Borough of Paddington.

June, 1892.

Annual Report of the Vestry.

(For the Year ending 25th March, 1892.)

I. Introduction.

THE PARISH OF PADDINGTON, in the County of London, extends Northward from the Marble Arch to Kilburn Gate; and Westward from the Marble Arch to Kensington Palace Gardens; it is bounded on the North by Willesden; on the South by St. George's, Hanover Square, and St. Margaret, Westminster; on the East by Marylebone; and on the West by Kensington and the detached portion of St. Luke, Chelsea; its length from North to South being nearly Two Miles and its superficial extent about 1,280 acres.

II. Parliamentary Electoral Divisions.

In 1885 Paddington was constituted a separate Parliamentary Borough by the Redistribution of Seats Act (48 and 49 Victoria, cap. 23). The Borough returns Two Members to Parliament, and for the purposes of election it is divided into Two Divisions,

under the names of North Paddington and South Paddington. North Paddington consists of Ward No. 2, and South Paddington of Wards Nos. 1, 3, and 4.

The number of Borough Voters, according to the Register made in 1891, is as follows :—

North Paddington	7,857
South Paddington	7,109
		<hr/>
TOTAL	..	<u>14,966</u>

The number of Parliamentary County Voters in Paddington is 104.

The following particulars give the results of the Parliamentary Elections which have taken place in the Borough, viz. :—

NORTH PADDINGTON.

1885, November.—LIONEL L. COHEN, M.P.

1886, June.— " " (deceased).

1887, July.—JOHN AIRD, M.P.

SOUTH PADDINGTON.

1885, November.—Right Hon. Lord RANDOLPH CHURCHILL, M.P.

1886, June.— " " "

III. Registration Districts.

The Registrar-General has divided Paddington into two Districts for the Registration of Births and Deaths, called respectively the St. Mary's District and the St. John's District. The divisional line of the two districts traverses the centre of the road in Praed Street, from Edgware Road to the Canal Basin, continues thence along the centre of the Canal Basin as far as the Bishop's Road, and passes Westward from thence along the centre of the Bishop's Road and Westbourne Grove to the Western boundary of the Parish; the St. Mary's District lying on the North and the St. John's District on the South of such divisional line.

Registrars of Births, Deaths, and Marriages.

Superintendent Registrar—HENRY F. AVELING.

Register Office, 287, Harrow Road.

Registrar of Marriages—WILLIAM KIRK, 78, Westbourne Park Road.

Registrars of Births and Deaths—St. Mary's District, WILLIAM KIRK, 78, Westbourne Park Road. St. John's District, MATTHEW BATTEN CRANSTONE, 35, Spring Street, Sussex Gardens.

IV. Poor-Law Administration.

The Paddington Workhouse and Infirmary are situate in the Harrow Road; the management is in the hands of a Board of Guardians, Eighteen of whom are Elected Guardians (elected by the Ratepayers). The resident Justices of the Peace are *ex-officio* Members of the Board. Paddington is united with St. George, Hanover Square, and Fulham, to form a District called the West London School District, the Schools being at Ashford, near Staines.

For list of Guardians see Appendix No. V.

V. The School Board.

In 1870, Paddington and the parishes of St. Marylebone, St. Pancras, and St. John, Hampstead, were formed into one of the Metropolitan Districts for the purposes of the Elementary Education Act (33 and 34 Victoria, cap. 75), under the name of the Marylebone Division of the School Board for London, which Division returns Seven Members to the School Board.

For Managers of the Board Schools of the Marylebone Division see Appendix No. VI.

VI. Ecclesiastical Districts.

Paddington is divided into Seventeen Ecclesiastical Districts, viz. :—

St. James',	St. Matthew's,	St. Mary Magdalene,
„ John's,	„ Luke's, Westbourne	„ Peter's,
„ Mary's,	Park,	„ Stephen's,
Holy Trinity,	„ Saviour's,	„ Augustine's,
St. Paul's,	„ Michael and All Angels,	Emmanuel,
All Saints',	Christ Church,	St. Luke's, Kilburn.

VII. The County Council.

By the Local Government Act of 1888, the Metropolitan Board of Works was superseded by the London County Council, and the area which had hitherto been under the control of the Metropolitan Board, was formed into the Administrative County of London, each Parliamentary Electoral Division returning double the number of Members to the Council to that returned to Parliament, so that Paddington has Four Members on the Council.

The number of County Council voters, according to the Register made in 1891, is as follows :—

North Paddington	6,423
South Paddington	6,004
			<hr/>
			12,427

The following particulars give the results of the County Council Elections which have taken place in the Borough, viz. :—

NORTH PADDINGTON.	SOUTH PADDINGTON.
<i>Elected 17th Jan., 1889.</i>	<i>Elected 17th Jan., 1889.</i>
R. MELVILL BEACHCROFT.	T. G. FARDELL.
E. PARKER YOUNG.	SIR GEORGE D. HARRIS.
<i>March, 1892.</i>	<i>March, 1892.</i>
H. P. HARRIS.	T. G. FARDELL.
W. URQUHART.	SIR GEORGE D. HARRIS.

VIII. Gas and Water Supply.

The Gas consumed in Paddington is supplied by The Gas Light and Coke Company.

The Water is supplied by two Companies, viz.:—the Grand Junction Waterworks Company and the West Middlesex Waterworks Company. Ratepayers residing on the Bishop of London's Estate are entitled to a deduction of 15 per cent. A plan of the Estate may be seen at the Vestry Hall.

IX. Municipal Electoral Divisions.

Paddington is divided into Four Wards, as follows, viz.:—

WARD No. 1:—All that portion of the Parish which lies within a line drawn along the centre of Harrow Road from the point at which the same intersects the N.W. boundary of the said Parish, and thence along the centre of such Road to a point directly opposite the centre of the Road on Westbourne Terrace Bridge, thence along the centre of such Road and of Westbourne Terrace, to the centre of Bishop's Road, thence Westward along the centre of Bishop's Road and Westbourne Grove to the West boundary of the said Parish at the point where the same intersects the centre of Westbourne Grove, and thence Northward continuously along the said boundary to the point mentioned at the commencement of the foregoing description.

WARD No. 2:—All that portion of the said Parish which lies North of Ward No. 1 and a line drawn from the boundary of such Ward Southward along the centre of Westbourne Terrace to a point directly opposite the West end of the centre of Craven Road, thence along the centre of Craven Road and Praed Street, and thence in a direct line to the boundary of the said Parish.

WARD No. 3 :—All that portion of the said Parish which lies South of Ward No. 1 and a line drawn from the boundary of such Ward Southward along the centre of Westbourne Terrace, Sussex Gardens, and Westbourne Street, and thence in a direct line to the boundary of the said Parish.

WARD No. 4 :—All that portion of the said Parish which is not comprised within the foregoing descriptions of the other Wards.

For the purposes of Rate Collection, Ward No. 2 has been sub-divided as follows :—

DIVISION No. 2A EAST :—All that portion of the Ward lying North of the canal and South of a line drawn through the centre of Sutherland Avenue from Harrow Road to Shirland Road, and East of a line drawn along the centre of Shirland Road from Sutherland Avenue to Kilburn Park Road.

DIVISION No. 2A WEST :—All that portion of the Ward lying North of a line drawn along the centre of Sutherland Avenue from Harrow Road to Shirland Road, and West of a line drawn along the centre of Shirland Road from Sutherland Avenue to Kilburn Park Road.

DIVISION No. 2B :—All that portion of the Ward lying South of the line of the Grand Junction and Regents Canals from Maida Vale to Lock Bridge, Harrow Road.

X. Population.

The population of Paddington, at the Census taken in 1891 (unrevised) was as follows, viz. :—

St. Mary's District .. 84,156

St. John's District .. 33,682

Total .. 117,838

Total number of inhabited houses, April Rate, 1892, 15,323.

XI. The Vestry.

In 1855 the Vestry of Paddington was reconstituted as the Local Authority of the Parish by the Metropolis Local Management Act (18 and 19 Victoria, cap. 120). The Vestry is the Board of Works for Paddington, and consists of Seventy-two Elected Members and the Vicar of Paddington, who is *ex-officio* Chairman of the Vestry. The ordinary meetings of the Vestry are held at the Vestry Hall, Harrow Road, Paddington Green, on the first and third Tuesdays in each month, the third Tuesday in August and the first Tuesday in September excepted.

In 1852 the Vestry resolved to erect a new building for the Municipal purposes of the Parish, and in 1853 the Vestry Hall in the Harrow Road was opened.

XII. The Burial Board.

In 1854 the Paddington Cemetery, which is situated in the parish of Willesden, was purchased by the Parish. It is managed by a Burial Board, consisting of Nine Members appointed by the Vestry. The ordinary meetings of the Burial Board are held at the Vestry Hall on the first Friday in each month.

For Report of the Burial Board see Section XL.

XIII. The Baths and Wash-houses.

In 1871 Paddington adopted the Baths and Wash-houses Act (9 and 10 Victoria, cap. 74), and the Baths and Wash-houses erected in the Queen's Road, on the site of premises formerly numbered 143 and 145 were opened to the public in 1874. The Baths and Wash-houses are under the management of Seven Commissioners appointed by the Vestry.

For Report of the Commissioners of Baths and Wash-houses see Section XLI.

XIV. The Parochial Charities.

There are certain charities under the control of the Vestry, managed by Trustees appointed by the Vestry and the Charity Commissioners. These Charities have an annual income of over Two Thousand Pounds, which is yearly distributed to the Poor in Coals and Blankets, in Grants to the Parochial National Schools, in apprenticing sons and daughters of poor parishioners, and in Annuities to aged persons resident in the Parish, &c.

For the Schedule of the Charities, with names of Trustees, &c., see Section XLII.

For the Accounts of the Charities see Section XLIII.

XV. Members of the Vestry.

During the year ending March 25th, 1892, the Vestry has been constituted as follows. (For present Vestry, &c., see Appendix No. IV.) :—

Chairman (Ex-Officio).

REV. WALTER ABBOTT, M.A., Vicar of Paddington.

Finance Committee	22
Sanitary Committee	29
Legal Committee	13

The Assessment Committee held 14 Meetings.

Four Special Committees have been appointed during the year, and have held meetings as follow :—

Committees.	No. of Meetings.
Hall Park Entrance Committee ...	3
Public Health Amendment Committee	1
Canal Committee	3
Recreation Ground Committee ...	3

Total number of Meetings held during the year, **145.**

XXI. — Open Spaces.—St. Mary's Churchyard (North), entrance from Cuthbert Street.

The premises situate 18, Cuthbert Street, having been purchased as reported last year, and a Faculty obtained for making an opening at this point into the Churchyard in lieu of the one closed against the public by the Trustees of the Hall Park Estate at the Northern end, they having leased, without consulting the Vestry, such pathway for building purposes, a new passageway was formed through No. 18, Cuthbert Street, and opened to the public in July last, which, it need hardly be said, has proved a great boon to the children and others residing in the vicinity of Hall Park.

A Committee of Management consisting of—

Rev. W. Abbott, *Vicar*.

Mr. R. H. Jackson.

Mr. A. G. Bicker-Caarten } *Church-*

„ W. H. Mills.

Col. H. R. Mead, R.E., } *wardens.*

„ John Williams.

„ H. F. Blair, R.E.

has been appointed in connection with the Ground, and a deed duly executed between the Rev. Walter Abbott, as Vicar of Paddington, and the Vestry, containing the following provisions in pursuance of the powers set forth in the Metropolitan Open Spaces Act, 1881 :—

1. “The Vestry undertakes the entire care, management, and control of the said Churchyard.

2. “The Vestry will defray the charges for maintaining and keeping up the said Churchyard, and will appoint and pay a fit and proper person or persons to maintain order.

3. “The Vestry may hold and administer the powers of management and control acquired by them under this agreement in manner and subject to the conditions prescribed by the said Act, and also subject to the terms of this agreement.

4. “The said Churchyard shall be and remain open daily to the public during the following hours, that is to say—from 7, a.m., to 8, p.m., during the month of August; from 7, a.m., to 9, p.m., during the months of June and July; 7, a.m., to 6, p.m., during the months of March, April, May, and September; and from 7, a.m., to 4, p.m., during the months

of October, November, December, January, and February.

5. "The Vestry shall refer the consideration of all questions respecting the management of the said Churchyard to a Committee of not more than seven in number, of which Committee the Vicar and Churchwardens of Paddington shall be ex-officio members, but every resolution of such Committee in relation to such questions shall be subject to confirmation by the Vestry, and shall have no force until so confirmed.

6. "Nothing herein contained shall be constructed to limit the right of the said Walter Abbott and his successors in office as owners of the soil and freehold of the said Churchyard to have access at all times and for all purposes to the said Churchyard, or to limit the right of the Incumbent of St. Philip's Church, Paddington, for the time being, and the parishioners and others attending the said Church of St. Philip's, at all times to go to and from and over that part of the said Churchyard in which St. Philip's Church (shewn on the plan drawn hereon) is situated, and the Vestry shall furnish the said Vicar and Incumbent with all necessary keys of the gates to the said Churchyard.

