Sept 2nd Set off from Leamington at 8 $\frac{1}{2}$
 The train left Coventry at 10. the Governor

Watering places. Arrived at Dumfries.
We had Mr Walter Scott Russell on
board. When we ~~left~~ the boat we
we rowed to shore by some broad Scotch
boatmen. I was taken to the Inn by
~~the side~~ a short cut through dirty
houses. Pig-sties & barefoot children.
The inn (King's Arms) was a ~~very~~
comfortable one. The largest house in
the place which last however would not
of itself say much for it, as the rest
of the houses are for the most part of
one story only. We then walked off to
Dumfries Castle, which consists of a wall
all round an almost perpendicular rock ^{with}
some small barracks which contain about
100 men. It is garrisoned by Highland
soldiers in full costume, of the Macdonald
Clan. There is a good spring of water at the
top of the rock. In the armoury here is
preserved a sword of Wallace's double pointed
about 5 feet high. a piece of it ~~has~~

has been ground off. Part of a battle Axe F. 9v
taken at Bannockburn &c. There is a
good view of the surrounding country from
this highest point, ^{in which some Glaps & Druas are most conspicuous} called Wallace's Seat.

Walked about the town in the evening

Sept 2^d Wednesday. Set off in a most immense
vehicle called a Coach for Ben Lomond

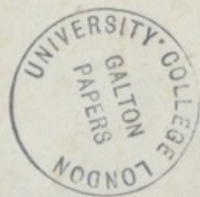

There were 6 inside & outside in proportion.
We passed along some pretty scenery, Snodells
Monument &c for about 5 miles when we
came to Galloch's ferry the opening of Loch
Lomond. here we embarked in a Steam Packet &
sailed upon the lake. The day was beautifully
clear. We had Ben Lomond before us & distant
mountainous hills on both sides. As we advanced

the Island became more numerous & the scenery
more beautiful. The weather was still out
& the light of the sun showed the dark shadows
of the mountains & the ^{various} shades of the greatest ^{width}

extent. The mountains are not wild but
slope for the most part gently to the water
side. We sailed on in this manner past
Tarbet with Ben Lomond opposite it. A lofty
but tame mountain. by Inversnaid
there is a mountain torrent fed by

where is situated Rob Roy's Cave. In
about $\frac{1}{2}$ an hour after we arrived at the
end of the lake the scenery became wilder.

we here turned. come back to Larber

the Inn. was overtaken by darkness
and had some trouble in getting down again.
Splendid Aurora borealis. Vivid colorations
it began with rays of light diverging
northwards from a point immersed a little above
our heads and extending gradually all round.
Wednesday 5th was awake at some most
unchristian hour of the morning by the ^{groans}
alarm, chiming away with double belfry
lower. We had intended going to Loch Katrine at
8 o'clock. but were prevented by a heavy
storm of rain. We were therefore obliged
to sit in the public room. the whole morning
where there were several other parties in a like

Judicament. It cleared up beautifully about 3 o'clock in the afternoon when we toiled along the Fort William Road along the sides of L. Lomond northward. The mountains on our left were beautifully covered with heather, some of it a deep crimson much of the fern had also changed its colour. The mist still remained over the head of Ben An. Whilst Ben Voilich & Ben Lomond formed the most conspicuous objects ~~by~~ ^{on} the side of the lake. We walked about 2 miles continually meeting with ^{small} mountain torrents swollen by the ~~morning~~ ^{morning} rains. On returning home the rain began again.

Friday ^{6th} Morning rather misty. Set off in a rowing boat from Tarbet to Inversnaid about 5 miles off on the other side of Loch Lomond. Thence on the backs of some stout little ponies over the mainland to Loch Katrine. The view of Loch Lomond ~~at~~ ^{at} the end of the first ascent is very beautiful. We see but a very small part of it which seems bounded on all sides by ^{mountains} Ben Voilich, Ben An &c. We then went along a valley between two chains of mountains passing the ruins of a

small foot Dr. and some distance on
reached. Lock ~~Arkelm~~. Arkelm, a small
lake of no particular beauty. I ~~thinks~~
afterward Lock Katiwe. We come
upon its shore about 2 miles from
its head. by the side of a bold
mountain standing freely out before
the others. Here we took a boat & rowed
down the Lake about 10 miles. At
first the mountains do not approach
the shore & there is a deal of tannery
in the ~~scene~~ scene, but the back view
is very beautiful a few small islands
are papered. the scene not getting much
for the first 8 miles. A jutting
promontory of rocks forms the boundary
of the Gorachs. The mountains are much
more perpendicular. Beuledi appears to
the left rather behind the boundaries of
the lake. Ben An to the right & rather
to the back. Before us are two beautiful
islands, one called Man Island after
the "Lady of the Lake" covered with

birch trees. Sir Walter Scott having
accurately represented each spot in ^{the} his
poem with the story of which the boat-
men are all acquainted. The scenery
is exceedingly grand. The mountains
were within the last few years covered
with wood which the Duke of Montrose
has lately cut down. Glen Island

a short distance from the mainland
to the left. There are two beautiful
views of the lake from it. Beyond
this place the lake become more contracted
& about $\frac{1}{2}$ a mile further terminate
in a small streamlet which ^{is called}
Loch Achray. Here we landed & walked
for about $\frac{1}{2}$ mile to the Inn. First
through a defile after-ward along the
borders of Loch Achray. a not very pretty
lake. The Inn (Stewart's Inn) is a
very comfortable one. I then ascended
a hill behind the house whence in a very

