## READING ROOM IN LONG ACRE.

On the 1st January, 1889, the Commissioners opened a Temporary Reading Room at 107 and 108, Long Acre, and (as will be seen from the accompanying table of attendances) the number of readers has been very large, taxing the capacity of the room to the utmost.

The periodicals provided number 118, and include the principal London and some of the provincial daily papers, a French and a German daily, and all the leading weekly papers, and monthly and quarterly magazines.

To supplement the periodicals the Commissioners have supplied fully 1,100 volumes of popular biography, history, science, fiction, etc., for use in the room.

These have been largely used.

# MEDICAL OFFICER'S REPORT,

## 1888.

*Annual Report on the Health of the Parish of St. Martin-in-the-Fields,  
for the Year 1888.*

TO THE VESTRY OF ST. MARTIN-IN-THE-FIELDS.

GENTLEMEN,

I have the honour of submitting to you my Nineteenth Annual Report on the health and sanitary condition of the Parish.

In my Annual Report for the previous year, 1887, I mentioned the outbreak of Scarlet Fever in the Metropolis, which epidemic continued on for the first few months of the year 1888. In London the number of deaths due to this disease in the year 1888, was 1209, a mortality less than in the previous year. In our own parish every precaution was taken against the spread of the complaint, in the way of isolation and disinfection, with the result that it was a very rare event for a second case to occur in the same house. Many cases of Scarlet Fever are concealed from the Sanitary Authority, when, of course, the necessary safeguards are not so well applied for the protection of the community. The Compulsory Notification of Infectious Diseases would get over this difficulty.

### BIRTHS.

In the year 1888 the Births numbered 276, the lowest number of the last ten years.

The following Table gives the number of Births registered in each month of the year:—

				<i>Males.</i>	<i>Females.</i>	<i>Total.</i>
January	..	..	..	10	.. 16	.. 26
February	..	..	..	19	.. 20	.. 39

November .. .. .	15	6	21
December .. .. .	7	9	16
	<u>143</u>	<u>133</u>	<u>276</u>

The Birth-rate of the Parish for the year 1888 would be 15·0 per 1,000.

The Births registered in London in 1888 numbered 131,080, and were in the proportion of 30·7 to 1,000 inhabitants. This is the lowest birth-rate recorded in London since 1841, when the rate was 30·4.

#### DEATHS.

During the year 1888 the number of Deaths registered in St. Martin-in-the-Fields was 399. This mortality is the lowest of the last ten years.

The following Table gives the number of Deaths registered in each month of the year :—

	<i>Males.</i>	<i>Females.</i>	<i>Total.</i>
January .. .. .	23	23	46
February .. .. .	28	12	40
March .. .. .	20	12	32

November .. .. .	21	8	29
December .. .. .	12	10	22
	<u>250</u>	<u>149</u>	<u>399</u>

Of the above 399 Deaths, 195 occurred in the Charing Cross Hospital, and of this number who died in that Institution, 165 were non-residents of the Parish. In public Institutions outside the Parish, and including the parishioners of St. Martin-in-the-Fields who died in the Strand Union Workhouse, Edmonton, the deaths numbered 93. In Table No. VI. will be found full details of these 93 deaths.

The Death-rate of the Parish for the year 1888 would be 17·3 per 1,000, rather less than in the previous year.

Ratio of deaths to population, about 1 in 57. The deaths registered in London in the year 1888 numbered 78,848, and corresponded to an annual rate of 18·5 per 1,000. This is far the lowest death-rate as yet recorded in London.

Appended is the annual death-rate per 1,000 in the Parish of St. Martin-in-the-Fields, during the last ten years:—

1879	..	..	..	..	..	..	18·6
1880	..	..	..	..	..	..	16·8

1887	..	..	..	..	..	..	18·1
1888	..	..	..	..	..	..	17·3

The ages of these 399 deaths were as follows:—

## CAUSES OF DEATH.

ZYMOTIC DISEASES.—The seven principal Zymotic Diseases are Small-pox, Measles, Scarlet Fever, Diphtheria, Whooping Cough, Fever, and Diarrhœa.

The deaths arising from this class of malady were 24. This number includes those non-parishioners who died in the Charing Cross Hospital. After deducting those non-parishioners, and adding those parishioners who died in Institutions outside the Parish, the mortality due to St. Martin-in-the-Fields would be 33. This mortality is in excess of the previous year, and is due to the epidemic of Scarlet Fever and Measles. See Table 5.

SMALL-POX.—No death or illness from this disease came to my knowledge.

MEASLES.—From this complaint 9 deaths were recorded, and 1 of a parishioner in the Metropolitan Asylums Hospital, making a total of 10. This disease assumed, in the Metropolis, an epidemic form, which began about the first week in October, after which the mortality rose very rapidly to a maximum in the middle of December, when as many as 184 deaths were registered in a single week.

