Borough of Paddington.

June, 1891.

Annual Report of the Vestry.

(For the Year ending 25th March, 1891.)

I. Introduction.

THE PARISH OF PADDINGTON, in the County of London, extends Northward from the Marble Arch to Kilburn Gate; and Westward from the Marble Arch to Kensington Palace Gardens; it is bounded on the North by Willesden; on the South by St. George's, Hanover Square, and St. Margaret, Westminster; on the East by Marylebone; and on the West by Kensington and the detached portion of St. Luke, Chelsea; its length from North to South being nearly Two Miles and its superficial extent about 1,280 acres.

II. Parliamentary Electoral Divisions.

In 1885 Paddington was constituted a separate Parliamentary Borough by the Redistribution of Seats Act (48 and 49 Victoria, cap. 23). The Borough returns Two Members to Parliament, and for the purposes of election it is divided into Two Divisions,

under the names of North Paddington and South Paddington. North Paddington consists of Ward No. 2, and South Paddington of Wards Nos. 1, 3, and 4.

The number of Borough Voters, according to the Register made in 1890, is as follows :—

North Paddington	6,137
South Paddington	5,136
		<hr/>
TOTAL	..	11,273
		<hr/>

The number of Parliamentary County Voters in Paddington is 102.

The following particulars give the results of the Parliamentary Elections which have taken place in the Borough, viz. :—

NORTH PADDINGTON.

1885, November.—LIONEL L. COHEN, M.P.

1886, June.— " " (deceased).

1887, July.—JOHN AIRD, M.P.

SOUTH PADDINGTON.

1885, November.—Right Hon. Lord RANDOLPH CHURCHILL, M.P.

1886, June.— " " "

III. Registration Districts.

The Registrar-General has divided Paddington into two Districts for the Registration of Births and Deaths, called respectively the St. Mary's District and the St. John's District. The divisional line of the two districts traverses the centre of the road in Praed Street, from Edgware Road to the Canal Basin, continues thence along the centre of the Canal Basin as far as the Bishop's Road, and passes Westward from thence along the centre of the Bishop's Road and Westbourne Grove to the Western boundary of the Parish ; the St. Mary's District lying on the North and the St. John's District on the South of such divisional line.

Registrars of Births, Deaths, and Marriages.

Superintendent Registrar—HENRY F. AVELING.

Register Office, 287, Harrow Road.

Register of Marriages—WILLIAM KIRK, 78, Westbourne Park Road.

Registrars of Births and Deaths—St. Mary's District, WILLIAM KIRK, 78, Westbourne Park Road. St. John's District, MATTHEW BATTEN CRANSTONE, 35, Spring Street, Sussex Gardens.

IV. Poor-Law Administration.

The Paddington Workhouse and Infirmary are situate in the Harrow Road; the management is in the hands of a Board of Guardians, Eighteen of whom are Elected Guardians (elected by the Ratepayers). The resident Justices of the Peace are *ex-officio* Members of the Board. Paddington is united with St. George Hanover Square, and Fulham, to form a District called the West London School District, the Schools being at Ashford, near Staines.

For list of Guardians see Appendix No. V.

V. The School Board.

In 1870 Paddington and the parishes of St. Marylebone, St. Pancras, and St. John, Hampstead, were formed into one of the Metropolitan Districts for the purposes of the Elementary Education Act (33 and 34 Victoria, cap. 75), under the name of the Marylebone Division of the School Board for London, which Division returns Seven Members to the School Board.

For Managers of the Board Schools of the Marylebone Division see Appendix No. VI.

VI. Ecclesiastical Districts.

Paddington is divided into Seventeen Ecclesiastical Districts, viz. :—

St. James',	St. Matthew's,	St. Mary Magdalene,
„ John's,	„ Luke's, Westbourne	„ Peter's,
„ Mary's,	Park,	„ Stephen's,
Holy Trinity,	„ Saviour's,	„ Augustine's,
St. Paul's,	„ Michael and All Angels,	Emmanuel,
All Saints',	Christ Church,	St. Luke's, Kilburn.

VII. The County Council.

By the Local Government Act of 1888, the Metropolitan Board of Works was superseded by the London County Council, and the area which had hitherto been under the control of the Metropolitan Board, was formed into the Administrative County of London, each Parliamentary Electoral Division returning double the number of Members to the Council to that returned to Parliament, so that Paddington has Four Members on the Council.

The number of County Council voters, according to the Register made in 1890, is as follows :—

North Paddington	6,063
South Paddington	5,877
			<hr/>
			11,940

The first election took place on 17th January, 1889, when the following Members were elected :—

NORTH PADDINGTON.

1889,—R. MELVILL BEACHCROFT.

E. PARKER YOUNG.

SOUTH PADDINGTON.

1889.—T. G. FARDELL.

SIR GEORGE D. HARRIS.

VIII. Gas and Water Supply.

The Gas consumed in Paddington is supplied by The Gas Light and Coke Company.

The Water is supplied by two Companies, viz.:—the Grand Junction Waterworks Company and the West Middlesex Waterworks Company. Ratepayers residing on the Bishop of London's Estate are entitled to a deduction of 15 per cent. A plan of the Estate may be seen at the Vestry Hall.

IX. Municipal Electoral Divisions.

Paddington is divided into Four Wards, as follows, viz.:—

WARD No. 1 :—All that portion of the Parish which lies within a line drawn along the centre of Harrow Road from the point at which the same intersects the N.W. boundary of the said Parish, and thence along the centre of such Road to a point directly opposite the centre of the Road on Westbourne Terrace Bridge, thence along the centre of such Road and of Westbourne Terrace, to the centre of Bishop's Road, thence Westward along the centre of Bishop's Road and Westbourne Grove to the West boundary of the said Parish at the point where the same intersects the centre of Westbourne Grove, and thence Northward continuously along the said boundary to the point mentioned at the commencement of the foregoing description.

WARD No. 2 :—All that portion of the said Parish which lies North of Ward No. 1 and a line drawn from the boundary of such Ward Southward along the centre of Westbourne Terrace to a point directly opposite the West end of the centre of Craven Road, thence along the centre of Craven Road and Praed Street, and thence in a direct line to the boundary of the said Parish.

WARD No. 3 :—All that portion of the said Parish which lies South of Ward No. 1 and a line drawn from the boundary of such Ward Southward along the centre of Westbourne Terrace, Sussex Gardens, and Westbourne Street, and thence in a direct line to the boundary of the said Parish.

WARD No. 4 :—All that portion of the said Parish which is not comprised within the foregoing descriptions of the other Wards.

For the purposes of Rate Collection, Ward No. 2 has been sub-divided as follows :—

DIVISION No. 2A EAST :—All that portion of the Ward lying North of the canal and South of a line drawn through the centre of Sutherland Avenue from Harrow Road to Shirland Road, and East of a line drawn along the centre of Shirland Road from Sutherland Avenue to Kilburn Park Road.

DIVISION No. 2A WEST :—All that portion of the Ward lying North of a line drawn along the centre of Sutherland Avenue from Harrow Road to Shirland Road, and West of a line drawn along the centre of Shirland Road from Sutherland Avenue to Kilburn Park Road.

DIVISION No. 2B :—All that portion of the Ward lying South of the line of the Grand Junction and Regents Canals from Maida Vale to Lock Bridge, Harrow Road.

X. Population.

The population of Paddington, at the Census taken in 1891 (unrevised) was as follows, viz. :—

St. Mary's District .. 84,156

St. John's District .. 33,682

Total .. 117,838

Total number of inhabited houses in 1891, 15,164.

XI. The Vestry.

In 1855 the Vestry of Paddington was reconstituted as the Local Authority of the Parish by the Metropolis Local Management Act (18 and 19 Victoria, cap. 120). The Vestry is the Board of Works for Paddington, and consists of Seventy-two Elected Members and the Vicar of Paddington, who is *ex-officio* Chairman of the Vestry. The ordinary meetings of the Vestry are held at the Vestry Hall, Harrow Road, Paddington Green, on the first and third Tuesdays in each month, the third Tuesday in August and the first Tuesday in September excepted.

In 1852 the Vestry resolved to erect a new building for the Municipal purposes of the Parish, and in 1853 the Vestry Hall in the Harrow Road was opened.

XII. The Burial Board.

In 1854 the Paddington Cemetery, which is situated in the parish of Willesden, was purchased by the Parish. It is managed by a Burial Board, consisting of Nine Members appointed by the Vestry. The ordinary meetings of the Burial Board are held at the Vestry Hall on the first Thursday in each month.

For Report of the Burial Board see Section XXXIX.

XIII. The Baths and Wash-houses.

In 1871 Paddington adopted the Baths and Wash-houses Act (9 and 10 Victoria, cap. 74), and the Baths and Wash-houses erected in the Queen's Road, on the site of premises formerly numbered 143 and 145 were opened to the public in 1874. The Baths and Wash-houses are under the management of Seven Commissioners appointed by the Vestry.

For Report of the Commissioners of Baths and Wash-houses see Section XL.

XIV. The Parochial Charities.

There are certain charities under the control of the Vestry, managed by Trustees appointed by the Vestry and the Charity Commissioners. These Charities have an annual income of over Two Thousand Pounds, which is yearly distributed to the Poor in Coals and Blankets, in Grants to the Parochial National Schools, in apprenticing sons and daughters of poor parishioners, and in Annuities to aged persons resident in the Parish, &c.

For the Schedule of the Charities, with names of Trustees, &c., see Section XLI.

For the Accounts of the Charities see Section XLII.

XV. Members of the Vestry.

During the year ending March 25th, 1891, the Vestry has been constituted as follows. (For present Vestry, &c., see Appendix No. IV.) :—

Chairman (Ex-Officio).

Rev. WALTER ABBOTT, M.A., Vicar of Paddington.

Deputy-Chairman (Elected).

Joint Committee <i>re</i> Siggers	1
Joint Committee Parliamentary Schemes	4

Total number of Meetings held during the year, exclusive of Sub-Committees, **256.**

XXI. — Open Spaces — Paddington Recreation Ground.

The visit of the Prince and Princess of Wales to the Paddington Recreation Ground, on the 9th July, 1890, was referred to in the Annual Report for last year (pages 132-135).

On the 15th July, 1890, upon the Motion of Mr. T. G. Fardell, a Special Committee was appointed to consider and report whether it would be advisable for the Vestry to take any steps towards assisting the Recreation Ground Committee in securing the vacant land in Portsdown Road for the use of the Parish. A Conference took place between the two Committees, and on the 25th November, 1890 (page 341 V. M.) a report was presented to the Vestry containing full particulars of the scheme for the purchase of the Ground in question, and submitting recommendations which were amended and adopted as follow :—

“ *Resolved*—1. That the Vestry hereby agrees to co-operate with the Paddington Recreation Ground Committee for the purpose of securing to the public for ever the Ground known as the Paddington Recreation Ground, consisting of nearly 21 acres, as shown on the plan submitted with the Report of the Vestry Special Committee, and that it be referred to the said Special Committee to give effect to this resolution, subject to the following conditions :—

“ (a.) That when one-half of the cost of acquiring the land shewn on appended plan, measuring nearly

21 acres, for the purpose of a Recreation Ground for Paddington has been subscribed by the outside public, [the other half of the cost, not exceeding £25,000, be found by the Vestry under the provisions of the Metropolitan Open Spaces Act, 1881.

“(b.) That the Ground, when acquired, be vested in the Vestry of Paddington as the Local Authority for the Borough.

“(c.) That one acre of the said Ground be reserved for the period of five years from the date of the acquisition of the Ground by the Vestry, for the purposes of an unsectarian Polytechnic Institute, and in the event of such Institute being established within that time, the said acre of land shall be conveyed free of charge to the Institute when duly incorporated.

“(d.) That the management of the Ground be vested in a Committee of twenty-one Members, ten of whom shall be appointed for life and elected by the Subscribers to the Fund in such manner as they alone in general meeting shall decide; the other Members shall be appointed by the Vestry. In the event of any vacancies whatsoever occurring, the same shall be filled up by the Vestry. Every person elected by the Vestry shall retire at the expiration of three years from his acceptance of office, but shall be eligible for re-election.

“(e.) That the Ground, when acquired, be open to the public free of charge for admission, and for the purpose of promenading and viewing the games and

sports, subject to necessary regulations for preventing obstruction to any games or sports sanctioned by the Committee.

“(f.) That the Committee be empowered to set apart portions of the Ground for Cricket, Football, Tennis, and Cycling, or other similar purposes, and to let the same at rents to Clubs, Societies, and others, preference being given to applicants residing in Paddington, and secondly to those in its immediate neighbourhood.

“(g.) That the net proceeds of the receipts be applied towards the payment of the yearly, or half-yearly instalments due in respect of the half of the purchase-money borrowed from the County Council, and when such debt has been repaid, together with the interest thereon, all such receipts shall be carried to the account of the Vestry.

“(h.) That no portion whatsoever of the Ground set apart for games or sports be enclosed by any hoarding or obstruction of any kind, temporary or permanent, which would have the effect of preventing persons frequenting the Ground from having a free and uninterrupted view of the games or sports.

“(i). That as a Bill in Parliament will in any case be required to enable the Ecclesiastical Commissioners and the Trustees of the Paddington Estate to sell the land, such Bill be promoted by, and at the expense of, the Vestry, and that it do contain provisions giving effect to the foregoing conditions.

Resolved—2. (a.) That as soon as the scheme for the acquisition of the Recreation Ground is sufficiently matured, the Special Committee be empowered to memorialize the County Council to extend to North-West London some of the favour shewn towards other parts of the Metropolis in the matter of the acquisition of open spaces, by acquiring the adjoining thirty odd acres in Elgin Avenue as a Park or Open Space, to be used in connection with, and by way of addition to, the Recreation Ground; thus giving partial effect to the scheme promoted some years back for the acquisition of what was then 80 acres as a Park.

“(b.) And further, that the Special Committee be also empowered to memorialize the Ecclesiastical Commissioners, the Trustees of the Paddington Estate, the Charity Commissioners, and other Public Bodies, to assist in the acquisition of the extended area.”

