MEDICAL LEXICON.

A

DICTIONARY

OF

MEDICAL SCIENCE,

CONTAINING

A CONCISE ACCOUNT OF THE VARIOUS SUBJECTS AND TERMS;

WITH THE

FRENCH AND OTHER SYNONYMES;

NOTICES OF CLIMATE, AND OF CELEBRATED MINERAL WATERS;
FORMULÆ FOR VARIOUS OFFICINAL AND EMPIRICAL
PREPARATIONS, ETC.

BY

ROBLEY DUNGLISON, M. D.

PROFESSOR OF THE INSTITUTES OF MEDICINE, ETC. IN JEFFERSON MEDICAL COLLEGE, PHILADELPHIA.

SIXTH EDITION.

REVISED AND GREATLY ENLARGED.

PHILADELPHIA:

LEA AND BLANCHARD.

.....

1846.

W
D916d
1846

Entered according to the Act of Congress, in the year 1839,
BY ROBLEY DUNGLISON,
In the Clerk's Office of the District Court of the Eastern District of Pennsylvania.

WM. S. YOUNG, Printer.

TO

ROBERT M. PATTERSON, M. D.,

DIRECTOR OF THE MINT OF THE UNITED STATES; VICE-PRESIDENT OF THE AMERICAN PHILOSOPHICAL SOCIETY; LATE PROFESSOR OF NATURAL PHILOSOPHY IN THE UNIVERSITY OF VIRGINIA; ETC. ETC.

My dear Doctor,

When I dedicated the first edition of this work to you, we were colleagues in the University of Virginia. Since that period, we have been placed in various relations with regard to each other; and in all you have maintained those sterling qualities which led me at the time to inscribe it to you. Need I add, that I embrace with eagerness the opportunity a sixth time afforded me of manifesting to you the regard and esteem with which I am

Faithfully Yours,

ROBLEY DUNGLISON.

PREFACE

TO THE SIXTH EDITION.

It is not necessary for the author to say more, as a preface to this *sixth edition* of his dictionary, than that he has bestowed the same care on its revision and improvement, which he did on the others. In proof of this, he may remark, that the present edition comprises nearly *two thousand five hundred* subjects and terms not contained in the last. Many of these have been introduced into medical terminology in consequence of the progress of the science; and others had escaped him in previous revisions.

It is the author's anxious wish to render the work a *satisfactory* and *desirable*—if not *indispensable*—Lexicon, in which the student may search without disappointment for every term that has been legitimated in the nomenclature of the science. This desideratum he is enabled to attempt in successive editions, by reason of the work not being stereotyped; and the present edition certainly offers stronger claims to the attention of the practitioner and student than any of its predecessors.

It is but an act of justice to add, that for the general typographical accuracy of the work, the author is greatly indebted to the assiduity bestowed on his department by Mr. Young, who printed also the three preceding editions.

ROBLEY DUNGLISON.

Philadelphia, 109 South Tenth Street,
May, 1846.

PREFACE

TO THE SECOND EDITION.

THE present undertaking was suggested by the frequent complaints, made by the author's pupils, that they were unable to meet with information on numerous topics of professional inquiry,—especially of recent introduction,—in the medical dictionaries accessible to them.

It may, indeed, be correctly affirmed, that we have no dictionary of medical subjects and terms which can be looked upon as adapted to the state of the science. In proof of this, the author need but remark, that he has found occasion to add several thousand medical terms, which are not to be met with in the only medical lexicon at this time in circulation in the country.

The present edition will be found to contain many hundred terms more than the first, and to have experienced numerous additions and modifications.

The author's object has not been to make the work a mere lexicon or dictionary of terms, but to afford, under each, a condensed view of its various medical relations, and thus to render the work an epitome of the existing condition of medical science. In its preparation, he has freely availed himself of the English, French, and German works of the same nature, and has endeavoured to add every subject and term of recent introduction, which has fallen under his notice; yet, with all his care, it will doubtless be found that subjects have been omitted. The numerous additions, however, which he has made, and his strong desire to be useful, "by removing rubbish and clearing obstructions from the paths through which learning and genius press forward to conquest and glory," will, he trusts, extenuate these and other objections that might be urged against the work; especially when the toil, which every compiler of a dictionary must endure, is taken into consideration; a toil which has been so forcibly depicted by the great English Lexicographer, as well as by the distinguished SCALIGER:

> "Si quelqu'un a commis quelque crime odieux,
> S'il a tué son père, ou blasphémé les Dieux,
> Qu'il fasse un Lexicon: s'il est supplice au monde
> Qui le punisse mieux, je veux que l'on me tonde."

EXPLANATION.

If the simple synonymy of any term be needed, a mere reference to the term may be sufficient; but if farther information be desired, it may be obtained in the body of the work, under the term referred to. For example, the French word *Tronc* is said to be synonymous with *Trunk*. This may be sufficient: should it not, the requisite information may be found by turning to *Trunk*.

ABBREVIATIONS, ETC. ARBITRARILY EMPLOYED.

Arab.	Arabic.

S. G.	Specific Gravity.
Sax.	Anglo-Saxon.
Sw.	Swedish.

A

NEW DICTIONARY

OF

MEDICAL SCIENCE.

A, before a consonant; *An* before a vowel, *a*, *av*, have, in the compound medical terms, a privative or debasing signification, like that of the particles *in*, *im*, *un*, *ir*, in English. Thus: *Sthenī'a* means strength. *Asthenī'a*, want of strength. *Anæmia*, want of blood, &c. Occasionally, in compound words, they have an intensive meaning.

AACHEN, Aix-la Chapelle.

A, or ā ā. See Abbreviation.

AARZHIL, MINERAL WATERS OF. A. is in the canton of Berne in Switzerland. The chief spring contains chlorides of calcium and sodium, sulphates of lime and soda, oxyd of iron, and sulphohydric acid gas.

ABACH, MINERAL WATERS OF. A hydrosulphuretted saline spring, not far from Ratisbon or Regentsberg in Bavaria.

ABAISSEMENT, Depression: see Cataract.—*a. de la Matrice*, Prolapsus uteri.

ABAISSEUR DE L'AILE DU NEZ, Depressor alæ nasi—*a. de l'angle des lèvres*, Depressor anguli oris—*a. de la lèvre inférieure*, Depressor labii inferioris—*a. de la Machoire inférieure*, Digastricus—*a. de l'œil*, Rectus inferior oculi.

ABALIENA'TUS. *Corrup'tus.* Corrupted, from *ab*, and *alienus*, 'different.' *Membra abaliena'ta.* Limbs dead, or benumbed.—Celsus, Scribonius Largus.

ABANGA. Name given by the inhabitants of St. Thomas to the fruit of a palm tree, the seeds of which they consider very useful in diseases of the chest, in the dose of three or four, given two or three times a day

ABAPTISTʼA. *Abaptiston*, from *a* privative, and βαπτιζειν, 'to plunge.' A term applied to the old trepan, the conical shape of which prevented it from plunging suddenly into the cavity of the cranium.

ABAREMO-TEMO. A Brazilian tree, which grows in the mountains, and appears to be a mimosa. Piso relates that the decoction of its bark, which is bitter and astringent, was applied, in that country, to ulcers of a bad character.

ABARNAHAS. Magnesia.

ABÂTARDISSEMENT, Degeneration.

ABARTICULA'TIO, Diarthrosis and Synarthrosis.

ABATTEMENT, Prostration.

ABATTIS, Giblets.

ABBECOURT, MINERAL WATERS OF. A chalybeate spring, six leagues from Paris, and one from Poissy. It was once much frequented, but is now abandoned.

ABBEVILLE, MINERAL WATERS OF. An acidulous chalybeate at Abbeville, in the department of Somme, France.

ABBREVIA'TION, *Abbrevia'tio*, *Brachyn'sis*, *Brachys'mos*, *Abbreviatu'ra* (F.) *Abréviation*, from *brevis*, 'short.' Abbreviations are chiefly used in medicinal formulæ. They are by no means as frequently employed now as of old, when every article had its appropriate symbol. The chief abbreviations now adopted are the following:

℞. *Recipe*, Take.

A. ā ā, ANA, (*ava*) *utriusque*, of each.

ABDOM. *Abdomen.*

ABS. FEBR. *Absente febre*, In the absence of fever.

AD. or ADD. *Adde* or *addatur.*

AD. LIB. *Ad libitum*, At pleasure.

ADMOV. *Admoveatur*, Let it be applied.

ALTERN. HOR. *Alternis horis*, Every other hour.

ALV. ADSTRICT. *Alvo adstrictâ*, The bowels being confined

AQ. *Aqua*, Water.

AQ. COMM. *Aqua communis*, Common water.

AQ. FONT. *Aqua fontis*, Spring water.

AQ. BULL. *Aqua bulliens*, Boiling water.

AQ. FERV. *Aqua fervens*, Hot water.

AQ. MARIN. *Aqua marina*, Sea water.

B. A. *Balneum arenæ*, A sand-bath.

BALS. *Balsamum*, Balsam.

B. B. BBDS. *Barbadensis*, Barbadoes.

BIB. *Bibe*, Drink.

BIS IND. *Bis indies*, Twice daily.

B. M. *Balneum mariæ*, A salt water bath.

BOL. *Bolus.*

BULL. *Bulliat*, Let it boil.

BUT. *Butyrum*, Butter.

B. V. *Balneum vaporis*, A vapour-bath.

CÆRUL. *Cæruleus*, Blue.

CAP. *Capiat*, Let him take.

C. C. *Cornu cervi*, Hartshorn.

C. C. U. *Cornu cervi ustum*, Burnt hartshorn

C. M. *Cras manè*, To-morrow morning.

COCHL. *Cochleare*, A spoonful.

COCHL. AMPL. *Cochleare amplum*, A large spoonful.

COCHL. INF. *Cochleare Infantum*, A child's spoonful.

Cochl. Mod. or Med. *Cochleare modicum* or *medium*, A dessert-spoonful.
Cochl. Parv. *Cochleare parvum*, A tea-spoonful.
Col. *Cola*, *colaturæ*, Strain, and to the strained.
Comp. *Compositus*, Compound.
Conf. *Confectio*, Confection.
Cons. *Conserva*, Conserve.
Cont. *Continuetur*, Let it be continued.
Coq. *Coque*, Boil.
Cort. *Cortex*, Bark.
Crast. *Crastinus*, For to-morrow.
Cuj. *Cujus*, Of which.
Cujusl. *Cujuslibet*, Of any.
Cyath. *Cyathus*, A glassful.
Cyath. Theæ, A cup of tea.
D. *Dosis*, A dose.
D. et S. *Detur et signetur*, (*placed at the end of a prescription.*)
D. D. *Detur ad*, Let it be given in *or* to.
D. D. Vitr. *Detur ad vitrum*, Let it be given in a glass.
Deaur. Pil. *Deaurentur pilulæ*, Let the pills be gilded.
Deb. Spiss. *Debita spissitudo*, A due consistence.
Dec. *Decanta*, Pour off.
Decub. *Decubitus*, Lying down, going to bed.
De D. in D. *De die in diem*, From day to day.
Dej. Alv. *Dejectiones alvi*, Alvine evacuations.
Dep. *Depuratus*, Purified.
Det. *Detur*, Let it be given.
Dieb. Altern. *Diebus alternis*, Every other day.
Dieb. Tert. *Diebus tertiis*, Every third day.
Dig. *Digeratur*, Let it be digested.
Dil. *Dilutus*, Dilute.
Dim. *Dimidius*, One half.
Dist. *Distilla*, Distil.
Div. *Divide*, Divide.
Donec Alv. Solut. Fuer. *Donec alvus soluta fuerit*, Until the bowels are opened.
Drach. *Drachma*, A drachm.
Ejusd. *Ejusdem*, Of the same.
Enem. *Enema*, A clyster.
Exhib. *Exhibeatur*, Let it be exhibited.
Ext. Super Alut. *Extende super alutam*, Spread upon leather.
F. *Fiat*, Let it be made.
F. Pil. *Fiat pilula*, Make into a pill.
F. Venæs. or F. V. S. *Fiat venæsectio*, Let bleeding be performed.
Feb. Dur. *Febre durante*, The fever continuing.
Fem. Intern. *Femoribus internis*, To the inside of the thighs.
Fist. Armat. *Fistula armata*, A *bag and pipe*, a clyster pipe and bladder fitted for use.
Fl. *Fluidus*, and *Flores*, Fluid, *and* Flowers.
Frust. *Frustillatim*, In small pieces.
Gel. Quâvis. *Gelatinâ quâvis*, In any kind of jelly.
G. G. G. *Gummi guttæ Gambiæ*, Gamboge.
Gr. *Granum*, A grain.
Gtt. *Gutta*, A drop.
Gtt. or Gutt. Quibusd. *Guttis quibusdam*, With some drops.
Gum. *Gummi*, Gum.
Guttat. *Guttatim*, By drops.
Hor. Decub. *Horâ decubitûs*, At bed-time.
Hor. Interm. *Horis intermediis*, At intermediate hours.
H. S. *Horâ somni*, At bed-time.
Inf. *Infunde*, Infuse.
Ind. *Indies*, Daily.
Inj. Enem. *Injiciatur enema*, Let a clyster be given.
In Pulm. *In pulmento*, In gruel.
Jul. *Julepus*, a julep.
Lat. Dol. *Lateri dolenti*, To the pained side.
Lb. and Lib. *Libra*, A pound weight.
Lib. Llb. *Libræ*, Pounds.
Liq. *Liquor*.
M. *Misce*, Mix.
Mac. *Macera*, Macerate.
Man. *Manipulus*, A handful.
Man. Prim. *Manè primo*, Early in the morning.
Mic. Pan. *Mica panis*, Crumb of bread.
Min. *Minimum*, The 60th part of a drachm, by measure.
Mitt. *Mitte*, Send.
Mitt. Sang. *Mittatur sanguis*, Let blood be drawn.
Mod. Præscript. *Modo præscripto*, In the manner directed.
Mor. Sol. *More solito*, In the usual manner.
Muc. *Mucilago*, Mucilage.
N. M. *Nux moschata*, Nutmeg.
O. *Octarius*, A pint.
Ol. *Oleum*, Oil.
Ol. Lini, S. I. *Oleum lini sine igne*, Cold-drawn linseed oil.
Omn. Bid. *Omni biduo*, Every two days.
Omn. Bih. *Omni bihorio*, Every two hours.
Omn. Hor. *Omni horâ*, Every hour.
Omn. Man. *Omni manè*, Every morning.
Omn. Nocte, Every night.
Omn. Quadr. Hor. *Omni quadrante horæ*, Every quarter of an hour.
O. O. O. *Oleum olivæ optimum*, Best Olive oil.
Ov. *Ovum*, An egg.
Ox. *Oxymel*.
Oz. *Uncia*, An ounce.
P. *Pondere*, by weight.
P. and Pug. *Pugillus*, a pugil.
P. Æ. *Partes æquales*, Equal parts.
Part. Vic. *Partitis vicibus*, In divided doses.
Peract. Op. Emet. *Peractâ operatione emetici*, The operation of the emetic being over.
Pil. *Pilula*, A pill.
Post Sing. Sed. Liq. *Post singulas sedes liquidas*, After every liquid evacuation.
Pot. *Potio*, A potion.
P. P. *Pulvis patrum*, Jesuits' bark.
P. Rat. Ætat. *Pro ratione ætatis*, According to the age.
P. R. N. *Pro re natâ*, As occasion may be.
Pulv. *Pulvis*, A powder.
Q. P. *Quantum placeat*, As much as may please.
Q. S. *Quantum sufficiat*, as much as is sufficient.
Quor. *Quorum*, Of which.
Q. V. *Quantum volueris*, As much as you wish.
Rad. *Radix*, Root.
Ras. *Rasuræ*, Shavings.
Rect. *Rectificatus*, Rectified.
Red. or Redig. in Pulv. *Redactus in pulverum*, or *Redigatur in pulverum*, Powdered, or Let it be powdered.
Reg. Umbil. *Regio umbilici*, The umbilical region.
Repet. *Repetatur*, Let it be repeated.
S. A. *Secundum artem*, According to art.
Sem. *Semen*, Seed.

Semi-dr. *Semi-drachma*, Half a drachm.
Semi-H. *Semi-hora*, Half an hour.
Serv. *Serva*, Keep, preserve.
Sesquih. *Sesquihora*, An hour and a half.
Sesunc. *Sesuncia*, An ounce and a half.
Si Non Val. *Si non valeat*, If it does not answer.
Si Op. Sit. *Si opus sit*, If there be need.
Si Vir. Perm. *Si vires permittant*, If the strength will permit.
Solv. *Solve*, Dissolve.
Sp. and Spir. *Spiritus*, Spirit.
Ss. *Semi*, One half.
St. *Stet*, Let it stand.
Sub Fin. Coct. *Sub finem coctionis*, Towards the end of the boiling.
Sum. *Sumat*, Let him take; also, *Summitates*, The tops.
S. V. *Spiritus vini*, Spirit of wine.
S. V. R. *Spiritus vini rectificatus*, Rectified spirit of wine.
S. V. T. *Spiritus vini tenuior*, Proof spirit of wine.
Syr. *Syrupus*, Syrup.
Temp. Dext. *Tempori dextro*, To the right temple.
T. O. *Tinctura opii*, Tincture of opium.
Tr., T_R and Tinct. *Tinctura*, Tincture.
Trit. *Tritura*, Triturate.
V. O. S. or Vit. Ov. Sol.. *Vitello ovi solutus*, Dissolved in the yelk of an egg.
Z. Z. anciently *myrrh:* now *zinziber*, or ginger.
lb, *Libra*, a pound.
℥, *Uncia*, An ounce.
ʒ, *Drachma*, A drachm.
℈, *Scrupulum*, A scruple.
♏, *Minimum*, a minim.
ss, *Semissis*, or half; iss, one and a half.
j, one; ij, two; iij, three; iv, four, &c.

The same system is not always followed in abbreviating. The subjoined will exhibit the usual mode:

℞

Infus. Colomb.	f. ʒiss
Tinct gent. c.	f. ʒi
Syr. Cort. Aurant.	f. ʒss
Tinct. Caps.	gtt. XL. ℳ

Capt Coch. ij. p. r. n.

This, written at length, is as follows:

Recipe
Infusi Colombæ, sesqui-fluidunciam,
Tincturæ Gentianæ Compositæ, fluidrachmam.
Syrupi Corticis Aurantiorum, semi-fluidrachmam.
Tincturæ Capsici, guttas quadraginta.
Misce.
Capiat cochlearia duo pro re natâ.

ABCÈS, Abscess—*a. aigu*, see Abscess,—*a. Chaud*, see Abscess,—*a. Chronique*, see Abscess,—*a. Par congestion*, see Abscess.—*a. Diathésique*, see Abscess,—*a. Froid*, see Abscess,—*a. Métastatique*, see Abscess,—*a. Scrofuleux*, see Abscess,—*a. Soudain*, see Abscess.

ABDO'MEN, from *ab'dere*, 'to conceal;' *Etron, Hypogas'trion, Epis'chion, Lap'ara, Hypochol'lion, Gaster, Hypou'trion, Nedys, Abdu'men, Venter imus, Venter in'fimus, Alvus, Uterus.* (F.) *Ventre, V. inférieur, Bas ventre.* The largest of the three splanchnic cavities, bounded, above, by the diaphragm; below, by the pelvis; behind, by the lumbar vertebræ; and at the sides and fore part, by muscular expansions. It is distinguished into three anterior regions, from above to below; viz. the epigastric, umbilical, and hypogastric, each of which is itself divided into three others, one middle, and two lateral: thus, the *epigastric region* comprises the *epigastrium* and *hypochondria;* the *umbilical*, the *umbilicus* and *flanks* or *lumbar regions;* and the *hypogastric*, the *hypogastrium* and *iliac regions.* None of these regions has its limits well defined. The chief viscera contained in the Abdomen are the stomach, intestines, liver, spleen, pancreas, kidneys, &c. It is lined by the peritoneum.

ABDOM'INAL, *Abdomina'lis.* That which belongs to the Abdomen, as *abdominal muscles*, *abdominal viscera*, &c.

ABDOMINOSCOP'IA. A hybrid word, from *Abdomen*, 'the lower belly,' and σκοπεω, 'I view.' *Laparoscop'ia*, examination of the lower belly as a means of Diagnosis. See Auscultation.

ABDUCENS LABIORUM, Levator anguli oris.

ABDUCENTES. Motor oculi externus.

ABDUCTEUR DE L'ŒIL, Rectus externus oculi—*a. de l'oreille*, Abductor auris—*a. du gros orteil*, Abductor pollicis pedis—*a. du petit orteil*, Abductor minimi digiti pedis—*a. court du pouce*, Abductor pollicis brevis—*a. long du pouce*, Abductor longus pollicis.

ABDUC'TION. *Abduc'tio*, from *abdu'cere*, to separate, (*ab* and *ducere*, 'to lead.') The movement which separates a limb or other part from the axis of the body.

The word has also been used synonymously with *Abrup'tio*, *Apag'ma*, *Apoclas'ma*, a fracture near the articular extremity of a bone, with separation of the fragments.

ABDUC'TOR, same etymon. (F.) *Abducteur.* A muscle which moves certain parts by separating them from the axis of the body.

Abductor Auricularis, Abductor auris—a. Indicis pedis, Prior indicis pedis, Posterior indicis pedis—a. Medii digiti pedis, Prior medii digiti pedis—a. Minimi digiti, Flexor parvus minimi digiti—a. Minimi digiti, Prior minimi digiti—a. Oculi, Rectus externus oculi—a. Pollicis manus, and a. Brevis alter, Abductor pollicis brevis.

Abductor Auris, *Abductor auricula'ris.* (F.) *Abducteur de l'oreille.* A portion of the *posterior auris*, the existence of which is not constant, and which passes from the mastoid process to the concha.

Abductor Is'dicis. *Semi-interos'seus in'dicis.* A muscle which arises from the os trapezium and metacarpal bone of the thumb, and is inserted into the first bone of the forefinger. Its use is to bring the forefinger towards the thumb.

Abductor Min'imi Dig''iti, *Carpo phalan'geus min'imi digiti, Carpo-phalangien du petit doigt, Exten'sor ter'tii interno'dii minimi digiti* —(Douglas.) *Hypoth'enar minor metacarpeus.* See Flexor parvus. It originates fleshy from the os pisiforme, and from the annular ligament near it; and is inserted, tendinous, into the inner side of the base of the first bone of the little finger. *Use*, to draw the little finger from the rest.

Abductor Minimi Digiti Pedis, *Calco-sub-*

phalangeus minimi digiti, Calcaneo-phalangien du petit orteil, Parath'enar major—(Winslow, by whom the muscle is divided into two portions. *Parathenar major* and *metatarseus.*) *Calcaneo-sous-phalangien du petit orteil*—(Ch.) (F.) *Abducteur du petit orteil.* This muscle forms the outer margin of the sole of the foot, and is immediately beneath the plantar aponeurosis. It arises, tendinous and fleshy, from the outer side of the protuberance of the os calcis, and from the root of the metatarsal bone of the little toe, and is inserted into the outer part of the root of the first bone of the little toe. *Use.* To draw the little toe outwards.

Abductor Pol'licis Brevis, *Abductor Pollicis Manus, Scapho-carpo-super-phalangeus Pollicis, Sus-phalangien du pouce, A. pollicis manus* and *A. brevis alter*—(Albinus.) (F.) *Abducteur court du pouce. Carpo-sus-phalangien du pouce*—(Ch.) A short, flat, triangular muscle, which arises from the anterior surface of the os scaphoides and the annular ligament of the carpus, and terminates at the outside of the upper extremity of the first phalanx of the thumb. A particular portion, on the inner side of this muscle, is called, by Albinus, *Abduc'tor brevis alter.*

Abductor Longus Pollicis, *A. l. P. Manûs, Extensor ossis metacarpi pollicis manûs, Extensor primi internodii*—(Douglas,) *Extensor primus Pollicis, Cubito-radi-sus-métacarpien du pouce, Cubito-sus-métacarpien du pouce,*—(Ch.) (F.) *Abducteur long du pouce.* A long, thin muscle, arising from the posterior surface of the ulna, radius, and interosseous ligament, and inserted at the outer side of the upper extremity of the first metacarpal bone.

Abductor Pollicis Pedis, *Calco-sub-phalangeus Pol'licis.* (F.) *Abducteur du gros orteil.* This muscle arises, fleshy, from the anterior and inner part of the protuberance of the os calcis, and tendinous from the same bone where it joins with the os naviculare. It is inserted, tendinous, into the internal os sesamoideum and root of the first bone of the great toe. *Use.* To pull the great toe from the rest.

The name *Abductor* has been given also to all those interosseous muscles of the hand and foot, which perform the motion of abduction on the fingers or toes, and to muscles which execute the same function on other parts of the body.

ABDUMEN, Abdomen.

ABEBÆ'OS, from *a* neg. and *βεβαιος*, 'firm,' *infir'mus, deb'ilis.* Weak, infirm, unsteady.

ABEILLE, Bee.

ABELMELUCH. One of the names of the Ricinus, according to some authors.—Prosper Alpinus says that a tree, which grows about Mecca, is so called. Its seeds, which are black and oblong, are said to be a most violent cathartic.

ABELMOSCHUS, Hibiscus Abelmoschus.—a. Moschatus, Hibiscus abelmoschus.

ABELMUSK, Hibiscus Abelmoschus.

ABENSBERG, MINERAL WATERS OF. A. is a city of Bavaria, where there is a cold, sulphureous spring.

ABERRATIO MENSIUM, Menstruation, vicarious.

ABERRA'TION, *Aberra'tio*, from *aberra're*, (*ab* and *errare*,) 'to stray,' 'to wander from.' This word has several meanings.

1. The passage of a fluid of the living body into an order of vessels not destined for it. The passage of red blood, for example, into white vessels.

In this sense it is synonymous with the *Error Loci* of Boerhaave.

2. The flow of a fluid towards an organ different from that to which it is ordinarily directed; as in cases of vicarious hemorrhage. *Aberrations of sense* or *judgment* are certain errors in the images perceived or certain derangements of the intellectual faculties.

The word is used in optics to designate the dispersion of the rays of light in passing through a lens.

The Aberration of Spheric''ity, or *spher'ical aberra'tion*, takes place, when the rays, as in a common lens, which pass through the centre of the lens, and those which pass near the circumference, are unequally refracted, so that they do not meet at a common focus.

This aberration of sphericity in the human eye is corrected by the iris.

The Aberration of Refrangibil'ity exists, when, as in a common lens, the rays that pass near the circumference of the lens are decomposed, so that a coloured image is observed. This aberration in the human eye is corrected by the iris, which does not permit the rays to fall near the circumference of the lens, and also by the crystalline lens itself, which, owing to its structure, serves the purposes of an achromatic glass.

ABESSI, Realgar.

ABEVACUA'TIO. *Apocend'sis*, from *ab*, and *evacuare*, 'to empty.' An evacuation. A partial or imperfect evacuation. By some, it is applied to an immoderate evacuation.—Kraus.

ABHAL. A fruit well known in India, and obtained from a species of cypress. It passes for an emmenagogue.

ABIES, Pinus Picea—a. Balsamea, Pinus balsamea—a. Canadensis, Pinus Canadensis,—a. Excelsa, see Pinus abies—a. Gallica, Pinus picea—a. Pectinata, Pinus picea—a. Picea, Pinus picea—a. Rubra, Pinus rubra.

ABIGA, Teucrium Chamæpitys

ABIOTOS, Conium Maculatum.

ABIRRITA'TION. *Ab-irrita'tio*, from *ab*, privative, and *irrita'tio*, 'irritation.' This word strictly means absence or defect of irritation. The disciples of Broussais used it to indicate a pathological condition, opposite to that of irritation. It may be considered as synonymous with debility, asthenia, &c.

ABLACTATIO, Weaning.

ABLATIO, Extirpation.

ABLUENS, Abstergent.

ABLU''TION, *Ablu'tio, Aponip'sis, Cataclys'mus*, from *ablu'crē*, (*ab* and *lucre*,) 'to wash.' A name given to legal ceremonies in which the body is subjected to particular affusions. Ablution (especially of the extremities) with cold or tepid water is employed, therapeutically to reduce febrile heat. Also, the washing by which medicines are separated from the extraneous matters mixed with them.

ABNORMAL, Abnormous.

ABNORMITAS, Anomalia.

ABNOR'MOUS, *Abnor'mal* (F.) *Anormal*, from *ab*, 'from,' and *norma*, 'rule.' Not conformable to rule, irregular.

ABOLI''TION, *Aboli''tio*, destruction or sup-

pression, from *ab* and *luere* (?) 'to wash.' A word, often employed, especially by the French, to express the complete suspension of any symptom or function. *Abolition of the sight*, e. g. is the complete loss of sight.

ABOMA'SUS, *Aboma'sum*, *Enys'tron*, *Rennet*. The lowermost or fourth stomach of ruminating animals.

ABOMINA'TIO, Disgust.

ABONDANCE, Plethora.

ABORSIO, Abortion.

ABORSUS, Abortion.

ABORTIF, Abortive.

ABORTION, *Abor'tus*, *Abor'sus*, *Abor'sio*, *Dysto'cia aborti'va*, *Omoto'cia*, *Paracye'sis abortus*, *Ambly'sis*, *Ambly'ma*, *Diaph'thora*, *Ectro'sis*, *Exambly'ma*, *Exambly'sis*, *Ectros'mos*, *Apopalle'sis*, *Apopal'sis*, *Apoph'thora*, *Phthora*, *Convul'sio u'teri*, *Deperdi'tio*. (F.) *Avortement*, *Blessure*, Miscarriage, from *ab* and *oriri*, 'to rise,' applied to that which has *arisen* out of season. The expulsion of the fœtus before the seventh month of utero-gestation, or before it is *viable*. (q. v.) The causes of this accident are referrible either to the mother, and particularly to the uterus; or to the fœtus and its dependencies. The causes, in the mother, may be:—extreme nervous susceptibility, great debility, plethora; faulty conformation, &c.; and it is frequently induced immediately by intense mental emotion, violent exercise, &c. The causes seated in the fœtus are its death, rupture of the membranes, &c. It most frequently occurs between the 8th and 12th weeks of gestation. The symptoms of abortion are:—uterine hemorrhage with or without flakes of décidua, with intermitting pain. When abortion has once taken place, it is extremely apt to recur in subsequent pregnancies about the same period. Some writers have called abortion, when it occurs prior to three months, *Effluxion*. The treatment must vary according to the constitution of the patient and the causes giving rise to it. In all cases, the horizontal posture and perfect quietude are indispensable.

Abortion is likewise applied to the product of an untimely birth. *Amblothrid'ion*, *Ectro'ma*, *Abortment*. (F.) *Avorton*, *Avortin*.

TO ABORT, *Abori'ri*. To miscarry. (F.) *Avorter*.

ABOR'TIVE, *Aborti'vus*, *Ecbol'ius Ambly'ticus*, *Phthor'ius*, *Apophthor'ius*, *Ectrot'icus*, *Parturient*. (q. v.) *Parturifa'cient*, *Ec'bolic*. (F.) *Abortif*. A medicine to which is attributed the property of causing abortion. There is probably no direct agent of the kind.

ABORTMENT, Abortion.

ABORTUS, Abortion.

ABOUCHEMENT, Anastomosis.

ABOULAZA, a tree of Madagascar, used, according to Flacourt, in the practice of the country in diseases of the heart.

ABOUTISSEMENT, Suppuration.

ABRABAX, *Abrasax*, *Abraxas*. A mystic term expressing the number 365, and to which the Cabalists attributed miraculous properties.

ABRACADA'BRA: the name of a Syrian Idol, according to Selden. This word, when pronounced and repeated in a certain form and a certain number of times, was supposed to have the power of curing fevers and preventing many diseases. It was figured on amulets and worn suspended around the neck.

ABRACALAN, A cabalistic term to which the Jews attributed the same virtue as to the word Abracadabra.

ABRASAX, Abrabax.

ABRA'SION, *Abra'sio*, *Aposyr'ma*, *Apoxys'mus*, from *abra'dere*, (*ab* and *radere*.) 'to rasp.' A superficial excoriation, with loss of substance, under the form of small *shreds*, in the mucous membrane of the intestines. (F.) *Raclure des Boyaux*. Also, an ulceration of the skin, possessing similar characters. According to Vicq d'Azyr, the word has been used for the absorption of the molecules composing the various organs.

ABRATHAN, Artemisia abrotanum.

ABRAXAS, Abrabax.

ABRÉVIATION, Abbreviation.

ABRICOT, Prunus Armeniaca.

ABROSIA, Abstinence.

ABROTANUM, Artemisia abrotanum—a. Cathsum, Artemisia abrotanum—a. Mas, Artemisia abrotanum.

ABROTONI'TES, *αβροτονιτης*, (*οινος*, 'wine' understood.) Wine impregnated with the Artemisia Abrotanum or Southernwood.

ABROTONUM, Artemisia abrotanum.

ABRUPTIO, Abduction.

ABRUS PRECATO'RIUS, *Liq'uorice Bush*, *Red Bean*, *Love pea*. A small ornamental shrub, found from Florida to Brazil, as well as in Egypt and the West Indies; *Nat. Ord.* Leguminosæ *Sex. Syst.* Monadelphia enneandria; having beautiful scarlet seeds with a black spot. The roots and leaves are sweet and mucilaginous demulcents. The seeds of the American kind are considered to be purgative and poisonous.

ABSCESS, from *abscedo*, (*abs*, and *cedere*,) 'I depart,' or 'separate from.' *Absces'sus*, *Absces'sio*, *Aphiste'sis*, *Aposte'ma*, *Impos'thume*, *Ecpye'ma*, *Ecpye'sis*, *Reces'sus*. (F.) *Abcès*, *Depôt*. A collection of pus in a cavity, the result of a morbid process. See Pyogenia and Suppuration.

The French have various distinctive terms for Abscesses.

ABCÈS CHAUD, *AIGU*, *SOUDAIN*, is one which follows violent inflammation.

ABCÈS FROID, *CHRONIQUE*, *SCROFULEUX*, one which is the result of chronic or scrofulous inflammation.

ABCÈS PAR CONGESTION, *A. diathésique*, is a symptomatic abscess, one which occurs in a part at a distance from the inflammation by which it is occasioned: e. g. a *lumbar abscess*; (q. v.) in which the inflammation may be in the lumbar vertebræ, whilst the pus exhibits itself at the groin.

Abscess Metastat'ic, (F.) *Abcès métastatique*; *A. consécutif*, an abscess, which forms suddenly, and sometimes without any precursory signs of inflammation in a part of the body

remote from one in a state of suppuration, and without presenting a sufficient reason for its development in the place which it occupies. It is a consequence of phlebitis.

ABSCESS, PERFORATING OF THE LUNG, See Lung, perforating abscess of the—a. Psoas, Lumbar abscess.

ABSCESSUS CAPITIS SANGUINEUS NEONATORUM, Cephalæmatoma—a. Gangrænescens, Anthrax—a. Gangrænosus, Anthrax—a. Lumborum, Lumbar abscess—a. Mammæ, Mastodynia apostematosa—a. Nucleatus, Furunculus—a. Oculi, Hypopyon—a. Pectoris, Empyema—a. Pulmonum, Empyema—a. Spirituosus, Aneurism—a. Thoracis, Empyema.

ABSCIS'ION, *Abscis'io*, *Abecis'sio*, from *absci'dere* or *abscin'dere*, 'to cut off,' *Apoc'opé*, *Apothrau'sis*, *Diac'opē*. Excision or extirpation of a part, especially of a soft part.—Fabricius Hildanus.

A fracture or injury of soft parts with loss of substance.—Hippocrates.

Diminution, or loss of voice.—Celsus.

Sudden and premature termination of a disease.—Galen.

ABSCISSIO PRÆPUTII, Circumcision.

ABSCONSIO, Sinus.

ABSENCE DU BRUIT RESPIRATOIRE, See Murmur, respiratory.

ABSINTHI'TES, *ἀψινθίτης*, *Apsinthi'tes*, Wine impregnated with Absinthium or Wormwood.—Dioscorides.

ABSINTHIUM, (Ph. U. S.) Artemisia absinthium—a. Maritimum, Artemisia maritima—a. Ponticum, Artemisia pontica—a. Romanum, Artemisia pontica—a. Santonicum, Artemisia santonica—a. Vulgare, Artemisia absinthium.

ABSORBANT, Absorbent.

ABSOR'BENT, *Absor'bens*, from *absorbere*, (*ab* and *sorbere*,) 'to drink, to suck up.' (F.) *Absorbant*. That which absorbs.

ABSORBENT SYSTEM is the collection of vessels and glands, which concur in the exercise of absorption.

A medicine used for absorbing acidity in the stomach and bowels, as magnesia, chalk, &c.

Also, any substance, such as cobweb, sponge, &c., which, when applied to a bleeding surface, retains the blood, and forms with it a solid and adhesive compound, which arrests the hemorrhage.

ABSORP'TION, *Resorp'tio*, *Inhala'tio*, *Imbibi''tio*, *Absorp'tio*, *Catarrhophe'sis*, *Catar'rhophē*; same etymon. The function of absorbent vessels, by virtue of which they take up substances from without or within the body. Two great divisions have been made of this function. 1. *External absorption*, or the *absorption of composition*, which obtains from without the organs, the materials intended for their composition: and, 2. *Internal absorption*, or the *absorption of decomposition*, which takes up from the organs the materials that have to be replaced by the exhalants.

By *external absorption* is meant not only that which takes place at the external surface of the body, but also that of the mucous membranes of the digestive and respiratory passages. Hence, again, the division of external absorption into *cutaneous*, *intestinal*, or *digestive*, and *pulmonary* or *respiratory*.

Internal absorption is also subdivided into, 1. *Molecular* or *interstitial*, *nutritive* or *organic*, which takes up from each organ the materials that constitute it, so that the decomposition is always in equilibrio with the deposition. 2. The *absorption of recrementitial secreted fluids*, such as the fluid of serous membranes, synovia, &c. As these are constantly exhaled on surfaces, which have no external outlet, they would augment indefinitely, if absorption did not remove them in the same proportion as that in which they are deposited. 3. The *absorption of a part of the excrementitial secreted fluids*, as they pass over the excretory passages.

Absorption does not effect the decomposition of the body immediately. It merely prepares the fluid which has to be eliminated by the secretory organs.

The great agents of external absorption are the veins and chyliferous vessels; of internal absorption, probably the lymphatics. In the chyliferous vessels and lymphatics the fluid is always found to possess the same general properties. In them, therefore, an action of elaboration or selection must have taken place.

The veins, on the other hand, seem to exert no selection. Any fluid, possessing the necessary tenuity, passes through the coats of the vessel readily by imbibition, and proceeds along with the torrent of the circulation. Watery fluids in this manner enter the blood when they are taken into the stomach. Substances that require digestion, on the other hand, must pass through the chyliferous vessels and thoracic duct.

ABSTÈME, Abstemious.

ABSTE'MIOUS, *Abste'mius*, *Aoï'nos*, from *abs*, 'without,' and *teme'tum*, 'wine,' (F.) *Abstème*. Used by the ancient writers as well as by the French in the sense only of its roots; one who abstains from wine or fermented liquors in general.

ABSTER'GENT, from *aster'gere*, 'to clean,' (*abs* and *tergere*,) *Absterси'vus*, *Aster'sive*, *Ab'luens*, *Absterso'rius*, *Deter'gens*, *Rhyp'ticus*, *Traumat'icus*. A medicine that cleanses the part to which it is applied.

ABSTERGENTIA, Detergents.

ABSTERSIVUS, Abstergent.

ABSTERSORIUS, Abstergent.

AB'STINENCE, *Abstinen'tia*, from *abs*, 'from,' and *tene're*, 'to hold,' *Abros'ia*, *Asit'ia*, *Liman'chia*, *Limocton'ia*, Fasting. Privation, usually voluntary, as when we speak of *abstinence from pleasure*, *abstinence from drink*, &c. It is more particularly used to signify voluntary privation of certain articles of food. Fasting is a useful remedial agent in certain diseases, particularly in those of an inflammatory character.

ABSUS, a kind of cassia—*C. Absus*—which grows in Egypt and in India, the seeds of which, pulverized and mixed with powdered sugar, have been employed, in form of a dry collyrium, in the endemic ophthalmia of Egypt.

ABUS DE SOI-MÊME, Masturbation.

ABUTA, Pareira brava.

ABUTILON CORDA'TUM, *Sida abutilon*, *Yellow mallow*. An indigenous plant common from Canada to Mexico, which resembles common mallow in its medical virtues, being mucilaginous and demulcent.

ABVACUA'TIO, an excessive or colliquative evacuation of any kind.

ACACIA (Ph. U. S.) Acaciæ gummi—a. Catechu, Catechu—a. Germanica, see Prunus spinosa—a. Indica, Tamarindus—a. Nostras, see

Prunus spinosa—a. Vera, see Acaciæ gummi—a. Zeylonica, Hæmatoxylon Campechianum.

ACACIÆ GUMMI, *Aca'cia*, from *ακη*, 'a point,' so called in consequence of its spines, *G. Aca'ciæ Arab'icæ*, *G. Arab'icum*, *G. Acanth'inum*, *G. Leucum*, *G. Theba'icum*, *G. Serapio'nis*, *G. Lamac*, *G. Senega*, or *Seneca*, *Gum Ar'abic*. (F.) *Gomme Arabique*. The gum of the *Mimosa Nilot'ica*, *Aca'cia vera*, *Spina Ægyptiaca*, of Upper Egypt, *Nat. Ord.* Mimoseæ. *Sex. Syst.* Polygamia Monœcia. It is in irregular pieces, colourless, or of a pale yellow colour, hard, brittle, of a shining fracture, transparent, soluble in water, and insoluble in alcohol, s. g. 1.4317.

It is mucilaginous; but is rarely used, except in Pharmacy. Sometimes it is administered alone as a demulcent.

ACAJOU, Anacardium occidentale.

ACAM'ATOS, from *α* priv., and *καμνω*, 'I labour.' This word has been sometimes used for a good constitution of the body. According to Galen, it means that position in which a limb is intermediate between flexion and extension; a position which may be long maintained without fatigue.

ACAMPSIA, Contractura.

ACANOS, Onopordium acanthium.

ACANTHA, Vertebral column. Also, Spinous process of a vertebra.

ACANTHAB'OLOS, *Acan'thulus*, *Volsel'la*, from *ακανθα*, 'a spine,' and *βαλλω*, 'I cast out.' A kind of forceps for removing extraneous substances from wounds.—Paulus of Ægina, Fabricius ab Acquapendente, Scultetus, &c.

ACANTHALZUCA, Echinops.

ACANTHE FAUSSE, Heracleum spondylium.

ACANTHIUM, Onopordium acanthium.

ACANTHULUS, Acanthabolos.

ACANTHUS MOLLIS, Same etymon as Acacia, (q. v.) *Melamphyl'lum*, *Bran'ca ursi'na*, *Brankur'sine*, *Bear's Breech*. (F.) *Pied d'ours*. This plant is mucilaginous like Althæa, and is used as a demulcent.

ACAPATLI, Piper longum.

ACAR'DIA, from *α* priv., and *καρδια*, 'the heart.' The state of a fœtus without a heart.

ACARDIOTROPHIA, Heart, atrophy of the.

ACARICOBA. The Brazilian name for the *Hydrocot'yle umbella'tum*, used by the Indians as an aromatic, alexipharmic, and emetic.

ACARON, Myrica gale.

AC'ARUS, from *α* privative, and *καρης*, 'divisible.' A minute insect, one species of which has been noticed by several observers, in the itch. The *Acarus Scabiei*, *Sarcopte*, *Ciron*.

Ac'arus Ciro, see Psora.

Acarus Folliculo'rum, *Entozo'on Folliculo'rum*. An articulated animalcule, discovered in the sebaceous substance of the cutaneous follicles.

Acarus Scabiei, see Psora.

ACATALEP'SIA, from *α* privative, and *καταλαμβανω*, 'I comprehend.' Uncertainty in diagnosis. Its opposite is Catalepsia.—Galen.

ACATAP'OSIS, from *α* privative, and *καταποσις*, 'deglutition.' Incapacity of swallowing. Vogel has given this name to difficulty in deglutition.

ACATASTAT'IC, *Acatastat'icus*, from *α* priv., and *καθιστημι*, 'to determine.' An epithet given to fevers, &c., when irregular in their periods or symptoms.—Hippocrates.

ACATHAR'SIA, from *α* priv., and *καθαιρίζω* 'I purge.' *Sordes*, *Impurities*. Omission of a purgative.—Foësius.

ACATSJAVAL'LI, a Malabar plant, which is astringent and aromatic. A bath of it is used in that country in cases of hemicrania. It is supposed to be the *Cassytha filiformis* of Linnæus.

ACAWERIA, Ophioxylum serpentinum.

ACCABLEMENT, Torpor.

ACCÉLÉRATEUR, Accelerator urinæ.

ACCELERA'TOR URI'NÆ, *Bulbo-caverno'sus*, *Bulbo-urétral*—(Ch.) *Ejacula'tor Semi'nis*, *Bulbo-syndesmo-caverneux*. (F.) *Accélérateur*, from *ad* and *celer*, 'quick.' A muscle of the penis, which arises, fleshy, from the sphincter ani and membranous part of the urethra, and tendinous from the crus and beginning of the corpus cavernosum penis. In its course it forms a thin, fleshy layer, the inferior fibres of which run more transversely than the superior, which descend in an oblique direction; the muscles of both sides completely enclosing the bulb of the urethra. It is inserted into its fellow by a tendinous line running longitudinally on the middle of the bulb. Its *use* is to propel the urine or semen forwards.

ACCENT, *Sonus vocis*, from *ad*, and *canere*, *cantum*, to sing. Inflection or modification of the voice, which consists in raising or dropping it on certain syllables.

The accent exhibits various alterations in disease.

ACCÈS, Paroxysm.

ACCES'SION. *Acces'sio*, from *acce'do*, (*ad* and *cedere*,) 'I approach.' The invasion, approach, or commencement of a disease.

ACCESSOIRE, Accessory,—*a. du long fléchisseur commun des orteils*: see Flexor longus digitorum pedis profundus perforans (accessorius)—*a. del'Obturateur interne*, Ischio-trochanterianus—*a. du pied d'Hippocampe*: see Cornu ammonis—*a. du Sacro-lombaire*: see Sacro-lumbalis.

ACCESSORIUS FLEXOR LONGUS DIGITORUM PEDIS; see Flexor longus digitorum pedis profundus perforans (accessorius)—a. Pedis hippocampi. See Cornu ammonis.

AC'CESSORY, *Accesso'rius*, (F.) *Accessoire*, *Annexe*, same etymon. A consequence or dependence on any thing; as *accessory ligament*, *muscle*, *nerve*, &c.

Accessory of the Parot'id is a name given by Haller to a small gland, which accompanies the parotid duct, and which is commonly a mere prolongation of the parotid itself.

Accessory Sciences to Medicine are those which do not relate directly to the science of man in a state of health or disease; as physics, chemistry, &c.

Accessory of the Par Vagum, Spinal nerve.

The term *accessory* is also given to several muscles.

ACCESSUS, Coition.

ACCIDENS, Symptoma—*a. Consecutifs*, Consecutive phenomena.

AC'CIDENT, *Ac'cidens*, from *accidere*, (*ad* and *cedere*,) 'to happen.' A casualty; an unforeseen event. The French use the term in nearly the same sense as *symptom*. It means also an unexpected symptom.

ACCIDEN"TAL. *adventi"tious*. That which happens unexpectedly.

The French give the name *Tissus accidentels* to those adventitious textures, that are the result of a morbid process.

ACCIP'ITER, *Hi'erax*, ἱέραξ, 'the hawk,' from *accipere* (*ad* and *capio*,) 'to take.' *Menec'ratis Accip'iter.* (F.) *Epervier.* A bandage applied over the nose, so called from its likeness to the claw of a hawk.

AC'CLI'MATED, *Clima'ti assue'tus*, from *ad* and *clima*, a word of recent introduction from the French, which means 'accustomed to a climate.'

ACCLIMATEMENT, Acclimation.

AC'CLIMATION, *Seas'oning.* (F.) *Acclimatement.* The act of becoming acclimated, or accustomed to a climate.

The constitution of a person, who goes to live in another and very different climate, usually experiences changes, which are frequently of an unfavourable character, and the study of which is of considerable importance in medicine.

ACCOM'PANIMENT, *Adjun'ctum.* (F.) *Accompagnement, (compagnon*, 'an associate.') That which is joined to any thing.

Accompaniment to the cataract is a whitish, viscid substance, which sometimes surrounds the opaque crystalline and remains after the operation for cataract, causing a secondary cataract.

ACCOUCHÉE, Puerpera.

ACCOUCHEMENT, Parturition—*a. Laborious*, Dystocia—*a. Contre nature*, see Presentation, preternatural—*a. Laborieux*, Laborious labour.

ACCOUCHEUR, (F.) *Adju'tor Partus, Obstet'ricans, Maieu'ter.* He who practises the art of midwifery. *A physician-Accoucheur, a Surgeon-Accoucheur, a Man-midwife*, &c.

ACCOUCHEUSE, Midwife.

ACCOUPLEMENT, Coition.

ACCOUTUMANCE, Habit.

ACCRE'TION, *Accre'tio*, from *ad*, 'to,' and *crescere*, 'to increase.' Augmentation; also, increase by juxta-position.

ACCROISSEMENT, Increase.

ACCUSATIO, Indication.

ACE'DIA. *Incu'ria*, from *α* privative, and *κηδος*, 'care.' Want of care, neglect. Also, fatigue.—Hippocrates.

ACELLA, Axilla.

ACEPH'ALOBRACHUS, from *α* privative, *κεφαλη*, 'head,' and *βραχιων*, 'arm.' A fœtus without head or arms.

ACEPH'ALOCHI'RUS, from *α* privative, *κεφαλη*, 'head,' and *χειρ*, 'hand.' A fœtus without head or hands.

ACEPH'ALOCYST, *Acephalocyst'is*, from *α* privative, *κεφαλη*, 'head,' and *κυστις*, 'bladder.' An hydatiform vesicle, without head or visible organs, ranked amongst the Entozoa, although possessed of few animated characteristics. In no organ of the body, are acephalocysts so frequently found as in the liver. Generally it is the 'multiple acephalocyst,' *A. socia'lis* seu *prolif'era*, which is met with. At times, however, it is the 'solitary acephalocyst,' *A. eremi'ta* seu *ster'ilis.*

The *acephalocystis endog''ena* has a firm coat, and is composed of different layers, which have numbers of smaller hydatids within them, and are thrown off from the interior of the parent cyst. This species has hence been termed *endogena*, to distinguish it from the *A. exog''ena* of ruminant animals, in which the young vesicles are developed from the exterior of the parent vesicle.—See Hydatid.

ACEPH'ALOGAS'TER, *Atho'racocephal'alus*, from *α* privative, *κεφαλη*, 'head,' and *γαστηρ*, 'the belly.' A name given to monsters devoid of head, chest, and abdomen; or to those which have an abdomen but no chest or head.

ACEPH'ALOS'TOMA, from *α* privative, *κεφαλη*, 'head,' and *στομα*, 'mouth.' An acephalous fœtus, at the upper part of which there is an opening resembling a mouth.

ACEPH'ALOTHO'RUS, from *α* privative, *κεφαλη*, 'head,' and *θωραξ*, 'chest,' *Apectocephalus.* A monster, devoid of head or chest.

ACEPH'ALOUS, from *α* priv., and *κεφαλη*, 'head.' A monster born devoid of head. The condition is called *Acepha'lia.*

ACER, Acrid.

ACER SACCHARI'NUM. *Maple, Sugar Maple*, (F.) *Érable.* This tree contains a large amount of sweet sap, whence a considerable quantity of sugar may be extracted. When purified, this sugar can scarcely be distinguished from that obtained from the cane.—See Saccharum.

ACERB', *Acer'bus, Stryphnos*, from *acer*, 'sharp.' A savour, or taste, compounded of the acid, bitter, and astringent; such as is met with in unripe fruits, &c.

ACER'CUS, from *α* privative, and *κερκος*, 'a tail.' A monster devoid of tail.—Gurlt.

ACE'RIDES, from *α* privative, and *κηρος*, 'wax.' Plasters devoid of wax.—Galen.

ACERO'SUS, *Achyro'des, Pithyri'nus*, from *αχυρον*, 'chaff.' *Furfura'ceous.* An epithet used, by Hippocrates, for the coarsest bread, made of flour not separated from the chaff—Foësius.

ACERVULUS CEREBRI. See Pineal Gland.

ACES'CENCY, *Acescen'tia*, from *aces'cere*, 'to grow sour,' (*αχις*, 'a point,' *acer*, 'sharp.') A disposition to acidity. The humourists believed that the animal humours are susceptible of this change.

ACESIS, Curation, Medicament.

ACESMA, Medicament.

ACESTOR, Physician.

ACESTORIS, Midwife.

ACESTOS, Curable.

ACESTRA, Needle.

ACETA MEDICATA, Acetica.

ACETABULA UTERINA. Cotyledons.

ACETAB'ULUM, from *ace'tum*, 'vinegar,' because it resembles the old vinegar vessel *oxybaphon*, ὀξυβαφον. A measure capable of containing the eighth part of a modern pint.—Athenæus. Galen. See Cotyloid. According to Castelli, the lobes or cotyledons of the placentæ of ruminating animals have been so called.

ACETABULUM, Cotyle, Cotyloid—*a. Marinum*, Umbilicus marinus.

ACETA'RIA, same etymon. A salad or pickle.

ACETAS, Acetate.

AC''ETATE, *Ace'tas.* A salt formed by the union of the acetic acid with an alkaline, earthy, or metallic base. The acetates, chiefly used in medicine, are the acetates of ammonia, lead, potash, and zinc.

ACE'TICA, *Ace'ta Medica'ta*, (F.) *Vinaigres Médicinaux.* Pharmaceutical preparations of Vinegar.

ACE'TICUM AC''IDUM, *Acidum Ace'ticum for'tius, A. A. fortē. A. Ace'ticum purum, Ace'tum radica'lē, Oxos, Ace'tic Acid, Strong Ace'tous Acid, Acidum Aceto'sum fortē, Rad'ical Vin'egar*

Spir'itus Ven'eris (when made from verdigris.) Spirit of Verdigris. Concentrated acetic acid, prepared by decomposing an acetate and receiving the acetic acid by distillation, has a very pungent and grateful odour, and an acid and acrid taste. Its s. g. is about 1·046, and it is very volatile.

It is stimulant, rubefacient, and escharotic, and is applied to the nostrils in syncope, asphyxia, headache, &c. It destroys warts.

An Aromatic Spirit of Vinegar, *Ac''idum Ace'ticum Camphora'tum, A. aceto'sum camphora'tum*, is formed of this *strong acid*, ℥vj, *Camphor* ℥ss, *Ol. Caryoph.* gtt. xv.

A strong Acetic Acid was ordered by the London pharmacopœia prepared from wood. It was called *Vinegar of wood, Improved distilled Vinegar, Pyrolig'neous Acid, Ace'tum Ligno'rum*, and its strength was such, that 87 gr. of crystallized subcarbonate of soda should saturate 100 grains of the acid.

Ac''idum Ace'ticum Dilu'tum, *A. a. ten'uĕ, Ace'tum destilla'tum, Acidum ace'ticum, Acidum aceto'sum destilla'tum, Acidum ace'ticum debil'ius, Distil'led vin'egar*, (F.) *Acide Acétique faible, Vinaigre distillé*, is prepared by distilling vinegar, until seven-eighths have passed over. An *Acidum aceticum dilutum, Diluted acetic acid* is made by mixing half a pint of the strong acetic acid with five pints of distilled water,—Ph. U. S. Its properties are like those of vinegar.

AC''ETONE, from *acetum*, 'vinegar.' *Pyroace'tic spirit, Pyro-acetic Ether, Mesit'ic Al'cohol, Bihydrate of Mesit'ylene;* erroneously called *Naphtha* and *Wood Naphtha*. A limpid, colourless liquid, having a peculiar penetrating and slightly empyreumatic odour. Its density in the liquid state is almost the same as that of alcohol, 0.7921. Its taste is disagreeable, and analogous to that of peppermint. It is miscible in all proportions with water, alcohol, and ether. It may be prepared by distilling a mixture of two parts of crystallized acetate of lead and one part of quicklime in a salt-glaze jar (gray-beard), the lower part of the jar being coated with fire-clay: and a bent glass tube, half an inch in diameter, adapted to the mouth by a cork, so as to form a distillatory apparatus. The jar is supported on the mouth of a small furnace, by which the lower part only is heated to redness, and the vapours are conducted into a Liebig's condenser. The product is repeatedly redistilled from quicklime, until its boiling point is constant at 132°.

It has been brought forward, of late, as a remedy in phthisis pulmonalis; but evidently with unfounded pretensions. It is an excitant, and may be serviceable in chronic bronchitis. The dose is ten to forty drops three times a day, diluted with water.

ACETOSA NOSTRAS, Rumex acetosa—a. Pratensis, Rumex acetosa—a. Romana, Rumex scutatus—a. Rotundifolia, Rumex scutatus—a. Vulgaris, Rumex acetosa.

ACETOSELLA, Oxalis acetosella.

ACE'TUM, ὄξος, *Oxys, Ace'tum Vini, Common Vinegar, Acidum aceto'sum, Al'egar, Ace'tum Cerevisiæ*, (F.) *Vinaigre;* from ἀκίς, 'a point,' *acer*, 'sharp.' A liquor obtained by the acetous fermentation. Vinegar has a pungent odour, and a pleasant acid taste. One fluid ounce of the acetum of the United States Pharmacopœia is saturated by about 35 grains of crystallized bicarbonate of soda. It is refrigerant in fevers; antiseptic, and anti-narcotic; and externally is stimulant and discutient.

Ace'tum Aromat'icum, *Acidum Ace'ticum Aromat'icum, Ace'tum Theriacalē, Thieves' Vinegar, Vinegar of the four Thieves, Marseilles Vinegar*, (F.) *Vinaigre Aromatique, V. des quatre voleurs, (Rorismarin cacum. sicc., Fol. Salviæ* sing. ℥j. *Lavand. flor. sicc.* ℥iv. *Caryoph. cont.* ℥ss. *Acid. Acet.* Oij. Macerate 7 days, and filter. Ph. E.) Odour pungent and aromatic. Used as a perfume.

Ace'tum Canthar'idis, *Vinegar of Cantharides, (Cantharid.* in pulv. ℥iij. *Acid. acet. f.* ℥v., *Acid. pyrolign.* f. ℥xv: *Euphorb.* in pulv. crass. ℥ss. Mix the acids; add the powders; macerate for seven days; strain, express strongly, and filter the liquor.—Ph. E. The London College macerates cantharid. ℥ij in acid. acet. Oj for eight days; expresses and strains.) It is used as a prompt vesicant.

Ace'tum Col'chici, *Vinegar of meadow saffron. (Colchic. rad. contus.* ℥ij; *Acet. destillat.* Oij; *Alcohol*, f. ℥j: Ph. U. S. It may also be made by displacement.) It is used as a diuretic, and also in gout. Dose f. ℥ss to ℥iss.

Acetum Destillatum: see Aceticum acidum—a. Lignorum: see Aceticum acidum—a. Mulsum dulce, Oxyglycus—a. Opii, Guttæ Nigræ—a. Radicale, Aceticum Acidum.

Ace'tum Scillæ, *Acidum Ace'ticum Scillit'icum. Vinegar of Squills, Vinaigre scillitique. (Scillæ* contus. ℥iv; *Acet. destillat.* Oij; *Alcohol* ℥j. Ph. U. S. It may also be made by displacement.) Diuretic, expectorant, and emetic. Dose f. ℥ss to ℥ij as a diuretic and expectorant.

Acetum Theriacale, Acetum aromaticum.

ACEYTE DE SAL. A remedy for bronchocele used in S. America. Roulin found it to contain a portion of iodine.

ACHACANA. A species of cactus, in the province of Potosi in Peru. Its root is thick and fleshy, and of a conical shape. It is a good edible, and is sold in the markets of the country.

ACHANACA. A plant of the kingdom of Mely in Africa. It is used by the natives as an antisyphilitic.

ACHAOVAN, a species of Egyptian chamomile.—Prosper Alpinus.

ACHAOVAN-ABIAT. The Egyptian name of the *cineraria maritima*, used in female diseases.

ACHAR, Atchar.

ACHE, Apium graveolens—*a. des Montagnes*, Ligusticum levisticum.

ACHEI'LIA, from *α* priv. and χεῖλος, 'lip.' A malformation, consisting in a deficiency of a lip or lips.

ACHEIR, *De'manus*, from *α* privative, and χεὶρ, hand. One devoid of hands.—Galen.

ACHEROIS, Populus.

ACHIA, *Achiar.* A name given in India to the pickled shoots of the bamboo.

Achia, Atchar.

ACHIAR, Achia.

ACHIC'OLUM, *Achit'olus, Hidrote'rion, Suda'rium, Fornix, Tholus, Sudato'rium.* The sweating-room in the ancient bagnios.

ACHILLE'A AGE'RATUM, *Balsamī'ta fœmin'ea. Eupato'rium mes'ues, Age'ratum, Cos'tus horto'rum minor, Maudlin, Maudlin Tansey.* (F.) *Achillée Visqueuse. Nat Ord.* Compositæ. *Sub. Ord.* Anthemideæ. *Sex. Syst.* Syngenesia Po-

lygamia superflua. Has the same properties as tansey, bitter and aromatic, and is used in like affections.

ACHILLE'A ATRA'TA, *Herba Gen'ipi veri*, (F.) *Achillée Noire*, has similar virtues.

ACHILLE'A MILLEFO'LIUM, *Achille'a Myriophyl'lon, Chrysoc'oma, Millefo'lium, Chiliophyl'lon, Lumbus Ven'eris, Milita'ris herba, Stratio'tes, Carpenta'ria, Spec'ulum Ven'eris, Common Yarrow* or *Milfoil*. (F.) *Millefeuille*. The leaves and flowers have an aromatic smell, and a rough, bitterish, somewhat pungent taste. They have been used in dyspepsia, flatulence, &c.

ACHILLE'A PTAR'MICA, *Pseudo py'rethrum, Py'rethrum sylves'trē, Draco sylves'tris, Tarchon sylves'tris, Sternutamento'ria, Dracun'culus Praten'sis, Sneeze-wort, Bastard Pellitory, Ptar'mica*. (F.) *Herbe à éternuer*. The roots and flowers have a hot, biting taste, approaching that of pyrethrum. Their principal use is as a masticatory and sialogogue.

ACHILLÉE NOIRE, Achillea atrata—*a. Visqueuse*, Achillea ageratum.

ACHILLE'IS, a beautiful species of barley, mentioned by Theophrastus and Galen, called after Achilles, a labourer. The decoction was used in fevers and jaundice.—Hippocrates.

ACHIL'LIS TENDO, *Funis* HIPPOC'RATIS, *Corda* HIPPOC'RATIS, *Corda magna, Nervus latus*, (F.) *Tendon d'Achille*. The strong tendon of the gastrocnemii muscles above the heel: so called, because it was the only vulnerable part of ACHILLES, or because of its strength. See Tendon.

ACHIMBASSI. An archiater or chief of physicians. A name given, at Grand Cairo, to a magistrate who licenses physicians.

ACHITOLUS, Achicolum.

ACHLYS, Caligo.

ACHMELLA, Spilanthus acmella.

ACHNĒ. Lint. See Linteum. Also, small mucous flocculi seen in front of the cornea.—Hippocrates.

A'CHOLUS, from *α* privative, and *χολη*, 'bile.' One deficient in bile.

ACHOR, Porrigo larvalis.

ACHO'RES. A term often employed by the ancients to designate both the *crusta lac'tea*, and small superficial ulcerations on the skin of the face and head. See Porrigo Larvalis.

ACHORES CAPITIS, Porrigo scutulata.

ACHORIS'TOS, from *α* priv., and *χωριζω*, 'I separate.' Any sign which necessarily accompanies a state of health or disease.

ACHOUROU. The Caraib name for a species of myrtle used in dropsy.

ACHRAS SAPOTA. *El Nispero*. A very abundant tree in South America, the fruit of which is excellent. It is astringent. The leaves are likewise astringent. The seeds are aperient and diuretic. It belongs to the family Sapoteæ. *Sex. Syst.* Hexandria Monogynia.

ACHROI, from *α* privative, and *χρωμα*, 'colour.' Pale individuals.—Hippocrates. It is nearly synonymous with *λευφαιμοι*, persons without colour, bloodless.

ACHROMAT'IC, *Achromat'icus;* same etymon. A lens so constructed as to correct the aberration of refrangibility of common lenses. The *Crystalline* is an achromatic lens.

ACHROMATOP'SIA, *Chromatopseudop'sia, Chromatometablep'sia, Colour blindness, Idiop'tcy, Dal'tonism*, from *α* privative, *χρωμα*, 'colour,' and *οπτομαι*, 'I see.' Incapability of distinguishing colours. A defect situate in the cerebral part of the visual organ. See Acyanoblepsia.

ACHYRODES. Acerosus.

ACHYRON, Furfur.

ACIA, from *αχις*, a point. A word used by Celsus, which has puzzled commentators; some believing it to have meant a needle; others the thread; and others, again, the kind of suture. "*Acia mollis, non nimis torta.*"—Celsus, Galen. (Chifflet thinks it meant the thread, Antwerp, 1638.)

ACID, ACETOUS, STRONG, Aceticum acidum—a. Aerial, Carbonic acid—a. Antimonious, Antimonium diaphoreticum—a. Arsenious, Arsenicum album—a. Azotic, Nitric acid—a. Benzoic, Benjamin, flowers of—a. Boric, Boracic acid—a. Calcareous, Carbonic acid—a. Carbonaceous, Carbonic acid—a. Carbonous, Oxalic acid—a. Cyanhydric, Hydrocyanic acid—a. Cyanohydric, Hydrocyanic acid—a. Gastric, Gastric juice.

ACID, GALLIC, *Ac''idum Gall'icum*. This acid is found in most of the astringent plants that contain tannic acid of the kind obtained from galls. It is in delicate silky needles, usually somewhat yellowish, inodorous, and of a harsh, somewhat astringent taste. It dissolves in one hundred parts of cold and three parts of boiling water. It is very soluble in alcohol, and but slightly so in ether.

It has been highly extolled in internal hemorrhage, especially from the urinary organs and uterus.

Its dose is from ten to twenty grains.

ACID, HIP'PURIC, *Ac''idum Hippu'ricum, Urobenz'oic acid*. An acid found in the urine of graminivorous animals. It is contained in human urine, especially after benzoic acid has been taken.

ACID, HYDRI'ODIC, *Ac''idum Hydriod'icum*. This acid is made by mixing solutions of iodide of potassium and tartaric acid; filtering the liquor to separate the bitartrate of potassa, and adding water to make the resulting hydriodic acid of definite strength.

It has been used in the same cases as the preparations of iodine in general, but is rarely employed.

ACID, HYDROCHLORONITRIC, Nitro-muriatic acid—a. Hydrocyanic, Hydrocyanic acid—a. Igasuric: see Jatropha curcas—a. of Lemons, Citric acid—a. Lithic, Uric acid—a. Dephlogisticated marine, Chlorine—a. Mephitic, Carbonic acid—a. of Milk, Lactic acid—a. Muriatic, see Muriaticum acidum—a. Nitric, see Nitric acid—a. Nitro-hydrochloric, Nitro muriatic acid.—a. Nitro-Muriatic, see Nitro-Muriatic Acid—a. Nitrous dephlogisticated, Nitric acid—a. Oxyseptonic, Nitric acid—a. Polygalic, see Polygala senega—a. Prussic, Hydrocyanic acid—a. Pyroligneous: see Aceticum acidum—a. Pyrolignic, Pyroligneous acid—a. of Sorrel, Oxalic acid—a. of Sugar, Oxalic acid—a. Sulphuric, see Sulphuric acid—a. Uric, Uric acid—a. Urobenzoic, a. Hippuric.

ACIDE ACÉTIQUE FAIBLE, see Aceticum acidum—*a. Sulphureux*, Sulphurous acid—*a. Sulfurique delayé*, Sulphuricum acidum dilutum.

AC''IDS, *Ac''ida, Aco'res*, from *αχις*, 'a point,' genitive *αχιδος*. Any liquid, solid or gaseous

body, possessed of a sour, more or less caustic taste, and the principal character of which is the capability of saturating, wholly or in part, the alkaline properties of bases.

Acids, in general, are refrigerant and antiseptic. Their particular uses are pointed out under the individual articles.

ACID'ITIES, *Aco'res*, *Acidita'tio*, *Ac''idum morbo'sum*, *Ac''idum prima'rum via'rum*, (F.) *Aigreurs*. Sourness of the stomach, the result of indigestion, indicated by acid eructations, &c. The affection is very common in children, and must be obviated by absorbents, as magnesia, chalk, &c., and by regulated diet.

To ACID'ULATE. To render acidulous, or slightly acid. (F.) *Aiguiser*, *Aciduler*.

ACID'ULOUS, *Acid'ulus*, *Oxo'des*. (F.) *Acidule*, *Aigre*, *Aigrelet*. Substances are called acidulous, which possess a sourish taste, as tamarinds, cream of tartar, &c.

Acidulous Fruits, Oranges, gooseberries, &c.

Acidulous Waters, *Aquæ acid'ulæ*. Mineral waters containing carbonic acid gas sufficient to render them sourish. See Waters, Mineral.

Simple Acidulous Water, *Aqua Ac''idi Carbon'ici*, (Ph. U. S.) *Aqua a'eris fixi*, *A'qua acid'ula simplex*. (F.) *Eau Acidule simple*, is water impregnated with fixed air.

Water, so impregnated, is cooling, and slightly stimulating. It is used beneficially in dyspepsia, and in cases of vomiting, &c.

ACIDUM ACETICUM, Aceticum acidum—a. Aceticum aromaticum, Acetum aromaticum—a. Aceticum camphoratum: see Aceticum acidum—a. Aceticum empyreumaticum, Pyroligneous acid—a. Aceticum Scilliticum, Acetum scillæ—a. Acetosellæ, Oxalic acid—a. Acetosum, Acetum—a. Allantoicum, Allantoic acid—a. Amnicum, Amniotic acid—a. Arsenicosum, Arsenious acid—a. Arseniosum, (Ph. U. S.) Arsenious acid—a. Azoticum, Nitric acid—a. Benzoicum, Benjamin, Flowers of—a. Boracicum, Boracic acid—a. Borussicum, Hydrocyanic acid—a. Carbonicum, Carbonic acid—a. Citricum, Citric acid—a. Gallicum, Acid Gallic—a. Hydriodicum, Acid hydriodic—a. Hydrocarbonicum, Oxalic acid—a. Hydrochloricum, Muriaticum acidum—a. Hydrocyanicum, Hydrocyanic acid—a. Hydrothionicum liquidum, see Hydrosulphuretted water—a. Jatrophicum, see Jatropha curcas—a. Lacticum, Lactic acid—a. Ligneum, Pyroligneous acid—a. Ligni pyro-oleosum, Pyroligneous acid—a. Lithicum, Uric acid—a. Marinum concentratum, Muriaticum acidum—a. Morbosum, Acidities—a. Muriaticum, Muriaticum acidum—a. Muriaticum nitroso-oxygenatum, Nitro-muriatic acid—a. Nitri, Nitric acid—a. Nitricum, Nitric acid—a. Nitro-Muriaticum, Nitro-muriatic acid—a. Oxalinum, Oxalic acid—a. Phosphoricum, Phosphoric acid—a. Primarum viarum, Acidities—a. Prussicum, Hydrocyanic acid—a. Pyro-aceticum, Pyroligneous acid—a. Quercitannicum, Tannin—a. Sacchari, Oxalic acid—a. Saccharinum, Oxalic acid—a. Salis, Muriaticum acidum—a. Salis culinaris, Muriaticum acidum—a. Salis marini, Muriaticum acidum—a. Septicum, Nitric acid—a. Succinicum, Succinic acid—a. Sulphuricum, Sulphuric acid—a. Sulphuricum alcoolisatum, Elixir acidum Halleri—a. Sulphuricum aromaticum, Sulphuric acid, aromatic—a. Sulphuricum dilutum, Sulphuric acid, diluted—a. Sulphuris volatile, Sulphurous acid—a. Sulphurosicum, Sulphurous acid—a. Tannicum, Tannin—a. Tartari essentiale, Tartaric acid—a. Tartaricum, Tartaric acid—a. Tartarosum, Tartaric acid—a. Uricum, Uric acid—a. Vitriolicum, Sulphuric acid—a. Vitriolicum aromaticum, Sulphuricum acidum aromaticum—a. Vitriolicum alcohole aromaticum, Sulphuricum acidum aromat.—a. Vitriolicum vinosum, Elixir acidum Halleri—a. Zooticum, Hydrocyanic acid—a. Zootinicum, Hydrocyanic acid.

ACIDURGIA, Surgery, (operative.)

ACIER, Chalybs.

ACIES, Chalybs—a. Digitorum manus, Phalanges of the fingers—a. Diurna, Hemeralopia.

ACIESIS, Sterilitas.

ACINE'SIA, *Acine'sis*, *Akine'sia*, *Immobil'itas*, *Quies*, *Esych'ia*, *Erem'ia*, from *α* privative, and *κινησις*, 'motion' (*κινεω*, 'I move.') Immobility. Also, the interval between the systole and diastole of the heart.

Under the term *Acineses*, Remberg includes the paralytic neuroses,—or those that are characterized by defect of motive power.

ACINI OF MALPIGHI, Corpora Malpighiana.

ACINIFORMIS, (TUNICA.) Choroid, Urea.

AC''INUS, *Ac''inus glandulo'sus*, from *ac''inus*, 'a grape-stone.' A *glandiform corpuscle* or *granulation*. A fancied termination of a secretory artery of a gland in a granular body, in which the secretion is supposed to take place, and the excretory radicle to take its rise. Acini are the *glob'uli arteria'rum ter'mini* of Nichols. The term *acini glandulosi* has also been given to glands, which, like the pancreas, are arranged as it were in clusters. See Lobule.

ACLEITROCARDIA, Cyanopathy.

ACMAS'TICOS, from *ακμη*, 'the top,' and *στημι*, 'I remain.' A fever which preserves an equal degree of intensity throughout its course. It is also called *Homot'onos*. The Greeks gave it the name of *Epacmas'ticos*, and *Syn'ochos*, when it went on increasing,—and *Paracmas'ticos*, when it decreased.—Galen.

ACMĒ, *Vigor*, *Status*, *Fastig''ium*. The period of a disease at which the symptoms are most violent. *Αρχη*, is 'the commencement;' *αναβασις*, 'the period of increase;' and *ακμη*, 'the height.'

ACMON, Incus.

ACNĒ, *Acna*, *Ion'thus varus*, *Varus*, *Psydra'cia Acne*, *Stone Pock*, *Whelk*, *Bubucle*. (F.) *Dartre pustuleuse disseminée*. A small pimple or tubercle on the face.—Gorræus. Foësius thinks the word ought to be *Acme*, and, according to Cassius, it is, at all events, derived from *ακμη*, 'vigour;' the disease affecting those in the vigour of life, especially.

Willan and Bateman have adopted the term in their Nosology of cutaneous diseases, and placed it in the Order, Tubercula. Acne, with them, is an eruption of distinct, hard, inflamed tubercles, sometimes continuing for a considerable length of time, and sometimes suppurating slowly and partially. They usually appear on the forehead, temples, and chin; and are common to both sexes; but the most severe forms are seen in young men. They require but little management, and consist of four varieties; *Acne indura'ta*, *A. simplex*, *A puncta'ta* (*Ion'thus varus puncta'tus*, *Punctæ muco'sæ*, *Comedones* or *Maggot Pimple*,) and *A. rosa'cea*.—See Gutta Rosea.

Acne Rosacea, Gutta rosea.

ACNES'TIS, from *α* privative, and *κναειν*, 'to scratch.' The part of the spine which extends, in quadrupeds, from between the shoulders to the loins. According to Pollux, the middle of the loins.

ACNESTOS, Cneorum tricoccum.

ACŒ'LIOS, from *α* privative, and *κοιλια*, 'belly.' Devoid of belly. One who is so emaciated as to appear to have no belly.—Galen.

ACOESIS, Audition.

ACOLASIA, Intemperance.

ACOLOGY, Materia Medica.

ACONE, Mortar.

ACONIT à GRANDS FLEURS, Aconitum cammarum—*a. Salutaire*, Aconitum anthora.

ACONITE, Aconitum.

ACONITIA, See Aconitum napellus.

ACONITINE, see Aconitum napellus.

ACONI'TUM, from *Ac'onē*, a place in Bithynia, where it is common. *Cynoc'tonon*, *Canici'da*, *Ac'onite*, *Wolfsbane*, *Monkshood*. *Nat. Ord.* Ranunculaceæ. *Sex. Syst.* Polyandria Trigynia.

Aconitum, Aconite, in the Pharmacopœia of the United States is the leaves of Aconitum Napellus, and of A. paniculatum.

Aconi'tum An'thora. *Aconi'tum Salutif'erum*, *An'thora vulga'ris*, *Antith'ora*, *Sal'utary Monks'hood*. (F.) *Aconit salutaire*. The root of this variety, like all the rest, is poisonous. It is used as a cathartic and anthelmintic. Dose ℈ss to ℈j.

Aconi'tum Cam'marum. *A. panicula'tum* (F.) *Aconit à grands fleurs*, resembles Aconitum Napellus in properties.

Aconi'tum Napel'lus, *Napel'lus verus*, *Aconi'tum*, *Common Monkshood* or *Wolfsbane*, *A. Neomonta'num*. (F.) *Chaperon de Moine*. The leaves are narcotic, sudorific, and deobstruent (?) They have been used in chronic rheumatism, scrofula, scirrhus, paralysis, amaurosis, &c. The active principle is called *Aconit'ia* or *Aconitine*. It has been used of late, applied externally, in neuralgic cases, iatraleptically and endermically. Dose of the Aconitum, gr. j. to gr. iij.

ACONU'SI, from *ακοη*, 'audition,' and *νουσος*, 'disease.' *Morbi au'rium et audi'tûs*. Diseases of the ears and audition.

AC'OPIS. Same etymon as the next. Pliny gives this name to a precious stone, which was boiled in oil and used against weariness.

AC'OPON, from *α* privative, and *κοπος*, 'weariness.' A remedy against weariness.—Foësius, Gorræus, &c. *Acopum*,—Celsus, Pliny. See Anagyris.

ACOR BENZOINUS, Benjamin—a. Boracicus, Boracic acid—a. Succineus, Succinic acid—a. Sulphuris, Sulphuric acid—a. Tartaricus, Tartaric acid.

ACORE BÂTARD, Iris pseudacorus—*a. Faux*, Iris pseudacorus—*a. Odorant*, Acorus calamus.

ACORES, Acids, and Acidities.

ACOR'IA, from *α* privative, and *κορεω*, 'I satiate.' An inordinate or canine appetite.—Hippocrates.

ACORI'TES. A wine made of Acorus—Dioscorides.

ACOR'MUS, from *α* 'privative,' and *κορμος*, 'trunk.' A monster devoid of a trunk.

ACORN, JUPITER'S, Fagus castanea—a. Oily, Guilandina moringa—a. Sardinian, Fagus castanea.

ACORNS. See Quercus alba.

ACORUS ADULTERINUS, Iris pseudacorus.

Ac'orus Cal'amus. *A. Verus*, *Cal'amus Aromat'icus*, *C. Odora'tus*, *Cal'amus vulga'ris*, *Typha Aromat'ica*, *Acorus Brazilien'sis*, *Clava Ru'gosa*, *Sweetflag* or *Ac'orus*, *Flagroot*, *Sweet cane*, *Myrtle Flag*, *Sweet grass*, *Sweet root*, *Sweet rush*. (F.) *Jonc Roseau* ou *Canne aromatique*, *Acore odorant*. *Nat. Ord.* Aroidæ; Acoraceæ (Lindley.) *Sex. Syst.* Hexandria Monogynia. The rhizoma—*Cal'amus* (Ph. U. S.)—is a stomachic and carminative, but is rarely used. It is regarded a good adjuvant to bark and quinia in intermittents.

Ac'orus Palustris, Iris pseudacorus—a. Vulgaris, Iris pseudacorus.

ACOS, Medicament.

ACOS'MIA, from *α*, 'privative,' and *κοσμος*, 'order, ornament.' Disorder, irregularity in the critical days, according to Galen, who uses the word *κοσμος* for regularity in those days. Others, and particularly Pollux, call bald persons *ακοσμοι*, because they are deprived of one of their most beautiful ornaments.

ACOUM'ETER, *Acouom'eter*, from *ακουω*, "I hear,' and *μετρον*, 'measure.' An instrument designed by Itard for measuring the degree of hearing.

ACOUOPHO'NIA, *Copho'nia*; from *ακουω*, 'I hear,' and *φωνη*, 'voice,' "*Auscultatory Percussion*." A mode of auscultation, in which the observer places his ear on the chest, and analyzes the sound produced by percussion.—Donné.

ACOUS'MA, an imaginary noise. Depraved sense of hearing.

ACOUS'TIC, *Acus'ticus*, that which belongs to the ear; as *Acoustic nerve*, *Acoustic trumpet*, &c.

Acoustic Medicine is one used in diseased audition.

Acous'tics, *Acus'tica*, (F.) *Acoustique*. The part of physics which treats of the theory of sounds. It is also called *Phonics*.

ACOUSTIQUE, Acoustics.

ACQUA BINELLI, Aqua Binellii—a. di Napoli, Liquor arsenicalis—a. della Toffana, Liquor arsenicalis.

ACQUETTA, Liquor arsenicalis.

ACQUI, MINERAL WATERS OF. These thermal sulphureous springs are in Piémont. Their temperature is 167° Fahr.; and they contain sulphohydric acid, and chloride of sodium.

ACQUIRED DISEASES, *Morbi acquisi'ti*, *Adventitious diseases*, *M. Adventi'tii*. (F.) *Maladies acquises*. Diseases which occur after birth, and which are not dependent upon hereditary predisposition.

ACRAI'PALA, from *α* 'privative,' and *κραιπαλη*, 'drunkenness.' Remedies against the effects of a debauch.—Gorræus.

ACRA'LEA, from *ακρος*, 'extremity.' The extreme parts of the body, as the head, hands, feet, nose, ears, &c.—Hippocrates and Galen. See Acrea.

ACRA'NIA, from *α* privative, and *κρανιον*, 'the cranium.' Want of cranium, wholly, or in part.

ACRAS SAPOTA, Sapota.

ACRA'SIA, from *α* privative, or 'bad,' and *κρασις*, 'mixture.' Intemperance. Excess of any kind.—Hippocrates.

It has been employed to denote debility, synonymously with *Acratia*; but this may have been a typographical inaccuracy.

ACRATI'A, from *α* privative, and *κρατος*, 'strength.' Impotence; weakness.

ACRATIS'MA, from *α* privative, and *κιρναω*, 'to mix.' A breakfast, consisting of bread steeped in wine, not mixed with water.—Galen, Athenæus.

ACRATOM'ELI, from *ακρατον*, 'pure wine,' and *μελι*, 'honey.' Wine mixed with honey.

ACRATURE'SIS, from *Acratia*, 'weakness,' and *ουρον*, 'urine.' Inability to void the urine from paralysis of the bladder.

ACRĒ. The extremity or tip of the nose.

A'CREA, *Acrote'ria*, from *ακρος*, 'the summit.' The extreme parts of the body, as the feet, hands, nose, ears, &c.

Also the extreme parts of animals that are used as food. *Acroco'lia.*

ACRID, from *ακρος*, 'a point or summit,' or from *ακις*, 'a point,' *Acer.* An epithet for substances which occasion a disagreeable sense of irritation or of constriction at the top of the throat.

Acrid heat, (F.) *Chaleur âcre*, is one that causes a hot tingling sensation at the extremities of the fingers.

ACRIDS, in Pathology, are certain imaginary substances, supposed, by the humourists, to exist in the humours, and to cause various diseases. See Acrimony.

ACRIDOPH'AGI, from *ακρις*, 'a locust,' and *φαγω*, 'I eat.' *Locust-eaters.* Acridophagous tribes are said to exist in Africa.—Strabo.

AC'RIMONY, *Acri'tas*, *Acrimo'nia*, from *acer*, 'acrid,' *ακις*, 'a point.' Acrimony of the humours. An imaginary acrid change of the blood, lymph, &c., which, by the humourists, was conceived to cause many diseases.

ACRIN'IA, from *α* privative, and *κρινω*, 'I separate.' A diminution in the quantity, or a total suspension, of the secretions.

ACRIS, a sharp bony prominence. Also the locust.

ACRIS'IA, from *α* privative, and *κρισις*, 'judgment.' A condition of disease, in which no judgment can be formed; or in which an unfavourable opinion must be given.—Hipp. and Galen.

ACRIT'ICAL, *Ac'ritos*, from *α* privative, and *κρισις*, 'judgment.' That which takes place without any crisis, or which does not foretell a crisis; as a *critical symptom*, *obscess*, &c.

ACRITOS, Acritical.

ACRIVIOLA, Tropæolum majus.

ACROBYS'TIA, *Acropos'thia*, from *ακρος*, 'top,' and *βυω*, 'I cover.' The extremity of the prepuce.—Hippocrates. Rufus.

ACROCHEIR', *Acrochir'*, *Acrocheir'on*, from *ακρος*, 'extremity,' and *χειρ*, 'the hand.' The fore arm and hand.—Gorræus. Also, the hand.

ACHROCHOR'DON, from *ακρις*, 'extremity,' and *χορδη*, 'a string.' A tumour, which hangs by a pedicle. A kind of hard wart.—Aëtius, Celsus.

ACHROCHORIS'MUS, from *ακρος*, 'extremity,' and *χορευω*, 'I dance.' A kind of dance, with the ancients, in which the arms and legs were violently agitated.

ACROCOLIA, Acrea.

ACROD'RYA, from *ακρος*, 'extremity,' and *δρυς*, 'a tree.' Autumnal fruits, as nuts, apples, &c.

ACRODYN'IA, *Erythe'ma acrod'ynum*, *E. acrodyn'ia.* (F.) *Acrodynie*, from *ακρος*, 'extremity,' and *οδυνη*, 'pain.' A painful affection of the wrists and ankles especially, which appeared at Paris as an epidemic, in 1828 and 1829. It was supposed by some to be rheumatic, by others to be owing to spinal irritation.

ACROLENION, Olecranon.

ACRO'MIAL, *Acromia'lis.* Relating to the Acromion. (q. v.)

ACROMIAL ARTERY, *External Scap'ular*, *A. Arte'ria Thorac'ica humera'lis*, *Artère troisième des Thoraciques*,—(Ch.) *A. Thoracique humérale*, arises from the anterior part of the axillary artery, opposite the upper edge of the pectoralis minor. It divides into two branches: one, *superior;* the other, *inferior:* the branches of which are distributed to the subclavius, serratus major anticus, first intercostal, deltoid, and pectoralis major muscles, as well as to the shoulder joint, &c. They anastomose with the superior scapular, thoracics, and the circumflex arteries.

ACROMIAL VEIN. Has the same arrangement as the artery.

ACRO'MIO-CORACOIDEUS. Belonging to the acromion and coracoid process.

The triangular ligament between the acromion and coracoid process of the scapula is so called.

ACRO'MION, *Acro'mium*, from *ακρος*, 'the top,' and *ωμος*, 'the shoulder,' *Os Acro'mii*, *Hu'merus summus*, *Armus summus*, *Mucro-hu'meri*, *Rostrum porci'num*, *Caput Scap'ulæ.* The process which terminates the spine of the scapula, and is articulated with the clavicle.

ACROM'PHALON, *Acrompha'lion*, from *ακρος*, 'the top,' and *ομφαλος*, 'the navel.' The extremity of the umbilical cord, which remains attached to the fœtus after birth.

ACROPOSTHIA, Acrobystia.

ACROPSI'LON, from *ακρος*, 'extremity,' and *ψιλος*, 'naked.' The extremity of the glans penis.

ACROS, *ακρος*, 'extremity, top.' The strength of the Athletæ, and of diseases: the prominences of bones: the extremities of the fingers, &c. See Acrocheir, Acromion, &c.

ACROTERIA, Acrea.

ACROTERIAS'MUS, from *ακρωτηρια*, 'the extremities;' hence *ακρωτηριαζειν*, 'to mutilate.' Amputation of the extremities.

ACROTHYM'ION, from *ακρος*, 'top,' and *θυμον*, 'thyme.' A kind of conical, rugous, bloody wart, compared by Celsus to the flower of thyme.

ACROT'ICA, from *ακρος*, 'summit.' Diseases affecting the excernent functions of the external surface of the body.

Pravity of the fluids or emunctories that open on the external surface; without fever or other internal affection as a necessary accompaniment.

The 3d order of the class *Eccrit'ica* of Good.

ACROTISMUS, Asphyxia.

ACT, *Actus*, from *actum*, past participle of *agere*, 'to do,' 'a thing done.' The effective exercise of a power or faculty. The action of an agent. *Acte* is used by the French, to signify the public discussion, which occurs in supporting a thesis:—thus, *soutenir un Acte aux Écoles de Médecine*, is, 'to defend a Thesis in the Schools of Medicine.'

ACTÆ'A RACEMO'SA, *Cimicif'uga*, (Ph.

U. S.) *C. racemo'sa Macro'trys racemo'sa. Bot'rophis Serpenta'ria* (?) *Serpenta'ria nigra, Black snakeroot, Richweed, Cohosh, Squaw root, Rattleweed, Black Cohosh.* (F.) *Actée à grappes. Serpentaire noire. Nat. Ord.* Ranunculaceæ. *Sex. Syst.* Polyandria Pentagynia. A common plant in the United States. The root is astringent; and, according to Barton, has been successfully used in the form of decoction, as a gargle in putrid sore throat. A decoction of the root cures the itch. It is acronarcotic, and has been used in rheumatism, acute and chronic; chorea, &c.

Actæ'a Spica'ta, *Baneberry, Herb Chris'topher.* A perennial herbaceous European plant, the root of which resembles that of the black hellebore. The root is cathartic, and sometimes emetic, and in overdoses may produce dangerous consequences.

Actæa Americana, of which there are two varieties, *A. alba* and *A. rubra,—white and red cohosh*, is indigenous in the United States. It has the same properties as A. spicata.

ACTE, Sambucus.

ACTE, Act.

ACTÉE à GRAPPES, Actæa racemosa.

ACTIF, Active.

ACTION, *Actio, Opera'tio, Energi'a, Praxis*: from *agere, actum*, 'to act.' Mode in which one object influences another.

The *animal actions* are those that occur in the animal body: the *vital*, those that are seen in bodies endowed with life: the *physiological*, those of a healthy character: the *pathological*, or *morbific*, those that occur in disease, &c. The ancients divided the *physiological actions* into *vital, animal, natural, sexual, particular, general*, &c. See Function.

ACTIVE, same etymon. *Dras'ticus, Acti'vus, Sthen'icus, Hypersthen'icus.* (F.) *Actif.* This adjective is used, in *Pathology*, to convey the idea of superabundant energy or strength. *Active symptoms, e. g.* are those of excitement. In *Therapeutics*, it signifies *energetic*:—as, an *active treatment*. The French use the expression *Médecine agissante*, in contradistinction to *Médecine expectante*. In Physiology, *active* has a similar signification, many of the functions being divided into active and passive.

ACTON. A village near London, at which there is a purgative mineral spring, like that at Epsom.

AC'TUAL. Same etymon as *active*. That which acts immediately. A term usually restricted to the red hot iron, or to heat in any form; in contradistinction to the *potential* or *virtual*, which is applied to caustics or escharotics.

ACTUA'RIUS. Originally a title of dignity given to the Byzantine physicians.

ACUITAS, Acrimony.

ACULEUS LIGNEUS, Splinter.

A'CUPUNCTURE, *Acupunctu'ra*, from *acus*, 'a needle,' and *punctu'ra*, 'a puncture.' A surgical operation, much in use amongst the Chinese and Japanese, which consists in puncturing parts with a very fine needle. It has been employed, of late years, in obstinate rheumatic affections, &c., and apparently with success. Acupuncture is likewise a mode of infanticide in some countries; the needle being forced into the brain through the fontanelles, or into the spinal marrow, &c.

ACURGIA, Surgery (operative.)

ACUS, Needle—a. Capitata, Pin—a. Invaginata. See Needle—a. Ophthalmica. See Needle—a. Paracentica, Trocar—a. Triquetra vulgaris, Trocar—a. Veneris, Eryngium campestre.

ACUSIS, Audition.

ACUSTICA, Acoustics.

ACUTE, *Acu'tus*, οξυς, (*axις*, 'a point.') (F.) *Aigu.* A disease which, with a certain degree of severity, has a rapid progress, and short duration. *Oxynose'ma, Oxyn'osos, Oxynu'sos.*

Diseases were formerly subdivided into *Morbi acutis'simi*, very acute, or those which last only three or four days: *M. subacutis'simi*, which continue seven days: and *M. subacu'ti*, or those which last from twenty to forty days.

The antithesis to *acute* is chronic. *Acute*, when applied to pain, sound, cries, &c., means *sharp.*

ACUTENACULUM, *Porte-aiguille.*

ACYANOBLEP'SIA, from *a* privative, κυανος, 'blue,' and βλεπω, 'I see.' Defective vision, which consists in incapability of distinguishing blue.—Göthe.

ACYESIS, Sterilitas.

ACYRUS, Arnica montana.

ADACA. The *Sphæran'thus In'dicus*, a Malabar plant, which is acrid and aromatic.

ADÆMONIA, Anxiety.

ADAKO'DIEN. A Malabar plant of the family Apocyneæ, used in that country in diseases of the eyes.

AD'ALI, *Lip'pia.* A Malabar plant, which the Orientals regard as an antidote to the bite of the *naja*.

ADAMAS, Diamant.

ADAMI'TA, *Adami'tum.* A very hard, white calculus.—Paracelsus.

The first word has been used for stone in the bladder: the second for lithiasis or the calculous condition.

ADAM'S APPLE, Pomum Adami.

ADANSONIA DIGITATA, Baobab.

ADAR'CE, *Adar'cion, Adar'cis.* A concretion found about the reeds and grass in the marshy regions of Galatia, and hiding them, as it were: hence the name, from *a* privative, and δερκω, 'I see.' It was formerly in repute for cleansing the skin from freckles, &c.

ADARIGO, Orpiment.

ADARNECH, Orpiment.

ADARTICULATIO, Arthrodia.

ADDAD. A Numidian plant. Bitter and poisonous.

ADDEPHAG'IA, *Adephag''ia*, from αδδην, 'much,' and φαγειν, 'to eat.' *Voraciousness.* Galen and Hoffman have given this name to voracious appetite in children affected with worms. Sauvages refers it to Bulimia. Also, the goddess of gluttony.

ADDER'S TONGUE. Ophioglossum vulgatum.

ADDITAMEN'TUM. A term once used synonymously with *Epiphysis*, q. v. It is now restricted to the prolongations of two cranial sutures, the lambdoidal and squamous.

Additamentum Coli. Appendix vermiformis cæci—a. Necatum, Olecranon—a. ad Sacrolumbalem, see Sacro-lumbalis—a. Uncatum ulnæ, Olecranon—a. Ulnæ, Radius.

ADDUCENS OCULI, Rectus internus oculi.

ADDUCTEUR DE L'ŒIL, Rectus internus

oculi—*a. du gros orteil*, Adductor pollicis pedis—*a. Premier* ou *moyen*, Adductor longus femoris—*a. du pouce*, Adductor pollicis manûs—*a. Second* ou *petit*, Adductor brevis—*a. Troisième* ou *grand*, Adductor magnus.

ADDUCTION, *Adduc'tio*, from *ad*, 'to,' and *ducere*, 'to draw.' *Paragō'gē*. The action by which parts are drawn towards the axis of the body.

The muscles which execute this function are called *Adduc'tors*.

ADDUCTOR MEDII DIGITI PEDIS, Posterior medii digiti pedis—a. Oculi, Rectus internus oculi.

ADDUC'TOR METACAR'PI MIN'IMI DIG''ITI, *Metacar'peus*, *Car'po-metacar'peus min'imi dig''iti*, is situate between the abductor and flexor, next to the metacarpal bone. It arises, fleshy, from the unciform process of the os unciforme, and from the contiguous part of the annular ligament of the wrist, and is inserted, tendinous and fleshy, into the fore-part of the metacarpal bone of the little finger, from its base to its head

ADDUC'TOR POL'LICIS MANŪS, *A. Pol'licis*, *A. ad min'imum dig''itum*, *Metacar'po-phalangæ'us pol'licis*—(Ch.) (F.) *Adducteur du pouce*. A muscle which arises, fleshy, from almost the whole length of the metacarpal bone of the middle finger, and is inserted into the inner part of the root of the first bone of the thumb.

ADDUC'TOR POL'LICIS PEDIS, *Antith'enar*, *Metatarso-subphalangæus pollicis*—(Ch.) *Tarso-metatarsi phalangien du pouce*. (F.) *Adducteur du gros orteil*, arises by a long, thin tendon, from the under part of the os calcis, from the os cuboides, os cuneiforme externum, and from the root of the metatarsal bone of the second toe. It is divided into two fleshy portions, and is inserted into the external sesamoid bone, and root of the metatarsal bone of the great toe.

Bichat has given the general name, *Adduc'tors*, to those of the interosseous muscles of the hand or foot, which perform the action of adduction.

ADDUCTOR TERTII DIGITI PEDIS, Prior tertii digiti pedis.

ADDUCTORS OF THE THIGH. These are three in number, which have, by some anatomists, been united into one muscle—the *Triceps Adduc'tor Fem'oris*.

1. *Adduc'tor longus fem'oris*, *Adduc'tor fem'oris primus*, *Triceps minor*, *Pu'bio-femora'lis*.—(Ch.) (F.) *Premier* ou *moyen adducteur*. Arises by a strong tendon from the upper and fore part of the os pubis and ligament of the symphysis, at the inner side of the pectinalis. It runs downwards and outwards, and is inserted by a broad, flat tendon, into the middle of the linea aspera.

2. *Adduc'tor brevis*, *A. fem'oris secun'dus*, *Triceps secun'dus*, *Sub-pubio-femora'lis*.—(Ch.) (F.) *Second* ou *petit Adducteur*. Arises tendinous from the os pubis, at the side of its symphysis, below and behind the last muscle. It runs obliquely outwards, and is inserted by a short, flat tendon into the inner and upper part of the linea aspera, from a little below the trochanter minor to the beginning of the insertion of the adductor longus.

3. *Adduc'tor magnus*, *Adduc'tor fem'oris ter'tius et quartus*, *Triceps magnus*, *Is'chio-femora'lis*—(Ch.) (F.) *Troisième* ou *grand adducteur*, is much larger than either of the others. It arises from the ramus of the pubis, from that of the ischium, and from the tuber ischii, and is inserted into the whole length of the linea aspera. Near the lower part of the linea aspera it is pierced by a kind of oblique, fibrous canal, through which the crural artery and vein pass.

ADEC. The inner man.—Paracelsus.

ADECTA, Sedatives.

ADELIPARIA, Polysarcia.

ADELODAGAM. A bitter Malabar plant, used in asthma, catarrh, and gout.

ADELPHIA. see Adelphixia.

ADELPHIX'IA, *Adelphix'is;* from ἀδελφος, 'brother.' Consanguinity of parts in health or disease. *Frater'nitas*, *Fratra'tio*. Hippocrates used the epithet *Adel'phia*, for diseases that resemble each other

ADELPHIXIS, Sympathy.

ADEN, ἀδην, 'a gland;' hence *Adenalgia*, *Adeniform*, &c.—See Gland.

ADENAL'GIA, from ἀδην, 'a gland,' and ἀλγος, 'pain.' Glandular pain.

ADENEMPHRAX'IS, from ἀδην, 'a gland,' and ἐμφραξις, 'obstruction.' Glandular obstruction.

ADEN'IFORM, *Adeniform'is*, *Adenoï'des*, ἀδενοειδης, from *Aden*, 'a gland,' and *Forma*, 'form or resemblance.' *Glan'diform*, or resembling a gland.

ADENI'TIS, from ἀδην, 'a gland,' and *itis*, a termination denoting inflammation. Glandular inflammation.

ADENI'TIS MESENTER'ICA, *Mesenter'ic Ganglioni'tis*. Inflammation of the mesenteric glands.

ADENOCHIRAPSOLOG''IA, from ἀδην, 'a gland,' χειρ, 'the hand,' απτω, 'I lay hold of,' and λογος, 'a description.' The doctrine of curing scrofula or the king's evil by the royal touch.

ADENOG'RAPHY, *Adenogra'phia*, from ἀδην, 'a gland,' and γραφω, 'I describe.' That part of anatomy which describes the glands.

ADENOIDES, Adeniform.

ADENOL'OGY, *Adenolog''ia*, from ἀδην, 'a gland,' and λογος, 'a description.' A treatise on the glands.

ADE'NO-PHARYNGEUS, from ἀδην, 'a gland,' and φαρυγξ, 'the pharynx.' Some fleshy fibres, which pass from the constrictor pharyngis inferior to the thyroid gland, have received this name. Their existence is not constant.

ADE'NO-PHARYNGI'TIS. Same etymon. Inflammation of the tonsils and pharynx.

ADENOPHTHALMIA, Ophthalmia tarsi.

ADENOPHY'MA, *Adenon'cus;* from ἀδην, 'a gland,' and φυμα, 'a swelling.' Swelling of a gland, or glandiform ganglion. (F.) *Glandage*. *Adenophyma* is used by some to signify a soft glandular swelling;—*Adenoncus*, one of a harder character.—Kraus.

ADENOPHYMA INGUINALIS. Bubo.

ADENOSIS SCROPHULOSA, Scrofula.

ADENO'SUS, (*Absces'sus.*) A hard, glandular abscess, which suppurates slowly.—M. A. Severinus.

ADENOT'OMY, *Adenotom'ia*, from ἀδην, 'a gland,' and τεμνω, 'I cut.' Dissection of the glands.

ADEPHAGIA, Addephagia, Boulimia.

ADEPS, *Adeps Suilla*, *Oxyn'gium*, ὀξυγγιον, *Pingue'do*. Pig's flare. The fat of the hog. In the Ph. U. S. the prepared fat of *Sus scrofa*, free from saline matter.

Adeps Anseri'na, *A'deps an'seris* or *Goose grease*, (F.) *Graisse d'Oie*, is also emollient. It has been used as an emetic.

Adeps Cantharidibus Medicatus, Unguentum lyttæ medicatum—a. Cortice Daphnes gnidii medicatus, Unguentum epispasticum de Daphne gnidio—a. Humanus, Liquamumia—a. Hydrargyro medicatus, Unguentum Hydrargyri—a. ex Hydrargyro mitius dictum cinereum, Unguentum oxidi hydrargyri cinereum—a. Hydrargyri muriate oxygenato medicatus, Unguentum muriatis hydrargyri oxygenati medicatum—a. Hydrargyri nitrate medicatus, Unguentum hydrargyri nitratis—a. Hydrargyri oxido rubro et plumbi acetate medicatus, Unguentum ophthalmicum—a. Lauro medicatus, Unguentum laurinum—a. Ovilli, Sevum—a. Papavere, hyoscyamo, et belladonnâ medicatus, Unguentum populeum—a. Sulfure et ammoniæ muriate medicatus, Unguentum sulphuratum ad scabiem—a. Sulfure et carbonate potassæ medicatus, Unguentum sulphuratum alcalinum ad scabiem—a. Tartaro stibii medicatus, Unguentum antimonii tartarizati—a. Oxido zinci medicatus, Unguentum oxidi zinci impuri.

Adeps Præpara'ta, *Hog's lard*, *Barrow's grease*, *Lard*, *Ax'unge*, *Axun'gia*, *Adeps suil'la præpara'ta*, *A. præpara'ta*, *Axun'gia porci'na*, (F.) *Graisse de Porc*, *Saindoux*, is prepared by melting pig's flare, and straining it. This is called *rendering* the lard. Lard is emollient, but is chiefly used for forming ointments and plasters.

ADEPT, Alchymist.

ADEP'TA MEDICI'NA. Medicine, which treated of diseases contracted by celestial operations, or communicated from heaven.

Adepta Philosophia, Alchymy.

ADFLATUS, Afflatus.

ADHÆRENSIA, Adherence.

ADHÆSIO, Adherence.

ADHATO'DA, *Justic'ia adhato'da*. The *Malabar Nut Tree*. (F.) *Noyer de Ceylon*. Used in India for expelling the dead fœtus in abortion. The word is said to convey this meaning in the Ceylonese.

ADHE'RENCE, *Adhe'sion*, *Adhæren'tia*, *Concré'tio*, *Atre'sia*, *Pros'physis*, *Proscolle'sis*, *Adhæ'sio*, from *adhærere*, (*ad* and *hærere*,) 'to stick to.' These words are usually employed synonymously. The French often use *adherence* for the state of union, and *adhesion* for the act of adhering.

ADHESION, Adherence.

ADHE'SIVE INFLAMMATION is that inflammation which terminates by an adhesion between inflamed and separated surfaces.

Adhe'sive is also an epithet for certain plasters, which stick closely to the skin.

ADIANTUM ALBUM, Asplenium ruta muraria—a. Aureum, Polytrichum.

Adian'tum Capil'lus Ven'eris, from *a*, privative, and διαιτω, 'to grow wet,' from the leaves not being easily moistened. *Maidenhair*. *Nat. Ord.* Filices. *Sex. Syst.* Cryptogamia Filices. (F.) *Capillaire de Montpellier*. A European plant, of feeble aromatic and demulcent properties. It is used for forming the *Sirop de Capillaire* or *Capillaire*.

Adian'tum Peda'tum, *A. Canaden'sē*, *Capillus Canaden'sis*, *Herba Ven'eris*, *Filix Ven'eris*. *Canada Maidenhair*, *American Maidenhair*, *Rockfern*, *Sweetfern*, (F.) *Capillaire du Canada*, has the same properties. *Capillaire* was once made from this

Adiantum Rubrum, Asplenium trichomanoides.

ADIAPHORO'SIS, *Adiaphore'sis*, from *a* privative, διὰ, 'through,' and φορος, 'a pore.' Defect or suppression of perspiration, *Adiapneus'tia*.

ADIAPH'OROUS, *Adiaph'orus*, *Indifferens*, *Neutral*. A medicine which will neither do harm nor good.

ADIARRHŒ'A, from *a* privative, and διαῤῥεειν, 'to flow.' Retention of any excretion.—Hipp.

ADICE, Urtica.

ADIPEUX, Adipose.

ADIPOCERA, *Adipocire*—a. Cetosa, Cetaceum.

AD'IPOCIRE, *Adipoce'ra*, from *adeps*, 'fat,' and *cera*, 'wax.' The base of biliary calculi, called also *Chol'esterine*. (F.) *Gras des Cadavres*, *Gras des Cimetières*. Also, a sort of soap, formed from animal matter under certain circumstances. The human body, when it has been for some weeks in water, assumes this appearance; and it has been a subject of legal inquiry, what length of time is necessary to produce it. This must, of course, depend upon various circumstances, as climate, season, &c.

ADIPOCIRE DE BALEINE, Cataceum.

AD'IPOSE, *Ad'ipous*, *Adipo'sus*, from *adeps*, 'fat.' (F.) *Adipeux*. That which relates to fat—as *Adipose membrane*, *A. vessels*, &c. See Fatty.

Ad'ipose Sarco'ma of Abernethy, *Emphy'ma sarco'ma adipo'sum*, is suetty throughout, and enclosed in a thin capsule of condensed cellular substance, connected by means of minute vessels. It is chiefly found on the fore and back part of the trunk. See Sarcoma.

ADIPOSIS. See Polysarcia.

Adipo'sis Hepat'ica, *Pimelo'sis hepat'ica*, *Fatty liver*, *Fatty degeneration of the liver*, (F.) *Dégénerescence graisseuse du Foie*. Fatty disease of the liver.

ADIPOSUS, Fatty.

ADIPOUS, Fatty.

ADIP'SIA, *Dipso'sis expers*. Absence of thirst.

ADIP'SON, from *a* privative, and διψα, 'thirst.' Any substance which relieves thirst. Applied to a decoction of barley to which oxymel was added.—Hipp.

ADIPSOS, Glycyrrhiza.

AD'ITUS, 'an entrance,' 'an approach;' from *adere*, *aditum*, 'to go to.' *Pros'odos*. The entrance to a canal or duct, as *Aditus ad Aquæductum Fallopii*.

ADIULIS'TOS, from *a* privative, and διυλιζω, 'I run.' Unstrained wine for pharmaceutical purposes.—Gorræus.

ADJUNCTUM, Accompaniment.

ADJUTOR PARTÛS, Accoucheur.

AD'JUVANT, *Ad'juvans*, from *adjuva're*, 'to aid.' A medicine, introduced into a prescription to aid the operation of the principal ingredient or basis. Also, whatever assists in the removal or prevention of disease.

ADNATA (TUNICA) Conjunctiva.

ADNÉE (MEMBRANE.) Conjunctiva.

ADOLES'CENCE, *Adolescen'tia*, *Juven'tus*, *Ætas bona*, *Youth*; from *adolescere* (*ad* and *olescere*) 'to grow.' (F.) *Jeunesse*. The period

between puberty and that at which the body acquires its full development; being, in man, between the 14th and 25th year; and, in woman, between the 12th and 21st.

ADO'LIA. A Malabar plant, whose leaves, put in oil, form a liniment, used in facilitating labour.

ADOR, Zea Mays.

ADORION, Daucus carota.

ADOUCISSANT, Demulcent.

AD PONDUS OM'NIUM. The weight of the whole. In a prescription it means, that any particular ingredient shall equal in weight the whole of the others.

ADRA RIZA, Aristolochia clematitis.

ADROBO'LON, from *αδρος*, 'great,' and *βωλος*, 'mass.' The bdellium of India, which is in larger pieces than that of Arabia.

ADROS, *αδρος*, 'plump and full.' Applied to the habit of body, and also to the pulse.—Hippocrates.

ADSARIA PALA, Dolichos pruriens.

ADSPIRATIO, Aspiration, Inspiration.

ADSTITES GLANDULOSI, Prostate.

ADSTRICTIO, Constipation.

ADULAS'SO. The *Justitia bivalvis*. A small shrub, used in India as a local application in gout.

ADULT AGE, *Andri'a*, from *adolescere*, 'to grow to,' (*ad* and *olere*, *olitum*, 'to grow.') *Viril'ity*. The age succeeding adolescence, and preceding old age. *Adult*, *Adul'tus*, is also used for one in the adult age.

ADULTERATIO, Falsification.

ADURION, Rhus coriaria.

ADUST, *Adus'tus*, from *adurere*, (*ad* and *urere*,) 'to burn.' The blood and fluids were formerly said to be adust, when there was much heat in the constitution and but little serum in the blood.

ADUSTIO, Burn.

ADUS'TION, *Adus'tio*. State of the body described under Adust. In surgery, it signifies *cauterization*.

ADVENTITIOUS DISEASES, Acquired diseases.

ADVENTITIUS, Accidental.

ADYNA'MIA, *Impoten'tia*; from *α*, privative, and *δυναμις*, 'strength.' *Adyna'sia*, *Adyna'tia*. Considerable debility of the vital powers; as in typhus fever. Some Nosologists have a class of diseases under the name *Adynamiæ*.

ADYNAMIA VIRILIS, Impotence.

ADYNASIA, Adynamia.

ADYNATIA, Adynamia.

ADYNATOS, Sickly.

ÆDŒA, Genital organs.

ÆDŒAG'RAPHY, *Ædœagraph'ia*, from *αιδοια*, 'organs of generation,' and *γραφω*, 'I describe.' A description of the organs of generation.

ÆDŒAL'OGY, *Ædœalog''ia*, from *αιδοια*, 'the pudendum,' and *λογος*, 'a description.' A treatise on the organs of generation.

ÆDŒAT'OMY, *Ædœatom'ia*, from *αιδοια*, 'the pudendum,' and *τεμνω*, 'I cut.' Dissection of the parts of generation.

ÆDŒI'TIS. Inflammation of the genital organs.

ÆDŒOBLENORRHŒA, Leucorrhœa.

ÆDŒOMANIA, Nymphomania.

ÆDŒON, Inguen.

ÆDOPSOPH'IA, from *αιδοια*, 'the pudendum,' and *ψοφειν*, 'to make a noise.' Emission of wind by the urethra in man, by the vagina in woman.—Sauvages and Sagar.

ÆDOPTOSIS, Hysteroptosis—æ. Uteri, Prolapsus uteri—æ. Uteri inversa, Uterus, inversion of the—æ. Uteri retroversa, Retroversio uteri—æ. Vaginæ, Prolapsus V.—æ. Vesicæ, Exocyste.

ÆEIG'LUCES, *Aeig'luces*, from *αει*, 'always,' and *γλυκυς*, 'sweet.' A kind of sweet wine or must. Gorræus.

ÆGAGROP'ILA, from *αιγαγρος*, 'the rock goat,' and *πιλος*, 'hair.' *Bézoar d'Allemagne*, *Pila Dama'rum* seu *Rupicapra'rum*. A ball, composed of hairs, found in the stomach of the goat; once used medicinally. See Bezoar.

ÆGEIROS, Populus.

ÆGER, Sick.

Æ'GIAS, *Ægis*, *Æglia*, *Ægides*, from *αιξ*, 'the goat;' why, is not known. (F.) *Aige* or *Aigle*. There is obscurity regarding the precise meaning of this word. It was used to designate an ulcer, or speck on the transparent cornea. Hippocrates.

Maître Jean uses it for a calcareous deposite between the conjunctiva and sclerotica.

ÆGIDES, Ægias.

Æ'GILOPS, *An'chilops*, *An'kylops*, from *αιξ*, 'goat,' and *ωψ*, 'the eye.' An ulcer at the greater angle of the eye, which sometimes does not penetrate to the lachrymal sac, but at others does, and constitutes fistula lachrymalis. Galen, Celsus, Oribasius, Aëtius, Paulus of Ægina, &c.

ÆGI'RINON. An ointment of which the fruit or flower of the poplar was an ingredient; from *αιγειρος*, 'the black poplar.'

ÆGLIA, Ægias.

ÆGOCERAS, Trigonella Fœnum.

ÆGONYCHON, Lithospermum officinale.

ÆGOPHONIA, Egophony.

ÆGOPODIUM PODAGRARIA, Ligusticum podagraria.

ÆGRIPPA, Agrippa.

ÆGRITUDO, Disease—æ. Ventriculi, Vomiting.

ÆGROTUS, Sick.

ÆGYP'TIA. An epithet for several medicines, mentioned by Galen, Paulus of Ægina, and Myrepsus.

ÆGYPTIA MOSCHATA, Hibiscus abelmoschus.

ÆGYP'TIA STYPTE'RIA, *Αιγυπτια στυπτηρια*, *Ægyptian alum*. Recommended by Hippocrates.

ÆGYP'TIA UL'CERA; *Ægyptian ulcers*. Ulcers of the fauces and tonsils, described by Aretæus, as common in Egypt and Syria.

ÆGYPTIACUM, *Ægyp'tion*, *Mende'sion*, *Mel Ægyptiacum*, *Phar'macum Ægyptiacum*. A preparation of vinegar, honey, and verdigris, scarcely used now, except by veterinary surgeons as a detergent. See Linimentum Æruginis.

ÆGYP'TION, Ægyptiacum.

ÆGYPTIUM MEDICAMENTUM AD AURES, Pharmacum ad aures.

ÆGYP'TIUS PESSUS: *Ægyptian pessary*. A pessary, composed of honey, turpentine, butter, oil of lily or rose, saffron, each one part; with sometimes a small quantity of verdigris.

AEICHRYSON, Sedum.

ÆIPATHEIA, see Continent (disease.)

AEIPATHIA, see Continent (disease.)

ÆNEA, Catheter.

ÆOLECTHYMA, Variola.

ÆOLLION, Varicella.

ÆON, αιων. The entire age of a man from birth till death.—Hippocrates, Galen. Also the spinal marrow. See Medulla Spinalis.

ÆONESIS, Fomentation.

ÆONION, Sedum.

ÆO'RA, from αιωρεω, 'I suspend.' Gestation, swinging.—Aëtius, Celsus, &c.

ÆQUALIS, Equal.

ÆQUA'TOR OC'ULI. The line formed by the union of the upper and under eyelid, when they are closed. It is below the middle of the globe.

ÆQUIVOCUS, Equivocal.

AER, Air.

AERATION OF THE BLOOD, Hæmatosis.

AERATUS, Carbonated.

AÉRÉ, Carbonated.

ÆREOLUM, *Æreolus*, *Chalchus*. The sixth part of an obolus by weight, consequently about 2 grains.

Æ'RESIS, αιρεσις, 'the removal of any thing.' A suffix denoting a removal or separation, as *Aphærĕsis*, *Diærĕsis*, &c.

AERIF'EROUS, *Aërifer*, (F.) *Aérifère*, from *aer*, 'air,' and *ferre*, 'to carry.' An epithet for tubes, which convey air, as the larynx, trachea, and bronchia.

AERIFLUX'US. The discharge of gas, and the fetid emanations from the sick.—Sauvages.

AERO-ENTERECTASIA, Tympanites.

AEROL'OGY; *Aerolog''ia*, *Aerolog''icē*, from αηρ, 'air,' and λογος, 'a description.' That part of physics which treats of the air, its qualities, uses, and action on the animal economy.

AER'OMANCY, *Aeromanti'a*, from αηρ, 'air,' and μαντεια, 'divination.' An art in judicial astrology, which consists in the foretelling, by means of the air or substances found in the atmosphere.

AEROMELI, Fraxinus ornus.

AEROPÉRITONIE, see Tympanites.

AEROPHO'BIA, from αηρ, 'air,' and φοβος, 'fear.' Dread of the air. This symptom often accompanies hydrophobia, (q. v.) and sometimes hysteria and other affections.

ÆRUCA, Cupri subacetas.

ÆRU'GINOUS, *Ærugino'sus*, ιωδης, from *Ærugo*, 'verdigris.' (F.) *Érugineux*. Resembling verdigris in colour; as the bile when discharged at times from the stomach.

ÆRU'GO, ιος, from æs, 'copper.' The rust of any metal, properly of brass. See Cupri Subacetas.

ÆS, Cuprum.

ÆSCHOS, αισχος. Deformity of the body generally or of some part.—Hippoc.

ÆS'CULUS HIPPOCAS'TANUM, from *esca*, 'food,' [?] *Casta'nea equi'na*, *Pavi'na*, *Horse-chestnut*, *Buck-eye*. (F.) *Marronier d'Inde*. *Nat. Ord.* Hippocastaneæ. *Sex. Syst.* Heptandria Monogynia. The bark has been advised as a substitute for the cinchona. Both bark and fruit are astringent. Externally, it has been employed, like the cinchona, in gangrene.

ÆSECAVUM, Brass.

ÆSTATES, Ephelides.

ÆSTHE'MA, αισθημα, gen. αισθηματος, 'a sensation, a perception.' See Sensation and sensibility.

ÆSTHEMATONU'SI, from αισθημα, and νουσοι, 'diseases.' Diseases affecting sensation.

ÆSTHEMATORGANONU'SI. Diseases of the organs of sensation.

ÆSTHE'SIS, αισθησις, *Aisthe'sis*, from αισθανομαι, 'I feel.' The faculty of being affected by a sensation. Perception. Sensibility, as well as the senses themselves. See Sense.

ÆSTHETERION, Sensorium.

ÆSTHET'ICA, from αισθανομαι, 'I feel.' Diseases affecting the sensations. Dulness, depravation or abolition of one or more of the external organs of sense. The 2d order, class *Neurotica* of Good.

ÆSTIVUS, Estival.

ÆSTUARIUM, Stove.

ÆSTUATIO, Ardor, Ebullition, Fermentation.

ÆSTUS, Ardor.

Æstus Volat'icus. Sudden heat, scorching or flushing of the face.—Vogel.

ÆTAS, Age—æ. Bona, Adolescence—æ. Decrepita, Decrepitude—æ. Mala, Senectus.

ÆTHER, *Ether*, from αιθηρ, 'air,' or from αιθω, 'I burn.' *Liquor æthe'reus*. A volatile liquor obtained by distillation from a mixture of alcohol and a concentrated acid.

Æther Chloricus, *Chloric Ether*, has been administered in spasmodic asthma, and in adynamic conditions of the nervous system, in the dose of f. ʒss.

Æther Hydrocyan'icus, *Æther Prus'sicus*, *Hydrocyan'ic Ether*, *Hydrocy'anate of E'therine*, *Cyan'uret of Ethule*, has been advised in hooping cough, and where the hydrocyanic acid is indicated. Dose, 6 drops.

Æther Martialis, Tinctura seu Alcohol sulfurico-æthereus ferri—æ. Nitricus alcoolisatus, Spiritus ætheris nitrici—æ. Pyro-aceticus, Acetone.

Æther Sulphu'ricus, *Æ. Vitriol'icus*, *Naphtha Vitrioli*, *Sulph'uric Ether*. Ether prepared from sulphuric ether and alcohol. (*Sp. rectificat; Acid. Sulph.* āa lbiss. Distil until a heavier liquid passes over. Ph. L.)

Rectified Ether, *Æther rectifica'tus*, prepared by distilling 12 oz. from a mixture of *sulphuric ether*, f. ʒxiv, *fused potass*, ʒss, and *distilled water*, f. ʒij, is a limpid, colourless, very inflammable, volatile liquor; of a penetrating and fragrant odour, and hot pungent taste. Its s. g. is 0.732.

It is a diffusible stimulant, narcotic and antispasmodic, and is externally refrigerant. Dose gtt. xxx to ʒiss.

Æther Sulphuricus, of the Pharmacopœia of the United States, (1842,) is formed from *alcohol*, Oiv; *sulphuric acid*, Oj; *potassa*, ʒvj; *distilled water*, f. ʒiij, distilling and redistilling according to the process there laid down.

The Parisian Codex has an *Æther ace'ticus*, an *Æther muriat'icus* seu *hydrochlor'icus*, an *Æther ni'tricus* seu *nitro'sus*, and an *Æther phosphora'tus*. They all possess similar virtues.

Æther Sulphuricus Acidus, Elixir acidum Halleri—æ. Sulphuricus cum alcohole, Spiritus ætheris sulphurici—æ. Sulphuricus cum alcohole aromaticus, Spiritus ætheris aromaticus.

ÆTHEREA HERBA, Eryngium maritimum.

ÆTHE'REAL, *Ethe'real*, *Ethe'reous*, *Æthe'reus*. (F.) *Éthérée*, *Teinture éthérée*. An ethereal tincture is one formed by the action of sulphuric ether, at the ordinary temperature, on medicinal substances. An ethereal oil is a volatile oil. See Olea Volatilia.

ÆTHEROLEA, Olea volatilia.

ÆTHIOP'ICUS LAPIS, Ethiopian stone. A stone formerly supposed to be possessed of considerable virtue.—Oribasius.

ÆTHIOPIS, Salvia sclarea.

Æ'THIOPS, from *αιθω*, 'I burn,' and *ωψ*, 'countenance.' A black or burnt countenance. The ancients gave this name to certain oxides and sulphurets of metals, which were of a black colour.

Æthiops Albus, Albino—æ. Alcalisatus, Hydrargyrum cum cretâ—æ. Animal, see Choroid.