7. "The Bye-Laws made by the said Vestry (a print of which is attached to this agreement, and is signed by the said Walter Abbott and by Frank Dethridge, the Vestry Clerk), for the regulation of

the said Churchyard, fixing the days and times of admission thereto, and for the preservation of order and prevention of nuisances therein, are hereby agreed to and approved, and it is hereby expressly agreed that no alteration shall be made in any of such Bye-Laws without the previous consent, in writing, of the Vicar of Paddington for the time being, but such consent shall not be unreasonably withheld.

8. "If any dispute shall arise between any Vicar of Paddington and the Vestry as to the construction of the agreement, or any clause or provision herein contained, or the rights or obligations of such Vicar and the Vestry respectively under the same, every such question in dispute shall be referred to the Chancellor for the time being of the Diocese of London, if willing to act, and if not, then to some other person to be named by him, and the decision of such Chancellor or nominee to be final.

9. "Nothing in these presents shall be deemed or constructed to in any way affect the right of the said Walter Abbott as such Vicar as aforesaid, or his successors to the soil or freehold of the said Churchyard.

10. "The Vestry shall pay all the costs, charges, and expenses of this agreement, and incidental to the negotiations for preparation and execution thereof."

XII. St. Philip's Church.

On the 1st March, 1892, the Vestry passed the following resolution :—

“That inasmuch as the purpose for which the temporary iron Church (St. Philip's), erected in St. Mary's Churchyard in the year 1861, has been served, the Solicitor be instructed to take the requisite steps for obtaining a Faculty in the names of the Vicar, Churchwardens, and Vestry, for the removal of such temporary iron building.”

This matter is still in the hands of the Solicitor.

XXIII. Measures before Parliament.

The following Bills have received the attention of the Vestry during the year :—

LONDON COUNTY COUNCIL GENERAL POWERS.

RATING OF MACHINERY.

SCHOOL BOARD ELECTIONS.

TELEPHONE COMPANIES.

VALUATION (METROPOLIS) ACT, 1869, AMENDMENT.

LONDON BUILDING LAW CONSOLIDATION.

XXIV. Public Lavatory Accommodation.

PADDINGTON GREEN.

This Lavatory is working satisfactorily, the money received in connection therewith being more than sufficient to cover working expenses.

HARROW ROAD, FERNHEAD ROAD.

On October 6th, 1891, the Vestry approved the plan prepared by the Surveyor for the construction of an underground Lavatory at the junction of Fernhead and Walterton Roads, and the tender of Mr. John Bentley, of Leicester, for carrying out the work for the sum of £1,728 was accepted. In this Lavatory W.C. accommodation is provided for 5 males and 4 females. The work is expected to be completed in August next. (See also page 93.)

XXV. Tree Planting.

The Vestry having accepted the sum of £100 from the Metropolitan Public Gardens Association for the same to be expended in planting Plane Trees in the Parish, 80 trees have been planted in Chippenham Road at a cost of £124. (See also page 81.)

XXVI. Coal and Wine Dues.

Several Metropolitan Vestries have considered the question of re-imposing the Coal and Wine Dues, and Paddington has concurred in adopting steps for a re-imposition of the dues in question, but up to the present time all attempts in such direction have been abortive.

XXVII. Blomfield Road Hoarding.

A Deputation of Ratepayers waited upon the Vestry on 15th September, 1891, with reference to

the hoarding which was being erected by the Canal Company in the Blomfield Road, and requested that steps might be taken for the removal of the same. The Vestry having received the Memorial, passed the following Resolution :—

“That in the opinion of the Vestry the erection of a permanent hoarding by the Regent's Canal Company in the Blomfield Road is most undesirable, and that the Memorial be referred to a Special Committee of 5 Members, with power to consult the Solicitor, to consider and report to the Vestry at its next Meeting what steps can be taken to prevent it. Further, that the Canal Company and the County Council be informed by the Solicitor of this Resolution in order that they may know of the objection of the Vestry to the erection of the said hoarding.”

The Committee, consisting of Mr. Mark H. Judge (Chairman), Col. H. F. Blair, R.E., Mr. H. Gundry, Mr. R. H. Jackson, Mr. R. F. Whur, at once put itself into communication with the Authorities mentioned in the Resolution, also with the Ecclesiastical Commissioners, the result being that prompt measures were taken by the Canal Company to remove the objectionable hoarding.

XXVIII. Electric Lighting.

Owing to the interposition of Col. C. H. Barchard, C.B., and Col. H. F. Blair, R.E., the charge

to the Vestry for Electrical Energy supplied to all buildings belonging to the Vestry, the lighting of which is paid for out of the Rates, has been reduced from $7\frac{1}{4}$ d. to 7d. per Board of Trade unit.

Col. Barchard and Col. Blair have also been successful in compelling the Metropolitan Electric Supply Company to keep separate accounts of undertakings authorised by different Provisional Orders, notwithstanding the application of the Company in question to the Board of Trade to be relieved from such obligation. The Vestry expressed satisfaction at the steps taken by Col. Barchard and Col. Blair.

XXIX. Electric Lighting Vestry Hall.

It having been decided to light the Vestry Hall by means of Electricity, tenders were invited, and that of Mr. Conolly, of 42, Hampstead Road, was accepted. A conversazione in commemoration of the installation was held in the Vestry Hall premises on the 10th December last. (See also page 85.)

XXX. Public Health (London) Act, 1891.

The Public Health (London) Act, 1891, which came into operation on the 1st of January, 1892, has cast upon the Vestry as the Sanitary Authority additional duties and responsibilities. This important measure is in the main a consolidating Act, and

confers the same advantages upon the Metropolis as were conferred upon the rest of the country by the Public Health Act, 1875. Bye-laws have been formulated by the Sanitary Committee, and after much thought and consideration the Vestry passed the same. The Bye-laws are as follow :—

Interpretation of Terms.

1.—Throughout these Bye-laws the expression “the Sanitary Authority” means the Vestry of the Parish of Paddington, and the expression “the District” means the Parish of Paddington.

All words in these Bye-laws shall have the same meaning as the same words in the Public Health (London) Act, 1891, and as in the regulations made under the Metropolis Water Act, 1871.

For the Prevention of Nuisances arising from any Snow, Ice, Salt, Dust, Ashes, Rubbish, Offal, Carrion, Fish, or Filth, or other matter or thing in any Street. (s. 16.)

2.—The occupier of any premises fronting, adjoining, or abutting on any street not repairable by the inhabitants at large shall, as soon as conveniently may be after the cessation of any fall of snow, remove or cause to be removed from the footways and pavements adjoining such premises, all snow fallen or accumulated on such footways and pavements in such a manner and with such precautions as will prevent any undue accumulation in any channel or carriage-way or upon any paved crossing.

In the case of any premises, the person in occupation of or having the charge, management, or control of the same, or if there is no such person, then any person in occupation of or having the charge, maintenance or control of any part of the premises, and in the case of any premises the whole of which are let to lodgers, the person receiving the rent payable by the tenants or lodgers, either on his own account or as the agent of another person, shall for the purposes of this bye-law be deemed to be the occupier.

3.—Every person who shall remove any snow from any premises shall deposit the same in such a manner, and with such precautions as to prevent any accumulation thereof in any channel or upon any paved crossing.

If in the process of such removal any snow be deposited upon any footway or pavement, he shall forthwith remove such snow from such footway or pavement.

4.—Every person who shall throw any salt upon any snow on the footway or carriageway of any street shall do so in such quantity and in such manner as effectually to dissolve the whole of such snow, and he shall forthwith effectually remove from the footway or carriageway the whole of the deposit resulting from the mixture of the salt with the snow. He shall not place any part of such deposit on the carriageway of such street, other than any channel at the side of such carriageway, and he shall not remove the same into any such channel unless it is sufficiently liquid to flow along such channel.

5.—The occupier of any premises who shall remove or cause to be removed any dust, ashes, rubbish, offal, carrion, fish in an offensive condition, or filth or other like matter or thing from his premises, shall for the purpose of such removal in every case use or cause to be used a suitable vessel or receptacle, cart, or carriage properly constructed and furnished with a sufficient covering, so as to prevent the escape of the contents thereof.

The removal of offal, carrion, fish in an offensive condition, or any offensive trade refuse or other like matter or thing, shall be effected daily.

If in the process of such removal any person shall slop or spill, or cause or allow to fall upon any footway, pavement, or carriageway, any such offal, carrion, fish in an offensive condition, or filth or other like matter or thing, he shall forthwith remove such offal, carrion, fish, or filth, or other matter or thing from the place whereon the same may have been slopped or spilled, or may have fallen, and shall immediately thereafter thoroughly sweep or otherwise thoroughly cleanse such place.

6.—No person shall lay or cause to be laid in any street any litter or other matter in case of sickness to prevent noise without the permission of the Sanitary Authority, and having obtained such permission, shall lay the same so that it may be evenly distributed over the surface of the part of the street intended to be covered, and shall, when the occasion ceases, within 24

hours, or upon notice from the Sanitary Authority, remove or cause to be removed from such street the litter or other matter so laid in such street.

For preventing Nuisances arising from any offensive matter running out of any Manufactory, Brewery, Slaughter-house, Knacker's Yard, Butcher's or Fishmonger's Shop, or Dunghill, into any uncovered place, whether or not surrounded by a wall or fence. (s. 16.)

7.—The occupier of a manufactory, brewery, slaughter-house, knacker's yard, butcher's or fishmonger's shop, or of any premises comprising a dunghill, shall not cause or suffer any offensive matter to run out of such manufactory, brewery, slaughter-house, knacker's yard, butcher's or fishmonger's shop, or dunghill, into any street or uncovered place, whether or not surrounded by a wall or fence.

For the Prevention of the Keeping of Animals on any premises in such place or manner as to be a Nuisance or Injurious or Dangerous to Health. (s. 16).

8.—The occupier of any premises shall not keep nor allow to be kept any animal on such premises in such a place or in such a manner as to pollute, or to be likely to pollute any water supplied for use or used or likely to be used by man for drinking or domestic purposes, or for manufacturing drink for the use of man, or any water used or likely to be used in any dairy.

9.—Every occupier of a building or premises wherein or whereon any horse or other beast of draught or burden, or any cattle or swine may be kept, shall provide, in connection with such building or premises, a suitable receptacle for dung, manure, soil, filth, or other offensive or noxious matter which may, from time to time, be produced in the keeping of any such animal in such building or upon such premises.

He shall cause such receptacle to be constructed so that the bottom or floor thereof shall not, in any case, be lower than the surface of the ground adjoining such receptacle.

He shall also cause such receptacle to be constructed in such a manner and of such materials, and to be maintained at all times in such a condition as to prevent any soakage therefrom into the ground or into the wall of any building.

He shall likewise provide in connexion with such building or premises a sufficient drain constructed in such a manner, and of such materials, and maintained at all times in such a condition as effectually to convey all urine or liquid filth, or refuse therefrom, into a sewer or other proper receptacle.

He shall at such times as the Sanitary Authority may by notice require, periodically remove or cause to be removed from the receptacle provided in accordance with the requirements of this bye-law all dung, manure, soil, filth, or other offensive or noxious matter, produced in or upon such building or premises, and deposited in such receptacle.

As to the Paving of Yards and Open Spaces in connexion with Dwelling-Houses. (s. 16).

10.—The owner of every dwelling-house in connexion with which there is any yard or open space, shall, where, in the opinion of the Sanitary Authority, it is necessary for the prevention or remedy of insanitary conditions that all or part of such yard or open space shall be paved, forthwith cause the same to be properly paved with a hard, durable, and impervious pavement, evenly and closely laid upon a sufficient bed of good concrete, and so sloped to a properly constructed channel, and drain with properly trapped gulley and grating, as effectually to carry off all rain or waste water therefrom.

With respect to the keeping of Water-closets supplied with sufficient Water for their effective action. (s. 39).

11.—The owner or the occupier of any premises in or for which any water-closet shall be provided, shall cause such water-closet to be at all times properly supplied with a sufficient quantity of water for securing its effective action. He shall cause such water supply to be served through a cistern separate from that used for any other purposes, or through a cast-iron or other approved flushing tank, so constructed as to discharge not less than two gallons of water at each flush, by means of a service pipe having an internal diameter of not less than one inch and a half, if the cistern or tank be less than five feet above the closet basin, or one inch

and a quarter if more than five feet and less than eight feet above the closet basin, or one inch if eight feet or more above the closet basin.

Where, however, any water-closet is provided for the use of persons occupying two or more separately occupied premises, the foregoing requirement shall apply to the owner of such premises instead of to any occupier thereof.

