TRANSLATOR'S PREFACE.

In placing a work of this character before the profession, but little need be said by way of introduction; the intrinsic merit of the original speaks for itself. The arrangement adopted by the author has been followed in the present edition, as closely as possible. But few alterations have been made in the original text, and these only where the author has given in an obscure phraseology, some well known symptom; in such cases, which were but few, the translator has preferred the more lucid expression, as found in the original of Hahnemann's *Chronic Diseases*, or in the *Materia Medica Pura*. The typographical arrangement of the repertory has however, been changed; the highest degree is herein given in small caps.; the next lower degree in italics; while the two degrees still lower (as given by Bönninghausen), owing to the slight practical benefit to be derived from their distinction, have been given in roman type. The alterations here referred to have been necessitated, through the great difficulty and expense of the composition as found in the original. Many symptoms have been added to the repertory, some of which are recent observations, but all are from the best authorities.

Regarding part IV., we would remark: the additions thereto have been made with care; yet we would most earnestly commend the careful selection of the remedy, according to the individual symptoms, rather than place any dependence on such a pathological classification, which if relied upon, we will find a stumbling block to success.

Twenty-six remedies have been added to the text and arranged in the repertory; the text for these has been carefully excerpted from the most reliable sources, and in addition has received the sanction of

Dr. C. Hering, to whom the translator would here return sincere thanks, for the kind assistance rendered in the completion of this work.

With these remarks and explanations, the work is now submitted to the profession, with the hope that it may prove as useful to the English reader, as the original has to the

TRANSLATOR.

P R E F A C E

TO THE SECOND GERMAN EDITION.

Within the past ten years, the author of the "Essay on the homœopathic treatment of intermittent fever," published in the year 1833, (at Münster by Fried. Regensberg), has been frequently requested to publish a new edition of the same, the former being out of print. This request, coming as it does, from a distance as well as from nearer home, and renewed, always more earnestly, every year at the meeting of the homœopathic physicians of the Rheinlands and Westphalia, lays upon the author the duty to again take up a work, which through thirty years of accumulated observations and experiences, has not only decidedly increased its scope, but also its difficulties.

Although the first edition received sufficient approbation to afford gratification, and even received honorable mention from the founder of homœopathy, in the last (fifth) edition of his *Organon* (p. 251); yet we must in truth, admit the demand of to-day to be so widely different from what it was at that time, that an entire remodeling in an increased and more comprehensive form, must be looked upon as a prerequisite, in order to meet it.

This revision and remodeling has long kept the author from the work, the time requisite being great, while his advanced age, 79 years, with impaired vigor and power of endurance, together with diminished hours of leisure in which to write, render the conditions far different from thirty years ago. On the other hand is brought to bear, not only the long years of experience, but especially the important accumulation of 115 quarto volumes of the most carefully kept Case books, "*Kranken Journal*," which contain a great treasure of material gathered by himself, on which he can fully rely.

If therefore, through this last mentioned fact, the author is encouraged to again take up the work, that he may fulfill his involuntary

promise, by laying before his honored friends and colleagues this work in a new and more complete form; he has on the other hand a duty towards himself to perform, viz: to explain and justify his mode of treating the subject. With this especial purpose the following lines have been written.

1. A limitation of the therapeutics to intermittent fever alone, as in the first edition of this work, could not properly receive unqualified favor, for the most cogent reason, that nowhere between intermittent fever in the broadest sense of the term, and the numerous other fevers, can a sufficiently sharp line be drawn. The title "Intermittent fever" should therefore be set aside, and the general term "Fever," as related to the various diseased states of Circulation, Chill (including coldness and shivering), Heat and Sweat, be used in its stead. As one or more of these conditions can, in general, indicate and characterize a fever, it is therefore not only advisable, but necessary, to treat each of these stages in a separate chapter.

2. Most fevers, not only intermittent and remittent, but even the continued fevers, have periods during which the fever, with its concomitants, is ameliorated; and others during which the condition of the patient is more or less aggravated. Herein lie sufficiently forcible reasons for distinguishing the so-called Pyrexia (the actual fever period), from the Apyrexia (during which the actual fever has for a time abated, and given place to this changed condition). Therefore it seems quite appropriate that this first volume should especially treat of the Pyrexia, and that the complaints of the Apyrexia should be reserved for a second volume. In the mean time every other homœopathic therapeia, can take the place of this last mentioned part, until the author is able to prepare it. *Si qua fata sinunt!*

3. For the first volume, which will therefore treat exclusively of the Pyrexia, it seems of paramount importance, that a short extract of the characteristic symptoms, relative to fever, of the drugs mentioned in the repertory, should be given. This constitutes the first principal part of this work. These symptoms will be found under four divisions. 1. The Circulation and pulse; 2. The Chill, including coldness and shivering; 3. Heat; and 4. Sweat. The author believes that this arrangement, in which he has confined himself to the most important symptoms, will in a great degree lessen the difficulties, in the study and comparison of the peculiarities and differences of the remedies; and that through it, a more sharply defined picture of each remedy

may be drawn. This first part is therefore especially adapted to, and set apart for, the study of the true genius of each remedy, in regard to its power to excite fever, and to the adaptability of the same to individual cases; while the following chapters will decide in regard to points still remaining in doubt. It may here be remarked, that the abbreviation adopted for each remedy will be found in parenthesis to the right of its respective name.

4. The second part is composed of a repertory, which has been made as complete as possible, as regards the four stages: 1. Circulation; 2. Chill, including coldness and shivering; 3. Heat; 4. Sweat. The subdivisions for each stage are set forth in the index; the symptoms under each are arranged, as much as possible, in systematic alphabetical order; first the essential varieties therewith connected, in general; then in regard to single parts and organs. Next follow aggravations as regards time, location and circumstance; then ameliorating circumstances and conditions; and finally (for the last three stages), the concomitant complaints, which latter are all of more or less importance, according to the fundamental principles of homœopathy, in deciding the adaptability of a given remedy, to the greatest possible certainty, for the individual case.

5. The third part gives a view of the compound fevers, that is, of such as are composed of more than one of the afore-mentioned stages, from which many combinations are formed. It is evident that this part will not only allow, but will actually require, considerable enlargement and improvement in the future. For the more ready review of this part, the headings are given with reference to the first stage, and arranged according to the transition from one to the other.

6. The fourth and last part, which treats only of the pathological names, as applied to the various forms of fever, and of the remedies which to the present have been used more or less frequently, in the treatment of the same; is given only at the request of a number of my colleagues, who hope thereby to facilitate the task of searching for the remedy. It need scarcely be said that here less than anywhere can anything determinate be given, and the author would especially protest against the misuse of this "Name Therapeia," a part, to which every true homœopath will attach but slight importance, and which in no case can supplant the careful valuation of the symptoms, in the selection of the remedy. The cause of the numerous complaints, which of late have become so loud, in regard to the difficulties in the treat-

ment of fevers, is no doubt the censurable practice of generalization and name prescribing "*Namen Unfug.*"

7. With great diligence and especial care the author has endeavored, through different type and setting of the same, in the repertory, to mark the degree of importance of each remedy. He has retained the distinguishing points, which were employed in his repertory (of 1833 and 1835) and in his therapeutic pocket-book (of 1846); these having been recognized by competent judges, as conformable to the object in view. According to this arrangement, as for instance on the last, therefore readily found page, under the heading Hectic fever, we find, in spread italics, *Ars. Calc. Kal. Lyc. &c.*; these hold the highest degree, being remedies most frequently useful and employed. Next in order the common set italics *Bry. Chin. Iod. Ipec. &c.* In still lower degree the spread roman, as *Bar. Cupr. Dros. Ferr. &c.*, and in the lowest degree the common set roman type, as *Bell. Carb. veg. Con. Dig. &c.* Those in brackets, which but seldom appear, require confirmation.

The author trusts that the friendly reader will at least recognize the labor and care, which has been bestowed on the preparation of this small, yet comprehensive work. He also hopes that even the experienced homœopath, may find many useful things therein, which in other books would be sought for in vain; as much of a not unimportant character has been taken from the records in the case books, "Kranken Journal" kept during a not insignificant practice of thirty-five years.

Whether the author will be spared to prepare a second volume, treating of the Apyrexia exclusively, remains in the hands of Him who rules over both health and life. In the mean time the want can, though with less convenience, be supplied by any good Homœopathic Therapeia, so that the necessity may be looked upon as of less imperative nature. Nevertheless it would without doubt, be a useful, and for many a welcome work, if some colleague, having the necessary experience with the peculiar conditions, which frequently manifest themselves both before and after fevers, would prepare and publish such a treatise. The author expresses this wish, which is also his own, unreservedly, and with the guarantee that it would in no case occur to his mind to prepare a work to compete therewith.

Münster, Jan. 1, 1863.

PART I.

GENERAL FEVER SYMPTOMS.

ACONITUM NAPELLUS. (Acon.)