Æthiops Martial, *Deutox'ydum Ferri nigrum*. The black deutoxide of iron: once in repute as a tonic.

Æthiops Mineralis, Hydrargyri sulphuretum nigrum—æ. Narcoticus, Hydrargyri sulphuretum nigrum—æ. per se, Hydrargyri oxydum cinereum—æ. Saccharatus, Hydrargyrum saccharatum—æ. Vegetabilis, see Fucus vesiculosus.

ÆTHOL'ICES, from *αιθω*, 'I burn.' Fiery pustules on the skin. Some have considered them to have been *boils*.

ÆTHU'SA CYNA'PIUM, *Fool's Parsley*, (F.) *Faux Persil, Petite Ciguë*. *Family*, Umbelliferæ. *Sex. Syst.* Pentandria Digynia. A poisonous plant, which has been mistaken for true parsley, producing nausea, vomiting, headache, giddiness, sopor, and, at times, fatal results. It resembles conium in its action.

Æthu'sa Meum, *Meum, Meu, Spignel, Baldmoney*. (F.) *Éthuse Meum*. The root has been advised as carminative, stomachic, &c.

ÆTIOL'OGY, *Ætiolog''ia, Etiol'ogy, Aitiolog''ia*, from *αιτια*, 'cause,' and *λογος*, 'a discourse.' The doctrine of the causes of disease.

ÆTI'TES, from *αετος*, 'an eagle.' *Eagle-stone, Pierre d'Aigle, Hydrate de tritoxide de fer*. This stone was formerly supposed to facilitate delivery, if bound on the thigh; and to prevent abortion, if bound on the arm. It was, also, called *Lapis Collymus*.

ÆTOI PHLEBES, Temporal veins.

ÆTOLION, Cnidia grana.

ÆTOI PHLEBES, Temporal veins.

AFFADISSEMENT. (F.) from *fade*, 'insipid.' That condition of the digestive function in which the appetite is diminished, the sense of taste blunted, and the action of the stomach enfeebled; a state usually accompanied by general languor.

AFFAIBLISSEMENT, Asthenia.

AFFAIRES, Menses.

AFFAISSEMENT, Collapsus.

AFFECTIO HYPOCHONDRIACA, Hypochondriasis—a. Hysterica, Hysteria—a. Tympanitica, Tympanites.

AFFEC'TION, *Affec'tio*, from *afficio* or *affectare (ad* and *facere,)* 'to move or influence.' Any mode in which the mind or body is affected or modified.

AFFECTION VAPOREUSE, Hypochondriasis.

Affections of the Mind. *Affec'tus An'imi*, (F.) *Affections de l'âme*, include not only the different passions, as love, hatred, jealousy, &c., but every condition of the mind that is accompanied by an agreeable or disagreeable feeling, as pleasure, fear, sorrow, &c.

In Pathology, *Affection, Pathos, Pathe'ma*, is synonymous with disease: thus we speak of a *pulmonary affection*, a *calculous affection*, &c.

AFFECTIONS DE L'ÂME. Affections of the Mind.

AFFECTIVE. That which affects, touches, &c. Gall gives the term *affective faculties*, (F.) *Facultés affectives*, to functions dependent upon the organization of the brain, comprising the sentiments, affections, &c.

AFFECTUS, Passion—a. Faucium pestilens, Cynanche maligna—a. Hyderodes, Hydrops.

AF'FERENT, *Af'ferens*, from *affero*, (*ad* and *fero*, 'to carry,') 'I bring.' The vessels which convey the lymph to the lymphatic glands, are called *afferent*. Also, nerves that convey impressions towards the nervous centres.

AF'FION or OF'FIUM, *O'pium*, (q. v.) The Bantamese thus designate an electuary of which opium is the basis, and which they use as an excitant.

AFFLA'TUS or ADFLA'TUS, *Epipno'a*, from *ad*, 'to,' and *flare*, 'to blow.' Any air that strikes the body and produces disease.

AF'FLUENCE and AF'FLUX, from *affluere*, (*ad* and *fluere*, 'to flow,') 'to flow to.' A flow or determination of humours, and particularly of blood, towards any part.

AFFLUXUS, Fluxion.

AFFUSIO ORBICULARIS, Placenta.

AFFU'SION, *Pros'chysis, Epich'ysis, Affu'sio*, from *ad*, 'to,' and *fundere, fusum*, 'to pour.' The action of pouring a liquid on any body. *Affusions, cold* and *warm*, are used in different diseases. The *cold affusion* is said to have been beneficial in cutting short typhus fever and scarlatina, if used during the first days. It consists in placing the patient in a tub, and pouring cold water over him; then wiping him dry, and putting him to bed. The only precaution necessary, is, to use it in the state of greatest heat and exacerbation; not when chilliness, or topical inflammation is present.

AFIUM, Opium.

AFTER-BIRTH, Secundines.

AFTER-PAINS, see Pains, labour.

AGACEMENT, (F.) from *αχαζειν*, 'to sharpen.' The setting on edge.

AGACEMENT DES DENTS. A disagreeable sensation experienced when acids are placed in contact with the teeth. *Tooth edge*. Setting the teeth on edge.

AGACEMENT DES NERFS. A slight irritation of the system, and particularly of the organs of sense and locomotion, corresponding nearly to the English *Fidgets*.

AGALACTATIO, Agalactia.

AGALAC'TIA, *Agalax'is, Agalac'tio*, and *Agalacta'tio, Defec'tus lac'tis, Oligoga'lia*, from *a*, privative, and *γαλα*, 'milk.' Absence of milk in the mammæ.

AGALAXIS, Agalactia.

AGAL'LOCHUM, from *αγαλλομαι*, 'to become splendid,' *Calambac, Calambouk, Lig'num Agal'lochi veri, Lig'num Al'oës, L. Aspal'athi, Xyloaloës, Aloes wood*. A resinous and very aromatic wood of the East Indies, from *Excæcaria Agallocha*. Used in making pastils, &c.—Dioscorides, Oribasius, Paulus.

AGAMOUS, see Cryptogamous.

AG'ARIC, *Agar'icum*. A genus of plants in the Linnæan system, some of which are edible, others poisonous. It was so called from Agaria, a region of Sarmatia.—Dioscorides. Among the edible varieties of the Boletus, the following are

the chief. 1. The *Agar'icus edu'lis*, (F.) *Agaric comestible et champignon de couche*. 2. The *Agar'icus odora'tus*, (F.) *Mousseron*. The most common poisonous varieties are the *Agar'icus Neca'tor* (F.) *Agaric meurtrier:* and 2. The *Agar'icus acris*, (F.) *Agaric âcre;* besides the *Auranite*, a sub-genus, which includes several species. One of the most delicate is the *Agaricus Aurantiacus*, but care must be taken not to confound it with the *A. Pseudo-Aurantiacus*, which is very poisonous. The A. aurantiacus is called, in French, *Oronge*. See Poisons, Table of.

AGARIC, see Boletus igniarius—*a. Blanc*, Boletus laricis—*a. de Chêne*, Boletus igniarius—a. Female, Boletus igniarius—a. of the Oak, Boletus igniarius—*a. Odorant*, Boletus suaveolens.

AGARICUS, Boletus igniarius—a. Albus, Boletus laricis—a. Aurantiacus, Amanitæ—a. Aurantiacus, Bolites—a. Auriculæforma, Peziza auricula—a. Chirurgorum, Boletus igniarius—a. Pseudo-aurantiacus, Amanitæ—a. Quercûs, Boletus igniarius.

AGATHIS DAMARRA, Pinus Damarra.

AGATHOSMA CRENATUM, Diosma crenata.

AGATHOTES CHIRAYITA, Gentiana chirayita.

AGA'VĒ AMERICA'NA. *American Agave*, from αγανος, 'admirable.' *Nat. Ord.* Bromeliaceæ. *Sex. Syst.* Hexandria Monogynia. This plant has been considered diuretic and antisyphilitic.

AGE, ἡλικια, *Helikia, Æ'tas.* Of uncertain etymon. Period of life. Time that has elapsed since birth, &c. Five ages are often designated in the life of man. 1. First infancy (*Infan'tia:*) 2. Second infancy (*Pueri''tia:*) 3. Adolescence (*Adolescen'tia:*) 4. The adult age (*Viril'itas:*) 5. Old age (*Senec'tus:*) all which see.

AGENEIOS, Imberbis.

AGEN'ESIS, from α, privative, and γενεσις, 'generation.' Imperfect development of any part of the body; as *cerebral agenesis*, i. e. imperfect development of the brain in the fœtus.

AGENNESIA, Sterilitas.

AGENT, *Agens*, from *ag''ere*, 'to act.' Any power which produces, or tends to produce an effect on the human body. Morbific agents, (F.) *Agens morbifiques*, are the causes of disease;—therapeutical agents, (F.) *Agens thérapeutiques*, the means of treating it, &c.

AGER NATURÆ, Uterus.

AGERA'SIA, *Insenescen'tia*, from α, privative, and γηρας, 'old age.' A vigorous and green old age.

AGERATUM, Achillea ageratum.

AGE'RATUS LAPIS. A stone used by cobblers to polish shoes. It was formerly esteemed discutient and astringent.—Galen, Oribasius, Paulus.

AGES, Palm.

AGEUSTIA or AGHEUSTIA, *Apogeus'tia, Apogeu'sis, Dysæsthe'sia gustato'ria, Parageu'sis*, from α, priv., and γευστις, 'taste.' Diminution or loss of taste, *Anæsthe'sia linguæ*.—Sauvages, Cullen.

AGGLOM'ERATE, *Agglomera'tus*, from *agglomerare* (*ad* and *glomerare*, 'to wind up yarn in a ball,') 'to collect together.' Applied to humours or glands in aggregation.

AGGLU'TINANT, *Agglu'tinans, Collet'icus, Glu'tinans*, from *gluten*, 'glue.' (F.) *Agglutinant, Agglutinatif, Glutinatif.* Remedies were formerly so called, which were considered capable of uniting divided parts.—Paulus.

Plasters are called *agglutinants*, (F.) *agglutinatifs*, which adhere strongly to the skin. Certain bandages are likewise so termed. (F.) *Bandelettes agglutinatives.*

TO AGGLU'TINATE. The French use the word *agglutiner*, in the sense of 'to reunite;' as *agglutiner les lèvres d'une plaie*, 'to unite the lips of a wound.'

AGGLUTINATIF, Agglutinant.

AGGLUTINATIO, Coition.

AGGLUTINA'TION, *Colle'sis, Epicolle'sis, Proscolle'sis, Glutina'tio*, from *agglutinare*, 'to glue together.' The first degree of adhesion. Also, the action of agglutinants.

AGGLUTINER, To agglutinate.

AG'GREGATE, *Aggrega'tus*, from *aggregare*, (*ad* and *gregare*,) 'to flock together,' 'to assemble together.' Glands are called *aggregate* which are in clusters. *Aggregate pills*, (F.) *Pilules aggrégatives*, signified, formerly, those which were believed to contain the properties of a considerable number of medicines, and to be able to supply their place.

AGHEUSTIA, Ageustia.

AGIAHA'LID or AGIHA'LID, or AGRAHA'LID. An Egyptian and Ethiopian shrub, similar to the *Ximenia*. The Ethiopians use it as a vermifuge. The fruit is purgative.

AGIHALID, Agiahalid.

AGISSANT, Active.

AGITA'TION, *Agita'tio: Done'sis;* from *agere*, 'to act.' Constant and fatiguing motion of the body (*inquies*,) or distressing mental inquietude (*An'imi agita'tio.*)

AGITATORIUS, Convulsive.

AGLOS'SIA, from α, priv. and γλωσσα, 'the tongue.' A malformation which consists in the want of a tongue.

AGLOSSOSTOMOG'RAPHY, *Aglossostomogra'phia*, from α, priv. γλωσσα, 'the tongue,' στομα, 'the mouth,' and γραφω, 'I describe.' Description of a mouth without a tongue.—Roland (of Saumur.)

AGLUTI'TION, *Aglutii'tio*, from α, priv., and *glutire*, 'to swallow.' A hybrid term, designating impossibility of swallowing.—Linnæus.

AGME, Fracture.

AGMINA DIGITORUM MANUS, Phalanges of the fingers—a. Membrana, Amnios.

AGNA'THIA, from α, priv. and γναθος, 'jaw.' A malformation which consists in the want of the jaw, especially of the lower.

AGNOIA, from α, privative, and γινοσκω, 'I know.' State of a patient who does not recognise individuals.—Hippocr., Galen, Foësius.

AGNUS CASTUS, Vitex.

AGO'GĒ, αγωγη. The order or condition of a disease,—Hippoc., Galen. Likewise the state of the air.—Hippoc., Galen, Gorræus, Foësius.

AGOGUE, αγωγος, 'a leader,' from αγω, 'I lead or expel.' Hence *Cholagogue*, an expeller of bile: *Hydragogue*, &c.

AGOMPHI'ASIS, *Agompho'sis*, from α, privative, and γομφοω, 'I nail.' Looseness of the teeth. Gorræus. See Gomphiasis.

AGOMPHOSIS, Agomphiasis.

AGONE, Hyoscyamus.

AGONIA, Sterilitas.

AGONIS'TICA, from αγων, 'a combat.' The

part of ancient gymnastics, which had reference to the combats of the Athletæ.

Also, very cold water, given internally, to calm febrile heat. Paulus of Ægina.

AG'ONY, *Ago'nia*, *An'gor*, from αγων, 'a combat.' The last struggle of life.—Galen, Gorræus, &c. The agony, which is of longer or shorter duration, is characterized by great change in the features, gradual abolition of sensation and motion, loss of voice, dryness or lividity of the tongue and lips, rattling in the throat, small and intermittent pulse, and coldness of the extremities. This state is not present in those who die suddenly. See Facies Hippocratica.

AGOS'TUS, from αγω, 'I lead.' The fore arm from the elbow to the fingers. Also, the palm of the hand.—Gorræus. See Palm.

AGRA, αγρα, from αγρεω, 'I seize hold of.'—A seizure, as *Odontagra*, a tooth seizure, toothache; *Chiragra*, *Podagra*, &c.

AGRAFE DE VALENTIN. A kind of forceps with parallel branches, employed by Valentin in the operation for hare lip, to effect the approximation of the edges of the wound.

AGRAHALID, Agiahalid.

AGRÉGATIVES PILULES. See Aggregate.

AGRIA, Herpes exedens.

AGRIAMPELOS, Bryonia alba.

AGRICOCCIMELEA, Prunus spinosa.

AGRIFOLIUM, Ilex aquifolium.

AG'RIMONY, *Eupato'rium*, *Caf'al*, *Lap'pula hepat'ica* (F.) *Aigremoine*. The *Agrimo'nia Eupato'rium*. *Cockle-bur*, *Stickwort*. *Nat. Ord.* Rosaceæ. *Sex. Syst.* Icosandria Digynia. A mild astringent and stomachic. *Dose*, in powder, from ℈j to ʒj.

Agrimony Hemp, Eupatorium cannabinum.

AGRIOCASTANUM, Bunium bulbocastanum, Lycoperdon tuber.

AGRIOCINARA, Sempervivum tectorum.

AGRIORIGANUM, Origanum majorana.

AGRIOSELINUM, Smyrnium olusatrum.

AGRIOTHYM'IA, from αγριος, 'ferocious,' and θυμος, 'disposition.' Ferocious insanity.—Sauvages.

AGRIPALMA GALLIS, Leonurus cardiaca.

AGRIPAUME, Leonurus cardiaca.

AGRIP'PA or ÆGRIP'PA, from *æger partus*, 'difficult birth:' or perhaps from αγρα, 'taking or seizure,' and πους, 'the foot.' This term has been given to those born by the feet. It is pretended that the family of Agrippa obtained their name from this circumstance. Parturition where the feet present, is called *Agrippæ partus*, *Agrippinus partus*.

AGRIPPINUS PARTUS. See Agrippa.

AGRO DI CEDRO. See Citrus medica.

AGROSTIS, Bryonia alba.

AGRUNA, Prunus spinosa.

AGRYPNIA, Insomnia.

AGRYPNOCOMA, Coma vigil.

AGRYPNO'DES, αγρυπνωδης, from αγρυπνος, 'sleepless.' Characterized by sleeplessness, as *Febris agrypnodes*, a fever accompanied with sleeplessness.

AGRYP'NUS, αγρυπνος, 'sleepless,' 'vigilant.' Hence *Agrypnodes* (*Febris*,) fever attended with watching.

AGUE, from Gothic *agis*, 'trembling.' [?] Intermittent fever.

Ague and Fever, Intermittent fever.

A'gue Cake, *Placen'ta febri'lis*, *Physco'nia splen'icum*, *P. splenica*, *Splenis Tumor*; (F.) *Gâteau fébrile*. A visceral obstruction (generally in the spleen,) which follows agues, and is distinctly felt by external examination. To a greater or less degree, it is not uncommon.

Ague, Dead. See Fever, masked.

Ague, Dumb. See Fever, masked.

Ague, Free, Laurus sassafras—a. Leaping, see Leaping ague—a. Quartan, Quartan—a. Tertian, Tertian fever—a. weed, Eupatorium perfoliatum.

AGUL or ALHA'GI, the *Hedisa'rum alhagi*. A thorny shrub of Persia and Mesopotamia, which affords manna. The leaves are purgative.

AGY'ION, from α, priv., and γυιον, 'limb.' Mutilated, or wanting limbs.—Hippocr. Weak, feeble.—Galen.

AGYR'IAS, from αγυρις, 'a collection.' Opacity of the crystalline.—Aëtius, Paré.

AGYR'TA, from αγυρις, 'a crowd.' Formerly meant a stroller, who pretended to supernatural powers. Subsequently, a quack or illiterate pretender. See Charlatan.

AGYRTIA, Charlatanry.

AHOUAI, Thevetia Ahouai.

AHUSAL, Orpiment.

AIDE, (F.) *Ad'jutor min'ister*. An assistant to a surgeon in his operations.

AIDOROMANIA, Nymphomania.

AIERSA, Iris Germanica.

AIGE, Ægias.

AIGLE, MINERAL WATERS OF. Near the city of this name, in Normandy, is the chalybeate spring of Saint Xantin, much used in the 16th and 17th centuries.

AIGLE, Ægias.

AIGRE, Acidulous.

AIGRELET, Acidulous.

AIGREMOINE, Agrimony.

AIGREURS, Acidities.

AIGU, Acute.

AIGUILLE, Needle—*a. à Acupuncture*, see Needle—*a. à Appareil*, see Needle—*a. à Bec De Lièvre*, see Needle—*a. à Cataracte*, see Needle—*a. de Deschamps*, see Needle—*a. Engainée*, see Needle—*a. à Fistule*, see Needle—*a. à Gaine*, see Needle—*a. à Ligature*, see Needle—*a. à Manche*, see Needle—*a. à Seton*, see Needle—*a. à Suture*, see Needle.

AIGUILLON, (F.) *Spina Helmon'tii*. A term used since the time of Van Helmont to designate the proximate cause of inflammation. According to him, an inflamed part is in the same condition as if an *aiguillon* or thorn were thrust into it.

AIGUISER, to Acidulate.

AIL, Allium.

AILE, Ala, *Aileron*.

AILERON, (F.) *Extre'ma ala vel Pin'nula*, diminutive of (F.) *Aile*, a wing. The extremity of the wing of a bird, to which the great feathers are attached.

AILERONS DE LA MATRICE. Three folds at the base of the broad ligaments of the uterus, which are occupied by the ovary and its ligament, the Fallopian tube, and the round ligament.

AIMA, 'αιμα, See Hæma.

AIMANT, Magnet.

AIMATERA, Hepatirrhœa.

AIMORRHŒA, Hæmorrhagia.

AIMORRHOIS, Hæmorrhois.

AIMORROIS, Hæmorrhois.

AINE, Inguen.

AIPI, Jatropha manihot.

AIPIMA COXERA, Jatropha manihot.

AIPIPOCA, Jatropha manihot.

AIR, *Aer*, from *αω*, 'I breathe.' *Common air, Atmospheric air*, is an invisible, transparent, inodorous, insipid, ponderable, compressible and elastic fluid, which, under the form of the atmosphere, surrounds the earth to the height of 15 or 16 leagues.

Air is essentially composed of two gases, oxygen and azote, in the proportion of 20 of the former to 80 of the latter. Oxygen is the vital portion, but the azote is necessary to dilute it. Air also contains a small portion of carbonic acid gas, and it has always floating in it aqueous vapour, different terrestrial emanations, &c. Its effects upon the human body vary according to its greater or less density, temperature, moisture, &c.; hence, change of air is found extremely serviceable in the prevention and cure of certain morbid conditions. See Climate.

AIR ACIDE VITRIOLIQUE, Sulphurous acid—*a. Alcalin*, Ammonia.

Air Cells of the Lungs, Bronchial cells; see Cellule—a. Dephlogisticated, Oxygen—a. Empyreal, Oxygen—*a. Du feu*, Oxygen—a. Factitious, Carbonic acid—a. Fixed, Carbonic acid—*a. Gaté*, Azote—a. Inflammable, Hydrogen.

Air Passages, (F.) *Voies aëriennes aërifères*, are the larynx, trachea, bronchia, &c.

Air, Pure, Oxygen—a. Solid, of Hale, Carbonic acid—*a. Vicié*, Azote—a. Vital, Oxygen.

AIRAIN, Bell-metal, Brass.

AIRE, Areola.

AIRELLE ANGULEUSE, Vaccinium myrtillus—*a. Ponctuée*, Vaccinium vitis idæa.

AIRIGNE, Hook.

AIRTHREY, MINERAL WATERS OF. A. is situate about two miles north of Stirling, Scotland.—The waters are saline cathartics; containing chloride of sodium, chloride of calcium, sulphate of zinc, and chloride of magnesium.

AISSELLE, Axilla.

AISTHESIS, Æsthesis.

AITHOMO'MA, from *αἰθος*, 'black.' A black condition of all the humours of the eye. A. Paré.

AITIA, Cause.

AITIOLOGY, Ætiologia.

AITION, Cause.

AIX-LA-CHAPELLE, MINERAL WATERS OF. Called by the Germans, Aachen. A thermal, sulphureous, mineral water, which contains, in 1000 grammes, 28.54 cubic inches of sulphohydric acid gas, 18.05 cubic inches of carbonic acid gas, 0.1304 grammes of carbonate of lime, 0.0440 grammes of carbonate of magnesia, 0.5444 grammes of carbonate of soda, 2.3697 grammes of chloride of sodium, 0.2637 of sulphate of soda, and 0.0705 of silica. The temperature is 134° Fahr.

The *factitious water of Aix-la-Chapelle, A'qua Aquisgranen'sis*, (F.) *Eau d'Aix-la-Chapelle*, is made by adding *pure water* f. ℥xvijss, to *hydrosulphuretted water* f. ℥iv, *carbonate of soda* gr. xx, *chloride of sodium* gr. ix. Ph. P.

There are thermal sulphureous springs at Aix in Savoy, (98°) and some thermal springs at Aix in Provence (91°.)

AIZOON, Sempervivum tectorum.

AJU'GA. *A. pyramida'lis, Consol'ida Me'dia, Bu'gula, Upright Bugloss, Middle Consound.* (F.) *Bugle pyramidale.* This plant is subastringent and bitter.

Ajuga Chamæpitys, Teucrium chamæpitys.

Aju'ga Reptans, *Bu'gula, Common Bugle*, (F.) *Bugle rampante*, has similar properties.

AKATALIS, Juniperus communis.

AKATERA, Juniperus communis.

AKINESIA, Acinesia.

AKOLOGY, Materia Medica.

ALA, *Pinna, Pteryx*, 'a wing.' (F.) *Aile.* A term often used by anatomists for parts which project like a wing from the median line; as the *Alæ nasi, Alæ of the uterus*, &c. See Axilla and Pavilion of the Ear.

Ala Extrema, see *Aileron.*

ALABAS'TER, *Alabas'trum.* (F.) *Albâtre, Alabastri'tes.* A variety of compact gypsum; of which an ointment was once made;—the *unguentum alabastri'num*; used as a discutient. Alabaster likewise entered into several dentifrices.

ALABASTRITES, Alabaster.

ALÆ INTERNÆ MINORES CLITORIDIS, Nymphæ—a. Majores, Labia pudendi—a. Minores, Nymphæ.

ALAITER, from (F.) *lait*, 'milk.' To suckle.

ALALIA, Mutitas.

ALAMBIC, Alembic.

ALANFU'TA. A name given by the Arabians to a vein, situate between the chin and lower lip, which they were in the habit of opening in cases of fœtor of the breath.—Avicenna.

ALAQUE'CA. The Hindusthanee name of a stone, found in small, polished fragments, which is considered efficacious in arresting hemorrhage when applied externally. It is a sulphuret of iron.

ALARES MUSCULI, Pterygoid muscles.

Ala'res Venæ. The superficial veins at the fold of the arm.

Ala'ria Ossa. The wing-like processes of the sphenoid bone.

ALATERNUS, COMMON, Rhamnus alaternus.

ALA'TUS. *Pterygo'des.* One whose scapulæ project backwards like wings.

ALBADA'RA. The sesamoid bone of the metatarso-phalangal joint of the great toe. The Rabbis and Magicians attributed extraordinary virtues to it.—Arabians.

ALBAGIAZI, Sacrum.

ALBAMENTUM, Albumen ovi.

ALBAN, SAINT, MINERAL WATERS OF. A French acidulous chalybeate, in the department of the Loire.

ALBARA, Lepra alphoides.

ALBARAS NIGRA, Lepra nigricans.

ALBARÆS, Lepra alphoides.

ALBAROS, Lepra alphoides.

ALBÂTRE, Alabaster.

ALBICAN'TIA COR'PORA. *C. Candican'tia*, from *albico*, 'I grow white.' *Willis's glands* in the brain, anterior to the tuber annulare. See Mammillary Eminence.

ALBIN D'ŒUF, Albumen ovi.

ALBI'NO. 'White.' *Leucæ'thiops, Æthiops albus, Dondo*, from *albus*, 'white.' (F.) *Blafard, Nègre-blanc.* A Spanish word applied to individuals of the human race who have the skin and hair white; the iris very pale, bordering on red; and the eyes so sensible, that they cannot

bear the light of day. This condition, which has been called *Leucæthio'pia, Alpho'sis Æthiop'ica, Albinois'mus, Leucopathi'a*, is seen more frequently in the Negro. Both sexes are exposed to it; but it does not seem to be true, that there are tribes of Albinos in the interior of Africa.

ALBINOISMUS. See Albino.

ALBOR OVI. Albumen ovi.

AL'BORA. A kind of itch or complicated leprosy.—Paracelsus.

ALBOT, Crucible.

ALBOTIM, Terebinthina.

ALBUGIN'EA, *Tu'nica albugin'ea, A. Testis, Peritestis, Membra'na capsula'ris testis.* (F.) *Albuginée, Tunique albuginée.* A strong, fibrous, and resisting membrane, which immediately envelops the testicle, and has, at its upper part, an enlargement, called corpus Highmorianum. From its inner surface it sends off a number of flat, filiform prolongations or septa, between which are contained the seminiferous vessels. Externally, it is covered by the tunica vaginalis testis.

ALBUGINÉE, Albuginea, Albugineous.

ALBUGIN'EOUS, *Albugin'eus*, 'white,' from *albus*, (F.) *Albuginée.* A term applied to textures, humours, &c., which are perfectly white.

Albugin'eous Fibre, (F.) *Fibre albuginée.* A name given by Chaussier to what he considers one of the four elementary fibres.

The albugineous fibre is linear, cylindrical, tenacious, elastic, but little extensible, and of a shining, satiny appearance. It always forms fasciæ or fasciculi, which constitute the tendons, articular ligaments, and aponeuroses: hence the name *Albugineous membranes*, given by Chaussier to the fibrous membranes.

Gauthier considers that the rete mucosum consists of four layers, to two of which he gives the names,—*membra'na albugin'ea profun'da*, and *membra'na albugin'ea superficia'lis*, respectively.

ALBUGINI'TIS, (F.) *Albuginite.* A term employed by some authors for inflammation of the albugineous tissue. Thus, gout and rheumatism are regarded as species of the genus albuginitis.

ALBUGO OCULORUM, Leucoma—a. Ovi, Albumen ovi.

ALBULA, Leucoma.

ALBUM CANIS, Album græcum—a. Ceti, Cetaceum.

Album Græcum, *Cynoc'oprus, Spo'dium Græco'rum, Album Canis, Stercus Cani'num Album.* The white dung of the dog. It consists almost wholly of *phosphate of lime*, from the bones used as food. It was formerly applied as a discutient to the inside of the throat in quinseys, but is now justly banished from practice.

Album Nigrum. The excrement of the mouse.

ALBU'MEN, from *albus*, 'white.' (F.) *Albumine.* An immediate principle of animals and vegetables, which constitutes the chief part of the white of egg. It is found in the serum, chyle, synovia, serous fluids, &c. There is not much difference in chemical composition between animal and vegetable albumen.

Albu'men Ovi, *Albu'mor, Albu'go Ovi, Albor Ovi, Can'didum Ovi, Albu'men, Clare'ta, Ovi albus liquor, Albumen'tum, Lac avis* or *white of egg.* (F.) *Blanc d'œuf*, (Old F.) *Albin d'œuf*, is used in pharmacy for suspending oils, &c., in water. See Ovum.

ALBUMINE, Albumen.

ALBUMINU'RIA. A hybrid term from '*Albumen*,' and οὖρον, 'the urine.' The condition of the urine in which it contains albumen, the presence of which is indicated by its coagulation on the application of adequate heat.

ALBUMINURORRHÉE, Kidney, Bright's disease of the.

ALBUMOR, Albumen ovi.

AL'CAEST, *Al'cahest, Al'chaest*, perhaps from (G.) all, 'all,' and geist, 'spirit.' A word invented by Paracelsus to designate a liquor, which, according to him, was capable of removing every kind of swelling.

The same word was used by Van Helmont for a fancied universal solvent, capable of reducing every body to its elements.

Alcaest of Glauber is a thick liquor obtained by detonating nitrate of potassa on hot coals, which transforms it into subcarbonate of potassa.

Alcaest of Respour is a mixture of potassa and oxyd of zinc.

ALCAHEST, Alcaest.

ALCALES'CENCE, *Alkales'cence, Alcalescen'tia.* The condition in which a fluid becomes alkaline.

Alcalescence of the Humours was an old notion of the Humorists. It can only occur during the putrid fermentation of animal matters, which contain azote, and produce ammonia. Alcalin'ity is the quality of being alcaline.

AL'CALI or AL'KALI, from *al* (*Arab.*,) 'the,' and *kali*, the name of the *Salso'la Soda.* A plant which contains a large quantity of one of the principal alkalis—*soda.* The alkalis are substances soluble in water, possessing generally a urinous, acrid, and caustic taste, turning the syrup of violets green, and restoring to blue the infusion of litmus, which has been reddened by acids; reddening the yellow of turmeric, and having the greatest tendency to unite with acids, whose character they modify, and form salts with them. In medicine we understand by this term *Potassa, Soda,* or *Ammonia* (q. v.)

Alcali, Caustic, *Al'kali Caus'ticum.* A pure alkali. One deprived of its carbonic acid.

Alcalis, Fixed, are soda and potassa; Volatile Alcali, ammonia.

Alcali Ammoniacum Acetatum, Liquor ammoniæ acetatis—a. Ammoniacum fluidum, Liquor ammoniæ—a. Fixum tartarizatum, Potassæ tartras—a. Minerale sulphuricum, Soda, sulphate of—a. Tartari aceto saturatum, Potassæ acetas—a. Vegetabile salito dephlogisticatum, Potassæ murias hyperoxygenatus—a. Vegetabile tartarizatum, Potassæ tartras—a. Vegetabile vitriolatum, Potassæ sulphas—a. Volatile acetatum, Liquor ammoniæ acetatis—a. Volatile aeratum, Ammoniæ carbonas—a. Volatile ex sale ammoniaco, Ammoniæ carbonas.

ALCALIGENE, Azote.

ALCALINITY. See Alkalescence.

ALCANA, Anchusa officinalis.

ALCANNA MAJOR LATIFOLIA DENTATA, Prinos—a. Orientalis, Lawsonia inermis—a. Spuria, Anchusa tinctoria—a. Vera, Lawsonia inermis.

ALCEA, Hibiscus abelmoschus—a. Ægyptiaca, Hibiscus abelmoschus—a. Indica, Hibiscus abelmoschus.

ALCE'A RO'SEA, *Common hollyhock.* Emollient, like Althæa.

ALCHACHENGE, Physalis.

ALCHACHIL, Rosmarinus.

ALCHAEST, Alcahest.

ALCHEMIL'LA, said to have been celebrated with the Alchemists [?] *A. vulga'ris, Common Ladies' Mantle, Pes Leo'nis, Leontopo'dium* (F.) *Pied de Lion.* Formerly in great repute as an astringent in hemorrhage.

ALCHEMY, Alchymy.

ALCHITRAM. See Pinus Sylvestris.

ALCHITURA. See Pinus Sylvestris.

ALCHYMY, *Al'chemy, Alchemi'a, Alchimi'a, Adep'ta Philosoph'ia*, from *al*, an Arabic particle, signifying 'superiority, excellence,' and *Chimia*, 'Chymistry.' This word was formerly synonymous with Chymistry; but, from the 7th century, it has been applied to the mysterious art of endeavouring to discover a universal remedy, and a mode of transmuting the baser metals into gold: an operation to which they gave the name *Opus magnum*, and *Philosopher's stone.*

Alchymy has also been called *Scien'tia vel Philosoph'ia Hermet'ica*, from an idea that Hermes or Mercury was its inventor.

Harris has well defined this chimerical art: '*Ars sine arte, cujus principium est mentiri, medium laborare, et finis mendicare.*'

AL'CHYMIST, *Flatua'rius, Adept'.* One pretending to alchymy.

ALCOCALUM, Cynara scolymus.

AL'COHOL, *Al'cool, Al'kool.* An Arabic word, formerly used for an impalpable powder, and signifying 'very subtile, much divided.' At the present day it is applied to highly rectified spirit of wine. See *Spiritus rectificatus*, or rectified spirit, distilled from dried subcarbonate of potassa. In the Ph. U. S. Alcohol is rectified spirit of the specific gravity 0.835.

Alcohol is an inflammable liquor, lighter than water, of a warm, acrid taste, colourless, transparent, and of a pungent, aromatic smell. It is the product of the distillation of vinous liquors; is miscible with water in all proportions, and is the direct solvent of resins, balsams, &c. Various other vegetable principles are soluble in it, and hence it is used, in different states of concentration, in the preparation of *elixirs, tinctures, essences*, &c.

Alcohol acts on the animal body as a powerful stimulus: as such, in a dilute form, it is used in the prevention and cure of disease. Its habitual and inordinate use is the cause of many serious affections, of a chronic character especially, as visceral obstructions, dropsy, &c.

ALCOHOL ÆTHEREUS FERRATUS, A. sulfuricoæthereus ferri—a. cum Aloe perfoliata, Tinctura aloes—a. Ammoniæ et guaiaci, Tinctura guaiaci ammoniata—a. Ammoniatum, Spiritus ammoniæ—a. Ammoniatum aromaticum, Spiritus ammoniæ aromaticus—a. Ammoniatum fœtidum, Spiritus ammoniæ fœtidus—a. cum Aromatibus sulphuricatus, Sulphuricum acidum aromaticum—a. cum Aromatibus compositus, Tinctura cinnamomi composita—a. Castoriatum, Tinctura castorei—a. cum Crotone cascarillâ, Tinctura cascarillæ—a. Dilutum, Spiritus tenuior—a. Ferratus, Tinctura ferri muriatis—a. cum Sulphate ferri tartarisatus, see Ferrum tartarizatum—a. cum Guaiaco officinale ammoniatus, Tinctura guaiaci ammoniata—a. Iodii, Tinctura Iodinæ—a. cum Opio, Tinctura opii—a. Sulphuricatum, Elixir acidum Halleri—a. Sulphuricum, Elixir acidum Halleri—a. Sulphuris, Carbonis sulphuretum.

ALCOOL, Alcohol—*a. Camphré*, Spiritus camphoræ.

ALCOOLAT, Tincture.

ALCOOLATUM, Tincture—a. Antiscorbuticum, Tinctura de cochleariis—a. Carminativum Sylvii, Tinctura carminativa Sylvii—a. de Cochleariis, Tinctura de Cochleariis—a. de Croco compositum, Tinctura de croco composita.

ALCOOLISER (F.) Formerly, 'to reduce into an impalpable powder.' No longer used.

ALCOOLOMETER, Areometer.

ALCORNOQUE (F.) *Cortex Alcornoco.* A bark, but little known and distributed in France, which has been considered capable of curing phthisis. It is bitter, tonic and slightly astringent. Dose of the powder ℈i to ʒss.

AL'CYON, *Hal'cyon.* A swallow of Cochin China, whose nests are gelatinous and very nutritious. They have been proposed in medicine as analeptic and aphrodisiac.

ALCYO'NIUM, *Bastard sponge.* The ashes were formerly employed as dentifrices: they were believed proper for favouring the growth of the hair and the beard, and were used in Alopecia.

ALDER, American, Alnus serratula—a. Black, Prinos, Rhamnus frangula—a. European, Alnus glutinosa.

ALE, Cerevisia.

ALEACAS, Glycyrrhiza.

ALECOST, Tanacetum balsamita.

ALECTO'RIUS LA'PIS, *Alecto'ria;* from αλεκτωρ, 'a cock.' The name of a stone, supposed to exist in the stomach of the cock, or, according to others, in that of the capon, four years old. Many marvellous properties were formerly attributed to it, which are as groundless as its existence. There are no stones in the stomach, except what have been swallowed.

ALEGAR, Acetum.

ALEHOOF, Glechoma hederacea.

ALEIMMA, Liniment.

ALEIPHA, Liniment.

ALEIPTE'RIUM, from αλειφω, 'I anoint.' The place in the ancient gymnasium where the combatants anointed themselves.

ALEIP'TRON. Same etymon. A box for containing ointments.

ALEMA, Farina.

ALEM'BIC *(Arab.) Moorshead, Capitel'lum, Capit'ulum*, (F.) *Alambic.* A utensil made of glass, metal, or earthen ware, and adapted for distillation. It consists of a *body* or *cucurbit*, to which is attached a *head* or *capital*, and out of this a *beak* descends laterally to be inserted into the receiver.

ALEM'BROTH (*Salt.*) The alchymists designated by this name, and by those of *Sal sapien'tiæ, Sal vitæ* and *S. Scien'tiæ*, the product resulting from the sublimation of a mixture of corrosive sublimate and sal ammoniac. It is stimulant, but not employed.

ALÈSE, (F.) *Alèze, Lin'teum*, from αλεξω, 'I preserve.' A *guard.* A cloth arranged in several folds, and placed upon a bed, so as to *guard* it from the lochial or other discharges.

ALETON, Farina.

ALETRIS, A. farinosa.

AL'ETRIS, *A. Farino'sa, Stargrass, Starwort,*

Blazing star, Aloe-root, Bitter grass, Black root, Unicorn root, Ague root, Ague grass, Devil's bit, Mealy starwort, (F.) *Alétris Meunier. Nat. Ord.* Asphodeleæ. *Sex. Syst.* Hexandria Monogynia. This plant is an intense and permanent bitter, and is used as a tonic and stomachic. It is common in the United States.

ALEURON, Farina.

ALEUROTESIS. See Cribration.

ALEXANDERS, Smyrnium olusatrum.

ALEXANDRI ANTIDOTUS AUREA. See Alexandrine.

ALEXAN'DRINE, *Emplas'trum Alexan'dri.* A garlic plaster, invented by Alexander, contemporary of Mesuë. Other ancient preparations were called 'Alexandrine;' as the *Alexan'dri antid'otus au'rea*, used in apoplexy; the *Collyr'ium siccum Alexandri'num*, or '*Collyrium of King Alexander*,' mentioned by Aëtius.

ALEXICACUM, Amuletum, Alexipharmic.

ALEXIPHAR'MIC, *Alexiphar'macus, Antiphar'macus, Alexica'cus, Caco-alexite'ria, Lexiphar'macus*, (F.) *Alexipharmaque*, from αλεξειν, 'to repel,' and φαρμακον, 'poison.' A term formerly used for medicines which were considered proper for expelling from the body various morbific principles, or for preventing the bad effects of poisons taken inwardly.

ALEXIPYRETICUS, Febrifuge.

ALEXIR, Elixir.

ALEXITE'RIA, from αλεξασθαι, 'to assist.' Originally, *alexiterium* was used synonymously with remedy. In more modern times it has been applied to a class of medicines, that counteract poisons placed in contact with the exterior of the body, in contradistinction to alexipharmic.

ALEXITERIUM CHLORICUM, see Disinfection—a. Nitricum, see Disinfection.

ALÈZE, Alèse.

ALFUSA, Tutia.

ALGALIE, Catheter.

AL'GAROTH, *Al'garot, Algaro'thi Pulvis, Pulvis Angel'icus, Ox'idum* seu *submu'rias Stib'ii præcipitan'do para'tum, Antimo'nii Ox'ydum, Ox'idum antimo'nii Nitro-muriat'icum, Ox'idum Stib'ii Ac''ido Muriat'ico oxygena'to para'tum, Mercu'rius Vitæ, Mercu'rius Mortis*, so called from Victor Algarothi, a Veronese physician. The *sub-muriate of protoxide of antimony*, separated from the muriate of antimony by washing away some of its acid. It was formerly much used as an emetic, purgative, and diaphoretic.

ALGE'DO, from αλγος, 'pain.' Violent pain about the neck of the bladder, occasionally occurring in gonorrhœa.—Cockburn.

ALGEDON, Pain.

ALGEMA, Pain.

ALGESIS, Pain.

ALGETICUS. See Algos.

AL'GIDUS, from *algor*, 'cold.' That which is accompanied by coldness.

AL'GIDA FEBRIS, *F. horrif'ica, F. quer'quera.* (F.) *Fièvre algide.* A pernicious intermittent, accompanied by icy coldness, which is often fatal in the second or third paroxysm.

ALGOR, Rigour.

ALGOS, αλγος, 'pain.' See Pain. Hence, *Alget'icus*, 'painful,' as *Epilep'sia alget'ica.* The suffix *algia* has the same signification, as in *Cephalalgia, Pleuralgia, Neuralgia*, &c.

ALHAGI, Agul.

ALIBILIS, Nutritious.

AL'ICA, *Hal'ica, Farina'rium, Chondrus*, from *alere*, 'to nourish.' A grain from which the ancients made their tisanes; supposed, by some, to have been the *Triticum Spelta.* At times, it seems to have meant the tisane itself.

AL'ICES, from αλιζω, 'I sprinkle.' Spots which precede the eruption of smallpox.

ALIENATIO, Anomalia.

ALIENATION, MENTAL, Insanity.

ALIENUS, Delirious.

ALIFORMES MUSCULI, Pterygoid muscles.

ALIFORMIS, Pterygoid.

ALIGULUS, Confection.

ALIMELLÆ, Parotid.

AL'IMENT, *Alimen'tum, Ciba'rium, Broma, Comis'tē, Cibus, Esca, Nutri'tus, Nutrimen'tum, Sitos, Trophē*, (F.) *Aliment, Nourriture*, from *alere*, 'to nourish.' Food. Any substance which, if introduced into the system, is capable of nourishing it and repairing its losses.

The study of aliments forms one of the most important branches of hygiene. They are confined to the organized kingdom,—the mineral affording none.

As regards the immediate principles which predominate in their composition, they have been classed, but imperfectly, as follows.

TABLE OF ALIMENTS.

1. *Feculaceous.*	Wheat, barley, oats, rye, rice, Indian corn, potato, sago, peas, beans, &c.
2. *Mucilaginous.*	Carrot, salsify, beet, turnip, asparagus, cabbage, lettuce, artichoke, melon, &c.
3. *Saccharine.*	Sugar, fig, date, raisin, apricot, &c.
4. *Acidulous.*	Orange, currant, gooseberry, cherry, peach, strawberry, raspberry, mulberry, prune, pear, apple, sorrel, &c.
5. *Oleaginous and Fatty.*	Cocoa, olive, sweet almond, nut, walnut, animal fat, oil, butter, &c.
6. *Caseous.*	Different kinds of milk, cheese.
7. *Gelatinous.*	Tendon, aponeurosis, true skin, cellular texture; very young animals.
8. *Albuminous.*	Brain, nerve, eggs, &c.
9. *Fibrinous.*	Flesh and blood.

Dr. Prout has four great classes—the *aqueous, saccharine, oleaginous*, and *albuminous:*—Dr. Pereira twelve;—the *aqueous, mucilaginous* or *gummy, saccharine, amylaceous, ligneous, pectinaceous, acidulous, alcoholic, oily* or *fatty, proteinaceous, gelatinous*, and *saline.*

ALIMENTARY TUBE, Canal, alimentary.

ALIMENTATION, *Alimenta'tio.* The act of nourishing.

ALIMENTUM, Pabulum.

ALIMOS, Glycyrrhiza.

ALINDE'SIS, from αλινδομαι, 'to be turned about.' A species of exercise, which consisted in rolling in the dust, after having been anointed with oil.—Hippocr.

ALIPÆ'NOS. *Alipæ'num, Alipan'tos*, from α, priv. and λιπαινειν, 'to be fat.' An epithet formerly given to every external remedy, devoid of fat or moisture; such as powders.—Galen.

ALIPANTOS, Alipænos.

ALIP'TA, *Aliptes*, from αλειφω, 'I anoint.' He who anointed the Athletæ after bathing. The place where this was done was called *Alipte'rium.*

ALIP'TICA, same etymon. The part of ancient medicine, which treated of inunction, as a means of preserving health.

ALISIER BLANC, Cratægus aria.

ALISMA, Arnica montana.

ALIS'MA PLANTA'GO, *Water Plantain*, (F.) *Plantain d'Eau*. *Nat. Ord.* Alismaceæ. *Sex. Syst.* Hexandria Polygynia. The fresh root is acrid, and the dried leaves will vesicate. The leaves have been proposed as substitutes for Uva Ursi.

ALITURA, Nutrition.

AL'KALE, *O'leum Galli'næ*. An ancient pharmaceutical name for pullets' fat.

ALKALESCENCE, Alcalescence.

ALKALI, see Alcali—a. Ammoniacum causticum, Ammonia—a. Ammoniacum spirituosum, Spiritus ammoniæ—a. Minerale nitratum, Soda, nitrate of—a. Minerale phosphoratum, Soda, phosphate of—a. Minerale salinum, Soda, muriate of—a. Vegetable, Potash—a. Vegetabile cum aceto, Potassæ acetas—a. Vegetabile fixum causticum, Potassa fusa—a. Volatile, Ammonia—a. Volatile causticum, Ammonia—a. Volatile, concrete, Ammoniæ carbonas—a. Volatile nitratum, Ammoniæ nitras—a. Volatile tartarizatum, Ammoniæ tartras—a. Volatile vitriolatum, Ammoniæ sulphas.

ALKANET, BASTARD, Lithospermum officinale—a. Dyer's, Anchusa tinctoria—a. Garden, Anchusa officinalis—a. Officinal, Anchusa officinalis.

ALKAR, Medicament.

ALKEKENGI, Physalis.

ALKER'MES, *Confec'tio Alker'mes, Alcher'mes*. A celebrated electuary, composed of a multitude of substances. It was so called from the grains of kermes contained in it. It was used as a stimulant. Also, kermes (q. v.)

ALKERVA, see Ricinus communis.

ALKITRAN, Cedria.

ALKOOL, Alcohol.

ALLA, Cerevisia.

ALLAITEMENT, Lactation.

ALLAMAN'DA, *A. Cathar'tica, Orel'lia grandiflora, Gal'arips, Echi'nus scandens, Apoc'ynum scan'dens*. A shrub, native of Guiana, the infusion of whose leaves is said by Linnæus to be useful in colica Pictonum.

ALLANTOIC ACID, *Ac'idum allanto'icum*. A peculiar acid, found in the liquor of the allantois of the cow.

ALLANTOIS, *Allantoi'des, Membra'na urina'ria, M. Farcimina'lis, M. Intestina'lis*, the *Allantoid Vesicle*, from αλλας, 'a sausage,' and ειδος, 'shape.' A sort of elongated bladder, between the chorion and amnion of the fœtus, and communicating with the bladder by the urachus. It is very apparent in quadrupeds, but not in the human species. The fluid of the allantois has been considered inservient to the nutrition of the fœtus; but our ideas, in regard to the vesicle, in man, are far from being determinate.

ALLANTOTOX'ICUM, from αλλας, 'a sausage,' and τοξικον, 'a poison.' The Germans have given this name to a poison developed in sausages formed of blood and liver.

ALLELUIA, Oxalis acetosella.

ALLE'VIATOR: from *ad*, 'to,' and *levare*, 'to raise.' A soother. An instrument for raising invalids, invented by Mr. Jenks of Rhode Island. It consists of two upright posts, about six feet high, each supported by a pedestal; of two horizontal bars at the top, rather longer than a common bedstead; of a windlass of the same length, placed six inches below the upper bar; of a cog-wheel and handle; of linen belts from six to twelve inches wide; of straps secured at one end of the windlass; and at the other having hooks attached to corresponding eyes in the linen belts, and of a head piece made of netting. The patient lying on his mattress, the surgeon passes the linen belts beneath his body, attaching them to the hooks on the ends of the straps, and adjusting the whole at the proper distance and length, so as to balance the body exactly, and then raises it from the mattress by turning the handle of the windlass. To lower the patient again, and replace him on the mattress, the windlass must be reversed.

ALLGOOD, Chenopodium bonus Henricus.

ALLHEAL, Heracleum spondylium.

ALLIA'CEOUS, *Allia'ceus*, from *allium*, 'garlic.' Belonging to garlic, as *alliaceous* odour.

ALLIAIRE, Alliaria.

ALLIA'RIA, from *allium*, its smell resembling garlic. *A. officina'lis, Erys'imum allia'ria, Jack-in-the-hedge, Stinking hedge Mustard, Hedge Garlic, Sauce-alone, Hes'peris allia'ria*, (F.) *Alliaire*. This plant has been sometimes given in humid asthma and dyspnœa. It is reputed to be diaphoretic, diuretic, and antiscorbutic.

The Parisian Codex has a compound syrup of alliaria, *Sirop d'erysimum composé*, which is used in hoarseness.

ALLIGATURA, Fascia, Ligature.

AL'LIUM, from *oleo*, 'I smell.' *A. sati'vum, Theriaca rustico'rum, Ampelop'rasum, Scor'odon, Garlic*, (F.) *Ail*. *Nat. Ord.* Asphodeleæ. *Sex. Syst.* Hexandria Monogynia. A native of Sicily, but cultivated for use. The *bulbs* or *cloves, Ag'lithes*, have a strong, offensive, and penetrating odour; and a sweetish, biting, and caustic taste. *Internally*, garlic is stimulant, diuretic, expectorant, emmenagogue (?), diaphoretic, and anthelmintic. *Externally*, it is rubefacient, maturative, and repellent.

Dose, one to six cloves, swallowed whole, or from f. ʒss to f. ʒij of the juice.

Taylor's Remedy for Deafness, a nostrum, appears to consist of *garlic*, infused in *oil of almonds*, and coloured by *alkanet root*.

ALLIUM ASCALONICUM, *Échalotte*.

AL'LIUM CEPA, *Common Onion, Cepul'la, Crom'myon*, (F.) *Oignon*. Acrid and stimulating, and possessing very little nutriment. Onions have been used as stimulants, diuretics, and anthelmintics. The boiled or roasted onion, as a cataplasm, is emollient and maturating. The fresh root is rubefacient. The expressed juice is sometimes used in otalgia and in rheumatism.

ALLIUM GALLICUM, Portulaca.

AL'LIUM PORRUM, *Porrum, Prasum*, πρασον, the *Leek* or *Porret*; (F.) *Poireau, Porreau*. It possesses the same properties as the onion.

The virtues of the genus *Allium* depend upon an acrid principle, soluble in water, alcohol, acids, and alkalies.

ALLIUM REDOLENS, Teucrium scordium.

AL'LIUM VICTORIA'LE, *Victoria'lis longa*. The root, which, when dried, loses its alliaceous smell and taste, is said to be efficacious

in allaying the abdominal spasms of pregnant women (?)

ALLOCHOOS, Delirious.

ALLOCHROMA'SIA, from *αλλος*, 'another,' and *χρωμα*, 'colour.' A change of colour.

ALLOIOSIS, Alteration.

ALLOIOTICUS, Alterative.

ALLONGEMENT, Elongation.

ALLOPATH, Allopathist.

ALLOPATH'IC, *Allopath'icus, Heteropath'ic*, from *αλλος*, 'another,' and *παθος*, 'affection.' Relating to the ordinary method of medical practice, in contradistinction to the homœopathic.

ALLOP'ATHIST, *Allopath*, same etymon. One who follows allopathy.

ALLOP'ATHY, *Allopathi'a*, same etymon. The opposite to homœopathy. The ordinary medical practice.

ALLOPHASIS, Delirium.

ALLOTRIODON'TIA, from *αλλοτριος*, 'foreign,' and *οδους*, 'a tooth.' Transplantation of teeth.

ALLOTRIOGEUSTIA, Parageustia.

ALLOTRIOPHAGIA, Malacia.

ALLOTRIU'RIA, from *αλλοτριος*, 'foreign,' and *ουρον*, 'urine.' Admixture of foreign matters with the urine.

AL'LOTROPISM; from *αλλος*, 'another,' and *τροπος*, 'a turn or change.' A term recently introduced into chemistry; the object of which is to express the property possessed by certain simple bodies, of assuming different qualities on being subjected to certain modes of treatment. Carbon, for example, furnishes three forms—plumbago, charcoal, and diamond.

ALLSPICE, see Myrtus pimenta—a. Bush, Laurus Benzoin—a. Wild, Laurus Benzoin.

ALLUCINATIO, Hallucination.

ALLURE, Influenza.

ALMA, Water.

ALMARIAB, see Plumbi oxydum semivitreum.

ALMEZERION, Cneorum tricoccum.

ALMOND, Amygdala.

ALMOND BLOOM. A liquid cosmetic, formed of *Brazil dust*, ℥j, *water*, Oiij; boil and strain; and add *isinglass* ℥vj, *grand sylvestria* ℥ij, or *cochineal* ℥ij, *alum* ℥j, *borax* ℥iij; boil again, and strain through a fine cloth.

ALMOND CAKE, see Amygdala—a. of the Ear, Tonsil—a. Paste, see Amygdala—a. Powder, see Amygdala—a. of the Throat, Tonsil.

ALNUS GLUTINO'SA, *Europe'an Alder.* A tree which grows in Europe, in moist places. The bark and leaves are astringent and bitter; and hence are employed in intermittents, and as a tonic and astringent.

ALNUS SERRAT'ULA, *American Alder*, has similar properties.

ALNUS NIGRA, Rhamnus frangula.

ALOEDA'RIUM. A compound medicine, containing aloes.—Gorræus.

ALOE ROOT, Aletris farinosa.

AL'OES, *Al'oë, Fel Na'turæ.* The inspissated juice of the *aloë*. *Nat. Ord.* Asphodeleæ. *Sex. Syst.* Hexandria Monogynia.

ALOES CABALLI'NA, *A. Guinien'sis, Horse-aloes.* Used chiefly for horses. It is collected in Spain and Portugal, and is very coarse.

ALOES HEPAT'ICA, *A. vulga'ris, A. Barbaden'sis, Hepat'ic aloes, Bombay aloes, Barbadoes aloes, A. vulgaris extractum*, (F.) *Aloes en calébasses, A. des Barbades.* This species has a very disagreeable odour, and an intensely bitter and nauseous taste. Properties the same as the last.

ALOES SUCCOTORI'NA, *Söc'otrine aloes, Turkey aloes, East India aloes, Alöes lu'cida, A. Zoctori'nia, A. spica'ta, A. spica'tæ extrac'tum, A. extractum, An'ima Aloes*, is the best species. Its odour is not unpleasant, taste very bitter, and slightly aromatic; colour reddish-brown, with a shade of purple; mass hard, friable; fracture conchoidal and glossy; soluble in dilute alcohol. Powder of a bright cinnamon-yellow colour. It is cathartic, warm, and stimulating; emmenagogue, anthelmintic, and stomachic. As a cathartic, it affects the rectum chiefly. *Dose*, as a cathartic, gr. v to ℈j in pill.

ALOES WOOD, Agallochum.

ALOET'IC, *Aloet'icus.* A preparation which contains aloes.

ALOGOTROPH'IA, from *αλογος*, 'disproportionate,' and *τροφη*, 'nutrition.' Irregular nutrition. Used particularly to designate the irregular manner in which the nutrition of bones is operated in rickety individuals.

ALOPECES, Psoæ.

ALOPE'CIA, from *αλοπηξ*, 'a fox;' (this animal being said to be subject to the affection.) *Capillo'rum defluvium, Athrix depi'lis, Phalacro'tis, A'rea, Depila'tio, Tricho'sis Athrix, Gangræ'na Alope'cia.* Falling off of the hair; loss of the hair. When this is confined to the crown of the head, it is called *calvities* (q. v.), although the terms are often used synonymously.

ALOPECIA AREATA, Porrigo decalvans.

ALOUCHE, Cratægus aria.

ALOUCH'I. The name of a gum procured from the canella alba tree.

ALOUCHIER, Cratægus aria.

ALPAM. A shrub which grows on the coast of Malabar. Certain parts of this, infused in oil, form an antipsoric ointment. The juice of the leaves, mixed with that of *calamus*, is employed against the bites of serpents.

ALPHENIC, Saccharum candidum.

ALPHITEDON, see Fracture.

ALPHITON, *αλφιτον*, *Polen'ta, Fari'na.* Any kind of meal. Toasted barley-meal.—Hippocrates. Polenta means also a food composed of Indian meal, cheese, &c. See Farina.

ALPHON'SIN, *Alphonsinum.* A kind of bullet forceps, similar to a *Porte-crayon*, so called from the inventor, Alphonso Ferri, of Naples.—Scultetus.

ALPHOS, Lepra alphoides.

ALPHOSIS ÆTHIOPICA, See Albino.

ALPINIA CARDAMOMUM, Amomum Cardamomum—a. Galanga, Maranta galanga.

ALPISTE, Phalaris Canadiensis.

ALSANDERS, Smyrnium olusatrum.

ALSI'NE ME'DIA, from *αλσος*, 'a grove,' because growing abundantly in woods. *Morsus Galli'næ, Holos'teum Alsi'nē, Mouse-ear, Chickweed*, (F.) *Mouron des Oiseaux, Morgeline.* This plant, if boiled tender, may be eaten like spinach, and forms an excellent emollient poultice. It was formerly regarded as a vulnerary and detergent.

ALTAFOR, Camphor.

ALTER SEXUS, Sex female.

ALTERANS, Alterative.

ALTÉRANT, Alterative.

ALTERA'TION, *Altera'tio*, from *alter*, 'other,' *Alloio'sis*. This word is used in France to express a morbid change which supervenes in the expression of the countenance (*altération de la face*,) or in the structure of an organ (*altération organique*,) or in the nature of fluids excreted (*altération de l'urine, des larmes, du lait, &c.*)

Alteration is also used in an entirely different sense, to express intense thirst in disease. In this case its etymology is different. It comes from *haleter*, and was formerly written *haletération*.

ALTERATIVE, *Alterans, Alloiot'icus*. A medicine considered to be capable of producing a salutary change in a disease, but without exciting any sensible evacuation. As Medicine improves, this uncertain class of remedies becomes, of necessity, diminished in number.

(F.) *Altérant*. (The French term likewise means, that which causes thirst,—*Siticulo'sus, Dipset'icus*, as *Altérer* means both to change and to cause thirst. *S'altérer*, is, to experience a change for the worse,—*corrum'pi*.)

ALTERCANGENON, Hyoscyamus.

ALTERCUM, Hyoscyamus.

ALTHÆ'A, from *ἀλθειν*, 'to heal;' *A. officina'lis, Malvavis'cum, Aristalthæ'a, Hibis'cus, Ibis'cha mismal'va, Bismal'va, Marsh-mallow*. (F.) *Guimauve*. *Nat. Ord.* Malvaceæ. *Sex. Syst.* Monodelphia Polyandria. The leaves and root contain much mucilage. They are emollient and demulcent, and are employed wherever medicines, possessing such properties, are required. In the Ph. U. S., Althæa is the root of Althæa officinalis.

ALTHANAIHA, Orpiment.

ALTHEUS, Physician.

ALTHEXIS, Curation.

ALTILIBAT, Terebinthina.

ALU'DEL, *Alu'tel, Vitrum sublimato'rium*. A hollow sphere of stone, glass, or earthenware, with a short neck projecting at each end, by means of which one glass might be set upon the other. The uppermost had no aperture at the top. Aludels were formerly used in the sublimation of various substances.

ALUM, Symphytum—a. Egyptian, Ægyptia stypteria.

Alum, Roche, *Alu'men de Rochi*, (F.) *Alun de Roche*. So called from Roccha in Syria, where there was a manufactory. It is in pieces of the size of an almond, covered with a reddish efflorescence.

Common Roche Alum, A. Rochi Gallis. Fragments of common alum, moistened and shaken with prepared bole. It is white when broken.

Alum Root, Geranium maculatum, Heuchera cortusa—a. Solution of, compound, Liq. aluminis compos.

ALU'MEN, (an Arabic term, *alum*) *Alum, Hypersul'phas alu'minæ et Potas'sæ, Potas'sæ alu'mino-sulphas, Sul'phas Aluminæ Acid'ulus cum Potas'sâ, Sulphas Alu'minæ, Sul'phas Kal'ico-alumin'icum, Supersul'phas alu'minæ et potas'sæ, Argil'la sulphu'rica alcalisa'ta, A. vitriola'ta, Stypte'ria, Supersul'phas Argil'læ alcalisa'tum, Argilla Kalisulphurica*. (F.) *Alun*.

Alumen Catinum, Potash of commerce—a. Fixum, see Potash—a. Kinosatum, Pulvis sulphatis aluminæ compositus.

Alu'men Commu'nĕ, *Common alum, English alum, Rock alum, Alumen facti''tium, A. crystall'inum, A. ru'peum*, (F.) *Alun d'Angleterre*, is the variety usually employed. It is in octahedral crystals, but generally in large, white, semitransparent masses; has a sweetish, styptic taste; effloresces in the air, and is soluble in 16 parts of water at 60°. It is tonic and astringent, and as such is used internally and externally. Dose, gr. v. to xv.

Alu'men Exsicca'tum, *Alu'men ustum, A. calcina'tum, Sulphas alu'minæ fusus, Argil'la sulphu'rica usta, Burnt alum, dried alum*. (F.) *Alun calciné*, (*Alum melted in an earthen vessel until ebullition ceases.*) Escharotic.

Alu'men Roma'num, *Roman alum, A. Ru'tilum, A. Rubrum*. (F.) *Alun de Rome*. In crystals, which are of a pale red when broken, and covered with a reddish efflorescence.

ALUMINA, ACETATE OF, Aluminæ Acetas—a. Pura, Argilla pura—a. Sulphate of, Aluminæ Sulphas.

ALU'MINÆ ACE'TAS, *Ac''etate of Alu'mina*. A deliquescent salt, obtained by the addition of *acetate of lead* to *sulphate of alumina and potassa*. It possesses the same properties as the sulphate of alumina.

Alu'minæ et Potassæ Hypersulphas, Alumen—a. et Potassæ supersulphas, Alumen—a. sulphas, Alumen.

Alu'minæ Sulphas, *Sulphate of Alu'mina*. Simple sulphate of alumina may be made by the direct combination of *alumina* and *sulphuric acid*, and contains 30 per cent. of the former, to 70 per cent. of the latter. It is a deliquescent salt; and is an excellent antiseptic and detergent to ulcers. It is chiefly used to preserve dead bodies—a strong solution being injected into the arteries.

Aluminæ Sulphas Acidulus cum Potassâ, Alumen—a. Sulphas fusus, Alumen exsiccatum.

ALUMINE FACTICE, Argilla pura.

ALUN, Alumen.

ALUNSEL, Gutta.

ALUS, Symphytum.

ALUSIA, Hallucination—a. Hypochondriasis, Hypochondriasis.

ALUTEL, Aludel.

ALVAQUILLA, Psoralea glandulosa.

ALVEARIUM, Auditory canal, external.

ALVE'OLAR. *Alveola'ris*, from *alveus*, 'a cavity.' (F.) *Alvéolaire*. That which relates to the alveoli.

Alve'olar Arches. (F.) *Arcades alvéolaires*, are formed by the margins of the two jaws, which are hollowed by the Alveoli (q. v.)

Alve'olar Artery, *Supra-max'illary A.* (*Artère sus-maxillaire* of Chaussier,) arises from the internal maxillary, descends behind the tuberosity of the upper jaw, and gives branches to the upper molar teeth, gums, periosteum, membrane of the maxillary sinus, and buccinator muscle.

Alve'olar Membranes are very fine membranes, situate between the teeth and alveoli, and formed by a portion of the sac or follicle which enclosed the tooth before it pierced the gum. By some this membrane has been called the *alveolo-dental periosteum*.

Alve'olar Vein. This has a similar distribution with the artery.

ALVÉOLE, Alveolus.

ALVÉOLO-LABIAL, Buccinator.

ALVE'OLUS, same etymon. *Bo'trion, Bo'thrion, Frena, Mortariolum, Hol'micos, Præsepio-*

lum, Phat'nion, Præse'pium, Patnē, Pathnē. (F.) *Alvéole.* The alveoli are the *sockets of the teeth*, into which they are, as it were, driven. Their size and shape are determined by the teeth which they receive, and they are pierced at the apex by small holes, which give passage to the dental vessels and nerves.

ALVEUS, Auge—a. Ampullosus, Receptaculum chyli—a. Ampullescens, thoracic duct—a. Communis: see Semicircular canals—a. Utriculosus: see Semicircular canals.

ALVI EXCRETIO, Defecation—a. Fluxus aquosus, Diarrhœa—a. Profluvium, Diarrhœa.

ALVIDUCUS, Laxative.

ALVINE, *Alvi'nus*, from *alvus*, 'the abdomen.' That which relates to the lower belly, as *alvine dejections, alvine flux, alvine obstructions*, (q. v.) &c.

ALVUS, Abdomen, Uterus—a. Adstricta, Constipation—a. Dura, Constipatio—a. Renum, Pelvis of the kidney—a. Tarda, Constipation.

ALYCE, Anxiety.

AL'YPON, from α, privative, and λυπη, 'pain.' An acrid, purging plant, described by Matthiolus. By some it has been supposed to be the *Globula'ria alypum* of botanists.

ALYSIS, Anxiety.

ALYSMUS, Anxiety.

ALYSSUM PLINII, Galium Mollugo.

AL'ZILAT. In some of the Arabian writers, a weight of three grains.—Ruland and Johnson.

AMADOU, Boletus igniarius.

AMADOUVIER, Boletus igniarius.

AMAIGRISSEMENT, Emaciation.

AMANDES, See Amygdala.

AMANI'TÆ, from α, priv. and μανια, 'madness:' i. e. 'not poisonous.' A name given, by the Greeks and Romans, to the edible *champignons*. *Amanita* forms, at the present day, a genus, some of which are edible, others poisonous. Amongst others, it contains the *Agaricus aurantiacus* and *A. pseudo-aurantiacus*.

AMARA DULCIS, Solanum dulcamara.

AMARACI'NUM. An ancient and esteemed plaster, containing several aromatics, the marjoram, αμαρακος, in particular.

AMARACUS, Origanum majorana.

AMARITIES, Bitterness.

AMARITUDO, Bitterness.

AMAROR, Bitterness.

AMA'RUS, *Picros*, bitter. (F.) *Amèr*. The bitter principle of vegetables is the great natural tonic, and hence *bitters*, as they are termed collectively, belong to the class of tonics. Several are used in medicine; the chief are, gentian, quassia, cinchona, calumba, dog-wood, &c.

AMASE'SIS, *Amasse'sis*, from α, privative, and μασησις, 'mastication.' Mastication when impeded or impracticable.

AMATORII, Oblique muscles of the eye.

AMATORIUM VENEFICIUM, Philter.

AMATORIUS MUSCULUS, Obliquus superior oculi.

AMAURO'SIS, *Obfusca'tio, Offusca'tio*, from αμαυρος, 'obscure.' *Drop serene, Gutta sere'na, Catarac'ta nigra, Parop'sis amauro'sis, Immobil'itas pupil'læ, Black cat'aract.* (F.) *Goutte-sereine, Cataracte noire, Anopticonervie* (Piorry.) Diminution, or complete loss of sight, without any perceptible alteration in the organization of the eye; generally, perhaps, owing to loss of power of the optic nerve or retina. Counter-irritants are the most successful remedial agents, although the disease is always very difficult of removal, and generally totally incurable.

AMAUROT'IC, *Amaurot'icus;* same etymon. Affected with amaurosis.

AMAUROTIC CAT'S EYE. A name given by Beer to an amaurotic affection, accompanied by a remarkable change of colour in the pupil, which presents, apparently in the fundus of the eye, a lighter tint, yellowish or brownish yellow, instead of its natural clear black.

AMBARUM, Ambergris—a. Cineritium, Ambergris.

AMBĒ, from αμβαινω, 'I ascend;' *Ambi.* A superficial eminence on a bone. Also, an old surgical machine for reducing dislocations of the shoulder; the invention of which is ascribed to Hippocrates. It is no longer used.—Hipp., Scultetus.

AMBER, Succinum—a. Liquid: see Liquidambar styraciflua.

AM'BERGRIS. *Ambra gri'sea, Ambor, Ambra cinera'cea, A. ambrosiaca, Am'barum, Suc'cinum cine'reum, S. gri'seum, Am'barum cineri''tium.* A concrete substance, of the consistence of wax, cineritious colour studded with yellow and blackish spots, and exhaling a very pleasant odour. It seems highly probable that ambergris is formed in the intestines of the whale, and voided with its excrements. Like all aromatic substances, ambergris is slightly antispasmodic and excitant; but it is oftener employed as a perfume than as a medicine.

AMBIA. A liquid, yellow bitumen, the smell and virtues of which are similar to those of the resin tacamahaca. It is obtained from a spring in India.

AMBIDEX'TER, *Amphidex'ios*, from *ambo*, 'both,' and *dexter*, 'right.' One who uses *both* hands with equal facility. Celsus says the surgeon ought to be '*non minus sinistrâ quam dextrâ promptus.*' One of the aphorisms of Hippocrates says, that a woman is never ambidexter. This is a mistake.

AMBILÆVUS, Ampharisteros.

AMBLOMA, Abortion.

AMBLOSIS, Abortion.

AMBLOTHRIDION, Abortion.

AMBLOTICUS, Abortive.

AMBLUS, αμβλυς, 'obscure.' Hence,

AMBLYOGMOS, Amblyopia.

AMBLYO'PIA, from αμβλυς, 'obscure,' and ωψ, 'the eye.' *Amblyos'mos, Amblyog'mos, Amplio'pea* (so called by some, according to Castelli, *ob ignorantiam Græcæ linguæ.*) *Hebetu'do visûs. Feebleness of sight.* (F.) *Vue faible.* First degree of Amaurosis.—Hippocr.

AMBLYOPIA CREPUSCULARIS, Hemeralopia—a. Dissitorum, Myopia—a. Meridiana, Nyctalopia—a. Proximorum, Presbytia.

AMBLYOSMOS, Amblyopia.

AMBON, αμβων, 'the raised rim of a shield or dish,' from αμβαινω, 'I ascend.' The fibro-cartilaginous rings or *bourrelets*, which surround the articular cavities, as the glenoid cavity of the scapula, the acetabulum, &c., have been so called.—Galen.

AMBOR, Ambergris.

AMBRA, Succinum—a. Ambrosiaca, Ambergris—a. Cineracea, Ambergris.

AMBRAGRISEA, Ambergris.

AMBRE BLANC, Succinum (album)—*a. Jaune*, Succinum.

AMBRETTE, Hibiscus abelmoschus.

AMBRO'SIA, from *α*, privative, and *βροτος*, 'mortal.' Food which makes immortal, or the food of immortals. The food of the gods.—Homer. See also, Chenopodium Botrys.

AMBRO'SIA MARIT'IMA. A plant which grows on the shores of the Levant, and has a pleasant, bitter and aromatic taste. It is given in infusion, as a tonic and antispasmodic.

AMBROSIE DU MEXIQUE, Chenopodium Ambrosioides.

AMBULANCE, (F.) from *ambulare*, 'to walk.' A military hospital attached to an army, and moving along with it. Also called *Hôpital ambulant*.

AMBULANT, (F.) *Am'bulans*, *Ambulati'vus*, *Am'bulative*. A morbid affection is said to be *ambulante*, when it skips from one part to another; as *Erisypèles ambulants*, &c. When blisters are applied successively on different parts of the body, they are called *Vésicatoires ambulants*.

AMBULATIO, Walking.

AMBULEIA. Cichorium intybus.

AM'BULI. The Brachmanic name for an Indian aquatic herb, which appears to belong to the family *Lysimachiæ*. The whole plant has a sweet smell. Its decoction has a very bitter taste, and is an excellent febrifuge. It is also taken in milk in cases of vertigo.

AM'BULO FLATULEN'TUS ET FURIO'SUS. *Flatus furio'sus*, *Vare'ni*. Painful, mobile, and periodical tumours affecting different parts, which were once considered as the effect of very subtile vapours—Michaelis. Their nature is by no means clear.

AMBUSTIO, Burn.

AMBUTUA, Pareira brava.

AMBUYA-EMBO. A very beautiful, creeping aristolochia of Brazil, the decoction of which is exhibited successfully in obstructions. It is also used in fumigation and in baths as a tonic.

ÂME, Anima.

AMELI. A Malabar shrub, belonging to a genus unknown. The decoction of its leaves is said to relieve colic. Its roots, boiled in oil, are used to repel tumours.

AMENIA, Amenorrhœa.

AMENOMA'NIA. A hybrid word, formed from the Latin *amœnus*, 'agreeable,' and *μανια*, 'mania.' A gay form of insanity.

AMENORRHŒ'A. *Parame'nia obstructio'nis*, *Menocryph'ia*, *Menosta'sia*, *Apophrax'is*, *Arrhœ'a*, *Defec'tus men'sium*, *Menstrua'tio impedi'ta*, *Ischome'nia*, *Ame'nia*, from *α*, privative, *μην*, 'a month,' and *ρεω*, 'I flow.' *Suppression of the menses*. (F.) *Suppression du flux menstruel*. This suppression is most commonly symptomatic, and hence the chief attention must be paid to the cause. Usually, there is an atonic state of the system generally, or of the uterus in particular, and hence chalybeates and other tonics are advisable.

Two great varieties of Amenorrhœa are commonly reckoned. 1. *A. Emansio'nis*, *Eman'sio men'sium*, *Menos'chesis*, *Menstrua'tio retenta*, or *Retention of the menses*, when the menses do not appear at the usual age: and, 2, *Suppres'sio Men'sium*, *Amenorrhœ'a Suppressio'nis*, *Interrup'tio menstruatio'nis*, *Menstrua'tio suppressa*, in which the catamenia are obstructed in their regular periods of recurrence. See Emansio Mensium, and Menses.

AMENORRHŒA DIFFICILIS, Dysmenorrhœa.

AMENTIA, Dementia. See, also, Fatuitas, and Idiotism.

AMER, Amarus.

AMERICANUM TUBEROSUM, Solanum tuberosum.

AMERTUME, Bitterness.

AM'ETHYST, *Amethys'tus*, from *α*, privative, and *μεθυω*, 'I am drunk.' A precious stone, to which the ancients attributed the property of preventing drunkenness. It was also used as an anti-diarrhœic and absorbent.—Pliny, Albertus Magnus.

AMETRIA, Intemperance.

AMICULUM, Amnios.

AMIDUM, Amylum.

AMINÆA, Anime.

AMINÆ'UM VINUM, *Amincan wine*, highly esteemed as a stomachic. Virgil distinguishes it from the Falernian.—Pliny, Macrobius, &c.

AMMA, Truss.

AMMI, *Ammi majus*, *Bishop's weed*, *A. Vulga're*. The seeds of this plant are aromatic and pungent. They are said to be carminative and diuretic, and are tonic and stomachic.

AMMI VERUM, see Sison Ammi—*a. des Boutiques*, see Sison ammi.

AMMION, Hydrargyri sulphuretum rubrum.

AMMOCHO'SIA, from *αμμος*, 'sand,' and *χεω*, 'I pour.' *Arena'tio*. Putting the human body in hot sand, for the cure of disease.

AMMO'NIA, *Ammo'nia*, or *Ammoni'acal gas*, *Volatile al'kali*, *Al'cali ammoni'acum caus'ticum*, *A. volati'le caus'ticum*, *Ammo'nia caus'tica*, *A. pura*, *Ammoni'acum*, *A. caus'ticum*, (F.) *Ammoniâque*, *Air alcalin*, *Gaz ammoniacal*. An alcali, so called, because obtained principally by decomposing sal ammoniac (*muriate of ammonia*) by lime. This gas is colourless, transparent, elastic, of a pungent, characteristic odour, and an acrid urinous taste. It turns the syrup of violets green, and its specific gravity is 0.596. When inhaled, largely diluted with common air, it is a powerful irritant. When unmixed, it instantly induces suffocation.

AMMONIA, ACETATE, SOLUTION OF, Liquor ammoniæ acetatis—a. Caustica liquida, Liquor ammoniæ—a. Chlorohydrate of, Ammoniæ murias—a. Citrate of, Ammoniæ citras—a. Hydriodate of, see Iodine—a. Hydrochlorate of, Ammoniæ murias—a. Hydrosulphuret of, Ammoniæ sulphuretum—a. Iodide of, see Iodine—a. Liniment of, strong, Linimentum ammoniæ fortius—a. Liquid, Liquor ammoniæ—a. Muriatica, Ammoniæ murias—a. Nitrata, Ammoniæ nitras—a. Præparata, Ammoniæ carbonas—a. Pura liquida, Liquor ammoniæ—a. Solution of, Liquor ammoniæ—a. Solution of, stronger, Liquor ammoniæ fortior—a. Tartrate of, Ammoniæ tartras.

AMMO'NIAC, GUM, *Ammoni'acum* (Ph.U.S.) *Gum'mi Ammoni'acum*, *Armoni'acum*, (F.) *Ammoniac*, *Gomme ammoniaque*, so called from Ammonia in Libya, whence it is brought. A gum-resin, the concrete juice of *Dore'ma ammoni'acum*, of Persia: a species of a genus allied to Ferula. It is in irregular, dry masses and tears, yellow externally, whitish within. Its odour is peculiar, and not ungrateful: taste nauseous, sweet, and bitter. It forms a white emulsion

with water: is soluble in vinegar; partially so in alcohol, ether, and solutions of the alcalies.

Gum ammoniacum is expectorant, deobstruent (?) antispasmodic, discutient, and resolvent. It is chiefly used, however, in the first capacity, and in the formation of certain plasters.

Two varieties are met with in the market, *Guttæ ammoni'aci*, the best; and *Lapis ammoni'aci*, the more impure.

AMMONIACÆ NITRAS, Ammoniæ nitras—a. Sulphas, Ammoniæ sulphas.

AMMONIACUM, Ammonia, Ammo'niac Gum—a. Succinatum, Spiritus ammoniæ fœtidus—a. Volatile mite, Ammoniæ carbonas.

AMMONIÆ ACETAS, Liquor ammoniæ acetatis—a. Arsenias, Arseniate of Ammonia.

Ammoniæ Car'bonas, *A. Subcar'bonas, Salt of bones, Sal Os'sium, Salt of wood soot, Sal Fulig''inis, Salt of urine, Volatile Sal Ammoniac, Baker's salt, Al'cali volat'ilē aëra'tum, A. volat'ile ammoniaca'lē, A. volat'ilē ex salē ammonia'co, Ammoni'acum volat'ilē mitē, Ammo'nium carbon'icum, A. subcarbo'neum, Carbonas ammo'niæ alkali'nus* seu *incomple'tus* seu *superammoni'acus, Hypocar'bonas ammo'niæ, Flores salis ammoni'aci, Sal cornu cervi volat'ilē, Sal volat'ilis salis ammoni'aci, Concrete volatile alkali, Carbonate* or *subcarbonate of ammonia, Ammo'nia præpara'ta, Sal volat'ilē, Smelling salt.* (F.) *Carbonate d'ammoniaque, Sel volatil d'Angleterre,* (*Ammon. muriat.* ℔j; *Cretæ* ℔iss. Sublime.—Ph. U. S.) A white, striated, crystalline mass, odour and taste pungent and ammoniacal: soluble in two parts of water: insoluble in alcohol: effloresces in the air. It is stimulant, antacid, diaphoretic, and antispasmodic. Dose, gr. v. to xv.

Ammoniæ Citras, *Citrate of Ammo'nia.* Made by saturating lemon or lime juice, or a solution of citric acid, with carbonate of ammonia. Dose, f. ℥ss.

It may be made extemporaneously, and taken in an effervescing draught. Seventeen grains of citric acid or half a fluidounce of lemon juice will be sufficient for thirteen grains of carbonate of ammonia.

Ammoniæ et Ferri Murias, Ferrum ammoniatum—a. Hydrosulphuretum, Liquor fumans Boylii—a. Hypocarbonas, Ammoniæ Carbonas

Ammo'niæ Mu'rias, *Muriate of Ammonia, Hydrochlo'rate of Ammo'nia, Chlorohydrate of Ammo'nia, Sal Ammoni'acum, Sal Ammo'niac, Sal Ammoni'acus, Ammo'nia Muriat'ica, Ammo'nium Muria'tum, Hydrochlo'ras Ammo'niæ, Sal Armoni'acum, Salmiac, Fuli'go Al'ba Philosopho'rum,* (F.) *Muriate d'Ammoniaque.* A saline concrete, formed by the combination of the muriatic acid with ammonia. In Egypt it is manufactured in large quantities by subliming the soot formed by burning camel's dung—26 pounds of the soot yielding 6 pounds. It is also prepared, in great quantities, by adding sulphuric acid to the volatile alkali obtained from soot, bones, &c., mixing this with common salt, and subliming.

Muriate of ammonia is inodorous, but has an acrid, pungent, bitterish, and urinous taste. Three parts of cold water dissolve one. Soluble also in 4 5 parts of alcohol. It is aperient and diuretic, but seldom used internally. Externally, it is employed, producing cold during its solution, in inflammations, &c.

Ammo'niæ Nitras, *Nitrate of Ammonia, Al'kali volat'ilē nitra'tum, Sal ammoni'acus nitro'sus, Ammo'nia nitra'ta, Nitras ammoni'acæ, Nitrum flammans.* (F.) *Nitrate d'Ammoniaque.* A salt composed of nitric acid and ammonia. It is diuretic and deobstruent.(?) Externally, it is discutient and sialogogue.

Ammo'niæ Sulphas, *Sulphate of Ammo'nia, Sulphas ammoni'acæ, Ammo'nium sulphu'ricum, Al'kali volat'ilē vitriola'tum, Sal Ammoni'acum secretum* Glauberi, *Sal secre'tus* Glauberi, *Vitriolum ammoniaca'lē,* (F.) *Sulphate d'Ammoniaque.* Formed by adding sulphuric acid either to sal ammoniac or to ammoniacal liquor. Its properties are like those of the muriate of ammonia.

Ammo'niæ Sulphure'tum, *Sul'phuret of Ammo'nia, Hydrosul'phuret of Ammo'nia, Hydrosul'phas Ammoniæ, Spir'itus* Begui'ni, *Sp. fumans* Begui'ni, *Sulphure'tum ammoni'acæ, Sp. salis ammoni'aci sulphura'tus, Liquor ammo'nii hydrothiodis, Hydrosulphure'tum Ammonicum, Hydrarg. ammoniaca'lē aque'sum, Hydrog''enosulphure'tum ammoni'acæ liq'uidum, Spir'itus sul'phuris volat'ilis, Hepar sulphuris volat'ilē,* Boyle's or Beguine's *fuming spirit.* (F.) *Hydrosulphate sulfuré d'Ammoniaque, Liqueur fumante de* Boyle, *Sulfure hydrogéné d'Ammoniaque, Hydrosulfure d'Ammoniaque,* Odour very fetid; taste nauseous and styptic; colour dark yellowish green. It is reputed to be sedative, nauseating, emetic, disoxygenizing, (?) and has been given in diabetes and diseases of increased excitement. Dose, gtt. viij. to gtt. xx.

Ammo'niæ Tartras, *Al'kali volat'ilē tartariza'tum, Sal Ammoni'acum tarta'reum, Tar'tarus ammo'niæ, Tartrate of Ammo'nia,* (F.) *Tartrate d'Ammoniaque.* A salt composed of tartaric acid and ammonia. It is diaphoretic and diuretic; but not much used.

AMMONIAQUE, Ammonia—*a. Hydrosulfure d',* Ammoniæ sulphuretum—*a. Hydrosulfate sulfuré d',* Ammoniæ sulphuretum—*a. Liquide,* Liquor ammoniæ—*a. Sulfure hydrogéné d',* Ammoniæ sulphuretum.

AMMONIO-CUPRICUS SUBSULPHAS, Cuprum ammoniatum.

AMMO'NION, from *αμμος,* 'sand.' An ancient collyrium of great virtues in many diseases of the eye, and which was said to remove sand from that organ.

AMMONIUM ARSENICUM, Arseniate of ammonia—a. Carbonicum, Ammoniæ carbonas—a. Iodide of, see Iodine—a. Muriaticum martiatum seu martiale, Ferrum ammoniatum—a. Muriatum, Ammoniæ murias—a. Subcarboneum, Ammoniæ carbonas—a. Sulphuricum, Ammoniæ sulphas.

AMNA ALCALIZATA, Water, mineral, saline.

AMNE'SIA, *Amnes'tia,* from *a,* privative, and *μνησις,* 'memory.' *Moria imbec''ilis am'nesia, Oblivio, Recollectio'nis jactu'ra, Dysæsthe'sia inter'na, Debil'itas memo'riæ. Memo'riæ dele'ta,* (F.) *Perte de Mémoire,* 'loss of memory.' By some Nosologists, amnesia constitutes a genus of diseases. By most, it is considered only as a symptom, which may occur in many diseases.

AMNESTIA, Amnesia.

AMNIOCLEP'SIS, from *Amnion,* and *κλεπτω,* 'I steal or take away clandestinely.' Premature escape of the liquor amnii.

AM'NIOS, *Am'nion, Am'nium, Charta vir-*

gin'ea, Armatu'ra, Agni'na membra'na, Pellu'cida membra'na, Galea, Indu'sium, Amic'ulum, Membra'na fœtum involvens. The innermost of the enveloping membranes of the fœtus. So called because first observed in the sheep.(?) αμνος, 'a sheep.' It is thin, transparent, perspirable, and possesses many delicate, colourless vessels, which have not been injected. It sends a prolongation, which serves as a sheath to the umbilical cord. Its external surface is feebly united to the chorion by cellular and vascular filaments. Its inner surface is polished, and is in contact with the body of the fœtus and the liquor amnii, (q. v.)

AMNIOT'IC ACID, *Ac''idum Am'nicum* vel *amniot'icum*. A peculiar acid, found by Vauquelin and Buniva in the liquor amnii of the cow.

AMNI'TIS or AMNII'TIS, from *Amnion* and *itis*, inflammation. Inflammation of the Amnion.

AMOME FAUX. Sison amomum.

AMO'MUM CARDAMO'MUM, *A. racemo'sum, A. verum, Alpin'ia cardamo'mum, Caro'pi. Mato'nia Cardamo'mum, Eletta'ria Cardamo'mum, Cardamo'mum Minus, Lesser* or *officinal Car'damom, Amo'mum repens.* (F.) *Cardamome de la Côte de Malabar, Cardamome.* The seeds of this East India plant have an agreeable, aromatic odour; and a pungent, grateful taste. They are carminative and stomachic: but are chiefly used to give warmth to other remedies. The fruit is called *Amomis*. Dose, gr. v. to ℈j.

AMOMUM GALANGA, Maranta G.

AMOMUM GRANUM PARADI'SI, *Cardamo'mum majus, Meleguet'ta, Maniguet'ta, Cardamo'mum pipera'tum, A. maximum,* (F.) *Graines de Paradis.* Greater cardamom seeds resemble the last in properties. They are extremely hot, and are not much used.

AMOMUM PIMENTA: see Myrtus pimenta—a. Zedoaria, Kæmpferia rotunda.

AMOMUM ZIN'GIBER, *Zin'giber officina'lē, Zin'giber album, Z. nigrum, Z. commu'ne, Zin'ziber, Ginger,* (F.) *Gingembre.* The *white* and *black ginger, Zin'ziber fuscum* and *album*, are the rhizoma of the same plant, *Zin'giber officina'lē*, the difference depending upon the mode of preparing them.

The odour of ginger is aromatic; taste warm, aromatic, and acrid. It yields its virtues to alcohol, and in a great degree to water. It is carminative, stimulant, and sialogogue.

Preserved Ginger, Zingib'eris Radix Condi'ta, Radix Zingib'eris condi'ta ex Indiâ allā'ta is a condiment, which possesses all the virtues of ginger.

Ginger-Beer Powders, may be formed of *white sugar*, ℥j and ℈ij. *ginger*, gr. v. *subcarbonate of soda*, gr. xxxvj in each *blue* paper: *acid of tartar*, ℈iss in each *white* paper,—for half a pint of water.

Oxley's Concentrated Essence of Jamaica Ginger, is a mere solution of *ginger* in *rectified spirit*.

AMOR, Love.

AMORGE, Amurca.

AMORPHUS, Anideus.

AMOSTEUS, Osteocolla.

AMOUR, Love.

AMOUREUX (muscle.) Obliquus superior oculi.

AMPAC, *Amp'acus*. An East India tree, the leaves of which have a strong odour, and are used in baths as detergents. A very odoriferous resin is obtained from it.

AMPAR, Succinum.

AMPELOCARPUS, Galium aparine.

AMPELOPRASUM, Allium.

AMPELOS, Vitis vinifera—a. Agria, Bryonia alba—a. Idæa, Vaccinium vitis idæa—a. Oinophoros, Vitis vinifera.

AMPHAMPHOTERODIOPSIA, Diplopia.

AMPHARISTEROS, *Ambilæ'vus*, "awkward;" from αμφι, and αριστερος, 'the left.' Opposed to ambidexter.

AMPHEMERINOS, Quotidian.

AMPHI, αμφι, 'both, around, on all sides.' Hence, a prefix in many of the following terms.

AMPHIAM, Opium.

AMPHIARTHRO'SIS, from αμφι, 'both,' and αρθρωσις, 'articulation.' A mixed articulation, in which the corresponding surfaces of bones are united in an intimate manner by an intermediate body, which allows, however, of some slight motion. Such is the junction of the bodies of the vertebræ by means of the intervertebral cartilages. This articulation has also been called *Diarthrose de Continuité*. The motion it permits is but slight.

AMPHIBLESTRODITIS, Retinitis.

AMPHIBLESTROIDES, Reticular.

AMPHIBRAN'CHIA, from αμφι, 'around,' and βραγχια, 'the throat.' *Amphibron'chia*. The tonsils and neighbouring parts.—Hippoc.

AMPHICAUSTIS, Vulva.

AMPHIDEXIOS, Ambidexter.

AMPHIDIARTHRO'SIS, from αμφι, 'about,' and διαρθρωσις, 'a moveable joint.' A name given by Winslow to the temporo-maxillary articulation, because, according to that anatomist, it partakes both of ginglymus and arthrodia.

AMPHIMERINA, Pertussis—a. Hectica. Hectic fever.

AMPHIMERINOS, Quotidian.

AMPHION, Maslach.

AMPHIPLEX, Perinæum.

AMPHISMELA, Knife, double-edged.

AMPHISMILE, Knife, double-edged.

AMPHISPHAL'SIS, *Circumac'tio, Circumduc'tio*, from αμφι, 'around,' and σφαλλω, 'I wander.' The movement of circumduction used in reducing luxations.—Hippoc.

AM'PHORA, per syncop. for αμφιφορευς, from αμφι, 'on both sides,' and φερω, 'I bear:' because it had two handles. A liquid measure among the ancients, containing above 7 gallons. Also called *Quadrantal, Cera'mium, Ceram'nium, Cadus*.

AMPHORIC RESPIRATION, See Cavernous Respiration.

AMPHRODIPLOPIA, Diplopia.

AMPLEXATIO, Coition.

AMPLEXUS, Coition.

AMPLIOPEA, Ambliopia.

AMPOSIS, Anaposis.

AMPOULES, Essera.

AMPULLA, Cavitas elliptica—a. Chylifera seu chyli, Receptaculum chyli.

AMPUL'LÆ, Phlyctænæ.

AMPUTATION, *Amputa'tio*, from *amputare*, (*am*, 'around,' and *putare*,) 'to cut off.' *Apot'omē, Apotom'ia*. The operation of separating by means of a cutting instrument, a limb or a part of a limb, or a projecting part, as the mamma, penis, &c., from the rest of the body. In the case of a tumour, the term *excision*, re-

moval, or *extirpation*, (F.) *Resection*, is more commonly used.

Amputation, Circular, is that in which the integuments and muscles are divided circularly.

Amputation, Flap, (F.) *A. à lambeaux*, is when one or two flaps are left so as to cover the stump, when the limb has been removed.

Amputation, Joint, (F.) *A. dans l'article* ou *dans la contiguité des membres*, is when the limb is removed at an articulation.

Each amputation requires a different process, which is described in works on operative surgery.

AMULETTE, Amuletum.

AMULE'TUM, from *Amoli'ri*, 'to remove.' An *Amulet*,—*Periam'ma*, *Apotropæ'um*, *Periap'ton*, *Phylacte'rion*, *Apoteles'ma*, *Exarte'ma*, *Alexica'cum*, (F.) *Amulette*. Any image or substance worn about the person for the purpose of preventing disease or danger.

AMURCA, αμοργη. The *marc* or grounds remaining after olives have been crushed and deprived of their oil. It has been used as an application to ulcers.

AMUSA, Musa Paradisiaca.

AMYCE, Excoriation, Scarification.

AMYC'TICA, from αμυσσω, 'I lacerate.' Medicines which stimulate and vellicate the skin.—Cœlius Aurelianus.

AMYDRIASIS, Mydriasis.

AMYE'LIA, from α, 'privative,' and μυελος, 'marrow.' A monstrous formation, in which there is an absence of spinal marrow.

AMYG'DALA, same etymon as Amyctica; because there seem to be fissures in the shell. The *Almond*, of which there are two kinds; the *Amyg'dalæ ama'ræ* and *A. dulces*, (F.) *Amandes douces*, *A. amères*, obtained from two varieties of *Amyg'dalus communis*; or *A. sati'va*, a native of Barbary. *Nat. Ord.* Amygdaleæ. *Sex. Syst.* Icosandria Monogynia.

The taste of the *Amygdala dulcis* is soft and sweet; that of the *A. amara*, bitter. Both yield, by expression, a sweet, bland oil. The bitter almond contains Prussic acid. They are chiefly used for forming emulsions.

Amyg'dalæ Placenta, *Almond Cake*, is the cake left after the expression of the oil. The *ground Almond Cake*, *Almond Powder*, *Fari'na Amygdala'rum*, is used instead of soap for washing the hands.

Amyg'dalæ Pasta, *Almond Paste*, a cosmetic for softening the skin and preventing chaps, is made of *bitter almonds*, blanched, ℥iv, *white of one egg*; *rose water*, and *rectified spirit*, equal parts, or as much as is sufficient.

Amygdala, Tonsil. Also, a lobe of the cerebellum, so called from its resemblance to an enlarged tonsil. This and its fellow of the opposite side form the lateral boundaries of the anterior extremity of the valley, (q. v.) and are in great part covered by the medulla oblongata.

AMYGDALATUM, Emulsio Amygdalæ.

AMYGDALE, Tonsil.

AMYGDALITIS, Cynanche tonsillaris.

AMYGDALUS COMMUNIS. See Amygdala.

Amyg'dalus Per'sica. The *common peach-tree*, (F.) *Pêcher*. The leaves and flowers have been considered laxative. They are bitter and aromatic, and have been given in hæmaturia, nephritis, &c. The fruit is one of the pleasant and wholesome summer fruits, when ripe. The kernels, *Amyg'dalæ Per'sicæ*, contain prussic acid, as well as the flowers.

Peach Brandy is distilled from the fruit, and is much used in the United States.

Amygdalus. See Amygdala.

AMYGMOS, Scarification.

AMYLEON, Amylum.

A'MYLUM, *A'midum*, *Fec'ula*, *Amyl'eon*, *Amyl'ion*, from α, priv., and μυλη, 'a mill,' because made without a mill; *Starch*. (F.) *Amidon*, *Amylon*. *Starch of Wheat*, *Fari'na*, *Trit'ici fari'na*, *Fec'ula Amyla'cea*, is inodorous and insipid, white and friable. It is insoluble in cold water and alcohol; but forms with boiling water a strong, semi-transparent jelly. It is demulcent, and is used as an emollient glyster, and as the vehicle for opium, when given *per anum*. Starch is met with abundantly in all the cereal grains, in the stalks of many of the palms, in some lichens, and in many tuberous roots, particularly in the bulbs of the orchis.

Amylum Iodatum. See Iodine.

A'MYON, from α, priv., and μυων, 'a muscle,' *Emuscula'tus*. Without muscle. Applied to the limbs, when so extenuated that the muscles cannot be distinguished.

AMYOSIS, Synezizis.

AMYRIS COMMIPHORA, See Bdellium.

Am'yris Elemif'era. (F.) *Balsamier Elémifère*. *Nat. Ord.* Terebinthaceæ. *Sex. Syst.* Octandria Monogynia. The plant whence it is supposed the Gum El'emi is obtained. This gum or resin is brought from the Spanish West Indies. It is softish, transparent, of a pale whitish colour, inclining a little to green, and of a strong, though not unpleasant smell. It is only used in ointments and plasters, and is a digestive.

Amyris Gileadensis. See A. opobalsamum.

Am'yris Opobal'samum, (F.) *Balsamier de la Mecque*, *Bal'sem*, *Bal'samum*. The plant from which is obtained the Balsam of Mecca, *Bal'samum genui'num antiquo'rum*, *Balsamelæ'on*, *Ægyptiacum Bal'samum*, *Bal'samum Asiat'icum*, *B. Juda'icum*, *B. Syriacum*, *B. e Meccâ*, *Cocobal'samum*, *B. Alpi'ni*, *Oleum Bal'sami*, *Opobal'samum*, *Xylobal'samum*, *Balsam* or *Balm of Gilead*. (F.) *Baume Blanc*, *B. de Constantinople blanc*, *B. de Galaad*, *B. du Grand Caire*, *B. Vrai*, *Térébinthine de Gilléad*, *T. d'Egypte*, *T. du Grand Kaire*, *T. de Judée*. A resinous juice obtained by making incisions into the *Amyris opobal'samum* and *A. Gileadensis* of Linnæus, *Balsamaden'dron Gileaden'sē* of Kunth. The juice of the fruit is called *Carpobal'samum*; that of the wood and branches *Xylobal'samum*. It has the general properties of the milder Terebinthinates.

Amyris Tomentosum, Fagara octandra.

AMYRON, Carthamus tinctorius.

AMYX'IA, from α, privative, and μυξα, 'mucus.' Deficiency of mucus.

AMYXIS, Scarification.

ANA, ανα, a word which signifies 'of each.' It is used in prescriptions as well as ā and aa, its abbreviations. As a prefix to words, it means 'in,' 'through,' 'upwards,' 'above,' in opposition to *Cata*, (q. v.;) also 'repetition,' like the English *re*. Hence,—

ANAB'ASIS, from αναβαινω, 'I ascend.' The first period of a disease, or that of increase.—Galen. See Augmentation.

ANABEXIS, Expectoration.

ANABLEP'SIS, from ανα, 'again,' and βλεπω, 'I see.' Restoration to sight.

ANABOLÆ'ON, *Anabole'us*, from αναβαλλω, 'I cast up.' An ointment for extracting darts or other extraneous bodies.

ANAB'OLE, from ανα, 'upwards,' and βαλλω, 'I cast.' *Anago'gē, Anaph'ora.* An evacuation upwards. An act by which certain matters are rejected by the mouth. In common acceptation it includes, *expuition, expectoration, regurgitation*, and *vomiting.*

ANABROCHIS'MUS, *Anabronchis'mus*, from ανα, 'with,' and βροχος, 'a running knot.' An operation for removing the eye-lashes, when they irritate the eye, by means of a hair knotted around them.—Hippocr., Galen, Celsus, &c.

ANABRONCHISMUS, Anabrochismus.

ANABROSIS, Corrosion, Erosion.

ANACAMPSEROS, Sedum telephium.

ANACAR'DIUM OCCIDENTA'LE, *Cassu'vium pomif'erum, Cashew (W. Indies.)* (F.) *Ac'ajou. Nat. Ord.* Terebinthaceæ. *Sex. Syst.* Enneandria Monogynia. The *Oil of the Cashew Nut, O'leum Anacar'dii*, (F.) *Huile d'Acajou*, is an active caustic, and used as such in the countries where it grows, especially for destroying warts, &c.

ANACARDIUM ORIENTALE, Avicennia tomentosa.

ANACATHAR'SIS, from ανα, 'upwards,' and καθαιρειν, 'to purge.' Purgation upwards. Expectoration. (q. v.) See, also, Repurgatio.

ANACATHARSIS CATARRHALIS SIMPLEX, Catarrh.

ANACATHARTICUS, Expectorant.

ANACHREMPSIS, Exspuition.

ANACHRON, Soda.

ANACLASIS, Repercussion.

ANACLINTE'RIUM, *Recubito'rium*, from αναχλινω, 'I recline.' A long chair or seat, so formed, that the person can rest in a reclining posture.

ANACOLLE'MA, from ανα, 'together,' and κολλαω, 'I glue.' A healing medicine.

ANACOLLEMATA, Frontal bandages.

ANACOLUP'PA. A creeping plant of Malabar, the juice of which, mixed with powdered pepper, passes in India as a cure for epilepsy, and as the only remedy for the bite of the naja. It is supposed to be the *Zapania Nodiflora.*

ANACOLUTHIE, Incoherence.

ANACOMIDE, Restauratio.

ANACONCHYLISMOS, Gargarism.

ANACTESIS, Restauratio.

ANACTIRION, Artemisia.

ANACYCLEON, Charlatan.

ANACYCLUS OFFICINARUM, See Anthemis Pyrethrum—a. Pyrethrum, Anthemis pyrethrum.

ANADESMUS, Fascia.

ANADIPLO'SIS, from ανα, 'again,' and διπλοω, 'I double.' *Epanadiplo'sis, Epanalep'sis, Reduplica'tio.* The redoubling which occurs in a paroxysm of an intermittent, when its type is double.—Galen, Alexander of Tralles.

ANÆDŒ'US, from αν, privative, and αιδοια, 'organs of generation.' A monster devoid of sexual organs.

ANADORA, Ecdora.

ANAD'OSIS, from αναδιδωμι, 'I distribute.' Purgation upwards, as by vomiting. *Anadosis* seems also to have meant, occasionally, chylification, whilst *diadosis* meant capillary nutrition.—Hippocr., Galen.

ANAD'ROMĒ, from ανα, 'upwards,' and δρεμω, 'I run.' The transport of a humour or pain from a lower to an upper part.—Hippocr.

ANÆMATOPOIE'SIS, from α, αν, privative, αιμα, 'blood,' and ποιεω, 'I make.' Impeded or obstructed hæmatosis.

ANÆ'MIA, *Anæmasis, Anhæ'mia, Anhæ'mato'sis, Polyanhæ'mia, Anæmo'sis, Oligæ'mia, Hypæ'mia*, (q. v.) *Hydroæ'mia*, (q. v.) *Hydræ'mia, Ane'mia*, (F.) *Anémie, Polyanhémie, Hydrohémie, Exsanguin'ity, Bloodlessness:* from α, priv. and αιμα, 'blood.' Privation of blood. The opposite to plethora. (q. v.) It is characterized by every sign of debility. Also, diminished quantity of fluids in the capillary vessels:—the opposite to *Hyperæmia.*—The essential character of the blood in anæmia is diminution in the ratio of red corpuscles.

ANÆMOSIS, Anæmia.

ANÆMOTROPHY, *Anæmotroph'ia:* from αν, privative, 'αιμα, 'blood,' and τροφη, 'nourishment.' A deficiency of sanguineous nourishment.—Prout.

ANÆSTHE'SIA, *Insensibil'itas, Analge'sia, Parap'sis expers*, (F.) *Anesthé'sie:* from α, privative, and αισθανομαι, 'I feel.' Privation of sensation, and especially of that of touch, according to some. It may be general or partial, and is almost always symptomatic.

ANÆSTHESIA LINGUÆ, Ageustia—a. Olfactoria, Anæmia.

ANÆSTHISIA, Insensibility.

ANAGAL'LIS, from ανα and γαλα, 'milk,' from its power of coagulating milk. *A. arven'sis, A. Phœnic''ea, Red Pimpernel, Scarlet Pimpernel. Nat. Ord.* Primulaceæ. *Sex. Syst.* Pentandria Monogynia. (F.) *Mouron rouge.* A common European plant; a reputed antispasmodic and stomachic.

Another species—*Anagal'lis cæru'lea* is a mere variety of the above.

ANAGALLIS AQUATICA, Veronica Beccabunga.

ANAGARGALICTA, Gargarism.

ANAGARGARISTON, Gargarism.

ANAGLYPHE, Calamus scriptorius.

ANAGOGE, Anabole, Rejection.

ANAGRAPHE, Prescription.

ANAG'YRIS, *Ac'opon, Anag'yris fœ'tida, Stinking Bean Trefoil.* Native of Italy. The leaves are powerfully purgative. The juice is said to be diuretic, and the seeds emetic.—Dioscorides, Paulus.

ANAL, *Ana'lis.* That which refers to the anus;—as *Anal region*, &c.

ANALDIA, (F.) *Analdie;* from α, privative, and αλδειν, 'to grow.' Defective nutrition.

ANALEMSIA, Analepsia.

ANALENTIA, Analepsia.

ANALEP'SIA, *Analep'sis, Analen'tia, Analem'sia*, from ανα, 'afresh,' and λαμβανειν, 'to take.' Restoration to strength after disease.—Galen. A kind of sympathetic epilepsy, originating from gastric disorder. See Epilepsy.

Also, the support given to a fractured extremity. *Appensio.*—Hippocr.

ANALEPSIS, Restauratio.

ANALEP'TICA, same etymon; *Analep'tics.* Restorative medicines or food; such as are adapted to recruit the strength during convalescence:—as sago, salep, tapioca, jelly, &c.

ANALEPTIC PILLS, JAMES'S, consist of *James's Powder, Gum Ammoniacum*, and *Pill of Aloës and Myrrh*, equal parts, with *Tincture of Castor* sufficient to form a mass.

ANALGE'SIA, from α, priv. and αλγος, 'pain.' Absence of pain both in health and disease. See Anæsthesia.

ANALOGOUS TISSUES, see Tissues.

ANALOSIS, Atrophy.

ANALTESIS, Restauratio.

ANAMNES'TIC, from ανα, 'again,' and μνασμαι, 'I remember.' A medicine for improving the memory. See, also, Commemorative.

ANANAS, Bromelia ananas—a. Acostæ ovatæ, &c., Bromelia ananas—a. Americana, Bromelia pinguin—a. Wild, broad-leaved, Bromelia pinguin.

ANANAZIP'TA. A word formerly scrawled on amulets to charm away disease.

ANANEO'SIS, *Renova'tio*; from ανα, 'again,' and νεος, 'new.' Renovation or renewal,—as of the blood by the chyliferous vessels and lymphatics.

ANAPETI'A, *Expan'sio mea'tuum*, from ανα, and πιτανω, 'I dilate.' A state opposite to the closure of vessels.—Galen.

ANAPHALANTI'ASIS, from αναφαλαντιας, 'bald.' Loss of the hair of the eyebrows. Also, baldness in general.

ANAPH'IA, *Anaph'ia;* from α, αν, priv. and 'αφη, 'touch.' Diminution or privation of the sense of touch.

ANAPHONE'SIS, from ανα, 'high,' and φωνη, 'voice.' Exercise of the voice: vociferation:—the act of crying out. *Vocifera'tio, Clamor.*

ANAPHORA, Anabole.

ANAPHRODIS'IA, from α, priv. and Αφροδιτη, 'Venus.' Absence of the venereal appetite. Sometimes used for *Impotence* and *Sterility.*

ANAPHROMELI, Mel despumatum.

ANAP'LASIS, from αναπλασσω, 'I restore.' *Confirma'tio.* Union or consolidation of a fractured bone.—Hippocr.

ANAPLERO'SIS, from αναπληρωω, 'I fill up.' Repletion. That part of surgical therapeutics whose object is to supply parts that are wanting. Also, *Apposition* or *Prosthesis,* (q. v.)

ANAPLEROTICUS, Incarnans.

ANAPLEU'SIS, *Fluctua'tio, Innata'tio*, from αναπλειν, 'to swim above.' The looseness or shaking of an exfoliated bone; or of a carious or other tooth, &c.—Hippocr., Paulus.

ANAPNEUSIS, Respiration.

ANAPNOMETER, Spirometer.

ANAPODOPHYLLUM CANADENSE, Podophyllum peltatum.

ANAP'OSIS, *Am'posis*, from ανα, 'again,' and ποσις, 'drink.' A recession of humours from the circumference to the centre of the body.—Hippocr.

ANAPSE, Auante.

ANAPSIA, Cæcitas.

ANAPTYSIS, Expectoration.

ANARRHEGNU'MINA, from αναρρηγνυμαι, 'I break out again.' Fractures are so called when they become disunited; as well as ulcers when they break out afresh.

ANARRHI'NON, from ανα, 'upwards,' and ρις, 'the nose.' That which returns by the nose.—Gorræus.

According to others, that which issues by the skin, from ανα, and ρινος, 'the skin.'

ANARRHŒA, *Anarrho'pia, Anas'tasis*, from ανα, 'upwards,' and ρεω, 'I flow.' Afflux of fluid towards the upper part of the body.

ANARRHOPIA, Anarrhœa.

ANAR'THROS, αναρθρος, from αν, priv. and αρθρον, 'a joint.' One who is so fat, that his joints are scarcely perceptible.—Hippocrates.

ANASAR'CA, from ανα, 'through,' and σαρξ, 'the flesh.' *Anasarch'a, Aqua inter cutem, Hyposar'ca, Hydrops cellula'ris totius cor'poris, Katasar'ca, Episarcid'ium, Hy'deros, Hydrosar'ca, Hydroder'ma, Sarci'tes, Polylym'phia, Hyposarcid'ios, Leucophlegma'tia, General dropsy, Dropsy of the cellular membrane.* (F.) *Anasarque.* Commonly, it begins to manifest itself by swelling around the ankles; and is characterized by tumefaction of the limbs and of the soft parts covering the abdomen, thorax, and even the face, with paleness and dryness of the skin, and pitting when any of these (especially the ankles) are pressed upon. Like dropsy in general, Anasarca may be *active* or *passive;* and its treatment must be regulated by the rules that are applicable to general dropsy. See Hydrops.

ANASARCA HYSTERICUM, Anathymiasis—a. Pulmonum, Œdema of the Lungs—a. Serosa, Phlegmatia dolens.

ANASARCHA, Anasarca.

ANASARQUE, Anasarca.

ANASPADIÆ'US, *Anaspa'dias*, from ανα, 'upwards,' and σπαω, 'I draw.' One whose urethra opens on the upper surface of the penis.

ANAS'PASIS, from αναστπαω, 'I contract.' *Retrac'tio*, Contraction, especially of the stomach.—Hippocrates.

ANASSA, Bromelia ananas.

ANASTALTICA, Styptics.

ANASTASIS, Anarrhœa.

ANASTŒCHEIO'SIS, from ανα, 'again,' and στοιχειον, 'element.' *Re-elementa'tio.* Resolution of a body or its parts into their elements.—Galen.

ANASTOMO'SIS, from ανα, 'with,' and στομα, 'a mouth.' *Inoscula'tio, Exanastomo'sis, Concur'sus.* (F.) *Abouchement.* Communication between two vessels. By considering the nerves to be channels, in which a nervous fluid circulates, their communication likewise has been called *Anastomosis.* By means of anastomoses, if the course of a fluid be arrested in one vessel, it can proceed along others.

ANASTOMOSIS, JACOBSON'S. See Petrosal ganglion.

ANASTOMOT'ICS, *Anastomot'ica.* Same etymon. Certain medicines were formerly so called, which were believed to be capable of opening the mouths of vessels:—as aperients, diuretics, &c.

ANASTOMOT'ICUS MAGNUS, RAMUS, (F.) *Artère collatérale interne, A. collatérale du coude*, is a branch of the brachial artery which comes off a little above the elbow, and bestows branches to the brachialis internus, to the under edge of the triceps, and to the muscles, ligaments, &c., about the elbow-joint.

ANATASIS, Extension.

ANATHYMI'ASIS, from ανα, 'upwards,' and θυμα, 'fumigation.' *Œde'ma fugax, Œde'ma spas'ticum, Œde'ma hyster'icum, Anasar'ca hyster'icum.* An uncertain and transient swelling, said to have been observed at times in nervous

and hysterical persons. It also means Exhalation, Fumigation, and Hypochondriasis, (which see.)

ANATOME ANIMATA, Physiology.

ANATOMIA VIVA, Physiology.

ANATOMIE, Anatomy.

ANAT'OMIST, *Anatom'icus*. One who occupies himself with anatomy. One versed in Anatomy.

ANAT'OMY, *Anat'omē*, *Anatom'ia*, from ανα, and τεμνειν, 'to cut.' (F.) *Anatomie*.

The word *Anatomy* properly signifies *dissection;* but it has been appropriated to the study and knowledge of the number, shape, situation, structure, and connexion,—in a word of all the apparent properties of organized bodies. Anatomy is the science of organization. Some have given the term a still more extended acceptation, applying it to every mechanical decomposition, even of extra-organic bodies. Thus, *Crystallography* has been termed the *Anatomy* of crystallized minerals. Anatomy has also been called *Morpho'logy*, *Somatol'ogy*, *Somatot'omy*, *Organol'ogy*, &c. It assumes different names, according as the study is confined to one organized being, or to a species or class of beings. Thus *Androt'omy*, or *Anthropot'omy*, or *Anthropog'raphy*, or *Anthroposomatol'ogy*, is the *Anatomy of man:—Zoöt'omy*, that of the other species of the animal kingdom: and *Vet'erinary Anat'omy*, is the anatomy of domestic animals: but when the word is used abstractedly, it means *human Anatomy*, and particularly the study of the organs in a physiological or healthy state. *Physiological Anatomy* is occasionally used to signify the kind of anatomy which investigates structure with a special view to function. The Anatomy of the diseased human body is called *Patholog''ical* or *Morbid Anatomy*, and when applied to Medical Jurisprudence, *Foren'sic Anatomy*. Several of the organs possessing a similarity of structure, and being formed of the same tissues, they have been grouped into Systems or Genera of Organs; and the study of, or acquaintance with, such systems, has been called *General Anat'omy*, *Histol'ogy*, or *Morphot'omy*, whilst the study of each organ in particular has been termed *Descriptive Anatomy*. Descriptive Anatomy has been divided into *Skeletol'ogy*, which comprises *Osteol'ogy* and *Syndesmol'ogy;* and into *Sarcol'ogy*, which is subdivided into *Myol'ogy*, *Neurol'ogy*, *Angiol'ogy*, *Adenol'ogy*, *Splanchnol'ogy*, and *Dermol'ogy*. *Sur'gical Anat'omy*, *Medico-Chirurgical Anatomy*, *Topograph'ical Anat'omy*, *Regional Anatomy*, (F.) *Anatomie Chirurgicale*, *A. des Régions*, is the particular and relative study of the bones, muscles, nerves, vessels, &c., with which it is indispensable to be acquainted before performing operations. *Compar'ative Anat'omy* is the comparative study of each organ, with a view to an acquaintance with the modifications of its structure in different animals or in the different classes of animals. *Transcendent'al* or *Philosoph'ical Anatomy* inquires into the mode, plan, or model upon which the animal frame or organs are formed; and *Artific''ial Anat'omy* is the art of modelling and representing in wax or other substance, the different organs or different parts of the human body, in the sound or diseased state. *Phytot'omy* is the anatomy of vegetables.

ANATOMY, PRACTICAL, see Dissection.

ANATON, Soda.

ANATREPSIS, Restauratio.

ANATRESIS, Perforation, Trepanning.

ANATRIBE, Friction.

ANATRIPSIS, Friction.

ANATRIPSOL'OGY, *Anatripsolog''ia*, from ανατριψις, 'friction,' and λογος, 'a discourse.' A treatise on friction as a remedy.

ANATRON, Soda.

ANAT'ROPÉ, from ανα, 'upwards,' and τρεπω, 'I turn.' A *subversion*. A turning or subversion or inverted action of the stomach, characterized by nausea, vomiting, &c.—Galen. We still speak of the stomach turning against any thing.

ANAUDIA, Catalepsy, Mutitas.

ANAXYRIS, Rumex acetosa.

ANAZESIS, Ebullition.

ANAZOTURIA, see Urine.

ANCHA, Haunch.

ANCHILOPS, Ægilops.

ANCHORALIS PROCESSUS, Coracoid.

ANCHU'SA OFFICINA'LIS, *Alcan'na*, *Lingua Bovis*, *Buglos'sum sylves'trĕ*, *Offic''inal* or *Garden Al'kanet* or *Bugloss; Nat. Ord.* Boragineæ. *Sex. Syst.* Pentandria Monogynia. (F.) *Buglose*. A native of Great Britain. The herb was formerly esteemed as a cordial in melancholia and hypochondriasis; but it is now rarely used. It is also called *Buglos'sa*, *Buglos'sum angustifo'lium majus*, *B. vulga'rĕ majus*, *B. sati'vum*.

ANCHU'SA TINCTO'RIA, *Alcan'na spuria*, *Dyer's Bugloss*, *Ane'bium*, *Buglos'sum Tincto'rum*, *Lithosper'mum villo'sum*, *Dyer's Al'kanet*. (F.) *Orcanette*. A European plant. The medical properties are equivocal. It is used to give a beautiful red colour to ointments.

ANCHYLOSIS, Ankylosis.

ANCISTRON, Hamulus.

ANCOLIE, Aquilegia vulgaris.

ANCON, Elbow, Olecranon.

ANCONÉ, Anconeus.

ANCONE'US, from αγκων, 'the elbow.' A term once applied to every muscle attached to the olecranon. Winslow distinguished four:—the *great*, *external*, *internal*, and *small;* the first three being portions of the same muscle, the *triceps brachialis*. The last has, alone, retained the name. It is the *Anconæ'us minor* of Winslow, the *Anconæ'us* vel *Cubita'lis* RIOLA'NI of Douglass, the *Epicondylo-Cubita'lis* of Chaussier, the *Brevis Cubiti* (F.) *Anconé*, and is situate at the upper and back part of the fore-arm. It arises from the external condyle of the os humeri, and is inserted into the posterior edge of the upper third of the ulna. Its use is to aid in the extension of the fore-arm.

ANCONEUS EXTERNUS, see Triceps extensor cubiti—a. Internus, see Triceps extensor cubiti—a. Major, see Triceps extensor cubiti.

ANCTE'RES. *Fibulæ* or *Clasps*, by which the lips of wounds were formerly kept together.—Celsus, Galen.

ANCTERIASMUS. Infibulation.

ANCU'BITUS, *Petrifac'tio*. An affection of the eye, in which there is a sensation as if sand were irritating the organ.

ANCUNNUEN'TÆ. A name formerly given to females during menstruation.

ANCUS, *Ankus*, from αγκων, 'the elbow.' One who cannot extend his arms completely.

Also, the deformity resulting from a luxation of the humerus or fore-arm.—Hippocr.

ANCYLE, Ankylosis.

ANCYLOBLEPHARON, Ankyloblepharon.

ANCYLOGLOSSUM, Ankyloglossum.

ANCYLOMELE, Ankylomele.

ANCYLOMERISMUS, Ankylomerismus.

ANCYLOSIS, Ankylosis.

ANCYLOTOMUS, Ankylotomus.

ANCYRA, Hook.

ANCYROIDES PROCESSUS, Coracoid.

ANDA. A tree of Brazil. *Anda Gomé'sii*, *Joanné'sia princeps*. *Nat. Order*, Euphorbiaceæ. *Sex. Syst.* Monœcia Monadelphia. An oil is obtained from the seeds by pressure, 50 to 60 drops of which act as a cathartic. The fruit is an oval nut, containing two seeds. These have the taste of the chestnut; but are strongly cathartic, and even emetic. The shell is astringent, and used as such in diarrhœa, &c.

ANDELY, MINERAL WATERS OF. A. is in France, near Gysore, and 8 leagues from Rouen. The water is a cold and weak chalybeate. It is used in chlorosis and abdominal obstructions.

ANDIRA INERMIS, Geoffræa inermis—a. Surinamensis, Geoffræa Surinamensis.

ANDRACHAHARA, Sempervivum tectorum.

ANDRACHNE, Arbutus unedo, Portulaca.

ANDRANATOM'IA, *Andranat'omē*, *Androtom'ia*, *Androt'omē*, *Anthropot'omy*, from ανηρ, genitive ανδρος, 'a man,' and τεμνειν, 'to cut.' The anatomy of man.

ANDRI'A. Adult age.

ANDRI'A MU'LIER, *Mu'lier Hermaphродit'ica*. A female hermaphrodite.

ANDROGEN'IA, from ανηρ, 'man,' and γενεσις, 'generation.' The procreation of males —Hippocr.

ANDROG''YNUS, from ανηρ, 'a man,' and γυνη, 'a woman.' An hermaphrodite. An effeminate person.—Hippocr.

ANDROMANIA. Nymphomania.

ANDROM'EDA ARBO'REA, *Sorrel Tree*, *Sour Tree*, *Sour Wood*, *Elk Tree*, *Elk Wood*, *Sorrel wood*, *Sour Leaf*. (F.) *Andromedier*. A small indigenous tree; *Nat. Ord.* Ericeæ. *Sex. Syst.* Decandria Monogynia; found in the Alleghany Mountains and the hills and valleys diverging from them, as far as the southern limits of Georgia and Alabama; but seldom north of Virginia. The leaves are refrigerant and astringent, and have been used to make a kind of lemonade, which has been given in fevers.

ANDROM'EDA MARIA'NA. *Broad-leaved Moorwort*. A decoction of this American plant is said to have been successfully employed as a wash, in a disagreeable affection,—not uncommon amongst the slaves in the southern parts of the United States,—called the *Toe Itch*, and *Ground Itch*.—Barton.

ANDROPOGON CHŒNANTHUS, Juncus odoratus—a. Nardus, Calamus Alexandrinus, Nardus Indica.

ANDROSACE, Umbilicus marinus—a. Matthioli, Umbilicus marinus.

ANDROSÆMUM. Hypericum perforatum.

ANDROTOMY, Andranatomia.

ANDRUM. An East India word, Latinized by Kæmpfer, signifying a kind of elephantiasis of the scrotum, endemic in southern Asia.

ANEANTISSEMENT, (F.) *Vir'ium extinc'tio*. This word is often employed hyperbolically by patients, in France, to signify excessive fatigue, debility or syncope.

