Henri Lecog. De la Fécondation des végétaux 1862 ^{Pl}
Paris.

VI. Few have practiced it & most of those have made a Secret of it

VII. Artificial fecundation requires time & patience

XII. The French are behind the English in their
an extraordinary statement about an English horticult. Soc. both in regard
resisting the introduction of their science - changing the species & making of

XIV. The first step is to make the plant vary. It takes its stability
Sow - hybridize - graft.

37. Parents of mixed colors give usually the same color to
offspring as if the colors had been mixed on a palette - Sometimes
they appear in 'panachures' (filices) as in Belle de nuit Tulips
in striae as in Reine Marguerite, les Muffliers, en pointillé
as in certain Dahlias, in borders as in some primroses - auricled
see above colors in the authors great work on botanical geography
of Europe in 9 vols 8^{vo}
