registered Common Lodging Houses in Fulham.

Situation.	Authorised No. of Lodgers.
541, King's Road ...	51
16, Stamford Road ...	15
38, Stamford Road ...	20

Two of these can hardly be considered Common Lodging Houses as they do not take in casual lodgers, but only receive men employed at certain nursery gardens in the neighbourhood, who are boarded as well as lodged, and generally remain for lengthy periods.

## BY-LAWS UNDER PUBLIC HEALTH (LONDON) ACT, 1891.

The By-laws made by the Vestry under Section 94, in respect of houses let in lodgings or occupied by members of more than one family, were amended by the Vestry, the limits of exemption, viz., 3s. 6d. a week for unfurnished rooms, and 5s. for furnished rooms, being raised to 6s. and 7s. 6d. respectively.

The amended By-laws were allowed by the Local Government Board in November, and steps are now being taken to register houses under them.

## UNDERGROUND ROOMS.

25 notices in respect of underground rooms not complying with the provisions of the Public Health (London) Act, and found to be separately occupied, were served, and in one instance, the notice not having been complied with, proceedings were taken against the owner and the occupier.

## OVERCROWDING.

15 houses were certified as being overcrowded, and notices to abate the overcrowding were served on the persons responsible for it, and in one instance, the notice not having been complied with, proceedings were taken and an abatement order made.

## CERTIFICATES UNDER CUSTOMS AND INLAND REVENUE ACTS, 1890 and 1891.

Certificates for exemption from Inhabited House Duty in respect of 35 houses were refused.

## ENQUIRY BY THE LONDON COUNTY COUNCIL AS TO THE SANITARY CONDITION AND ADMINISTRATION OF FULHAM.

The Assistant Medical Officer to the London County Council, Dr. Young, made an enquiry on behalf of the Council, during the year, as to the sanitary condition and administration of Fulham. Dr. Young's report will be found in the appendix to this report.

### COMBINED DRAINAGE.

A conference of Metropolitan Vestries and District Boards, convened by the Holborn District Board of Works, met on four occasions at the Holborn Town Hall. The Bill to amend the Metropolis Management Acts with respect to drains and sewers, prepared by the London County Council was considered and some alterations suggested.

The chief clauses of the Bill altered, was suggested by the conference, are the following :—

- I. In the construction of the Metropolis Management Act, 1855, and the Acts amending the same, the word "drain" shall be deemed to apply to, and include the subject matters specified in the 250th section of the Metropolis Management Act, 1855, and in the 112th section of the Metropolis Management Act, 1862, and also any drain, whether constructed before the first of January, 1856, or subsequently, which has not been approved as a sewer by the Metropolitan Commissioners of Sewers, or under Section 69 of the Metropolis Management Act, 1855, and Section 45 of the Metropolis Management Amendment Act, 1862, or under Sections 47 and 48 of the latter Act.
- II. Any Local Authority may recover any expenses incurred by them in clearing, repairing, or replacing any drain, for draining any group or block of houses, from the owner or owners of any premises for the drainage of which such drain is or

may be used, in such proportions, if there be more than one such owner, as may be settled by the Surveyor of the Local Authority, or in case of dispute, by the London County Council.

Any such expenses may be recovered summarily in the same manner as the expenses of making and paving new streets are authorised to be recovered under the Metropolis Management Acts.

There is, however, but little chance of the Bill becoming law during the coming session, and meanwhile the Vestry will have to face considerable expenditure in re-laying defective combined drains, as there is a large number of houses in Fulham which are drained by a combined operation, without such combination having been ordered by the Vestry; consequently these drains are sewers within the meaning of the Metropolis Management Acts, and repairable by the Vestry.

# HOUSING OF THE WORKING CLASSES ACT, 1890.

The following houses were represented to the Sanitary Authority under the Act as being in a state so injurious or dangerous to health as to be unfit for human habitation:—

Description of Premises.	Number of Dwellings	Action Taken.	Subsequent Action.
1 to 15, St. George's sq.	15	Repaired by Owner	
1, 2 and 3, Factory lane	3	" "	
15, 16, 17 and 18, Caroline place	4	" "	
68, High street	1	Closed by Magistrate's order	Repaired and Re-opened
3b, 4b and 5b, Bagleys lane	3	Repaired by Owner	
1 to 7, Garden row	7	Closed by Magistrate's order	Demolished
14, Greyhound road	1	Repaired by Owner	
32, Greyhound road	1	" "	
53, Hammersmith road	1	Closed by Owner	Demolished
63, Hammersmith road	1	" "	"
1, Distillery lane	1	Repaired by Owner	

Description of Premises.	Number of Dwellings	Action Taken	Subsequent Action.
2 to 6, Distillery lane	6	Closed by Magistrate's order with penalty of £1 in each case	Demolished
7, Distillery lane	1	Closed by Magistrate's order with penalty of £1	
58, Star road	1	Repaired by Owner

## DEMOLITION OF HOUSES UNDER THE HOUSING OF THE WORKING CLASSES ACT.

In June I represented to the Vestry, that in my opinion, the continuance of Nos. 3, 4, 5, 6, 7, 8, 9 and 10, Caroline Place, which had been closed under the Housing of the Working Classes Act, since 1891, was dangerous or injurious to the health of the public or of the inhabitants of the neighbouring dwelling-houses.

The Vestry having resolved that it was expedient to order the demolition of these houses, notice of the resolution was served on the owners.

Mr. R. Furber attended before the Vestry on behalf of the owners of the houses, who were mortgagees in possession, and stated that the property was now the subject of litigation in Chancery, owing to the bankruptcy of the former owner, and contended that there was a technical objection to the notice served by the Vestry, but that he was willing, on behalf of his clients, to give an undertaking in writing to at once Board up the property and pull down the dangerous portions of the buildings to the satisfaction of the Surveyor, if the Vestry would allow the question of demolition to stand over until the legal negotiations were concluded, and the request was acceded to by the Vestry.

The following Table gives a summary of the action taken under the Housing of the Working Classes Act, in the last three years.