1. Pulse generally very full, hard and accelerated, sometimes intermittent; seldom small and thread-like, or imperceptible. Sensation of coldness in the blood-vessels.

2. Chill at the beginning of the attack, most severe in the evening after lying down, often with one hot cheek and contracted pupils. Chill from uncovering and from being touched. With the chill, frequently, internal heat with anxiety and redness of the cheeks. Shivering ascending from the feet to the chest.

3. Dry burning heat, generally extending from the head and face, with much thirst for cold drink. With the heat, great excitability, restlessness, and agonized tossing about. Continued external heat with inclination to uncover. Burning heat with chilly shiverings at the same time.

4. Long continued sweat over the whole body, of somewhat sour odor. The covered parts sweat the most.

ACTÆA RACEMOSA. (Act. rac.)

1. Pulse weak and irregular; or, quick and weak. Pulse feeble in the morning, with weakness and trembling. Pulse slow, intermitting.

2. Creeping chills upon the back, during the evening, followed by frequent waking during the night, and desire to throw off the bed clothes, although the room was very cold.

3. Heat, especially of the face.

4. Disposition to sweat at night (3 A. M.), commencing while asleep, disappearing after awaking. Sweat inclined to be cold.

ÆSCULUS HIPPOCASTANUM. (Æsc. hip.)

1. Pulse (66) soft and weak. Pulse accelerated (130).
2. Severe chilliness in the afternoon. Chilliness and goose-flesh.
3. Heat in the whole body. Hands hot and dry. Disposition to stretch and yawn all the time. Head aches as if it would burst.
4. Profuse hot sweat with the fever.

AGARICUS MUSCARIUS. (Agar.)

1. Pulse somewhat accelerated, in the morning; later in the day always slower; very unequal and at times intermittent.
2. Chill and chilliness predominating particularly in the cold open air, and from raising the bed clothes. Shiverings over the body, running from above downwards.
3. Heat slight, and principally on the upper part of the body.
4. Greasy, but not offensive smelling sweat, the whole night, during sleep. Sweat from slight exercise.

AGNUS CASTUS. (Agn. cast.)

1. Pulse weak and slow, often imperceptible.
2. Internal chill with trembling, with external warmth of the skin. Chill and heat alternating. Much chilliness with cold hands. Chill predominating.
3. Flushes of burning heat, mostly in the face, with coldness of the knees in the evening in bed.
4. Sweat, almost exclusively on the hands, when walking in the open air.

ALUMINA. (Alum.)

1. Pulse full and somewhat accelerated.
2. Chill predominating, and principally toward evening, even in bed, and by the warm stove; also after eating a warm soup; frequently with heat of the face. Chill during the day, heat at night.

3. In the evening, following the chill, heat commencing in and spreading from, the face, at times however taking in only the right side of the body.

4. Sweat at night, especially toward morning in bed, with anxiety; most profuse in the face, and frequently only on the right side of the face. Entire inability to sweat.

AMBRA GRISEA. (Ambra.)

1. Pulse accelerated and circulation excited.

2. Chill in the forenoon, with lassitude and sleepiness, relieved by eating. Chill at night, preventing sleep. Chill of single parts of the body, with heat of the face.

3. Anxious flushes of heat, returning every quarter hour, most violent toward evening.

4. Profuse sweat at night, worse after midnight and most on the affected side. Profuse sweat, particularly on the abdomen and thighs, during exercise.

AMMONIUM CARBONICUM. (Amm. carb.)

1. Pulse hard, tense and quick.

2. Chill in the evening, frequently alternating with heat, till toward midnight. Chill in the open air.

3. Heat principally in the evening, particularly in the face, with cold feet.

4. Sweat in the morning, mostly at the joints. Continuous day or night sweat.

AMMONIUM MURIATICUM. (Amm. mur.)

1. Pulse accelerated, day and night continuously.

2. Chill with external coldness in the evening, and from uncovering at night. Chill alternating every half hour with heat. Chill running up the back.

3. Heat with red, puffed up face, particularly in the warm room and after bodily exertion. Flushes of heat, in frequent attacks, ending each time with sweat, which is most profuse in the face, palms of the hands and on the soles of the feet.

4. Sweat day and night, following heat. Profuse night-sweat over the whole body, most copious after midnight and early in the morning, in bed.

ANACARDIUM ORIENTALE. (Anac.)

1. Pulse accelerated, with beating in the blood-vessels.
2. Chill and chilliness with trembling, particularly in the open air, passing off in the sun. Shivering over the back, as if cold water was poured over it, with heat of the face. Internal chill even in the warm room.
3. External heat with internal chill. Heat of the upper body, with cold feet, internal shiverings and hot breath. Heat, from 4 P. M. till evening, daily, passing off after supper.
4. Evening sweat on the head, abdomen and back, even when sitting quiet. Night sweat on the abdomen and back. Clammy sweat in the palms, particularly the left. Cool sweat with internal heat.

ANGUSTURA. (Angust.)

1. Pulse accelerated, spasmodic, irregular and at times intermitting.
2. Chill, in the morning in bed, and in the forenoon, preceeded by thirst. Severe internal chill every afternoon (3 P. M.). Repeated shiverings over the affected part. Shivering in the back 9 A. M.
3. Heat in the evening, most in the face, after coming into the room and after supper. Heat after midnight (3 A. M.) which disturbs sleep, soon followed by shivering.
4. Sweat only in the morning, and only on the forehead.

ANTIMONIUM CRUDUM. (Ant. crud.)

1. Pulse extremely irregular, now accelerated and again slow, changing every few beats.
2. Chill predominating during the day, even in the warm room. Violent shaking chill toward noon, with thirst (for beer). Sensitive cold feeling in the nose, during inspiration through the same. Shivering over the back; feet cold as ice, with sweat on the rest of the body. C. Hg.

3. Heat at night predominant, but until midnight with cold feet. Great heat from the least exercise, particularly in the sun.

4. Sweat in the morning when awaking, which causes a shriveling of the tips of the fingers. Sweat which returns precisely at the same hour, usually every other (third) morning.

ANTIMONIUM TARTARICUM. (Ant. tart.)

1. Pulse full, strong and accelerated, at times trembling. Strong beating in the blood-vessels. As the fever passes off, the pulse frequently grows slow and imperceptible. Pulse uncommonly accelerated from the slightest motion.

2. Chill with external coldness, coming on at all times of the day, with somnolancy; mostly with trembling and shaking; frequently as if cold water was poured over one. Chill and heat alternating during the day.

3. Violent, but not long lasting heat, succeeding a long chill, aggravated by every motion. Long lasting heat after a short chill, with somnolency, and sweat on the forehead.

4. Profuse sweat all over, also at night. Sweat is frequently cold and clammy. The affected parts sweat most profusely.

APIS MELLIFICA. (Apis.)

1. Pulse full and accelerated; less frequently small and thread-like; at times intermittent and imperceptible.

2. Chill most severe toward evening. Shivering in the afternoon (3 to 4 P. M.) aggravated in the warmth. Chilliness from the slightest motion, particularly toward evening, with heat of the face and hands.

3. Dry heat towards evening. The sensation of heat is most severe on the chest and epigastric region.

4. Sweat alternating with dryness of the skin.

ARGENTUM METALLICUM. (Argent.)

1. Pulse accelerated in the evening, after lying down.

2. Chill in the afternoon and evening until going to sleep, also before midnight, every time the bed clothes are raised. Chill spreads from the back.

3. Heat in the forenoon, over the whole body, but less on the head.
4. Sweat only on the abdomen and on the chest.

ARNICA MONTANA. (Arnic.)

1. Pulse very changeable, mostly hard, full and accelerated. Pulse at times very weak and slow. Strong pulsations through the whole body in the evening.

2. Internal-chill with external warmth. Chill, as if cold water was poured over him, mostly in the evening, attended with much thirst, which commences before the chill. Chill and coldness of the lower part of the body, with heat of the upper part, particularly of the head. General chill with heat and redness of one cheek. Chill after every sleep. Chill from the slightest lifting of the bed clothes. Chill alternating with heat. Sensation of coldness on the side on which he lies.

3. Dry heat which is either general; or, running only over the face or back. Burning in one spot which was cold to the touch. Heat or coldness now here and again there. Heat in the evening with pain in the limbs.

4. Sweat mostly sour or offensive smelling; at times cold sweat.

ARSENICUM ALBUM. (Arsen.)

1. Pulse weak and small but much accelerated, often imperceptible, or intermitting. Pulse frequent in the morning, slow in the evening. Burning or cold feeling in the blood-vessels.

2. Undefined development of chill (and heat); either simultaneously or in alternation. Chill in the forenoon not relieved by anything. Internal chill with external heat. Chill and shivering after every drink. External coldness with cold, clammy sweat. During the chill (and during the heat), aggravation of symptoms which existed previously, but were of slight importance. Nursing children have no distinct chill; must be covered; very thirsty.