ANÉBIUM. Anchusa Tinctoria.

ANEBUS. Impuber.

ANECPYE'TUS, from αν, for ανευ, 'without,' and πυεω, 'I promote suppuration.' That which does not suppurate, or is not likely to suppurate.

ANEGER'TICĒ, from ανεγειρω, 'I awaken.' The art of resuscitating the apparently dead.

ANEILE'MA, *Aneile'sis*, from ανειλεσθαι, 'to be rolled upwards.' Applied particularly to the motion of air in the intestines and the tormina accompanying it.—Hippocr.

ANEILESIS, Aneilema.

ANEMIA, Anæmia.

ANEMO'NĒ. The *Wind Flower*: from ανεμος, 'the wind,' because it does not open its flowers till blown upon by the wind.

ANÉMONE DES BOIS, Anemone nemorosa.

ANEMO'NĒ HEPAT'ICA, *Hepat'ica nobi'lis*, *Herba Trinita'tis*, *Hepat'ica* or *Herb Trinity*, *Hepat'icus Flos*, *Trifo'lium Hepat'icum*, *Anem'ony*. The plant is a mild astringent and tonic. Dose ʒj of the powder. It may be given in infusion.

ANEMO'NĒ NEMORO'SA, *Ranun'culus albus*, *Wood anem'ony*. (F.) *Anémone des bois*. The herb and flowers are poisonous, acrid, and corrosive. They have been used as rubefacients.

ANEMO'NĒ PRATEN'SIS, *Pulsatil'la ni'gricans*. This plant has similar properties with the last. It is also called *Meadow Anemony*. (F.) *Pulsatille noire*, *P. des prés*.

ANEMO'NĒ PULSATIL'LA, *Pulsatil'la vulga'ris*, *Herba ventis*, *Nola culina'ria*, *Pasque flower*, (F.) *Coquelourde*, possesses like properties.

ANEMONY, Anemone hepatica—a. Meadow, Anemone pratensis—a. Wood, Anemone nemorosa.

ANEMOS, Wind.

ANENCEPHALIA, see Anencephalus.

ANENCEPHALOTROPHIE, from αν, privative; εγκεφαλος, 'the encephalon,' and τροφη, 'nourishment.' Atrophy of the encephalon.

ANENCEPHALUS, from α, priv, and εγκεφαλος, 'brain.' A monster devoid of brain.—Bonetus. G. St. Hilaire. Also one that has a part only of the brain. *Paraceph'alus*. The condition has been called *Anencephal'ia*. A weak, silly person.—Hippocr.

ANENTERONERVIA. Colic.

ANEPITHYM'IA, from α, priv. and επιθυμια, 'desire.' Many nosologists have used this word for a loss of the appetites; as of those of hunger, thirst, venery, &c.

ANEPITHYMIA CHLOROSIS, Chlorosis.

ANERETHIS'IA, *Inirritabil'itas*, from α, priv. and ερεθισις, 'irritability.' Defect of irritability.—Swediaur.

ANESIS, Remission.

ANESTHÉSIE, Anæsthesia.

ANESTHÉSIE EXTATIQUE. The aggregate of phenomena of impaired feeling produced especially by the manipulations of the animal magnetizer.—Andral.

ANESON, Anethum.

ANESUM, Pimpinella anisum.

ANET, Anethum.

ANETH, Anethum graveolens.

ANE'THUM, *Ané'son*, *Ané'ton*, *Ané'thum Fœnic'ulum*, *Fœnic'ulum*, *F. vulg'arē*, *F. Dulcē*, *Ligus'ticum fœnic'ulum*, *Fennel* or *Finckle*,

Mar'athrum, Anet, Sweet Fennel, (F.) *Fenouil* ou *Anis doux*. *Nat. Ord.* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. The seeds, *Fænic'ulum*, (Ph. U. S.) have an aromatic odour, and warm sweetish taste. They are carminative. The oil—*Oleum Fœnic'uli*—is officinal in the Pharm. U. S. The root is said to be pectoral and diuretic.

ANETHUM FŒNICULUM, Anethum.

ANE'THUM GRAV'EOLENS, *Anethum, A. horten'sē, Dill*, (F.) *Aneth, Fenouil puant*. A native of the south of Europe. The seeds are stimulant and carminative. Dose, gr. xv to ʒj.

Oleum Ane'thi, Oil of Dill, (F.) *Huile d'Aneth*, possesses the carminative properties of the plant.

ANETICUS, Anodyne.

ANETON, Anethum.

ANETUS, Intermittent fever—a. Quartanus, Quartan—a. Quotidianus, Quotidian—a. Tertianus, Tertian fever.

AN'EURISM, *Aneurys'ma, Aneuris'ma*, from ἀνευρύνειν, 'to dilate or distend.' *Dilata'tio Arteria'rum, Ecta'sia, Emboris'ma, Exangi'a aneuris'ma, Arterieurys'ma, Absces'sus spirituo'sus, Arteriec'tasis*, (F.) *Anévrysme, Aneurysme*. Properly, Aneurism signifies a tumour, produced by the dilatation of an artery; but it has been extended to various lesions of arteries, as well as to dilatations of the heart.

There are various kinds of aneurism. The following are the chief.

I. When the blood, which forms the tumour, is enclosed within the dilated coats of the artery. This is the *true aneurism, Aneuris'ma verum, Hernia Arteria'rum*. (F.) *Anévrysme vrai*.

II. When the blood has escaped from the opened artery, it is called *spurious* or *false aneurism, Aneuris'ma spu'rium, Ruptu'ra Arté'riæ, Arteriorrhex'is, Arté'riodial'ysis, Ecchymo'ma arterio'sum*. (F.) *Anévrysme faux*. The latter is divided into three varieties.

1. The *diffused false aneurism*, (F.) *Anévrysme faux, primitif, diffus, noncirconscrit*, ou *par infiltration*, which occurs immediately after the division or rupture of an artery, and consists of an extravasation of blood into the cellular texture of the part.

2. The *circumscribed false aneurism*, (F.) *A. faux consécutif, circonscrit* ou *par épanchement, enkysté* ou *sacciforme, tumeur hémorrhagiale circonscrite*, in which the blood issues from the vessel, some time after the receipt of the wound, and forms itself a sac in the neighbouring cellular membrane.

3. The *An'eurism by Anastomo'sis*, or *Var'icose An'eurism, Phlebarteriodial'ysis, Aneurys'ma venoso-arteriosum, A. varico'sum*, (F.) *Anévrysme par anastomose* ou *variqueux, A. par érosion, A. de* POTT, *A. des plus petites artères*, which arises from the simultaneous wounding of an artery and vein;—the arterial blood passing into the vein, and producing a varicose state of it.

III. *Mixed Aneurism*, (F.) *Anévrysme mixte*, is that which arises from the dilatation of one or two of the coats, with division or rupture of the other. Some authors have made two varieties of this.

1. *Mixed external Aneurism*, where the internal and middle coats are ruptured, and the cellular is dilated.

2. *Mixed internal Aneurism*, in which the internal coat is dilated, and protrudes, like a hernial sac, through the ruptured middle and outer coats. This variety has been called *Aneuris'ma Her'niam Arté'riæ sis'tens*.

Aneurisms have been likewise termed *Traumat'ic* and *Sponta'neous*, according as they may have been caused by a wound, or have originated spontaneously. They have also been divided into *internal* and *external*.

The *internal aneurisms* are situate in the great splanchnic cavities, and occur in the heart and great vessels of the chest, abdomen, &c. Their diagnosis is difficult, and they are often inaccessible to surgical treatment.

The *external aneurisms* are situate at the exterior of the head, neck, and limbs, and are distinctly pulsatory.

Aneurisms, especially the internal, may be combated by a debilitant treatment, on the plan of Valsalva, which consists in repeated bloodletting, with food enough merely to support life. In external aneurism the artery can be obliterated. This is usually done by applying a ligature above the aneurismal tumour.

ANEURISM, DISSECTING, is one in which, owing to rupture of the inner and middle coats of an artery, the blood makes itself a channel between these coats and the outer coat.

In many cases, the lesion appears to consist in a separation of the lamina of the middle coat, between which the blood forms itself a channel.

ANEURISMS OF THE HEART, *Cardion'chi, Cardieurys'ma*, (F.) *Anévrysmes du cœur*, have been divided into *active* and *passive*. The former can scarcely be esteemed aneurisms, as they most commonly consist of increased thickness of the parietes of the heart, which diminishes its cavity instead of increasing it. The term *Hypertrophy of the heart*, (q. v.) better indicates their character. *Passive aneurism, Cardiectasie*, on the contrary, is attended with extenuation of the parietes of the organ, and enlargement of the cavities. The physical signs of *dilatation of the heart* are the following:—The action of the heart is not visible, and no impulse is conveyed to the hand. On percussion, there is a loss of resonance over a larger surface than usual, but the dulness is much less intense than that which accompanies hypertrophy. On auscultation, the action of the heart is only slightly felt, and communicates at once the impression of its diminished power. The impulse is feebler than usual. Both sounds are widely transmitted over the thorax, and are not much fainter at a distance from their point of origin.

The name *Aneurism of the Valves of the heart* has been given to pouch-like projections of the valves into the auricles.

ANEURIS'MAL, *Aneurys'mal, Aneurismat'ic, Aneurismal'is*. That which belongs to Aneurism.

ANEURISMAL SAC or CYST, (F.) *Sac* ou *Kyste anévrysmal*, is a sort of pouch, formed by the dilatation of the coats of an artery, in which the blood, forming the aneurismal tumour, is contained.

ANEURISMATIC, Aneurismal.

ANEURYSM, Aneurism.

ANEURYSME, Aneurism.

ANEURYSMUS, Dilatation.

ANÉVRYSME, Aneurism—*a. de l'Aorte*, Aorteurysma.

ANFION, Maslach.

ANFRACTUOSITÉS CÉRÉBRALES, Anfractuosities, cerebral—*a. Ethmoïdales*, see Anfractuosity.

ANFRACTUOS'ITY, *Anfrac'tus, Gyrus*, from *am*, 'around,' and *frangere, fractum*, 'to break.' A groove or furrow. Used in anatomy to signify sinuous depressions, of greater or less depth, like those which separate the convolutions of the brain from each other. These

ANFRACTUOSITIES, CEREBRAL, *Anfrac'tus Cer'ebri, Gyri Cer'ebri, Intestin'ula Cer'ebri*, (F.) *Anfractuosités Cérébrales*, are always narrow, and deeper at the upper surface of the brain than at its base; and are lined by a prolongation of the pia mater.

The Ethmoid Cells are, sometimes, called *Anfractuosités ethmoïdales.*

ANFRACTUS, Anfractuosity—a. Cerebri, Anfractuosities (cerebral.)

ANGEIAL, Vascular.

ANGEIOG'RAPHY or ANGIOG'RAPHY, *Angeiograph'ia*, from αγγειον, 'a vessel,' and γραφη, 'a description.' The anatomy of the vessels.

ANGEIOHYDROG'RAPHY, *Angiohydrog'raphy, Angeiondrog'raphy, Angeiohydrogra'phia*, from αγγειον, 'a vessel,' ὑδωρ, 'water,' and γραφω, 'I describe.' A treatise on the lymphatics.

ANGEIOHYDROT'OMY, *Angiohydrot'omy, Angeiondrot'omy, Angeiohydrotom'ia*, from αγγειον, 'a vessel,' ὑδωρ, 'water,' and τεμνειν, 'to cut.' Dissection of the lymphatics.

ANGEIOLEUCI'TIS, *Angioleuci'tis, Lymphangei'tis, Lymphangi'tis, Lymphi'tis, Lymphati'tis*, from αγγειον, 'a vessel.' λευκος, 'white,' and *itis*, inflammation. (F.) *Inflammation des tissus blancs.* Inflammation of the lymphatics: lymphatic or scrofulous inflammation.

ANGEIOL'OGY, *Angiol'ogy, Angeiolog''ia*, from αγγειον, 'a vessel,' and λογος, 'a discourse.' A description of the vessels. The anatomy of the vessels. It includes *Arteriol'ogy, Phlebol'ogy*, and *Angeiohydrol'ogy.*

ANGEION, Vessel.

ANGEIONDROGRAPHY, Angeiohydrography.

ANGEIONDROTOMY, Angeiohydrotomy.

ANGEIOPATHI'A, *Angiopathi'a*, from αγγειον, 'a vessel,' and παθος, 'a disease.' Disease of the vessels.

ANGEIORRHAGIA, Hæmorrhagia activa.

ANGEIORRHŒ'A, (F.) *Angéiorrhée;* from αγγειον, 'a vessel,' and ρεω, 'I flow.' Passive hemorrhage.

ANGEIOSTEO'SIS, *Angiosto'sis*, from αγγειον, 'a vessel,' and οστεωσις, 'ossification.' Ossification of vessels.

ANGEIOT'OMY, *Angiot'omy, Angeiotom'ia*, from αγγειον, 'a vessel,' and τεμνειν, 'to cut.' Dissection of the vessels.

ANGEI'TIS, *Inflamma'tio vaso'rum*, (F.) *Angéite.* Inflammation of vessels in general.

ANGEL'ICA. *Angel'ica Archangel'ica, A. Hispa'na, Garden Angelica.* (F.) *Angélique, Racine de Saint Esprit.* So called from its supposed angelic virtues. *Nat. Ord.* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. Native of Lapland. The roots, stalk, leaves, and seed are aromatic and carminative. A sweetmeat is made of the root, which is agreeable.

ANGEL'ICA ATROPURPU'REA, *Angelica*, (Ph. U. S.) *Masterwort.* An indigenous species, growing over the whole of the United States, and admitted into the secondary list of the Pharmacopœia of the United States. Virtues, same as those of the Angelica of Europe.

ANGEL'ICA SYLVES'TRIS, *A. sati'va, Wild Angel'ica.* (F.) *Angélique sauvage.* Possesses similar properties to the last, but in an inferior degree. The seeds, powdered and put into the hair, are used to destroy lice.

ANGELICA SYLVESTRIS, Ligusticum podagraria—a. Tree, Aralia spinosa.

ANGELI'NÆ CORTEX. The bark of a Grenada tree, which has been recommended as an anthelmintic and cathartic.

ANGÉLIQUE, Angelica—*a. Sauvage*, Angelica sylvestris.

ANGELOCACOS, Myrobalanus.

ANGIECTASIA VENOSA, Varix.

ANGIEC'TASIS, from αγγειον, 'a vessel,' and εκτασις, 'dilatation.' Any dilatation of vessels.—Gräfe and Alibert.

ANGIITE, Inflammation, Angeitis.

ANGIITIS, Angeitis.

ANGI'NA, *Febris Angino'sa, Isthmi'tis, Quinsey* or *Sore Throat;* from *angere*, 'to suffocate.' Inflammation of the supra-diaphragmatic portion of the alimentary canal, and of the air passages. The Latin writers applied the term to every disease in which deglutition or respiration, separately or united, was effected, provided that such affection was above the stomach and lungs.—Boerhaave speaks of the angina of the moribund, which is nothing more than the dysphagia or difficult deglutition preceding death.—See Cynanche.

ANGINA AQUOSA, Œdema of the glottis.

ANGINA APHTHOSA, Aphthæ—a. Bronchialis, Bronchitis—a. Canina, Cynanche trachealis—a. Cordis, Angina pectoris—a. Cum tumore, Cynanche tonsillaris—a. Epidemica, Cynanche maligna—a. Epiglottidea, Epiglottitis—a. Exudatoria, Cynanche trachealis—a. Externa, Cynanche parotidæa—a. Gangrænosa, Cynanche maligna—a. Humida, Cynanche trachealis—a. Inflammatoria, Cynanche, Cynanche trachealis—a. Laryngea, Laryngitis—a. Linguaria, Glossitis—a. Maligna, Cynanche maligna, Pharyngitis diphtheritic—a. Maxillaris, Cynanche parotidæa—a. Membranacea, Cynanche trachealis.

ANGI'NA NASA'LIS, *Nasi'tis posti'ca.* An inflammation of the posterior portion of the Schneiderian membrane lining the nose.

ANGI'NA ŒDEMATO'SA, (F.) *Angine œdémateuse, Œdème de la Glotte.* An œdematous swelling of the glottis; the effect of chronic cynanche laryngea. See Œdema of the Glottis.

ANGINA PALATINA, Hyperoitis—a. Paralytica, Pharyngoplegia—a. Parotidæa Externa, Cynanche parotidæa.

ANGI'NA PEC'TORIS, *A. cordis, Sternal'gia, Asthma spas'tico-arthrit'icum incon'stans, Asthma diaphragmat'icum, Arthri'tis diaphragmatica, Orthopnœ'a cardi'aca, Sternodyn'ia syncoptica et palpitans, S. syncopa'lis, Cardiog'mus cordis sinistri, Asthéni'a pectoralis, Angor pec'toris, Stenocar'dia, Diaphragmat'ic gout, Asthma convulsi'vum, Asthma arthrit'icum, Cardioneural'gia, Neural'gia brachiothorac''ica, Hyperæsthe'sia plexus cardi'aci, A. dolorif'icum, Syn'copē angino'sa, Pneumonal'gia, Suffocative Breast-pang.* (F.) *Angine de Poitrine, Névrose du Cœur.* A disease, the precise pathology of which is not well known. The principal symptoms are, violent pain about the ster-

num, extending towards the arms; anxiety, dyspnœa, and sense of suffocation. It is an affection of great danger, and is often connected with ossification, or other morbid affection of the heart. It appears to be neuropathic, and has been termed *Neuralgia* of the *Heart*. Some, however, employ this last term for an acutely painful intermittent affection of the heart, which seems to differ from angina pectoris more in regard to the small number of parts which are drawn into morbid consent with the affected cardiac nerves, than in regard either to its nature or appropriate treatment. The most powerful stimulating and narcotic antispasmodics are required during the paroxysm.

ANGI'NA PELLICULA'RIS, *Diptheri'tis* (q. v.) *of the throat*. A name given to those inflammations about the throat, in which exudations or false membranes are thrown out, during the phlogosis of mucous membranes. *Aphthæ*, *Tracheitis*, when accompanied with the membraniform exudation, are, with some, examples of diphtheritic inflammation.

ANGI'NA PERNICIOSA, Cynanche trachealis—a. Polyposa, Cynanche trachealis—a. Polyposa seu membranacea, Cynanche trachealis—a. Pulposa, Cynanche trachealis.

ANGI'NA SANGUINEA, Cynanche tonsillaris.

ANGI'NA SICCA, (F.) *Angine sèche*, is a chronic inflammation of the pharynx, with a distressing sense of dryness and heat, in chronic diseases of the stomach and lungs. See Pædanchone.

ANGI'NA SQUIRRO'SA, (F.) *Angine squirreuse*, consists in difficulty of deglutition, caused by scirrhous disorganization of the pharynx or œsophagus, or by enlarged tonsils.

ANGI'NA STREPITOSA, Cynanche trachealis—a. Suffocatoria, Cynanche trachealis—a. Synochalis, Cynanche tonsillaris—a. Tonsillaris, Cynanche tonsillaris—a. Trachealis, Cynanche trachealis—a. Ulcerosa, Cynanche maligna—a. Uvularis, Staphylœdema, Uvulitis—a. Vera et legitima, Cynanche tonsillaris.

ANGINE GUTTURALE, Cynanche tonsillaris—*a. Laryngée*, Laryngitis—*a. Laryngée et tracheale*, Cynanche trachealis—*a. Laryngée œdémateuse*, Œdema of the glottis—*a. Œsophagienne*, Œsophagitis—*a. Pharyngée*, Cynanche parotidæa—*a. de Poitrine*, Angina pectoris—*a. Sèche*, Angina sicca—*a. Squirreuse*, Angina squirrosa—*a. Tonsillaire*, Cynanche tonsillaris.

ANGINEUX, Anginosa.

ANGINO'SA, (F.) *Angineux*. That which is accompanied with angina; as *Scarlati'na angino'sa*.

ANGIOCARDI'TIS, from αγγειον, 'a vessel,' and *carditis*, 'inflammation of the heart.' Inflammation of the heart and great vessels.

ANGIOGRAPHY, Angeiography.

ANGIOHÉMIE, Hyperæmia.

ANGIOHYDROGRAPHY, Angeiohydrography.

ANGIOHYDROTOMY, Angeiohydrotomy.

ANGIOLEUCITIS, Angeioleucitis.

ANGIOLOGY, Angeiology.

ANGIOPATHIA, Angeiopathia.

ANGIOPYRA, Synocha.

ANGIO'SIS, from αγγειον, 'a vessel.' *Angeio'sis*. Under this term Alibert includes every disease of the blood-vessels.

ANGIOSTOSIS, Angeiostosis.

ANGIOTEN'IC, *Angeioten'ic*, *Angioten'icus*, seu *Angeioten'icus*. From αγγειον, 'a vessel,' and τεινειν, 'to extend.' An epithet given to inflammatory fever, owing to its action seeming to be chiefly exerted on the vascular system.

ANGIOTOMY, Angeiotomy.

ANGLE, *An'gulus*, from αγκυλος, 'a hook.' The space between two lines which meet in a point.

ANGLE, FA'CIAL, pointed out by Camper, is formed by the union of two lines, one of which is drawn from the most prominent part of the forehead to the alveolar edge of the upper jaw, opposite the incisor teeth, and the other from the meatus auditorius externus to the same point of the jaw. According to the size of the angle it has been attempted to appreciate the respective proportions of the cranium and face, and, to a certain extent, the degree of intelligence of individuals and of animals. In the white varieties of the species, this angle is generally 80°; in the negro not more than 70°, and sometimes only 65°. As we descend the scale of animals, the angle becomes less and less; until, in fishes, it nearly or entirely disappears. Animals which have the snout long and facial angle small, are proverbially foolish; at least they are so esteemed, such as the snipe, crane, stork, &c., whilst intelligence is ascribed to those in which the angle is more largely developed, as the elephant and the owl. In these last animals, however, the large facial angle is caused by the size of the frontal sinuses:—so that this mode of appreciating the size of the brain is very inexact, and cannot be depended upon.

The following is a table of the angle in man and certain animals:

FACIAL ANGLES.

Man	from 65° to 85°
Sapajou	65
Orang-Utang	56 to 58
Guenon	57
Mandrill	30 to 42
Coati	28
Pole-cat	31
Pug-dog	35
Mastiff	41
Hare	30
Ram	30
Horse	23

ANGLE, OPTIC, (F.) *Angle optique*, is the angle formed by two lines, which shave the extremities of an object, and meet at the centre of the pupil.

ANGOISSE, Angor.

ANGOLAM. A very tall Malabar tree, which possesses vermifuge properties.

AN'GONÉ, *Præfoca'tio Fau'cium*, *Globus hyster'icus*, *Orthopnœ'a hyster'ica*, *Dyspha'gia globo'sa*, *D. hyster'ica*, *Nervous Quinsey*. A feeling of strangulation, with dread of suffocation. It is common in hysterical females, and is accompanied with a sensation as if a ball arose from the abdomen to the throat.

ANGOR, *Anguish*, (F.) *Angoisse*. Extreme anxiety, accompanied with painful constriction at the epigastrium, and often with palpitation and oppression. It is frequently an unfavourable symptom.

ANGOR, Agony, Orthopnœa—a. Pectoris, Angina pectoris.

ANGOS, Bubo, Uterus, Vessel.

ANGOURION, Cucumis sativus.

ANGUIS, Serpent.

ANGUISH, Angor.

Anguish, Febrile, *Angor Febri'lis.* The combination of weariness, pain, anxiety and weakness affecting the head and neck, which is so generally observed at the commencement of fever.

ANGULAIRE DE L'OMOPLATE, Levator scapulæ.

AN'GULAR, *Angula'ris*, from *angulus*, 'an angle.' (F.) *Angulaire.* That which relates to an angle.

Angular Artery and Vein. A name given, 1. to the termination of the facial artery and vein, because they pass by the greater angle of the eye; and, 2. to the facial artery and vein themselves, because they pass under the angle of the jaw. See Facial.

Angular Nerve is a filament furnished by the inferior maxillary, which passes near the greater angle of the eye.

Angular Processes of the frontal bone are seated near the angles of the eyes. See Orbitar.

ANGULARIS, Levator scapulæ.

ANGULI-SCAPULO-HUMÉRAL, Teres major.

ANGULUS OCULARIS, Canthus.

ANGURIA, Cucurbita citrullus.

ANGUSTATIO CORDIS. Systole.

ANGUS'TIA, *Angusta'tio, Stenocho'ria.* Anxiety or constriction.

Angustia Abdominalis, Pelvis, (Brim)—a. Perinæalis, Pelvis (Outlet.)

ANGUSTURA, Cusparia febrifuga—a. Spuria, Brucea antidysenterica.

ANGUSTURE, FAUSSE, Brucea antidysenterica—*a. Ferrugineuse*, Brucea anti-dysenterica—*a. Vraie*, Cusparia febrifuga.

ANHÆMATOSIA, Asphyxia, Anæmia.

ANHÆMIA, Anæmia.

ANHAPHIA, Anaphia.

ANHELA'TIO, from *anhelo*, 'I pant.' *Anhel'itus, Panting, Anhelation.* (F.) *Essoufflement.* Short and rapid breathing. See Dyspnœa.

Anhela'tio is sometimes employed synonymously with asthma.

ANHELITUS, Breath.

ANHIS'TOUS, from *a*, *av*, 'privative,' and *ἱστος*, 'organic texture,' '*anorganic.*' The tunica decidua uteri is termed by Velpeau the *anhistous membrane.*

ANHUIBA, Laurus sassafras.

ANICE'TON, *Mesia'mum*, from *a*, privative, and *νικη*, 'victory,' 'invincible.' A plaster much extolled by the ancients in cases of achores. It was formed of litharge, cerusse, thus, alum, turpentine, white pepper, and oil.

ANI'DEUS, from *av*, 'privative,' and *εἰδος*, 'shape,' *Amorphus.* A monster devoid of shape. —J. G. St. Hilaire.

ANIDRO'SIS, from *a*, privative, and *ἱδρως*, 'sweat.' *Sudo'ris nul'litas* vel *priva'tio.* Absence of sweat. Deficiency of perspiration.—Hippocr.

ANILITAS. See Dementia.

AN'IMA, *An'imus, Mens, Psychē.* The mind, breath, &c., from *ανεμος*, 'wind or breath.' (F.) *Âme.* The principle of the intellectual and moral manifestations. Also, the principle of life:—the life of plants being termed *An'ima vegetati'va*, (F.) *Âme végétative;* that of man, *An'ima sensiti'va*, (F.) *Âme sensitive.*

Under the term *Anima Mundi*, the ancient philosophers meant a universal Spirit, which they supposed spread over every part of the universe.

The precise seat of the mind in the brain has given rise to many speculations. The point is unsettled.

Anima Aloes: see Aloes—a. Articulorum, Hermodactylus—a. Hepatis, Ferri sulphas—a. Pulmonum, Crocus.

AN'IMAL, *Zoon*, *ζωον.* A name given to every animated being provided with digestive organs; even if such be merely a simple tube, as in the polypi. The greater part of animals have the power of locomotion; some can merely execute partial movements, such as contraction and dilatation. In other respects it is often a matter of difficulty to determine what is an animal characteristic. The study of animals is called *Zoöl'ogy.*

An'imal, (adjective,) *Anima'lis.* That which concerns, or belongs to, an animal.

Animal Heat, *Calor anima'lis, Cal'idum anima'lē, C. inna'tum, Biolych'nion*, (F.) *Chaleur animale*, is the caloric constantly formed by the body of a living animal, by virtue of which it preserves nearly the same temperature, whatever may be that of the medium in which it is placed. This formation seems to take place over the whole of the body, and to be connected with the action of nutrition.

The following are the natural temperatures of certain animals; that of man being 98° or 100°.

Animals.	Temperatures.
Arctic fox	107
Arctic wolf	105
Squirrel	105
Hare	104
Whale	104
Arctomys citillus, *zizil*—in summer	103
Do. when torpid	80 to 84
Goat	103
Bat, in summer	102
Musk	102
Marmota bobac,—*Bobac*	101 or 102
House mouse	101
Arctomys marmota, *marmot*,—in summer	101 or 102
Do. when torpid	43
Rabbit	100 to 104
Polar Bear	100
Dog	100 to 103
Cat	100 to 103
Swine	100 to 103
Sheep	100 to 103
Ox	100 to 103
Guinea-pig	100 to 102
Arctomys glis	99
Shrew	98
Young wolf	96
Fringilla arctica, *Arctic finch*	111
Rubecola, *redbreast*	111
Fringilla linaria, *lesser red poll*	110 or 111
Falco palumbarius, *goshawk*	100
Caprimulgus Europæus, *European goat-sucker*	100
Emberiza nivalis, *snow-bunting*	109 to 110
Falco lanarius, *lanner*	109
Fringilla carduelis, *goldfinch*	109
Corvus corax, *raven*	109
Turdus, *thrush*, (of Ceylon,)	109
Tetrao perdrix, *partridge*	109
Anas clypeata, *shoveler*	108
Tringa pugnax, *ruffe*	108
Scolopax limosa, *lesser godwit*	108
Tetrao tetrix, *grouse*	108
Fringilla brumalis, *winterfinch*	108
Loxia pyrrhula	108
Falco nisus, *sparrowhawk*	108
Vultur barbatus	107
Anser pulchricollis	107
Colymbus auritus, *dusky grebe*	107
Tringa vanellus, *lapwing*, (wounded,)	107
Tetrao lagopus, *ptarmigan*	107
Fringilla domestica, *house sparrow*	107 to 111

ANIMALS.	Temperatures.
Strix passerina, *little owl*,	106
Hæmatopus ostralegus, *sea-pie*,	
Anas penelope, *widgeon*,	
Anas strepera, *gadwall*,	
Pelecanus carbo,	
Falco ossifragus, *sea-eagle*,	105
Fulica atra, *coot*,	
Anas acuta, *pintail-duck*,	
Falco milvus, *kite*, (wounded,)	104
Merops apiaster, *bee eater*,	
Goose,	103 to 107
Hen,	
Dove,	
Duck,	
Ardea stellaris,	103
Falco albicollis,	
Picus major,	
Cossus ligniperda,	89 to 91
Shark,	83
Torpedo marmorata,	74

ANIMAL KINGDOM, (F.) *Règne Animal*, comprises all animated beings.

ANIMAL'CULE, *Animal'culum;* diminutive of *animal*. A small animal. An animal perceptible only by means of the microscope.

ANIMAL'CULIST, *An'imalist*. One who attempts to explain different physiological or pathological phenomena by means of animalcules.

ANIMALIST, Animalculist.

ANIMAL'ITY, *Animal'itas*. Qualities which distinguish that which is animated. That which constitutes the animal.

AN'IMALIZATION, *Animalisa'tio*. The transformation of the nutritive parts of food into the living substance of the body to be nourished.

To AN'IMATE, *Anima're*. To unite the living principle with an organized body. The French use it in the sense of,—to excite or render active; as, *animer un vésicatoire:* to excite a blister to suppurate.

ANIMA'TION, *Zoö'sis, Anima'tio*, from *anima*, 'the soul or mind.' The act of animating. The state of being enlivened.

ANIMATION, SUSPENDED, Asphyxia.

AN'IMÉ, *Gum an'imē, Aminæ'a, Can'camy, Gummi an'imē, Can'camum*. A resin obtained from the trunk of *Hymenæ'a cour'baril*. It has been given as a cephalic and uterine. It is not used. The plant is also called *Cour'baril*.

ANIMÉ, (F.) An epithet applied to the countenance, when florid, in health or disease.

ANIMELLÆ, Parotid.

ANIMI CASUS SUBITUS, Syncope—a. Deliquium, Syncope—a. Pathemata, Passions.

AN'IMIST, from *an'ima*, 'the soul.' The Animists are those who, following the example of Stahl, refer all the phenomena of the animal economy to the soul.

The soul, according to Stahl, is the immediate and intelligent agent of every movement, and of every material change in the body. Stahl therefore concluded, that disease was nothing more than a disturbance or disorder in the government of the economy, or an effort by which the soul, attentive to every morbific cause, endeavoured to expel whatever might be deranging the habitual order of health.

ANIMUS, Anima, Breath.

ANIS, Pimpinella anisum—*a. Aigre*, Cuminum cyminum—*a. de la Chine*, Illicium anisatum—*a. Doux*, Anethum—*a. Étoilé*, Illicium anisatum.

ANISA'TUM, from *Anisum, Anise*. A sort of medicated wine, formerly prepared with honey, wine of Ascalon, and aniseed.

ANISCALPTOR, Latissimus dorsi.

ANISE PLANT, Pimpinella anisum—a. Star, Illicium anisatum, I. Floridanum—a. Tree, Florida, Illicium Floridanum—a. Tree, yellow-flowered, Illicium anisatum.

ANISEED, See Pimpinella Anisum.

ANISI SEMINA. See Pimpinella anisum.

ANISOS'THENES, *Inæqua'li rob'orē pol'lens*. That which is unequal in strength: from *α*, priv., *ισος*, 'equal,' and *σθενος*, 'strength.' An epithet applied particularly to the muscular contractility, which, in the sick, is sometimes augmented in certain muscles only: in the flexors, for example.

ANISOT'ACHYS, from *α*, priv., *ισος*, 'equal,' and *ταχυς*, 'quick.' An epithet for the pulse when at the same time quick and unequal.—Gorræus.

ANISUM, Pimpinella anisum—a. Africanum frutescens, Bubon Galbanum—a. Fruticosum galbaniferum, Bubon galbanum—a. Sinense, Illicium anisatum—a. Stellatum, Illicium anisatum.

ANKLE, Astragalus, Malleolus.

ANKUS, Ancus.

ANKYLOBLEPH'ARON, *Ancyloblepha'ron, Palpebra'rum coal'itus*, from *αγκυλη*, 'contraction,' and *βλεφαρον*, 'eyelid.' A preternatural union between the free edges of the eyelids. Likewise called *Symbleph'aron, Symblepharo'sis*, and *Pros'physis*.

Also, union between the eyelids and globe of the eye.—Aëtius.

ANKYLOGLOS'SUM, *Ancyloglos'sum, Concre'tio linguæ*, from *αγκυλος*, 'crooked,' or 'contracted,' and *γλωσσα*, 'the tongue.' Impeded motion of the tongue in consequence of adhesion between its margins and the gums; or in consequence of the shortness of the frænum: the latter affection constituting *Tongue-tie, Olopho'nia lin'guæ fræna'ta*. It merely requires the frænum to be divided with a pair of scissors.

ANKYLOME'LĒ, *Ancylome'lē*, from *αγκυλος*, 'crooked,' and *μηλη*, 'a probe.' A curved probe.—Galen.

ANKYLOMERIS'MUS, *Ancylomeris'mus*, from *αγκυλη*, 'a contraction,' and *μερος*, 'a part.' Morbid adhesion between parts.

AN'KYLOPS, Ægilops.

ANKYLO'SIS, *Ancylo'sis, Anchylo'sis, Orthoco'lon, Orthocyllo'sis, An'cylē, Stiff Joint*, from *αγκυλος*, 'crooked.' An affection, in which there is great difficulty or even impossibility of moving a diarthrodial articulation. It is so called, because the limb, commonly, remains in a constant state of flexion. Anchylosis is said to be *complete* or *true*, when there is an intimate adhesion between the synovial surfaces and union of the articular extremities of the bones. In the *incomplete* or *false* anchylosis, there is obscure motion, but the fibrous parts around the joint are more or less stiff and thickened. In the treatment of this last state, the joint must be gently and gradually exercised; and oily, relaxing applications be assiduously employed.

ANKYLOT'OMUS, *Ancylot'omus*, from *αγκυλος*, 'crooked,' and *τεμνειν*, 'to cut.' Any kind of curved knife.—Paulus. An instrument for dividing the frænum linguæ.—Scultetus.

ANNEAU, Ring—*a. Crural*, Crural canal—

a. Diaphragmatique, Diaphragmatic ring—*a. Fémoral*, Crural canal—*a. Inguinal*, Inguinal ring—*a. Ombilical*, Umbilical ring.

ANNEXE, Accessory, Appendix.

ANNI CRITICI, Climacterici (anni)—a. Decretorii, Climacterici (anni)—a. Fatales, Climacterici (anni)—a. Genethliaci, Climacterici (anni)—a. Gradarii, Climacterici (anni)—a. Hebdomadici, Climacterici (anni)—a. Heroici, Climacterici (anni)—a. Natalitii, Climacterici (anni)—a. Scalares, Climacterici (anni)—a. Scansiles, Climacterici (anni.)

ANNOTA'TIO, *Episema'sia.* Under this term some have included the preludes to an attack of intermittent fever—as yawning, stretching, somnolency, chilliness, &c.

ANNOTTO. See Terra Orleana.

AN'NUAL DISE'ASES, *Morbi an'nui, M. anniversa'rii.* (F.) *Maladies annuelles.* A name given, by some, to diseases which recur every year about the same period. *Febris annua* is a term used for a fancied intermittent of this type. (F.) *Fièvre annuelle.*

ANNUENS, Rectus capitis internus minor.

ANNUIT'IO, *Nodding*, from *ad*, 'to,' and *nutus*, 'a nod.' A gesture denoting assent in most countries. Also, the state of somnolency, (when the individual is in the erect or sitting posture, with the head unsupported,) in which the power of volition over the extensor muscles of the head is lost, and the head drops forward.

AN'NULAR, *Annula'ris*, *Cricoï'des*, *(annus*, 'a circle.') Any thing relating to a ring, or which has the shape or fulfils the functions of a ring; from *annulus*, 'a ring,' itself.

Annular Finger, or *Ring Finger*, *Dig''itus annula'ris*, *Param'esos*, is the fourth finger; so called from the wedding-ring being worn thereon.

An'nular Lig'ament of the Ra'dius, is a very strong fibro-cartilaginous band, which forms, with the lesser sigmoid cavity of the cubitus, a kind of ring in which the head of the radius turns with facility.

An'nular Lig'aments of the Carpus, *Armil'læ manus membrano'sæ*, are two in number. The one, *anterior*, is a broad, fibrous, quadrilateral band, extending transversely before the carpus, and forming the gutter, made by the wrist, into a canal. It is attached, externally, to the trapezium and scaphoïdes; and internally to the os pisiforme and process of the unciforme. It keeps the tendons of the flexor muscles, median nerve, &c., applied against the carpus. The *posterior* ligament is situate transversely behind the joint of the hand, and covers the sheaths of the tendons, which pass to the back of the hand. Its fibres are white and shining, and are attached, externally, to the inferior and outer part of the radius; internally, to the ulna and os pisiforme.

An'nular Lig'aments of the Tarsus are two in number. The *anterior* is quadrilateral, and extends transversely above the instep. It is attached to the superior depression of the os calcis, and to the malleolus internus. It embraces the tendons of the extensor muscles of the toes, the *tibialis anticus*, and *peroneus anticus*. The *internal* is broader than the last. It descends from the malleolus internus to the posterior and inner part of the os calcis, with which it forms a kind of canal, enclosing the sheaths of the tendons of the *tibialis posticus*, *flexor longus digitorum pedis*, and *F. longus pollicis pedis*, as well as the plantar vessels and nerves.

Annular Vein, *Vena annula'ris*, is situate between the annular finger and the little finger. Aëtius recommends it to be opened in diseases of the spleen.

ANNULARIS, Cricoid: see Digitus—a. Ani, Sphincter ani.

ANNULI-TENDINO-PHALANGIENS, Lumbricales manus.

ANNULUS, Dactylius, Vulva—a. Abdominis, Inguinal ring—a. Fossæ ovalis: see Ovalis fossa—a. Albidus, see Ciliary (body)—a. Cellulosus, Ciliary ligament—a. Ciliaris, Ciliary ligament—a. Gangliformis, see Ciliary (body)—a. Repens, Herpes circinatus—a. Umbilicalis, Umbilical ring—a. Ventriculi, Pylorus.

ANO, *ανω*. A prefix denoting 'above, up.'

ANOCŒLIA, Stomach.

ANO'DIA, from *αν*, priv. and *ωδη*, 'song.' An unconnected or dissonant mode of speech.

ANODIN, Anodyne.

ANODOS, Edentulus.

AN'ODYNE, *Anod'ynus*, *Antod'ynus*, *Antid'ynous*, (improperly,) *Paregor'icus*, *Hypnot'icus*, *Anet'icus*, *Antal'gicus*, (F.) *Anodin* ou *Anodyn*, from *α*, *αν*, priv. and *οδυνη*, 'pain.' *Anodynes* are those medicines which relieve pain, or cause it to cease; as opium, belladonna, &c. They act by blunting the sensibility of the brain, so that it does not appreciate the morbid sensation.

ANODYN'IA, *Indolen'tia.* Cessation or absence of pain. Vogel has given this name to a genus of diseases, characterized by a cessation of pain, and the exasperation of other symptoms; as we see in gangrene.

ANODYNUM MINERALE, Potassæ nitras sulphatis paucillo mixtus.

ANŒ'A, from *α*, privative, and *νους*, 'mind.' Delirium, imbecility. See Dementia and Idiotism.

ANOMAL, Anomalous.

ANOMA'LIA, from *αν*, priv. and *ομαλος*, 'regular.' *Abnor'mitas*, *Aliena'tio.* Anomaly, irregularity. In Pathology, anomaly means something unusual in the symptoms proper to a disease.

Anomalia Nervorum, Nervous diathesis.

ANOMALOTROPHIES, from *αν*, privative, *ομαλος*, 'regular,' and *τροφη*, 'nourishment.' A class of diseases, which consist in modifications in the nutrition of organs.—Gendrin.

ANOM'ALOUS, *Ano'malus;* the same etymon. Irregular; contrary to rule. (F.) *Anomal.* In Medicine, a disease is called *anomalous*, in whose symptoms or progress there is something unusual. Affections are also called anomalous, which cannot be referred to any known species.

ANOMALUS, Irregular.

ANOMMATUS, Anophthalmus.

ANOMOCEPH'ALUS, from *α*, priv. *νομος*, 'rule,' and *κεφαλη*, 'head.' One whose head is deformed.—Geoffroi Saint-Hilaire.

ANOM'PHALOS, from *αν*, privative, and *ομφαλος*, 'the navel.' Devoid of navel. Many writers have endeavoured to show that Adam and Eve must have been *ανομφαλοι*, as they could not have been nourished by umbilical vessels.

ANONYME, Innominatum.

ANON'YMOUS, *Anon'ymus*, *Innomina'tus*, (F.) *Anonyme*, from *αν*, priv. and *ονομα*, 'name.' That which has no name.

The word has been applied to many parts of the body:—to the *Anonymous bone* or *Os innominatum*:—the *Anonymous foramen* or *Foramen innominatum*, &c.

ANOPHTHAL'MUS, *Anom'matus*, from αν, privative, and οφθαλμος, 'an eye.' A monster devoid of eyes.

ANOPS'IA, from αν, priv. and οψ, 'the eye.' A case of monstrosity in which the eye and orbit are wanting.

ANOPTICONERVIE, Amaurosis.

ANOR'CHIDES, from αν, priv. and ορχις, 'a testicle.' Those born without testicles.—Fortunatus Fidelis.

ANOREX'IA, from αν, priv. and ορεξις, 'appetite.' *Inappeten'tia*, *Limo'sis expers*. (F.) *Perte d'appetit*. Absence of appetite, without loathing. Anorexia or want of appetite is symptomatic of most diseases. Also, Indigestion, Dyspepsia (q. v.)

ANOREXIA EXHAUSTO'RUM, Frigidity of the stomach—a. Mirabilis, Fasting.

ANORGANIC. See Anhistous, and Inorganic.

ANORMAL, Abnormous.

ANOS'IA, from α, priv. and νοσος, 'disease.' Health. Freedom from disease.

ANOS'MIA, from α, privative, and οσμη, 'odour.' Loss of smell. Diminution of the sense of smell. Called, also, *Anosphre'sia*, *Paros'mia*, *Olfactûs amis'sio*, *O. defic'iens*, *Dysæsthe'sia olfacto'ria*, *Anæsthe'sia olfacto'ria*, *Odora'tus deper'ditus*, *Caco'dia*, (F.) *Perte de l'Odorat*.

ANOSPHRESIA, Anosmia.

ANSE (F.), *Ansa* (L.) signifies, properly, the handle of certain vessels, usually of an arched form. By analogy, it has been applied to that which is curved in the form of such handle. Thus, the French speak of *Anse intestinale* to signify a portion of intestine, supported by its mesentery, and describing a curved line:—also, of *Anse nerveuse*, *Anse anastomotique*, &c.

Anse de fil is used, in Surgery, to designate a thread, curved in the form of an *Anse*.

ANSERINA, Potentilla anserina.

ANSÉRINE, Chenopodium ambrosioides—*a. Anthelmintique*, Chenopodium anthelminticum—*a. Bon Henri*, Chenopodium Bonus Henricus—*a. Botrys*, Chenopodium Botrys—*a. Fétide*, Chenopodium vulvaria—*a. Vermifuge*, Chenopodium anthelminticum.

ANTAC'IDS or ANTI-ACIDS, *Antiac'ida*, from *anti*, 'against,' and *acida*, 'acids.' Remedies which obviate acidity in the stomach. They are chemical agents, and act by neutralizing the acid. Those chiefly used are ammonia, calcis carbonas, calx, magnesia, magnesiæ carbonas, potassa, potassæ bicarbonas, p. carbonas, sodæ bicarbonas, and s. carbonas. They are, of course, only palliatives, removing that which exists, not preventing the formation of more.

ANTAG'ONISM, *Antagonis'mus*, from αντι, 'against,' and αγωνιζειν, 'to act.' Action in an opposite direction. It applies to the action of muscles which act in a contrary direction to others. In estimating the force of the muscles, this antagonism must be attended to.

ANTAG'ONIST, *Antagonis'ta*. A muscle, whose action produces an effect contrary to that of another muscle. Every muscle has its antagonist, because there is no motion in one direction without a capability of it in another.

ANTALGICUS, Anodyne.

ANTAPHRODIS'IAC and ANTAPHRODIT'IC, *Antaphrodisiacus*, *Anterot'icus*, from αντι, 'against,' and αφροδισιακος, 'aphrodisiac.' A substance capable of blunting the venereal appetite.

ANTAPOD'OSIS, from αντιαποδιδωμι, 'I return in exchange.' The succession and return of the febrile periods.—Hippocr.

ANTATROPH'IC, *Antatroph'icus*, *Antiatroph'icus*, from αντι, 'against,' and ατροφια, 'atrophy.' A remedy opposed to atrophy or consumption.

ANTEBRACHIAL. See Antibrachial.

ANTECENDEN'TIA. The precursory or warning symptoms of a disease.

ANTELA'BIA. *Procheï'la*, from *ante*, 'before,' and *labia*, 'the lips.' The extremity of the lips.

ANTELOPE, Antilopus.

ANTEMBALLOMENOS, Succedaneum.

ANTEM'BASIS, from αντι, and εμβαινω, 'I enter.' *Mu'tuus ingres'sus*. The mutual reception of bones.—Galen.

ANTEMETIC, Antiemetic.

ANTENDEIXIS, Counter-indication.

ANTENEAS'MUS, from αντι, 'against,' and νεαν, 'audacious.' One furious against himself. Mania, in which the patient attempts his own life.—Zacchias.

ANTENNA'RIA DIOICA, *Gnapha'lium Dioicum*, *Hispid'ula*, *Pes cati*, *Elich'rysum monta'num*, *Catsfoot*, (F.) *Pied de chat*. A common European plant, which has been advised in hemorrhage, diarrhœa, &c.

ANTEPHIALTIC, Antiephialtic.

ANTEPILEPTIC, Antiepileptic.

ANTEREI'SIS, from αντι, 'against,' and ερειδω, 'I support.' The resistance—the solidity—of bones.—Hippocr.

ANTÉRIEUR DUMARTEAU, Laxator tympani—*a. de l'Oreille*, Anterior auris.

ANTE'RIOR, *Anti'cus*, from *ante*, 'before.' Situate before. Great confusion has prevailed with Anatomists in the use of the terms *before*, *behind*, &c. Generally, the word *anterior* is applied to parts situate before the median line, the body being in the erect posture, with the face and palms of the hands turned forwards; and the feet applied longitudinally together.

ANTE'RIOR AU'RIS (*Muscle*,) *Auricula'ris ante'rior*, (F.) *Auriculaire antérieur*, *Antérieur de l'oreille*, *Zygomato-oriculaire*. A small muscle, passing from the posterior part of the zygoma to the helix. *Use*. To draw the ear forwards and upwards.

ANTERIOR MALLEI, Laxator tympani.

ANTEROTICUS, Antaphrodisiac.

ANTEUPHORBIUM, Cacalia anteuphorbium.

ANTEVER'SION, *Antever'sio*, from *ante*, 'before,' and *vertere*, *versum*, 'to turn.' Displacement of the uterus, in which the fundus is turned towards the pubes, whilst its orifice is towards the sacrum. It may be caused by extraordinary size of the pelvis, pressure of the viscera on the uterus, &c.; and is recognised by examination *per vaginam*. See Retroversio uteri.

ANTHELITRAGUS, (F.) *Anthélitragien*. One of the proper muscles of the pavilion of the ear.

ANT'HELIX or ANTI-HELIX, from αντι, 'before,' and ελιξ, 'the helix.' An eminence

on the cartilage of the ear, in front of the helix, and extending from the concha to the groove of the helix, where it bifurcates.

ANTHELMIN'TIC, *Antihelmin'ticus*, *Antiscol'icus*, *Antivermino'sus*, *Vermif'ugus*, *Vermifuge*, from αντι, 'against,' and ἑλμις, 'a worm.' A remedy which destroys or expels worms, or prevents their formation and development. The chief anthelmintics are, the Chenopodium, Mucu'na, Oleum animale Dippelii, Oleum Terebinthinæ, Sodii Chloridum, Spigelia, and Pulvis Stanni. See Worms and Helminthagogues.

ANTHEMA ERUPTIO, Exanthem.

AN'THEMIS COT'ULA, from ανθεω, 'I flower.' *Cot'ula*, *C. fœ'tida*, *Cota*, *Cynan'themis*, *Chamæme'lum fœ'tidum*, *An'themis Noveboracen'sis*, *Chamomil'la spu'ria*, *Mayflower*, *Mayweed*, *Stinking Chamomile*, *Wild Cham'omile*, *Dog's fennel*, *Dilly*, *Dilweed*, *Fieldweed*, *Pissweed*, *Nat. Ord.* Compositæ Corymbiferæ. *Sex. Syst.* Syngenesia Superflua. (F.) *Maroute*, *Camomille fétide*, *Camomille puante*. This plant has a very disagreeable smell: and the leaves have a strong, acrid, bitterish taste. It is reputed to have been useful in hysterical affections.

AN'THEMIS NO'BILIS, *Chamæme'lum*, *Chamemæ'lum No'bilē*, *Chamomil'la Roma'na*, *Euan'themon*, *An'themis*, *Chamæme'lum odora'tum*, *Leucan'themum*, *Matrica'ria*, (F.) *Camomille Romaine*. The leaves and flowers,—*Anthemis*, Ph. U. S.—have a strong smell, and bitter, nauseous taste. The flowers are chiefly used. They possess tonic and stomachic properties, and are much given as a pleasant and cheap bitter. A simple infusion is taken to produce, or to assist vomiting. Externally, they are often used in fomentations.

The *O'leum Anthem'idis* possesses the aromatic properties of the plant, but not the bitter and tonic. Consequently, the '*Chamomile Drops*,' as sold by the druggists, must be devoid of the latter qualities. They are made by adding *Ol. anthem.* f. ℥j. to *Sp. vini rectif.* Oj.

ANTHEMIS NOVEBORACENSIS, A. Cotula.

AN'THEMIS PY'RETHRUM, *Py'rethrum*, *Anacyc'lus pyrethrum*, *Pyrethrum verum*, *Buphthal'mum Cre'ticum*, *Denta'ria*, *Herba saliva'ris*, *Pes Alexandri'nus*, *Spanish Chamomile*, *Pellitory of Spain*, (F.) *Pyrèthre*, *Racine salivaire*, *Pied d'Alexandre*. The root is hot and acrid; its acrimony residing in a resinous principle. It is never used except as a masticatory in toothache, rheumatism of the face, paralysis of the tongue, &c. It acts as a powerful sialogogue.

The Pellitory of the shops in Germany is said to be derived from *Anacyc'lus officina'rum*; a plant cultivated in Thuringia for medicinal purposes.

AN'THEMIS TINCTO'RIA, *Buphthal'mi Herba*, *Dyer's Chamomile*, a European plant, has a bitter and astringent taste, and has been regarded stomachic and vulnerary, (F.) *Camomille des Teinturiers*, *Œil de Bœuf*.

ANTHE'RA, from ανθηρος, 'florid,' so called from its florid colour. A remedy compounded of several substances, myrrh, sandarac, alum, saffron, &c. It was used under the form of liniment, collyrium, electuary, and powder.—Celsus, Galen.

ANTHEREON, Mentum.

ANTHORA VULGARIS, Aconitum anthora.

ANTHOS: see Rosmarinus—a. Sylvestris, Ledum sylvestre.

ANTHRA'CIA, from ανθραξ, 'coal.' *Carbun'cular Exan'them*. An eruption of tumours, imperfectly suppurating, with indurated edges, and, for the most part, a sordid and sanious core. A genus in the order *Exanthematica*, class *Hæmatica* of Good, and including Plague and Yaws.

ANTHRACIA, Anthracosis—a. Pestis, Plague—a. Rubula, Frambœsia.

ANTHRACION. See Anthrax.

AN'THRACOID. *Anthraco'des*, from ανθραξ, 'coal,' and ειδος, 'resemblance.' (F.) *Charbonneux*. As black as coal. Accompanied by, or resembling anthrax.

ANTHRACOMA, Anthrax.

ANTHRACOSIA, Anthrax.

ANTHRACO'SIS, *Anthra'cia*, *Carbo Palpebra'rum*, from ανθραξ, 'a coal.' A species of carbuncle, which attacks the eyelids and globe of the eye.—Paulus of Ægina. Also, a carbuncle of any kind. It has been used recently for the "black lung of coal miners," which is induced by carbonaceous accumulation in the lungs. When ulceration results from this cause, *black phthisis* exists.

ANTHRAKOK'ALI, from ανθραξ, 'coal,' and *kali*, 'potassa.' An article recently introduced as a remedy in cutaneous diseases. It is formed by dissolving carbonate of potassa in 10 or 12 parts of boiling water, and adding as much slacked lime as will separate the potassa. The filtered liquor is placed on the fire in an iron vessel, and suffered to evaporate, until neither froth nor effervescence occurs, and the liquid presents a smooth surface like oil. To this, levigated coal is added in the proportion of 160 grammes to 192 grammes of potassa. The mixture is stirred, and removed from the fire, and the stirring is continued, until a black homogeneous powder results. A *sulphuretted anthrakokali* is made by mixing accurately 16 grammes of sulphur with the coal, and dissolving the mixture in the potassa as directed above. The dose of the simple and sulphuretted preparations is about two grains three times a day.

ANTHRAX, ανθραξ, 'a coal,' *An'trax*, *Carbo*, *Rubi'nus verus*, *Codesel'la*, *Erythe'ma gangreno'sum*, *Grantris'tum*, *Pruna*, *Per'sicus Ignis*, *Granatris'tum*, *Phyma anthrax*, *Erythe'ma anthrax*, *Carbun'culus Anthroco'sia*, *Anthroco'ma*, *Absces'sus gangrænescens*, *A. gangræno'sus*, *Furun'culus malig'nus*, *F. gangrænosus*, *Carbuncle*, (F.) *Charbon*. An inflammation, essentially gangrenous, of the cellular membrane and skin, which may arise from an internal or external cause. In the latter case it is called, *Anthra'cion*, *Vesic'ula gangrænes'cens*, *Pustule maligne*; *Bouton d'Alep*, *Feu Persique* (*Persian Fire*) *Mal-vat*, *Bouton malin*, *Puce maligne*, and is characterized at the outset by a vesication or bleb filled with a sero-sanguinolent fluid, under which a small induration is formed, surrounded by an areolar inflammation, which becomes gangrenous. It has been thought by some to be induced altogether by contact with the matter of the carbuncle of animals, or of the exuviæ of bodies of such as had died of the disease. But it is now known to arise primarily in the human subject.

Anthrax is a malignant boil, and its treatment is similar to that which is required in cases of gangrene attacking a part.

Anthrax Pulmonum. Necropneumonia.

ANTHRIS'CUS CEREFO'LIUM, Scardiæ cerefolium.

ANTHROPE, Cutis.

ANTHROPOCHYMY, Chymistry (human.)

ANTHROPOGEN'IA, *Anthropog''eny*, from ανθρωπος, 'man,' and γενεσις, 'generation.' The knowledge or study, or phenomena of human generation.

ANTHROPOL'OGY, *Anthropolog''ia*, from ανθρωπος, 'man,' and λογος, 'a discourse.' A treatise on man. By some, this word is used for the science of the structure and functions of the human body. Frequently, it is employed synonymously with *Natural History and Physiology of man.*

ANTHROPOMANCY, *Anthropomanti'a*, from ανθρωπος, 'a man,' and μαντεια, 'divination.' Divination by inspecting the entrails of a dead man.

ANTHROPOM'ETRY, from ανθρωπος, 'a man,' and μετρον, 'measure.' An acquaintance with the dimensions of the different parts of the human body.

ANTHROPOPH'AGUS, (F.) *Anthropophage*, from ανθρωπος, 'a man,' and φαγω, 'I eat.' A name given to one who eats his own species.

ANTHROPOPH'AGY, *Anthropopha'gia*, same etymon. The custom of eating human flesh. A disease in which there is a desire to eat it.

ANTHROPOSCOPIA, Physiognomy.

ANTHROPOTOMY, Andranatomia.

ANTHYPNOT'IC, *Anthypnot'icus*, from αντι, 'against,' and 'υπνωτικος, 'stupefying.' A remedy for stupor.

ANTHYPOCHON'DRIAC, *Anthypochondri'acus*, from αντι, 'against,' and υποχονδριακος, 'hypochondriac.' A remedy for hypochondriasis.

ANTHYSTER'IC, *Antihyster'ic*, *Antihyster'icus*, from αντι, 'against,' and 'υστερα, 'the uterus.' A remedy for hysteria.

ANTI, αντι, as a prefix, in composition, generally means 'opposition.'

ANTIADES, Tonsils.

ANTIADITIS, Cynanche tonsillaris.

ANTIADON'CUS, from αντιαδες, 'the tonsils,' and ογκος, 'tumour.' A swelling of the tonsils. —Swediaur. *Anti'ager* has a similar meaning.

Antiadoncus Inflammatorius. Cynanche tonsillaris.

ANTIAPOPLEC'TIC, *Antiapoplec'ticus*, from αντι, 'against,' and αποπληξια, 'apoplexy.' A remedy for apoplexy.

ANTIARIS TOXICARIA. See Upas.

ANTIARTHRIT'IC, *Antarthrit'ic*, *Antiarthrit'icus*, *Antipodagric*, from αντι, 'against,' and αρθριτις, 'the gout,' (F.) *Antigoutteux*. A remedy for gout.

ANTIASTHMAT'IC, *Antiasthmat'icus*, from αντι, 'against,' and ασθμα, 'asthma.' A remedy for asthma.

ANTIATROPHICUS, Antatrophic.

ANTIBRA'CHIAL, *Antibrachia'lis*. That which concerns the fore arm. Bichat. J. Cloquet suggests that the word should be written *antebrachial*, from *ante*, 'before,' and *brachium*, 'the arm:'—as *antebrachial region*, *antebrachial aponeurosis*, &c.

Antebra'chial Aponeuro'sis, (F.) *Aponévrose antebrachiale*, is a portion of the aponeurotic sheath which envelops the whole of the upper limb. It arises from the brachial aponeurosis, from a fibrous expansion of the tendon of the biceps muscle, from the epicondyle, epitrochlea, and, behind, from the tendon of the triceps brachialis. Within, it is inserted into the cubitus, &c.; and, below, is confounded with the two annular ligaments of the carpus. It is covered by the skin, by veins, lymphatics, and by filaments of superficial nerves; it covers the muscles of the fore-arm, adheres to them, and sends between them several fibrous septa, which serve them for points of insertion.

ANTICACHEC'TIC, *Anticachec'ticus*, *Anticacochym'ic*, from αντι, 'against,' and καχεξια, 'cachexy.' A remedy against cachexy.

ANTICACOCHYMIC, Anticachectic.

ANTICAN'CEROUS, *Anticancero'sus*, *Anticancro'sus*, *Anticarcinom'atous*, from αντι, 'against,' and καρκινωμα, 'cancer,' carcinoma. Opposed to cancer.

ANTICANCROSUS, Anticancerous.

ANTICARCINOMATOUS, Anticancerous.

ANTICARDIUM, *Fossette du cœur*, Scrobiculus cordis.

ANTICATAR'RHAL, *Anticatarrha'lis*, from αντι, 'against,' and καταρρος, 'catarrh.' A remedy for catarrh.

ANTICAUSOD'IC, *Anticausod'ic*, *Anticausod'icus*, from αντι, 'against,' and καυσος, 'a burning fever.' A remedy for *causus*, or inflammatory fever.

ANTICAUSOTIC, Anticausodic.

ANTICHEIR, Pollex. See Digitus.

ANTICHOLERICA, Sophora heptaphylla.

ANTIC''IPATING, *Antic''ipans*, *Prolept'icus*. A periodical phenomenon recurring at progressively shorter intervals. An *anticipating intermittent* is one in which the intervals between the paroxysms become progressively less.

ANTICNEMION, Shin.

ANTICŒUR, Scrobiculus cordis.

ANTICOL'IC, *Anticol'icus*, from αντι, 'against,' and κωλικος, 'the colic.' That which is opposed to colic.

ANTICUS, Anterior.

ANTIDARTREUX, Antiherpetic.

ANTIDIARRHŒ'IC, *Antidiarrhœ'icus*. A remedy for diarrhœa. Opposed to diarrhœa.

ANTID'INIC, *Antidin'icus*, from αντι, 'against,' and δινος, 'vertigo.' Opposed to vertigo.

ANTIDOTA'RIUM, from αντιδοτον, 'an antidote.' A dispensatory (q. v.) A pharmacopœia or formulary.

AN'TIDOTE, *Antid'otum*, from αντι, 'against,' and διδωμι, 'I give.' Originally this word signified an *internal remedy*. It is now used synonymously with *counter-poison*, and signifies any remedy capable of combating the effect of poisons, by decomposing them.

ANTIDOTUM HERACLIDIS, Enneapharmacos.

Antidotum Mithridaticum, Mithridate.

ANTIDYNOUS, Anodyne.

ANTIDYSENTER'IC, *Antidysenter'icus*, from αντι, 'against,' δυς, 'with difficulty,' and εντερον, 'intestine.' Opposed to dysentery.

ANTIEMET'IC or ANTEMET'IC, *Antiemet'icus*, from αντι, 'against,' and εμετικος, 'emetic.' A remedy for vomiting.

ANTIEPHIAL'TIC or ANTEPHIAL'TIC, *Antiephial'ticus*, from αντι, 'against,' and εφιαλτης, 'nightmare.' A remedy for nightmare.

ANTIEPILEP'TIC or ANTEPILEP'TIC, *Antiepilep'ticus*, from αντι, 'against,' and επιλημψια, 'epilepsy.' A remedy for epilepsy.

ANTIFEBRILIS, Febrifuge.

ANTIGALAC'TIC, *Antigalac'ticus*, *Antilac'teus*, from αντι, 'against,' and γαλα, 'milk.' (F.) *Antilaiteux*. Opposed to the secretion of milk, or to diseases caused by the milk.

ANTIG'ONI COLLYR'IUM NIGRUM, *Black collyrium of* ANTIG'ONUS. It was composed of cadmia, antimony, pepper, verdigris, gum Arabic, and water.

ANTIGUA. See West Indies.

ANTIHEC'TIC, *Antihec'ticus*, from αντι, 'against,' and 'εξις, 'habit of body.' The *Antihec'ticum* POTE'RII is the white oxyd of antimony; also called *Diaphoret'icum Jovia'lĕ*.

ANTIHELMINTICUS, Anthelmintic.

ANTIHEMORRHOID'AL, *Antihæmorrhoïda'lis*, from αντι, 'against,' and 'αιμορροιδες, 'hemorrhoids.' A remedy for hemorrhoids.

ANTIHERPET'IC, *Antiherpet'icus*, from αντι, 'against,' and 'ερπες, 'herpes.' (F.) *Antidartreux*. A remedy for herpes.

ANTIHYDROPHOB'IC, *Antihydrophob'icus*, *Antilys'sus*, from αντι, 'against,' 'υδωρ, 'water,' and φοβος, 'dread.' A remedy for hydrophobia.

ANTIHYDROP'IC, *Antihydrop'icus*, from αντι, 'against,' and 'υδρωψ, 'dropsy.' A remedy for dropsy.

ANTIHYSTERIC, Antihysteric.

ANTI-ICTERIC, from αντι, 'against,' and ικτερος, 'jaundice.' A remedy for jaundice.

ANTI-IMPETIGENES, SOLOMON'S. See Liquor hydrargyri oxymuriatis.

ANTILACTEUS, Antigalactic.

ANTILAITEUX, Antigalactic.

ANTILEP'SIS, *Apprehen'sio*, from αντιλαμβανω, 'I take hold of.' The mode of attaching a bandage over a diseased part, by fixing it upon the sound parts.—Hippocrates. The mode of securing bandages, &c. from slipping.

ANTILITH'ICS, *Antilith'ica*, from αντι, 'against,' and λιθος, 'a stone.' A substance that prevents the formation of calculi in the urinary organs.

The chief antilithics—according as the calculi are lithic acid or phosphatic—are alkalies or acids; with revellents, especially change of air; tonics, as the diosma crenata, (?) and uva ursi. (?)

ANTILLY, MINERAL WATERS OF. A celebrated French medicinal spring, near Méaux, in France. The waters have not been analyzed; but astonishing and chimerical effects have been ascribed to them.

ANTILOBIUM, Tragus.

ANTILOI'MIC, *Antiloi'micus*, *Antipestilentia'lis*, from αντι, 'against,' and λοιμος, 'the plague.' A remedy for the plague.

ANTIL'OPUS. The *An'telope*. (F.) *Gazelle*. An African animal, whose hoofs and horns were formerly given in hysteric and epileptic cases.

ANTILYSSUS, Antihydrophobic.

ANTIMELANCHOL'IC, *Antimelanchol'icus*, from αντι, 'against,' and μελαγχολια, 'melancholy.' A remedy for melancholy.

ANTIMOINE, Antimonium—*a. Beurre d'*, Antimonium muriatum—*a. Chlorure d'*, Antimonium muriatum—*a. Oxide blanc d'*, Antimonium diaphoreticum—*a. Soufre doré d'*, Antimonii sulphuretum præcipitatum—*a. Sulfuré hydrosulphure rouge d'*, Antimonii sulphuretum rubrum—*a. Verre d'*, Antimonii vitrum.

ANTIMO'NIAL, *Antimonia'lis*, *Stibia'lis*, from *antimo'nium*, 'antimony.' A composition into which antimony enters. A preparation of antimony.

ANTIMO'NIAL POWDER, *Pulvis antimonia'lis*, *Ox'idum antimo'nii cum phos'phatē calcis*, *Phosphas calcis stibia'tus*, *P. Cal'cicum stibia'tum*, *Pulvis Jame'sii*, *Pulvis stibia'tus*, *Pulvis de phos'phatē calcis et stib'ii compos'itus*, *Factitious* JAMES'S *Powder*, SCHWANBERG'S *Fever Powder*, CHENEVIX'S *Antimonial Powder*. (F.) *Poudre antimoniale composée* ou *de* JAMES. A peroxide of antimony combined with phosphate of lime. (*Take of common sulphuret of antimony*, ℔j; *hartshorn shavings*, ℔ij. Roast in an iron pot, until they form a gray powder. Put this into a long pot, with a small hole in the cover. Keep it in a red heat for two hours, and grind to a fine powder.) This preparation has long been esteemed as a febrifuge: but it is extremely uncertain in its action. The ordinary dose is 6 or 8 grains.

ANTIMONIALE CAUSTICUM, Antimonium muriatum.

ANTIMONIATUM SULPHUR, Antimonii sulphuretum præcipitatum—*a.* Tartar, Antimonium tartarizatum.

ANTIMONII (BUTYRUM,) Antimonium muriatum—*a.* Calx, Antimonium diaphoreticum—*a.* Cerussa, Antimonium diaphoreticum—*a.* Murias, Antimonium muriatum—*a.* Oleum, Antimonium muriatum—*a.* Oxydulum hydrosulphuratum aurantiacum, Antimonii sulphuretum præcipitatum—*a.* Oxydum, Algaroth—*a.* Oxydum auratum, Antimonii sulphuratum præcipitatum—*a.* Oxidum nitro-muriaticum, Algaroth—*a.* Oxydum cum sulphure vitrifactum, Antimonii vitrum—*a.* Oxydum sulphuretum vitrifactum, Antimonii vitrum—*a.* Regulus medicinalis, Antimonium medicinale—*a.* Sal, Antimonium tartarizatum—*a.* Sulphur auratum, Antimonii sulphuretum præcipitatum—*a.* Sulphur præcipitatum, Antimonii sulphuretum præcipitatum—*a.* Sulphuretum, Antimonium—*a.* Tartras, Antimonium tartarizatum—*a.* Tartras et Potassæ, Antimonium tartarizatum—*a.* Vitrum hyacinthinum, Antimonii vitrum.

ANTIMONII ET POTASSÆ TARTRAS, (Ph. U. S.) Antimonium tartarizatum.

ANTIMO'NII SULPHURE'TUM PRECIPITA'TUM, *Sulphur antimonia'tum*, *Hydrosulphure'tum stibio'sum cum sul'phurĕ*, *Oxi'des stib'ii sulphura'tum*, *Oxyd'ulum antimo'nii hydrosulphura'tum aurantiacum*, *Ox'ydum aura'tum antimo'nii*, *Sulphure'tum stib'ii oxydula'ti*, *Hydro-sulfure'tum lu'teum ox'ydi stib'ii sulfura'ti*, *Sulphur antimo'nii præcipita'tum*, *Sulphur aura'tum antimo'nii*, *Golden Sulphur of Antimony*.

Antimo'nii Sulphure'tum Præcipitatum, (F.) *Soufre doré d'Antimoine*, of the London Pharmacopœia, is nearly the same as the old *Kermes Mineral*. It is a powder of an orange colour, and of a metallic, styptic taste. It is emetic, diaphoretic, and cathartic, according to the dose; and has been chiefly used in chronic rheumatism, and in cutaneous affections. Dose, gr. j. to gr. iv.

Antimonii Sulphuretum Præcipitatum of the United States Pharmacopœia, (1842,) is made by boiling together *Sulphuret of Antimony*, in fine powder, *Solution of Potassa*, and *distilled water;* straining the liquor while hot, and dropping into it *Diluted Sulphuric Acid* so long as it produces a precipitate.

ANTIMO'NII SULPHURE'TUM RUBRUM, *Red*

Sul'phuret of An'timony, Hydrosulfure'tum stib'ii rubrum, Sub-hydrosulfas stib'ii, Hydrosulphure'tum rubrum stib'ii sulphura'ti, Pulvis Carthusiano'rum, Kermes mineral. (F.) *Hydrosulfure rouge d'Antimoine sulfuré, Vermillon de Provence.* Properties the same as the last. Dose, gr. j. to gr. iv.

ANTIMO'NII VITRUM, *Glass of Antimony, Antimo'nii ox'ydum sulphure'tum vitrifac'tum, Ox'ydum stib'ii semivit'reum, Antimo'nium vitrifac'tum, Ox'idum antimonii cum sul'phure vitrifac'tum, Vitrum stib'ii, Antimo'nii vitrum hyacinthinum, Oxyd'ulum stib'ii vitrea'tum.* (F.) *Verre d'Antimoine.* (Formed by roasting powdered common antimony in a shallow vessel, over a gentle fire, till it is of a whitish gray colour, and emits no fumes in a red heat; then melting it, in a quick fire, into a clean, brownish-red glass.) It has been used for preparing the tartarized antimony and antimonial wine.

ANTIMONIOUS ACID, Antimonium diaphoreticum.

ANTIMO'NIUM, from ἀντι, 'against,' and μονος, 'alone:' *i. e.* not found alone: or according to others, from ἀντι, 'against,' and *moine*, 'a monk;' because, it is asserted, certain monks suffered much from it. *Stibi, Stib'ium, Reg'ulus Antimo'nii, Minera'lium, Gynæce'um, Magne'sia Satur'ni, Marcasi'ta plum'bea, Platyophthal'mon, Stim'mi, Aurum lepro'sum, Antimo'nium crudum, Antimo'nii sulphure'tum, Sulphure'tum stib'ii nigrum, Common Antimony, Sulphuret of Antimony,* (F.) *Antimoine.* Sulphuret of antimony is the ore from which all the preparations of antimony are formed. In Pharmacy it is the native sesquisulphuret of antimony, purified by fusion. When prepared for medical use, by trituration and levigation, it forms a powder of a black, or bluish gray colour, which is insoluble. It is slightly diaphoretic and alterative, and has been used in chronic rheumatism, cutaneous diseases, &c.

ANTIMONIUM CALCINATUM, Antimonium diaphoreticum.

ANTIMO'NIUM DIAPHORET'ICUM, *Diaphoret'ic Antimony, Antimo'nious Acid, Min'eral Bez'oard, Antimo'nium Calcina'tum, Mineral Diaphoret'ic, Matière perlée de* KERKRING, *Peroxide of Antimony, Calx Antimo'nii, Antimo'nium diaphoret'icum lotum, Cerus'sa Antimo'nii, Calx Antimo'nii elo'ta, Oxo'des stibii album, Ox'idum stibio'sum, Deutoxide of An'timony, Ox'idum stib'ii album mediante nitro confectum.* (F.) *Oxide blanc d'Antimoine préparé par le moyen du nitre.* (*Common antimony,* ℔j; *purified nitre,* ℔iij.—Throw it by spoonfuls into a red-hot crucible; powder and wash. The flowers that stick to the side of the crucible must be carefully separated, otherwise they render it emetic.) Dose, gr. x to xxx.

ANTIMO'NIUM MEDICINA'LE, *Reg'ulus Antimo'nii Medicina'lis, Medicinal Reg'ulus of Antimony.* (*Antimon. sulphur.* ℥v, *Potass. subcarb.* ℥i. *Sodii chlorid.* ℥iv. Powder, mix, and melt. When cold, separate the scoriæ at top, powder the mass, and wash it well.) It is conceived to be more active than common antimony.

ANTIMO'NIUM MURIA'TUM, *Antimo'nii Mu'rias, Chlor'uret of An'timony, Chlorure'tum stib'ii, Spuma trium draco'num, Deuto-mu'rias stib'ii sublima'tus, Butter of Antimony, Muriate of Antimony, Chloride of Antimony, Buty'rum Antimo'nii, O'leum Antimo'nii, Buty'rum stib'ii, Caus'ticum antimoni'ale; Antimonium sali'tum.* (F.) *Chlorure d'Antimoine, Beurre d'Antimoine.* (Common antimony and corrosive sublimate, of each equal parts: grind together, and distil in a wide-necked retort, and let the butyraceous matter that comes over, run, in a moist place, to a liquid oil.) A caustic, but not much used as such. Sometimes taken as poison.

ANTIMONIUM SALITUM, Antimonium muriatum.

ANTIMO'NIUM TARTARIZA'TUM, *Tartris Antimo'nii, Tartar Antimonia'tum, Sal Antimo'nii, Tartras Potas'sæ stibio'sus* seu *stibia'lis, Tartris lixiv'iæ stibia'tus, Deuto-tartras potas'sæ et stib'ii, Tar'tarus emet'icus, Tar'tarum emet'icum, Tartras antimo'nii, Tartras Antimo'nii et Potassæ, Antimo'nii et Potassæ Tartras.* (Ph. U. S.) *Tartarized Antimony, Emetic Tartar, Tartar Emetic.* (F.) *Tartre stibié, Tartre Émétique, Émétique.* In some parts of the United States, vulgarly and improperly called *Tartar:* (Made by digesting *sulphuret of antimony* in a mixture of *nitric* and *muriatic acids* with the aid of heat; filtering the liquor, and pouring it into *water:* freeing the precipitate from acid, by washing and drying it; adding this powder to *bitartrate of potassa* in boiling *distilled water;* boiling for an hour, and after filtering the liquor while hot, setting it aside to crystallize.—Ph. U. S.) Tartarized antimony is emetic, sometimes cathartic and diaphoretic. Externally, it is rubefacient. Dose, as an emetic, gr. j. to gr. iv. in solution: as a diaphoretic, gr. one-sixteenth to gr. one-quarter.

The empirical preparation, called NORRIS's DROPS, consists of a solution of *tartarized antimony* in *rectified spirits*, disguised by the addition of some vegetable colouring matter.

ANTIMONIUM VITRIFACTUM, Antimonii vitrum.

ANTIMONY, BUTTER OF, Antimonium muriatum—a. Chloride of, Antimonium muriatum—a. Chloruret of, Antimonium muriatum—a. Deutoxide of, Antimonium diaphoreticum—a. Glass of, Antimonii vitrum—a. Golden sulphur of, Antimonii sulphuretum præcipitatum—a. Medicinal, regulus of, Antimonium medicinale—a. Muriate of, Antimonium muriatum—a. Peroxide of, Antimonium diaphoreticum—a. Submuriate of, Protoxide of, Algaroth—a. Sulphuret of, red, Antimonii sulphuretum rubrum—a. Tartarized, Antimonium tartarizatum—a. Vegetable, Eupatorium perfoliatum.

ANTINEPHRITIC, *Antinephret'ic, Antinephret'icus,* from ἀντι, 'against,' and νεφριτις, 'nephritis.' A remedy for inflammation of the kidney.

ANTINEUROPATHIC, Nervine.

ANTINEUROTIC, Nervine.

ANTI'OCHI HI'ERA. A preparation extolled by the ancients, in melancholy, hydrophobia, epilepsy, &c. It was formed of germander, agaric, pulp of colocynth, Arabian stœchas, opoponax, sagapenum, parsley, aristolochia, white pepper, cinnamon, lavender, myrrh, honey, &c.

ANTI'OCHI THERIACA. A theriac employed by Antiochus against every kind of poison. It was composed of thyme, opoponax, millet, trefoil, fennel, aniseed, nigella sativa, &c.

ANTIODONTAL'GIC, *Antodontal'gic, Antodontal'gicus, Odontal'gic, Odont'ic, Antiodontal'gicus,* from ἀντι, 'against,' and ὀδονταλγια, 'toothache.' A remedy for toothache.

ANTIORGAS'TIC, *Antiorgas'ticus*, from αντι, 'against,' and οργαω, 'I desire vehemently.' A remedy for orgasm or erethism, and for irritation in general.

ANTIPARALYT'IC, *Antiparalyt'icus*, from αντι, 'against,' and παραλυσις, 'palsy.' Opposed to palsy.

ANTIPARASIT'IC, *Antiparasit'icus, Antiphtheiri'acus, Parasit'icide*; from αντι, 'against,' παρασιτος, 'a parasite,' (q. v.) An agent that destroys parasites, as the different vermin that infest the body. The chief antiparasitics are *Cocculus, Staphisagria, Veratrum album*, and certain of the mercurial preparations.

ANTIPATHI'A, from αντι, 'against,' and παθος, 'passion, affection.' Aversion. A natural repugnance to any person or thing.

ANTIPATH'IC, *Antipath'icus* (F.) *Antipathique*. Belonging to antipathy. Opposite, contrary; as *humeurs antipathiques;* humours opposed to each other. Also, palliative, (q. v.)

ANTIPA'TRI THERIACA, *Theriac of* ANTIPA'TER. A farrago of more than 40 articles: used as an antidote against the bites of serpents.

ANTIPERIOD'IC, *Antiperiod'icus*, from αντι, 'against,' and περιοδος, 'period.' A remedy which possesses the power of arresting morbid periodical movements;—e. g. the sulphate of quinia in intermittents.

ANTIPERISTAL'TIC, *Antiperistal'ticus, Antivermic'ular*, from αντι, 'against,' and περιστελλω, 'I contract.' An inverted action of the intestinal tube.

ANTIPERIS'TASIS, from αντι, 'against,' and περιστασις, 'reunion, aggregation.' A union of opposite circumstances: the action of two contrary qualities, one of which augments the force of the other. The peripateticians asserted, that it is by Antiperistasis, that fire is hotter in winter than in summer. Theophrastus attributes the cause, which renders man more vigorous, and makes him digest more readily in winter, to the augmentation of heat caused by Antiperistasis.

ANTIPERTUSSIS, see Zinci sulphas.

ANTIPESTILENTIALIS, Antiloimic.

ANTIPHAR'MACON, from αντι, 'against,' and φαρμακον, 'poison.' A counter-poison. An antidote.—Dioscorides.

ANTIPHARMACUS, Alexipharmic.

ANTIPHLOGIS'TIC, *Antiphlogis'ticus*, from αντι, 'against,' and φλεγω, 'I burn.' Opposed to inflammation;—as *Antiphlogistic remedies, A. regimen*, &c.

ANTIPHTHEIRIACA; from αντι, 'against,' and φθειριαω, 'I am lousy.' A remedy which is used to destroy lice.

ANTIPHTHIS'ICAL, *Antiphthis'icus*, from αντι, 'against,' and φθισις, 'consumption.' Opposed to phthisis.

ANTIPHYSICA, Carminatives.

ANTIPHYS'ICAL, *Antiphys'icus*, from αντι, 'against,' and φυσαω, 'I blow.' An expeller of wind: a carminative, (q. v.)

It has also been used for any thing preternatural; here, the derivation is from αντι, 'against,' and φυσις, 'nature.' The French sometimes say, '*Un goût antiphisique.*'

ANTIPLEURIT'IC, *Antipleu'reticus, Antipleuret'ic*, from αντι, 'against,' and πλευριτις, 'pleurisy.' Opposed to pleurisy.

ANTIPODAGRIC, Antiarthritic.

ANTIPRAX'IS, from αντι, 'against,' and πραττω, 'I act.' A contrary state of different parts in the same patient: e. g. an increase of heat in one organ, and diminution in another.

ANTIPSOR'IC, *Antipso'ricus*, from αντι, 'against,' and ψωρα, 'the itch.' (F.) *Antigaleux*. Opposed to the itch.

ANTIPUTRID, Antiseptic.

ANTIPY'IC, *Antipy'icus*, from αντι, 'against,' and πυον, 'pus.' Opposed to suppuration.

ANTIPYRET'IC, *Antipyret'icus*, from αντι, 'against,' and πυρετος, 'fever.' A febrifuge, (q. v.)

ANTIPYROT'IC, *Antipyrot'icus*, from αντι, 'against,' and πυρ, 'fire.' Opposed to burns.

ANTIQUARTANA'RIUM, *Antiquar'ticum*. A remedy formerly used against quartan fever.

ANTIRHACHIT'IC, *Antirhachit'icus*, from αντι, 'against,' and *rachitis*. Opposed to rachitis, or rickets.

ANTIRRHI'NUM LINA'RIA, *Lina'ria, L. vulga'ris, Osy'ris, Urina'ria, Common Toad Flax*. (F.) *Linaire*. The leaves have a bitterish taste. They are reputed to be diuretic and cathartic. An ointment made from them has been extolled in hemorrhoids.

ANTIRRHI'NUM ELATI'NE, *Elati'nē, Fluellen* or *Female Speedwell*, was formerly used against scurvy and old ulcerations.

ANTISCOLICUS, Anthelmintic.

ANTISCORBU'TIC, *Antiscorbu'ticus*, from αντι, 'against,' and *scorbutus*, 'the scurvy.' Opposed to scurvy.

ANTISCROF'ULOUS, *Antistrumo'sus*. Opposed to scrofula.

ANTISEP'TIC, *Antisep'ticus, Antiputrid*, from αντι, 'against,' and σηπτος, 'putrid.' *Antiputredino'sus*. Opposed to putrefaction. The chief Antiseptics, internally or externally employed, are *Acidum Muriaticum, Acidum Nitricum, Acidum Sulphuricum, Carbo Ligni, Calx chlorinata, Chlorinum, Cinchona* and its active principles, *Creasote, Dauci Radix, Fermentum Cerevisiæ*, and *Soda Chlorinata*.

ANTISPASIS, Revulsion.

ANTISPASMOD'IC, *Antispasmod'icus*, from αντι, 'against,' and σπαω, 'I contract.' Opposed to spasm. The whole operation of antispasmodics is probably revulsive. The following are the chief reputed antispasmodics. *Æther Sulphuricus, Asafœtida, Castoreum, Dracontium, Moschus, Oleum Animale Dippelii*, and *Valeriana*—with the mental antispasmodics, abstraction, powerful emotions, fear, &c. Of direct antispasmodics, we have not an example.

ANTISPASTIC, Derivative.

ANTISTERIG'MA, from αντι, 'against,' and στηριγμα, 'a support.' A fulcrum, support, crutch.—Hippocrates.

ANTISTER'NUM, from αντι, 'against,' and στερνον, 'the sternum.' The back.—Rufus.

ANTISTRUMOSUS, Antiscrofulous.

ANTISYPHILIT'IC, *Antisyphilit'icus, Antisyphilit'ic*, from αντι, 'against,' and *syphilis*, 'the venereal disease.' Opposed to the venereal disease.

ANTITASIS, Counter-extension.

ANTITHENAR, Opponens pollicis, Adductor pollicis pedis.

ANTITHORA, Aconitum anthora.

ANTITRAG'ICUS, or ANTITRA'GEUS, (F.) *Muscle de l'Antitragus, M. antitragien*.—(Ch.) Belonging to the Antitragus. A small muscle is so called, the existence of which is

not constant. It occupies the space between the antitragus and anthelix.

ANTITRAGIEN, Antitragicus.

ANTITRAGUS, from αντι, 'opposite to,' and τραγος, 'the tragus.' A conical eminence on the pavilion of the ear, opposite the tragus.

ANTITYP'IA, from αντι, 'against,' and τυπτω, 'I strike.' Resistance. Hardness.

ANTIVENE'REAL, *Antivene'reus*, from αντι, 'against,' and *Venus*, 'Venus.' The same as Antisyphilitic. Formerly it was used synonymously with Antaphrodisiac.

ANTIVERMICULAR, Antiperistaltic.

ANTIVERMINOSUS, Anthelmintic.

ANTODONTALGIC, Antiodontalgic.

ANTODYNUS, Anodyne.

ANTRAX, Anthrax.

ANTRE, Antrum—*a. d'Highmore*, Antrum of Highmore.

ANTRUM. 'A cavern,' *Cavern'a* (q. v.) *Bar'athrum*, (F.) *Antre*. A name given to certain cavities in bones, the entrance to which is smaller than the bottom.

ANTRUM AURIS, Tympanum—a. Buccinosum, Cochlea, Labyrinth—a. Dentale, see Tooth—a. Pylori, see Stomach.

ANTRUM OF HIGHMORE, *Antrum Highmoria'num*, *Antrum Genæ*, *Antrum maxilla'rē* vel *maxil'læ superio'ris*, *Genyan'trum*, *Maxillary Sinus*, *Sinus Genæ pituita'rius*, (F.) *Antre d'Highmore*, *Sinus Maxillaire*. A deep cavity in the substance of the superior maxillary bone communicating with the middle meatus of the nose. It is lined by a prolongation of the Schneiderian membrane.

ANULUS, *Fossette*.

ANURIA, Ischuria.

ANUS, *Podex*, *Potex*, *Mol'ynē*, *Cath'edra*, *Cyr'ceon*, *Cys'saros*, *Cysthos*, *Hedra*, *Proctos*, *Archos*, *Sedes*, *Culus*, 'a circle.' The circular opening situate at the inferior extremity of the rectum, by which the excrement is expelled. The *fundament*. The *seat*. (F.) *Siége*. The *body*. The *seat*.

ANUS also signifies the anterior orifice of the *Aqueduct of* Sylvius. By some, this *Anus*, called also *Fora'men commu'nē poste'rius*, has been supposed to form a communication between the back part of the third ventricle and the lateral ventricles. It is closed up, however, by the tela choroidea, and also by the fornix, which is intimately connected with this. The foramen is situate between the commissura mollis of the optic thalami and the pineal gland.

ANUS, ARTIFICIAL. An opening made artificially, to supply the natural anus. The term is often used to include preternatural anus, (q. v.)

ANUS, CONTRACTED, (F.) *Anus rétréci*. A state of the anus when, from some cause, it is constricted.

ANUS, IMPERFORATE. A malformation in which there is no natural anus. See Atresia ani adnata.

ANUS, PRETERNAT'URAL, (F.) *Anus contre nature* or *A. anormal*. An accidental opening which gives issue to the whole or to a part of the fæces. It may be owing to a wound, or, which is most common, to gangrene attacking the intestine in a hernial sac.

This term is also employed, as well as *Anus devié*, *devious anus*, to the case where the anus, instead of being in its natural situation, is in some neighbouring cavity, as the bladder, vagina, &c.

ANXI'ETY, *Anxi'etas*, *Anxi'etude*, *Adæmo'nia*, *Dyspho'ria anxi'etas*, *Alysmus*, *Al'ycē*, *Al'ysis*, *Asē*, from *angere*, Gr. αγχειν, 'to strangle, to suffocate.' A state of restlessness and agitation, with general indisposition, and a distressing sense of oppression at the epigastrium. *Inquietude*, *anxiety*, and *anguish*, represent degrees of the same condition.

AOCHLE'SIA, from α, priv. and οχλος, 'disturbance.' Tranquillity. Calmness.

AOR'TA, *Arte'ria magna*, *A. crassa*, *A. maxi'ma*. (F.) *Aorte*. This name was given by Aristotle to the chief artery of the body. It may have been derived from αορτεομαι, 'I am suspended,' as it seems to be suspended from the heart; or from αηρ, 'air,' and τηρεω, 'I keep,' because it was supposed to contain air. It is probable that Hippocrates meant by αορται, the bronchia and their ramifications. The aorta is the common trunk of the arteries of the body. It arises from the left ventricle of the heart, about opposite to the fifth dorsal vertebra, passes upwards (*ascending Aorta*,) forms the *great arch* of the *Aorta*, and descends along the left of the spine (*descending Aorta*,) until it reaches the middle of the fourth or fifth lumbar vertebra, where it bifurcates, to give origin to the common iliacs. The aorta is sometimes divided into the *Thoracic* or *pectoral*, and the *Abdominal*. For the arteries which arise from it, &c., see Artery.

AORTEURYS'MA, from αορτη, 'the aorta,' and ευρυς, 'dilated.' Aneurism of the Aorta. (F.) *Anévrysme de l'Aorte*, *Aortiectasie*. By carefully auscultating over the dorsal vertebræ, a bellows' sound, with a deep and not always perceptible impulse, may be detected.

AOR'TIC, *Aor'ticus*. Relating to the Aorta. The *Aortic ventricle*, (F.) *Ventricle aortique*, is the left ventricle. The *Aortic valves* are the sigmoid valves at the origin of the Aorta, &c.

AORTIECTASIE, Aorteurysma.

AORTI'TIS, *Inflamma'tio Aor'tæ*, from *Aorta*, and *itis*, denoting inflammation. Inflammation of the aorta.

AORTRA, AORTRON, αορτρα, αορτρον. A lobe of the lungs.—Hipp.

AO'TUS, from α, privative, and ους, 'an ear.' A monster devoid of ears. Gurlt.

APAG'MA, *Apoclas'ma*, *Apocecaulis'menon*, from απο, 'from,' and αγω, 'I remove.' Separation, abduction. (q. v.) Separation of a fractured bone.—Galenus, Foësius.

APAGOGE, Inductio.

APALACHINE, Ilex vomitoria—*a. à feuilles de Prunier*, Prinos—a. Gallis, Ilex vomitoria.

APAL'LAGE, from απαλλαττω, 'I change.' Mutation, change. It is generally taken in a good sense, and means the change from disease to health.—Hippocr.

APALOT'ICA, from απαλοτης, 'softness, tenderness.' Fortuitous lesions or deformities affecting the soft parts. The first order in the class *Tychica*, of Good.

APANTHIS'MUS, from απο, 'from,' and ανθεω, 'I flower.' The obliteration of parts previously inservient to useful purposes, as of the ductus venosus and ductus arteriosus, which are essential to fœtal existence, but are subsequently unnecessary. See, also, Stuprum.

APANTHRO'PIA, from απο, 'from,' and

ανθρωπος, 'man.' Detestation of man; desire for solitude.—Hippocrates. One of the symptoms of hypochondriasis.

APAPHRISMOS, Despumation.

APARACH'YTUM VINUM, from α, priv. and παραχυω, 'I pour over.' The purest wine: that which has not been mixed with sea-water. Galen.

APARINE, Galium aparine.

APARTHROSIS, Diarthrosis.

AP'ATHY, *Apathi'a*, from α, privative, and παθος, 'affection.' (F.) *Apathie.* Accidental suspension of the moral feelings. It takes place in very severe diseases, particularly in malignant fevers.

APECHE'MA, from απο, 'from,' and ηχος, 'sound.' Properly the action of reflecting sound. In medicine, it is synonymous with the Latin *Contrafissu'ra*, a counter-fissure, a counter-blow.—Gorræus, Celsus.

APECTOCEPHALUS, Acephalothorus.

APEL'LA or APPEL'LA, *Leipodermos*, from *a*, priv. and *pellis*, 'skin.' One whose prepuce does not cover the glans.—Galenus, Linnæus, Vogel. Retraction or smallness of any other soft appendage.—Sagar.

APEPSIA, Dyspepsia.

APE'RIENT, *Ape'riens*, *Aperiti'vus*, from *aperire*, (*ad* and *pario*,) 'to open.' A *laxative*, (q. v.) (F.) *Apéritif.* A medicine which gently opens the bowels. The term had, formerly, a much more extensive signification, and was given to every substance supposed to have the power of opening any of the passages, and even the blood-vessels.

APERIS'TATON, *Aperis'tatum*, from α, privative, and περιστημι, 'I surround.' An epithet for an ulcer not dangerous nor considerable, nor surrounded by inflammation.

APÉRITIF, Aperient.

APERITIVUS, Aperient.

APERTOR OCULI, Levator palpebræ superioris.

APERTO'RIUM, from *aperio*, 'I open.' An instrument for dilating the os uteri during labour.

APEUTHYSMENOS, Rectum.

APEX. The point or extremity of a part:—as the apex of the tongue, nose, &c.

APHÆRESIS, Apheresis, Extirpation.

APHASSOM'ENOS, from αφασσω, 'I touch, I feel.' The touching of the parts of generation of the female as a means of diagnosis.—Hippocr. See Esaphe.

APHELI'A, αφελης, 'simple.' Simplicity. The simple manners of the sect of Methodists in teaching and practising medicine.

APHELX'IA, from αφελκω, 'I abstract.' Voluntary inactivity of the whole or the greater part of the external senses to the impressions of surrounding objects, during wakefulness. *Revery* (F.) *Reverie.* Dr. Good has introduced this into his Nosology, as well as *Aphelx'ia socors* or *absence of mind—A. inten'ta* or *abstraction of mind:* and *A. otio'sa*, *Stu'dium ina'nĕ*, *brown study* or *listless musing.*

APHEPSEMA, Decoction.

APHEPSIS, Decoction.

APHE'RESIS or APHÆ'RESIS, from αφαιρεω, 'I take away.' An operation by which any part of the body is separated from the other. Hippocrates, according to Foësius, uses the expression *Aphæresis Sanguinis* for excessive hemorrhage; and Sennertus, to express the condition of an animal deprived both of the faculties of the mind and of the mind itself.

APH'ESIS, from αφιημι, 'I relax.' A remission. This word expresses sometimes the diminution or cessation of a disease; at others, languor and debility of the lower extremities. See Languor and Remission.

APHILAN'THROPY, *Aphilanthro'pia*, from α, privative, φιλεω, 'I love,' and ανθρωπος, 'a man.' Dislike to man. Love of solitude. Vogel has given this name to the first degree of melancholy.

APHISTESIS, Abscess.

APHODOS, Excrement.

APHO'NIA, (F.) *Aphonie, Perte de la Voix*, from α, privative, and φωνη, 'voice.' Privation of voice, or of the sounds that ought to be produced in the glottis. When aphonia forms part of catarrh or of 'cold,' it is commonly of but little consequence: but when produced by causes acting on the nervous system, as by some powerful emotion, or without any appreciable lesion of the vocal apparatus, it frequently resists all remedies.

APHONIA, Catalepsy—a. Surdorum, Mutitas Surdorum.

APHORIA, Sterilitas.

APHOR'MĒ, αφορμη, 'occasion.' The external and manifest cause of any thing. The occasional cause of a disease.—Hippocrates.

APHRO'DES, 'frothy,' from αφρος, 'foam,' and ειδος, 'resemblance.' Applied to the blood and the excrements.—Hippocrates.

APHRODISIA, Coition, Puberty.

APHRODIS'IAC, *Aphrodisiacus*, from Αφροδιτη, 'Venus.' (F.) *Aphrodisiaque.* Medicine or food believed to be capable of exciting to the pleasures of love; as ginger, cantharides, &c. They are generally stimulants.

APHRODISIACUS, Venereal.

APHRODISIASMUS, Coition.

APHRODISIOG'RAPHY, from Αφροδιτη, 'Venus,' and γραφω, 'I describe.' Etymologically, this term means a description of the pleasures of love, but it has been placed at the head of a work describing the venereal disease.

APHROG'ALA, from αφρος, 'foam,' and γαλα, 'milk.' *Lac spumo'sum.* A name formerly given to milk rendered frothy by agitation.

APHRONIA, Apoplexy.

APHRONITRUM, Soda.

APHROSYNE, Insanity.

APHTHÆ, *Aphtæ*, *Apthæ*, from απτω, 'I inflame.' *Osce'do*, *Thrush* or *sore mouth*, *Aphtha lactu'cimen*, *A. Infant'um*, *Lactu'cimen*, *Lactucim'ina*, *Lactu'mina*, *White Thrush*, *Milk Thrush*, *Em'phlysis aphtha*, *Ulcera serpen'tia Oris*, *Pus'tula oris*, *Febris aphtho'sa*, *Angi'na aphtho'sa*, *Vesic'ulæ gingiva'rum*, *Typhus aphthoïdeus.* A. consist of roundish, pearl-coloured vesicles, confined to the lips, mouth, and intestinal canal, and generally terminating in curd-like sloughs. In France, the Aphthæ of children, *Aphthes des enfans*, is called *Muguet*, *Millet*, *Blanchet*, *Catarrhe buccal* and *Stomatite crêmeuse pultacée*, *Pultaceous Inflammation of the Mouth;* and generally receives two divisions—the *mild* or *discreet*, (F.) *Muguet bénin* ou *discret*, and the *malignant*, (F.) *Muguet malin* ou *confluent*, the *Black Thrush.* Common Thrush is a disease of no consequence, requiring merely the use of

absorbent laxatives. The malignant variety, which is rare, is of a more serious character, and is accompanied with typhoid symptoms.

APHTHÆ ADULTORUM, Stomatitis, aphthous—a. Serpentes, Cancer aquaticus.

APHTHE GANGRÉNEUX, Cancer aquaticus.

APHTHES DES ENFANS, Aphthæ.

APHTHEUX, Aphthous.

APH'THOUS, *Aphtho'sus*, (F.) *Aphtheux*. Belonging to aphthæ; complicated with aphthæ; as *Aphthous Fever*.

APIASTRUM, Melissa.

APICES CRURUM MEDULLÆ OBLONGATÆ, Corpora striata.

APILEPSIA, Apoplexy.

APIOS, Pyrus communis.

APIS, Bee.

API'TES, from *απιον*, 'a pear.' Perry.—Gorræus.

A'PIUM GRAV'EOLONS, *Apium, Paludap'pium, Beli'num, Smallage*. (F.) *Ache*. *Nat. Ord.* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. The plants, roots, and seeds are aperient and carminative. *Selery* is a variety of this.

APIUM PETRÆUM, Bubon Macedonicum.

APIUM PETROSELI'NUM, *A'pium Hortens'sē, Eleoseli'num* (?), *Grielum, Petroseli'num* or *Common Parsley*. (F.) *Persil*. The root—*Petroselinum*, (Ph. U. S.)—and seeds are diuretic and aperient.

APLAS'TIC, *Aplas'ticus*, from *α*, privative, and *πλασσω*, 'I form.' That which is not capable of forming; that which does not serve to form, or is not organizable.

APLASTIC ELEMENT; one which is unsusceptible of any farther amount of organization.—Gerber.

APLESTIA, Ingluvies, Intemperance.

APLEU'ROS, from *α*, privative, and *πλευρος*, 'a rib.' One without ribs.—Hippocrates. Galen.

APLOT'OMY, *Aplotom'ia*, from *απλοος*, 'simple,' and *τεμνω*, 'I cut.' A simple incision.

APNEUSTIA, Apnœa, Asphyxia.

APNŒ'A, from *α*, privative, and *πνεω*, 'I respire.' *Asphyx'ia, Apneus'tia*. Absence of respiration, or insensible respiration. Also, Orthopnœa, (q. v.)

APNŒA INFANTUM, Asthma Thymicum.

APNŒSPHYXIA, Asphyxia.

APNUS, *απνοος*, same etymon. One devoid of respiration. An epithet applied by authors to cases in which the respiration is so small and slow, that it seems suspended.—Castelli. It is probable, however, that the word was always applied to the patient, not to the disease.

APO, *απο*, a prefix, denoting 'from, of, off, out.' Hence—

APOBAINON, Eventus.

APOBESOMENON, Eventus.

APOBIOSIS, Death.

APOCAPNISMUS, Fumigation.

APOCATASTASIS, Considentia, Restauratio.

APOCATHARSIS, Catharsis.

APOCATHARTICUS, Cathartic.

APOCECAULISMENON, Apagma.

APOCENO'SIS, from *απο*, 'out,' and *κενωσις*, 'evacuation.' A partial evacuation, according to some, in opposition to Cenosis, which signifies a general evacuation.—Cullen and Swediaur apply it to morbid fluxes.

APOCENOSIS, Abevacuatio—a. Diabetes mellitus, see Salivation—a. Vomitus pyrosis, Pyrosis.

APOCHOREON, Excrement.

APOCHREMPSIS, Exspuition.

APOCH'YMA, from *αποχεω*, 'I pour out.' A sort of tar, obtained from old ships; which is impregnated with chloride of sodium.—Aëtius, Paulus, Gorræus.

APOCIN GOBE-MOUCHE, Apocynum androsæmifolium.

APOCLASMA, Abduction, Apagma.

APOC'OPE, from *απο*, and *κοπτειν*, 'to cut.' Abscission, (q. v.) A wound with loss of substance. Fracture with loss of part of the bone. Amputation.

APOCOPUS, Castratus.

APOCRISIS, Contagion, Excrement, Secretion.

APOCROUS'TIC, *Apocrous'tica remed'ia*, from *απο*, 'out,' and *κρουω*, 'I push.' An astringent and repellent.—Galenus.

APOCRUSTICA, Repellents.

APOCYESIS, Parturition.

APOC''YNUM ANDROSÆMIFO'LIUM, from *απο*, and *κυων*, 'a dog,' because esteemed, of old, to be fatal to dogs. *Dog's Bane, Bitter Dog's Bane, Milkweed, Bitterroot, Honeybloom, Catchfly, Flytrap, Ip'ecac.* (F.) *Apocin gobe-mouche, A. amer. Nat. Ord.* Apocyneæ. *Sex. Syst.* Pentandria Digynia. The root of this plant is found from Canada to Carolina. Thirty grains evacuate the stomach as effectually as two-thirds of the amount of Ipecacuanha, by which name it is known in various parts of the eastern states. It is in the secondary list of the Pharmacopœia of the United States.

APOC''YNUM CANNAB'INUM, *Indian Hemp*. This American plant possesses emetic, cathartic, diaphoretic and diuretic properties, and has been strongly recommended in dropsy. It has been given in decoction,—℥ij of the root boiled in three pints of water to two. A wineglassful for a dose.

APOCYNUM NOVÆ ANGLIÆ HIRSUTUM, Asclepias tuberosa—a. Orange, Asclepias tuberosa—a. Scandens, Allamanda.

APODACRYT'ICUS, *Delachrymati'vus*, from *απο*, 'from,' and *δακρυω*, 'I weep.' A substance, supposed to occasion a flow of the tears, and then to arrest them.—Columella, Pliny, Galenus.

APODYTE'RIUM, *Coniste'rium, Spoliato'rium, Spolia'rium*, from *αποδυω*, 'I strip off.' The ante-room, where the bathers stripped themselves in the ancient Gymnasia.

APOGALACTISMUS, Weaning.

APOGALACTOS, Exuber.

APOGEUSIS, Ageustia.

APOGEUSTIA, Ageustia.

APOGLAUCOSIS, Glaucosis.

APOGON, Imberbis.

APOG'ONUM, from *απο*, and *γινομαι*, 'I exist.' A living fœtus in utero.—Hippocrates.

APOLEP'SIS, from *απολαμβανω*, 'I retain.' Retention, suppression.—Hippocrates. Asphyxia.

APOLEX'IS, from *αποληγω*, 'I cease.' Old age, decrepitude.

APOLINO'SIS, from *απο*, and *λινον*, 'a flaxen thread.' The mode of operating for fistula in ano, by means of a thread of *Homolinon* or *Linum crudum*.—Hippocrates, Paulus.

APOLLINARIS ALTERCUM, Hyoscyamus.

APOLUTICA, Cicatrisantia.

APOLYS'IA or APOL'YSIS, from απολυω, 'I loosen.' Solution. Relaxation. Debility of the limbs or looseness of bandages.—Erotian. Expulsion of the fœtus and its dependencies. Termination of a disease.—Hippocrates, Galen.

APOMATHE'MA or APOMATHE'SIS, from απο, and μανθανω, 'I learn.' Forgetfulness of things taught.—Hippocr.

APOM'ELI, from απο, 'of,' and μελι, 'honey.' An oxymel (q. v.) or decoction made of honey.—Galen, Aëtius, Paulus, &c.

APOMEXIS, Munctio.

APOMYLE'NAS, from απομυλλαινω, 'I make a wry mouth.' One who pushes his lips forwards, pressing them against each other. Occasionally a symptom of nervous fever.—Galen, Erotian.

APOMYTHO'SIS, from απομυσσω, 'I snore.' A disease in which there is stertor.—Sauvages, Sagar.

APONEUROG'RAPHY, *Aponeurogra'phia*, from απονευρωσις, an 'aponeurosis,' and γραφη, 'a description.' A description of the Aponeuroses.

APONEUROL'OGY, *Aponeurolog''ia*, from απονευρωσις, 'an aponeurosis,' and λογος, 'a discourse.' *Aponeurosiol'ogy*. The Anatomy of the Aponeuroses.

APONEUROSIOLOGY, Aponeurology.

APONEURO'SIS or APONEVRO'SIS, from απο, 'from,' and νευρον, 'a nerve.' *Pronerva'tio, Expan'sio nervo'sa.* (F.) *Aponeurose, Aponévrose.* The ancients called every white part νευρον, and regarded the Aponeurosis as a nervous expansion. The Aponeuroses are white, shining membranes, very resisting, and composed of fibres interlaced. Some are continuous with the muscular fibres, and differ only from tendons by their flat form. They are called *Aponeuroses of insertion*, (F.) *Aponévroses d'insertion*, when they are at the extremities of muscles, and attach them to the bone;—*Aponeuroses of intersection*, (F.) *Aponévroses d'intersection*, if they interrupt the continuity of the muscle, and are continuous on both sides with muscular fibres. Others surround the muscle, and prevent its displacement: they are called *enveloping Aponeuroses*, (F.) *Aponévroses d'enveloppe.*

Aponeurosis, Fascia—a. Crural, Fascia lata—a. Femoral, Fascia lata—a. Iliac, Fascia iliaca.

APONEUROT'IC, *Aponeurot'icus.* What relates to Aponeuroses:—thus we say, *Aponeurotic expansion, Aponeurotic muscle,* &c.

APONEUROT'OMY, *Aponeurotom'ia*, from απονευρωσις, 'aponeurosis,' and τεμνω, 'I cut.' Anatomy of aponeuroses.

A. has, also, been proposed for the division, *(débridement)* of filaments, &c. in aponeurotic openings, and for the section of fasciæ.

APONÉVROSE SUPERFICIELLE DE L'ABDOMEN ET DE LA CUISSE, Fascia superficialis.

APONEVROSIS, Aponeurosis

APONIA, from α, privative, and πονος, 'pain.' Freedom from pain.

APONIPSIS, Ablution.

APOPALLE'SIS or APOPAL'SIS, from αποπαλλω, 'I throw off.' Expulsion. Protrusion.—Hippocr. Also, Abortion, (q. v.)

APOPATE'MA and APOP'ATHOS. The excrements, and the place where they are deposited.—Dioscorides, Erotian.

APOPEDASIS, Luxation.

APOPHLEGMATISANS PER NARES, Errhine—a. per os, Sialogogue.

APOPHLEGMATISAN'TIA, *Apophlegmatison'ta, Apophlegmatis'mi*, from απο, 'out,' and φλεγμα, 'phlegm.' Medicines which facilitate the upward expulsion of mucus from the mucous membrane of the digestive or air passages; as gargles, masticatories, &c.

APOPHLEG'MATISM, *Apophlegmatis'mus.* The action of Apophlegmatisantia.—Galen.

APOPHLEGMATISMI, Apophlegmatisantia.

APOPH'RADES, from αποφρας, 'unlucky.' An epithet applied to unlucky days, *(dies nefandi.)* Days on which a favourable change is not expected to occur in a disease.—A. Laurentius.

APOPHRAXIS, Amenorrhœa.

APOPHTHAR'MA and APOPH'THORA, from απο, and Φθειρω, 'I corrupt.' Abortion, as well as a medicine to procure abortion.

APOPHTHORA, Abortion.

APOPHTHORIUS, Abortive.

APOPHYADES, from απο, 'from,' and φυω, 'I spring.' The ramifications of veins and arteries.—Hippocr.

APOPHYSE BASILAIRE, Basilary process—*a. Engainante* ou *vaginale*, Vaginal process—*a. Pyramidale*, see Temporal Bone—*a. Petrée*, see Temporal Bone.

APOPHYSES ÉPINEUSES, Spinous processes of the vertebræ.

APOPH'YSIS, from απο, 'from,' and φυω, 'I rise,' *Ec'physis, Proces'sus, Appendix. A process of a bone.* When the apophysis is yet separated from the body of the bone by intervening cartilage, it is called *Epiphysis.* The apophyses or processes are, at times, distinguished by epithets, expressive of their form: as *A. styloid, A. coracoid,* &c. Others are not preceded by the word apophysis; as *Trochanter, Tuberosity,* &c.

Apoph'ysis of Ingras'sias is a term applied to the lesser ala of the sphenoid bone.

Apophysis of Rau, *Grêle apophyse du Marteau:* see Malleus.

APOPIES'MA, from αποπιεζω, 'I compress.' Hippocrates uses the term to signify a fancied expression or forcing out of humours, by the application of bandages in wounds and fractures.

APOPLANESIS, Error loci.

APOPLEC'TIC, *Apoplec'ticus.* Referring to Apoplexy. This word has various significations. It is applied, 1. To individuals labouring under apoplexy: 2. To remedies proper for combating apoplexy: 3. To the constitution, temperament, or make, *Architectu'ra apoplec'tica*, which predisposes to it: and, 4. To the symptoms, which characterize apoplexy; as *Apoplectic sleep, A. stroke,* (q. v.) *A. stertor,* &c. The jugular veins have also, by some, been called *Apoplectic veins.—Venæ apoplec'ticæ.*

Apoplectic Cell. The cavity remaining in the encephalon, after the effusion of a clot into it.

APOPLEXIA, Apoplexy—a. Catalepsia, Catalepsia—a. Cordis, Hæmocardiorrhagia—a. Hydrocephalica, Hydrocephalus internus—a. Hepatica, Hepatorrhagia—a. Medullaris, Apoplexia myelitica—a. Meningæa, Apoplexy, meningeal.

Apoplexia Myelitica; *A. Medullaris, A. Spina'lis, A. Rhachia'lis, Hæmorrha'chis,* (F.)

Apoplexie de la Moëlle épinière, Hémorrhagie de la Moëlle épinière, Hémato-myélie, Hémo-myélorrhagie. Hemorrhage into the spinal marrow.

APOPLEXIA NERVOSA, Apoplexy, nervous—a. Pulmonalis, see Hæmoptysis—a. Pulmonum, see Hæmoptysis—a. Renalis, Apoplexy, renal—a. Rhachialis, A. myelitica—a. Spasmodica, Apoplexy nervous—a. Simplex, Apoplexy, nervous—a. Spinal, Apoplexia myelitica—a. Temulenta, see Temulentia.

APOPLEXIE CAPILLAIRE, Mollities cerebri—*a. Cérébrale*, Apoplexy, *Hemorrhagie cérébrale.*

APOPLEXIE FOUDROYANTE, 'Thundering Apoplexy.' A form of apoplexy, which is intense and rapidly fatal.

APOPLEXIE MÉNINGÉE, Apoplexy, meningeal—*a. De la Moëlle Épinière*, Apoplexy, spinal.

AP'OPLEXY, *Apoplex'ia*, from αποπληττειν, 'to strike with violence.' At the present day, the term apoplexy is employed by many writers to signify *interstitial hemorrhage*, (F.) *Hémorrhagie interstitielle*, or every effusion of blood, which occurs suddenly into the substance of organs or tissues. Hence, we speak of cerebral apoplexy, pulmonary apoplexy, &c. &c. Formerly it was always—and still is by many—used in an entirely symptomatic sense,—to signify, in other words, the train of phenomena, which characterize cerebral apoplexy This disease, *Hæmorrha'gia Cer'ebri, Aphro'nia, Carus Apoplex'ia, Coma Apoplex'ia, Pulpez'ia, Sideru'tio, Apilepsia, Morbus atton'itus, Gutta, Theople'gia, Theoplex'ia*, (F.) *Apoplexie, A. cérébrale, Hémato-encephalie, Coup de sang*, is characterized by diminution, or loss of sensation and mental manifestation; by the cessation, more or less complete, of motion; and by a comatose state,—circulation and respiration continuing. It generally consists in pressure upon the brain; either from turgescence of vessels, or from extravasation of blood; hence the terms *Hæmenceph'alus, Hémorrhagie cérébrale*, and *Hémoencephalorrhagie*, applied to it by some. The general prognosis is unfavourable; especially when it occurs after the age of 35. When A. is accompanied with a hard, full pulse, and flushed countenance, it is called *Apoplexia sanguin'ea, Cataph'ora coma;* when with a feeble pulse and pale countenance, and evidences of serous effusion, *Apoplexia serosa, A. pituitosa, Serous apoplexy, Cataphora hydrocephalica, Hydro-encephalorrhée.* (Piorry.) *Hydropisie cérébrale suraiguë, Hydrorrhagié.*

In *Nervous Apoplexy, Apoplexia nervosa*, seu *spasmodica, A. simplex, simple apoplexy*, no lesion whatever may be perceptible on dissection, although the patient may have died under all the phenomena that are characteristic of apoplexy.

APOPLEXY OF THE HEART, Hæmo-cardiorrhagia.

APOPLEXY MENINGE'AL, *Apoplex'ia meningæ'a*, (F.) *Apoplexie méningée, Hemorrhagie méningée.* Hemorrhage from the meninges of the brain or spinal marrow—generally into the great cavity of the arachnoid.

APOPLEXY, NERVOUS, see Apoplexy—a. Pulmonary see Hæmoptysis—a. Simple, A. Nervous.

APOLEXY, RENAL, *Apoplex'ia rena'lis.* A condition of the kidney, characterized by knotty, irregular, tuberculated eminences, some of a deep black colour. Effusion of blood into the substance of the kidney.

APOPLEXY, SPINAL, Apoplexia myelitica.

APOPNIXIS, Suffocation.

APOPSYCHIA, Syncope.

APOPTO'SIS, from αποπιπτω, 'I fall down.' A relaxation of bandages.—Erotian.

APORRHŒ'A, from απορρεω, 'I flow from.' An emanation, effluvium, contagion. (q. v.)—Moschion. A falling off of the hair, according to some.

APOSCEM'MA, and APOSCEP'SIS, from αποσκηπτω, 'I lie down, I direct myself towards.' Afflux of fluids towards a part. Metastasis. The first word has been applied to the excrements.—Hippocr., Galen.

APOSCEPARNIS'MUS, *Deascia'tio*, from απο and σκεπαρνον, 'a hatchet.' Wound of the cranium, by a cutting instrument, in which a piece of the bone has been cut out, as with a hatchet.—Gorræus.

APOSCEPSIS, Aposcemma.

APOS'CHASIS or APOSCHAS'MOS, from αποσχαζω, 'I scarify.' *Scarification.* A slight superficial incision in the skin. Also, bloodletting.—Hippocr.

APOS'IA, *Sitis defec'tus*, from α, privative, and ποσις, 'drink.' Want of thirst, absence of desire for liquids.

APOSI'TIA, from απο, 'from,' and σιτος, 'food.' Aversion for food.—Galen. See Disgust.

APOSIT'IC, *Aposit'icus;* the same etymology. Any substance which destroys the appetite, or suspends hunger.

APOSPAS'MA, from αποσπαω, 'I tear or lacerate.' *Rhegma ligamenta'rē, Lacera'tio ligamenta'ria.* (F.) *Arrachement* (q. v.) A solution of continuity, especially of a ligament.

APOSPHACELE'SIS, *Aposphacelis'mus*, from απο, and σφακελος, 'mortification.' Gangrene in wounds and fractures, owing to the bandages being too tight.—Hippocr.

APOSPHINX'IS, αποσφιγξις; constriction, compression. The action of a tight bandage.—Hippocr.

APOSPONGIS'MUS, the act of sponging for any purpose.—Gorræus.

APOSTALAG'MA, and APOSTAG'MA, from απο, 'from,' and σταλαζω, 'I flow.' The ancient name for the saccharine liquor which flows from grapes when not yet pressed.

APOS'TASIS, from απο, and ιστημι, 'I stop.' The ancients had different significations for this word. It was most commonly used for an abscess. The separation of a fragment of bone by fracture. Removal of disease by some excretion, &c.

APOSTAX'IS, from αποσταξω, 'I distil from.' The defluxion of any humour, as of blood from the nose.—Hippocr. Staxis (q. v.)

APOSTE'MA, from απο, 'from,' and ιστημι, 'I settle,' or from αφιστημι, 'I recede from.' This word is used by the ancients, somewhat vaguely. It meant an affection in which parts, previously in contact, are separated from each other by a fluid collected between them. The moderns regard it as synonymous with *Abscess.* (q. v.) Some, even of the moderns, have applied it to any watery tumour, and even to tumours in general.

APOSTEMA CEREBRI, Encephalopyosis—a. Empyema, Empyema—a. Parulis, Parulis—a. Phalangum, *Fourche*—a. Psoaticum, Lumbar abscess.

APOSTERIG'MA, from αποστηριζω, 'I sup-

port.' Any thing that supports a diseased part, as a cushion, a pillow, &c.—Galen. A deep-seated and inveterate disease of the intestines.—Hippocr.

APOSTOLO'RUM UNGUEN'TUM, *Dodecaphar'macum, Ointment of the Apostles.* So called, because as many solid ingredients entered into its composition as there were Apostles. It contained several resins and gum resins, yellow wax, oil, vinegar, verdigris, &c. and was formerly employed as a vulnerary.

APOS'TROPHĒ, from απο, and στρεφω, 'I turn.' An aversion or disgust for food.—Paulus.

APOSYRMA, Abrasion, Desquamation.

APOTELES'MA, from απο, and τελεσμα, 'completion.' The result or termination of a disease. See, also, Amuletum.

APOTHANASIA, see Death.

APOTHE'CA, *Pharmace'um*, from απο, and τιθημι, 'to place.' Any place where things are kept, and therefore 'a shop.' A place where medicines are kept. See Pharmacopolium.

APOTHECARIES' HALL. The Hall of the Corporation or Society of Apothecaries of London, where medicines are prepared and sold under their direction, &c. This Company obtained a charter of incorporation in the 15th year of James the First. No general practitioner can establish himself in England or Wales, without having obtained a license from the Court of Examiners of the Company.

APOTH'ECARY, *Apotheca'rius, Dispensa'tor, Pharmacopo'la, Pigmenta'rius, Pharmacopæ'us, Rhizot'omus, Myropo'les*, same derivation. (F.) *Apothicaire, Pharmacien, Pharmacopole.* In every country, except Great Britain, it means one who sells drugs, makes up prescriptions, &c. In addition to these offices, which, indeed, they rarely exercise, except in the case of their own patients, the Apothecaries in England form a privileged class of practitioners—a kind of sub-physician.

APOTHERAPEI'A, from αποθεραπευω, (απο and θεραπευω,) 'I cure.' A perfect cure.—Hippocr. In the ancient Gymnastics, it meant the last part of the exercises:—the friction, inunction, and bathing, for the purpose of obviating fatigue, or curing disease.—Galen, Gorræus.

APOTHER'MUM, from απο, and θερμη, 'heat.' A pickle made of mustard, oil, and vinegar.—Galen.

APOTH'ESIS, from αποτιθημι, 'I replace.' The position proper to be given to a fractured limb, after reduction.

APOTHICAIRE, Apothecary.

APOTHICAIRERIE, (F.) from αποθηκη, 'a warehouse, shop.' The same as Apotheca; also, a gallipot.

APOTHLIM'MA, from απο, and θλιβω, 'I press from.' Anciently, the dregs, and sometimes the expressed juice of plants.—Gorræus.

APOTHRAU'SIS, from αποθραυω, 'I break.' Fracture of a bone, with spicula remaining. Extraction of a spiculum of bone.—Gorræus. Also, Abscision, (q. v.)

APOTILMOS, Evulsion.

APOT'OKOS, from απο, and τικτω, 'I bring forth.' An abortive fœtus.—Hippocr.

APOTOME, Amputation.

APOTROPÆUM, Amuletum.

APOTROPE, Aversion.

APOXYSMUS, Abrasion.

APOZEM, Decoction.

APPARA'TUS, *Parasceu'ē*, from *ad* and *parare*, 'to prepare.' This word signifies,—a collection of instruments, &c. for any operation whatever. (F.) *Appareil.*

In surgery it means the methodical arrangement of all the instruments and objects necessary for an operation or dressing. By extension, the French give the name *Appareil, Capsa chirurgica*, to the case or drawers in which the apparatus is arranged.

Apparatus has likewise been applied to the different modes of operating for the stone.—See Lithotomy.

In *Physiology*, Apparatus (*Appareil*) is applied to a collection of organs, all of which work towards the same end. A *system of organs* comprehends all those formed of a similar texture. An *apparatus* often comprehends organs of very different nature. In the *former*, there is analogy of structure; in the *latter*, analogy of functions.

Apparatus Altus, see Lithotomy.

Apparatus, Immovable, (F.) *Appareil immobile, Immovable Bandage, Permanent Bandage.* An apparatus used for fractures, which is generally formed by wetting the bandages in some substance, as starch or dextrin, which becomes solid, and retains the parts *in situ.*

Apparatus Lateralis, see Lithotomy—a. Major, see Lithotomy—a. Minor, see Lithotomy.