Total number of Houses represented by the Medical Officer of Health as unfit for habitation.	Number of Houses closed, demolished or improved without Magisterial intervention.				Number of Houses for which Closing Orders were granted.			
	Closed.	Demolished.	Improved	Total.	Subsequently demolished.	Subsequently improved and re-opened.	Still closed	Total.
175	9	10	73	92	11	64	8	83

## SUPERVISION OF NEW PROPERTY.

In my last annual report I remarked that "the attention of the Vestry has more than once been called to the necessity for more supervision being exercised over new property. At present the drains of new houses are always very carefully tested, but frequently, owing to the time of the Drainage Inspector being fully occupied, no inspection is made of the sanitary fittings, which subsequently are sometimes found not to have been constructed in accordance with the By-laws; and as the houses have generally changed hands, the new owner naturally feels aggrieved when called upon to make certain alterations, having purchased the house on the understanding that all the sanitary arrangements had been approved by the Local Authority. In some instances even houses have been found to be occupied in such an unfinished condition as to be quite unfit for human habitation. "No newly-erected house should be permitted to be occupied until not merely the drains, but all the sanitary appliances have been inspected and approved, and the Vestry should at once increase their staff, so that this may be carried out."

The cases of "The Vestry *v.* Lowman," in the list of prosecutions under the Public Health Act, serve to illustrate these remarks, since those houses were let and occupied when quite unfit for habitation, as the drains were left open just beneath the windows, the water was not laid on, water-fittings were not provided, the yards were unpaved and undrained, in fact they were in a generally unfinished condition. The Vestry have since appointed an additional Drainage Inspector, whose duties are entirely connected with the supervision of the drainage and sanitary appliances of *new* houses, but what is really wanted to strengthen the hands of the Sanitary Authority, and to enable them to exercise proper control over new houses, is, that the County Council should have power to make a By-law: "That a person shall not let or occupy any new dwelling-house until such dwelling-house shall, after examination, have been certified by an officer of the Sanitary Authority

authorised to give such certificate, to be, in his opinion, in every respect fit for human habitation." This By-law has been adopted in several provincial towns, and has been confirmed by the Local Government Board.

I brought this matter under the notice of the County Council, but have been informed that the Council appear to have no power to make a By-law of the nature referred to, but that the question of applying to Parliament for such power is under consideration.

### SALE OF FOOD AND DRUGS ACTS.

The following samples were taken for analysis during the year :—

			Samples.	Adulterated.
Milk	...	...	95	10
Cocoa	...	...	4	1
Sugar	...	...	6	—
Mustard	...	...	1	—
Pepper	...	...	2	—
Butter	...	...	17	3
Lard	...	...	2	—
Coffee	...	...	6	1
Whisky	...	...	1	—
Vinegar	...	...	2	—
			—	—
			136	15

Of the 95 samples of milk taken 10, or 10·5 per cent., were found to be adulterated, and were pronounced to be of inferior quality.

In 1893, 20 per cent., and in 1894, 21·7 per cent. of the samples of milk taken were found to be adulterated.

One sample was taken for every 814 of the population as compared with one for every 492 persons in London in 1894.

It will again be noticed that the favourite form of sophistication was that of abstraction of fat, or in other words, that of selling skim milk as pure new milk.

## PROCEEDINGS UNDER SALE OF FOOD AND DRUGS ACT.

Defendant.	Offence.	Result.
Elizabeth Lyons, 361, New Kings rd.	Butter adulterated with 56 per cent. of foreign fat	Ordered to pay costs, 12s. 6d.
Herbert Adderley, 355, New Kings rd.	Butter adulterated with 70 per cent. of foreign fat	Fined £2 and 12s. 6d. costs
G. Nicholls, 301, New Kings rd.	Margarine exposed for sale without being properly labelled	Withdrawn by the Vestry on payment of costs, 12s. 6d.
Ditto.	Ditto.	Ditto.
H. Bagge, 5, Sandilands rd.	Selling milk with 50 per cent. of fat abstracted	Fined 5s. and 12s. 6d. costs
J. Grigg, 6, Rainham rd., Edmonton	Selling milk with 25 per cent. of fat abstracted	Defendant absconded
Spiers & Pond, Ltd. Earl's Court Exhibition	Selling milk adulterated with 16 per cent. of added water	Fined 20s. and 33s. costs
E. Clark, The Amalgamated Direct Supply Co.	Selling milk with 48 per cent. of fat abstracted	Fined £3 and 12s. 6d. costs
E. Clark	Selling milk with 39 per cent. of fat abstracted	Fined £5 and 12s. 6d. costs

Defendant.	Offence.	Result.
A. Warren, employed by M. A. Turland, 470, Fulham rd.	Selling milk with 54 per cent. of fat abstracted	Fined 30s. and 12s. 6d costs
E. Jarvis, 21, Rosaline rd.	Selling milk adulterated with 14 per cent. of added water	Fined 7s. 6d. and 12s. 6d costs
A. Warren, 4, Victoria rd.	Selling milk deprived of 95 per cent. of fat	Fined £5 and 12s. 6d. costs
W. Morris, 499, Fulham rd.	Selling coffee adulter- ated with 14 per. cent. of chicory	Fined 20s. and 12s. 6d. costs
H. Sharp, 306, Lillie rd.	Selling milk adulterated with 23 per cent. of added water	Fined 20s. and 12s. 6d. costs
W. Field	Selling milk deprived of 62 per cent. of its natural fat	Fined £2 and 11s. 6d. costs

# PROSECUTIONS UNDER THE PUBLIC HEALTH (LONDON) ACT, 1891.

Prosecutions under the Public Health (London) Act, 1891, were instituted by the Vestry in the following cases:—

Defendant.	Offence.	Result.
Owner, 31, Mulgrave road	Insanitary condition of house	Order 14 days, 3s. costs
Owner, 89, Greyhound road	Failure to comply with order of Vestry	Dismissed
Owner, 38, Yeldham road	Failure to comply with order of Vestry	Order 2s. costs
Owner, 188, Lillie rd.	Failure to comply with order of Vestry	Order 2s. costs
Mary Tombs, 1 and 2, Denham cottages	Wilfully exposing a person suffering from a dangerous infectious disease	Fined £2 and 38s. costs
Owner of vacant land in Yeldham road	Nuisance on land	Order to abate, 6s. costs
Owner, 48, Lillie road	Insanitary condition of premises	Order work to be done in 28 days, 6s. costs
Owner, 30M, Langford road	Failing to comply with notice of the Vestry	Dismissed, £3 3s. costs against the Vestry
London Road Car Company, Limited	Failing to comply with notice of the Vestry to remove manure not less frequently than every 48 hours, from their stables in Star road, Normand road and North end road. Three summonses.	Fined £1 10s. and 2s. costs in each case
E. Grey, 12, Campbell street	Overcrowding	Order to abate forthwith, 3s. costs

