Pharmaceutical (& some veterinary)
including tipped in adverts.

NEWFOUNDLAND Cod Liver Oil.

THE characteristic properties of this Oil are its freedom from Colour, Taste, and Smell, and the consequent absence of any nauseating tendency; its unfailing beneficial effects, resulting from the large amount of organic constituents it contains, on which its medicinal value depends, the active elements not being in the slightest degree altered or impaired by its mode of preparation; AND ITS MARKED SUPERIORITY, analytically and in practice, over every other description of

THE BROWN-COLOURED OIL.

by whomsoever manufactured, and wheresoever prepared. Oil of a Brown Colour cannot *by possibility* be extracted from the Fresh and Healthy, but *must of necessity* be prepared from Rancid or Putrid Livers. In confirmation of this fact, and to show the erroneous nature of the publications so largely circulated laudatory of the Brown Oil, and to prove that its use may be productive of hurtful effects, it will only be necessary to refer to the following quotation from the last edition of DR. JONATHAN PEREIRA'S standard work on the *Elements of Materia Medica and Therapeutics*:—

"The finest Oil is most devoid of colour, odour, and flavour. The Oil in the cells of the fresh Livers is nearly colourless, and the brownish colour possessed by the ordinary Cod Oil, used by curriers, is due to the colouring matters derived from the decomposing hepatic tissues and fluids; chemical analysis lends no support to the opinion at one time entertained, that the Brown Oil was superior, as a therapeutical agent, to the Pale Oil. If patients could conquer their aversion to the Brown Oil, its free use, like that of other rancid and empyreumatic fats, would often disturb the digestive functions, and be attended with injurious effects."

As also the following extract, from an article in *Braithwaite's Retrospect of Medicine*, vol. xix., p. 92, by DR. C. J. B. WILLIAMS, F.R.S., Professor of Medicine in University College, London:—

"In all instances I have prescribed Oil as *free from taste and smell as could be procured*. The inoffensiveness of the Oil implies the use of no process by which it can be deprived of its proper qualities; what is required is, to obtain it *pure and fresh*, as it existed in the hepatic cells of the healthy fish when alive, *without contamination by any process of putrefaction, roasting, boiling, or the like*."

Extraction 2/6 simple tooth

Tooth.—The solution of cocaine used in Tooth-extraction contains $\frac{3}{4}$ grain of the hydrochlorate in 8 minims of water. Half of this is injected into the interior of the root of the tooth, and the rest into the exterior, care being taken to get the needle of the syringe as near the socket as possible, and to allow the solution time for absorption. This time is at least three minutes. If the patient shows signs of cocaine-poisoning, amyl nitrite should be inhaled, and a little brandy swallowed.

IMPORTANT TO MOTHERS.

Over L. Labue

Liquid Carbolic Antiseptic
For preserving the teeth & Gums.

The Antiseptic and preservative
properties of Carbolic Acid so well
known that to comment upon
its virtues as a disinfectant would
be superfluous, it is sufficient
to say that this is an agreeable
and perfectly safe preparation
possessing the powerful
Antiseptic properties, and it
is strongly recommended for
cleaning & preserving the teeth
Arresting decay & restoring the Gums
to a healthy condition.

Directions for use
Sprinkle a few drops upon a
wet tooth brush and well
brush the teeth in the usual
manner,

THE STOCKPORT REMEDY.

**KAY'S
COMPOUND ESSENCE**

OF LINSEED, ANISEED, SENEGA, SQUILL, TOLU, &c.,
Contains a preparation of CHLOROFORM and MORPHINE,
and is therefore labelled **POISON.**

It is Demulcent, Expectorant, Tonic, and Soothing for
COLDS, COUGHS, ASTHMA, HOARSENESS,
DIFFICULTY OF BREATHING,
CONSUMPTION, AND SIMPLE AILMENTS
OF THE CHEST, THROAT, AND LUNGS.

Scale of Doses. { To be modified according to the
age or debility of the Patient.
For over 21 years... a tea-spoonful in water, at bed-time.
" 12 " .. half a tea-spoonful " "
" 6 " .. 15 drops " "
" 4 " .. 10 drops " "
" 2 " .. 5 drops " "
Half Doses may be taken three or four times a day.

IT IS NOT INTENDED FOR INFANTS.

FOR SERIOUS CASES SEEK MEDICAL AID.

Being a concentrated preparation, it must always be
taken mixed with water, warm water is best.

KAY BROTHERS LTD.
STOCKPORT, GREAT BRITAIN.

SHAKE THE BOTTLE.

KAY'S Compound Essence follows the Patent 1573 No. 1575, and is within
the exception contained in section 16 of the Pharmacy Act, 1868.