Tuesday 10th. Set off in a most extraor-
dinary carriage, ^{for Glasgow at 11 o'clock.} all outside. consisting
of 2 benches ~~with~~ looking forwards placed
11 ^{feet} on a platform. We were so much
crowded that the coachman was obliged to
sit on one of the passengers' laps. The road
lay first through the Duke of Argyll's grounds
then through several picturesque defiles.
We next ferried over Loch Awe. from
side of which some splendid mountain rise.
I came at last to Loch Etive passing by
the ruins of Dunstaffnage. I came at length
to Oban, ^{at 5 in the evening} a small, neat, white, Welsh
looking town situated in a small bay
with the Isle of Mull directly before
it. & some fine mountains beyond that

Gießen July 30th
2^{1/2} p.m. being thoroughly ennuised & kicking
about on the sofa I suddenly thought
of a voyage to Constantinople & made up
my mind in a quarter of an hour I sent
off my passport to be visied to Frankfurt
then went to Herr Prof. Adrian for my ~~Drum~~
Lepus who it seem went the same route last
year & who gave me several good hints.

Wrote a penitent letter home begging for
absolution, & without waiting for an answer
packed up.

31st set off with Dr. Meyer for Frankfurt, ^{7 a.m.} he
having parted "Schmollen" fashion with
several of his fellow students. Terrible
& dusty road. & a very musical conductor.
We all laid in a stock of plums & pears at
Bartzback (where the "buy a broom" girls come
from) & sat away perseveringly. Arrived
in Frankfurt about 1^{1/2} p.m. too late to get

the Austrian & the other necessary visits, &
I must be content with staying at Frankfurt
- after dinner went to the New Church - a very
good panoramic view from its top. (Protestant)
Magnum is hidden by trees. Went over the
cathedral. there are pictures by Lucas
Cranach (ascension). very fresh - I ~~found~~
a Rubens (Joseph Mary & the child. a ^{Vandike}
Dead Christ) & others. It has several ancient
monuments. of groups of figures cut out of
stone & painted. One of Charlemagne
& the other of the martyrdom of some saint.
Changed much my money into Ducats &
Brabant crowns. Walked round
the town in the gardens - vast quantities
of Nurses & Children - Shortly fat old
Burgomasters with a daughter or so made
their appearance. I, about 7 o'clock the
fashionable dropt in. Took some
coffee in the Lust Garten where there was

~~was~~ very good music, & then toiled along the banks of the Main.

August 1st Went at Godok to the Bavarian Ambass~~ades~~ & got my passport visced, "to travel towards Turkey" - then walked round Kothchildi garden - pretty laid down but very two store cake - a summer house painted with many colours in small patterns - & an imitation castle gateway. Went to English Ambassadore, visced for Austria Turkey & Russia. The secretary grumbled a little saying that I ought to have ^{had} it done at Vienna instead - Russian Ambassadore would not sign it saying that it ought to be an English pass^{port}. I then left it at the Austrian's - whose valet de place fetched it in an hour or so ^{signed} & also got the police signature. Walked to Ariadne & staid with her some time - it is certainly a beautiful statue, though I did not admire it so much as before. I thought that the arm which was supported by the Sea-pord's head was lying too quietly & lightly compared to

the springy sagerness of the rest of the body
 - The "taughtness" of the figure is perfect. She,
 as Hogarth says in Jack Sheppard, has got
 no superfluous fat about her. Beta walked
 back to the Inn, left my valet de place a
 Thaler which he received pretty graciously.
 Dined. walked out & took the sketch of

Frankfort on the Main from beyond the
Garden of Main Markt. Aug. 1st 1840 F.F.

Set off for Wurtzburg at 8 p.m.; there were
a no^d of a Mr Steinhöfner (of Frankfurt)
boys of all nations, Portuguese French Belgians
& German & who jabbered away in an
infinity of languages. They were going with
Steinhöfner on a walking tour over Franconian
Switzerland & to Leipzig. I set off

a very pretty German girl & tried
with "tout mon pouvoir" to make myself
agreeable, but stuck fast in the
middle of all very complimentary

