PUBLIC HEALTH DEPARTMENT

TOWN HALL, WEST HAM.

To the Council of the County Borough of West Ham.

MR. MAYOR AND GENTLEMEN,

"Every Medical Officer of Health appointed under order of the Local Government Board is required to make an annual report with regard to the sanitary district which is under his superintendence . . . The report is to be for the year ending 31st December . . . It should be chiefly concerned with the conditions affecting health in the district and with the means for improving those conditions. It should contain an account of the sanitary circumstances of the district and of any improvement or deterioration which may have occurred during the year in these circumstances."

In accordance with the above requisition, I beg to submit my annual report for the year 1903, and in doing so, desire to point out that such report must necessarily consist very largely of a summary of my periodical reports and other matters which have been under discussion by the Council during the year, and which therefore are more or less within the immediate recollection of the members. The collated returns, however, and the statement of local circumstances which may appear superfluous to members fully conversant with them, serve not only as valuable statistical records for future reference, but are needed by the Local Government Board and other Authorities, to whom the Medical Officer of Health is required to forward copies.

I am, Mr. Mayor and Gentlemen,

Your obedient servant,

CHARLES SANDERS, M.B.,

Medical Officer of Health.

METEOROLOGY.

The observations given below are extracted from the weekly reports of observations taken at Greenwich Observatory, a course justified by the geographical position of the Borough immediately to the North of Greenwich. They show that the registered sunshine of the year was 1,441·4 hours, being 205·2 hours more than in 1902. The hottest day was July 11th, when the temperature reached 87·5 degrees, and the coldest day was January 16th, when it sank to 23·6 degrees. The number of rainy days was 177, the total rainfall during the year being 35·33 inches.

VITAL STATISTICS.

Births.—The number of births registered during the year was 9,478, being 75 less than the previous year, but 740 more than the average during the last 10 years. This makes an annual birth-rate of 33·6 per 1,000, the average birth-rate for the 10 years 1893—1902 being 34·8. Distributed to the various wards, the births were as follows:—

Ward.	Total.	Males.	Females.
New Town	547	288	259
Forest Gate	515	284	231
High Street	645	328	317
Broadway	487	240	247
Park	408	222	186
Upton	383	201	182
West Ham	1,122	552	570
Plaistow	1,162	592	570
Hudsons	912	471	441
Canning Town	1,083	561	522
Tidal Basin	1,276	682	594
Custom House and Silver- town	938	480	458
Totals	9,478	4,901	4,577

Deaths.—The number of deaths registered in the Borough during the year was 3,599. This number included the following deaths in public institutions and other places in the Borough :—

	Under 1 year.	One year and upwards.
Plaistow Hospital	1	75
West Ham Hospital	16	53
St. Mary's Children's Hospital ...	28	41
Seamen's Hospital	—	58
Non-residents registered in the district	12	92

The 3,599 registered deaths do not include the following deaths in institutions outside the Borough :—

	Under 1 year.	One year and upwards.
Union Infirmary	36	446
Borough Asylum	—	119
Dagenham Hospital	—	—
Residents registered in London Institutions.	37	261

After the suitable adjustments rendered necessary by the foregoing tables have been made, the nett deaths of the Borough numbered 4,394 (2,387 males and 2,007 females), being 464 less than those of

the year 1902, making an annual death-rate of 15·5 per 1,000, or 3·4 per 1,000 less than the average death-rate for the 10 years 1893-1902, which was 18·9 per 1,000. Corrected for age and sex distribution, this death-rate becomes 16·5 per 1,000.

Notifiable Epidemic Disease.

The total notifications received during the year numbered 1,700, and were distributed as follows:—Small-pox 13, Diphtheria 544, Membranous Croup 8, Erysipelas 219, Scarlet Fever 660, Enteric Fever 237, Puerperal Fever 18, Anthrax 1.