APPAREIL, Apparatus, *Boîtier—a. Grand*, see Lithotomy—*a. Haut*, see Lithotomy—*a. Immobile*, Apparatus, immovable—*a. Lateralisé*, see Lithotomy—*a. Petit*, see Lithotomy—*a. Pigmental*, Pigmental apparatus.

APPAREILS DE FORMATION, (F.) Gall admits, in the brain, two kinds of fibres; the one, divergent, proceeding from the cerebral peduncles to the convolutions, and constituting what he calls *appareils de formation:* the other, convergent, and proceeding from the convolutions to the centre of the organ, constituting what he calls *appareils de réunion.* The *first*, as a whole, form the organs of the mental faculties: the *latter* are commissures, which unite parts of the organ that are double and in pairs.

APPAUVRI, Impoverished.

APPENDICE, Appendix—*a. Cæcal*, Appendix vermiformis cæci—*a. Digital*, Appendix vermiformis cæci—*a. Épiploïques*, Appendiculæ epiploicæ—*a. Sous-sternale*, Xiphoid cartilage—*a. Sus-sphenoïdale du cerveau*, Pituitary gland—*a. Xiphoïde*, Xiphoid cartilage.

Appendices Coli Adiposæ, Appendiculæ epiploicæ.

APPENDICULA CEREBRI, Pituitary gland—a. Vermiformis cæci, see Appendix—a. Epiploica, Epiploic appendage.

APPENDICULÆ PINGUEDINOSÆ, Epiploic appendages. (q. v.) *Appendic'ulæ Epiploicæ, Appen'dices coli adipo'sæ.* (F.) *Appendices Epiploïques.* Prolongations of the peritoneum beyond the surface of the great intestine, which are analogous in texture and arrangement to omenta.

APPEN'DIX, *Epiph'ysis*, from *appendere*, 'to hang from.' Any part that adheres to an organ or is continuous with it:—seeming as if

added to it. *An appendage*, an apophysis, (q. v.) (F) *Appendice, Annexe.*

Appen'dix or Appendic'ula Vermifor'mis Cæ'ci, *Ec'phyas, Additamen'tum Coli, Appen'dix Cæci.* (F.) *Appendice vermiforme, A. cæcal* ou *digital.* A vermicular process, the size of a goose-quill, which hangs from the intestinum cœcum. Its functions are unknown.

Appendix Cerebri, Pituitary gland—a. ad Cerebrum, Cerebellum—a. to the Epididymis, Vasculum aberrans—a. Ventriculi, Duodenum.

APPENSIO, see Analeptia.

AP'PETENCE, *Appeten'tia*, from *appetere*, (*ad* and *petere*,) 'to desire.' An ardent, passionate desire for any object.

APPETIT, PERTE D', Anorexia.

AP'PETITE, *Appeti'tus, Appeten'tia, Appeti''tia, Cupi'do, Orex'is, Ormē*, same etymology as the last. An internal sensation, which warns us of the necessity of exerting certain functions, especially those of digestion and generation. In the latter case it is called *venereal appetite*, (F.) *Appetit vénérien:* in the former, simply *appetite*, (F.) *Appetit* ou *Appetition.* If the desire for food, occasioned by a real want, be carried to a certain extent, it is called *hunger*, when solid food is concerned; *thirst*, when liquid. *Appetite* and *hunger* ought not, however, to be employed synonymously: they are different degrees of the same want. Hunger is an imperious desire: it cannot be provoked, like the appetite. It is always allayed by eating: but not so the appetite; for, at times, it may be excited in this manner. They are very generally, however, used synonymously.

Appetite, Morbid, Limosis.

APPETITUS CANINUS, Boulimia.

APPLE, ADAM'S, Pomum adami—a. Bitter, Cucumis colocynthis—a. Curassoa, Aurantium curassaventium—a. May, Podophyllum peltatum—a. Root, Euphorbia corollata—a. Tree, Pyrus malus.

APPLICA'TA, from *applicare*, (*ad* and *plicare*,) 'to apply.' A word, unnecessarily introduced into medical language, to express the objects which are applied immediately to the surface of the body, as clothes, cosmetics, baths, &c.—Hallé.

APPLICATION, *Applica'tio*, in a moral signification, is synonymous with Attention. Also the act of applying one thing to another; as the A. of an apparatus, of a bandage, blister, &c.

APPREHEN'SIO, from *ad* and *prehendere*, 'to take.' This word is employed in various senses. It means catalepsy, (q. v.) or catochia.—Paul Zacchias. A kind of bandage for securing any part. Also, a therapeutical indication.

APPROCHE, Coition.

APPROXIMA'TION, *Approxima'tio*, from *ad* and *proximus*, 'nearest.' Ettmuller gave this name to a pretended method of curing disease, by making it pass from man into some animal or vegetable, by the aid of immediate contact.

APRAC'TA, from α, priv. and πρασσω, 'I act.' Without action. An epithet for the parts of generation, when unfit for copulation or generation.

APRICATIO, Isolation.

APRICOT', Prunus Armeniaca.

APROSO'PIA, *Triocephal'ia*, from α. priv. and προσωπον, 'the face.' A malformation, which consists in the face being deficient.

APSINTHIA'TUM, from αψινθιον, 'wormwood.' A sort of drink made of wormwood.—Aëtius.

APSINTHITES, Absinthites.

APSYCHIA, Syncope.

APTHÆ, Aphthæ.

APTYS'TOS, from α, priv. and πτυω, 'I spit.' Devoid of expectoration. An epithet given to certain pleurisies, in which there is no expectoration.—Hippocr.

APYETOS, from α, priv. and πυον, 'pus.' An external affection, which does not end in suppuration.

APYIQUE, Apyos.

AP'YOS, from α, priv. and πυον, 'pus,' (F.) *Apyique.* That which does not afford pus.

APYRENOMELE, Apyromele.

APYRET'IC, *Apyret'icus*, from α, priv. and πυρ, 'fire, fever.' Without fever. This epithet is given to days in which there is no paroxysm of a disease; as in the case of an intermittent; as well as to some local affections which do not induce fever. Urticaria is sometimes called an *apyretic exanthem.*

APYREX'IA. The same etymology. Absence of fever: *Dialeim'ma, Intermissio.* Apyrexia is the condition of an intermittent fever between the paroxysms: the duration of the apyrexia, consequently, depends on the type of the intermittent. Occasionally, the term has been applied to the cessation of the febrile condition in acute diseases.

APYROME'LE or APYRENOME'LE, from α, priv. πυρην, 'a nut,' and μηλη, 'a sound.' A sound or probe, without a button or nut. It is the *Melo'tis, Specil'lum auricula'rium* or *Auricular sound* of Galen.

AQUA, Water—a. Acidi carbonici, Acidulous water—a. Acidula hydrosulphurata, Naples water (factitious)—a. Aeris fixi, Acidulous water (simple)—a. Alkalina oxymuriatica, *Eau de Javelle*—a. Aluminis compositus, Liquor a. c.—a. Aluminosa Bateana, Liq. aluminis compositus—a. Ammoniæ, Liquor ammoniæ—a. Acetatis ammoniæ, Liquor ammoniæ acetatis—a. Ammoniæ carbonatis, Liquor ammoniæ subcarbonatis—a. Ammoniæ caustica, Liquor ammoniæ—a. Amnii, Liquor Amnii.

Aqua Amygdala'rum Concentra'ta, (F.) *Eau d'Amandes amères. Water of bitter almonds.* Made by bruising well two pounds of *bitter almonds;* adding, whilst triturating, ten pounds of *spring water*, and four pounds of *alcohol*, letting the mixture rest in a well-closed vessel, and then distilling two pounds. Used instead of the Aqua Laurocerasi and the Hydrocyanic acid.

Aqua Anisi Fortis, Spiritus anisi—a. Aquisgranensis, see Aix-la-Chapelle—a. Ardiente, see Spirit—a. Auditoria, Cotunnius, Liquor of—a. Aqua balsamica arterialis, Aqua Binelli—a. Bareginensis, Barèges water—a. Bellilucana, Balaruc waters—a. Benedicta, Liquor calcis—a. Benedicta composita, Liquor calcis compositus—a. Benedicta Rulandi, Vinum antimonii tartarizati.

Aqua Binellii, *Acqua Binelli, Aqua Balsam'ica arteria'lis.* A celebrated Italian hæmostatic, invented by one Binelli. Its composition is unknown, but its virtues have been ascribed to creasote; although there is reason

for believing it to possess no more activity than cold water.

Aqua Brocchiari. A supposed styptic, which made much noise at Paris at one time. It is devoid of efficacy. Dr. Paris found nothing in it but water perfumed by some vegetable essence.

Aqua Borvonensis, Bourbonne-les-Bains, mineral waters of—a. Bristoliensis, Bristol water—a. Calcariæ ustæ, Liquor calcis—a. Calcis, Liquor calcis—a. Calcis composita, Liquor calcis compositus—a. Camphor, Mistura camphoræ—a. Camphorata, Bates's, see Cupri sulphas—a. Catapultarum, *Arquebusade eau d'*.

Aqua Cinnamo'mi, *Cinnamon Water*. Distilled water of Cinnamon Bark. Prepared also in the following manner. *Ol. Cinnam.* f. ʒss; *Magnes. Carbon.* ʒss: *Aq. destillat.* Oij. Rub the oil and carbonate of magnesia; add the water gradually and filter. (Ph. U. S.)

Aqua Cinnamomi Fortis, Spiritus Cinnamomi—a. Colcestrensis, Colchester, mineral waters of—a. Cupri ammoniata, Liquor c. a.—a. Cupri vitriolati composita, Liquor cupri sulphatis composita—a. inter Cutem, Anasarca—a. Destillata, Water, distilled—a. Fluviatilis, Water, river.

Aqua Fœnic'uli, *Fennel Water*. The distilled water of fennel seed. It may be prepared also like the aqua cinnamomi.

Aqua Fontana, Water, spring—a. Fortis, Nitric acid—a. Hepatica, Hydrosulphuretted water—a. Hordeata, Decoctum hordei—a. Juniperi composita, Spiritus juniperi compositus—a. Kali, Liquor potassæ subcarbonatis—a. Kali caustici, Liquor potassæ—a. Kali præparati, Liquor potassæ subcarbonatis—a. Kali puri, Liquor potassæ—a. Kali subcarbonatis, Liquor potassæ subcarbonatis—a. Labyrinthi, Cotunnius, liquor of—a. ex Lacu, Water, lake—a. Lithargyri acetati composita, Liquor plumbi subacetatis dilutus—a. Luciæ, Spiritus ammoniæ succinatus—a. Marina, Water, sea—a. Medicata, Water, mineral.

Aqua Menthæ Piperi'tæ, *Peppermint Water*. The distilled water of peppermint. It may be prepared like the aqua cinnamomi.

Aqua Menthæ Piperitidis Spirituosa, Spiritus menthæ piperitæ—a. Menthæ viridis, Spearmint water, see Aqua menthæ piperitæ—a. Menthæ vulgaris spirituosa, Spiritus menthæ viridis—a. Mineralis, Water, mineral—a. Mirabilis, Spiritus pimentæ—a. Mulsa, Hydromeli—a. Natri Oxymuriatici, Liquor sodæ chlorinatæ—a. Neapolitana, Naples water (factitious)—a. Nephritica, Spiritus myristicæ—a. Nivata, Water, snow—a. Nucis moschatæ, Spiritus myristicæ—a. Ophthalmica, Liquor zinci sulphatis cum camphorâ—a. Paludosa, Water, marsh—a. Picea, see Pinus sylvestris—a. Pluvialis, Water, rain—a. Potassæ, Liquor potassæ—a. Pulegii spirituosa, Spiritus pulegii—a. Putealis, Water, well—a. Rabelii, Elixir acidum Halleri—a. Raphani composita, Spiritus armoraciæ compositus—a. Regia, Nitro-muriatic acid.

Aqua Rosæ, *Rose Water*. (*Ros. centifol.* lbviij: *Aquæ*, cong. ij. M. Distil a gallon—Ph. U. S.)

Aqua Salubris, Water, mineral—a. Sapphariña, Liquor cupri ammoniata—a. Saturni, Liquor plumbi subacetatis dilutus—a. Sclopetaria, *Arquebusade eau d'*—a. Seminum anisi composita, Spiritus anisi—a. Seminum carui fortis, Spiritus carui—a. Soteria, Water, mineral—a. Stygia, Nitro-muriatic acid—a. Styptica, Liquor cupri sulphatis composita—a. Sulphurata simplex, Hydrosulphuretted water—a. Sulphureti ammoniæ, Liquor fumans Boylii—a. Thediana, *Arquebusade eau d'*—a. Theriacalis Bezoardica, Chylostagma diaphoreticum Mindereri—a. Tofana, Liquor arsenicalis—a. Traumatica Thedenii, *Arquebusade eau d'*—a. Vegeto-mineralis, Liquor plumbi subacetatis dilutus—a. Viciensis, Vichy water—a. Vitriolica camphorata, Liquor zinci sulphatis cum camphorâ—a. Vitriolica cærulea, Solutio sulphatis cupri composita—a. Vulneraria, *Arquebusade eau d'*—a. Zinci vitriolati cum camphorâ, Liquor zinci sulphatis cum camphorâ.

AQUÆ ACIDULÆ, Acidulous waters—a. Badiguæ, Bath, Mineral waters of—a. Badizæ, Bath, Mineral waters of—a. Bathoniæ, Bath, Mineral waters of—a. Buxtonienses, Buxton, Mineral waters of—a. Cantuarienses, Canterbury, waters of.

Aquæ Destilla'tæ, *Distilled Waters, Hydrola'ta*, (F.) *Hydrolats*. These are made by putting vegetable substances, as roses, mint, pennyroyal, &c., into a still with water, and drawing off as much as is found to possess the aromatic properties of the plant. To every gallon of the distilled water, 5 oz. of spirit should be added to preserve it. The *simple distilled waters* are sometimes called *Aquæ stillatit''iæ sim'plices*: the *spirituous, Aquæ stillatit''iæ spirituo'sæ*, but more commonly *Spir'itus*.

Aquæ Minerales Acidulæ, Waters, mineral, gazeous—a. Minerales ferruginosæ, Waters, mineral, chalybeate—a. Minerales sulphureæ, Waters, mineral, sulphureous—a. Stillatitiæ, Aquæ destillatæ—a. Solis, Bath mineral waters.

AQUÆDUC'TUS, *Aq'ueduct*, from *aqua*, 'water,' and *ducere, ductum*, 'to lead.' (F.) *Aqueduc*. Properly, a canal for conducting water from one place to another. Anatomists have used it to designate certain canals.

Aquæductus Cerebri, Infundibulum of the brain—a. Cotunnii, Aquæductus vestibuli.

Aquæduc'tus Cochle'æ, (F.) *Aqueduc du Limaçon*;—a very narrow canal, which proceeds from the tympanic scala of the cochlea, to the posterior edge of the *pars petrosa*.

Aquæduc'tus Fallo'pii, *Canal spiroïde de l'os temporal* of Chaussier, *Aqueduc de Fallope*. A canal in the pars petrosa of the temporal bone, which extends from the meatus auditorius internus to the foramen stylo-mastoideum. and gives passage to the facial nerve. The opening into this aqueduct is called *Hia'tus Fallo'pii*.

Aquæduc'tus Syl'vii, *Aqueduc de Sylvius, Iter ad quartum ventric'ulum, Cana'lis me'dius, Canal intermédiaire des ventricules* of Chaussier. A canal forming a communication between the third and fourth ventricles of the brain.

Aquæduc'tus Vestib'uli, or *Aquæductus Cotun'nii*, (F.) *Aqueduc du vestibule* ou *Aqueduc de Cotugno*. This begins in the vestibule, near the common orifice of the two semicircular canals, and opens at the posterior surface of the *pars petrosa*.

AQUALIC'ULUS, from *aqualis*, 'a water-pot.' That part of the abdomen which extends from the umbilicus to the pubes. See Hypogastrium. It has also been applied to the stomach or intestinal canal.

AQUAS'TER. A word used, by Paracelsus,

to express the visions or hallucinations of patients.

AQUEDUC, Aqueduct—*a. de Cotugno*, Aquæductus vestibuli—*a. de Fallope*, Aquæductus Fallopii—*a. du Limaçon*, Aquæductus cochleæ—*a. de Sylvius*, Aquæductus Sylvii—*a. du Vestibule*, Aquæductus vestibuli.

AQUEDUCT, Aquæductus.

A'QUEOUS, *Aquo'sus*, *Hydato'des*, *Hydro'des*, from *aqua*, 'water,' (F.) *Aqueux*. Watery.

The absorbents or lymphatics are sometimes called, in France, *Conduits* ou *Canaux aqueux*.

AQUEOUS HUMOUR OF THE EYE, *Humor aquo'sus*, *Albugineous humour*, *Oöci'des*, *ωοειδης*, *Hydatoï'des*, *'υδατοειδης*, *Ova'tus* seu *Oviformis humor*, (F.) *Humeur aqueuse*. The limpid fluid which fills the two chambers of the eye, from the cornea to the crystalline, and which is, consequently, in contact with the two surfaces of the iris. Quantity, 5 or 6 grains: s. g. 1.0003. It contains gelatin, albumen, chloride of sodium, and phosphate of lime in small quantity; and is enveloped in a fine membrane:—*the membrane of the aqueous humour*—*Tunica propria* seu *Vagi'na humo'ris a'quei*, seu *Membra'na Demuria'na* seu *Descemet'ii*, *Membra'ne of Demours*, or of *Descemet*; although these last terms are by some appropriated to a third layer of the cornea.

AQUIDUCA, Hydragogues.

AQUIFOLIUM, Ilex aquifolium—a. Foliis deciduis, Prinos.

AQUILA, Hydrargyri submurias, Sulphur.

The alchymists used this word for sublimed sal ammoniac, precipitated mercury, arsenic, sulphur, and the philosopher's stone. See Hydrargyri Submurias, and Sulphur.

AQ'UILA CŒLEST'IS; a sort of panacea, of which mercury was a constituent.

AQ'UILA LACH'CRYMÆ; a liquor prepared from several ingredients, especially from calomel.

AQ'UILA PHILOSOPHO'RUM. The alchymists, whose terms were always mysterious, called mercury thus, when reduced to its original form.

AQ'UILA VEN'ERIS; an ancient preparation, made by subliming verdigris and sal ammoniac.

AQUILÆ VENÆ, Temporal veins.

AQUILE'GIA VULGA'RIS, *Common Colombine* or *Columbine*, (F.) *Ancolie*. The seeds, herb, and flowers were formerly used in jaundice and cutaneous diseases. They are still retained in many of the Pharmacopœias of continental Europe.

AQUO-CAPSULITIS, Aquo-membranitis.

AQUO-MEMBRANI'TIS, *Keratoïri'tis*, *Aquocapsuli'tis*. Inflammation of the anterior chamber of the eye. A badly compounded term, denoting inflammation of the capsule or membrane of the aqueous humour.

AQUULA. Ceratocele, Hydatid, Hydroa—a. Acustica, Cotunnius, liquor of.

AQUULA seu AQUA MORGAGNII. The minute portion of water, which escapes when an opening is made into the capsule of the crystalline.

ARA PARVA, a small altar;—a kind of bandage invented by Sostratus, which represents the corners of an altar.—Galen.

AR'ABĒ; a wound, a blow.—Erotian.

ARAB'ICA ANTID'OTUS HEPAT'ICA, *Ar'abic Hepat'ic An'tidote*. A powder, composed of myrrh, costus, white pepper, &c. It was administered in new wine.

ARAB'ICUS LAPIS. A sort of white marble found in Arabia, and analogous to alabaster. It was regarded as an absorbent and desiccative, and was employed in hemorrhoids.

AR'ABIS MALAG'MA. An anti-scrofulous medicine, composed of myrrh, olibanum, wax, sal ammoniac, iron pyrites, &c.—Celsus.

AR'ABS, MEDICINE OF THE. The Arabians kept the torch of medical science illuminated during a dark period of the middle ages. Before the year of the Hegira, they had schools of medicine; but these were most flourishing during the 10th, 11th, and 12th centuries. The chief additions made by them to medical science were in the departments of pharmacy and in the description of diseases. Their principal writers were Avicenna, Serapion, Averrhoes, Hali Abbas, Moses Maimonides, Avenzoar, Rhazes, Albucasis, &c.

AR'ACHIS HYPOGE'A, *Ground nut*, *Pea nut*; erroneously called *Pistachio nut*, in the South; *Pindars* of the West Indies. Cultivated in the Southern States. The seeds are oily and are eaten. A kind of inferior chocolate may be made of them.

ARACH'NE, αραχνη, 'a spider, a cobweb.' Hence—

ARACHNI'TIS or ARACHNOIDI'TIS, *Inflammation of the Arachnoid*. A variety of phrenitis; which see.

ARACH'NOID MEMBRANE, *Meninx Média*, *Arachnoïdeus*, *Arachno'des*, from αραχνη, 'a cobweb,' and ειδος, 'form, resemblance.' *Tu'nica ara'nea*, *Tu'nica arachno'des*, *Menin'gion*. A name given to several membranes, which, by their extreme thinness, resemble spider-webs.—Celsus and Galen called thus the membrane of the vitreous humour,—the *tunica hyaloidea*. The moderns use it now for one of the membranes of the brain, situate between the dura mater and pia mater. It is a serous membrane, and composed of two layers; the *external* being confounded, in the greater part of its extent, with the dura mater, and, like it, lining the interior of the cranium and spinal canal: the *other* being extended over the brain, from which it is separated by the pia mater, without passing into the sinuosities between the convolutions, and penetrating into the interior of the brain by an opening at its posterior part under the corpus callosum. It forms a part of the investing sheath of the nerves, as they pass from the encephalic cavities. Its chief uses seem to be;—to envelop, and, in some measure, protect the brain, and to secrete a fluid for the purpose of keeping it in a state best adapted for the proper performance of its functions.

ARACHNOIDITIS, Arachnitis.

ARACK', *Arrack'*; (East Indian.) A spirituous liquor made in India in various ways, often from rice, sometimes from sugar fermented along with the juice of the cocoa nut: frequently from toddy, the juice which flows from the cocoa nut tree by incision, and from other substances. It is a strong, heating spirit.

ARACK, MOCK, is made by adding ℥ij of *Benzoic acid* to a *quart of rum*. The celebrated Vauxhall punch is made with such arack.

ARACOUCHINI, Icica aracouchini.

ARACUS AROMATICUS, Vanilla.

AR'ADOS, from αραδεω, 'I am turbulent.' The agitation excited in the stomach by the coction of aliments of different nature.—Hip-

poor. Likewise, the motion produced by cathartics.

ARÆOT'ICA, from *αραιοω*, 'I rarefy.' Medicines supposed to have the quality of rarefying the humours. See Rarefaciens.

ARAKI, see Spirit.

ARALIA CANADENSIS, Panax quinquefolium.

ARA'LIA HIS'PIDA, *dwarf elder*, is said to be diuretic, and has been recommended, in decoction, in dropsy.

ARA'LIA NUDICAU'LIS, *Nardus America'nus, Small Spikenard, Wild Liq'uorice, Sweet root, False Sarsapari'lla*, (F.) *Petit nard*. This American plant is said to be a mild stimulant and diaphoretic, and has been recommended as a substitute for the sarsaparilla. It is used, also, as a tonic. It is in the secondary list, Pharm. United States.

ARA'LIA RACEMO'SA, *American Spikenard*, has the same properties as A. Nudicaulis.

ARA'LIA SPINO'SA, *Angel'ica Tree, Prickly Ash, Toothach Tree, Spikenard Tree, Prickly Elder, Shotbush, Pigeon Tree*. Its properties are not clear. The berries, and a tincture of them have been employed, it is said, successfully in *toothach*. A spirituous infusion has also been used in colic.

ARANEA, Araneæ Tela—a. Tarentula, see Tarentula.

ARA'NEÆ TELA, *Ara'nea, Ara'neum, Cobweb*, (F.) *Toile d'Araignée*. Formerly, this substance was much employed, and supposed to possess extraordinary virtues, especially when applied to the wrists. It has been recently used again in intermittents. It is a mechanical styptic, and is so applied, externally, at times.

ARANEO'SA URI'NA. A term applied to the urine when loaded with filaments, like cobwebs.

ARANEO'SUS PULSUS; a term employed to express extreme weakness of pulse; when the movements resemble those of a delicate net raised by the wind.

ARANEUM, Araneæ Tela.

ARA'NEUM ULCUS, *Astakil'los*. A name given by Paracelsus to a malignant, gangrenous ulcer, extending from the feet to the legs.

ARARA, Myrobalanus citrina.

ARASCON, Nymphomania, Satyriasis.

ARATRUM, Vomer.

ARAUCARIA DOMBEYI, Dombeya excelsa.

ARBOR BENIVI, Benjamin—a. Indica, Laurus cassia—a. Maris, Coral—a. Thurifera, Juniperus Lycia.

ARBOR VITÆ, (F.) *Arbre de vie*. A name given to an arborescent appearance, observed on cutting the cerebellum longitudinally; and which results from the particular arrangement of the white substance with the cineritious. Also, the Thuya occidentalis, (q. v.)

AR'BORES. A morbid alteration of the skin, which precedes its ulceration. Ruland.

ARBOUSIER, Arbutus unedo.

ARBRE DE VIE, Arbor Vitæ.

ARBUSCULA GUMMIFERA BRAZILIENSIS, Hypericum Bacciferum.

AR'BUTUS UVA URSI, *Arctostaph'ylos, Uvæ Ursi Fo'lia. Nat. Ord.* Ericeæ. *Sex. Syst.* Decandria Monogynia. (F.) *Busserolle* ou *Raisin d'Ours*. The leaves—(*Uva Ursi*, Ph. U.S.)—of this plant are tonic and astringent, and have been employed, chiefly, in diseases of the urinary organs. Dose of powder from gr. xv. to ʒss. The English names are *Bear's Whortleberry*, or *Bearberry, Mountainbox, Redberry, Upland Cranberry, Foxberry, Checkerberry*.

AR'BUTUS UNE'DO, *Andrach'nē, Une'do, Une'do papyra'cea*, *κεμαρος*, (F.) *Arbousier*. A decoction of the leaves is astringent, and has been used in diarrhœa.

ARC or ARCH, *Arcus*. Any part of the body resembling an arch in form; as the *Arch of the colon*, (F.) *Arc du colon*:—the transverse portion of that intestine:—*Arch of the aorta, Arcus aor'tæ*, (F.) *Crosse de l'Aorte*, &c.: the turn which the aorta takes in the thorax.

ARCH, ANASTOMOT'IC, (F.) *Arcade anastomotique*, is the union of two vessels, which anastomose by describing a curved line. The vessels of the mesentery anastomose in this manner.

ARCHES OF THE PALATE. These are two in number on each side of the throat, one of which is termed *anterior*, the other *posterior*.

The *anterior arch* arises from the middle of the velum palati, at the side of the uvula, and is fixed to the edge of the base of the tongue.

The *posterior arch* has its origin, likewise, from the side of the uvula, and passes downwards to be inserted into the side of the pharynx. The anterior arch contains the circumflexus palati, and forms the isthmus faucium. The posterior arch has, within it, the levator palati: and between the arches are the tonsils.

ARCA ARCANORUM, Hydrargyrum—a. Cordis, Pericardium.

ARCADE ANASTOMOTIQUE, Arch anastomotic—*a. Crurale*, Crural arch—*a. Inguinale*, Crural arch—*a. Orbitaire*, Orbitar arch—*a. Pubienne*, Pubic arch—*a. Zygomatique*, Zygomatic arch.

ARCADES DENTAIRES, Dental arches—*a. Palmaires*, Palmar arches.

ARCADI-TEMPORO-MAXILLAIRE, Temporalis.

ARCÆ'US or ARCŒ'US, BALSAM OF, (F.) *Baume d'Arcæus*. A kind of soft ointment used in sores, contusions, &c. It is made by melting two parts of mutton suet, one part of hog's lard: of turpentine and rosin, each one part and a half: straining and agitating till cold.

ARCANSON, Colophonia.

ARCA'NUM, from *ar'ca*, 'a chest.' A secret, a *nostrum*, (F.) *Arcane*. A remedy whose composition is kept secret; but which is reputed to possess great efficacy.

ARCANUM CORALLINUM, Hydrargyri nitrico-oxydum—a. Duplicatum, Potassæ sulphas—a. Tartari, Potassæ acetas.

ARCATOS, Meros.

ARCEAU, Arculus, Cradle.

ARCEUTOS, Juniperus communis.

ARCHÆ'US, *Archeus*, from *αρχη*, 'commencement,' (F.) *Archée*. A word invented by Basil Valentine, and afterwards adopted by Paracelsus and Van Helmont. The latter used it for the internal principle of our motions and actions. This archæus, according to Van Helmont, is an immaterial principle, existing in the seed prior to fecundation, and presiding over the development of the body, and over all organic phenomena. Besides this chief archæus, whose seat Van Helmont placed in the upper orifice of the stomach, he admitted several of a subordinate character, which had to execute its orders; one, for instance, in each organ, to preside over its functions; each of

them being subject to anger, caprice, terror, and every human failing.

ARCHANGELICA, Lamium album.

ARCHÉ, ἀρχή, *Init'ium, Princip'ium. Inva'sio.* The first attack of a disorder.

ARCHÉE, Archæus.

ARCHELL, CANARY, Lichen roccella.

ARCHELOG''IA, from ἀρχή, 'beginning,' and λόγος, 'a discourse.' A treatise on fundamental principles;—of medicine, for example.

ARCHEN'DA. A powder of the leaves of the *ligustrum*, used by the Ægyptians after bathing, to obviate the unpleasant odour of the feet.—Prosper Alpinus.

ARCHIA'TER; *Protomed'icus, Protia'tros*, from ἀρχή, 'authority,' and ἰατρός, 'physician.' The original signification of this word is a matter of dispute. Some consider with Mercurialis, that it meant physician to a prince, king, emperor, &c.: others, with C. Hoffman, apply it to every physician who, by his situation, is raised above his colleagues. The former opinion seems to have prevailed,—*Archiatre des Rois de France*, being applied to the chief physician to the king.

ARCHIG''ENI MORBI. Acute diseases; because they hold the first rank: from ἀρχή, 'beginning,' and γίνομαι, 'I am.'

ARCHIMAGIA, Chymistry.

ARCHINGEAY, MINERAL WATERS OF. Archingeay is situate in France, three leagues from St. Jean d'Angely. The waters are prized in all diseases. They seem to contain carbonate of lime, a little chloride of sodium, carbonate of iron, and some bitumen.

ARCHITECTURA APOPLECTICA, Apoplectic make.

ARCHITIS, Proctitis, Rectitis.

ARCHOPTOSIS, Proctocele.

ARCHORRHA'GIA from ἄρχος, 'the anus,' and ῥέω, 'I flow.' *Archorrhœ'a.* Hemorrhage from the anus.

ARCHORRHŒA, Archorrhagia.

ARCHOS, Arcus, Rectum.

ARCHOSYRINX, Fistula in ano.

AR'CIFORM, *Arcifor'mis*, from *arx, arcis*, 'a top or ridge,' and *forma*, 'shape.' An epithet given to certain fibres of the anterior pyramids of the medulla oblongata, which take a curved course around the inferior extremity of each corpus olivare and ascend towards the cerebellum.

ARCTA'TIO and ARCTITU'DO, from *arcto*, 'I make narrow.' Contraction, (F.) *Rétrécissement*, of a natural opening or of a canal, and especially of the vulva, of the orifice of the uterus, or of the intestinal canal. Constipation. Reunion by suture or infibulation.—Scribonius Largus, Paul Zacchias, &c.

ARCTITUDO, Arctatio.

ARC'TIUM LAPPA. The root and seed of the *Clit-bur, Barda'na, Arctium, Vlaphis, Lappa glabra, Lappa major, L. persona'ta, Burdock*, (F.) *Bardane, Glouteron. Nat. Ord.* Compositæ. *Sex. Syst.* Syngenesia æqualis. *Root* diuretic: *seed* cathartic. It has been used in decoction in diseases of the skin and in syphilis.

ARCTOSTAPHYLOS, Arbutus uva ursi.

ARCTU'RA, from *arcto*, 'I straighten.' The effects of a nail grown into the flesh, *Arctu'ra unguis.*—Linnæus.

ARCUA'TIO, *Concava'tio.* An anterior gibbosity or projection of the sternum.

ARCUEIL, MINERAL WATERS OF. Arcueil is about one league south of Paris. The water contains carbonic acid, carbonate of lime, sulphate of lime, chloride of sodium, and some deliquescent salts.

A celebrated society held its meetings at this village, of which Berthollet, Humboldt, La Place, &c. were members.

ARCULA CORDIS, Pericardium.

ARCULÆ. The Orbitar Fossæ: πυελίδες.—Rufus of Ephesus.

ARCULUS, diminutive of *arcus*, 'an arch.' A small arch; a cradle, (q. v.) (F.) *Arceau, Archet.* A semicircular box or basket used for preventing the coverings of the body from coming in contact with injured or diseased parts. An ordinance of the Grand Duke of Tuscany forbade mothers to sleep with an infant near them, unless it was put under a solid cradle.

ARCUS MEDULLARIS, Fornix—a. Senilis, Gerotoxon.

ARDALOS, Excrement.

ARDAS, Excrement.

ARDENT, *ardens*, from *ardere*, 'to burn.'

ARDENT FEVER, (F.) *Fièvre ardente.* The *Causus, Synocha*, or inflammatory fever.

MAL DES ARDENS. A name given to a species of pestilential erysipelas, or *Saint Anthony's Fire*, which reigned epidemically in France in 1130.

ARDENT OR INFLAMED EYES, (F.) *Yeux ardens.* So called when they are injected red.

ARDENT URINE, (F.) *Urine ardente.* When it is of a deep red.

ARDESIA HIBERNICA, Hibernicus lapis.

ARDEUR, Ardor—*a. du Cœur*, Cardialgia—*a. d'Estomac*, Ardor ventriculi, Pyrosis—*a. de la Fièvre*, Ardor Febrilis—*a. d'Urine*, Ardor Urinæ.

AR'DOR, (F.) *Ardeur.* Heat, (q. v.) A feeling of burning, of violent heat; *Æstus, Æstu'tio, Causo'ma.*

ARDOR FEBRI'LIS, (F.) *Ardeur de la Fièvre.* The hot period of fever.

ARDOR STOMACHI, Pyrosis.

ARDOR URI'NÆ, (F.) *Ardeur d'Urine.* A scalding sensation occasioned by the urine in passing over the inflamed mucous membrane of the urethra, or over the neck of the bladder.

ARDOR VENEREUS, Heat.

ARDOR VENTRIC'ULI, (F.) *Ardeur d'Estomac.* Heartburn. See Cardialgia and Pyrosis.

A'REA, 'a void place.' A Latin word used by some authors to designate a variety of Alopecia, (q. v.) in which the hair changes colour, but does not fall off; also, Porrigo decalvans, (q. v.)

ARE'CA. The fruit of *Are'ca Cat'echu, Caun'ga; Are'ca nut, Betel nut. Nat. Ord.* Palmæ; *Sex. Syst.* Monœcia Monadelphia; (F.) *Arec*, is astringent and tonic, and enters into the composition of the *Betel*, the great masticatory of the Orientals.

AREFAC'TION, *Arefac'tio*, ξήρανσις, from *arefacere*, 'to make dry.' (*arere*, 'to dry,' and *facere*, 'to make.') The process of drying substances, prior to pulverization.

ARENAMEN, Bole Armenian.

ARENA'TIO. *Sand* or *Earth Bath;* from *arena*, 'sand.' *Saburra'tio.* The application of hot sand to the body. *Pedilu'via* of sand were formerly used in Ascites.

ARENO'SA URI'NA. *Sandy Urine.* Urine when it deposits a sandy sediment.

ARENO'SUS, Sabulous, (q. v.) Also, one who passes sandy urine.

ARE'OLA. A diminutive of *Area*. Anatomists understand by *Areolæ*, the interstices between the fibres composing organs; or those existing between laminæ, or between vessels which interlace with each other.

Areola is, also, applied to the coloured circle or *Halo*, which surrounds the nipple; and which becomes much darker during pregnancy; as well as to the circle surrounding certain vesicles, pustules, &c., as the pustules of the small-pox, the vaccine vesicle, &c. Chaussier, in such cases, recommends the word *Aure'ola*. (F.) *Auréole*, *Aire*.

AREOLAR, *Areola'ris*. Appertaining to an areola.

AREOLAR EXHALATIONS are those recrementitial secretions, which are effected within the organs of sense, or in parenchymatous structures,—as the aqueous, crystalline and vitreous humours, &c.

AREOM'ETER, *Gravim'eter*, *Alcoölom'eter*, *Aërostat'ic Bal'ance*, from αραιος, 'light,' and μετρον, 'measure:' i. e. '*measure of lightness*.' An instrument, so called, because first employed to take the specific gravity of fluids lighter than water. The *Areometer of Beaumé*, which is the most used in Pharmacy, particularly in France, consists of a tube of glass, largely expanded towards its inferior extremity, and terminating, below, by a small ball, containing mercury or lead, which serves it as a balance, so that it may remain upright in the fluid. This tube is furnished with a graduated scale. If the fluid, into which the Areometer is plunged be heavier than water, the instrument rises: if lighter, it sinks. There are various Areometers, as those of the Dutch, of Fahrenheit, Nicholson, &c. The *Areometer* is also called *Hydrom'eter*, (F.) *Aréomètre*, *Pèse-liqueur*.

SCALE OF THE AREOMETER WITH CORRESPONDING SPECIFIC GRAVITIES.

1. *Ascending Scale for light liquids.*
Beaumé.

Scale of Beaumé.	Specific Gravities.	Substances.
	700	Pure hydrocyanic acid — *Gay Lussac.*
66	715	Very pure sulphuric ether.
60	742	The same concentrated.
50	782	
48	792	Equal parts of alcohol, and ether.
42	819	Very pure alcohol for pharmaceutical purposes.
40	827	
36	847	Pure alcohol. Naphtha.
33	863	Alcohol of commerce.
32	868	Essential oil of turpentine.
30	878	
26	900	Hydrocyanic acid of Scheele and pure hydrocyanic acid, mixed with an equal portion of water. (*Robiquet.*)
25	906	Acetic ether.
23	915	
Id.	Id.	Nitric ether.
22	923	Muriatic ether. Liquid ammonia. Olive oil.
Id.	Id.	
20	935	Brandy.
18	948	
13	980	Burgundy wine.
12	986	
11	993	Bordeaux wine.
10	1000	Distilled water.

2. *Descending Scale for heavy liquids.*
(*Dutch.*)

Scale of Beaumé.	Specific Gravities.	Substances.
0	1000	Common distilled water.
1	1007	Distilled vinegar.
	1009	
2	1014	Common vinegar.
3	1032	Cow's milk.
4		
10	1075	Concentrated acetic acid.
12	1091	
20	1161	
21	1180	Liquid hydrochloric acid.
25	1210	
30	1261	Boiling syrup.
35	1321	Cold syrup. Common nitric acid.
40	1384	Concentrated nitric acid.
41	1398	
45	1454	
Id.	Id.	Phosphoric acid for medical use.
50	1532	
60	1714	
66	1847	Very concentrated sulphuric acid.
70	1946	Very concentrated phosphoric acid

ARES. A term invented by Paracelsus to designate the principle on which depends the form of mercury, sulphur, and salt. These the alchymists regarded as the three bodies that give birth to every other.

AR'ETĒ, αρετη, 'virtue.' Mental or corporeal vigour. Hippocrates.

A'REUS. A pessary, mentioned by Paulus of Ægina.

AR'GEMA and AR'GEMON, from αργος, 'white.' *Fos'sula.* (F.) *Encavure.* A white spot or ulceration of the eye. Hippocr. See Leucoma.

ARGEMONĒ MEXICA'NA, *Thorn Poppy.* A native of Mexico, but naturalized in most parts of the world. *Nat. Ord.* Papaveraceæ. *Sex. Syst.* Polyandria Monogynia. The juice resembles gamboge, and has been used as a hydragogue. The seeds are employed in the West Indies as a substitute for ipecacuanha. They are also used as a cathartic.

ARGENSON, MINERAL WATERS OF. A chalybeate situate at Argenson in Dauphiny: used in cases of obstruction, jaundice, &c.

ARGENT, Argentum.

ARGENTERIA, Potentilla anserina.

ARGENTI CHLORIDUM. See Argentum —a. Cyanuretum, see Argentum—a. Iodidum, see Argentum.

ARGEN'TI NITRAS, *Argen'tum Nitra'tum*, *Sal argen'ti*, *Argentum Nit'ricum*, (F.) *Nitrate d'Argent*, *Azotate d'Argent*, *Nitrate of Silver*. This preparation is sometimes kept in crystals, the *Nitras Argen'ti in crystal'los concre'tus*, *Nitrate d'Argent cristallisé* of the Codex of Paris. *Crystalli Lunæ*, *Argen'tum nit'ricum crystallisa'tum*, *Nitras argenti crystal'linus*, *Nitrum luna'rē*, *Hydrago'gum* BOY'LEI. Generally, however, it is in the fused state: and it is this which is admitted into most Pharmacopœias, and which, besides the name *Nitras Argenti*, is called *Ni'tras argen'ti fu'sus*, *Caus'ti'cum luna'rē*, *Lapis inferna'lis*, *Argen'tum nit'ricum fusum*, and *lunar caustic*. (F.) *Nitrate d'argent fondu*, *Pierre infernale*.

In the Pharmacopœia of the United States, it is directed to be prepared as follows: Take of *silver*, in small pieces, ℥j; nitric acid, f. ℥v. *distilled water*, f ℥ij. Mix the acid with the

water, and dissolve the silver in the mixture in a sand bath; then gradually increase the heat, so that the resulting salt may be dried. Melt this in a crucible, over a gentle fire, and continue the heat until ebullition ceases; then immediately pour it into suitable moulds.

The *virtues* of nitrate of silver are tonic. and escharotic. It is given in chorea, epilepsy, &c.; locally, it is used in various cases as an escharotic. Dose, gr. 1-8 to gr. 1-4 in pill, three times a day.

When silver is combined with iodine, it is said to have the same effect as the nitrate, and not to produce the slate colour of the surface, which is apt to follow the protracted use of the latter.

ARGENTINE, Potentilla anserina.

ARGEN'TUM, *Ar'gyrus*, from αργος, 'white.' *Silver*, *Luna*, *Dia'na*, (F.) *Argent*. A solid metal of a shining white appearance: insipid; inodorous; highly sonorous; malleable and ductile; somewhat hard; crystallizable in triangular pyramids; fusible a little above a red heat, and volatizable; s. g. 10.4. Not used at all in medicine, unless in some places for silvering pills. Silver Leaf, *Argen'tum folia'tum*, is the state in which it is used for this purpose.

Argentum Divi'sum, metallic silver in very fine powder has been recommended internally in syphilis.

The Chloride Cyanuret and Iodide of Silver, the Oxide and the Chloride of Ammonia and Silver, have been used in syphilis. At first, these different preparations were administered iatraleptically on the gums; the chloride, the cyanide and the iodide in the dose of 1-12th of a grain; the chloride of silver and ammonia in the dose of 1-14th of a grain, and the oxide of silver and divided silver in the dose of 1-8th and 1-4th of a grain. M. Serre, of Montpellier, who made many trials with them, soon found that these doses were too small; he therefore raised that of the chloride to 1-10th, and of the iodide to 1-8th of a grain, without any inconvenience resulting. The dose of the other preparations was likewise increased in a similar ratio. M. Serre extols the preparations of silver—used internally as well as iatraleptically—as antisyphilitics, but they are not to be depended upon.

The *Cyanuret* or *Cyanide of Silver*, *Argenti Cyanuretum*, *A. Cyanidum*, *Argentum cyanogena'tum*, (F.) *Cyanure d'argent*, is thus directed to be prepared in the Pharmacopœia of the United States, (1842.) *Argent. Nit.* ʒxv. *Acid Hydrocyan. Aq. destillat.* aā Oj. Having dissolved the nitrate of silver in the water, add the hydrocyanic acid, and mix them. Wash the precipitate with distilled water and dry it.

Argentum Fugitivum, Hydrargyrum—a. Fusum, Hydrargyrum—a. Mobile, Hydrargyrum—a. Vivum, Hydrargyrum.

ARGILE OCHREUSE PALE, Bolus Alba.

ARGILLA BOLUS FLAVA, Terra Lemnia—a. Bolus rubra, Bole Armenian—a. Ferruginea Rubra, Bole Armenian—a. Kalisulphurica, Alumen—a. Pallida, Bolus alba.

Argilla Pura, *Terra Alu'minis*, *T. bolaris* seu *argilla'cea pura*, *pure Argil* or *Alumina*, *Alumine factice*. This substance, which is prepared by drying alum and exposing it, for twenty or twenty-five minutes to a red heat, until the sulphuric acid is driven off, has been recommended in indigestion as antacid, as well as in vomiting and diarrhœa accompanied with acidity. The dose to a very young child is from ʒss to ʒj.; to older children from ʒj to ʒij.

Argilla Sulphurica Alcalisata, Alumen—a. Sulphurica usta, Alumen exsiccatum—a. Supersulphas alcalisatum, Alumen—a. Vitriolata, Alumen.

ARGOL, RED, Potassæ supertartras impurus—a. White, Potassæ supertartras impurus.

ARGUMENTUM INTEGRITATIS, Hymen.

ARGYROCHÆTA, Matricaria.

ARGYROPH'ORA, from αργυρος, 'silver,' and φερω, 'I bear.' A name given, by Myrepsus, to an antidote which he regarded as extremely precious.

ARGYROTROPHEMA, *Blancmanger*.

ARGYRUS, Argentum.

ARHEUMAT'IC, *Arheumat'icus*, from α, privative, and ρευμα, 'fluxion or rheumatism.' One without fluxion or rheumatism.

ARIA, Cratægus aria.

ARIC'YMON, αριζυμον, from αρι, an intensive particle, and ζυειν, 'to conceive.' A name given to a female who conceives readily.—Hippocr.

ARIDE'NA. A Latin word employed to designate the leanness of any part.—Ettmuller, Sauvages.

ARID'ITY, *Arid'itas*, (F.) *Aridité*, from *arere*, 'to dry.' The French use the word *Aridité* to express the dryness of any organ, and particularly of the skin and tongue, when such dryness is so great as to render the organ rough to the touch. *Aridité*, also, means the lanuginous appearance of the hair in some diseases in which they seem covered with dust.

ARIDU'RA. Wasting or emaciation of the whole or of any part of the body.—Marasmus, Atrophy, (q. v.)

Aridura Cordis, Heart, atrophy of the.

ARIKA. See Spirit.

ARISTALTHÆA, Althæa.

ARISTOLOCHI'A from αριστος, 'very good,' and λοχεια, 'parturition;' so called, because the different varieties were supposed to aid parturition. *Birthwort*. (F.) *Aristoloche*. Several varieties were once in use.

Aristolochi'a Clemati'tis, *Aristolochi'a Vulga'ris*, *Adra Riza*, *Aristolochi'a ten'uis*. (F.) *Aristoloche ordinaire*, *Upright Birthwort*. The root has been considered stimulant and emmenagogue, and as such has been used in amenorrhœa, chlorosis, and cachexia.

Aristolochia Fabacea, Fumaria bulbosa.

Aristolochi'a Longa and A. Rotun'da, (F.) *Aristoloche longue et ronde*, *Long and round Birthwort*. Virtues the same as the preceding.

Aristolochi'a Pistolochi'a, *Pistolochi'a*, *Aristolochi'a polyrrhi'za*. This variety has an aromatic odour, and an acrid and bitter taste. (F.) *Aristoloche cre'nelée*.

Aristolochi'a Serpenta'ria, *Serpenta'ria*, *Vipera'ria*, *Viperi'na Virginia'na*, *Colubri'na Virginia'na*, *Contrayer'va Virginia'na*, *S. Virginia'na*, (F.) *Serpentaire* et *Aristoloche serpentaire de Virginie*, *Couvrine de Virginie*, *Virginia Snake root*, *Snakeroot Birthwort*, *Snakeweed*, *Snagrel*. Virtues—tonic, stimulant; and, as such, employed in debility, intermittents, &c.

Aristolochi'a Triloba'ta. (F.) *Aristoloche*

trilobée. A plant of Surinam and Jamaica; possessing the general virtues of the Aristolochiæ. The other varieties of Aristolochia have similar properties.

ARISTOLOCH'IC. Same etymology. An old term for remedies supposed to have the property of promoting the flow of the lochia.—Hippocr., Theophrastus, Dioscorides, &c.

ARIS'TON MAGNUM and ARISTON PARVUM. These names were formerly given to pharmaceutical preparations, used in phthisis, tormina, and fever.—Avicenna.

ARISTOPHANEI'ON. A sort of emollient plaster, prepared with four pounds of pitch, two of *apochyma*, one of wax, an ounce of opoponax, and half a pint of vinegar.—Gorræus. Not used.

ARKANSAS, MINERAL WATERS OF. About 5 miles from the Washita river, and about a quarter of a degree north of the Louisiana line, there are 70 of those springs. They are thermal, upwards of 100° Fahrenheit, and are employed in rheumatism, cutaneous affections, &c.

ARLADA, Realgar.

ARLES, MINERAL WATERS OF. Thermal sulphureous springs in the department of Pyrénées Orientales, France. Their temperature is 103° to 145° of Fahr., and they contain sulphohydric acid.

ARM, Brachium.

ARMA, Penis—a. Ventris, Penis.

ARMAMENTARIUM, Arsenal.

ARMATORY UNGUENT, Hoplochrysma.

ARMATURA, Amnios.

ARME, αρμη, from αρω, 'I adapt.' Any physiological or mechanical junction or union of parts.—Hesychius. A suture, as of the cranium.—Galen.

ARMENIACA MALUS. The Apricot. See Prunus.

ARMENIAN STONE, Melochites.

ARMENITES, Melochites.

ARMILLÆ MANUS MEMBRANOSÆ, Annular ligament of the carpus.

ARMOISE BLANC, Artemisia rupestris—*a. Estragon*, Artemisia dracunculus—*a. Ordinaire*, Artemisia vulgaris.

ARMONIACUM, Ammoniac, gum.

ARMORA'CIA. In the Pharmacopœia of the United States, the fresh root of the Cochlearia armoracia.

ARMOUR, Condom.

ARMURE DES JAMBES. See Cornu ammonis.

ARMUS, Humerus—a. Summus, Acromion.

AR'NICA MONTA'NA. Derivation uncertain. *Arnica, Leopard's Bane, Doron'icum Germani'cum, Alis'ma, Ac''yrus, Diuret'ica, Arnica Plauen'sis, Panace'a lapso'rum, Ptar'mica monta'na, Caltha* seu *Calen'dula Alpi'na*, (F.) *Arnique, Bétoine des Montagnes. Tabac des Vosges. Sex. Syst.* Syngenesia Polygamia superflua. *Nat. Ord.* Synantherеæ. The plant and flower are considered, or have been considered, narcotic, stimulant, emmenagogue, &c.; and, as such have been given in amaurosis, paralysis, all nervous affections, rheumatism, gout, chlorosis, &c. Dose, gr. v to x in powder. In large doses, it is deleterious.

ARNICA SPURIA, Inula dysenterica—a. Suedensis, Inula dysenterica.

ARNOGLOSSUM, Plantago.

ARO'MA, αρωμα, 'perfume:' (αρι, 'very,' and οσμη or οδμη, 'odour.') *Spir'itus Rector*. (F.) *Arome*. The odorous part of plants. An emanation—frequently imponderable—from bodies, which acts on the organ of smell, and varies with the body exhaling it.

AROMAT'IC, *Aromat'icus*, (F.) *Aromate*. Any odoriferous substance obtained from the vegetable kingdom, which contains much volatile oil, or a light and expansible resin. Aromatics are used in perfumes, in seasoning, and embalming. In medicine they are employed as stimulants. Ginger, cinnamon, cardamoms, mint, &c., belong to this class.

AROMATOPO'LA, from αρωμα, 'an odour,' and πωλεω, 'I sell.' An apothecary or druggist. One who sells spices.

AROPH. A barbarous word, which had various significations with the ancients. Paracelsus employed it to designate a lithontriptic remedy. The mandragora, according to some. Also, a mixture of bread, saffron and wine.—Van Helmont.

AROPH PARACELSI, Ferrum ammoniatum.

ARQUEBUSADE EAU D', *Aqua traumat'ica Thede'nii, Aqua Thedi'na, Aqua sclopeta'ria, Aqua vulnera'ria, Aqua catapulta'rum, Mistu'ra vulnera'ria ac''ida*. A sort of vulnerary water, distilled from a farrago of aromatic plants. (*Rosemary* lbiss, *millefoil, thyme*, each lbss. *Proof spirit* 2 gallons—distil a gallon. This is one form.)

ARRABON, Arraphon.

ARRACHEMENT, (F.) from *arracher*, 'to tear out,' *Apospas'ma, Abrup'tio, Avul'sio*. Act of separating a part of the body by tearing it from the bonds connecting it with others. Evulsion (q. v.) Laceration (q. v.)

Arrachement, is applied to certain operations, as to the *extraction of a tooth*, the *extirpation of a polypus*, &c.

ARRACK, Arack. See Spirit.

AR'RAPHON or AR'RABON, from α, priv. and ραφη, 'a suture,'—'without suture.' A term applied to the cranium when it presents no sutures.

ARRECTIO, Erection.

ARREPTIO, Insanity.

ARRESTA BOVIS, Ononis spinosa.

ARRÊT D'HILDAN, Remora Hildani.

ARRÊTEBŒUF, Ononis spinosa.

ARRHŒ'A, from α, privative, and ρεω, 'I flow.' The suppression of any flux. Amenorrhœa, (q. v.)

ARRHOSTE'MA, Disease.

ARRHOSTE'NIA, Disease.

ARRHOSTIA, Disease.

ARRHYTHMUS, Cacorrhythmus.

ARRIÈRE-BOUCHE, Pharynx—*a.-dent*, See Dentition—*a.-Faix*, Secundines.

ARRIÈRE-GOUT, (F.) 'after taste.' The taste left by certain bodies in the mouth for some time after they have been swallowed, owing probably to the papillæ of the mouth having imbibed the savoury substance.

ARRIÈRES NARINES, Nares, posterior.

ARROCHE, Atriplex hortensis—*a. Puant*, Chenopodium vulvaria.

ARROSEMENT, Aspersion.

ARROW ROOT. The fecula of the rhizoma of *Maran'ta Arundina'cea, Fec'ula Maran'tæ*, which, like all feculæ, is emollient and nutritive, when prepared with water or milk.

Dr. Carson has shown, that *Florida arrow-root* is derived from *Zamia integrifolia* or *Z. pumila, Sugar pine; Bermuda arrow root* being obtained from Maranta arundinacea. Florida arrow root as well as the farina is known in the Southern States under the name *Coonti* or *Coontie.*

Arrow Root, Brazilian. The fecula of Jatropha Manihot.

Arrow Root, Common. See Solanum tuberosum.

Arrow Root, East Indian. The fecula of the tubers of Curcuma angustifolia or narrow-leaved Turmeric.

Arrow Root, English, Arrow root, common.

ARS CABALISTICA, Cabal—a. Chymiatrica, Chymiatria—a. Clysmatica nova, Infusion of medicines—a. Coquinaria, Culinary art—a. Cosmetica, Cosmetics—a. Culinaria, Culinary art—a. Empirica, Empiricism—a. Hermetica, Chymistry—a. Infusoria, Infusion of medicines—a. Machaonia, Medicina—a. Majorum, Chymistry—a. Medica, Medicina—a. Obstetricia, Obstetrics—a. Sanandi, Art, healing—a. Separatoria, Chymistry—a. Spagirica, Chymistry.

ARSALTOS, Asphaltum.

ARSATUM, Nymphomania.

ARSENAL (F.) *Chirapothe'ca, Armamenta'rium.* A collection of surgical instruments. A work containing a description of surgical instruments.

ARSEN'IATE, *Arsen'ias.* A salt formed by a combination of arsenic acid with a salifiable base.

Arseniate of Ammonia, *Arsen'ias Ammo'niæ, Ammo'nium Arsen'icum,* (F.) *Arséniate d'Ammoniaque.* This preparation is highly extolled in cutaneous diseases. A grain of the salt may be dissolved in an ounce of distilled water, and 20 to 25 drops be commenced with as a dose.

Arseniate of Iron, *Arsen'ias Ferri, Ferrum Arsenia'tum, F. Arsen'icum oxydula'tum,* (F.) *Arséniate de Fer.* This preparation has been applied externally to cancerous ulcers. An ointment may be made of ʒss of the arseniate, ʒij of the phosphate of iron and ʒvj of spermaceti ointment: the arseniate has also been given internally in cancerous affections, in the dose of one-sixteenth of a grain.

Arseniate of Protox'ide of Potas'sium, *Proto-arsen'iate of Potas'sium, Arsen'iate of Potassa, Arsen'ias Potassæ, Arsen'ias Kali.* Properties the same as those of the arsenious acid.

ARSENIC, *Arsen'icum.* A solid metal; of a steel-gray colour; granular texture; very brittle; volatilizing before melting; very combustible and acidifiable. It is not dangerous of itself, and only becomes so, by virtue of the facility with which it absorbs oxygen.

Arsenic, Iodide of, *Arsen'ici Io'didum, A. Iodure'tum, Arsen'icum Ioda'tum.* This preparation has been highly extolled by Biett in various cutaneous affections, applied externally. The ointment he uses contains three grains of iodide to ʒj of lard.

Arsenic, Oxide of, Arsenious acid—a. White, Arsenious acid.

Arsenic and Mercury, Iodide of, *Hydrar'gyri et Arsen'ici Io'didum, Double Iodide of Mer'cury and Ar'senic, Iodo-ars'enite of Mer'cury.* A compound, which has been proposed as more efficacious than either the iodide of arsenic or the iodide of mercury. It is made by triturating 6.08 grains of *arsenic;* 15.38 grains of *mercury;* 50 of *iodine,* with a fluidrachm of *alcohol,* until the mass has become dry, and from being deep brown has become pale red. Eight ounces of *distilled water* are poured on, and after trituration for a few moments, the whole is transferred to a flask; half a drachm of *hydriodic acid,* prepared by the acidification of two grains of iodine is added, and the mixture is boiled for a few moments. When the solution is cold, make the mixture up to f. ʒviij with distilled water. This is called by Mr. Donovan, the proposer, *Liquor Arsen'ici et Hydrar'gyri Io'didi,* each drachm of which by measure consists of water ʒj, protoxide of arsenic gr. 1-8th; protoxide of mercury gr. 1-4th, iodine converted into hydriodic acid gr. 4-5ths. The dose of this *Donovan's Solution* is from ♏. xv to f. ʒss two or three times a day.

It has been used successfully in inveterate cutaneous diseases.

ARSEN'ICAL PASTE, (F.) *Pâte Arsénicale.* This application to cancers is formed of 70 parts of *cinnabar,* 22 of *dragon's blood,* and 8 of *arsenious acid;* made into a paste with saliva, when about to be applied.

ARSEN'ICUM ALBUM; *White Ar'senic, Oxide of Ar'senic, Ratsbane, Arsen'ici ox'ydum album, Ac''idum Arsenico'sum, A. Arsenio'sum* (Ph. U. S.) *Arsen'ious acid, Calx Arsen'ici alba.* An acid which is met with in commerce, in compact, white, heavy, fragile, masses; of a vitreous aspect, opaque, and covered with a white dust: of an acrid and nauseous taste; without smell when cold; volatilizable by heat, and exhaling the odour of garlic: soluble in water, alcohol and oil; crystallizable in regular octahedrons. It is this that is meant by the name *Arsenic,* as commonly used.

Arsen'icum Album Sublima'tum, *Sublimed Oxide of Arsenic,* is the one employed in medicine. It is tonic and escharotic, and is the most virulent of mineral poisons. It is used in intermittents, periodical headachs, neuroses, &c. Dose, gr. one-tenth to one-eighth in pill. See Poisons, *Table of.*

Arsenicum Rubrum Factitium, Realgar.

ARSENIS POTASSÆ, Arsenite of protoxide of potassium—a. Potassæ aquosus, Liquor arsenicalis—a. Potassæ liquidus, Liquor arsenicalis.

AR'SENITE, *Ar'senis.* A salt, formed by a combination of the arsenious acid with a salifiable base.

Ar'senite of Protox'ide of Potas'sium, *Proto-ar'senite of Potas'sium, Ar'senite of Potassa, Ar'senis Potassæ.* An uncrystallizable and colourless salt, which forms the basis of the liquor arsenicalis, which see.

ARSE-SMART, Persicaria—a. Biting, Polygonum hydropiper.

ART, HEALING, *Ars sanan'di, Medici'na,* (q. v.) The appropriate application of the precepts of the best physicians, and of the results of experience to the treatment of disease.

AR'TABE, *αρταβη.* Name of a measure for dry substances, in use with the ancients, equal, at times, to 5 modii: at others, to 3; and at others, again, to 7.—Galen.

AR'TELSHEIM, MINERAL WATERS OF. These German waters have been much recommended in hysteria, gout, palsy, &c.

Their physical or chemical properties have not been described.

ARTEMIS'IA, *Anacti'rion*. Called after a queen of the name, who first employed it; or from Αρτεμις, 'Diana;' because it was formerly used in diseases of women, over whom she presided. The Gauls called it *Bricumum*.

ARTEMIS'IA ABROT'ANUM, *Abrot'anum*, *Abrot'onum*, *Abrot'anum Cathsum*, *Abrot'anum mas*, *Abrathan*, *South'ernwood*, (F.) *Aurone*, *Aurone mâle*, *Aurone des jardins*, *Garderobe*, *Citronelle*. Supposed to be possessed of stimulant properties.

Oil of Southernwood, *O'leum Abrot'ani*, (F.) *Huile d'Aurone*, possesses the aromatic properties of the plant.

ARTEMIS'IA ABSIN'THIUM, *Absin'thium*, *Absin'thium vulga'rē*, *Barypi'cron*, *Common Wormwood*, (F.) *Absinthe*. Properties:—tonic and anthelmintic. The *Oil of Wormwood*, *O'leum Absin'thii*, (F.) *Huile d'Absinthe*, contains the aromatic virtues of the plant.

ARTEMISIA BOTRYS, Chenopodium ambrosioides.

ARTEMIS'IA CAMPES'TRIS, *Field Southernwood*, (F.) *Aurone des Champs*. This possesses the same properties as *A. Abrot'anum*.

ARTEMISIA CHENOPODIUM, Chenopodium botrys.

ARTEMISIA CHINENSIS. From this the Chinese form their moxas.

ARTEMIS'IA DRACUN'CULUS, *Tar'agon*, (F.) *Armoise estragon*. Virtues:—the same as the last.

ARTEMIS'IA GLACIA'LIS or *Silky Wormwood*;

ARTEMISIA INDICA, Artemisia santonica;

ARTEMIS'IA MARIT'IMA, *Absin'thium Marit'imum*, *Sea Wormwood*, *Maritime Southernwood*. and

ARTEMIS'IA PON'TICA, *A. Roma'na*, *Absinthium Pon'ticum* seu *Romanum*, *Roman Wormwood*, *Lesser Wormwood*, possess like virtues;—as well as

ARTEMIS'IA RUPES'TRIS, *Creeping Wormwood*, *Gen'ipi album*, (F.) *Armoise blanc*, *Genipi blanc*. This variety has aromatic virtues, and is used in intermittents and in amenorrhœa.

ARTEMIS'IA SANTON'ICA, *Santon'icum*, *Artemis'ia contra*, *Semen contra Vermes*, *Semen contra*, *S. Zedoa'riæ*, *Canni Herba*, *Chamæcedris*, *Chamæcyparis'sus*, *Semen Cinæ*, *Hagiospermum*, *Sanctum Semen*, *Absin'thium Santon'icum*, *Sementi'na*, *Xantoli'na*, *Scheba Ar'abum*, *Artemis'ia Juda'ica*, *Wormseed*, *Tartarian Southernwood*, (F.) *Barbotine*. Virtues:—anthelmintic and stimulant. Dose, gr. x. to ʒj in powder.

ARTEMIS'IA VULGA'RIS, *Artemis'ia rubra et alba*, *Cin'gulum Sancti Joannis*, *Mater Herba'rum*, *Berenisecum*, *Bubastecor'dium*, *Canapa'cia*, *Mug'wort*, (F.) *Armoise ordinaire*, *Herbe de Saint Jean*. This, as well as some other varieties, possesses the general tonic virtues of the Artemisiæ. The Artemisia vulgaris has been highly extolled by the Germans in cases of epilepsy. Dose of the powder in the 24 hours from ʒss to ʒj.

ARTERE, Artery—*a. Brachial*, Brachial artery—*a. Brachio-céphalique*, Innominata arteria—*a. Bronchique*, Bronchial artery—*a. Ciliaire*, Ciliary artery—*a. Clitorienne*: see Clitoris—*a. Cœcale*: see Colic arteries—*a. Collatérale du coude*, Anastomoticus magnus ramus—*a. Collatérale externe*, Arteria profunda humeri—*a. Collatérale interne*, Anastomoticus magnus ramus—*a. Coronaire des lèvres*, Labial artery—*a. Coronaire Stomachique*, Coronary artery—*a. Crurale*, Crural artery—*a. Deuxième des thoraciques*, Arteria thoracica externa inferior—*a. Épineuse*, Meningeal artery, middle—*a. Fémoro-poplitée*, Ischiatic artery—*a. Fessière*, Gluteal artery—*a. Gastrique droite*, *petite*, Pyloric artery—*a. Gutturo-maxillaire*, Maxillary artery, internal—*a. Honteuse externe*, Pudic, external, artery—*a. Honteuse interne*, Pudic, internal, artery—*a. Humérale profonde*, Arteria profunda humeri—*a. Iliaque primitive*, Iliac artery—*a. Innominée*, Innominata arteria—*a. Irienne*, Ciliary artery—*a. Ischio-penienne*: see Pudic, internal, artery—*a. Médiane antéricure*, Spinal artery, anterior—*a. Médiane postérieure du rachis*, Spinal artery, posterior—*a. Méningée moyenne*, Meningeal artery, middle—*a. Mentonnière*, Mental foramen—*a. Mesocéphalique*, Basilary artery—*a. Mesocolique*: see Colic artery—*a. Musculaire du bras*, Arteria profunda humeri—*a. Musculaire du bras*, *grande*: see Collateral arteries of the arm—*a. Musculaire grande de la cuisse*, Arteria profunda femoris—*a. Opisthogastrique*, Cœliac artery—*a. Orbitaire*, Ophthalmic artery—*a. de l'Ovaire*, Spermatic artery—*a. Pelvi-crurale*, Crural artery—*a. Pelvi-crurale*, Iliac artery—*a. Pelvienne*, Hypogastric artery—*a. Première des thoraciques*, Arteria thoracica externa superior—*a. Radio-carpienne transversale palmaire*, Radio-carpal artery—*a. Scrotale*, Pudic, external, artery—*a. Sous-clavière*, Subclavian artery—*a. Sous-pubio-fémorale*, Obturator artery—*a. Sous-pubienne*, Pudic, internal, artery—*a. Sous-sternal*, Mammary, internal—*a. Sphéno-épineuse*, Meningeal artery, middle—*a. Stomogastrique*, Coronary artery—*a. Sus-carpienne*, see *Sus-carpien*—*a. Sus-maxillaire*, Alveolar artery—*a. Sus-maxillaire*, Buccal artery—*a. Sus-Métatarsienne*, Metatarsal artery—*a. Sus-pubienne*, Epigastric artery—*a. Testiculaire*, Spermatic artery—*a. Thoracique humérale*, Acromial artery—*a. Trachélocervical*, see Cerebral arteries—*a. Trochantérienne*, Circumflex artery of the thigh—*a. Troisième des thoraciques*, Acromial artery—*a. Tympanique*, Auditory artery, external—*a. Uvéale*, see Ciliary artery—*a. Vulvaire*, Pudic, external, artery.

ARTERIA, Artery—a. Anonyma, Innominata artery—a. Aspera, Trachea—a. Cerebralis, Carotid, internal—a. Cervicalis, Basilary artery—a. Coronaria dextra, Pyloric artery—a. Crassa, Aorta—a. Externa cubiti, Radial artery—a. Dorsalis metacarpi, Metacarpal artery—a. Duræ matris media maxima, Meningeal artery, middle—a. Encephalica, Carotid, internal—a. Gastrica superior, Coronary artery—a. Ileo-colica: see Colic arteries—a. Iliaca interna, Hypogastric artery—a. Iliaca posterior, Hypogastric artery—a. Magna, Aorta—a. Malleolaris externa: see Tibial arteries—a. Malleolaris interna: see Tibial arteries—a. Mammaria externa, A. Thoracica externa, inferior—a. Maxima, Aorta—a. Media anastomotica: see Colic arteries—a. Meningæa media, Meningeal artery, middle—a. Muscularis femoris, A. Profunda femoris—a. Pharyngea suprema, Pterygoid artery—a. Profunda cerebri: see Cerebral arteries—a. Pudenda communis, Pudic, internal, artery—a. Pudica, Pudic, internal, artery—a. Ramulus ductus Pterygoidei, Pterygoid artery—a. Spheno-spinosa, Meningeal artery, middle—a. Spinalis, A. Profunda humeri—a. Sternalis, Mammary, internal—a. Supra-orbitalis, Frontal

artery—a. Sylviana: see Cerebral arteries—a. Thoracica axillaris vel alaris, Scapular artery, inferior—a. Thoracica humeralis, Acromial artery—a. Transversalis colli: see Cerebral arteries—a. Transversalis humeri, Scapular artery, superior—a. Ulnaris, Cubital artery—a. Uterina hypogastrica, Uterine artery—a. Vasta posterior, A. Profunda femoris.

ARTE'RIAC, *Arteriacus.* A medicine prescribed in diseases of the windpipe.

ARTE'RIÆ ADIPO'SÆ. The arteries which secrete the fat about the kidneys, are sometimes so called. They are ramifications of the capsular, diaphragmatic, renal, and spermatic arteries.

ARTERIÆ APOPLECTICÆ, Carotids—a. Capitales, Carotids—a. Ciliares, Ciliary arteries—a. Jugulares, Carotids—a. Lethargicæ, Carotids—a. Præparantes, Spermatic arteries—a. Somniferæ, Carotids—a. Soporales, Carotids—a. Soporariæ, Carotids—a. Venosæ, Pulmonary veins.

ARTE'RIAL, *Arterio'sus.* Belonging to arteries.

ARTERIAL BLOOD, (F.) *Sang artériel.* Red blood is so called because contained in the arteries. The pulmonary veins, however, also contain red blood: hence the name *arterial veins*, (F.) *Veines artérielles*, applied to them.

ARTE'RIAL DUCT, *Cana'lis arterio'sus, Ductus arterio'sus, D. Botalli*, (F.) *Canal artériel, C. Pulmo-aortique*, is the portion of the pulmonary artery which terminates in the aorta in the fœtus. When this duct is obliterated after birth, it is called *Arte'rial Lig'ament*, (F.) *Ligament artériel.*

ARTERIAL SYSTEM includes all the arteries, from their origin in the heart to their termination in the organs. See Vascular System.

ARTERIALIZATION OF THE BLOOD, Hæmatosis.

ARTERIARCTIE, from αρτηρια, 'artery,' and *arcto*, 'I straiten.' Contraction of an artery.

ARTERIECTASIS, Aneurism.

ARTERIEURYSMA, Aneurism.

ARTERIITIS, Arteritis.

ARTERIODIALYSIS, see Aneurism.

ARTERIOG'RAPHY, *Arteriogra'phia;* from αρτηρια, 'artery,' and γραφη, 'a description.' A description of the arteries.

ARTERIOLA. A small artery.

ARTERIOL'OGY, *Arteriolog'ia;* from αρτηρια, 'artery,' and λογος, 'a discourse.' A treatise on the arteries.

ARTE'RIO-PITU'ITOUS. An epithet applied to vessels which creep along the interior of the nostrils.—Ruysch.

ARTERIORRHÉXIS, see Aneurism.

ARTERIOSTEIE, from αρτηρια, 'artery,' and οστεον, 'a bone.' Ossification of an artery.—Piorry.

ARTERIOTOMY, *Arteriotom'ia*, from αρτηρια, 'an artery,' and τεμνω, 'I cut.' This word has been used for the dissection of arteries. Most commonly, however, it means a surgical operation, which consists in opening an artery, to draw blood from it. Arteriotomy is chiefly used in inflammatory affections of the head, when the blood is generally obtained from the temporal artery. See Blood-letting.

ARTERI'TIS, *Arterii'tis, Inflamma'tio Arteria'rum*, (F.) *Artérite, Inflammation des artères;* from αρτηρια, 'an artery,' and *itis*, a termination denoting inflammation. Inflammation of an artery. Inflammation of the inner coat of the artery is termed *Endo-arteri'tis* or *Endonarteri'tis;* of the outer, *Exo-arteritis* or *Exarteri'tis.*

ARTERY, *Arteria*, (F.) *Artère*, from αηρ, 'air,' and τηρεω, 'to preserve,' *quasi*, 'receptacle of air,' because the ancients believed that it contained air. They, at first, gave the name *Artery* to the trachea, αρτηρια τραχεια, because it is filled with air; and afterwards they used the same term for the arteries, properly so called, probably because they commonly found them empty in the dead body. We find, also, φλεβες to designate the arteries, called by the Latins *Venæ micantes pulsatiles.* Arteries, with the moderns, signify that order of vessels, which arise from the two ventricles of the heart, and have valves only at their origin. They are cylindrical, firm, and elastic canals: of a yellowish white colour; little dilatable; easily lacerable; and formed, 1. Of an external, laminated or cellular membrane, of a dense and close character. 2. Of a middle coat composed of fibres, which does not, however, contract on the application of the galvanic stimulus; and 3. Of an inner coat, which is thin, diaphanous, reddish, and polished.

The use of the arteries is to carry the blood from the heart to the various parts of the system. It will be obvious, however, that they cannot all convey *arterial* blood. The pulmonary artery, for example, is destined to convey the *venous* blood to the lungs, there to be converted into *arterial;* whilst the pulmonary veins convey *arterial* blood back to the heart.

TABLE OF THE PRINCIPAL ARTERIES OF THE BODY.

All the other arteries take their rise from the Pulmonary Artery, or the Aorta: and the names generally indicate the parts to which they are distributed.

I. ARTERIA PULMONARIS.

The Pulmonary Artery arises from the right ventricle, and soon divides into a right and left branch, one of which is distributed to each lung.

II. ARTERIA AORTA.

The Aorta arises from the left ventricle. It is the common trunk of the arteries of the body, and may be divided into five portions.

a. *Arteries furnished by the Aorta at its origin.*

1. A. Cardiaca or coronaria anterior.
2. A. Cardiaca or coronaria posterior.

b. *Arteries furnished by the Aorta at its arch.*

The arch of the Aorta gives off, to the left, two considerable trunks—the *Arteria carotidea primitiva*, and *A. subclavia;* and, to the right, a single trunk, which is larger—the *A. innominata* or *Brachio-cephalica*, which divides into the *primitive carotid* and *subclavian.*

A. ARTERIA CAROTIDEA PRIMITIVA. { Divides into A. Carotidea externa, A. Carotidea interna.

a. A. Carotidea externa. {
1. Furnishes, 1, *A. Thyroidea superior.*
2. *A. lingualis*, which gives off the A. dorsalis linguæ and A. sublingualis.
3. *A. facialis* or *A. Maxillaris externa*, which furnishes the A. palatina inferior, the A. submentalis, and A. coronaria superior and inferior.
4. *A. occipitalis*, which gives off the A. mastoidea posterior.
5. *A. auricularis posterior*, which gives off A. stylo-mastoidea.
6. *A. pharyngea inferior.*

The external carotid ultimately divides into the temporal artery and internal maxillary.

1. *A. Temporalis.* — Furnishes *A. transversalis faciei, A. auricularis anterior*, and *A. temporalis media.*

2. *A. Maxillaris interna.* — Furnishes 13 branches, viz. *A. meningea media, A. dentaris inferior, A. temporalis profunda posterior, A. masseterina, A. pterygoidea, A. buccalis, A. temporalis profunda anterior, A. alveolaris; A. suborbitaris, A. vidiana, A. pterygopalatina* or *pharyngea superior, A. palatina superior*, and *A. sphenopalatina.*

b. A. Carotidea interna. — Furnishes, 1. *A. ophthalmica*, which gives off A. lachrymalis, A. centralis retinæ, A. supraorbitaria vel superciliaris, A. ciliares posteriores, A. ciliares longæ, A. muscularis superior et inferior, A. ethmoidalis posterior et anterior, A. palpebralis superior et inferior, A. nasalis, and A. frontalis. 2. *A. communicans, Willesii.* 3. *A. choroidea.* 4. *A. cerebralis anterior.* 5. *A. cerebralis media.*

B. Arteria Subclavia. — Furnishes, 1. *A. vertebralis*, which gives off A. spinalis anterior et posterior, A. cerebellosa inferior, and forms—by uniting itself with that of the opposite side—the A. basilaris, divided into A. cerebellosa superior and A. cerebralis posterior. 2. *A. thyroidea inferior*, which gives off A. cervicalis ascendens. 3. *A. mammaria interna*, which gives off the A. mediastina anterior and A. diaphragmatica superior. 4. *A. intercostalis superior.* 5. *A. cervicalis transversa.* 6. *A. scapularis superior.* 7. *A. cervicalis posterior* vel *profunda.* Farther on, the subclavian artery continues its progress under the name *A. axillaris.*

A. Axillaris. — Furnishes, 1. *A. acromialis.* 2. *A. thoracica superior.* 3. *A. thoracica inferior* vel *longa* vel *mammaria externa.* 4. *A. scapularis inferior* vel *communis.* 5. *A. circumflexa posterior.* 6. *A. circumflexa anterior.* Farther on, the axillary artery continues under the name *A. brachialis.*

A. Brachialis. — Furnishes *A. humeralis profunda* or *collateralis externa.* 2. *A. collateralis interna.* It afterwards divides into the *radial* and *cubital* arteries.

1. *A. Radialis.* — Gives off *A. recurrens radialis, A. dorsalis carpi, A. dorsalis metacarpi, A. dorsalis pollicis*, and terminates in forming the *Arcus palmaris profundus.*

2. *A. Cubitalis.* — Gives off *A. recurrens cubitalis anterior* and *posterior: A. interossea anterior* and *posterior*, which latter furnishes *A. recurrens radialis posterior.* It terminates in forming the *superficial palmar arch*, which gives off *A. Collaterales digitorum.*

c. *Arteries given off by the Aorta in the Thorax.*

These arteries are,

1. *A. Bronchica, dextra et sinistra.*
2. *A. œsophagææ* (to the number of four, five, or six.)
3. *A. mediastinæ posteriores.*
4. *A. intercostales inferiores* vel *Aorticæ* (to the number of eight, nine, or ten.)

d. *Arteries furnished by the Aorta in the Abdomen.*

These branches are,

1. The *A. diaphragmatica* vel *phrenica, dextra et sinistra.*

2. *A. Cœliaca.* — Which divides into three branches, 1. *A. coronaria ventriculi.* 2. *A. Hepatica*, which gives off A. pylorica, A. gastro epiploica dextra and A. cystica; and, lastly, the *A. splenica*, which gives off A. gastro epiploica sinistra and vasa brevia.

3. *A. Mesenterica superior.* — Which gives off at its concavity the *A. colica dextra superior, media et inferior*, and at its convex part from 15 to 20 Rami intestinales.

4. *A. Mesenterica inferior.* — Which gives off *A. colica superior media*, and *inferior*, and divides into A. hæmorrhoidales superiores.

5. The *A. Capsulares mediæ* (to the number of two on each side.)

6. *A. Renales* or *Emulgentes.*

7. *A. Spermaticæ.*

8. *A. Lumbares* (to the number of four or five on each side.)

e. *Arteries resulting from the Bifurcation of the Aorta.*

The Aorta, a little above its Bifurcation, gives off the A. *sacra media*, and divides into *A. iliacæ primitivæ.*

A. Iliaca primitiva. — Divides into *A. Iliaca interna* and *A. Iliaca externa.*

a. A. Iliaca interna. — Furnishes, 1. *A. ilio-lumbaris.* 2. *A. sacra lateralis.* 3. *A. glutea* or *iliaca posterior.* 4. *A. umbilicalis.* 5. *A. vesicalis.* 6. *A. obturatorea.* 7. *A. hæmorrhoidæa media.* 8. *A. uterina.* 9. *A. vaginalis.* 10. *A. ischiatica.* 11. *A. pudenda interna*, which gives off the *A. hemorrhoidales inferiores, A. of the septum, A. transversa perinea, A. corporis cavernosi*, and *A. dorsalis penis.*

b. A. Iliaca externa. — Furnishes 1. *A. epigastrica.* 2. *A. iliaca anterior* or *circumflexa ilii*, and is continued afterwards under the name of *Crural Artery.*

A. Cruralis. — Furnishes, 1. *A. subcutanea abdominalis.* 2. *A. pudenda superficialis* and *profunda.* 3. *A. muscularis superficialis.* 4. *A. muscularis profunda*, which gives off the A. circumflexa externa and interna, and the three Perforantes, distinguished into superior, middle, and inferior. Farther on, the crural artery continues under the name *A. Poplitæa.*

A. poplitæa. — Furnishes, 1. *A. Articulares superiores, interna, media, et externa.* 2. *A. gemellæ.* 3. *A. articulares inferiores, interna et externa.* 4. *A. tibialis antica*, which at the foot, takes the name, *A. dorsalis tarsi*, and gives off the tarsal and metatarsal arteries In the leg, the popliteal artery divides into the peroneal and posterior tibial.

1. *A. Peronæa.* — Divides into *A. peronæa antica and A. peronæa postica.*

2. *A. Tibialis postica.* — Divides into *A. plantaris interna* and *A. plantaris externa.* The latter by anastomosing with the *A. dorsalis tarsi*, forms the *plantar arch*, whence arise *Rami superiores* or *perforantes postici, R. Inferiores postici et antici*, which give off Rami perforantes antici.

ARTERY, ANGULAR, Facial artery—a. Articular, Circumflex artery—a. Central of the retina, Central artery of the retina—a. Central of Zinn, Central artery of the retina—a. Cephalic, Carotid—a. Cerebral posterior, Vertebral—a. Cervico-scapular, see Cervical arteries—a. Coronary of the lips, Labial artery—a. Crotaphite, Temporal artery—a. Fibular, Peroneal artery—a. Gastric inferior, Gastro-epiploic artery—a. Gastro-hepatic, see Gastro-epiploic artery—a. Genital, Pudic (internal) artery—a. Guttural inferior, Thyroideal, A. inferior—a. Guttural superior, Thyroideal, A. superior—a. Humeral, Brachial artery—a. Iliac posterior, Gluteal artery—a. Iliaco-muscular, Ileo-lumbar artery—a. Labial, Facial artery—a. Laryngeal superior, Thyroideal artery superior—a. Lateral large, Spheno-palatine artery—a. Maxillary internal, Facial artery—a. Median of the sacrum, Sacral artery, anterior—a. Palato-labial, Facial artery—a. Pericephalic, Carotid (external)—a Pharyngeal, superior, Pterygo-palatine artery—a. Phrenic, Diaphragmatic artery—a. Posterior of the brain, see Cerebral arteries—a. External scapular, Acromial artery—a. Spinal, Meningeal artery, middle—a. Subclavian right, Innominata arteria—a. Subscapular, Scapular artery, inferior—a. Supramaxillary, Alveolar artery—a. Suprarenal, Capsular artery—a. Thoracic, internal, Mammary internal—a. Urethro-bulbar, Transverse perineal artery—a. Vesico-prostatic, Vesical artery—a. Vidian, Pterygoid artery.

ARTETIS'CUS; from *artus*, 'a limb.' One who has lost a limb.

ARTHANI'TA, from αρτος, 'bread:' the *Cyclamen* or *Sowbread.* It was formerly made into ointments, with many other substances,

and was employed as a purgative, being rubbed on the abdomen. It formed the *Unguen'tum Arthani'tæ*.

ARTHANITA CYCLAMEN, Cyclamen.

ARTHETICA, Teucrium chamæpitys.

ARTHRAL'GIA, *Arthronal'gia*, from αρθρον, 'a joint,' and αλγος, 'pain.' Pain in the joints.

ARTHREM'BOLUS, from αρθρον, 'a joint,' εν, 'in,' and βαλλω, 'I cast.' An ancient instrument used in the reduction of dislocations.

ARTHRETICA, Teucrium chamæpitys.

ARTHRITIC, *Arthrit'icus*, from αρθρον, 'a joint.' (F.) *Arthritique, Goutteux*. That which relates to gout or arthritis, as *arthritic symptoms*, &c.

ARTHRITICUS VERUS, Gout.

ARTHRITIS, Gout, Arthrosia—a. Aberrans, Gout (wandering)—a. Acuta, Gout (regular)—a. Arthrodynia, Rheumatism, chronic—a. Atonic, Gout (atonic)—a. Asthenica, Gout (atonic)—a. Diaphragmatica, Angina Pectoris—a. Erratica, Gout (wandering)—a. Hydrarthros, Hydrarthrus—a. Inflammatoria, Gout (regular)—a. Nodosa, Gout (with nodosities)—a. Podagra, Gout—a. Rheumatismus, Rheumatism, acute—a. Retrograda, Gout (retrograde.)

ARTHROC'ACE, from αρθρον, 'a joint,' and κακος, 'bad.' Disease of the joints; and especially caries of the articular surfaces. Spina ventosa, (q. v.).

ARTHROCACE COXARUM, Coxarum morbus.

ARTHROCACOLOG''IA, from *arthrocacia*, —according to Rust, a chronic disease of the joints; and λογος, 'a description.' The doctrine of chronic disease of the joints.

ARTHRO'DIA, from αρθρον, 'a joint,' *Adarticula'tio*. A moveable joint, formed by the head of a bone applied to the surface of a shallow socket, so that it can execute movements in every direction. *Arthrodium* is 'a small joint:' diminutive of Arthrodia.

ARTHRODYN'IA, *Arthronal'gia*, from αρθρον, 'articulation,' and οδυνη, 'pain.' Articular pain. Pain in the joints. See Rheumatism, chronic.

ARTHROL'OGY, *Arthrolog''ia*, from αρθρον, 'a joint,' and λογος, 'a description.' A description of the joints. The anatomy of the joints.

ARTHROM'BOLE, from αρθρον, and βαλλω, 'I cast.' Coaptation, reduction. Reduction of a luxated or fractured bone.

ARTHRON, 'a joint.' The ancients used the word *Arthron*, for the articulation of bones with motion, in opposition to *Symphysis*, or articulation without motion.

ARTHRONALGIA, Arthralgia, Arthrodynia.

ARTHROPHLOGO'SIS, from αρθρον, 'a joint,' and φλεγω, 'I burn.' Inflammation of the joints.

ARTHROPUO'SIS, from αρθρον, 'a joint,' and πυον, 'pus.' Suppuration or abscess of the joints.

ARTHRO-RHEUMATISMUS, Rheumatism (acute.)

ARTHRO'SIA, from αρθρωω, 'I articulate.' *Arthritis*, (of some.) Inflammation mostly confined to the joints; severely painful; occasionally extending to the surrounding muscles. A genus of diseases in the Nosology of Good, including *Rheumatism, Gout, Articular inflammation, Joint-ache*, &c.

ARTHROSIA ACUTA, Rheumatism, acute—a. Chronica, Rheumatism, chronic—a. Lumborum, Lumbago—a. Podagra, gout—a. Podagra complicata, Gout (retrograde)—a. Podagra larvata, Gout (atonic)—a. Podagra regularis, Gout (regular.)

ARTHROSIS, Articulation.

ARTHROSPON'GUS, from αρθρον, 'a joint,' and σπογγος, 'a sponge.' A white, fungous tumour of the joints.

ARTIA. According to some, this word is synonymous with αρτηρια; others use it synonymously with *Trachea*.

ARTICHAUT, Cynara scolymus.

ARTICHOKE, Cynara scolymus.

ARTICLE, Articulation.

ARTICOCALUS, Cynara scolymus.

ARTIC'ULAR, *Articula'ris*: from *artus*, 'a joint;' *articulus*, 'a small joint.' That which relates to the articulations;—as the *articular capsules*, &c.

ARTIC'ULAR AR'TERIES OF THE KNEE arise from the popliteal artery, and surround the tibio-femoral articulation. Although of a small size, they are important, as they furnish blood to the lower extremity after the operation for popliteal aneurism. They are distinguished into *superior* and *inferior*. The *superior articular arteries, popliteal articular arteries*, are commonly three in number: one of which is *internal*, another *external*, and another *middle*. The *first* anastomoses by one branch with the external circumflex; and by another with the external superior articular. The *second* anastomoses with the external circumflex, the superior internal articular, and the inferior external articular; and the *third* is distributed within the joint. The *inferior articular arteries* are two in number: *an internal* and *external*. The former anastomoses with the internal superior articular and the external inferior articular. The latter anastomoses with the recurrent branch of the anterior tibial, and the external superior articular.

ARTIC'ULAR FACETTES are the contiguous surfaces, by means of which the bones are articulated.

ARTIC'ULAR VEINS of the knee follow the same course as the arteries.

ARTICULA'TION, *Joint, Articula'tio, Arthro'sis, Assarthro'sis, Artic'ulus, Junctu'ra, Cola, Conjunc'tio, Nodus, Commissu'ra, Compages, Syntax'is*. (F.) *Articulation, Article*. Same etymon. The union of bones with each other, as well as the kind of union.

TABLE OF ARTICULATIONS.

Articulations are generally divided into *Diarthroses* or moveable articulations, and *Synarthroses* or immoveable.

Diarthroses.	1. Amphiarthroses.	
	2. Diarthroses, Orbicular vague.	Enarthrosis. / Arthrodia.
	3. Alternative or Ginglymus, which admits of varieties.	
Synarthroses.	1. Suture.	
	2. Harmony.	
	3. Gomphoses.	
	4. Schindylesis.	

The articulations are subject to a number of diseases, which are generally somewhat severe. These may be physical, as wounds, sprains, luxations, &c.; or they may be organic, as ankyloses, extraneous bodies, caries, rheumatism, gout, hydrarthroses, arthropuosis, &c.

Articulation means also the combination of letters which constitute words. See Voice.

Articulation, False, *Pseudarthro'sis, Artic'ulus falsus*, (F.) *A. fausse, A. accidentelle, A. contre nature, A. anormale. A false joint*, formed between fragments of bone, that have remained ununited; or between a luxated bone and the surrounding parts.

ARTICULATION EN CHARNIÈRE, Ginglymus—*a. de la Hanche*, Coxo-femoral articulation.

ARTICULI DIGITORUM MANUS, Phalanges of the fingers—a. Digitorum pedis, Phalanges of the toes.

ARTIFIC"IAL, *Artificia'lis*. (F.) *Artificiel*; from *ars, artis*, 'art,' and *facere*, 'to make.' That which is formed by art.

Artificial Eyes are usually made of enamel, and represent a sort of hollow hemisphere, which is applied beneath the eyelids, when the eye is lost.

Artificial Teeth are teeth made of ivory, porcelain, &c.

PIÈCES D'ANATOMIE ARTIFICIELLES are preparations of anatomy, modelled in wax, plaster, paper, &c.

ARTISCOCCUS LÆVIS, Cynara scolymus.

ARTISCUS, from αρτος, 'bread.' See trochiscus. A troch of the shape of a small loaf. Also, and especially, a troch made of vipers.

ARTOCAR'PUS. The *Bread-fruit Tree*. (F.) *Jaquier*. A Polynesian tree, so called because the fruit, which is milky and juicy, supplies the place of bread to the inhabitants. It grows to the height of 40 feet.

Artocarpus Integrifolia, Caoutchouc.

ARTOC'REAS, from αρτος, 'bread,' and κρεας, 'flesh.' A kind of nourishing food made of various aliments boiled together.—Galen.

ARTOG'ALA, from αρτος, 'bread,' and γαλα, 'milk.' An alimentary preparation of bread and milk. A poultice.

ARTOM'ELI, from αρτος, 'bread,' and μελι, 'honey.' A cataplasm of bread and honey. Galen.

ARTUS, Membrum.

ARTYMA, Condiment.

ARUM, A. maculatum, and A. triphyllum.—a. Americanum betæ foliis, Dracontium fœtidum.

Arum Dracun'culus, *Dracun'culus polyphyl'lus, Colubri'na Dracon'tia, Erva de Sancta Maria, Gig'arus serpenta'ria, Arum polyphyl'lum, Serpenta'ria Gallo'rum. Family*, Aroideæ. *Sex. Syst.* Monœcia Polyandria. The roots and leaves are very acrimonious. The plant resembles the *A. macula'tum*, in its properties.

Arum Esculen'tum, *Cala'dium esculen'tum, Taro*. The foliage and roots possess acrid qualities, which are dissipated by baking or boiling; in which form it is used as food by the people of Madeira, the Polynesians, &c.

Arum Macula'tum, *Arum* (of the older writers) *Cuckow Pint, Barba Aaro'nis, Serpenta'ria minor, Zin'giber German'icum, Wake Robin*. (F.) *Gouet, Pied de Veau*. The fresh root is stimulant internally. Dose, ℈j. of the dried root. Externally, it is very acrid. From the root of this Arum a starch is prepared, which is called *Portland Island Sago, Gersa serpenta'riæ, Cerus'sa serpenta'riæ, Fec'ula ari macula'ti*.

Arum, Three-leaved, Arum triphyllum.

Arum Triphyl'lum, *Three-leaved arum*, (F.) *Pied-de-Veau triphylle, Indian Turnip, Dragon Root, Dragon Turnip, Pepper Turnip*. This plant grows all over the United States, and is received into the Pharmacopœia under the title of *Arum*. The recent root, or Cormus—*Arum*, (Ph. U. S.)—is very acrimonious, and has been employed in asthma, croup, and hooping-cough. Boiled in lard, it has been used in tinea capitis, and in milk in consumption.

ARUMARI, Caramata.

ARUNDO BAMBOS, Bamboo—a. Brachii major, Ulna—a. Brachii minor, Radius—a. Indica, Sagittarium alexipharmacum—a. Major, Tibia—a. Minor, Fibula—a. Sacchariferа, see Saccharum.

ARVUM, Vulva—a. Naturæ, Uterus.

ARY-ARYTENOIDÆUS, Arytenoidæus—a.-epiglotticus, Arytæno-epiglotticus.

ARYTÆ'NA, αρυταινα, 'a ladle.' Hence,

ARYTÆ'NO-EPIGLOT'TICUS. *Arytæ'no-epiglottidæ'us, Ary-epiglotticus*. That which belongs to the arytenoid cartilages and epiglottis. Winslow gives this name to small, fleshy fasciculi, which are attached, at one extremity, to the arytenoid cartilages, and, by the other, to the free edge of the epiglottis. These fibres do not always exist. They form part of the arytenoid muscle of modern anatomists.

ARYT'ENOID, *Arytænoi'des, Arytenoidæ'us*, from αρυταινα, 'a ladle,' and ειδος, 'shape.' Ladle-shaped.

Aryt'enoid Car'tilages, *Cartilag"ines arytenoi'des, C. guttura'les, C. gutturi'næ, C. gutturifor'mes, C. triq'uetræ, Guttur'nia*, are two cartilages of the larynx, situate posteriorly above the cricoid, and which, by approximation, diminish the aperture of the glottis. Their upper extremities or cornua are turned towards each other, and are now and then found loose, in the form of appendices, which are considered, by some, as distinct cartilages, and termed *cuneiform* or *tuberculated Cartilages*, or *Cornic'ula Laryn'gis*.

Aryt'enoid Glands, *Glan'dulæ Arytenoidæ'æ*, are small, glandular, whitish bodies, situate anterior to the A. cartilages. They pour out a mucous fluid to lubricate the larynx.

ARYTENOIDÆ'US. (F.) *Arytenoïdien*. A small muscle, which passes from one arytenoid cartilage to the other, by its contraction brings them together, and diminishes the aperture of the glottis. Winslow divided the muscle into three portions;—the *Arytenoidæ'us transver'sus*, or *Ary-arytenoidæus*, and two *Ary'tenoidæ'i obli'qui*.

ARYTH'M, *Aryth'mus*, from α, privative, and ρυθμος, 'rythm,' 'measure.' Irregular. This word is applied chiefly to the pulse.

ASA, Asafœtida.

ASAFŒ'TIDA, *Assafœ'tida, Stercus diab'oli, Asa, Devil's dung*. A gum resin—the concrete juice of the *Fer'ula Assafœtida. Order*, Umbelliferæ. It is in small masses of a whitish, reddish, and violet hue, adhering together. Taste bitter and subacrid: smell insupportably alliaceous. The Asiatics use it regularly as a condiment.

Its medical properties are antispasmodic, stimulant, and anthelmintic. Dose, gr. v. to xx, in pill.

AS'APES, 'crude,' *Asep'ton*. A term applied to the sputa, or to other matters evacuated, which do not give signs of coction.

ASAPH'ATUM, from α, privative, and σαφης,

'clear.' This term has been applied to collections in the sebaceous follicles of the skin, which may be pressed out like little worms, with a black head. See Acne.

ASAPHI'A, from *α*, privative, and *σαφης*, 'clear.' *Dyspho'nia immodula'ta palati'na, Paraphо'nia guttura'lis; P. palati'na.* Defective articulation, dependent upon diseased palate.—Hippocr., Vogel.

ASARABACCA, Asarum—a. Broad-leaved, Asarum Canadense.

ASAR'CON, from *α*, privative, and *σαρξ*, 'flesh.' Devoid of flesh. Aristotle uses the term for the head when it is but little fleshy, compared with the chest and abdomen.

ASARET, Asarum—*a. du Canada*, Asarum Canadense.

ASARI'TES, from *ασαρον*, 'the asarum.' A diuretic wine, of which asarum was an ingredient.—Dioscorides.

AS'ARUM, from *α*, privative, and *σαιρειν*, 'to adorn:' because not admitted into the ancient coronal wreaths; *As'arum Europæ'um, Nardus Monta'na, Nardus Rust'ica, Azarum.* (F.) *Asaret* ou *Cabaret, Oreille d'homme, Oreillette, Girard-Roussin, Nard Sauvage. Fam.* Aroideæ. *Sex. Syst.* Dodecandria Monogynia. The plant, used in medicine, is the *As'arum Europæ'um, Asarabac'ca*, and of this the leaves. They are emetic, cathartic, and errhine, but are hardly ever employed, except for the last purpose.

A'SARUM CANADEN'SE, *A. Carolinia'num, Canada Snakeroot, Wild Ginger, Colt's Foot, Broad-leaf Asarabacca, Indian Ginger, Heart Snakeroot.* (F.) *Asaret du Canada.* The root *As'arum* (Ph. U. S.) is used as a substitute for ginger, and is said to act as a warm stimulant and diaphoretic.

ASARUM CAROLINIANUM, A. Canadense.

ASBESTOS SCALL, See Eczema of the hairy scalp.

ASCAIN, MINERAL WATERS OF. Ascain is a village, situate about a league from St. Jean-de-Luz in France. The water is a cold chalybeate.

ASCARDAMYC'TES, from *α*, privative, and *σκαρδαμυττω*, 'I twinkle the eyes.' One who stares with fixed eyes, and without moving the eyelids.—Hippocr.

ASCARICIDA ANTHELMINTICA. Vernonia anthelmintica.

ASCARIDE LUMBRICOÏDE Ascaris lumbricoides—*a. Vermiculaire*, Ascaris vermicularis.

AS'CARIS, pl. ASCAR'IDES, from *ασκαριζω*, 'I leap.' A genus of intestinal worms, characterized by a long, cylindrical body, extenuated at the extremities; and having a mouth furnished with three tubercles, from which a very short tube is sometimes seen issuing. Formerly, there were reckoned two varieties of the Ascaris—the *As'caris lumbricoï'des, Lumbri'cus, L. teres hom'inis, As'caris gigas hom'inis,* (F.) *Lombricoïde, Ascaride lombricoïde, Lombric, L. Teres*, or long round worm; and the *As'caris Vermicula'ris*—the Ascaris proper—the *thread worm* or *maw worm.* The former is alone included under the genus, at present—a new genus having been formed of the *A. vermicularis* under the name Oxyuris. It is the *Oxyu''ris vermicula'ris*, (F.) *Ascaride, A. vermiculaire, Oxyure vermiculaire.*

A new species of entozoa has been found by Dr. Bellingham, the *As'caris ala'ta.*

ASCARIS ALATA, See Ascaris—a. Trichuria, Tricocephalus.

AS'CELES or AS'KELES, *Carens cru'ribus*, from *α*, privative, and *σκελος*, 'a leg.' One who has no legs.

ASCELLA, Axilla.

ASCEN'DENS, from *ascendere*, (*ad* and *scandere*,) 'to ascend.' (F.) *Ascendant.* Parts are thus called, which are supposed to arise in a region lower than that where they terminate. Thus, *Aorta ascendens*, is the aorta from its origin to the arch: *Vena cava ascendens*, the large vein, which carries the blood from the inferior parts to the heart: *Obliquus ascendens* (*muscle*,) the lesser oblique muscle of the abdomen, &c.

ASCEN'SUS MORBI. The period of increase of a disease.

ASCESIS, Exercise.

ASCHIL, Scilla.

ASCHISTODAC'TYLUS, *Syndac'tylus:* from *α*, privative, *σχιστος*, 'cleft;' and *δακτυλος*, 'a finger.' A monster whose fingers are not separated from one another.—Gurlt.

ASCIA, *Axinē*, 'an axe,' *Scepar'nos, Dolabra, Fas'cia spira'lis.* Name of a bandage mentioned by Hippocrates and Galen, and figured by Scultetus, in the shape of an axe or hatchet. —Galen. See Doloire.

ASCILLA, Axilla.

ASCI'TES, from *ασκος*, 'a bottle:'—*Aski'tes, Hydroce'lē Peritonæ'i, Hy'drops Abdom'inis, Hydrogas'ter, Ascli'tes. Dropsy of the lower belly. Dropsy of the Peritone'um.* (F.) *Ascite, Hydropéritonie, Hydropisie du Bas-ventre.* A collection of serous fluid in the abdomen. Ascites proper is dropsy of the peritoneum; and is characterized by increased size of the abdomen, by fluctuation and the general signs of dropsy. It is rarely a primary disease; but is always dangerous, and but little susceptible of cure. Most generally, it is owing to obstructed circulation in some of the viscera, or to excitement of the vessels of the abdominal organs. The treatment is essentially the same as that of other dropsies. Paracentesis, when had recourse to, can only be regarded as a palliative.

ASCITES HEPATO-CYSTICUS, Turgescentia vesiculæ felleæ—a. Ovarii, Hydrops ovarii—a. Saccatus, Hydroarion, Hydrops ovarii.

ASCLEPIADE, Asclepias Vincetoxicum.

ASCLEPIAS ASTHMAT'ICA. (F.) *Ipecacuanha blanc de l'Ile de France.* A creeping plant of the Isle of France, regarded as a specific in asthma.

ASCLEPIAS CURASSAV'ICA. The leaves are emetic in the dose of one or two scruples. It is the *Ipecacuanha blanc* of St. Domingo.

ASCLEPIAS DECUM'BENS, the root. Escharotic, cathartic, sudorific, diuretic.

ASCLEPIAS, FLESH-COLOURED, A. Incarnata.

ASCLEPIAS GIGANTE'A. The milky juice is very caustic. It is used in Malabar against herpes; and, mixed with oil, in gout. See Mudar.

ASCLE'PIAS INCARNA'TA, *Flesh-coloured asclepias.* The root of this plant, which grows in all parts of the United States, has the same virtues as the A. Syriaca.

ASCLEPIAS PROC''ERA (?) *Beidel-ossar; Beidelsar.* An Egyptian plant, the leaves of which are made into a plaster, and applied to indolent tumours. The milky juice is caustic, and is used as such.

Asclepias Pseudosarsa, Hemidesmus Indicus.

Asclepias Syriaca, *Common Silkweed, Milk Weed*, (F.) *Herbe à la houette*. The cortical part of the root has been given, in powder, in asthmatic and pulmonic affections in general, and, it is said, with success.

Ascle'pias Tubero'sa, *Butterfly Weed, Pleurisy Root, Flux Root, Wind Root, White Root, Orange Swallow Root, Silk Weed, Canada Root, Orange Apoc''ynum, Tuberous Rooted Swal'low Wort. Nat. Ord.* Asclepiadeæ. *Sex. Syst.* Pentandria Digynia. Said to have been first recommended by Ασκληπιαδης. In Virginia and the Carolinas, the root of this plant has been long celebrated as a remedy in pneumonic affections. It is sudorific, and the powder acts as a mild purgative. Its chief powers are said to be expectorant, diaphoretic, and febrifuge. It is occasionally given to relieve pains of the stomach from flatulence and indigestion.

Asclepias Vincetox'icum, *Cynan'chum Vincetox'icum, Vincetox'icum Apoc''ynum Novæ Anglìæ hirsu'tum*, &c. *Swallow Wort, White Swallow Wort*, (F.) *Asclépiade, Dompte-venin*. The root is said to be stimulant, diuretic, and emmenagogue, but is hardly ever used. It is called also, *Hirundina'ria*.

ASCLITES, Ascites.

ASCO'MA, from ασκος, 'a bottle.' The eminence of the pubes at the period of puberty in females.—Rufus of Ephesus.

ASE, Anxiety.

ASELLI, Onisci aselli.

ASELLUS, Oniscus.

ASE'MA CRISIS, κρισις ασημα, from α, privative, and σημα, 'a sign.' A crisis occurring unexpectedly and without the ordinary precursory signs.

ASEPTON, Asapes.

ASH, BITTER, Quassia.

Ash Tree, Fraxinus excelsior—a. Mountain, Sorbus acuparia—a. Prickly, Aralia spinosa, Xanthoxylum clava Herculis—a. Prickly, shrubby, Xanthoxylum fraxineum.

ASIT'IA, from α, privative, and σιτος, 'food.' Abstinence from food (q. v.) Want of appetite.

ASJAGAN, *As'jogam*. An Indian tree, the juice of whose leaves, mixed with powdered cumin seeds, is employed in India in colic.

ASJOGAM, Asjagan.

ASKELES, Asceles.

ASKITES, Ascites.

ASPALASO'MUS, from ασπαλαξ, 'a mole,' and σωμα, 'body.' A genus of monsters in which there is imperfect development of the eyes.—I. G. St. Hilaire.

ASPALTUM, Asphaltum.

ASPARAGINE. See Asparagus.

ASO'DES, *Asso'des*, from αση, 'disgust,' 'satiety.' A fever accompanied with anxiety and nausea. *Fe'bris aso'des* vel *azo'des*.

ASPAR'AGUS, *Aspar'agus officina'lis, Common Asparagus, Spar'agus, Sparrow Grass, Grass. Nat. Ord.* Asphodeleæ. *Sex. Syst.* Hexandria Monogynia. *Aspar'agi officina'lis Turio'nes*. (F.) *Asperge*. The fresh roots are diuretic, perhaps owing to the immediate, crystallizable principle, *Asparagine*. The young shoots are a well known and esteemed vegetable diet. They communicate a peculiar odour to the urine. A syrup made of the young shoots and an extract of the roots has been recommended as a sedative in heart affections.

ASPA'SIA. A ball of wood soaked in an infusion of galls, and used by females for constringing the vagina.

ASPEN, AMERICAN, Populus tremuloides—a. European, Populus tremula.

ASPERGE, Asparagus.

ASPERITAS ARTERIÆ ASPERÆ, Raucedo.

ASPÉRITÉ DES PAUPIÈRES, Trachoma.

ASPER'ITY, *Asper'itas*, roughness. Asperities are inequalities on the surfaces of bones, which often serve for the insertion of fibrous organs.

ASPERMATIS'MUS, from α, privative, and σπερμα, 'sperm.' Reflux of sperm from the urethra into the bladder, during the venereal orgasm.

ASPERSIO, Catapasma, Fomentation.

ASPER'SION, *Asper'sio*, from *aspergere* (*ad* and *spargere*,) (F.) *Arrosement*. Act of sprinkling or pouring a liquid *guttatim* over a wound, ulcer, &c.

ASPERULA, Galium aparine.

Asper'ula Odora'ta, *Matrisyl'va, Hepat'ica stella'ta*, (F.) *Aspérule odorante* ou *Muguet des bois, Hépatique étoilée. Fam.* Rubiaceæ. *Sex. Syst.* Tetrandria Monogynia. *Sweet-scented Woodroof*. Said to be diuretic, deobstruent, tonic, and vulnerary.

ASPÉRULE ODORANTE, Asperula odorata.

ASPHALTI'TES, same etymon as asphaltum. A name given by some to the last lumbar vertebra.—Gorræus.

ASPHAL'TUM, *Nep'ta, Arsal'tos, Aspal'tum*, from ασφαλιξειν, 'to strengthen.' With the Greeks, this word signified any kind of bitumen. It is now restricted chiefly to the Bit'umen of Judæa, *B. Juda'icum, A. sol'idum, Jew's Pitch*, or *Karabē* of Sodom. (F.) *Asphalte*. It is solid, friable, vitreous, black, shining, inflammable, and of a fetid smell. An oil is obtained from it by distillation. It enters into the composition of certain ointments and plasters.

It is collected on the surface of the water of the Dead Sea, or Lake Asphaltites, in Judæa.

ASPHARINE, Galium aparine.

ASPHOD'ELUS RAMO'SUS, *Asphodelus, A. Albus, A. Maris, Has'tula Regis*. (F.) *Lis asphodèle*. The bulbs of this southern European plant have an acrimony, which they lose in boiling water. They contain a fecula with which bread has been made, and have been considered diuretic. They have been used as a succedaneum for the squill.

ASPHYX'IA, from α, priv., and σφυξις, 'pulse,' *Defec'tus Pûlsus, Acrotis'mos*. For a long time, Asphyxia was confined to the sense of 'suspension of circulation or Syncope,' (q. v.) It now generally means *suspended animation*, produced by the nonconversion of the venous blood of the lungs into arterial blood, *Apnœ'a*, (q. v.) *Apneus'tia, Apnœsphyx'ia, Anhœmato'sia, Ec'lysis pneumo-cardi'aca*. Owing to the supply of air being cut off, the unchanged venous blood of the pulmonary artery passes into the minute radicles of the pulmonary veins, but their peculiar irritability requiring arterial blood to excite them, stagnation takes place in the pulmonary radicles, and death occurs chiefly from this cause,—not owing to venous blood being distributed through the system, and 'poi

soning' it, as was the idea of Bichat. *Carus asphyx'ia, Mors appa'rens, Mors putati'va, Pseudothan'atos, Apparent death, Mort apparente*, is characterized by suspension of respiration, of the cerebral functions, &c. Several varieties of Asphyxia have been designated.

1. Asphyx'ia of the New-Born, *A. neonato'rum*. This is often dependent upon the feeble condition of the infant, not permitting respiration to be established.

2. Asphyx'ia by Noxious Inhala'tion, or inhalation of gases, some of which cause death by producing a spasmodic closure of the glottis: others by the want of oxygen, and others are positively deleterious or poisonous.

3. Asphyx'ia by Strangula'tion or *Suffoca'tion;* produced by mechanical impediment to respiration, as in strangulation.

4. Asphyx'ia by Submer'sion, *A. by Drowning, A. Immerso'rum*, as occurs in the drowned, who perish in consequence of the medium in which they are plunged being unfit for respiration. See Submersion.

Mr. Chevalier has used the term *Asphyx'ia Idiopath'ica*, for fatal syncope owing to relaxation of the heart. See Suffocation.

Asphyxia Immersorum, A. by submersion—a. Local. See Gangrene—a. Neonatorum, A. of the new-born.

ASPHYXIE DES PARTIES, Gangrene—*a. lente des nouveau-nés*, Induration of the cellular tissue.

ASPHYX'IED, same etymon. In a state of asphyxia.

ASPIC, Aspis; also, Lavendula.

ASPIDISCOS, Sphincter ani externus.

ASPIDIUM CORIACEUM, Calagualæ radix—a. Filix fœmina, Asplenium filix fœmina—a. Filix mas, Polypodium filix mas.

ASPIRATIO, Inspiration.

ASPIRA'TION, *Adspira'tio, Aspira'tio*, from *aspira're (ad* and *spirare)* 'to breathe.' The French sometimes use the term synonymously with inspiration. It also means the act of attracting or sucking like a pump. Imbibition, (q. v.) Also, the pronunciation of a vowel with a full breath.

ASPIS, ασπις. A name given by the ancients to a venomous serpent—the *Ægyptian viper* of Lacépède. (F.) *Aspic*. Its bite is very dangerous, and it is supposed to have been the reptile which Cleopatra used for her destruction.

ASPLE'NIUM, from *α*, priv., and *σπλην*, 'the spleen.' *Spleenwort, Miltwaste.*

Asple'nium Cet'erach, *Doradil'la, Blechnum squamo'sum, Scolopen'dria, Athy'rion, Cet'erach officina'rum*. (F.) *Doradille*. Supposed to be subastringent and mucilaginous, and has been recommended as a pectoral. It has also been given in calculous cases.

Asple'nium Filix Fœ'mina, *Polypo'dium filix fœmina, Aspidium filix fœmina, Athyrium filix fœmina, Female fern*, (F.) *Fougère femelle*. The root of this plant resembles that of the male fern, and is said to possess similar anthelmintic virtues. The name *female fern* is also given to the *Pteris aquilina*, (q. v.)

Asple'nium Ruta Mura'ria, *A. mura'lē, Paronych'ia, Wallrue, White Maidenhair, Tentwort, Adian'tum album, Ruta mura'ria, Salvia Vitæ*. (F.) *Rue des murailles, Sauvevie*. Used in the same cases as the last.

Asple'nium Scolopen'drium, *Scolopen'drium officina'rum, Hart's Tongue, Spleenwort, Phylli'tis, Lingua cervi'na, Blechnum lignifo'lium*. (F.) *Scolopendre, Langue de cerf*. Properties like the last.

Asple'nium Trichomanoï'des, *A. Trichom'anes, Calliphy'lum, Trichom'anes, Adian'tum rubrum, Common Maidenhair, Polyt'richum commu'nē*, (F.) *Polytric*. Properties like the last.

ASPREDO, Trachoma—a. Miliacea, Miliary fever.

ASPRÈLE, Hippuris Vulgaris.

ASSA DOUX, Benjamin—a. Dulcis, Benjamin—a. Odorata, Benjamin.

ASSABA. A Guinea shrub whose leaves are considered capable of dispersing buboes.

ASSAFŒTIDA, Asafœtida.

ASSAIERET. A compound of bitter, stomachic, and purgative medicines in the form of pill.—Avicenna.

ASSAISONNEMENT, Condiment.

ASSAKUR, Saccharum.

ASSALA. See Myristica moschata.

ASSARTHROSIS, Articulation.

ASSA'TIO, *Opte'sis*. The boiling of food or medicines in their own juice, without the addition of any liquid. Various kinds of cooking by heat.—Galen.

ASSELLA, Axilla.

AS'SERAC, *Assis*. A preparation of opium or of some narcotic, used by the Turks as an excitant.

ASSERCULUM. Splint.

ASSERVATION, Conservation.

AS'SIDENS, from *ad*, 'to,' and *sedere*, 'to be seated.' That which accompanies or is concomitant. An epithet applied to the accessory symptoms and general phenomena of disease.

ASSIMILA'TION, *Assimila'tio, Appropria'tio, Exomoio'sis, Homoio'sis, Threpsis, Threp'ticē:* from *assimilare, (ad* and *similare,)* 'to render similar.' The act by which living bodies appropriate and transform into their own substance matters with which they may be placed in contact. In man, assimilation is a function of nutrition.

ASSIS, Asserac.

AS'SIUS LAPIS, *A'sius Lapis*. A sort of stone or earth found near the town of Assa in the Troad, which had the property of destroying proud flesh.

ASSODES, Asodes.

ASSOUPISSEMENT, Somnolency.

ASSOURON. See Myrtus pimenta.

ASSUETUDO, Habit.

ASSULA, Splint.

ASSUMPTIO, Prehension.

ASTACI FLUVIATILIS CONCREMENTA, Cancrorum chelæ.

ASTACUS FLUVIATILIS, Crab.

ASTAKILLOS, Araneum ulcus.

ASTASIA, Dysphoria.

ASTARZOF. An ointment, composed of litharge, frog's spawn, &c. Also, camphor dissolved in rose water.—Paracelsus.

ASTER ATTICUS, Bubonium—a. Inguinalis, Eryngium campestre.

ASTE'RIA GEMMA, *Aste'rius, Aströi'tes, As'trios, Astrob'olus*. The ancients attributed imaginary virtues to this stone,—that of dispersing *Nævi Materni*, e. g.

ASTHENI'A, from *α*, privative, and *σθενος*, 'force,' 'strength.' Want of strength, debility. (q. v.) (F.) *Affaiblissement*. Infirmity, (q. v.)

A word used in this sense by Galen, and employed, especially by Brown, to designate debility of the whole economy or diminution of the vital forces. He distinguished it into *direct* and *indirect:* the former proceeding from diminution of stimuli; the latter from exhaustion of incitability by the abuse of stimuli.

Asthenia Deglutitionis, Pharyngoplegia—a. Pectoralis, Angina pectoris.

ASTHENO'PIA, *Debil'itas visûs*, (F.) *Affaiblissement de la Vue*, from α, privative, σθενος, 'strength,' and ωψ, 'the eye.' Weakness of sight. *Weaksightedness.*

ASTHMA, from ασθμα, 'laborious breathing;' from αω, 'I respire.' *A. spas'ticum adulto'rum, A. Senio'rum, A. Convulsi'vum, A. spas'ticum intermit'tens, Dyspnœ'a et orthopnœ'a convulsi'va, Malum Cadu'cum pulmo'num, Broken-windedness, Nervous asthma*, (F.) *Asthme, A. nerveux.* Difficulty of breathing, recurring at intervals, accompanied with a wheezing sound and sense of constriction in the chest; cough and expectoration.

Asthma is a chronic disease, and not curable with facility. Excitant and narcotic antispasmodics are required.

There are no pathognomonic physical signs of asthma. In some cases, the respiration is universally puerile during the attack. In the spasmodic form the respiratory murmur is very feeble or absent during the fit; and in all forms percussion elicits a clear pulmonary sound. The disease generally consists in some source of irritation, and occasionally, perhaps, in paralysis of the pneumogastric nerves; more frequently of the former—all the phenomena indicating constriction of the smaller bronchial ramifications. The treatment is one that relieves spasmodic action—narcotics, counter-irritants, change of air, &c.

Asthma Acu'tum, of Millar, *A. spasticum infan'tum, Cynan'chē trachea'lis spasmod'ica.* (F.) *Asthme aigu.* Probably spasmodic croup. (?) See Asthma Thymicum.

Asthma Aërium, Pneumothorax.

Asthma Aërium ab Emphysemate Pulmonum, Emphysema of the Lungs.

Asthma Arthriticum, Angina pectoris.

Asthma, Car'diac. Dyspnœa dependent upon disease of the heart.

Asthma Convulsivum, Angina pectoris—a. Diaphragmaticum, Angina pectoris—a. Dolorificum, Angina pectoris—a. Emphysematicum, Pneumothorax.

Asthma, Grinders'. The aggregate of functional phenomena, induced by the inhalation of particles thrown off during the operation of grinding metallic instruments, &c. The structural changes induced are enlargement of the bronchial tubes, expansion of the pulmonary tissue, and phthisis.

Asthma Gypseum, A. pulverulentum—a. Hay, Fever, hay.

Asthma Hu'midum, *Humid, Common*, or *spitting asthma*, is when the disease is accompanied with expectoration. It is also called *A. humora'lē, A. flatulen'tum, A. pneumon'icum, Blennotho'rax chro'nicus*, &c.

Asthma Infantum, Cynanche trachealis—a. Infantum Spasmodicum, A. Thymicum—a. Koppian, A. Thymicum—a. Laryngeum Infantum, A. Thymicum—a. Montanum, A. pulverulentum—a. Nocturnum, Incubus.

Asthma Pulverulen'tum, *A. gyp'seum, A. monta'num.* The variety of asthma to which millers, bakers, grinders and others are subject.

Asthma Siccum, so called when the paroxysm is sudden, violent, and of short duration; cough slight, and expectoration scanty; spasmodic constriction.

Asthma Spastico-Arthriticum Inconstans, Angina pectoris—a. Spasticum Infantum, A. Thymicum.

Asthma Thy'micum, *A. T. Koppii, A. spasti'cum infan'tum, A. infantum spasmod'icum, Cynan'chē trachea'lis spasmod'ica, Croup-like inspiration of infants, Child-crowing, Spasmodic croup, Pseudo-croup, Spu'rious croup, Cer'ebral croup, Suffocating nervous catarrh, Spasmus glot'tidis, Asthma laryngē'um infantum, A. intermittens infan'tum, A. Dentien'tium, A. period'icum acu'tum, Koppian Asthma, Thymic Asthma, Laryngis'mus strid'ulus, Apnœ'a infan'tum*, (F.) *Laryngite striduleuse, Faux Croup.* A disease of infants, characterized by suspension of respiration at intervals; great difficulty of breathing, especially on waking, swallowing, or crying, ending often in a fit of suffocation with convulsions. The pathology of the disease has been supposed to consist in enlargement of the thymus gland, (?) or of the glands of the neck pressing on the pneumogastric nerves. The ear, on auscultation, at a distance from the chest, detects an incomplete, acute, hissing inspiration, or rather cry; whilst the expiration and voice are croupal, both at the accession and termination of the paroxysm. The heart's action has been observed to be distinct and feeble.

These symptoms are often accompanied by rigidity of the fingers and toes; the thumb being frequently drawn forcibly into the palm of the clenched hand, whence the name *Carpopedal spasm*, (q. v.) applied, at times, to the disease.

Asthma Uteri, Hysteria—a. Weed, Lobelia inflata.

ASTHMAT'IC, *Asthmat'icus;* one affected with asthma. Relating to asthma.

ASTHME AIGU, Asthma acutum—*a. Nerveux*, Asthma.

AS'TOMUS, αστομος, from α, privative, and στομα, 'a mouth.' One without a mouth. Pliny speaks of a people in India without mouths, who live *anhelatu et odore!*

ASTRAGALE COL D', Collum astragali.

ASTRAG'ALUS, *Talus*, the *Ankle, Qua'trio, Dial'ebos, Peza, Cavic'ula, Cavil'la, Tetro'ros, As'trion, Os Ballist'æ*, from αστραγαλος, 'a die,' which it has been considered to resemble. (?) A short bone situate at the superior and middle part of the tarsus, where it is articulated with the tibia. It is the *ankle bone, sling bone*, or *first bone of the foot.* The anterior surface is convex, and has a well-marked prominence, supported by a kind of neck, and hence has been called the *head of the Astragalus.* The astragalus is developed by two points of ossification.

Astrag'alus Exs'capus, *Stemless Milk-vetch*, (F.) *Astragale à gousses velus. Nat. Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. The root is said to have cured confirmed syphilis.

Astragalus Tragacanthus, see Tragacanth.

Astrag'alus Verus, *Goat's thorn, Milk-vetch, Spina hirci, Astrag'alus aculea'tus.* The plant which affords *Gum Trag'acanth.* See Tragacantha.

ASTRANTIA, Imperatoria.

