Thamor House. Layton
May 10 - 1840. -

My dear Father

I should have answered your former letters, but I did not know where about you might be, as you were travelling. - but my Mother having given me your address, I now write. - and send my accounts.

Your acct. and mine agree, except my last acct. which you transferred to Robert & C. for £257. 17. 2.. which you have debited me with, but not credited at some time. -

f. 1v

I mean you have made me ^{dt} to you for the sum. but not made me creditor before. —

~~July~~

the above are my acts which please to transfer to me when convenient. to Stuckey. —

The new barn will be began next week. the
roof of the present one has partly tumbled in.
I saw old Stucky the other day in Bath, he is
now in town, and desired to be kindly remem-
bered to you - I wish you could come here
before Cotham, and walk about
the hills. I am sure it would do
you good - the air is so pure.
and the sound of a scythe is never heard -
Hammett has not sold the trees cut down
yet. and has some objection to do so, but
for what reason I cannot make out.
With dear love to Emma. believe me ever
Your affectionate Son
Thomas Galton

My dear Frank

Mumma writes about your Gold medal
to accept my sincerest congratulations. It
is really a great honor. And I quite glory
in your receiving it — I also must
congratulate Louise — on her Brother's great
step — as Master of Trinity — What more
can you two wish for —

I remain here some three weeks
before returning to Leamington for the winter

Very affectionately yours

Ernest Galton

LOXTON,

WESTON SUPER MARE.

Sunday June 2nd 1895

Dearest Emma

Having now toppled over into the
Eighties - I feel competent to decline all dinner
out invitations - And to shut myself up - as
a fossil Oyster - "There is a time for all things"
Many thanks for your letter of the 26th - Frank
did send me a ~~copy~~ printed copy of his Cambridge
address - as I could not translate it myself
I got the Christie, Parson to ^{do} ~~do~~ - I like the two
ideas - As I think it very nice - If you think
Frank would like to see it - please send it to
him - At all events I should like it returned

as I want to paste it - in Frank's last book
of finger prints - Which I have purchased
It is well - and clearly written - I have just
finished putting on a new roof - to the farm
house - and began the other Farm house - on
Tuesday - We have a nice dry time for doing
it - Which I ascribe to Mary Louise - and Frank
bringing sunshine to Boston - which has
continued pretty well - ever since

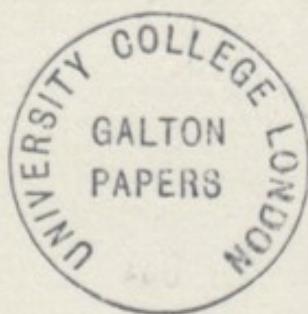

I was sorry to see the death of W^m Lea of
Rock Hall & ~~mother~~ - I had no idea that
she was ill - She and her Cousin were
most hospitable - and kind to me -

I do not expect to finish my work here
 for fully three weeks - after which I shall
 probably be at Leamington for a fortnight
 as I have business matters to write up. And
 then return to Ryde as usual - as I am not
 up to London Hotel life - That is too noisy
 for me. I do hope you will have a good
 time for your sea side tour.

Give my affectionate love to Mary, Louisa
 and Edward - I only wish I could come home
 to see them - But old age. ~~they say~~ no

Very affectionately yours

E. Galton

Philosopher in a Chorus of the Clouds of Aristophanes, for to ^{F.8}
other, indeed, of our present Meteorologists would be hearken
^{wg}

It is a lengthy matter to trace the great ability of parents &
their ancestors, perpetuated in their offspring, illustrated by this man
^{relative} of Charles Darwin, by the examples of remarkable men!