The attack-rate, death-rate, and fatality of these diseases, together with a comparison of their death-rates during the past ten years, is best studied in the table given below :—

Disease.	Notified Cases, 1903.	Deaths, 1903.	Attack-rate, 1903.	Death-rate, 1903.	Fatality Deaths to Attacks per cent.	Average Attack-rate, 10years, 1893-1902.	Average Death-rate, 10years, 1893-1902.
Small-pox ...	13	—	·04	—	—	—	·11
Scarlet Fever	660	17	2·30	·05	2·6%	—	·16
Diphtheria ...	544	72	1·90	·26	13·2%	—	·65
Membranous Croup	8	4	·02	·01	50·0%	—	
Enteric Fever	237	34	·71	·12	14·3%	—	·27
Puerperal Fever	18	14	·06	·04	77·7%	} Not notifiable.	
Erysipelas ...	219	11	·77	·02	5·0%		

In addition to the above, Measles, Whooping Cough, and Diarrhoea, which are included in the statistics for the purpose of

estimating the Zymotic death-rate, and which are usually the potent factors for swelling that rate, caused 597 deaths, a number much below the average in the cases of Measles and Diarrhoea, as shown below. These diseases not being notifiable, it is impossible to record the exact number of cases, but by returns kindly supplied to me by the School Attendance Officers I am enabled to gauge roughly the number of children absent from the Public Elementary Schools owing to an attack of Measles or Whooping Cough. During the year 1903, I received, in this manner, intimation of 1,744 cases of Measles and 515 cases of Whooping Cough.

Disease.	No. of cases.	No. of deaths.	Death-rate per 1,000.	Average death-rate 10 years, 1893-1902.
Measles	1,744	143	·50	·62
Whooping Cough	515	164	·58	·49
Diarrhoea ..	—	290	1·02	1·25

These diseases not only increase the general Zymotic death-rate, but are chiefly responsible for the magnitude of the infantile death-rate; and it is pleasing to note that, largely owing to the comparatively few deaths from Diarrhoea, caused by the combined operation of excessive rain and low temperature during the summer, the infantile death-rate (148 per 1,000 births) was lower than has been previously recorded.

Disinfection.—The routine practice with regard to disinfection in West Ham naturally varies according as the necessity for the operation arises from the removal of a patient to the hospital or from the recovery of the patient at home. In the case of removal to

hospital, the process is simple and practically automatic. As soon as the ambulance reaches the hospital the disinfecting van is despatched for the bedding, which is conveyed to the steam disinfecting station at the hospital. In the meantime the assistant of the Public Health Department attends at the house and thoroughly disinfects the premises, so that within a few hours after the removal of the case the room may be cleansed and used with safety. Where cases are treated at home, however, the matter is not so simple. Although the Notification Act requires notice to be given to the Local Authority of all cases of notifiable disease, no provision is made for information to be given of the recovery of the patient, and the Public Health Department have to rely partly on the kindness of the medical man who may be in attendance, partly on the information of friends of the patient where no medical man is in attendance, and partly on periodical visitation of the house at or about such time as the recovery of the patient may be considered probable. In theory, the Sanitary Inspectors should keep such watch upon the premises that they should become acquainted with the date of recovery of the patient; but in practice such supervision is not only impossible, but would prove utterly galling to the friends of the sufferer. From these causes it sometimes happens that upon attending to disinfect, the assistant finds that the patient has been up and about for a more or less lengthy period without having had his premises and articles liable to be infected properly disinfected. Such cases, however, are few in number, and it appears difficult to devise a scheme which will entirely obviate them. On the other hand, there is an increasing tendency on the part of the public to call in the aid of the Department for the purpose of disinfecting premises which in the past have not been officially disinfected; and although in many cases it is questionable whether a single disinfection is as valuable as a persistent recourse to pail and scrubbing-brush, it is not considered advisable to refuse the assistance when desired, even if it necessitates an increase of the

disinfecting staff, especially as the opportunity can be made use of for educational purposes

Common Lodging-houses.—During the year a new Lodging-house was opened at 12, Tidal Basin Road, for the accommodation of 63 lodgers. There are, therefore, now 10 Common Lodging-houses within the Borough, registered under the Public Health Act, accommodating 516 lodgers.