St. Mary's Churchyard North—Entrance from Cuthbert Street.

In consequence of the closing of the late entrance to the old Churchyard, from Howell Street, owing to the land being let by the Trustees of the Hall Park Estate for building purposes, the matter was referred to the Legal Committee to secure, if possible, a public way between Cuthbert Street and the Churchyard, and the Vestry has now purchased the Leasehold interest in No. 13, Cuthbert Street, at a cost of £450.

XXII. Electric Lighting.

The Vestry having agreed to conditionally withdraw its opposition to the application of the Metropolitan Electric Supply Company (Limited) for a Provisional Order for lighting the Parish, appointed and authorised Col. C. H. Barchard, C.B., Col. H. F. Blair, R.E., together with the Vestry Clerk and Surveyor, to deal with any points arising on the form of the Provisional Order, and to agree to same with such alterations as the Board of Trade might approve.

On the approval of the Provisional Order an agreement was entered into between the Vestry and the Metropolitan Electric Supply Company (305 V.M.) setting forth the scale of charges for the supply of Electrical Energy, and the Company is now engaged in laying distributing mains and wires in the streets set forth in the Paddington Electric Lighting Order.

XXIII. Measures before Parliament.

Amongst the Bills introduced into Parliament during the year, the following have received attention by the Vestry.

CENTRAL LONDON RAILWAY.

HOUSING OF THE WORKING CLASSES.

CUSTOMS AND INLAND REVENUE.

INFECTIOUS DISEASES PREVENTION.

LONDON COUNTY COUNCIL GENERAL POWERS.

LONDON DISTRICT COUNCILS.

LONDON WATER SUPPLY.

RATING OF MACHINERY.

SCHOOL BOARD ELECTIONS.

METROPOLITAN LOCAL GOVERNMENT.

LONDON WATER METER.

METROPOLITAN BUILDING ACT AMENDMENT.

METROPOLITAN WATER COMPANIES CHARGES.

HARROW ROAD & PADDINGTON TRAMWAYS.

SOUTH KENSINGTON & PADDINGTON SUBWAY RAILWAY.

XXIV. Deputy-Chairman of Vestry.

On the 2nd June, 1890, it was resolved, on the Motion of Mr. Mark H. Judge—"That in the opinion of the Vestry a frequent change of Chairman is undesirable, and that therefore a Deputy-Chairman be appointed to preside at all meetings of the Vestry in the absence of the Ex-Officio Chairman, and that he be elected annually at the time of the Election of Standing Committees; also that the nominations for the first Deputy-Chairmanship do take place at the next meeting of the Vestry, and the election at the following meeting, provided more than one candidate be nominated." On the 17th June Mr. William Henry Mills was unanimously elected the Deputy-Chairman of the Vestry for the current year. This arrangement has not only given general satisfaction to the members of the Board, but has been the means of expediting business.

XXV. Parochial Accounts.

The recommendations of the Special Committee appointed to consider which of the recommendations of the Parochial Accounts Committee could be carried out with the present establishment and without incurring any extra expenditure, were considered by the Vestry, and certain alterations of a minor character were made in the method of presenting the accounts. To organize and equip an entirely new Financial Department would have involved considerable outlay, without conferring upon the parish a corresponding advantage.

XXVI. Representation of Wards.

A Memorial from Ratepayers having been presented to the London County Council calling attention to the inequality which existed in the representation to the Wards of the Parish, an inquiry was instituted, with the result that an Order was passed by the London County Council re-arranging the representation, without however altering the total number of the Vestry, a step which would have been attended with great inconvenience and expense owing to the limited character of the present Board Room accommodation. A copy of the Order is as follows:--

TO THE VESTRY OF THE PARISH OF PADDINGTON AND
ALL WHOM IT MAY CONCERN.

WHEREAS the Parish of Paddington, in the County of London, mentioned in Schedule (A), Part II. of

the Metropolis Act, 1855, was, pursuant to Section 3 of the said Act, divided into four Wards, AND WHEREAS application has been made to the London County Council, by certain Ratepayers of the said Parish, to alter the number of Vestrymen assigned to such Wards, AND WHEREAS upon an account taken of the population by the Authority of Parliament, in the year One thousand eight hundred and eighty-one the relative number of inhabited houses in the several Wards of the said Parish are found to have varied from those shown by the last previous census, AND WHEREAS the London County Council have taken into consideration the said application, Now the London County Council do hereby, by virtue of the powers contained in Section 5 of the Metropolis Management Act, 1855, and in Section 40 of the Local Government Act, 1888, and of every other power and authority enabling them in this behalf, RESOLVE, ORDER, and DETERMINE that the number of the Vestrymen assigned to the several Wards of the said Parish of Paddington be the numbers following, that is to say:—

No. of Ward.	Vestrymen.		Vestrymen.
1 ...	15	to remain as at present	... 15
2 ...	30	instead of	... 24
3 ...	15	instead of	... 18
4 ...	12	instead of	... 15
	—		—
	72		72

Dated the 13th day of March, One thousand eight hundred and ninety-one.

Sealed by Order (L.S.) H. DE LA HOOKE,

Clerk of the London County Council.

XXVII. Three Polling Stations for Ward 2.

On the 15th July, 1890, the Vestry Resolved, on the Motion of Mr. T. G. Fardell, L.C.C.—“That, with a view of meeting the expressed wishes of Ratepayers, the Churchwardens be requested to provide at all future Vestry Elections three Polling Stations for Ward 2.” This request was complied with, and the Election of May, 1891, carried out in the manner suggested.

XXVIII. Barrable's Bequest.

The legacy received from the estate of the late Mr. Barrable, viz., £1,000 (less duty 10 per cent.), the dividends of which are to be applied for the benefit of the poor of this Parish in such form as the Vestry shall in their absolute discretion think fit, has been placed on deposit at the London and County Bank, Bayswater Branch, in the joint names of the Manager (Mr. G. Martin), and the Vestry Clerk (Mr. Dethridge).

XXIX. Simmonds' Bequest.

The Bequest of Mrs. Simmonds has been referred to the Churchwardens to be dealt with by them in accordance with the last Will and Testament of the Testatrix.

XXX. Quinquennial Re-Assessment.

The Assessment Committee reported on the 31st October, 1890, that they had attended 31 meetings, and heard and determined 3,554 Appeals (reductions being made in 1,444 cases); also that Messrs. Dobbin & Cooke had succeeded in arranging, on a fair and equitable basis, the assessments relating to the works belonging to the Public Companies.

Three Appeals were made to Assessment Sessions, and are still pending.

The following Statement contains the Gross and Rateable Values of the old and new Assessments of the properties in question :—

Public Companies.	Old Value.		New Value.	
	Gross.	Rateable.	Gross.	Rateable.
Grand Junction Waterworks Company	12,152	11,180	13,570	12,340
West Middlesex Ditto.....	5,113	4,500	5,700	5,050
East London Ditto	713	630	856	714
Grand Junction Canal Co. ...	769	750	769	750
Regent's Ditto	84	80	84	80
*The Gas Light & Coke Co.	14,250	13,574	19,000	17,284
Great Western Railway Co.	54,345	45,108	74,600	62,166
Ditto & Metropolitan Railway	16,769	13,918	20,395	18,472
*National Telephone Co. ...	18	14	180	150
Postmaster-General	31	24	31	24
Woods and Forests	22	18	22	18
Harrow Road and Paddington Tramway	178	150	178	150
	<u>£104,444</u>	<u>89,946</u>	<u>135,385</u>	<u>117,198</u>

* Under Appeal.

The effect of the increase on the Quinquennial Re-assessment has been to reduce the Rate for the year about $1\frac{3}{4}$ d. in the £.

Appeals against the Valuation Lists of various Parishes and Unions have been made by the London County Council, and considerable expense incurred thereby. The Council has not taken any action with reference to the Assessment of this Parish, which may be regarded as evidence of the satisfactory manner in which the Overseers and Assessment Committee have carried out their very onerous and complicated duties.

XXXI. Public Libraries Acts.

On the 17th March, 1891, a Deputation waited upon the Vestry and presented a Memorial asking that the proper steps might be taken for submitting to a vote of the Burgesses the adoption of the Public Libraries Acts.

A Poll was taken on the 2nd May last, with the following result:—

QUESTION 1.	Answer.	
	YES.	No.
Are you in favour of the adoption of the Libraries Acts for the Borough of Paddington, in the County of London?	1,590	4,528

QUESTION 2.

Are you in favour of the Rate being limited to one-halfpenny in the pound?	1,633	1,912
--	-------	-------

XXXII. Municipal Reference Library.

The following Resolution of the Vestry is still under consideration of the Legal Committee:—

“That it be referred to the Legal and Parliamentary Committee to consider and report as to whether any, and if so, what better arrangements can be made for preserving and utilizing the books and papers acquired by the Vestry from time to time.”

XXXIII. Poor Rate Accounts.

The Local Government Board in November, 1890, forwarded to the Vestry a draft of proposed Regulations prescribing the mode of keeping the Poor Rate Accounts, but owing to certain alterations and suggestions made to the Local Government Board, the proposed order will remain in abeyance until such time as the Local Government Board shall have fully considered the recommendations and suggestions brought under their notice.

XXXIV. Hygiene and Demography.

Sir George D. Harris, L.C.C., Chairman of the Sanitary Committee, Mr. H. H. Collins, F.R.I.B.A., Fellow of the Sanitary Institute and Vice-Chairman of the Sanitary Committee, and Mr. Mark H. Judge, F.R.I.B.A., Fellow of Sanitary Institute, were elected to represent the Vestry at the International Congress of Hygiene which will assemble in London, under the Presidency of H.R.H. the Prince of Wales, in August next.

XXXV. Housing of the Working Classes Act.

At the instigation of Paddington, several meetings of Delegates from various Vestries and District Boards in the Metropolis were held, under the Presidency of Mr. Mark H. Judge, for the purpose of considering the above-mentioned measure, and carefully framed Resolutions were passed and forwarded to the Sanitary Authorities of London for their information and guidance.

The works, Sanitary and otherwise, carried out during the year, appear in the Reports of the respective Officers, hereunto annexed, together with the Reports of the Burial Board and Commissioners of Baths and Wash-houses, and such Reports are followed by the documents required by the 198th Sec. of the Metropolis Local Management Act.

Printed and published by order of the Vestry of Paddington.

FRANK DETHRIDGE,

Vestry Clerk.

VESTRY HALL, HARROW ROAD,

June, 1891.

XXXVI.—ABSTRACT OF ACCOUNTS, SUMMARY OF CONTRACTS, STATISTICAL TABLES, &c.

The following ABSTRACT OF ACCOUNTS for the Year ending March 25th, 1891, SUMMARY OF CONTRACTS, and STATISTICAL TABLES, &c., were submitted to the Vestry by the Vestry Clerk, Mr. Frank Dethridge, and ordered to be included in the Annual Report of the Vestry, in pursuance of Section 196, 18 & 19 Vic., c. 120, viz.:—

“The auditor or auditors of the accounts of the Metropolitan Board of Works, and of every District Board and Vestry, shall, after such audit of accounts as aforesaid, cause an account in abstract to be prepared, showing the receipt and expenditure under this Act for the preceding year, under the several distinct heads of receipt and expenditure, with the statement of the allowance of the auditor or auditors, if he or they has or have allowed such accounts, or of the parts, if any, which he or they have disallowed of such accounts, and also a summary statement of all contracts entered into by such Board or Vestry in such preceding year, and of the moneys owing to and debts and liabilities owing by such Board or Vestry on the 25th day of March next preceding.”

We, the undersigned, being the Auditors appointed under the provisions of the "Metropolis Local Management Act," for the purpose of auditing the Accounts of the Vestry of the Parish of Paddington, do state that we have audited and allowed the Accounts of the Vestry for the year ending 25th March, 1891, of which the foregoing Account, marked **A**, is an abstract. And we state that the several Contracts entered into by the Vestry during the year ending 25th March, 1891, are specified in the foregoing Statement of such Contracts marked **B**. And that the moneys owing to, and the Debts and Liabilities owing and incurred by, such Vestry respectively, are specified in the foregoing Statement of such Credits, Debts, and Liabilities respectively, marked **C**. And we further wish to thank Mr. Dethridge, the Vestry Clerk, and his Officers, for the able and courteous assistance they have rendered during the investigation.

F. CALDER-TURNER, } Parochial
MONTAGU HOLMES, } Auditors.

July 16th, 1891.

SUNDRY PAYMENTS MADE TO OR BY THE VESTRY AND
CHURCHWARDENS UNDER VARIOUS ACTS OF PARLIAMENT.

1. A sum of £12 is paid annually under 26 Geo. 2, cap. 43, to the Ecclesiastical Commissioners by the Churchwardens out of moneys supplied by the Vestry as rent for land granted by a former Bishop of London for the enlargement of the Churchyard. The Vestry is recouped a portion of this £12 by an annual payment of £3 under the same Act to the Churchwardens by the Vicar of Paddington, and of £3 by the Parish Clerk (if any).
2. A sum of £15 is paid annually under the private Act 35 Geo. 3, cap. 83, to the Churchwardens by the Ecclesiastical Commissioners as compensation for the enclosure of waste lands by a former Bishop of London, and is paid by the Churchwardens to the credit of the Vestry General Account.
3. A sum of £2 is paid annually under 3 Geo. 3, cap. 50, to the Vestry by the Churchwardens of St. George's, Hanover Square, in lieu of parochial rates for the burial ground in Uxbridge Road, and is placed to the credit of the Vestry General Account.

4. HARVIST'S ESTATE.

A proportion of the rents of this Estate (amounting in the year ending Lady-day, 1891, to £107 19s. 3d.) is paid annually under 10 Geo. 4, cap. 59, and private Act 18 and 19 Vic., cap. 11, to the Vestry by the Hendon Union Rural Sanitary Authority, and is applied towards the repair of the Highway of the Edgware Road.

5. LYON'S ESTATE.

A proportion of the rents of this Estate (amounting in the year ending Lady-day, 1891, to £476 11s. 1d.) is paid annually to the Vestry under the same Acts and by the same Authority as in Harvist's Estate, and is applied towards the repair of the Highway of the Harrow Road.

