PREFACE.

THE last issue of the King's College Hospital Pharmacopœia having long been exhausted, a new edition has been called for. This has been adapted to the British Pharmacopœia. Its objects are to facilitate the work both of the prescriber and of the dispenser, and to present the student with a series of formulæ which have been found useful in the various departments. To render it more permanently serviceable the doses of the pharmacopœia have been added, brief directions are given for the treatment of common cases of poisoning, and diet sheets employed in the wards are appended. The direction for the dietary of infants, as carried out in the Children's Ward, will probably prove of value to those commencing practice.

Immediate Treatment. — Emetic, followed by Stomach-pump. Subcutaneous injection of Tinct. Digitalis ℥ xx., or of Liq. Atropinæ Sulphatis ℥ ij.

Later.—Brandy. Warmth. Inhalation of nitrite of amyl.

Alcohol.

Immediate Treatment. — Stomach-pump, Emetic, or Injectio Apomorphinæ Hypodermica ℥ ij. Cold affusions to head.

Later.—Hot strong Coffee. Warmth.

Almonds, Essential Oil of Bitter.

Treatment. — As for *Hydrocyanic Acid*.

Ammonia.

Treatment.—As for *Caustic Potash*.

Antimony, Salts of.

Immediate Treatment.—Emetic, if there is no vomiting. Inj. Apomorphinæ Hypodermica m ij. Tannic Acid, or strong Tea or Coffee.

Later. — Demulcents. Brandy. Opium.

Arsenic.

Immediate Treatment.—Emetic and Stomach-pump. Dialysed Iron or Ferric Hydrate (prepared by mixing Tinct. Ferri Perchlor. and Liq. Ammonia), or Magnesia.

Later. — Brandy. Demulcents. Morphine. Enema Opii for tenesmus. Hot fomentations to abdomen.

Atropine.

Immediate Treatment. — Emetic, Stomach-pump, washing out with strong Tea or Tannic Acid. Hypodermic Injection of Nitrate of Pilocarpine gr. $\frac{1}{3}$, repeated if necessary.

Later.—Brandy. Warmth.

Battle's Vermin Killer.

Treatment.—As for *Strychnine*.

Battley's Solution.

Treatment.—As for *Opium*.

Belladonna.

Treatment.—As for *Atropine*.

Benzol.

Immediate Treatment. — Emetic, Stomach-pump.

Later. — Brandy. Inhalation of Ammonia. Subcutaneous Injection of Liq. Atropinæ Sulphatis \mathfrak{m} ij.

Bichromate of Potash.

Immediate Treatment.—Emetic and Stomach-pump.

Later.—Demulcents. Olive Oil. Warmth.

Butler's Vermin Killer.

Treatment.—As for *Strychnine*.

Calabar Bean.

Immediate Treatment.—Emetic and Stomach-pump.

Later. — Repeated Subcutaneous Injection of Liq. Atropinæ Sulphatis ℥ ij, or Chloral Hydrate gr. x, by mouth or rectum. Brandy. Sal volatile.

Camphor.

Immediate Treatment. — Emetic and Stomach-pump.

Later. — Inhalation of Sal volatile. Subcutaneous Injection of Brandy. Hot fomentations.

Cantharides.

Immediate Treatment.—Emetic.

Later.—Demulcents. Opium. Morphine.

Carbolic Acid.

Immediate Treatment.— Emetic and Stomach-pump. Wash out with Sulphate of Magnesium.

Later.—Demulcent Drinks. Olive Oil. Brandy subcutaneously or by enema. Warmth.

Caustic Potash.

Immediate Treatment.—Vinegar.

Lemon juice. Orange juice.

Later.—Demulcents. Olive oil.

Brandy. Warmth.

Caustic Soda.

Treatment.—As for *Caustic Potash*.

Chloral Hydrate.

Immediate Treatment.—Cold water to face, head and neck. Emetic and Stomach-pump. Hot blankets. Hot bottle to feet.

Later.—Hot strong Coffee. Artificial respiration. Battery. Subcutaneous Injection of Liq. Strychninæ Hydrochloratis m v . Nitrite of amyl.

Chlorodyne.

Treatment.—As for *Opium*.

Chloroform (inhaled).

Immediate Treatment. — Clear fauces. Pull forward the tongue. Fresh air. Artificial respiration. Inversion. Battery. Nitrite of Amyl.

Chloroform (swallowed).

Immediate Treatment.—Emetic and Stomach-pump. Cold water to face. Nitrite of Amyl. Olive Oil. Artificial respiration.

Cocaine.

Immediate Treatment. — Brandy. Nitrite of Amyl. Subcutaneous Injection of Ether.

Later.—Bromide of Potassium.

Cocculus Indicus.

Treatment.—As for *Picrotoxin*.

Colchicum.

Immediate Treatment. — Stomach-pump or emetic.

Later.—Strong Tea. Tannic Acid.
Demulcents. Stimulants.

Colocynth.

Immediate Treatment. — Stomach-pump or Emetic. Sp. Camphoræ \mathfrak{m} x.

