Army Book 153.

FIELD MESSAGE BOOK

(For the use of Dismounted Regimental
Officers and Non-commissioned Officers of
Cavalry and Mounted Infantry.)

*This Book is ruled in $\frac{1}{4}$ inch
squares.*

The waterproof cover issued for the purpose of protecting
this book may be obtained on application. It should be
made to outlast as many refills as possible. Special
envelopes for despatching messages, Army Form C. 393,
may also be obtained.

Extracts from F. S. Regs., Part I. affecting preparation of Messages.

1. Messages intended for the headquarters of units and formations will be addressed by the title of the unit or formation in an abbreviated form, e.g., First Army, First Div., Seventh Inf. Bde., Second F.A. Bde. The abbreviation H.Q. will only be used in addressing general headquarters. The title of the unit will be followed, if necessary, by the place to which the message is to be sent.

Abbreviations will only be used when there can be no doubt as to their meaning. The sender is responsible that any abbreviations he may use are such as will be understood.

2. After the address the number of the sender's message will be given, followed by the day of the month.

If the message is in reply to, or has reference to, a message from the addressee, the number of that message will then be quoted. The text of the message will come next. The message will end with the abbreviated title of the sender's unit or appointment, as in para. 1 above, followed by the place and time of despatch.

3. When the sender desires to inform different addressees that the message has been circulated, he will add this information at the end of the text of the message, thus:—

"addressed First Gordons, repeated Fourth Inf. Bde., Second F.A. Bde."

When information has been sent to another unit, the message will contain, at the end of the text—"unit informed."

4. When the message is complete it will be signed in the right-hand bottom corner, the rank of the sender, his appointment and the force he is with being stated. If the message is despatched by signal this signature is not transmitted, but is the authority for despatch.

5. If a signal message is to be delivered to more than one addressee, it facilitates despatch if separate copies for each addressee are handed in to the signal office.

6. The following general rules should also be observed—

(a) Messages must be as concise as possible, consistent with clearness, and precise as regards time and place. Anything of an indefinite or conditional nature such as "dawn," "dusk," "if possible," "may," is to be avoided. The language used should be simple and the handwriting easily legible.

(b) The hour of 12 will be followed by "noon" or "midnight" written in words. A night will be described thus: "night 29/30 Sept." or "night 30 Sept./1 Oct."

(c) The use of Roman numerals in signal messages is forbidden. Important numbers should be written in words. In messages which are to be signalled the letters AAA should be used for a full stop.

(d) Names of places and persons will be written in block capitals, e.g., LONDON and must be spelt exactly as given on the map in use. Care is necessary to prevent misunderstanding resulting from the existence of two or more places of the same name.

(e) If the map is referred to, the one used must be specified unless this is already provided for in standing orders. The position of places will be denoted either by the points of the compass, e.g., "wood, 600 yds. S.E. of TETSWORTH," or by compass bearings, e.g., "hill 1,500 yds. true bearing 272° from CHOBHAM, C.H.," or by description, e.g., "cross roads $\frac{1}{2}$ mile S.W. of second E in HASELEY," the letter indicated being underlined. A road is best indicated by naming a sufficient number of places on it to prevent the possibility of mistake.

(f) Positions are to be described from right to left looking in the direction of the enemy. The terms "right" or "left" are used in describing river banks, it being assumed that the writer is looking down stream. With this exception ambiguous terms such as "before," "behind," "front," etc., must not be used. If the term "Right" (or "Left") is applied to our own forces in retirement it is always to be understood that it refers to the original "Right" (or "Left") flank when facing the enemy.

(g) When bearings are given they will always be true bearings, and this should be stated.

(h) In naming units from which a portion is excluded, the unit will be named and the words "less....." added.

(i) If the report or message refers to troops reaching a place at a certain time, it is assumed that the head of the main body is meant, unless otherwise stated.

(j) A copy of messages sent will be kept by the sender, the copy and original being endorsed with the method and hour of issue, e.g., "Pte. X. to Bde. Maj. Fourth Inf. Bde. at 8 p.m." "Flag signal to First Gordons at 9 a.m."