RETURN showing the amount in the Pound levied by the Vestry during the Twenty-four Years ending October, 1890, in respect of Rates made for payment of Liabilities of the Vestry, distinguishing those over which the Vestry has control from those over which it has no control :—

TOTAL . . .	2 8	1d.	2s. 0 $\frac{1}{2}$ d.	1d.	4s. 10 $\frac{1}{2}$ d.

The Rateable Value of the Parish, based upon the Rate made in October, 1890, was £1,284,770.

List of the Principal Statutes under which Rates are Levied.

* * The earliest Acts are alone given in this List, the object being to show the dates at which the duty of levying a rate was in each case imposed on the Parochial Authorities :—

- I. *Poor Rate*.—18 & 19 Vic., Cap. 120 (A.D. 1855). (Transferring to the existing Vestry the powers and duties given or reserved to the Vestry elected under the Local Act of 1824, 5 Geo. IV., Cap. 126, which superseded the Open Common Law Vestry).
- II. *Lighting Rate*.—The same.
- III. *General Rate*.—The same.
- IV. *Sewers Rate*.—The same.
- V. *Main Drainage and Metropolitan Consolidated Rate*.—The same.
- VI. *Church Building Rate*.—58 Geo. III., Cap. 45 (A.D. 1818).
- VII. *Poor Rate proper*.—43 Eliz., Cap. 2 (A.D. 1601).
- VIII. *Police Rate*.—10 Geo. IV., Cap. 44 (A.D. 1829).
- IX. *County Rate*.—12 Geo. II., Cap. 29 (A.D. 1738).
- X. *Common Poor Fund Rate*.—30 and 31 Vic., Cap. 6 (A.D. 1867).
- XI. *Metropolitan Asylum District Rate*.—The same.
- XII. *West London District School Rate*.—7 & 8 Vic., Cap. 101 (A.D. 1844).
- XIII. *Metropolitan Fire Brigade Rate*.—28 & 29 Vic., Cap. 90 (A.D. 1865).
- XIV. *Baths and Wash-houses Rate*.—9 and 10 Vic., Cap. 74 (A.D. 1846).
- XV. *Sewers Rate*.—18 and 19 Vic., Cap. 120 (A.D. 1855).
- XVI. *School Board Rate*.—33 and 34 Vic., Cap. 75 (A.D. 1870).
- XVII. *Main Drainage Rate*.—18 and 19 Vic., Cap. 120 (A.D. 1855).
- XVIII. *Metropolitan Consolidated Rate*.—32 & 33 Vic., Cap. 102 (A.D. 1869)

FRANK DETHRIDGE,
Vestry Clerk.

XXXVII.—REPORT OF THE SURVEYOR.

The following Report on the Paving, Sewers, Lighting, and other works carried out during the year ending March 25th, 1891, was submitted to the Vestry by the Surveyor, Mr. George Weston, and ordered to be included in the Annual Report of the Vestry :—

VESTRY HALL, PADDINGTON,

30th June, 1891.

To the Vestry of Paddington.

GENTLEMEN,

I herewith submit my Annual Report of the various works that have been executed, and other matters in connection therewith, during the year ending Lady-day, 1891.

Maintenance of Roads.

The following statement will show the quantity of materials used in the maintenance and general repair of the various macadam and gravel roads in the Parish. The surface, wherever practicable, has been consolidated by the use of the two steam road-rollers :—

				Tons.	Cwt.
Guernsey Granite	2,647	4
Clee Hill Granite	527	1
Enderby Granite...	1,731	8

				Tons.	Cwt.
Quenast Granite...	6	18
Narborough Granite	34	2
Aberdeen Granite	309	2
Sifted Gravel	3,548	8
Hoggin	1,488	15
Thames Sand	1,328	5 $\frac{1}{2}$
Thames Ballast	1,041	12 $\frac{1}{2}$

Used for scattering on slippery roads :—

				Tons.	Cwt.
Thames Shingle	1,291	11
Pit Shingle	20	0

The expenses attending the working of the two ten-ton steam rollers have been as follow :—

				£	s.	d.
Wages to Drivers	188	4	6
1,179 $\frac{1}{2}$ Cwt. of Coke	51	12	1
67 Sacks of Coal	5	11	8
184 Quarts of Lard Oil	8	1	0
3 do. Cylinder Oil	0	2	7
23-lbs. of Tallow	0	9	7
197 $\frac{1}{2}$ -lbs. of Cotton Waste	2	12	10
40 $\frac{1}{2}$ -lbs. of White Lead	0	8	6
7-lbs. of Red Lead...	0	1	9
57-yds. of Steam Packing	2	10	8
4 Quarts of Boiler Fluid	0	1	6
219 Nights Watchmen	36	10	0
62 Quarts of Colza Oil	2	1	4
Aveling & Porter :—						
New Driving Rollers, &c.	...	£70	2	0		
Roller Repairs	47	13	3	
				117	15	3
				£416	3	3

Wood Paving Repairs.

During the twelve months 38 streets have been repaired ; the quantity of materials used and the expenses incurred have been :—

	£	s.	d.
Wages for Labour	345	13	10
15,772 New Wood Blocks	94	9	9
57,766 Old Wood Blocks	57	15	4
2,895½ Bushels of Cement	223	3	10
2,364½ Bushels of Sand	59	2	3
156 Bushels of Shingle	3	18	0
	<u>£784</u>	<u>3</u>	<u>0</u>

The expenses incurred in making good and repairing pipe trenches, &c., after Gas and Water Companies, &c., in 29 streets during the year have been as follow :—

	£	s.	d.
Wages for Labour	66	19	1
3,705 New Wood Blocks	23	1	6
7,767 Old Wood Blocks	7	15	4
387½ Bushels of Cement	29	16	7
515 Bushels of Sand	12	17	6
81 Bushels of Shingle	2	0	6
40 Gallons of Tar	0	13	4
	<u>£143</u>	<u>3</u>	<u>10</u>

The undermentioned Wood Paving Renewals were carried out during the year :—

Locality.	Date when First Laid.	Renewed in 1890.	
Harrow Road, from Bishop's Road to Green Street ...	August, 1881.	June, 1890.	MEMO. For quantity of Materials used and cost thereof see the following page.
Radnor Place and Somers Place ...	June, 1879.	July, 1890.	
Porchester Road, from Bishop's Road to Westbourne Park Villas	Nov., 1881.	July, 1890.	
Edgware Road, from Church Street to Maida Hill West...	October, 1881.	October, 1890.	

The quantity of Materials used and the cost thereof, and Wages paid for Wood Paving Works during the year has been as follows, viz. :—

NEW WOOD PAVING.

Locality.	Superficial Area.	Labour, Superintendence, &c.			Wood Blocks.	Portland Cement.	Thames Ballast.	Thames Sand.	Thames Shingle.	Water.	Cartage.	Total Cost.

TOTALS	15,277	649	15	11	610,936	1,280½	—	354½	159½	15,277	98½	4,896	12	2

Harrow Road, from the junction with Edgware Road to Green Street, formerly paved by the late Metropolitan Board of Works with 3" \times 6" Aberdeen granite paving stones, when the Harrow Road Improvement was carried out, was, as directed, this year taken up, and where necessary the old concrete was floated over with Portland Cement and new wood blocks were laid thereon.

The Vestry passed a resolution to wood-pave Queen's Road, from Bishop's Road to the Bayswater Road ; the macadamized surface was broken up, the useable portion of the macadam being mixed with Thames Ballast and Portland Cement to form the foundation. The levels were altered so as to improve the general surface of the roadway, which formerly was of a very inconvenient and unsightly appearance in consequence of the levels of the two footways not being uniform. The entire length of footways were relaid, and the kerb bedded on a concrete foundation.

Considerable difficulty was experienced in obtaining satisfactory wood blocks from the Contractors, and serious delays took place from time to time owing to non-delivery, thus causing waste of time, additional expense, and great inconvenience to the public generally, owing to the roads being closed for a longer period than they should have been.

Channels and Carriageway Paving.

The undermentioned Streets, &c., were repaired during the year :—

				Superficial Area.		Cost.		
				Feet.	inches.	£	s.	d.
Westmoreland Road	1,501	0	11	6	1
Bravington Road...	1,499	0	10	6	9

Totals	20,179	8	£325	1	3

Maintenance of Footways and Channels.

In the month of January, 1890, I was instructed to prepare an Approximate Estimate of the cost of putting the footways in a complete state of repair. With this view, an estimate was made of about 70 of the streets that greatly needed attention, and in April the Vestry determined to carry out this work, passing the following resolution :—

“That the footways referred to in pages 7, 8,
 “and 9 of the Report be put in a proper
 “state of repair, and that the sum of £2,500,

“for footway paving repairs, be included in
“the Approximate Estimate of April, 1890,
“and in each subsequent Approximate
“Estimate until the whole of the footways
“in the Parish are in a thorough state of
“repair ; further, that the Works Committee
“do report to the Vestry as to the work
“proposed to be done in each half-year, with
“estimates, before the work is put in hand.”

Since the passing of this order, the undermentioned footways have been relaid and repaired, new Yorkshire stone being used where necessary, and every endeavour will be exercised to push forward this work as rapidly as possible :—Carlton Terrace, between Carlton Bridge and Fermoy Road ; Carlton Bridge ; Great Western Road, by Kensal Road ; Harrow Road, on South side, from North Wharf Road to Hermitage Street ; Queen’s Road ; Carlton Road ; Edgware Road, from Praed Street to the “Red Lion” P.H. ; Clifton Place, North side ; Harrow Road, on North side, from Chichester Place to Westbourne Terrace North ; Leinster Gardens ; Cleveland Square, South and West sides ; Cleveland Gardens, North side ; and Connaught Place.

The Victoria stone paving laid down in May, 1889, seems to answer most admirably, and as regards its durability it is quite equal to York stone, and more uniform in wear.

Reinstating Roads and Footpaths after Companies, &c.

Trenches opened by Gas, Water, Electric Lighting and Postal Authorities and others, have been reinstated

at their cost by the Vestry's workmen, the same amounting to £1,372 19s. 3d.; this amount has been repaid to the Vestry.

Parliamentary Bills.

The following Plans, &c, of Railways, Tramways, and Electric Lighting Schemes were deposited in November, and considered by the Works and Legal Committees :—

South Kensington and Paddington Subway.

SUBWAY No. 1.—Total length, 1 mile, 4 furlongs, and 2·6 chains, is proposed to commence in Alfred Place West, in the Parish of Kensington, close to the South Kensington Station, taking the centre of the Exhibition Road, thence going West towards the East side of the Royal Albert Hall, thence crossing Kensington Road and across Kensington Gardens, entering the boundary of the Parish of Paddington in Kensington Gardens at about 1 mile and 2 chains from its commencement, thence proceeding Northwards under the Uxbridge Road, near the Grand Junction Road, Eastwards following the centre line of the latter road by Westbourne Terrace to Spring Street, under the same to or about the point at which the Metropolitan Railway crosses that Street, crossing over the Metropolitan Railway Tunnel to form junction with—

SUBWAY No. 2, which passes Northwards under Eastbourne Terrace, to the Northern wall of the Bishop's Road Bridge Approach, to form a connection

with the Great Western Railway. The length of Subway will be about 2 furlongs 2·8 chains.

The Longitudinal Section shows at the before-mentioned junction an alteration of the surface of the roadway of Spring Street, in order to get over the Metropolitan Railway tunnel. Generally the rail level is shown throughout nearly parallel to the surface of the ground, at about a depth of 13 feet.

At the commencement of Subway No. 1, and for a length of 1 furlong 9·70 chains therefrom, there will be an up and down line laid in one covered way of a width varying from 18 to 16 feet, and of a height varying from 11 to 9 feet above the rail level. The remaining length of No. 1 Subway and the whole length of No. 2 Subway will consist of an up and down line, each laid in a separate covered way 9 feet in width and 9 feet high, except at points where the Subway is on a curve, when the width will be 9 feet 6 inches.

It is proposed to afford access to such Subway by means of stairs, subways, and lifts.

No. 1 SUBWAY—

DEPTH OF RAIL, from surface of ground or roadway :—

				Feet. Inches.

No. 2 SUBWAY—

DEPTH OF RAIL, from surface of ground or
roadway:—

	Feet.	Inches.
At Junction in Spring Street	11	0
At Chilworth Street	11	6
At Bishop's Road, by Parapet Wall of Bridge	17	0

GRADIENT.—1 in 30—

then Level

„ 1 in 30

„ 1 in 146

„ 1 in 473

The following Houses are included in the limits of
deviation, evidently for the situation of Stations on—

SUBWAY No. 1.—

7 Premises in Stanhope Terrace, and

19 Houses on the Eastern side of Spring Street.

SUBWAY No. 2.—

10 Houses in Eastbourne Terrace, and
2 Houses in Chilworth Street.

The Gauge for the intended Subway will be the standard 4 ft. 8½ in., and the motive power to be employed will be Electricity, or Cable Power.

The SUBWAYS will affect the following Roads and Streets, viz. :—Uxbridge Road, Grand Junction Road, Glo'ster Place, Conduit Place, Spring Street, Craven Road, Eastbourne Terrace, and Bishop's Road, and all pipes and sewers, drains and lamps.

The SUBWAY is stated to be laid in a *Covered Way*, but not any plan or description is given of such Covered Way; and I would call your special attention to this fact, that the roadway surface on the Longitudinal Section shows only a depth of about 2 feet from Soffit of *Covered Way*.

The Central London Railway.

A portion of this Railway Scheme was before the Vestry last year. It was then proposed to start Westward from Queen's Road, along Bayswater Road, Oxford Street, New Oxford Street, High Holborn, Holborn, Holborn Viaduct, Newgate Street, St. Martin's-le-Grand, Cheapside, Poultry, Cornhill, and terminate there by Exchange Buildings, to form a junction with the Terminus of the City and Southwark Subway.