Defendant.	Offence.	Result.
L. Mason, 12, Campbell street	Overcrowding	Order to abate fort with, 3s. costs
E. Lowman	Newly erecting 4 houses, 55, 57, 59 and 61, Claxton Grove, without a sufficient ashpit and water-closet furnished with proper water supply. Four summonses.	Fined £2 and 2s. costs in each case
"	Permitting 55, 57, 59 and 61, Claxton Grove, to be occupied without having obtained a certificate that the houses have proper and sufficient water supply. Four summonses.	Fined 10s. and 2s. costs in each case
Owner, 8 and 10, Campbell street	Drains in a state of nuisance.	Order work to be done, £2 2s. costs
Owner, 56, Yeldham road	Insanitary premises	Dismissed
Owner, 8, Claybrook road	Failing to comply with Vestry's notice to relay drain	Order 14 days, £1 1s. costs
Owner	Insanitary premises	Order 14 days, 6s. costs
Owner, 16B, Langford road	Premises in a state of nuisance	Order work to be done in 14 days, 2s. costs
Owner, 8, Jarvis road	Failing to comply with Vestry's notice to abate nuisance.	Order work to be done in 7 days, 6s. costs
Owner, 83, Yeldham road	Insanitary premises	Order 14 days, 5s. costs
Owner, 112, Bayonne road	Ditto	Ditto

Defendant.	Offence.	Result.
Owner, 52, Darlan rd.	Permitting premises to be occupied without having obtained a certificate as to water supply	Fined 20s. and 2s. costs.
Owner, 54, 56, 58, 60 and 62, Darlan rd.	Ditto	Fined 10s. and 2s. costs in respect of each house
Owner, 19 & 21, Star road	Ditto	Ditto
Owner, 2 houses in Field road	Ditto	Ditto
Owner, 3 & 5, Salisbury parade	Ditto	Ditto
Owner, 4, Salisbury parade	Ditto	Fined 40s. and 2s. costs
H. & E. Lea	Not ventilating trap of w.c. according to By-laws	Fined 10s. and 2s. costs
H. & E. Lea	Erecting premises without proper ashpit	Ditto
N. Eddington	Removing offensive refuse during prohibited hours	Ditto
N. Eddington	Removing offensive refuse in improperly constructed carriage	Ditto
Messrs. Gower & Smyth	Illegal occupation of underground rooms	Withdrawn on payment of costs and in undertaking to cease to occupy rooms within 21 days
P. Rhodes	Ditto	Ditto
Owner, 8, Jervis road	Non-compliance with Magistrate's order to abate nuisance	Fined £1 and £5 5s. costs

Defendant.	Offence.	Result.
Owner, 83, Yeldham road	Failing to comply with Magistrate's order to abate nuisance	Fined £10 and 2s. costs
Owner, 26, Grove avenue	Insanitary premises	Order to abate nuisance within 14 days, 3s. costs
Owner, 36, Grove avenue	Ditto	Ditto
Owner, 107, Sherbrooke road	Ditto	Ditto
Owner, 109, Sherbrooke road	Ditto	Ditto
The London Road Car Company	Failing to comply with the notice of the Vestry to remove the manure from their stables in Farm lane, once in every 48 hours	Fined £3
Owner	Nuisance on vacant land corner of Jervis and Lillie roads	Withdrawn. Ownership disputed
H. Bagge, 5, Sandilands road	Obstructing Inspector Grigg in the execution of his duty	Bound over in £20 to keep the peace for 12 months
Owner, 8, Foskett road	Failing to comply with the Vestry's notice to relay drains.	Fined £10 and 2s. costs
Owner, 6, Foskett rd.	Ditto	Ditto
Owner, 4, Foskett rd.	Ditto	Ditto
Owner, 3, 11, 17, 21, 23, 25, 31 & 33, Harwood road	Failing to comply with Vestry's notice <i>re</i> drainage	Withdrawn on payment of costs 14s. Work done
Messrs. Boyton & Pegram	Failing to comply with L.C.C. by-laws at 27, Charleville road	Withdrawn on payment of costs 24s. Work altered in accordance with by-laws
Owner, 52, Lillie road	Insanitary premises	Order work to be done in 28 days, 6s. costs

One of the cases in the above list, that of the Vestry of St. Solomon, requires special mention, as the Vestry appealed against the decision of the Magistrate.

The respondent was served with a notice under Section 41 (2) of the Public Health Act, requiring him to make certain alterations in a water-closet on premises of which he was the owner. By Section 41 (3) "any person who thinks himself aggrieved by any notice or act of a Sanitary Authority under that Section in relation to any water-closet, may appeal to the County Council, whose decision shall be final."

The work not having been done complaint was made to the Magistrate by the Vestry, who contended that he had no jurisdiction to enquire into the validity of the notice, but that as the notice had been duly served, the work had not been done, and the owner had not appealed to the County Council, he was compelled to convict and fine the respondent by the provisions of Section 41 (2).

The Magistrate decided that he had jurisdiction to enquire into the validity of the notice; and that the By-laws in the notice not being in accordance with the By-laws of the County Council, were void under Section 39 of the Public Health Act, and dismissed the summons with costs.

Against this decision the Vestry appealed, contending first that the Magistrate had no jurisdiction to enquire into the validity of the notice—"Vestry of St. James, Clerkenwell, *v.* Fearey, 24 Q. B. D. 703"—and secondly, that even if the Magistrate had that power the notice was good, having been made under Section 41 (2), and not under the By-laws of the County Council, which had no application to the case of this kind.

The Court dismissed the appeal, holding that the Magistrate was right in deciding that the notice given by the Vestry was void under Section 39 of the Public Health Act, as not being in accordance with the By-laws made under that Section.

It will be noticed that, with one exception, all the By-laws made by the County Council with respect to water-closets under Section 39 of the Public Health Act,

refer only to those constructed after the date of the confirmation of the By-laws, June 28th, 1893, and that the only By-law applying to closets constructed before that date is By-law 27: "The owner of any premises shall maintain in proper condition of repair every water-closet, and the proper accessories thereof belonging to such premises"; consequently as by Section 39 (3) any directions given by the Sanitary Authority "under this Act," must be in accordance with the By-laws, and so far as they are not so in accordance are void, any notice of the Sanitary Authority specifying structural alterations to closets in old houses is bad. For instance, the Sanitary Authority has no power to serve a notice requiring a "foul container closet" to be removed, but can only require it to be maintained in proper condition of repair.