SCARLET FEVER.—One death occurred within the Parish, one of a parishioner in King's College Hospital, and seven in the Metropolitan Asylums Hospital, making in all a total of nine. The number of cases of this complaint, which came under my notice, was 26, and 24 of these were sent to hospital. In 1887, the Metropolitan Asylums Board admitted into their hospitals 5,900 Scarlet Fever cases, and in 1888, the number was 4,498. In the former year, the maximum number under treatment at one and the same time was 2,611; in 1888, 954. The deaths in London from this disease numbered 1,209, and were in the proportion of 0.28 to 1,000 inhabitants, the average annual rate in the preceding decennium having been 0.46.

DIPHThERIA.—Three deaths, from this disease, occurred in the Parish, all in the Charing Cross Hospital, two of these were non-residents, and two deaths of parishioners took place in King's College Hospital, so that the Parish would be credited with three deaths from Diphtheria.

WHOOPING COUGH.—Four deaths were attributable to this malady.

FEVER.—This includes Typhus, Typhoid, Simple Continued Fever, and Remittent Fever. A death from Typhus occurred in a gentleman staying at a private hotel, he was ailing when he took up his residence there. A death from Typhoid of a parishioner took place in the Central London Sick Asylum Hospital, and an inmate of the Strand Union Workhouse, who was formerly a resident of St. Martin-in-the-Fields, died of Typhoid Fever, making a total of three.

DIARRHŒA.—Five deaths were due to this complaint, one of which was a non-resident who died in the Charing Cross Hospital, this circumstance would credit the Parish with only four deaths, This mortality is very low, and is attributable to the very cool summer of 1888.

The deaths from all other causes, with the ages at death, will be found fully detailed in Table 2.

#### MORTUARY CHAPEL.

This most useful building, situated in Drury Lane, I have ascertained from the keeper, has had, during the last fourteen years, 373 bodies deposited in it during the interval between death and burial.

#### THE SALE OF FOOD AND DRUGS ACT.

3 " " mustard .. .. .	1 sample adulterated

In the case of the adulterated mustard, legal proceedings were instituted, with the result that the magistrate inflicted a fine of 20s. upon the seller.

#### SANITARY WORK.

During the year 1888, notices to the number of 107 were served upon the owners or occupiers of property, also numerous verbal recommendations to remedy sanitary defects, and 26 notices were served for the purpose of disinfection after infectious disease.

Champion House, White Hart Street, which has been such a source of trouble and annoyance ever since it was built, owing to the unsanitary condition of the place, has been put into a thorough state of repair, and is now occupied by a very respectable class of tenants, who are cleanly and orderly in their habits.

#### BAKE-HOUSES.

The bake-houses have been duly inspected, and were all found in a satisfactory condition.

#### HOUSES LET OUT IN LODGINGS.

Your Inspector, whom you appointed permanent inspector of these houses, has regularly inspected them, and reported to me all sanitary defects that came under his notice.

The pipe-sewers have been regularly flushed, those gullies emitting offensive effluvia have also been flushed with carbolic acid and water, and the several courts and passages in the parish lime-whited.

I have the honour to be, GENTLEMEN,

Your obedient Servant,

JOHN J. SKEGG,

*Medical Officer of Health.*

## LIGHTING.

The following is a statement of the number of public lamps, on the 25th March, 1889, with consumption of gas and cost per annum:—

During the year 2 lamps in Cecil Court and 1 at Salisbury Wharf have been cut off in consequence of improvements which are taking place, and 1 new lamp erected upon urinal, Charing Cross Road. The position of the lamps in Chapel Court, Long Acre, have been altered, for the prevention of nuisances therein.

The total cost of lighting, cleaning, maintenance, &c., amounted to £2,505 4s. 10d., as against a cost in the previous year of £2,839 17s. 7d., the decrease being the result of the Vestry's action in reducing, on the 1st January, 1888, the burning hours from 4,300 to 3,940 per annum, and of the Gas Company in reducing the price of gas on the same date, from 2s. 5d. to 2s. 2d. per 1,000 feet.

#### SLOP AND DUST COLLECTING.

During February, 1888, this subject was referred to a Special Committee of the Vestry to consider as to the advisability of the work of collection being performed by the Vestry or under a contract.

On the 17th May, the committee reported in favour of this work being done by the Vestry purchasing the Slop and Dust Vans and hiring horses and drivers for the same, the Report being adopted by the Vestry on the 11th June.

Tenders from Mr. J. S. Gabriel, for receiving slop at 2s. per cubic yard, and rough dust at 3s. per load of  $2\frac{1}{2}$  cubic yards; the Bristol Wagon Works Company for supplying vans at £43 10s. 0d. each, and from Mr. H. Clarkson for the supply of horses, drivers, machine brooms, and any additional vans required, at a schedule of prices, were subsequently accepted.

Two ganger sweepers are employed at 19s. each, and 6 sweepers at 18s. each per week.

The dusting is divided into 3 districts, one dustman being employed to each, and paid at the rate of  $4\frac{1}{2}d.$  per load.