This year the Company seek for powers to construct two Railways, viz. :—

RAILWAY No. 1.—5 miles, 7 furlongs, 4·10 chains, commencing in the Parish of Hammersmith, at or near the Eastern angle of Shepherd's Bush Green, and terminating in the Parish of St. Michael, Cornhill, in the City of London, in Cornhill, at a point 20 yards or thereabouts, measured in a Westerly direction, from the junction of Birchin Lane with Cornhill.

RAILWAY No. 1A.—1 furlong 7·20 chains long, is wholly in the Parish of Hammersmith, commencing at the Northern end of Caxton Road, and terminating by a junction with Railway No. 1, at its commencement, as herein-before described.

The Plans and Longitudinal Section show Railway No. 1 to pass under the entire length of Uxbridge Road, in this Parish, for a distance of one mile, 3 furlongs, $6\frac{3}{4}$ chains.

As the Gradients of the Railway are not stated on the Longitudinal Section, I have taken the depth of the rails from roadway surface, as follows :—

At the Western Boundary by Palace Gardens,

it is shown to be 73

Feet
deep.

Albion Street	60
Stanhope Place, Eastern Boundary			...	60

This gives the average depth of Rail in this Parish about 61 feet below the surface of roadway. In the Plans submitted last year the average depth was only 44 feet.

The up and down lines of the proposed Railway are intended to be placed in separate tunnels, each circular in section, and 11·5 feet internal diameter, with enlargements at the Stations, and it is proposed to afford access to the Railway by means of stairs and lifts.

It is not intended to alter the surface level of any road or street.

The limits of deviation appear to be the kerb line on the North side of Uxbridge Road, to the Park and

Kensington Gardens railings, and at the following places houses are included in the limits, probably for the situation of Passenger Stations :—

QUEEN'S ROAD, at the Southern end.

East side.—3 Houses.

1 House and Private Yard, and
A Building at the rear of the Black
Lion P. H., Bayswater Road.

West side.—3 Houses.

IN COBURG PLACE.—4 Houses and 7 Premises in a
portion of STANHOPE TERRACE, Bayswater Road.

The guage of the Railway will be the standard
4 ft. 8½ in., and the motive power to be employed,
Electricity, or any mechanical power (other than
steam locomotives).

The formation of this Railway will probably affect
the following public streets.

Bayswater Road.—Footpaths, crossings, refuges,
and lamps, cab-stands, and drinking troughs.

Queen's Road.—Footpaths, road and crossing at
South end.

Vincent Place.

And all streets running at right angles to the
Bayswater Road.

MEMO.—Both Railway Companies ask for the usual
power to cross, stop up, close for traffic, alter, remove,

divert, deviate, and otherwise interfere with, temporarily or permanently, within the limits of lateral deviation, any road, street, highway, crossings, sewer, drains, pipes, wires, &c., yards, passages, houses, shops, areas, cellars and premises, cab-ranks, drinking fountains, and urinals.

Harrow Road and Paddington Tramways Extension.

THE HARROW ROAD AND PADDINGTON TRAMWAYS COMPANY intend to make application to Parliament this Session, for power to construct and maintain the following Tramway extensions:—

TRAMWAY No. 1.—A double and single line commencing in the Harrow Road, being a junction with the existing Tramway of the Company, at, or near, the end of Amberley Road, and passing thence in an Easterly and South-easterly direction along the Harrow Road, to, and terminating in that Road, at a point $1\frac{1}{2}$ chains West of Edgware Road. Length—1 mile, 2 furlongs, 8·5 chains.

The single line will be at the following points— $\frac{1}{2}$ chain Eastwards of Amberley Road junction, 6 chains Westwards of Howley Place by Canal Bridge, 1 furlong, $7\frac{1}{2}$ chains from North of Fulham Place to St. Mary's Square and Hermitage Street, 1 chain Westwards of termination at the Eastern end.

I would draw your attention to the proposed piece of double line on the approach of No. 1 Bridge over

the Canal in Harrow Road, near Howley Place, and also to the proposed double line from Amberley Road down the Lock Bridge Approach. If the Tramways are thus carried out at these points, I fear constant accidents will occur.

TRAMWAY No. 3.—A double line commencing by a junction with TRAMWAY No. 2, about half-a-chain North of Christ Church Road, Kilburn, and passing thence in a Southerly direction along Edgware Road and High Road, Kilburn, and terminating in that Road at a point about half-a-chain N. of Kilburn Park Road. Length—1 mile, 0 furlongs, 2 chains.

TRAMWAY No. 4.—A double and single line commencing by a junction with TRAMWAY No. 3 at its termination, and passing thence in a Southerly direction along High Road, Kilburn, Maida Vale, and Edgware Road, into, and terminating in Harrow Road, at a point $1\frac{1}{2}$ chains West of Edgware Road. Length—1 mile, 2 furlongs, 8·5 chains.

The single line will be at the following points:—From a point 4 chains South from centre of Canal Bridge Maida Hill West, for a distance of $2\frac{1}{4}$ chains, and from a point S. of Bell Street to the junction in Harrow Road, 2 chains.

TRAMWAY No. 5.—A double and single line commencing by a junction with the existing Tramway of the Company in Harrow Road near the “Prince of Wales” Public House, and at the South end of Walter-

ton Road, passing in a Northerly direction along that Road, and terminating by a junction with the existing Tramway at the Northern end of Chippenham Road. Length—2 furlongs, 5 chains.

The double line will commence at a point $7\frac{1}{2}$ chains North of the junction with the Harrow Road Tramway by the "Prince of Wales" Public House, and will be continued to within one chain of the junction of the Tramway in Chippenham and Malvern Roads.

TRAMWAY No. 6.—A double line commencing in Cambridge Road by a junction with the existing Tramway of the Company at its termination, thence into Carlton Road, and in an Easterly direction along Kilburn Park Road, at the North-east end dividing out on each side of the cab-rank there into the Edgware Road, and terminating by a junction with TRAMWAY No. 3. Length—2 furlongs, 6 chains.

TRAMWAY No. 6A.—Total length, 1 chain, being a connecting link between TRAMWAYS Nos. 3 and 4.

The Company also propose to extend their line at the present Western end by Willesden Lane to Stonebridge Park.

The Company also apply for the following powers:—

To widen the Harrow Road on its North-east side between points respectively 1 chain South-east of Porteus Road by Messrs. Pickford's stables and a point opposite Dudley Street, and when the said

widening is constructed, to authorise the Company to lay as much of TRAMWAY No. 1 as lies between the points aforesaid as a double line of Tramway along the centre of such road.

For all or any of the purposes of the intended Act, and for the general purposes of their undertaking, to purchase or acquire by compulsion or agreement, and to hold, sell, and let lands and houses or easements therein, and to erect offices, buildings, or other convenience on any such lands.

When, by reason of the execution of any work affecting the surface or soil of any street, road, or thoroughfare, or otherwise, it is necessary or expedient to remove or discontinue the use of a Tramway or any part thereof, to make in the same or any adjacent street, road, or thoroughfare, in any parish or place mentioned in this notice, and to maintain so long as occasion may require, a Temporary tramway, or temporary Tramways, in lieu of the Tramway or part of a Tramway so removed or discontinued to be used or intended so to be.

To provide for the repayment and release of the deposit-fund mentioned in the Harrow Road and Paddington Tramway Act, 1886, and for the abandonment of the portion of Tramway No. 2, authorised by that Act, between its authorised commencement at the "Prince of Wales" Hotel, in the Cambridge Road, and

the commencement of the intended Tramway No. 1 as before described.

The intended Act will incorporate the whole or some of the provisions of the Tramways Act, 1870, with such alterations and amendments as may be deemed expedient, and will enable the Company to exercise the powers granted by that Act as well as the powers hereinbefore mentioned, and will alter and amend as far as may be necessary the Harrow Road and Paddington Tramway Act, 1886, and any other Act or Acts relating to the Company or their undertaking.

West London Tramways.

TRAMWAY No. 12—a portion of which only affecting this parish will commence by a junction with TRAMWAY No. 11, in Uxbridge Road, by the West London Junction Railway Bridge, passing thence Easterly along Uxbridge Road and Northerly along Norland Road, and Easterly along Latimer Road, Bramley Road, Lancaster Road, and Northerly along All Saints' Road and Tavistock Road, and terminating there at a point opposite the South-east corner of the "Metropolitan" Public House, Westbourne Park.

The only portion in this parish will be a proposed double line extending from the Western Boundary and passing by St. Luke's Church, by St. Luke's Road, passing Eastwards from such road for a length of

about $4\frac{1}{2}$ chains, then a single line for a length of about $4\frac{1}{2}$ chains to its termination. Total length in Paddington being about 9 chains.

The Gauge will be the standard 4 ft. $8\frac{1}{2}$ in. The streets interfered with will be Tavistock Road, and a portion of the intersection by Tavistock Crescent.

Paddington and Bayswater

Electric Light and Power Supply Company, Limited.

An application to the Board of Trade under the Electric Lighting Acts, 1882 and 1888, for a Provisional Order to authorise the above Company to supply Electricity for public and private purposes in the Parish of Paddington ; power to construct works, to make charges, to acquire lands, and make arrangements with Local Authorities, to open streets and lay Electric Lines.

The Undertakers ask for power to break up and pass over, along, across, or under the several railways, canals, and tramways in the Parish ; to purchase, hold, or acquire, or take on lease, land, &c., for the purpose of the said Order ; to construct, provide, and lay down the necessary plant ; to open, and break up the soil and pavement of the several streets within the area of supply ; to take up, relay, divert, and alter drains, sewers, mains, and all pipes, &c.

New Sewer Works.

New brick sewers, 1,225 feet in length, and 3 ft. 9 in. by 2 ft. 6 in. sectional area, have been constructed by Mr. E. Vigers in the under-mentioned roads, for the drainage of new buildings in course of erection there, viz. :—

Croxley Road, between Fernhead Road and Saltram Crescent.

Macroom Road, between Denholme Road and Croxley Road.

These sewers are provided with the requisite ventilating openings, manholes, and side entrances. The whole the works have been constructed under the supervision of the Vestry's Officers.

A 12-in. glazed stoneware pipe sewer 240 feet in length, extending from the brick sewer in Orsett Terrace, and continued along the roadway in front of the Houses Nos. 142, 144, 146, and 148, Westbourne Terrace, has been constructed at a cost to the Vestry of £390 8s. 8d., and in which amount is included a pipe ventilating shaft with brick catchpits at the north end of sewer. This sewer was constructed in order that the existing defective drains of the before-mentioned houses, having outlets into a 9-in. defective pipe drain at the rear, might be re-constructed with outlets into the new sewer, and with considerably improved sanitary arrangements.

The total length of sewers now under the jurisdiction of the Vestry is 54 miles, 5 furlongs, and 152 yards.

Special Repairs to Sewers.

The following are the localities in which old brick sewers have been repaired as specified in my Special Report to the Works Committee, on the 26th February, 1890 :—

	Length of Sewers. Feet.
Harrow Road and under Lines' Wharf	78
Bayswater Road, from Ossington Street to Western Boundary of the Parish	120
Market Street, West of Sale Street to Cambridge Place	688
Hyde Park Gardens	195
Moscow Road from Queen's Road to St. Petersburg Place	751
Bark Place	20
Salem Road	183
Total length	<u>2,035</u>

The cost of these repairs amounts to £2,010 3s. 9d.

The above-mentioned sewers had very defective and irregular segmental or nearly flat bottoms, which allowed a considerable quantity of sewage to stagnate in them, and were otherwise in an insanitary condition. They have now been greatly improved. The old brick inverts have been taken out and glazed stoneware invert blocks on concrete bed laid to proper gradients, portions of the side walls cut out and under-pinned

with new brickwork to form a narrower bottom, thus giving increased scouring power to the flow of sewage, so that no deposit will accumulate to cause fetid and noxious gases to be emitted from the sewers.

In addition to the above special works, the defective pipe drain outlets from houses and other premises, together with the brickwork round same, have been repaired, and the outlets trapped with modern stoneware block flap traps, also disused drain mouths bricked up in the following sewers:—

	Disused Drain Mouths Bricked up.	Drain Outlets Repaired.	Drain Outlets Trapped.
Clarendon Street	78	78
Woodchester Street	94	94
Newton Road	2	6	4
Fulham Place	4	...	2
Pickering Place	23
Star Street	13	4	4
Market Street	10
	52	182	182

Total cost, £277 13s. 6d.

To allow of easier access to the sewers in Moscow Road by Ossington Street, and Market Street by Sale Street, new manhole entrances have been constructed, at a cost of £27 6s.

The sum of £238 2s. has been expended in constructing new and repairing old gulleys in Queen's Road during the laying of the wood paving there, so that the levels of roadway and channels have been improved.

Complaint was made to the Sanitary and Public Health Committee by the owner of No. 76, Queen's Road, that the portion of the 9-in. pipe sewer passing under the basement of his premises from Inverness Mews to Queen's Road sewer, was in a leaky and insanitary condition, and caused considerable injury to his property. An examination was made by the Sanitary Inspector and the drain found in the condition as stated. The Vestry then ordered that the defective pipes should be taken up, and new pipes embedded in concrete be laid through the premises, and that the necessary works be carried out forthwith at the cost of the Vestry. This was done at an expense of £45 4s. 7d.

The Vestry of Marylebone having applied to the London County Council, and received their sanction to lay a 12" pipe-drain from St. John's Wood Road into the Sewer in Maida Vale, which is under the jurisdiction of this Vestry, the same was constructed at a cost of £18 8s. 6d. to the Marylebone Authorities.

The works carried out as comprised in the ordinary Sewers Jobbing Works consisted in fixing three hundred and twenty-nine stoneware block flap-traps

at the outlets of house and gulley drains ; also the reconstruction and repair of gulleys and sandpits, the laying of one hundred and ninety-one new stoneware pipe-drains from sewers to old premises in lieu of defective and old brick or pipe-drains. These last-mentioned drains were constructed for private persons at their cost, amounting to £1,411 17s. 5½d.

The sum of £2,451 3s. 7d., which includes the before-mentioned sum, was the actual amount paid to the Vestry's Contractors (Messrs. Neave & Son) for Jobbing Works executed by them during the year.