#### EXPOSURE OF A PERSON SUFFERING FROM INFECTIOUS DISEASES.

On January 3rd a notification was received that a child at 71, Fulham Palace Road, was suffering from Scarlatina, and on enquiries being made it was ascertained that the child, who had been staying with relatives, had been taken by train to Egham by her mother on that day, after she had been pronounced by the medical practitioner to be suffering from Scarlatina. The case was subsequently notified by a local practitioner to the Medical Officer of Health for Egham, who had been informed of the circumstance of the case. The Vestry, considering that gross and wilful recklessness whereby the health of many must necessarily have been endangered had been shown by the mother, whose only excuse was that *she* did not think the child had Scarlatina, instituted proceedings against her under the Public Health Act, and a penalty of £2 with 38s. cost was imposed at the West London Police Court.

#### GENERAL SANITARY WORK.

The following Table gives a record of the work done during the year by your Sanitary Officials. It is unnecessary to notice in detail the various improvements

effected, as in all cases where a house is inspected it is endeavoured to place it in every respect in a thoroughly sanitary condition. It will be noticed that a very large amount of work has been done in connection with defective drainage, no less than 662 houses having been re-drained during the year.

Complaints received and attended to	...	1,160
Dwelling-houses inspected and reported on		2,430
Miscellaneous Inspection	... ..	1,540
Notices for Sanitary Improvements served :—		
Intimation	... ..	1,950
Statutory Notices	... ..	940
House drains reconstructed in accordance with the regulations of the Vestry	...	662

The appointment of an additional Inspector in June last has enabled more work to be done than has hitherto been possible, and a house-to-house inspection has been made of some small portion of the district. But this has not been done to the extent it should be, and it is not possible to do it even with the increased staff. To properly carry out the duties devolving upon them under the various Sanitary Acts, it is necessary that the Vestry should appoint a fifth Inspector, and even then there would be in Fulham only one Inspector to every 23,000 inhabitants, as compared with one to every 19,000 in London.

I trust, therefore, that the Vestry will recognise the necessity of having a sanitary staff sufficiently strong to cope with the requirements of this rapidly growing district.

In conclusion, I have again the pleasure of expressing my satisfaction with the manner in which the Sanitary Clerk and the Sanitary Inspectors have performed their duties, and would remind the Vestry that the large amount of beneficial work which has been accomplished is mainly due to the tact and energy shown by their Inspectors.

I am,

Your obedient Servant,

J. CHARLES JACKSON.

March 25th, 1896.

VIII. ILL-DEFINED AND NOT SPECIFIED CAUSES					
Total					137
					<hr/> 2195 <hr/>

**TABLE E.**

Showing the number of Deaths at All Ages in 1895 from certain Groups of Diseases, and proportions to 1,000 of Population, and to 1,000 Deaths from all causes.

	Total Deaths.	Deaths per 1000 of population at all ages.	Deaths per 1000 of Total Deaths at all ages.
1. Principal Zymotic Diseases ...	343	3'1	156
2. Pulmonary Diseases	498	4'5	226
3. Tubercular Diseases	246	2'2	111

1. Includes Small-pox, Measles, Scarlet Fever, Diphtheria and Membranous Croup, Whooping Cough, Typhus, Enteric and Simple Continued Fevers and Diarrhœa.

3. Includes Phthisis, Scrofula, Tuberculosis, Tabes and Tubercular Meningitis.

**TABLE F.****INFANTILE MORTALITY IN FULHAM.**

Table showing the number of deaths of Infants under One Year from certain diseases, and the proportion to 1,000 births and to 1,000 deaths from all causes under One Year.

	Total Deaths.	Deaths per 1000 Births.	Deaths per 1000 of Total Deaths under one year.
Measles... ..	14	3·8	19·1
Whooping Cough ...	25	6·3	34·1
<i>a</i> Other Common Infectious Diseases ... ..	3	·8	4·1
Diarrhœa ... ..	109	27·7	148·5
<i>b</i> Tubercular Diseases ...	47	12·0	64·0
Convulsions ... ..	30	7·8	40·8
<i>c</i> Other Nervous Diseases	26	6·6	35·4
Lung Diseases (not Phthisis) ... ..	136	34·6	185·3
<i>d</i> Wasting Diseases ...	216	54·7	292·9
Found Dead in Bed ...	16	4·1	21·8

*a* These are Small-pox, Scarlet Fever, Diphtheria, Membranous Croup and Enteric Fever.

*b* These are Phthisis, Tubercular Meningitis, Tabes Mesenterica and General Tuberculosis.

*c* These are Meningitis and other Diseases of Brain and Spinal Cord.

*d* These are Premature Birth, and such ill-defined causes as Atrophy, Marasmus, Debility, Inanition, etc.

**TABLE G**

Showing the deaths from the principal Zymotic diseases since 1886, when Fulham was separated from Hammersmith.

	1886.	1887.	1888.	1889.	1890.	1891.	1892.	1893.	1894.	Annual Average for 9 years.	Proportion of deaths to 1000 deaths in 9 years, 1887-1894.	Deaths in 1895.	Proportion of deaths to 1000 deaths in 1895.
Small-pox ...	..	...	1	...	...	...	...	3	3	·8	0·4	...	...
Measles ...	57	79	70	52	125	27	128	12	160	79	46·2	50	22·7

## Report of Dr. Young,

*Assistant Medical Officer of Health to the  
London County Council,*

ON THE

SANITARY CONDITION AND ADMINISTRATION

OF THE

PARISH OF FULHAM.

EX-16-175151A

EX-16-175151A

EX-16-175151A

EX-16-175151A

# Report of Dr. Young, Assistant Medical Officer of Health to the London County Council, on the Sanitary Condition and Administration of the Parish of Fulham.

The sanitary district of Fulham is situated in the western part of the metropolitan area on the north bank of the river Thames. The course of the river here makes a considerable curve and forms the boundary of the district on the south-west, south, and south-east. On the north-west the boundary is formed by Hammersmith, and on the east and north-east by Chelsea and Kensington.

The character of the soil of the district is practically the same throughout the area, and consists of gravel and sand overlying the London clay. During the recent construction of a sewer in the neighbourhood of Dawes Road the depth of the gravel at this part was found to be 27 feet.

The area of Fulham is 1,701 acres, including 8 acres of water. The adjacent tidal water and foreshore is equal to an area of 156 acres.

Until the year 1886, Hammersmith and Fulham together formed one sanitary district under the jurisdiction of the Fulham Board of Works. By the Metropolis Local Management Act, 1885, this Board was dissolved, and the parish of Fulham was constituted a separate sanitary district under the control of the Vestry of Fulham as the local authority.