AS'TRAPE, *Corusca'tio, Fulgur, Lightning.* Galen reckons it amongst the remote causes of epilepsy.

ASTRIC'TION, *Astric'tio*, στυψις, from *astringere*, (*ad*, and *stringere*,) 'to constringe.' Action of an astringent substance on the animal economy.

ASTRICTORIA, Astringents.

ASTRINGENT ROOT, Comptonia asplenifolia.

ASTRINGENTS, *Astringen'tia, Catastal'tica, Constringen'tia, Contrahen'tia, Stegno'tica, Syncrit'ica, Astricto'ria.* Same etymon. Medicines which have the property of constringing the organic textures. External astringents are called *Styptics.*

The following are the chief astringents: Acidum Sulphuricum, A. Tannicum, Alumen, Argenti Nitras, Catechu, Cupri Sulphas, Tinct. Ferri Chloridi, Liquor Ferri Nitratis, Ferri Sulphas, Gallæ, Hæmatoxylon, Kino, Krameria, Liquor Calcis, Plumbi Acetas, Quercus Alba, Quercus Tinctoria, Zinci Sulphas, Creasoton.

ASTRION, Astragalus.

ASTRIOS, Asteria gemma.

ASTROB'LES, from αστρον, 'a star,' and βαλλω, 'I strike.' One struck by the stars (*sidera'tus.*) One who is in a state of sideration—in an apoplectic state.—Gorræus.

ASTROBOLIS'MOS, same etymology. *Sidera'tion* or action of the stars on a person. Apoplexy.—Theophr., Gorræus.

ASTROBOLOS, Asteria gemma.

ASTROITIS, Asteria gemma.

ASTROL'OGY, *Astrolog''ia*, from αστρον, 'a star,' and λογος, 'a discourse.' The art of divining by inspecting the stars. This was formerly considered to be a part of Medicine; and was called *Judicial Astrology*, to distinguish it from Astronomy.

ASTRON'OMY, *Astronom'ia*, from αστρον, 'a star,' and νομος, 'a law,' 'rule.' A science which makes known the heavenly phenomena, and the laws that govern them. Hippocrates places this and astrology amongst the necessary studies of a physician.

ASTYSIA, Impotence.

ASUAR, Myrobalanus Indica.

ASULCI, Lapis lazuli.

ASYNODIA, Impotence.

ATACTOS, Erratic.

AT'AVISM; from *At'avus*, 'an old grandsire or ancestor, indefinitely.' The case in which an anomaly or disease, existing in a family, is lost in one generation and reappears in the following.

ATARACTAPOIE'SIA, from α, privative, ταραχτος, 'troubled,' and ποιειν, 'to make.' Intrepidity, firmness. A quality of which, according to Hippocrates, the physician ought to be possessed in the highest degree.

ATARAX'IA, from α, privative, and ταραξις, 'trouble,' 'emotion.' Moral tranquillity, peace of mind.

ATAX'IA, from α, privative, and ταξις, 'order.' Disorder, irregularity. Hippocrates employs the word in its most extensive acceptation. Galen applies it, especially, to irregularity of pulse; and Sydenham speaks of *Ataxia Spirituum* for disorder of the nervous system. Ataxia, now, usually means the state of disorder that characterizes nervous fevers, and the nervous condition.

ATAXIA SPIRITUUM, Nervous diathesis. See Ataxia.

ATCHAR, *Achia, Achar.* A condiment used in India. It is formed of green fruits of various kinds,—garlic, ginger, mustard, and pimento, pickled in vinegar.

ATECNIA, Sterilitas.

AT'ELES, ατελης, 'imperfect,' 'defective.'—Hence,

ATELEC'TASIS PULMO'NUM, *Pneumonatelec'tasis.* Imperfect expansion of the lungs at birth; from ατελης, 'imperfect,' and εκτασις, 'dilatation.'

ATELOCHEI'LIA, from ατελης, 'imperfect,' and χειλος, 'lip.' A malformation which consists in an imperfect development of the lip.

ATELOENCEPHAL'IA, from ατελης, 'imperfect,' and εγκεφαλον, 'the encephalon.' State of imperfect development of the brain.—Andral.

ATELOGLOS'SIA, from ατελης, 'imperfect,' and γλωσσα, 'tongue.' A malformation which consists in an imperfect development of the tongue.

ATELOGNA'THIA, from ατελης, 'imperfect,' and γναθος, 'the jaw.' A malformation which consists in an imperfect development of the jaw.

ATELOMYEL'IA, from ατελης, 'imperfect,' and μυελος, 'marrow.' State of imperfect development of the spinal marrow.—Béclard.

ATELOPROSO'PIA, from ατελης, 'imperfect,' and προσωπον, 'the face.' A malformation which consists in imperfect development of the face.

ATELORACHIDIA, Hydrorachis.

ATELOSTOM'IA, from ατελης, 'imperfect,' and στομα, 'mouth.' One whose mouth is imperfectly developed.

ATER SUCCUS, Atrabilis.

ATHAMAN'TA, from Athamas, a place in Thessaly. A genus of plants.

ATHAMAN'TA AUREOSELI'NUM, *Oreoseli'num, Black Mountain Parsley.* (F.) *Persil de Montagne.* The plant, seed and roots are aromatic. It has been considered attenuant, aperient, deobstruent, and lithontriptic. The distilled oil has been used in toothache.

ATHAMAN'TA CRETEN'SIS seu CRET'ICA, *Daucus Creticus; D. Candianus, Myrrhis annua, Candy Carrot.* The seeds of this plant are acrid and aromatic. They have been used as carminatives and diuretics.

ATHANASIA, Tanacetum.

ATHANA'SIA, from α, privative, and θανατος, 'death.' An antidote for diseases of the liver, jaundice, gravel, &c. It consisted of saffron, cinnamon, lavender, cassia, myrrh, juncus odoratus, honey, &c. and was esteemed to be sudorific.

ATHARA, Athera.

ATHELAS'MUS, from α, privative, and θηλη, 'a breast or nipple.' Impracticability of giving suck; from want of nipple or otherwise.

ATHELXIS, Sucking.

ATHE'NA. Name of a plaster, recommended by Asclepiades, and composed of oxide of copper, sublimed oxide of zinc, sal ammoniac, verdigris, gall nuts, and a variety of resinous and other ingredients.—Oribasius, Aëtius, and P. Ægineta.

ATHENIO'NIS CATAPO'TIUM. A pill, composed of myrrh, pepper, castor, and opium; used to allay coughing.—Celsus.

ATHE'RA, *Atha'ra*, from αθηρ, 'an ear of corn.' A kind of pap for children: also, a kind of liniment.—Dioscorides, Pliny.

ATHERO'MA, from αθηρα, 'pap or pulp.' *Emphy'ma encys'tis athero'ma*, *Mollus'cum*. (q.v.) A tumour formed by a cyst containing matter like pap or *Bouillie*.

ATHEROM'ATOUS, *Atheromato'des*. Having the nature of Atheroma.

ATHLE'TA, from αθλος, 'combat.' Athletæ were men who exercised themselves in combat at the public festivals.—Vitruv.

ATHLET'IC, *Athlet'icus*; concerning *Athle'tæ*. Strong in muscular powers.—Foësius.

ATHORACOCEPHALUS, Acephalogaster.

ATHRIX DEPILIS, Alopecia.

ATHYM'IA, *An'imi defec'tus et anxi'etas*, *An'imi demis'sio*, *Tristia*, from α, priv. and θυμος, 'heart,' 'courage.' Despondency. The prostration of spirits, often observable in the sick.—Hippocr. Melancholy.—Swediaur. See Panophobia.

ATHYRION, Asplenium ceterach.

ATHYRIUM FILIX FŒMINA, Asplenium filix fœmina—a. Filix mas, Polypodium filix mas.

ATLANTION, Atlas.

ATLAS, *Atlantion*, from ατλαω, 'I sustain.' The *first cervical ver'tebra*; so called, from its supporting the whole weight of the head, as Atlas is said to have supported the globe on his shoulders. Chaussier calls it *Atloid*. This vertebra in no respect resembles the others. It is a kind of irregular ring, into which, anteriorly, the *processus dentatus* of the second vertebra is received. Posteriorly, it gives passage to the medulla spinalis.

ATLOI'DO-AXOID, (F.) *Atloïdo-axoïdien*. Relating to both the Atlas and the Axis or Vertebra Dentata.

Atloido-axoid Articulation. The articulation between the first two cervical vertebræ.

Atloido-axoid Lig'aments. These are two in number; one *anterior* and another *posterior*, passing between the two vertebræ.

ATLOI'DO-OCCIP'ITAL. Relating to the atlas and occiput. The *Atloi'do-occip'ital Articula'tion* is formed by the condyles of the occipital bone and the superior articular surfaces of the Atlas. The *Atloido-occipital* muscle is the Rectus capitis posticus minor.

ATLOÏDO-SOUS-MASTOÏDIEN, Obliquus superior oculi—*a. Sous-occipitale*, Rectus capitis lateralis.

ATMIATRI'A, *Atmidiat'ricē*, from ατμος, 'vapour,' and ιατρεια, 'treatment.' Treatment of diseases by fumigation.

ATMIDIATRICE, Atmiatria.

ATMISTERION, Vaporarium.

ATMOS, Breath.

AT'MOSPHERE, *Atmosphæ'ra*, from ατμος, 'vapour,' and σφαιρα, 'a sphere:'—as it were, *Sphere of vapours*. The atmosphere is a spherical mass of air, surrounding the earth in every part; the height of which is estimated at 15 or 16 leagues. It presses on the surface of the earth, and this pressure has, necessarily, sensible effects on organized bodies. The surface of the human body being reckoned at 15 square feet, it is computed that a pressure of 33,000 pounds or more exists under ordinary circumstances, and this pressure cannot be increased or diminished materially, without modifying the circulation and all the functions.

ATMOSPHERIZATION, Hæmatosis.

ATOL'MIA, from α, priv. and τολμα, 'confidence.' Want of confidence; discouragement. A state of mind, unfavourable to health, and injurious in disease. It is the antithesis of *Eutol'mia*.

AT'ONY, *Aton'ia*, *Infir'mitas et Remis'sio vi'rium*, *Languor*, *Lax'itas*, from α, priv. and τονος, 'tone,' 'force.' Want of tone. Weakness of every organ, and particularly of those that are contractile. Violent gastritis has been described by Scribonius Largus under a similar name, ατονον, *At'onon*.

ATRABIL'IARY, *Atrabil'ious*, *Atrabilia'ris*, *Atrabilio'sus*, from *ater*, 'black,' and *bilis*, 'bile.' An epithet given by the ancients to the melancholic and hypochondriac, because they believed the Atrabilis to predominate in such.

Atrabiliary Capsules, Arteries and Veins. The renal capsules, arteries and veins; the formation of Atrabilis having been attributed to them.

ATRABI'LIS, same etymon. *Ater succus*, *Black Bile* or *melancholy*. According to the ancients, a thick, black, acrid humour, secreted, in the opinion of some, by the pancreas; in that of others, by the supra-renal capsules. Hippocrates, Galen, Aëtius, and others ascribe great influence to the Atrabilis in the production of hypochondriasis, melancholy, and mania. There is really no such humour. It was an imaginary creation.—Aretæus, Rufus of Ephesus, &c.

ATRACHELOCEPH'ALUS, from α, priv. τραχηλος, 'neck,' and κεφαλη, 'head.' A monster whose neck is partially or wholly deficient.

ATRACHE'LUS. Same etymon. One who is very short-necked.—Galen.

ATRAC'TYLIS GUMMIF'ERA, *Car'duus pineus*, *Ixinē*, *Gummy-rooted Atractylis*, *Pine Thistle*. The root, when wounded, yields a milky, viscid juice, which concretes into tenacious masses, and is said to be chewed with the same views as mastich.

ATRAGENE, Clematis vitalba.

ATRAMEN'TUM, *A. Suto'rium*, *Ink*, *Calcan'thon*, (F.) *Encre*. It has been advised as an astringent, and as an external application in herpetic affections.

Atramentum Sutorium, Ferri sulphas.

ATRESIA, Adherence, Imperforation.

Atre'sia Ani Adna'ta, *Anus Imperfora'tus*, *Imperforatio ani*, (F.) *Imperforation de l'anus*. Congenital imperforation of the intestinal canal.

ATRETISMUS, Imperforation.

ATRETOCEPH'ALUS, from ατρητος, 'imperforate,' and κεφαλη, 'head.' A monster, in which some of the natural apertures of the head are wanting.—Gurlt.

ATRETOCOR'MUS, from ατρητος, 'imperforate,' and κορμος, 'trunk.' A monster, in which the natural apertures of the trunk are wanting.—Gurlt.

ATRE'TUS, from α, priv. and τραω, 'I perforate.' One whose anus or parts of generation are imperforate.

AT'RICES. Small tumours, which appear occasionally around the anus. Some commentators consider the word to be synonymous with condylomata.—Forestus.

AT'RICI. Small sinuses in the vicinity of the anus, not penetrating the rectum.

ATRIPLEX FŒTIDA, Chenopodium vulvaria.

At'riplex Horten'sis, *A. Satī'va.* (F.) *Arroche, Bonne Dame.* The herb and seed of this plant have been exhibited as antiscorbutics.

At'riplex al'imus, A. Portulacoï'des, and *A. Pat'ula,* are used as pickles, and have similar properties.

At'riplex Odorata, Chenopodium botrys—a. Olida, Chenopodium vulvaria.

ATRIUM CORDIS DEXTER, Sinus dexter cordis—a. Cordis sinistrum, Sinus pulmonalis.

AT'ROPA, from Ατροπος, 'immutable,' 'the goddess of destiny;' so called from its fatal effects.

Atropa Belladon'na, *Belladon'na, Deadly Nightshade, Sola'num letha'lĕ, Sola'num mani'acum, S. Furio'sum, Sola'num melanocer'asus.* (F.) *Belladone, Morelle furieuse. Belle Dame. Nat. Ord.* Solaneæ. *Sex. Syst.* Tetrandria Monogynia. The leaves—Belladonna (Ph. U. S.) are powerfully narcotic, and also diaphoretic, and diuretic. They are occasionally used where narcotics are indicated. Sprinkling the powdered leaves over cancerous sores has been found to allay the pain; and the leaves form a good poultice. Dose, gr. ½ to gr. j. of the powdered leaves.

Atropa Mandrag'ora, *Mandrag'ora, Mandrake.* The boiled root has been used in the form of poultice in indolent swellings.

ATROPHIA, Tabes—a. Ablactatorum, Brash, weaning—a. Cordis, Heart, atrophy of the—a. Glandularis, Tabes mesenterica—a. Infantum, Tabes mesenterica—a. Intestinorum, Enteratrophia—a. Mesenterica, Tabes mesenterica.

ATROPHIE, Atrophy—*a. Mésentérique,* Tabes mesenterica.

AT'ROPHIED, see Atrophy.

AT'ROPHY, *Maras'mus Atro'phia, Atro'phia, Maras'mus, Macies, Contabescen'tia, Tabes, Marco'res, Analo'sis,* from α, privative, and τροφη, 'nourishment.' (F.) *Atrophie, Desséchement.* Progressive and morbid diminution in the bulk of the whole body or of a part. Atrophy is generally symptomatic. Any tissue or organ thus affected is said to be *atrophied.*

Atrophy of the Heart. See Heart, Atrophy of the.

AT'ROPINE, *Atropi'na, Atro'pia, Atro'pium.* The active principle of *Atropa Belladonna,* separated by Brandes, by a process similar to that for procuring Morphia.

ATTACHE, Insertion.

ATTAGAS, Attagen.

ATTACK, *Insul'tus, Irrept'io, Inva'sio, Eis'bolē, Lepsis,* (F.) *Attaque.* A sudden attack, invasion or onset of a disease. A seizure.

AT'TAGEN, *At'tagus,* the *Fran'colin.* Celebrated with the ancients both as food and medicine.—Martial, Aristophanes.

ATTANCOURT, MINERAL WATERS OF. A mineral water in France at Attancourt, in Champagne; about 3 leagues north of Joinville. The water is a chalybeate, and contains sulphate of lime. In large doses it is purgative.

ATTAQUE, Attack—*a. des Nerfs,* Nervous attack.

ATTELLE, Splint.

ATTENOTING, MINERAL WATERS OF, in Bavaria. The water contains carbonic acid, carbonates of lime and soda, sulphates of lime and magnesia, chloride of sodium, iron, and alum. It is much used in skin diseases, fistula, old ulcers, calculi, and hemorrhoids.

ATTEN'UANTS, *Attenuan'tia Leptun'tica,* (F.) *Leptontiques,* from *ten'uis,* 'thin.' Medicines which augment the fluidity of the humours.

ATTIRANT, Attrahent.

AT'TITUDE, *Situs Cor'poris.* Low Latin, *aptitudo;* from Latin *aptare,* 'to fit.' Situation, position of the body. The attitudes are the different postures which man is capable of assuming. In *General Pathology,* the attitude will often enable the physician to pronounce at once upon the character of a disease, or it will aid him materially in his judgment. In St. Vitus's dance, in fractures, luxations, &c., it is the great index. It will also indicate the degree of nervous or cerebral power; hence the sinking down in bed is an evidence of great cerebral debility in fever. The position of a patient during an operation is an interesting subject of attention to the surgeon.

ATTOL'LENS AUREM, *Attol'lens Auric'ulæ, Leva'tor Auris, Supe'rior Auris, Attol'lens Auric'ulam,* (F.) *Auriculaire supérieur, Tempo-ro-auriculaire.* A muscle of the ear, which arises, thin, broad, and tendinous, from the tendon of the occipito-frontalis, and is inserted into the upper part of the ear, opposite to the anti-helix. It raises the ear.

Attollens Oculi, Rectus superior oculi.

ATTOUCHEMENT, Masturbation.

ATTRACTION OF AGGREGATION, Cohesion, force of.

ATTRACTIVUM. See Magnet.

ATTRACTIVUS, Attrahent.

ATTRACTORIUS, Attrahent.

AT'TRAHENT, *At'trahens, Attracti'vus, Attracto'rius,* from *ad,* 'to,' and *traho,* 'I draw.' (F.) *Attractif, Attirant.* Remedies are so called, which attract fluids to the parts to which they are applied, as blisters, rubefacients, &c.

ATTRAPE-LOURDAUT, (F.) A bistoury invented by a French surgeon, called Biennaise, and used in the operation for hernia. See Bistouri caché.

ATTRITA, Chafing.

ATTRI''TION, *Attri''tio, Ecthlimma,* from *ad,* 'and' *terere,* 'to bruise.' Friction or bruising. Chafing.—Galen. Also, a kind of cardialgia.—Sennertus. Likewise, a violent contusion.

ATYP'IC, *Atyp'icus, At'ypos,* from α, privative, and τυπος, 'type.' That which has no type. Irregular. Chiefly applied to an irregular intermittent.—*Febris atypica.*

ATYPOS, Erratic.

AUAN'TĒ, *Anap'sē,* from αυαινσις, 'desiccation.' Hippocrates gave this name to a disease, the principal symptom of which was emaciation. Atrophy.

AUBE-VIGNE, Clematis vitalba.

AUBÉPINE, Mespilus oxyacantha.

AUBERGINE, Solanum Melongena.

AUBIFOIN, Cyanus segetum.

AUCHEN, Collum.

AUDE, Voice.

AUDINAC, MINERAL WATERS OF. Audinac is situate in the department of Ariège, France. The water contains a small quantity of sulphohydric acid, carbonic acid, sulphates of lime and magnesia, carbonates of

lime and iron, and a bituminous substance. Temp. 67° Fahr. It is much used in chronic rheumatism, herpes, scrofulous diseases, &c.

AUDIT"ION, from *audire*, 'to hear.' *Ac'oē*, *Audi"tio*, *Audi'tus*, *Acoe'sis*, *Acu'sis*. Hearing. The act of hearing. The sensation arising from an impression made on the auditory nerves by the vibrations of the air, produced by a sonorous body. The physiology of Audition is obscure. It probably takes place:—1. By the vibrations being communicated from the membrana tympani along the chain of small bones to the membrane of the foramen ovale. 2. By means of the air in the cavity of the tympanum, the membrane of the foramen rotundum is agitated. 3. The transmission may be made by means of the bony parietes. In these three ways the vibrations produced by a sonorous body, may reach the auditory nerve. Audition may be *active* or *passive:* hence the difference between *listening* and simply *hearing*.

AU'DITORY, *Audito'rius*, *Audi'tivus*. That which relates to audition.

Auditory Arteries and Veins, are vessels which enter the auditory canals, and are, like them, distinguished into *internal* and *external*. The *external auditory artery*, *A. Tympanique*—(Ch.), is given off by the styloid, a branch of the external carotid: the *internal* is a branch of the basilary artery, which accompanies the auditory nerve, and is distributed to it. The *Auditory Veins* empty into the internal and external jugulars.

Auditory Canal, External, *Mea'tus audito'rius exter'nus*, *Alvea'rium*, (F.) *Conduit auditif externe*, *Conduit auriculaire*, commences at the bottom of the concha, at the *Fora'men auditi'vum exter'num*, passes inwards, forwards, and a little downwards, and terminates at the membrana tympani. It is partly cartilaginous, partly osseous, and partly fibrous.

Auditory Canal, Internal, *Mea'tus audito'rius inter'nus*, *Cyar*, (F.) *Conduit auditif interne*, *C. labyrinthique*, is situate in the posterior surface of the pars petrosa of the temporal bone. From the *Fora'men auditivum inter'num*, where it commences, it passes forwards and outwards, and terminates by a kind of *cul-de-sac*, perforated by many holes, one of which is the orifice of the Aquæductus Fallopii; and the others communicate with the labyrinth.

Auditory Nerve, *Nerf labyrinthique*—(Ch.) is the *Portio Mollis* of the seventh pair. It arises from the corpus restiforme, from the floor of the fourth ventricle, and by means of white striæ, from the sides of the calamus scriptorius. As it leaves the encephalon, it forms a flattened cord, and proceeds with the facial nerve through the foramen auditivum internum, and as far as the bottom of the meatus, where it separates from the facial and divides into two branches, one going to the cochlea; the other to the vestibule and semicircular canals.

AUGE, *Al'veus*. Some of the older Anatomists gave this name to a reservoir, into which liquids flow in an interrupted manner, so that it is alternately full and empty. Such are the ventricles and auricles of the heart.

AUGMENTA'TION, from *augere*, 'to increase.' *Augmen'tum*, *Incremen'tum*, *Anab'asis*, *Auc'tio*, *Auxe'sis*. The stage of a disease in which the symptoms go on increasing.

AULISCOS, Canula.

AULOS, Canula. See Vagina, and Foramen.

AUMALE, MINERAL WATERS OF. Aumale is a town of Upper Normandy, in the country of Caux. Several springs of ferruginous mineral waters are found there, whose odour is penetrating, and taste rough and astringent. They are tonic, and employed in debility of the viscera, &c.

AUNE NOIR, Rhamnus frangula.

AUNÉE, Inula helenium—*a. Dysentérique*, Inula dysenterica.

AURA, *Pnoë*. A vapour or emanation from any body, surrounding it like an atmosphere. Van Helmont regarded the vital principle as a gas and volatile spirit, which he called *Aura vitalis*.

In *Pathology*, Aura means the sensation of a light vapour, which, in some diseases, appears to set out from the trunk or limbs; and to rise towards the head. This feeling has been found to precede attacks of epilepsy and hysteria, and hence it has been called *Aura epilep'tica*, and *A. hyster'ica*.

Aura San'guinis. The odour exhaled by blood newly drawn. See Gaz Sanguinis.

Aura Sem'inis or *A. semina'lis*;—A volatile principle fancied to exist in the sperm, and regarded by some as the fecundating agent. Such is not the case.

AURANCUM. See Ovum.

AURANITE. See Agaric.

AURAN'TIA CURASSAVEN'TIA, *Curasso'a apples* or *oranges*. Immature oranges, checked, by accident, in their growth. They are a grateful, aromatic bitter, devoid of acidity. Infused in wine or brandy they make a good stomachic. They are also used for *issue peas*.

Aurantia Curassavica, see Citrus aurantium—a. Poma, see Citrus aurantium.

Aurantii Cortex. See Citrus aurantium.

AURANTIUM, Citrus aurantium.

AURELIANA CANADENSIS, Panax quinquefolium.

AUREOLA, Areola.

AURI CHLORETUM CUM CHLORETO NATRII, see Gold—a. Chloridum, Gold, muriate of—a. Chloretum, Gold, muriate of—a. Cyanidum, see Gold—a. Cyanuretum, see Gold—a. et Natri chloruretum, see Gold—a Murias, Gold, muriate of—a. Nitro-murias, see Gold—a. Oxidum, see Gold—a. Terchloridum, see Gold—a. Tercyanidum, see Gold.

AURICHALCUM, Brass.

AURIC'ULA. Diminutive of *auris*, an ear. The auricle of the ear. See Pavilion.

Auricles of the Heart, *Cavita'tes innomina'tæ*, (F.) *Oreillettes*, are two cavities; one right, the other left, each communicating with the ventricle of its side. These two cavities receive the blood from every part of the body. Into the *right auricle*, the two venæ cavæ and coronary vein open: into the *left*, the four pulmonary veins. Chaussier calls the former the *Sinus of the Venæ Cavæ*:—the latter, the *Sinus of the Pulmonary Veins*. See Sinus.

Auricula Judæ, Peziza auricula—a. Muris, Hieracium Pilosella—a. Muris major, Hieracium murorum.

AURICULAIRE, see Digitus—*a. Postérieur*, Retrahens auris—*a. Supérieur*, Attollens aurem.

AURIC'ULAR, *Oric'ular*, *Auricula'ris*, from *auric'ula*, 'the ear.' That which belongs to the ear, especially to the external ear.

Auric'ular Ar'teries and Veins, *Oriculaires*—(Ch.), are divided into *anterior* and *posterior*. The *anterior* are of indeterminate number. They arise from the temporal artery, and are distributed to the meatus auditorius externus, and to the pavilion of the ear. The *posterior auricular* is given off by the external carotid, from which it separates in the substance of the parotid gland. When it reaches the inferior part of the pavilion of the ear it bifurcates; one of its branches being distributed to the inner surface of the pavilion, the other passing over the mastoid process, and being distributed to the temporal and posterior auris muscles, &c. Before its bifurcation it gives off the *stylo-mastoid artery*. The *Anterior and Posterior Auricular Veins* open into the temporal and external jugular.

Auricular Finger, (F.) *Doigt auriculaire*, is the little finger, so called because, owing to its size, it can be more readily introduced into the meatus auditorius.

Auricular Nerves are several. 1. The *auricular branch*, *Zygomato-auricular*, is one of the ascending branches of the cervical plexus. It ramifies and spreads over the two surfaces of the pavilion. 2. The *auricular* or *superficial temporal*, *Temporal-cutaneous*—(Ch.) is given off from the inferior maxillary. It ascends between the condyle of the jaw and the meatus auditorius externus, sends numerous filaments to the meatus and pavilion, and divides into two twigs, which accompany the branches of the temporal artery, and are distributed to the integuments of the head. There is also a *posterior auricular* furnished by the facial.

AURICULARIS ANTERIOR, Anterior auris.

AURICULE, Pavilion of the ear.

AURIC'ULO-VENTRIC'ULAR, *Auric'uloventricula'ris*. That which belongs to the auricles and ventricles of the heart. The communications between the auricles and ventricles are so called. The *Tricuspid and Mitral Valves* are auriculo-ventricular valves.

AURI'GA. A species of bandage for the ribs, described by Galen. See, also, Liver.

AURIGO, Icterus—a. Neophytorum, Icterus Infantum.

AURIPIGMENTUM, Orpiment—a. Rubrum, Realgar.

AURIS, Ear.

AURISCALPIUM, Earpick.

AURIST, from *auris*, 'the ear.' One who occupies himself chiefly with the diseases of the ear and their treatment.

AURIUM FLUCTUATIO, Bombus—a. Marmorata, Cerumen—a. Sibilus, Bombus—a. Sonitus, Bombus—a. Sordes, Cerumen—a. Susurrus, Bombus.

AURONE, Artemisia abrotanum—*a. des Champs*, Artemisia campestris—*a. des Jardins*, Artemisia abrotanum—*a. Mâle*, Artemisia abrotanum.

AURUGO, Icterus.

AURUM, 'Gold,' (q. v.)—a. Chloratum, Gold, muriate of—a. Chloratum natronatum, see Gold—a. Foliatum, Gold leaf—a. in Libellis, Gold leaf—a. Leprosum, Antimonium—a. Limatum, see Gold—a. Muriaticum, Gold, muriate of—a. Muriaticum, see Gold—a. Muriaticum natronatum, see Gold.

Aurum Musi'vum, *Aurum Mosa'icum, Sulphuret of Tin, Deutosulphuret* or *persulphuret of tin*. (*Quicksilver, tin, sulphur, sal ammoniac*, āā, equal parts. The tin being first melted, the quicksilver is poured into it, and then the whole are ground together, and sublimed in a bolthead. The aurum musivum lies at the bottom.) It is used in some empirical preparations.

Aurum Oxydatum, see Gold—a. Oxydulatum muriaticum, Gold, muriate of—a. Nitromuriaticum, see Gold—a. Salitum, Gold, muriate of.

AUSCULTATE, TO; from *auscultare*, 'to listen.' To practise auscultation, (q. v.) 'To *auscult*' is at times used with the same signification.

AUSCULTA'TION, *Ausculta'tio*, act of listening. Buisson has used it synonymously with *listening*. Laennec introduced *auscultation* to appreciate the different sounds, which can be heard in the chest, and in the diagnosis of diseases of the heart, lungs, &c. This may be done by the aid of an instrument called a *stethoscope* (q. v.), one extremity of which is applied to the ear, the other to the chest of the patient. This mode of examination is called *Mediate Auscultation*, (F.) *Auscultation médiate*, —the application of the ear to the chest being *immediate auscultation*.

The act of exploring the chest is called *Stethoscop'ia*, and *Thoracoscop'ia;* of the abdomen, *Abdominoscop'ia*, (q. v.)

AUSCUL'TATORY, *Auscultato'rius; Auscul'tic*, (with some.) Belonging or having relation to auscultation.

Auscultatory Percussion, see Acouophonia.

AUSTE'RE, *Auste'rus*. Substances, which produce a high degree of acerb impression on the organs of taste.

AUSTRUCHE, Imperatoria.

AUTALGIA DOLOROSA, Neuralgia, facial, Pleurodynia—a. Pruriginosa, Itching—a. Vertigo, Vertigo.

AUTARCI'A, from αυτος, 'himself,' and αρκεω, 'I am satisfied.' Moral tranquillity.—Galen.

AUTEMESI'A, from αυτος, 'self,' and εμεσις, 'vomiting.' Spontaneous or idiopathic vomiting.—Alibert.

AUTHE'MERON. A medicine which cures on the day of its exhibition; from αυτος, 'the same,' and ἡμερα, 'day.'

AUTOCHIRIA, Suicide.

AUTOC'RASY, *Autocrati'a, Autocrato'ria*, from αυτος, 'himself,' and κρατος, 'strength.' Independent force. Action of the vital principle, or of the instinctive powers towards the preservation of the individual.—See Vis Medicatrix Naturæ. Also, the vital principle.

AUTOCRATIA, Autocrasy, Vis medicatrix naturæ.

AUTOCRATORIA, Autocrasy—a. Physiatrice, Vis medicatrix naturæ.

AUTOCTONIA, Suicide.

AUTOLITHOT'OMUS, *Autolithot'omus*, from αυτος, 'himself,' λιθος, 'a stone,' and τεμνειν, 'to cut.' One who operates upon himself for the stone.

AUTOMAT'IC, *Automat'icus*, from αυτοματος, 'spontaneous.' That which acts of itself. Those movements are called *automatic*, which the patient executes without any object; apparently without volition being exercised.

AUTOMNALE, Autumnal.

AUTONOMIA, Vis medicatrix naturæ The word *Autonomia* is occasionally employed by the French and Germans for the peculiar mechanism of an organized body. Thus, although individuals of the same species may differ in outward conformation, their mechanism or instinctive laws (*Autonomia*,) may be the same.

AUTOPEP'SIA, from αυτος, 'self,' and πεπτω, 'I concoct.' Self-digestion,—as of the stomach after death.

AUTOPHIA, Autopsia.

AUTOPHO'NIA, from αυτος, 'self,' and φωνη, 'voice.' An auscultatory sign pointed out by M. Hourmann, which consists in noting the character of the observer's own voice, while he speaks with his head placed close to the patient's chest. The voice, it is alleged, will be modified by the condition of the subjacent organs. The resonance thus heard, he terms *retentissement autophonique.*

AUTOPHOSPHORUS, Phosphorus.

AUTOPLASTY, Morioplastice.

AUTOP'SIA or AU'TOPSY; from αυτος, 'himself,' and οψις, 'vision.' *Autoph'ia.* Attentive examination by one's self. Improperly used occasionally for the following:

Autop'sia Cadaver'ica, (F.) *Autopsie, Ouverture cadavérique.* Attentive examination after death, *Examination post mortem, Sectio Cadav'eris, Dissection, Nec'roscopy, Nec'ropsy:* —practised for the purpose of investigating the causes and seat of an affection of which a person may have died, &c.

AUTOPYROS, Syncomistos.

AU'TOSITE, from αυτος, 'self,' and σιτος, 'nourishment.' A single monster, capable of deriving nourishment from its own proper organs, in contradistinction to *Omphalosite*, (q. v.)

AUTUMN, *Autum'nus, Phthiropo'ron*, (F.) *Automne.* One of the seasons of the year, between the 23d of September and the 21st of December. In all climates, the Autumn or Fall is liable to disease; a combination of local and atmospheric causes being then present, favourable to its production.

AUTUM'NAL; *Autumna'lis.* (F.) *Automnale.* Relating to Autumn; as *Autumnal Fruits, Autumnal Fevers*, &c.

Autumnal Fever, generally assumes a bilious aspect. Those of the intermittent kind are much more obstinate than when they appear in the spring.

AUXESIS, Augmentation, Increase.

AUXIL'IARY, *Auxilia'ris*, from *auxilium*, 'aid.' (F.) *Auxiliaire.* That which assists,—from which assistance is obtained.

Auxiliary Medicine is one which assists the principal medicine or basis. It is synonymous with Adjuvant.

Auxiliary Muscles are those which concur in the same movement. Some anatomists have applied the term to several ligaments, as well as to the fleshy fibres, which hang from the *sacro-spinalis* muscle.

AUXILIUM, Juvans, Medicament.

AVA, *Kava.* An intoxicating narcotic drink made by chewing the Piper methisticum. It is much used by the Polynesians.

AVAILLES, WATERS OF. A small village in France, 13 leagues S. S. E. of Poitiers, at which there is a cold saline chalybeate. It contains chlorides of sodium and calcium, sulphate and subcarbonate of soda, iron, &c.

AVANT-BOUCHE, (F.) *Os anti'cum.* This name has been applied by some to the *mouth*, properly so called—in contradistinction to the *Arrière bouche* or *Pharynx.*

AVANT-BRAS, Forearm.

AVANT-CŒUR, Scrobiculus cordis.

AVANT-GOUT, (F.) *Prægusta'tio;* a foretaste; prægustation.

AVANT-MAIN, (F.) *Adver'sa Manus.* The inside of the hand, when extended.

AVANT-PIED, (F.) The most advanced part of the foot.

AVANT-POIGNET, (F.) The anterior part of the wrist.

AVELINE, Corylus avellana (nut.)

AVELLANA CATHARTICA, Jatropha curcas.

AVE'NA, *Oats, Bromos.* The seeds of *Ave'na sati'va. Nat. Ord.* Gramineæ. *Sex. Syst.* Triandria Digynia. (F.) *Avoine.* Oats are used as food for man, in some parts, particularly in the North of England and Scotland. When deprived of the husks they form Groats, (q. v.) Reduced to meal,—*Avenæ Fari'na, Oatmeal*—they are applied as cataplasms to promote suppuration. The dry meal is sprinkled over erysipelatous parts.

AVENÆ FARINA. See Avena

AVENHEIM, MINERAL WATERS OF. Avenheim is three leagues from Strasburg: near it is an aperient mineral water.

AVENNES, MINERAL WATERS OF. Avennes is a village in the department of Herault in France: near it is a saline spring, the temperature of which rises to 84° Fahrenheit.

AVENS, COMMON, Geum urbanum—a. Water, Geum rivale—a. White, Geum Virginianum.

AVERICH, Sulphur.

AVERRHO'A BILIM'BI, *Bilim'bi, Bilimbing ters.* An Indian tree, which has a fruit, that is too acid to be eaten alone. It is used as a condiment, and in the form of syrup as a refrigerant.

Averrho'a Caram'bola, called after Averrhoes; *Malum Coën'sē, Prunum stella'tum, Tam'ara, Conga, Caram'bolo.* An Indian tree, whose fruits are agreeably acid. The bark, bruised, is employed as a cataplasm, and its fruit is used as a refrigerant in bilious fever and dysentery.

AVER'SION, *Aver'sio; Apot'ropē*, from *avertere*, (*a* and *vertere*) 'to turn from.' Extreme repugnance for any thing whatever.

AVERSION (F.) also means, in therapeutics, the action of medicines which turn the afflux of fluids from one organ, and direct them to others; being synonymous with *counter-irritation*, or rather *revulsion* or *derivation.*

AVERTIN, (F.) A disease of the mind, which, according to Lavoisien, renders the patient obstinate and furious.

AVEUGLE, Cæcus.

AVEUGLEMENT, Cæcitas—*a. de Jour*, Nyctalopia—*a. de Nuit*, Hemeralopia.

AVICEN'NIA TOMENTO'SA, called after Avicenna. The plant which affords the *Malac'ca Bean* or *Anacar'dium Orienta'lē* of the Pharmacopœias, *Semecar'pus Anacar'dium.* The oil drawn from the bark of the fruit is a corrosive, and active vesicatory, but it is not used.

AVICULA CIPRIA, Pastil—a. Margaritifera, see Pearl.

AVOIN, Avena.
AVORTEMENT, Abortion.
AVORTER, to Abort.
AVORTIN, Abortion.
AVORTON, Abortion.
AVULSIO, *Arrachement*.
AVULSION, Evulsion.

AX, MINERAL WATERS OF. Ax is a small town in the department of Arriège, France; where there are several sulphurous springs, the temperature of which varies from 77° to 162° of Fahrenheit.

AXE, Axis—*a. de l'Œil*, Axis of the eye.

AX'EA COMMISSU'RA, *Trochoï'des*. A pivot-joint. See Trochoid.

AXIL'LA, *Ala*, *Ascel'la*, *Assel'la*, *Ascil'la*, *Acel'la*, *Cordis emuncto'rium*, *Malæ*, *Hypo'mia*, *Fo'vea axilla'ris*, *Mas'chalē*, (F.) *Aisselle*. The cavity beneath the junction of the arm with the shoulder; the *armpit;* (F.) *Creux de l'Aisselle*. It is bounded, anteriorly, by a portion of the pectoralis major; posteriorly, by the latissimus dorsi. It is covered with hair, contains much cellular membrane, lymphatic ganglions, important vessels and nerves, and numerous sebaceous follicles, furnishing an odorous secretion. In consequence of such secretion, the ancients called it *emuncto'rium cordis*.

AX'ILLARY, (F.) *Axillaire*, from *axil'la*, 'the armpit.' Belonging to the armpit.

Axillary Artery, *Arte'ria axilla'ris;* a continuation of the subclavian, extending from the passage of the latter between the scaleni muscles as far as the insertion of the pectoralis major, when it takes the name of *Brachial*.

Axillary Glands are lymphatic glands, seated in the armpit; into which the lymphatic glands of the upper extremity open.

Axillary Nerve, *Scap'ulo-hu'meral* (Ch.), *Nerf circonflexe*, *Articular nerve;* arises from the posterior part of the brachial plexus, particularly from the last two cervical pairs and the first dorsal. It is chiefly distributed to the posterior margin of the deltoid.

Axillary Vein, *Vena Axilla'ris*, *Vena Subula'ris*. This vein corresponds with the artery; anterior to which it is situate. It is a continuation of the *brachial veins;* and, at its termination, assumes the name *Subclavian*.

AXINĒ, Ascia.

AXIRNACH, An Arabic word, used by Albucasis to designate a fatty tumour of the upper eyelid, observed particularly in children.

AXIS, *Axon*, (F.) *Axe*. A right line which passes through the centre of a body.

Axis, Cerebro-Spinal. See Encephalon.

Axis of the Eye, (F.) *Axe de l'œil*, called, also, *Visual Axis* and *Optic Axis*, is a right line, which falls perpendicularly on the eye, and passes through the centre of the pupil.

Axis, is also the second vertebra of the neck, *Axon*, *Epistroph'eus*, *Maschalister;* the *Ver'tebra Denta'ta*. (F.) *Essieu*. So called because it forms a kind of axis on which the head moves. Chaussier calls it *Axoïde*, from ἄξων, 'axis,' and εἶδος, 'shape.'

AXOIDE, Axis—*a. Occipitale*, Rectus capitis posticus major.

AXOÏDO-ATLOÏDEUS. What refers to both the axis and atlas; *Axoido-atloidean* articulation.

The lesions of the Axoïdo-atloïdean articulation, are, 1. Fracture of the *Proces'sus Denta'tus*. 2. Rupture of the odontoid ligament, and consequently passage and pressure of the process behind the transverse ligament: and, 3. The simultaneous rupture of the odontoid and transverse ligaments. These different accidents are fatal.

AXOÏDO-ATLOÏDIEN, Obliquus inferior capitis.

AXON, Axis.

AXUNGE, Adeps præparata.

AXUNGIA, Pinguedo—a. de Mumia, Marrow—a. Articularis, Synovia—a. Porcina, Adeps præparata.

AZARNET, Orpiment.

AZARUM, Asarum.

AZEDARACH, Melia Azedarach.

AZEDARACHA AMŒNA, Melia Azedarach.

AZOODYNA'MIA, from α, priv., ζωη, 'life,' and δυναμις, 'strength.' Privation or diminution of the vital powers.

AZORES, CLIMATE OF. The Azores or Western Islands are said to afford one of the best examples of a mild, humid, equable climate to be met with in the northern hemisphere. It is slightly colder and moister than that of Madeira, but even more equable. Sir James Clark thinks, that a change from Azores to Madeira, and from thence to Teneriffe—one of the Canaries, would prove more beneficial to the phthisical valetudinarian than a residence during the whole winter in any one of these islands.

AZOTATE D'ARGENT, Argenti Nitras.

A'ZOTE, AZO'TUM, from α, priv. and ζωη, 'life.' *A'zote* or *Ni'trogen*, *Alcaligene*, *Gas azo'ticum*, (F.) *Air gaté*, *Air vicié*, is a gas which is unfit for respiration. It is not positively deleterious, but proves fatal, owing to the want of oxygen. It is one of the constituents of atmospheric air, and is a distinguishing principle of animals. Vegetables have it not generally diffused, whilst it is met with in most animal substances. It has been variously called, *phlogistic air*, *vitiated air*, &c.; has been looked upon as sedative, and recommended to be respired, when properly diluted, in diseases of the chest.

Azote, Protoxide of, Nitrogen, gaseous oxide of.

AZOTENÈSES, from *azote*, and νοσος, 'disease.' Diseases fancied to be occasioned by the predominance of azote in the body.—Baumes.

AZOTURIA. See Urine.

AZUR. Coral, Smalt.

AZU'RIUM. A compound of two parts of mercury, one-third of sulphur, and one-fourth of sal ammoniac.—Albert the Great.

AZ'YGES, *Az'ygos*, *sine pari*, from α, priv. and ζυγος, 'equal.' Unequal. The *sphenoid bone*, because it has no fellow. Also, a process, *Proces'sus Az'yges*, projecting from under the middle and forepart of this bone.

AZYGOS MUSCLE, *Azygos Uvulæ*, is the small muscle, which occupies the substance of the uvula.—Morgagni. The name is, however, inappropriate, as there are two distinct fasciculi, placed along side each other, forming the *Palato-staphyli'ni*, *Staphyli'ni*, or *Epistaphyli'ni* muscles, *Staphyli'ni me'dii* of Winslow.

Azygos Vein, *Vena Azygos*, *Veine Prélombo-thoracique*—(Ch.) *Vena sine pari*, *Vena pari carens* (F.) *Veine sans Paire*. This vein was so

called by Galen. It forms a communication between the *V. cava inferior* and *V. cava superior*, permitting the blood to pass freely between the two. It rises from the vena cava inferior, or from one of the lumbar or renal veins, passes through the diaphragm, ascends along the spine to the right of the aorta and thoracic duct, and opens into the V. cava superior, where it penetrates the pericardium. On the left side, the SEMI-AZ'YGOS, *Left bron'chial* or *left superior intercos'tal vein*, *V. demi-azygos*, *Veine petite prélombo-thoracique*—(Ch.) presents, in miniature, nearly the same arrangement.

AZ'YMUS, from *α*, priv. and *ζυμη*, 'leaven.' Azymous bread is unfermented, unleavened bread.—Galen.

B.

BABEURRE, Buttermilk.

BABILLEMENT, Loquacity.

BAC'ARIS, *Bach'aris*. A name given by the ancients to an ointment described by Galen under the name *Ointment of Lydia*. It was sometimes employed in diseases of the womb.—Hippocr.

BACCÆ BERMUDENSES, Sapindus saponaria—b. seu Grana actes, see Sambucus ebulus—b. Myrtillorum, see Vaccinium myrtillus—b. Norlandicæ, Rubus arcticus—b. Piscatoriæ, see Menispermum cocculus.

BACCAR, BAC'CARIS, or BAC'CHARIS. An herb used by the ancients in their garlands, to destroy enchantment. Perhaps the *Digitalis purpurea* (q. v.) Some authors have erroneously thought it to be the *Asarum*.

BACCHI'A, from *Bac'chus*, 'wine.' A name applied to the red or pimpled face of the drunkard. See Gutta rosea.

BACCHICA, Hedera helix.

BACHARIS, Bacaris.

BACHELOR'S BUTTONS. See Strychnos nux vomica.

BACILE, Crithmum maritimum.

BACIL'LUM, *Bac'ulus*, *Bac'culus*: 'a stick.' This name has been applied to a kind of troch, composed of expectorants, and having the shape of a stick. *Bacillum* was used by the ancient chemists for several instruments of iron.

BACKACHE ROOT, Liatris.

BACKSTROKE OF THE HEART, Impulse, diastolic.

BACOVE, Musa sapientum.

BACULUS, Bacillum.

BADEN, MINERAL WATERS OF. Baden is a town six miles from Vienna. Here are 12 springs, containing carbonates of lime and magnesia; sulphates of lime, and magnesia, and soda; and chlorides of sodium and aluminum. The water is used in diseases of the skin, rheumatism, &c. There are two other towns of the same name; one in Suabia, and the other in Switzerland, about 12 miles from Zurich, where are mineral springs. The waters of the last two are thermal sulphureous.

BADIAGA. A kind of sponge, sold in Russia, the powder of which is said to take away the livid marks from blows and bruises in a few hours. Its nature is not understood.

BADIANE, Illicium anisatum.

BADISIS, Walking.

BADUKKA, Capparis badukka.

BAGEDIA, Pound.

BAGNÈRES-ADOUR, MINERAL WATERS OF. Bagnères-Adour is a small town in the department of the *Hautes Pyrénées*, having a great number of mineral springs; some, cold chalybeates; others, thermal salines; but the greatest part sulphureous and warm.

BAGNÈRES DE LUCHON is a small town in the department of *Haute Garonne*, on the frontiers of Spain. It has been for a long time famous for its numerous sulphureous springs, the temperature of which is from 69° to 148° of Fahrenheit.

BAGNIGGE WELLS. A saline mineral spring in London, resembling the Epsom.

BAGNIO, *Baignoire*.

BAGNOLS, MINERAL WATERS OF. Bagnols is a village, two leagues from Mende, in the department of Lozère. The waters are hydrosulphurous and thermal: 109° Fahrenheit.

BAGNOLES, MINERAL WATERS OF. Bagnoles is a village in the department of Orne. The water resembles that of the *Bagnères de Luchon*.

BAGOAS, Castratus.

BAGUENAUDIER, Colutea arborescens.

BAHAMA ISLANDS, CLIMATE OF. The climate of the Bahamas is not considered to be well adapted for consumptive patients, on account of the rapid alternations of temperature, and the prevalence of winds, often of a dry, cold character. Still the phthisical valetudinarians from most portions of the United States might derive advantage from a residence there during the winter months. The accommodations are not, however, good, or numerous.

BAHEL, *Colum'nea longifo'lia*. A labiated plant of Malabar, whose leaves, bruised, are applied as cataplasms to suppurating tumours.

BAHEL SCHULLI, Genista spinosa Indica.

BAIGNEUR, Bather.

BAIGNOIRE, (F.) *Baptiste'rium*, a *Bathing tub*, *Bagnio*, *Solium*, *Pisci'na*. The vessel or place in which bathing is performed. *Baignoire oculaire*, an *eye-bath*,—a small vessel for bathing the eyes.

BAILLEMENT, Yawning.

BAILLON, Speculum oris.

BAIN, Bath—*b. Chaud*, Bath, hot—*b. Électrique*, Bath, electric, see Electricity—*b. Entier*, Bath, general—*b. de Fauteuil*, Bath, hip—*b. Frais*, Bath, tepid—*b. Froid*, Bath, cold—*b. Marie*, Bath, water—*b. Medicinal*, Bath, medicated—*b. de Pied*, Bath, foot, Pediluvium—*b. de Sable*, Bath, sand—*b. de Siège*, Bath, hip—*b. Tempéré*, Bath, tepid, B. Temperate—*b. de Tête*, Bath, head—*b. Tiède*, Bath, tepid—*b. Très froid*, Bath, cold—*b. de Vapeur*, Bath, vapour.

BAINS, MINERAL WATERS OF. These are situate at Plombières, department of the Vosges. They are said to be saline and thermal by some; others deny them any medical properties.

BALAMPULLI, Tamarindus.

BALANCE, AREOSTATIC, Aerometer.

BALANDA, Fagus Sylvatica.

BALANEUM, Bath.

BALANITIS, Gonorrhœa spuria.

BALANOBLENNORRHŒA, Gonorrhœa spuria.

BALANOCASTANUM, Bunium Bulbocastanum.

BALANORRHŒA, Gonorrhœa spuria.

BA'LANOS, βαλανος, 'glans,' 'an acorn.' The glans penis. Hence, *Balanoblennorrhœ'a*, Blennorrhœa of the glans; and *Balani'tis*, Inflammation of the glans. Suppositories and pessaries were, also, so called.

Balanos Phœnicos, Date.

BALANUS, Glans—b. Myrepsica, Guilandina moringa.

BALARUC, MINERAL WATERS OF. Balaruc is a town in the department of Hérault, in France. The waters are saline and thermal. They contain carbonic acid, carbonate of lime, carbonate of magnesia, chlorides of sodium, calcium, and magnesium, sulphate of lime, and a little iron. They are considered tonic, and are largely used. Their temperature is about 118° Fahrenheit.

Balaruc Water, Factitious, (F.) *Eau de Balaruc; Aqua Bellilucana*, is made of *simple acidulous water* (containing twice its bulk of carbonic acid) f. ℥xxss; *chloride of sodium*, ʒiss; *chloride of calcium*, gr. xviij; *chloride of magnesium*, gr. 56; *carbonate of magnesia*, gr. j.

BALATRO, Bambalio.

BALAUSTINE FLOWERS. See Punica granatum.

BALBIS, βαλβις, 'a foundation.' Any oblong cavity.—Galen. Hippocrates, in his treatise on the joints, gives the name *Balbito'des* to the olecranon cavity of the humerus.

BALBUS. (F.) *Bègue.* One habitually affected with stammering. A stammerer.

BALBU'TIES, *Psellis'mus, Psel'lotes, Blæsitas, Baryglos'sia, Dysla'lia, Mogila'lia, Ischopho'nia, Battaris'mus, Bamba'lia;* (F.) *Balbutiement, Bégaiement.* Stammering, St. Vitus's Dance of the Voice. Also, vicious and incomplete pronunciation, in which almost all the consonants are replaced by the letters B and L *Traulis'mus.*

BALCHUS, Bdellium.

BALDMONEY, Æthusa Meum.

BALENAS, Leviathan penis.

BALIMBAGO, Hibiscus populeus.

BALINEATOR, Bather.

BALL, Pila.

BALLISMUS, Chorea.

BALLONNEMENT, Tympanites.

BAL'LOTA FŒTIDA, *Marru'bium nigrum, Black Horehound, Stinking H.* (F.) *Marrube noir.* This plant is esteemed to be anti-spasmodic, resolvent, and detersive.(?)

Ballota Lana'ta, *Leonu'rus lana'tus.* A plant of the *Nat. Family* Labiatæ, *Sex. Syst.* Didynamia Gymnospermia, which grows in Siberia. The whole plant, with the exception of the root, has recently been recommended in dropsy, and in rheumatism and gout, as a diuretic. It is usually given in decoction (ʒss to ʒj, to f ℥viij of water.)

BALLOTTEMENT (F.) *Agitatium, Succussion, Mouvement de Ballottement, Repercussion,* means the motion impressed on the fœtus in utero, by alternately pressing the uterus by means of the index finger of one hand introduced into the vagina; the other hand being applied on the abdomen. It is one of the least equivocal signs of pregnancy.

BALLSTON SPA. This village is situate in Saratoga County, New York. The spring Sans Souci belongs to the class of Acidulous Chalybeates. It contains iodide of sodium. There is also a sulphur spring.

BALM, Melissa—b. Apple, Momordica balsamina—b. Bastard, Melitis Melissophyllum—b. of Gilead, Solomon's, see Tinctura cardamomi—b. of Gilead tree, Dracocephalum canariense—b. Indian, Trillium latifolium—b. Mountain, Monarda coccinea—b. Red, Monarda coccinea—b. Stinking, Hedeoma.

BALNEA CŒNOSA, *Boue des eaux.*

BALNEARIUM, Hypocaustum.

BALNEARIUS, Bather.

BALNEATOR, Bather.

BALNEOL'OGY, *Balneolog''ia*, from βαλανειον, 'a bath,' and λογος, 'a description.' A treatise on baths.

BALNEUM, Bath—b. Animale, Bath, animal—b. Arenæ, Bath, sand—b. Mariæ, Bath, water—b. Medicatum, Bath, medicated.

BALSAM. *Bal'samum*, (q. v.) *Bol'eson, Bel'eson.* (F.) *Baume.* This name is given to natural vegetable substances, concrete or liquid, but very odorous, bitter, and piquant: composed of resin, benzoic acid, and sometimes of an essential oil;—which allow benzoic acid to be disengaged by the action of heat; readily dissolve in volatile oil, alcohol, and ether; and, when treated with alcalis, afford a soluble benzoate, and throw down resin. We know of only five balsams:—those of Peru, and Tolu, Benzoin, *solid* Styrax or Storax, and *liquid* Styrax. See those different words. There are, however, many pharmaceutical preparations and resinous substances, possessed of a balsamic smell, to which the name *balsam* has been given; but they differ essentially in composition and properties: hence the distinction of balsams into *natural* and *artificial.* The *natural balsams* include the five before mentioned; the *artificial* the remainder.

Balsam, Acous'tic, *Bal'samum Acous'ticum.* (F.) *Baume acoustique.* A mixture of fixed and essential oils, sulphur, and tinctures of fetid gums. Used in cases of atonic deafness, dropped into the ear.

Balsam, American, see Myroxylon Peruiferum—b. Anodyne, Bates's, Linimentum saponis et opii.

Balsam, Apoplec'tic, *Bal'samum Apoplec'ticum*, (F.) *Baume apoplectique.* A medicine, composed of several *balsams* properly so called, resins, and volatile oils. It is of a stiff consistence, is worn in ivory boxes about the person, and is smelled at in headachs, &c.

Balsam Apple, Momordica balsamina.

Balsam of Arcœ'us, *Bal'samum Arcæi, Unguen'tum Elemi*, (F.) *Baume d'Arcæus.* A soft ointment; sometimes employed in wounds, ulcers, &c. It is made by melting, with a gentle

heat, two parts of mutton suet, one of lard, one and a half of turpentine, and as much resin.

Balsam Canada, see Pinus balsamea—b. Canary, Dracocephalum canariense—b. Capivi, Copaiba.

Balsam of Carpa'thia, *Bal'samum Carpath'icum.* (F.) *Baume de Carpathie.* The resin of the *Pinus Cembra*, (q. v.) a tree, which grows in Switzerland, Libya, and the Krapac mountains in Hungary.

Balsam, Chalyb'eate, *Bal'samum Chalybea'tum*, (F.) *Baume d'acier* ou *d'aiguilles.* A mixture of nitrate of iron, alcohol, and oil, prepared by dissolving needles in nitric acid. It was formerly employed in frictions in pains of the joints.

Balsam, Commander's, Tinctura benzoini composita—b. for Cuts, Tinctura benzoini composita.

Balsam, Cordial, of Senner'tus, *Bal'samum Cordia'lē Senner'ti*, (F.) *Baume cordiale de Sennert.* A stimulant medicine, composed of the essential oils of citron, cloves, and cinnamon, of musk, and ambergris. Dose, 6 to 15 drops.

Balsam, Spir'ituous, of Fioraventi, *Bal'samum Fioraven'ti spirituo'sum*, (F.) *Baume de Fioraventi spiritueux.* Different products of the distillation of resinous and balsamic substances, and of a number of aromatic substances, previously macerated in alcohol, have been thus called. The *Spirituous Balsam of Fioraventi*, the only one now used in friction, in chronic rheumatism, is the first product of the distillation from a sand-bath. It is entirely alcoholic. The *Oily Balsam of Fioraventi* is obtained by removing the residue, and distilling it in an iron vessel, at a white heat. It has the appearance of a citrine-coloured oil. The *Black Balsam of Fioraventi*, is the black oil, obtained when the temperature is sufficient to carbonize the substances in the cucurbit.

Balsam of Fir, see Pinus balsamea.

Balsam of Fourcroy or of Laborde, (F.) *Baume de Fourcroy* ou *de Laborde.* A kind of liniment composed of aromatic plants, balsams, resins, aloes, turpentine, theriac, and olive oil. Used in chaps of the skin and nipples.

Balsam, Friar's, Tinctura benzoini composita.

Balsam of Genevieve, (F.) *Baume de Geneviève.* An ointment composed of wax, turpentine, oil, red saunders, and camphor. Used in contused wounds, gangrene, &c.

Balsam of Honey (Hill's.) A tincture made of *tolu*, *honey* (āā ℔j) and *spirit*, (a gallon.) A pectoral, used in coughs. The committee of the New York College of Pharmacy recommend the following formula:—(*Gum Benzoin* ℥v, *Bals. Tolut* ℥j, *Mellis*, ℥viij, *Alcohol* Oiij—digest for 10 days and filter.) See Mel.

Balsam of Horehound (Ford's.) A tincture of *horehound*, *liquorice-root*, *camphor*, *opium*, *benzoin*, *dried squills*, *oil of aniseed*, and *honey.* It has the same properties as the above. See Marrubium.

Balsam, Hungarian, see Pinus mughos.

Balsam, Hypnot'ic, *Bal'samum Hypnot'icum*, (F.) *Baume Hypnotique.* A preparation of which opium, hyoscyamus, camphor, and some other sedative substances form the basis. It is used externally in friction, to provoke sleep.

Balsam, Hyster'ic, *Bal'samum Hyster'icum*, (F.) *Baume Hystérique.* A preparation made of opium, aloes, asafœtida, castor, distilled oils of rue, amber, &c. It is held to the nose, applied to the navel, or rubbed on the hypogastrium in hysterical cases.

Balsam, Indian, see Myroxylon Peruiferum.

Balsam of Leictoure, of Condom or Vinceguere, *Bal'samum Lectorense.* A strongly stimulant and aromatic mixture of camphor, saffron, musk, and ambergris, dissolved in essential oils. The ancients burnt it for the purpose of purifying the air of a chamber, when infested with a disagreeable odour.

Balsam of Life, of Hoff'man, *Bal'samum Vitæ Hoffman'ni*, (F.) *Baume de Vie d'Hoffman.* A tincture, composed of essential oils and ambergris, employed internally and externally as a stimulant. A mixture of essential oils without alcohol constitutes the *Saxon Balsam*, *Bal'samum apoplec'ticum*, *B. aromat'icum*, *B. cephal'icum*, *B. Saxon'icum*, *B. nervinum*, *B. Scherzeri*, *B. Stomach'icum.* Employed in friction as a stimulant.

Balsam of Life. Decoctum aloes compositum—b. of Life, Turlington's, see Tinctura benzoini composita.

Balsam of Locatel'li or Lucatel'li, *Bal'samum Lucatel'li*, (F.) *Baume de Lucatel.* A sort of ointment, composed of wax, oil, turpentine, sherry, and balsam of Peru, coloured with red saunders. It was once administered in pulmonary consumption.

Balsam of Mecca, see Amyris opobalsamum—b. Mexican, see Myroxylon Peruiferum—b. Natural, see Myroxylon Peruiferum.

Balsam, Green, of Metz, *Bal'samum Vir'idē Meten'sium*, *Bal'samum Vir'idē*, (F.) *Baume vert de Metz*, *Baume de Feuillet*, *Huile verte*, *Oleum ox'ydi cupri vir'idē.* This is composed of several fixed oils, holding, in solution, subcarbonate of copper, sulphate of zinc, turpentine, aloes, and the essential oils of cloves and juniper. It is green and caustic, and is employed to hasten the cicatrization of atonic ulcers.

Balsam, Nephrit'ic, of Fuller, *Bal'samum Nephret'icum Fulleri.* A liquid medicine, composed of oils, resins, and balsams, which have experienced an incipient state of carbonization from concentrated sulphuric acid. It was given in the dose of 15 to 30 drops in certain affections of the kidneys.

Balsam, Nervous, *Bal'samum Nervinum*, (F.) *Baume nervin* ou *nerval.* A kind of ointment, composed of fatty bodies, volatile oils, balsam of Peru, camphor, &c. It is employed by friction in cases of sprains and rheumatic pains.

Balsam, Paralyt'ic of Mynsicht. A sort of liniment or soft mixture of the essential oils of different aromatic plants, oils of turpentine and amber.—Lémery.

Balsam of Parei'ra-brava, *Bal'samum Parei'ræ-bravæ.* A soft mixture of balsam, resin, muriate of ammonia, and powder of the root of *Pareira-brava.* It is given internally, to excite the urinary secretion.

Balsam, Peruvian, see Myroxylon Peruiferum—b. of Peru, red, see Toluifera balsamum—b. of Peru, white, see Myroxylon Peruiferum.

Balsam of Rackasi'ra or of Rakasi'ri. This substance is of a yellowish-brown colour; semi-transparent; fragile, when dry, but softening by heat; adhering to the teeth, when chewed. It has a smell similar to that of the Balsam of Tolu, and is slightly bitter. It is brought from

India in gourd shells, and has been employed in diseases of the urinary organs, especially in gonorrhœa.

Balsam, Riga. Prepared from the shoots of the Scotch Fir, macerated in spirit of wine. *Internally*, stimulant and diuretic; *externally*, a vulnerary. See Pinus Cembra.

Balsam of Sat'urn, *Bal'samum Satur'ni*. A solution of acetate of lead in spirit of turpentine, concentrated by evaporation; and to which camphor has been added. This balsam was applied to hasten the cicatrization of wounds.

Balsam of the Samar'itan, (F.) *Baume du Samaritain*. A sort of liniment, prepared by boiling together, at a gentle heat, equal parts of wine and oil. It is said to have been the ointment used by the Samaritan of the Gospel to cure a patient covered with ulcers.

Balsam, Saxon, Balsam of Life of Hoffmann.

Balsam of Sulphur, *Bal'samum Sul'phuris*, (F.) *Baume de Soufre*. A solution of sulphur in oil.—*B. sulph. anisa'tum*, (F.) *B. de Soufre anisé*. A solution of sulphur in essential oil of aniseed; given as a carminative.—*B. Sulph. succina'tum*, (F.) *B. de Soufre succiné*. A solution of sulphur in oil of amber.—*B. Sulphuris terebinthina'tum, Common Dutch Drops*. (F.) *B. de soufre térébinthiné*. A solution of sulphur in essential oil of turpentine, administered as a diuretic.—The *Balsam of Sulphur of* Ruland is a solution of sulphur in linseed oil or nut oil.

Balsam of Sym'pathy, *Balsamum Sympath'icum*, (F.) *Baume de Sympathie*. A balsam, used in the days when sympathetic influence was strongly believed in. It was composed of the raspings of a human skull, blood, and human fat, and was applied to the instrument which had inflicted the wound.

Balsam, Thibaut's. A tincture of myrrh, aloes, dragon's blood, flowers of St. John's wort, and Chio turpentine. *Internally*, diuretic; *externally*, vulnerary.

Balsam of Tolu, see Toluifera Balsamum.

Balsam, Tranquil, *Bal'samum tranquil'lum*. (F.) *B. tranquille*. A liquid medicine employed, externally, in the shape of friction: it is prepared by macerating and boiling, in olive oil, narcotic and poisonous plants,—belladonna, mandragora, hyoscyamus, &c.—and afterwards infusing, in the filtered decoction, different aromatic plants. It was employed as an anodyne.

Balsam, Turkey, Dracocephalum Canariense.

Balsam of Tur'pentine, *Dutch Drops*, *Bal'samum Terebin'thinæ*. Obtained by distilling oil of turpentine in a glass retort, until a red balsam is left. It possesses the properties of the turpentines.

Balsam, Vervain's, Tinctura Benzoini composita.

Balsam, Vul'nerary, of Mindere'rus, *Bal'samum vulnera'rium Mindere'ri*, (F.) *B. vulnéraire de* Minderer. A kind of liniment, composed of turpentine, resin elemi, oil of St. John's wort, and wax. Employed in friction, and as a dressing to wounds.

Balsam Weed, Impatiens fulva.

Balsam, Wound, Tinctura Benzoini composita.

BALSAMADENDRON GILEADENSE, Amyris Gileadensis—b. Myrrha, see Myrrha.

BALSAMELÆON, Myroxylon Peruiferum.

BALSAM'IC, *Balsam'icus*, from βαλσαμον, 'balsam.' Possessing the qualities of balsams. *Balsamic odour*:—a sweet, faint, and slightly nauseous smell. *Balsamic substance*;—One resembling the balsams in property.

BALSAMIER ELÉMIFÈRE, Amyris elemifera—*b. de la Mecque*, Amyris opobalsamum.

BALSAMINA, Momordica balsamina.

BALSAMINE, Momordica balsamina.

BALSAMITA FŒMINEA, Achillea ageratum—b. Mas, Tanacetum balsamita.

Balsami'ta Suav'eolens, *B. odora'ta*, *B. maris*, *Mentha Saracen'ica*, *M. Roma'na*. *Fam.* Compositæ Corymbiferæ. *Sex. Syst.* Syngenesia Polygamia superflua. A plant, common in the south of France, and cultivated in the gardens; where it bears the names *Menthecoq*, *Grand baume*, *Baume des Jardins*. Its smell is strong and aromatic, and taste hot. It is used for the same purposes as the tansey, i. e. as a stimulant, vermifuge, &c.

Balsamita Suaveolens, Tanacetum balsamita.

BALSAMO-SACCHARUM, Elæo-Saccharum.

BALSAMUM, see Balsam, Amyris opobalsamum—b. Ægyptiacum, see Amyris opobalsamum—b. Album, see Myroxylon peruiferum—b. Alpini, Dracocephalum canariense—b. Alpini, see Amyris opobalsamum—b. Anodynum, Linimentum saponis et opii—b. Apoplecticum, Balsam of life of Hoffmann—b. Aromaticum, Balsam of life of Hoffmann—b. Asiaticum, see Amyris opobalsamum—b. Braziliense, Copaiba—b. Calaba, see Fagara octandra—b. Catholicum, Tinctura benzoini composita—b. Cephalicum, Balsam of life of Hoffmann—b. Copaibæ, Copaiba—b. Genuinum antiquorum, see Amyris opobalsamum—b. Hyperici simplex, see Hypericum perforatum—b. Judaicum, see Amyris opobalsamum—b. Libani, see Pinus cembra—b. Mariæ, see Fagara octandra—b. e Meccâ, see Amyris opobalsamum—b. Mercuriale, Unguentum hydrargyri nitratis—b. Nervinum, Balsam of life of Hoffmann—b. Ophthalmicum rubrum, Unguentum hydrargyri nitrico-oxydi—b. Persicum, Tinctura benzoini composita—b. Peruanum, see Myroxylon Peruiferum—b. Saturninum, Unguentum plumbi superacetatis—b. Scherzeri, Balsam of life of Hoffmann—b. Stomachicum, Balsam of life of Hoffmann—b. Styracis, Styrax—b. Styracis benzoini, Benjamin—b. Succini, see Succinum—b. Sulphuris Barbadense, Petroleum sulphuratum—b. Sulphuris simplex, Oleum sulphuratum—b. Syriacum, see Amyris opobalsamum—b. Tolutanum, see Toluifera balsamum—b. Traumaticum, Tinctura benzoini composita—b. Universale, Unguentum plumbi superacetatis—b. Viride, Balsam, green, of Metz, see Fagara octandra.

BALSEM, Amyris opobalsamum.

BAMBA, Bamboo.

BAMBALIA, Balbuties.

BAMBA'LIO, *Bala'tro*, from βαμβαινω, 'I speak inarticulately.' One who stammers or lisps, or utters inarticulate sounds. According to Krause, one who speaks as if he had pap in his mouth, or as if the tongue were paralyzed.

BAMBOO, (F.) *Bambou*, *Bambu*. *Fam.* Gramineæ. *Sex. Syst.* Hexandria Monogynia. The young shoots of the *Bambos arundina'cea* or *Arun'do bambos*, and of the *Bambos verticilla'ta*

contain a saccharine pith, of which the people of both the Indies are very fond. They are sometimes made into a pickle.

BAMBOS ARUNDINACEA, Bamboo—b. Verticillata, Bamboo.

BAMIX MOSCHATA, Hibiscus abelmoschus.

BAMMA, from βαπτω, 'I plunge,' 'a paint; a dye.' Anciently, liquids were so called, in which certain bodies were plunged, to moisten or soften them. In the case of tea, for instance, into which bread is dipped, the tea would be the *bamma*.

BANANA, Musa sapientum.

BANANIER, Musa sapientum.

BANAUSIA, Charlatanry.

BANC D'HIPPOCRATE, Bathron.

BANCAL, (F.) One who has deformed legs. It includes the *valgus compernis*, and *varus*, which see.

BANCROCHE, (F.) A vulgar epithet for a rickety individual.

BAN'DAGE *Desma*, *Hypodes'mis*, from Sax bindan, 'to bind.' This word, with the French, is generally used to express the methodical application of rollers, compresses, &c., to fix an apparatus upon any part: corresponding to the words *deliga'tio*, *fascia'tio*, *fascia'rum applica'tio*, *epid'esis*. With us the noun is usually applied to the result of the application: or to the bandage itself;—a sense in which the French employ the word *Bande*. Bandages are *simple* or *compound*. The simple bandage is *equal*, if the turns are applied circularly above each other; *unequal*, if the turns are not accurately applied upon each other. If each turn of the bandage be only covered one-third, it forms the *doloire* of the French; if the edges touch only slightly, it is the *mousse'*; if the turns are very oblique and separated, it is the *spiral* or *creeping*, (F.) *rampant*; if folded upon each other, it is termed the *reversed*, (F.) *renversé*. By uniting various kinds of bandaging, we have the *compound*; and these compound bandages have received various names expressive of their figure, or of the parts to which they are applied, as *capistrum*, *spica*, &c. Bandages are divided, also, as regards their uses, into *uniting*, *dividing*, *retaining*, *expelling*, *compressing*, &c.

BANDAGE or ROLLER, *Fascia*, (q. v.) *Tænia*, *Epides'mos*, *Vin'culum*, the *Bande* of the French is derived from (G.) b i n d e n, 'to bind.' It may be made of linen, flannel, or other stuff capable of offering a certain resistance. The two extremities of a bandage are called *tails*, (F.) *chefs*, and the rolled part is termed its *head*, (F.) *globe*. If rolled at both extremities, it is called a *double-headed roller* or *bandage*, (F.) *Bande à deux globes*.

BANDAGE, BODY, *Manti'lē*, (F.) *Bandage de Corps*, is used for fixing dressings, &c. to the trunk. It is formed of a towel, napkin, or some large compress, folded three or four times; the extremities of which are fastened by pins. This is again fixed by means of the *scapulary bandage*, which is nothing more than an ordinary bandage, stitched to the anterior and middle part of the napkin, passing over the clavicles and behind the head, to be attached to the back part of the napkin.

BANDAGE, COMPRESSING, or ROLLER, *Fascia compressi'va* seu *convolu'ta*, (F.) *Bandage compressif* ou *roulé*, is the simple *roller* with one head; and is employed in cases of ulcers, varices, &c. of the limbs. Whenever this roller is applied to the lower part of the limbs, it is carried upwards by the *doloire* and *reversed* methods above described.

BANDAGE, EIGHTEEN-TAILED, *Fascia octod'ecim capit'ibus* (F.) *Bandage à dix huit chefs*. This bandage is made of a longitudinal portion of a common roller; and with a sufficient number of transverse pieces or tails, to cover as much of the part as is requisite. It is a very useful bandage, inasmuch as it can be undone without disturbing the part.

BANDAGE, GALEN'S, or *B. for the Poor*, *Fascia Galeni* seu *Pau'perum*, (F.) *Bandage de Galien* ou *des pauvres*, *Galea*, is a kind of *cucul'lus* or hood, (F.) *Couvrechef*, divided into three parts on each side; and of which GALEN has given a description. See Cancer Galeni.

BANDAGES, HERNIAL, see TRUSS.

BANDAGE, IMMOVABLE, Apparatus, immovable.

BANDAGE, INGUINAL, *Fascia inguina'lis*. A bandage for keeping dressings applied to the groin. It consists of a cincture, to which is attached a triangular compress, adapted for covering the groin. To the lower extremity of this, one or two bandages are attached, which pass under the thigh, and are fixed to the posterior part of the cincture. This bandage may be either simple or double.

Other bandages will be found described under their various names.

BANDAGE, PERMANENT, Apparatus, immovable—b. of the Poor, see Cancer Galeni; and Bandage, Galen's.

BANDAGE OF SEPARATE STRIPS, or B. OF SCULTE'TUS, *Fas'cia fasci'olis separa'tim dispos'itis* seu *Sculte'ti*, (F.) *Bandage à bandelettes séparées* ou *de Scultet*. This is formed of linen strips, each capable of surrounding once and a half the part to which they have to be applied, and placed upon each other, so as to cover, successively, one-third of their width. It is used chiefly for fractures, requiring frequent dressing.

BANDAGE DIVISIF, Dividing bandage—*b. en Doloire*, *Doloire*—*b. Unissant*, Uniting bandage.

BAN'DAGIST. One whose business it is to make bandages, and especially those for hernia.

BANDE, Bandage. The word *Bande*, in anatomy, is used by the French for various narrow, flat, and elongated expansions. *Bande d'Héliodore*, is a kind of bandage for supporting the mammæ.

BANDEAU (F.) A kind of simple bandage, which consists of a piece of cloth, folded four times, and applied round the head. There is also the *Bandeau* ou *Mouchoir en triangle* or *triangular bandage*, a kind of couvrechef (which see,) made of a square piece of cloth, or of a handkerchief, folded diagonally, and applied round the head.

BANDELETTE (F.) Diminutive of *Bande*, *Fasciola*, *Tæniola*, *Vitta*; a narrow bandage, strip or fillet. Also Tænia semicircularis (q. v.)

BANDELETTES AGGLUTINATIVES, small strips, covered with a glutinous plaster. *Vittæ agglutinan'tes*. See Agglutinant.

BANDELETTES DECOUPÉES, are strips of linen, notched on one edge, and covered, on one side, with ointment. They are applied to

wounds to prevent the lint from sticking, and the laceration of the cicatrix.

BANDELETTE SEMICIRCULAIRE, Tænia semicircularis—*b. des Cornes d'ammon*, Corpus fimbriatum—*b. des Éminences pyriformes*, Tænia semicircularis—*b. de l'Hippocampe*, Corpora fimbriata.

BANDURA, Nepentha destillatoria.

BANEBERRY, Actæa spicata.

BANGUE or BANGI or BENG, *Indian hemp, Gunjah*. Adanson believes this to be the *Nepenthes* of the ancients, *Can'nabis In'dica*, probably identical with *C. sativa*. *Family*, Urticeæ. *Sex. Syst.* Diœcia Pentandria. Its leaves and flowers are narcotic and astringent. They are chewed and smoked. Its seeds, mixed with opium, areca, and sugar, produce a kind of intoxication, and are used for this purpose by the people of India. An alcoholic extract of the plant has been used in India, and since then in Europe and this country as a narcotic, and anti-convulsive, in the dose of from half a grain to ten or more. It requires, however, great caution in its administration. See Gunjah and Churrus.

BANICA, Pastinaca sativa.

BANILAS, Vanilla.

BANILLA, Vanilla.

BANILLOES, Vanilla.

BANISTE'RIA ANGULO'SA. This plant, in Brazil and the Antilles, passes for a powerful sudorific, and an antidote to the poison of serpents.

BANNIÈRES, MINERAL WATERS OF. Bannières is a village in Quercy, diocess of Cahors, France. The waters are probably chalybeate. They are celebrated in amenorrhœa, cachexia, jaundice, &c.

BA'OBAB. The *Adanso'nia digita'ta*, of Africa; *Nat. Ord.* Bombaceæ; one of the largest productions of the vegetable kingdom. Its fruit is called, in the country, *Pain de singe*. The pulp is sourish, and agreeable to eat: and a refreshing drink is made from it, which is used in fevers. Prospero Alpini and Dr. L. Franck, think that the *Terra Lemnia* was prepared, in Egypt, from the pulp. All the parts of the Baobab abound in mucilage.

BAPTISIA TINCTORIA, Sophora tinctoria.

BAPTISTERIUM, *Baignoire*.

BARAQUETTE, (F.) A name given by Rasous, physician at Nimes in France, to a catarrhal epidemy, which occurred there in 1761. See Influenza.

BARATHRON, Juniperus sabina.

BARATHRUM, Antrum.

BARBA, Beard—b. Aaronis, Arum maculatum—b. Capræ, Spiræa ulmaria—b. Jovis, Sempervivum tectorum.

BARBADOES, see West Indies—b. Leg, see Elephantiasis.

BARBAREA, Erysimum Barbarea.

BARBAROS'SÆ PIL'ULÆ, *Barbarossa's Pills*. An ancient composition of quicksilver, rhubarb, diagridium, musk, &c. It was the first internal mercurial medicine, which obtained any real credit.

BARBE, Beard—*b. de Bouc*, Tragopogon.

BARBEAU, Cyanus segetum.

BARBER-CHIRUR'GEONS. A Corporation of London, instituted by king Edward IV. The barbers were separated from the surgeons, by 18 Geo. II. c. 15; and the latter were erected into a *Royal College of Surgeons* at the commencement of the present century.

BARBERIE, MINERAL WATERS OF. These mineral waters are half a league from Nantes. They contain carbonic acid, chlorides of magnesium and sodium, sulphate of magnesia, carbonates of magnesia, lime, and iron. They are used as chalybeates.

BARBERRY, Oxycantha Galeni—b. American, see Oxycantha Galeni.

BARBIERS. A variety of paralysis chiefly prevalent in India, and by many considered to be the same as Beriberi (q. v.) Beriberi is commonly an acute disease. Barbiers is generally chronic.

BARBITIUM, Beard.

BARBOTINE, Artemisia Santonica.

BARBULA CAPRINA, Spiræa ulmaria.

BARDADIA, Pound.

BARDANA, Arctium lappa—b. Minor, Xanthium.

BARDANE PETITE, Xanthium.

BARÉGES, MINERAL WATERS OF. Barèges is a village in the department of Hautes Pyrénées, near which are several springs. They are sulphureous and thermal, the heat varying from 85° to 112° Fahrenheit. They contain chlorides of magnesium and sodium, sulphates of magnesia and lime, carbonate of lime, sulphur, &c. These springs have long enjoyed a high reputation, and are daily advised in cutaneous and scrofulous affections, &c.

Factitious Barèges Water, *Aqua Baregi nen'sis*, (F.) *Eau de Barèges*, is made by adding, *hydrosulphuretted water*, f. ℥iv, to *pure water*, f. ℥xvijss, *carbonate of soda*, gr. xvj, *chloride of sodium*, gr. ss. Bottle closely.

BARGADA, Convolvulus pes capriæ.

BARIGLIA, Soda.

BARII CHLORIDUM, Baryta, muriate of—b. Iodidum, Baryta, hydriodate of.

BARILLA, Soda—b. Alicant, Soda—b. Carthagena, Soda—b. Turkey, Soda.

BARILLOR, Soda.

BARIUM, CHLORIDE OF, Baryta, muriate of—b. iodide of, Baryta, hydriodate of—b. protoxide of, Baryta.

BARK, Cinchona—b. bitter, Pinckneya pubens—b. Calisaya, Cinchona cordifolia cortex—b. Caribæan, Cinchonæ Caribææ cortex—b. Carthagena, see Cinchona—b. Crown, Cinchonæ lancifoliæ cortex—b. Elk, Magnolia glauca—b. Essential salt of, see Cinchona—b. Florida, Pinckneya pubens—b. Georgia, Pinckneya pubens—b. Gray, see Cinchona—b. Huanuco, see Cinchona—b. Indian, Magnolia glauca—b. Jesuit's, Cinchona—b. Loxa, Cinchonæ lancifoliæ cortex—b. Pale, Cinchonæ lancifoliæ cortex—b. Maracaybo, see Cinchona—b. Peruvian, Cinchona—b. Pitaya, Cinchonæ Caribææ cortex—b. Red, Cinchonæ oblongifoliæ cortex—b. Saint Lucia, Cinchonæ Caribææ cortex—b. Santa Martha, see Cinchona—b. Silver, see Cinchona—b. Yellow, Cinchonæ cordifoliæ cortex.

BARLERIA BUXIFOLIA, Cara schulli.

BARLEY, PEARL, see Hordeum—b. Scotch, Hordeum.

BARM, Yest.

BARNET, MINERAL WATERS OF. Barnet is not far from London. The water is of a purging quality, like that of Epsom, and about half the strength.

BAROMACROM'ETER; from βαρος, 'weight,' μακρος, 'long,' and μετρον, 'measure.' An instrument, invented by Stein to indicate the length and weight of a new-born infant.

BAROM'ETER, from βαρος, 'weight,' and μετρον, 'measure.' (F.) *Baromètre.* An instrument which measures the weight of the air. A certain degree of density in this medium is necessary for health: when we ascend high mountains great inconvenience is experienced, owing to the diminished density. Changes of this character are indicated by the Barometer or weather-glass.

BA'ROS, βαρος, 'heaviness.' Employed by the Greek physicians to designate the feeling of lassitude and heaviness observable in many diseases.—Hippocrates, Galen.

BAROSMA CRENATA, Diosma crenata.

BAROTES SALITUS, Baryta, muriate of.

BARRAS. See Pinus Sylvestris.

BARRE (F.) *Bar'rure, Vara,* 'a bar.' A projection or prolongation of the symphysis pubis;—a deformity rendering delivery difficult.

BARRÉE (F.) A term applied, in France, to a female whose pelvis has the deformity described under Barre.

BARRÉES, (DENTS.) The molar teeth, when the roots are spread or tortuous, so that they cannot be extracted without being broken; or without a portion of the alveolar arch being removed.

BARRE, MINERAL WATERS OF. Barre is a small town, six leagues from Strasburg. The waters are thermal, and contain much iron, calcareous salt, &c. They are diuretic and tonic.

BARREL OF THE EAR, Tympanum.

BARRENNESS, Sterilitas.

BARROS, Terra Portugallica.

BARRURE, Barre.

BARYCOCCALON, Datura stramonium.

BARYCOITA, Baryecoia.

BARYECOIA, Deafness.

BARYECOI'A or BARYCOI'TA, *Bradyecoi'a, Paracu'sia obtu'sa, Disecoi'a, Dysecæ'a, Audi'tus diffic''ilis, Obaudi''tio, A. gravis, A. imminu'tus, Hypocopho'sis,* (F.) *Dureté d'Oreille,* from βαρυς, 'heavy,' and ακοη, 'hearing.' Hardness of hearing, incomplete deafness. See Cophosis.

BARYGLOSSIA, Balbuties.

BARYI HYDRAS IODATI, Baryta, hydriodate of.

BARYOD'YNĒ, from βαρυς, 'heavy,' and οδυνη, 'pain.' A dull, heavy pain.

BARYPHO'NIA, from βαρυς, 'heavy,' and φωνη, 'voice.' Difficulty of speech.

BARYPICRON, Artemisia abrotanum.

BARY'TA, from βαρυς, 'heavy,' *Terra pondero'sa, Baryʃtes, Protox'ide of Ba'rium, Heavy Earth, Ponderous Earth,* (F.) *Baryte, Barite, Terre pesante.* This earth and its soluble salts are all highly corrosive poisons. It is never employed in medicine in the pure state. When externally applied, it is caustic, like potassa and soda.

BARY'TA, CAR'BONATE OF, *Baryʃtæ Car'bonas,* is only used officinally, to obtain the muriate.

BARYTA, HYDRI'ODATE OF, *Barytæ Hydriodas, Baryta Hydriod'ica, Hydras Baryi Ioda'ti,* (in the dry state,—*Iodide of Barium, Barii Iod'idum, B. Ioda'tum.*) has been given in scrofulous and similar morbid conditions. It may be administered internally in the dose of one-eighth of a grain three or four times a day, and be applied externally to scrofulous swellings, in the form of ointment, (gr. iv. to ℥j. of lard.)

BARYTA HYDRIODICA, Baryta, hydriodate of.

BARYTA, MU'RIATE OR HYDROCHLO'RATE OF, *Baryʃtæ mu'rias, Chlo'ride of Ba'rium, Ba'rii Chlo'ridum* (Ph. U. S.) *Chlo'ruret of Ba'rium, Terra pondero'sa sali'ta* seu *muria'ta, Sal muriat'icum barot'icum, Baro'tes sali'tus,* is the combination chiefly used. The Muriate of Baryta may be formed as follows: *Baryt. Carbon.,* in fragments, ℔j. *Acid. Muriat.* f. ℥xij. *Aquæ,* Oiij. Mix the acid with the water, and gradually add the Carbonate of Baryta. Toward the close of the effervescence, apply a gentle heat, and, when the action has ceased, filter the liquor, and boil it down so that crystals may form as it cools. Ph. U. S.

It is given in the form of the *Solu'tio Muria'tis Barytæ, Liquor Barii Chloridi,* (F.) *Solution de Muriate de Baryte.* (*Muriate of Baryta,* one part; *distilled water,* three parts,) and is employed in scrofulous cases, worms, and cutaneous diseases. Externally, to fungous ulcers and to specks on the cornea.

BARYTÆ CARBONAS, Baryta (Carbonate)—b. Hydriodas, Baryta, hydriodate of—b. Murias, Baryta, muriate of.

BARYUM, see Barium.

BAS-FOND, see Urinary Bladder.

BAS-LASSÉ, Stocking, laced.

BAS VENTRE, Abdomen.

BASAAL. The name of an Indian tree, the decoction of whose leaves, in water, with ginger, is used as a gargle in diseases of the fauces. The kernels of the fruit are vermifuge.

BASANASTRA'GALA, from βασανος, 'torture,' and αστραγαλος, 'the astragalus.' Pain in the ankle joint; gout in the foot.

BASANIS'MOS, from βασανιζειν, 'to explore.' 'A touch-stone.' Investigation or examination.—Hippocr., Galen.

BASE, *Basis,* from βαινω, 'I proceed,' 'I rest,' 'I support myself.' That which serves as a foundation or support. That which enters, as a principal matter, into a mixture or combination. In anatomy, it is employed in the former sense, as *Base of the Cranium, Base of a Process, &c. Base of the Heart, Basis* vel *coro'na cordis.* In the art of prescribing, *Basis* is the chief substance which enters into a compound formula.

BASIATIO, Coition.

BASIATOR, Orbicularis oris.

BASIL, BUSH, Ocymum caryophyllatum—b. Citron, Ocymum basilicum—b. Common, Ocymum basilicum—b. Small, Ocymum caryophyllatum—b. Wild, Chenopodium vulgare—b. Wild, Cunila mariana.

BASILARY *Basila'ris,* (F.) *Basilaire.* That which belongs to the base, from βασις, 'base.' This name has been given to several parts, which seem to serve as bases to others. The sacrum and sphenoid have been hence so called.

BASILARY ARTERY, *A. basila'ris, A. cervica'lis,* (F.) *Artère* ou *Tronc basilaire, A. mesocéphalique* (Ch.) The union of the two vertebral arteries. It ascends along the middle groove on the inferior surface of the tuber, and is supported, beneath, by the *Fossa basilaris.* It terminates in the posterior cerebral arteries.

BASILARY FOSSA, (F.) *Gouttière* ou *Fosse basilaire,* is the upper surface of the basilary pro-

cess,—so called because it is channeled like a *Fossa* or *Gutter*. The *Tuber annulare* rests upon it.

Basilary Process, *Proces'sus basila'ris ossis occip'itis*, *P. cuneifor'mis ossis occip'itis*, (F.) *Apophyse Basilaire*, *Prolongement sous-occipital*, *Cu'neiform Process*, is the bony projection, formed by the inferior angle of the os occipitis, which is articulated with the sphenoid.

Basilary Surface, (F.) *Surface basilaire*, is the inferior surface of the process. It is covered by the mucous membrane of the pharynx.

Basilary Vertebra. The last vertebra of the loins.

BASIL'IC, *Basil'icus*, from βασιλικος, 'royal.' This name was given, by the ancients, to parts which they conceived to play an important part in the animal economy.

Basilic Vein, *Vena Basil'ica*, *V. Cu'biti inte'rior*, (F.) *Veine Basilique*, *Veine cubitale cutanée* of Chaussier. This vein is one of those on which the operation of blood-letting is performed. It is situate at the internal part of the fold of the elbow, in front of the humeral artery, and is formed by the *anterior* and *posterior cubital veins*, and by the *median basilic*. It terminates, in the arm-pit, in the axillary vein. The ancients thought, that the basilic of the right arm had some connexion with the liver, and hence they called it *hepatic*. The vein of the left arm, for a similar reason, they called *splenic*. The *Median Basilic Vein*, (F.) *Veine médiane basilique*, is one of the branches of the preceding vein. It joins the median cephalic at an acute angle, or rather by a transverse branch, and receives some branches of the deep radial and cubital veins, and a considerable subcutaneous vein—the *common median*.

BASILIC COMMUN, Ocymum basilicum.

BASILIC SAUVAGE, GRAND, Chenopodium vulgare.

BASIL'ICON or BASIL'ICUM. 'Royal,' or of great virtue. An ointment, composed of yellow wax, black pitch, and resin, of each one part, olive oil four parts. Hence it was called *Unguen'tum Tetraphar'macum*, (τετραφαρμακα, 'four drugs.')—Celsus. Scribonius Largus.

Basilicon or Basilicum, of the Parisian Codex, is the *Onguent de Poix et de Cire*. In most Pharmacopœias, it is represented by the *Unguen'tum* or *Cera'tum Resi'næ*. It is used as a stimulating ointment. See Ceratum Resinæ, and Unguentum Resinæ Nigræ.

BASILICUM, Basilicon, Ocymum Basilicum—b. Citratum, Ocymum basilicum—b. Majus, Ocymum basilicum.

BASIO-CERATO-CHONDRO-GLOSSUS, Hyoglossus.

BA'SIO-CER'ATO-GLOSSUS, from βασις, 'base,' κερας, 'cornu,' and γλωσσα, 'tongue.' A name given to a part of the hyoglossus, which is inserted into the cornu of the os hyoides and base of the tongue.

BASIOCES'TRUM, from βασις, 'the base,' and κεστρα, 'a dart.' An instrument for opening the head of the fœtus in utero, invented by Mesler, a German.

BA'SIO-GLOS'SUS, *Hypseloglos'sus*, *Hyobasioglossus*, *Ypseloglos'sus*, from βασις, 'base,' and γλωσσα, 'the tongue.' A name formerly given to the portion of the hyoglossus which is inserted into the base of the os hyoides.—Riolan, Thomas Bartholine. See Lingual Muscle.

BASIO PHARYNGÆ'US, from βασις, 'base,' and φαρυγξ, 'the pharynx.' A name given to some fibres of the constrictor pharyngis medius.—Winslow.

BASSI-COL'ICA. Name of a medicine composed of aromatics and honey.—Scribonius Largus.

BASSIN, Pelvis—*b. Oculaire*, Scaphium oculare.

BASSINER, to foment.

BASSINET, Pelvis of the kidney, Ranunculus bulbosus.

BASSWOOD, Tilia.

BATA, Musa paradisiaca.

BATABAS, Solanum tuberosum.

BATA'TAS. The inhabitants of Peru gave this appellation to several tuberous roots, especially to the *Convolvulus Batatas*, or *Sweet Potato*. (q. v.) Our word, *Potato*, comes from this.

BATERION, Bathron.

BATH, Anglo-Saxon, baƀ, *Balneum*, *Balne'um*, *Loutron* (F.) *Bain*. Immersion, or stay, for a longer or shorter duration, of the whole or a part of the body, in some medium, as water. Act of plunging into a liquid, sand, or other substance, in which it is the custom to bathe. Also, the vessel in which the water is put for bathing. Also, a public or private establishment for bathing.

In *Pharmacy*, a vessel, placed over a fire, and filled with any substance, into which another vessel is placed, containing matters for digestion, evaporation, or distillation.

Bath, Air, Hot, see Bath, hot.

Bath, Air, Warm, see Bath, hot.

Bath, Animal, *Balneum Anima'lē*, consists in wrapping an animal, recently killed, or its skin, around the body, or some part of it.

Bath, Cold, see Bath, hot.

Bath, Cool, see Bath, hot.

Bath, Dry, is one made of ashes, salt, sand, &c. The ancients used these frequently for therapeutical purposes.

Bath, Earth, Arenatio.

Bath, Elec'tric, (F.) *Bain électrique*, consists in placing the person upon an insulated stool, communicating, by a metallic wire, with the principal conductor of the electrical machine in action. The Electric Bath produces general excitement of all the functions, and especially of the circulation and secretions.—See Electricity.

Bath, Foot, *Pedilu'vium* (F.) *Bain de Pied*, a bath for the feet.

Bath, General, (F.) *Bain Entier*, is one, in which the whole body is plunged, except the head; in contradistinction to the *partial bath*, *Merobalane'um*, *Merobal'neum*.

Bath, Half, *Semicu'pium*, (q. v.) *Excathis'ma*. (q. v.) *Incessio*, *Inces'sus*, is one adapted for half the body. One, for receiving only the hips or extremities, is also so called.

Bath, Hand, *Manulu'vium*, (F.) *Bain de Main* ou *Manuluve*, is a bath for the hands.

Bath, Head, *Capitilu'vium* (F.) *Bain de Tête* ou *Capitiluve*, a bath for the head.

Bath, Hip, *Coxælu'vium*, (F.) *Bain de Fauteuil*, *Bain de Siège*, is one in which the lower part of the trunk and upper part of the thighs are immersed.

Bath, Hot, *Balneum cal'idum*, (F.) *Bain chaud*, is a bath, the temperature of which is 98° and upwards; the Warm Bath, from 92° to

98°; the Tepid Bath, (F.) *Bain Tiède, Balneum tep'idum*, from 85° to 92°; the Temperate Bath, (F.) *Bain Tempéré*, from 75° to 85°; the Cool Bath, (F.) *Bain frais*, from 60° to 75°; the Cold Bath, *Balneum frig"idum, Frigida'rium*, (F.) *Bain froid, Bain très froid*, (of some) from 30° to 60°; and the Vapour Bath, *Balneum vapo'ris*, (F.) *Bain de Vapeur, Étuve Humide*, from 100° to 130°, and upwards. See Vaporarium. A Warm Air Bath, or Hot Air Bath, consists of air the temperature of which is raised.

Bath, Medicated, *Balneum Médica'tum*, (F.) *Bain médicinal*, is a bath, formed of decoctions or infusions of vegetable substances, or of any ingredient, introduced into the water for therapeutical purposes.

Bath, Nitro-Muriatic Acid, Scott's acid bath.

Bath, Sand, *Balneum Are'næ*, (F.) *Bain de Sable*, consists of a vessel filled with sand, and placed over the fire. Into this vessel, the one is put, which contains the substance to be evaporated.

Bath, Sea Water, *Balneum Mar'iæ*, (F.) *Bain Marie*, consists of a vessel filled with boiling sea water, or salt water, in which the vessel is placed, that contains the substance to be evaporated. *Bain Marie*, is, however, at the present day employed for any form of water bath.

Bath, Shower, *Implu'vium*, is one in which the water is made to fall like a shower on the body. See Douche.

Bath, Steam, may be formed by introducing steam into a properly closed vessel in place of water, as in the water bath.

Bath, Temperate, see Bath, hot.

Bath, Tepid, see Bath, hot.

Bath, Vapour, see Bath, hot, and Vaporarium.

Bath, Warm, see Bath hot.

Bathing is much employed in the treatment of disease. The cold bath, especially the cold sea bath, is a sedative and indirect tonic: the warm bath is a relaxant; and the hot bath stimulates.

The regular use of the bath is extremely conducive to health; but if too much indulged in, it is apt to produce injurious effects.

BATH, MINERAL WATERS OF, *Aquæ Batho'niæ* vel *Bad'izæ, Aquæ Solis, Aquæ Bad'iguæ*. Celebrated thermal springs at Bath, in England. They contain but little impregnation, and are chiefly indebted to their temperature, from 112° to 117° Fahrenheit, for their utility. The main ingredients are sulphate of lime, chloride of sodium, sulphate of soda, carbonate of lime, protoxide of iron, free carbonic acid and azote.

These waters are employed in the most heterogeneous cases; and are serviceable where the simple thermal springs are indicated, as in rheumatism, paralysis, &c.

BA'THER, Same etymon; *Balnea'rius, Balinea'tor, Balnea'tor*. (F.) *Baigneur*. One who bathes. Anciently, the name was given to those that administered baths to the diseased,—the *Étuvistes* of the French.

BATHMIS, *Bathma*, 'base, support.' The cavity of a bone, which receives the eminence of another; and especially the two *Fossettes* at the inferior extremity of the humerus; into which the processes of the ulna are received, during the flexion and extension of the forearm.

BATHRON, *Scamnum Hippoc'ratis* (q. v.) *Bate'rion*, 'a step, a ladder.' (F.) *Banc d' Hippocrate*. An instrument, used for the extension of a limb, in cases of fracture or luxation. The description of it is found in Galen, Oribasius, and Scultetus, with a figure.

BATIA, Retort.

BATISSE, MINERAL WATERS OF. Batisse is three leagues from Clermont in France. The water is tepid, and contains subcarbonate and sulphate of soda, sulphates of lime and iron, muriate of magnesia, and carbonate of lime.

BATOS, Rubus Idæus.

BATRACHOS, Ranula.

BATTARISMUS. Balbuties.

BATTATA VIRGINIANA, Solanum tuberosum.

BATTEMENS DOUBLES, see *Bruit du Cœur fœtal*.

BATTEMENT, Pulsation.

BAUDRICOURT, MINERAL WATERS OF. Baudricourt is a town of France, two leagues and a half from Mirecourt. The waters are sulphureous.

BAUDRUCHES, Condom.

BAUHIN, VALVE OF, *Valve of* Tulpius, Fallopius or Varolius, *Ileo-cæcal Valve, Ileocolic Valve, Val'vula Ilei, Val'vula Coli, V. Cæci, Oper'culum Ilei, Sphincter Ilei*. This name is given to the valve situate transversely at the place where the ileum opens into the cœcum, and which Bauhin says he discovered at Paris, in 1759. It had, however, been previously described by several anatomists; as by Vidus Vidius, Postius, &c.

BAUME, Balsam—*b. d'Acier*, Balsam, chalybeate—*b. Aromatique*, Balsam, aromatic—*b. d'Aiguilles*, Balsam, chalybeate—*b. Apoplectique*, Balsam, apoplectic—*b. d'Arcæus*, Arcæus, balsam of—see, also, Balsam of Arcæus—*b. d'Arcéus*, Unguentum elemi compositum—*b. Benjoin*, Benjamin—*b. Blanc*, see Amyrus Opobalsamum—*b. du Brésil*, Copaiba—*b. de Canada*, see Pinus balsamea—*b. de Cannelle*, Laurus cinnamomum—*b. de Carpathie*, Balsam of Carpathia—*b. de Carthagène*, see Toluifera balsamum—*b. de Constantinople blanc*, see Amyris opobalsamum—*b. de Copahu*, Copaiba—*b. Cordiale de Sennerte*, Balsam, cordial, of Sennertus—*b. d'Eau à feuilles ridées*, Mentha crispa—*b. de Feuillet*, Balsam, green, of Metz—*b. de Fioraventi spiritueuse*, Balsam, spirituous, of Fioraventi—*b. de Fourcroy* ou *de Laborde*, Balsam of Fourcroy or Laborde—*b. de Galaad*, see Amyris opobalsamum—*b. de Geneviève*, Balsam of Geneviève—*b. Grand*, Tanacetum balsamita—*b. du Grand Caire*, see Amyris opobalsamum—*b. Hypnotique*, Balsam, hypnotic—*b. Hystérique*, Balsam, hysteric—*b. des Jardins*, Mentha viridis—*b. de Lucatel*, Balsam, Lucatelli's—*b. Nervin*, Balsam, nervous—*b. de Perou*, see Myroxylon Peruiferum—*b. du Samaritain*, Balsam of the Samaritan—*b. Saxon*, Balsam, Saxon—*b. de Soufre*, Balsam of sulfur—*b. de Sympathie*, Balsam of sympathy—*b. Tranquille*, Balsam, tranquil—*b. de Tolu*, see Toluifera balsamum—*b. de Vanille*, Vanilla—*b. Vert*, see Fagara octandra—*b. Vert de Metz*, Balsam, green, of Metz—*b. de Vie d'Hoffmann*, Balsam of Life, of Hoffmann—*b. de Vie de Lelièvre*, Tinctura aloes composita—*b. Vrai*, see Amyris opobalsamum—*b. Vulnéraire de Minderer*, Balsam, vulnerary, of Mindererus.

BAURAC, (*Arab.*) Nitre, or salt in general. From this word comes Borax.

BAURIN, MINERAL WATERS OF. Baurin is a village four leagues from Roye, department of Somme. The waters are strongly chalybeate.

BAVE (F.) *Sali'va ex ore fluens, Spuma, Humor Sali'vus.* Frothy, thick, viscid saliva, issuing from the mouth. This *driveling*, or, *slavering*, (q. v.) we see in children, old people, &c. The term is, also, applied to the frothy liquid, which flows from the mouth of rabid animals. Sauvages uses it synonymously with salivation.

BAY, CASTOR, Magnolia glauca—b. Rose, Rhododendron chrysanthemum—b. Sweet, Laurus—b. White, Magnolia glauca and M. macrophylla.

BDALSIS, Sucking.

BDELLA, Hirudo.

BDELLIUM, βδελλιον; *Myrrha imperfec'ta, Bolchon, Madeleon, Balchus.* A gum-resin, brought from the Levant and India, and supposed to be obtained from a species of *Amyris*, little known. It is solid, brittle, of a deep brown colour, of an acrid and bitter taste, and sweet odour. It was much vaunted by the ancients, but is now little employed. Two different gum-resins have been in the shops distinguished by the names *Indian* and *African bdellium*. Dr. Royle was informed that the former was obtained from *Am'yris commiph'ora*, growing in India and Madagascar. The latter is said to be from *Heudelo'tia Africa'na*, which grows in Senegal.

BDELLOM'ETER, from βδελλα, 'a leech,' and μετρον, 'measure.' An instrument, proposed as a substitute for the leech; inasmuch as we can tell the quantity of blood obtained by it, whilst we cannot by the leech. It consists of a cupping-glass, to which a scarificator and exhausting syringe are attached.

BDELLUS, Fart.

BEAD TREE, Melia Azedarach.

BEAN TREE, WHITE, Cratægus aria.

BEAN, CARTHAGENA, Habilla de Carthagena—b. Egyptian, Nymphæa nelumbo—b. French, Phaseolus vulgaris—b. Garden, common, Vicia faba—b. Kidney, Phaseolus vulgaris—b. Malacca, Avicennia tomentosa—b. Pontic, Nymphæa nelumbo—b. Red, Abrus precatorius—b. Sacred, Nelumbium luteum—b. St. Ignatius's, Ignatia amara—b. Trefoil tree, see Cytisine.

BEARBERRY, Arbutus uva ursi.

BEAR'S BREECH, Acanthus mollis—b. Foot, Helleborus fœtidus—b. Fright, Heptallon graveolens—b. Whortleberry, Arbutus uva ursi.

BEARD, *Barba, Pogon, Geneion, Barbitium*, (F.) *Barbe.* The hair which covers a part of the cheeks, the lips, and chin of the male sex, at the age of puberty.

BEARWEED, Veratrum viride.

BEASTINGS, Colostrum.

BEATING OF THE HEART. See Heart.

BEAUGENCY, MINERAL WATERS OF. Beaugency is a quarter of a league from Orleans. The waters contain subcarbonate of soda, iron, magnesia, and lime. They are tonic and aperient.

BEAUMONT ROOT, Gillenia trifoliata.

BEAUVAIS, MINERAL WATERS OF. These waters are chalybeate. Beauvais is in *Picardie.*

BEAVER, Castor fiber—b. Wood, Magnolia glauca—b. Tree, Magnolia macrophylla.

BEBEERINE. See Bebeeru.

BEBEERU. A tree of British Guiana, which yields two alkalies—*Bebeerin* and *Sisseerin;* and in its properties resembles the Cinchona. The *Sulphate of Bebeerin* has been employed in intermittents.

BEC (F.) *Rostrum*, (q. v.) *Beak.* This name has been applied to various parts.

BEC CORACOIDIEN, (F.) *Cor'acoid Beak*, is the end of the coracoid process. *Bec de la plume à écrire*, (F.) *Beak of the Calamus Scripto'rius*, is a small cavity at the superior part of the medulla oblongata, which forms part of the 4th ventricle.

BEC DE CUILLER, Ham'ulus. An instrument used for the extraction of balls. It consists of an iron rod, 7 or 8 inches long, having at one extremity a small cavity, into which the ball is received to be drawn outwards. See Cochleariformis.

BEC DE GRUE MUSQUÉ, Geranium Moschatum—*b. de Grue Robertin*, Geranium Robertianum—*b. de Lièvre*, Harelip.

BEC (LE,) MINERAL WATERS OF. Bec is six leagues from Rouen in Normandy. The water is strongly chalybeate.

BECCABUNGA, Veronica Beccabunga.

BE'CHIC, *Be'chica, Becha, Bec'chica, Be'chita*, from βηξ, 'cough,' (F.) *Béchique.* Medicines adapted for allaying cough.

BECHITA, Bechic.

BECHIUM. Tussilago.

BECHORTHOPNŒA, Pertussis.

BECUIBA, Ibicuiba.

BEDEGAR, BEDEGUAR, or BEDEGUARD, *Spon'gia Cynos'bati, Fungus Rosa'rum, F. Cynos'bati.* (F.) *Pomme mousseuse, Éponge d'eglantier.* An excrescence, which makes its appearance on different species of wild roses, and which is produced by the puncture of a small insect,—the *Cynips Rosæ.* It was formerly employed as a lithontriptic and vermifuge, but is not now used. It was slightly astringent.

BEDFORD, MINERAL WATERS OF. Bedford is a village, situate on the great Western Turnpike road from Philadelphia to Pittsburg, a few miles east of the chief elevation of the Alleghany mountains. There are various springs, saline, chalybeate, and sulphureous. The most celebrated contains carbonic acid, sulphate of magnesia, chlorides of sodium and calcium, and carbonate of iron.

BEDSTRAW, Galium verum—b. Ladies, greater, Galium mollugo, Galium verum.

BEE. Sax. beo. *Apis, Melis'sa, Melitta.* (F.) *Abeille.* This insect was formerly exhibited, when dried and powdered, as a diuretic.

BEEBREAD, Propolis.

BEECH, Fagus sylvatica—b. Drop, Orobanche Virginiana—b. Albany, Pterospora Andromedea—b. Mast, see Fagus sylvatica.

BEER, Cerevisia.

BEET, Beta.

BÉGAIEMENT, Balbuties.

BEGMA, βηγμα, according to some *Bregma*, βρηγμα, from βησσειν or βρησσειν, 'to expectorate after coughing.' The sputum or expectorated matter.—Hipp.

BEGO'NIA. The *Begonia grandiflora* and *B. tomentosa* have astringent roots, which are used in Peru in cases of hemorrhage, scurvy, low fevers, &c.

BÈGUE, Balbus.

BEHEN ABIAD, Centaurea behen—b. Album, Centaurea behen—b. Officinarum, Cucubalus behen—*b. Rouge*, Statice limonium.

BEHMEN AGKMAR, Statice limonium.

BEIAHALALEN, Sempervivum tectorum.

BEIDELSAR, Asclepias procera.

BEJUIO, Habilla de Carthagena.

BELA-AYE or BE-LAHE. A tonic and astringent bark of a Madagascar tree. Du-petit-Thouars and Sonnerat think it may be substituted for the Simarouba.

BE-LAHE, Bela-aye.

BEL'S EYE, Belloculus.

BELADAMBOC. A species of convolvulus of the Malabar coast, which contains an acrid milky juice. From this a liniment is formed with oil and ginger, which is used against the bites of rabid animals.

BELA-MODAGAM. A kind of *Scævola* of the Malabar coast, the leaves of which are considered diuretic and emmenagogue.

BELANDRE, (F.) A litter, surrounded with curtains, in which patients are sometimes carried to hospitals.

BELCHING, Eructation.

BELEMNOID, Belenoid.

BELEMNOIDES PROCESSUS, Styloid processes.

BEL'ENOID, BEL'ONOID, BEL'EMNOID or BELOID, *Belenoi'des* or *Belemnoi'des Proces'sus*, from βελος, 'an arrow,' and ειδος, 'shape.' This name has been given to the styloid processes in general.

BELESON, Balsam, Mussænda frondosa.

BELI OCULUS, Belloculus.

BELILLA, Mussænda frondosa.

BELINUM, Apium graveolens.

BELL, CANTERBURY, Campanula trachelium.

BELLADON'NA, in the Pharmacopœia of the United States, is the officinal name of the leaves of Atropa Belladonna, (q. v.)

BELLE DAME, Atropa belladonna.

BELLEGU, Myrobolanus.

BELLEREGI, Myrobalanus.

BELLESME, MINERAL WATERS OF. Bellesme is about three leagues from Montagne in France. The waters are chalybeate.

BELLEY, MINERAL WATERS OF. The waters at Belley, department of Ain, in France, are saline aperients.

BELLIDOIDES, Chrysanthemum leucanthemum.

BELLIS, *Bellus* ('pretty,') *B. peren'nis*, *B. minor*, *Bruisewort*, *Common Daisy*. (F.) *Paquerette vivace*, *petite Marguerite*. The leaves and flowers are rather acrid. They were, at one time, considered to cure different species of wounds. It is called also *Sym'phytum min'imum*.

BELLIS MAJOR, Chrysanthemum leucanthemum.

BELL METAL, *Cal'cocos*. (F.) *Airain*, *Métal des cloches*. An alloy of copper, zinc, tin, and a small quantity of antimony, used for making bells. The mortars of the apothecary are often formed of this material. They require to be kept clean, to avoid the formation of verdigris.

BELLOC'ULUS, *Beli Oc'ulus*. A kind of gem, which the Assyrians considered efficacious in the cure of many diseases. They imagined that the figure of an eye could be seen in it, and hence its name, *Bel's Eye*.

BELLON, Colic, metallic.

BELLOTAS. See Ilex major.

BELLOWS' SOUND, *Bruit de soufflet*—b. Encephalic, see *Bruit de soufflet*—b. Placental, *Bruit placentaire*.

BELLUS, Bellis.

BELLY-ACHE, Colica—b. Dry, Colic, metallic—b. Root, Angelica lucida.

BELMUSCHUS, Hibiscus abelmoschus.

BELNILEG, Myrobalanus.

BELOID, Belenoid.

BELOIDES PROCESSUS, Styloid processes.

BELONE, Needle.

BELONODES, Styloid.

BELONOID, Belenoid.

BELUL'CUM, from βελος, 'a dart,' and ελκω, 'I draw out.' An instrument used for extracting darts or arrows. Many instruments of this kind have been noticed by surgeons.—Ambrose Paré, Fabricius ab Acquapendente.

BELZOE, Benjamin.

BELZOIM, Benjamin.

BELZOINUM, Benjamin.

BEN, Guilandina moringa—b. of Judæa, Benjamin—b. Nut, Guilandina moringa.

BEN MOENJA. A Malabar tree. An alexipharmic decoction is made of its roots, in the country, which is much praised in cases of malignant fever. Its bark, boiled with *Calamus aromaticus* and salt, forms a decoction used in bites of poisonous serpents.

BENATH, Pustule.

BENEDICTUM LAXATIVUM, Confectio sennæ.

BÉNÉFICE DE LA NATURE, Beneficium naturæ—*b. de Ventre*, see Beneficium naturæ.

BENEFIC'IUM NATU'RÆ, (F.) *Bénéfice de la nature*. This term is used, by the French pathologists, for cases, in which diseases have got well without medical treatment. With them, *Bénéfice de nature*, or *B. de ventre*, is synonymous also with *Alvi Profluvium*;—a spontaneous diarrhœa, often acting favourably either in the prevention or cure of disease.

BENEL, Croton racemosum.

BENEOLEN'TIA, from *bene*, 'well,' and *olere*, 'to smell.' *Euo'des*. Sweet-scented medicines, as gums, &c.

BENG, Bangue.

BENGAL ROOT, Cassumuniar.

BENGALE INDORUM, Cassumuniar.

BENGI, Hyoscyamus.

BENIGN', *Benig'nus*, *Eueth'es*, (F.) *Bénin*, *Bénigne*. Diseases of a mild character are so called: as well as medicines, whose action is not violent, as a *Benign Fever*, *Febris benig'na impu'tris*, &c.

BÉNIN, Benign.

BEN'JAMIN or BEN'ZOIN, *Benzo'inum*, (Ph. U. S.) *Benzo'inum verum*, *Benzo'inum*, *Assa odora'ta*, *Benjui*, *Benjuin*, *Assa dulcis*, *Ben'jaoy*, *Benjo'inum*, *Belzoë*, *Belzoim*, *Benzoë*, *Sty'racis Benzo'ini Bal'samum*, *Liquor Cyreni'acus*, *Croton Benzoe*, *Ben of Judæ'a*, *Acor Benzo'inus*, *Sal Ac''idum* seu *essentia'lē* seu *volat'ilē Benzoes*. (F.) *Benjoin*, *Baume Benjoin*, *Assa doux*. A resinous, dry, brittle substance, obtained from

Styrax Benzoin, *Arbor Benivi*, of Sumatra. The odour is extremely fragrant, and taste slightly aromatic. It is principally used for the preparation of the acid which it contains. It is also employed in some vulnerary tinctures, and as an expectorant. Benzoic Acid, *Ac''idum Benzo'icum*, is obtained from it by sublimation. The purest Benjamin is in *amygdaloid masses*: hence called (F.) *Benjoin amygdaloïde*.

Ben'jamin, Flowers of, or Benzo'ic Acid, *Ac''idum Benzo'icum*, *Flores Benzoes*, *Flores Benzo'ini*, *Ac''idum Benzo'icum per sublimatio'nem*. (F.) *Acide Benzoique*. This acid exists in all the balsams, but chiefly in Benzoin, from which it is obtained by sublimation. It is in the vanilla, canella, the urine of infants, and of herbivorous animals. Its odour is aromatic and fragrant; taste hot, slightly acidulous, and agreeable. The crystals consist of white, satiny flakes, slightly ductile. It is probably stimulant; and has been used, as such, in chronic catarrh; but it has little efficacy.

BENJAOY, Benjamin.

BENJOINUM, Benjamin.

BENJUI, Benjamin.

BENNE, Sesamum orientale.

BENNET, HERB, Geum urbanum and G. Virginianum.

BÉNOITE, Geum urbanum—*b. Aquatique*, Geum rivale—*b. des Ruisseaux*, Geum rivale—*b. de Virginie*, Geum Virginianum.

BENZOE, Benjamin.

BENZOENIL, Vanilla.

BENZOIN, Benjamin—b. Odoriferum, Laurus Benzoin.

BERBERIS, Oxycantha Galeni—b. Canadensis, see Oxycantha Galeni.

BERCE, Heracleum spondylium.

BERENDAROS, Ocymum basilicum.

BERENICE Succinum.

BERENICIUM, Potassæ nitras.

BERENISECUM, Artemisia vulgaris.

BERGAMOTE, *Bergamot'ta*, (F.) *Bergamotte*. A small orange, of a very agreeable taste; and peculiar odour. From its bark an oil, *Oleum Berga'mii*, (Ph. U. S.) is obtained, which is much employed as a perfume, and sometimes in medicine.

BERIBERI, *Beribe'ria*, *Syn'clonus Beribe'ria*, *Paral'ysis Ber'iberi*, from *beri* in the Singhalese language, which signifies 'weakness;' therefore, *beriberi*, 'great weakness.' This word is also said to be Hindusthanee, and to mean a *sheep*.—Bontius. Beriberi is an Indian disease, little known in Europe. It consists in debility and tremors of the limbs,—sometimes, indeed, of the whole body; with painful numbness of the affected parts, &c.:—the patient walking doubled; and imitating the movements of sheep! Some authors have esteemed it rheumatic; others, paralytic; others, to be a kind of chorea. It is, almost always, incurable, but rarely fatal; and is treated by exercise, stimulant frictions, sudorifics, &c. It is sometimes called *Bar'biers*, but this would seem to be a different disease.

BERICOCCE. Prunus armeniaca.

BERLE NODIFLORE, Sium.

BERLUE, Metamorphopsia.

BERMU'DAS, CLIMATE OF. Pulmonary invalids are occasionally sent to Bermuda, but the principal objection to a winter residence there, is the prevalence of strong winds; especially of the dry, sharp, and cold north-west winds, during the winter and spring. Still, it affords a good winter retreat for the phthisical, from any part of the United States, provided due care be selected in choosing a suitable locality. The neighbourhood of Hamilton has been strongly recommended with this view.

BERNARD THE HERMIT, Cancellus.

BERRIES, INDIAN, see Menispermum cocculus—b. Turkey, yellow, see Piper cubeba.

BERS. A sort of electuary, composed of pepper, seed of the white hyoscyamus, opium, euphorbium, saffron, &c. The Egyptians used it as an excitant.—Prospero Alpini.

BERU, MINERAL WATERS OF. Beru is in Champagne, France. The waters are slightly chalybeate.

BÈSASA, Ruta.

BESICLES, Spectacles.

BESOIN, Want—*b. de Respirer*, see Want—*b. de la Vie*, Necessary of life.

BESSANEM. A word used by Avicenna, for redness of the skin, limbs, and face, produced by the action of cold.

BESSON, *BESSONNE*, } See Gemellus.

BETA. The *Beet*, *Sic'ula*, (F.) *Bette*, *Betterave*. *Family*, Chenopodeæ. *Sex. Syst.* Pentandria Digynia. A genus of plants, of which the following are the chief varieties.

Beta Hy'brida, *Root of Scarcity*. Root red, outside; white, within. Very nutritive; yields sugar.

Beta Vulga'ris Alba, *White Beet*. The root yields sugar, and the leaves are eaten as a substitute for spinach.

Beta Vulga'ris Rubra, *Red Beet*. Root red and nutritive; yields a small quantity of sugar.

BETEL, *Piper Betel*. A species of pepper, cultivated in several parts of India. The Indians are in the habit of chewing the leaves with lime and areca; and they give the name *Betel* to this preparation. It is used in all the equatorial countries of Asia. Betel is said to be tonic and astringent. It is also called *Bette*, *Bètre*, *Betle*. See Areca.

BETHROOT, Trillium latifolium—b. broad-leaf, Trillium latifolium.

BÉTISE, Dementia.

BÉTOINE, Betonica officinalis—*b. des Montagnes*. Arnica montana.

BÉTON, Colostrum.

BETONICA AQUATICA, Scrophularia aquatica.

Beton'ica Officina'lis, *Cestron*, *Beton'ica purpu'rea*, *Veton'ica Cordi*, &c., *Bet'ony*, *Wood Betony*, *Psychot'rophum*, *Veroni'ca purpu'rea*, (F.) *Bétoine*, *Family*, Labiatæ. *Sex. Syst.* Didynamia Gymnospermia. Betony was in much esteem amongst the ancients, who employed the flowers and leaves, in decoction, in gout, sciatica, cephalalgia, &c. It was so called, according to Pliny, from being in great repute among the Vettones, or Bettones, an ancient people of Spain. Antonius Musa is said to have written a volume in praise of it; recommending it in no less than 47 different diseases. It has, however, little or no virtue. The leaves are said to be aperient, and the root emetic.

Betonica Pauli, Veronica.

BETONY, Betonica officinalis—b. Paul's, Lycopus Virginicus—b. Water, Scrophularia aquatica—b. Wood, Betonica officinalis.

BÈTRE, Betel.

BETTE, Beta.

BETTERAVE, Beta.

BET'ULA ALBA. The *Birch*, (F.) *Bouleau commun*. The young leaves are slightly odorous, astringent, and bitter. They are applied to wounds and ulcers. They have been regarded as antiscorbutic and anthelmintic. The tree furnishes a saccharine juice, which is considered antiscorbutic and diuretic.

Betula Lenta, *Sweet Birch*, *Black Birch*, *Cherry Birch*, *Mountain Mahogany*, is an American species, the bark and leaves of which have the smell and taste of Gaultheria procumbens. An infusion is sometimes made of them, and used as an excitant and diaphoretic. The volatile oil is nearly if not wholly identical with that of Gaultheria.

BEURRE, Butter—*b. de Bambouc*, Butter of bambouc—*b. de Cacao*, Butter of cacao—*b. de Coco*, Butter of cocoa.

BEUVRIGNY, MINERAL WATERS OF. Beuvrigny is in the vicinity of Bayeux in Normandy. The water is chalybeate.

BÉVUE, Diplopia.

BEX, Tussis—b. Convulsiva, Pertussis—b Humida, Expectoration—b. Theriodes, Pertussis.

BEXIS, Tussis.

BEXU'GO. Under this name, a purgative root was formerly introduced into Europe, from Peru. It is supposed to have been the root of a Hippocratea.

BEZ'OAR, BEZ'AAR, BEZ'EHARD, PA'ZAHAR, from Persian *Pa*, 'against,' and *zahar*, 'poison.' *Lapis Bezoar'dicus*, *Cal'culus Bez'oar*, *Enterol'ithus Bezoar'dus*, *Bezoard*. A calculous concretion, found in the stomach, intestines, and bladder of animals. Wonderful virtues were formerly attributed to these Bezoars. There were two great varieties: the *Bez'oar orienta'lē*, *An'imal Bezoar'ticum orienta'lē*, formed in the fourth stomach of the gazelle of India (*Gazella Indica*, or rather *Antilope cervicapra*:) and the *Bez'oar occidenta'lē*, *Animal Bezoar'ticum occidenta'lē*, found in the fourth stomach of the *wild goat* or *chamois* of Peru. These substances were esteemed to be powerful alexipharmics; but the former was the more valued. It was believed, that no poison, and no eruptive, pestilential, or putrid disease could resist its influence. As so many virtues were ascribed to it, other animal concretions were substituted for it; and factitious Bezoards were made of crab's eyes and claws, bruised and mixed with musk, ambergris, &c.