For securing the Cleanliness and freedom from Pollution of Tanks, Cisterns, and other Receptacles used for Storing of Water used or likely to be used by man for drinking or domestic purposes, or for manufacturing drink for the use of man. (s. 50).

12.—The occupier of any premises on which a tank, cistern, or other receptacle is used for storing of water used or likely to be used by man for drinking or domestic purposes, or for manufacturing drink for the use of man, shall empty and cleanse the same, or cause to be emptied and cleansed, once at least every six months, and at such other times as may be necessary to keep the same in a cleanly state and free from pollution.

He shall cause every such tank, cistern, or other receptacle which is erected outside a building, or which, being erected inside a building, is not placed in a suitable chamber, or otherwise constructed or placed so as to prevent the pollution of the water therein, to be provided with a proper cover, and to be kept at all times properly covered.

Provided that in every case where two or more tenants of any premises are entitled to the use in common of any tank, cistern, or other receptacle, used for storing of water used or likely to be used by man for drinking or domestic purposes, or for manufacturing drink for the use of man, the foregoing requirements shall apply to the owner of such premises instead of to any occupier thereof.

BYE-LAWS WITH RESPECT TO HOUSES LET IN LODGINGS,
OR OCCUPIED BY MEMBERS OF MORE THAN ONE
FAMILY, AND FOR THE SEPARATION OF THE SEXES IN
THE HOUSE SO LET OR OCCUPIED. (S. 94).

Registration.

1.—A Register shall be kept by the Sanitary Authority of Paddington of houses let in lodgings, or occupied by members of more than one family.

2.—No house shall be placed upon the Register until so resolved at a meeting of the Sanitary Authority. Upon the passing of any such resolution, Notice thereof shall be served on the landlord, together with a copy of these Bye-laws, and such Bye-laws shall operate in respect of such premises so long as the premises are let in lodgings, or occupied by members of more than one family.

3.—The landlord of a lodging-house within a period of seven days after he shall have been required by a notice in writing, duly served upon him, or his agent, or upon

the premises, shall personally, or by his agent duly authorised in that behalf, attend at the office of the Sanitary Authority, during office hours, and then and there furnish and sign a statement of the following particulars with respect to such house ; that is to say :—

- (a) The total number of rooms in the house ;
- (b) The total number of rooms let in lodgings or occupied by members of more than one family ;
- (c) How each room is occupied—whether as bedroom, sitting-room, or otherwise ;
- (d) The number and sex of the occupants of each room used for sleeping, and whether over or under 10 years of age ;
- (e) The Christian name and surname of the lessee of each room.

Inspection.

4.—In every case where the landlord of a registered lodging-house occupies or resides in any part of the premises, or retains a general possession or control of the premises, such landlord shall, at all times when required by the Officer of the Sanitary Authority, afford any such Officer free excess to the interior of the premises for the purpose of inspection.

5.—In every case where the landlord of a registered lodging-house does not occupy or reside in any part of the premises, or retain a general possession or control of the premises, every lodger, who is entitled to have

or to exercise the control of the outer door of the premises, shall, at all times when required by the Officer of the Sanitary Authority, afford such Officer free access to the interior of the premises for the purpose of inspection.

6.—Every lodger in a registered lodging-house shall, at all times when required by the Officer of the Sanitary Authority, afford any such Officer free access for the purpose of inspection to the interior of any room or rooms which may have been let to such lodger.

7.—In every case where the Officer of the Sanitary Authority has, for the purpose of inspection, obtained access to the interior of a registered lodging-house, or to the interior of any room or rooms in such lodging-house, a person shall not wilfully obstruct any such Officer in the inspection of any part of the premises, or, without reasonable excuse, neglect or refuse, when required by any such Officer, to render him such assistance as may be reasonably necessary for the purpose of such inspection.

Overcrowding.

8.—The landlord of a lodging-house shall not knowingly cause or suffer a greater number of persons than will admit of the provision of three hundred cubic feet of free air space for each person of an age exceeding ten years, and of one hundred and fifty cubic feet of free air space for each person of an age not exceed-

going ten years, to occupy at any one time, as a sleeping apartment, a room which is used exclusively for that purpose.

9.—The landlord of a lodging-house shall not knowingly cause or suffer a greater number of persons than will admit of the provision of four hundred cubic feet of free air space for each person of an age exceeding ten years, and of two hundred cubic feet of free air space for each person of an age not exceeding ten years, to occupy, at any one time, as a sleeping apartment, a room which is not used exclusively for that purpose.

10.—A lodger in a lodging-house shall not knowingly cause or suffer a greater number of persons than will admit of the provision of three hundred cubic feet free air space for each person of an age exceeding ten years, and of one hundred and fifty cubic feet of free air space for each person of an age not exceeding ten years, to occupy, at any one time, as a sleeping apartment, a room which is used exclusively for that purpose, and which has been let to such lodger.

11.—A lodger in a lodging-house shall not knowingly cause or suffer a greater number of persons than will admit of the provision of four hundred cubic feet of free air space for each person of an age exceeding ten years, and of two hundred cubic feet of free air space for each person of an age not exceeding ten years, to occupy, at any one time, as a sleeping apartment, a room which is not used exclusively for that purpose, and which has been let to such lodger.

12.—No room shall be occupied as a living or sleeping room without it has one or more windows opening directly into the external air, with a total area, clear of the sash frames, equal to at least one-tenth of the floor area of the room, and so constructed that the sashes thereof shall open from top to bottom—from sill to head of such window or windows. No room shall be occupied as a living or sleeping room without it has a fire-place and flue unobstructed, or an otherwise efficient mode of ventilation to approval of Sanitary Authority.

For enforcing the Drainage of such Houses, and for promoting Cleanliness and Ventilation in such Houses.

13.—The landlord of a registered lodging-house shall, to the satisfaction of the Sanitary Authority, cause every court and courtyard immediately adjoining or contiguous to the walls of such house to be properly paved with a hard, durable, and impervious pavement, evenly and closely laid upon a sufficient bed of good concrete and sloped to a properly constructed channel leading to a trapped gulley-grating, which shall be so constructed and placed as effectually to carry off all rain or waste water from such court or courtyard.

He shall cause such pavement, channel, and grating to be kept at all times in good order and in proper repair.

14.—In every case where a lodger in a registered lodging-house is entitled to the exclusive use of any

court, courtyard, area, or other open space within the curtilage of the premises, such lodger shall cause such court, courtyard, area, or other open space to be thoroughly cleansed from time to time, as often as may be requisite, for the purpose of keeping the same in a clean and wholesome condition.

15.—In every case where two or more lodgers in a registered lodging-house are entitled to the use in common of any court, courtyard, area, or other open space within the curtilage of the premises, the landlord shall cause such court, courtyard, area, or other open space to be thoroughly cleansed from time to time, as often as may be requisite, for the purpose of keeping the same in a clean and wholesome condition.

16.—The landlord of a registered lodging-house shall provide good and sufficient water-closet accommodation for such house. He shall provide such accommodation so that the number of water-closets in relation to the greatest number of persons who, subject to the restrictions imposed by any regulation in that behalf, may, at any one time, occupy rooms in the house as sleeping apartments, shall be in the proportion of not less than one water-closet to every twelve persons.

17.—In every case where, for the purpose of providing water-closet accommodation for a registered lodging-house, in pursuance of the requirements of any regulation in that behalf, the construction of a new water-closet is necessary, and where such construction, as far as regards the several details hereinafter specified, is

not already the subject of regulation by any statute in force within the district, the landlord shall construct such water-closet in accordance with the following rules:—

Every such new water-closet, if situated within a house, shall have at least on one side thereof an external wall, and shall have a window therein, opening into the external air, of at least eighteen inches by three feet, or where this is impracticable, some other sufficient communication to the outer air, to the approval of the Sanitary Committee.

When the water-closet is situated exterior to a house, it shall be properly lighted and ventilated to the approval of the Sanitary Authority.

Every water-closet shall be furnished with a separate cistern of at least two gallons capacity, which shall be so constructed, fitted, and placed as to admit of the supply of water for use in such water-closet without any direct communication with the drinking water used in such house; and that such water shall only be used for the purpose of flushing out such water-closet, and shall have a service pipe of an internal diameter of not less than one inch and a half if the cistern or tank be less than five feet above the closet basin, or one inch and a quarter if more than five feet and less than eight feet above the closet basin, or one inch if eight feet or more above the closet basin.

He shall furnish the water-closet with a pan, basin, or other suitable receptacle of non-absorbent

material, to the approval and satisfaction of the Sanitary Authority.

He shall not construct or fix under such pan, basin, or receptacle, any "container," D traps, or other similar fitting.

Every water-closet situated on the upper floors of such house shall have a soil pipe properly connected with the basin of same of at least four inches in internal diameter made of not less than six pounds to the foot super, lead or of stout iron, and the joints made to the approval of the Sanitary Authority—and all soil pipes shall be situated externally to the said house. Such soil pipe shall be open at the top to allow of proper ventilation, carried to such a height as shall be approved of by the Sanitary Authority.

18.—The landlord of a registered lodging-house shall cause every part of the structure of every water-closet belonging to such house to be maintained at all times in good order, and every part of the apparatus of such water-closet, and every drain or means of drainage with which such water-closet may communicate, to be maintained at all times in good order and efficient action.

He shall also cause all such means of ventilation as may be provided in or in connection with such water-closet to be maintained at all times in good order.

19.—In every case where a lodger in a registered lodging-house is entitled to the exclusive use of any

water-closet belonging to such house, such lodger shall cause the pan, seat, floor, and walls of such water-closet to be thoroughly cleansed from time to time, as often as may be necessary for the purpose of keeping such pan, seat, floor, walls, and ceilings in a clean and wholesome condition.

20.—In every case where two or more lodgers in a registered lodging-house are entitled to the use in common of any water-closet belonging to such house, the landlord shall cause the pan, seat, floor, walls and ceilings of such water-closet to be thoroughly cleansed from time to time, as often as may be necessary for the purpose of keeping such pan, seat, floor, walls, and ceilings in a clean and wholesome condition.

21.—The landlord of a registered lodging-house shall provide the lodgers with a sufficient number of covered receptacles of galvanized iron, or other suitable material, for the temporary detention and subsequent removal of dust.

22.—A lodger in a registered lodging-house shall not cause or suffer any animal or other creature to be kept in any room which has been let to such lodger, or elsewhere upon the premises, in such a manner as to render the condition of such room or premises filthy or unwholesome.

23.—In every case where a lodger in a registered lodging-house is entitled to the exclusive use of any cistern or other receptacle for the storage of water supplied to the premises, such lodger shall cause every

part of the interior of such cistern or receptacle to be kept thoroughly cleansed and properly covered.

24.—In every case where two or more lodgers in a registered lodging-house are entitled to the use in common of any cistern or other receptacle for the storage of water supplied to the premises, the landlord shall cause every part of the interior of such cistern or receptacle to be kept thoroughly cleansed and properly covered.

25.—Wherever there is no constant supply of water afforded by the Water Company, the landlord shall supply a cistern or cisterns of such capacity as will afford a minimum of 25 gallons for each lodger occupying such house.

26.—The landlord of a registered lodging-house shall cause every common passage or staircase in such house to be thoroughly cleansed from time to time, as often as may be requisite.

For Cleansing and Lime-washing, at stated times, of the Premises.

27.—The landlord of a registered lodging-house shall, at least once in every year, cause the premises to be properly cleansed and lime-washed.

For the taking of Precautions in case of any Infectious Disease.

28.—The landlord of any lodging-house whatsoever, immediately after he shall have been informed, or

shall have ascertained, that any person in such house is ill of a dangerously infectious or contagious disease, shall give written notice thereof to the Medical Officer of Health of the Sanitary Authority, in pursuance of Section 55 of the Public Health (London) Act, 1891.

29.—In every case where a lodger in any lodging-house has been informed, or has ascertained, or has reasonable grounds for believing, that an occupant of any room which has been let to such lodger is ill of a dangerously infectious or contagious disease, such lodger shall forthwith give written notice thereof to the landlord and to the Medical Officer of Health of the Sanitary Authority, in pursuance of Section 55 of the Public Health (London) Act, 1891..

Penalties.

30.—Every person who shall offend against any of the foregoing bye-laws shall be liable for every such offence to a penalty of five pounds, and in the case of a continuing offence to a further penalty of forty shillings for each day after written notice of the offence from the Sanitary Authority.

Provided, nevertheless, that the Justices or Court before whom any complaint may be made, or any proceedings may be taken in respect of any such offence, may, if they think fit, adjudge the payment as a penalty of any sum less than the full amount of the penalty imposed by this bye-law.

XXXI. Snow Clearing.

Section 29 of the Public Health Act has made provision for the cleansing of Footways as well as Carriageways by the Parochial Authorities. The impracticability of carrying out this work in the event of heavy falls of snow was the subject of a Conference of Delegates from Vestries and District Boards, such Conference being held at the instigation of Paddington, when a Resolution was passed and forwarded to the President of the Local Government Board. The Resolution and reply are as follow, viz. :--

RESOLUTION.