Slaughter-houses.—There are 12 private slaughter-houses within the Borough subject to an annual license, and 11 old slaughter-houses not subject to an annual renewal. All these buildings have been periodically inspected by the staff, and found to be kept in a cleanly condition.

Dairies, Cowsheds, and Milkshops.—In accordance with the Dairies, Cowsheds, and Milkshops Orders, inspection has been made by the Sanitary Inspectors and the Medical Officer of Health of the premises occupied by the 25 cowkeepers within the Borough. These premises are registered to accommodate 400 cows. In a large number of cases a much fewer number than were allowable were found within the cowsheds. In five cases, however, an excessive number above the legal limit were stored, and peremptory notices to abate overcrowding served on the cowkeepers. A considerable difference is noticeable both with regard to structure and cleanliness between different cowkeepers, and in view of the dangers to public health arising from contaminated milk, it is very desirable that there should be a levelling-up in the conditions under which some of the cowkeepers carry on their trade.

In this connection I append the report of the Veterinary Inspector furnished to me by him after his annual examination of all

the cows within the Borough with a view to detecting tuberculosis of the udder.

TOWN HALL, WEST HAM,

31st December, 1903.

**Examination of Cows in the County Borough for
Tuberculosis of the Udder.**

VETERINARY SURGEON'S REPORT.

The annual examination just concluded shows the number of dairy cows in the Borough to be 337 in 21 registered cowsheds. The premises at 281, Beckton Road are no longer used for cow-keeping. The general condition is again satisfactory. No case of tuberculosis of the udder was discovered, and a few only (seven) of the pulmonary form; none of these being in an advanced stage. Six doubtful cases had to be revisited, but healthy resolution occurred in every instance. Sanitary arrangements are, on the whole, well observed. Appended are an abstract and details.

RICHARD GLOVER, F.R.C.V.S.

C. SANDERS, Esq., M.B.,

Medical Officer of Health, West Ham.

Factory and Workshops Act, 1901.

“The Medical Officer of Health of every District Council shall, in his annual report to them, report specifically on the administration of this Act in workshops and workplaces, and he shall send a copy of his annual report, or so much of it as deals with this subject, to the Secretary of State.”

In accordance with the above requirement I submit a series of tables specifically showing the work carried out under the above Act. In 14 cases notice has been received from His Majesty's Inspector of Factories calling attention to nuisances remediable under the Public Health Act, but not under the Factory and Workshops Act. In the majority of cases these complaints have referred to a sufficiency or condition of the sanitary accommodation in connection with factories, and an attempt has been made to bring the latter up to the standard which rules in the metropolis, although the order of the Home Secretary relating to this subject is not in force within the Borough.

Bakehouses.—There are 105 bakehouses in the Borough, all of which have been subject to periodical inspection. In accordance with the recommendation made by me in 1902, a special Sub-Committee of the Public Health Committee was formed for the purpose of examining and certifying underground bakehouses under the Factory Act. The sub-Committee held eight meetings and visited each bakehouse on at least two occasions. The whole of the underground bakehouses certified were renovated up to and in accordance with the standards suggested in my special memorandum, save that the Council did not see its way to insist upon a minimum height of eight feet, but lowered the minimum height to seven feet. Seven underground bakehouses which were existent at the passing of the Act were not altered with a view to obtaining a Certificate, in some cases being closed, in others being used for another purpose, and in two cases a new ground-floor bakehouse being built in substitution. These bakehouses were situate at 160, Maryland Road; 52,

Cruikshank Road ; 64, Field Road ; 191, Upton Lane ; 16, Knox Road ; 332, Green Street ; and the Co-operative Stores, Stratford New Town.

