This is a black and white electron micrograph showing a large, roughly circular biological specimen, possibly a cell or a large virus particle. The interior of the specimen is filled with a complex, granular pattern of dark and light areas, suggesting internal structure. A scale bar is located in the lower-left quadrant of the image, consisting of a horizontal line with the text "1000 Å" below it. The entire image is framed by a white border, which has some faint markings and a small triangular artifact in the bottom right corner.

1000 Å