Bez'oar Bovi'num, (F.) *Bézoard de Bœuf*, *Bezoard of the beef*. A concretion formed in the fourth stomach of beeves: also, a biliary calculus found in the gall-bladder.

Bez'oard of Cayman. This was once much prized. It is now unknown.

BÉZOARD d'ALLEMAGNE, Ægagrophila.

Bez'oard of the Chamois, Horse, &c., exhibits its origin in the name.

Bez'oard of the Indian Por'cupine, Bez'oar Hys'tricis, Lapis Porci'nus, Lapis Malucen'sis, *Petro del Porco*, (F.) *Bézoard de Porc Épic*, was formerly the dearest of all the Bezoards, and was sold at an enormous price in Spain and Portugal.

Bez'oard Mineral, Antimonium diaphoreticum—b. Vegetable, see Calappite.

BEZOAR'DIC, *Bezoar'dicus*, (F.) *Bézoardique*; concerning the bezoard. Bezoardic medicines are those supposed to posses the same properties with the bezoard; as antidotes, alexiteria, alexipharmics, cordials.

BEZOARDICA RADIX, Dorstenia contrayerva.

BEZOAR'DICUM SATUR'NI. A pharmaceutical preparation, regarded by the ancients as antihysteric. It was formed of protoxide of lead, butter of antimony, and nitric acid.

Bezoar'dicum Huma'num. Urinary calculi were formerly employed under this name as powerful alexipharmics.

Bezoar'dicum Jovia'lē. A sort of greenish powder, used as a diaphoretic, and formed of antimony, tin, mercury, and nitric acid.

Bezoar'dicum Luna'rē. A medicine formerly regarded as a specific in epilepsy, convulsions, megrim, &c. It was prepared of nitrate of silver, and butter of antimony.

Bezoar'dicum Martia'lē. A tonic medicine, used by the ancients in diarrhœa. It was prepared from the tritoxide of iron and butter of antimony.

Bezoar'dicum Mercuria'lē. A medicine, formerly vaunted as an antisyphilitic, and prepared from the mild chloride of mercury, butter of antimony, and nitric acid.

Bezoar'dicum Mine'ralē. The deutoxide of antimony; so called, because its properties were supposed to resemble those of animal bezoard.

Bezoar'dicum Sola'rē. A diaphoretic medicine, prepared of gold filings, nitric acid, and butter of antimony.

Bezoar'dicum Ven'eris. A pharmaceutical preparation, formerly employed in lepra, diseases of the brain, &c.; and which was made from filings of copper, butter of antimony, and nitric acid.

BI, as a prefix to words, has the same signification as Di.

BIAIOTHANATI, Biothanati.

BIBITORIUS, Rectus internus oculi.

BIBLIOG'RAPHY, MEDICAL, from βιβλος, 'a book,' and γραφω, 'I describe.' Skill in the knowledge of medical books. The most distinguished medical bibliographers have been: J.A. Van der Linden, Amstelod. 1662, 8vo. (L.) M. Lipenius, Francf. ad Mœn. 1679. fol. (L.) G. A. Merckelein, Norimb. 1686, (L.) J. J. Manget, Genev. 1695 to 1731, (L.) Taris (anatomical,) Paris, 1753, (F.) A. von Haller, Zurich, 1774, &c. (L.) Vigilius von Creutzenfeld (surgical,) Vindob 1781, (L.) C. G. Kuhn, Lips. 1794, (L.) C. L. Schweickard (anat., phys., and legal medicine,) Stuttgard, 1796 to 1800, (L.) G. G. Ploucquet, Tubing. 1808 to 1814, (L.) C. F. Burdach, Gotha, 1810 to 1821. (G.) J. S. Ersch, (since 1750,) Leipz. 1822, (G.) Th. Ch Fr. Enslin, (of Germany, since 1750,) Berlin, 1826, (G.) J. B. Montfalcon, Paris, 1827, (F.) J. Forbes, M. D., F. R. S., Lond. 1835. A. C. P. Callisen, Copenhagen, 1845, (G.)

BICAUDALIS, Retrahens auris.

BICAUDA'TUS, *Cauda'tus*, 'double tailed.' A monster having two tails.

BICEPHA'LIUM, *Dicepha'lium*. A hybrid word, from *bi* and κεφαλη, 'head.' Sauvages applies this epithet to a very large sarcoma on the head, which seems to form a double head.

BICEPHALUS, Dicephalus.

BICEPS, from *bis*, 'twice,' and *caput*, 'head.'

That which has two heads. This name has been particularly given to two muscles; one belonging to the arm, the other to the thigh.

Biceps Exter'nus, Mus'culus. The long portion of the *Triceps Brachia'lis*.—Douglas.

Biceps Flexor Cruris, *Biceps Cruris*, *Biceps*, (F.) *Biceps Crural*, *Biceps Fem'oris*, *Is'chio-fem'oro péronier*—(Ch.) A muscle on the posterior part of the thigh; one head arising from the tuberosity of the ischium, and the other from a great part of the linea aspera. It is inserted into the top of the fibula. It serves to bend the leg on the thigh.

Biceps Flexor Cu'biti, *Biceps Bra'chii*, *Cor'aco-radia'lis*, *Biceps*, *Biceps manûs*, *Biceps inter'nus*, *Biceps inter'nus hu'meri*, (F.) *Scap'ulo-radial* (Ch.,)—*Biceps Brachial*. A muscle, situate at the anterior and internal part of the arm; extending from the edge of the glenoid cavity and from the top of the coracoid process to the tuberosity of the radius. It bends the fore-arm upon the arm.

BICHE DE MER, *Sea Slug*. A molluscous animal belonging to the genus Holothuria, which is caught amongst the islands of the Feejee group, New Guinea, &c., and when prepared finds a ready sale in China, where it is used as an ingredient in rich soups.

BICHET. Terra Orleana.

BICHICH'LÆ Pectoral medicines, composed of liquorice juice, sugar, blanched almonds, &c.—Rhazes.

BICHIOS, Dracunculus.

BICHO, Dracunculus.

Bicho di culo, (S.) A disease about the anus, said to be endemic in Brazil. It is attributed to bad food; the use of pimento, &c.; and is treated by astringents.

BICHOS. A Portuguese name for the worms that get under the toes of people in the Indies; and which are destroyed by the oil of the cashew nut.

BICIP'ITAL, from *biceps* (*bis* and *caput*) 'two-headed.' Relating to the biceps.

Bicip'ital Groove, (F.) *Coulisse* ou *Gouttière bicipitale*, *Coulisse humérale*, (Ch.,) is a longitudinal groove, situate between the tuberosities of the os humeri, which lodges the long head of the biceps.

Bicip'ital Tu'bercle or Tuberos'ity, (F.) *Tubérosité bicipitale*;—a prominence near the upper extremity of the radius, to which the tendon of the biceps is attached.

BICORNE RUDE, Ditrachyceros.

BICUS'PID, *Bicuspida'tus*, from *bis*, 'twice,' and *cuspis*, 'a spear.' That which has two points or tubercles.

Bicus'pid Teeth, *Dentes Bicuspida'ti*, (F.) *Dents bicuspidées*, the small molares. See Molar.

BIECHO, Bische.

BIÈRE, Cerevisia.

BIESTINGS, Colustrum.

BIFEMORO-CALCANIEN, Gastrocnemii.

BIFURCA'TION, *Bifurca'tio*, from *bis*, 'twice,' and *furca*, 'a fork.' Division of a trunk into two branches; as the *bifurcation of the trachea*, *aorta*, &c.

BIGASTER, Digastricus.

BIG BLOOM, Magnolia macrophylla.

BIGGAR A disease of Bengal, remarkable for the intensity and danger of the cerebral symptoms.—Twining.

BIG-LEAF, Magnolia macrophylla.

BIGLES. See Strabismus.

BIGNONIA CATALPA, Catalpa.

Bigno'nia Is'dica. The leaves are employed in India, as emollients, to ulcers.

BIJON. See Pinus sylvestris.

BILAZAY, MINERAL WATERS OF. Bilazay is a town in France, two leagues from Thouar, department of Deux Sèvres, near which is a thermal sulphureous spring. Temperature about 77° Fahrenheit.

BILBERRY, Vaccinium myrtillus—b. Red, Vaccinium vitis idæa.

BILE, *Bilis*, *Fel*, *Chol'os*, *Cholē*, (F.) *Bile*, *Fiel*. A yellow, greenish, viscid, bitter, nauseous fluid, secreted by the liver. It is distinguished into *hepat'ic* and *cystic*; according as it flows immediately into the duodenum from the liver or from the gall-bladder. It contains, according to Muratori, water, a peculiar fatty matter, colouring matter, (*Cholepyr'rhin* or *Biliphæ'in*,) cholesterin combined with soda; picromel or *bilin*; extract of flesh, mucus; soda, phosphate of soda; phosphate of lime, and chloride of sodium.

The use of the bile is to remove from the body superfluous hydro-carbon; and it is probably inservient to useful purposes in digestion.

Bile, Furunculus.

Bile, Black, Atrabilis—*b. de Bœuf*, see Bile—*b. Repandue*, Icterus.

Bile or Gall of the Ox, *Ox Gall*, *Fel Tauri*, *Fel Bovis*, *F. Bovi'num*, (F.) *Bile de Bœuf*, was once reputed cosmetic and detergent, anti-otalgic and emmenagogue; as well as to possess the power of facilitating labour. It has also been given as a bitter stomachic and anthelmintic; and recently, as a tonic and laxative, in cases of deficiency of the biliary secretion.

Bile or Gall of the Bear, *Fel Ursi*, was thought to be antiepileptic; and that of the *Eel*, *Fel anguil'læ*, to facilitate labour.

BIL'IARY, *Bilia'ris*, *Bilia'rius*. That which relates to bile.

Bil'iary Appara'tus, *B. organs*, *B. passages*. The collection of parts that concur in the secretion and excretion of bile:—viz. the liver, pori biliarii or tubuli biliferi; hepatic, cystic, and choledoch ducts and gall-bladder.

Bil'iary Concre'tions are concretions found in some parts of the biliary apparatus.

BILIEUX, Bilious.

BILIMBI, Averrhoa bilimbi.

BILIMBING TERES, Averrhoa bilimbi.

BILIN, Picromel.

BIL'IOUS, *Bilio'sus*, *Epich'olos*, *Picroch'olos*, (F.) *Bilieux*. That which relates to bile, contains bile, or is produced by bile. An epithet given to certain constitutions and diseases, which are believed to be the effect of superabundance of the biliary secretion; as *Bilious temperament*, *B. symptoms*, *B. fever*.

BILIPHÆIN, see Bile.

BILIVERDIN, from *Bilis*, 'bile,' and *viridis*, 'green.' On adding an acid to a solution of the yellow colouring matter of bile, a precipitate of green flocculi takes place, which possesses all the properties of chlorophyll, or the green colouring matter of leaves. This is the *biliverdin* of Berzelius.

BILUMBI BITING-BING, Malus Indica.

BI'MANUS, from *bis* and *manus*, 'a hand.' One that has two hands. A term applied only

to man, because he is the sole mammiferous animal that possesses two perfect hands.

BINDWEED, Polygonum aviculare—b. Fiddle-leaved, Convolvulus panduratus—b. Great, Convolvulus sepium—b. Lavender-leaved, Convolvulus cantabrica—b. Sea, Convolvulus soldanella—b. Virginian, Convolvulus panduratus.

BINKOHUMBA, Phyllanthus urinaria.

BINOC'ULUS, *Bin'ocle*, *Diophthal'mica Fascia*, *Oculis duplex*, from *bis*, 'twice,' and *oculus*, 'an eye.' (F.) *Œil double.* A bandage applied over both eyes. It was, also, formerly called *Diophthal'mus.*

BIN'SICA. Disorder of the mind. According to Van Helmont, an atrophy of the organ of imagination.

BIOCHYMIA, Chymistry, vital.

BIODYNAM'ICS, *Biodynam'ica*, *Biodynam'icē*; from βιος, 'life,' and δυναμις, 'power,' 'force.' The doctrine of the vital activity, or forces.

BIOGAMIA, Magnetism, animal.

BIOLOGY, Physiology.

BIOLYCHNION, Animal heat.

BIOLYCH'NIUM, from βιος, 'life,' and λυχνιον, 'a lamp.' Innate heat, vital heat. Also, a secret preparation of which Beguin and Burgrave make mention.

BIOMAGNETISMUS, Magnetism, animal.

BIOPHÆNOMONELOGIA, Physiology.

BIOS, βιος. Life, (q. v.) Also, what is necessary for the preservation of life.

BIOTE, Life.

BIOTHAN'ATI, *Biaiothan'ati*, from βιος, 'life,' and θανατος, 'death.' Those who die of a violent death,—very suddenly, or as if there was no space between life and death.

BIOTICS, Physiology.

BIR, Thorax.

BIRA, Cerevisia.

BIRCH, Betula alba—b. Black, Betula lenta—b. Cherry, Betula lenta—b. Sweet, Betula lenta.

BIRTH, CROSS, Presentation, preternatural.

BIRTHWORT, Aristolochia—b. Snakeroot, Aristolochia serpentaria.

BISCHE, *Biecho.* A malignant kind of dysentery, which often prevails in the island of Trinidad.

BIS'CUIT, *Biscoc'tus*, 'twice baked.' A kind of dry, hard bread, or cake, which is variously made; and, when without eggs or butter, is easy of digestion. It was formerly called *Dipyrites*, and *Dipyros.*

BISERMAS, Salvia sclarea.

BISFERIENS, Dicrotus.

BISHOP'S WEED, Ammi.

BISLINGUA, Ruscus hypoglossum.

BISMALVA, Althæa.

BISMUTH, *Bismu'thum*, *Wismu'thum*, *Reg'ulus of Bis'muth*, *Marcasi'ta*, *Tin Glass.* (F.) *Étain gris*, *E. de Glace.* A metal, in spicular plates, of a yellowish-white colour; s. gr. 9.822. Fusible at 400° Fahrenheit, and volatilizable at a high temperature. It is used only in the preparation of the subnitrate.

Bismuth, Subni'trate of, *Marcasi'ta alba*, *Plumbum cine'reum*, *Magiste'rium Marcasi'tæ*, *Bismu'thum Nit'ricum*, *B. Subnit'ricum*, *Nitras Subbismu'thicum*, *Nitras Bismuthi*, *Calx Vismu'thi*, *Bismu'thum oxydula'tum album*, *Oxyd of Bismuth*, *Mag''istery of Bismuth*, *Pearl White*, *Spanish White*, (F.) *Sousnitrate de bismuth*, *Oxide blanc de B.*, *Blanc de fard*, *Blanc de perle.* (*Bismuth.* in frustulis, ℥j. *Acid nitric.* f. ℥iss. *Aq. destill.* q. s. Mix a fluidounce of distilled water with the nitric acid, and dissolve the bismuth in the mixture. When the solution is complete, pour the clear liquor into three pints of distilled water, and set the mixture by, that the powder may subside. Lastly, having poured off the supernatant fluid, wash the subnitrate of Bismuth with distilled water, wrap it in bibulous paper, and dry it with a gentle heat. Ph. U. S.) It is considered to be tonic and antispasmodic, and has been chiefly used in gastrodynia.

BISPIRUS, Dipnoos.

BISSUS. The silky filaments which fix the *Pinna Mari'na* to the rocks. In Italy and Corsica, clothes are made of these, which are considered to favour perspiration, and are recommended to be worn next the skin in rheumatism, gout, &c.—See Byssus.

BISTORT, OFFICINAL, Polygonum bistorta.

BISTORTA, Polygonum bistorta.

BISTORTIER, (F.) A name given, by the *Pharmacien*, to a long wooden pestle used for reducing soft substances to powder, and in the preparation of electuaries.

BISTOURI, (F.) *Pistorien'sis gla'dius*, *Scalpel'lus.* A *Bistoury.* A small cutting-knife, used in surgery,—so called, according to Huet, from the town of Pistori, which was formerly celebrated for the manufacture of those instruments. A bistoury has the form of a small knife, and is composed of a blade and handle. The blade, which is most commonly movable in the handle, may be fixed by a button, spring, &c. When fixed in the handle, the bistouri is called by the French, *B. à lame fixe* ou *dormante.*

The chief bistouries are:—1. The straight B (F.) *B. droit*, in which the blade and cutting edge are straight: the point being fine, round, or square. 2. The convex B. (F.) *B. convexe*; the blade of which is convex at the cutting edge, concave at the back. 3. The concave B. (F.) *B. concave*; the blade of which is concave at its edge, and convex at the back. 4. blunt-pointed B. (F.) *B. boutonné*; the blade of which has a button at its extremity. 5. The blunt or probe-pointed Bistouri of Pott; concave at its cutting edge, and its point blunt; so that it can be carried on the palmar surface of the index finger, to divide the stricture, in strangulated hernia. Sir Astley Cooper has recommended a useful modification of this, to avoid wounding the intestine, should it come in contact with the edge of the knife. His Bistouri has an edge of not more than eight lines in length, situate about five lines from the point. 6. Bistouri à la lime, (F.) is a straight Bistoury; the blade fixed in the handle, the extremity with a button, and the edge made with a file. It is chiefly used for dilating parts. 7. Bistouri royal, (F.) A Bistouri used in operating upon Louis XIV., for fistula in ano. 8. Bistouri gastrique, (F.) A complicated instrument, invented by Morand, for dilating wounds of the abdomen. 9. Bistouri caché. *B. herniaire*, ou *Attrappe-lourdaud de Biemaise.* A curved bistouri, the blade of which is placed in a canula, whence it issues on pressing a spring.

The word *Bistouri* is used by the French, at times, where we would employ *knife*.

BIT NOBEN, *Salt of Bit'umen, Padnoon, Soucherloon, Khala mimuc.* A white, saline substance, which is a Hindoo preparation of great antiquity, and has been supposed to be the *Sal asphalti'tes and Sal Sodome'nus* of the ancients. It is used by the Hindoo in the prevention or cure of almost all diseases.

BITHNIMAL'CA or GAS'TERANAX. Two unmeaning words, used by Dolæus, to designate an active principle supposed to have its seat in the stomach, and preside over chymification, &c.

BITTER, Amarus—b. Bark, Pinckneya pubens—b. Bloom, Chironia angularis—b. Holy, Hiera picra—b. Redberry, Cornus Florida—b. Root, Apocynum androsæmifolium, Gentiana Catesbæi, Menyanthes verna—b. Sweet nightshade, Solanum Dulcamara—b. Sweet vine, Solanum Dulcamara.

BIT'TERNESS, *Amaritu'do, Amarit'ies, Ama'ror, Pi'cria*, (F.) *Amertume.* A particular taste, which belongs to many substances. In some diseases there is a sense of bitterness felt in the mouth.

BITTERS. COLUMBO, Tinctura Calumbæ—b. Spirit, Tinctura gentianæ composita—b. Wine, Vinum gentianæ compositum.

BITTERSWEET, Solanum dulcamara.

BITTERWOOD TREE, Quassia.

BITTOS. A disease, in which the chief symptom is an acute pain in the anus.—Chomel.

BITUMEN, GLUTINOUS, Pissasphaltum—b. Judaicum, Asphaltum—b. of Judæa, Asphaltum—b. Petroleum, Petrolæum—b. Malta, Pissasphaltum—b. Salt of, Bitnoben—b. Solidum, Asphaltum.

BIVENTER, Digastricus—b. Cervicis, Complexus musculus.

BIVENTRAL LOBE OF THE CEREBELLUM, see Lobe, biventral.

BIXA ORLEANA, Terra Orleana.

BLABE, Wound.

BLACCIÆ, Rubeola.

BLACIA, Debility.

BLACKBERRY, AMERICAN. See Rubus fruticosus—b. High or standing, see Rubus fruticosus.

BLACK DRAUGHT, see Infusum Sennæ compositum.

BLACK DOSE, see Infusum Sennæ compositum.

BLACK ROOT, Aletris farinosa, Leptandria purpurea.

BLACKWATER, Pyrosis.

BLADDER, IRRITABLE, Cysterethismus.

BLADUM, *Blé.*

BLÆSITAS, Balbuties.

BLÆ'SITAS, *Blæsa lingua.* Some authors have used this word as synonymous with stammering. See Balbuties. Sauvages understands by it a defect in pronunciation, which consists in substituting soft consonants for those that are hard; as the z for s, the d for t, the s for g and j, &c. Also, Lisping, *Traulis'mus, Trau'lotes*, (F.) *Blésité, Blé (parler.)*

BLÆSOPODES, see Kyllosis.

BLÆSOPUS, see Kyllosis.

BLÆSUS. A distortion; especially the outward distortion of the legs. Also, a stammerer.

BLAFARD, (F.) *Pal'lidus, Pallid'ulus.* This epithet is sometimes given to the skin, when pale and dull; but, most frequently, to the flesh of a wound, when it has lost its colour, and become white. The word is, also, sometimes used synonymously with Albino, (q. v.)

BLANC DE BALEINE, Cetaceum—*b. de Fard*, Bismuth, subnitrate of—*b. de l'Œil*, Sclerotic—*b. d'Œuf*, Albumen ovi—*b. de Perle*, Bismuth, subnitrate of.

BLANC MANGER, (F.) *Cibus albus, Leucopha'gium, Argyrotrophe'ma.* An animal jelly, (so called on account of its colour,) combined with an emulsion of sweet almonds, to which sugar has been added, and some aromatic. It is sometimes prescribed as a nutrient in convalescence and chronic diseases.

BLANC RHAZIS or BLANC-RAISIN. An ointment composed of cerusse, white wax, and olive oil.

BLANCA, Plumbi subcarbonas.

TO BLANCH, from (F.) *blanchir*, 'to whiten, to bleach.' To deprive of the outer rind; as 'to *blanch* almonds;' i. e. to peel them.

BLANCHET, (F.) A blanket. A term given, by the French Pharmaciens, to the woollen strainer through which they filter syrup and other thick fluids. See, also, Aphthæ.

BLANCNON ORIBASII, Polypodium filix mas.

BLAS. An unmeaning term, invented by Van Helmont to designate a kind of movement in the body; at times, local, at others, under extraneous influence. Thus, he speaks of the *Blas meteoros*, or of the heavenly bodies, and the *Blas huma'num*, that which operates in man.

BLASÉ, (F.) An epithet given to one whom the abuse of enjoyment has prevented from any longer deriving satisfaction or pleasure from it.

BLASTE'MA, *Blaste'sis*, from βλαστανω, 'I bud.' A germ, (q. v.) The sense of this word, which is often used by Hippocrates, is obscure. Castelli thinks it means the eruption of some morbific principle at the surface of the body. Also, the matrix or general formative element of tissues.

BLASTODERMA, see Molecule.

BLATTA BYZAN'TIA, *Unguis odora'tus*, (F.) *Blatte de Byzance.* This name seems, formerly, to have been given to a marine production from some of the Conchylia. It had an agreeable smell, a reddish tint, and the shape of a nail. It was prescribed in epilepsy, hysteria, and hepatic obstructions. Rondelet affirms that it was the production of the shell-fish *murex* or *purpura*; and that the name *Blatta* is derived from the Greek βλαπτος, 'purple.'

BLAVELLE, Centaurea cyanus.

BLAVÉOLE, Centaurea cyanus.

BLAVEROLLE, Centaurea cyanus.

BLAZING-STAR, Liatris.

BLÉ, *Bladum.* This word answers, in France, to the word *Corn* (q. v.) in England; i. e. any kind of grain employed for making bread. Wheat being most commonly used for this purpose, *Blé* is sometimes restricted to this. *Blé méteil* is a mixture of wheat and rye.

BLÉ, CORNU, Ergot—*b. d'Espagne*, Zea mays—*b. d'Italie*, Zea Mays—*b. Noir*, Polygonum fagopyrum—*b. de Turquie*, Zea Mays.

BLÉ (PARLER.) Blæsitas.

BLEABERRY, Vaccinium myrtillus.

BLEACHING LIQUID, *Eau de javelle.*

BLEAR EYE, Lippitudo.

BLEB, Bulla.

BLECHNON, Polypodium filix mas.

BLECHNUM LIGNIFOLIUM, Asplenium

scolopendrium—b. Squamosum, Asplenium ceterach.

BLECHROPYRA. See Blechros.

BLECHROPYRUS, Typhus mitior.

BLECHROS, *βληχρος*, 'weak, feeble, slow.' An epithet, applied to different affections, and particularly to fevers. Hence *Blechropy'ra*, 'a slow fever:' *Blechrosphyg'mia*, 'a slow pulse.'

BLECHROSPHYGMIA, see Blechros.

BLED, Corn.

BLEEDING FROM THE NOSE, Epistaxis.

BLEEDING HEART, Cypripedium luteum.

BLÈME, (F.) This word has nearly the same signification as *Blafard*. Generally, however, it includes, also, emaciation of the countenance.

BLENNA, Mucus—b. Narium, Nasal mucus.

BLENNELYTRIA, from *βλεννα*, 'mucus,' and *ελυτρον*, 'a sheath.' A discharge of mucus from the vagina. Leucorrhœa. (q. v.) Alibert.

BLENNÉM'ÉSIS. *Blennoëm'esis, Vom'itus pituito'sus*, from *βλεννα*, 'mucus,' and *εμεσις*, 'vomiting.' Vomiting of mucus.

BLENNENTERIA, Dysentery.

BLENNISTH'MIA, from *βλεννα*, 'mucus,' and *ισθμος*, 'the gullet.' Increased flow of mucus from the pharynx and larynx.—Alibert.

BLENNOEMESIS, Blennemesis.

BLENNOG''ENOUS, *Blennog''enus*: from *βλεννα*, 'mucus,' and *γενεω*, 'I form.' Forming or generating mucus. Breschet and Roussel de Vauzème describe an apparatus of this kind for the secretion of the mucous matter that constitutes the cuticle, composed of a glandular parenchyma or organ of secretion situate in the substance of the true skin, and of excretory ducts, which issue from the organ, and deposite the mucous matter between the papillæ.

BLENNOPHTHALMIA, Ophthalmia, (purulent.)

BLENNOP'TYSIS, from *βλεννα*, and *πτυω*, 'I spit.' Expectoration of mucus. Catarrh (q. v.)

BLENNOPY'RA, from *βλεννα*, and *πυρ*, 'fire.' Alibert has classed, under this head, various fevers with mucous complications; as *Mesenteric fever, Adeno-meningeal fever*, &c.

BLENNORRHAGIA, Gonorrhœa—b. Genitalium, Leucorrhœa—b. Notha, Gonorrhœa spuria—b. Spuria, Gonorrhœa spuria.

BLENNORRHAGIC EPIDIDYMITIS, Hernia humoralis.

BLENNORRHAGIE FAUSSE, Gonorrhœa spuria—*b. du Gland*, Gonorrhœa spuria.

BLENNORRHINIA, Coryza.

BLENNORRHŒ'A, *Blennorrhoë, Blennorrhag''ia, Phlegmorrhœa, Phlegmorrhag''ia*, from *βλεννα*, 'mucus,' and *ρεω*, 'I flow.' Inordinate secretion and discharge of mucus. Also, Gonorrhœa.

BLENNORRHŒA CHRONICA, (gleet,) see Gonorrhœa—b. Genitalium, Leucorrhœa—b. Luodes, Gonorrhœa impura—b. Nasalis, Coryza—b. Oculi, see Ophthalmia—b. Oculi gonorrhoica, see Ophthalmia—b. Oculi neonatorum, see Ophthalmia—b. Oculi purulenta, see Ophthalmia—b. Urethralis, Gonorrhœa—b. Urinalis, Cystorrhœa—b. Ventriculi, Gastrorrhœa—b. Vesicæ, Cystorrhœa.

BLENNO'SES, from *βλεννα*, 'mucus.' Affections of the mucous membranes.—Alibert.

BLENNOTHORAX, Catarrh, Peripneumonia notha—b. Chronicus, Asthma humidum.

BLENNOTORRHŒA, Otirrhœa.

BLENNURETHRIA, Gonorrhœa.

BLENNURIA, Cystorrhœa.

BLEPHARELOSIS, Entropion.

BLEPHARIDES, Cilia.

BLEPHARIDOPLASTICE, Blepharoplastice.

BLEPHARITIS, Ophthalmia tarsi.

BLEPHAROBLENNORRHŒA, Ophthalmia, purulent.

BLEPHARODYSCHRŒ'A, from *βλεφαρον*, the 'eyelid,' *δυς*, 'with difficulty,' and *χρωα*, 'colour.' Discoloration of the eyelid. Nævus of the eyelid.—Von Ammon.

BLEPHARŒDEMA AQUOSUM, Hydroblepharon.

BLEPHARON, Palpebra—b. Atoniaton, Blepharoptosis.

BLEPHARONCO'SIS, *Palpebra'rum Tumor*, from *βλεφαρον*, 'eyelid.' A tumour on the eyelid.

BLEPHAROPHTHALMIA, Ophthalmia tarsi—b. Neonatorum, see Ophthalmia.

BLEPHAROPHTHALMITIS GLANDULOSA, Ophthalmia, purulent, of infants.

BLEPHAROPLAS'TICE, *Blepharidoplas'ticè, Insitio Cilio'rum*, from *βλεφαρον*, 'the eyelid,' and *πλαστικος*, 'forming,' 'formative.' The formation of a new eyelid.

BLEPHAROPLEGIA, Blepharoptosis.

BLEPHAROPTO'SIS, *Blepharople'gia, Casus pal'pebræ superio'ris, Delap'sus pal'pebræ, Prolap'sus pal'pebræ, Propto'sis pal'pebræ, Pto'sis pal'pebræ, Atoniaton blepharon*, from *βλεφαρον*, 'the eyelid,' and *πτωσις*, 'fall.' A falling down of the upper eyelid over the eye, caused by a paralysis of the *Levator pal'pebræ superioris* muscle. This paralysis is an unfavourable symptom, as it is generally connected with a state of the brain favouring apoplexy or palsy.

BLEPHAROPTOSIS ECTROPIUM, Ectropium—b. Entropion, Entropion.

BLEPHAROSPAS'MUS: from *βλεφαρον*, 'eyelid,' and *σπασμος*, 'spasm.' A spasmodic action of the orbicularis palpebrarum muscle.

BLEPHAROTIS, Ophthalmia tarsi.

BLEPHAROTITIS, Ophthalmia tarsi.

BLEPHAROTOSIS, Ectropium.

BLEPHAROXYS'TUM, from *βλεφαρον*, 'eyelid,' and *ξυω*, 'I scrape.' An instrument used, by the ancients, for removing callosities, which made their appearance in the affection called, by the Greeks, *τραχωμα*.—Paulus of Ægina, Gorræus.

BLÉSITÉ, Blæsitas.

BLESSURE, Abortion, Wound.

BLESTRIS'MOS. Restlessness of the sick.—Hippocr.

BLETA. A word, used by Paracelsus for white or milky urine, arising from diseased kidneys. *Blota alba* has the same meaning.

BLEVILLE, MINERAL WATERS OF. Bleville is a village about two miles from Havre. The waters are acidulous chalybeates.

BLIGHT IN THE EYE, Ophthalmia, catarrhal.

BLINDNESS, Cæcitas—b. Colour, Achromatopsia.

BLISTER, *Vesicato'rium, Emplas'trum Vesicato'rium, Emplas'trum Lyttæ, Epispas'ticum*, from *Vesi'ca*, 'a bladder,' (F.) *Vésicatoire, Vésicant*. Any substance which, when applied to the skin, irritates it, and occasions a serous secretion, raising the epidermis, and inducing a vesicle. Various articles produce this effect, as *cantharides, mustard, garou, euphorbium, gar-*

lic, ammonia, &c. Blisters are used as counter-irritants. By exciting a disease artificially on the surface, we can often remove another which may be at the time existing internally. A *perpetual blister* is one, that is kept open for a longer or shorter time by means of appropriate dressings.

Blister or *vesication* also means the vesicle produced by vesicatories.

BLISTERING FLY, Cantharis.

BLISTERWEED, Ranunculus acris.

BLITUM AMERICANUM, Phytolacca decandra.

BLOOD, Anglo Saxon, blob, from bleban, 'to bleed.' *Sanguis, Cruor, Lapis anima'lis, Hæma,* 'αιμα. (F.) *Sang.* An animal fluid, formed chiefly from the chyle; acquiring important properties during respiration; entering every organ through the circulation; distributing the nutritive principles to every texture, and the source of every secretion. The blood is white in the molluscous and inferior animals, which have been, hence, called *white-blooded,* to distinguish them from the *red-blooded;* which class includes the mammalia, birds, reptiles, and fishes. Human blood is composed of water, albumen, fibrin, an animal colouring substance, a little fatty matter, and different salts; as chlorides of potassium and sodium, phosphate of lime, subcarbonate of soda, lime, magnesia, oxide of iron, and lactate of soda, united with an animal matter. *Arterial blood* is of a florid red colour, strong smell, temp. 100°; s. g. 1.049. *Venous blood* is of a brownish-red: temp. 98°; s. g. 1. 051. This difference in colour has given occasion to the first being called *red blood;* the latter *black.* The former, which is distributed from the heart, is nearly the same through its whole extent: the latter is the remains of the arterial blood after the different elements have been taken from it, in nutrition, and probably differs in composition. It likewise contains different substances absorbed. Venous blood, taken from a vessel and left to itself, becomes solid; and separates into two distinct parts,—the *serum* or watery, supernatant fluid; and the *cruor, coag'ulum, crassamen'tum, hepar san'guinis, placen'ta, in'sula,* or *clot.* The serum is chiefly water, holding albumen in solution and the salts of the blood. The clot contains the fibrin, colouring matter, *hæmatosin,* (q. v.) a little serum, and a small quantity of salts. M. Lecanu found the blood to be composed—in 1000 parts—of water, 785.590; albumen, 69.415; fibrin, 3.565; colouring matter, 119.626; crystallizable fatty matter, 4.300; oily matter, 2.270; extractive matter soluble in alcohol and water, 1.920; albumen combined with soda, 2.010; chlorides of sodium and potassium; alkaline phosphates, sulphates, and subcarbonates, 7.304; subcarbonate of lime and magnesia, phosphate of lime, magnesia and iron, peroxide of iron, 1.414; loss, 2.586. The following table exhibits the computations of different physiologists regarding the weight of the circulating fluid—arterial and venous.

	lbs.
Harvey, Lister, Moulins, Abilguard, Blumenbach, Lobb, Lower,	8
	10
Sprengel,	10 to 15
Müller and Burdach,	20
Quesnai,	27
F. Hoffman,	28
Haller,	28 to 30
Young,	40
Hamberger,	80
Keill,	100

The proportion of arterial blood to venous is about 4 to 9.

Of late, much attention has been paid to the varying condition of the blood in disease. The average proportion of each of the organic elements in 1000 parts of healthy blood is as follows, according to Lecanu, and MM. Andral, and Gavarret,—fibrin, 3; red corpuscles, 127; solid matter of the serum, 80: water, 790.

Dried human blood was, at one time, considered to be antiepileptic; that of the goat, dried, *Sanguis hirci sicca'tus,* sudorific, and antipleuretic.

Blood, Black, vascular System of, see Vascular—b. Casein, Globulin—b. Corpuscles, Globules of the blood—b. Disks, Globules of the blood—b. Loss of, Hæmorrhagia—b. Red, system of, see Vascular—b. Spitting of, Hæmoptysis—b. Vomiting of, Hæmatemesis—b. White, Lymph.

BLOODLESSNESS, Anæmia.

BLOOD-LETTING, *Missio San'guinis, Hæmaxis.* (F.) *Saignée.* A discharge of a certain quantity of blood produced by art:—an operation which consists in making an opening into a vessel to draw blood from it. When practised on an artery, it is called *Arteriot'omy;* on a vein, *Phlebot'omy;* and on the capillary vessels, *local* or *capillary,* in contradistinction to the former, which is termed *general.* Blood-letting is used both during the existence of a disease, as in inflammation, and in the way of prophylaxis. It is employed to fulfil various indications. 1. To diminish the actual mass of blood;—when it is termed, by the French Pathologists, *Saignée évacuative.* In such case, fluids ought not to be allowed too freely afterwards. 2. To diminish the turgescence in any particular organ—((F.) *Saignée révulsive,* when performed far from the part affected; and *Saignée dérivative,* when near.) 3. To diminish the consistence of the red particles of the blood, ((F.) *Saignée spoliative.*) The immediate effects of blood-letting are: diminution of the mass of blood and of heat; retardation of the pulse, and sometimes syncope. Blood-letting from the veins, or *phlebotomy, venesec'tion,* is practised on the subcutaneous veins of the neck, the face, the fore-arm, and the leg; sometimes on those of the hand or foot. The necessary apparatus consists of a bandage or riband, a compress of rag, and a lancet or phleam.

The veins selected for the operation, are, 1. *In the fold of the arm,* five;—the cephalic, basilic, the two median, and the anterior cubital. 2. *In the hand,* the cephalic and salvatella. 3. *In the foot,* the great and little saphena. 4. *In the neck,* the external jugular. 5. *In the forehead,* the frontal. 6. *In the mouth,* the ranine. The operation of phlebotomy in the limbs is performed by tying a circular bandage round the limb, in order that the subcutaneous veins may become turgid, by the course of the blood being obstructed: the bandage not being so tight, however, as to compress the arteries of the limb. A puncture is made into the vein, and the desired quantity allowed to flow. The liga-

ture is now removed; and a compress and retaining bandage applied. *Capillary* or *local blood-letting* is practised on the skin or mucous membranes, by means of leeches, the lancet, or cupping.

BLOODROOT, Sanguinaria canadensis.

BLOODSTONE, Hæmatites.

BLOOD VESICLE, Globule of the blood.

BLOOD VESSEL, (F.) *Vaisseau sanguin*. A vessel destined to contain and convey blood.

BLOOD VESSEL, BREAKING, BURSTING, RUPTURING OF A.—Hæmorrhagia.

BLOODWORT, Sanguinaria canadensis.

BLOOM, HONEY, Apocynum androsæmifolium.

BLOTA ALBA, Bleta.

BLOW, *Ictus*, *Plegē*, (F.) *Coup*. Effect produced by one body striking another. The impression made by any body, which strikes us, or against which we strike;—a common cause of wounds, contusions, fractures, &c.

BLOWING SOUND, *Bruit de Souffle*.

BLUE-BELLS, Gentiana Catesbæi.

BLUE-BERRY, Caulophyllum thalictroides, Lantana.

BLUE BOTTLE, Centaurea cyanus, Cyanus segetum.

BLUE STONE, Cupri sulphas.

BLUET DES MOISSONS, Cyanus segetum.

BLUSH, CUTANEOUS, see Efflorescence.

BOA. An eruption of red, ichorous pimples. Pliny. See, also, Hidroa and Sudamina.

BOA UPAS, Upas.

BOBERRI, Curcuma longa.

BOCHIUM, Bronchocele.

BOCIUM, Bronchocele.

BOCKLET, MINERAL WATERS OF. The springs of Bocklet in Bavaria are acidulous chalybeates.

BODY, *Corpus*, *Soma*, (F.) *Corps*. From *boden*, the 'fundus or bottom.' (?) The human body is the collection of organs, which compose the frame. At times, however, body is used synonymously with *trunk*. We say, also, *body of the femur*, *of the sphenoid*, &c., to designate the shaft or middle portion of those bones; *body of the uterus*, &c. Also, the rectum.

BODY, COMING DOWN OF THE, Proctocele.

BODY-SNATCHER, Resurrectionist.

BOETHEMA, Medicament.

BOG-BEAN, Menyanthes trifoliata.

BOHON UPAS, Upas.

BOIL, Furunculus—b. Gum, Parulis—b. Malignant, see Furunculus—b. Wasp's nest, see Furunculus.

BOIS DE CAMPÈCHE, Hæmatoxylum Campechianum—*b. de Chypre*, Rhodium lignum—*b. de Couleuvre*, see Strychnos—*b. de Marais*, Cephalanthus occidentalis—*b. de Plomb*, Dirca palustris—*b. Puant*, Prunus padus—*b. de Rose*, Rhodium lignum—*b. de Sappan*, Cæsalpinia sappan—*b. Sudorifique*, Wood, sudorific.

BOISSE, MINERAL WATERS OF. These waters are situate about half a league from Fontenay-le-Comte in France. They are purgative, and seem to contain carbonate and sulphate of lime and chloride of sodium.

BOISSON, Drink.

BOÎTE, (F.) A *box* or *case*, *Capsa*, *Pyxis*. An apparatus for the reception of any matters, which it may be desirable to preserve. In *Surgery* and *Anatomy*, *Boîtes à dissection*, *B. à amputation*, *B. à trépan*, *B. à cataracte*, &c., mean the cases in which these various instruments are kept. *Boîte du Crane* is the bony case which receives the brain. *Boîte* is, also, the portion of the stem of the trephine, which receives the pyramid or centrepin. *Boîte de Petit* is a machine, invented by M. Petit to retain the fractured portions of bone in apposition, when the leg has been fractured in a complicated manner. *Boîte* is, also, a kind of case put before an artificial anus to receive the fæces, which are continually being discharged. The vulgar, in France, give the name *Boîte* to various articulations,—*B. de genou*, *B. de la hanche*; "Knee-joint, Hip-joint."

BOITEMENT, Claudication.

BOITIER, (F.) *Appareil*, *Cap'sula unguenta'ria*. A *Dressing-case*. A box, containing salves and different apparatus, used more particularly by the dressers in hospitals.

BOL, Bolus—*b. d'Arménie*, Bole, Armenian—*b. Blanc*, Bolus alba.

BOLA, Myrrha.

BOLCHON, Bdellium.

BOLE, *Bolus*, (F.) *Bol*, *Terre bolaire*, meant, with the older writers, argillaceous earth, used as an absorbent and alexipharmic. The various boles had different forms given to them, and were stamped, as in the following:

BOLE ARME'NIAN, BOLE ARME'NIAC, or B. AR'MENIC, *Argil'la ferrugin'ea rubra*, *A. Bolus rubra*, *Sinapi'sis*, *Arena'men*, *Bolus Orienta'lis*, *Bolus Armeniaca*, *B. Arme'niæ*, *B. rubra*. (F.) *Bol d'Arménie*. A red, clayey earth, found not only in Armenia, but in several countries of Europe,—in Tuscany, Silesia, France, &c. It was once esteemed a tonic and astringent, and was applied as a styptic. It is now scarcely, if ever, used. It consists of argil, mixed with lime and iron.

BOLESIS, Coral.

BOLESON, Balsam.

BOLET ODORANT, Dædalia suaveolens.

BOLETUS ALBUS, Boletus laricis.

BOLE'TUS ESCULEN'TUS, (F.) *Morelle*. An eatable mushroom, found in the woods in Europe, and much admired by *Gastronomes*. It was formerly esteemed to be aphrodisiac.

BOLE'TUS IGNIA'RIUS. The systematic name for the *Ag'aric*, *Agar'icus* of the Pharmacopœias. *Agar'icus Chirurgo'rum*, *Agar'icus Quercûs*, *Isca*, ισχα, *Bole'tus Ungulatus*, *Spunk*, *Am'adou*, *Punk*, *Fungus Ignia'rius*, *Fungus Querci'nus*, *Agaric of the Oak*, *Touchwood Boletus*, *Female Agaric*, *Tinder*, (F.) *Agaric de chêne*, *Amadouvier*. It was formerly much used by surgeons as a styptic.

BOLE'TUS LAR'ICIS, B. LARICI'NUS, *Fun'gus Lar'icis*, *Polyp'orus officina'lis*, *Agar'icus albus*, *A. albus op'timus*, *B. purgans*, *B. albus*, (F.) *Agaric blanc*. On the Continent of Europe it has been given as a cathartic and emetic, as well as to moderate the sweats in phthisis—(De Haen.) Externally, styptic.

BOLETUS PURGANS, Boletus laricis—b. Salicis, Dædalea suaveolens.

BOLE'TUS SUAV'EOLENS, *Fungus sal'icis*, *Fungus albus salig'neus*, *Dædale'a suav'eolens*. (F.) *Agaric odorant*. It has been used in phthisis pulmonalis, and asthma, in powder. Dose, from ʒss to ʒij.

BOLETUS TOUCHWOOD, Boletus igniarius.

BOLI MARTIS, Ferrum tartarisatum.

BOLISMOS, Boulimia.

BOLI'TES. The *mushroom;* perhaps the *Agar'icus Aurantiacus.*—Pliny, Martial, Seutonius, Galen. It was so called, in consequence of its shape, from *Bolus.*

BOLUS, βωλος, a morsel, a mouthful, a bole, (q. v.) (F.) *Bol.* A pharmaceutical preparation, having a pilular shape, but larger; capable, however, of being swallowed as a pill.

Bolus Alba, *Terra Sigilla'ta, Argil'la pallid'ior:* called *sigilla'ta,* from being commonly made into small cakes or flat masses, and stamped or *sealed* with certain impressions. (F.) *Bol blanc, Terre sigillée, Argile ochreuse pâle.* It was used like the *Bolus Armeniæ,* and was brought from Etruria. See Terra.

Bolus, Alimen'tary. *Bolus alimenta'rius.* The bole, formed by the food, after it has undergone mastication and insalivation in the mouth; and been collected upon the tongue prior to deglutition.

Bolus Orienta'lis. A kind of bolar earth only distinguished from Bole Armenian, in being brought from Constantinople. See Bole, Armenian.

Bolus Rubra, Bole, Armenian.

BOMA'REA SALSIL'LA. The inhabitants of Chili use this plant as a sudorific. It is given in infusion, in cutaneous diseases.

BOMBAX, Gossypium.

BOMBEMENT, Bombus.

BOMBUS, *Au'rium fluctua'tio, A. sil'ilus, A. son'itus, A. susur'rus,* (F.) *Bombement.* A kind of ringing or buzzing in the ears;—characterized, according to Sauvages, by the perception of blows or beating repeated at certain intervals. See Flatulence, and Tinnitus Aurium.

BOMBYX MORI, see Sericum.

BON, Coffea Arabica.

BONA, Phaseolus vulgaris.

BONDUE, Gymnocladus canadensis.

BONE, *Os, Osteon,* οστεον, (F.) *Os.* Saxon, ban. The bones are the solid and hard parts, which form the basis of the bodies of animals, of the superior classes; and the union of which constitutes the *skeleton.* The human body has, at the adult age, 208 bones, without including the 32 teeth, the ossa Wormiana and the sesamoid bones. Anatomists divide them, from their shape, into 1. *Long Bones,* which form part of the limbs and represent columns for supporting the weight of the body, or levers of different kinds for the muscles to act upon. 2. *Flat Bones,* which form the parietes of splanchnic cavities; and, 3. *Short Bones,* met with in parts of the body, where solidity and some mobility are necessary. Bones are formed of two different textures; *spongy* and *compact.* They afford, on analysis, much phosphate and carbonate of lime, a little phosphate of magnesia, phosphate of ammonia, oxides of iron and manganese, some traces of alumina and silica, gelatin, fat, and water. The uses of the bones are mentioned under each bone. They give shape to the body, contain and defend the viscera, and act as levers to the muscles.

TABLE OF THE BONES.

Bones of the Head.	Bones of the *Cra'nium* or *Skull.*	Frontal	1
		Parietal	2
		Occipital	1
		Temporal	2
		Ethmoid	1
		Sphenoid	1
	Bones of the *Face.*	Superior Maxillary	2
		Jugal or Cheek	2
		Nasal	2
		Lachrymal	2
		Palatine	2
		Inferior Spongy	2
		Vomer	1
		Inferior Maxillary	1
	Dentes or *Teeth.*	Incisores	8
		Cuspidati	4
		Molares	20
	Bone of the *Tongue.*	Hyoid	1
	Bones of the *Ear.*	Malleus	2
		Incus	2
		Orbiculare	2
		Stapes	2
Bones of the Trunk.	*Vertebræ.*	Cervical	7
		Dorsal	12
		Lumbar	5
	Sacrum		1
	Os Coccygis		1
	The *Thorax.*	Sternum	1
		Ribs	24
	The *Pelvis.*	Innominatum	2
Bones of the Upper Extremity.	The *Shoulder.*	Clavicle	2
		Scapula	2
	The *Arm.*	Humerus	2
	Forearm.	Ulna	2
		Radius	2
	The *Hand.* — *Carpus* or *Wrist.*	Naviculare	2
		Lunare	2
		Cuneiforme	2
		Orbiculare	2
		Trapezium	2
		Trapezoides	2
		Magnum	2
		Unciforme	2
	Metacarpus		10
	Phalanges		28
Bones of the Lower Extremity.	The *Thigh.*	Femur	2
	The *Leg.*	Patella	2
		Tibia	2
		Fibula	2
	The *Foot.* — *Tarsus* or *Instep.*	Calcis Os	2
		Astragalus	2
		Cuboides	2
		Naviculare	2
		Cuneiforme	6
	Metatarsus		10
	Phalanges		28
		Total	240

Bone, Back, Vertebral column—b. Blade, Scapula—b. Boat-like, Os scaphoides—b. Breast, Sternum—b. Haunch, Ilion—b. Share, Pubis—b. Splinter, Fibula.

Bone Nippers, *Tenac'ula,* from *teneo,* 'I hold.' (F.) *Tenaille incisive.* An instrument used for cutting off splinters and cartilages. It is a kind of forceps, the handles of which are strong, and the edges, which touch each other, cutting.

BONEBINDER, Osteocolla.

BONES, BRITTLENESS OF THE, Fragilitas ossium—b. Friability of the, Fragilitas ossium—b. Salt of, Ammoniæ carbonas—b. Softening of the, Mollities ossium.

BONESET, Eupatorium perfoliatum.

BONIFACIA, Ruscus hypoglossum.

BONNE DAME, Atriplex hortensis.

BONNES, MINERAL WATERS OF. Bonnes is a village six leagues from Pau, in the department *Basses Pyrénées,* France. Here are several thermal springs. They were celebrated as early as the time of Francis I, under the name *Eaux d'Arquebusade.* They contain chlorides of sodium and magnesium, sulphates of magnesia and lime, sulphur, and silica. The temperature is from 78° to 98° Fahrenheit.

The *factitious* Eau de Bonnes is made of *Hydrosulphuretted water,* f. ℥iv: *pure water,* Oj

and f.℥ss; *chloride of sodium*, 30 grains; *sulphate of magnesia*, 1 grain.

BONNET, Reticulum.

BONNET A DEUX GLOBES, *Bonnet d'Hippocrate.*

BONNET D'HIPPOCRATE, *Cap of Hippocrates*, *Mitra Hippocrat'ica*, *Fas'cia capita'lis*, *Pi'leus Hippocrat'icus*. A kind of bandage, the invention of which is ascribed to Hippocrates. It consists of a double-headed roller, passed over the head so as to envelop it like a cap. The French, also, name it, *Bonnet à deux globes*, *Capeline de la tête.*

BONNYCLABBER, from Irish, *baine*, 'milk,' and *clabar*, 'mire.' Sour milk.

BONPLANDIA TRIFOLIATA, Cusparia febrifuga.

BONUS GENIUS, Peucedanum—b. Henricus, Chenopodium bonus Henricus.

BOON UPAS, Upas.

BOONA, Phaseolus vulgaris.

BORAC''IC ACID, *Ac''idum Borac''icum*, *Sal sedati'vus* Homber'gi, *Boric Acid.* An acid obtained from Borax, which was once looked upon as sedative. It was also called *Acor Borac''icus*, *Sal vitrioli narcoticum*, *Sal volati'ile Bora'cis*, and *Flores Bora'cis.*

BORAGE, Borago officinalis.

BORA'GO OFFICINA'LIS, *Buglos'sum verum*, *Bug. latifo'lium*, *Borra'go*, *Corra'go*, *Borag. horten'sis*, *Borage*, (F.) *Bourrache.* *Nat. Ord.* Borragineæ. *Sex. Syst.* Pentandria Monogynia. The leaves and flowers have been considered aperient.

BORAS SUPERSODICUS, Borax.

BORATHRON, Juniperus Sabina.

BORAX, *Boras Sodæ*, *Sodæ Bibo'ras*, *Subboras Sodæ*, *Boras supersaturus sodæ*, *Soda Boraxata*, *Chrysocol'la*, *Capis'trum auri*, *Subborate of protox'ide of Sodium*, *Subprotobo'rate of Sodium*, *Boras Sodæ alcales'cens* seu *alcali'num*, *Boras superso'dicus*, *Borax Ven'etus*, *Subbo'ras Nu'tricum*, *Borax'trion*, *Nitrum facti''tium*, &c. *Subbo'rate of Soda*, (F.) *Sous-borate de Soude*, *Borate sursaturé de soude.* It is found in an impure state in Thibet and Persia. It is inodorous; taste cool, and somewhat alkaline; soluble in 12 parts of water. Borax is seldom used except as a lotion in aphthæ.

Borate of Mercury has been recommended as an antisyphilitic.

BORAXTRION, Borax.

BORBORYG'MUS, from βορβορυζω, 'I make a dull noise.' *Murmur*, *Motus Intestino'rum*, (F.) *Gargouillement*, *Grouillement d'Entrailles.* The noise made by flatus in the intestines. This happens often in health, especially to nervous individuals.

BORD (F.), *Margo*, *Edge*, *Margin.* Anatomists have so named the boundaries of an organ. Thus, the bones, muscles, &c. have *bords* as well as bodies. The 'free edge,' *bord libre*, is one not connected with any part; the 'adhering edge,' *bord adhérent*, one that is connected; and the *bord articulaire*, or 'articular margin, or edge,' that which is joined to another bone.

BORD CILIAIRE, Ciliary margin.

BORDEAUX, MINERAL WATERS OF. Near this great city, in the south-west of France, is a saline, chalybeate spring. It contains oxide of iron, carbonate and sulphate of lime, chlorides of sodium and calcium, subcarbonate of soda, and sulphate of magnesia.

BORGNE, (F.) *Cocles*, *Unoc'ulus*, *Luscus.* One who has only one eye, or sees only with one. The word has been used, figuratively, for *blind*, in surgery and anatomy. See Cæcus.

BOR'OSAIL, *Zael.* Æthiopian names for a disease, very common there, which attacks the organs of generation, and appears to have considerable analogy with syphilis.

BORRAGO, Borago officinalis.

BORRI, Curcuma longa.

BORRIBERRI, Curcuma longa.

BORSE, MINERAL WATERS OF. Borse is a village in Béarn. The waters are chalybeate.

BO'SA. An Ægyptian name for a mass, made of the meal of darnel, hempseed, and water. It is inebriating.—Prospero Alpini.

BOSOM. See Mamma.

BOSSE, Hump, Protuberance—*b. Nasale*, Nasal protuberance.

BOSWELLIA SERRATA. See Juniperus lycia.

BOTAL FORA'MEN, *Fora'men Bota'lē*; the *Fora'men ova'lē*, (F.) *Trou de Botal.* A large opening which exists in the fœtus in the partition between the two auricles of the heart; and by means of which the blood passes from one to the other. Its discovery is generally attributed to Leonard Botallus or Botal, who wrote in 1562. It was spoken of, however, by Vesalius, and even by Galen.

BOTANIQUE MÉDICALE, Botany, medical.

BOT'ANY, MEDICAL, *Botan'ica Med'ica*, *Medici'na Botan'ica*, *Phytolog''ia med'ica*; from βοτανη, 'an herb,' (F.) *Botanique Médicale.* The knowledge of the properties, characters, &c., of those vegetables which are used in Medicine.

BOTAR'GO, (F.) *Botargue.* A preparation made in Italy and the south of France, with the eggs and blood of the *Mugilceph'alus* or *Mullet*; strongly salted, after it has become putrescent. It is used as a condiment.

BOTARGUE, Botargo.

BOTHOR. An Arabic term for abscess in the nares. It means, also, tumours in general; especially those which are without solution of continuity.

BOTHRIOCEPH'ALUS or BOTRIOCEPH'ALUS LATUS, from βοθριον, 'a small pit,' and κεφαλη, 'head,' *Tæ'nia lata*, *T. vulga'ris*, *Lumbri'cus latus*, *Plate'a*, *T. os'culis lateral'ibus gem'inis*, *T. grisea*, *T. membrana'cea*, *T. tenel'la*, *T. denta'ta*, *T. huma'na iner'mis*, *Hal'ysis membrana'cea*, *T. prima*, *T. os'culis lateral'ibus solita'riis*, *T. aceph'ala*, *T. os'culis superficial'ibus*, *T. à anneaux courts*, *T. non armé*, *Ver solitaire*, *Broad Tape worm.* Common in Switzerland, Russia, and some parts of France. It inhabits the intestines of man, and extends to an enormous length. A broken specimen has been obtained 60 yards long.—Goëze.

BOTHRION, from βοθρος, 'a pit, cavity,' &c. An *alveolus*, (q. v.) or small fossa. A small deep ulcer on the cornea.—Galen, Paulus of Ægina. See *Fossette.*

BOTHRIUM, *Fossette.*

BOTHROS, Fovea.

BOTIN, Terebinthina.

BOTIUM, Bronchocele.

BOTOTHINUM. An obscure term, used by Paracelsus to denote the most striking symptom of a disease:—the *Flos morbi.*

BOTOU, Pareira brava.

BOTRIOCEPHALUS, Bothriocephalus.

BOTRION, Alveolus.

BOTROPHIS SERPENTARIA, Actæa racemosa.

BOTRYS, Chenopodium botrys, see Vitis vinifera—b. Ambrosioides, Chenopodium ambrosioides—b. Americana, Chenopodium ambrosioides—b. Anthelminticum, Chenopodium anthelminticum—b. Mexicana, Chenopodium ambrosioides.

BOTTINE, (F.) A *thin boot* or *buskin*, *O'crea le'vior.* An instrument, which resembles a small boot, furnished with springs, straps, buckles, &c., and used to obviate distortions of the lower extremities in children.

BOTTLE NOSE, Gutta rosea.

BOUBALIOS, Momordica elaterium, Vulva.

BOUBON, Bubo.

BOUCAGE MAJEUR, Pimpinella magna—*b. Mineur*, Pimpinella saxifraga—*b. Petit*, Pimpinella saxifraga.

BOUCHE, Mouth.

BOUCLEMENT, Infibulation.

BOUES DES EAUX, (F.) *Boues Minérales. Balnea Cæno'sa.* The mud or swamp, formed near mineral springs; impregnated with the substances contained in such springs, and consequently possessing similar properties. The *Boues* are applied generally and topically, in France, at the springs of St. Amand, Bagnères de Luchon, Bagnols, Barèges; in the United States, the White Sulphur in Virginia, &c.

BOUES MINÉRALES, *Boues des eaux.*

BOUFFE, (F.) The small eminence, formed by the junction of the two lips.—Dulaurens.

BOUFFISSURE, Puffiness.

BOUGIE, (F.) A wax candle, *Candel'ula*, *Cande'la ce'rea*, *Cande'la medica'ta*, *Ce'reum medica'tum*, *Cereolus Chirurgo'rum*, *Da'dion*, *Speci'lum ce'reum*, *Virga ce'rea*, *Cereola.* A flexible cylinder, variable in size, to be introduced into the urethra, œsophagus, rectum, &c. for the purpose of dilating these canals, when contracted. A *Simple Bougie* is composed of solid and insoluble substances; as plaster, elastic gum, catgut, &c. It acts of course only mechanically.

Bougie, Medicated, (F.) *B. Médicamenteuse*, has the addition of some escharotic or other substance to destroy the obstacle; as in the *Caustic Bougie*, which has a small portion of *Lunar Caustic* or *Common Caustic*, inserted in its extremity. Ducamp has recommended a Bougie, which swells out near its extremity for the better dilating of the urethra. This he calls *B. à ventre.* The *metallic Bougie*, invented by Smyth, is a composition of metal, allowing of great flexibility; and a *hollow Bougie* is one, with a channel running through it, to be used in the same manner as the catheter, or otherwise.

BOUILLIE, (F.) *Pultic'ula*, *Pap*, from (F.) *bouillir*, 'to boil.' Flour, beaten and boiled with milk. It is a common food for infants.

BOUILLON, (F.) from *bouillir*, 'to boil,' *Jus*, *Sorbi'tio.* A liquid food, made by boiling the flesh of animals in water. The osmazome, gelatin, and soluble salts dissolve; the fat melts, and the albumen coagulates. B. is nourishing, owing to the gelatin and osmazome. The *Jus de Viande* is a very concentrated Bouillon, prepared of beef, mutton, veal, &c.

BOUILLON, in common language, in France, means a round fleshy excrescence, sometimes seen in the centre of a venereal ulcer.

BOUILLON BLANC, Verbascum nigrum.

BOUILLONS MEDICINAUX ou *PHARMACEUTIQUES. Medicinal* or *Pharmaceutic Bouillons*, contain infusions or decoctions of medicinal herbs. The *Bouillon aux herbes* is generally composed of *sorrel* or *beet.*

BOUILLON d' OS, (F.) *Bouillon from bones*, is obtained by treating bones with muriatic acid, in order to dissolve the earthy parts. The gelatin, which remains, is then boiled with a little meat and vegetables.—D' Arcet. Bouillon, however, can be easily obtained from the bones of roast meat by simple coction.

BOUILLONNEMENT, Ebullition.

BOUIS, Buxus.

BOULE D'ACIER, Ferrum tartarizatum—*b. de Mars*, Ferrum tartarizatum—*b. de Molsheim*, Ferrum tartarizatum—*b. de Nancy*, Ferrum tartarizatum.

BOULEAU COMMUN, Betula alba.

BOULIM'IA, *Bulim'ia*, or *Bulim'ius*, *Boul'imos*, *Bulimiasis*, *Bolismos*, *Eclim'ia*, *Fames cani'na*, *Appeti'tus caninus*, *Appeten'tia cani'na*, *Adepha'gia*, *Cynorex'ia*, *Bupei'na*, *Phagæ'na*, *Phagedæ'na*, *Fames Bovi'na*, *F. Lupina*, from βους, 'an ox,' and λιμος, 'hunger;' or from βο, augmentative particle, and λιμος, 'hunger.' (F.) *Boulimie*, *Faim canine*, *F. dévorante*, *Polyphagie.* An almost insatiable hunger. A *canine appetite.* It is sometimes seen in hysteria and pregnancy; rarely under other circumstances.

BOULIMIE, Boulimia.

BOULOGNE, MINERAL WATERS OF B. is in the department Pas-de-Calais, France. The waters are chalybeate.

BOUQUET ANATOMIQUE DE RIOLAN, (F.) from *bouquet*, a collection of flowers or other substances tied together. A name given, by some anatomists, to the collection of ligaments and muscles, inserted into the styloid process of the temporal bone.

Bouquet Fever, Dengue.

BOURBILLON, see Furunculus (core.)

BOURBON-LANCY, MINERAL WATERS OF. Bourbon-Lancy is a small village in the department of Saône-et-Loire, France; where there are thermal saline springs, containing carbonic acid, chloride of sodium, and sulphate of soda, chloride of calcium, carbonate of lime, iron, and silica. Their heat is from 106° to 135° Fahrenheit.

BOURBON L'ARCHAMBAUT, MINERAL WATERS OF. This town is in the department of the Allier, six leagues west from Moulins, and has been long celebrated for its thermal chalybeate waters. They contain sulphohydric acid, sulphate of soda, magnesia, and lime, carbonate of iron, and silica. Their temperature varies between 136° and 145° Fahrenheit.

BOURBONNE-LES-BAINS, MINERAL WATERS OF. These springs are seven leagues from Langres, department of Haute-Marne, France. They are thermal and saline, and have been long celebrated. Temperature from 106° to 133° Fahrenheit. The *Factitious water*, (F.) *Eau de Bourbonne-les-Bains*, *Aqua Borvonen'sis*, is composed of *water*, containing

twice its bulk of *carbonic acid*, f. ℥xxss; *chloride of sodium*, f ʒj, *chloride of calcium*, gr. x. &c.

BOURBOULE, MINERAL WATERS OF. A village near Mont d'Or, where there are two thermal saline springs.

BOURDAINE, Rhamnus frangula.

BOURDONNEMENT, (F.) *Bruissement, Murmur, Susurrus*. A sensation of buzzing or humming in the ear, which may be either dependent on some modified condition of the ear itself, or may be seated in the brain.

BOURDONNET, Pulvil'lus. A term used in French surgery for charpie rolled into a small mass of an olive shape, and which is used for plugging wounds, absorbing the discharge, and preventing the union of their edges. In cases of deep and penetrating wounds, as of the abdomen or chest, a thread is attached to them by which they may be readily withdrawn, and be prevented from passing altogether into those cavities.—J. Cloquet.

BOURGÈNE, Rhamnus frangula.

BOURGEON, Granulation, Papula—*b. Charnu*, Granulation.

BOURGEONS, Gutta rosea.

BOURRACHE, Borago officinalis.

BOURRELET, (F.) A *Pad*, a *Border*. A fibro-cartilaginous border, which surrounds certain articular cavities, such as the glenoid cavity of the scapula and the acetabulum; and by which the depth of those cavities is augmented.

BOURRELET ROULÉ, Cornu ammonis.

BOURSES, LES, Scrotum.

BOURSOUFLURE, Puffiness.

BOUTON, Papula—*b. d'Alep*, see Anthrax—*b. Malin*, see Anthrax—*b. d'Or*, Ranunculus acris.

BOUTONNIÈRE, (F.); *Fissu'ra, Incis'io*. A small incision made in the urethra to extract a calculus from the canal, when it is too large to be discharged.

Also, a small incision or puncture, made in the peritoneum, or above the pubis, to penetrate the bladder in certain cases of retention of urine.

BOVILLÆ, Rubeola.

BOVISTA, Lycoperdon.

BOWMAN'S ROOT, Euphorbia corollata, Gillenia trifoliata, Leptandria purpurea.

BOXBERRY, Gaultheria.

BOX, MOUNTAIN, Arbutus uva ursi.

BOX TREE, Buxus, Cornus Florida.

BOXWOOD, Cornus Florida.

BOYAU, Intestine.

BRABYLON, Prunum Damascenum.

BRACHERIOLUM, Truss.

BRACHERIUM, Truss.

BRACHIÆUS, Brachial—b. Internus, Brachialis anterior.

BRA'CHIAL, *Brachia'lis, Brachiæ'us*, from *Brachium*, 'the arm.' What belongs to the arm.

Brachial Aponeuro'sis. An aponeurosis, formed particularly by expansions of the tendons of the latissimus dorsi, pectoralis major, and deltoides muscles, and which completely envelops the muscles of the arm.

Brachial Artery, *Arte'ria brachia'lis, Humeral Artery*, (F.) *Artère* ou *Tronc brachial*. The artery, which extends from the axilla to the bend of the elbow; where it divides into *A. cubitalis* and *A. radialis*. It passes along the internal edge of the biceps, behind the median nerve and between the accompanying veins. Under the name *Brachial Artery*, M. Chaussier includes the subclavian, axillary, and humeral; the last being the *brachial proper*.

Brachial Muscle, Anterior, *Mus'culus Brachia'lis Ante'rior, Brachia'lis internus, Brachiæ'us, Brachiæ'us internus*, (F.) *Muscle brachial interne, Humero cubital*—(Ch.) This muscle is situate at the anterior and inferior part of the arm, and before the elbow-joint. It arises, fleshy, from the middle of the os humeri; and is inserted into the coronoid process of the ulna. *Use*. To bend the forearm.

Brachial Plexus, *Plexus Brachia'lis*, is a nervous plexus, formed by the interlacing of the anterior branches of the four last cervical pairs and the first dorsal. It is deeply seated in the hollow of the axilla, and extends as far as the inferior and lateral part of the neck. It gives off the *thoracic* nerves, *supra* and *infra scapular*, and the *brachial* (which are six in number,) the *axillary, cutaneous, musculo-cutaneous, radial, cubital*, and *median*.

Brachial Veins are two in number, and accompany the artery, frequently anastomosing with each other: they terminate in the axillary. Under the term *Brachial Vein*, Chaussier includes the humeral, axillary, and subclavian.

BRACHIALE, Carpus.

BRACHIALIS EXTERNUS. See Triceps extensor cubiti.

BRACHIO-CU'BITAL, *Brachio-cubita'lis*. That which belongs both to the arm and cubitus. This name has been given to the internal lateral ligament at the elbow-joint; because it is attached to the os brachii or os humeri and to the cubitus or ulna.

Brachio-Radial, *Brachio-radia'lis*. That which belongs to the brachium and radius. This name has been applied to the external lateral ligament of the elbow-joint, because it is attached to the humerus and to the radius. See Supinator Radii longus.

BRACHIUM, *Lacer'tus*, (F.) *Bras*, the arm. The arm from the shoulder to the wrist, or the part between the shoulder and elbow. See Humeri, Os.

Brachium Movens Quartus, Latissimus dorsi.

BRACHUNA, Nymphomania, Satyriasis.

BRACHYAU'CHEN, from βραχυς, 'short,' and αυχην, 'neck.' One who has a short neck.

BRACHYCHRO'NIUS, from βραχυς, 'short,' and χρονος, 'time.' That which continues but a short time. A term applied to diseases which are of short duration.—Galen.

BRACHYGNA'THUS, from βραχυς, 'short,' and γναθος, the 'under jaw.' A monster with too short an under jaw.—Gurlt.

BRACHYNSIS, Abbreviation.

BRACHYPNŒA: Dyspnœa.

BRACHYP'OTI, from βραχυς, 'short,' and ποτης, 'drinker.' They who drink little, or who drink rarely. Hippoc., Galen, Foësius.

BRACHYRHYN'CHUS: from βραχυς, 'short,' and ρυγχος, 'snout.' A monster with too short a nose.

BRACHYSMOS, Abbreviation.

BRACING, Corroborant.

BRADYÆSTHE'SIA, from βραδυς, 'difficult,' and αισθησις, 'sensation.' Impaired sensation.

BRADYCOIA, Baryecoia.

BRADYMASE'SIS, *Bradymasse'sis*, from

βραδυς, 'difficult,' and μασησις, 'mastication.' Difficult mastication. See Dysmasesis.

BRADYPEP'SIA, *Tarda cibo'rum concoc'tio*, from βραδυς, 'slow,' and πεπτω, 'I digest.' Slow digestion.—Galen. See Dyspepsia.

BRADYSPERMATIS'MUS, from βραδυς, 'slow,' and σπερμα, 'sperm.' A slow emission of sperm.

BRADYSU'RIA, *Tenes'mus vesi'cæ*, (F.) *Ténesme vésical*, from βραδυς, 'difficult,' and ουρειν, 'to pass the urine.' Painful evacuation of the urine, with perpetual desire to void it. Dysuria (q. v.)

BRAG'GET, *Braggart*, *Bragwort*. A name formerly applied to a tisan of honey and water. See Hydromeli.

BRAI, LIQUIDE, see Pinus sylvestris—*b. Sec*, Colophonia.

BRAIN, Cerebrum—b. Little, Cerebellum.

BRAINE, MINERAL WATERS OF. Braine is a small village, three leagues from Soissons, France, which has purgative waters similar to those of Passy.

BRAKE, COMMON, Pteris aquilina—b. Rock, Polypodium vulgare—b. Root, Polypodium vulgare.

BRAMBLE, AMERICAN HAIRY, see Rubus fruticosus—b. Common, Rubus fruticosus.

BRAN, Furfur.

BRANC-URSINE BÂTARDE, Heracleum spondylium.

BRANCA URSINA, Acanthus mollis—b. Germanica, Heracleum spondylium.

BRANCH, from (F.) *Branche*, originally probably from βραχιων, 'an arm,'(?) because branches of trees, &c., go off like arms. A term applied, generally, to the principal division of an artery or nerve. The word is commonly used synonymously with *Ramus:* but often, with the French, *Branche* signifies the great division;—*Rameau*, Lat. *Ramus*, the division of the branches; and *Ramuscules*, Lat. *Ramusculi*, the divisions of these last.

The French, also, speak of the *branches of* the pubis, for the *Rami* of that bone, *branches* of the ischium, for the rami of the ischium, &c.

BRANCHES DE LA MOËLLE ALLONGÉE (PETITES) Corpora restiformia.

BRANCHI or BRANCHÆ. Swellings of the tonsils, or parotid, according to some;—of the thyroid gland, according to others.

BRANCHUS, βρογχος, *Rauce'do* (q. v.) A catarrhal affection of the mucous membrane of the fauces, trachea, &c.—Galen.

BRANCIA, Vitrum.

BRANDY. (G.) Brantwein, Dutch, Brandwijn, 'burnt wine.' *Aqua Vitæ*. (F.) *Eau de vie*. The first liquid product obtained by distilling wine. It is composed of water, alcohol, and an aromatic oily matter, which gives it its flavour. Brandy is a powerful and diffusible stimulant, and as such is used in medicine. It has been also called *Liquor Aquilé'gius*. See Spirit.

BRANDY, APPLE, see Pyrus malus.

BRANKS, Cynanche parotidæa.

BRANKURSINE, Acanthus mollis.

BRAS, Brachium—*b. du Cervelet*, Corpora restiformia.

BRASÉGUR, MINERAL WATERS OF. Braségur is a place in the diocess of Rhodez, where there are cathartic waters.

BRASÉNIA, B. Hydropeltis.

BRASE'NIA HYDROPEL'TIS, *Brase'nia*, *Gelatina aquat'ica*, *Frogleaf*, *Little Water Lily*, *Water Jelly*, *Deerfood*. An indigenous plant, *Nat. Ord.* Ranunculaceæ, *Sex. Syst.* Polyandria Polygynia, flourishing from Carolina to Kentucky and Florida; and covering the surface of ponds, marshes, &c. The fresh leaves are mucilaginous, and have been used in pulmonary complaints, dysentery, &c., like cetraria.

BRASH, WATER, Pyrosis.

BRASH, WEANING, *Atroph'ia Ablactato'rum*. A severe form of diarrhœa, which supervenes at times on weaning. The *Maladie de Cruveilhier* appears to be a similar affection.

BRASILETTO, see Cæsalpinia.

BRASIUM, Malt.

BRASMOS, Fermentation.

BRASS, Sax. bpar, *Welsh*, prês. *Aurichal'cum*, *Orichal'cum*, *Æsecavum*, *Chrysochalcos*, (F.) *Airain*. A yellow metal, formed by mixing copper with calamine. The same remarks apply to it as to copper. See Cuprum.

BRAS'SICA, *Crambē*, κραμβη. *Bras'sica olera'cea*: *B. capita'ta*, seu *cuma'na* of the old Romans. The Cabbage. (F.) *Chou potager*. *Family*, Cruciferæ. *Sex. Syst.* Tetradynamia Siliquosa. Cato wrote a book on its virtues. It is a vegetable by no means easy of digestion when boiled; when raw, it appears to be more digestible. When forming a solid globular mass, like a head, it is the *B. Capita'ta*, (F.) *Chou-Cabus*, *Chou Pommé*.

BRASSICA CANINA, Mercurialis perennis.

BRAS'SICA ERU'CA, *Eru'ca*, *Garden Rocket*, *Roman Rocket*, &c. (F.) *Chou Roquette*, *Roquette*. This was considered, by the Romans, an aphrodisiac,—Columella. The seeds were ordinarily used.

BRAS'SICA FLOR'IDA,—*Bras'sica Pompeia'na* of the ancients—the *Cauliflower*, *Caulis Florida*, (F.) *Chou-fleur* is a more tender and digestible variety.

The *Broc'coli*, *B. Sabel'lica* of the Romans, *B. Ital'ica*, belongs to this variety.

BRASSICA MARINA, Convolvulus soldanella—b. Pompeiana, Brassica Florida.

BRAS'SICA NAPUS, NAPUS SYLVES'TRIS or BU'NIAS, Rape, (F.) *Navette*. The seed yields a quantity of oil.

BRASSICA NIGRA, Sinapis nigra.

BRAS'SICA RAPA, *Rapa rotun'da*, *Rapum majus*, *Rapa napus*, the *Turnip*. (F.) *Chou navet*, *Navet*, *Rave*. The turnip is liable to the same objection (but to a less extent) as the cabbage.

BRATHU, Juniperus sabina.

BRATHYS, Juniperus sabina.

BRAYER, Truss.

BRAYERA ANTHELMIN'TICA. An Abyssinian plant, of the *Family* Rosaceæ. *Sex. Syst.* Icosandria Digynia. The flowers have been highly extolled as an anthelmintic, especially in cases of tapeworm. They are given in decoction.

BRAZIL WOOD, Cæsalpinia echinata.

BREAD, see Triticum—b. Household, Syncomistos.

BREAD-FRUIT TREE, Artocarpus.

BREAST, Thorax, Mamma—b. Abscess of the, Mastodynia apostematosa.

BREAST-PANG, SUFFOCATIVE, Angina pectoris.

BREATH, *Sax.* bpaðe, *Hal'itus*, *Anhel'itus*, *An'imus*, *Spir'itus*, *At'mos*. (F.) *Haleine*. The air expelled from the chest, at each expiration.

It requires to be studied in the diagnosis of thoracic diseases especially.

Breath, Offensive; *Fœtor Oris*. An offensive condition, which is usually dependent upon carious teeth, or some faulty state of the secretions of the air passages. The internal use of the chlorides may be advantageous.

Breath, Short, Dyspnœa.

BREATHING, DIFFICULTY OF, Dyspnœa.

BRECHET, (F.) The *Brisket*. This name is given in some parts of France to the *cartilago ensiformis*, and sometimes to the sternum itself.

BRÉDISSURE, (F.) *Trismus Capistra'tus*. Incapacity of opening the mouth, in consequence of preternatural adhesion between the internal part of the cheek and gums; often occasioned by the abuse of mercury.

BREDOUILLEMENT, (F.) *Tituban'tia*. A precipitate and indistinct mode of utterance, in which a part only of the words is pronounced, and several of the syllables viciously changed. This defect is analogous to stuttering, but differs from it in being dependent on too great rapidity of speech; whilst stuttering is characterized by continual hesitation, and frequent repetition of the same syllables.

BREGMA, from βρεχειν, 'to sprinkle;' *Fontanell'a*, (q. v.) *Sin'ciput* (q. v.) The top of the head was thus called, because it was believed to be humid in infants; and, according to some, because it was conceived to correspond to the most humid part of the brain.

BRENNING, Burning.

BREPHOCTONON. Conyza squarrosa.

BRÉSILLET, Cæsalpinia sappan.

BRE'VIA VASA, *Short Vessels*. This name has been given to several branches of the splenic arteries and veins, which are distributed to the great *cul-de-sac* of the stomach.

BREVIS CUBITI. See Anconeus.

BRIER, WILD, Rosa canina.

BRICK, (F.) *Brique*. Hot bricks are sometimes used to apply heat to a part, as to the abdomen in colic, or after the operation for popliteal aneurism; or, reduced to very fine powder, and mixed with fat, as an application to herpetic and psoric affections.

Bricks, *Forna'ceæ Testæ* or *Tiles*, were formerly bruised in vinegar, and the liquid was used as a specific in cutaneous affections. They entered, also, into a cerate used for scrofulous humours, &c. To the *Terra Forna'cum*, or *Brick earth*, the same virtues were assigned.

BRICUMUM, Artemisia.

BRIDE, (F.) A bridle. *Fræ'nulum, Retinac'ulum*. This term is given, in the plural, to membranous filaments, which are found within abscesses or deep-seated wounds, and which prevent the exit of pus. The term is, also, applied to preternatural adhesions, which occur in cicatrices in the skin, in the urethra, or in inflamed serous or synovial membranes.

BRIGHT'S DISEASE OF THE KIDNEY, see Kidney, Bright's disease of the.

BRIGHTON, CLIMATE OF. The air of this fashionable watering place, on the south coast of England, is dry, elastic, and bracing. According to Sir James Clarke, its climate appears to the greatest advantage in the autumn and early part of the winter; when it is somewhat milder and more steady than that of Hastings. Accordingly, it is adapted for all cases in which a dry and mild air at this season of the year proves beneficial. In the spring months, owing to the prevalence of, and its exposure to, north-east winds, the climate is cold, harsh, and exciting to the delicate. It is well adapted for convalescents, and for all who require a dry and bracing sea air.

BRIMSTONE, Sulphur.

BRINE, Muria.

BRINTON ROOT, Leptandria purpurea.

BRION, Corallina.

BRIQUE, Brick.

BRIQUEBEC, MINERAL WATERS OF. This town is three leagues from Cherbourg, in France. The water contains chloride of iron.

BRISE-PIERRE ARTICULÉ, (F.) An instrument invented by Jacobson for crushing the stone in the bladder.

BRISTOL HOT WELL, *Bristolien'sis Aqua*. Bristol is about thirteen miles from Bath, in England. The water is an almost pure thermal; slightly acidulated. It contains chlorides of magnesium and sodium, sulphate of soda, sulphate of lime, carbonate of lime, carbonic acid, oxygen and azote. Temperature, 74° Fah. The *Hot Well* has been long celebrated. Its action is like that of the thermal waters in general. The climate of Bristol is mild, and hence the water has been celebrated for the cure of incipient pulmonary consumption. See Clifton.

BRIZOCERAS, Ergot.

BROAD, *Sax.* bpaꝺ, *Latus*, (F.) *Large*. Any body is so termed whose transverse extent is considerable compared with its length. The *Broad Bones*, such as the frontal, parietal, occipital, iliac, aid in forming the parietes of splanchnic cavities. *Broad Muscles* generally occupy the parietes of cavities, and especially those of the chest and abdomen. The epithet has also been applied to other parts—as to the *broad ligaments* of the womb, &c.

BROCCOLI, Brassica sabellica.

BROCHOS, βροχος, *Laqueus*, (q. v.) A bandage.

BROCH'THUS, βροχθος, *Gula*. The throat. Also, a kind of small drinking vessel.—Hippocr.

BROCHUS, βροχος. This name has been given to one who has a very prominent upper lip.—Castelli. According to others, it means one whose teeth project in front of the mouth.

BRO'DIUM. A synonym of *Jus* or *Jus'culum*. Broth, or the liquor in which any thing is boiled. *Bro'dium salis*—a decoction of salt.

BROIEMENT, see Cataract.

BROKEN-WINDEDNESS, Asthma.

BROMA, Aliment.

BROMATOG'RAPHY, *Bromatograph'ia*, from βρωμα, 'food,' and γραφη, 'a description.' *Bromog'raphy*. A description of aliments.

BROMATOL'OGY, *Bromatolog''ia, Sitiol'ogy*, from βρωμα, 'food,' and λογος, 'a discourse.' A treatise on food.

BROME, Bromine.

BROME'LIA ANA'NAS, called after Olaus Bromel, a Swede. *Car'duus Brazilia'nus, Ana'nas acostæ ova'tæ* seu *acule'atus, Anas'sa, Capa-Isiak'ka, Ana'nas*, or *Pine Apple*. A West India tree, which produces the most delicious of fruits.

Brome'lia Pinguin, *Ana'nas America'na, Pinguin, Broad-leaved wild Ana'nas*, &c. The West India plant, which affords the *Pinguin*

fruit. The fruit is refrigerant, and the juice, when ripe, very austere. It is used to acidulate punch. A wine is made from the Pinguin, which is very intoxicating, and has a good flavour.

BROMIDE OF IRON, see Bromine—b. of Mercury, see Bromine—b. of Potassium, see Bromine.

BROMINE, *Bro'minum*, *Bromin'ium*, *Brome*. A simple body, of a very volatile nature, and highly offensive and suffocating odour, whence its name, from βρωμος, 'a stench.' It is met with chiefly in sea-water, and in many animal and vegetable bodies that live therein. It has likewise been found in many mineral waters of this and other countries. In its chemical relations, it may be placed between chlorine and iodine. With oxygen it forms an acid, the *Bromic*, and with hydrogen another—the *Hydrobromic*.

PURE BROMINE, BROMIDE OF IRON, (dose gr. i or ij) and BROMIDE OF POTASSIUM or *Hydrobromate of Potassa*, (dose gr. iv to viij in the day,) have been used medicinally, and chiefly in scrofulosis, internally, as well as applied externally. Bromine may be dissolved in forty parts of distilled water, and six drops be commenced with as a dose. BROMIDES of MERCURY (*Hydrar'gyri Bro'mida*) have been given in syphilis. The *protobromide* and the *bibromide* are analogous in composition and medicinal properties to the corresponding iodides of mercury.

BROMINIUM, Bromine.

BROMINUM, Bromine.

BROMOS, βρωμος. One of the cerealia, supposed, by some, to be oats. See Avena.

BRONCHES, Bronchia—*b. Ganglions lymphatiques des*, Bronchial glands.

BRON'CHIA, *Bron'chiæ*, *Bronchi*, from βρογχος, 'the throat.' The Latins used the term *Bronchus*, for the whole of the trachea; whilst they called its ramifications *Bronchia*. *Bronchia*, *Bronchiæ*, and *Bronchi*, (F.) *Bronches*, now mean the two tubes, with their ramifications, which arise from the bifurcation of the trachea, and carry air into the lungs.

BRONCHIA, DILATATION OF THE. *Dilated Bronchia*. The physical signs of this condition are the following:—*Percussion* usually clear, but not unfrequently less so than natural, although very seldom quite dull. *Auscultation* detects coarse mucous or gurgling rhonchi, increased by the cough, combined with, or replaced by, bronchial or cavernous respiration, which is often effected as if by a sudden puff or whiff. The resonance of the voice is increased, but it seldom amounts to perfect pectoriloquy. The most common situations for dilated bronchia are the scapular, mammary, or lateral regions. They are almost always confined to one side.

BRONCHIA, OBLITERATION, OR COMPRESSION OF THE. The inspiratory murmur on auscultation is weaker or wholly suppressed over a limited portion of the chest; the expiration is generally more distinct and prolonged: all the other conditions are natural.

BRON'CHIAL or BRONCHIC. That which relates to the bronchia.

BRON'CHIAL ARTERIES, (F.) *Artères Bronchiques*. These are generally two in number, one going to each lung. They arise from the thoracic aorta, and accompany the bronchia in all their ramifications.

BRON'CHIAL CELLS, (F.) *Cellules bronchiques*. The *Air-cells*; the terminations of the bronchia.

BRONCHIAL COUGH, (F.) *Toux bronchique*, *T. tubaire*. This generally accompanies bronchial respiration. They both indicate obstruction to the entrance of air into the air-cells.

BRON'CHIAL GLANDS. (F.) *Glandes bronchiques* ou *Ganglions lymphatiques des bronches*, are numerous glands of an ovoid shape; of a reddish hue in the infant, and subsequently brown and black, seated in the course of the bronchia. Their functions are unknown. The Bronchial glands may be presumed to be affected by scrofulosis, when, in addition to the existence of tumours in the neck, percussion gives a dull sound under the upper and central part of the sternum, whilst there is no appreciable lesion of the lungs.

BRON'CHIAL NERVES, (F.) *Nerfs Bronchiques*, are furnished by the two pulmonary plexuses.

BRONCHIAL PHTHISIS, see Phthisis bronchial—b. Respiration, see Murmur, Respiratory

BRON'CHIAL VEINS, arise from the last divisions of the arteries of the same name, and pass, on the right side, into the vena azygos; on the left, into the superior intercostal.

BRONCHIC, Bronchial.

BRONCHIEC'TASIS, *Dilata'tio bronchid'rum*, from βρογχος, 'a bronchus,' and εκτασις, 'dilatation.' Dilatation of one or more bronchial tubes.

BRONCHITE CONVULSIVE, Pertussis.

BRONCHI'TIS, *Inflamma'tio bronchio'rum*, *Catarrhus Pulmo'num*, *C. bronchiorum*, *Pleuri'tis hu'mida*, *P. bronchia'lis*, *Bronchos'tasis*, *Pul'monary Catarrh*, *Angi'na bronchialis*. (F.) *Inflammation des Bronches*. Inflammation of the lining membrane of the bronchial tubes. This is always more or less present in cases of pulmonary catarrh; and is accompanied by cough, mucous expectoration, dyspnœa, and more or less uneasiness in breathing. The *acute* form is accompanied with all the signs of internal inflammation, and requires the employment of antiphlogistics followed by revulsives. The *chronic* form, *Tussis seni'lis*, *Catar'rhus seni'lis*, *Rheuma catarrha'lē*, *Peripneumo'nia notha* (q. v.) *Bronchorrhœ'a acu'ta*, *Winter cough*, *Chronic Catarrh*, may be confounded with phthisis; from which it must be distinguished mainly by the absence of hectic fever and of the physical signs that are characteristic of the latter, as well as by the nature of the expectoration, which is generally mucous, although at times muco-purulent. When the expectoration is little or none, the bronchitis is said to be *dry*, *dry catarrh*, (F.) *Catarrhe Sec*.

BRONCHITIS, Catarrh—b. Asthenica, Peripneumonia notha—b. Membranacea, Polypus bronchialis—b. Plastic, Polypus bronchialis—b. Pseudomembranous, Polypus bronchialis—b. Summer, Fever, hay.

BRONCHIUS. Sterno-thyroideus.

BRONCHLEMMITIS, Polypus bronchialis.

BRONCHOCE'LĒ, from βρογχος, 'a bronchus,' and κηλη, 'tumour.' An inaccurate name for the affection which is called, also, *Bo'chium*, *Botium*, *Hernia gut'turis*, *Guttur tu'midum*, *Trachelophy'ma*, *Hernia guttura'lis*, *Thyroce'lē*, *Thyreoce'lē*, *Thyremphraxis*, *Thyreon'cus*, *Thyron'cus*, *Deironcus*, *Deron'cus*, *Thyrophrax'ia*, *Gossum*, *Exechebron'chus*, *Gongro'na*, *Struma*,

Bocium, *Hernia bronchia'lis*, *Tracheloce'lē*, &c., the *Derbyshire neck*, *Swelled neck*, *Wen*, *Goitre*, &c. (F.) *Goître*, *Gouètre*, *Hypertrophie du Corps Thyroïde*, *Grosse Gorge*, *Gros Cou*. This is no rupture, but consists of an enlargement of the thyroid gland. It is common at the base of lofty mountains in every part of the world; and has been supposed to be owing to the drinking of snow-water, but it occurs where there is no snow. The tumour is sometimes very extensive. Iodine has great power over it, and will generally occasion its absorption, when the case has not been of such duration as to have ended in a cartilaginous condition.

BRONCHOPHONY, Resonance.

BRONCHOPLAS'TIC, *Bronchoplas'ticus;* from βρογχος, 'a bronchus,' and πλασσω, 'I form.' An epithet given to the operation for closing fistulæ in the trachea.

BRONCHOPNEUMO'NIA, from βρογχος, 'a bronchus,' and *Pneumonia*. Inflammation of the bronchia and lungs.

BRONCHORRHŒ'A, (F.) *Bronchorrhée*, *Catarrhe pituiteux*, *Phlegmorrhagie pulmonaire*, *Flux bronchique*, from βρογχος, 'bronchus,' and ρεω, 'I flow.' An increased secretion of mucus from the air passages, accompanied or not by inflammation:—a gleet (q. v.) as it were, of the pulmonary mucous membrane.

Bronchorrhœa Acuta, Bronchitis (chronic.)

BRONCHOSTASIS, Bronchitis.

BRONCHOTOME, *Bronchot'omus*, from βρογχος and τεμνειν, 'to cut.' A kind of lancet, with a blunt and rounded point, mounted on a handle, and fitted to a canula, which passes in along with it, and is allowed to remain in the opening made in the trachea. The instrument is not much used.

BRONCHOT'OMY, *Bronchotom'ia*, (F.) *Bronchotomie*. Same etymology. A surgical operation, which consists in making an opening either into the trachea, (*Tracheot'omy:*) into the larynx, (*Laryngot'omy:*) or into both, (*Tracheolaryngot'omy*,) to extract foreign bodies or to permit the passage of air to the lungs. These different parts are divided transversely or vertically, according to circumstances.

BRONCHUS, Trachea.

BROOKLIME, Veronica beccabunga.

BROOM, Sophora tinctoria, Spartium scoparium—b. Butcher's, Ruscus—b. Clover, Sophora tinctoria—b. Indigo, Sophora tinctoria—b. Rape, of Virginia, Orobanche Virginiana—b. Spanish, Spartium junecum—b. Yellow, Sophora tinctoria.

BROSSARDIÈRE, MINERAL WATERS OF. Brossardière is a chateau in Bas-Poitou, France. The waters contain carbonates of iron and lime, chloride of sodium, and sulphate of lime. They are aperient.

BROSSE, Brush.

BROUILLARD, Caligo.

BROUSSAIST. One who is a believer in, and professor of, the physiological and pathological opinions of Broussais. The system itself is called Broussaism or the *Physiological Doctrine*.

BROW, Front.

Brow-Ague, Neuralgia frontalis.

BROWN-RED, Colcothar.

BROWN'IAN, BROWNO'NIAN, or BRUNO'NIAN. Relating to the system or opinions of John Brown.

BROWNISM, BRU'NONISM, or BRUNO'NIANISM. The doctrines of Brown.

BROWNIST, BROWNO'NIAN, or BRUNO'NIAN. A follower of the system of Brown.

BRU'CEA ANTI-DYSENTER'ICA. Called after Bruce, the Abyssinian traveller. *B. ferrugin'ea*, *Angustu'ra spuria*, (F.) *Fausse Angusture*, *A. Ferrugineuse*. The systematic name of the plant, whence is obtained the *false Angustura Bark*. It affords Brucia.

BRUCIA, Brucine.

BRUCINE, BRU'CIA, BRUCI'NA, *Vom'icine*. An organic, salifiable base, discovered in the false Angustura—*Brucea anti-dysenterica*, and obtained from *Strychnos nux vomica*. It is of a pearly white; crystallized in oblique prisms with a parallelogrammatic base; very bitter, slightly acrid and styptic, and soluble in water, but more so in alcohol. Brucia is a less active poison than strychnia. It resembles it, however, and may be used as a substitute for it and for the extract of nux vomica. Dose, half a grain.

BRUCKENAU, MINERAL WATERS OF. These springs are in Bavaria, and contain carbonic acid and iron.

BRUCOURT, MINERAL WATERS OF. Brucourt is three leagues and a half from Caen in Normandy. The waters contain carbonic acid, chloride of sodium, and sulphate of soda, much sulphate of lime, &c.

BRUISE, Contusion.

BRUISEWORT, Bellis Saponaria.

BRUISSEMENT, (F.) *Frem'itus*. This word has much the same signification as *Bourdonnement*, (q. v.) as well as *Bruit*.

BRUIT, (F.) 'Sound.' A term applied to various sounds heard on percussion and auscultation, viz.

BRUIT DE CRAQUEMENT, *B. de Tiraillement*, *Bruit de cuir neuf*, 'sound of crackling, or bursting, or of new leather.' A sound produced by the friction of the pericardium, when dried and roughened by inflammation.

BRUIT DU CŒUR FŒTAL, *Battemens doubles; Double bruit du Cœur du Fœtus*. The pulsations of the fœtal heart heard in auscultation in the latter half of utero-gestation.

BRUIT DE CUIR NEUF, *Bruit de craquement*.

BRUIT DE DIABLE, *Ronflement de Diable*, *Bruit de souffle à double courant*, 'noise of the diable or humming-top.' *Venous Hum*. A high degree of *Bruit de soufflet*, heard on auscultating the arteries. It denotes an impoverished state of the blood.

BRUIT DOUBLE DU CŒUR DU FŒTUS, *Bruit du Cœur fœtal*—*b. de Frôlement*, see *Frôlement*.

BRUIT DE FROTTEMENT ASCENDANT ET DESCENDANT, 'Sound of friction of ascent and descent.' Sounds produced by the rubbing of the lung against the parietes of the chest, as it rises and falls during inspiration and expiration. It is distinctly heard in pleuritis, when the pleura has become roughened by the disease. *Friction sounds* or *To-and-fro sounds*, are also heard in pericarditis and peritonitis.

BRUIT HUMORIQUE, *B. Hydropneumatique*. The sound afforded on percussion when organs are filled with liquid and air.

BRUIT HYDROPNEUMATIQUE, *Bruit humorique*.

BRUIT MUSCULAIRE. The sound accompanying the first sound of the heart, referred by some to muscular contraction. Called, also, *Bruit rotatoire*, in consequence of its having been thought to resemble the rumbling of distant wheels.

BRUIT MUSICAL. Sifflement modulé.

BRUIT DE PARCHEMIN, 'Parchment tone.' A sound as if produced by two sheets of parchment applied to each other. It is said to be produced by thickening and rigidity of the valves of the heart.

BRUIT PLACENTAIRE, B. de soufflet placentaire, B. utérin, Souffle utérin, Souffle placentaire, Placental bellows' sound, Utero-placen'tal murmur, Uterine murmur. The bellows' sound heard on auscultating over the site of the placenta in a pregnant female. It does not appear to be owing to the placental vessels: but to the uterine tumor pressing upon the large vessels of the mother.

BRUIT DE POT FÉLÉ; 'Sound of a cracked vessel.' This sound is heard on percussion, when a cavern in the lungs is filled with air, and has a narrow outlet.

BRUIT DE RACLEMENT, 'Sound of scraping.' A sound produced by the scraping of hard, solid membranes, as the pericardium, against each other.

BRUIT DE RÂPE, 'Sound of a rasp.' A sound heard during the contraction of either the auricles or ventricles. It is constant; and the contraction of the cavity is more prolonged than natural, and emits a hard, rough, and—as it were—stifled sound.

It indicates contraction of the valvular orifices, by cartilaginous deposites, or ossification, and accompanies the contraction of the auricles if the auriculo-ventricular valves be concerned, —that of the ventricles if the semilunar valves be the seat of the disease.

BRUIT ROTATOIRE, Bruit musculaire.

BRUIT DE SCIE, or 'saw-sound,' and Bruit de lime à bois, or 'file-sound,' resemble the *Bruit de Rape,* (q. v.)

BRUIT DE SOUFFLE à DOUBLE COURANT, Bruit de Diable.

BRUIT DE SOUFFLET, Bruit de Souffle, 'bellows' sound,' 'Blowing sound.' A sound like that of a bellows, heard occasionally by the ear applied to the chest during the contraction of the ventricles, auricles, or large arteries. It coexists with affections of the heart, but is heard, also, without any disease in that organ, —whenever, indeed, an artery is compressed. An *Encephalic bellows' sound,* has been described by Dr. Fisher, of Boston. It is heard on applying the ear to the occiput or to the top of the head; and is considered to indicate turgescence of vessels, or inflammation. When such turgescence exists, the vessels are compressed, and the compression gives rise to the sound in question.

BRUIT DE SOUFFLET PLACENTAIRE, Bruit placentaire—b. de Tiraillement, Bruit de craquement.

BRUIT DE TAFFETAS. 'Sound of Taffeta.' '*Sarcenet sound.*' A respiratory sound so named by M. Grisolle, from its resembling the sound caused by the tearing of a piece of taffeta; and which he considers to indicate hepatization of the lung limited to the surface in pneumonia.

BRUIT TYMPANIQUE, 'Tympanic sound.' The clear sound afforded by percussing the stomach and intestines when containing air.

BRUIT UTÉRIN, B. placentaire.

BRULURE, Burn.

BRUNELLE, Prunella.

BRUNNER'S GLANDS, *Brunneri Glan'dulæ, Glandulæ solita'riæ.* Muciparous follicles of a small size, seated between the mucous and muscular coats of the stomach, along the two curvatures of that organ, and in the small intestines, especially the duodenum; so called from their discovery having generally been attributed to Brunner.

BRUNONIAN, Brownian.

BRUNONIANISM, Brownism.

BRUNUS Erysipelas.

BRUSCUS, Ruscus.

BRUSH, *Scop'ula.* (F.) *Brosse.* A well known instrument, used in medicine chiefly for the following purposes. 1. To clean the teeth. 2. To remove the saw-dust, which adheres to the teeth of the trephine, during the operation of trephining. 3. To rub the surface of the body, for the purpose of exciting the skin, and favouring transpiration. Westring, a Swedish physician, has recommended metallic brushes for the purpose of conveying galvanism to a part. These brushes consist of a plate of ebony fitted to another of gold, in which threads of the same metal are fixed;—the brush being connected with one of the poles of the galvanic pile.

Brush, Stomach, Excutia ventriculi.

BRUTA, Juniperus sabina.

BRUTIA. A sort of thick pitch, obtained from Brutia in Italy. From the *Pix Brutia* was obtained the *Oleum Picinum.*

Brutia, Instinct.

BRUTINO, Terebinthina.

BRUXANELI. A Malabar tree, the bark and leaves of which have a strong smell, and are astringent. On the coast of Malabar, its juice, mixed with butter, is applied to boils. Its bark is esteemed to be diuretic, and its roots anti-arthritic.

BRUYÈRE VULGAIRE, Erica vulgaris.

BRUYÈRES, MINERAL WATERS OF. Bruyères is a small village, 7½ leagues from Luneville. The waters are acidulous and chalybeate.

BRYCHETHMOS, Rugitus.

BRYGMUS, *βρυγμος, Strido'r Den'tium.* (q. v.) Grinding of the teeth.

BRYO'NIA ALBA; *White Bry'ony, Vitis alba sylves'tris, Agros'tis, Agriam'pelos, Am'pelos agria, Archeos'tris, Echetro'sis, Bryo'nia as'pera, Cedros'tis, Chelido'nium, Labrus'ca, Melo'thrum, Ophrostaph'ylon, Psilo'thrum, Bryonia Dioi'ca. Nat. Ord.* Cucurbitaceæ. *Sex. Syst.* Monœcia Monadelphia. (F.) *Couleuvrée, Vigne vierge, V. blanche.* The root is large and succulent, and has an acrid, bitter, and disagreeable taste. It is a drastic cathartic. Externally, it has been applied, in form of cataplasm, in gout. When repeatedly washed, a good starch is obtained from it. The active principle has been separated from it, and called *Bry'onine.*

Bryonia Mechoacanna Nigricans, Convolvulus jalapa—b. Peruviana, Convolvulus jalapa.

BRYONINE, see Bryonia alba.

BRYTIA, Marc of grapes.

BRYTON, Cerevisia.

BU, *βου,* abbreviation of *βους,* 'an ox;' in com-

position expresses, 'excess, greatness.' Hence *Bulimus*, *Buphthal'mia*, &c.

BUBASTECORDIUM, Artemisia vulgaris.

BUBE, Pustule.

BUBO, βουβων, *Pand'chia*, *Panus inguina'lis*, *Adenophy'ma inguinalis*, *Bubonopa'nus*, *Cambu'ca*, *Angus*, *Boubon*, *Codocelē*, *Codoscella*, (F.) *Bubon*, *Poulain*. In the works of Hippocrates and Galen, this word sometimes signifies the groin; at others, the inguinal glands; and at others, again, swelling or inflammation of these parts. The moderns apply the term to an inflammatory tumour seated in the groin or axilla, and they generally distinguish, 1. *Simple or sympathetic Bubo*, which is independent of any virus in the economy. 2. *Venereal Bubo*, (F.) *Bubon vénérien*, which is occasioned by the venereal virus. 3. *Pestilential Bubo*, or *B. symptomatic of the Plague*. The last two have by some been called *malignant Bubo*, (F.) *Bubon malin*. *Primary Bubo*, (F.) *Bubon primitif*, shows itself with the first symptoms of syphilis: the *consecutive* not till afterwards.

BUBON, Bubo, Inguen—b. Gummiferum, see Ammoniac gum.

Bubon Gal'banum. The systematic name of a plant which has been supposed to afford the galbanum. *Meto'pion*. The plant is also called *Fer'ula Africa'na*, *Oreoseli'num Africa'num*, *Ani'sum frutico'sum galbanif'erum*, *Anisum Africa'num frutes'cens*. *The long-leaved or lovage-leaved Gal'banum*. *Nat. Ord.* Umbelliferæ. The plant can scarcely, however, be considered to be determined. Galbanum is the gummi-resinous juice of this tree. Its odour is fetid, and taste bitter and acrid: the agglutinated tears are of a white colour, on a ground of reddish-brown. It forms an emulsion, when triturated with water, and is soluble in proof spirit of wine, and vinegar: s. g. 1.212. It has been given as an antispasmodic, and expectorant, in pill or emulsion. Dose, from gr. 10 to 60. Externally, it is applied as a cataplasm.

Bubon Macedon'icum, *Petroseli'num Macedon'icum*, *A'pium petræ'um*, *Petra'pium*, (F.) *Persil de Macédoine*, *Macedo'nian Parsley*. Its properties are similar to those of common parsley, but weaker and less grateful. The seeds are an ingredient in the celebrated compounds—Mithridate and Theriac.

BUBO'NIUM, *Aster At'ticus*, *Golden Starwort*. A plant anciently supposed to be efficacious in diseases of the groin, from βουβων, 'the groin.'

BUBONOCE'LE, from βουβων, 'the groin,' and κηλη, 'tumour,' 'rupture.' *Hernia inguina'lis*, (F.) *Hernie inguinale*, *In'guinal Hernia*, or *Rupture of the Groin*. Some surgeons have confined this term to hernia when limited to the groin, and have called the same affection, when it has descended to the scrotum, *Oscheoce'lé* or *Scrotal Hernia*. The rupture passes through the abdominal ring: and, in consequence of the greater size of the opening in the male, is more frequent in the male sex.

BUBONOPANUS, Bubo.

BUBONOREX'IS, from βουβων, 'the groin,' and ρηξις, 'a rupture.' A name given to bubonocele when accompanied with a division of the peritoneum, or when, in other words, it is devoid of a sac.

BUBON'ULUS. A diminutive of *Bubo*, (q. v.) A painful swelling of the lymphatics of the penis, extending along the dorsum of that organ to the groin. It is an occasional accompaniment of gonorrhœa.

BUCAROS, Terra Portugallica.

BUCCA, *Gnathos*. The mouth. The cheeks and hollow of the cheeks. Also, the vulva.

BUCCACRATON, from *Bucca*, and κραω, 'I mix.' A morsel of bread sopped in wine, which served of old for a breakfast.—Linden.

BUCCAL, *Bucca'lis*, from *Bucca*, 'the mouth,' or rather 'the cheek.' That which concerns the mouth, and especially the cheeks.

Buccal Artery, *A. Sus-maxillaire*,—(Ch.) arises from the internal maxillary or from some of its branches, as the *Temporalis profunda antica*, or the *Alveolar*. It distributes its branches to the buccinator muscle, and to the buccal membrane.

Buccal or Molar Glands. Mucous follicles, seated in the buccal membrane, opposite the molar teeth. They secrete a viscid humour, which mixes with the saliva, and lubricates the mouth.

Buccal Membrane, (F.) *Membrane Buccale*. The mucous membrane, which lines the interior of the mouth.

Buccal Nerve, or *Buccinator Nerve*, *Bucco-labial*—(Ch.,) is given off by the inferior maxillary. It sends its branches to the cheek, and especially to the buccinator muscle.

Buccal Vein, follows the artery.

BUCCEA and BUCCEL'LA. The fleshy excrescence of nasal polypus, so called because it was believed to proceed from the mouth.—Paracelsus. Also, a mouthful.

BUCCELA'TON or BUCCELA'TUS. A loaf-shaped cathartic medicine; made chiefly of scammony.—Aëtius, Paulus of Ægina.

BUCCINA, Turbinated bones.

BUCCINA'TOR, from *buccinare*, 'to sound the trumpet.' The *Buccina'tor Muscle*, *Retracʹtor An'guli Oris*, *Bucco-Alvéolo-maxillaire*, *Alvéolo-labial*—(Ch.,) *Manso'rius*, is situate in the substance of the cheeks. It extends between the posterior portions of the alveolar arches of the two jaws and the commissure of the lips, which it draws backward. It assists in mastication, by pushing the food back towards the teeth; and, if the cheeks be distended by air, its contraction forces it out.

BUCCO. One who is blub-cheeked, or wide-mouthed.

BUCCO-ALVÉOLO-MAXILLAIRE, Buccinator.

BUCCO-LABIAL NERVE, Buccal nerve.

BUCCO-PHARYNGE'AL, *Bucco-pharyngeʹus*, (F.) *Bucco-pharyngien*. Belonging to the mouth and pharynx. The *Bucco-pharyngeʹal Aponeuro'sis*, or *Intermaxʹillary Ligʹament*, extends from the internal ala of the pterygoid process to the posterior part of the lower alveolar arch, and affords attachment, anteriorly, to the buccinator, and posteriorly to the constrictor pharyngis superior.

BUC'CULA, from *Bucca*, 'the mouth.' A small mouth. The fleshy part beneath the chin.—Bartholine.

BUCCELLA'TIO. A mode of arresting hemorrhage, by applying a pledget of lint to the bleeding vessel.—Avicenna, Fallopius.

BUCERAS, Trigonella fœnum.

BUCHU-LEAVES, Diosma crenata.

BUCKBEAN, Menyanthes trifoliata — b. American, Menyanthes verna.

BUCKET FEVER, Dengue.

BUCKEYE, Æsculus hippocastanum.

BUCKHO, Diosma crenata.

BUCKTHORN, PURGING, Rhamnus.

BUCKWHEAT, Polygonum fagopyrum—b. Plant, eastern, Polygonum divaricatum.

BUCNEMIA, see Elephantiasis—b. Tropica, see Elephantiasis.

BUCTON, Hymen.

BUFF, INFLAMMATORY, Corium phlogisticum.

BUFFY COAT, Corium phlogisticum.

BUG, BED, Cimex.

BUGANTIA, Chilblain.

BUGLE, Prunella—b. Common, Ajuga reptans—*b. Pyramidale*, Ajuga—*b. Rampante*, Ajuga reptans—b. Water, Lycopus virginicus—b. Weed, Lycopus.

BUGLOSE, Anchusa officinalis.

BUGLOSS, Dyer's, Anchusa tinctoria—b. Garden, Anchusa officinalis—b. Upright, Ajuga.

BUGLOSSA, Anchusa officinalis.

BUGLOSSUM ANGUSTIFOLIUM MAJUS, Anchusa officinalis—b. Latifolium, Borago officinalis—b. Sativum, Anchusa officinalis—b. Sylvestris, Anchusa officinalis—b. Tinctorum, Anchusa tinctoria—b. Verum, Boracic acid—b. Vulgare majus, Anchusa officinalis.

BUGULA, Ajuga.

BUGRANDE ÉPINEUSE, Ononis spinosa.

BUGRANE, Ononis spinosa—*b. des Champs*, Ononis arvensis.

BUIS, BUXUS.

BUISARD, MINERAL WATERS OF. Buisard is two leagues from Chateau-Thierry, in France. The water contains chloride of calcium and carbonate of lime.

BULB, *Bulbus*, (F.) *Bulbe*. A name, given by anatomists to different parts which resemble, in shape, certain bulbous roots. The *Bulb of the Aorta* is the great sinus of the Aorta. *Bulb of a Tooth;* the vascular and nervous papilla contained in the cavity of a tooth. The *Bulb* or *Root of the Hair* is the part whence the hair originates. The *Bulb of the Urethra* is the dilated portion formed by the commencement of the *Corpus spongiosum* towards the root of the penis. We say, also, *Bulb*, for *Globe, of the eye.*

BULB, RACHIDIAN, see Medulla oblongata.

BULBE DE LA VOÛTE A TROIS PILIERS, Mamillary tubercles.

BULBI PRIORUM CRURUM FORNICIS, Mamillary tubercles.

BULBOCASTANEUM, Bunium bulbocastanum.

BULBO-CAVERNOSUS, Accelerator urinæ—*b. Syndesmo-caverneux*, Accelerator urinæ—*b. Urétral*, Accelerator urinæ.

BULBONACH, Lunaria rediviva.

BULBUS ESCULEN'TUS. The *Es'culent Bulb:* a particular kind, so denominated by the ancients. It is supposed to have been the *Cepa Ascalon'ica*.—Dioscorides, Celsus, Pliny, &c.

BULBUS VOMITO'RIUS. A plant, said by Dioscorides to be emetic and diuretic. It is the *Musk-grape flower*, according to Ray:—the *Hyacinthus Muscari*.

BULGA, Vulva.

BULIMIA, Boulimia.

BU'LITHOS, from βους, 'an ox,' and λιθος, 'a stone.' A bezoar or stone, found in the kidneys, gall-bladder, or urinary bladder of an ox or cow.

BULLA. (F.) *Bulle*. A *Bleb*. A portion of the cuticle, detached from the skin by the interposition of a transparent, watery fluid. It forms the 4th order in Willan's and Bateman's arrangement of cutaneous diseases, and includes erysipelas, pemphigus, and pompholyx. By some, Bulla has been used synonymously with *Pemphigus*, (q. v.) See, also, Hydatid.

BULLACE PLUM. Prunus invitia.

BULLÆ ROTUNDÆ CERVICIS UTERI, Nabothi glandulæ.

BULL-FISTS, Lycoperdon.

BUMELLIA, Fraxinus excelsior.

BUNA, Coffea Arabica.

BUNDURH, Corylus avellana.

BUNIAS, Brassica napus.

BU'NIOID, *Bunioi'des, Na'piform;* from βουνιον, 'a turnip,' and ειδος, 'resemblance.' An epithet for a form of cancer, bearing some resemblance to a turnip.

BUNION, Bunyon.

BUNITES VINUM. A wine, made by infusing the *Bunium* in must. It is stomachic, but scarcely ever used.

BU'NIUM BULBOCAS'TANUM, βουνιον, so called, it has been supposed, from growing on hills, from βουνος, 'a hill.' *Balanocas'tanum*. The systematic name of a plant, whose root is called the *Pig-nut*, (q. v.) *Agriocas'tanum, Nu'cula terres'tris, Bulbocasta'neum, Bulbocas'tanum majus et minus, Earth-nut, Hawk-nut, Kipper-nut*, (F.) *Terrenoix*. The root is tuberous, and is eaten raw or roasted. It has been supposed of use in strangury. It is not employed in medicine.

BUNNIAN, Bunyon.

BUN'YON, *Bun'ion, Bun'nian*, from βουνος, 'an eminence.' (?) An enlargement and inflammation of the bursa mucosa at the inside of the ball of the great toe.

BUPEINA, Boulimia.

BUPHTHALMI HERBA, Anthemis tinctoria.

BUPHTHAL'MIA, *Buphthal'mos*, from βους, 'an ox,' and οφθαλμος, 'an eye.' *Ox eye*. Under this name, the generality of authors have designated the first stage of hydrophthalmia. Others, with Sabatier, mean, by it turgescence of the vitreous humour, which, by pushing the iris forwards, forms around the crystalline a sort of border.

BUPHTHALMUM CRETICUM, Anthemis Pyrethrum—b. Majus, Chrysanthemum leucanthemum.

BUPHTHALMUS, Hydrophthalmia, Sempervivum tectorum.

BUPLEUROIDES, Bupleurum rotundifolium.

BUPLEU'RUM ROTUNDIFO'LIUM, *Bupleu'ron, Bupleuroï'des*, from βου, augmentative, and πλευρον, 'side.' (F.) *Buplèvre, Percefeuille, Round-leaved Hare's-Ear*, or *Thorow-wax*. The herb and seeds are slightly aromatic. It was formerly celebrated for curing ruptures, being made into a cataplasm with wine and oatmeal.

BUPLÈVRE, Bupleurum rotundifolium.

BURAC, *Borax*. Also, any kind of salt. (Arabic.)

BURDOCK, Arctium lappa—b. Lesser, Xanthium.

BURIS. Hernia, accompanied by scirrhous tumefaction; or, perhaps, a scirrhous tumour only.—Avicenna.

BURN. Sax. bernan or byrnan, 'to burn

or bren.' *Ustio*, *Ambus'tio*, *Adus'tio*, *Tresis Causis*, *Erythe'ma Ambus'tio*, *Causis*, *Encau'sis*, *Combustu'ra*, *Catacau'ma*, *Combus'tio*, (F.) *Brûlure*. An injury produced by the action of too great heat on the body. Burns are of greater or less extent; from the simple irritation of the integument to the complete destruction of the part. The consequences are more or less severe, according to the extent of injury, and the part affected. Burns of the abdomen, when apparently doing well, are sometimes followed by fatal results. Their treatment varies: at times, the antiphlogistic being required; at others, one more stimulating.

BURNEA, see Pinus Sylvestris.

BURNING, or BRENNING. A disease mentioned by old historians, from which authors have unsuccesfully endeavoured to demonstrate the antiquity of syphilis.—Parr.

BURRHI SPIRITUS MATRICA'LIS. The *Spirit of Burrhus for diseases of the Womb*. It is prepared by digesting, in alcohol, equal parts of myrrh, olibanum, and mastic. Boerhaave frequently prescribed it.

BURSA TESTIUM, Scrotum—b. Virilis, Scrotum.

BURSÆ MUCOSÆ, *Bursæ muco'sæ vesicula'res*, *Bursæ synovia'les*, *Synovial Crypts* or *Follicles*, (F.) *Bourses Synoviales*. Small membranous sacs, situate about the joints, particularly about the large ones of the upper and lower extremities, and, for the most part, lying under the tendons. They are naturally filled with an oily kind of fluid, the use of which is to lubricate surfaces over which tendons play. In consequence of bruises or sprains, this fluid sometimes collects to a great extent. The Bursæ are, generally, either of a roundish or oval form, and they have been arranged under two classes, the *spherical* and *vaginal*.

BURSÆ SYNOVIALES, Bursæ mucosæ.

BURSALIS, Obturator internus.

BURSE'RA GUMMIF'ERA, *Terebinth'us gummif'era*, *Jamaica Bark Tree*. A resin exudes from this tree, which is solid externally, as met with in the shops; softish internally; of a vitreous fracture; transparent; of a pale yellow colour; turpentine smell, and sweet, perfumed taste. It has been used like balsams and turpentines in general, and is called, by the French, *Cachibou*, *Chibou*, and *Resine de Gomart*.

BURSULA, Scrotum.

BURWEED, Xanthium.

BURWORT, Ranunculus acris.

BURTHISTLE, Xanthium.

BUSSANG, MINERAL WATERS OF. Bussang is a village in the department of Vosges, France. The waters are acidulous chalybeates.

BUSSEROLLE, Arbutus uva ursi.

BUSSII SPIRITUS BEZOAR'TICUS. The *Bezoar'dic Spirit of Bussius*. A preparation, regarded as sudorific, diuretic, and antispasmodic; obtained by distilling subcarbonate and muriate of ammonia, amber, oil of cedar or juniper, &c.

BUTE, ISLAND OF, CLIMATE OF. This island is in the Frith of Clyde, about 18 miles below Greenock. The climate is mild and equable, but rather moist; and, as a winter residence, it holds out advantages for those only as appear to demand such a condition of the atmosphere. The climate resembles, in character, that of the S. W. of England and France, and the channel islands; although its temperature is lower.

BUTEA FRONDOSA, see Kino. A tree common in Bengal, and in the mountainous parts of India; *Nat. Ord.* Leguminosæ; from which *gum butea* flows. Dr. Pereira found this gum to be identical with a specimen marked *gummi rubrum astringens*—the *gomme astringente de Gambie* of M. Guibourt. By some this gum has been confounded with kino.

BUTIGA, Gutta rosea.

BUTOMON, Iris pseudacorus.

BUTTER, from βουτυρον; itself from βους, 'ox,' and τυρος, 'any thing coagulated.' *Buty'rum*, *Pice'rion*, (F.) *Beurre*. A sort of concrete oil, obtained from the cream that forms on the surface of the milk furnished by the females of the mammalia; especially by the cow and the goat. Fresh butter is very nutritious, whilst the rancid is irritating. The ancient chemists gave the name *Butter* to many of the metallic chlorides. It has also been applied to vegetable substances, which resemble, in some respects, the butter obtained from milk.

BUTTER OF BAMBOUC or BAMBUC, (F.) *Beurre de Bambouc* ou *Bambuk*. A vegetable oil obtained from a species of almond, and used in Senegal in neuralgic and rheumatismal pains.

BUTTER OF CACAO, *Oil of Cacao*, *Oleum Cacao spissa'tum*, *O. Theobro'mæ Cacao expres'sum*, (F.) *Beurre de Cacao*, *Huile de Cacao*. A fat substance, of a sweet and agreeable taste, obtained from the *Theobroma cacao*, or chocolate nut.

BUTTER OF COCOA, (F.) *Beurre de Coco*. A fatty, concrete substance, which separates from the milk of the cocoa nut. It is sweet and agreeable.

BUTTERBUR, Tussilago petasites.

BUTTERCUPS, Ranunculus acris.

BUTTERFLY-WEED, Asclepias tuberosa.

BUTTERMILK, (F.) *Babeurre*, *Lait de Beurre*. The thin, sour milk, separated from the cream by churning. It contains caseum and a little butter. It is a refreshing drink when newly made.

BUTTERWORT, Pinguicola vulgaris.

BUTTONBUSH, Cephalanthus occidentalis.

BUTTONWOOD SHRUB, Cephalanthus occidentalis.

BUTUA, Pareira brava.

BUTYRUM, Butter—b. Amygdalarum dulcium, Confection (almond)—b. Saturni, Unguentum plumbi superacetatis—b. Zinci, Zinci chloridum.

BUVEUR, Rectus internus oculi.

BUXTON, MINERAL WATERS OF, *Buxtonien'sis Aquæ*. Buxton is a village in Derbyshire. The springs are thermal, and about 82° Fahrenheit. They contain sulphate of soda, chloride of calcium, chloride of sodium, chloride of magnesium, carbonate of lime, carbonic acid, and azote. They are used in cases in which thermal springs, in general, are recommended. They contain little or no mineral impregnation.

BUXUS, *Buxus sempervi'rens*. The *Box-tree*. (F.) *Buis* ou *Bouis*. The leaves are bitter and aromatic, and, as such, have been used in medicine, in cases of worms, dyspepsia, &c., in the form of decoction. They are sometimes,

also, added to beer. The seed was anciently called *Carthe'gon.*

BYNE, Malt.

BY'RETHRUM. A sort of cap or *Couvre-chef*, filled with cephalic substances.—Forestus.

BYRSA, *βυρσα.* A leather skin to spread plasters upon.

BYRSODEP'SICON. A tan stuff, with which Cælius Aurelianus sprinkled wool, which he applied in certain cases to the umbilical region: from *βυρσα*, 'leather,' and *δεψεω*, 'I tan.'

BYRSODEPSICUM PRINCIPIUM, Tannin.

BYSAU'CHEN, from *βυω*, 'I stop up,' and *αυχην*, 'the neck.' A morbid stiffness of the neck.

BYSSOS, Vulva.

BYSSUS or BYSSUM. The ancients gave this name to several vegetable substances, which were used for the fabrication of stuffs, prized for their fineness, colour, and rarity of material. It is now chiefly applied to the filaments, by the aid of which the acephalous mollusca attach their shells to the rocks. B. was formerly also applied to the *female pudendum.*

BYTHOS, *βυθος*, 'depth.' An epithet used by Hippocrates for the fundus of the stomach.

C.

C. This letter in the chemical alphabet signifies nitre. It is also sometimes used in prescriptions for calx.

CAA-AP'IA, *Dorste'nia Brazilien'sis.* The root, according to Piso, is employed as emetic and anti-diarrhœic.

CAA-ATAY'A. A plant of Brazil, supposed to be a species of gratiola. It is very bitter, and considered to be one of the best indigenous cathartics.

CAACICA, Euphorbia capitata.