3. Internal burning dry heat. Dry heat, evening and night, with thirst, and frequent drinking of but a small quantity at a time. Heat at night as if hot water was poured over one.

4. Sweat at the end of the fever, with cessation of all the pre-

vious symptoms. Sweat in the first sleep or through the whole night. Cold, clammy, or sour and offensive smelling sweat. During the sweat, unquenchable thirst.

ARUM TRIPHYLLUM. (Arum tr.)

1. Pulse accelerated.
2. Chill?
3. Dry heat of the skin, redness of the tongue with elevated papillæ; soreness of the mouth; cracked corners of the mouth and lips; stoppage of the nose, with or without profuse yellow discharge filling the whole nasal cavity and throat; putrid sore throat; submaxillary glands swollen; urine abundant and pale; itching eruption.
4. Sweat?

ASA FŒTIDA. (Asaf.)

1. Pulse small, but very frequent and unequal.
2. Chill, coldness and dryness of the skin. Shiverings, particularly over the back, in the afternoon.
3. Heat in the face, after dinner, with anxiety and sleepiness, but without thirst.
4. Sweat wanting; only occasionally cold, moist skin.

ASARUM EUROPÆUM. (Asar.)

1. Pulse quick and strong.
2. Chill and cold feeling in the forenoon, after eating or drinking, and in the open air, generally with heat of the head. Much chilliness during the day.
3. Heat, in the evening after lying down, particularly in the face and palms of hands. Alternate flushes of burning heat and coldness.
4. Sweat, increased at night, of a sour smell; most profuse in the axillæ; also when sitting quiet. In general sweats easily, particularly on the upper body.

AURUM FOLIATUM. (Aurum.)

1. Pulse small but accelerated. Orgasm of blood in the whole body, with stronger congestion to the head and chest.

2. Chill predominating. Chill and coldness of the hands and feet, also in bed, frequently lasting the entire night. General shivering in the evening in bed. Coldness of the whole body with nausea.

3. Heat principally in the face, alternating with chill.

4. Sweat in the morning hours, most profuse on and around the genitals.

BAPTISIA TINCTORIA. (Baptis.)

1. Pulse accelerated (190), full and soft; or, slow, round and soft; or, first accelerated, afterwards very slow and faint. The pulsations of the heart seem to fill the chest.

2. Chilliness all day. Chilliness with soreness of the whole body.

3. Heat at night.

4. Fetid sweat.

Accompaniments.—Dull, stupefying headache; confusion of ideas; she cannot go to sleep because she cannot get herself together; delirious stupor; dark red face with a besotted expression; injected eyes; coated tongue, brown and dry, particularly in the centre, or, dry and red; sordes on the teeth; fetid breath; fetid discharges from the bowels; fetid urine; debility and nervous prostration; ulcerations.

BARYTA CARBONICA. (Baryt.)

1. Pulse accelerated but weak; seldom full and hard.

2. Chill and chilliness predominating, often as if cold water was poured over one, relieved by external warmth. Chill alternating with heat, in the evening and at night. Chill extending from the face or from the pit of the stomach (Plexus solaris?), down the body. Chill beginning in the feet.

3. Frequent flushes of heat during the day. Nightly attacks of flushes of heat, with great anxiety and restlessness.

4. Debilitating night-sweat. Sweat of one (mostly left,) side. Sweat returning every other (third) evening.

BELLADONNA. (Bellad.)

1. Pulse generally quick, frequently full, hard and tense, yet

also at times small and soft, seldom slow, and then it is full. Throbbing of the carotids and temporal arteries.

2. Chill in the evening, particularly on the extremities; mostly on the arms, with heat of the head. Internal chill with external burning heat. Chill and heat alternating. Shaking chill in the evening. Coldness of the limbs, with heat of the head. Shiverings running down the back.

3. Continuous dry burning heat, with sweat only on the head. Internal heat with anxiety and restlessness. Heat of the forehead, with cold cheeks. Internal or external heat, or both at the same time. Heat of the head, with redness of the face and delirium. Heat predominating.

4. Sweat every night. Morning sweat. Sweat easily excited during the day by motion and from exertion of the mind. Sweat especially on the upper body, also increased by warm drinks. Offensive or sour smelling sweat. Entire want of perspiration and inability to sweat.

KALI HYDRIODICUM. (Kali hydr.)

1. Pulse accelerated.
2. Chill in the afternoon; or lasting till morning; or from 4 to 7 P. M. (with thirst; chill not relieved by the stove, but is ameliorated when in bed.) Chill beginning in the back and from thence spreading over the whole body, (with sleepiness.) Chilliness in the evening, with thirst.
3. Flushes of heat, with dulness of the head and general discomfort of the body. Heat and then sweat, in the afternoon.
4. Sweat in the afternoon. Skin at times dry, and at other times profuse sweat.

KREOSOTUM. (Kreos.)

1. Pulse small and weak, with orgasm of the blood. Pulsations in all the blood-vessels when at rest.
2. Chill predominating, principally when at rest. Shaking chill, with severe flushes of heat, in the face, red cheeks and ice cold feet. Chill with great bodily restlessness. Chill alternating with heat.
3. Heat mostly in the face. Flushes of heat with circumscribed redness of the cheeks.
4. Sweat scant and only during the morning, with heat and redness of the cheeks.

LACHESIS. (Laches.)

1. Pulse small and weak, but accelerated, frequently alternating with full and strong beats; in general very unequal and intermitting.
2. General chill, with chattering of the teeth and desire for external warmth. Numbing coldness. Shivering chill, ascending the back, frequently every other (third) day. Chill and heat

alternating, and changing from place to place. Chill every other (third) day. After ice cold calves, shaking chill, with warm sweat; then a strumming through all the limbs, intermingled with flushes of heat. (Nursing children: Spasms during every paroxysm.)

3. Heat particularly of the hands and feet, in the evening. Burning in the palms of hands and soles of the feet, during the evening and night. Heat at night, like from orgasm of the blood, with great sensitiveness of the throat. Internal sensation of heat with cold feet.

4. Profuse sweat attends most complaints. Great inclination to sweat. Sweat cold, staining yellow, or bloody and staining red.

LACHNANTHES TINCTORIA. (Lachnanth.)

1. Pulse during the coldness 74, some beats fast, some beats slow. Pulse ranges from 58 to 68. Pulse 110 only in pneumonia.

2. Continuous chilliness. Sensation as if a piece of ice was lying on the back, between the shoulders, then a shock, followed by coldness over the whole body with gooseflesh; these attacks recur on moving and pass off after going to bed. Icy coldness of the body. External heat applied by heated flat-irons, ameliorates the coldness.

RHUS TOXICODENDRON. (Rhus tox.)

1. Pulse irregular: generally accelerated, but weak, flagging and soft; at times imperceptible and intermittent.

2. Chill most frequently during the evening, often beginning in and spreading from the feet, or from the scapulæ. Chill as if cold water was poured over him; or, as if the blood ran cold through the blood-vessels. Cold feeling with every motion. Chill, with increased pains particularly in the limbs. Chill with heat and redness of the face. Chill and heat in quick alterna-

tion. One-sided chill; chill of the right with heat of the left side. Coldness of the head and back, with heat of the forepart of the body. Coldness with paleness, alternating with heat and redness of the face. Cough with the chill, not with the heat. (Dunham.)

3. Heat after the chill, frequently with sweat at the same time, with cessation of the pain in the limbs and other concomitants. General heat as if hot water was poured over one; or, as if the blood, flowing through the blood-vessels, was hot. Flushes of heat with sweat, spreading from the navel, frequently alternating with chill. Heat with nettle-rash.

4. General sweat, usually beginning during the heat; frequently however excepting the face. Profuse night and morning-sweat. Musty, putrid, or, sour smelling sweat. Sweat, with the pains, when sitting. During the sweat, violent itching of the eruption.

RUTA GRAVEOLENS. (Ruta.)

1. Pulse accelerated only during the heat.

2. Internal chill with shivering and shaking, even when near the warm stove. Coldness running over one side of the head. Chill principally in the back, running both up and down. Chill with heat of the face and violent thirst.

3. Heat over the whole body, mostly in the afternoon, without thirst, but with anxiety, restlessness and dyspnoea. External and internal heat of the face, with redness of the cheeks, and cold hands and feet. Frequent attacks of quick flushes of heat.

4. Cold sweat on the face, in the morning, in bed. General sweat, after walking in the open air.

SABADILLA. (Sabad.)

1. Pulse small but somewhat spasmodic. Orgasm of the blood and beating in the blood-vessels. Sensation of stagnation of the blood.

2. Chill in the afternoon, or evening, returning at the same hour; frequently without subsequent heat. Chill predominates, particularly on the extremities, with heat of the face. The chills always run from below—upward. Chill relieved by the warmth of the stove.