"That this conference is of opinion that Section 29 of the PUBLIC HEALTH ACT, 1891, which directs the Sanitary Authorities to cleanse the footways, should be amended so as not to include the removal of snow, the Conference believing that snow removal from footways can be more readily, economically, and efficiently carried out by occupiers than by Sanitary Authorities, and that, moreover, the removal of snow should be made compulsory on occupiers under a recoverable penalty, and in cases of unoccupied property, tenements, or public buildings, the same duties and obligations should devolve upon the owners thereof."

REPLY.

"LOCAL GOVERNMENT BOARD, WHITEHALL, S.W.,
"13th May, 1892.

"Sir,

"I am directed by the President of the Local Government Board to advert to your letter of the 29th ultimo, forwarding a copy of a resolution passed

at a Conference of Delegates from Vestries and District Boards in the Metropolis with reference to the removal of snow from footpaths.

“Under the Public Health (London) Law Amendment Bill, as introduced into Parliament, the duty of removing snow from the footways rested with the occupiers, but the Clause embodying the provision was, contrary to the advice of Mr. Ritchie, struck out by the standing Committee on Law, to whom the Bill was referred.

“On Report of the Public Health (London) Bill, in which the Amendment Bill was incorporated, it was proposed to reinstate the provision, but the proposal was rejected.

“Under the circumstances, the President does not see his way to the introduction of a Bill for the amendment of the Public Health (London) Act, 1891, so as to make it the duty of occupiers to remove snow from the footways; and therefore he does not think that, at the present time, he need trouble a Deputation from the Conference above referred to, to wait upon him on the subject.

“I am, Sir,

“Your obedient Servant,

“S. A. PROVIS,
“Assistant Secretary.”

“F. DETHRIDGE, Esq.,

“Vestry Clerk of the Parish of Paddington.”

XXXII. 26 Wharf, New Lease.

On March 25th, 1891, the lease of these premises expired and an increase of £150 per annum (viz., £500) was demanded for a new lease. Upon negotiations being entered into, the Vestry Clerk

succeeded in inducing the Secretary and Engineer of the Grand Junction Canal Company to recommend the acceptance of a rental of £450 per annum for a 7, 14, or 21 years' lease, which has been done.

XXXIII. Canal Purification.

A Conference of Delegates from St. Marylebone, St. Pancras, and Paddington was convened by the Vestry of St. Marylebone with a view of joint action being taken to induce the Companies to place and maintain the Canals in a proper Sanitary condition. This very important question is still under consideration.

XXXIV. Constant Water Supply.

Upon the application of the Vestry, through the London County Council, the West Middlesex Water Co. has given a constant supply of water to the district which is bounded by the Harrow Road, Edgware Road, Praed Street, and Great Western Railway.

XXXV. Cab Radius, Extension.

This question has been considered at a Conference of Delegates from the Metropolitan Vestries and District Boards (General Shaw-Stewart, R.E., and Mr. J. F. Hawkey representing Paddington). The members of the Conference attended before the Home Secretary on the 22nd February last, and brought forward arguments in favour of an extension. The matter has not yet been determined.

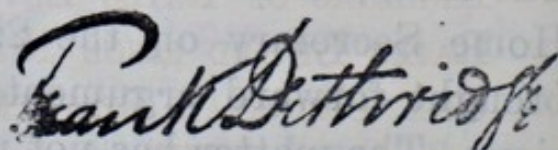

XXXVI. Assessment Appeals.

The Quinquennial Re-Assessment of the property in the Parish came into force on April 6th, 1891, upon a total rateable value of £1,322,982, exclusive of new property and additions at Christmas, 1890, and Lady-Day, 1891. With regard to the appeals pending before the Court at the publication of the last Annual Report, the Gas Company's case has been settled at £16,932, showing a reduction of £352 upon the rateable value as estimated by the Parish Valuers. The costs up to and including the first day of hearing were awarded to the Vestry, and notwithstanding the above-mentioned reduction, the Parish has gained considerably on its original assessment.

The appeals by the Metropolitan Railway Company and the National Telephone Company are still pending.

The works, Sanitary and otherwise, carried out during the year, appear in the Reports of the respective Officers, hereunto annexed, together with the Reports of the Burial Board and Commissioners of Baths and Wash-houses, and such Reports are followed by the documents required by the 198th Sec. of the Metropolis Local Management Act.

Printed and published by order of the Vestry of Paddington.

Vestry Clerk.

VESTRY HALL, HARROW ROAD,
June, 1892.

XXXVII.—ABSTRACT OF ACCOUNTS, SUMMARY OF CONTRACTS, STATISTICAL TABLES, &c.

The following ABSTRACT OF ACCOUNTS for the Year ending March 25th, 1892, SUMMARY OF CONTRACTS, and STATISTICAL TABLES, &c., were submitted to the Vestry by the Vestry Clerk, Mr. Frank Dethridge, and ordered to be included in the Annual Report of the Vestry, in pursuance of Section 196, 18 & 19 Vic., c. 120, viz.:—

“The auditor or auditors of the accounts of the Metropolitan Board of Works, and of every District Board and Vestry, shall, after such audit of accounts as aforesaid, cause an account in abstract to be prepared, showing the receipt and expenditure under this Act for the preceding year, under the several distinct heads of receipt and expenditure, with the statement of the allowance of the auditor or auditors, if he or they has or have allowed such accounts, or of the parts, if any, which he or they have disallowed of such accounts, and also a summary statement of all contracts entered into by such Board or Vestry in such preceding year, and of the moneys owing to and debts and liabilities owing by such Board or Vestry on the 25th day of March next preceding.”

We, the undersigned, being the Auditors appointed under the provisions of the "Metropolis Local Management Act," for the purpose of auditing the Accounts of the Vestry of the Parish of Paddington, do state that we have audited and allowed the Accounts of the Vestry for the year ending 25th March, 1892, of which the foregoing Account, marked **A**, is an abstract. And we state that the several Contracts entered into by the Vestry during the year ending 25th March, 1892, are specified in the foregoing Statement of such Contracts marked **B**. And that the moneys owing to, and the Debts and Liabilities owing and incurred by, such Vestry respectively, are specified in the foregoing Statement of such Credits, Debts, and Liabilities respectively, marked **C**. And we further wish to thank Mr. Dethridge, the Vestry Clerk, and his Officers, for the able and courteous assistance they have rendered during the investigation.

I. BRUNEL,
F. CALDER-TURNER, } *Parochial*
F. C. BAUM, } *Auditors.*

May 31st, 1892.

SUNDRY PAYMENTS MADE TO OR BY THE VESTRY AND
CHURCHWARDENS UNDER VARIOUS ACTS OF PARLIAMENT.

1. A sum of £12 is paid annually under 26 Geo. 2, cap. 43, to the Ecclesiastical Commissioners by the Churchwardens out of moneys supplied by the Vestry as rent for land granted by a former Bishop of London for the enlargement of the Churchyard. The Vestry is recouped a portion of this £12 by an annual payment of £3 under the same Act to the Churchwardens by the Vicar of Paddington, and of £3 by the Parish Clerk (if any).
2. A sum of £15 is paid annually under the private Act 35 Geo. 3, cap. 83, to the Churchwardens by the Ecclesiastical Commissioners as compensation for the enclosure of waste lands by a former Bishop of London, and is paid by the Churchwardens to the credit of the Vestry General Account.
3. A sum of £2 is paid annually under 3 Geo. 3, cap. 50, to the Vestry by the Churchwardens of St. George's, Hanover Square, in lieu of parochial rates for the burial ground in Uxbridge Road, and is placed to the credit of the Vestry General Account.

4. HARVIST'S ESTATE.

A proportion of the rents of this Estate (amounting in the year ending Lady-day, 1892, to £125 0s. 8d.) is paid annually under 10 Geo. 4, cap. 59, and private Act 18 and 19 Vic., cap. 11, to the Vestry by the Hendon Union Rural Sanitary Authority, and is applied towards the repair of the Highway of the Edgware Road.

5. LYON'S ESTATE.

A proportion of the rents of this Estate (amounting in the year ending Lady-day, 1892, to £475 17s. 8d.) is paid annually to the Vestry under the same Acts and by the same Authority as in Harvist's Estate, and is applied towards the repair of the Highway of the Harrow Road.

RETURN showing the amount in the Pound levied by the Vestry during the Twenty-five Years ending October, 1891, in respect of Rates made for payment of Liabilities of the Vestry, distinguishing those over which the Vestry has control from those over which it has no control :—

The Rateable Value of the Parish, based upon the Rate made in October, 1891, was £1,326,162.

List of the Principal Statutes under which Rates are Levied

. The earliest Acts are alone given in this List, the object being to show the dates at which the duty of levying a rate was in each case imposed on the Parochial Authorities:—

- I. *Poor Rate*.—18 & 19 Vic., Cap. 120 (A.D. 1855). (Transferring to the existing Vestry the powers and duties given or reserved to the Vestry elected under the Local Act of 1829, 5 Geo. IV., Cap. 126, which superseded the Open Commons Law Vestry).
- II. *Lighting Rate*.—The same.
- III. *General Rate*.—The same.
- IV. *Sewers Rate*.—The same.
- V. *Main Drainage and Metropolitan Consolidated Rate*.—The same.
- VI. *Church Building Rate*.—58 Geo. III., Cap. 45 (A.D. 1818).
- VII. *Poor Rate proper*.—43 Eliz., Cap. 2 (A.D. 1601).
- VIII. *Police Rate*.—10 Geo. IV., Cap. 44 (A.D. 1829).
- IX. *County Rate*.—12 Geo. II., Cap. 29 (A.D. 1738).
- X. *Common Poor Fund Rate*.—30 and 31 Vic., Cap. 6 (A.D. 1867).
- XI. *Metropolitan Asylum District Rate*.—The same.
- XII. *West London District School Rate*.—7 & 8 Vic., Cap. 101 (A.D. 1844).
- XIII. *Metropolitan Fire Brigade Rate*.—28 & 29 Vic., Cap. 90 (A.D. 1865).
- XIV. *Baths and Wash-houses Rate*.—9 and 10 Vic., Cap. 74 (A.D. 1846).
- XV. *Sewers Rate*.—18 and 19 Vic., Cap. 120 (A.D. 1855).
- XVI. *School Board Rate*.—33 and 34 Vic., Cap. 75 (A.D. 1870).
- XVII. *Main Drainage Rate*.—18 and 19 Vic., Cap. 120 (A.D. 1855).
- XVIII. *Metropolitan Consolidated Rate*.—32 & 33 Vic., Cap. 102 (A.D. 1869).

FRANK DETHRIDGE,
Vestry Clerk

XXXVIII.—REPORT OF THE SURVEYOR.

The following Report on the Paving, Sewers, Lighting, and other works carried out during the year ending March 25th, 1892, was submitted to the Vestry by the Surveyor, Mr. George Weston, and ordered to be included in the Annual Report of the Vestry :—

VESTRY HALL, PADDINGTON,

30th June, 1892.

To the Vestry of Paddington.

GENTLEMEN,

I beg to submit my Annual Report on the principal works that have been executed and the chief business transacted in the Paving, Sewers, Lighting, and Works Departments during the year ending Lady-day, 1892.

Maintenance of Roads.

The following quantities of materials have been used in the general repairs of the various Macadam and Gravel Roads in the Parish. The surface,

wherever practicable, have been consolidated by the use of the three steam road-rollers :—

	Tons.	Cwt.
Guernsey Granite	4,354	16
Enderby Granite... ..	2,446	8
Aberdeen Granite	193	12
Sifted Gravel	6,710	8
Hoggin	2,280	1
Thames Sand	1,515	3
Thames Ballast	820	12
Pit Sand	11	5

Materials used on frosty roads :—

	Tons.	Cwt.
Thames Shingle	1,189	3½

The cost of working and maintaining the two ten-ton and one six-ton *steam road-rollers* during the year has been as follows :—

	£	s.	d.
Wages to Drivers	264	3	4
1,746 Cwt. of Coke	85	16	10
97 Sacks of Coal	8	4	1
250 Quarts of Lard Oil	11	14	5
11 Pints of Cylinder Oil	0	4	10
30-lbs. of Tallow	0	12	6
261½-lbs. of Cotton Waste	3	10	0
44½-lbs. of White Lead	0	9	2
3-lbs. of Red Lead... ..	0	0	9
54-yds. of Steam Packing	2	8	0
20 Quarts of Boiler Fluid... ..	0	7	6
736 Nights Watchmen	122	13	4
254 Quarts of Colza Oil	6	19	11
Aveling & Porter :—			
New Funnel, &c.	£3	5	4
Roller Repairs	13	6	6
		16	11 10
London County Council, for three Roller			
Licenses		0	3 0
		£525	19 6

During the early part of the year complaints were received as to the rough state of the repaired gravel roads, and asking the Vestry to have them rolled similarly as the broken granite roads. The ten-ton steam road-rollers being too heavy for this class of work, as by their weight the stones get crushed, and there being also a liability to damage the gas and water mains and service pipes, it was decided to hire a six-ton steam roller for three months with the option of purchase at the end of such time, the cost of hire to form part of purchase-money. The roller was found to do the work very satisfactorily, and it was deemed desirable to purchase it with a view of using it to assist in consolidating the gravel roads in future.