CAA-GHIYU'YO, *Frutex bac'cifer Brazilien'sis.* A shrub of Brazil, whose leaves, in powder, are considered detersive.

CAAOPIA, Hypericum bacciferum.

CAAPEBA, Pareira brava.

CAAPONGA, Crithmum maritimum.

CAAROBA. A Brazilian tree, whose leaves, in decoction, promote perspiration.—See Ceratonia.

CABAL, *Cab'ala, Caba'lla, Ca'bala, Cabalia, Kabala, Gaballa.* This word is from the Hebrew, and signifies knowledge transmitted by tradition. Paracelsus and several authors of the 16th and 17th centuries have spoken much of this species of magic, which they distinguished into *Judaic* or *theo'logian*, and *Hermetic* or *medicinal;* the latter being, according to them, the art of knowing the most occult properties of bodies by an immediate communication with spirits:—the knowledge being thus acquired by inspiration, and incapable of inducing error. It was also called *Ars cabalis'tica*, 'cabalistic art.'

CABAL'HAU. A plant of Mexico, according to Dalechamps, which passes for an antidote to white hellebore, and yet is used for poisoning arrows. It is unknown to botanists.

CAB'ALIST, *Cabalis'ta.* One instructed in the Cabal.

CABALLATION, Cynoglossum.

CABARET, Asarum.

CABBAGE, Brassica—c. Cow, Nymphæa odorata—c. Irish, Dracontium fœtidum—c. Skunk, Dracontium fœtidum—c. Swamp, Dracontium fœtidum—c. Water, Nymphæa odorata—c. Tree, Geoffræa inermis—c. Bark tree, Geoffræa inermis.

CABUREIBA, Myroxylon Peruiferum.

CABUREICIBA, see Myroxylon Peruiferum.

CACÆ'MIA, *Cachæ'mia*, from *κακος*, 'bad,' and *'αιμα*, 'blood.' A faulty or morbid condition of the blood.

CACÆSTHESIS, Indisposition.

CAC'AGOGUE, *Cacago'gus*, from *κακκη*, 'excrement,' and *αγειν*, 'to expel.' An ointment, composed of alum and honey; which, when applied to the anus, produced an evacuation.—Paulus of Ægina.

CACA'LIA ANTEUPHOR'BIUM, *Anteuphor'bium.* A plant, which Dodoens and others considered to be capable of tempering the caustic properties of the euphorbium. It is also called *Kleinia.*

Many varieties of the Cacalia are used, in different countries, chiefly as condiments.

CA'CAO, *Ca'coa, Co'coa Cacavif'era, Caca'vi, Quahoil, Cacara'ta.* The cocoa or chocolate nut; fruit of *Theobro'ma Cacao; Family,* Malvaceæ. *Sex. Syst.* Polydelphia Pentandria.

CACATION, Defecation.

CACATORIA, Diarrhœa.

CAC'ATORY, *Cacato'rius*, from *cacare*, 'to go to stool.' *Febris cacato'ria;* a kind of intermittent fever, accompanied by copious alvine evacuations.—Sylvius.

CACAVATA, Cacao.

CACAVI, Cacao, Jatropha manihot.

CACCE, Excrement.

CACCION'DE. A sort of pill, chiefly formed of catechu, recommended by Baglivi in dysentery.

CACHANG-PARANG. A sort of bean of Sumatra, mentioned by Marsden, whose seeds are given in pleurisy. Jussieu considers it to be the *Mimo'sa scandens.*

CACHEC'TIC, *Cachec'ticus*, same etymon as *Cachexia.* One attacked with cachexia. Belonging to cachexia. *Cachec'tica remedia* are remedies against cachexia.

CACHEN LAGUEN, Chanchalagua, Chironia chilensis.

CACHEX'IA, from *κακος*, 'bad,' and *'εξις*, 'habit.' *Status cachec'ticus.* A condition in which the body is evidently depraved. A bad habit of body; chiefly the result of scorbutic, cancerous, or venereal diseases when in their last stage. Hence we hear of a *Scorbutic C., Cancerous C.*, &c. Sauvages and Cullen have included under this head a number of diseases —consumptions, dropsies, &c. Cachexia has been sometimes confounded with diathesis.

The *Cachexia Icterica* is jaundice or icterus itself, or a disposition thereto. The fluor albus is sometimes called *Cachexia Uterina*.

Cachexia Africana, Chthonophagia—c. Calculosa, Lithia—c. Cancerous, see Cancer—c. Chlorotic, Chlorosis—c. Dysthetica, Dyscrasia—c. Icterica, Icterus.

Cachexia Londinensis. The paleness and other evidences of impaired health presented by the inhabitants of London: a similar cachexia is seen in those of other crowded cities.

Cachexia, Scorbutic, see Purpura—c. Scrophulosa, Scrofula.

Cachexia Sple'nica. The state of scorbutic Cachexia, which often accompanies diseases of the spleen, especially in India.

Cachexia Venerea, Syphilis—c. Venous, Venosity—c. Virginum, Chlorosis.

CACHIBOU. See Bursera gummifera.

CACHINNA'TIO, from *cachin'no*, 'I laugh aloud.' A tendency to immoderate laughter, as in some hysterical and maniacal affections.

CACHIRI. A fermented liquor made, in Cayenne, from a decoction of the rasped root of the manioc. It resembles perry.

CACHLEX. A small stone or pebble, found on the sea-shore. One of these, when heated in the fire, and cooled in whey, communicates an astringency to the liquid, so that it was anciently esteemed to be useful in dysentery.—Galen.

CACHOS. An Oriental fruit, apparently of a Solanum, which is esteemed lithontriptic.

CACHOU, Catechu.

CACHRYS LIBANO'TIS. An umbelliferous plant, which grows in Africa and the South of Europe. It is aromatic and astringent. Its seeds are extremely acrid.

CACHUN'DE. An Indian troch or pastile composed of amber, mastic, musk, cinnamon, aloes, rhubarb, galanga, pearls, rubies, emeralds, garnets, &c. It is regarded by the people of India as an antidote, stomachic and antispasmodic.

CACO-ALEXITERIA, Alexipharmic.

CACOCHO'LIA, from κακος, 'bad,' and χολη, 'bile.' Diseases induced by a depraved condition of the bile.

CACOCHROI, from κακος, 'bad,' and χροα, 'colour.' Diseases in which the complexion is morbidly changed in colour.

CACOCHYLI'IA, from κακος, 'bad,' and χυλος, 'chyle.' Depraved chylification.

CACOCHYM'IA, *Corrup'tio Humo'rum*, from κακος, 'bad,' and χυμος, 'juice,' 'humour.' *Cacoch'ymy.* Depravation of the humours.

Cacochymia Scorbutica—See Purpura—c. Scrophulosa, Scrofula—c. Venerea, Syphilis.

CACOCH'YMUS, *Cacochym'icus.* One attacked with cacochymia. Belonging to cacochymia.

CACOCNE'MOS, *Malis suris prædi'tus;* from κακος, 'bad,' and κνημη, 'the leg.' One who has bad legs.

CACOCORE'MA, from κακος, 'bad,' and κορεω, 'I purge, or cleanse.' A medicine which purges off the vitiated humours.

CACODÆ'MON, from κακος, 'bad,' and δαιμων, 'a spirit.' An evil spirit, to which were ascribed many disorders. The nightmare.

CACODIA, Anosmia.

CACOETHES, from κακος, 'bad,' and ηθος, 'disposition, habit,' &c. Of a bad or vitiated character.

CACOGALAC'TIA, from κακος, 'bad,' and γαλα, gen. γαλακτος, 'milk.' A bad condition of the milk.

CACOMORPHIA, Deformation.

CACOPATHI'A, *Passio Mala*, from κακος, 'bad,' and παθος, 'affection.' A distressed state of mind.—Hippocr.

CACOPHO'NIA, from κακος, 'bad,' and φωνη, 'voice,' *vitia'ta vox.* A dissonant condition of voice.

CACOPLAS'TIC, *Cacoplas'ticus, Dysplasmat'ic;* from κακος, 'bad,' and πλασσω, 'I form.' Susceptible of only a low degree of organization, as in the indurations resulting from low or chronic inflammation, in fibrocartilage, cirrhosis, &c.

CACOPRA'GIA, from κακος, 'bad,' and πραττω, 'I perform.' Depraved condition of the chylopoietic organs.

CACORRHACHI'TIS, from κακος, 'bad,' and ραχις, 'the spine.' *Cacorrha'chis, Spondylal'gia.* Deformity of the spine. Disease of the spine. Spontaneous luxation of the vertebræ and ribs dependent upon internal causes.

CACORRHYTH'MUS, *Arrhyth'mus*, from κακος, 'bad,' and ρυθμος, 'rhythm,' 'order.' Irregular.

CACO'SIS. *Mala disposi''tio*, (F.) *Vice.* A bad condition of body.—Hippocr.

CACOSIT'IA, from κακος, 'bad,' and σιτιον, 'aliment.' Disgust or aversion for food.—*Fastid'ium cibo'rum.*

CACOSOMIUM, from κακος, 'bad,' and σωμα, 'the body.' An hospital for leprosy, and incurable affections.

CACOSPHYX'IA, from κακος, 'bad,' and σφυξις, 'pulse.'—*Vitio'sus pulsus.* Bad state of pulse.—Galen.

CACOSTOM'ACHUS, from κακος, 'bad,' and στομαχος, 'the stomach.' What disagrees with the stomach. Indigestible.—Gorræus.

CACOS'TOMUS, from κακος, 'bad,' and στομα, 'a mouth.' Having a bad mouth.

CACOTHYM'IA, *Vit'ium An'imi*, from κακος, 'bad,' and θυμος, 'mind,' 'disposition.' A vitious state of mind.—Linden.

CACOTRIBULUS, Centaurea calcitrapa.

CACOTROPH'IA, from κακος, 'bad,' and τροφη, 'nutrition.'—*Vitio'sa nutri''tio;*—disordered nutrition.—Galen.

CACOU, Cagot, Catechu.

CACOU'CIA COCCIN'EA, *Courin'ea Coccin'ea, Schousbæ'a coccin'ea, Tikimma.* A perennial twining shrub of South America, the plant of which, as well as the fruit, is possessed of emeto-cathartic properties.

CACTIER, Cactus opuntia.

CACTUS OPUN'TIA, *Opun'tia.* The *Indian Fig*, (F.) *Cactier, Raquette, Figuier d'Inde.* This plant grows in South America, Spain, Italy, &c. Its fruit, which has the shape of the fig, is of a sweetish taste, and colours the urine red when eaten. Its leaves are considered refrigerant.

CADA'BA, *Stroë'mia.* A genus of the family *Capparideæ*, natives of India and Arabia. The young shoots of the *Cada'ba farino'sa* are considered to be an antidote against venomous bites.

CADA'VER, *Ptoma, Necron.* A *dead body;* a *subject;* a *corcass,* (F.) *Cadavre.* The word

has been supposed to come from *cado*, 'I fall;' and by some, to be a contraction from *caro data vermibus*, 'flesh given to the worms!'

CADAV'EROUS, *Cadav'eric, Cadavero'sus, Necro'des.* (F.) *Cadavéreux.* Belonging to the dead body; as *cadaverous smell.* The *Cadav'erous* or *Hippocrat'ic face* (see Face,) is an unfavourable sign in disease, and generally denotes a fatal termination.

CADAV'EROUS or CADAV'ERIC HYPERÆ'MIA. The hypostatic hyperæmia observed in depending parts of the dead body.

CADEJI-INDI, Malabathrum.

CADEL-AVANACU, Croton tiglium.

CADIA. An Egyptian, leguminous plant. The Arabs attribute to its fresh leaves the power of relieving colic.

CADMIA, Calamina, Tutia.

CAD'MII SULPHAS, *Cad'mium sulphu'ricum, Sulphas Cad'micus, Meli'ni Sulphas, Klapro'thii Sulphas, Klapro'thium Sulphuricum, Melinum Sulphu'ricum, Sulphate of Cad'mium.* Used in spots on the cornea, and in chronic torpid inflammation of the conjunctiva, in the quantity of half a grain to a grain to the ounce of water.

CADMIUM SULPHURICUM, Cadmii Sulphas.

CADTCHU, Catechu.

CADUCA HUNTERI, Decidua.

CADU'CITY, *Imbecil'litas, Debil'itas, Cadu'citas*, from *cadere*, 'to fall.' The French use the word *Caducité* for the portion of human life which is comprised generally between 70 and 80 years. The age which precedes decrepitude. It is so termed in consequence of the limbs not usually possessing sufficient strength to support the body. The precise age must of course vary in individuals.

CADURCUS, Vulva.

CADUS, κάδος. A Greek measure, equal to ten gallons English.—Pliny.

CADUS, Amphora.

CÆCAL, *Cæca'lis.* Belonging to the cæcum, from *cæcus*, 'blind, hidden.' The *Cæcal arteries and veins* are the branches of the *Arteriæ et venæ colicæ dextræ inferiores*, distributed to the cæcum.

CÆCATRIX, Cicatrix.

CÆ'CITAS, *Blindness, Anap'sia, Ty'phlotes, Typhlo'sis*, (F.) *Aveuglement, Cécité, Perte de la vue.* C. may be dependent upon many different diseases,—as upon amaurosis, specks, hypopyon, cataract, glaucoma, ophthalmia, atrophy of the eye, &c.

CÆCITAS CREPUSCULARIS, Hemeralopia—c. Diurna, Nyctalopia.

CÆCUM or CŒCUM, *Intesti'num cæcum, Monom'achon, Monoco'lon, Monocu'lum, Typhlo'teron monoco'lon, Ini''tium intesti'ni crassi, Saccus, Cæcum Caput Coli, Prima cella coli*, from *cæcus*, 'blind.' The *Blind Gut*, so called from its being perforated at one end only. That portion of the intestinal canal, which is seated between the termination of the ileum and commencement of the colon; and which fills, almost wholly, the right iliac fossa; where the peritoneum retains it immovably. Its length is about three or four fingers' breadth. The *Ileo cæcal valve*, or *Valve of* Bauhin shuts off all communication between it and the ileum; and the *Appendix vermiformis cæci* is attached to it.

CÆCUM, PHLEGMONOUS TUMOUR OF THE, Typhlo-enteritis.

CÆCUS. 'Blind.' One deprived of sight. (F.) *Aveugle, Borgne.* In anatomy, it is used to designate certain holes or cavities, which end in a *cul de-sac;* or have only one opening.

Blind Ducts of the Ure'thra, (F.) *Conduits aveugles de l'urethrè*, are the *Mucous Lacu'næ of the Ure'thra.*

CÆCUM, FORA'MEN, of the frontal bone is a small cavity at the inferior extremity of the internal coronal crest or crista.—*Fronto-ethmoidal foramen*—(Ch.). (F.) *Trou aveugle* ou *borgne.* Morgagni has given the same name to the small cavity, in the middle of the upper surface of the tongue, near its base; the sides of which are furnished with mucous follicles—*Lacunæ de la langue.*—(Ch.)

CÆCA, FORAM'INA,—ANTERIUS ET POSTERIUS, are situate at the fore and back parts of the tuber annulare of the brain, and at the extremities of the depression made by the vertebral artery. The former is placed between the nerves of the 3d, and the latter between those of the 6th pair.

CÆCÆ, HÆMORRHOI'DES, *Blind Piles*, (F.) *Hémorrhoïdes aveugles*, are those unaccompanied by any discharge.

CÆLA-DOLO, Torenia Asiatica.

CÆMENTUM, Lute.

CÆRULEUM BEROLINENSE, Prussian blue—c. Borussicum, Prussian blue.

CÆRULOSIS NEONATORUM, Cyanopathy.

CÆSALPI'NIA or CÆSALPI'NA SAPPAN, *Sappan* or *Sampfen wood*, (F.) *Brésillet, Bois de Sappan.* A small Siamese tree, the wood of which is used in decoction, in cases of contusion.

Brazil wood, Pernambuco or *Fernambuco wood*, formerly used as an astringent, is the wood of CÆSALPIN'IA ECHINA'TA. This is the proper Brazil wood; but another variety in commerce is the *Brasiletto*, from *Cæsalpinia Brasiliensis*, and *C. crista*, which grow in the West Indies.

The *Nicaragua* or *peach-wood*, is analogous to this, and is said to be derived from a species of Cæsalpinia.

The kernel of CÆSALPIN'IA BONDUCELL'A, the seed of which is called in India *Kutkuleja* and *Kutoo Kurunja*, is given as a febrifuge tonic. Dose ten grains.

CÆSA'REAN SECTION or OPERATION, *Tomoto'cia, Cæsa'rea sectio, Partus cæsa'reus, Opera'tio cæsa'rea, Metrotom'ia*, (F.) *Opération Césarienne*, from *cædere*, 'to cut.' An incision made through the parietes of the abdomen and uterus to extract the fœtus. In this manner Julius Cæsar is said to have been extracted.—Pliny. It is also called *Hysterotom'ia, Hysterotomato'cia*, and *Gastrohysterot'omy*, (F.) *Opération Césarienne.* An incision has been made into the uterus through the vagina; constituting the *Vaginal Cæsarean Section*, (F.) *Opération césarienne vaginale.* The Cæsarean Section may be required when the mother dies before delivery;—when there is some invincible obstacle to delivery, from the faulty conformation of the pelvis; or when the child has passed into the abdominal cavity in consequence of rupture of the uterus.

CÆSARIES, Capillus.

CÆSIUS, Glaucoma.

CÆSONES, CÆSARES. Children brought into the world by the Cæsarean operation.

CÆSU'LIÆ. They who have gray eyes.

CÆSURA, Cut.

CÆTCHU, Catechu.

CAF, Camphor.

CAFAL, Agrimony.

CAFAR, Camphor.

CAFÉ, Coffea.

CAFÉ A LA SULTANE. This name has been given to an infusion or decoction of the ground *coques* or pericarps which surround the coffee.

CAFÉ CITRIN. The aqueous infusion of unroasted coffee, so called on account of its yellowish tint.

CAFEYER, Coffea Arabica.

CAFFA, Camphor.

CAFIER, Coffea Arabica.

CAGAS'TRUM. The principle or germ of diseases, which are communicable. Paracelsus.

CAGNEUX, *Cagot*. See Kyllosis.

CAGOSANGA, Ipecacuanha.

CAGOT, (F.) A name given to deformed and miserable beings, met with in the Pyrenees, Bern, and Upper Gascony in France, where they are also called *Capots*. In other districts they are called, *Gézits*, *Gézitains*, *Crétins*, *Gahets*, *Capons*, *Coliberts*, *Cacous*, *Cagneux*, &c. See *Crétin*. The word *Cagot* is supposed to be an abbreviation of *Canis Gothus*, 'Dog of a Goth.'

CAGUE-SANGUE, *Caquesangue*.

CAHINCÆ RADIX, Caincæ radix.

CAI'EPUT or CAJ'EPUT, OIL OF. *Kyaput'ty*, *Cajaput'i Oleum*. The volatile oil of the leaves of *Melaleu'ca Cajaput'i*, a native of the Moluccas. The oil has a strong, fragrant smell, like camphor; taste pungent and aromatic: limpid. It is stimulant, and useful where the essential oils in general are employed. It has also been called *Oil of Witneben*, from the person who first distilled it.

CAILLEAU, Lantana.

CAILLE, Tetrao coturnix.

CAILLEBOTTE, Curds.

CAILLELAIT BLANC, Galium mollugo—c. *Vraie*, Galium verum.

CAILLOT, Coagulum.

CAINANÆ RADIX, Caincæ radix.

CAIN'CÆ RADIX, *Radix Chiococ'cæ*, *R. Caina'næ*, *Caninanæ*, *Cahincæ*, *Kahincæ*, *Serpenta'riæ Brazilien'sis*, *Cainca Root*. The bark of the roots of *Chiococ'a anguif'uga*, *Ch. densifo'lia*, and perhaps *Ch. racemo'sa*, a plant of the *Family* Rubiaceæ. *Sex. Syst.* Pentandria Monogynia, of Linnæus. It is bitter, tonic, and diuretic, but has not been long introduced. Dose of the powder from ℈j. to ʒss.

Dr. John H. Griscom, of New York, considers there is a remarkable analogy between the Cainca and the *Apocynum cannabinum*.

CAINITO, Chrysophyllum Cainito.

CAIPA SCHORA. A cucurbitaceous Malabar plant, the fruit of which has a pyriform shape. The juice is drunk in that country for the purpose of arresting hiccough. The fruit, when unripe, is emetic.

CAISSE, Case—*c. du Tambour*, Tympanum.

CAITCHU, Catechu.

CAJAN, Phaseolus creticus.

CAJUPUTI, Cajeput.

CAKES, WORM, STORY'S. These were composed of *calomel* and *jalap*, made into cakes, and coloured with *cinnabar*.

CALABASH TREE, NARROW-LEAVED, Crescentia Cujete.

CALADIUM ESCULENTUM, Arum esculentum.

CALAF, *Salix Ægyp'tiaca*. A large-leaved Egyptian willow, called, also, *Ban*. The distilled water of the flowers, called *Macahalef*, passes, in that country, for an excellent antiaphrodisiac. It is also used as an antiloimic, antiseptic, and cordial.

CALAGERI, Vernonia anthelmintica.

CALAGIRAH, Vernonia anthelmintica.

CALAGUA'LÆ RADIX, *Calague'læ Radix*. The root of *Polypo'dium Calagua'la*, or *Aspid'ium coria'ceum*. It has been exhibited in Italy in dropsy, pleurisy, contusions, abscesses, &c. Its properties are not, however, clear.

CALAMBAC, Agallochum.

CALAMANDRIÑA, Teucrium chamædrys.

CALAMBOUK, Agallochum.

CALAME'DON, from κάλαμος, 'a reed.' This word has had various significations. Some have used it for an oblique fracture of a bone; the fractured portions having the shape of the nib of a pen. Others have used it for a longitudinal fracture, and others, again, for one that is comminuted.—Dictionaries.

CALAMI'NA, *Cal'amine*, from *calamus*, 'a reed,' so called from its reed-like appearance. *Cadmia*, *Cathmir*, *Cadmia lapido'sa aëro'sa*, *Cadmia Fos'silis*, *Lapis Aëro'sus*, *Calim'ia*, *Lapis Calamina'ris*, *Calamina'ris*, *Car'bonas Zinci impu'rus*, (F.) *Pierre calaminaire*. Native impure carbonate of zinc. Calamine is chiefly used for pharmaceutical purposes in the form of the Calamina præpara'ta, *Lapis Calamina'ris præpara'tus*, *Car'bonas zinci impu'rus præpara'tus*, *Zinci car'bonas præpara'tus*, *Prepared Calamine*;—Calamine reduced to an impalpable powder by roasting and levigation. In this state it is sprinkled or dusted on excoriated parts, or to prevent excoriation, &c.

CALAMINARIS, Calamina.

CALAMINT, Melissa Calamintha—c. Field, Melissa nepeta—c. Mountain, Melissa grandiflora—c. Spotted, Melissa nepeta.

CALAMINTA HUMILIOR, Glecoma hederacea.

CALAMINTHA, Melissa C.—c. Anglica, Melissa nepeta—c. Erecta Virginiana, Cunila Mariana—c. Magno flore, Melissa grandiflora—c. Montana, Melissa grandiflora—c. Pulegii odore, Melissa nepeta.

CAL'AMUS, κάλαμος, 'the reed.' In the Pharmacopœia of the U. S. the rhizoma of acorus calamus (q. v.)

Calamus Alexandri'nus. Celsus has thus called a medicine, which was long confounded with *Calamus Aromaticus*. It is not a root, however, but the stalk of a plant of India and Egypt, probably the *Andropo'gon Nardus*. It entered into the theriaca, and has been regarded antihysteric and emmenagogue; *Calamus aromaticus verus*.

Calamus Aromaticus, Acorus calamus—c. Aromaticus verus, Calamus Alexandrinus—c. Indicus, see Saccharum—c. Odoratus, Acorus calamus, Juncus odoratus.

Calamus Rotang. The systematic name of a plant, whence *Dragon's Blood*, *Sanguis Dra-*

co'nis, Cinnab'aris Græco'rum, Draconthæ'ma, (F.) *Sang-Dragon*, is obtained. It is the red, resinous juice, obtained, in India, from wounding the bark of the *Calamus Rotang*. It has been used as an astringent in hemorrhages, &c.; but is now rarely employed.

Calamus Sacchabinus, see Saccharum.

Calamus Scripto'rius, *Anag'lyphē, Rhomboidal Sinus*. 'A Writing pen,' (F.) *Fossette angulaire du quatrième ventricule*. A small, angular cavity, situate at the superior extremity of the medulla, in the fourth ventricle of the brain, which has been, by some, supposed to resemble a pen.

Calamus Vulgaris, Acorus calamus.

CALAPPITE. Rumphius has given this name to calculous concretions, found in the interior of some cocoa nuts. The cocoa tree itself the Malays call *Calappa*. These stones are, likewise, termed *Vegetable Bezoards*. The Malays attribute potent virtues to them, and wear them as amulets.

CALASAYA, Cinchonæ cordifoliæ cortex.

CALBALA, Cabal.

CALBIA'NUM. The name of a plaster in Myrepsus, the composition of which we know not.

CALCADINUM, Ferri sulphas.

CALCAIRE, Calcareous.

CALCANEO-PHALANGIEN DU PETIT ORTEIL, Abductor minimi digiti pedis—*c. Phalanginien commun*, Extensor brevis digitorum pedis—*c. Sous-phalangettien commun*, Flexor brevis digitorum pedis—*c. Sous-phalanginien commun*, Flexor brevis digitorum pedis—*c. Sous-phalangien du petit orteil*, see Abductor minimi digiti pedis—*c. Sus-phalangettien commun*, Extensor brevis digitorum pedis.

CALCA'NEUM, from *calx*, 'the heel.' *Calca'neus, Calcar, Os Calcis, Pterna*. The largest of the tarsal bones; that which forms the heel. It is situate at the posterior and inferior part of the foot; is articulated above and a little anteriorly with the astragalus; anteriorly, also, with the os cuboides. Its posterior surface,—called *Heel, Talus, Calx*, (F.) *Talon*,—gives attachment to the tendo achillis: the lower has, posteriorly, two tuberosities, to which the superficial muscles of the sole of the foot are attached. The *small Apoph'ysis* or *lateral Apophysis of the Calca'neum*. (F.) *Petite Apophyse* ou *Apophyse latérale du Calcanéum*, is a projection at the upper surface of this bone, on which is formed the posterior portion of the cavity, that receives the astragalus. The *great Apoph'ysis, anterior Apoph'ysis of the Calca'neum* is the projection, which corresponds, on one side, with the cuboides; and on the other forms the anterior part of the facette, which receives the astragalus.

CALCANTHON, Atramentum.

CALCAR, Calcaneum, *Ergot*—c. Avis, Hippocampus minor.

CALCA'REOUS, *Calca'reus, Calca'rius*; from *calx*, 'lime.' (F.) *Calcaire*. Containing lime:—as *calcareous concretions, C. depositions*, &c.

CALCAREUS CARBONAS, Creta.

CALCARIA CHLORATA, Calcis chloridum—c. Chlorica, Calcis chloridum—c. Phosphorica, see Cornu cervi—c. Pura, Calx—c. Pura liquida, Liquor calcis.

CALCARIÆ CHLORUM, Calcis chloridum.

CALCATOR, Ferri sulphas.

CALCATREPPOLA, Centaurea calcitrapa.

CALCE'NA, CALCE'NON, CALCENO'NIA, CALCINO'NIA. Words employed by Paracelsus, to designate the concretions of tartrate of lime, which form in the human body.

CALCENOS, Calcetus.

CALCEOLA'RIA, from *calceolus*, 'a small slipper;' *Slipperwort*.

Calceola'ria Prima'ta is used in Peru as a laxative.

Calceola'ria Trif'ida is esteemed to be febrifuge.

CALCE'TUS, *Calceno'nius, Calce'nos*. That which abounds in tartrate of lime. An adjective used, by Paracelsus, in speaking of the blood; *Sanguis calce'tus*. Hence came the expression *Calcined blood, Sang calciné*.

CALCEUM EQUINUM, Tussilago.

CALCIGEROUS CELL, see Tooth.

CALCIG'RADUS, *Pternobates*, from *Calx*, πτερνα, 'the heel,' and βαινω, 'I walk.' One who walks on his heels.—Hippocr.

CALCII CHLORURETUM, Calcis murias—c. Oxychloruretum, Calcis chloridum—c. Oxydum, Calx viva—c. Protochloruretum, Calcis chloridum.

CALCINA'TION, *Calcina'tio, Calci'non, Concrema'tio*, from *calx*, 'lime.' The act of submitting to a strong heat any infusible mineral substance, which we are desirous of depriving either of its water, or of any other volatilizable substance, that enters into its composition; or which we wish to combine with oxygen. *Alum* is calcined to get rid of its water of crystallization;—*chalk*, to reduce it to the state of pure lime, by driving off the carbonic acid; and *certain metals* are subjected to this operation to oxidize them.

CALCINATUM MAJUS POTERII, Hydrargyrum præcipitatum.

CALCINONIA, Calcena.

CALCIS BICHLORURETUM, Calcis chloridum—c. Carbonas, Creta—c. Carbonas durus, Marmor.

Calcis Chlo'ridum; *Chlo'ride of Lime, Calx chlorina'ta* (Ph. U. S.) *Protoxi-chlo'uret of Calcium, Calca'ria chlora'ta, Chlorum Calca'riæ, Chlore'tum Calca'riæ, Calcaria Chlo'rica, Oxychlorure'tum Calcii, Protochlorure'tum Calcii, Chlorure'tum Oxidi Calcii, Bichlorure'tum Calcis, Oxymu'rias Calcis, Bleaching Powder, Tennant's Powder*. A compound resulting from the action of chlorine on hydrate of lime. The Chloride of lime is a most valuable disinfecting agent, (see Disinfection,) when dissolved in the proportion of one pound, to six gallons of water. It has likewise been employed both internally and externally in various diseases, as in scrofula, fœtor oris, foul ulcers, &c. &c.

Calcis Hepar, Calcis sulphuretum.

Calcis Murias; *Muriate of Lime, Calx sali'ta, Calcii Chlorure'tum* seu *Chlo'ridum, Chloride of calcium*. This salt has been given, in solution, as a tonic, stimulant, &c., in scrofulous tumours, glandular obstructions, general debility, &c. The *Solu'tio Muria'tis Calcis, Liquor Calcis Muria'tis, Solution of Muriate of Lime, Liquid Shell*, may be formed of *muriate of lime* ℥j. dissolved in *distilled water* f. ℥iij. The Liquor Calcii Chloridi, or *Solution of Chloride of Calcium*, of the Pharmacopœia of the United States, is formed as follows:—*Marble*, in fragments, ℥ix. *Muriatic acid*, Oj; *Distilled*

water, a sufficient quantity. Mix the acid with a half pint of the water, and gradually add the marble. Towards the close of the effervescence apply a gentle heat, and, when the action has ceased, pour off the clear liquor and evaporate to dryness. Dissolve the residuum in its weight and a half of distilled water, and filter. Dose, from gtt. xxx to f. ʒj in a cupful of water.

Calcis Oxymurias, Calcis chloridum.

Calcis Sulphure'tum; *Hepar Calcis*, *Sulphuret of Lime*, (F.) *Proto-hydrosulfate de Calcium*, *Hydrosulfate de chaux*. Principally used in solution, as a bath, in itch and other cutaneous affections.

CALCITEA, Ferri sulphas.

CALCITEOSA, Plumbi oxydum semivitreum.

CALCITHOS, Cupri subacetas.

CALCITRAPA, Centaurea Calcitrapa—c. Stellata, Centaurea calcitrapa.

CALCITRAPPA, Delphinium consolida.

CALCIUM, CHLORIDE OF, Calcis murias—c. *Protohydrosulphate de*, Calcis sulphuretum—c. Protoxichloruret of, Calcis chloridum—c. Protoxide of, Calx.

CALCO-SUBPHALANGEUS MINIMI DIGITI, Abductor minimi digiti pedis—c. Subphalangeus pollicis, Abductor pollicis pedis.

CALCOCOS, Bell-metal.

CALCOIDEA, (ossicula,) Cuneiform bones.

CALCOTAR, Ferri sulphas.

CALCUL, Calculus.

CALCULEUX, Calculous.

CAL'CULI, ARTIC'ULAR. See Calculi Arthritic; and Concretions, Articular.

Calculi, Arthrit'ic, *Tophi*, *Tuber'cula arthrit'ica*, *Chalk stones*, (F.) *Pierres crayeuses*, *Calculs arthritiques*, *Nœuds*. Concretions, which form in the ligaments, and within the capsules of the joints, in persons affected with gout. They are composed of uric acid, soda, and a little animal matter; very rarely, urate of lime and chloride of sodium are met with. Similar calculi are found in other parts besides the joints.

Cal'culi, Bil'iary, *Cal'culi bilio'si* seu *fell'ei* seu *bilia'rii*, *Cysthepatolithi'asis*, *Bil'iary Concre'tions*, *Gall-stones*, *Cholol'ithus*, *Cholel'ithus*, *Cholelith'ia*, (F.) *Calculs biliaires*, *Pierres au fiel*. Some of these contain all the materials of the bile, and seem to be nothing more than that secretion thickened. Several contain *Picromel;* and the greater part are composed of from 88 to 94 parts of *Cholesterin*, and of from 6 to 12 of the yellow matter of the bile. Biliary calculi are most frequently found in the gall-bladder: at other times, in the substance of the liver, in the branches of the *Ductus hepaticus*, or in the *Ductus Communis Choledochus*. The first are called *Cystic;* the second *Hepatic;* and the last, sometimes, *Hepatocystic*. The causes which give rise to them are very obscure. Often they occasion no uneasiness, and at other times the symptoms may be confounded with those of hepatitis. At times, they are rejected by the mouth, or by the bowels, along with a considerable quantity of bile, which had accumulated behind them; at other times, they occasion violent abdominal inflammation, abscesses, and biliary fistulæ, rupture of the gall-bladder, and fatal effusion into the peritoneum. The passage of a gallstone is extremely painful; yet the pulse is not affected. Antiphlogistics, when there is inflammatory action, and strong doses of opium, to allay the pain and spasm, with the warm bath, are the chief remedies. Solvents are not to be depended upon. They cannot reach the calculi.

Cal'culi in the Ears, (F.) *Calculs de l'Oreille*. Hard, light, and inflammable concretions, which occur in the *meatus auditorius externus*, and are merely indurated cerumen. They are a frequent cause of deafness. They can be easily seen, and may be extracted by appropriate forceps, after having been detached by injections of soap and water.

Calculi Fellei, Calculi, biliary.

Cal'culi, Lach'rymal, (F.) *Calculs lacrymaux*. Concretions sometimes, but rarely, form in the lachrymal passages, where they occasion abscesses and fistulæ, which do not heal until they are extracted. No analysis has been made of them.

Calculi of the Mammæ, (F.) *Calculs des Mamelles*. Haller gives a case of a concretion, of a yellowish-white colour, which had the shape of one of the excretory ducts of the mammary gland, having been extracted from an abscess seated in that organ.

Cal'culi of the Pan'creas, (F.) *Calculs du Pancréas*. These are but little known. Analogy has induced a belief that they resemble the salivary. Some have supposed that certain transparent calculi, rejected by vomiting, or passed in the evacuations, have proceeded from the pancreas, but there seems no reason for this belief.

Cal'culi of the Pine'al Gland, (F.) *Calculs de la Glande Pinéale*. These have been frequently met with. No symptom announces their presence during life. They are composed of phosphate of lime.

Calculi of the Prostate, *Prostat'ic cal'culi*. These are not very rare. They have generally the same composition as the preceding. They usually present the symptoms common to every tumefaction of the prostate, and sometimes those of calculi in the bladder.

Cal'culi Pul'monary, (F.) *Calculs pulmonaires*. These concretions are very frequently met with in the dead body, without seeming to have produced unpleasant symptoms during life. At other times, they are accompanied with all the symptoms of phthisis, *Phthisie calculeuse* of Bayle. At times, they are expectorated without the supervention of any unpleasant symptom. They are usually formed of carbonate of lime and animal matter.

Cal'culi Sal'ivary, *Cal'culi saliva'les*, *Sialol'ithi*, (F.) *Calculs salivaires*. Concretions, usually formed of phosphate of lime and animal matter, which are developed in the substance of the salivary glands or in their excretory ducts. In the first case, they may be mistaken for a simple swelling of the gland; in the second, they may be generally detected by the touch. They may be extracted by incision in the interior of the mouth.

Cal'culi, Spermat'ic, (F.) *Calculs spermatiques*. These have been sometimes found in the vesiculæ seminales after death. They cannot be detected during life. No analysis has been made of them.

Cal'culi of the Stomach and Intes'tines, *Enterol'ithus*, *E. Cal'culus*, *Concre'tio alvi'na*,

(F.) *Calculs de l'estomac, C. intestinaux, Pierres stercorales, Concrétions intestinales.* Calculi of the stomach are rare, and have almost always been carried thither by the antiperistaltic action of the intestines. The symptoms occasioned by them are those of chronic gastritis. It has been imagined that the continued use of absorbent powders, as magnesia, will give occasion to them.

Intestinal concretions, (F.) *Calculs intestinaux*, are not uncommon in animals (see Bezoard:) but they are rare in man. The causes which give rise to them are little known: sometimes a biliary calculus affords them a nucleus. Their composition varies. They are light, hard, very fetid, and not inflammable. They are formed, ordinarily, between the valvulæ of the small intestines, or in the cells of the large, and sometimes in old herniæ. Whilst they do not obstruct the passage of the alimentary mass, they produce no unpleasant symptom. At times, the movable tumour which they form, may be felt through the parietes of the abdomen. They are generally evacuated *per anum*.

Cal'culi of the Tonsils. Calculous concretions, which sometimes form in the tonsils. (F.) *Calculs des Amygdales.* They are easily recognised by the sight and touch: sometimes they are discharged by spitting, either alone or with the pus of an abscess occasioned by their presence. They have not been analyzed.

Cal'culi, U'rinary, *Urol'ithi*, (F.) *Calculs urinaires, Pierres urinaires.* Concretions, which form from the crystallizable substances in the urine, and which are met with not only in the whole course of the urinary passages, but in fistulous openings wherever the urine stagnates naturally or accidentally. Their causes are but little known. They are more common at the two extremities of life than at the middle, and more so in some countries and districts than in others. At times, a clot of blood, a portion of mucus, &c., will form the nucleus. The symptoms and treatment vary according to the seat of the calculus. There is no such thing probably as a medicinal solvent. See Urinary Calculi.

Modern chymists have demonstrated the existence of several components of urinary calculi, viz. *Lithic Acid, Phosphate of Lime, Ammoniaco-Magnesian Phosphate, Oxalate of Lime, Cystic Oxide*, and *Xanthic Oxide*, with an animal cementing ingredient. The varieties of calculi, produced by the combination or intermixture of these ingredients, are thus represented by Dr. Paris.

A TABULAR VIEW OF THE DIFFERENT SPECIES OF URINARY CALCULI.

SPECIES OF CALCULI.	EXTERNAL CHARACTERS.	CHYMICAL COMPOSITION.	REMARKS.
1. LITHIC OR URIC.	Form, a flattened oval. S. G. generally exceeds 1.500. *Colour*, brownish or fawn-like. *Surface*, smooth. *Texture*, laminated.	It consists principally of *Lithic Acid*. When treated with nitric acid, a beautiful pink substance results. This calculus is slightly soluble in water, abundantly so in the pure alkalies.	It is the prevailing species; but the surface sometimes occurs finely tuberculated. It frequently constitutes the *nuclei* of the other species.
2. MULBERRY.	*Colour*, dark brown. *Texture*, harder than that of the other species. S. G. from 1.428 to 1.976. *Surface*, studded with tubercles.	It is *oxalate of lime*, and is decomposed in the flame of a spirit lamp swelling out into a white efflorescence, which is *quicklime*.	This species includes some varieties, which are remarkably smooth and pale-coloured, resembling *hemp seed*.
3. BONE EARTH.	*Colour*, pale brown or gray; *surface*, smooth and polished: *structure*, regularly laminated; the laminæ easily separating into concrete crusts.	Principally *phosphate of lime*. It is soluble in muriatic acid.	
4. TRIPLE.	*Colour*, generally brilliant white. *Surface*, uneven, studded with shining crystals, less compact than the preceding species. Between its laminæ small cells occur, filled with sparkling particles.	It is an *ammoniaco-magnesian phosphate*, generally mixed with phosphate of lime. Pure alkalies decompose it, extracting its ammonia.	This species attains a larger size than any of the others.
5. FUSIBLE.	*Colour*. Grayish white.	A compound of the two foregoing species.	It is very fusible, melting into a vitreous globule.
6. CYSTIC.	Very like the triple calculus, but it is unstratified and more compact and homogeneous.	It consists of *cystic oxide*. Under the blowpipe it yields a peculiarly fetid odour. It is soluble in acids, and in alkalies, even if they are fully saturated with carbonic acid.	It is a rare species.
7. ALTERNATING.	Its section exhibits different concentric laminæ.	Compounded of several species, alternating with each other.	
8. COMPOUND.	No characteristic form.	The ingredients are separable only by chymical analysis.	

1. *Renal Calculi*, (F.) *Calculs rénaux.* These have almost always a very irregular shape: at times, there will be no indication of their presence: at others, they occasion attacks of pain in the kidneys, sometimes accompanied with bloody or turbid urine. Often, they cause inflammation of the kidneys, with all its unpleasant results. They are generally formed of uric acid, animal matter, and oxalate of lime, with, sometimes, phosphates. The treatment will have to vary, according to the absence or presence of inflammatory signs,—relieving the irritation by opiates. A surgical operation can rarely be applicable.

2. *Calculi in the Ureters.* (F.) *Calculs des Urétères.* These come from the kidneys, and do not produce unpleasant effects, unless they are so large as to obstruct the course of the urine, and to occasion distention of the whole of the ureter above them; or unless their surface is so rough as to irritate the mucous membrane, and occasion pain, hemorrhage, abscesses, &c. The pain, during the passage, is sometimes very violent, extending to the testicle of the same side in the male; and occasioning a numbness of the thigh in both sexes. The treatment consists in general or local blood-letting, warm bath, and opiates.

3. *Calculi, Vesical, Stone in the Bladder, Lith'ia Vesica'lis, Lithi'asis cys'tica, Lithi'asis vesica'lis, Cysto-lithi'asis, Dysu'ria calculo'sa, D. irrita'ta, Cal'culus vesi'cæ,* (F.) *Calculs vésicaux.* These are the most common. Sometimes, they proceed from the kidneys: most commonly, they are formed in the bladder itself. Sense of weight in the perinæum, and sometimes of a body rolling when the patient changes his position; pain or itching at the extremity of the glans in men; frequent desire to pass the urine; sudden stoppage to its flow; and bloody urine—are the chief signs which induce us to suspect their existence. We cannot, however, be certain of this without sounding the patient. Sometimes, when of a small size, they are expelled: most commonly, they remain in the bladder, the disorganization of which they occasion, unless removed by a surgical operation.

4. *Calculi, Ure'thral.* They almost always proceed from the bladder. The obstruction, which they cause to the passage of the urine, the hard tumour, and the noise occasioned when struck by a sound, indicate their presence. They are removed by incision.

5. *Calculi in Fis'tulous Passages.* These arise when there is some fistulous opening into the urethra. They can be readily recognised, and may generally be extracted with facility. (F.) *Calculs placés hors des voies urinaires.* See Urinary Calculi.

Cal'culi of the U'terus. (F.) *Calculs de l'Utérus.* These are very rare. The signs, which indicate them during life, are those of chronic *engorgement* of the uterus. Their existence, consequently, cannot be proved till after death.

CALCULIFRAGUS, Lithontriptic.

CAL'CULOUS, (F.) *Calculeux, Graveleux.* That which relates to calculi, especially to those of the bladder.

CALCULS BILIAIRES, Calculi, biliary—*c. de l'Estomac,* Calculi of the stomach—*c. de la Glande pinéale,* Calculi of the pineal gland—*c. Intestinaux,* Calculi of the stomach and intestines—*c. Lacrymaux,* Calculi, lachrymal—*c. des Mamelles,* Calculi of the mammæ—*c. de l'Oreille,* Calculi in the ears—*c. du Pancréas,* Calculi of the Pancreas—*c. Placés hors des voies urinaires,* Calculi in fistulous passages—*c. Pulmonaires,* Calculi, pulmonary—*c. Rénaux,* Calculi, renal—*c. Salivaires,* Calculi, salivary—*c. Spermatiques,* Calculi, spermatic—*c. Urinaires,* Calculi, urinary—*c. des Urétères,* Calculi in the ureters—*c. de l'Utérus,* Calculi of the uterus—*c. Vésicaux,* Calculi, vesical.

CAL'CULUS, *Lapis, Lithos,* λιθος. A diminutive of *calx,* a lime-stone. (F.) *Calcul, Pierre.* Calculi are concretions, which may form in every part of the animal body, but which are most frequently found in the organs that act as reservoirs, and in the excretory canals. They are met with in the tonsils, joints, biliary ducts, digestive passages, lachrymal ducts, mammæ, pancreas, pineal gland, prostate, lungs, salivary, spermatic and urinary passages, and in the uterus. The causes which give rise to them are obscure.

Those that occur in reservoirs or ducts are supposed to be owing to the deposition of the substances, which compose them, from the fluid as it passes along the duct; and those which occur in the substance of an organ are regarded as the product of some chronic irritation. Their general effect is to irritate, as extraneous bodies, the parts with which they are in contact; and to produce retention of the fluid, whence they have been formed. The symptoms differ, according to the sensibility of the organ and the importance of the particular secretion whose discharge they impede. Their *solution* is generally impracticable: spontaneous expulsion or extraction is the only way of getting rid of them.

CALCULUS BEZOAR, Bezoard—c. Encysted, *Calcul chatonné*—c. Vesicæ, Calculus, vesical.

CALDAS, WATERS OF. Caldas is a small town, ten leagues from Lisbon, where are mineral springs: containing carbonic and hydrosulphuric acid gases, carbonates and muriates of lime and magnesia, sulphates of soda and lime, sulphuret of iron, silica, and alumina. They are much used in atonic gout. They are thermal. Temperature 93° Fahrenheit.

CALDE'RIÆ ITAL'ICÆ. Warm baths in the neighbourhood of Ferrara, in Italy, much employed in dysuria.

CALEBASSES, Cucurbita lagenaria.

CALEFA'CIENTS, *Calefacien'tia, Therman'tica,* from *calidus,* 'warm,' and *facio,* 'I make.' (F.) *Échauffants.* Substances which excite a degree of warmth in the part to which they are applied, as mustard, pepper, &c. They belong to the class of stimulants.

CALEFACTIO, *Échauffement.*

CALENDULA ALPINA. Arnica montana.

Calen'dula Arven'sis, *Caltha Arven'sis, Wild Mar'igold.* (F.) *Souci des Champs.* This is, sometimes, preferred to the last. Its juice has been given, in the dose of from f. ℥j to f. ℥iv, in jaundice and cachexia.

Calen'dula Officina'lis, *C. Sati'va, Chrysan'themum, Sponsa solis, Caltha vulga'ris; Single Mar'igold, Garden Mar'igold. Family,* Synantheræ, Syngenesia necessaria, Linn. (F.) *Souci.* So called from flowering every *calend.* The flowers and leaves have been exhibited as aperients, diaphoretics, &c., and have been highly extolled, of late, in cancer.

CALENDULÆ MARTIALES, Ferrum ammoniatum.

CALENTU'RA, from *calere,* 'to be warm.' The word, in Spanish, signifies fever. A species of furious delirium to which sailors are subject in the torrid zone:—a kind of phrenitis, the attack of which comes on suddenly after a broiling day, and seems to be characterized by a desire in the patient to throw himself into the sea. It is only a variety of phrenitis.

CALENTU'RAS; *Palo de Calentu'ras.* Pomet and Léméry say, that these words are,

sometimes, applied to cinchona. Camelli says, they mean, also, a tree of the Philippine Isles, the wood of which is bitter and febrifuge.

CALF OF THE LEG, Sura.

CALICE, Calix.

CALICES RÉNALES. See Calix.

CALICO BUSH, Kalmia latifolia.

CALIDARIUM. See Stove.

CALIDUM ANIMALE, Animal heat—c. Innatum, Animal heat.

CALIGATIO, Dazzling.

CALI'GO. 'A mist.' *Achlys*. (F.) *Brouillard*. An obscurity of vision, dependent upon a speck on the cornea: also, the speck itself; *Caligo cor'neæ, Mac'ula corneæ, M. sémipellu'cida, Phtharma caligo, C. à nephel'io, Hebetu'do visûs, C. à leuco'matē, Nel'ula*. (q. v.) *Opake cornea, Web-eye*. (F.) *Nouage de la Cornée, Taye, Obscurcissement de la vue*.

CALIGO LENTIS, Cataract—c. Pupillæ, Synezisis—c. Synizesis, Synezisis—c. Tenebrarum, Hemeralopia.

CALIHACHA CANELLA, Laurus cassia.

CALIX, *Infundibu'lum*, from κάλπξ, 'a cup.' (F.) *Calice, Entonnoir*. Anatomists have given this name to small membranous canals, which surround the papillæ of the kidney, and open into its pelvis, whither they convey the urine;—*Calices renales, Cylindri membrana'cei Renum, Fis'tulæ ure'terum renum, Canales membra'nei Renum, Tu'buli pelvis renum*. Their number varies from 6 to 12 in each kidney.

CALIX VOMITORIA, Goblet, emetic.

CALLEUX, Callous.

CALLICOCCA IPECACUANHA, Ipecacuanha.

CALLICREAS, Pancreas.

CALLIOMARCHUS, Tussilago.

CALLIPÆ'DIA, from κάλος, 'beautiful,' and παις, παιδος, 'a child.' The art of begetting beautiful children. This was the title of a poem by Claude Quillet, in 1655. *Callipædia sive de pulchræ prolis habendæ ratione*. The author absurdly supposes, that the beauty of children is affected by the sensations which the mother experiences during her pregnancy.

CALLIPERS OF BAUDELOCQUE, see Pelvimeter.

CALLIPESTRIA, Cosmetics.

CALLIPHYLLUM, Asplenium trichomanoides.

CALLOSITAS, Induration—c. Palpebrarum, Scleriasis.

CALLOSITY, *Callos'itas, Scyros, Tylo'ma, Tylo'sis, Dermatol'ylus, Ecphy'ma Callus*. Hardness, induration, and thickness of the skin, which assumes a horny consistence, in places where it is exposed to constant pressure. (F.) *Durillon*. Also that induration, which is observed in old wounds, old ulcers, fistulous passages, &c.

CALLOUS, *Callo'sus, Ochtho'des*, from *callus*, 'hardness.' (F.) *Calleux*. That which is hard or indurated. A *Callous Ulcer*, is one whose edges are thick and indurated.

CALLUNA VULGARIS, Erica vulgaris.

CALLUS or CALUS or CALLUM. (F.) *Cal*. The bony matter, thrown out between the fractured extremities of a bone, which acts as a cement, and as a new bony formation. The words, are, likewise, used occasionally in the same sense as Callosity.

CALMANTS, Sedatives.

CALME, (F.) The interval that separates the paroxysms of an acute or chronic disease. When the type is intermittent, the word *intermission* is used.

CALOMBA, Calumba.

CALOMELANOS TORQUETI, Hydrargyri submurias.

CALOMELANOS TURQUETI. A name given by Riverius to purgative pills, prepared with calomel, sulphur, and resin of jalap.—Dictionaries.

CALOMELAS, Hydrargyri submurias.

CALO'NIA, καλωνια. An epithet formerly given to myrrh.—Hippocr. See Myrrha.

CALOPHYLLUM INOPHYLLUM, see Fagara octandra.

CALOR, Heat—c. Animalis, Animal heat.

CALORICITÉ, (F.) *Caloric''itas*. The faculty possessed by living bodies, of generating a sufficient quantity of caloric, to enable them to resist atmospheric cold, and to preserve, at all times and in every part, a temperature nearly equal. See Animal Heat.

CALORIFICA'TION, *Calorifica'tio*, from *calor*, 'heat,' and *fieri*, 'to become.' The function of producing animal heat.

CALORINÈSES, from *calor*, 'heat.' The name under which M. Baumes proposes to arrange all diseases, characterized by a sensible change in the quantity of animal heat. The *Calorinèses* form the first class of his Nosology.

CALOTROPIS GIGANTEA, Mudar—c. Mudarii, Mudar.

CALOTTE, (F.) *Pile'olum*. Anatomists sometimes give the name—*Calotte aponévrotique*—to the aponeurosis of the occipito-frontalis muscle, which covers it externally; and that of *Calotte du crane* to the *scull-cap*.

Calotte is also applied to an adhesive plaster, with which the head of a person labouring under tinea capitis is sometimes covered, after the hair has been shaved off. This plaster is pulled suddenly and violently off, in order to remove the bulbs of the hair. It means, also, a sort of coif made of boiled leather, worn by those who have undergone the operation of trepan, &c.

CALOTTE D'ASSURANCE, Condom.

CALTHA ALPINA, Arnica montana—c. Arvensis, Calendula arvensis—c. Vulgaris, Calendula officinalis.

CALTROPS, see Trapa natans.

CALUM'BA, *Colom'bo, Calom'ba, Colom'ba*, (Ph. U. S.;) *Columbo, Radix Columbæ*. (F.) *Calumbe* ou *Columbe*. The root of *Menisper'mum palma'tum, Coc'culus palma'tus*, indigenous in India and Africa. Its odour is slightly aromatic; taste unpleasantly bitter. It is tonic and antiseptic. Dose, gr. 10 to ʒj. in powder.

CALUMBA, AMERICAN, *Frase'ra Walteri, F. Carolinien'sis*, (F.) *Officina'lis, Sicer'tia differm'is, Sw. Frase'ra, American* or *Marietta Columbo, Indian Lettuce, Yellow Gentian, Golden Seal, Meadow pride, Pyramid*, is used in the same cases as the true Calumba.

CALUS, Callus.

CALVA, Cranium.

CALVA, *Calva'ria*. The cranium;—the upper part especially;—the *Vault of the Cranium, Cam'era*.

CALVARIA, Cranium.

CALVA'TA FERRAMEN'TA. Surgical instruments, which have a head or button.

CALVER'S PHYSIC, Leptandria Virginica.

CALVI''TIES, *Calvi''tium, Phalacro'sis, Glabri''ties, Ophi'asis, Depila'tio Cap'itis, Phalacro'ma, Madaro'sis*, &c. from *calvus*, 'bald.' (F.) *Chauveté*. Absence of hair, particularly at the top of, and behind the head. *Calvi''ties palpebra'rum*:—loss of the eye-lashes.

CALX, Lime, *Ca'rium Terræ, Protox'ide of Cal'cium, Cal'caria pura*. The lime, employed in pharmacy, should be recently prepared by calcination.

Calx, see Calcaneum—c. Chlorinata, Calcis chloridum—c. Cum kali puro, Potassa cum calce—c. Salita, Calcis murias—c. Bismuthi, Bismuth, subnitrate of.

Calx e Testis; lime prepared from shells. It has probably no medicinal advantages over that prepared from marble.

Calx Viva, *Ox'idum Calcii, Calx recens, Fumans nix, Calx usta, Calx et Calx viva. Lime* or *Quicklime*. (F.) *Chaux vive*. The external operation of calx viva is escharotic, but it is rarely used. Lime is a good disinfecting agent. It is employed internally in the form of Liquor Calcis, (q. v.)

CALYSTEGIA SOLDANELLA, Convolvulus soldanella.

CAMARA, Calva.

CAMAREZ, MINERAL WATERS OF. Camarez is a small canton near Sylvanès, in the department of Aveyron, France, where there are some acidulous chalybeates.

CAMARO'SIS, *Camaro'ma*, from καμαρα, 'a vault;' *Camera'tio, Testudina'tio Cranii*. A species of fracture of the skull, in which the fragments are placed so as to form a vault, with its base resting on the dura mater.—Galen, Paulus of Ægina.

CAMBING. A tree of the Molucca Islands, from the bark of which a kind of gum-resin exudes, which has been highly extolled in dysentery. It appears to have some resemblance to the simarouba.—Rumphius.

CAMBIUM, '*Exchange*.' A name formerly given to a fancied nutritive juice, which was supposed to originate in the blood, to repair the losses of every organ, and produce their increase.—Sennertus.

CAMBO, MINERAL WATERS OF. A village in the department of Basses Pyrénées, France, where there are two mineral springs; the one an acidulous chalybeate, the other sulphureous. Temperature, 62° to 69° Fahrenheit.

CAMBODIA, Cambogia.

CAMBO'GIA, from Cambodia, in the East Indies, where it is obtained. Hence, likewise, its names *Cambo'dia, Cambo'gium, Gambo'gia, Gambo'gium, Gambu'gium*. It is called, also, *Gutta, Gutta gamba, Gummi Gutta, Catagau'na, Cattagau'ma, Chryso'pus, Laxati'vus Indicus, Gummi Bogia, G. gaman'dræ, G. de Goa, G. de Jemu, Chitta jemoco, Gutta Gamandræ, Gummi ad Pod'agram, Camboge* or *Gamboge*, &c. (F.) *Gomme Gutte*. *Ord.* Guttiferæ. A yellow juice obtained from *Stalagmi'tis Cambogioï'des* and other plants of the natural family Guttiferæ, but it is not known from which of them the officinal Camboge is obtained. It is inodorous, of an orange yellow colour; opake and brittle: fracture glassy; is a drastic cathartic, emetic, and anthelmintic; and is used in visceral obstructions and dropsy, and wherever powerful hydragogue cathartics are required. Dose from gr. ij. to vi. in powder, united with calomel, squill, &c.

CAMBU'CA, *Cambuc'ca membra'ta*. Buboes and venereal ulcers, seated in the groin or near the genital organs.—Paracelsus. See Bubo.

CAMELÉE, Cneorum tricoccum.

CAMERA, Chamber, Fornix, Vault—c. Cordis, Pericardium.

CAMERATIO, Camarosis.

CAMINGA, Canella alba.

CAMISIA FŒTUS, Chorion.

CAMISOLE, Waistcoat, strait.

CAMMARUS, Crab.

CAMOMILLE FÉTIDE, Anthemis cotula—c. *Puante*, Anthemis cotula—c. *Romaine*, Anthemis nobilis—c. *des Teinturiers*, Anthemis tinctoria—c. *Vulgaire*, Matricaria chamomilla.

CAMOSIERS, WATERS OF. C. is a canton, two leagues from Marseilles, where are springs containing carbonate of lime, sulphur, chloride of sodium, &c. They are purgative, and used in skin complaints.

CAMPAGNE, MINERAL WATERS OF. Campagne is in the department of Aude, France. The waters contain sulphate and chlorohydrate of magnesia. Temperature 80° Fahr.

CAMPAN'ULA. Diminutive of *Campa'na*. A bell.

Campanula Trache'lium, *Canterbury Bell* or *Throatwort*, was formerly used, in decoction, in relaxation of the fauces. It is, also, called *Cervica'ria*.

CAMPE, Flexion.

CAMPHIRE, Camphor.

CAMPHOR, from Arab. *Caphur* or *Kam'phur, Cam'phora, Cam'phura, Caffa, Caf, Cafar, Caph'ora, Alcafor, Camphire, Camphor*, &c. (F.) *Camphre*. A concrete substance, prepared, by distillation, from the *Laurus Cam'phora*, an indigenous tree of the East Indies. *Order*, Laurineæ. Its odour is strong and fragrant: it is volatile, not easily pulverizable; texture crystalline. Soluble in alcohol, ether, oils, vinegar; and slightly so in water. Its properties are narcotic, diaphoretic, and sedative. Dose, gr. v. to ℈j. Dissolved in oil or alcohol, it is applied externally in rheumatic pains, bruises, sprains, &c.

Camphor Water, Mistura Camphoræ.

CAMPHORATA HIRSUTA SEU MONSPELIENSIUM, Camphorosma monspeliaca.

CAMPH'ORATED, *Camphora'tus*, (F.) *Camphré*. Relating to camphor; containing camphor; as a *camphorated smell, a camphorated draught*.

CAM'PHOROSMA MONSPELIACA, from *Camphor*, and οσμη, 'odour.' *Sela'go, Camphora'ta hirsu'ta* seu *Monspelien'sium, Hairy Camphoros'ma*, (F.) *Camphrée de Montpellier*. *Family*, Atripliceæ. *Sex. Syst.* Tetrandria Monogynia. This plant, as its name imports, has an odour of camphor. It is regarded as diuretic, diaphoretic, cephalic, antispasmodic, &c. It is also called *Chamæpeucē* and *Stinking Ground Pine*.

CAMPHRE, Camphor.

CAMPHRÉ, Camphorated.

CAMPHRE DE MONTPELLIER, Camphorosma monspeliaca.

CAMPSIS, καμψις, *Flex'io, Curva'tio, Inflex'io*. Bone or cartilage, forcibly bent from its proper shape, without breaking.—Good.

Campsis depressio, Depression.

CAMPYLORRHACHIS; from καμπυλος, 'crooked,' and ραχις, 'spine.' A monster, whose spine is crooked.—Gurlt.

CAMPYLORRHI'NUS; from καμπυλος, 'crooked,' and ρις, 'nose.' A monster whose nose is crooked.—Gurlt.

CAMPYLOTIS, Cataclasis.

CAMPYLUM. Cataclasis.

CAMUS (F.) *Simus, Resi'mus.* One who has a short nose. The French speak of *Nez camus*, 'short nose.'

CANAL, *Cana'lis, Ductus, Mea'tus, Poros, Och'etos*, (F.) *Conduit.* A channel, for affording passage to liquids or solids or to certain organs.

CANAL, ALIMEN'TARY or DIGES'TIVE, *Cana'lis ciba'rius* vel *digesti'vus, Diges'tive Tube, Alimentary Duct* or *Tube, Ductus ciba'rius.* The canal extending from the mouth to the anus.

CANAL, ARACHNOI'DIAN, *Cana'lis Bichat'ii, Canal of Bichat.* A canal formed by the extension of the arachnoid over the transverse and longitudinal fissures of the brain, and which surrounds the vena magna Galeni.

CANAL ARTÉRIEL, Arterial duct—*c. de Bartholin*, Ductus Bartholinus—c. of Bichat, Canal, arachnoidian—c. Bullular, of Petit, *Godronné canal*—*c. Carotidien*, Carotid canal—*c. Cholédoque*, Choledoch duct—*c. Goudronné, Godronné canal*—*c. Hépatique*, Hepatic duct—c. Infra-orbitar, Suborbitar canal—*c. Inflexe de l'os temporal*, Carotid canal—*c. Intermédiare des ventricules*, Aquæductus Sylvii.

CANAL, INTES'TINAL. *Cana'lis* seu *Ductus intestina'lis.* The portion of the digestive canal, formed by the intestines.

CANAL DE PETIT, Godronné canal—*c. Pulmo-aortique*, arterial Duct—c. Rachidian, Vertebral canal.

CANAL of SCHLEMM. A minute circular canal, discovered by Professor Schlemm, of Berlin. It is situate at the point of union of the cornea and sclerotica.

CANAL SPINAL, Vertebral canal—*c. Spiroïde de l'os temporal*, Aquæductus Fallopii—*c. de Stenon*, Ductus salivalis superior—*c. Thoracique*, Thoracic duct—*c. Veineux*, Canal, venous—c. Vulvo-uterine, Vagina—*c. de Warthon*, Ductus salivalis inferior.

CANAL VENOUS, *Cana'lis* seu *Ductus veno'sus*, (F.) *Canal veineux.* A canal, which exists only in the fœtus. It extends from the bifurcation of the umbilical vein to the vena cava inferior, into which it opens, below the diaphragm. At times, it ends in one of the infrahepatic veins. It pours into the cava a part of the blood, which passes from the placenta by the umbilical vein. After birth, it becomes a fibrocellular cord.

CANALES CIRCULARES, Semicircular canals—c. Lachrymales, Lachrymal ducts—c. Membranei renum, see Calix—c. Tubæformes, Semicircular canals.

CANALICULATUS, *Cannélé*, Grooved.

CANALICULI LACHRYMALES, Lachrymal ducts—c. Limacum, Lachrymal ducts—c. Semicirculares, Semicircular canals.

CANALIS ARTERIOSUS, Arterial duct—c. Bichatii, Canal arachnoidian—c. Canaliculatus, Gorget—c. Caroticus, Carotid canal—c. Lacrymalis, Lachrymal or nasal duct—c. Medius, Aquæductus Sylvii—c. Nerveus fistulosus renum, Ureter—c. Orbitæ nasalis, Lachrymal or nasal duct—c. Scalarum communis, Infundibulum of the cochlea—c. Urinarius, Urethra—c. Vidianus, Pterygoid canal.

CANALS, NUTRITIVE or FOR THE NUTRITION OF BONES, *Ductus nutri'tii*, (F.) *Canaux nourriciers* ou *de Nutrition des os.*—*Conduits nourriciers* ou *nutriciers.* The canals, through which the vessels pass to the bones. They are lined by a very fine lamina of compact texture, or are formed in the texture itself. There is, generally, one large nutritious canal in a long bone, situate towards its middle.

CANAPACIA, Artemisia vulgaris.

CANARIES, CLIMATE OF. The climate of the Canaries greatly resembles that of Madeira. That of the latter is however more equable, and the accommodation for invalids much superior.

CANARY-SEED, Phalaris Canariensis.

CANAUX AQUEUX, see Aqueous—*c. Demicirculaires*, Semicircular canals—*c. Éjaculateurs*, Ejaculatory ducts—*c. Nourriciers*, Canals, nutritive—*c. de Nutrition des os*, Canals, nutritive.

CANAUX DE TRANSMISSION. According to Bichat, the bony canals intended to give passage to vessels and nerves going to parts more or less distant; as the *Cana'lis Carot'icus*, &c.

CANAUX VEINEUX. Venous Canals. The canals situate in the diploë, which convey venous blood.

CAN'CAMUM. A mixture of several gums and resins, exported from Africa, where it is used to deterge wounds. Dioscorides calls, by the name καγκαμον, the tears from an Arabian tree, which are similar to myrrh, and of a disagreeable taste. He advises it in numerous diseases. This name is given, also, to the Anime, (q. v.)

CANCAMY, Anime.

CANCEL'LI. *Lattice-work.* The *Cellular* or *Spongy Texture of Bones*, (F.) *Tissu celluleux;* consisting of numerous cells, communicating with each other. They contain a fatty matter, analogous to marrow. This texture is met with, principally, at the extremities of long bones; and some of the short bones consist almost wholly of it. It allows of the expansion of the extremities of bones, without adding to their weight; and deadens concussions.

CANCEL'LUS, from *cancer*, 'a crab.' A species of crayfish, called the *Wrong Heir*, and *Bernard the Hermit:* which is said to cure rheumatism, if rubbed on the part.

CANCER, καρκινος, *Car'cinos, Lupus cancro'sus, Ulcus cancro'sum*, 'a crab.' (q. v.) A disease, so called, either on account of the hideous appearance which the ulcerated cancer presents, or on account of the great veins which surround it, and which the ancients compared to the claws of the crab; called also *Carcino'ma.* It consists of a scirrhous, livid tumour, intersected by firm, whitish, divergent bands; and occurs chiefly in the secernent glands. The pains are acute and lancinating, and often extend to other parts. The tumour, ultimately, terminates in a fetid and ichorous ulcer. It is distinguished, according to its stages, into *occult* and *open;* the former being the scirrhous, the latter the ulcerated condition. At times, there is a simple destruction or erosion of the organs, at others, an *encephaloid* or *cerebriform*, and at others, again, a *colloid* degeneration.

For its production, it requires a peculiar diathesis, or cachexia. The following table exhibits the characters of the three species of carcinoma, from Dr. Walshe:

The use of irritants, in cancerous affections, is strongly to be deprecated. When the disease is so situate that excision can be practised, the sooner it is removed the better.

Encephaloid.	*Scirrhus.*	*Colloid.*
Resembles lobulated cerebral matter.	Resembles rind of bacon traversed by cellulo-fibrous septa.	Has the appearance of particles of jelly inlaid in a regular alveolar bed
Is commonly opaque from its earliest formation.	Has a semitransparent glossiness.	The contained matter is strikingly transparent.
Is of a dead white colour.	Has a clear whitish or bluish yellow tint.	Greenish yellow is its predominant hue.
Contains a multitude of minute vessels.	Is comparatively ill-supplied with vessels.	Its vessels have not been sufficiently examined as yet.
Is less hard and dense than scirrhus.	Is exceedingly firm and dense.	The jelly-like *matter* is exceedingly soft; a colloid *mass* is, however, firm and resisting.
Is frequently found in the veins issuing from the diseased mass.	Has not been distinctly detected in this situation.	The pultaceous variety has been detected in the veins.
The predominant microscopical elements are globular, not always distinctly cellular, and caudate corpuscula.	The main microscopical constituents are juxtaposed nuclear cells; caudate corpuscula do not exist in it.	Is composed of shells in a state of *emboîtement*.
Occasionally attains an enormous bulk.	Rarely acquires larger dimensions than an orange.	Observes a mean in this respect.
Has been observed in almost every tissue of the body.	Its seat, as ascertained by observation, is somewhat more limited.	Has so far been seen in a limited number of parts only.
Very commonly coexists in several parts or organs of the same subject.	Is not unusually solitary.	Has rarely been met with in more than one organ.
Is remarkable for its occasional vast rapidity of growth.	Ordinarily grows slowly.	Grows with a medium degree of rapidity.
Is frequently the seat of interstitial hemorrhage and deposition of black or bistre-coloured matter.	Is comparatively rarely the seat of these changes.	
When softened into a pulp appears as a dead white or pink opaque matter of creamy consistence.	Resembles, when softened, a yellowish brown semitransparent gelatinous matter.	Undergoes no visible change of the kind.
Subcutaneous tumours are slow to contract adhesion with the skin.	Scirrhus thus situate usually becomes adherent.	
Ulcerated encephaloid is frequently the seat of hemorrhage, followed by rapid fungous development.	Scirrhous ulcers much less frequently give rise to hemorrhage; and fungous growths (provided they retain the scirrhous character) are now more slowly and less abundantly developed.	
The progress of the disease after ulceration is commonly very rapid.	There is not such a remarkable change in the rate of progress of the disease after ulceration has set in.	
It is the most common form under which secondary cancer exhibits itself.		
Is the species of cancer most frequently observed in young subjects.	Is much less common before puberty.	Has so far been observed in adults only.

Cancer Aquat'icus, *Gan'grenous stomati'tis, Cancrum Oris, Gangræop'sis, Canker of the mouth, Gangrenous soremouth, Sloughing Phagedæ'na of the mouth, Water Canker.* Called, also, *Aphthæ serpen'tes, Gangræ'na Oris, Noma, Stomac'acē gangræno'sa, Cheiloc'acē, Uloc'acē, Cheilomala'cia, Scorbu'tus Oris, Stomatomala'cia pu'trida, Stomatosep'sis, Stomatonecro'sis, Carbun'culus labio'rum et gena'rum, &c.* (F.) *Cancer aquatique, Stomatite gangréneuse, S. Charbonneuse, Gangrène de la Bouche, Sphacèle de la Bouche, Fégarite, Apthe gangréneux.* Certain sloughing or gangrenous ulcers of the mouth,—so called, perhaps, because they are often accompanied with an afflux of saliva. The disease is not uncommon in children's asylums, and demands the same treatment as hospital gangrene;—the employment of caustics, and internal and external antiseptics.

CANCER AQUATIQUE, Cancer aquaticus, Stomacace—c. Astacus, see Cancrorum chelæ—c. Black, Melanosis—c. Caminariorum, Cancer, chimney sweepers'—c. *Cérébriforme,* see Encephaloid.

Cancer, Chimney-sweepers', *Sootwart, Cancer mundito'rum, Cancer purgato'ris infumic'uli, Cancer scroti, Cancer caminario'rum, Oscheocarcino'ma,* (F.) *Cancer des Ramoneurs.* This affection begins with a superficial, painful, irregular ulcer, with hard and elevated edges, occupying the lower part of the scrotum. Extirpation of the part affected is the only means of effecting a cure.

Cancer, Davidson's Remedy for, see Conium maculatum—c. *du Foie, Hépatosarcomie.*

Cancer Gale'ni, (F.) *Cancer de Galien.* A bandage for the head, to which Galen gave the name *Cancer,* from its eight heads resembling, rudely, the claws of the crab. It is now supplied by the bandage with six *chefs* or heads, which is called the *Bandage of Galen or B. of the Poor.*

CANCER DE GALIEN, Cancer Galeni—c. Intestinorum, Enteropathia cancerosa—*c. des Intestins,* Enteropathia cancerosa—c. of the Lung, Phthisis, cancerous—c. Lupus, Lupus—c. Mollis, see Encephaloid—c. Munditorum, Cancer, chimney-sweepers'—c. Oris, Stomacace—c. Ossis, Spina ventosa—c. Purgatoris infumiculi, Cancer, chimney-sweepers'—c. Scroti, Cancer, chimney-sweepers'—c. Soft, Hæmatodes fungus—c. Uteri, Metro-carcinoma.

CANCÉREUX, Cancerous.

CANCER ROOT, Orobanche Virginiana, Phytolacca decandra.

CAN'CEROUS, *Cancro'sus,* (F.) *Cancéreux.*

Relating to cancer; as *Cancerous ulcer, Cancerous Diathesis*, &c.

CANCHALAGUA, *Cachenlaguen, Cachin lagua, Chance lagua, Erythræ'a Chilen'sis.* A bitter Chili plant, which is considered aperient, sudorific, stomachic, vermifuge, and febrifuge.

CANCRENA, Gangrene.

CAN'CROID, *Cancroï'deus*, from *cancer* and εἶδος, 'form.' That which assumes a cancerous appearance. A name given to certain cutaneous cancers by Alibert: called also, *Cheloid* or *Keloid* (χελὺς, 'a tortoise,' and εἶδος, 'likeness,') from their presenting a flattish raised patch of integument, resembling the shell of a tortoise.

CANCRO'RUM CHELÆ, *Oc'uli* vel *Lap'ides Cancro'rum, Lapil'li cancro'rum, Concremen'ta, Ast'aci fluviat'ilis, Crab's stones* or *eyes*, (F.) *Yeux d'écrevise.* Concretions found, particularly, in the *Cancer As'tacus* or Crayfish. They consist of carbonate and phosphate of lime; and possess antacid virtues, but not more than chalk.

CANCROSUS, Cancerous, *Chancreuse.*

CANCRUM ORIS, Cancer aquaticus, Stomacace.

CANDELA FUMALIS, Pastil—c. Medicata, *Bougie*—c. Regia, Verbascum nigrum.

CANDELARIA. Verbascum nigrum.

CANDI, *Candum, Canthum, Cantion;* 'white, bleached, purified.' Purified and crystallized sugar. See Saccharum.

CANDIDUM OVI, Albumen ovi.

CANE, SUGAR. See Saccharum—c. Sweet, Acorus Calamus.

CANELÉ, Grooved.

CANELLA. See Canella alba.

CANEL'LA ALBA, diminutive of *Canna*, 'a reed,' so called because the bark is rolled up like a reed. *Cortex Wintera'nus spu'rius, Canella Cuba'na, C. Winterа'nia, Cinnamo'mum album, Cortex Antiscorbu'ticus, C. Aromat'icus, Costus cortico'sus, Camin'ga, Canella of* Linnæus, and of Ph. U. S., *Canella Bark, Canella*, (F.) *Canelle* ou *Canelle blanche, Fausse Écorce de Winter, Écorce Cariocostine. Fam.* Magnoliaceæ. *Sex. Syst.* Dodecandria Monogynia. This bark is a pungent aromatic. Its virtues are partly extracted by water; entirely by alcohol. It is a stimulant, and is added to bitters and cathartics.

CANELLA CARYOPHYLLATA, Myrtus caryophyllata—c. Cubana, C. alba, Laurus cassia—c. Malabarica et Javensis, Laurus cassia.

CANELLIFERA MALABARICA, Laurus cassia.

CANEPIN. (F.) A fine lamb's skin or goat's skin, used for trying the quality of lancets.

CANICACEOUS, Furfuraceous.

CAN'ICÆ. Meal, in which there is much bran. Also, coarse bread; or bread in which there is much bran—*Panis Canica'ceus.*

CANICIDA, Aconitum.

CANIC'ULA; the *Dogstar*, from *canis*, 'a dog;' Σείριος, Sirius, (F.) *Canicule.* This star, which gives its name to the *Dogdays*, because they commence when the sun rises with it, was formerly believed to exert a powerful influence on the animal economy. The Dog-days occur at a period of the year when there is generally great and oppressive heat, and therefore—it has been conceived—a greater liability to disease.

CANIF, Knife.

CANIN, Canine.

CANINANÆ RADIX, Caincæ radix.

CANINE, *Cani'nus, Cyn'icus*, κυνικὸς, from *canis*, 'a dog,' (F.) *Canin.* That which has a resemblance to the structure, &c. of a dog.

CANINE FOSSA, *Fossa Cani'na*, (F.) *Fosse Canine.* A small depression on the superior maxillary bone, above the *dens caninus*, which gives attachment to the *caninus* or *levator anguli oris muscle.*

CANINE LAUGH, *Sardon'ic laugh, Risus Cani'nus, Risus Sardon'icus, Sardi'asis, Sardoni'asis*, (F.) *Ris canin, sardonique, moqueur.* A sort of laugh, the facial expression of which is produced particularly by the spasmodic contraction of the *Caninus* muscle. Probably, this expression, as well as *Cynic spasm, Cani'nus spasmus*, may have originated in the resemblance of the affection to certain movements in the upper lip of the dog.

CANINE TEETH, *Dentes Cani'ni, Cynodon'tes, D. Lania'rii, D. angula'res, cuspida'ti, columella'res, ocula'res, morden'tes, Eye Teeth*, (F.) *Dents canines, laniaires, angulaires, oculaires, œillères*, ou *conoïdes.* The teeth between the lateral incisors and small molares of each jaw;—so named because they resemble the teeth of the dog.

CANINUS, Levator anguli oris—c. Sentis, Rosa canina.

CANIRAM, Strychnos nux vomica.

CANIRUBUS, Rosa canina.

CANIS INTERFECTOR, Veratrum sabadilla—c. Ponticus, Castor fiber.

CANI'TIES, from *canus*, 'white.' *Whiteness* or *grayness of the hair*, and especially of that of the head, (F.) *Canitie.* When occurring in consequence of old age it is not a disease. Sometimes, it happens suddenly, and apparently in consequence of severe mental emotions. The causes, however, are not clear. See Poliosis.

CANKER, Stomacace—c. of the mouth, Cancer aquaticus—c. water, Cancer aquaticus.

CANNA, see Tous-les-Mois, Cassia fistula, Trachea—c. Brachii, Ulna—c. Domestica cruris, Tibia—c. Fistula, Cassia fistula—c. Indica, Sagittarium alexipharmacum—c. Major, Tibia—c. Minor, Fibula, Radius—c. Solutiva, Cassia fistula.

CANNABIS INDICA, Bangue. See, also, Churrus and Gunjah.

CAN'NABIS SATI'VA, (F.) *Chanvre, Chambrie.* The seed of this—*Hempseed, Sem'ina Can'nabis*, (F.) *Chenevis*, is oily and mucilaginous. The decoction is sometimes used in gonorrhœa.

CANNACORUS RADICE CROCEA, Curcuma longa.

CANNAMELLE, see Saccharum.

CANNE AROMATIQUE, Acorus calamus—*c. Congo*, Costus—*c. de Rivière*, Costus—*c. à Sucre*, see Saccharum.

CANNEBERGE, Vaccinium oxycoccos—*c. Ponctuée*, Vaccinium vitis idæa.

CANNELÉ ou *CANELÉ* (F.) from *cana'lis*, 'a canal;' *Sulca'tus, Stria'tus, Canalicula'tus.* Having a canal or groove—as, *Muscle cannelé* (Lieutaud,) the Gemini; *Corps cannelés* ou *striés*, the Corpora striata; *Sonde cannelée*, a grooved sound, &c. See Grooved.

CANNELLE, Laurus cinnamomum—*c. Blanche*, Canella alba—*c. de la Chine*, Laurus cassia—*c. de Coromandel*, Laurus cassia—*c.*

Fausse, Laurus cassia—*c. Giroflée*, Myrtus caryophyllata—*c. des Indes*, Laurus cassia—*c. de Java*, Laurus cassia—*c. de Malabar*, Laurus cassia—*c. Matte*, Laurus cassia—*c. Officinale*, Laurus cinnamomum—*c. Poivrée*, see Wintera aromatica.

CANNULA, Canula.

CANOPUM, see Sambucus.

CANTABRICA, Convolvulus cantabrica.

CANTABRUNO, Furfur.

CANTARELLUS, Meloe proscarabæus.

CANTATIO, Charm.

CANTERBURY, WATERS OF. *Aquæ Cantuarien'ses.* The waters of Canterbury in Kent, England, are impregnated with iron, sulphur, and carbonic acid.

CANTERIUM, Cantherius.

CANTHARIDE TACHETÉE, Lytta vittata.

CANTHARIDINE, see Cantharis.

CAN'THARIS, from *καν9αρος*, 'a *scarabæ'us*;' *Musca Hispan'ica*, *Mel'oë vesicato'rius*, *Cantharis vesicato'ria*, *Lytta vesicato'ria*; *Blistering Fly*, *Spanish Fly*, *Fly*, (F.) *Cantharides*, *Mouches*, *M. d'Espagne.* This fly is much employed in medicine. It is the most common vesicatory. Given internally, and even when absorbed from the skin, it affects the urinary organs, exciting strangury. This may be prevented, in cases of blisters, by interposing between the blistering plaster and skin a piece of tissue paper. Diluents will relieve the strangury. Dose, half a grain to one grain. If kept dry, the flies will retain their activity for many years. Their active principle, *Can'tharidin*, *Cantharidi'na*, has been separated from them.

CANTHARIS VITTATA, Lytta vittata.

CANTHE'RIUS, *Canthe'rium.* The cross piece of wood in the apparatus, used by Hippocrates for reducing luxations of the humerus.

CANTHI'TIS. Inflammation of the Canthus of the eye.

CAN'THUM, Candi.

CANTHUS, *καν9ος*, *Epican'this*, *An'gulus ocula'ris*; the corner or angle of the eye. The *greater canthus* is the *inner angle*, *Hir'quus*, *Rhanter*; the *lesser canthus*, the *outer angle*, *Paro'pia*, *Pega.*

CANTIA'NUS PULVIS. A cordial powder, known under the name, '*Countess of Kent's powder*,' composed of coral, amber, crab's eyes, prepared pearls, &c. It was given in cancer.

CANTION, Candi.

CAN'ULA, or CAN'NULA, *Au'liscos*, *Aulos.* Diminutive of *Canna*, 'a reed;' *Tu'bulus*, (F.) *Canule* ou *Cannule.* A small tube, of gold, silver, platinum, iron, lead, wood, or elastic gum, used for various purposes in surgery.

CAOUTCHOUC. The Indian name for *Indian Rubber*, *Elas'tic Gum*, *Gum Elastic*, *Cauchuc*, *Resi'na elas'tica*, *Cayenne Resin*, *Cautchuc.* A substance formed from the milky juice of the *Hævea* (seu *Hevea*) *Guianen'sis*, *Jat'ropha elas'tica*, (*Sipho'nia Cahuchu*,) *S. elas'tica*, *Ficus Indica*, and *Artocar'pus integrifo'lia*:—South American trees. It is insoluble in water and alcohol; but boiling water softens and swells it. It is soluble in the essential oils and in ether, when it may be blown into bladders. It is used in the fabrication of catheters, bougies, pessaries, &c.

CAPA-ISIAKKA: Bromelia ananas.

CAPBERN, WATERS OF. C. is in the department Hautes-Pyrénées, France. The waters contain sulphates, and carbonates of lime and magnesia, and chloride of magnesium. Temperature, 75° Fahrenheit. They are purgative.

CAPELET, Myrtus caryophyllata.

CAPELINE; 'A *Woman's Hat*,' in French; *Capis'trum*, from *caput*, 'head.' A sort of bandage, which, in shape, resembles a riding-hood. There are several kinds of *Capelines.* 1. That of the head, *C. de la tête.* See Bonnet d'Hippocrate. *C. of the clavicle*, employed in fractures of the acromion, clavicle and spine of the scapula. *C. of an amputated limb*—the bandage applied round the stump.

CAPER BUSH, Capparis spinosa.

CAPER PLANT, Euphorbia Lathyris.

CAPERS, see Capparis spinosa.

CAPETUS, Imperforation.

CAPHORA, Camphor.

CAPILLAIRE, Capillary, see Adiantum capillus veneris—*c. du Canada*, Adiantum pedatum—*c. de Montpellier*, Adiantum capillus veneris.

CAPILLAMEN'TUM, from *Capil'lus*, 'a hair,' *Capilli''tium*, *Tricho'ma*, *Trichoma'tion.* Any villous or hairy covering. Also, a small fibre or fibril.

CAP'ILLARY, *Capilla'ris*, *Capilla'ceus*, from *capil'lus*, 'a hair.' (F.) *Capillaire.* Hair-like; small.

CAP'ILLARY VESSELS, (F.) *Vaisseaux capillaires*, are the extreme radicles of the arteries and veins, with perhaps a spongy tissue or parenchyma between the two. These, together, constitute the *Capillary*, *intermediate*, or *peripheral vascular system.* In this system, secretion and nutrition are performed, and animal heat is probably elicited. They possess an action distinct from that of the heart, and are the seat of febrile, inflammatory and other diseases.

CAPILLATIO, Trichismus.

CAPILLATUS, Impuber.

CAPILLITIUM, Capillamentum, Entropion, Scalp.

CAPILLORUM DEFLUVIUM, Alopecia.

CAPIL'LUS, quasi *Capitis Pilus*, *Coma*, *Chætē*, *Crinis*, *Pilus*, *Thrix*, *Cæsa'ries*, (F.) *Cheveu.* This term is generally applied to the hair of the head, the characters of which vary, according to races, individuals, &c. Hairs arise in the cellular membrane, where the bulb is placed, and are composed of two parts—*one*, external, tubular, and transparent, of an epidermoid character; the *other*, internal and *sui generis*, which communicates to them their colour. The hair is insensible, and grows from the root.

CAPILLUS CANADENSIS, Adiantum pedatum.

CAPIPLE'NIUM, from *caput*, 'the head,' and *plenum*, 'full.' A word, employed with different significations. A variety of catarrh.—Schneider. A heaviness or disorder in the head common at Rome, like the *καρηβαρια*, *Carebaria*, of the Greeks.—Baglivi.

CAPISTRATIO, Phimosis.

CAPISTRUM, *Capeline*, *Chevestre*, Trismus—c. Auri, Borax.

CAPIS'TRUM, *Phimos*, *Cemos*, *κημος*, 'a halter.' This name has been given to several bandages for the head.—See Capeline, Chevestre.

CAPITALIA REMEDIA, Cephalic remedies.

CAPITALIS, Cephalic.

CAPITELLIUM, Alembic.

CAPITELLUM, see Caput.

CAPITEUX, Heady.

CAPITILU'VIUM, from *caput*, 'the head,' and *lavare*, to 'wash.' A bath for the head.

CAPITO'NES, from *caput*, 'the head.' Fœtuses whose heads are so large as to render labour difficult.

CAPITULUM, Alembic, Condyle, see Caput—c. Martis, Eryngium campestre—c. Santorini, Corniculum laryngis.

CAPITULUVIUM, Bath, (head.)

CAPNISMOS, Fumigation.

CAPNITIS, Tutia.

CAPNORCHIS, Fumaria bulbosa.

CAPNOS, Fumaria.

CAPON, *Cagot*.

CAPOT, *Cagot*.

CAP'PARIS SPINO'SA, *Cap'paris*, *Cappar*, *Ca'pria*, *Prickly Caper Bush*, (F.) *Câprier*. *Family*, Capparideæ. *Sex. Syst.* Polyandria Monogynia. The bark of the root, and the buds have been esteemed astringent and diuretic. The buds are a well known pickle.—*Capers*, (F.) *Câpres*.

CAPPARIS BADUC'CA, *Baduk'ka*. A species of caper, cultivated in India on account of the beauty of its flowers. The Orientals make a liniment with its juice, with which they rub pained parts. The flowers are purgative.

CAPPONE, WATERS OF. At Cappone, in the isle of Ischia, are waters containing carbonate of soda, chloride of sodium and carbonate of lime. Temp. 100°. Fah.

CAPREOLA'RIS, from *capreolus*, 'a tendril,' *Cissoïdes*, *Elicoïdes*. (F.) *Capréolaire*. Twisted.

CAPREOLA'RIA, VASA. Some have called thus the spermatic arteries and veins, on account of their numerous contortions.

CAPREOLUS, Helix.

CÂPRES, see Capparis spinosa.

CAPRIA, Capparis spinosa.

CAPRICORNUS, Plumbum.

CÂPRIER, Capparis spinosa.

CAPRIFOLIA, Lonicera periclymenum.

CAPRILOQUIUM, Egophony.

CAPRI'ZANS, *Dorcad'izon*, δορκαδίζων. That which leaps like a goat. An epithet used by Herophilus for the pulse when irregular and unequal.

CAPSA, *Boîte*, Capsule, Case—c. Cordis, Pericardium.

CAPSICUM, see Capsicum annuum.

CAP'SICUM AN'NUUM, from καπτω, 'I bite.' The systematic name of the plant whence *Cayenne Pepper* is obtained.—*Piper In'dicum*, *Sola'num urens*, *Siliquas'trum Plin'ii*, *Piper Braziliа'num*, *Piper Guineen'se*, *Piper Calecu'ticum*, *Piper Tur'cicum*, *C. Hispan'icum*, *Piper Lusitan'icum*, *Cayenne Pepper*, *Guin'ea Pepper*, (F.) *Piment*, *Poivre d'Inde*, *Poivre de Guinée*, *Corail des Jardins*. The pungent, aromatic properties of *Baccæ Cap'sici*, *Capsicum Berries*, *Capsicum* (Ph. U. S.), are yielded to ether, alcohol, and water. They are highly stimulant and rubefacient, and are used as a condiment. Their active principle is alcaloid, and is called *Capsicin*.

CAPSICUM HISPANICUM, Capsicum annuum.

CAPSIQUE, Capsicum annuum.

CAPSITIS, Phacitis.

CAPSULA, *Boîtier*—c. Articularis, Capsular ligament—c. Cordis, Pericardium—c. Dentis, Dental follicle—c. Nervorum, Neurilemma.

CAPSULÆ SEMINALES, Vesiculæ S.

CAPSULAIRE, Capsular.

CAP'SULAR. Relating to a capsula or capsule, *Capsula'ris*, (F.) *Capsulaire*.

CAPSULAR OR SUPRARENAL ARTERIES AND VEINS. Vessels, belonging to the suprarenal capsules. They are divided into superior, middle, and inferior. The first proceed from the inferior phrenic, the second from the aorta itself, and the third from the renal artery. The corresponding veins enter the phrenic, vena cava, and renal.

CAPSULAR LIG'AMENT, *Ligamen'tum capsula'rē*, *Cap'sula articula'ris*, *Artic'ular capsule*, *Fibrous capsule*, &c., (F.) *Ligament capsulaire*, *Capsule articulaire*, *Capsule fibreux*, &c. Membranous, fibrous, and elastic bags or capsules, of a whitish consistence, thick, and resisting, which surround joints.

CAPSULE, *Cap'sula*, *Capsa*, a box, or case, (F.) *Capsule*. This name has been given, by anatomists, to parts bearing no analogy to each other.

CAPSULE, FIBROUS, Capsular ligament.

CAPSULE, GELAT'INOUS, *Cap'sula gelat'inæ*, *Capsule of gelatin*. A recent invention by which copaiba and other disagreeable oils can be enveloped in gelatin so as to conceal their taste.

CAPSULE OF GLISSON, *Cap'sula* GLISSO'NII, *C. commu'nis* GLISSO'NII, *Vagi'na Portæ*. *V.* GLISSO'NII. A sort of membrane, described by Glisson, which is nothing more than dense cellular membrane surrounding the vena porta and its ramifications in the liver.

CAPSULE OF THE HEART, *Cap'sula cordis*. The Pericardium, (q. v.)

CAPSULE, RENAL OR SUPRA-RE'NAL OR ATRABIL'IARY, *Renal Gland*, *Glan'dula suprarena'lis*, *Cap'sula rena'lis*, *suprarena'lis* vel *atrabilia'ris*, *Ren succenturia'tus*, (F.) *Capsule surrénale* ou *atrabiliaire*. A flat, triangular body, which covers the upper part of the kidney, as with a helmet. A hollow cavity in the interior contains a brown, reddish or yellowish fluid. The renal capsules were long supposed to be the secretory organs of the fancied atrabilis. They are much larger in the fœtus than in the adult. Their uses are not known.

CAPSULE, SEM'INAL, *Capsula semina'lis*. BARTHOLINE thus designates the extremity of the vas deferens, which is sensibly dilated in the vicinity of the vesiculæ seminales. Some anatomists apply this name to the vesiculæ themselves.

CAPSULE, SYNO'VIAL, *Capsula Synovia'lis*. A membranous bag, surrounding all the movable articulations and canals, which gives passage to tendons. Synovial capsules exhale, from their articular surface, a fluid, whose function is to favour the motions of parts upon each other. See Bursa Mucosa, and Synovia.

CAPSULE SURRÉNALE OU ATRABILIARE, Capsule, renal.

CAPSULITIS, see Phacitis.

CAPUCHON, Trapezius.

CAPUCINE, Tropæolum majus.

CAPULUS, Scrotum.

CAPUT, 'the head,' (q. v.) Also the top of a bone or other part, (F.) *Tête*. The head of the small bones is sometimes termed *capit'ulum*, *capitell'um*, *cephalid'ium*, *cephal'ium*. Also, the glans penis.

Caput Asperæ Arteriæ, Larynx.

Caput Gallinag"inis, *Verumonta'num*, (F.) *Crête urétrale*. A projection, situate in the prostate, before the neck of the bladder. It is like the head of a woodcock in miniature, and, around it, open the seminal ducts and the ducts of the prostate.

Caput Genitale, Glans—c. Lubricum, Penis—c. Monachi, Leontodon Taraxacum—c. Obstipum, Torticollis—c. Penis, Glans.

Caput Purgia. Remedies, which the ancients regarded as proper for purging the head:—*errhines*, *sternutatories*, *apophlegmatisantia*, &c. Prosper Alpinus makes the *caput purgia* to be the same as errhines; and the *apophlegmatismi* the same as the masticatories of the moderns.

Caput Scapulæ, Acromion.

Caput Succeda'neum. A term sometimes used for the tumefied scalp, which first presents in certain cases of labour.

Caput Testis, Epididymis.

CAQUE-SANGUE ou *CAGUE-SANGUE*. Old French words which signify *Bloody evacuations*, (F.) *Déjections sanguinolentes*. They come from *cacare*, 'to go to stool,' and *sanguis*, 'blood.' Under this term was comprehended every affection, in which blood is discharged from the bowels.

CARA SCHULLI, *Frutex Ind'icus spino'sus*, *Barle'ria buxifo'lia*. A Malabar plant, which, when applied externally, is maturative and resolvent. The decoction of its root is used, in the country, in ischuria.

CARABAC'CIUM. An aromatic wood of India, of a yellowish colour, and a smell like that of the clove. Its decoction and infusion are given as stomachic and antiscorbutic.

CAR'ABUS. A genus of coleopterous insects. Two species, the *chrysoceph'alus* and *ferrugin'eus*, have been recommended for the toothache. They must be pressed between the fingers, and then rubbed on the gum and tooth affected.

CARACTÈRE, Character.

CARAGNA, Caranna.

CARAMATA, *Arumari*. A tree in the inland parts of Pomeroon. It furnishes a febrifuge bark, which Dr. Hancock says may be used in typhoid and remittent fevers where the cinchona is either useless or pernicious.

CARAMBOLO, Averrhoa carambola.

CARAN'NA, *Caragna*, *Tacamahaca Caragna*, *Caran'næ Gum'mi*, *G. Brel'sis*, *Gum Caran'na*, (F.) *Caragne*, *Gomme Caragne* ou *Carane*. A gum-resinous substance, which flows from a large tree in New Spain, and is obtained from South America in impure masses. It preserves its softness for a long time, has an aromatic smell, and a slightly acrid and bitter taste. It was formerly used as a vulnerary and in plasters.

CARAWAY, Carum.

CAR'BASUS, *Car'basa*, *Car'pasa*, *Linteum Carptum*, *Carpia*, *Motos*, *Linamen'tum*, from καρφος, 'a filament,' or from *carpere*, 'to card.' Celsus; *Charpie*, *Lint*. The filaments, obtained by unravelling old linen cut into small pieces; or by scraping it with a knife. The former is termed *Charpie brute*, the latter *Charpie rapée*. Charpie is applied to many useful purposes in surgery. Of it are formed compresses, tents, &c.

CARBO, *Carbo Ligni*, *Charcoal*, (F.) *Charbon*. Fresh charcoal is antiseptic. It is used to improve the digestive organs in cases of worms, dyspepsia, &c.; as a cataplasm to gangrenous and fetid ulcers, tinea, &c., and forms a good tooth-powder. Dose, gr. x. to ʒj. Also, Anthrax, (q. v.)

Carbo Anima'lis, *Carbo carnis*, *Animal charcoal*, (F.) *Charbon animal*. In the Pharmacopœia of the United States, it is directed to be prepared from bones. It is given in the same cases as the *Carbo Ligni*, and has been extolled in cancer. Dose, gr. ss. to gr. iij.

The Pharmacopœia of the United States contains a formula for the preparation of Carbo Anima'lis Purifica'tus, *purified animal charcoal* (*Carbon animal*. ℔j; *Acid. muriat.*, *Aquæ* ää f. ʒxij.) Pour the muriatic acid, previously mixed with the water, gradually upon the charcoal, and digest with a gentle heat for two days, occasionally stirring the mixture. Having allowed the undissolved portion to subside, pour off the supernatant liquor, wash the charcoal frequently with water until it is entirely free from acid, and lastly dry it.

Carbo Huma'num. The human excrement.—Paracelsus.

Carbo Mineralis, Graphites—c. Palpebrarum, Anthracosis.

CARBON, SESQUI-IODIDE OF, Carbonis sesqui-iodidum—c. Bisulphuret of, Carbonis sulphuretum—c. Sulphuret of, Carbonis sulphuretum.

CAR'BONAS or CARBO'NAS. A *carbonate*, (F.) *Carbonate*. A salt, formed by the combination of carbonic acid with a salifiable base.

Carbonas Natricum, Sodæ carbonas.

CARBONATE D'AMMONIAQUE, Ammoniæ carbonas.

CAR'BONATED, *Carbona'tus*, *Aëra'tus*, (F.) *Carboné*, *Aéré*. That which is impregnated with carbonic acid.

CARBONÉ. Carbonated.

CARBON'IC ACID, *Ac"idum Carbon'icum*, *Solid Air of Hales*, *Factitious Air*, *Fixed Air*, *Carbona'ceous Acid*, *Calca'reous Acid*, *Aërial Acid*, *Mephit'ic Acid*, (F.) *Acide Carbonique*. This gas, which neither supports respiration nor combustion, is not often used in medicine. It is the refreshing ingredient in effervescent draughts, poultices, &c. It is often found occupying the lower parts of mines (when it is called the *choke damp*,) caverns, tombs, wells, brewers' vats, &c., and not unfrequently has been the cause of death. Lime thrown into such places soon absorbs the acid.

CARBO'NIS SESQUI-IO'DIDUM, *C. Sesqui-Iodure'tum*, *Sesqui-Iodide* or *Sesqui-Iodure of Carbon*. This is made by mixing concentrated alcoholic solutions of iodine and potassa, until the former loses its colour; a solution is obtained from which water throws down a yellow precipitate—the sesqui-iodide of carbon. It has been used in enlarged glands and in some cutaneous affections, applied externally, (ʒss, to ʒvj. of cerate.)

Carbo'nis Sulphure'tum, *Sulphure'tum Carbo'nii*, *Sul'fidum Carbo'nii*, *Carbo'nium Sulphura'tum*, *Al'cohol Sul'phuris*, *Bisulphure'tum Carbo'nii*, *Sulphuret of Carbon*, *Bisulphuret of Carbon*, *Carburet of Sulphur*, (F.) *Sulfure de Carbon*. This transparent, colourless fluid, which has a very penetrating, disagreeable odour, and a

taste which is cooling at first, but afterwards acrid and somewhat aromatic, is a diffusible excitant. It is diaphoretic, diuretic, and has been said to have proved emmenagogue. It is also used in nervous diseases as an antispasmodic. Dose, one drop to four, repeated frequently.

It is used externally, where a cooling influence has to be rapidly exerted.

CARBONIUM SULPHURATUM, Carbonis sulphuretum.

CARBUNCLE, Anthrax—c. Fungous, Terminthus—c. of the Tongue, Glossanthrax—c. Berry, Terminthus.

CARBUNCLED FACE, Gutta rosea.

CARBUNCULAR EXANTHEM, Anthracia.

CARBUNCULUS, Anthrax—c. Anginosus, Cynanche maligna—c. Labiorum et genarum, Cancer aquaticus—c. Pulmonum, Necropneumonia.

Carbun'culus Rubi'nus. A red, shining, and transparent stone, from the Isle of Ceylon; formerly employed in medicine as a preservative against several poisons, the plague, &c.

Carbunculus Ulcusculosus, Cynanche maligna.

CAR'CAROS, from καρχαιρω, 'I resound,' 'I tremble.' A fever, in which the patient has a general tremor, accompanied with an unceasing noise in the ears.

CARCINODES, Carcinomatous, *Chancreuse.*

CARCINO'MA, from καρκινος, 'a crab.' Some authors have called thus, indolent tumours different from cancer; others, incipient cancer; and others, again, the species of cancer in which the affected structure assumes the appearance of cerebral substance; but the majority of authors use Carcinoma in the same sense as Cancer.

Carcinoma Hæmatodes, Hæmatodes fungus—c. of the Liver, *Hépatosarcomie*—c. Melanoticum, Melanosis—c. Spongiosum, Hæmatodes fungus—c. Ventriculi, see Gastrostenosis cardiaca et pylorica.

CARCINOM'ATOUS, *Carcin'odes, Carcinoï'des.* Relating to Cancer.

CARCINÔME SANGLANTE, Hæmatodes fungus.

CARCINOS, Cancer.

CARDAMANTICA, Cardamine pratensis, Lepidium Iberis.

CARDAMINDUM MINUS, Tropæolum majus.

CARDAMINĒ FONTANA, Sisymbrium nasturtium.

Cardami'ne Praten'sis, *Cardami'nē, Cardaman'tica, Nastur'tium Aquat'icum, Car'damon, Culi flos, Ibe'ris sophi'a, Nastur'tium praten'sē, Ladies-smock, Cuckoo flower.* (F.) *Cresson élégant, Cresson des près, Passerage sauvage. Ord.* Cruciferæ. The flowers have been considered useful as antispasmodics, in the dose of ʒj to ʒij. They are probably inert.

CARDAMOM, LESSER, Amomum cardamomum.

CARDAMOME, Amomum cardamomum—c. *de la Côte de Malabar*, Amomum cardamomum.

CARDAMOMUM MAJUS, Amomum grana paradisi—c. Minus, Amomum cardamomum—c. Piperatum, Amomum grana paradisi.

CARDAMON, Cardamine pratensis.

CARDÈRE, Dipsacus sylvestris—c. *Cultivé*, Dipsacus fullonum.

CARDIA, καρδια, 'the heart,' *Stom'achus, Orific'ium sinis'trum ventric'uli.* The superior or œsophageal orifice of the stomach. Also, the Heart, (q. v.)

CAR'DIAC, *Cardi'acus*, from καρδια, 'the heart;' or the upper orifice of the stomach, (F.) *Cardiaque.* Relating to the heart or to the upper orifice of the stomach.

Cardiac or Cor'onary Ar'teries, (F.) *Artères cardiaques* ou *coronaires*, are two in number. They arise from the aorta, a little above the free edge of the sigmoid valves, and are distributed on both surfaces of the heart.

Cardiac Nerves, (F.) *Nerfs cardiaques.* These are commonly three on each side; a *superior, middle* and *inferior*, which are furnished by corresponding cervical ganglia. Commonly, there are but two on the left side; the upper and middle, which draw their origin from the last two cervical ganglia. Scarpa calls the *superior—C. superficialis;* the *middle—C. profundus* or *C. magnus:* and the *inferior—C. parvus.* There are, besides, *Cardiac filaments*, (F.) *Filets cardiaques*, furnished by the par vagum or pneumo-gastric nerve, which become confounded with the above.

Cardiac Plexus, *Gan'glion cardi'acum.* A nervous network, formed by the different nerves above mentioned. It is situate at the posterior part of the aorta, near its origin. It affords numerous branches, which are distributed to the heart and great vessels. The name *Cardiac* has also been given to the glands, vessels, and nerves, which surround the superior or *cardiac orifice of the stomach.*

Cardiac or Cor'onary Veins, (F.) *Veines Cardiaques*, are commonly four in number; two anterior and two posterior. They open into the right auricle by one orifice, which is furnished with a valve, and is called, by Portal, *Sinus coronaire du Cœur.*

CARDIACA CRISPA, Leonorus cardiaca—c. Passio, Cardialgia.

CARDIACUS, Cordial, Stomachal.

CARDIAGMUS, Cardialgia.

CARDIAG'RAPHY, *Cardiagra'phia*, from καρδια, 'the heart,' and γραφη, 'a description.' An anatomical description of the heart.

CARDIAL'GIA, *Cardi'aca Passio, Col'ica Ventric'uli, Spasmus Ventric'uli, Perodyn'ia, Cordo'lium, Cardilæ'a, Dyspepsodyn'ia, Cardiod'ynē, Gastral'gia, Gastrodyn'ia, Stomacal'gia Cardi'acus Morbus, Cardiog'mus:* from καρδια, 'the cardiac orifice of the stomach,' and αλγος, 'pain:' *Pain of the stomach*, (F.) *Douleur de l'Estomac, D. névralgique de l'Estomac:* also, *Heartburn*, (F.) *Cardialgie, Ardeur d'Estomac, A. du Cœur.* Impaired appetite, with gnawing or burning pain in the stomach or epigastrium,—*Morsus* vel *ardor ventric'uli, Soda, Limo'sis cardial'gia mordens, Rosio Stom'achi:*—a symptom of dyspepsia.

Cardialgia Inflammatoria, Gastritis—c. Sputatoria, Pyrosis.

CARDIALOG''IA, from καρδια, 'the heart,' and λογος, 'a discourse.' A treatise on the heart.

CARDIARCTIE, Heart, concentric hypertrophy of the.

CARDIA'RIUS; same etymology. A name given to a worm, said to have been found in the heart or pericardium.

CARDIATOM'IA, from καρδια, 'the heart,' and τεμνειν, 'to cut.' Dissection of the heart.

CARDIATROPHIA, Heart, atrophy of the.

CARDIECTASIE, see Aneurism of the heart.

CARDIELCOSIS; from καρδια, 'the heart,' and 'ελκος, 'an ulcer.' Ulceration of the heart.

CARDIETHMOLIPOSIS, Steatosis cordis.

CARDIEURYSMA, see Aneurisma.

CARDILÆA, Cardialgia.

CARDIM'ELECH, from καρδια, 'the heart,' and כלך, *Melech*, (Hebr.,) 'a governor.' A supposititious active principle seated in the heart, and governing the vital functions.—Dolæus.

CARDINAL FLOWER, Lobelia cardinalis—c. Blue, Lobelia syphilitica.

CARDINAL PLANT, Lobelia cardinalis.

CARDINAMENTUM, Ginglymus, Gomphosis.

CARDIOBOTANUM, Centaurea benedicta.

CARDIOCE'LE, from καρδια, 'the heart,' and κηλη, 'rupture.' Rupture of the heart, especially into the abdominal cavity.

CARDIOCLASIE, Cardiorrhexis.

CARDIODYNE, Cardialgia.

CARDIOG'MUS. Hippocrates employed this word synonymously with cardialgia. In the time of Galen it was used, by some writers, for certain pulsations of the heart, analogous to palpitations. Sauvages understood by *Cardiogmus* an aneurism of the heart or great vessels, when still obscure.

Cardiogmus Cordis Sinistri, Angina pectoris.

CARDIOMALA'CIA, *Malaco'sis*, *Cordis*, (F.) *Ramollissement du Cœur*, from καρδια, 'the heart,' and μαλαχια, 'softness.' Softening of the heart, caused by inflammation of the organ, or a consequence of some lesion of the function of nutrition.

CARDIOMYOLIPOSIS, Steatosis cordis.

CARDIONEURALGIA, Angina pectoris.

CARDIONCHI, see Aneurism.

CARDIOPALMUS, Cardiotromus.

CARDIORRHEX'IS, *Cardioclasie*, (Piorry,) *Ruptura Cordis*, (F.) *Rupture du Cœur*, from καρδια, 'the heart,' and ρηξις, 'laceration.' Laceration of the heart.

CARDIOSCLÉROSIE, (Piorry:) from καρδια, 'the heart,' and σκληρος, 'hard.' (F.) *Endurcissement du Cœur*. Induration of the heart.

CARDIOT'ROMUS, *Palpita'tio Cordis trepidans*, *Cardiopal'mus*, *Trepida'tio Cordis*, from καρδια, 'the heart,' and τρομος, 'tremor.' Rapid and feeble palpitation, or fluttering of the heart.

CARDIOT'ROTUS, from καρδια, 'the heart,' and τιτρωσκω, 'I wound.' One affected with a wound of the heart—Galen.

CARDIPERICARDITIS, see Pericarditis.

CARDITE, Carditis.

CARDI'TIS, from καρδια, 'the heart,' and the termination *itis*. Inflammation of the fleshy substance of the heart. *Empres'ma Cardi'tis*, *Inflamma'tio Cordis*, *Inflamma'tio Cardi'tis*, *Cauma Carditis*, *Myocardi'tis*, *Inflammation du Cœur*. (F.) *Cardite*. The symptoms of this affection are by no means clear. They are often confounded with those of pericarditis, or inflammation of the membrane investing the heart. Carditis, indeed, with many, includes both the inflammation of the investing membrane and that of the heart itself. See Pericarditis, and Endocarditis.

Carditis Interna, Endocarditis—c. Polyposa, Polypi of the heart.

CARDO, Ginglymus.

CARDOPATIUM, Carlina acaulis.

CARDUUS ALTILIS, Cynara scolymus—c. Benedictus, Centaurea benedicta—c. Brazilianus, Bromelia ananas—c. Domesticus capite majori, Cynara scolymus—c. Hemorrhoidalis, Cirsium arvense.

Car'duus Maria'nus, *Car'duus Ma'riæ*, *Sil'ybum*, *Car'duus lac'teus*, *Spina alba*, *Common Milk Thistle*, or *Ladies' Thistle*, (F.) *Chardon-Marie*. The herb is a bitter tonic. The seeds are oleaginous. It is not used.

Carduus Pineus, Atractylis gummifera—c. Sativus, Carthamus tinctorius—c. Sativus nonspinosus, Cynara scolymus—c. Solstitialis, Centaurea calcitrapa—c. Stellatus, Centaurea calcitrapa—c. Tomentosus, Onopordium acanthium.

CAREBARESIS, Carebaria.

CAREBA'RIA or CAREBARI'A, *Carebare'sis*, from καρη, 'the head,' and βαρος, 'weight.' *Scordine'ma*, *Cardine'ma*. Heaviness of the head—Hippocr., Galen.

CARE'NA, *Kare'na*. The twenty-fourth part of a drop.—Ruland and Johnson.

CAREUM, Carum.

CAREX ARENARIA, Sarsaparilla Germanica.

CARIACOU. A beverage, used in Cayenne, and formed of a mixture of cassava, potato, and sugar fermented.

CARICA, Ficus carica.

Car'ica Papaya. *Papaw tree*, (F.) *Papayer*. *Ord.* Artocarpeæ. A native of America, India, and Africa. The fruit has somewhat of the flavour of the pumpkin, and is eaten like it. The milky juice of the plant, and the seed and root have been regarded as anthelmintic.

CAR'ICUM;—said to have been named after its inventor Caricus. *Car'ycum*. A detergent application to ulcers; composed of black hellebore, sandarach, copper, lead, sulphur, orpiment, cantharides, and oil of cedar.—Hippocrates.

CARIE, Caries—c. *des Dents*, Dental gangrene.

CARIÉ, Carious.

CA'RIES, *Nigri'ties os'sium*. An *ulceration of bone*,—*Necrosis* being the death of the bone. It resembles the gangrene of soft parts. Hence it has been termed *Caries gangreno'sa*, *Gangræna Caries*, *G. Ossium*, *Tere'do*, *Euros*, (F.) *Carie*. It is recognised by the swelling of the bone which precedes and accompanies it; by the abscesses it occasions; the fistulæ which form; by the sanious character, peculiar odour and quantity of the suppuration, and by the evidence afforded by probing. The most common causes of caries are blows;—the action of some virus, and morbid diathesis. When dependent on any virus in the system, *this* must be combated by appropriate remedies. When entirely local, it must be converted, where practicable, into a state of necrosis or death of the affected part. For this end stimulants are applied, the actual cautery, &c.

Caries Dentium, Dental gangrene—c. of the Vertebræ, Vertebral disease—c. Vertebrarum, Vertebral disease.

CARIEUX, Carious.

CARIM CURINI, Justitia ecbolium.

CARINA, Vertebral column.

CA'RIOUS, *Cario'sus*, (F.) *Carié*, *Carieux*. Affected with caries.

CARIUM TERRÆ, Calx.

CARIVE, Myrtus pimenta.

CARIVILLANDI, Smilax sarsaparilla.

CARLI'NA. 'Carline Thistle.'

CARLI'NA ACAULIS, *Chamæ'leon album*, *Cardopa'tium*, (F.) *Carline sans tige*, which grows in the Pyrenees, and on the mountains of Switzerland, Italy, &c. has been recommended as a tonic, emmenagogue, and sudorific.

CARLINE SANS TIGE, Carlina acaulis.

CARLO SANCTO, RADIX. 'St. Charles's Root:' found in Mechoachan, in America. The bark is aromatic, bitter and acrid. It is considered to be sudorific, and to strengthen the gums and stomach.

CARLSBAD, MINERAL WATERS OF. Carlsbad is a town in Bohemia, 24 miles from Egra, celebrated for its hot baths. The water contains about 47 parts in the 100 of purging salts. It is a thermal saline; temperature 121° to 167° Fahrenheit. The constituents are—carbonic acid, sulphate of soda, carbonate of soda, and chloride of sodium.

CARMANTINE, Justitia pectoralis—c. *Pectorale*, Justitia pectoralis.

CARMEN, 'a verse,' because charms usually consisted of a verse. A charm (q. v.) an amulet.

CARMINANTIA, Carminatives.

CARMIN'ATIVES, *Carminan'tia* seu *Carminati'va*, from *carmen*, '*a verse*,' or 'charm,' *Antiphys'ica*, *Xan'tica*, (F.) *Carminatifs*. Remedies which allay pain, and cause the expulsion of flatus from the alimentary canal. They are generally of the class of aromatics.

The FOUR GREATER CARMINATIVE HOT SEEDS, *Qua'tuor sem'ina cal'ida majo'ra carminati'va*, were, of old, anise, carui, cummin, and fennel.

The FOUR LESSER CARMINATIVE HOT SEEDS, *Qua'tuor sem'ina cal'ida mino'ra*, were bishop's weed, stone parsley, smallage, and wild carrot.

CARMOT. A name given, by the alchymists, to the matter which they believed to constitute the Philosopher's stone.

CARNABADIA, Carum, (seed.)

CARNABADIUM, Cuminum cyminum.

CARNATIO, Syssarcosis.

CARNELIAN, Cornelian.

CARNEOLUS, Cornelian.

CARNEOUS, *Car'neus*, *Carno'sus*, *Sarco'des*, from *caro*, 'flesh,' (F.) *Charnu*. Consisting of flesh, or resembling flesh.

CARNEOUS or FLESHY COLUMNS, *Colum'næ Carneæ* of the heart, (F.) *Colonnes charnues*, are muscular projections, situate in the cavities of the heart. They are called, also, *Musculi Papilla'res*.

CARNEOUS, FLESHY or MUSCULAR FIBRES, (F.) *Fibres charnues* ou *musculaires*, are fibres belonging to a muscle.

PANNIC'ULUS CARNOSUS, (F.) *Pannicule charnu;—Carnosa Cutis;* a muscular membrane, adhering to the skin of certain animals, whose use is to move the integuments with the hair, feathers, &c.

CARNEUM MARSUPIUM, Ischio-trochanterianus.

CARNIC'ULA. Diminutive of *Caro*, 'flesh.' The gums. Gingivæ, (q. v.)—Fallopius.

CARNIFICA'TION, *Carnifica'tio*, from *caro*, 'flesh,' and *fieri*, 'to become.' *Transformation into flesh.* A morbid state of certain organs, in which the tissue acquires a consistence like that of fleshy or muscular parts. It is sometimes observed in hard parts, the texture becoming softened, as in *Osteo-sarcoma*. When it occurs in the lungs, they present a texture like that of liver.

CARNIFOR'MIS ABSCES'SUS. An abscess whose orifice is hard, the sides thick and callous: and which ordinarily occurs in the neighbourhood of the articulations.—M. A. Severinus.

CARNIV'OROUS, *Carnivo'rus*, *Sarcoph'agus*, *Creatoph'agus*, *Creoph'agus*, (F.) *Carnivore*, from *caro*, 'flesh,' and *voro*, 'I eat.' That which eats flesh. Any substance which destroys excrescences in wounds, ulcers, &c.

CARNOSITAS. *Carnosities* or *Caruncles in the Ure'thra*, (F.) *Carnosités* ou *Caroncules de l'urètre*, (F.) *Carnosités*, are small fleshy excrescences or fungous growths, which were, at one time, presumed to exist in the male urethra, whenever retention of urine followed gonorrhœa.

M. Cullérier uses the term *Carnosité vénérienne* for a cutaneous, cellular, and membranous tumour, dependent upon the syphilitic virus. See, also, Polysarcia.

CARNOSUS, Carneous.

CARO, Flesh—c. Accessoria, see Flexor longus digitorum pedis profundus perforans, (accessorius)—c. Excrescens, Excrescence—c. Fungosa, Fungosity—c. Glandulosa, Epiglottic gland—c. Luxurians, Fungosity—c. Orbicularis, Placenta—c. Parenchymatica, Parenchyma—c. Quadrata, Palmaris brevis—c. Quadratus Sylvii, see Flexor longus digitorum pedis profundus perforans. (accessorius)—c. Viscerum, Parenchyma.

CAROB TREE, Ceratonia siliqua.

CAROBA ALNABATI, Ceratonium siliqua.

CAROLI'NA, NORTH, MINERAL WATERS OF. In the counties of Warren, Montgomery, Rockingham, Lincoln, Buncomb and Rowan, there are mineral springs. They belong generally to the sulphureous or acidulous saline.

CAROLINA, SOUTH, MINERAL WATERS OF. They are numerous. Pacolet Springs, on the west bank of Pacolet River, contain sulphur and iron. Many, with similar properties, but not held in estimation, are scattered about the state.

CARONCULE, Caruncle—c. *Lachrymale*, Caruncle.

CARONCULES MYRTIFORMES, Caruncul æ myrtiformes—c. *de l'Urètre*, Carnosities of the urethra.

CAROPI, Amomum cardamomum.

CAROSIS, Somnolency.

CAROTA, see Daucus carota.

CAROTIC, (ARTERIES,) Carotids.

CAROTICA, Narcotics.

CAROT'ICUS, comatose, from κάρος, 'stupor,' (F.) *Carotique*. Relating to stupor or *carus*—as a *carotic state*, &c.

CAROT'IDS, *Carot'ides* (*Artériæ*,) *Carot'icæ*, *Carotideæ*, *Capita'les*, *Jugula'res*, *Sopora'les*, *Sopora'riæ*, *Soporif'eræ*, *Somnif'eræ*, *Apoplecticæ*, *Lethar'gicæ*, the *Carot'id Ar'teries*, *Cephal'ic Ar'teries*, (F.) *A. Carotides;* from κάρος, 'stupor.' The great arteries of the neck, which carry blood to the head. They are divided into, 1. *Primitive* or *common;* the left of which arises from the aorta, and the right from a trunk, common to it and the subclavian. 2. *External* or *pericephal'ic*, a branch of the primitive, which extends from the last to the neck

of the condyle of the lower jaw; and, 3. *Internal, Arte'ria cerebra'lis* vel *encephal'ica*, another branch of the primitive, which, arising at the same place as the external, enters the cranium, and terminates on a level with the fissure of Sylvius, dividing into several branches.

Carotid Canal, *Cana'lis Carot'icus, Canal inflexe de l'os temporal*—(Ch.) *Canal carotodien*, is a canal in the temporal bone, through which the carotid artery and several nervous filaments pass.

Carotid Foramina, *Foram'ina Carot'ica*, (F.) *Trous carotidiens*, are distinguished into *internal* and *external*. They are the foramina at each extremity of the *Canalis Caroticus*.

CARÓTTE, Daucus carota.

CAROUA, Carum, (seed.)

CAROUBIER, Ceratonium siliqua.

CAROUGE, see Ceratonium siliqua.

CARPASA, Carbasa.

CARPA'SIUM, CAR'PASUM, CAR'PASUS, and CARPE'SIUM. Dioscorides, Pliny, Galen, &c., have given these names, and that of *Carpasos*, to a plant, which cannot now be determined, and whose juice, called *Opocarpason*, *οποκαρπασον*, passed for a violent, narcotic poison, and was confounded with myrrh.

CARPATHICUM, see Pinus cembra.

CARPE, Carpus.

CARPENTARIA, Achillea millefolium.

CARPESIUM, Carpasium.

CARPHOLOG''IA, *Tilmus, Carpolog''ia, Crocidis'mus, Flocco'rum vena'tio, Tricholog''ia, Crocidiz'is*, from *καρφος*, '*floc'culus*,' and *λεγω*, 'I collect,' or 'pluck,' (F.) *Carphologie*. Action of gathering flocculi. A delirious picking of the bed-clothes, as if to seek some substance, or to pull the flocculi from them. It denotes great cerebral irritability or debility, and is an unfavourable sign in fevers, &c.

CARPHOS, Trigonella fœnum.

CARPIA, Carbasus.

CARPIÆUS, Palmaris brevis.

CAR'PIAL or CAR'PIAN, *Carpia'nus, Carpia'lis*, (F.) *Carpien*. Belonging to the Carpus.

Car'pial Lig'aments, (F.) *Ligaments Carpiens*, are, 1. The fibrous fasciæ, which unite the bones of the carpus: and, 2. The annular ligaments, anterior and posterior, (q. v.)

CARPIAN, Carpial.

CARPIEN, Carpial.

CARPISMUS, Carpus.

CARPOBALSAMUM, see Amyris opobalsamum.

CARPOLOGIA, Carphologia—c. Spasmodica, Subsultus tendinum.