Caution: - Persons should use this Compound Essence with care. It is not intended for use in cases of severe
stomachic, or other serious ailments. Adults should use Linum Catharticum Pills; Children, Senna Tea.

SALINE.

THIS Preparation is the best and simplest for regulating the action of the LIVER that has yet been discovered. It is very valuable after any excess in eating or drinking. Anyone with a Sluggish Liver should never be without it. It can be taken at any time, day or night.

DIRECTIONS

DOSE.—APERIENT, two tea-spoonfuls, or more, in a tumbler of cold or tepid water, in the morning, fasting.

HEAD-ACHE.—A tea-spoonful, in half a tumbler of water; to be repeated in an hour if necessary.

INDIGESTION OF HEARTBURN. SLUGGISH LIVER, &c.—A tea spoonful twice a day, in a tumbler of water.

PICK-ME-UP OR RESTORER.—Two tea-spoonfuls, in a tumbler of water, first thing in the morning, after too free indulgence in Wines and Spirits over-night.

Keep the Bottle well corked and in a dry place.

Alterative Condition Powders, for Horses.

Are strongly recommended for producing a beautiful smooth skin and for bringing horses into general good condition; they give tone to the stomach, increase the appetite, and purge the blood from all gross and impure humours.

They will be found of essential service for Grease, Swelled Legs, Coughs, and Influenza.

A table-spoonful may be given every other night, in a mash or feed of corn. The Horse may work as usual, in fact, is more fit.

1200

CLEANSING DRENCH.

FOR COWS AFTER CALVING.

DIRECTIONS FOR USE.—As soon as it is observed that the Cow has not cleansed properly, one of these Drenches should be given, either in Gruel or Ale, previously heated to about blood-heat. If this fails to produce the desired effect, it should be repeated in twelve hours, keeping the Cow moderately warm during its operation.

1212)

GRIPE DRINK, FOR A HORSE.

DIRECTIONS FOR USE.—As soon as the Disease appears, give the contents of the bottle in a quart of Warm Gruel; and if the animal be not relieved in an hour, bleed freely, and give from a pint to a pint and a half of castor or some other oils.

As mistakes sometimes occur in not distinguishing this disease from Inflammation of the Bowels, W. P. O. begs to subjoin a short table of the symptoms of each, as the treatment necessary for one may prove fatal in that of the other.

Colic or Gripes.

Sudden in its attack.

Pulse rarely much quickened in the early period of the disease, and during the intervals of ease.

Legs and ears of the natural temperature.

Relief obtained from rubbing the belly.

Relief obtained from motion.

Intervals of freedom from pain.

Strength scarcely affected.

Inflammation.

Gradual in its approach, with previous indications of fever.

Pulse very much quickened but small, and often scarcely to be felt.

Legs and ears cold.

Belly exceedingly tender and painful to the touch.

Motion evidently increasing the pain.

Constant pain.

Rapid and great weakness.

or

Refined Sclantine ℥j

Glycerine ℥ijss

Sum Alacia ℥ij

Aq. Flor Aurant ℥ij

Add ℥ij of the orange flower water
to the Sclantine, allow to stand till
a soft mass is formed, add the Sum
previously dissolved in the remaining
ounce of orange flower water, dissolve
by the aid of a gentle heat, then add the
Glycerine this combination forms a good
basis for pastilles being easily but
slowly soluble, thereby allowing any
Medicaments to come gradually in contact
with the affected parts of the Throat

Emulsion oleo Morrhuae (253)

R^y

Gum Acacia ℥i

Cod Liver oil ℥iv

Essence of Saccharin 40 Min.

Oil of Cassia Min. ij

Hypophosphite of Soda 16 grs
Lime

Distilled water 2 S. to 3 or 4

Make a mucilage by dissolving the Gum
in 2 S of water. to this gradually add ℥iv
of Cod Liver oil stirring constantly
until a thick emulsion is formed
then add 1 S of water in which the
Hypophosphite have been dissolved
and stir in so before the remainder
of the oil. add now the Saccharin
Essence & oil of Cassia mix through
& make up to 8 S with water
Object to P.C.T. on account of richness

Ol Rosmarini ℥j

—

Mix thoroughly and wrap up in wax
paper to prevent whitening 39 1/2
powder to 1 pint of water.