Wood Paving Repairs.

The general repairs during the twelve months, the quantity of materials used, and the expenses incurred in thirty-six streets has been as under:—

	£	s.	d.
Labour	635	4	11
6,517 New Wood Blocks	33	8	5
155,192 Old Wood Blocks	155	3	10
1,099½ Bushels of Cement	82	9	3
3,908 Bushels of Sand	97	14	0
169 Bushels of Shingle	4	4	6
38 Gallons of Tar... ..	0	12	8
	<hr/>		
	£1,008	17	7
	<hr/>		

The expenses incurred in making good and repairing pipe-trenches, &c., after Gas, Water, and

Electric Light Companies, &c., in thirty-eight streets during the year has been as follows:—

	£	s.	d.
Labour	132	7	6
4,502 New Wood Blocks	25	16	2
17,063 Old Wood Blocks	17	1	3
704½ Bushels of Cement	52	16	9
727½ Bushels of Sand	18	3	9
43 Bushels of Shingle	1	1	6
106 Gallons of Tar	1	15	4

Street Refuge.

Complaints having been received of the danger to pedestrians crossing the Edgware Road from Praed Street by the City Bank premises to Chapel Street, it was decided to fix a 14-ft. by 4-ft. Refuge, with a large Lambeth-pattern lamp-post and lantern and guard-posts, in the centre of Edgware Road, North of line of footway in Chapel Street, and at the same time to set back the kerb and paving on the West side of Edgware Road, and to alter and widen up the entrance to Praed Street by setting back the kerb-line and inserting kerb of 20-ft. radius at the corners.

Tree Planting.

The Metropolitan Public Gardens Association presented the sum of £100 to be used for planting trees in Paddington, the road selected being the Harrow Road from Bridge House Wharf to the Northern end of Porchester Road, but it was found impracticable to do so in this locality, owing to a 24-in. gas main running under the footway, and very near the kerb. It was decided afterwards to plant the trees on both sides of Chippenham Road. Eighty trees were planted there in October last, the average cost per tree, including all expenses, viz. :—taking up and re-laying, paving, digging holes, cartage, trees, mould, tree-guards, iron footway plates, and men's time, was £1 11s.

The before-mentioned Association gave to the Vestry for the use of the public six new garden seats. These have been fixed in the Uxbridge Road, beside the park railings, between Leinster Terrace and Clarendon Place.

Blomfield Road Railings.

For a very long period these railings between Warwick Road Bridge and Westbourne Terrace Road Bridge, by the side of the canal towing path, had been in a very dilapidated condition. The Grand Junction Canal Company, after a deal of pressure, admitted their liability to repair their portion, but the Regent's Canal Company and Messrs. Budd, Son and Brodie denied their responsibility to repair the remaining length of railing. A considerable amount of correspondence had taken place from time to time, and the fencing becoming dangerous, the Vestry Solicitor was again consulted, and he failing to obtain a satisfactory arrangement, a Special Committee was called, at which the Engineers of the two Canal Companies and Mr. Budd attended. The Engineer of the Regent's Canal Company still maintained that they were not liable, and Mr. Budd promised to again look into the matter. Having done so, he found that the wall and railings in Blomfield Road did belong to the Trustees of the Paddington Charity Estate, and he stated that immediate steps should be taken to put the railing in thorough repair. This has now been done by the

Grand Junction Canal Company doing their portion, and Messrs. Budd, Son and Brodie doing the Paddington Charity Estate portion ; thus settling a question that has been in dispute for upwards of 21 years.

Electric Lighting.

During the past year the Metropolitan Electric Supply Company have made considerable progress in putting down mains in the public streets of this parish. Mains have been laid in all streets where a supply was required, and in anticipation of an increasing demand they have also been run under the pavement of both sides of the principal streets and thoroughfares. The following streets have been taken up for this purpose :—

Alfred Road
Albion Street

The total length of conductors now laid is $30\frac{1}{2}$ miles, and for the purpose of obtaining easy access to the mains, 565 manholes have been provided. This enables additional conductors to be provided when required, without causing any disturbance to the pavement.

A strict supervision has been exercised by my department over all this work, and care has been taken not to interfere with the street traffic during the progress of the work, and no accidents have occurred. Owing to bad weather during the winter, instructions

were given to the Supply Co. to cease work until the paving could be reinstated satisfactorily, and in a manner that would last, which could not have been the case had the paving been relaid during the severe frosty weather.

An uninterrupted supply has been given from the other stations of the Company, and in a few weeks the new Electric Light Station in Amberley Road will be ready for next winter's demand. Large and substantial buildings have been erected on the premises known as St. Peter's Wharf, thus securing the double advantage of canal and road deliveries of coal and other requisites. The buildings have been designed to suit the requirements of the work, and comprise a frontage of offices, store-rooms, &c., leading into a capacious engine room about 108-ft. by 55-ft., containing 5 large horizontal engines, each driving a dynamo by means of ropes, the boiler house being close behind the engines, and the coal bunkers facing the canal, a ready delivery of coals can be made either by barge or road.

Electric Light at the Vestry Hall.

In July it was decided to have the Vestry Hall premises wired for the supply of electric light. A contract was obtained for carrying out such work. Fittings were put up in the various public rooms on the ground floor to supply 78 16-candle power incandescent lamps, and in the basement floor 6 similar

lamps. On the first floor rooms and passages, 24 points were provided for the fixing of fittings, should the Vestry determine hereafter to extend the lighting.

Decorating Board Room.

After completion of the before-mentioned work, an order was passed to thoroughly clean down, paint, and decorate the Board Room. This work was completed by the end of November, and arrangements were made for a public opening of the electric lighting installation in the Vestry Hall by holding a conversatione, the expenses of carrying out the same being borne by subscription from certain members of the Vestry. This was held on the 10th December, when all the lights were put on, and since that time the system has worked very satisfactorily.

New Sewer and other Works.

Five hundred and thirty feet of 3-ft. 9-in. by 2-ft. 6-in. 1-brick sewer has been constructed by Mr. Seaman in Bravington Road, North of Marban Road, in accordance with corrected levels approved by the London County Council, and the necessary side entrances and ventilating openings have been provided to this sewer. A further length of about 144-ft. will have to be constructed in order to complete the total length required in this road.

In that part of Marban Road between Bravington Road and the Western boundary of the Parish, about

120-ft. of 12-in. glazed stoneware pipes have been laid as a sewer in connection with a system of main pipe drainage from a private yard at the rear of houses on the West side of Bravington Road. These drainage works, which are for buildings erected in this yard, together with all requisite inspection, chambers, manholes, and ventilating pipes, have been carefully supervised by the officials of my Department.

54 miles, 6 furlongs, and 148 yards is the total length of sewers under the jurisdiction of the Vestry.

Portions of the brick sewer in Lanark Villas, a length of about 99-ft., was reported to be in an unsafe condition on account of the side walls and other parts having bulged in. In consequence of these defects the Vestry ordered that the same should be re-constructed, which was effected at an expense of £203 16s. 6d.

One new side entrance has been constructed in Walterton Road, on flank of No. 174, Shirland Road, in order to improve the access to sewers in this locality.

As much difficulty has hitherto been experienced by the Vestry's workmen, and at times possible danger to them, in cleansing the small brick sewer on the South side of Cleveland Square, a length of about

700-ft., it was considered advisable to construct three brick manholes, with covers thereto, which can be opened for ventilating the sewer prior to the men entering for cleansing purposes, and also to enable them to get out in a more expeditious manner the accumulated heavy deposits from the sewer to the surface of roadway for carting away. Manholes have also been constructed to sewer in Elnathan Mews, and in Elgin Mews North at the West end of brick barrel sewer. The total cost of constructing the side entrance and manholes was £204 11s. 2d.

Special Repairs to Old Sewers.

In the undermentioned streets further works have been carried out in the repair and improvement of old brick sewers in the Parish by the construction of new stoneware inverts, with regulated and improved levels; also in narrowing the lower portions of side walls so as to enable the flow of sewage to pass freely away. In all sewers which have been thus treated, very little or no deposit accumulates to cause offensive smells to arise therefrom :—

Drains and other Works.

One hundred and twenty-two feet run of 9" stone-ware main pipe-drain, embedded in concrete with outlet into sewer in Irongate Wharf Road, has been laid under footway pavement on the North side of Praed Street, with separate drain connections from ten new shop premises West of Irongate Wharf Road, recently erected by Messrs. Thomas & Taylor for the Grand Junction Canal Company.

The main drain has three brick man-holes and intercepting syphoned trap, in accordance with order of Vestry.

The whole of this work was executed by the Vestry's Contractor, and under the supervision of the Vestry's officials, at a cost of £102 3s. 8d. to Messrs. Thomas & Taylor.

During the progress of re-constructing the drains of No. 46, Hyde Park Square, in December last, by Mr. Appleton, Builder, of Connaught Street, a portion of an old brick sewer or water conduit, three feet high and one foot six inches wide, partly filled in with earth, and water running therefrom, was discovered in the covered area of these premises when the ground was opened for the construction of an inspection chamber by Mr. Appleton. This fact was reported to the Sanitary and Public Health Committee in January last, and I received instructions to continue the investigations with a view of discovering the commencement and termination of the conduit in question. In order to do so a trench was opened through the kitchen of No. 46 to further ascertain the course of the conduit, when it was found to extend under the kitchens of Nos. 45, 44, and 43, where shafts were sunk for the purpose. I then submitted to the Sanitary Committee plans, shewing the position of the conduit and other particulars respecting the same, and reported to the Committee that I believed it to extend a distance of 800 feet beyond the premises No. 43, because at various points this conduit has been cut asunder—in one instance, in Stanhope Street, that being about the

distance before-mentioned from No. 43. A 6" perforated pipe-drain was then laid at the bottom of the conduit in loose rubble, with concrete and ground filled in over same from No. 43 to the sewer in Hyde Park Street. I may mention that there was not any bad smell from the conduit when opened. The cost of this work to the Vestry was £96 19s. 3d.

The ordinary Jobbing Works carried out by the Vestry's Contractors during the last twelve months, amounting to the sum of £2,073 18s. 9d., include the re-construction and repair of gulleys and sandpits, the fixing of two hundred and eighty-three modern flap-traps to the outlets of drains from new and old buildings and gulleys, the construction of one hundred and fifty-seven new stoneware pipe-drains from sewers to old houses or other buildings. Where new drains are laid from existing buildings to the sewer the cost of so doing is defrayed by the parties requiring this work to be done. The amount received by the Accountant of the Surveyor's Department for the before-mentioned drains has been £1,490 18s. 6d., which is included in the total amount paid to Messrs. Neave & Son as Contractors for this work.

One hundred and four applications have been made to the Sewers Department and the sum of £20 16s. 0d. received for examinations of private drains as to their state of repair, obstructions, or other defects. The

obstructions have been removed where possible, and information given to the applicants as to the condition of the drains or if new ones were necessary.

As many of the old sewers which used to require periodical cleansing have now been improved, there is a considerable less quantity of heavy deposit to remove. Ninety loads have been carted away this year from those sewers still remaining in their old condition, against one hundred and forty loads carted away last year from the sewers generally. There has also been carted away a considerable quantity of slop from the catchpits of gulleys.

Underground Public Lavatories.

The Public Lavatory at Paddington Green still maintains its utility, as shewn by the number of persons who paid for the accommodation :—

	Number of Persons.	Amount Received.
Use of Lavatory...	1,222 at 1d. ...	£5 1 10
Use of W.C.'s. ...	27,122 at 1d. ...	113 0 2
Total	... 28,344	£118 2 0

The working expenses during the year amount to :—

Two Attendants' Wages	£80 14 2
Lavatory and Water Closet Expenses		35 14 6
		£116 8 8

The above statement is exclusive of the great number of people using the urinals only.

The Works Committee considered the question of providing suitable urinal accommodation at the junction of Elgin Avenue, Fernhead and Walterton Roads, this place being considered a most suitable site for the construction of an Underground Lavatory, and I was instructed to prepare plans and specifications for carrying out this work. The accommodation provided being five W.C.'s and fourteen urinals for men and four W.C.'s for women, with lavatory accommodation in each.

The construction of the above was commenced on the 16th March by Mr. J. Bentley, Contractor, of Leicester, whose tender was accepted for the same by the Vestry, and the work is still proceeding.

The above-ground iron and slate urinals in different parts of the Parish are also much used by the Public, and are maintained in an efficient sanitary condition.