3. Heat mostly of the head and face, often interrupted by

shivering, always returning at the same hour. Thirst only between the chill and heat. Sweat frequently during the heat. Internal heat at night, and in the morning.

4. Sweat in the morning and sleep therewith. Hot sweat in the face, with coldness of the rest of the body.

SABINA. (Sabin.)

1. Pulse unequal; mostly quick, strong, and tense. Strong beating in the blood-vessels, through the whole body.

2. Chill in the evening, with attacks of shivering. Great chilliness during the day. Shivering with obscuration of sight, followed by sleepiness. Cold sensation in the whole (right) leg.

3. Unbearable burning heat in the whole body, with great restlessness. Flushes of heat in the face, with chilliness of the rest of the body, hands and feet cold.

4. Sweat every night.

SAMBUCUS NIGRA. (Sambuc.)

1. Pulse mostly small and very quick; at times intermittent; often full and slow. Orgasm of blood in the body.

2. Chill running over the whole body, with crawling sensation here and there. Shivering, with very cold hands and feet.

3. Dry heat over the whole body as soon as he falls asleep, after lying down; with aversion to uncovering, and without thirst. Burning heat of the face, with ice-cold feet.

4. Unusually profuse sweat, day and night, but only when awake; breaking out in the face first; continuing even during the apyrexia. Extremely debilitating sweat. General night-sweat, with the exception of the head, increased toward morning. Continuous sweat when awake, changing to dry heat when asleep.

SANGUINARIA CANADENSIS. (Sanguin.)

1. Pulse tense and quick; extremely irregular. Increased force and frequency of the pulse (from small doses.) Suppressed pulse with fainting (from very large doses.)

2. Chill and shivering in the back, in the evening in bed. Shaking chill, with pain under the shoulder blade on motion. Chill with headache. Chill and nausea. Slight chill, then violent fever, headache, and delirium.

3. Burning heat, rapidly alternating with chill and shivering. Heat flying from the head to the stomach. Sensation as if hot water was poured from the breast into the abdomen. Febrile excitement in the afternoon, with circumscribed redness of the cheeks. Flushes of heat. Fever and delirium.

4. Copious sweat. Cold sweat.

SARSAPARILLA. (Sarsap.)

1. Pulse somewhat accelerated, with strong orgasm of the blood, especially toward evening.

2. Chill predominating, day and night. Frequent shiverings, running from below upwards, mostly in the forenoon. Coldness of the whole body, especially of the feet, even when near the warm stove, the face and chest however are not cold. During the chill he feels the worst.

3. Heat in the evening, with orgasm of blood and palpitation of the heart. Sensation of warmth in the evening, with a feeling as of increased good health.

4. Sweat only on the forehead, in the evening, during the heat.

SCILLA MARITIMA. (Scilla.)

1. Pulse small and slow, but somewhat hard.

2. Internal chill with external heat, at night. Chilliness toward evening when walking, not when sitting.

3. Predominating dry, burning, internal heat of the whole body, with cold hands and feet, and intolerance to uncovering. Sensation of great heat in the whole body, generally with cold feet, in the afternoon and evening. Uncovering during the heat, causes immediately chill and shivering.

4. Sweat entirely wanting. Want of all transpiration, even with the most severe burning heat.

SECALE CORNUTUM. (Secal.)

1. Pulse often unchanged, even during the most violent attacks. Pulse generally slow and contracted, at times intermittent, or suppressed; somewhat accelerated during the heat.

2. Violent chill of but short duration, followed soon after by internal burning heat, with great thirst. Disagreeable sensation of coldness in the back, in the abdomen, and in the limbs.

3. Severe and long lasting dry heat, with great restlessness and violent thirst.
4. Sweat especially on the upper part of the body. General cold and clammy sweat.

SELENIUM. (Selen.)

1. Pulse but little accelerated, even with strong orgasm of the blood.
2. Constant alternation of chill with heat.
3. Only external heat, like burning in the skin, and only on single parts, (chest, abdomen, loins &c.)
4. Very profuse sweat, particularly on the chest, in the axillæ, and on the genitals. Sweat from the slightest exercise. Sweat during every sleep, night or day. Sweats exceedingly easy. The sweat makes yellow, or white stiff spots, in the linen.

SENEGA. (Seneg.)

1. Pulse, unequal; mostly hard and accelerated, with strong orgasm of blood; seldom soft.
2. Chill and chilliness almost only in the open air, with weakness in the legs and difficult breathing. Shivering over the back, with heat of the face, chest symptoms, and other complaints.
3. Only quick flushes of heat. Burning in the left chest (Raue.)
4. Sweat entirely wanting, appears only in the after effect of the drug.

SEPIA. (Sepia.)

1. Pulse quick, full and often intermitting, during the night; during the day slow. Pulse becomes accelerated, especially from anger or motion. Orgasm of blood and beating in the blood-vessels.
2. Chill frequently setting in after heat. Chilliness, evenings, in the open air and from every motion. Chill and heat alternating. Thirst greater during the chill than during the heat. Shivering with the pains. Want of animal heat.
3. Flushes of heat in attacks, during the day, particularly in the afternoon and evening, while sitting as well as when walking in the open air, with excited mood, and generally, with thirst and redness of the face. Attacks of heat, as if hot water was poured over one.

4. Profuse sweat, more after than during motion. Protracted debilitating sweat. Continuous night and morning-sweats. Sweat only on the upper part of the body. Sweat anxious, stinking, sour, or smelling like elder flowers.

SILICEA. (Silic.)

1. Pulse small, but hard and quick; frequently irregular, and then at times slow. The circulation is excited very easily.

2. Severe chill in the evening, in bed, increased by uncovering. Great chilliness, particularly from every motion. Continuous internal chilliness and want of animal heat.

3. Heat predominating. During the day, frequent short attacks of flushes of heat, worse in the face. General severe heat with violent thirst, in the afternoon, evening, or during the whole night. During the day typically returning heat, without preceding chill, and with subsequent slight sweat.

4. Debilitating sweat during the night, or only in the morning. Sweat from slight motion, most profuse on the head and in the face. Profuse sweat, only on the head. Night-sweat sour or offensive smelling. Entire want of sweat.

SPIGELIA ANTHELMINTICA. (Spigel.)

1. Pulse irregular, generally strong but slow. Trembling pulse. Pulse more rapid in the evening, slower in the morning.

2. Chill, often returning at the same hour in the morning. Chill alternating with heat, or with sweat. Chill of single parts, with warmth of others. General flitting chills, with simultaneous heat. Slight chilliness from the least motion. The chill, begins in and spreads from the chest.

3. Heat particularly in the back. Nightly flushes of heat, with thirst for beer. Heat in the face and on the hands, with chill in the back.

4. Offensive smelling night-sweat, with heat at the same time. Clammy sweat on the hands. Cold sweat.

SPONGIA. (Spong.)

1. Pulse very quick, full and hard. Strong orgasm of the blood and distention of the blood-vessels.

2. Chill, with shaking, even near the warm stove, mostly over the back.

3. Severe heat soon after the chill, with dry burning skin over the whole body, with the exception of the thighs, which remain cold, numb, and chilly. Flushes of heat, in attacks. Anxious heat, with red face and tearful, inconsolable mood.

4. Cool sweat of the face, in the evening. Morning-sweat over the whole body. Worse with the sweat, better after the sweat.

STANNUM. (Stann.)

1. Pulse small and quick.

2. Evening chill particularly over the back, preceded by heat with sweat. Shivering chill every forenoon (10 A. M.) Chill only on the head. With a slight shivering chill, great chattering of the teeth as from a convulsion of the masseter muscles. During the forenoon chill, a marked numb sensation in the tips of the fingers.

3. Heat in the afternoon (4 to 5 P. M.) returning daily, with sweat at the same time. Burning heat in the limbs, strongest in the hands, every evening. Anxious heat, as if sweat would break out, in repeated attacks. Anxious sensation of heat with the least motion. Predominating sensation of internal heat.

4. Very debilitating sweat, during the night and in the morning hours, most profuse on the neck. Very debilitating general sweat, from slight motion. Musty, or mouldy smelling sweat.

STAPHISAGRIA. (Staphis.)

1. Pulse much accelerated but small, and frequently trembling.

2. Chill and coldness predominating. In the evening chill and coldness, frequently without subsequent heat. Violent chill in the evening, attended with shivering and shaking, and heat of the face. Shivering chill in the afternoon (3 P. M.) better from motion in the open air. Chill, ascending from the back, over the head, even when near a warm stove. Chill running down the back.

3. External heat with thirst, after midnight, succeeded toward morning by a chill. Burning heat at night, particularly of the hands and feet, with inclination to uncover.

4. Profuse sweat and great tendency thereto. (Inability to induce sweat, during a headache with paleness of the face.) Night-sweat smelling like rotten eggs. Cold sweat on the forehead and on the feet.

STRAMONIUM. (Stramon.)