In June last the Vestry ordered certain Sanitary Works to be carried out at the Vestry Hall premises, so as to improve the existing closet accommodation and drainage. This work consisted of fixing Jennings's patent flush-out closets and apparatus connected therewith in lieu of the old defective valve closets. New drains were also constructed, together with the necessary inspection chambers and disconnecting traps, also ventilating-pipes, &c. The amount expended being £246 10s. 8d.

Applicants have desired examinations to be made from sewers in order to ascertain the condition of their private drains, and if possible rectify any defects found in them. This has been done, and the number of examinations made during the year have been ninety-six, and the cost to the applicants £19 4s.

The old brick-sewers which require periodical cleansing have received the usual attention, the amount of deposit taken therefrom, consisting of grit and sand, has been one hundred and forty-eight loads. The smaller sewers have been flushed with water.

The necessary cleansing of catchpits of gulleys has also been fully maintained.

1,520 loads of slop have been removed and carted away.

The Underground Convenience at Paddington Green has been very much utilised by the general public since its opening. The gates of the Convenience are opened each morning (except Sunday) at seven o'clock and kept open until one o'clock the following morning. On Sundays the gates are opened at nine in the morning and not closed until midnight. One Attendant is on duty from the time of opening until four o'clock, p.m., when he is relieved by another Attendant, who remains until the closing time. Each Attendant is paid 15s. per week.

The official return of the number of persons using the W.C.'s and the Lavatory during the year ending March, and for which a charge of one penny is made in either case, is as follows :—

Use of W.C.'s.		Use of Lavatory.	
18,016 at 1d.,	£75 1s. 4d. ...	971 at 1d.,	£4 0s. 11d.
Total Receipts ...		£79 2s. 3d.	

The working expenses during the year have been :—

	£	s.	d.
Two Attendants' Wages	78	18	6
Lavatory and W.C. Expenses ...	44	4	1
	<hr/>		
Total	£123	2	7
	<hr/>		

In order to obtain an approximate estimate of the number of persons using the Convenience generally, the Attendants enumerated them for three days, as under :—

Sunday, May 31st	967
Monday, June 1st	682
Tuesday, June 2nd	725
	<hr/>
Total	2,374
	<hr/>

The eleven public urinals in the Parish, which are above-ground, are kept in order by workmen for that purpose.

New Buildings.

Large residential flats are in course of erection, one at the corner of Maida Vale and Blomfield Road, and one in Hereford Road, adjoining the "Princess Royal" public-house. The one in Elgin Avenue, by Lanhill Road, has stabling in the basement portion thereof.

Two extensive buildings have been erected as Furniture Depositories, one in Harrow Road, South side, for Messrs. Dixon & Haynes, and the other for

Messrs. Fowler & Chick, in Irongate Wharf Road. Warehouses have also been built on the North side of Market Street and on the East side of Paddington Green.

Ranges of cartsheds and stabling have been erected in Harrow Road, between Dudley House and Messrs. Pickford's premises, for Mr. Whiteley. Stabling has also been erected at the West end of Cuthbert Street and abutting on a portion of the Old Churchyard.

One corrugated iron Church has been constructed on ground lately belonging to the "Thatched Cottage" premises, at the rear of houses on the East side of St. Mary's Terrace.

A portion of a large school building in connection with St. Augustine's Church, Kilburn, has been built on the North-West side of Croxley Road, by Saltram Crescent.

The greater portion of the private dwelling houses erected this year has been in the North-Western portion of the Parish, which is being rapidly filled up.

Notices for the further erection of new buildings have been received by the Vestry from various Builders, so that as soon as these are completed that portion of the Parish will be entirely built over.

The total number of buildings erected during the twelve months is one hundred and sixty-two.

Orders of Vestry were made respecting the drainage of the above-mentioned new buildings.

The construction of the drains from sewers to inspection chambers in forecourts or areas of new buildings, and from thence through the premises, have been carried out under the supervision of the Officers of the Surveyor's Department; the pipe-drains through the houses being tested with water in order to ensure a watertight condition.

Re-naming Streets and Re-numbering Houses.

The following Orders of the London County Council have been carried out, viz. :—

Date of Order.	New Names of Streets.	Old Names of Streets Abolished.	Remarks.
1891.			
Jan. 24th..	Ranelagh Road ..	Cottage Road, Burry Terrace.	42 Houses re-numbered.
„ 31st..	Carlton Vale ..	Carlton Road	Re-named only.
March 24th .	Palace Court ..	Torwood Gardens ..	The name "Palace Court" had been written up some time prior to this Order being made, and the houses numbered as erected.

Lighting Department.

There are now 1,994 ordinary lamps, each burner is estimated to consume 4.6 cubic feet per hour; they have been alight for 3,879 hours each during the year,

or on an average of 10·73 hours per night. The actual consumption of gas per lamp per annum has been 18,107 cubic feet. A meter is attached to one lamp in twenty, which gives about 98 meters, the average of their monthly readings are taken as the consumption of each ordinary lamp. The Gas Light and Coke Company are paid for the gas supplied on this basis, at 2s. 2d. per 1,000 cubic feet.

The lamp service pipes up to the foot of the lamp column are maintained by the Gas Company, and during the year notices were sent them of 190 defective services, which they attended to at once.

Refuge Lamps.—The position, power, and number of these lamps will be found in the accompanying return. See appendix sheet L.

Damages to Lamp-posts.—During the year ten lamp-posts were knocked down, 23 columns broken, 26 head-irons and 24 lanterns broken and damaged by various parties through carelessness or accidents.

Electric Lighting.

In August, 1890, the Metropolitan Electric Supply Company, Limited, obtained an Act of Parliament to confirm certain Provisional Orders made by the Board of Trade, under the Electric Lighting Acts 1882 and 1888, relating to Paddington; and on the 1st of December they commenced laying 3" and 5" cast-iron mains under the public footways, for the purpose of

carrying their supply cables. The frosty weather stopped their progress for a few weeks in January, but since then they have made considerable advancement with their work.

Dusting Department.

During the year 5,313 horses and vans have been engaged in collecting 22,352 loads of dust and ashes, giving a daily average of 72.57 loads per working day, or 4.22 loads per horse per day. From this quantity of rough dust 13,590 chaldrons of ashes, 9,584 chaldrons of breeze, $21\frac{1}{2}$ tons of coals, 19 boats and 18 cart-loads of hard core, 3,954 tons of soft core, $52\frac{1}{4}$ tons of bones, 100 tons of rags, 40 tons of old iron, $3\frac{3}{4}$ tons of various metals, $15\frac{3}{4}$ tons of white glass, and $23\frac{1}{2}$ tons of green glass, have been extracted from the before-mentioned number of loads.

In consequence of the very severe winter during December and January, the canal traffic was entirely stopped for forty days, causing the greatest inconvenience, nuisance, and extra expense in having to deposit the ashes, breeze, and especially the soft core on the Wharves. In fact, had the frost continued for another week, the collection of the dust in the Parish must have been discontinued, owing to the Wharves being entirely blocked with the accumulations. In former reports I have several times mentioned that the disposal of house refuse, sooner or later, must be

by cremation, and I think the day is not far distant when the Vestry will have to seriously consider this important matter.

Slopping Department.

All the dry sweepings, slop, &c., collected by the Vestry's own men is brought to the Dépôt. The latter, when in a fluid state, being deposited in the filtering tanks, so that the water may drain away, the residue-mud being placed into boats and taken away by Canal beyond Southall, under a contract with Messrs. Studds, at 1s. 4½d. per ton, such amount including haulage, tonnage, and shoot.

The quantity collected from the various thoroughfares in the Parish during the year was 30,049 loads, being an excess over former years owing to the wet summer and the severe winter weather. The maximum number of loads of slop and snow brought in in one week being 2,245 and the minimum 158, giving a daily average throughout the year of 97·24 loads. By Canal 26,659 tons of slop, &c., has been boated away in 767 boats; 7,826 horses and vans have been employed collecting, averaging daily 25·37, or at the rate of 3·78 loads per horse per day.

Cleansing the Public Streets.

This work is carried out by gangs of sweepers, and whenever practicable by horse-scraping and

sweeping machines, also by the employment of street orderly boys. The main thoroughfares and most important streets are swept daily, especially the wood-paved roads—periodically the latter are washed and cleansed—other roads, where the traffic is not so great, are swept two or three times weekly, as occasion requires.

Frosty Weather and Snow Clearing.

I may mention that the frost set in about the end of October, and continued more or less throughout November, December, and January. Snow first began to fall on the 18th of December, on which date the Canal was frozen up and the traffic stopped, and this continued for a space of forty days. On the 27th and 28th of December, 4 to 5 inches of snow fell, the weather was extremely cold, and the frost continued till the 22nd January, 1891, with occasional slight snow falls. February was fairly fine, but from the 16th to the 22nd, a dense fog surrounded the Metropolis. March came in bright, fair and dry, the water carts being sent out for five days ending on the 7th of the month; then the weather changed, and on the 11th 4 inches of snow fell, accompanied with very cold winds and sharp frosts. Everything was done to clear the public thoroughfares. A fall of snow invariably calls forth many unnecessary complaints and impracticable suggestions, and numerous persons take the matter up very warmly, and amuse themselves by

writing to the public press ; but in no instance can a single practical suggestion be found that would assist local authorities in grappling with the inconvenience. The following simple calculations ought to convince any reasonable person how utterly impossible it is to clear the streets, or even partially clear them in this parish, or any other parish, in a few days, without incurring a most unjustifiable expenditure. For instance, the first and most important matter, irrespective of money, is to consider where to stack a large quantity of snow at a few hours' notice. A large depôt must always be ready and clear, with good roads to travel over, easy of access for working a large number of carts, suitable and proper drainage for carrying quickly away the dissolved snow should a sudden thaw or rain set in ; and also, being able at a few hours' notice, to procure the enormous number of men, horses, and carts necessary for the work.

Taking four to six inches of snow in depth, and in many parts of the parish this depth is greatly increased owing to the clearance of snow from roofs and gardens, which is all thrown into the roadway, in many instances after the roads have been cleared ; and taking an average width of roadway and footpaths at 40 feet ; the weight of a cubic foot of snow at $21\frac{1}{2}$ lbs., less $\frac{1}{3}$ due to compression in sweeping and filling into carts, this will give about 900 tons, or 1,618 cart loads of 58 cubic feet each,

per lineal mile, or over the 50 miles of parish roads 80,900 cart loads, equalling in weight 45,000 tons. If a wharf or field could be obtained to deposit this enormous quantity. and assuming a cart will collect far and near eight loads per day to the shoot, it would require 10,111 horses and carts to do the work in one day; the carting and boating away of this quantity would entail an expenditure of at least £12,000. To this amount must be added the work of ploughing and sweeping the streets, stacking, rent of depôt, depreciation of plant, &c., which I estimate would be, at least, $\frac{1}{5}$ of this amount, or upwards of £14,500. Of late years salt has been freely used by many of the Metropolitan parishes as a speedy relief and assistance in the removal of snow off wood paved and asphalte roads, and a large quantity was used in Paddington.

I may mention that this parish does not possess the same facilities as those having easy access to, or abutting on the River Thames, into which collected snow may be readily tipped, as was done by the City Sewers Commissioners, the Strand Board of Works, St. George's, Hanover Square, Chelsea, and other Vestries.

In some parishes the snow was shot down the manholes into the sewers, but this practice I should certainly not recommend the Vestry to adopt.

Unfortunately I was confined to my house during the winter, but I have no hesitation in saying that all worked with a will both early and late, and the incessant work day and night, owing to the variable and severe weather, was most trying ; and I believe everything was done to carry out the work in a satisfactory and economical manner.

The following General Directions for Snow Clearing will furnish you with information of the proceedings I always adopt attending a fall. These directions have been amended this year, and are issued annually, at the beginning of October, to each of the foremen, so that they may know how to proceed with the work when necessary :—

PADDINGTON VESTRY.

HIGHWAY AND WORKS DEPARTMENT.

General Directions for Snow Clearing.

Immediately after a Snow-fall, and as quickly as the men can be assembled, start a responsible Foreman and gang to clear the Mail and Cab Route from the Great Western Railway, viz. :—Beginning at London Street, Grand Junction Road to Cambridge Place, Radnor Place, Somers Place, Southwick Crescent and Street, Connaught Street and Square (West side), Hyde Park Square (South side), and Chester Place,

The snow to be collected after heaping, viz.:—
From London Street, Cambridge Place, Southwick Street, Connaught Street, Connaught Square, and Seymour Street, and from all corners of Streets, in other parts, it is to be stacked in ridges, grips being cut every 6 or 8 feet for drainage, all crossings, channels, and gulleys to be kept clean.

PLOUGH A.

As quickly as possible start the men, horses, and Plough along North Wharf Road, Green Street, Harrow Road to Edgware Road, to the Junction of Praed Street, turn round and go up the centre of Edgware Road and Maida Vale, to the Western Boundary, returning the same route to save time and horses, to Praed Street, which plough to Spring Street, down Spring Street, Grand Junction Road to Upper Porchester Street, Porchester Place, Connaught Street and Square, Stanhope Place. **Get a relay of horses here.** Go to Eastern Boundary, and then start down the Bayswater Road to the Western Boundary, **clear as quickly as possible bulk of snow on the South side of roadway, and heap the same on the Park side footpath,** cutting grips 6 or 8 feet apart for drainage, keeping all crossings, channels, and gulleys clear. Eight or nine able men from the road-picking or spreading gang to follow the Plough to clear ridges that are left too high by the Plough at the

intersections of Streets, and all corners or any other places, so as to make all clear for the traffic.

Arrange for gangs of men to clear Praed Street and Craven Road to Devonshire Terrace, and collect snow opposite shops and corners of Streets.

The small Scrapers to Plough Eastbourne Terrace from Bishop's Road end, driving the snow on the Eastern side, cutting grips as before described, afterwards go into South Wharf Road in order to get the Railway Van Route open.

PLOUGH B.