Later. — Brandy. Demulcents.
Warmth. Tinct. Opii \mathfrak{m} xx.

Conium.

Immediate Treatment.—Stomach-pump or Emetic.

Later.—Strong Tea. Tannic Acid.
Brandy. Artificial respiration,
if necessary.

Copper, Salts of.

Immediate Treatment.—White of Egg. Milk. Emetic and Stomach-pump if vomiting has not occurred.

Later.—Demulcents. Morphine or Laudanum and hot fomentations if much pain.

Corrosive Sublimate.

Treatment.—As for *Mercury, Salts of.*

Cyanide of Potassium.

Treatment.—As for *Hydrocyanic Acid.*

Dalby's Carminative.

Treatment.—As for *Opium.*

Digitalis.

Immediate Treatment.—Emetic and Stomach-pump.

Later.—Aperient. Strong Tea or Coffee. Brandy. Recumbent posture long after urgent symptoms have subsided.

Emerald Green.

Treatment.—As for *Arsenic*.

Immediate Treatment.—Emetic and Stomach-pump.

Later.—Brandy. Sal volatile. Strong tea. Aperient.

Eserine.

Treatment.—As for *Calabar Bean*.

Ether (inhaled).

Treatment.—As for *Chloroform inhaled*.

Gibson's Vermin Killer.

Treatment.—As for *Strychnine*.

Godfrey's Cordial.

Treatment.—As for *Opium*.

Henbane (*Hyoscyamus*).

Treatment.—As for *Atropine*.

Hydrochloric Acid.

Immediate Treatment.—Soap and water. Magnesia, Chalk, or Carbonate of Soda with water.

Later.—Demulcents. Olive Oil
White of Egg. Morphine
hypodermically.

Hydrocyanic Acid.

Immediate Treatment.—Dash cold water over head and chest. Emetic, or promote vomiting by tickling fauces. Inhalation of Ammonia.

Later.—Artificial respiration. Battery. Hypodermic Injection of Liq. Atropinæ Sulphatis \mathfrak{m} ij.

Iodine.

Immediate Treatment.—Emetic and Stomach-pump.

Later.—Starch and water. Demulcents. Nitrite of Amyl. Morphine and fomentations for pain.

Lead, Salts of (Acute).

Immediate Treatment.—Stomach-pump or Emetic. Dilute Sulphuric Acid \mathfrak{z} ss. in water. Sulphate of Magnesium.

Later.—White of egg. Demulcents. Aperients.

Mercury, Salts of.

Immediate Treatment.—White of egg or milk, followed immediately by Stomach-pump or Emetic.

Later.—Demulcents. Stimulants.

Morphine.

Treatment.—As for *Opium*.

Nitrate of Silver.

Immediate Treatment.—Common salt in milk or water. Emetic.

Later.—Demulcents.

Nitric Acid.

Treatment.—As for *Hydrochloric Acid*.

Nitro-Glycerine.

Immediate Treatment.—Recumbent posture. Cold affusion.

Later.—Injectio Ergotini Hypodermica ℥ iij., or Liq. Atrop. Sulph. ℥ ij.

Opium.

Immediate Treatment.—Emetic and Stomach-pump. Dash cold water on face. Ammonia or Nitrite of Amyl to nostrils.

Later.—Hot strong Coffee. Liq. Atrop. Sulph. hypodermically. Battery. Rouse by exercise or shouting. Artificial respiration if necessary.

Oxalic Acid.

Immediate Treatment.—Chalk and water. Lime water.

Later.—Brandy. Castor oil.

DIETARY FOR INFANTS.

EMPLOYED IN THE PANTIA RALLI WARD.

One month old: 1 part milk, 1 part hot water, 1 part lime water; vary quantity of lime water according to state of child's bowels. Feed every two hours, giving from zij to ziiij .

Two months: 2 parts milk to 1 of hot water and 1 of lime water or $1\frac{1}{2}$ of hot water and $\frac{1}{2}$ of lime water. Feed every 3 hours, giving from ziiij to zvj .

Three months: 2 parts of milk to 1 of hot water, with 1 teaspoonful of lime water; increase quantity to zviij every 3 or 4 hours. These bottles should be sweetened and given at a temperature of 96° or 98° . Barley water or oatmeal water with the fibre of the meal left in

may be used alternately with or instead of the lime water.

After six months the milk should be given as little diluted as possible, but still with some lime water.

After eight months the frequency of the bottles should be decreased and some more solid food given with spoon, such as rusks softened in boiling water and mixed with warm milk, porridge, arrowroot.

After tenth month feed entirely with spoon and give beef tea ; chicken broth once a day.

If the child is sick some food may be mixed with the milk as early as the fifth month, and even beef tea may be given if cow's milk seems to disagree ; arrowroot or gruel can be easily given in the feeding bottle.

After sixteen or eighteen months very finely minced meat or chicken mixed

with bread crumbs and gravy, with custard pudding, bread and milk, porridge, &c., may form the diet, not feeding the child oftener than every three or four hours and never between its meals.