New Buildings.

Very extensive ranges of buildings have been erected by the Metropolitan Electric Supply Company on the East side of Amberley Road, by Harrow Road, as an Electric Light Station.

In London Street, between Francis Street and Stanley Street, the Post Office Authorities are com-

pleting a large building to be used as a District Sorting Office, with a subway under London Street to the arrival platform of Paddington Station.

A large factory building has been erected on sites of late Nos. 225 and 227, Harrow Road, abutting on Marlborough Street, for Mr. C. Fox.

In a private yard at the rear of houses on the West side of Bravington Road, buildings one storey high have been built by Mr. Seaman, to be used for laundry purposes.

In addition to the above buildings, one hundred and fifty-eight houses have been erected and the drainage thereof carried out in accordance with submitted plans and orders of Vestry, under the direction of the Officers of my Department.

LIGHTING DEPARTMENT.

The number of public lamp columns and bracket lamps in lighting on the 25th March last was 2,017. They each consume 4·6 cubic feet per hour. The number of refuge and corner lamps and candle-power will be found on page 118.

The Gas Company have been served with 108 notices during the year for the rectification of defective service pipes, &c.

During the year 7 lamp-posts were knocked down, 23 columns broken, and 20 head-irons and lanterns damaged by various parties; the restoration being made good by the Vestry's own staff of workmen, at the expense of those causing the damage, with the exception of 13 who escaped detection.

DUSTING DEPARTMENT.

Collecting Rough Dust.—During the year ended Lady-day, 23,781 loads of rough dust were collected, the number of working days being 308; 5,425 horses and vans were employed in this work, the daily average number of loads collected being 77·21, or 4·38 loads per horse per day, the maximum number of loads collected in one week being 632, and the minimum 317.

Materials Abstracted.—The following miscellaneous materials were abstracted from the before-mentioned loads of rough dust, viz. :—

	Tons.	Cwt.	Qrs.	
14,886 chaldrons of Ashes.	63	17	2	of Bones.
9,406 chaldrons of Breeze.	110	0	0	of Rags.
34 cart loads } of Hard Core.	53	18	2	of Cast & Wrought
24 boatloads }				Iron.
35 tons of Coal.	4	0	3	of various Metals.
178 boat loads or 4,172 tons	14	11	3	of white sheet Glass.
of Soft Core.	19	5	0	of black Glass.
				broken Bottles, &c.

SLOPPING DEPARTMENT.

The dry sweepings, slop, snow, &c., collected by the Vestry's carmen is brought to the Dépôt, and when dry is tipped into the boats direct. When in a

fluid state it is deposited in the filtering tanks, so that the water may percolate away, the mud portion being placed into boats and conveyed away by canal beyond Southall, under a contract with Messrs. Studds at 2s. 0½d. per ton, this amount being 8d. per ton more than last year, the increase being due to the difficulty in getting men to unload the boats at the old scale of wages. This amount includes haulage, tonnage, unloading, and for providing a shoot.

During the year 28,745 loads were collected by 7,811 horses and vans, working 308 days, giving an average of 93·32 loads per day, or 3·68 loads per horse and van per day, the maximum number brought to the Depôt in one week being 1,146 and the minimum 92 loads. 34,965 tons were taken away down the canal by means of 953 boats.

Carting Road Materials and General Work.

During the year 2,830 horses and carts were engaged in this class of work for 302 days, giving an average of 9·37 per day.

Cleansing the Public Streets.

As described in former Reports, this work is executed by gangs of sweepers, horse scraping and sweeping machines. Main thoroughfares and important

streets are swept daily, especially wood paved roads ; other roads, where the traffic is not so great, are swept two or three times weekly.

Sanding Frosty Roads.

When necessary, men, horses, and sanding machines were sent out before midnight and in the early hours of the morning scattering sand and shingle, 515 horses and carts being out on 41 occasions, the total hours worked being 515, and 686 cubic yards of shingle, 326 chaldrons of ashes, and 100 cubic yards of hoggin being used.

Road Watering.

The vans and horses were out on 108 days, 3,438 being thus engaged, giving an average of 31·83 per day.

The quantity of water used and the cost thereof, including that used for road-making purposes, being as follows :—

	Gallons.		
Grand Junction Water Co. ...	18,005,500	...	£525 3 2
West Middlesex Water Co. ...	4,732,430	...	£155 0 8
	<u>22,737,930</u>		<u>£680 3 10</u>

On the mains of the Grand Junction Water Company there are 44 standposts, and on the West Middlesex Water Company, 13 meters being attached to each, the indices being taken fortnightly.

Horses.

The losses by deaths and sales during the year have been as follows, viz. :—

DEATHS.

No.	Description.	When Purchased.	Date of Death.	Cause of Death.
1891.				
53	Brown Mare ...	March, 1885	June 27th	Inflammation of bowels.
100	Roan Mare ...	„ 1889	Sept. 10th	Inflammation of lungs.
29	Black Gelding ...	„ 1886	Nov. 25th	Stoppage of bowels.
1892.				
90	Bay Gelding ...	„ 1888	Feb. 4th	Ruptured intestines.
40	Roan Gelding ...	„ 1884	March 1st	Cankered foot.
149	Chestnut Mare ...	„ 1892	March 11th	Ruptured blood vessel.
134	Bay Gelding ...	„ 1892	March 20th	Hydro-thorax, result of pleuro-pneumonia.

SALES.

No.	Description.	When Purchased.	Date of Sale.	Reason for Selling.
1892.				
20	Black Mare ...	March, 1881	March 4th	Worn out.
24	Chestnut Gelding	„ 1881	„ „	„
26	Grey Gelding ...	„ 1881	„ „	„
43	Bay Gelding ...	„ 1884	„ „	„
45	Black Gelding ...	„ 1884	„ „	„
57	Chestnut Gelding	„ 1886	„ „	„
61	Bay Gelding ...	„ 1886	„ „	„
67	Black Mare ...	„ 1886	„ „	„
81	Bay Gelding ...	„ 1888	„ „	Worn out and lame.
114	Bay Gelding ...	„ 1890	„ „	Worn out and lame from a strained hock.

The net average amount received per horse by sales was £13 0s. 4d., the average time per horse working being seven years and one month.

Horse Fodder.

Advertisements were issued on two occasions during the year for tenders for the supply of fodder. The following table will shew the cost per horse per week for keep and bedding, the average being 15s. 8'98d.:—

Artizans' Work.

The general work of the repairs at the several Depôts have been carried out by the following Artizans, viz. :—The Millwright, Engineer, Wheelwrights, Farriers, Smiths, and Harness Makers ; and all repairs to the engine, sifting machine, stand-posts, and general smithing work for repairs to carts, vans, scraping and sweeping machines, horse shoeing, &c., and miscellaneous repairs ; also the following work for the Highway Department.

Pickaxes lined and Steeled.	TOOLS SHARPENED.			Paving Hammer Heads steeled.
	Pickaxes.	Chisels.	Paving Hammers.	
200	9,980	1,869	3	18

Paddington Green and St. Mary's Old Churchyards.

In June last the Vestry passed an order to purchase No. 18, Cuthbert Street, for the purpose of making a permanent passageway under same from Hall Park into the Old Churchyard. Plans, &c., were prepared and tenders obtained for carrying out this work, which was put in hand at once, completed, and opened to the public on the 18th July.

The following list of Tables, Details, and Accounts accompanying this Report (see Appendix), will furnish interesting information connected with the several matters carried out by the Works and Lighting Departments :—

A—Dusting, Slopping, Watering, Carting Roadway Materials, and General Expenses incidental to the Works Department.

B—Plant Capital Account.

C—Road Sweeping and Cleansing Account.

D—Public Lighting Account.

E—Miscellaneous Articles in Store.

F—Miscellaneous Tools in use.

G—Defects of Un-metered and Metered Lamps.

H—List of Plant fixed in the Public Streets.

I—Experimental and Testing Apparatus fixed at the Vestry Hall.

J—List and positions of Refuge and Special Lamps.

K—Table of Lighting Hours, &c., &c.

I am,

Gentlemen,

Your obedient Servant,

GEORGE WESTON,

Surveyor,

Professional Associate Surveyors' Institute.

DUSTING, SLOPPING, WATERING AND CARTING MATERIALS, &c.

XXIX—REPORT—THE BUREAU OF TABULATED REPORTS OF THE PUBLIC ANALYST, VENTRY HALL, LONDON, 1892

SIR,
For the Year ending March 31st, 1892,
I am instructed by the Board to transmit
to you statements in relation to the Account of the
Board and of the Treasurer of the Board for the
Year ending 31st March, 1892, and also to submit
for Messrs. J. & W. Messinger, (the auditors)
(1st) and (2nd) by the Treasurer, and
3rd by the Treasurer, and 4th by the Treasurer,
A Statement showing the balance of the
by the Treasurer, and 5th by the Treasurer,
years is shown as appended.
From the balance at the commencement of the
financial year, a sum of £1,000 was paid over
to the Treasury, and a sum of £1,000 was
since 1889, when the loan was raised for the purpose and
laying out, the ground was cleared and
The following shows the number of barrels which
took place from the 1st of March, 1891, to the 1st
April, 1892:—

234

Of these the only adulterated articles were 18 samples of Milk

XL.—REPORT OF THE BURIAL BOARD.

VESTRY HALL, HARROW ROAD,

June 15th, 1892.

SIR,

I am instructed by the Burial Board to transmit to you Statements in abstract of the Account of the Board, and of the Incumbent of Paddington, for the Year ending 25th March, 1892, certified by Mr. Wilde (of Messrs. Wilde and Venables, Chartered Accountants), and audited by the Parochial Auditors.

A Statement showing the amount of Fees received by the Incumbent and the Board during the past three years is likewise appended.

From the balance at the commencement of the financial year a further sum of £1,500 was paid over to the Vestry account, making a total of £40,600 since 1870, when the loan raised for the purchase and laying-out of the ground was cleared off.

The following shows the number of burials which took place from the 31st March, 1891, to the 1st April, 1892 :—

CONSECRATED GROUND.

Parishioners.	Non-Parishioners.	Total.
909	397	1,306

UNCONSECRATED GROUND.

Parishioners.	Non-Parishioners.	Total.
752	411	1,163

During the same period there were 243 graves purchased.

In the preceding year the number of interments in the Consecrated Ground was 1,166, and in the Unconsecrated Ground 1,170.

I am, SIR,

Your obedient Servant,

HENRY CECIL,

Clerk to the Board.

To F. Dethridge, Esq.,

Vestry Clerk, Paddington, W.

PADDINGTON BURIAL BOARD.

REPORT

OF THE

Commissioners for Public Baths and Washhouses

FOR THE

PARISH OF PADDINGTON,

For the Year ending 31st March, 1892.

The Commissioners in submitting their Annual Statement of Accounts to the 31st March, 1892, duly audited, have to report:—

That there has been a slight increase in the Receipts Accounts. for the year, amounting to £90 1s. 8d. The Expenditure has been very heavy, owing to the necessity (foreshadowed in last Report) of laying down three new Boilers, which are further referred to under the head of Machinery. This has entailed an expenditure of upwards of £1,100, of which £646 has been paid in the Financial year under review, and with the extra charge of £313 for Rates and Taxes, in consequence of the increased Assessment on the premises, has obliged the Commissioners to make a Supplemental Call upon the Vestry for £500.

The Comparative Statement of the number of persons using the Baths and Washhouses during the past four years is as follows:—

Comparative Statement of No. of Bathers and Washers.

YEAR.	SWIMMING BATHS.			PRIVATE BATHS.			Total No. of Bathers.	Wash-houses.
	Men.	Women.	Total.	Men.	Women.	Total.		
1888-89	68,164	9,084	77,248	69,172	19,111	88,283	165,531	19,385
1889-90	73,467	12,439	85,906	69,830	21,036	90,866	176,772	18,793
1890-91	68,296	12,065	80,361	70,718	21,571	92,289	172,650	20,118
1891-92	76,631	11,847	88,478	70,408	21,198	91,606	179,784	19,639

Building. The Building has been maintained in an efficient state of repair, much of the work being carried out by the employés during the winter months.

The Roof of the Ladies' Swimming Bath being in a very defective condition, the Commissioners are considering the question of overhauling the same, and painting the interior.

Gallery. A Gallery is now in course of erection in the Ladies' Swimming Bath, at a cost of £34 10s., and the Commissioners believe that it will be much appreciated by those who wish to watch the swimming.