To start from North Wharf Road, down Green Street, turning Westward, ploughing Harrow Road by Paddington Green, Dudley Grove and over Bishop's Road Bridge, Bishop's Road, Westbourne Grove to the Western Boundary, returning back again to the Royal Oak, turning up Porchester Road over the Lord Hill Bridge, going to the left up Harrow Road, over the Lock Bridge to the Western Boundary. **Get a relay of horses here.** Returning back to the Prince of Wales Public House, through Carlton Terrace and Bridge, Great Western Road, Westbourne Park Road to Porchester Road, over the Lord Hill Bridge, turning to the right, up Harrow Road to Westbourne Terrace Bridge, over same to Bishop's Road.

Eight or nine able men from the road-picking or spreading gang to follow the Plough to clear ridges that are left too high by the Plough at the intersections of Streets and all corners, clear away from all shops and dangerous places.

Foremen of gangs to send men to open up Richmond Road, Blue Omnibus Route.

PLOUGH C.

To plough the first thing from Dudley Grove, Bridge Terrace, Warwick Road, Formosa Street, and Shirland Road, opening up the Kilburn Omnibus Route to the Chippenham Hotel.

Clear the centre of Fernhead Road at both ends for Omnibus traffic.

Foremen of gangs to send sufficient men to open up Walterton Road, from Harrow Road to the Chippenham Hotel, Blue Omnibus Route.

Also send men to open up the Omnibus Route, Westbourne Park Road, by St. Stephen's Church, Talbot and Cornwall Roads, to the Coal Wharves.

Also open up Amberley Road from Harrow Road, Formosa Street, a portion of Blomfield Road, to Warwick Road Bridge approach, thence down Blomfield Road to the Edgware Road.

Gangs to open up Queen's Road, and Clifton Gardens and Road from Warwick Road to Edgware

Road, beginning at Clifton Road end. Collect snow from shops at Clifton Road, and where requisite in Queen's Road.

The snow must be collected from all **contracted places, and from fronts of shops**, especially by Edgware Road to Maida Hill West, and by junction of Harrow and Edgware Roads to Praed Street, Praed Street and Craven Road, Dudley Grove, Bishop's Road to Westbourne Terrace, Porchester Road, through Westbourne Grove to the Boundary, as also by Queen's Road, South End, Porchester Road to Westbourne Park, Harrow Road from Westbourne Terrace North to the Western Boundary, especially by sides of the Tramway. Also from all Streets where **vaults, areas, or low lying localities are likely to be flooded consequent upon a sudden thaw setting in.**

All dangerous heaps must be kept down or cleared away from the corners of Streets where there are large accumulations caused by the clearing of the angles.

All crossings must be cleared the first thing, also channels and gulleys, and the foremen of gangs must especially see that men are told off to do this work in their several districts.

Wherever it is practicable, the snow is to be stacked at the sides of Streets in ridges, the ends

to be well sloped down to prevent accidents, sloping grips from 6 to 8 feet apart, to be cut through sufficiently wide to admit of foot-passengers to cross the roads, and for drainage purposes.

Should the wood paving or any of the roads after snow clearing be found slippery, ashes, fine hoggin, or Thames shingle, must be immediately spread over the surface.

Should the Canal be frozen and the navigation stopped, or there is not any space on the Wharves to deposit the collected snow from any of the before-mentioned localities, it must be carted and properly stacked, and (if necessary) lighted and watched at night, in any of the following places that are nearest to the point of collection.

On the Southern footpath of the Uxbridge Road, by Park Railings.

By Garden Enclosure, Connaught Square.

Hyde Park Gardens, by Stable Wall.

Sussex Square, by Garden Enclosure.

Warwick Road, in centre, between Rest-lamp, near Blomfield Road, and the Cab Rank.

Sutherland Avenue, between the large Rest-lamps.

Elgin Avenue, on the Southern footpath between Lauderdale Road to within one hundred feet West-

ward of the present houses at the Eastern end of Elgin Avenue.

Salt to dissolve the snow may be used on the wood or granite cube paving, and on no account to be used on the surface of any of the other roads.

The "**Clerk of Works**" to see that these directions are fully carried out, and to **confer daily** with the Surveyor or the Surveyor's first Assistant.

GEO. WESTON,

Surveyor.

SURVEYOR'S DEPARTMENT,

VESTRY HALL, HARROW ROAD,

January 10th, 1891.

Sanding Frosty Roads.

The length of time the frost lasted, and the continuous falls of snow, necessitated the men, horses, and sanding machines being sent out during the day, late at night, and early in the morning, scattering sand, shingle, and ashes over the surface of the roads. In fact, both men and horses were quite knocked up with the strain put upon them. 603 horses and carts were out on 46 occasions, the total number of hours being 2,627; 1,292 cubic yards of shingle and 814 chaldrons of ashes were used.

Carting Road Materials and General Work.

During the year, 2,657 horses and carts were engaged in this class of work for 262 days, giving an average of 10·14 per day ; more horses being required this year owing to the carrying out of wood paving renewals and new wood paving works in the Harrow Road and Queen's Road.

Road Watering.

The water-vans were sent out on 124 days, 3,978 horses and vans being engaged, giving an average of 32·08 per day.

The quantity of water used and the cost thereof, including that used for road-making purposes, being as follows :—

	Gallons.		
Grand Junction Water Co. ...	19,948,080	...	£581 16 4
West Middlesex Water Co. ...	5,057,250	...	£170 3 1
	<u>25,005,330</u>		<u>£751 19 5</u>

The number of stand-posts, with meters attached, being :—On the mains of the Grand Junction Water Company, 43 ; and on the West Middlesex Water Company, 10 ; the indices being taken fortnightly.

Horses.

The losses by deaths and sales during the year have been as follows :—

DEATHS.

No.	Description.	When Purchased.	Date of Death.	Cause of Death.
			1890.	
105	Chestnut Gelding	March, 1890	May 17th	Twisted gut.
113	Bay Gelding ...	„ 1890	Dec. 24th	Influenza.
84	Chestnut Gelding	„ 1888	Dec. 26th	Broken blood vessel and ruptured liver.
106	Blue Roan ...	„ 1890	Dec. 29th	Influenza.
54	Black Gelding ...	„ 1885	Dec. 31st	Influenza.
			1891.	
77	Chestnut Gelding	„ 1887	Jan. 2nd	Influenza.
71	Bay Gelding ...	„ 1887	Jan. 3rd	Influenza.
72	Black Gelding ...	„ 1887	Jan. 7th	Influenza.
27	Roan Gelding ...	„ 1881	Jan. 9th	Influenza.
119	Black Gelding ...	„ 1891	March 12th	Inflammation and acute attack of congestion of the lungs.
25	Bay Gelding ...	„ 1881	March 20th	Inflammation.

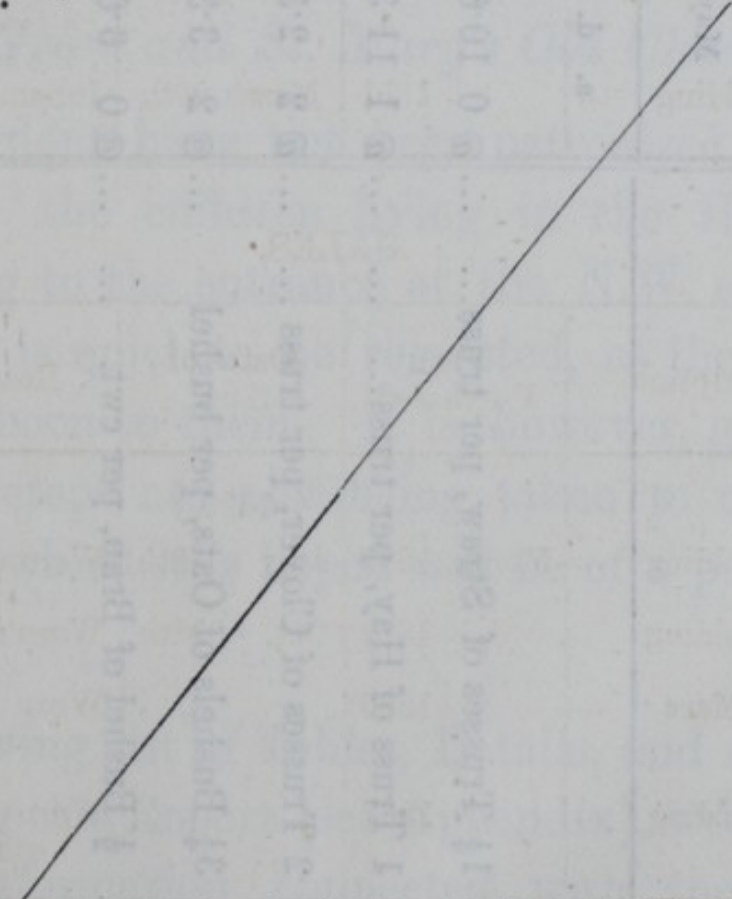

SALES.

No.	Description.	When Purchased.	Date of Sale.	Reason for Selling.
			1890.	
59	Bay Gelding ...	March, 1885	July 9th	Worn out.
30	Bay Gelding ...	„ 1882	Oct. 14th	Worn out, lame.
65	Black Mare ...	„ 1886	„ „	Worn out, lame, and cankered foot.
78	Bay Gelding ...	„ 1887	„ „	Worn out, lame, and cankered foot.

The mortality amongst the horses has been very great during the end of December and early part of January, owing to the exceptionally severe weather. Influenza in its severest form was most prevalent, not only in the Vestry's stud, but generally throughout London. Every care and attention was bestowed upon them, both by the Horsekeeper and Veterinary Surgeon. This has been the heaviest death-roll since the Vestry became possessed of horses, now fifteen years.

Horse Fodder.

The following Tenders for the supply of horse fodder were accepted during the year, the average cost per horse per week for keep and bedding being 15s. 4·62d. :—

One Week's supply per Horse.	Tenders Accepted.											
	May, 1890.				July, 1890.				February, 1891.			
	s.	d.	s.	d.	s.	d.	s.	d.	s.	d.	s.	d.
1½ Trusses of Straw, per truss... ..	@ 0	10·66	=1	1·32	@ 0	11	=1	1·75	@ 0	10·33	=1	0·91
1 Truss of Hay, per truss... ..	@ 1	11·33	=1	11·33	@ 2	1	=2	1	@ 1	10·50	=1	10·50
2 Trusses of Clover, per truss	@ 2	2·5	=4	4·10	@ 2	5·83	=4	11·66	@ 2	5·16	=4	10·32

Cost per horse per week				14 11·52				15 8·48				15 5·88

Artizans' Work.

The general Farriers' work and miscellaneous repairs have been carried out by Artizans in the employ of the Vestry at the Works Department, including the following Smith's work for the Highway Department:—

Pickaxes lined and Steeled.	TOOLS SHARPENED.			Paving Hammer Heads steeled.
	Pickaxes.	Chisels.	Paving Hammers.	
338	9,582	951	8	19

Paddington Green and St. Mary's Old Churchyards.

These gardens have not been patronized so much this year by the children living in the Hall Park district, owing to the entrance at the N.W. end being closed. This is much to be regretted, as the grounds were a great boon to them. It is, however, gratifying to find that steps are now being taken to obtain an opening, and which it is hoped will be of a permanent character.

The following list of Tables, Details, and Accounts accompanying this Report (see Appendix), will furnish interesting information connected with the several

matters carried out by the Works and Lighting Departments :—

A—Dusting, Slopping, Watering, Carting Roadway Materials, and General Expenses incidental to the Works Department.

B—Plant Capital Account.

C—Table shewing the Cost of Dusting for the past 11 years.

D—Table shewing the Cost of Slopping for the past 11 years.

E—Road Sweeping and Cleansing Account.

F—Public Lighting Account.

G—Miscellaneous Articles in Store.

H—Miscellaneous Tools in use.

I—Defects of Un-metered and Metered Lamps.

J—List of Plant fixed in the Public Streets.

K—Experimental and Testing Apparatus fixed at the Vestry Hall.

L—List and positions of Refuge and Special Lamps.

M—Table of Lighting Hours, &c., &c.

I am,

Gentlemen,

Your obedient Servant,

GEORGE WESTON,
Surveyor,

Professional Associate Surveyors' Institute.

XXII.—REPORT OF THE BURIAL BOARD.

VESTRY HALL, HARROW ROAD,

July 13th, 1891.

SIR,

I am instructed by the Burial Board to transmit to you Statements in abstract of the Account of the Board, and of the Incumbent of Paddington, for the Year ending 25th March, 1891, certified by Mr. Wilde (of Messrs. Wilde and Venables, Chartered Accountants), and audited by the Parochial Auditors.

A Statement showing the amount of Fees received by the Incumbent and the Board during the past three years is likewise appended.

From the balance at the commencement of the financial year a further sum of £1,500 was paid over to the Vestry account, making a total of £39,100 since 1870, when the loan raised for the purchase and laying-out of the ground was cleared off.

The following shows the number of burials which took place from the 31st March, 1890, to the 1st April, 1891 :—

CONSECRATED GROUND.

Parishioners.	Non-Parishioners.	Total.
797	369	1,166

UNCONSECRATED GROUND.

Parishioners.	Non-Parishioners.	Total.
739	431	1,170

During the same period there were 228 graves purchased.

In the preceding year the number of interments in the Consecrated Ground was 1,074, and in the Unconsecrated Ground also 1,074.

I am, SIR,

Your obedient Servant,

HENRY CECIL,

Clerk to the Board.

To F. Dethridge, Esq.,

Vestry Clerk,

Paddington, W.

PADDINGTON BURIAL BOARD.

June 29th, 1891.

REPORT

OF THE

Commissioners for Public Baths and Washhouses

FOR THE

PARISH OF PADDINGTON,

For the Year ending 25th March, 1891.

The Commissioners, in submitting their Annual State- Accounts. ment of Accounts to the 25th March, 1891, duly audited, have to report:—

That there has been a slight falling off in the receipts for the Year of £82 16s. 10d., entirely owing to the wet summer. The expenditure, which shows a decrease of £278 4s. 6d., has been kept down as much as possible, notwithstanding the extensive works undertaken, which are mentioned in other parts of this Report.

