TO THE

BOARD OF WORKS

FOR THE

LIMEHOUSE DISTRICT.

---

GENTLEMEN,

I have the honour to submit to you my Report on the health and Sanitary condition of the Limehouse District for the year 1885.

The number of Births registered in the District during that period was 2,124, a number somewhat lower than the average for the ten years 1875-84. The Birth rate was 36 per 1,000, the Metropolitan Birth rate having been 32.6 per 1,000 of the population.

The Deaths in the District during the year exclusive of those of non-residents which occurred in Public Institutions situated in the District, but inclusive of those residents which occurred in

Public Institutions situated beyond the limits of the District, amounted to 1,490. This is a number slightly higher than the average of the ten years 1875-84. The Rate of Mortality was 25.4 per 1,000 the Metropolitan rate having been 19.7 per 1,000 population and the rate for the Eastern District 22.1 per 1,000.

The Deaths of children under one year constituted 23 per cent., and those of children under 5 years 42 per cent. of the total deaths.

The total number of Deaths in Public Institutions amounted to 376, a number far in excess of any previously reported by me. This arises from my having availed myself of increased facilities for obtaining exact returns of such deaths, such facilities having only recently been available.

DISEASES OF A ZYMOTIC CHARACTER caused the deaths of 280 persons ; and included 22 from Smallpox, of which number 3 were returned as vaccinated, 14 as unvaccinated, and in 5 cases no statement was made, 87 from Measles, 32 from Scarlet Fever, 49 from Whooping Cough, 20 from Diphtheria, 11 from Typhoid Fever, 42 from Diarrhoea, and 8 from Erysipelas. The rate of Mortality from the seven principal diseases of this class was 4.5 per 1000 of population.

CONSTITUTIONAL DISEASES caused the deaths of 288 persons ; and included 33 from Cancer, 47 from Tabes Mesenterica, 42 from Tubercular Meningitis, 141 from Phthisis. The rate of Mortality in this class was 4.9 per 1,000 population.

DEVELOPMENTAL DISEASES caused 102 deaths, among which are included 22 from Premature Birth, and 77 from Old Age.

LOCAL DISEASES caused the deaths of 706 persons, and included 44 from Apoplexy and allied diseases, 11 from Epilepsy, 40 from Convulsions, 84 from Diseases of the Heart, 196 from Bronchitis and 111 from Pneumonia. The death rate from diseases of this class was 12 per 1,000 population.

VIOLENCE caused 70 deaths, of which 18 were due to Fractures and Contusions, 28 to Drowning, and 15 to Suffocation.

## Sanitary Work, &c.

The usual house to house inspection was carried on regularly throughout the year, and resulted in the inspection of 3,581 houses, and the service of 2,216 orders for Sanitary Amendments. In addition to this inspection 1,178 houses let in lodgings or occupied by more than one family were examined and registered under the 35th section of the Sanitary Act of 1866. The Bakehouses, Cow Houses, and Slaughter Houses were regularly inspected, and the provisions of the Canal Boats Act were enforced. These proceedings however indicate but briefly the activity which prevailed in this department and for a detailed list of the work done I beg to refer you to Table VI.

My Official Representation, under the Artizans and Labourers Dwellings' Acts, concerning the Angel Gardens area in Shadwell

was, by the instruction of the Secretary of State for Home Affairs, the subject of an enquiry by Mr. CUBITT NICHOLS. This was an enquiry into the correctness of my Representation, and was held in the Board Room at your Offices. It commenced on 16th April, lasted all day, and was adjourned to the 25th, when, after again lasting all day, it was closed. Towards the end of the year, nothing further having transpired, the Board addressed a letter to the Home Secretary requesting him to call the attention of the Metropolitan Board to the great delay, and to ask them to come to a speedy decision. Up to the present time no decision has been communicated to your Board, although I believe there is no doubt about the correctness of my Representation.

## Cow and Slaughter Houses.

These structures were again licensed after conforming with the requirements of the Board.

## Sale of Food and Drugs' Act.

Ninety-nine samples of Food and Drugs were examined at the Laboratory. Of these 8 were Coffees, 1 of which was adulterated with Chicory to the extent of 25 per cent. Twenty-seven were Milks, of which three were mixed with water. Two were Cocoas, of which one was mixed with Sago. Six were Quinines, of which one contained a small quantity of Cinchonine. Eight were Butters, of which one was adulterated with 86 per cent. of foreign fat, and six were Mustards, of which 1 was mixed with 40 per cent. of

Wheat Flour and coloured with Turmeric. The remaining samples consisting of Bread, Flour, Pepper, Gin, Rhubarb, Beer and Vinegar were genuine.

I have pleasure in acknowledging the great assistance I have received from the Inspectors who have carried out my instructions in an intelligent and satisfactory manner.

I have the honour to remain,

GENTLEMEN,

Your most obedient Servant,

G. A. ROGERS,

*Medical Officer of Health and  
Public Analyst.*

*Board's Offices:—*

WHITE HORSE STREET,

July, 1886.

TABLE I.

Shewing the Population, Inhabited Houses, Births, Deaths, and  
Marriages for the Year 1885, and 10 years preceding.

## GROSS NUMBERS.

Population estimated at the middle of the year 1885.	Approximate No. of Inhabited Houses in District.	Births.	Deaths.	Marriages.
<b>58,600.</b>	<b>8,012.</b>	<b>2,124.</b>	<b>1,490.</b>	<b>408.</b>
1884	8,012	2,202	1,369	449
1883	8,012	2,153	1,478	494
1882	8,012	2,275	1,469	468
1881	8,012	2,176	1,428	468
1880	8,012	2,210	1,540	484
1879	7,820	2,286	1,554	504
1878	7,820	2,240	1,484	544
1877	7,820	2,146	1,513	527
1876	7,820	2,202	1,434	522
1875	7,820	2,167	1,518	593
Average of 10 yrs. 1875—84	7,916	2,205	1,478	505

## NOTES.

1. Population at Census, 1881, 58,543.
2. Area in Acres, 576.
3. Average No. of Persons in each house at Census 1881, 7.3.

TABLE II.

Shewing the Annual Birth Rate, Rate of Mortality, Death Rates among Children, and Deaths in Public Institutions, for the year 1885, and 10 years preceding.

	Birth rate per 1,000 of the Population.	Annual Rate of Mortality per 1,000 living.	Deaths of Children under 1 year : per centage of Total Deaths.	Per centage of Deaths of Children under 1 year to Registered Births.	Deaths of Children under 5 years : per centage of Total Deaths.	Total number of Deaths in Public Institutions.
1885	36.0	25.4	23.0	16.2	42.0	376