Machinery. The old Boilers, which, as mentioned in last Report, have been in constant work for 17 years, developed unmistakeable signs of breaking down, and being so dangerously thin in many places, as to be impossible of repair, the Commissioners, after due consideration, thought they would be following an economical course by laying down a set of three new Boilers. Advertisements were therefore issued, and Tenders with Plans received from twelve firms, extending over all parts of the Country. The deliberations on these occupied a considerable amount of time and attention and resulted in the acceptance of the Tender of Messrs. Rennie & Co., of Greenwich, for three Steel Multi-Tubular High-pressure Boilers of 50 h.p., for the sum of £970. In accepting this Tender, the Commissioners had regard to the reduced length of the Boilers, viz., 14-ft. 10-in. as against 26-ft., thus giving a much larger working space in the Boiler Room, which has hitherto been greatly

needed. The alteration has involved a re-construction of the Hot and Cold Water Mains, at a cost of £66, and the fitting of an Iron Gallery in the Boiler Room, at a cost of £28 10s.

With these improved appliances at their command, the Commissioners consider that it will be a great saving to heat the Swimming Baths by steam, and they are considering the question of introducing a Steam Injector into the First Class Swimming Bath.

Heating
Baths by
Steam.

The system adopted last year, of closing the Baths on Sunday Mornings during the months of November, December, January, and February, was again adopted this year, and a loss thereby avoided, without any apparent inconvenience to the public.

Sunday
Closing.

The question of issuing Penny Tickets for Children attending the Board Schools, is occupying the attention of the Commissioners, and they hope that steps may be taken to bring this about, notwithstanding the fact that it must be attended with a loss.

School
Board
Children
Penny
Tickets

The Commissioners cannot close their Report without recording their deep sense of the loss the Parish has sustained by the death of their late colleague, Mr. William Clarke, whose practical knowledge rendered him peculiarly fitted for the position he held as a Commissioner.

Death of
Mr. Wm
Clarke.

The following Statements are appended to this Report :—

Statement of Accounts for the Year ending 31st

March, 1892, with Statement of Outstanding Assets and Liabilities.

Number of Tickets in Stock, given out and sold, during the twelve months, which will be found to agree with the first three columns upon the Receipt side of the audited Cash Account.

ADDENDA.

REPORT OF ACCOUNTANTS.

The following Report was received by the Commissioners, and ordered to be printed as an Addenda to the Report :—

(Copy.)

69, MOORGATE STREET, E.C.,

15 June, 1892.

To the CHAIRMAN,

COMMISSIONERS OF PADDINGTON BATHS.

SIR,

We have to report that we have completed our Examination of the Tickets, and Audit of the Accounts for the Year ending 31st of March, 1892, and finding the same to be correct, we have so Certified the Statement of Accounts for the 12 months.

Yours obediently,

WILDE & VENABLES,

Chartered Accountants.

Paddington and Washhouses.

XLII.—SCHEDULE OF THE PAROCHIAL CHARITIES.

This Schedule gives the names and addresses of the Trustees, the description and income of the Property, and the mode of distributing the Funds ; prepared by the Vestry Clerk, pursuant to the following Section of the “ Metropolis Local Management Act, 1855 ” (18 and 19 Vic. c. 120) :—

“ 199.—Every such Vestry as aforesaid shall
“ cause to be made out once at least in every year,
“ a list of the several freehold, copyhold, and lease-
“ hold estates, and of all charitable foundations and
“ bequests if any belonging to the parish, and under
“ the control of the Vestry, the list to contain a
“ true and detailed account of the place where such
“ estate or charitable foundation may be situate, or
“ in what mode and security such bequest may be
“ invested, specifying also the yearly rental of each,
“ and the particular appropriation thereof, together
“ with the names of the persons partaking of their
“ benefit (except where such benefit shall be allotted
“ to the poor of the parish generally), and to what

“amount in each case, and also stating the name
“and description of the persons in whom such
“estates are vested, and the names and description
“of the trustees for each charity; and such lists
“shall be open for the inspection of the ratepayers
“at the office of the Vestry Clerk at the same time
“with the accounts when audited, according to the
“provisions of this Act.”

Borough of Paddington.

REPORT OF THE MEDICAL OFFICER OF HEALTH

For the Year 1891.

To the Vestry of the Parish of Paddington.

GENTLEMEN,

I beg to lay before you the following Report on the Health of the Parish of Paddington during the year 1891 :—

BIRTHS AND DEATHS.

During the fifty-two weeks of the registration year ending 2nd January, 1892, 2,952 births and 2,331 deaths were registered in Paddington.

Births.

Of the 2,952 births, comprising 1,536 male and 1,416 female children, 2,420 occurred in St. Mary's and 532 in St. John's Sub-district.

The proportion of males to females among the children born in the Parish was 100 males to 92 females, whereas in the Metropolis it was 100 males to 97 females.

The births were most numerous during the first and least so in the fourth quarter of the year.

The ratio of births to the entire population of the Parish was 1 to every 40 inhabitants, or 25·1 per 1,000 inhabitants of all ages.

In St. Mary's Sub-district the ratio of births to the population was 1 to every 35 inhabitants, or 28·8 per 1,000 living.

In St. John's the ratio of births to population was 1 to 63, or 15·8 per 1,000 inhabitants.

Some of the preceding particulars are shown in the subjoined table :—

Sub-Districts.	Enumerated Population. (unrevised.)	Births.	Ratio of Births to Population.	Rate per 1,000.
St. Mary's	84,156	2,420	1 to 35	28·8
St. John's	33,682	532	1 to 63	15·8
Paddington	117,838	2,952	1 to 40	25·1

The Birth-rate in London was 31·8

„ „ England & Wales was ... 31·4

Deaths.

The total number of deaths registered in Paddington during the year was 2,331. Of this number, 278

were of non-parishioners who died in St. Mary's Hospital, 43 were of non-parishioners who died in the Children's Hospital, and 5 were of non-parishioners who died in the Lock Hospital, making a total of 326 non-parishioners who died in the Parish.

Deducting these non-parishioners, it will be seen that 2,005 parishioners died actually in Paddington. To this number must be added the deaths of 105 parishioners in extra-parochial hospitals and public institutions, making a corrected total of 2,110—1,006 males and 1,104 females—equivalent to an annual death-rate of 17·9 per 1,000 inhabitants.

The natural increase of population from the excess of births over deaths was 842, as compared with 797 in the previous year.

Of the 2,110 deaths, 1,590 occurred in St. Mary's and 520 in St. John's Sub-district.

The subjoined table shows that the deaths were most numerous in the first, and least so in the third quarter of the year.

Quarter.	St. Mary's.	St. John's.	Paddington.
First	447	154	601
Second	397	152	549
Third.....	370	107	477
Fourth	376	107	483
Total	1,590	520	2,110

In the Public Institutions in the Parish there were 695 deaths, viz., 56 in the Workhouse, 201 in the Paddington Infirmary, 62 in the Children's Hospital, 371 in St. Mary's Hospital, and 5 in the Lock Hospital.

The 56 deaths in the Workhouse—23 males and 33 females, and the 201 deaths in the Paddington Infirmary—109 males and 92 females—being regarded as those of parishioners, are included in the 1,590 deaths in St. Mary's Sub-district; 278 of the deaths in St. Mary's Hospital, 43 of the deaths in the Children's Hospital, and the 5 deaths in the Lock Hospital, were of non-parishioners, and are therefore not dealt with in this Report.

The following table shows the ratio of deaths to the population, together with the death-rate per 1,000 of the population of the parish and of its two Sub-districts :—

Sub-Districts.	Enumerated Population. (unrevised.)	Deaths.	Ratio of Deaths to Population.	Death Rate per 1,000.
St. Mary's	84,156	1,590	1 to 53	18·9
St. John's	33,682	520	1 to 65	15·4
Paddington	117,838	2,110	1 to 56	17·9

In 1891 the Death-rate was in London ...	21·4
Do. do. in Edinburgh ...	21·6
Do. do. in Glasgow ...	25·3
Do. do. in Dublin ...	26·5
Do. do. in England & Wales ...	20·2
Do. do. in Paddington ...	17·9

The death-rate from all causes in each one of the five groups of districts into which London is divided is shown as under :—

	Per 1,000 Inhabitants.			
North Districts	20·0
West „	19·5
South „	20·2
East „	23·9
Central „	27·6

The subjoined figures showing the number of deaths from all causes in Paddington during each of the last ten years may be more intelligible to some than when expressed in the form of a death-rate :—

Years.	No. of Deaths.			
1882	1,766
1883	1,762
1884	1,802
1885	1,877
1886	1,909
1887	1,785
1888	1,916
1889	1,664
1890	2,104
1891	2,110

When considering these figures, not only must the annual increase of population be borne in mind, but also the fact that since 1885 the deaths of parishioners in out-lying Public Institutions have been included. The 105 deaths of parishioners—83 from St. Mary's Sub-district and 22 from St. John's—which occurred in 1891 in the following extra-Parochial Hospitals and Institutions, are throughout

this Report dealt with in the same manner as if they had actually taken place in the Parish, and are assigned in the Tables to the Sub-districts from which the deceased were admitted. These 105 deaths constituted 5·0 per cent. of the total corrected deaths.

Mortality at different Ages.

Sub-Districts.	Under 1 Year.	Under 5 Years.	65 Years and Upwards.	Percentage of Deaths of Infants under 1 year to Registered Births.	Percentage of Deaths of Children under 5 years of Total Deaths.
St. Mary's ..	364	519	437	15·0	32·6
St. John's ..	73	110	163	13·7	21·2
Paddington ..	437	629	600	14·8	29·8

During the year there were 437 deaths of infants under one year of age, 629 of children under five years of age, and 600 of persons aged 65 years and upwards.

The rate of infantile mortality in Paddington was 148 per 1,000 registered births. In London the rate was 154, and in the 27 largest provincial towns it ranged from 137 in Brighton to 227 in Preston.

The 629 deaths of children under 5 years of age constituted 29·8 per cent. of the total deaths. 158 of these deaths were due to one or other of the seven principal zymotic diseases, of which 135 occurred in St. Mary's, and 23 in St. John's Sub-district.

ZYMOTIC DISEASES.

The number of deaths from the seven principal preventable (zymotic) diseases was 201, and was equivalent to an annual rate of 1·7 per 1,000 inhabitants. In London, the zymotic death-rate was equivalent to an annual rate of 2·30 per 1,000 inhabitants. In the 27 largest provincial towns, it ranged from 1·05 in Brighton to 3·77 in Preston.

Small-pox caused no death in Paddington, nor did any case come under the notice of the Sanitary Department. In London only 8 deaths occurred, being the sixth successive year in which London has been practically free from the disease.

Measles caused only 7 deaths—6 in St. Mary's and 1 in St. John's Sub-district—equivalent to an annual

rate of 0·6 per 1,000 inhabitants. The number of deaths from this disease during the preceding year was 77. In London there were 1,807 deaths, equivalent to a rate of 0·43 per 1,000 inhabitants, the average annual rate during the preceding decennium (1881-1890) having been 0·64.

Scarlet Fever caused 7 deaths—5 in St. Mary's and 2 in St. John's Sub-district—equivalent to an annual rate of 0·06 per 1,000 inhabitants, as compared with 0·05 in the preceding year. 259 cases—209 in St. Mary's and 50 in St. John's Sub-district—were notified during the year to the Sanitary Department. 149 cases—124 from St. Mary's and 25 from St. John's Sub-district—were removed to Hospital, 110 cases—85 in St. Mary's and 25 in St. John's Sub-district—being treated at home.

In London there were 589 deaths, equivalent to an annual rate of 0·14 per 1,000 inhabitants, the average annual rate during the preceding decennium having been 0·34.

Diphtheria caused 27 deaths in Paddington—19 in St. Mary's and 8 in St. John's Sub-district—as compared with 45 in the preceding year. The rate was 0·23 per 1,000 inhabitants.

184 cases—159 in St. Mary's and 25 in St. John's Sub-district—were notified to the Sanitary Department. 71 of these cases—59 from St. Mary's and 12

from St. John's Sub-district—were removed to Hospital. 113 cases—100 in St. Mary's and 13 in St. John's Sub-district—were treated at home.

All the houses in which the deaths occurred were carefully inspected, attention being specially directed in each case to the condition of the water supply and to the soundness of the house-drain, as proved either by the water-test, or by the smoke-test, or by the peppermint-test. In the large majority of cases defects of some sort were discovered, and were subsequently made good.

The localities in which deaths from this disease occurred are shewn in Table VA.

In London there were 1,361 deaths, equivalent to an annual rate of 0·32 per 1,000 inhabitants, the average annual rate during the preceding decennium having been 0·26.

Whooping Cough caused 67 deaths—57 in St. Mary's and 10 in St. John's Sub-district—equivalent to an annual rate of 0·6 per 1,000 inhabitants, as compared with 0·7 in the preceding year.

In London there were 2,876 deaths, equivalent to a rate of 0·68 per 1,000 inhabitants, the average annual rate in the preceding decennium having been 0·69.