Smyrna Aug 28

Aug 28th: Walked by myself. as ~~the~~ to day was the Sunday of my Jewish Valet de place. Took one of my pistols in my pocket & stepped toward the aqueduct, not an easy thing to reach on account of the innumerable Garden Walls intersecting each other at all angles & the number of blind alleys. Caught a splendid beast which I sent for Delly got to the aqueduct at last having had previously to walk up the middle of a stream on natural stepping stones for about 200 yards & trespassing in orchard innumerable. The aqueduct is a very large one I should judge 500 yards long & from 3 to 5 feet wide I walked on the top of it from one side to the other. a feat which my Valet de Place had told me had been

once accomplished at great peril by an
adventurous Englishman. The learned
talk about the ignorance of our ancestors,
in making aqueducts ^{of stone} instead of ^{using} metal
pipes. but that's common, in those
which are carried round mountains
they must be much cheaper. The
stone is on the spot & the common
workman can build a stuff (is it
spelt right?) & plaster the inside
afterward, then it can be unrolled
at any place & the water can at once
be got at. & whether the supply
of water be large or great, it
~~can~~ is always equally distributed,
& it is besides much ~~clearer~~ purer.
Fired off my pistol sundry times
for practice & much approved of.
then took sketch on last page

Left Constantinople Aug 26

Set off from Constantinople in the
Crescent at 4 p.m. Italian Captain
English Mate. one English Gentleman
& 4 or 5 Ladies, French Greeks &
& innumerable Turks & Greeks
lying about. men & women smoking
or drinking coffee. They are a
great nuisance. The clear space
on the quarter deck is not 18 inches
broad & the consequence is that
when the ship rolls you are almost
sure to tumble over their feet
right into the middle of them
& as they are mostly women such
a position is very indelicate & as
they are all sea sick, highly disag-
reeable also. Very rainy on getting out
I was soon drenched. Entered the
Dardanelles at 8 next morning

towns & that's all

The ~~Castles~~ Fortification,
low & as the Dardanelles

I should think it
would be difficult
to hit a vessel passing
in the middle of the
river. Came to the
place where Troy
was, thoroughly
disappointed. There
is no truth in the
proverb "Eunhite

has ~~described~~ shown
the fallacy. He must

Smyna Aug 27

Still Mount Ida & the rocks
of Peucedon are necessary
stationary, & so the current
by much mistake about (Blaine
distances) Peucedon is rocky
& barren. has a large stone
fortress built on it.

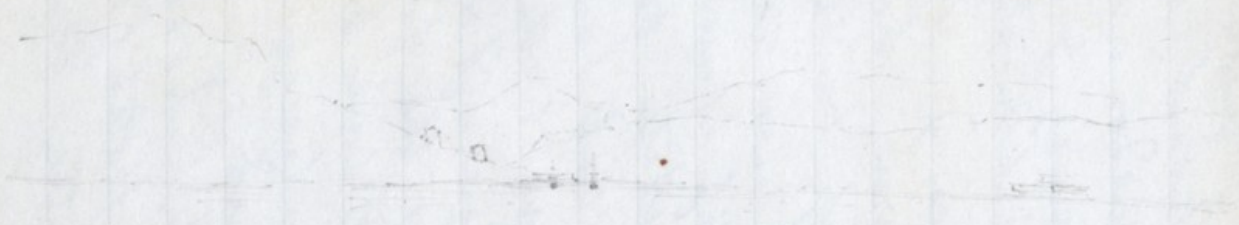

Intense rocky & barren
also. if it used to be in the
same state perhaps must have
been a dab hand to find beasts
to charm with his lyre.

Anchored off Smyna at 11 p.m.
drifted the first time, about
the 2nd time but all right.

Strong breeze blowing. Slept
on board.

Smyrna Aug 28

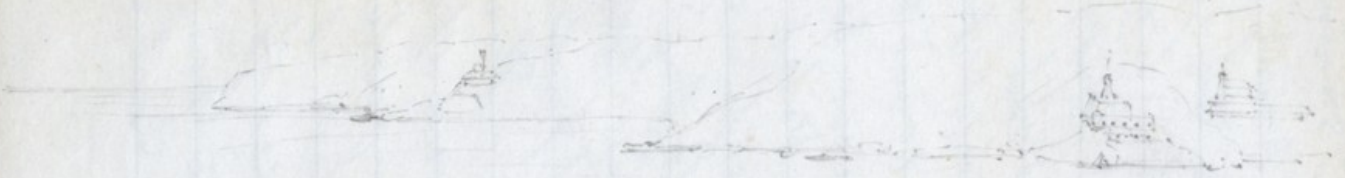

Full of noisy Frenchmen. I
do hate the generality of French
men. The women are good
enough. But there is an impudent
off-handness in a French man's
talk which I ~~find~~ find disgusting.

Walked round the bazaars with
a suspicious looking Jew who
acted as Valet de Place & who
was especially desirous that
I should buy every thing that
presented itself. I returned
to breakfast table d'hôte
at 10. Think of the impudence
of Smyrna of all places trying
to appear fashionable. Break-
fast lasted at least an hour.
Then I set off on horseback
to see the ruins of a Genoese
~~Chapel~~ ~~Fortress~~ very large.

Square and turreted pitched
on the top of a hill, all covered
with stones about the size

clear & cool water. Then to
the villages of Kocigia & Bom-

& some bought to pick
up piastres of these I saw my
guide keep ten: but his
presence kept me from being
cheated to a greater extent.