The rateable value of the district at the present time is £511,738. I have extracted from the annual reports of the Vestry the rateable values at different periods since 1861, which show the large increase that has taken place in this respect since that date. The figures are as follows:—

1861	...	£58,296		1881	...	£190,136
1871	...	100,121		1891	...	426,551

Under the Equalisation of Rates (London) Act, 1894, the amount payable to Fulham from the Equalisation fund for the half-year ending September, 1895, amounted to £4,299 os. 8d., and for the previous half-year to £4,402 3s. 6d., which is equivalent to the production of a rate in Fulham of nearly 4½d. in the £1 for the whole year.

For statistical purposes the sanitary area of Fulham forms one of the sub-districts of the registration district of Fulham, which includes three sub-districts, namely, Fulham, St. Peter, Hammersmith, and St. Paul, Hammersmith.

The census returns as to the population and number of inhabited houses in the sub-district of Fulham show that a marked change has

been taking place during the last thirty years. The following Table gives the figures obtained at each census since 1861—

	Population,	Houses (inhabited).
1861	15,539	2,481
1871	23,350	3,469
1881	42,900	5,833
1891	91,639	12,896

From these it is seen that there has been a very rapid increase in the population, and especially since the year 1871, for whereas between 1861-71 there was an increase of 50 per cent., between 1871-81 the increase was equal to about 83 per cent. of the population, and during the inter-censal period of 1881-91 the population more than doubled itself. This increase is no doubt largely due to the extensive building of houses in the district, and the immigration of persons from the more central parts of the metropolis.

At the date of the ordnance survey of London some thirty years ago the district of Fulham consisted of four villages, namely, Fulham, North End, Parsons Green, and Walham, separated by land used chiefly for agricultural purposes; at the present time the greater part of this area, with the exception of some 500 acres, for the most part situated along the bank of the river, has been built over, and building operations are still being carried on. During the period which has elapsed since the census was taken in 1891, considerable increase in the number of houses and of residents has continued to take place, though there is reason to believe that the rate of increase has not been quite so great as during the period 1881-91.

The density of the population in Fulham, as measured by the average number of inhabitants per acre and per inhabited house in the census year 1891 and previous censuses, was as follows:—

	Per acre.	Per inhabited house.
1861	9	6.2
1871	14	6.7
1881	25	7.3
1891	54	7.1

In the registration County of London in 1891 there was an average of 56 persons to each acre, and 7.7 persons per inhabited house.

The proportion of the population living in one and in two rooms was in 1891 less than in the other districts of London except Camberwell, Greenwich, Hackney, Hampstead, Lewisham, Plumstead and Wandsworth. The number of persons living in one room was greater, and in two rooms less than in Battersea.

In the last census return of the population of Fulham it is shown that the total number of inhabitants, viz., 91,639, consisted of 42,861 males or 46·8 per cent., and 48,778 females or 53·2 per cent. The proportion which obtained in London was 47·3 per cent, males and 52·7 per cent, females.

The following figures give the proportion of persons of each sex at different age periods. The figures for London generally are also given :—

		0-	5-	10-	15-	20-	25-	35-	45-	55-	65-	75 and upwards.
Fulham—												
Males	...	7·12	6·15	4·94	3·84	3·76	8·19	6·08	3·72	1·76	0·91	0·30
Females	...	7·06	6·27	5·17	4·49	5·11	9·79	6·69	4·09	2·53	1·46	0·57
London—												
Males	...	5·92	5·36	4·90	4·69	4·61	7·92	5·85	4·11	2·35	1·20	0·37
Females	...	5·99	5·42	4·99	5·21	5·56	9·11	6·49	4·64	2·92	1·72	0·69

A marked difference in the constitution of these two populations is the excess of persons under 15 years and between the ages 25-45 in Fulham. The relatively greater proportion of persons at these ages is probably due to newly-married persons, and persons with young families having taken up their abode in Fulham, consequent upon the large number of houses which have been built there of late years. The high birth-rate which prevails in Fulham no doubt largely accounts for the excess of persons under 15 years, but the presence of the Western Fever Hospital in the district may to a small extent have some effect.

In the next Table are given the birth and death-rates for Fulham and London respectively.

The rates for Fulham have been calculated upon the number of deaths occurring in the parish after the correction for the deaths of non-residents. These figures have been supplied by Dr. Jackson, the Medical Officer of Health of Fulham.

The rates from all causes so obtained, as well as those for London generally, have been further corrected for age and sex distribution by the factor given by the Council's Medical Officer in his annual report,

	Fulham.				London.			
	Birth rate.	Death rate.	Deaths under one year old to 1000 births.	Zymotic Death rate.	Birth rate.	Death rate.	Deaths under one year old to 1000 births.	Zymotic Death rate.
1891 ...	38.7	21.3	163	3.18	31.8	22.4	153	2.27
1892 ...	35.3	19.8	166	3.5	30.9	21.6	154	2.80
1893 ...	35.4	20.2	177	3.3	30.9	22.3	163	3.04
1894 ..	34.9	18.4	149	3.9	30.1	18.6	143	2.64

Fulham shows a considerably higher birth-rate than that which prevailed in London during these years, and though in both cases the rates have decreased, the decrease is more marked in the former.

During the same period both the infantile mortality and the zymotic death-rate have been greater than in London, but the rates for deaths from all causes have been less except during the year 1894.

The houses in the parish of Fulham consist for the most part of two-storey buildings, and generally speaking, they are well situated as regards light and air. In a few instances, however, the open space at the rear of houses cannot be regarded as adequate, owing to the fact that the rear wall of the back addition portion of the house has been built up to the rear boundary of the site, leaving open space which extends for a portion only of the entire width of the house. In one instance, where the open space provided at the rear of a small two-storey house was measured, it was found to consist of two small spaces on either side of the back addition, one of which measured 24 superficial feet, and the other some 12 superficial feet.

A marked feature which attracted attention in this district is the inferior character of the building which has taken place in some parts. Houses, which I found had only been built within recent years, were already becoming defective, owing apparently to the inferior quality of material used in their construction and to inferior workmanship. As illustrating these remarks, I quote the following facts, which I noticed in houses situated in one street, all of which I understand have been built within the last ten years or so:—

*Mooltan-street.*—The houses in this street are two-storey buildings. The brickwork is bad and the pointing defective, especially at the rear. The houses, generally speaking, show signs of damp; the window frames have apparently in several cases been taken from other buildings and made to serve for these houses; the front doors have warped and are ill-fitting; the soil pipes are ventilated by unsubstantial-looking zinc piping.

The following defects found in particular houses are illustrative of conditions generally existing in this street.