1. Pulse extremely irregular; generally full hard and accelerated; then again small and quick; at times slow and scarcely perceptible; also intermittent, and trembling.

2. Chill and general coldness, with redness of the face and twitchings, frequently of long duration. General coldness in the afternoon, succeeding heat of the head and face, and followed by general heat. During the chill, extreme sensitiveness toward uncovering. Chill running down the back.

3. Heat of the whole body, with bright redness of the face, generally accompanied with sweat. Hot redness of the face, with cold hands and feet. Anxious heat with vomiting.

4. Profuse sweat over the whole body, already during the heat, with great thirst. Greasy, oily, putrid smelling sweat. General cold sweat.

STRONTIA CARBONICA. (Strontia.)

1. Pulse full and hard, with strong beating in the blood-vessels.

2. Chill in the forenoon, running from the small of the back over the posterior part of the thighs. Shivering over the head and shoulder blades.

3. Dry heat at night with thirst. Heat, which seems to stream out of the nose and mouth.

4. Sweat in the morning hours. Night-sweat mostly on the affected parts, with increased pains from uncovering the same.

SULPHUR. (Sulphur.)

1. Pulse full, hard and accelerated, at times intermittent.

2. Chill and chilliness mostly internal and without thirst, generally in the evening, but also at other times of the day. External chill, with simultaneous internal heat and redness of the face. Severe chill at night in bed. In the forenoon chill; in the afternoon heat with cold feet. Chill with thirst, preceded

by heat. Chill spreading from the toes. Chill running up the back.

3. Heat in the afternoon and evening, with dryness of the skin and much thirst. Frequent attacks of flushes of heat. Strong heat at night without thirst, preceded by chill with thirst.

4. Sweat at night and in the morning hours. Profuse sour smelling sweat, the whole night. Sweat in the evening, most profuse on the hands. Profuse sweating from slight exercise. Anxious, debilitating, empyreumatic-sourish, less frequent offensive smelling, at times also, cold sweat. Night-sweat only on the nape of neck and occiput.

SULPHURIS ACIDUM. (Sulph. ac.)

1. Pulse small and weak, but accelerated.

2. Chill during the day, mostly in the room, better from motion in the open air. Frequent shiverings running down the body.

3. Evening heat, also after lying down in bed. Frequent flushes of heat in the evening, particularly after exercise. Attacks of flushes of heat, with sweat at the same time (during the climacteric years.)

4. Excessive sweat, most profuse on the upper body. Profuse morning-sweat. Sweat from every motion, and continuing a long time after sitting down. Sour-sweat. Cold sweat, immediately after eating warm food.

TARAXACUM. (Tarax.)

1. Pulse?

2. Chill and chilliness, particularly after eating and drinking. General chill with headache. Shivering chill in the open air.

3. Heat particularly in the face and on the hands, at night when awaking.

4. Very profuse sweat, the whole night, most profuse before midnight, during the first sleep. Very debilitating sweat, causing biting sensation on the skin.

THERIDION CURASSAVICUM. (Therid.)

1. Pulse accelerated in the morning, after the nocturnal paroxysm. Slow pulse, with vertigo.

2. Violent shaking chill, during which foam appears at the mouth. Shaking chill during headache, with vomiting. Pain in all the bones, as if every part would fall asunder; feels as if broken, from head to foot; thereupon violent coldness, so that nothing would warm her; without thirst. Cold hands, with flickering of the eyes and nausea. After breakfast heaviness in every limb; he must lie down; grows sleepy; he is attacked by a severe internal chill so that he trembles. Internal coldness, but not cold to the touch, accompanying a peculiar drawing in the right thigh, which began in the hip and passed downward; with a cold sensation below the knee; external warmth was agreeable.

3. Heat?

4. Light perspiration, after walking out. More perspiration after walking and driving. Icy sweat covers the body, with faintness and vertigo, and vomiting at night.

THUYA OCCIDENTALIS. (Thuya.)

1. Pulse, in the morning, slow and weak; in the evening, accelerated and full. Strong beating in the blood-vessels, in the evening. Great distention of the blood-vessels.

2. Chill in attacks, at various times of the day, but mostly toward evening. Chill on the left side, which also feels cold to the touch. Chill without thirst, after midnight and in the morning. Internal chill, with external heat and great thirst.

3. Heat in the evening, particularly in the face. Burning in the face, without redness. Dry heat of the covered parts.

4. Sweat at the beginning of sleep. Sweat of the uncovered parts of the body, with dryness of those covered; also vice versa. Anxious, at times cold sweat. Sweat after the chill, without intervening heat. Sweat often greasy, at times fetid, or smelling sweetish like honey.

VALERIANA OFFICINALIS. (Valer.)

1. Pulse very unequal and irregular; generally much accelerated and somewhat tense, yet at times small and weak.

2. Chill which lasts but a short time, soon passing into a continuous heat. The shivering chill, usually commences at the nape of the neck, and runs down the back.

3. Predominating long lasting and general heat, frequently with sweat in the face. Flushes of heat in the face. Increased heat in the evening and when eating. Heat with thirst, predominating.

4. Profuse sweat particularly at night and during exercise, with continuous strong heat. Frequent sudden attacks of sweat, especially in the face and on the forehead, which again passes off as suddenly.

VERATRUM ALBUM. (Veratr.)

1. Pulse irregular; most frequently small, thread-like, weak and slow; often entirely imperceptible; seldom hard and quick. The blood runs like cold water through the veins.

2. Chill and coldness, mostly external, with internal heat and cold clammy sweat. Shaking chill with sweat, which soon passes off into a general coldness. Chill and coldness, running downward, predominating. Chill and heat alternating. Chill increased by drinking. Icy coldness of the whole body. (Chill, of nursing children.)

3. Heat, mostly internal, with thirst, but without desire to drink. Heat in the evening, with sweat. Heat suddenly alternating with chill. Chill and heat alternating, now here and again there, on single parts.

4. Profuse sweat in the morning, evening, or all night; also with every stool. Cold, clammy, sour, offensive, or, at times bitter smelling sweat; or staining yellow; always with deathly paleness of the face. Cold sweat over the whole body, most profuse on the forehead. Sweats readily during the day, with every motion.

VERBASCUM THAPSUS. (Verbas.)

1. Pulse ?

2. Chill and one-sided shivering, like from cold water pouring over one. Internal and external cold feeling, of the whole body. Chill and coldness predominating.

3. Heat ?

4. Sweat ?

VIOLA ODORATA. (Viol. od.)

1. Pulse full and strong.

2. Chill during the day, consisting of shivering only.

3. Heat ?
4. Sweat during the night.

VIOLA TRICOLOR. (Viol. tr.)

1. Pulse accelerated.
2. Chill and chilliness in the forenoon, and in the open air.
3. Dry anxious heat, at night in bed, with great redness of the face. Immediately after eating, general anxious heat.
4. Night-sweat. Hot sweat after eating.

ZINCUM. (Zinc.)

1. Pulse small and quick, in the evening; in the morning and during the day slower. Pulse at times intermittent. Violent beating in the blood-vessels, during the heat.

2. Chill generally after eating (dinner), lasting till late in the evening, even in bed. Chill in the open air, and from touching a cold object. Frequent alternations of chill and heat during the day. Shivering chills, running down the back. Shivering chills on the approach of stormy weather. Continuous external chilliness, with increased internal warmth.

3. Internal heat, with cold sensation in the abdomen and on the feet. Anxious sensation of heat without external heat, during the entire night. Heat of the face with cool body, in the forenoon. Flushes of heat, with violent trembling and short hot breath.

4. Profuse sweat during the entire night, with inclination to uncover. Sweats very easily during the day, when exercising. Offensive smelling sweat.

Aconite, Monograph on, its Therapeutic and Physiological Effects, together with its Uses and Accurate Statements, derived from the Various Sources of Medical Literature, by A. Reil, M. D. Translated from the German by H. B. Millard, M. D. Prize Essay. 168 Pages. 8vo. 75 cts.

Annual Record of Homœopathic Literature 1870. Edited by C. G. Raue, M. D. 496 Pages. 8vo. \$3.50.

 In the preparation of the ANNUAL RECORD, Professor RAUE has been assisted by an able corps of collaborators, and no labor or expense has been spared to have the whole a complete *digest of all the valuable information* scattered throughout the periodical literature of Homœopathy, during the year 1869. The Journals of the UNITED STATES, ENGLAND, GERMANY, FRANCE, SPAIN, and other countries, have furnished materials for this great work.

Annual Record of Homœopathic Literature, 1871. Edited by C. G. Raue, M. D. 255 Pages. 8vo. \$2.50. N. B. The third Vol. will soon be in the printer's hands.

 The arrangement of the work is the same as that of last year. Dr. C. Hering has arranged the part on *Materia Medica*, Dr. T. F. Allen, the chapter on the eye, Dr. M. McFarlan, the surgical part, and the rest by Dr. C. G. Raue. There is no Appendix to this volume.