FIELD MESSAGE BOOK

(For the use of Dismounted Regimental
Officers and Non-commissioned Officers of
Cavalry and Mounted Infantry.)

*This Book is ruled in $\frac{1}{4}$ inch
squares.*

The waterproof cover issued for the purpose of protecting this book may be obtained on application. It should be made to outlast as many refills as possible. Special envelopes for despatching messages, Army Form C. 398, may also be obtained.

Extracts from F. S. Regs., Part I. affecting preparation of Messages.

1. Messages intended for the headquarters of units and formations will be addressed by the title of the unit or formation in an abbreviated form, e.g., First Army, First Div., Seventh Inf. Bde., Second F.A. Bde. The abbreviation H.Q. will only be used in addressing general headquarters. The title of the unit will be followed, if necessary, by the place to which the message is to be sent.

Abbreviations will only be used when there can be no doubt as to their meaning. The sender is responsible that any abbreviations he may use are such as will be understood.

2. After the address the number of the sender's message will be given, followed by the day of the month.

If the message is in reply to, or has reference to, a message from the addressee, the number of that message will then be quoted. The text of the message will come next. The message will end with the abbreviated title of the sender's unit or appointment, as in para. 1 above, followed by the place and time of despatch.

3. When the sender desires to inform different addressees that the message has been circulated, he will add this information at the end of the text of the message, thus:—

"addressed First Gordons, repeated Fourth Inf. Bde., Second F.A. Bde."

When information has been sent to another unit, the message will contain, at the end of the text—"(unit) informed."

4. When the message is complete it will be signed in the right-hand bottom corner, the rank of the sender, his appointment and the force he is with being stated. If the message is despatched by signal this signature is not transmitted, but is the authority for despatch.

5. If a signal message is to be delivered to more than one addressee, it facilitates despatch if separate copies for each addressee are handed in to the signal office.

6. The following general rules should also be observed—

- (a) Messages must be as concise as possible, consistent with clearness, and precise as regards time and place. Anything of an indefinite or conditional nature such as "dawn," "dusk," "if possible," "may," is to be avoided. The language used should be simple and the handwriting easily legible.

(b) The hour of 12 will be followed by "noon" or "midnight" written in words. A night will be described thus; "night 29/30 Sept." or "night 30 Sept./1 Oct."

(c) The use of Roman numerals in signal messages is forbidden. Important numbers should be written in words. In messages which are to be signalled the letters AAA should be used for a full stop.

(d) Names of places and persons will be written in block capitals, e.g., LONDON and must be spelt exactly as given on the map in use. Care is necessary to prevent misunderstanding resulting from the existence of two or more places of the same name.

(e) If the map is referred to, the one used must be specified unless this is already provided for in standing orders. The position of places will be denoted either by the points of the compass, e.g., "wood, 600 yds. S.E. of TETSWORTH," or by compass bearings, e.g., "hill 1,500 yds. true bearing 272° from CHOBHAM, C.H.," or by description, e.g., "cross roads ½ mile S.W. of second E in HASELEY," the letter indicated being underlined. A road is best indicated by naming a sufficient number of places on it to prevent the possibility of mistake.

(f) Positions are to be described from right to left looking in the direction of the enemy. The terms "right" or "left" are used in describing river banks, it being assumed that the writer is looking down stream. With this exception ambiguous terms such as "before," "behind," "front," etc., must not be used. If the term "Right" (or "Left") is applied to our own forces in retirement it is always to be understood that it refers to the original "Right" (or "Left") flank when facing the enemy.

(g) When bearings are given they will always be true bearings, and this should be stated.

(h) In naming units from which a portion is excluded, the unit will be named and the words "less....." added.

(i) If the report or message refers to troops reaching a place at a certain time, it is assumed that the head of the main body is meant, unless otherwise stated.

(j) A copy of messages sent will be kept by the sender, the copy and original being endorsed with the method and hour of issue, e.g., "Pte. X. to Bde. Maj. Fourth Inf. Bde. at 8 p.m." "Flag signal to First Gordons at 9 a.m."

