## **modified aspirin**

How powerful an irritant is aspirin? A recent annotation in the "Lancet" (1:950, 1958) sums up our present knowledge as follows: "occasionally it causes gastro-intestinal hæmorrhage, probably owing to gastric erosions, and less rarely it gives rise to symptoms of gastric irritation."

Both prolonged and occasional use of aspirin are known to cause irritation, but even heavy doses of Paynocil are almost free from this risk. In Paynocil, aspirin is rendered quick-dispersing and is invested with a protective, lubricant and buffering coat of glycine to reduce its acidity and prevent it from adhering to the stomach wall.

This aspirin-glycine combination is exceptionally pleasant to take and quickly ingested by merely placing the tablet on the tongue. No water is needed, and there is no aspirin after-taste.

Paynocil is as acceptable to the stomach as to the palate. It is the modified aspirin of choice.

## **PAYNOCIL** *non-irritant, quick-dispersing, palatable aspirin*

Each Paynocil tablet contains 10 grains of aspirin and 5 grains of glycine.

PACKING: Cartons of 18: dispensing packs of 240 (basic N.H.S. cost 21/8).

## **Junior PAYNOCIL** *is readily accepted by children*

Each Junior Paynocil tablet contains  $2\frac{1}{2}$  grains of aspirin and  $1\frac{1}{4}$  grains of glycine.

PACKING: Cartons of 20: dispensing packs of 240 (basic N.H.S. cost 12/-).

*Pansies*

*Number 10 of a series*

The plate overleaf is reproduced from an engraving of the original watercolour by Redouté, the 18th Century master of botanical illustration