Apis Mellifica, or the Poison of the Honey Bee, considered as a Therapeutic Agent. By Dr. C. W. Wolff. 80 pages. 12mo. 25 Cents.

Baehr, Dr. B. The Science of Therapeutics, according to the Principles of Homœopathy, by B. BAEHR, M. D. Translated and enriched with numerous additions from Kafka and other sources. By C. J. Hempel, M. D. 2 vols. 1,387 pages. Royal 8vo. \$10.00.

☞ This work is to take the place of the late Hartmann's Acute and Chronic Diseases, but in point of scientific value and practical usefulness, it is far superior to the former. Dr. Hempel has incorporated large sections from Kafka in the same, has also on suitable occasions introduced the new remedies and has made valuable additions from our Journals and his personal records.

Becker, Dr. A. C. Diseases of the Digestive Organs and Constipation, treated homœopathically. Second American from the third London Edition, with Additions. 128 pages. 12mo. 50 Cents.

Becker, Dr. A. C. Dentition according to some of the best and latest German Authorities. 82 pages. 12mo. 50 Cents.

Bell, Dr. Jas. B. The Homœopathic Therapeutics of Diarrhœa, Dysentery, Cholera, Cholera morbus, Cholera infantum and all other loose evacuations of the Bowels. 168 pages. Bound in Muslin. 12mo. \$1.25.
Interleaved with writing paper, half morocco. \$2.25.

Berjeau, J. Ph. The Homœopathic Treatment of Syphilis, Gonorrhœa, Spermatorrhœa and Urinary Diseases. Revised with numerous additions. By J. H. P. Frost, M. D. 256 pages. 12mo. \$1.50.

Boenninghausen, Dr. C. Essay on the Homœopathic Treatment of Intermittent Fever. Translated and edited by C. J. Hempel, M. D. 8vo. 50 Cents.

Boenninghausen, Dr. C. The Sides of the Body and Drug Affinities. Homœopathic Exercises. Translated and edited by J. C. Hempel, M.D. 12mo. 25 cts.

Boenninghausen, Dr. C. Therapeutic Pocket Book for Homœopathic Physicians, to be used at the bedside of the Patient and in Studying the Materia Medica Pura. 510 pages. 8vo. \$3.00.

Breyfogle, Dr. W. L. Epitome of Homœopathic Medicines. 383 pages. 12mo. \$1.50.

Interleaved with writing paper, half morocco. 18mo. \$3.00.

☞ This work differs from other Epitomes, in treating of a larger number of remedies, and in the arrangement of its material in comparative form. The leading symptoms of all well-established provings are here arranged in as concise form as possible.

Bryant, Dr. J. A Pocket Manual or Repertory of Homœopathic Medicine, Alphabetically and Nosologically arranged; which may be used as the Physicians' Vade-Mecum, the Travellers' Medical Companion or the Family Physician, Containing the Principal Remedies for the most important Diseases, Symptoms, Sensations, Characteristics of Diseases, etc., with the Principal Pathogenetic Effects of the Medicines on the most important Organs and Functions of the Body, together with Diagnosis, Explanation of Technical Terms, Directions for the Selection and Exhibition of Remedies, Rules of Diet, etc. Compiled from the best Homœopathic Authorities. Third Edition. 352 pages. 18mo. \$2.00.

Buchner, J. Morbus Brighti, translated by S. Lilienthal, M. D. \$1.25

Burt, Dr. W. H. Characteristic Materia Medica. 460 pages. 12mo. \$3.00.
Interleaved with writing paper, half morocco. \$5.00.

☞ In this work the author gives the *characteristic symptoms* or key-notes of two hundred and three remedies, and has adopted the method of grouping those remedies which produce similar physico pathological and pathogenetic symptoms.

Caspari's Homœopathic Domestic Physician, edited by F. Hartmann, M. D., Author of the Acute and Chronic Diseases. Translated from the Eighth German Edition, and enriched by a Treatise on Anatomy and Physiology, by W. P. Esrey, M. D., with additions and a preface, by C. Hering, M. D. Containing also a Tabular Index of the Medicines and the Diseases, in which they are used, etc. With 30 illustrations. 475 pages. 8vo. \$1.00.

Cockburn, Dr. S. Medical Reform; being an Examination into the Nature of the Prevailing System of Medicine, and an Exposition of some of its Chief Evils, with Allopathic Revelations. A Remedy for the Evil. 180 pages. 18mo. 50 cts.

Curtis, J. T., M. D. and **J. Lillie, M. D.** An Epitome of Homœopathic Practice, compiled chiefly from Jahr, Ruckert, Beauvais, Bœnninghausen, etc. 206 pages. 18mo. 75 Cents.

 This handy little volume contains the most prominent symptoms of 119 remedies, to which is added a well-arranged Repertory.

Douglas, Dr. J. S. Homœopathic Treatment of Intermittent Fevers. 198 pages. 18mo. 38 Cents.

Ellis, Dr. John. The Avoidable Causes of Disease, Insanity and Deformity. 12mo. \$2.00.

Ellis, Dr. John. Family Homœopathy. 12mo. \$1.50.

Franklin, Dr. E. C. The Science and Art of Surgery, embracing minor and operative Surgery, compiled from Standard Allopathic Authorities and adapted to Homœopathic Therapeutics, etc. Vol. I. 8vo. \$8.00.

Goullon, Dr. H. On Scrofulous Diseases, translated by E. Tietze, M. D. (In Press.)

Gray & Hempel. Homœopathic Examiner. 2 Vols. 8vo. Bound \$5.00.

Gross, Dr. H. Comparative Materia Medica, edited by C. Hering, M. D. Royal 8vo. Extra heavy tinted paper. \$10.00.

 In this work the remedies are arranged alphabetically, so that in the left hand column will be found the remedy to be compared, and in the right hand column the remedies it is compared with, also in alphabetical order. The whole is enriched by numerous marginal annotations and remarks by the illustrious Editor.

Guernsey, Dr. H. N. The application of the Principles and Practice of Homœopathy to Obstetrics, and the Disorders peculiar to women and young children. With nearly one hundred illustrations. Second Edition. (In Press.)

Guernsey, Dr. E. Homœopathic Domestic Practice. With full descriptions and the Dose in each single case. Containing also chapters on Anatomy, Physiology, Hygiene and an abridged Materia Medica. Ninth enlarged, revised and improved edition. 653 pages. 8vo. \$2.50.

Guernsey, Dr. E. The Gentleman's Hand Book of Homœopathy, especially for Travellers and for Domestic Practice. 255 pages. 12mo. \$1.00.

Hahnemann, Dr. S. The Lesser Writings of, collected and translated by R. E. Dudgeon, M. D. With a Preface and Notes by E. E. Marcy, M. D. With a steel engraving of Hahnemann, from the statue by Steinhauser. 784 pages. 8vo. \$4.00.

 This valuable work contains a large number of Essays, of great interest to laymen as well as medical men, upon Diet, the Prevention of Diseases, Ventilation of Dwellings, etc. As many of these papers were written before the discovery of the Homœopathic Theory of cure, the reader will be enabled to peruse in this volume the ideas of a gigantic intellect when directed to subjects of general and practical interest.

Hahnemann, Dr. S. Materia Medica Pura, translated by C. J. Hempel, M. D. 808 pages. 8vo. \$9.00.

 This famous work gives the pathogenesis of fifty-one remedies, and ought not to be missed in any Homœopathic Physician's library.

Hahnemann, Dr. S. The Chronic Diseases; their specific Nature and Homœopathic Treatment. Translated and edited by C. J. Hempel, M. D. With a Preface by C. Hering, M. D. 5 vols. 12mo. \$10.00.

Hahnemann, Dr. S. Organon of Homœopathic Medicine. Fourth American Edition, with improvements and additions from the last German Edition, and Dr. C. Hering's Introductory Remarks. 229 pages. 8vo. \$1.50.

Hale, Dr. E. M. Lecture on diseases of the heart. In three Parts. Part I. Functional Diseases of the Heart. Part II. Inflammatory Affections of the Heart. Part III. Organic Diseases of the Heart. 206 pages. 8vo. \$2.00.

Hartmann, Dr. F. Diseases of Children and their Homœopathic Treatment, with Notes, and prepared for the use of the American and English professions, by C. J. Hempel, M. D. 509 pages. 12mo. \$3.00.

 The present work on the diseases of children, is undoubtedly the best work which our school possesses on this interesting subject. In describing the pathognomic character of all the principal diseases, the author has not contented himself with furnishing notes from his own experience, but he has given the eminently interesting and scientific diagnosis of such pathologists as Schoenlein, Canstatt, Heim and others, thus imparting to his work a truly scientific character, which scarcely any similar work in our literature can boast of.

Helmuth, Dr. W. T. Surgery and its Adaptation to Homœopathic Practice. Illustrated with numerous Engravings on Wood. 651 pages. 8vo. \$3.50.