Fever (Typhoid) caused 17 deaths—6 in St. Mary's and 11 in St. John's Sub-District—equivalent to an

annual rate of 0·14 per 1,000 inhabitants, as compared with 0·08 in the preceding year. 65 cases—49 in St. Mary's and 16 in St. John's Sub-district—were notified to the Sanitary Department. 29 of these cases—24 from St. Mary's and 5 from St. John's Sub-district—were removed to Hospital, 36 cases—25 in St. Mary's and 11 in St. John's Sub-district—being treated at home.

In London there were 597 deaths, equivalent to an annual rate of 0·14 per 1,000 inhabitants, the average annual rate during the preceding decennium having been 0·22.

Diarrhœa caused 76 deaths—67 in St. Mary's and 9 in St. John's Sub-district—equivalent to an annual rate of 0·6 per 1,000 inhabitants, as compared with 0·52 in the preceding year.

In London there were 2,437 deaths, equivalent to an annual rate of 0·59, the annual average rate during the preceding decennium having been 0·74.

Disinfection.

The disinfection of premises, of small articles of clothing, and of furniture, was, as hitherto, done without charge by the Sanitary Inspectors. Bedding, carpets, and large woollen fabrics belonging to the poor are cleansed and disinfected by Messrs. Armfield at the cost of the parish.

During the year 248-cwt. 3-qrs. 16-lbs. were thus disinfected by that firm, involving an expenditure of £371 16s. 8d. A further sum of £23 19s. 1d. was paid for chemicals and carbolic soap, thus raising the cost incurred by the Sanitary Department for disinfection to the sum of £395 15s. 9d.

Canal Basin.

The water in the Canal Basin was run off in March, 1891, when about 900 tons of mud were removed. The Basin was emptied again in July, but no mud was removed.

Water.

Paddington is supplied with water by the Grand Junction and West Middlesex Companies, which draw their supplies from the Thames, as do also the Chelsea, the Lambeth, the Southwark, and Vauxhall Companies. The remaining Metropolitan Water Companies are the Kent Company, whose water is drawn from the deep wells, and the New River Company and East London Company, both of which derive their water from the River Lea and other sources. For the purposes of comparison, Professor Frankland, in his annual report to the Registrar-General on the condition of these waters during 1891, includes also the results of similar examinations of the water supplied by the Colne Valley Water Company and the Tottenham Local Board of Health. He states that the operations of

those Companies which supply river waters have been most seriously interfered with by dense smoke—bearing fogs in the early part of the year—and by heavy floods in the Thames and Lea during the summer and autumn. In consequence of these unfavourable conditions, the river-derived waters have often been in a very undesirable condition, and well-founded complaints have repeatedly reached him from persons supplied with these waters. The storage, subsidence, filtration plant of these Companies who purvey river water were quite inadequate to deal with the exceptional pollution; and water of such bad quality, as regards organic matter in solution, has rarely been delivered by these Companies during the last 26 years. There appeared to have been no abnormal amount of sewage contamination in the river waters, the great additional amount of organic matter being derived from vegetable sources. Nevertheless, the water at the times of maximum pollution was, by reason of excessive quantity of organic and of clay in suspension, in some cases repulsive to both eye and palate.

All the samples examined were taken directly from the mains of the several Companies. In addition to the chemical analysis to which each sample was submitted, the temperature of the water as it issued from the main, at the time of its collection, was determined, and the appearance which it exhibited on being viewed in a two-foot tube recorded.

Temperature : Although the average temperature differs but little for the several supplies, the monthly variation in the case of the river waters is very great, whilst the temperature of the deep-well water is practically constant throughout the year. Thus the water principally derived from the Thames and supplied by the Chelsea, West Middlesex, Southwark, Grand Junction, and Lambeth Companies, varied in temperature from $34^{\circ}\cdot9$ Fahr. in January to $68^{\circ}\cdot5$ Fahr. in July, and the water of the Lea distributed by the New River and East London Companies fluctuated from $35^{\circ}\cdot8$ Fahr. in January to $65^{\circ}\cdot3$ Fahr. in July. The deep-well water of the Kent Company on the other hand, was free from these violent fluctuations, and practically maintained a constant temperature throughout the year. This uniformity of temperature of deep-well water is of considerable importance, as the water remains cool and refreshing in summer and is less likely to become frozen in the service-pipes in winter.

The solid matters in the water are almost wholly composed of mineral substances, which, in the proportion in which they exist in Metropolitan waters, in no way diminish the fitness of the water for drinking. But the salts of lime and magnesia which constitute the principal part of these mineral ingredients are objectionable, not only because they impart to the water what is known as "hardness," and thus render it unsuitable for washing, but also

because they cause incrustations and deposits in steam and kitchen boilers and hot-water pipes.

The saline matters dissolved in the deep-well water from the chalk is considerably greater in amount than those found in the river water, and inasmuch as this chalk-water is sent out in its natural condition by the Kent Company and by the Tottenham Local Board of Health, these supplies contain, in two out of the three cases, more solid matter than any of the others. The Colne Valley Company, on the other hand, by treating this chalk-water with lime before delivery, so reduced the solid matter that the latter was one-third less than the amount present in the river waters, and was less than one-half of that in the deep-well waters either of the Kent Company or of the Tottenham Local Board of Health.

The comparatively small proportion of organic material which the solid matter invariably contains is, on the other hand, of the greatest importance in connexion with the use of the water for drinking purposes. For although the actual amount of this organic matter is often quite insignificant, yet it may be of the most objectionable character on account of its origin. Thus the water, both of the Thames and the Lea, receives, above the points where it is abstracted for the purposes of the Metropolitan supply, various contributions of organic matter of animal origin, such as the drainage

from manured land, the effluents from sewage works, and even raw sewage itself. This animal matter may, at any time, be accompanied by zymotic poisons dangerous to health, and although the chances of such substances reaching the water-consumer are greatly reduced, both by the filtration to which the water is subjected by the Companies and by the care which is exercised in excluding the flood-waters from their reservoirs ; yet, in spite of these protective measures, there is no absolute guarantee that the noxious ingredients, which may at any time be present, are wholly removed. Most of the Water Companies are endeavouring to substitute, as far as possible, water from subterranean sources for raw river water, whilst the Board of Conservators have almost completely stopped the discharge of untreated town sewage into the Thames.

Table A gives the proportion of organic impurity present in the waters taken from the Thames, the Lea, and the deep-wells respectively, from 1868 to 1891. From the figures there given it will be seen that, the Thames water distributed during the year 1891 has not been equalled in respect of high average organic impurity since the year 1882.

Of the water chiefly derived from the River Lea, that supplied by the New River Company contained, in every case, less organic matter than that of the East London Company, which was generally, in this respect,

somewhat superior to the best of the Thames waters. The Lea water delivered during the year 1891 was also of worse average quality, as regards organic contamination, than that delivered at any time since the year 1882.

Table B shows the maximum, minimum, and average proportions of organic impurity in each of the waters, the average amount contained in the Kent Company's water during the nine years ending December, 1876, being taken as unity.

In Table C are recorded the results of observations respecting the freedom from turbidity or otherwise of various waters, and for the purposes of comparison, the results of similar observations made in 1868 are also included.

I have the honour to be,

Gentlemen,

Your obedient Servant,

JAMES STEVENSON,

Medical Officer of Health.

VESTRY HALL, PADDINGTON,

June, 1892.

TABLE A.

Taking the mean proportion of organic impurity in the Thames water delivered in London in 1868 as 1,000, in the subsequent years the following proportions were present respectively in the Thames water, in the Lea water, and in the Deep Well water.

Year.	Proportion of organic impurity present in Thames water as delivered in London.	Proportion of organic impurity present in Lea water as delivered in London.	Proportion of organic impurity present in Deep Well water as delivered in London.
1868	1,000	484	254
1869	1,016	618	312
1870	795	550	246
1871	928	604	150
1872	1,243	819	221
1873	917	693	250
1874	933	583	287
1875	1,030	751	250
1876	903	562	246
1877	907	596	243
1878	1,056	747	323
1879	1,165	947	387
1880	1,254	1,013	393
1881	993	765	405
1882	1,033	711	409
1883	850	620	321
1884	723	500	264
1885	839	603	200
1886	756	500	244
1887	690	473	249
1888	722	506	241
1889	677	504	268
1890	680	432	252
1891	1,002	684	357

TABLE B.

TABLE showing the maximum, minimum, and average proportions of organic impurities in the water delivered by the several Companies and Authorities during 1891 :—

Sources.		Maximum.*	Minimum.*	Average.
Deep Wells	Kent	1.0	0.6	0.8
	Colne Valley ..	5.7	1.1	1.9
	Tottenham ..	1.8	1.2	1.5
	East London ..	2.3	0.9	1.7
River Lea	New River ..	4.1	1.1	2.0
	East London ..	5.8	2.4	3.6
River Thames	Chelsea.. ..	6.6	2.4	3.6
	West Middlesex	7.9	2.4	4.2
	Southwark ..	8.5	2.6	4.1
	Grand Junction	8.7	2.6	4.4
	Lambeth ..	8.8	2.7	4.2

* For purposes of comparison the average yearly amount of organic element (organic carbon and organic nitrogen) found during the nine years ending 1876 in the water supplied by the Kent Company is taken as the unit.

TABLE C.

Showing the relative efficiency of filtration of the water of the several Companies and Authorities in 1891, as compared with 1868:—

Companies or Local Authorities.	Number of occasions when clear and transparent.		Number of occasions when slightly turbid.		Number of occasions when turbid.		Number of occasions when very turbid.

Average of } 10 years, 1881-1890 }	75,710	369,94	14,670	2,322	581	1,366	460

† April Rate, 1892.

* Enumerated populations in 1881 and 1891.

NOTES.

1. *Population at Census*, 1861, 75,807; 1871, 96,813; 1881, 107,218; 1891 (unrevised), 117,838.
2. *Area in Acres*, 1,280.
3. *Average No. of Persons in each House at Census*, 1881, 8.1.

* For statistical purposes the Registrar-General estimates the population to the middle of the year on the basis of the rate of increase ruling between the two preceding Census periods. The estimate of population may be checked by the known number of inhabited houses, and by the average number of inmates per house, as ascertained at the preceding Census.

** The deaths of non-parishioners in public institutions within the parish (St. Mary's Hospital, Lock Hospital, and Children's Hospital, Paddington Green), are deducted; but those of parishioners in extra-parochial hospitals and outlying institutions are included.

TABLE II.

TABLE showing the Annual Birth Rate, Rate of Mortality, Death Rates among Children, and Deaths in Public Institutions for the Year 1891, and 10 Years preceding.

Year.	Birth Rate per 1,000 of the Population.	Annual Rate of Mortality per 1,000 living.	Deaths of Children under 1 year; percentage of Total Deaths.	Percentage of Deaths of Children under 1 year to Registered Births.	Deaths of Children under 5 years; percentage of Total Deaths.	Total Number of Deaths in Public Institutions.

APPENDIX III.

PADDINGTON VESTRY HALL.

Regulations and Conditions as to Letting.

REGULATIONS.

- 1st.—All applications for the use of the Hall must be made in writing to the Vestry Clerk, on forms to be obtained at the Hall, stating the nature of the purpose for which it is required.
- 2nd.—The Vestry will not consider the Hall engaged until the charges are paid, and no public announcement is to be made until the Hall is so engaged. None but official receipts will be considered as valid.
- 3rd.—The person in whose name the Hall is engaged, and whose name is on the application and receipt, shall be held responsible for any damage.
- 4th.—Except by special permission of the Vestry, or one of its Standing Committees, the Hall will not be let for any Meeting, Lecture, Concert, &c., at which the doors will be required to be open before Seven o'clock in the Evening.

Scale of Charges for the Use of the Vestry Hall.

(PAYABLE IN ADVANCE.)

PARTICULARS OF MEETING.	OUTER HALL.			INNER HALL.		
	£	s.	d.	£	s.	d.
A. — Meeting of Ratepayers, to which admission is free and no collection is made, on Requisition signed by not less than One Hundred Ratepayers; or to which use of the Outer Hall has been, or may be, granted rent free by the Vestry...	—			1	1	0
B. — Any Meeting, Lecture, Concert, &c., for which admission to any part of Hall is by Payment or Ticket	2	2	0	3	3	0

In every case a fee of One Guinea must be paid at the time of application to the Vestry to cover incidental expenses.

By order,

FRANK DETHRIDGE, *Vestry Clerk.*

APPENDIX No. VII.

MANAGERS OF BOARD SCHOOLS.

The Parish of Paddington, with the Parishes of Marylebone, St. Pancras, and Hampstead, form the "MARYLEBONE DIVISION" of the School Board for London. The several Schools in the Division overlap in regard to the areas from which the Scholars are drawn, and therefore it is thought desirable to give in this Appendix the complete List of the Managers for the whole Division up to the 15th July, 1892:—

It may be added that the Members of the School Board are *ex-officio* Managers of all Schools in their Division, and that the other Managers are appointed by the Board.

MARYLEBONE DIVISION.

Correspondent for all Schools except Hawley-crescent:—Rev. M. E. Browne, M.A.,