The Comparative Statement of the number of persons using the Baths and Washhouses during the past three years is as follows:—

Compara-
tive
Statement
of No. of
Bathers
and
Washers.

YEAR.	SWIMMING BATHS.			PRIVATE BATHS.			Total No. of Bathers.	Wash- houses.
	Men.	Women.	Total.	Men.	Women.	Total.		
1888-89	68,164	9,084	77,248	69,172	19,111	88,283	165,531	19,385
1889-90	73,467	12,439	85,906	69,830	21,036	90,866	176,772	18,793
1890-91	68,296	12,065	80,361	70,718	21,571	92,289	172,650	20,118

The
Building.
(Ladies
Swimming
Bath).

In their last Report the Commissioners mentioned that a leakage had been discovered in the Ladies' Swimming Bath, which necessitated the closing of that Bath. This increased to such an extent that the Commissioners had to call on the Architects for a report, and they suggested "the laying of a drain just above the level of the area on the Commissioners' side of the wall, and beneath the concrete of the Bath." This, however, had no effect, and the Commissioners therefore determined themselves to take the matter in hand. On taking up a part of the Bath it was found that when the same was enlarged in 1874 the screeds had been left in, and had decayed; and that the concrete was found to be cracked in several places, through which the water was running away at the rate of about 1,000 gallons an hour. It was also discovered that the concrete of the added portion of the Bath was of a less thickness than the older part. As there was no time to be lost, the season having already commenced, the Commissioners at once had the whole of the defective part removed and renewed with concrete of a proper thickness. The work was satisfactorily completed on the 5th May, and the Bath re-opened, the expense incurred under this head being £344 7s. 3d.

(Sanitary
Work.)

In order to complete the sanitary improvements commenced last year, extensive works have been executed at a cost of £192 13s., and the Commissioners consider that the Building is now in a state of sanitation quite up to the requirements of modern science.

On the 3rd February it was reported that the plates Machinery.
on the under part of one of the boilers had been found to
be worn out. On a thorough investigation being made,
and in order that there might be no stoppage of the work
of the Institution, it was resolved that the brick-work
should be removed, the defective plates cut away, and
new ones inserted. The boilers have been in constant
work, night and day, since the opening of the Baths in
1874 (17 years), and the Commissioners feel it is quite
possible that during the next year it may be necessary to
have the whole of them renewed.

The other parts of the machinery are in satisfactory
working order, the new engine purchased last year adding
greatly to the efficiency of this department.

In the quinquennial re-assessment of the Parish this Assessment.
year the assessment of the Baths was raised by the
Overseers from Gross Value £100, Rateable Value £84,
to Gross Value £2,000, Rateable Value £1,668. The
Commissioners felt that this was an excessive charge, and
entered an appeal before the Assessment Committee,
when the same was reduced to Gross Value, £1,500,
Rateable Value, £1,250.

This will entail an increase in the expenditure on
Rates Account of about £260, and seriously hamper the
resources of the Institution.

Upon an examination being made of the receipts Sunday
Closing.
during the past three years, it was found that the opening

of the Baths on Sunday mornings during the months of November, December, January, and February, was practically attended with loss on the working expenses account, and the Commissioners, on the 1st December last, decided to keep the Baths closed on Sunday mornings until the end of February, at the same time extending the hour for closing the Baths on Fridays from 8.30 till 9, p.m., and Saturday evenings from 9 till 9.30.

The Commissioners regret that owing to the large arrears in the matter of repairs to the Building which they have had to meet during the past three years, they have been unable to partially relieve the Vestry in the payment of the half-yearly instalments of redemption and interest on loans, and with the additional burden now placed upon them for rates, their hope for the future in this respect is uncertain of realization.

They, however, feel satisfied that the Vestry will not be slow to recognize the fact that they have effected a saving in the working expenses, without in any way diminishing the efficiency of the establishment, and that, apart from this, the question of finance entirely depends upon weather conditions and temperature.

The following Statements are appended to this Report :—

Statement of Accounts for the Year ending Lady-day, 1891, with Statement of Outstanding Assets and Liabilities.

Number of Tickets in Stock, given out and sold, during the twelve months, which will be found to agree with the first three columns upon the Receipt side of the audited Cash Account.

XLI.—SCHEDULE OF THE PAROCHIAL CHARITIES.

This Schedule gives the names and addresses of the Trustees, the description and income of the Property, and the mode of distributing the Funds ; prepared by the Vestry Clerk, pursuant to the following Section of the “ Metropolis Local Management Act, 1855 ” (18 and 19 Vic. c. 120) :—

“ 199.—Every such Vestry as aforesaid shall
“ cause to be made out once at least in every year,
“ a list of the several freehold, copyhold, and lease-
“ hold estates, and of all charitable foundations and
“ bequests if any belonging to the parish, and under
“ the control of the Vestry, the list to contain a
“ true and detailed account of the place where such
“ estate or charitable foundation may be situate, or
“ in what mode and security such bequest may be
“ invested, specifying also the yearly rental of each,
“ and the particular appropriation thereof, together
“ with the names of the persons partaking of their
“ benefit (except where such benefit shall be allotted
“ to the poor of the parish generally), and to what

“amount in each case, and also stating the name
“and description of the persons in whom such
“estates are vested, and the names and description
“of the trustees for each charity; and such lists
“shall be open for the inspection of the ratepayers
“at the office of the Vestry Clerk at the same time
“with the accounts when audited, according to the
“provisions of this Act.”

Name of Charity.	Names and Descriptions of the Trustees for the Current Year.	Detailed Description of the Property.

Borough of Paddington.

SANITARY REPORT

For the Year 1890.

BY

JAMES STEVENSON, M.D.

Medical Officer of Health.

APPENDIX No. I.

Report of the

Board of Health.

REPORT

MEDICAL OFFICE OF HEALTH

SANITARY REPORT

For the Year 1890.

BY

JAMES STEVENSON, M.D.

Medical Officer of Health.

Borough of Paddington.

REPORT

OF THE

MEDICAL OFFICER OF HEALTH

For the Year 1890.

To the Vestry of the Parish of Paddington.

GENTLEMEN,

With the return of the Census year the opportunity recurs of determining with approximate accuracy the birth and death-rates in the Parish, of revising the estimates previously made, and of answering with greater precision and trustworthiness the questions which, with multiplied diversity, the study of vital statistics suggests.

For statistical purposes, the Registrar-General estimates the population to the middle of the year,

and it is difficult to form a correct estimate during the interval between the Census periods. Accordingly, as in 1881, the recent Census shows that, in too many instances, the estimates were incorrect, the actual increase of the urban population of the country having been much less than that estimated, with the result that all the rates and calculations based upon the over-estimates are incorrect, and require to be revised. The error has no doubt mainly arisen from the assumption that the annual rate of increase was the same as that shown by the Census of 1881, and partly from not sufficiently taking into account the continuous decline in the birth-rate and the large emigration of the last ten years.

During the decennium 1861-71, the population of the Parish increased at the rate of 27·7 per cent., and during that of 1871-81 at the rate of 10·7 per cent., whereas during that of 1881-91, according to official returns, the rate was only 9·9 per cent.

In the autumn of 1890, I estimated the population of the Parish as a whole to the middle of the year 1891 at 118,736; the Registrar-General's estimate to the same date, based upon the unrevised enumerated population of last April, is 117,838, the difference being only 898.

In the two Sub-districts of the Parish—St. Mary's and St. John's—the difference between the figures of

the enumerated and of the estimated population is much greater, more particularly that of St. John's.

1891.	Paddington.	St. Mary's.	St. John's.
Enumerated Population ...	117,838 ...	84,156 ...	33,682
Estimated do. ...	118,736 ...	82,091 ...	36,645
	<hr/>	<hr/>	<hr/>
	898	2,065	2,963

I venture to express the opinion that my estimate of the Parish as a whole, and of its two Sub-districts, more nearly represents the actual population of Paddington than do the figures of the Registrar-General. It is to be borne in mind that the Census was taken on Sunday, the 5th day of April, one week after the Bank Holiday, that such of the parishioners as are in the habit of going out of town from Saturday to Monday would not be included in the enumeration, nor would the much larger number of those who prolonged their holidays beyond the 5th April. These remarks apply to the Parish as a whole and to its two Sub-districts, more particularly to that of St. John's, in which the more leisured and wealthier parishioners usually reside. The Superintendent Registrar of the Parish assures me that, in a large number of the houses in the South part of the Parish, at the time the Census was taken, there were only the servants in occupation, the families being out of town.

In 1871, the enumerated population of St. John's Sub-district was 38,085; in 1881 it was 37,330, showing a decrease of 755; and in 1891 it is returned as 33,682, showing a further decrease of 3,648 since 1881.

In my first Annual Report (1875) I said: "It is not unlikely that we may see in St. John's what is taking place in the central districts of the Metropolis, viz., a decrease of population, arising not from the same causes—the incursion of railways, the opening up of new streets, &c.—but from the wealthy displacing the more numerous poor;" thus showing that I had anticipated a decrease in the population of St. John's, but not to the extent indicated by the official figures. Believing, for the reasons above stated, the official (Census) figures to be incorrect, I cannot accept them, and have throughout this report based the calculations upon the estimated population.

BIRTHS AND DEATHS.

During the fifty-three weeks of the registration year 1890, ending 3rd January, 1891, 2,901 births and 2,326 deaths were registered in Paddington.

Births.

Of the 2,901 births, comprising 1,443 male and 1,458 female children, 2,389 occurred in St. Mary's and 512 in St. John's Sub-district.

The proportion of males to females among the children born in the Parish was 100 males to 101 females, whereas in the Metropolis it was 100 males to 97 females.

The births were most numerous during the first and least so in the fourth quarter of the year.

The ratio of births to the entire population of the Parish was 1 to every 41 inhabitants, or 24·4 per 1,000 inhabitants of all ages.

In St. Mary's Sub-district the ratio of births to the population was 1 to every 34 inhabitants, or 29·1 per 1,000 living.

In St. John's the ratio of births to population was 1 to 72, or 14·0 per 1,000 inhabitants.

Some of the preceding particulars are shown in the subjoined table :—

Sub-Districts.	Estimated Population.	Births.	Ratio of Births to Population.	Rate per 1,000.
St. Mary's	82,091	2,389	1 to 34	29·1
St. John's	36,645	512	1 to 72	14·0
Paddington	118,736	2,901	1 to 41	24·4

The Birth-rate for London was 29·1 per 1,000
 „ „ England & Wales was... 30·0 „

Deaths.

The total number of deaths registered in Paddington during the year was 2,326. Of this number, 280 were of non-parishioners who died in St. Mary's Hospital, 39 were of non-parishioners who died in the Children's Hospital, and 3 were of non-parishioners who died in the Lock Hospital, making a total of 322 non-parishioners who died in the parish.

Deducting these non-parishioners, it will be seen that 2,004 parishioners died actually in Paddington.

To this number must be added the deaths of 100 parishioners in extra-parochial hospitals and public institutions, making a corrected total of 2,104—1,029 males and 1,075 females—equivalent to an annual death-rate of 17·7 per 1,000 inhabitants.

The natural increase of population from the excess of births over deaths was 797, as compared with 1,199 in the previous year.

Of the 2,104 deaths, 1,602 occurred in St. Mary's and 502 in St. John's Sub-district. The deaths in St. Mary's include 30—14 males and 16 females—in the Workhouse, and 142—82 males and 60 females—in the Paddington Infirmary.

The deaths were most numerous during the first, and least so in the third quarter of the year.

The following table shows the ratio of deaths to the population, together with the death-rate per 1,000 of the population of the parish and of its two Sub-districts :—

Sub-Districts.	Estimated Population.	Deaths.	Ratio of Deaths to Population.	Death Rate per 1,000.
St. Mary's	82,091	1,602	1 to 51	19·5
St. John's	36,645	502	1 to 73	13·7
Paddington	118,736	2,104	1 to 56	17·7

In 1890 the Death-rate was in London	20·3
Do. do. in Edinburgh	20·0
Do. do. in Glasgow	25·3
Do. do. in Dublin	26·4
Do. do. in England & Wales		19·19

The death-rate from all causes in each one of the five groups of districts into which London is divided is shown as under :—

				Per 1,000 Inhabitants.
North Districts	18·1
West	„	18·2
South	„	18·8
East	„	23·8
Central	„	30·7

The subjoined figures showing the number of deaths from all causes in Paddington during each of the last ten years may be more intelligible to some than when expressed in the form of a death-rate :—

Years.					No. of Deaths.
1880	1,667
1881	1,679
1882	1,766
1883	1,762
1884	1,802
1885	1,877
1886	1,909
1887	1,785
1888	1,916
1889	1,664
1890	2,104

When considering these figures, not only must the annual increase of population (averaging more than 1,000 a year) be borne in mind, but also the fact that since 1885 the deaths of parishioners in out-lying

Public Institutions have been included. The 100 deaths of parishioners—76 from St. Mary's Sub-district and 24 from St. John's—which occurred in 1890 in the following extra-Parochial Hospitals and Institutions, are throughout this Report dealt with in the same manner as if they had actually taken place in the Parish, and are assigned in the Tables to the Sub-districts from which the deceased were admitted:—

TABLE III.—Mortality at different Ages.

Sub-Districts.	Under 1 Year.	Under 5 Years.	65 Years and Upwards.	Percentage of Deaths of Infants under 1 year to Registered Births.	Percentage of Deaths of Children under 5 years of Total Deaths.
St. Mary's ..	389	614	365	16·3	38·3
St. John's ..	66	116	132	12·9	23·1
Paddington ..	455	730	497	15·7	34·7

During the year there were 455 deaths of infants under one year of age, 730 of children under five years of age, and 497 of persons aged 65 years and upwards.

The rate of infantile mortality in Paddington was 157 per 1,000 registered births. In London the rate was 163, and in the 27 largest provincial towns it ranged from 135 in Portsmouth to 241 in Preston.

ZYMOTIC DISEASES.

Small-pox caused no death in Paddington, nor did any case come under the notice of the Sanitary Department. In London only 4 deaths occurred, being the fifth successive year in which London has been practically free from the disease.