Hempel, Dr. C. J. Homœopathic Domestic. in German. 12mo. 75 Cents.
" " in French. 12mo. 75 Cents.

Hempel, Dr. C. J. Homœopathy a Principle in Nature. Its Scientific Universality unfolded; its development and Philosophy explained and its Applicability to the Treatment of Diseases shown. 8vo. \$1.00.

Hempel, Dr. C. J. Complete Repertory of the Homœopathic Materia Medica. 1224 pages. 8vo. \$6.00.

 The object of this work is simply to make the finding of any symptom or group of symptoms which a Physician may be called upon to treat, a matter of perfect certainty; provided always such may exist among the results of our physiological provings. The classifications of the symptoms which has been adopted is more complete, and at the same time more simple and practical than anything of the kind ever published in our language.

Hempel, Dr. C. J. A New and Comprehensive System of Materia Medica and Therapeutics, arranged upon a Physiologico-Pathological Basis, for the use of Practitioners and students of Medicine. Second Edition revised and considerably enlarged. 2 Vols. 1896 pages. Royal 8vo. \$12.00.

 The second Edition of this standard work contains, in the form of lectures, the pathogenesis of two hundred and twenty-seven remedies, and as these are interspersed with numerous therapeutic remarks, it is generally adapted to the study of Materia Medica.

Hempel, Dr. C. J. and Dr. J. Beakley. Homœopathic Theory and Practice; with the Homœopathic Treatment of Surgical Diseases, designed for Students and Practitioners of Medicine, and as a Guide for an intelligent Public generally. Fourth Edition. 1100 pages. 8vo. \$3.50.

 This work gives in the form of letters the condensed pathogenesis of two-hundred remedies.

Hughes, Dr. R. Manual of Therapeutics. 540 pages. 12mo. \$2.00.

 This work is a reprint from the English original, like its companion volume "on Pharmacodynamics" and is also intended "for Students and beginners."

Hull, Dr. A. G. Homœopathic Examiner, few copies only remain of this very valuable periodical, three vols. handsomely bound. \$15.00.

Hull's Jahr. A New Manual of Homœopathic Practice. Edited with Annotations and Additions by F. G. Snelling, M. D., Sixth American Edition, with an Appendix of the New Remedies, by C. J. Hempel, M. D. 2 vols. 2076 pages. 8vo. \$11.00.

 This is the most complete work on Materia Medica at present offered for sale. The *first volume* containing the Symptomatology, gives the complete Pathogenesis of 287 remedies, besides which a large number of new remedies were added by Dr. Hempel in the appendix. The second volume contains an admirably arranged *Repertory*. Each chapter is accompanied by copious clinical remarks and the concomitant symptoms of the chief remedies for the malady treated of, thus imparting a mass of information, rendering the work indispensable to every Student and Practitioner of Medicine.

Humphreys, Dr. F. Dysentery and its Homœopathic Treatment. Containing also a Repertory and numerous cases. 87 pages. 18mo. 50 Cents.

Humphreys, Dr. F. The Cholera and its Homœopathic Treatment. 72 pages. 18mo. 38 Cents.

Hydriatics, or Manual of the Water Cure, especially as practiced by Vincent Priesnitz in Græfenberg, compiled and translated from the writings of Dr. Chas. Munde, Dr. Oertel, Dr. B. Hirschel and other eye-witnesses and practitioners. By Francis Græter. 198 pages. 18mo. 50 Cents.

Jahr, Dr. G. H. G. Therapeutic Guide; the most important results of more than Forty Years' Practice, with personal observations regarding the truly reliable and practically verified curative indications in actual cases of disease. Translated with Notes and New Remedies. By C. J. Hempel, M. D. 364 pages. 8vo. \$3.50.

Jahr, Dr. G. H. G. Clinical Guide or Pocket Repertory for the Treatment of Acute and Chronic Diseases. Translated by C. J. Hempel, M. D. Second American revised and enlarged Edition, from the third German Edition, enriched by the Addition of the New Remedies. By S. Lilienthal, M. D. 624 pages. 12mo. \$3.00.

Jahr, Dr. G. H. G. The Homœopathic Treatment of Diseases of Females and Infants at the Breast. Translated from the French by C. J. Hempel, M. D. 422 pages. 8vo. \$2.50.

☞ This work deserves the most careful attention on the part of Homœopathic Practitioners. The diseases to which the female organism is subject, are described with the most minute correctness, and the treatment is likewise indicated with a care that would seem to defy criticism. No one can fail to study this work with profit and pleasure.

Jahr, Dr. G. H. G. Diseases of the Skin; or Alphabetical Repertory of the Skin Symptoms and External Alterations of Substance, together with the Morbid Phenomena observed in the Glandular, Osseous, Mucous and Circulatory Symptoms, arranged with Pathological Remarks on Diseases of the Skin. Edited by C. J. Hempel, M. D. 515 pages. 18mo. \$1.50.

Jahr, Dr. G. H. G. New Manual of the Homœopathic Materia Medica, with Possart's Additions Arranged with reference to well authenticated Observations at the Sick bed, and accompanied by an alphabetical Repertory, to facilitate and secure the selection of a suitable remedy in any given case. Fifth Edition, revised and enlarged by the Author. SYMPTOMATOLOGY and REPERTORY. Translated and Edited by C. J. Hempel, M. D. 923 pages. 12mo. \$4.50.

☞ In this work a condensed Pathogenesis is given of 226 remedies, 82 of which are additions by Possart, and are not contained in Jahr's former works. A well arranged Repertory of 225 pages completes the work, and renders it an admirable companion at the bedside.

Jahr, Dr. G. H. G. The Venereal Diseases, their Pathological Nature, correct Diagnosis, and Homœopathic Treatment. Prepared in accordance with the Author's own, as well as with the experience of other Physicians, and accompanied with critical Discussions. Index to the first eighteen volumes of the North American Journal of Homœopathy. 8vo. \$2.00.

Johnson, Dr. J. D. Therapeutic Key; or Practical Guide for the Homœopathic Treatment of Acute Diseases. 179 pages. Bound in linen. 18mo. \$1.25. Bound in flexible cover. \$1.75.

Joslin, Dr. B. F. Principles of Homœopathy. In a Series of Lectures. 185 pages. 75 Cents.

Joslin, Dr. B. F. Homœopathic Treatment of Epidemic Cholera. Third Edition, with Additions. 252 pages. 12mo. \$1.00.

☞ This work offers the advantage of a threefold arrangement of the principal medicines; viz.: 1st to the varieties of cholera; 2d, to its stages; and 3d, to its symptoms as arranged in repertories. These last will give the work a prominent value, in treating the more frequent complaints of summer.

Kreussler, Dr. E. The Homœopathic Treatment of Acute and Chronic Diseases. Translated from the German, with important Additions and Revisions, by C. J. Hempel, M. D. 190 Pages. 12mo. 75 Cents.

☞ The author is a practitioner of great experience and acknowledged talent. This work is distinguished by concise brevity and lucid simplicity in the description of the various diseases that usually come under the observation of physicians, and the remedies for the various symptoms are carefully indicated. Dr. Hempel has interspersed it with a number of highly useful and interesting notes which cannot fail to enhance the value of this work to American Physicians.

Laurie, Dr. J. Homœopathic Domestic. By A. Gerald Hull, M. D. Small Edition. 264 pages. 18mo. 60 Cents.

To which is added a Treatise on the Method of Rearing Children from their Earliest Infancy; comprising the essential branches of Moral and Physical Education, Edited; with Additions, by W. Williamson, M. D. 460 pages. 12mo. \$1.00.

☞ All the diseases to which children are liable, are described in this volume with remarkable conciseness and accuracy, and their treatment is indicated in such plain and precise language that no intelligent parent can have any difficulty in conducting to a satisfactory termination the various diseases described in this work.

Laurie, Dr. J. The Homœopathic Domestic Medicine. First American from the twenty-first English edition. Edited and revised, with numerous important additions, and the introduction of the new remedies, by R. L. McClatchey, M. D. 1034 pages. 8vo. \$5.00.

☞ The merits of "Laurie's Homœopathic Domestic Medicine" are best attested by the popularity of the work in Great Britain, where upwards of 21,000 copies have been sold to the most intelligent portion of the community, and in this country the work ran through three editions in the first year.

Lippe, Dr. A. Text Book of Materia Medica, 714 pages. 8vo. \$6.00.

This work contains the characteristic and most prominent symptoms of two hundred and ten remedies. It has been introduced into our colleges as a Text Book and was very favorably received by the profession.

Lippe, Dr. A. Key to the Materia Medica, 144 pages. 8vo. 75 Cents

This is the first and only number of a series which were to contain a characteristic Materia Medica. The following remedies are treated of in this number: Aconitum nap., Arsenicum alb., Belladonna, Pulsatilla, Sepia, Sulphur, Phosphorus, Calcarea carb., Tilia europ., Agaricus musc Rhus tox.