It is a lengthy matter to relate the numerous honours & titles won
by himself, accumulated through so many years - But in this place
I am sensible of his eloquence, eleven years ago, as President of
the Anthropological Society & would call him the measure not only
of the body, but also of the human mind - Amongst the ancients
indeed, that was a renowned saying of Pythagoras "that man is
the measure (standard) of all things" - But amongst moderns
this man is especially known as one who would wish to examine
the measure "ad amorem" (to the imprints of finger prints?) of
all men - in the forth-place of the ~~worst~~ worst of men -
But it is superfluous to say more to-day: for it seems

Our foster Son has revisited to day, the College formerly known
to him, who having first explored the River Nile afterwards &
traversed Southern Africa, as of another Mercury, as helper and
defender excelled all who had wandered into desert & inhospitable
lands - The same man, at another Roles, daringly unites
the very winds & storms of heaven to his Province - But, to-day,
regards, not without compassion, our College groves, ~~without~~,
~~compassion~~ recently too much disturbed by storms, & permits
a crown, too long defected, from its fallen branches to be placed on
his so reverend head -

Long time well skilled in the science of Physics (temper) the
years gone by, registered the currents of the winds & in faithful
records taught men to forecast the changing weather (the
changing fashion of heaven) & deserved at least, with one word
altered, the praise attributed to a certain ancient

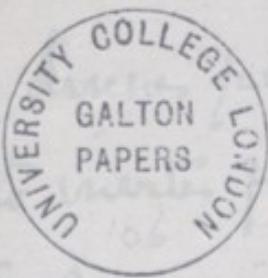

that no measure shall be wanting ^{not} in recording ~~the~~^{the mental & co.} ^{P. 9v} the marks of the best men.

I present to you a man specially noteworthy in Anthropological & Meteorological science - the unrevealed investigator of Havergal Bank & lastly - amongst ourselves, the renowned ~~an eminent~~ ^{an eminent} ~~reconnoiter~~ ^{reconnoitration} of geographical Mores - Francis Galton,

May 1895

To examine the measure ~~"ad amittit to the impreg of project"~~ ^{the mental faculties} marks of all men chiefly by the most consummate ~~intoxicates~~ But it is superfluous to say more for it is seenly that no measure shall be wanting in recording the marks ^{co.} of the best of men

Feb^r 10. 1900

My dear Frank

I am so glad to read your interesting accounts of your Survey - which Emma always lets me read - We have had a very mild damp season and foggy - till the last three days - now sharp dry frost with sunshine at night thermometer down to 16° Skating going on - no wind - so charming weather

Emma fairly well - and in excellent spirits begins with bronchitis - as usual - otherwise quite well - Although I never drive out - consequently out of the swim - I am told there are few

dry roads England

discreet caution goes on. As every one seems
to invite friends - who at any time may be
in the wronging - owing to the War.

My own opinion is - the War will shortly
collapse - The Boers refusing to fight - wishing
to go to their farms. As our force is now
getting too strong - and the Orange free state
dread the Transvaal Boers - bumptiously more
than England's rule.

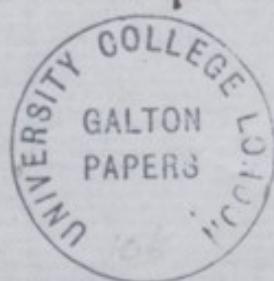

Do not trouble to answer this note - as
I always see you to Emma

I have a finger in hospital - only a chip - so
cannot write much.

Very affectionately yours

Evelyn Galton

My love to Evelyn

May 3. 1905

My dear Frank

I am so very glad to hear you are now quite well - and on your way home - yesterday was bitterly cold - But this morning we have sunshine - and all appearance of summer coming on.

Your idea about fruit trees is excellent in theory - but not in practice - fruit to be first class - must have sunshine - and ^{the} trees room - fruit planted as you saw them at Boston - have plenty of it - and have two wide avenues - and two narrow ones - So

that carts may pass between the trees - and
mowing machines - Bush harrows - in fact
every thing can be done by horse cultivation
in place of manual labour

For instance hay is, cut, made, stacked
and finished - entirely by machines

Turnips are cultivated in rows of from 28
to 32 inches apart - Cabbages still wider, to
allow horse horses to walk between - One horse
and one horse horse - easily doing the work
of twelve men

