## PREFACE.

The previous issue of this Pharmacopœia having become obsolete, the Medical Council of the London Hospital appointed a Committee, composed of certain Members of the Medical and Surgical Staff, to prepare and issue a new edition.

Upon proceeding to carry out the wishes of the Council, the Committee secured the assistance of Mr. T. H. TUSTIN, whose skill in Pharmacy and long connection with the Hospital qualified him in an especial manner to co-operate with advantage in the execution of the proposed work.

The reputation won by the old Pharmacopœia, after it had passed through the hands of the late DR. PEREIRA, induced the Committee to prepare the present edition upon the same plan. It is therefore divided into three parts—The first includes the *Materia Medica*, the second the *Special Formulæ*, and the third the *Dietaries and Aliments*.

In executing the work upon this plan, the constant aim of the Committee has been to make the *Formulæ* as simple, efficient, and economical, as loyalty to the national code, and deference to the differing views of individual Members of the Staff, would permit.

Whilst the Committee know that the Pharmacopœia now issued has many defects, they hope and believe it has some merits. For much that is plainly good, credit must be given to Mr. TUSTIN; for all that is faulty, the responsibility rests with the Committee.

The first of these is the fact that the