Measles caused 77 deaths—65 in St. Mary's and 12 in St. John's Sub-district—equivalent to an annual rate of 0·65 per 1,000 inhabitants. In London the

rate was 0·73 per 1,000 inhabitants, the average annual rate during the preceding decennium (1880-1889) having been 0·58.

In his Annual Report, 1889, the Registrar-General remarks "it is noteworthy that while the mortality from most diseases has in late years shown a large decrease, the mortality from measles has on the other hand, in three of the past five years, been in great excess." During the last ten years, 1881-90, the number of deaths from measles has greatly exceeded that from scarlet fever, the notification of which is made compulsory under the Infectious Disease (Notification) Act, 1889. Of the 3,291 deaths from measles in London in 1890, mostly of children under 5 years of age, a number nearly quadruple that from scarlet fever, and the highest recorded during the last 50 years, it may be safely affirmed that the greater number were preventable. If preventable, the very pertinent question arises why not prevented? Not only is no hospital provision made, except to a very limited extent in Parochial Infirmarys, to prevent the spread of the disease by the isolation of patients, or to protect them from the secondary affections which occasion their fatality, but the notification of measles is not even made compulsory.

Scarlet Fever caused 6 deaths—5 in St. Mary's and 1 in St. John's Sub-district—equivalent to an annual rate of 0·05 per 1,000 inhabitants, as compared

with 0·07 in the preceding year. 99 cases—87 from St. Mary's and 12 from St. John's Sub-district—were removed to Hospital, 114 cases being treated at home.

In London the rate was 0·19 per 1,000 inhabitants, the average annual rate during the preceding decennium having been 0·39.

Diphtheria caused 45 deaths in Paddington, as compared with 39 in the preceding year; 34 of the deaths occurred in St. Mary's and 11 in St. John's Sub-district. The rate was 0·38 per 1,000 inhabitants.

All the houses in which the deaths occurred were carefully inspected, attention being specially directed in each case to the condition of the water supply and to the soundness of the house-drain, as proved either by the water-test, or by the smoke-test, or by the peppermint-test. In the large majority of cases defects of some sort were discovered, and subsequently made good.

It must not be inferred from these observations that sewage *per se* is capable of producing diphtheria. For its production there are probably two pre-requisites, a specific micro-organism and a suitable site for its development. Foul air, whether from cess-pools, drains, or sewers, is recognised as capable of producing sore throat, and it may be fairly assumed that such a condition favours the development of the disease, which primarily and most frequently affects

the mucous membrane of the throat, though it sometimes attacks other mucous surfaces and even wounds.

That dirt, damp, and insanitary surroundings are conditions favourable to the propagation of the disease and its subsequent development, I am inclined to believe, but that to these must be added the specific diphtheritic virus.

In my first Report I expressed the opinion regarding the zymotic diseases that "none of them have any self-originating power; they are not generated in the system by any abnormal processes of nutrition or secretion; they are not begotten of dirt, poverty, or neglect, though these greatly aid their extension; they are the product of a distinct virus, conveyed directly or indirectly from one person to another, and they manifest their potency and individuality by producing the same diseases in others." To that opinion I adhere.

The localities in which deaths from this disease occurred are shewn in Table V_A.

In London the rate was 0·32 per 1,000 inhabitants, the average annual rate during the preceding decennium having been 0·23.

Whooping Cough caused 82 deaths—67 in St. Mary's and 15 in St. John's Sub-district—equivalent to an annual rate of 0·7 per 1,000 inhabitants, as compared with 0·22 in the preceding year.

In London the rate was 0·73 per 1,000 inhabitants, the average annual rate during the preceding decennium having been 0·69.

Fever (Typhoid) caused 10 deaths—5 in St. Mary's and 5 in St. John's Sub-District—equivalent to an annual rate of 0·08 per 1,000 inhabitants, as compared with 0·14 in the preceding year.

In London the rate was 0·15 per 1000 inhabitants, the average annual rate during the preceding decennium having been 0·22.

Diarrhœa caused 62 deaths—53 in St. Mary's and 9 in St. John's Sub-district—equivalent to an annual rate of 0·52 per 1,000 inhabitants, as compared with 0·54 in the preceding year.

In London the rate was 0·61 per 1,000 inhabitants, the annual average rate during the preceding decennium being 0·76.

Disinfection.

The disinfection of premises, of small articles of clothing, and of furniture, was, as hitherto, done without charge by the Sanitary Inspectors. Bedding, carpets, and large woollen fabrics belonging to the poor are cleansed and disinfected by Messrs. Armfield at the cost of the parish.

During the year 174 cwt. was thus disinfected by that firm, involving an expenditure of £261 2s. 1d.

A further sum of £35 13s. 9d. was paid for chemicals and carbolic soap, thus raising the cost incurred by the Sanitary Department for disinfection to the sum of £296 15s. 10d.

Canal Basin.

The water in the Canal Basin was run off on the evening of April 5th, and let in again on the evening of April 8th. 500 tons of mud were removed from the Basin. Nothing was done in the way of further concreting the bottom beyond repairing defects.

Water.

Paddington is supplied with water by the Grand Junction and West Middlesex Companies, which draw their supplies from the Thames, as do also the Chelsea, the Lambeth, the Southwark, and Vauxhall Companies. The remaining Metropolitan Water Companies are the Kent Company, whose water is drawn from the deep wells, and the New River Company and East London Company, both of which derive their water from the River Lea and other sources. For the purposes of comparison, Professor Frankland, in his annual report to the Registrar-General on the condition of these waters during 1890, includes also the results of similar examinations of the water supplied by the Colne Valley Water Company and the Tottenham Local Board of Health. He states that the weather during

the past year has on the whole been less favourable for the operations of those Companies which abstract water from rivers, than that prevailing in the previous year, but that nevertheless the improved quality of this water has been fully maintained.

All the samples examined were taken directly from the mains of the several Companies. In addition to the chemical analysis to which each sample was submitted, the temperature of the water as it issued from the main, at the time of its collection, was determined, and the appearance which it exhibited on being viewed in a two-foot tube recorded.

Temperature: Although the average temperature differs but little for the several supplies, the monthly variation in the case of the river waters is very great, whilst the temperature of the deep-well water is practically constant throughout the year. Thus the water principally derived from the Thames and supplied by the Chelsea, West Middlesex, Southwark, Grand Junction, and Lambeth Companies, varied in temperature from $66^{\circ}\cdot$ Fahr. in August to $37^{\circ}\cdot$ Fahr. in December, and the water from the Lea distributed by the New River and East London Companies fluctuated from $65^{\circ}\cdot3$ Fahr. in August to $38^{\circ}\cdot3$ Fahr. in December. The deep-well water of the Kent Company on the other hand, was free from these violent fluctuations, and practically maintained a constant temperature throughout the year.

This uniformity of temperature of deep-well water is of considerable importance, as the water remains cool and refreshing in summer, and is less likely to become frozen in the service-pipes in winter.

The solid matters in the water are almost wholly composed of mineral substances, which, in the proportion in which they exist in Metropolitan waters, in no way diminish the fitness of the water for drinking. But the salts of lime and magnesia which constitute the principal part of these mineral ingredients are objectionable, not only because they impart to the water what is known as "hardness," and thus render it unsuitable for washing, but also because they cause incrustations and deposits in steam and kitchen boilers and hot-water pipes.

The saline matters dissolved in the deep-well water from the chalk is considerably greater in amount than those found in the river water, and inasmuch as this chalk-water is sent out in its natural condition by the Kent Company and by the Tottenham Local Board of Health, these supplies contain more solid matter than any of the others. The Colne Valley Company, on the other hand, by treating this chalk-water with lime before delivery, so reduce the solid matter that the latter was one-third less than the amount present in the river waters, and was less than one-half of that in the deep-well waters either of the Kent Company or of the Tottenham Local Board of Health.

The small proportion of organic material which the solid matter invariably contains is, on the other hand, of the greatest importance in connexion with the use of the water for drinking purposes. For although the actual amount of this organic matter is generally quite insignificant, yet it may be of the most objectionable character on account of its origin. Thus the water, both of the Thames and the Lea, receives, above the points where it is abstracted for the purposes of the Metropolitan supply, various contributions of organic matter of animal origin, such as the drainage from manured land, the effluents from sewage works, and even raw sewage itself. This animal matter may at any time be accompanied by zymotic poisons dangerous to health, and although the chances of such substances reaching the consumer are greatly reduced, both by the filtration to which the water is subjected by the Companies and by the care which is exercised in excluding the flood-waters from their reservoirs, yet, in spite of these protective measures, there is no absolute guarantee that the noxious ingredients, which may at any time be present, are wholly removed. Most of the Water Companies are endeavouring to substitute, as far as possible, water from subterranean sources for raw river water, whilst the Board of Conservators have almost completely stopped the discharge of untreated town sewage into the Thames.

Table A gives the proportion of organic impurity present in the waters taken from the Thames, the Lea, and the deep-wells respectively, from 1868 to 1890.

From the figures there given it will be seen that, the Thames water distributed during the years 1889 and 1890 was superior to that of any former year as regards comparative freedom from organic impurity. Of the water chiefly derived from the River Lea, that supplied by the New River Company contained in every case, less organic matter than that of the East London Company, which was generally, in this respect, somewhat superior to the best of the Thames waters.

Table B shows the maximum, minimum, and average portions of organic impurity in each of the waters, the average amount contained in the Kent Company's water during the nine years ending December, 1876, being taken as unity.

In Table C are recorded the results of observations respecting the freedom from turbidity or otherwise of various waters, and for the purposes of comparison, the results of similar observations made in 1868 are also included.

I have the honour to be,

Gentlemen,

Your obedient Servant,

JAMES STEVENSON,

Medical Officer of Health.

VESTRY HALL, PADDINGTON,

June, 1891.

TABLE A.

Taking the mean proportion of organic impurity in the Thames water delivered in London in 1868 as 1,000, in the subsequent years the following proportions were present respectively in the Thames water, in the Lea water, and in the Deep Well water.

Year.	Proportion of organic impurity present in Thames water as delivered in London.	Proportion of organic impurity present in Lea water as delivered in London.	Proportion of organic impurity present in Deep Well water as delivered in London.
1868	1,000	484	254
1869	1,016	618	312
1870	795	550	246
1871	928	604	150
1872	1,243	819	221
1873	917	693	250
1874	933	583	287
1875	1,030	751	250
1876	903	562	246
1877	907	596	243
1878	1,056	747	323
1879	1,165	947	387
1880	1,254	1,013	393
1881	993	765	405
1882	1,033	711	409
1883	850	620	321
1884	723	500	264
1885	839	603	200
1886	756	500	244
1887	690	473	249
1888	722	506	241
1889	677	504	268
1890	680	432	252

TABLE B.

TABLE showing the maximum, minimum, and average proportions of organic impurities in the water delivered by the several Companies and Authorities during 1890 :—

Sources.			Maximum.*	Minimum.*	Average.
Deep Wells	{	Kent	0·8	0·3	0·5
		Colne Valley ..	1·9	0·9	1·4
		Tottenham ..	2·0	0·7	1·2
River Lea	{	New River ..	2·7	0·7	1·3
		East London ..	3·9	1·1	2·3

* April Rate, 1891.

NOTES.

1. *Population at Census*, 1861, 75,807; 1871, 96,813; 1881, 107,218; 1891 (unrevised), 117,838.
2. *Area in Acres*, 1,280.
3. *Average No. of Persons in each House at Census*, 1881, 8.1.

* For statistical purposes the Registrar-General estimates the population to the middle of the year on the basis of the rate of increase ruling between the two preceding Census periods. The estimate of population may be checked by the known number of inhabited houses, and by the average number of inmates per house, as ascertained at the preceding Census.

** The deaths of non-parishioners in public institutions within the parish (St. Mary's Hospital, Lock Hospital, and Children's Hospital, Paddington Green), are deducted; but those of parishioners in extra-parochial hospitals and outlying institutions are included.

TABLE II.

TABLE showing the Annual Birth Rate, Rate of Mortality, Death Rates among Children, and Deaths in Public Institutions for the Year 1890, and 10 Years preceding.

Year.	Birth Rate per 1,000 of the Population.	Annual Rate of Mortality per 1,000 living.	Deaths of Children under 1 year; percentage of Total Deaths.	Percentage of Deaths of Children under 1 year to Registered Births.	Deaths of Children under 5 years; percentage of Total Deaths.	Total Number of Deaths in Public Institutions.		
						St. Mary's Hospital.	The Lock Hospital.	The Children's Hospital.

Botting's Plugs.

APPENDIX III.

PADDINGTON VESTRY HALL.

Rules and Regulations as to Letting.

REGULATIONS.

- 1st.—All applications for the use of the Hall must be made in writing to the Vestry Clerk, on forms to be obtained at the Hall, stating the nature of the purpose for which it is required.
- 2nd.—The Committee will not consider the Hall engaged until the deposit and charges are paid, and no public announcement is to be made until the Hall is so engaged. None but printed receipts will be considered as valid.
- 3rd.—The person in whose name the Hall is engaged, and whose name is on the application and receipt, shall be held responsible for any damage, whether a deposit is taken or not.
- 4th.—Except by special permission of the Vestry, the Hall will not be let for any Meeting, Lecture, Concert, &c., at which the doors will be required to be open before Seven o'clock in the Evening.

Scale of Charges for the Use of the Vestry Hall.

(PAYABLE IN ADVANCE.)

PARTICULARS OF MEETING.	OUTER HALL.			INNER HALL.		
	£	s.	d.	£	s.	d.

APPENDIX No. VII.

MANAGERS OF BOARD SCHOOLS.

The Parish of Paddington, with the Parishes of Marylebone, St. Pancras, and Hampstead, form the "MARYLEBONE DIVISION" of the School Board for London. The several Schools in the Division overlap in regard to the areas from which the Scholars are drawn, and therefore it is thought desirable to give in this Appendix the complete List of the Managers for the whole Division up to the 18th July, 1891 :—

It may be added that the Members of the School Board are *ex-officio* Managers of all Schools in their Division, and that the other Managers are appointed by the Board.