I append a complete list of the underground bakehouses certified :—

73, Angel Lane	16, Greengate Street
106, Balaam Street	25, Chatsworth Road
108, Chapel Street, Stratford	8, Howard's Road
88, Green Street	160, Boleyn Road
32, Khartoum Road	47, Fairland Road
115, Leytonstone Road	48, Balaam Street
199, Leytonstone Road	55, Carpenters' Road
28, Martin Street	43A, Water Lane
2, Northern Road	65, Chobham Road
93, Plaistow Road	30, Vansittart Road
46, Plashet Road	44, Woodgrange Road
23, Portway	37, Vicarage Lane
158, Portway	97, Vicarage Lane
42, Romford Road	12, Terrace Road
327, Romford Road	530, Barking Road
54, Stratford Road	365, Barking Road
63, Upton Lane	51, Grange Road
100, Woodgrange Road	117, Stratford Road
38, Windmill Lane	18, Station Road, Forest Gate
54, West Ham Lane	40, Stephen's Road
34, Pelly Road	31, Denmark Street
2, Whitwell Road	78, Albert Square
80, Barking Road	195, High Street, Stratford

The alterations required by the Sub-Committee in order to render the above bakehouses worthy of certificate were in all cases thorough, and in many of an extensive character, leading to the lowering and provision of concrete floors and damp courses, the insertion of

windows and ventilation shafts, the re-laying of drains, new means of access, and the re-facing of walls. The visitation during the execution of these works was laborious, but the ultimate result has been fraught not only with great benefit to the working bakers, but with considerable improvement in the methods of manufacture of the bread and other articles made upon the premises.

Housing of Working Classes Act.

During the year I only reported the following house as being in a state so dangerous to health as to be unfit for human habitation, viz.:—

No. 23, Clarkson Street, Canning Town,

which was voluntarily closed and thoroughly renovated, before occupation, by the owners.

In January, 1903, the Housing of Working Classes Committee reported: "That, in connection with the subject of housing accommodation for the working classes, your Committee have had it brought to their notice that complaints are constantly arising with regard to the alleged overcrowding of houses, and recommend that the Public Health Committee be asked to cause instructions to be issued to the Inspectors of the Public Health Department to pay special attention to this question in their house-to-house visitations." In order to carry out this instruction constant watch has been kept during the year with a view to detecting overcrowding, but my officers have been unable in their enquiries to elicit facts which would warrant the belief that excessive overcrowding is rife in West Ham. From the Nuisance Table in the Appendix it will be seen that 39 notices to abate overcrowding were served during the year, a much smaller number than was found necessary in the years 1899, 1900, and 1901.

During the year 498 new buildings were added to the inhabited

houses of the Borough, the houses being distributed among the wards as follow :—

New Town	...	3	West Ham	...	43
Forest Gate	...	3	Plaistow	...	22
High Street	...	16	Hudsons	...	114
Broadway	...	1	Canning Town	...	33
Park	...	29	Tidal Basin	...	106
Upton	...	21	Custom House and Silvertown	...	107

One of the features of the year was the very large number of empty houses, especially in the southern portion of the Borough.

Offensive Trades.—The only points worthy of note in this connection were the transference of fat-melting and bone-boiling business at Stratford from Mr. W. Hornett to a limited liability company, and the permission granted to Mr. F. Hammersley to establish a new fat-melting business at Bradfield Road, Silvertown.

Owing probably to the comparatively low temperature during the whole of the year there were very few complaints in connection with the numerous offensive trades located in West Ham, but the same remark cannot be made in respect of smoke. It became necessary to serve official notices upon 27 firms, and I am pleased to record the distinct improvement in the condition of the atmosphere resulting therefrom, though there is still room for improvement in individual cases.

General Sanitary Inspection.—Systematic house-to-house inspection has been carried out throughout the year by 14 of your Inspectors (two ladies), and the results set out in the various tables at the end of the report, although the figures do not by any means make a full disclosure either of the difficulties encountered in the work or the benefits resulting from it.

West Ham Mortuary.