(a) Fore-court unpaved, passage wall damp, front room wall damp, stack pipe defective, water-closet pan dirty. The rear wall of back addition is within four feet of building at rear.

(b) Fore-court unpaved, front room wall damp, brickwork defective, wash-house plaster broken, yard paving bad, soil-pipe ventilator defective, water-closet pan cracked, rear stack-pipe defective, roof defective.

(c) Roof of back addition building defective, window defective and framework dilapidated, rear brickwork defective.

(d) Fore-court and yard unpaved, wall of ground floor front and back rooms very damp, rear brickwork defective, pointing defective, rear doorway framework dilapidated.

In another part of the district houses of somewhat older date were seen which were of the same character as the above, but in these, owing to action on the part of the sanitary authority, defects have been rectified and alterations effected, and most of the houses at the time of my visit were in a fair state of repair.

During the course of my inspection of the district I visited 406 dwellings, and at 283 of them I found one or more defects existing. I made notes of the following:—

Defective roofs	...	...	...	...	In the case of 33 houses,
Defective drains or drain inlets	...	...	...	...	26 "
Defective water-closets or foul pans	...	...	...	...	102 "
Defective paving of yards and forecourts	...	...	...	...	92 "
Defective domestic water cisterns	...	...	...	...	36 "
Defective or absence of dustbins	...	...	...	...	100 "
Dirty or dilapidated walls and defective flooring	...	...	...	...	100 "
Damp walls	...	...	...	...	86 "
Defective brickwork	...	...	...	...	30 "
Defective stack pipes and gutterings	...	...	...	...	17 "
Accumulations of house refuse	...	...	...	...	4 "

Generally speaking I found drain inlets to be well trapped, and water-closets provided with separate cisterns for flushing purposes. In many houses the drains were ventilated, properly trapped and disconnected from the sewers, though in a few cases it was noticed that ventilation of the soil pipe had been effected by means of a rain-water stack pipe in such a way as to be liable to cause nuisance, owing to the proximity of its upper end to an adjoining window.

With reference to the existence of overcrowding in dwellings, instances were not wanting where this was found to exist as judged by the standard adopted in the model by-laws of the Local Government Board. These by-laws require that every room used both as day and sleeping room shall be of such cubic capacity as to allow 400 cubic feet, and every room used solely for sleeping, 300 cubic feet per person, two children under ten years of age being regarded as equivalent to one adult.

The following are notes which I made in connection with this subject during my inspections:—

A top floor room of about 1,120 cubic feet, occupied as a living and sleeping-room by a family consisting of father, mother, one adult, and three children.

A room of about 988 cubic feet, used both for sleeping and living by a family of father, mother and three children.

A family, consisting of father, mother, one adult child, and five children, occupying three small rooms, all sleep in one room of about 864 cubic feet. This house was in a very defective condition.

A two-storey house of four rooms occupied by four separate families. In one room of about 1,080 cubic feet, father, mother, and one child, aged ten years, live and sleep. House dirty throughout.

Three rooms occupied by a family consisting of father, mother, four children over ten years, and three under that age. Two rooms were occupied as bedrooms, one by the father and mother and one child, the other by the rest of the family. The size of this room was about 1,080 cubic feet.

There are four licensed cowsheds and six licensed slaughter-houses in Fulham. At the time of my visit to these premises I found that they were in a good state of repair, and that the by-laws and regulations were duly observed. The milk shops which were inspected were also found to be well kept, and with few exceptions the utensils were in a cleanly condition. There are no registered offensive businesses in the district.

I also inspected thirty-four bakehouses. The majority of these were situated in the basement of the premises, either partially or wholly below the level of the adjoining roadway. In some cases these were bakehouses which had only recently been constructed, and the means of light and ventilation were, generally speaking, fairly good. As regards seven bakehouses, however, the provisions for ventilation did not appear to me to be adequate. Cleanliness was well observed in each, and there is evidence that periodical limewashing of the walls is enforced by the sanitary authority. In only a few instances did I notice a drain inlet situated inside the bakehouse. In all these cases the inlet was fitted with a proper trap.

I was unable to obtain a list of the workshops which there are in the district, as it appears to have been impossible for the existing sanitary staff to devote any special attention in carrying out the provisions of the Factory and Workshops' Act. Dr. Jackson, the Medical Officer of Health, however, accompanied me to some premises, the addresses of which had been supplied to him as workshops within the meaning of the Act. These were found to be mostly private houses at which one or more of the family worked but did not employ labour, and a few were large millinery establishments. As regards these little fault was to be found; in the absence of any definite information as to the number and character of workshops which there are in the district, it is impossible to form an opinion as to their needs.

There are three registered common lodging-houses in Fulham; these comply with the requirements of the Acts and regulations respecting such premises. Two of the houses differ in character from the ordinary common lodging-houses in that the keepers, who reside on the premises, do not take in casual lodgers; they receive only men employed at certain nursery gardens in the neighbourhood, who are recommended by the proprietor. These lodgers are boarded as well as lodged, and often remain for lengthy periods.

The Vestry have provided a mortuary in connection with a coroner's court, for the use of the parish. The building contains two mortuary chambers and a post-mortem room. I extract from the annual reports of the Medical Officer of Health of the district the following information relating to the use of the mortuary during the last two years. During 1893, 130 bodies were brought to the mortuary, of which twelve were brought at the request of the Medical Officer of Health, six being cases

of infectious disease. During 1894, 123 bodies were removed to the mortuary, five at the request of the Medical Officer of Health, four being cases of infectious disease.

The removal of house refuse and the scavenging of the streets is carried out by the Vestry. As regards the house refuse, it is the custom to have every house called at once in each week, and in order that the collection shall be made periodically, the parish has been divided into six sub-districts, each of which is visited upon a fixed day. The result appears to be generally satisfactory, and during the course of my inspection I seldom noticed any accumulations of house refuse.

The refuse is taken to the Vestry's wharf on the river, and there at once loaded into barges and removed.

The Vestry have not made provision for undertaking the disinfection of articles of clothing, bedding, etc., after the occurrence of infectious disease, but have arranged with a contractor in the district for this purpose. By the terms of this contract, inquiry is made twice daily at the Vestry Hall on behalf of the contractor for the purpose of ascertaining the occurrence of cases of infectious disease concerning which disinfection is required. The articles are removed from and returned to the houses in separate vans. The disinfection is effected by steam. The disinfection of rooms is carried out by an official in the employ of the Vestry.