Emulsio Olei Ror. Moschi et
Malti

℞
Gum Acacia ℥i
Cod Liver Oil ℥iv
Liq. Extract Malt ℥iv

Mix the malt extract with the Gum
Acacia, let the mixture stand
for four hours, then gradually
stir in the Cod Liver oil, a few
drops of Saccharine Syrup may be added

This makes a good emulsion containing
about 5 per cent of oil, a thinner
emulsion may be made by
dissolving the Gum in 2 oz of
water, adding 1 ounce of Liquid
Extract Malt & stirring in slowly
1 ounce of Cod Liver oil

the composition is made from the
is soaked over night in cold water and in
Swollen Gelatine. 62 H. ounces of Glycerine are now
and the Gelatine added, then the heating is continued
give a clear solution of Gelatine the composition is
in order to obtain a surface nearly even with the edge
of course must not come in contact with the smooth surface
copy that is to be reproduced is made upon ordinary
ink is as follows Milne Blue a White
Dissolve after cooling add alcohol 3-4
of Acid Carbolic, Cork. Keep in a box
an ordinary steel pen the lines should be rather
light. The surface of the pad should be slightly moist
the paper is then laid on it and smoothed down, this is best done
No air bubbles must remain between the copy & the tablet and
for a minute or less and is then raised by one corner & stripped
copy of its inscription perfectly reproduced upon the tablet at once
is laid upon the tablet smoothed down & stripped off when it will
this is repeated over & over again with other sheets of paper until the work is
work is completed the remains of the ink should be washed off with a
ready for a second operation.

How to Make them

best Lelantine & Glycerine. Lelantine 3 $\frac{1}{2}$
the morning the water is poured off leaving the
heated to about 200°. Then on a water bath preferably
for several hours this serves to expel the water and to
then pound into a lye, which must be perfectly level
it is then covered so as to keep off the dust. the cover
in 6 hours it will be ready for use the required
paper in Aniline Ink. One form for the
(2 B.B. 3 B.) 3 $\frac{1}{2}$ Hot Water ^{very} fluid runs
Glycerine 3 $\frac{1}{2}$ a few drops of either & 1 drop
Corked Bottle, the writing is executed with
heavy so as to show a second colour of reflected
with a wet sponge and is allowed to become nearly dry
by placing a second sheet over it & rubbing this with the hand
the paper must not be moved. it is allowed to remain
from the Lelantine Surface. it will then have left the reverse
an ordinary piece of writing paper of the desired size & quality
be found to have taken a complete copy of the inscription & writing
the pad is exhausted 50 or more copies can be thus obtained, as soon as the
moist sponge & the table after drying a little will be

Aqua 3j

Dissolve

Nitrate of Silver 3j

Sol. Ammonia 2.S.

Aqua to 3ij

Dissolve the silver in half an ounce of water, and add the ammonia until the precipitate is redissolved, then make up with water.

Directions. Before using the dye the hair must be thoroughly cleansed and free perfectly free from the slightest grease (this is most important if you wish to be successful) procure two small saucers, and two dye Brushes (Common tooth Brushes would do) when the Hair is perfectly dry & clean pour a small quantity of No. 1. into a saucer & apply it to the Hair, care being taken that it is thoroughly dampened let the hair get perfectly dry, & treat it afterwards with No 2 in the same way. Great Care must be taken that a separate Brush & Saucer be used for each Liquid. An hour after applying No 2

Wash the Hair or Beard with
Soap & water and apply a little
Brilliantine.

Brown.

GRIPE DRINK, FOR A HORSE.

DIRECTIONS FOR USE.—As soon as the Disease appears, give the contents of the bottle in a quart of Warm Gruel; and if the animal be not relieved in an hour, bleed freely, and give from a pint to a pint and a half of castor or some other oils.

As mistakes sometimes occur in not distinguishing this disease from Inflammation of the Bowels, W. P. O. begs to subjoin a short table of the symptoms of each, as the treatment necessary for one may prove fatal in that of the other.

Colic or Gripes.

Sudden in its attack.
Pulse rarely much quickened in the early period of the disease, and during the intervals of ease.
Legs and ears of the natural temperature.
Relief obtained from rubbing the belly.
Relief obtained from motion.
Intervals of freedom from pain.
Strength scarcely affected.

Inflammation.

Gradual in its approach, with previous indications of fever.
Pulse very much quickened but small, and often scarcely to be felt.
Legs and ears cold.
Belly exceedingly tender and painful to the touch.
Motion evidently increasing the pain.
Constant pain.
Rapid and great weakness.

PREPARED BY

W. P. OULTON, Dispensing Chymist,

ALTERATIVE CONDITION POWDERS, FOR HORSES

Are strongly recommended for producing a beautiful smooth skin and for bringing horses into general good condition; they give tone to the stomach, increase the appetite and purge the blood from all gross and impure humours.

They will be found of essential service for Grease, Swelled Leg Coughs, and Influenza.

A table-spoonful may be given every other night, in a meal or feed of corn. The Horse may work as usual, in fact, is more fit.