Bodies received during 1903 for sanitary purposes :

March 3rd. Elizabeth Walker, aged 8 months.

June 30th. John Hobbs, aged 4 years 3 months.

Collection of House Refuse.—The house refuse of the Borough is collected twice a week, the receptacles being placed outside the houses by the occupiers, and collected by the Corporation vehicles.

The total amount collected during the 307 working days of the year 1903 amounted to 28,403 loads, an increase of 142 loads on the previous year.

The shoots on which the above house refuse was deposited are set out below :—

OUT OF BOROUGH.

Wanstead Brickfield (Messrs. East & Barrett)	...	654
Wanstead Ballast Hole (Mr. Allerton)	26

IN THE BOROUGH.

Temple Mills (Messrs. C. Abbott & Sons	11,464
„ (Messrs. R. Chapman & Son)...	2,713
South West Ham Goods Station (Mr. H. Allen)	3,484
Beckton Road (West Ham Corporation)	10,062

	Loads.	Approximate weight in tons.	Average daily collections in loads.	Loads previous year, 1902.
Northern Division ...	16,057	28,099	52·30	16,016
Southern Division ...	12,346	24,692	40·21	12,245

During the last two months 1,282 loads of old ashes have been taken away from the Beckton Road Shoot to make up a football ground off Prince Regent's Lane.

Usually the collection is finished between 5 and 5.30 p.m., but on occasions of heavy collections, and snowy and foggy weather, the hours are much extended, as is shown by the table below :—

Time.	No. of days on which the latest Carman left his Beat at the time shown.

The average number of Horses and Men at present engaged on the collection daily is :—

	Fore-men.	Horses & Car-men.	Chain Horses.	Fillers	Levellers.	Time-keepers
Northern Division	1	21 $\frac{2}{3}$	—	10	—	1
Southern Division	1	15 $\frac{1}{2}$	1	7	1 occasionally	1

A few years ago I set out the various beats into which the Borough is divided for the purpose of bi-weekly collections of house refuse, but owing to the varying alterations caused by the eccentric additions of new houses to different parts it is found necessary to be constantly making alterations in the different beats, and I have, therefore, put into the Appendix a list of the beats as at present arranged which differs materially from that published in 1899.

Sale of Food and Drugs Acts.

Margarine Acts.

Under these Acts 998 samples were purchased for analysis, and 161 were returned by the Public Analyst as adulterated. I applied

for summonses, at the hearing of which fines and costs were imposed by the Magistrates amounting to £291 7s. 6d.

Samples taken (Sale of Food and Drugs Act	998

Unsound Food.

SEIZED—

68 lbs. Apples

70 7-lb. tins Corned Beef

33 2-lb. tins „

44 tins Lobster
 8 tins Peas
 1 tin Tomatoes
 25 Smoked Haddocks
 37 Bloaters
 456 tins Condensed Milk
 11 lbs. Aitchbone of Beef
 1 carcase of a Cow
 2 cases Pomegranates
 400 Eggs

CONDEMNED WITHOUT SEIZURE—

50 lbs. Skate and Roker
 1 carcase of a Pig
 2 bags Brussel Tops
 36 Rabbits
 2 boxes Kippers
 2 boxes Roker
 1 trunk Dabs
 1 carcase of a Sheep
 56 lbs. Apples
 48 stone Plaice
 12 lbs. Apples
 34 14-lb. tins Tasmanian Black Currants
 6 boxes Asparagus
 2 barrels Crabs
 7 stone Skate
 39 Rabbits
 10 boxes Kippers
 1 case Tomatoes
 3 cases Spanish Onions
 33 boxes Kipper Herrings
 1 trunk Dabs
 1 trunk Haddocks

3 stone Roker
1 box Walnuts
1 trunk Plaice
5 stone Roker
5 barrels Herrings
11 lbs. Beef
1,249 tins Condensed Milk
25 Smoked Haddocks
37 Bloaters
1 cwt. Roker
2 bags Winkles