The Vestry have not up to the present time provided a shelter for the use of the district, under section 60 Public Health (London) Act, 1891, which requires that every sanitary authority shall provide shelter for use of persons during the period necessary for the disinfection of their dwellings.

The water supply for the parish of Fulham is supplied partly by the Chelsea and partly by the West Middlesex Water Works Companies.

The Sanitary staff of the Vestry consists at the present time of:—

A Medical Officer of Health.

Four Sanitary Inspectors.

One Assistant for Disinfection.

A Sanitary Clerk.

The Medical Officer of Health is not allowed to engage in private practice. The Sanitary staff is under his control, and he attends at the offices of the Vestry daily to supervise the work of the department.

The Inspectors have districts allotted to them, and each performs in his allotted district all duties arising under the Public Health Acts and the Food and Drugs Act. They attend at the offices daily in the morning to carry out certain clerical duties, such as preparing the intimation notices, and also to see builders and others who may seek advice. They also attend in the afternoon if necessary. The Disinfection Assistant is employed in carrying out the disinfection of rooms in which cases of infectious diseases have occurred.

The Clerk devotes his time to keeping the register of complaints, the inspection book which contains a record of the conditions found to exist in all premises visited by the Inspectors, and of the action taken in each case, the register of infectious disease occurring in the district,

the register of samples taken under the Food and Drugs Act, and the mortuary and correspondence registers. He also makes out the statutory notices, and notices which are sent to the School Board, the Public Library, and the master of the house, in connection with the occurrence of infectious disease. He also keeps a record of the returns forwarded by the Metropolitan Asylums Board, of the fees paid to medical practitioners for notification returns of houses certified by the sanitary authority as being provided with a proper and sufficient supply of water, and of certificates granted under the Customs and Inland Revenue Acts. Another register has recently been commenced of all the houses in the district, with a view to a record being kept of all cases of infectious disease, and of deaths from other diseases, which occur in each house in the district.

The sanitary authority for the district is the Vestry of the Parish of Fulham. There is a Sanitary Committee for the special consideration of matters arising in connection with the work of the Public Health Department, consisting of all the members of the Vestry, but no powers under the Public Health (London) Act, 1891, are delegated to this committee by the Vestry.

Under the Public Health (London) Act, 1891, the sanitary authorities in the Metropolis must make and enforce by-laws in respect to the following matters:—

- (1) The prevention of particular nuisances.
- (2) The keeping of water-closets supplied with sufficient water for their effective action.
- (3) The cleansing of receptacles used for storing water likely to be used for drinking purposes.
- (4) Houses let in lodgings or occupied by members of more than one family.

The Vestry of Fulham have made by-laws on these subjects, which have been confirmed by the Local Government Board. The by-laws are based on the model by-laws, and are similar to those which have been made and are now in force in most districts in the metropolis. As regards the amount of rental which is considered sufficient to exempt houses from the operation of by-laws which relate to houses let in lodgings, this is not the same in all parts of London. In the case of Fulham, by-laws have recently been confirmed by the Local Government Board giving the sanitary authority power to register all unfurnished lodgings of no greater rental than 6s. a week, and all furnished lodgings which do not exceed a rental of 7s. 6d. a week.

These by-laws require the same amount of cubic space as the model by-laws of the Local Government Board already referred to, namely, 400 cubic feet for each person in rooms used both for living and sleeping purposes, and 300 cubic feet in those used for sleeping only, two children under ten years being regarded as equivalent to one adult. No houses had been registered at the time of my inspection.

A considerable amount of work has been carried out by the sanitary authority under the powers conferred on them by the Public Health (London) Act, and under the Housing of the Working Classes Act as regards houses unfit for human habitation. I find from the reports of the Medical Officer of Health for the years 1893 and 1894 that under the last-mentioned Act, thirty-nine and ninety houses respectively were certified by him as being unfit for human habitation. Of these houses eleven were demolished, and the remainder were either closed by the owners or by a magistrate's order. During my inspection I had opportunities of seeing premises in which drainage improvements were being effected owing to action by the sanitary authority; in all such cases the requirements of the Vestry appeared to be comprehensive, including ventilation and disconnection, and the provision of inspection chambers in the course of the system of drains. All drains, whether in newly-built houses or after re-construction, are now subjected to a water test before being passed as satisfactory.

The work thus carried on is as a rule limited to the case of premises which have been brought to the notice of the sanitary authority by a complaint, or by the occurrence of infectious disease. Some parts of the district, however, known to require periodical visits are thus treated, but it has not been possible to undertake a systematic house-to-house inspection of the whole district.

The results of this inquiry into the sanitary condition of Fulham may be summed up as follows :—

(1) The general death-rates for the last four years have been less than in London generally, but the infantile death-rates and the zymotic death-rates have been greater in Fulham. The birth-rate, which in 1891 showed a marked excess over London, has decreased.

(2) Much work has been carried out by the health department for the remedying of insanitary conditions, but in more than two-thirds of the houses visited by me defective conditions were found to exist.

(3) Systematic house-to-house inspection has not been undertaken, owing to the time of the existing staff being fully occupied.

(4) No sufficient steps have been taken to carry out the provision of the Factory and Workshops Act.

(5) No shelter for the provision of families during the disinfection of their rooms has been provided.

(6) The enforcement by the Vestry of the by-laws relating to houses let in lodgings will cause a considerable increase in the duties of the Sanitary Inspectors and Clerk.

(7) The Vestry have not provided themselves with proper apparatus for disinfection beyond arranging with a contractor.

These facts lead to the conclusion that, in order that the duties devolving upon the Public Health Department may be efficiently carried out, the Vestry should take steps to increase their staff. The appointment of another Inspector, making a total of five for the district, would probably at the present time be sufficient, though, in a district which is increasing so rapidly as Fulham, a further increase at no distant date may possibly be necessary. Additional clerical assistance is also needed.

The Vestry should, without further delay, provide a shelter for the use of persons during the disinfection of their rooms.

C. W. F. YOUNG,

*Assistant Medical Officer of Health.*

March 16th, 1896.

GENTLEMEN,

REPORT OF THE ASSISTANT MEDICAL OFFICER  
TO THE LONDON COUNTY COUNCIL.

The report of Dr. Young, one of the Assistant Medical Officers to the London County Council, on the Sanitary Condition and Administration of the Parish of Fulham, has been referred by the Committee to me for my observations.

The first portion of the report—which deals with the situation, area, rateable value, population, the density and age and sex constitution of the population of the parish—requires no comment, as the facts and figures have been given in my reports.