Lord, I. S. P. On Intermittent Fever, and other Malarious Diseases. 341 Pages. 8vo. \$3.00.

☞ In an introduction of forty-seven pages, the author lays down his theory, and substantiates his views by a record of two hundred and fifteen cases of ague, of all kinds, giving their treatment, and a running commentary thereon. To these a very copious double index—one to the remedies and the other to the symptoms—serves as a concordance.

Lutze, Dr. A. Manual of Homœopathic Theory and Practice, Designed for the use of Physicians and families. Translated from the German with Additions by C. J. Hempel, M. D. From the 60th Thousand of the German Edition. 750 pages. 8vo. \$2.50.

This work, from the pen of the late Dr. Arthur Lutze, has the largest circulation of any homœopathic work in Germany, no less than sixty thousand copies having been sold. The Introduction, occupying over fifty pages, contains the question of dose and rules for examining the patient and diet; the next sixty pages, contain a condensed pathogenesis of the remedies, treated of in the work; the description and treatment of diseases occupy four hundred and eighteen pages, and the whole concludes with one hundred and seventy-three pages of Repertory and a copious Index; thus forming a concise and complete work on Theory and Practice.

Madden, Uterine Diseases, with an Appendix, containing Abstracts of 180 Cases of Uterine Diseases and their Treatment, together with analytical Tables of Results, Ages, Symptoms, Dose, etc., to which is added a Clinical Record of interesting cases, treated in the Manchester Homœopathic Hospital. 111 pages. 8vo. 50 Cents.

Physician's Visiting List, The Homœopathic. By R. Faulkner, M. D. with a Repertory by W. J. Blakely, M. D. Morocco Gilt Edge. 12mo. \$1.50.

 This visiting list differs materially from any hitherto published, and has been arranged with a view of affording the physician a book much less cumbersome, than those at present in use, and yet containing everything necessary in a work of this kind. This has been accomplished by increasing the length, and by the omission of a large number of pages usually devoted to subjects entirely foreign, and of which but little use is made by the physician.

Practical Guide to the Treatment of the Common Disorders with Homœopathic Remedies. With Instructions as to Diet and Hygienic Recommendations. 64 pages. 64mo. 20 Cents.

Philadelphia Journal of Homœopathy, edited by W. A. Gardiner, M. D., assisted by the following contributors: Drs. B. F. Joslin, A. H. Okie, H. C. Preston, I. P. Dake, P. P. Wells, W. E. Payne, C. Dunham, Jas. Kitchen, W. S. Helmuth, A. E. Small, S. R. Dubbs. 4 volumes. Bound. 8vo. \$8.00.

Rapou, Dr. A. Treatise on Typhoid Fever and its Homœopathic Treatment. Translated from the French by A. A. Granville. 96 pages. 12mo. 50 Cents.

 Dr. Rapou has earned his title to instruct us on the subject he has chosen, at the bedside of from seventy to eighty patients attacked with Typhoid Fever, in all degrees of severity of whom he has lost not a single case.

Rau, Dr. G. L. Organon of the Specific Healing Art of Homœopathy. By C. J. Hempel, M. D. 200 pages. 8vo. \$1.25.

Raue, Dr. C. G. Special Pathology and Diagnosis, with Therapeutic Hints. 644 pages. Extra 8vo. \$5.00.

☞ This standard work is used as a Text Book in all our colleges, and is found in almost every physician's library. An especially commendable feature is, that it contains the application of nearly all the *new remedies* contained in Dr. Hale's work on *Materia Medica*.

Raue, Dr. C. G. Annual Record of Homœopathic Literature, 1870. 496 pages. 8vo. \$3.50.

Raue, Dr. C. G. Annual Record of Homœopathic Literature, 1871. 8vo. \$2.50.

Reil, Dr. A. Monograph on Aconite, its Therapeutic and Physiological Effects, together with its Uses and Accurate Statements, derived from the various sources of Medical Literature. Translated from the German by H. B. Millard, M. D. Prize Essay. 168 pages. 8vo. 75 Cents.

☞ Few remedies in the *Materia Medica* enjoy a higher and more deserved reputation for usefulness than that which is the subject of this Monograph, or have received more consideration from writers eminent in medicine, of every age and school. The Essay of Dr. Reil, containing the most recent facts and experience in relation to the subject, and completely exhausting, as it does, everything of interest connected with it, may be justly regarded as the most thorough and complete treatise upon Aconite ever yet presented.

Rokitansky's Pathological Anatomy. The Abnormal Conditions of the Organs of Respiration. Translated from the German, with Additions on Diagnosis, from Schönlein, Skoda and others, by J. C. Peters, M. D. 164 pages. 8vo. 75 Cents.

☞ Rokitansky's book is what it professes to be; it is morbid anatomy in its densest and most compact form, scarcely ever alleviated by cases, histories or hypotheses; it is just such a work as might be expected from its author, who is said to have written in it the results of his experience gained in the careful examination of over 12,000 bodies, and who is possessed of a truly marvelous power of observing and amassing facts.

Rueckert, Dr. E. F. Therapeutics; or Successful Homœopathic Cures, collected from the best Homœopathic Periodicals. Translated and Edited by C. J. Hempel, M. D. 496 pages. 8vo. \$4.00.

☞ We possess a rich treasure of successful cures, all of which are of great importance to the practitioner. Those cases which have been affected by one single, or at most two or three remedies appear to be the most instructive, and the present collection is chiefly composed of such cases. The author has intermixed them with practical remarks and he constantly indicated the source whence the information has been derived.

Ruoff's Repertory of Homœopathic Medicine, Nosologically arranged. Translated from the German by A. H. Okie, M. D. With Additions and Improvements, by G. Humphrey, M. D. 251 pages. 12mo. \$1.50.

☞ As a book of reference for the practitioner, the present work far excels every other work, presenting him at a single glance, what he might otherwise seek for amidst a confused mass of records and never find. The indefatigable author has drawn his matter from the infallible results of experience, leaving out all guess work and hypothesis.

Rush, Dr. John. Veterinary Surgeon. The Handbook to Veterinary Homœopathy, or the Homœopathic Treatment of Horses, Cattle, Sheep, Dogs and Swine. From the London Edition. - Therapeutic Guide,** Forty Years' Practice. By G. H. G. Jahr. 8vo. \$3.50.
- Therapeutics,** The Science and Art of, B. Baehr. 2 vols. Royal 8vo. \$10.00.
- Williamson, Dr. W.** Diseases of Females and Children and their Homœopathic Treatment. Third Enlarged Edition. 256 pages. 12mo. \$1.00.
- ☞ This work contains a short treatise on the Homœopathic Treatment of the Diseases of Females and Children, the conduct to be observed during pregnancy, labor and confinement, and directions for the management of new-born infants.
- Wolf, Dr. C. W.** Apis-Mellifica; or, the Poison of the Honey Bee, Considered as a Therapeutic Agent. 80 pages. 12mo. 25 Cents.
- ☞ This is the most elaborate treatise upon the above drug in print as the author, (one of our most skillful physicians) spared no pains in making it an excellent exponent of Apis mellifica and its medical virtues.

Epp's Prepared Cocoa.

This very agreeable preparation has been introduced in England since a number of years, and is very popular there. Our customers declare it to have the finest flavor of any they use.

The mode of preparation is very simple, requiring no cooking or boiling, and it will be borne by the weakest stomach of the most feeble patient, without discomfort.

We are sole agents for the United States for the sale of this article and have just received a fresh supply, from James Epps & Co., Homœopathic Pharmacutists, London, England. Price, per lb., 65 Cts., or per box of 14 lbs. \$8 50.

Address: BOERICKE & TAFEL,
145 Grand St., NEW YORK.

Liebig's Food for Infants,

prepared by *Lœfflund, in Stuttgart*, this perfect substitute for mothers' milk, is so well-known that any comment is unnecessary. It is of the consistency of honey, and has one great advantage over "Comstock's Food," "Castillon's Powder," "Dr. Ridge's Patent Food," et id omne genus, in requiring *no cooking* but merely to be stirred into warmed milk, as per direction on each bottle.

We recently received a large supply direct per steamer. It is put up in bottles each sufficient for 12 days' consumption. Price, \$1 per bottle, or \$10 per doz.

Address: BOERICKE & TAFEL,
145 Grand St. NEW YORK.

Pure Cow Pox Virus.

Since a number of years we exerted ourselves to procure *pure vaccine virus from kine*, and our rapidly increasing sales attest to the good quality of the virus supplied. We succeeded to make arrangements for a regular *monthly supply* per steamer, and can therefore guarantee a fresh article.

During the last epidemie our supplies did not cover one-tenth part of the demand, but we largely encreased our orders this year, and hope to be able to meet the demands. It comes in glass tubes hermetically sealed. Price, per tube \$1 50, sent carefully packed by Mail, on receipt of Price.