FIELD MESSAGE BOOK

(For the use of Dismounted Regimental
Officers and Non-commissioned Officers of
Cavalry and Infantry.)

*This Book is ruled in $\frac{1}{4}$ inch
squares.*

The waterproof cover issued for the purpose of protecting this book may be obtained on application. It should be made to outlast as many refills as possible. Special envelopes for despatching messages, Army Form C. 393, may also be obtained.

General Instructions from F. S. Regs., Part I. affecting preparation of Messages.

1. Messages intended for the headquarters of units and formations will be addressed by the title of the unit or formation in an abbreviated form, e.g., First Army, First Div., Seventh Inf. Bde., Second F.A. Bde. The abbreviation for general headquarters will be G.H.Q. The title of the unit will be followed, if necessary, by the place to which the message is to be sent.

Abbreviations will only be used when there can be no doubt as to their meaning. The sender is responsible that any abbreviations he may use are such as will be understood by the recipient.

2. After the address the number of the sender's message will be given, followed by the day of the month.

If the message is in reply to, or has reference to, a message from the addressee, the number of that message will then be quoted. The text of the message will come next. The message will end with the abbreviated title of the sender's unit or appointment, as in para. 1 above, followed by the place and time of despatch.

3. When the sender desires to inform different addressees that the message has been circulated, he will add this information at the end of the text of the message, thus:—

"addressed First Gordons, repeated Fourth Inf. Bde., Second F.A. Bde."

When information has been sent to another unit, the message will contain, at the end of the text—"unit informed."

4. When the message is complete it will be signed in the right-hand bottom corner, the rank of the sender, his appointment and the force he is with being stated. If the message is despatched by signal this signature is not transmitted, but is the authority for despatch.

5. If a signal message is to be delivered to more than one addressee, it facilitates despatch if separate copies for each addressee are handed in to the signal office.

6. The following general rules should also be observed—

(a) Messages must be as concise as possible, consistent with clearness, and precise as regards time and place. Anything of an indefinite or conditional nature such as "dawn," "dusk," "if possible," "may," is to be avoided. The language used should be simple and the handwriting easily legible.

(b) The hour of 12 will be followed by "noon" or "midnight" written in words. A night will be described thus: "night 29/30 Sept." or "night 30 Sept./1 Oct."

(c) The use of Roman numerals in signal messages is forbidden. Important numbers should be written in words. In messages which are to be signalled the letters AAA should be used for a full stop.

(d) Names of places and persons will be written in block capitals, e.g., LONDON and must be spelt exactly as given on the map in use. Care is necessary to prevent misunderstanding resulting from the existence of two or more places of the same name.

(e) If a map is referred to, the one used must be specified unless this is already provided for in standing orders. The position of places will, as a rule, be denoted either by naming the map squares (if any) in which they appear, or by the points of the compass, e.g., "wood, 600 yds. S.E. of TETSWORTH," or by compass bearings, e.g., "hill 1,500 yds. true bearing 272° from CHOBHAM, C.H.," or by description, e.g., "cross roads ½ mile S.W. of second B in HASELEY," the letter indicated being underlined. A road is best indicated by naming a sufficient number of places on it to prevent the possibility of mistake.

(f) Positions are to be described from right to left looking in the direction of the enemy. The terms "right" or "left" are used in describing river banks, it being assumed that the writer is looking down stream. With this exception ambiguous terms such as "before," "behind," "front," etc., must not be used. If the term "Right" (or "Left") is applied to our own forces in retirement it is always to be understood that it refers to the original "Right" (or "Left") flank when facing the enemy.

(g) When bearings are given they will always be true bearings, and this should be stated.

(h) In naming units from which a portion is excluded, the unit will be named and the words "less....." added.

(i) If the report or message refers to troops reaching a place at a certain time, it is assumed that the head of the main body is meant, unless otherwise stated.

(j) A copy of messages sent will be kept by the sender, the copy and original being endorsed with the method and hour of issue, e.g., "Pte. X. to Bde. Maj. Fourth Inf. Bde. at 8 p.m." "Flag signal to First Gordons at 9 a.m."