With regard to the death-rates given, with which you are also familiar, it will be noticed that in 1894, as well as in the other years referred to, the corrected death-rate was lower, though only slightly so, in Fulham than in London.

Dr. Young remarks that the zymotic death-rate of Fulham is higher than that of London, but in comparing the zymotic death-rates, the age constitution of the districts must, as I have pointed out, be taken into account, as the most prevalent of the seven principal zymotic diseases are mainly fatal to young children; in fact, upwards of 90 per cent. of the deaths from these diseases are of children under the age of 15 years, so that a district with a population containing a large proportion of children will, other things being equal, have a higher zymotic death-rate than a district with a population containing a small proportion of children. The proportion of children under 15 years of age amounts in Fulham to 36.6 per cent. of the population, and in London to only 32.4, and taking this difference into consideration it will be found that the corrected zymotic death-rate for Fulham is only 5 per cent. higher than that of London, while the uncorrected zymotic death-rate is no less than 16 per cent. higher.

In making these calculations, I have corrected an error in the zymotic death-rate for 1891, as given in the report, which should be 2.3 instead of 3.1.

The infantile mortality which, as Dr. Young points out, is also higher than that of London, is adversely affected by the fact that the proportion of illegitimate to legitimate births is higher in Fulham than in London, for, as is well known, the mortality of illegitimate is more than double that of children born in wedlock, though this factor does not by any means entirely account for the difference in the infantile mortality of London and Fulham. On the other hand, the death-rate of children between the ages of 1 and 5, an important sanitary test, is lower in Fulham than in London.

The next matter dealt with by Dr. Young is the general structure and conditions of the houses in Fulham, and this is perhaps the most important feature in the report. Dr. Young says:—"A marked feature which attracted attention in this district is the inferior character of the building which has taken place in some parts. Houses which I found

had only been built within recent years were already becoming defective, owing apparently to the inferior quality of material used in their construction and to inferior workmanship," and he then gives some typical examples. As to the absolute correctness of these remarks there can be no question, as most of the members of the Committee are well aware. In fact it may be said that a very large proportion of the sanitary defects in Fulham are due to the original faulty construction of the houses. And for this state of things it must be borne in mind the Sanitary Authority in Fulham are in no way responsible, as it is due to the way in which the Building Act has been administered, formerly by the Metropolitan Board of Works and of late years by the London County Council. I regret, too, to have to say that even with the more stringent Building Act of 1894 things are now but little better; at the present moment houses are being erected in Fulham in such a manner that it is almost certain that in a very few years they will be in a ruinous condition, and I have reported to the Council some recent violations of the Building Act in respect of open space at the rear of houses, a point which is also alluded to by Dr. Young as having been neglected in the past.

This report of the Council's own officer is a strong argument in favour of the transfer of many of the powers possessed by the London County Council under the Building Act to the Local Authority, and I would strongly urge the Vestry to endeavour to secure the transfer of these powers, which was, I believe, recommended by the recent Conference of Local Authorities, seeing how they are suffering from the shortcomings of the Central Authority who now sit in judgment on them.

Dr. Young next gives a list of the defects he found in the houses he visited, which shows the necessity for what has often been pressed upon the Vestry, viz., house-to-house inspection. I may say that since Dr. Young's visit a house-to-house inspection of some small portions of the parish has been effected, but not to the extent it should be done.

With respect to the overcrowding mentioned by Dr. Young, as I have already reported, it is evident from the census returns that there is a good deal of overcrowding in the parish, but it escapes notice as the staff of inspection is too small to undertake a systematic examination, even of the very poor property, which is so eminently desirable.

I may say, however, that overcrowding is a very difficult matter to deal with, as, if abated in one house it probably recurs in another, and sometimes, unfortunately, it is a question either of a family living under overcrowded conditions or of having no roof over their heads. I hope, however, when I am able to get all the tenement houses registered this evil will be able to be dealt with.

With respect to the cowsheds, slaughter-houses, milk-shops and bake-houses, I need say nothing, as Dr. Young reports favourably of them. As to workshops some little work has been done of late, but not to the extent I could wish.

The portion of the report dealing with common lodging-houses, the mortuary, and the removal of refuse, calls for no remarks.

With respect to the disinfection I have more than once reported to the Vestry on the question, the last occasion being of recent date, and as the Vestry are about to deal with the question of refuse

destruction and are expecting a report from an Engineer on the matter, it is, I think a favourable time to consider the advisability of erecting disinfecting plant in connection with a destructor, as probably there would be economy both in the cost of erection and in the subsequent working if the two were carried out in conjunction.

In the same scheme, too, provision should be made for a "shelter" for the use of persons during the period necessary for the disinfection of their dwellings, as is required by the Public Health (London) Act.

Dr. Young's remarks on the water supply, the sanitary staff and the By-laws, deal with matters which are perfectly familiar to the Committee and need not be gone into.

The final portion of Dr. Young's report is of a nature that must be satisfactory to the Vestry, bearing testimony as it does to the amount of work accomplished by the Sanitary Authority and also to the thoroughness with which the work is done.

I have briefly touched upon the main features of the report, and to sum up I might say that all the facts mentioned have, at various times, been brought under your notice, and that, looking at it as a whole, the report cannot be regarded as entirely unsatisfactory.

With regard to the recommendations of Dr. Young, I have already dealt with the question of disinfection and the provision of a shelter, and I would urge the Vestry to carry out his recommendation to appoint another Inspector. Although a great deal has been accomplished, an immense amount remains to be done, and, unfortunately, from the nature of the buildings, which has been alluded to, and the character of many of the residents, a large proportion of the property requires frequent and regular inspection, which cannot be, with the present staff, undertaken. I might mention that even with an additional Inspector the proportion of persons and houses to each Inspector would still be considerably over that obtaining in London and in other large towns in England, the figures being :—

		Houses.			Persons.
London	...	2556	...	...	18787
15 Large Towns	...	2700	...	...	15000
Fulham, with 5 Inspectors		3000	...	...	23000

If another Inspector were appointed, a house-to-house inspection of the parish could be proceeded with more vigorously, steps could be taken to register all the tenement houses and secure the enforcement of the By-laws made in their respect, and the provisions of the Factory and Workshops Acts could also be carried out.

I trust, therefore, the Vestry will see the necessity of appointing another Inspector, so that the various Acts for the administration of which they as the Sanitary Authority are responsible may be efficiently carried out, which would undoubtedly be in every way of benefit to the parish.

I am,

Yours obediently,

J. CHAS. JACKSON,

*To the Chairman and Members,  
Sanitary Committee.*