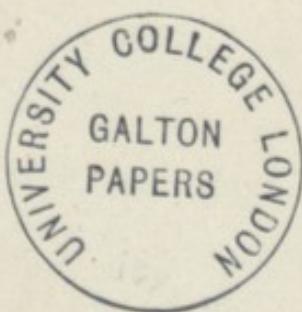

The Royal Agricultural Society's Journal
of this quarter - gives a long account of fruit
farming - which I think you should read

before sending in your paper - which paper I
enclose in this letter for your re-consideration
I would advise - sending it to the
Royal Agricultural Society or to the Field
to which paper I have sent a few articles
which they accepted

Ever very affectionately yours

Ernest Galton

Mr. Bayley has been so good - as to tell me
every fortnight about you

Aug 14. 1906

My dear Frank

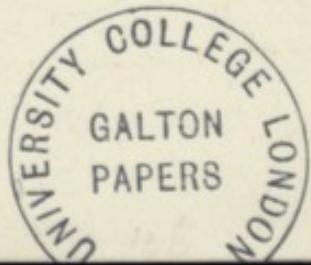

Our friend Collins - is quite wrong about the compass points - as used by seamen. No sailor would dream of saying
h h West by West half North

he would say.

h h West 1/2 West

No doubt Collins has picked the term up among yachts men - Who do make ridiculous mistakes among themselves - and there is no one to correct them - In mercy to Collins - pray tell him

Many thanks about sister Adele's letter
and of Miller's address.

I am glad you like your quarters so well
What a cheerful companion Tenny. would
make for me - How we would converse
and understand each other - Like
yourself and the Camel did some 40 years
since at the Zoo - When the Camel flopped
down on its knees, at toppling over a lot of
children and two ancient parties - I simply
made a run for it - yourself ditto

I get about in steamers often - but not
in sailing Vessels

How curious it is - how people keep on
using old terms - now useless - The newspaper

and others constantly say. Such and such - a
Companies steamers sail on such a day - In place
of saying, Steam - they carry no sails - and have
no masts except for signal uses.

I as well as possible - but the Toss by a
cow - three years since - has spoilt my
walking power - and my sea legs

Ever very affectionately yours

Fred Galton

TELEGRAMS TO
BANWELL,
SOMERSET.

LOXTON,

WESTON-SUPER-MARE.

My dear Frank

Sept 6-1906

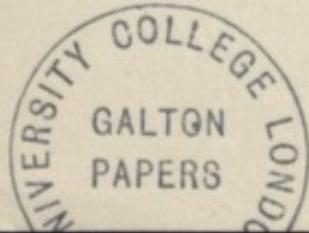

Your last letter to me was dated Aug 26 - so I fear I am behind in my epistles - I left Ryde last Monday week - stopped at Southampton for four days to visit old friends in the New Forest - and came on here last Saturday morning - All about Salisbury the land was quite dried up - But Thunder storms have kept this parish green - and vegetation full of growth but rain would be a blessing

I am unfit for London - my movements being so slow - owing to the Cow trapping two or more years since - And I hear that motor cars in London are what the American call "A caution"

I have thoughts of setting up a house in Leamington
with a good large garden - as a harbour for an old
Sailor to end his days - And not very far from
Edward Whelan - to see after my Cremation - which
he has promised to do

I am very very much interested in a series of
books published by a Society at Sixpence each
with a good print - R.P.A., Charles Darwin, Huxley
Codd, Arnold, Great Ayton - Stuart Mill, Lainy - and others
25 Vols in all - Many of them I have already read
What a change they will make in Belief
and old Dogma's go to the Wall and be buried
out

About our Mutual friends and his compa
the cause of mistake being made - Is in British
Merchant Vessels - more than half the crew are
foreign - and cannot understand English Orders

I well remember being on board a Government pilot brig
in the year 30- or 1831, at the Sunder Burh off the
mouth of the Calcutta river Hoogly - In taking
instead of the command "Ready About" it was
Terra Tanga Tanga, and so on. What a jumble

it must be at first - even to an educated man
I am rather expecting brother Galton next
week - for three days - How glad I should be if you
could once again - visit伊士頓. It cannot be very long
before Edward Wheeler will step into my shoes

August. Galton was looking very thriving when I met
them in Ryde

Ever. Very affectionately yours

Erst Galton