CARPO-METACARPEUS MINIMI DIGITI, Adductor metacarpi minimi digiti—c. *Métacarpien du petit doigt*, Opponens minimi digiti—c. *Métacarpien du pouce*, Opponens pollicis—c. Phalangeus minimi digiti, Abductor minimi digiti—c. *Phalangien du petit doigt*, Abductor minimi digiti—c. *Phalangien du petit doigt*, Flexor parvus minimi digiti—c. *Phalangien du pouce*, Flexor brevis pollicis manus—c. *Sus-phalangien du pouce*, Abductor pollicis brevis.

CARPO-PEDAL, from *carpus*, 'the wrist,' and *pes, pedis*, 'the foot.' Relating to the wrist and foot.

Carpo-pedal Spasm, *Cer'ebral spasmod'ic croup*. A spasmodic affection of the chest and larynx in young children, accompanied by general or partial convulsions. The disease commonly occurs between the third and ninth month, and is characterized by excessive dyspnœa, accompanied by a loud croupy noise on inspiration; the thumbs being locked, and the hands and feet rigidly bent for a longer or shorter period. The seat of the disease is evidently in the cerebro-spinal axis, primarily or secondarily; perhaps it is owing to erethism, seated elsewhere, being communicated to the cerebro-spinal centre and reflected to the respiratory and other muscles concerned. It seems to be connected with dental irritation, and consequently, in the treatment, where such is the case, the gums should be freely divided; after which, cathartics and revulsives, with the use of narcotics and appropriate diet, will generally remove the affection; for although extremely alarming, it is often not attended with great danger.

CARPOS, Fruit.

CARPOT'ICA, from *καρπος*, 'fruit.' Diseases affecting impregnation. Irregularity, difficulty or danger produced by parturition:—the 3d order, class *Genetica*, of Good.

CARPUS, *Carpis'mus, Brachia'lē, Rasceta, Rasteta*, the *wrist*, (F.) *Carpe, Poignet*. The part between the fore-arm and hand. Eight bones compose it, (in two rows.) In the superior row there are, from without to within—the *Scaphoïdes* or *navicula'rē*, *Luna'rē* or *semiluna'rē*, *Cuneifor'mē*, and *Orbicula'rē* or *pisifor'mē*. In the lower row—*Trape'zium, Trapezoïdes, Magnum*, and *Uncifor'mē*.

CARRAGEEN MOSS, Fucus crispus.

CARRÉ DE LA CUISSE, Quadratus femoris—c. *des Lombes*, Quadratus lumborum—c. *du Menton*, Depressor labii inferioris—c. *du Pied*, Extensor brevis digitorum pedis.

CARREAU, Tabes mesenterica.

CARRÉE. See Flexor longus digitorum pedis profundus perforans, (accessorius.)

CARRELET, (F.) *Acus triangula'ris*. A straight needle, two or three inches long, the point of which is triangular; and which the ancients used in different operations. Also, a wooden, triangular frame for fixing a cloth through which different pharmaceutical preparations are passed.

CARROT, CANDY, Athamanta cretensis—c. Deadly, Thapsia—c. Plant, Daucus carota.

CAR'THAMUS TINCTO'RIUS, *Am'yron, Cnicus, Crocus German'icus, Crocus Saracen'icus, Carthamum officina'rum, Car'duus sati'vus, Saffron-flower, Safra'num, Safflower, Bastard Saffron, Dyer's Saffron*, (F.) *Carthame, Safran bâtard, Carthame des Teinturiers*. *Family*, Cynarocephaleæ. *Sex Syst.* Syngenesia Polygamia æqualis. The seeds are aromatic, cathartic, and diuretic; yet to the parroquet they are an article of food, hence their name, *Graines de Perroquet*. The flowers, *Car'thamus*, (Ph. U. S.) are employed as a cosmetic, and are a reputed diaphoretic.[?]

CARTHEGON, see Buxus.

CARTILAGE ANONYMÉ, Cricoid, (cartilage)—c. Epiglottic, Epiglottis—c. *Mucroné*, Xiphoid Cartilage—c. Supra-arytenoid, Corniculum laryngis—c. Tarsal, see Tarsus.

CARTILAGINES GUTTURALES, Arytenoid cartilages—c. Triquetræ, Arytenoid cartilages.

Cartilaginis Arytenoidææ Capitulum, Corniculum laryngis.

CARTILAG"INOUS, *Cartilagin'eus, Cartilagino'sus, Chondro'des, Chondroi'des*, (F.) *Cartilagineux*. Belonging to, or resembling cartilage.

CARTILA'GO, *Chondros, Car'tilage*, (F.) *Cartilage*. A solid part of the animal body, of a medium consistence between bone and ligament, and which in the fœtus is a substitute for bone, but in the adult exists only in the joints, at the extremities of the ribs, &c. Cartilages are of a whitish colour, flexible, compressible, and very elastic, and some of them apparently inorganic. They are composed, according to J. Davy, of .44 albumen, .55 water, and .01 phosphate of lime.

Cartilages, Articular, or *Obdu'cent Car'tilages*, invest bony surfaces, which are in contact; hence they are called *investing* or *incrusting cartilages*, (F.) *Cartilages de revêtement* ou *d'encroutement*.

Cartilages, Interarticular, are such as are situate within the joints, as in the knee joint.

Cartilages of Ossifica'tion are such as, in the progress of ossification, have to form an integrant part of bones; as those of the long bones in the new-born infant. These are termed *temporary*; the others being *permanent*. All the cartilages, with the exception of the articular, are surrounded by a membrane analogous to the periosteum, called *Perichon'drium*.

Cartilages of the Ribs are, in some respects, only prolongations of the ribs. Those of the nose, of the meatus auditorius, and Eustachian tube, present a similar arrangement. Other cartilages resemble a union of fibrous and cartilaginous textures; hence their name, *Fibro-cartilages*.

Cartilago-Clypealis, Thyroid cartilage—c. Ensiformis, Xiphoid cartilage—c. Innominata, Cricoid—c. Mucronata, Xiphoid cartilage—c. Peltalis, Thyroid cartilage—c. Scutiformis, Thyroid cartilage—c. Uvifer, Uvula—c. Xiphoides, Xiphoid cartilage.

CARUM, from Caria, a province of Asia. *Ca'reum, Carum Car'ui, Carvi, Cumi'num praten'sē, Carus, Car'uon*, the *Car'away*, (F.) *Carvi. Cumin des prés. Family*, Umbelliferæ. *Sex. Syst.* Pentandria Digynia. The seeds, *Carnaba'dia, Car'oua*, are carminative. Dose, gr. x to ʒij, swallowed whole or bruised. The oil, *Oleum Car'ui*, (F.) *Huile de Carvi*, has the properties of the seeds. Dose, gtt. ij to vj.

CAR'UNCLE, *Carun'cula*, diminutive of *caro*, 'flesh.' A small portion of flesh, *Sar'cion*. A fleshy excrescence,—*Ecphy'ma carun'cula*, (F.) *Caroncule*.

Caruncle, Carnositas.

Carun'cula Lachryma'lis, (F.) *Caroncule lacrymale*. A small, reddish, follicular body, situate at the inner angle of the eye. It secretes a gummy substance.

CARUNCULÆ CUTICULARES, Nymphæ.

Caruncul Mamilla'res. The extremities of the lactiferous tubes in the nipples. The olfactory nerves (q. v.) have been so called by some.

Caruncul Myrtifor'mes, *C. vagina'les, Glan'dulæ myrtifor'mes*, (F.) *Caroncules myrtiformes*. Small, reddish tubercles, more or less firm, of variable form, and uncertain number, situate near the orifice of the vagina, and formed by the mucous membrane. They are regarded as the remains of the hymen.

Caruncul Papillares, Papillæ of the kidney.

CARUN'CULOUS. Relating to caruncles or carnosities. *Carun'cular*.

CARUON, Carum.

CARUS, κάρος, *Sopor caro'ticus, Profound sleep*. The last degree of coma, with complete insensibility, which no stimulus can remove, even for a few instants. *Sopor, Coma, Lethargia*, and *Carus*, are four degrees of the same condition.

Carus Apoplexia, Apoplexy—c. Asphyxia, Asphyxia—c. Catalepsia, Catalepsy—c. Ecstasis, Ecstasis—c. Hydrocephalus, Hydrocephalus internus—c. ab Insolatione, *Coup de soleil*—c. Lethargus, Lethargy—c. Lethargus cataphora, Somnolency—c. Lethargus vigil, Coma vigil—c. Paralysis, Paralysis—c. Paralysis paraplegia, Paraplegia—c. Veternus, Lethargy.

CARVI, Carum.

CARYA, Juglans regia—c. Basilica, Juglans regia.

CARYEDON CATAGMA, see Fracture.

CARYOCOSTINUM, Confectio scammoniæ.

CARYOCOSTINUS. An electuary prepared of the costus and other aromatic substances, &c. It was cathartic.

CARYON PONTICON, Corylus avellana (nut.)

CARYOPHYLLA, Geum urbanum.

CARYOPHYLLUM RUBRUM, Dianthus caryophyllus.

CARYOPHYLLUS AMERICANUS, see Myrtus pimenta—c. Aromaticus, Eugenia caryophyllata—c. Hortensis, Dianthus caryophyllus—c. Vulgaris, Geum urbanum.

CARYO'TI. The best kind of dates.—Galen.

CAS RARES, (F.) *Rare cases*. This term is used, by the French, for pathological facts, which vary from what is usual. See a celebrated article under this head in the *Dictionnaire des Sciences Médicales*, Vol. iv.

CASAMUM, Cyclamen.

CASAMUNAR, Cassumuniar.

CAS'CARA, CASCARIL'LA, Spanish words which signify *bark* and *little bark*, under which appellations the *bark* (Cinchona) is known in Peru. They are now applied to the bark of the *Croton Cascarilla*.

CASCARILLA, Croton cascarilla.

CASCHEU, Catechu.

CASE, *Capsa, Theca*, (F.) *Caisse*. This name is given to boxes for the preservation of instruments; or for medicines necessary in hospital or other service. We say, e. g.—*A case of amputating*, or *trepanning instruments*.

Case, *Casus*, from *cadere, casum*, 'to fall.' The condition of a patient;—as a *case of fever*, &c. (F.) *Observation*. Also, the history of a disease.

CASEARIUS, Cheesy.

CASEIN, *Caseine, Caseum, Caseous matter*; from *caseus*, 'cheese.' The only nitrogenized constituent of milk. It is identical in composition with the chief constituents of blood—fibrin and albumen, all being compounds of protein. A similar principle exists in the vegetable, *Vegetable Casein* or *Legu'min*. It is chiefly found in leguminous seeds—peas, beans, lentils. Like vegetable albumen, it is soluble in water; and the solution is not coagulable by heat.

Casein, Blood, Globulin.

CASEOSUS, Cheesy.

CASEOUS MATTER, Casein.

CASEUM, Casein.

CASEUS, Cheese—c. Equinus, Hippace.

CASEUX, Cheesy.

CASHEW, Anacardium occidentale.

CASHOO. An aromatic drug of Hindusthan, said to possess pectoral virtues.

CASHOW, Catechu.

CASIA, Laurus cassia.

CASMINA, Cassumuniar.

CASSA, Thorax.

CASSADA ROOT, Jatropha manihot.

CASSAVA ROOT, Jatropha manihot.

CASSE AROMATIQUE, Laurus cassia—c. *en Bâtons*, Cassia fistula—c. *en Bois*, Laurus cassia—c. *des Boutiques*, Cassia fistula—c. *Séné*, Cassia senna.

CASSE-LUNETTES, Cyanus segetum, Euphrasia officinalis.

CASSEENA, Ilex vomitoria.

CASSENOLES, see Quercus infectoria.

CASSIA, Laurus cassia—c. Absus, Absus—c. Cinnamomea, Laurus cassia—c. Caryophyllata, Myrtus caryophyllata—c. Canella, Laurus cassia—c. Egyptian, Cassia senna.

Cas'sia Fis'tula, *Cas'sia nigra*, *Cassia fistula'ris*, *C. Alexandri'na*, *Canna*, *Canna soluti'va*, *Canna fistula*, *Cathartocar'pus*, *Purging Cassia*, (F.) *Casse Canéficier*, *Casse en bâtons*, *Casse des Boutiques*. The pulp of *Cassia Fis'tula* or *Cathartocar'pus Fis'tula*; *Fam.* Leguminosæ; *Sex. Syst.* Decandria Monogynia, *Pulpa Cas'siæ*, *Cassiæ Aramentum*, *Cassiæ Fistulæ Pulpa*, (Ph. U. S.), which is obtained in long pods, is black, bright, and shining; sweet, slightly acid and inodorous. It is laxative in the dose of ʒiv. to ʒj.

Cassia Lignea, Laurus cassia—c. Lignea Malabarica, Laurus cassia.

Cassia Marilan'dica, *Senna America'na*, *American Senna*, *Wild Senna*, *Locust plant*, (F.) *Séné d'Amérique*. The leaves of this plant are similar, in virtue, to the cassia senna. They are, however, much inferior in strength.

Cassia, Purging, Cassia fistula.

Cassia Senna. The name of the plant which affords senna. It is yielded, however, by several species of the genus cassia. The leaves of senna, *Sennæ Folia*, *Senna Alexandri'na*, *Senna Ital'ica*, *Sena*, *Senna* or *Ægyptian Cassia*, (F.) *Séné*, *Casse Séné*, have a faint smell, and bitterish taste. The active part is extracted by alcohol and water. Their activity is injured by boiling water. They are a hydragogue cathartic, and apt to gripe. Dose of the powder, ʒj. to ʒj. Infusion is the best form.

CASSIÆ ARAMENTUM, see Cassia fistula—c. Fistulæ pulpa, see Cassia fistula—c. Flores, see Laurus cinnamomum.

CASSIALA, Hyssopus.

CASSIDE BLEUE, Scutellaria galericulata.

CASSINA, Ilex vomitoria.

CASSINE, EVERGREEN, Ilex vomitoria.

CASSIS, Ribes nigrum.

CASSITEROS, Tin.

CASSUMU'NIAR, *Casamu'nar*, *Zerumbet*, *Casmina*, *Risagon*, *Bengalē Indo'rum*, *Bengal' Root*, (F.) *Racine de Bengale*. A root, obtained from the East Indies, in irregular slices of various forms; some cut transversely, others longitudinally. It is an aromatic bitter, and is consequently tonic and stimulant. It was once considered a panacea, and has been referred to *Zingiber Cassumuniar*, and to *Zingiber Zerumbet*.

CASSUVIUM POMIFERUM, Anacardium occidentale.

CASTANEA, Fagus castanea, see also Fagus castanea pumila—c. Equina, Æsculus Hippocastanum—c. Pumila, Fagus castanea pumila.

CASTELLAMARE DI STABIA, WATERS OF. Castellamare di Stabia is a town in Naples, in the Principato Citra, 15 miles S. S. E. of Naples. There are two springs here, the one sulphureous, the other chalybeate.

CASTELLETTO ADONO, WATERS OF. These waters, situate near Acqui, in Italy, are sulphureous.

CASTERA-VIVENT, WATERS OF. Castera-Vivent is a small village in the department of Gers, near which is a cold acidulous chalybeate, and another which is sulphureous and thermal. Temp. 84° Fahrenheit.

CASTIGANS, Corrigent.

CASTJOE, Catechu.

CASTLE-LEOD, WATERS OF. A sulphureous spring in Ross-shire, Scotland, celebrated for the cure of cutaneous and other diseases.

CASTOR BAY, Magnolia glauca.

Castor Fiber, *Fiber*, *Canis Pon'ticus*. The *Beaver*, (F.) *Castor*. It furnishes the Castor. Rondelet recommends slippers made of its skin in gout. Its blood, urine, bile, and fat, were formerly used in medicine.

Castor Oil Plant, Ricinus communis.

CASTO'REUM, *Castor*, *Castoreum Ros'sicum et Canaden'sē*, from καστωρ, 'the beaver,' quasi γαστωρ, from γαστηρ, 'the belly,' because of the size of its belly; or *à castrando*. A peculiar matter, found in bags, near the rectum of the beaver, *Castor fiber*. Its odour is strong, unpleasant, and peculiar; taste bitter, subacrid; and colour orange-brown. It is antispasmodic, and often employed. Dose, gr. x. to ʒj.

CASTRANGULA, Scrophularia aquatica.

CASTRAT, Castratus.

CASTRA'TION, *Castra'tio*, *Ec'tomē*, *Evira'tio*, *Excastra'tio*, *Etesticula'tio*, *Detesta'tio*, *Exsec'tio viril'ium*, *Eunuchis'mus*, *Celotom'ia*, *Orchotom'ia*, *Orcheot'omy*, *Orchidot'omy*, (F.) *Chatrure*. The operation of removing the testicles. Sometimes, the term is employed for the operation, when performed on one testicle; hence the division into *complete* and *incomplete* castration. Castration renders the individual incapable of reproduction.

CASTRATO, Castratus.

CASTRA'TUS, (1.) *Castra'to*, *Ectom'ius*, *Emascula'tus*, *Evira'tus*, *Exsectus*, *Desec'tus*, *Extesticula'tus*, *Intestab'ilis*, *Intesta'tus*, *Spado*, *Apoc'opus*, *Bago'as*, from *castrare*, 'to castrate.' One deprived of testicles, (F.) *Castrat*, *Châtré*. This privation has a great influence on the development of puberty. It is adopted to procure a clearer and sharper voice; and in the East, the guardians of the Harem, for the sake of security, are converted into *Castra'ti* or *Eu'nuchs*, ευνουχοι. *Eunuchs* have generally both testes and penis removed.

CASUS, Prolapsus—c. Palpebræ superioris, Blepharoptosis.

CATA, Κατα, 'downwards;' 'after,' applied to time: a common prefix, as in—

CATAB'ASIS, from καταβαινω, 'I descend.' An expulsion of humours downwards.

CATABLE'MA, καταβλημα, (κατα and βαλ-

ἐμεν,) 'any thing let fall, as a curtain,' *Epible'ma, Perible'ma.* The outermost bandage which secures the rest.

CATABYTHISMOMA'NIA, from καταβυθισμος, 'submersion,' and μανια, 'mania.' Insanity, with a propensity to suicide by drowning.

CATACAUMA, Burn.

CATACAUSIS, Combustion, human—c. Ebriosa, Combustion, human.

CATACERAS'TICUS, from κατακεραννυμι, 'I temper,' 'I correct.' The same as *Epicerasticus.* A medicine capable of blunting the acrimony of humours.

CATACHASMOS, Scarification.

CATACHRISIS, Inunction.

CATACHRISTON, Liniment.

CATACH'YSIS, *Effu'sio, Perfu'sio,* from καταχεω, 'I pour upon.' Affusion with cold water.—Hippocr. Decantation, (q. v.)

CATAC'LASIS, from κατακλαζω, 'I break to pieces.' *Cam'pylum, Campylo'tis.* Distortion or spasmodic fixation of the eyes; spasmodic occlusion of the eyelids; also, fracture of a bone—Hippocr., Vogel.

CATACLEIS'; from κατα, 'beneath,' and κλεις, 'the clavicle.' This term has been applied to many parts, as to the first rib, the acromion, the joining of the sternum with the ribs, &c.

CATACLYS'MUS, *Cataclys'ma,* from κατακλυζειν, 'to submerge, inundate.' A *Clyster.*—Hippocr. Others mean, by the term, a shower-bath, or copious affusion of water; *Catæone'sis.* Ablution, (q. v.) *Douche,* (q. v.)

CATÆONESIS, Catantlema, Cataclysmus.

CATAGAUNA, Cambogia.

CATAGMA, Fracture—c. Fissura, Fissure, see Contrafissura—c. Fractura, Fracture.

CATAGMAT'ICS, *Catagmat'ica reme'dia,* from καταγμα, 'fracture.' Remedies supposed to be capable of occasioning the formation of callus.

CATALEN'TIA. Epilepsy, (q. v.) or some disease resembling it.—Paracelsus.

CATALEPSIA SPURIA, Ecstasis.

CAT'ALEPSY, *Catalep'sia, Catalep'sis, Cat'ochē, Cat'ochus, Cato'cha Gale'ni, Morbus atton'itus celsi, Hyste'ria catalep'tica, Congela'tio, Deten'tia, Encatalep'sis, Aphonia*—(Hippocr.,) *Anau'dia*—(Antigenes.,) *Apprehen'sio, Contempla'tio, Stupor vig''ilans, Prehen'sio, Carus Catalep'sia, Trance* (?) *Oppres'sio, Comprehen'sio*—(Cæl. Aurelian.), *Apoplex'ia Catalep'sia,* from καταλαμβανω, 'I seize hold of,' (F.) *Catalepsie.* A disease in which there is sudden suspension of the action of the senses and of volition; the limbs and trunk preserving the different positions given to them. It is a rare affection, but is seen, at times, as a form of hysteria. Some of the Greek writers have used the word in its true acceptation of a *seizure, surprise,* &c.

CATAL'PA, *C. Arbo'rea, Bigno'nia Catalpa, Catal'pa Cordifo'lia, C. Arbores'cens.* The decoction of the pods of the Catalpa, an American tree, of the *Nat. Fam.* Bignoniaceæ, Didynamia Angiospermia, has been recommended in chronic nervous asthma.

CATALYSIS, Paralysis, (q. v.) from κατα, and λυω, 'I dissolve or decompose.' The *action of presence* in producing decomposition; as when a body which possesses what has been termed *catalytic force* resolves other bodies into new compounds by mere contact or presence, without itself experiencing any modification.

CATALYTIC FORCE, see Catalysis.

CATAMENIA, Menses—c. Alba, Leucorrhœa.

CATAMENIORUM FLUXUS IMMODICUS, Menorrhagia.

CATANANCE, Cichorium intybus.

CATANGELOS, Ruscus.

CATANTLE'MA and CATANTLE'SIS, from κατα, 'upon,' and αντλαω, 'I pour,' *Catæone'sis* and *Catæone'sis.* Ablution with warm water. A fomentation.—Moschion, Marcellus Empiricus.

CATAPAS'MA, from καταπασσω, 'I sprinkle,' *Catapas'tum, Conspers'io, Epipas'ton, Pasma, Sympas'ma, Empas'ma, Xerion, Asper'sio.* Compound medicines, in the form of powder, employed by the ancients to sprinkle on ulcers, absorb perspiration, &c.—Paulus of Ægina.

CATAPH'ORA, 'a fall,' from καταφερω, 'I throw down.' A state resembling sleep, with privation of feeling and voice. Somnolency, (q. v.) According to others, Cataphora is simply a profound sleep, which it is difficult to rouse from—in this sense being synonymous with Sopor. (q. v.)

CATAPHORA HYDROCEPHALICA, see Apoplexy—c. Cymini, Theriaca Londinensis.

CATAPHRAC'TA, a *Cuirass,* from καταφραττω, 'I fortify.' A name given by Galen to a bandage applied round the thorax and shoulders. It was also called *Quadri'ga.*

CAT'APLASM, *Cataplas'ma, Epiplas'ma, Bæos, Poultice, Pultice,* from καταπλασσειν, (κατα and πλασσειν, 'to form or mould,') 'to besmear,' (F.) *Cataplasme.* A medicine to be applied externally, under the form of a thick pap. Cataplasms are formed of various ingredients, and for different objects. They may be *anodyne, emollient, tonic, antiseptic, irritating,* &c. A simple poultice acts only by virtue of its warmth and moisture. Meal, fatty substances, leaves of plants, certain fruits, crumb of bread, &c., are the most common bases. The chief poultices which have been officinal are the following:—Anodyne,—c. Cicutæ, c. Digitalis. Antiseptic,—c. Carbonis, c. Dauci, c. Fermenti, c. Acetosæ, c. Cumini. Emollient,—c. Lini, c. Panis, c. Mali maturi. Irritating,—c. Sinapis, c. Muriatis Sodæ, c. Quercûs Marini. Tonic and Astringent,—c. Alum, c. Goulard, c. Rosæ.

The Parisian Codex has some other officinal cataplasms. 1. *Cataplas'ma anod'ynum,* made of poppy and hyoscyamus. 2. *Cataplas'ma emol'liens,* made of meal and pulps. 3. *Cataplas'ma ad suppuratio'nem promoven'dam,* of pulps and Basilicon. 4. *Cataplas'ma rubefa'ciens* vel *antipleurit'icum,* formed of pepper and vinegar.

The only cataplasms, the preparation of which it is important to describe, are the following:

CATAPLAS'MA FERMEN'TI, *C. efferves'cens, Yeast Cataplasm* or *Poultice,* (F.) *Cataplasme de Levure.* (Take of *meal* lbj, *yeast* lbss. Expose to a gentle heat.) It is antiseptic, and a good application to bruises.

CATAPLAS'MA SINA'PIS, *C. Sina'peos, Sinapism, Mustard Cataplasm* or *Poultice,* (F.) *Cataplasme de Moutard* ou *Sinapisme.* (*Mustard* and *Linseed meal* or *meal* āā equal parts. *Warm vinegar,* or *water,* q. s.) A rubefacient and stimulant applied to the soles of the feet in coma,

low typhus, &c., as well as to the pained part in rheumatism, &c.

CATAPLEX'IS, *Stupor*, from κατα, and πλησσω, 'I strike.' The act of striking with amazement. Appearance of astonishment as exhibited by the eyes in particular. See Hæmodia.

CATAPOSIS, Deglutition.

CATAPOTION, Pilula.

CATAPSYX'IS, from καταψυχω, 'I refrigerate.' *Peripsyx'is.* Considerable coldness of the body, without *rigor* and *horripilatio.*—Galen. *Perfrictio.* Coldness in the extreme parts of the limbs.—Hippocr.

CATAPTO'SIS, *Decident'ia*, a *fall.* This word expresses, sometimes, the fall of a patient, attacked with epilepsy, (q. v.) or apoplexy; at others, the sudden *resolution* of a paralytic limb.

CATAPULTA VIRILIS, Penis.

CATAPUTIA, MINOR, Euphorbia lathyris, Ricinus communis.

CAT'ARACT, *Catarac'ta*, *Catarrhac'ta*, *Suffu'sio Oculi*, *Ptharma catarac'ta*, *Cali'go lentis*, *Gutta opa'ca*, *Hypoc'hyma*, *Hypoc'hysis*, *Phacoscoto'ma*, *Parop'sis catarac'ta*, *Glauco'ma Woulhou'si*, *from* καταρασσειν (κατα and ραττειν), 'to tumble down.' A deprivation of sight, which comes on, as if a veil fell before the eyes. Cataract consists in opacity of the crystalline lens or its capsule, which prevents the passage of the rays of light, and precludes vision. The causes are obscure. *Diagnosis.*—The patient is blind, the pupil seems closed by an opake body, of variable colour, but commonly whitish:—the pupil contracting and dilating. Cataracts have been divided, by some, into *spurious* and *genuine*. *The former*, where the obstacle to vision is between the capsule of the lens and the uvea: the *latter*, where it is in the lens or capsule. A *lenticular cataract* is where the affection is seated in the lens;—a *capsular* or *membranous*, in the capsule. The *capsular* is divided again, by Beer, into the *anterior*, *posterior*, and *complete capsular* cataract. When the capsule is rendered opake, in consequence of an injury, which cuts or ruptures any part of it, it thickens, becomes leathery, and has been called *Catarac'ta ar'ida siliquo'sa*. *Catarac'ta Morgagnia'na lactea* vel *purifor'mis*, is the *milky* variety, in which the crystalline is transformed into a liquid similar to milk, (F.) *Cataracte laiteuse;* or, as generally defined, in which there is opacity of the fluid situate between the lens and its capsule. The *cap'sulo-lentic'ular* affects both lens and capsule, and Beer conceives the liquor Morgagni, in an altered state, may contribute to it. Cataracts are also called *stony*, (F.) (*pierreuse*,) *milky* or *cheesy*, (*laiteuse* ou *caséuse*,) according to their density:—white, pearly, yellow, brown, gray, green, black, (F.) *blanche*, *perlée*, *jaune*, *brune*, *grise*, *verte*, *noire*, according to their colour:—*fixed* or *vacillating*,—*catarac'ta capsulo-lenticula'ris fixa* vel *trem'ula*, (F.) *fixe* ou *branlante*, according as they are fixed or movable behind the pupil. They are likewise called *Catarac'tæ marmora'ciæ*, *fenestra'tæ*, *stella'tæ*, *puncta'tæ*, *dimidia'tæ*, &c., according to the appearances they present.

They may also be *simple* or *complicated* with adhesion, amaurosis, specks, &c.; and *primary* or *primitive*, when *opake* before the operation;—*secondary*, when the opacity is the result of the operation.

Cataract is commonly a disease of elderly individuals, although, not unfrequently, *congen'ital*. It forms slowly; objects are at first seen as through a mist; light bodies appear to fly before the eyes, and it is not until after months or years that the sight is wholly lost. No means will obviate the evil except an operation, which consists in removing the obstacle to the passage of the light to the retina. Four chief methods are employed for this purpose. 1. *Couching* or *Depression*, (F.) *Abaissement*, *Déplacement de la Cataracte*. This consists in passing a cataract needle through the sclerotica and subjacent membranes, a little above the transverse diameter of the eye; and at about two lines' distance from the circumference of the transparent cornea, until the point arrives in the posterior chamber of the eye. With this the crystalline is depressed to the outer and lower part of the globe of the eye, where it is left. 2. *By absorption*,—by the French termed *broiement*, or *bruising*. This is performed in the same manner as the former; except that, instead of turning the crystalline from the axis of the visual rays, it is divided by the cutting edge of the needle, and its fragments are scattered in the humours of the eye, where they are absorbed. 3. *By extraction*, which consists in opening, with a particular kind of knife, the transparent cornea and the anterior portion of the capsule of the crystalline; and causing the lens to issue through the opening. Each of the processes has its advantages and disadvantages, and all are used by surgeons. 4. Some, again, pass a cataract needle through the transparent cornea and pupil to the crystalline, and depress or cause its absorption. This is called Keratonyxis, which see.

Cataract, Black, Amaurosis.

CATARACTA GLAUCA, Glaucoma—c. Nigra, Amaurosis.

CATARACTE, ABAISSEMENT DE LA, see Cataract—*c. Déplacement de la*, see Cataract—*c. Noire*, Amaurosis.

CATARACTÉ, (F.) *Catarac'tus*, *Catarac'tâ vitia'tus*. One affected with cataract. The French use this term, both for the eye affected with cataract and the patient himself.

CATARIA, see Nepeta.

CATARRH', *Catar'rhus*, *Catar'rhopus*, *Catarrheu'ma*, *Rheuma*, *Defluxio*, from κατα, 'downwards,' and ρεω, 'I flow.' A discharge of fluid from a mucous membrane. The ancients considered the catarrh as a simple flux, and not as an inflammation. Generally it partakes of this character, however. *Catarrh* is, with us, usually restricted to the inflammation of the mucous membrane of the air-passages: the French extend it to that of all mucous membranes. (F.) *Flux muqueux*, *Fluxion catarrhale*.

Catarrh, in the English sense, *Rheuma Pec'toris*, *Destilla'tio Pec'toris*, *Catar'rhus Pec'toris*, *Blennop'tysis*, *Tus'sis catarrha'lis simplex*, *Anacathar'sis catarrha'lis simplex*, *Gravé'do* (of many,) *Febris Catarrha'lis*, *Blennotho'rax*, *Bronchi'tis*, *Catar'rhus à fri'gore*, (F.) *Catarrhe pulmonaire*, *Fièvre Catarrhale*, *Rhume de Poitrine*, a *Cold*, is a superficial inflammation of the mucous follicles of the trachea and bronchi. It is commonly an affection of but little consequence, but apt to relapse and become *chronic*. It is characterized by cough, thirst, lassitude, fever, watery eyes, with increased secretion of mucus from the air-passages. The antiphlogistic regimen and time usually remove it. Sometimes,

the inflammation of the bronchial tubes is so great as to prove fatal.

CATARRH, ACUTE, OF THE UTERUS, see Metritis—c. Chronic, Bronchitis, (chronic)—c. Dry, see Bronchitis—c. Pulmonary, Bronchitis—c. Rose, Fever, hay—c. Suffocating nervous, Asthma Thymicum—c. Summer, Fever, hay.

CATARRH', EPIDEM'IC, *Catar'rhus epidem'icus, C. à conta'gio, Rheuma epidem'icum.* Catarrh prevailing owing to some particular *Constitutio aëris*, and affecting a whole country:—*Influenza*, (q. v.)

CATARRHACTA, Cataract.

CATARRHE AIGUE DE L'UTÉRUS, see Metritis—*c. Buccal*, Aphthæ—*c. Convulsive*, Bronchitis—*c. Gastrique*, Gastritis—*c. Guttural*, Cynanche tonsillaris—*c. Intestinal*, Diarrhœa—*c. Laryngien*, Laryngitis—*c. Nasal*, Coryza—*c. Oculaire*, Ophthalmia—*c. de l'Oreille*, Otirrhœa—*c. Pharyngien*, Cynanche parotidea—*c. Pituiteux*, Bronchorrhœa—*c. Pulmonaire*, Catarrh—*c. Sec*; see Bronchitis—*c. Stomacal*, Gastrorrhœa—*c. Utérin*, Leucorrhœa—*c. Vésical*, Cystirrhœa.

CATARRHEC'TICA, from καταῤῥηγνυμι, 'I break down.' Remedies considered proper for dissolving;—as diuretics, cathartics, &c.—Hippoc.

CATARRHEUMA, Catarrh.

CATARRHEUX, (F.) *Catarrho'sus.* One subject to catarrh, affected with catarrh.

CATARRHEX'IA, *Catarrhexis;* same etymon as *Catarrhectica:* the action of Catarrhectica. Also, effusion; evacuation of the bowels.

CATARRHEXIS, Catarrhexia, Excrement, (q. v.)—c. Vera, Hæmatochezia.

CATARRHŒ'CUS, from καταῤῥεω, 'I flow from.' An epithet for disease, produced by a discharge of phlegm; catarrhal.

CATAR'RHOPA PHY'MATA, from καταῤῥοπος, καταῤῥοπης, 'sloping downwards.' Tubercles tending downwards, or with their apices downwards.

CATARRHOPHE, Absorption.

CATARRHO'PIA, *Catar'rhysis*, from κατα, 'downwards,' and ῥοπη, 'inclination.' An afflux of fluids towards the inferior parts, and especially towards the viscera of the abdomen. The Greek word ἀναῤῥοπια expresses an opposite phenomenon, or a tendency towards the upper parts.

CATARRHOPUS, Catarrh.

CATARRHUS, Defluxion, Tussis—c. Æstivus, Fever, hay—c. Bellinsulanus, Cynanche parotidæa—c. Bronchiorum, Bronchitis—c. à Contagio, Influenza—c. Epidemicus, Influenza, Catarrh, epidemic—c. Gonorrhœa, Gonorrhœa—c. Intestinalis, Diarrhœa—c. ad Nares, Coryza—c. Pulmonum, Bronchitis—c. Senilis, Bronchitis (chronic)—c. Suffocativus Barbadensis, C. trachealis—c. Urethralis, Gonorrhœa—c. Vesicæ, Cystirrhœa.

CATARRHYSIS, Catarrhopia, Defluxion.

CATARTIS'MUS, from καταρτιζειν, 'to repair, replace.' The coaptation of a luxated or fractured bone.

CATASCEUE, Structure.

CATASTAGMOS, Coryza.

CATASTALAGMOS, Coryza, Distillation.

CATAS'TASIS, from καθιστημι, 'I establish.' The constitution, state, condition, &c. of any thing.—Hippoc. Also the reduction of a bone. See Constitution, and Habit of Body.

CATAT'ASIS, from κατατεινω, 'I extend,' extension, (q. v.) The extension and reduction of a fractured limb.—Hippoc.

CATATHLIPSIS, Oppression.

CATAXIS, Fracture.

CATCH FLY, Apocynum androsæmifolium, Silene Virginica.

CATCHUP, Ketchup.

CAT'ECHU. The extract of various parts of the *Acacia Cat'echu, Cæetchu*, an oriental tree. The drug is also called *Terra Japon'ica, Extrac'tum Catechu, Japan Earth, Cascheu, Cadtchu, Cashow, Caitchu, Castjoe, Cacau, Cate, Kaath, Cuti, Cutch, Coïra, Succus Japon'icus.* (F.) *Cachou.* It is a powerful astringent, and is used in diarrhœa, intestinal hemorrhage, &c. Dose, gr. xv. to ʒss in powder.

CATEIAD'ION, from κατα, and εια, 'a blade of grass.' A long instrument, thrust into the nostrils to excite hemorrhage in headache.—Aretæus.

CATENÆ MUSCULUS, Tibialis anticus.

CATEONESIS, Catantlema.

CATGUT, Galega Virginiana.

CATHÆ'RESIS, καθαιρεσις, 'subtraction, diminution.' Extenuation or exhaustion, owing to forced exercise.—Hippoc.

CATHÆRETICUS, Catheretic.

CATHARETICUS, Cathartic.

CATHARISMOS, Depuration.

CATHAR'MA, *Purgament'um.* Matters evacuated by a purgative, or by spontaneous purging, also, a cathartic, (q. v.)

CATHAR'MUS. Same etymon; a purgation.—Hippoc. Also, the cure of a disease by magic, &c.

CATHAR'SIS, from καθαιρειν, (καθ' and αἰρειν, 'to take away,') 'to purge.' *Purga'tio, Apocathar'sis, Copropho'ria.* A natural or artificial purgation by any passage;—mouth, anus, vagina, &c.

CATHAR'TIC, *Cathar'ticus, Catharc'ticus, Cathar'ma, Coprocrit'ica, Dejecto'rium Remedium, Eccathar'ticus, Hypac'ticus, Hypel'atos, Lapac'ticus, Apocathar'ticus.* Same etymon. (F.) *Cathartique.* A medicine, which, when taken internally, increases the number of alvine evacuations. Some substances act upon the upper part of the intestinal canal, as *calomel* and *colocynth;* others, on the lower parts, as *aloes;* and some on the whole extent, as saline purgatives. Hence a choice may be necessary. Cathartics are divided into Purgatives and Laxatives, (q. v.) The following is a list of the chief Cathartics:

Aloe, Cassia Marilandica, Colocynthis, Elaterium, Gambogia, Hydrargyri Chloridum mite, Hydrargyri Oxydum nigrum, Hydrarg. cum Magnesiâ, Jalapa, Juglans, Magnesia, Magnesiæ Carbonas, Magnesiæ Sulphas, Manna, Mannita, Oleum Euphorbiæ Lathyridis, Oleum Ricini, Oleum Tiglii, Podophyllum, Potassæ Acetas, Potassæ Bisulphas, Potassæ Sulphas, Potassæ Supertartras, Potassæ Tartras, Rheum, Scammonium, Senna, Sinapis, Sodæ et Potassæ Tartras, Sodæ Phosphas, Sodæ Sulphas, Sodii Chloridum, Sulphur, Veratria, Aquæ Minerales Sulphureæ et Salinæ, Enemata, Suppositoria.

CATHARTINE, see Convolvulus jalapa.

CATHARTIQUE, Cathartic.

CATHARTOCARPUS, Cassia fistula.

CATHEDRA, Anus.

CATHEMERUS, Quotidian.

CATHERETIC, *Cathæret'icus, Ectylot'icus, Sarcoph'agus*, from καθαιρειν, 'to eat,' 'destroy.' Substances applied to warts, exuberant granulations, &c., to eat them down. They are *mild caustics*.

CATH'ETER, from καθιημι, (καθ', and ιημι, 'to send,') 'I explore.' *Æne'a, Al'galie, Cathete'ris, Demissor, Immis'sor*. A hollow tube, introduced by surgeons into the urinary bladder, for the purpose of drawing off the urine. Catheters are made of silver or elastic gum. See Bougie. The French generally use the word *catheter* for the solid *sound* or *staff;* and *algalie* and *sonde* for the hollow instrument.

CATHETERIS, Catheter.

CATHETERIS'MUS, *Cathete'risis, Catheterisa'tio, Cath'eterism*, same etymon. The introduction of a catheter or sound into the bladder, or Eustachian tube.

CATHID'RYSIS, from καθιδρυω, 'I place together.' Reduction of a part to its natural situation.

CATHMIA, Plumbi oxydum semi-vitreum.

CATHMIR, Calamina.

CATH'OLIC HUMOURS, (F.) *Humeurs Catholiques*, are the fluids spread over the whole body.

CATHOL'ICON or CATHOL'ICUM, from καθ' and ολικος, 'universal.' A remedy, believed to be capable of curing all diseases; a *panacea*.

Catholi'con Duplex. An ancient, purging electuary, chiefly composed of cassia, tamarinds, rhubarb, senna, &c.

CATIL'LIA. A weight of nine ounces.

CATILLUS, Cup.

CATINUS FUSORIUS, Crucible.

CATLING, Knife, double-edged.

CATO, κατω, 'below,' 'beneath.' This word in the writings of Hippocrates, is often used for the abdomen, especially the intestines. When he advises a remedy—κατω, he means a purgative; when ανω, above or upwards, an emetic. As a prefix, *Cato* means 'beneath,' as in

CATOCATHAR'TIC, *Catocathar'ticus*, from κατω, 'downwards,' and καθαιρω, 'I purge.' A medicine, which purges downwards. One that produces alvine evacuations. The antithesis to *Anacathartic*.

CATOCHA GALENI, Catalepsy.

CAT'OCHE or CAT'OCHEIS, from κατεχω, 'I retain,' 'I hold fast.' This word has, by some, been used synonymously with Catalepsy, (q. v.); by others, with Coma vigil; by others, with Tetanus.

CATOCHUS, Ecstasis—c. Cervinus, Tetanus—c. Holotonicus, Tetanus—c. Infantum, Induration of the cellular tissue.

CATOMIS'MOS, from κατω, 'beneath,' and ωμος, 'shoulder.' *Subhumera'tio*. A mode with the ancients of reducing luxation of the humerus by raising the body by the arm.—Paulus of Ægina.

CATOPTRIC EXAMINATION OF THE EYE. When a lighted candle is held before the eye, three images of it are seen—two erect, and one inverted:—the former owing to reflection from the cornea and anterior surface of the crystalline; the latter owing to reflection from the posterior layer of the crystalline. This mode of examining the eye has been proposed as a means of diagnosis between cataract and amaurosis. In the latter, all the images are seen.

CATOPTROMANCY, from κατοπτρον, (κατα, and οπτομαι,) 'a mirror,' and μαντεια, 'divination.' A kind of divination by means of a mirror.

CATOPTER, Speculum.

CATOPTRON, Speculum.

CATORCHI'TES. A kind of sour wine, prepared with the orchis and black grape, or dried figs. It was formerly employed as a diuretic and emmenagogue.—Dioscorid. Called, also, *Sycites*.—Galen.

CATORETICUS, Purgative.

CATOTERICUS, Purgative.

CATOT'ICA, from κατω, 'beneath.' Diseases infecting internal surfaces. Pravity of the fluids or emunctories, that open on the internal surfaces of organs. The second order in the class *Ecritica* of Good.

CAT'S EYE, AMAUROTIC, see Amaurotic.

CATSFOOT, Antennaria Dioica.

CATTAGAUMA, Cambogia.

CATTITEROS, Tin.

CATULOT'ICUS, from κατουλοειν, (κατα and ουλοειν,) 'to cicatrize.' A remedy for removing cicatrices.—Galen. A medicine, proper for producing cicatrization.

CATU-TRIPALI, Piper longum.

CAUCALOIDES, Patella.

CAUCHEMAR, Incubus.

CAUCHEVIEILLE, Incubus.

CAUCHUC, Caoutchouc.

CAUDA, Coccyx, Penis.

Cauda Equi'na. The spinal marrow, at its termination, about the 2d lumbar vertebra, gives off a considerable number of nerves, which, when unravelled, resemble a horse's tail,—hence the name. (F.) *Queue de Cheval, Q. de la Moëlle Épinière*. See Medulla spinalis.

Cauda Salax, Penis.

CAUDA'TIO. An extraordinary elongation of the clitoris.—Blasius.

CAUDATUS, Bicaudatus.

CAUDIEZ, MINERAL WATERS OF. Caudiez is a small town, nine leagues from Perpignan, where there is a thermal spring, containing a little sulphate of soda and iron.

CAUL. The English name for the omentum. Also, when a child is born, with the membranes over the face, it is said to have been "*born with a caul*." In the catalogue of superstitions, this is one of the favourable omens. The caul itself is supposed to confer privileges upon the possessor; hence the membranes are dried, and sometimes sold for a high price. (L.) *Pilus, Pileolus, Galea, Vitta*. (F.) *Coeffe, Coiffe*—(*Etre né coëffé*—"to be born with a caul.") See Epiploon.

CAULE'DON, *Sicye'don*, from καυλος, 'a stalk.' A transverse fracture.

CAU'LIFLOWER, Germ. Kohl, cabbage, and *flower* [?] Brassica Florida.

Cauliflower Excres'cence, *Excrescen'tia Syphilit'ica*, (F.) *Choufleur*. A syphilitic excrescence, which appears about the origin of the mucous membranes, chiefly about the anus and vulva, and which resembles, in appearance, the head of the cauliflower.

CAULIS, Penis—c. Florida, Brassica Florida.

CAULOPHYL'LUM THALICTROI'DES, *Leon'ticē thalictroï'des, Blue'berry Cohosh, Co-*

hosh, Colush, Blueberry, Papoose Root, Squaw Root, Blue Ginseng, Yellow Ginseng, a plant of the *Family* Berberideæ; *Sex. Syst.* Hexandria Monogynia, which grows all over the United States, flowering in May and June. The infusion of the root is much used by the Indians in various diseases. To it are ascribed emmenagogue and diaphoretic virtues.

CAULOPLE'GIA, from καυλος, 'the male organ,' and πληγη, 'a wound,' or 'stroke.' An injury or paralysis of the male organ.

CAUMA, καυμα, 'a burnt part,' from καιω, 'I burn.' Great heat of the body or atmosphere. Synocha (q. v.) Empresma (q. v.)

Cauma Bronchitis, Cynanche trachealis—c. Carditis, Carditis—c. Enteritis, Enteritis—c. Gastritis, Gastritis—c. Hæmorrhagicum, Hæmorrhagia activa—c. Ophthalmitis, Ophthalmia—c. Peritonitis, Peritonitis—c. Phrenitis, Phrenitis—c. Pleuritis, Pleuritis—c. Rheumatismus, Rheumatism, acute.

CAUNGA, Areca.

CAUSA CONJUNCTA, Cause, proximate—c. Continens, Cause, proximate.

CAUSÆ ADDITÆ, Causes, predisponent or remote—c. Actuales, Causes, occasional—c. Præincipientes, Causes, procatarctic—c. Proëgumenæ, Causes, predisponent.

CAUSE, *Cau'sa, Ai'tia, Ai''tion.* An act which precedes another, and seems to be a necessary condition for the occurrence of the latter, The causes of disease are generally extremely obscure; although they, sometimes, are evident enough. The *predisponent* and *occasional* causes are the only two, on which any stress can be laid; but as authors have divided them differently, a short explanation is necessary.

Cause, Accessory, (F.) *Cause Accessoire*, which has only a secondary influence in the production of disease.

Causes, Accidental, *Common Causes*, (F.) *Causes Accidentelles*, are those which act only in certain given conditions; and which do not always produce the same disease. Cold, e. g., may be the accidental cause of pneumonia, rheumatism, &c.

CAUSES CACHÉES, C. occult—c. Common, C. accidental—c. Exciting, C. Occasional,—c. Essential, C. Specific—*c. Determinantes*, C. Specific—*c. Éloignées*, C. predisponent.

Causes, External, (F.) *Causes externes*, are such as act externally to the individual; as air, cold, &c.

CAUSES FORMELLES, (F.) are such as determine the form or kind of the disease. They differ from the *Causes matérielles*, which are common to a set of diseases; as, to the neuroses, phlegmasiæ, &c.

Causes, Hidden, C. occult.

Causes, Internal, (F.) *Causes internes*, are those which arise within the body;—as mental emotions, &c.

Causes, Mechanical, (F.) *Causes mécaniques*, are those which act mechanically, as pressure upon the windpipe in inducing suffocation.

Causes, Negative, (F.) *Causes négatives*, comprise all those things, the privation of which may derange the functions;—as abstinence too long continued. They are opposed to *positive causes*, which, of themselves, directly induce disease;—as the use of indigestible food, spirituous drinks, &c.

Causes, Obscure, C. occult.

Causes, Occasional or Exciting, *Causæ actua'les*, (F.) *Causes occasionelles*, are those which immediately produce disease.

Causes, Occult, *Hidden causes, Obscure causes*, (F.) *Causes occultes* ou *cachées* ou *obscures*. Any causes with which we are unacquainted;—also, certain inappreciable characters of the atmosphere, which give rise to epidemics.

Causes, Physical, (F.) *Causes Physiques*,—those which act by virtue of their physical properties; as form, hardness, &c. All vulnerating bodies belong to this class.

Causes, Physiological, (F.) *Causes Physiologiques*, those which act only on living matter;—narcotics, e. g.

Causes, Predisponent, *Remote causes, Causæ proëgu'menæ, Causæ al'ditæ, Causæ remo'tæ;* (F.) *Causes prédisponantes, Causes éloignées*,—those which render the body liable to disease. They may be *general*, affecting a number of people, or *particular*, affecting only one person.

Causes, Principal, (F.) *Causes principales*—those which exert the chief influence on the production of disease, as distinguished from the *accessory causes.*

Causes, Procatarc'tic, *Causæ procatarc'ticæ, Causæ præincipien'tes*, from προκαταρχτικος;—the origin or beginning of a thing, (καταρχω, 'I begin,' and προ, 'before.') These words have been used, in different significations. Some have employed them synonymously with *predisponent* or *remote causes*, others, with *occasional* or *exciting causes.*

CAUSE PROCHAINE, C. proximate.

Cause, Proximate, *Causa prox'ima* vel *con'tinens* vel *conjunc'ta* (F.) *Cause continente* ou *prochaine*, is the disease itself. Superabundance of blood, e. g., is the proximate cause of plethora.

Causes, Remote, C. predisponent.

Causes, Specific, *Essential causes, &c.* (F.) *Causes spécifiques, C. essentielles, Causes déterminantes;* those, which always produce a determinate disease; contagion, for example.

CAUSIS, Burn, Ebullition, Fermentation, Incendium, Ustion.

CAUSOMA, Inflammation.

CAUS'TIC, *Caus'ticus, Cauteret'icus, Diæret'icus, Ero'dens, Pyrot'icus* from καιω, 'I burn,' (F.) *Caustique.* Bodies, which have the property of causticity; and which, consequently, burn or disorganize animal substances. The word is also used substantively. The most active are called *Escharotics.* Caustics are also called 'corrosives.'

Caustic Bearer, *Porte-caustique.*

CAUSTICA ADUSTIO. Cauterization.

CAUSTIC''ITY, *Caustic''itas*, from καυστικος, 'that which burns,' (καιω, 'I burn.') The impression, which caustic bodies make on the organ of taste; or, more commonly, the property which distinguishes those bodies.

CAUSTICOPHORUM, *Porte-pierre.*

CAUSTICUM ALKALINUM, Potassa fusa—c. Americanum, Veratrum sabadilla—c. Antimoniale, Antimonium muriatum—c. Commune, Potassa fusa—c. Commune acerrimum, Potassa fusa—c. Commune fortius, Potassa cum calce—c. Lunare, Argenti nitras—c. Potentiale, Potassa fusa—c. Salinum, Potassa fusa.

Causticum Commu'nē, *Poten'tial Cau'tery, Common Caustic, Caute'rium potentia'lē, Lapis sep'ticus, Caus'ticum commu'nē mit'ius.* This

consists of *quicklime* and *black soap*, āā equal parts.

CAUSTIQUE, Caustic.

CAUSUS, from καιω, 'I burn.' A highly ardent fever; *Deü'rens*. Pinel regards it as a complication of bilious and inflammatory fever; Broussais, as an intense gastritis, accompanied with bilious symptoms. See Synocha.

CAUSUS, ENDEMIAL, OF THE WEST INDIES, Fever, yellow—c. Tropicus endemicus, Fever, yellow.

CAUTER, Cauterium.

CAUTÈRE, Cauterium, Fonticulus—c. *Inhérent*, Inherent cautery.

CAUTERETICUS, Caustic.

CAUTERETS, MINERAL WATERS OF. C. is a *bourg* seven leagues from Barèges (*Hautes-Pyrénees*,) France. The waters are hydrosulphurous and thermal—temperature 123° F. They are used in the same cases as the Barèges water.

CAUTE'RIUM, *Cauter*, *Cau'tery*, *Inusto'rium*, *Rupto'rium*, from καιω, 'I burn,' (F.) *Cautère*. *Feu actuel*. A substance, used for burning or disorganizing the parts to which it is applied. Cauteries were divided by the ancients into *actual* and *potential*. The word is now restricted to the red-hot iron; or to positive burning. It was, formerly, much used for preventing hemorrhage from divided arteries; and also with the same views as a blister. The term *Potential Cautery*, *Caute'rium potentia'lē*, (F.) *Feu potentiel*, was generally applied to the *causticum commune*, (q. v.) but it is now used synonymously with caustic in general.

Cautère also means an issue.

CAU'TERIZATION, *Cauterisa'tio*, *Exus'tio*, *Inus'tio*, *Caus'tica Adus'tio*. The effect of a cautery. The French, amongst whom cauterization is much used, distinguish five kinds: 1. *Cautérisation inhérente*, which consists in applying the actual cautery freely, and with a certain degree of force, so as to disorganize deeply. 2. *Cautérisation transcurrente*, which consists in passing the edge of the *Cautère cultellaire*, or the point of the *Cautère conique* lightly, so as not to disorganize deeply. 3. *Cautérisation par pointes*, which consists in applying on the skin, here and there, the hot point of the conical cautery with sufficient force to cauterize the whole thickness of the skin. 4. *Cautérisation lente, slow cauterization*, by means of the moxa. 5. *Cautérisation objective*, which consists in holding the cautery at some distance from the part to be acted upon by it.

To CAU'TERIZE; *Caus'tico adu'rerē*; (F.) *Cautériser*. To apply the cautery. To burn with a cautery.

CAUTERY, Cauterium—c. Potential, Causticum commune.

CAVA, Vulva.

CAVA, VENA. The hollow or deep-seated vein, (F.) *Veine cave*. A name given to the two great veins of the body, which meet at the right auricle of the heart. The *vena cava supe'rior*, *thorac''ica* vel *descen'dens*, is formed by the union of the subclavians; and receives successively, before its termination at the upper part of the right auricle, the *inferior thyroid*, *right internal mammary*, *superior diaphragmatic*, *azygos*, &c. The *vena cava infe'rior*, *abdomina'lis* vel *ascen'dens*, arises from the union of the two *primary iliacs*, opposite the fourth or fifth lumbar vertebra, receives the *middle sacral*, the *lumbar*, *right spermatic*, *hepatic*, and *inferior diaphragmatics*, and opens at the posterior and inferior part of the right auricle.

CAVATIO, Cavity.

CAVEA, Cavity—c. Narium, Nares.

CAVER'NA, *Antrum*. 'A cavern.' This term has been used for the female organs of generation. See Cavity, and Vulva.

CAVERNA NARIUM, Nares.

CAVERNÆ FRONTIS, Frontal sinuses.

CAVERNEUX, Cavernous.

CAV'ERNOUS, *Caverno'sus*, (F.) *Caverneux*. Filled with small cavities or caverns,—as a sponge.

CAVERNOUS BODIES, COR'PORA CAVERNOS'A, OF THE PENIS, *Cor'pora nervo'sa*, *C. Ner'veo-spongio'sa Penis*, (F.) *Corps caverneux*. The corpus cavernosum is a kind of cylindrical sac, separated, through its whole extent, by a vertical, incomplete septum; and forming nearly two-thirds of the penis. The *corpus cavernosum*, on each side, arises from the ascending portion of the ischium, and terminates obtusely behind the glans. The arteries of the corpora cavernosa come from the internal pudic. See Helicine Arteries. Nerves are found on the surface of the outer membrane, but they do not appear to penetrate the substance.

Müller's researches have led him to infer, that both in man and the horse, the nerves of the corpora cavernosa are made up of branches proceeding from the organic as well as the animal system, whilst the nerves of animal life alone provide the nerves of sensation of the penis.

CAVERNOUS BODIES, CORPORA CAVERNOSA, OF THE CLITORIS, are two hollow crura, forming the clitoris.

CAVERNOUS BODY OF THE VAGINA, *Corpus Caverno'sum Vagi'næ*, *Plexus retiformis*, is a substance, composed of blood-vessels and cells, similar to those of the penis and clitoris, which covers the outer extremity of the vagina, on each side. It serves to contract the entrance to the vagina during coition.

CAVERNOUS RESPIRATION, (F.) When a cavity exists in the lungs, and one or more ramifications of the bronchia terminate in it, a loud tubal noise is emitted, provided the cavity be not filled with fluid, which is called *cavernous respiration*. In this condition the cough is *cavernous* likewise, (F.) *Toux Caverneuse*. When the capacity of the cavern is very great, the sound of respiration is like that produced by blowing into a decanter, with the mouth at a little distance from the neck. This kind of cavernous respiration has been called *amphoric*, from *amphora*, 'a flask;' (F.) *Respiration amphorique*, *Souffle amphorique*, *S. métallique*.

The *Veiled Puff*, (F.) *Souffle voilé*, is a modification of the cavernous respiration, in which, according to Laënnec, "a sort of movable veil interposed between the excavation and the ear" seems to be agitated to and fro. It is a sign which is not attended to.

CAVERNOUS SINUS, *Sinus Caverno'sus*, *Sinus polymor'phus* seu *Receptac'ulum*, *S. sphenoidalis*, (F.) *Sinus caverneux*. The *Cav'ernous Si'nuses* are venous cavities of the dura mater, filled with a multitude of reddish, soft filaments, intersecting each other; and, as it were, reticulated. They commence behind the inner part of the sphenoidal fissure, pass backwards on

the sides of the fossa pituitaria, and terminate by opening into a cavity, common to the superior and inferior petrosal sinuses. They receive some meningeal veins, the ophthalmic veins, &c.

CAV'ERNOUS TEXTURE or TISSUE, (F.) *Tissu caverneux*. The spongy substance which forms the greater part of the penis and clitoris. It seems to consist of a very complicated lace-work of arteries and veins; and, probably, of nervous filaments, with small fibrous plates, which form by their decussation numerous cells communicating with each other. This spongy texture produces erection, by dilating and swelling on the influx of blood; and probably, also, by virtue of some property inherent in it.

CAVIARE, *Kaviac*. A culinary preparation, much used by certain people, and made on the shores of the Black and Caspian Sea, from the roe of the sturgeon, mixed with salt and other condiments.

CAVIC'ULA or CAVIL'LA, from *cavus*, 'hollow.' The *Ankle*, or space between the malleoli. Some have given this name to the os cuneiforme. See Astragalus.

CAVICULÆ PEDIS NODUS, Tarsus.

CAVILLA, Astragalus, Cavicula.

CAVITAS ANTROSA AURIS, Tympanum—c. Buccinata, Cochlea—c. Cochleata, Cochlea.

CAV'ITAS ELLIP'TICA, *Ampul'la*. A dilatation at one end of the semicircular canals of the ear.

CAVITAS NARIUM, Nares—c. Pulpæ, see Tooth.

CAVITATES CEREBRI, Ventricles of the brain—c. Duræ matris, Sinuses of the dura mater—c. Innominatæ, Auricles of the heart.

CAVITÉ, Cavity—*c. Dentaire*, Dental cavity—*c. des Epiploons*, see Peritonæum—*c. du Tympan*, Tympanum.

CAVITY, *Cav'itas, Cavum, Cælotes, Cælon, Ca'vea, Caver'na, Cava'tio*, (F.) *Cavité*. Every thing hollow, as the cranium, mouth, nasal fossæ, &c.

CAV'ITIES, SPLANCHNIC, (F.) *Cavités splanchniques*, are those which contain the viscera. They are three in number;—the cranium, chest, and abdomen. The cavities of bones, connected with joints or otherwise, are described under their particular denominations.

CAVUM, Cavity.

CAVUM CRA'NII, *Venter Supre'mus*. The cavity formed by the proper bones of the cranium.

CAVUM DENTIS, see Tooth—c. Narium, Nares—c. Oris, Mouth—c. Tympani, Tympanum.

CAYAN, Phaseolus creticus.

CAZABI, Jatropha manihot.

CEANOTHOS, Cirsium arvense.

CEANOTHUS AMERICANUS, Celastrus.

CEAR, Heart.

CEASMA, Fissure.

CEBI GALLI'NÆ. The liver of the fowl, bruised.—Castelli.

CEBIP'ARA. A large Brazilian tree, whose bitter and astringent bark is used in making anti-rheumatic baths and fomentations.

CECES, see Quercus alba.

CÉCITÉ, Cæcitas.

CEDAR, RED, Juniperus Virginiana.

CEDEIA, Embalming.

CED'MATA, *κεδματα*. Rheumatic pains of the joints, especially of the hips. A form of gout or rheumatism.

CEDRELE'UM, from *κεδρος*, 'the cedar,' and *ελαιον*, 'oil.' The oil of cedar.—Pliny.

CE'DRIA, *Ce'drium, Ce'drinum, Cedri lacry'ma, Alkitran*. The oil or resin which flows from the cedar of Lebanon. It was supposed to possess great virtues.—Hippocr., Foësius, Scribonius Largus, Dioscorides. It has been supposed to be the same as the pyroligneous acid. See Pinus Sylvestris.

CE'DRINUM VINUM, *Cedar Wine*. A wine, prepared by steeping half a pound of bruised cedar berries in six French pints of sweet wine. It is diuretic and subastringent.

CEDRI'TES, from *κεδρος*, 'the cedar.' A wine prepared from the resin of cedar and sweet wine. It was formerly employed as a vermifuge, &c.

CEDRIUM, Cedria.

CEDROMELA, see Citrus medica.

CEDRONELLA, Melissa.

CEDROS, Juniperus lycia.

CEDROSTIS, Bryonia alba.

CEDRUS BACCIFERA, Juniperus sabina.

CEINTURE, Cingulum. Herpes zoster.

CEINTURE BLANCHE DE LA CHOROÏDE, Ciliary ligament.

CEINTURE DARTREUSE, Herpes zoster—*c. de Hildane*, Cingulum Hildani—*c. de Vif Argent*, Cingulum mercuriale.

CELANDINE, Impatiens—c. Common, Chelidonum majus—c. lesser, Ranunculus ficaria.

CÉLIAQUE, Cœliac.

CELAS'TRUS, *Celas'tus, Ceano'thus America'nus, New Jersey Tea, Red root*. Used by the American Indians, in the same manner as lobelia, for the cure of syphilis. It is slightly bitter and somewhat astringent. A strong infusion of the dried leaves and seeds has been recommended in aphthæ, and as a gargle in scarlatina.

CELATION, (F.) *Concealment*, from *celare*, 'to conceal.' A word used by French medico-legal writers for cases where there has been concealment of pregnancy or delivery.

CELE, *κηλη*, 'a tumour, protrusion, or rupture;' a very common suffix, as in hydrocele, bubonocele, &c. See Hernia.

CEL'ERY, (F.) *Celeri*. The English name for a variety of *Apium graveolens*, (q. v.)

CE'LIS, *κηλις*, 'a spot, a stain.' A *macula* (q. v.) or spot on the skin.

CELL, APOPLECTIC, see Apoplectic cell—c. Calcigerous, see Tooth—c. germ, Cytoblast—c. germinal, see Cytoblast.

CELL LIFE. The life which is possessed by the separate cells that form the tissues, and by which the nutrition of the tissues is presumed to be effected.

CELL, NUCLEATED, see Cytoblast.

CELLA TURCICA, Sella Turcica.

CELLULÆ BRONCHICÆ, see Cellule.

CEL'LULAR, *Cellula'ris*, (F.) *Cellulaire*. Composed of cells or cellules, from *cella* or *cellula*, 'a cell.'

CEL'LULAR MEM'BRANE, *Membra'na cellulo'sa, M. Cellula'ris*,—*M. adipo'sa, pinguedino'sa*, of some,—*Pannic'ulus adipo'sus*,—Membrane formed of cellular tissue, (F.) *Membrane cellulaire*. Generally, it is used for the tissue itself.

CEL'LULAR SYSTEM. The whole of the cellular tissue of the human body.

CELLULAR TISSUE, *Tela cellula'ris, T. cellulo'sa: reticula'ted, filamentous, laminated, crib'riform, porous, are'olar*, and *mucous Tissue, Retic'ular*

or *cellular substance*, *Contex'tus cellulo'sus*, (F.) *Tissu cellulaire, réticulé, lamineux, cribleux, poreux, aréolaire, muqueux*, &c., is the most common of all the organic tissues. Anatomists do not agree regarding its intimate structure. It seems to contain cellules or irregular areolæ between the fibres and plates; as well as serum, fat, and the adipous tissue. The cellular tissue or texture unites every part of the body; determines its shape, and by its elasticity and contractility, and by the fluid, which it contains in its cells, facilitates the motion of parts on each other.

Cellular tissue has been divided by anatomists into the external, general or common cellular tissue—*textus cellularis intermedius* seu *laxus*, which does not penetrate the organs,—the cellular texture which forms the envelopes of organs—*textus cellularis strictus;* and that which penetrates into the organs, accompanying and enveloping all their parts,—the *textus cellularis stipatus*, constituting the basis of all the organs. It has likewise been termed *Textus organicus* seu *parenchymalis*.

Cellular Tissue of Bones, see Cancelli.

CEL'LULE, *Cel'lula*, diminutive of *cella*, 'a cavity.' A small cavity, (F.) *Cellule*. *Cellules* are the small cavities between the laminæ of the cellular tissue, corpora cavernosa, &c.

Cellules, or Cells, Bronchic, *Cel'lulæ Bron'chicæ*, *Vesic'ulæ pulmonales*. The air-cells of the lungs.

CELLULES BRONCHIQUES, Bronchial cells.

CELLULITIS VENENATA, see Wound.

CELOSO'MUS, from κηλη, 'a rupture,' and σωμα, 'body.' A monster in which the trunk is malformed, and eventration or displacement of the viscera exists.

CELOTOM'IA, *Kelotom'ia*, from κηλη, 'a rupture,' and τεμνειν, 'to cut.' An operation, formerly employed for the radical cure of inguinal hernia; which consisted, principally, in passing a ligature round the hernial sac and spermatic vessels. It necessarily occasioned atrophy and loss of the testicle; and did not secure the patient against the return of the disease. The intestines were of course not included in the ligature. See Castration.

CELOT'OMUS, same etymon. A knife used in the operation for hernia.

CELSA. A term, used by Paracelsus for a cutaneous disease, dependent, according to him, on a false or heterogeneous spirit or vapour, concealed under the integuments, and endeavouring to escape. Perhaps the disease was *Urticaria*. (?)

CELSUS, METHOD OF, see Lithotomy.

CEMBRO NUTS, see Pinus cembra.

CEMENTERIUM, Crucible.

CEMENTUM, see Tooth.

CENCHRON, Panicum miliaceum.

CENDRE DU LEVANT, Soda.

CENDRES GRAVELÉES, see Potash—*c. de Sarment*, see Potash.

CENDRÉ, Cineritious.

CENEANGI'A, from κενος, 'empty,' and αγγειον, 'a vessel.' Inanition. Empty state of vessels.—Galen.

CENEMBATE'SIS, from κενος, 'empty,' and εμβαινω, 'I enter.' Paracentesis, (q. v.) Also, the act of probing a wound or cavity; *Melo'sis*.

CENEONES, Flanks.

CENIGDAM, Ceniplam.

CENIGOTAM, Ceniplam.

CENIPLAM, *Cenigdam*, *Cenigotam*, *Cenipolam*. The name of an instrument anciently used for opening the head in epilepsy.—Paracelsus.

CENIPOTAM, Ceniplam.

CENO'SIS, from κενος, 'empty.' *Ine'sis*, *Inethmos*. Evacuation. It is sometimes employed synonymously with inanition, (q. v.) and opposed to repletion;—*Exinani''tio*.

CENOT'ICA, from κενωσις, 'evacuation.' Diseases affecting the fluids. Morbid discharges or excess, deficiency or irregularity of such as are natural. The first order, class *Genetica*, of Good; also, Drastics, (q. v.)

CENTAU'REA BEHEN, *Behen abiad*, *Behen album* or White Behen. *Ord.* Gentianeæ. Astringent.

Centau'rea Benedic'ta, *Car'duus benedic'tus*, *Cnicus sylves'tris*, *Cnicus benedic'tus*, *Cardiobot'anum*, *Blessed* or *Holy Thistle*, (F.) *Chardon bénit*. *Fam.* Cynarocephaleæ. *Sex. Syst.* Syngenesia Polygamia frustranea. A strong decoction of the herb is emetic:—a strong infusion, diaphoretic (?); a light infusion, tonic and stomachic. Dose, gr. xv. to ʒj of powder.

Centau'rea Calcitra'pa, *Calcitra'pa*, *Calcatrep'pola*, *Car'duus solstitia'lis*, *Carduus stellatus*, *Jacea ramosis'sima*, *Cacotrib'ulus*, *Calcitrap'pa stella'ta*, *Stella'ta rupi'na*, *Centau'rea stella'ta*, *Common Star-Thistle*, *Star-Knapweed*, (F.) *Centaurée étoilée*, *Chardon étoilé*, *Chausse-trappe*, *Pignerole*. It is possessed of tonic properties, and has been given in intermittents, dyspepsia, &c. It is not much used.

Centaurea Centau'rium, *Rhapon'ticum vulga're*, *Centaurium magnum*, *Centaurium majus*, *Greater Cen'taury*, *Centaurium officina'le*, (F.) *Centaurée grande*. It is a bitter; and was formerly used as a tonic, especially the root.

Centau'rea Cy'anus, *Cy'anus*, *Blue bottle*, *Corn-flower*, (F.) *Bluet'le*, *Bluéole*, *Blavcrolle*. The flowers were once much used as cordial, tonic, &c. They are now forgotten.

Centaurea Stellata, Centaurea calcitrapa.

CENTAURÉE ÉTOILÉE, Centaurea calcitrapa—*c. Grande*, Centaurea centaurium—*c. Petite*, Chironia centaurium.

CENTAURIUM MAGNUM, Centaurea centaurium—c. Minus vulgare, Chironia centaurium—c. Officinale, Centaurea centaurium—c. Parvum, Chironia centaurium.

CENTAURY, AMERICAN, Chironia angularis—c. Greater, Centaurea centaurium—c. Lesser, Chironia centaurium.

CENTESIS, Paracentesis.

CENTIGRAMME, (F.) from *centum*, 'a hundred,' and γραμμα, 'gramme.' *Centigram'ma*. The hundredth part of a gramme. A centigramme is equal to about the fifth part of a French grain, gr. .1544. Troy.

CENTILITRE, *Centili'tra*, from *centum*, 'a hundred,' and λιτρα, 'litre.' an ancient Greek measure for liquids:—the hundredth part of a litre—equal to nearly ten grammes or a spoonful. 2.7053 fluidrachms.

CENTIMETRE, *Centim'eter:* the hundredth part of a metre—equal to about four lines. .3937 English inch.

CENTIMORBIA, Lysimachia nummularia.

CENTINERVIA, Plantago.

CENTINODE, Polygonum aviculare.

CENTINODIA, Polygonum aviculare.

CENTO VIRGINALIS, Hymen.

CENTRAL ARTERY OF THE RETINA, *Arte'ria Centra'lis Ret'inæ, Central Artery of Zinn.* This artery is given off from the arteria ophthalmica, and penetrates the optic nerve a little behind the ball of the eye; running in the axis of the nerve, and spreading out into many small branches upon the inside of the retina. When the nerve is cut across near the eye, the orifice of the divided artery is observable. This was formerly called *Porus Op'ticus.*

CENTRE OF ACTION. The viscus in which the whole or a great part of any function is executed, and to which several other organs contribute. Thus, the vital activity seems to be wholly centred in the stomach, during chymification; in the duodenum, during chylification. In like manner, the uterus becomes a centre of action during gestation.

Centre, Epigas'tric. The ganglions and nervous plexuses, formed by the great sympathetic and pneumogastric nerves, in the epigastrium, around the cœliac artery; where the impressions received from various parts of the body seem to be centred.

Centre of Fluxion. The part towards which fluids are particularly attracted. An irritated organ is said to be a centre of fluxion.

Centres, Nervous, or Nervous Centres, (F.) *Centres nerveux.* The organs, whence the nerves originate; as the brain and spinal marrow.

Centre, Oval, *Centrum ova'lē, C. O. Vieussé'nii, Tegumen'tum ventriculo'rum cer'ebri.*—When the two hemispheres of the brain are sliced away, till on a level with the corpus callosum, the medullary part is of an oval shape: hence called *centrum ova'lē.* Vieussens supposed all the medullary fibres to issue from that point, and that it was the *great dispensatory of the animal spirits.*

Centre, Phrenic, or *Ten'dinous Centre of the Di'aphragm, Centrum Phren'icum, C. Nerveum* or *C. Tendino'sum,* (F.) *Centre phrénique* ou *C. tendineux du Diaphragme.* The central aponeurosis of the diaphragm.

Centre of Sympathet'ic Irradia'tions, (F.) *Centre d'irradiations sympathetiques.* Any organ, which excites, sympathetically, the action of other organs, more or less distant from it; and with which it seems to have no immediate communication.—Marjolin.

Centre, Tendinous of the Diaphragm, Centre phrenic.

CENTROMYRINE, Ruscus.

CENTRUM COMMUNE, Solar plexus—c. Nerveum, Centre, phrenic—c. Tendinosum, Centre, phrenic.

CENTRY, Chironia angularis.

CENTUM CAPITA, Eryngium campestre.

CENTUMNODIA, Polygonum aviculare.

CEPA ASCALONICA, Bulbus esculentus, Echalotte.

CEPÆA, Veronica beccabunga.

CEPHÆLIS IPECACUANHA, Ipecacuanha.

CEPHALÆ'A, *Headache,* (F.) *Céphalée,* from κεφαλη, 'head.' Some use the term synonymously with cephalalgia. Others, for a periodical headache:—others, again, for a more violent headache than cephalalgia implies; and others for a chronic headache. The last was its ancient signification.

Cephalæ'a spasmod'ica, Cephalal'gia spasmod'ica, C. Nauseo'sa or *Sick-headache,* is characterized by partial, spasmodic pain; often shifting from one part of the head to another: chiefly commencing in the morning, with sickness and faintness. It is extremely apt to recur, notwithstanding every care.

Cephalæa Hemicrania, Hemicrania—c. Nauseosa, c. Spasmodica—c. Pulsatilis, Crotaphe.

CEPHALÆMATO'MA, from κεφαλη, 'head,' and αἱμα, 'blood;' *Absces'sus Cap'itis sanguin'eus neonato'rum, Cephalophy'ma.* A sanguineous tumour, sometimes developed between the pericranium and the bones of the head of newborn children. Similar tumours are met with occasionally above other bones, and at all periods of existence.

CEPH'ALAGRA, from κεφαλη, 'the head,' and αγρα, 'seizure.' Gout in the head.

CEPHALAGRA'PHIA, from κεφαλη, 'the head,' and γραφη, 'a description.' An anatomical description of the head.

CEPHALAL'GIA, *Cephalopa'nia, Homonopa'gia,* from κεφαλη, 'the head,' and αλγος, 'pain,' *Encephalal'gia, Dolor Cap'itis, Pain in the head; Headache,* (F.) *Cephalalgie, Mal à tête.* Every kind of headache, whether symptomatic or idiopathic, is a cephalalgia. It is ordinarily symptomatic, and has to be treated accordingly.

Cephalalgia Contagiosa, Influenza—c. Inflammatoria, Phrenitis—c Pulsatilis, Crotaphe—c. Spasmodica, see Cephalæa.

CEPHALALOG'IA, from κεφαλη, 'the head,' and λογος, 'a discourse.' An anatomical dissertation on the head.

CÉPHALANTHE D'AMÉRIQUE, Cephalanthus occidentalis.

CEPHALAN'THUS OCCIDENTA'LIS, *Buttonwood shrub, Buttonbush, White Ball, Little Snowball, Swampwood, Pond Dogwood, Globeflower,* (F.) *Cephalanthe d'Amérique, Bois de Marais.* An ornamental shrub, *Nat. Ord.* Rubiaceæ; *Sex. Syst.* Tetrandria Monogynia, which grows all over the United States, near streams and ponds, and flowers in July and August. The bark of the root has been used as an antiperiodic tonic.

CEPHALARTICA, Cephalic remedies.

CEPHALATOM'IA, *Cephalotom'ia,* from κεφαλη, 'the head,' and τεμνειν, 'to cut.' Anatomy or dissection or opening of the head.

CEPHALE, Head.

CEPHAL'IC, *Cephal'icus, Capita'lis,* from κεφαλη, 'the head.' (F.) *Céphalique.* Relating to the head.

Cephal'ic Vein, *Vena Cephal'ica, Vena Cap'itis,* (F.) *Veine céphalique, Veine radiale cutanée* of Chaussier. The great superficial vein at the outer part of the arm and fore-arm. It begins on the back of the hand, by a number of radicles, which unite into a single trunk, called the *Cephalic of the Thumb, Cephal'ica Pol'licis,* (F.) *Veine céphalique du pouce.* It ascends along the anterior and outer part of the fore-arm, where it forms the *superficial radial.* At the fold of the elbow it receives the *median cephalic,* ascends along the outer edge of the biceps, and opens into the axillary vein.

The name *Cephalic* was given to it by the ancients, because they thought it had some con-

nexion with the head, and that blood-letting must be performed on it, in head affections.

Chaussier calls the internal jugular, *Veine céphalique*, and the primary or common carotid, *Artère céphalique*.

CEPHAL'IC REM'EDIES, *Cephal'ica* vel *Capita'lia reme'dia*, are remedies capable of relieving affections of the head, especially headache: —*Cephalar'tica*.

CEPHALIDIUM, see Caput.

CEPHALI'NÉ. The base or root of the tongue.—Gorræus.

CEPHALITIS, Phrenitis.

CEPHALIUM, see Caput.

CEPHALO-MENINGITIS, Meningo-cephalitis.

CEPHALOM'ETER, from κεφαλη, 'the head,' and μετρον, 'measure.' An instrument for measuring the different dimensions of the fœtal head, during the process of accouchement. A kind of forceps.

CEPHALON'OSUS, from κεφαλη, 'the head,' and νοσος, 'disease.' This term has been applied to the *Febris Hungar'ica*, in which the head was much affected. See Fever, Hungaric. Others have so called any cerebral disease or fever.

CEPH'ALO-PHARYNGÆ'US, from κεφαλη, 'the head,' and φαρυγξ, 'the pharynx:' belonging to the head and pharynx. Winslow has given this name to the portion of the *constrictor pharyngis superior*, (q. v.) which is attached, above, to the inferior surface of the basilary process of the os occipitis. The *Ceph'alo-pharyngé'al Aponeuro'sis* is a thin, fibrous membrane, which is attached to the basilary process, and gives insertion to fibres of the *constrictor superior pharyngis*.

CEPHALOPAGES, Symphyocephalus.

CEPHALOPHYMA, Cephalæmatoma.

CEPHALOPONIA, Cephalalgia.

CEPHALO-RACHIDIAN, Cephalo-spinal.

CEPH'ALO-SPINAL, *Cephalo-spina'lis*, *Ceph'alo-rachid'ian*. Belonging to the head and spine.

CEPH'ALO-SPINAL, or CEPHALO-RACHIDIAN FLUID, *Cerebro-spinal fluid*, *Flu'idum cer'ebro-spina'lĕ*, is an exhaled fluid, which is found between the encephalon and pia matter; and which seems to have a protecting office, and to keep up a certain degree of pressure on the organ,—at least in the spinal canal.

CÉPHALOTRIBE, (F.) An instrument invented by Baudelocque, the nephew, for crushing the head of the fœtus in utero; from κεφαλη, 'the head,' and τριβω, 'I bruise.' It consists of a strong forceps, the blades of which are solid: 16 lines broad, and 3 thick. The handles are perforated at their extremity to receive a screw with three threads, the direction of which is very oblique, so as to allow great rapidity of rotation, and the screw is moved by a winch 6 inches long, to increase the force of the pressure. The bones of the head are easily crushed by it.

CEPHALOTRYPESIS, Trepanning.

CEPHALOXIA, Torticollis.

CEPULLA, Allium cepa.

CER, Heart.

CERA FLAVA et CERA ALBA, *Ceros*, *Yellow and White Wax*, (F.) *Cire Jaune* et *Blanche*. An animal substance, prepared by the bee, and by some plants, as the *Cerox'ylon* and *Myri'ca cerif'era*. Its colour is yellow, and smell like that of honey, but both are lost by bleaching. It is demulcent and emollient: is sometimes given in the form of emulsion, in diarrhœa and dysentery, but is chiefly used in cerates and ointments.

CERÆ'Æ, from κηρας, 'a horn,' κηραιαι. The Cornua of the uterus. (q. v.)—Rufus of Ephesus.

CERAMICÉ, *Cerami'tis*, from κεραμος, 'potter's earth.' A sort of earth, used as a cataplasm in peripneumony.—Hippocr.

CERAMIUM, Amphora.

CERAMNIUM, Amphora.

CERAMURIA, see Urine.

CERANTHEMUS, Propolis.

CERAS, κηρας, 'genitive,' κηρατος, 'horn,' *Cornu*, (q. v.) also, the Cornea (q. v.) Hence *Ceratectomia*, *Ceratocele*, &c.

CERASION, see Prunus cerasus.

CERAS'MA, from κηραννυμι, 'to mix:' something mixed. A mixture of hot and cold water *Metacerasma*.—Gorræus.

CERASUM, see Prunus cerasus.

CERASUS AVIUM, Prunus avium—c. Laurocerasus, Prunus laurocerasus—c. Padus, Prunus Padus—c. Racemosus sylvestris, Prunus padus—c. Serotina, Prunus Virginiana—c. Virginiana. Prunus Virginiana.

CÉRAT BLANC ou *DE GALIEN*, Ceratum Galeni—*c. de Blanc de Baleine*, Ceratum cetacei—*c. de Goulard*, Ceratum plumbi—*c. pour les Lèvres*, Cerate for the lips—*c. de Plomb composé*, Ceratum plumbi compositum—*c. de Savon*, Ceratum Saponis—*c. de Suracétate de plomb*, Ceratum plumbi superacetatis.

CE'RATE, *Cera'tum*, from κηρος. Lat. *cera*, 'wax,' *Cerelæ'um*, *Cero'ma*, *Cero'nium*, *Cero'tum*, *Ceratomalag'ma*, (F.) *Cérat*. A composition of wax, oil, or lard, without other ingredients.

CERATE, *Simple Cerate*, *Cera'tum*, *Cera'tum simplex*, P. L. (F.) *Cérat Simple*. (*Yellow wax* ℥iv, *olive oil* ℥iv.) It is applied as an emollient to excoriations, &c.

CERATE OF CAL'AMINE, *Cera'tum Calami'næ*, *C. Carbona'tis zinci impu'ri*, *C. Zinci Carbona'tis*, (Ph. U. S.) *Cera'tum lap'idis Calamina'ris*, *Cera'tum epulot'icum*, *Cerate of Carbonate of Zinc*, *Turner's Cerate*, *Healing Salve*, (F.) *Cérat de Pierre Calaminaire*, *C. de Calamine*. *C. (Zinci Carbon. præpar. Ceræ flavæ*, ää ℔ss. *adipis*, ℔ij. Melt the wax and lard together, and, on cooling, add the carbonate of zinc and stir till cool.—Ph. U. S.)

CERATE OF CANTHAR'IDES, *Cera'tum Canthar'idis*. *Blister Ointment*, *Ointment of Spanish Flies*, *Unguen'tum ad vesicato'ria*, *Unguen'tum Pul'veris Mel'oes vesicato'rii*, *Ung. epispas'ticum fortius*, *Cera'tum Lyttæ*, (F.) *Cérat de Cantharides*. (*Spermaceti cerate* ℥vj, *Cantharides in powder*, ℥j. The cerate being softened by heat, stir in the flies.) This cerate of the European Pharmacopœias is used to keep open blisters, issues, &c. See Unguentum Lyttæ. For the cerate of Spanish flies of the U. S. Pharmacopœia, (see Emplastrum Lyttæ.)

CERATE, GOULARD'S, Ceratum Plumbi compositum.

CERATE, KIRKLAND'S NEUTRAL. (*Diachyl.* ℥viij, *olive oil* ℥iv, *prepared chalk* ℥iv: when nearly cool, add *Acet. dest.* ℥iv, *plumb. superacet.* ℥ij.) A cooling emollient.

Cerate or Pomma'tum for the Lips, *Cera'tum labia'lĕ rubrum, Pomma'tum ad labia demulcen'da.* Ph. P. (F.) *Cérat ou pommade pour les lèvres,* (*Wax* 9 parts; *oil* 16 parts;—*coloured with alkanet.*)

Cerate, Lead, Compound, Ceratum plumbi compositum.

Cerate, Marshall's. (*Palm oil* ℥vi, *calomel* ℥j, *sugar of lead* ℥ss, *ointment of nitrate of mercury,* ℥ij.)

Cerate, Resin, Compound, Ceratum Resinæ compositum.

Cerate, Savine, Ceratum sabinæ—c. Soap, Ceratum saponis—c. Spermaceti, Ceratum cetacei—c. of Superacetate or sugar of lead, Ceratum plumbi superacetatis—c. Turner's, Cerate of calamine—c. of Carbonate of zinc, Cerate of calamine.

CERATECTOM'IA, from κερας, 'the cornea,' and εκτομος, 'cut out.' An incision through the cornea. See Ceratotomia.

CERATIA, Ceratonium siliqua.

CERATION, Siliqua.

CERATI'TIS, from κερας, 'the cornea,' and *itis,* 'inflammation.' Inflammation of the cornea, *Kerati'tis, Ceratodei'tis, Ceratomeningi'tis, Cornei'tis, Inflamma'tio cor'neæ.*

CERATIUM, Ceratonium siliqua.

CER'ATO, in composition, in the names of muscles, is used for the cornua of the os hyoides;—as Cerato-glossus.

CERATOCE'LĒ, *Aquula, Uva'tio, Hernia Cor'neæ, Ceratodevce'lē,* from κερας, 'horn,' and κηλη, 'tumour.' A protrusion of the transparent cornea, or rather of the membrane of the aqueous humour through an opening in the cornea.

CERATODEITIS, Ceratitis.

CERATODEOCELE, Ceratocele.

CERATOGLOS'SUS or KERATOGLOS'SUS, from κερας, 'horn,' and γλωσσα, 'the tongue.' A muscle, extending from the great cornu of the os hyoides to the base of the tongue. It is a part of the hyoglossus. (q. v.)

CERATOIDES, Cornea.

CERATO-MALAGMA, Cerate.

CERATO-MENINGITIS, Ceratitis.

CERATO-MENINX, Cornea.

CER'ATO-PHARYNGE'US or KER'ATO-PHARYNGE'US, from κερας, 'horn,' and φαρυγξ, 'the pharynx.' The *great and small Cer'ato-pharyngei* are small fleshy bundles, forming part of the *Hyopharyngeus* of Winslow.

CER'ATO-STAPHYLI'NUS or KER'ATO-STAPHYLI'NUS, from κερας, 'horn,' and σταφυλη, 'the uvula.' Some fleshy fibres of the *Thyro-Staphylinus* of Winslow.

CERATO'NIA-SIL'IQUA. The *Carob Tree, Cera'tium, Cera'tia, Sil'iqua dulcis, Caro'ba Alnabati,* the *Sweetpod,* (F.) *Caroubier (Fruit. Carouge.)* This—the fruit of the *Ceratonia siliqua*—is mucilaginous, and employed in decoction, where mucilages are indicated.

CERATONYX'IS or KERATONYX'IS, from κερας, 'the cornea,' and νυσσω, 'I puncture.' An operation by which the crystalline is depressed by means of a needle introduced into the eye through the cornea. Some divide the crystalline into fragments with the needle, and leave them to the action of the absorbents. The operation is as old as the 17th century.

CERATOPLAS'TICĒ, from κερας, 'the cornea,' and πλαστικος, 'forming, formative.' The operation for the formation of an artificial cornea. It has not been practised on man.

CERATOTOM'IA, *Ceratectom'ia,* from κερας, 'horn,' 'cornea,' and τεμνειν, 'to cut.' *Section of the transparent cornea.* This incision is used in the operation for cataract: to give exit to pus effused in the eye, in case of hypopyon, &c.

CERATOT'OMUS, *Keratot'omus, Kerat'omus,* from κερας, 'cornea,' and τεμνειν, 'to cut.' A name given by Wenzel to his knife for dividing the transparent cornea, in the operation for cataract. Many modifications of the instrument have been made since Wenzel's time. See Knife, cataract.

CERATUM, Cerate—c. Album, Ceratum cetacei, Ceratum Galeni—c. de Althæâ, Unguentum de Althæâ—c. Calaminæ, Cerate of Calamine—c. Cantharidis, Cerate of Cantharides, Emplastrum Lyttæ—c. de Cerussâ, Unguentum plumbi subcarbonatis.

Cera'tum Ceta'ci, *Cera'tum spermaceti, Cera'tum album, Cera'tum simplex, C. Ceti, Unguen'tum adipoce'ræ ceta'rum, Linimen'tum album, Emplas'trum Sperm'atis Ceti, Spermaceti Cerate,* (F.) *Cérat de blanc de baleine.* (*Spermaceti* ℥j, *white wax* ℥ij; *olive oil* ℥vi. Ph. U. S.) A good emollient to ulcers, &c.

Ceratum Ceti, Ceratum cetacei—c. Cicutæ, Ceratum conii—c. Citrinum, Ceratum resinæ.

Cera'tum Coni'i, *Cera'tum Cicu'tæ.* (*Ung. conii* ℔j, *cetacei* ℥ij, *ceræ albæ* ℥iij) A formula in Bartholomew's Hospital: occasionally applied to cancerous, scrofulous sores, &c.

Ceratum Epuloticum, Cerate of calamine.

Cera'tum Gale'ni, *Cera'tum album, C. refrig''erans* Galeni, *Unguen'tum cera'tum, U. amygdali'num, U. simplex, Emplas'trum ad fonticu'los, Oleo-ceratum aquâ subactum, Cold Cream,* (F.) *Cérat blanc* ou *de* Galien. (*White wax* 4 parts; *oil of sweet almonds* 16 parts; add, when melted, *water* or *rose water* 12 parts. Ph. P.) A mild application to chaps, &c.

Ceratum Labiale Rubrum, Cerate for the lips—c. Lapidis calaminaris, Cerate of calamine—c. Lithargyri acetati compositum, Ceratum plumbi compositum—c. Lyttæ, Cerate of cantharides—c. Mercuriale, Unguentum hydrargyri—c. Picatum, Pisselæum.

Ceratum Plumbi Compos'itum, *Cera'tum Lithar'gyri Aceta'ti Compos'itum, Goulard's Ointment, Cera'tum subaceta'ti plumbi medica'tum, C. Plumbi Subaceta'tis* (Ph. U. S.), *Cero'tum Saturni, Compound Lead Cerate, Goulard's Cerate.* (F.) *Cérat de Goulard, C. de Plomb composé.* (*Liq. plumb. subacet.* ℥iiss, *ceræ flavæ,* ℥iv, *ol. olivæ* ℥ix, *camphoræ* ℥ss. Ph. U. S.) Its virtues are the same as the next.

Ceratum Plumbi Superaceta'tis, *Unguen'tum Cerus'sæ Aceta'tæ, Cerate of Superacetate* or *Sugar of Lead, Cera'tum Plumbi Aceta'tis, Unguentum Acetatis Plumbi.* (F.) *Cérat de suracétate de Plomb.* (*Acetate of lead* ℥ij, *white wax* ℥ij, *olive oil* ℔ss.) Cooling and astringent.

Ceratum Refrigerans Galeni, Ceratum Galeni.

Cera'tum Resi'næ, *C. Resi'næ flavæ, C. citrinum, Unguen'tum basil'icon flavum, Ung. Resi'næ flavæ, Ung. Resino'sum, Resin Cerate* or *Ointment, Yellow Basil'icon, Basil'icon Ointment.* (*Resin. flav.,* ℥v. *Ceræ flav.,* ℥ij; *Adipis* ℥viij, Ph. U. S.) A stimulating application to old ulcers, &c. Digestive.

Dr. Smellome's *Ointment for the Eyes* consists of finely powdered *verdigris* ℥ss, rubbed with oil, and then mixed with an ounce of *ceratum resinæ*.

Ceratum Resi'næ Compos'itum, *Compound Resin Cerate*, (*Resin., Sevi, Ceræ flavæ, āā* ℔j; *Terebinth.* ℔ss. *Ol. Lini*, Oss. Melt together, strain through linen, and stir till cool. Ph. U. S.)

Ceratum Sabi'næ, *Unguent. Sabinæ, Savine Cerate* (F.) *Cérat de Sabine*. (*Savine* in powder, ℥ij. *Resin Cerate* ℔j. Ph. U. S.) Irritative, 'drawing.' Used in the same cases as the cerate of cantharides.

Ceratum Sapo'nis, *Soap Cerate*, (F.) *Cérat de Savon* (*Liq. Plumb. subacetat*, Oij, *Sapon*, ℥vj; *Ceræ albæ*, ℥x; *Ol. oliv.*, Oj. Boil the solution of subacetate of lead with the soap over a slow fire to the consistence of honey, then transfer to a water bath, and evaporate until all the moisture is dissipated; lastly, add the wax, previously melted with the oil, and mix.—Ph. U. S.) It is applied in cases of sprains or fractures.

Ceratum Saturni, Ceratum plumbi compositum—c. Simplex, Ceratum cetacei, Cerate simple—c. Spermaceti, Ceratum cetacei—c. Subacetati plumbi medicatum, Ceratum plumbi compositum—c. Tetrapharmacum, Pisselæum—c. Carbonatis zinci impuri, Cerate of calamine.

CERAU'NION, from κεραυνος, 'thunder,' 'a thunderbolt.' *Lapis fulmineus*. A kind of stone, which was believed to be formed during thunder; and to be possessed of the power of inducing sleep, and numerous other prophylactic virtues. It was rubbed on the knee, breast, &c. in swellings of those parts.

CERBERUS TRICEPS, Pulvis cornachini.

CERCA'RIA. A genus of agastric, infusory animalcules, one of the most curious of which inhabits the tartar of the teeth. The spermatozoa are presumed by some to belong to this genus.

CERCHNOS, *Cerchnus*, from κερχνεω, 'I render hoarse.' A rough voice produced by hoarseness. See Rattle.

CER'CIS, κερκις. A sort of pestle for reducing substances to powder. Also, the radius or small bone of the arm. See Pilum and Radius.

CERCLE, Circulus—*c. de la Choroïde*, Ciliary ligament—*c. Ciliaire*, Ciliary ligament.

CERCO'SIS, from κερκος, 'a tail.' *Men'tula mulie'bris*, the *Clit'oris*. Some authors have employed the word synonymously with nymphomania and elongation of the clitoris; and with *Polypus Uteri*, the *Sarco'ma Cerco'sis* of Sauvages.

Cercosis Externa, Clitorism.

CEREA, Cerumen.

CEREA'LIA, from Ceres, 'goddess of corn,' (F.) *Céréales* (*Plantes.*) The cerealia are gramineous plants, the seed of which serve for the nourishment of man:—as wheat, barley, rye, &c. At times, the same term is applied to some of the leguminous plants.

CEREBEL'LA URI'NA. Urine of a whitish appearance of the colour of the brain, from which Paracelsus thought he could distinguish diseases of that organ.

CEREBELLI'TIS, from *cerebellum*, and *itis*, denoting inflammation. Inflammation of the cerebellum: a variety of Phrenitis or Encephalitis.

CEREBEL'LOUS, *Cerebello'sus*, from *cerebellum*, 'the little brain.' (F.) *Cérébelleux*. Chaussier has given this epithet to the vessels of the cerebellum. These are three in number; two of which are *inferior*: the larger, *inferior cerebelli*, which arises from the posterior cerebral or vertebral; and the smaller, whose existence is not constant, from the meso-cephalic or basilary:—the third, called, *A. cérébelleuse supérieure* (*superior cerebelli*,) is also a branch of the basilary.

Cerebel'lous Ap'oplexy, *Apoplex'ia cerebello'sa*: apoplexy of the cerebellum.

CEREBEL'LUM; diminutive of *Cer'ebrum*; *C. parvum, Appen'dix ad cer'ebrum, Cer'ebrum poste'rius, Encra'nion, Encra'nis, Epencra'nis, Parenceph'alis, Micrencepha'lium, Micrenceph'alum, Little brain*, (F.) *Cervelet*. A portion of the medullary mass, contained in the cavity of the cranium. It fills the lower occipital fossæ below the tentorium, and embraces the tuber annulare and medulla. It is composed, like the brain, of cortical and medullary substance, arranged in laminæ, as it were; so that, when a section is made of it, it has an arborescent appearance, called *Arbor vitæ*. The cerebellum is divided into two *lobes* or *hemispheres* or *lateral masses*, and each lobe is again subdivided into *Monticuli* or *Lobules*. In the cerebellum are to be observed the *Crura cerebelli*, the *fourth ventricle*, the *valvula magna cerebri*, the *processus vermiculares*, superior and inferior, &c.

CER'EBRAL, *Cerebra'lis*, from *cerebrum*, 'the brain.' Belonging to the brain, and similar to brain. (F.) *Cérébral*.

Cerebral Apophysis, Pineal gland.

Cerebral Ar'teries are three on each side:—the *anterior* or *artery of the corpus callosum*, and the *middle*, *arte'ria Sylvia'na*, are furnished by the internal carotid: the *posterior* or *posterior and inferior artery of the brain*, *A. profunda cerebri*, arises from the vertebral. Chaussier calls these arteries *lobaires*, because they correspond with the anterior, middle, and posterior lobes, whilst he calls the trunks, whence they originate, *cerebral*.

Cerebral Nerves are those which arise within the cranium, all of which, perhaps, with the exception of the olfactory, arise from the medulla oblongata. See Nerves.

In *Pathology*, an affection is called *cerebral*, which specially occupies the brain. *Fièvre cérébrale, Cerebral fever*, is a variety in which the head is much affected.

CEREBRIFORM, Encephaloid.

CEREBROMALACIA, Mollities cerebri.

CEREBRO-SPINAL, Cephalo-spinal.

CEREBRO-SPINANTS, Narcotics.

CER'EBRUM. The brain. (F.) *Cerveau, Cervelle*. This term is sometimes applied to the whole of the contents of the cranium: at others to the upper portion;—the posterior and inferior being called cerebellum. The *brain*, properly so called, extends from the os frontis to the superior occipital fossæ. Anteriorly, it rests on the orbitar vaults: behind this on the middle fossæ of the base of the cranium; and, posteriorly, on the *tentorium cerebello super-extensum*. The *upper surface* is divided by a deep median cleft (*Scissure interlobaire*,—Ch.) into

two halves, called *hemispheres*, which are united at the base by the *corpus callosum*. At its surface are numerous *convolutions*. The *inferior surface* exhibits, from before to behind, three *lobes*, distinguished into *anterior*, *middle* and *posterior*. The middle is separated from the anterior by the *fissure of* Sylvius; and from the posterior, by a shallow furrow which corresponds to the upper portion of the *pars petrosa*. *Internally*, the brain has, on the median line, the *corpus callosum*, *septum lucidum*, *fornix*, *pineal gland*, and *third ventricle*:—and laterally, the *lateral ventricles*, in which are the *corpora striata*, *optic thalami*, &c. It is contained in a triple envelope, (see Meninges.) Its texture is pulpy, and varies according to age. Two substances may be distinguished in it—the *medullary* or *fibrous*, and the *cortical*, *cineritious*, *vesicular*, or *gray*. The former is white; and occupies all the interior and base of the brain. The latter is grayish and softer. It is situate particularly at the surface of the organ.

The brain receives several arterial vessels, furnished by the internal carotid and vertebral. Its veins end in the sinuses. It is the material organ of the mental and moral manifestations. According to Gall, each part is the special seat of one of those faculties, and the brain and cerebellum, inclusive, are called by him "*the nervous system of the mental faculties.*" The following table, from Haller and Cuvier, exhibits the proportion between the mass of the brain and that of the body in man and in animals.

A child of six years (Haller) lb. 2, oz. 3 1-2.	1-22
Adult (Haller)	1-25
(From lb. 2, 3 oz. to lb. 3, 3 3-4 oz. Soemmering.)	
Gibbon (*Simia.*)	1-48
Sapajou	from 1-41 to 1-22
Ape	from 1-48 to 1-24
Baboon	from 1 101 to 1-86
Lemur	from 1-84 to 1-61
Bat (*Vespertilio Noctula*)	1-96
Mole	1-36
Bear	1-205
Hedgehog	1-168
Fox	1-205
Wolf	1-230
Beaver	1-290
Hare	1-228
Rabbit	1-140 to 1-152
Rat	1-76
Mouse	1-43
Wild Boar	1-672
Domestic, do	1-512 to 1-412
Elephant (7 or lb. 10)	1-500
Stag	1-290
Roebuck (young)	1-94
Sheep	1-351 to 1-192
Ox	1-750 to 1-860
Calf	1-219
Horse	1-700 to 1-400
Ass	1-151
Dolphin	1-25, 1-36, 1-40, 1-102
Eagle	1-260
Goose	1-360
Cock	1-25
Canary-bird	1-14
Humming-bird	1-11
Turtle	1-568
Tortoise	1-2240
Frog	1-172
Shark	1-2496
Pike	1-1305
Carp	1-560

The substance of the nervous system has been analyzed by Vauquelin, and found to contain water 80.00; white fatty matter 4.53; red fatty matter, called *cerebrine*, 0.70; osmazome, 1.12; albumen, 7.00; phosphorus, 1.50; sulphur, acid phosphates of potassa, lime, and magnesia, 5.15.

Cerebrum Abdominale, Solar plexus—c. Elongatum, Medulla oblongata—c. Parvum, Cerebellum—c. Posterius, Cerebellum.

CEREFOLIUM, Scandix cerefolium—c. Hispanicum, Chærophyllum odoratum—c. Sylvestre, Chærophyllum sylvestre.

CERELÆUM, Cerate.

CEREOLA, *Bougie*.

CERERISIA, Cerevisia.

CEREUM MEDICATUM, *Bougie*.

CEREVIS'IA, quasi, *Cererisia*, *Zythos*, *Liquor Cer'eris*, *Vinum hordea'ceum*, *Barley Wine*, *Bira*, *Bryton*, *βρυτον*, from Ceres, 'corn;' whence it is made. *Ale* (*Alla*,) *Beer*, *Porter*, (F.) *Bière*, *Cervoise*. These fluids are drunk by the inhabitants of many countries, habitually, and in Great Britain more than in others. They are nourishing, but not very easy of digestion. The old dispensatories contain numerous medicated ales, which are no longer in use.

CERFEUIL, Scandix cerefolium—*c. Musqué*, Chærophyllum odoratum—*c. Sauvage*, Chærophyllum sylvestre.

CERION, Favus, Porrigo favosa.

CÉRISIER, Prunus cerasus—*c. à Grappes*, Prunus padus—*c. de Virginie*, Prunus Virginiana.

CERNIN, SAINT, WATERS OF. St. C. is a parish in the diocess of St. Flour, Upper Auvergne, France. The water is a chalybeate. It is called *Eau du Cambon*.

CERNOS, Capistrum.

CEROE'NĒ, CEROU'NĒ, or CIROUE'NĒ, *Ceroe'num*, from *κηρος*, 'wax,' and *οινος*, 'wine.' A plaster composed of *yellow wax*, *mutton suet*, *pitch*, *Burgundy pitch*, *Bole Armeniac*, *Thus* and *wine*. It was used as a strengthening plaster. Sometimes it contained neither wax nor wine.

CEROMA, Cerate.

CEROMANTI'A, from *κηρος*, 'wax,' and *μαντεια*, 'divination.' The art of foretelling the future, from the figures which melted wax assumes, when suffered to drop on the surface of water.

CERONIUM, Cerate.

CEROPIS'SUS, from *κηρος*, 'wax,' and *πισσα*, 'pitch.' A depilatory plaster, composed of pitch and wax.

CEROS, Cera.

CEROSTROSIS, Hystriciasis.

CEROTUM, Cerate.

CEROXYLON, see Cera flava et alba.

CERUA, Ricinis communis.

CERU'MEN, from *cera*, 'wax.' *Ceru'men Au'rium*, *Ce'rea*, *Aurium Sordes*, *Marmora'ta Au'rium*, *Cyp'selē*, *Ceru'minous Humor*, *Cyp'selis*, *Fu'gilē*, (F.) *Cire des Oreilles*. A name given to the unctuous humour, similar to wax in its physical properties, which is met with in the *meatus auditorius externus*. It is secreted by follicles, situate beneath the membrane lining the meatus. It lubricates the meatus, preserves the suppleness of the lining membrane, prevents the introduction of bodies floating in the atmosphere, and by its bitterness and unctuousness prevents insects from penetrating.

CERU'MINOUS, *Cerumino'sus*, (F.) *Cérumineux*. Relating to cerumen.

Ceru'minous Glands or Follicles, (F.) *Glandes cérumineuses* ou *Follicules Cérumi-*

meuses. Glands or follicles, which secrete the cerumen.

CERUSSA ACETATA, Plumbi superacetas—c. Alba Hispanica, Plumbi subcarbonas—c. Alba Norica, Plumbi subcarbonas—c. Psymmithron, Plumbi subcarbonas—c. Serpentaria, see Arum maculatum.

CERUSSE, Plumbi subcarbonas.

CERUS'SEA URI'NA. Terms used by Paracelsus for the urine, when of a colour like cerusse.

CERVARIA ALBA, Laserpitium latifolium.

CERVEAU, Cerebrum.

CERVELET, Cerebellum.

CERVELLE, Cerebrum.

CERVI ELAPHI CORNU, Cornu cervi, see Cervus.

CERVICAL, *Cervica'lis*, from *cervix*, 'the back of the neck.' *Trachel'ian*. Every thing which concerns the neck, especially the back part.

Cervical Ar'teries are three in number: 1. The *ascending*, *anterior*, or *superficial*, a branch of the inferior thyroid, distributed to the scaleni muscles and integuments. 2. The *transverse* (*Cervico-scapulaire*—Ch.,) a branch of the axillary artery, or of the subclavian: distributed to the *levator scapulæ*, *trapezius*, &c. 3. The *posterior* or *profound*, *A. transversa'lis colli Trachélo-cervicale*—Ch.) a branch of the subclavian, distributed to the deep-seated muscles on the anterior and posterior parts of the neck.

Cervical Gan'glions. The three ganglions of the great sympathetic. The *cervical glands* or lymphatic glands of the neck are, also, so called.

Cervical Lig'aments. These are two in number. 1. The *anterior*, extending from the basilary process of the occipital bone to the anterior part of the first cervical vertebra. 2. The *posterior* or *supraspinous*, *Ligamen'tum Nu'chæ*, which extends from the outer occipital protuberance to the spinous process of the seventh cervical vertebra. In animals with large heads, it is very strong.

Cervical Nerves are eight in number, on each side; and form the *eight cervical pairs*, which are the first given off from the spinal marrow.

Cervical Plexus, *Plexus Trachélo-sous-cutané* (Ch.) The nervous net-work, formed by the anterior branches of the first three cervical nerves, above the posterior scalenus muscle, and at the outer side of the pneumogastric nerve, carotid artery, and jugular vein.

Cervical Veins have nearly the same distribution as the arteries.

Cervical Ver'tebræ. The first seven vertebræ of the spine.

CERVICALIS DESCENDENS, see Sacro-lumbalis.

CERVICARIA, Campanula trachelium.

CERVICI-DORSO-SCAPULAIRE, Rhomboideus—c. *Dorso-costal*, Serratus posticus superior—c. *Dorso-mastoidien et dorso-trachélien*, Splenius—c. *Mastoïdien*, Splenius.

CERVISPINA, Rhamnus.

CERVIX, *Collum*, (q. v.) The neck. A neck.

Cervix Obstipa, Torticollis.

Cervix U'teri. The neck of the uterus; also the vagina. The term *cervix* is applied to other parts, as the *cervix* of a bone, or the part between the head and body, &c. See Collum.

CERVOISE, Cerevisia.

CERVUS, *Cerva*. The horn of the *Cervus Elaphus*, called *Cornu*, *Cervi Elaphi Cornu*, *Cornu Cervi'num*, *Hartshorn*, (F.) *Corne de cerf*, contains 27 parts of gelatin in the 100. A jelly made from the shavings is emollient and nutritive.

The *Stag's Pizzle*, *Pria'pus Cervi*, was once considered to be aphrodisiac. Dose, ℈j to ʒj in powder.

Cervus Al'ces. The *Elk*, (F.) *Elan*. The *hoof* of this animal was anciently used as an anti-epileptic. The animal, it was asserted, was subject to attacks of epilepsy, and always cured them by putting its hoof into the ear. The hoof was also worn as an amulet.

Cornu Ustum or *Burnt Hartshorn* has been used as an antacid, but it consists of 57 parts of *phosphate*, and but one of *carbonate* of lime. It is, therefore, not of much use.

CÉSARIENNE OPÉRATION, Cæsarean section.

CESTRI'TES. A wine prepared from betony, (κεστρον, 'betony.')

CESTRON, Betonica officinalis.

CETA'CEUM, from κητος, 'a whale.' *Album Ceti*, *Adipoce'ra ceto'sa*, *Spermaceti*, (F.) *Blanc de Baleine*, *Cétine*, *Adipocire de Baleine*. An inodorous, insipid, white, crystallized, friable, unctuous substance, obtained from the brain of the *Physe'ter Macrocephalus* or *Spermaceti Whale*, and other varieties of whale. S. g. .9433: melts at 112°. It is demulcent and emollient; has been given in coughs and dysentery, but is mostly used in ointments. Dose, ʒss to ʒiss rubbed up with sugar or egg.

CETERACH OFFICINARUM, Asplenium ceterach.

CÉTINE, Cetaceum.

CETRARIA ISLANDICA, Lichen islandicus.

CETRARIN, see Lichen islandicus.

CEVADILLA HISPANORUM, Veratrum sabadilla.

CEVADILLE, Veratrum sabadilla.

CHAA, Thea.

CHÆREFOLIUM, Scandix cerefolium.

CHÆROPHYL'LUM, from χαιρω, 'I rejoice,' and φυλλον, 'a leaf.'

Chærophyl'lum Odora'tum, *Scandix Odora'ta*, *Myrrhis Odora'ta*, *Cerefo'lium Hispan'icum*, *Sweet Cic'ely*, (F.) *Cerfeuil musqué* ou *d'Espagne*, has the smell of aniseed, and is cultivated on account of its aromatic properties.

Chærophyl'lum Sylves'tre, *Cicuta'ria*, *Chærophyl'lum Tem'ulum*, *Cerefo'lium Sylves'tre*, *Bastard Hemlock*, *Wild Chervil* or *Cow-weed*, (F.) *Cerfeuil sauvage*, *Persil d'Âne*, is a slightly fetid aromatic; but is not used.

Chærophyl'lum Temulum, Chærophyllum sylvestre.

CHÆTE, Capillus.

CHAFING, *Erythe'ma Intertri'go*, *Intertri'go*, *Paratrim'ma*, from *échauffer*, 'to heat.' Fret, erosions of the skin, *Attri'ta*, (F.) *Échauffemens*, *Écorchures*. The red excoriations which occur in consequence of the friction of parts, or between the folds of the skin, especially in fat or neglected children. Washing with cold water and dusting with hair powder is the best preventive. When occurring between the nates and in the region of the perinæum, from long walking, it is vulgarly designated by the French *Entre-fesson*.

CHAIR, Flesh.

CHALASIS, Relaxation.

CHALASMOS, Relaxation.

CHALAS'TICUS, from χαλαω, 'I relax.' A medicine proper for removing rigidity of the fibres.—Galen. An emollient or relaxant, (q. v.)

CHALA'ZA, *Chala'zion, Chalazo'sis, Poro'sis, Grando, Hail*, (F.) *Grêle, Gravelle.* Certain hard, round, transparent tumours, developed in different parts of the body, more especially in the substance of the eyelids.

CHALCANTHUM, Ferri sulphas—c. Album, Zinci sulphas.

CHALCEDONIUS, Cornelian.

CHALCITES, Colcothar.

CHALCOIDEUM, (os) Cuneiform Bone.

CHALCOS, Cuprum, Æreolum.

CHALEUR, Heat—*c. Acre*, see Acrid—*c. Animale*, Animal heat—*c. des Animaux*, Heat.

CHALEURS DU FOIE, Heat.

CHAL'INOPLASTY, *Chalinoplas'ticē;* from χαλινος, 'frænum,' 'a bridle,' and πλασσω, 'I form.' The operation for forming a new frænum.

CHALK, Creta—c. Red, Rubrica fabrilis—c. Stones, Calculi arthritic.

CHALYB'EATE, *Chalybea'tus, Ferrugin'eus, Ferrugino'sus, Martia'lis*, (F.) *Ferrugineux;* from *chalybs*, 'iron or steel.' Of, or belonging to iron. Any medicine, into which iron enters; as, *chalybeate mixture, pills, waters*, &c. See Waters, Mineral.

CHALYBIS RUBIGO, Ferri subcarbonas.

CHALYBS, from *Chal'ybes;* a people of Pontus, who dug iron out of the earth; *A'cies, Steel.* The *Proto-carburet of iron*, (F.) *Acier.* As a medicine, steel does not differ from iron.

CHALYBS TARTARIZATUS, Ferrum tartarizatum.

CHAMA, Cheme.

CHAMÆACTE, Sambucus ebulus.

CHAMÆBATOS, Fragaria.

CHAMÆCEDRIS, Artemisia santonica.

CHAMÆCISSUS, Glecoma hederacea.

CHAMÆCLEMA, Glecoma hederacea.

CHAMÆCYPARISSUS, Artemisia santonica.

CHAMÆDROPS, Teucrium chamædrys.

CHAMÆDRYS, Teucrium Ch., Veronica—c. Incana maritima, Teucrium marum—c. Minor repens, Teucrium Ch.—c. Palustris, Teucrium scordium—c. Vulgaris, Teucrium Ch.

CHAMÆDRY'TES. A wine, in which the *Teu'crium Chamædrys* has been infused.

CHAMÆGEIRON, Tussilago.

CHAMÆLAI'TES. A wine impregnated with the *Chamæ'lea* or *Daphne Alpina.*

CHAMÆLEA, Cneorum tricoccum.

CHAMÆLÆAGNUS, Myrica gale.

CHAMÆLEON ALBUM, Carlina acaulis.

CHAMÆLEUCE, Tussilago.

CHAMÆLINUM, Linum catharticum.

CHAMÆMELUM, Anthemis nobilis—c. Fœtidum, Anthemis cotula—c. Nobile, Anthemis nobilis—c. Odoratum, Anthemis nobilis—c. Vulgare, Matricaria chamomilla.

CHAMÆMORUM, Teucrium chamæpitys, Rubus chamæmorus.

CHAMÆPEUCE, Camphorosma monspeliaca.

CHAMÆPITUI'NUM VINUM. A wine, in which the leaves of the *Chamæ'pitys, Teu'crium Chamæ'pitys*, have been infused.

CHAMÆPITYS, Teucrium chamæpitys—c. Anthyllus, Teucrium iva—c. Moschata, Teucrium iva.

CHAMÆPLION, Erysimum.

CHAMÆRAPH'ANUM, from χαμαι, 'on the ground,' and ραφανος, 'the radish.' So Paulus of Ægina calls the upper part of the root of the *Apium.*

CHAMÆ'ROPS SERRAT'ULA, *Saw Palmetto.* A farina is prepared from the roots of this plant, which is used by the Indians in Florida as diet.

CHAMBAR, Magnesia.

CHAMBER, *Cam'era.* (F.) *Chambre.* This term is used in speaking of the eye, in which there are two chambers:—an *anterior* and a *posterior.* (F.) *Chambre antérieure et postérieure.* The *anterior* is the space between the cornea and the anterior part of the iris:—the *posterior*, the space between the iris and anterior surface of the crystalline. They are filled with the aqueous humour, and communicate by the opening in the pupil.

CHAM'BERLAIN'S RESTOR'ATIVE PILLS. This nostrum, recommended in scrofula, and all impurities of the blood, has been analyzed by Dr. Paris, and found to consist of *cinnabar, sulphur, sulphate of lime*, and a little vegetable matter. Each pill weighs 3 grains.

CHAMBRE, Chamber.

CHAMBRIE, Cannabis sativa.

CHAMELEA, Daphne Alpina.

CHAMOMILE, DOGS', Matricaria chamomilla—c. Dyer's, Anthemis tinctoria—c. German, Matricaria chamomilla—c. Spanish, Anthemis pyrethrum—c. Stinking, Anthemis cotula—c. Wild, Anthemis cotula.

CHAMOMILLA NOSTRAS, Matricaria chamomilla—c. Romana, Anthemis nobilis—c. Spuria, Anthemis cotula.

CHAMPACA, Michelia champaca.

CHAMPIGNON, Fungus—*c. de l'Appareil des Fractures*, Clavaria—*c. de Couche*, see Agaric—*c. de Malte*, Cynomorion coccineum.

CHANCE LAGUA, Canchalagua.

CHANCRE, (F.) *Ulcus cancro'sum, Ulcus'culum cancro'sum.* A sore, which arises from the direct application of the venereal virus; hence it is almost always seated, in men, on the penis. The French use the word *Chancre*, in popular language, for cancerous ulcers, the malignant aphthæ of children, &c. Formerly, the terms *Caroli* and *Caries pudendo'rum* were used for venereal pustules or sores on the parts of generation.

CHANCREUX, *Chancreuse*, (F.) *Cancro'sus, Carcino'des.* Having the nature of chancre, or of cancer.

Bouton Chancreux. A small tumour of a cancerous nature, which makes its appearance on the face—most frequently on the upper lip—*Noli me tangere.*

CHANT DES ARTERES, Sifflement modulé.

CHANVRE, Cannabis sativa.

CHAOMANTI'A. The alchymists meant, by this word, the art of predicting the future from observation of the air. The word *Chaos* was used by Paracelsus for the air; (μαντεια, 'divination.')

CHAOSDA, Plague.

CHAPERON DE MOINE, Aconitum napellus.

CHAPPETONADE, (F.) *Vom'itus rabio'sus.*

Vomiting accompanied by furious delirium, attacking strangers in hot countries.

CHAR'ACTER, χαρακτηρ, 'A mark or impression,' (F.) *Caractère*. In Pathology, it is used synonymously with stamp or appearance. We say, "A disease is of unfavourable character," "The prevailing epidemic has a bilious character," &c. In *Mental Philosophy* it means —that which distinguishes one individual from another, as regards his understanding and passions.

CHARA'DRIUS. Ælian thus calls a bird, which was reputed to cure jaundice. The word now means the plover.

CHARANTIA, Momordica elaterium.

CHARBON, Anthrax carbo.

CHARBONNEUX, Anthracoid.

CHARCOAL, Carbo—c. Animal, Carbo animalis.

CHARDON AUX ANES, Onopordium acanthium—*c. Bénit*, Centaurea benedicta—*c. à Bonnetier*, Dipsacus fullonum—*c. Étoilé*, Centaurea calcitrapa—*c. à Foulon*, Dipsacus fullonum—*c. Hémorrhoidal*, Cirsium arvense—*c. Marie*, Carduus Marianus—*c. Roland*, Eryngium campestre.

CHAR'LATAN, from Ital. *ciarlare*, 'to talk much;' *Circula'tor, Circumfora'neus, Periodeu'tes, Pseudomed'icus, Agyr'ta, Anacyc'leon*, A *Quack*, an *Empirical Pretender*, *Emp'iric*. Probably, one who goes from place to place to sell any medicine, to which he attributes marvellous properties. By extension—any individual, who endeavours to deceive the public by passing himself off as more skilful than he really is. According to Ménage, the word comes from *circulatanus*, a corruption of *circulator*.

CHAR'LATANRY, *Agyr'tia, Banau'sia*, the conduct or action of a charlatan. (F.) *Charlatanerie, Charlatanisme, Quackery, Empiricism*.

CHARM, Lat. *Carmen*, whence comes the Italian *Ciarma*, (F.) *Charme*, with the same signification, *Canta'tio, Incantamen'tum*. Trick. A sort of magic, or superstitious practice, by which it was believed, that individuals might be struck with sickness or death, or be restored to health.

CHARNIÈRE, Ginglymus.

CHARNU, Carneous.

CHARPIE, Carbasus.

CHARTA VIRGINEA, Amnios.

CHARTRE, Tabes mesenterica.

CHAS (F.) *Acûs fora'men*. The *eye of a needle*. Sometimes, this opening is near the point of the instrument, as in the ligature needle.

CHASME, Yawning.

CHASPE, Variola.

CHASSE (F.) *Manu'brium*. A kind of handle composed of two moveable laminæ of horn, shell, or ivory, united only at the extremity, which holds the blade of the instrument,—as in the common bleeding lancet.

CHASSIE (F.) *Lema, Lippa, Glama, Gramia;* the *gum of the eye*. A sebaceous humour, secreted mainly by the follicles of Meibomius, which sometimes glues the eyelids together.

CHASSIEUX (F.) *Lippus;* covered with *Chassie*—as *Paupières chassieuses*.

CHASTE TREE, Vitex.

CHATAIGNE, see Fagus castanea—*c. d'Eau*, Trapa natans.

CHATAIGNIER COMMUN, Fagus castanea—*c. Nain*, Fagus castanea pumila.

CHATEAU-LANDON, WATERS OF. A town three leagues from Nemours, in France. The waters contain alum and iron.

CHATEAU-SALINS; a town in the department of La Meurthe, France. The waters contain carbonate of lime, sulphates of lime and magnesia, and chlorides of magnesium and sodium.

CHATELDON, MINERAL WATERS OF. Chateldon is in the department of Puy-de-Dôme, France. The waters contain carbonic acid and iron.

CHATEL-GUYON MINERAL WATERS OF. A village in France, in the department Puy-de Dôme, near which there are five thermal and acidulous springs. Temperature, 86° Fahrenheit.

CHATON (F.), 'a husk.' In pathology, it means a *funda* or cavity formed by the irregular or *hour-glass contraction* of the uterus, in which the placenta is often retained or *enchatonné* after the birth of the child. It is detected by passing the fingers along the cord as far as the part which is contracted, when the placenta will not be discoverable.

The treatment consists in relaxing by a large dose of an opiate, then passing the fingers along the cord, and gradually dilating the opening through which it passes, until it permits the hand to go through. The placenta must then be grasped and gently withdrawn.

CHATON, Vaginal process.

CHATONNÉ, CALCUL, (F.) *Calculus incarcera'tus, Encys'ted Calculus, Calcul enkysté*. A urinary calculus, adherent to the inner surface of the bladder, so that it is immovable, and cannot pass to the different parts of that organ. This happens when calculi form in some natural or accidental cavity of the bladder; or when the organ, by ulceration, gives rise to fungi, which surround the calculus; or when it is lodged in the orifice of the ureter or urethra.

CHATONNÉ, PLACENTA, (F.) The placenta when retained as above described. See *Chaton*.

CHATONNEMENT, (F.) *Incarcera'tio, Chatonnement du placenta, Enkystement*—Hour-glass contraction of the uterus. See *Chaton*.

CHATOUILLEMENT, (F.) This word sometimes means the action of *tickling* (q. v.) or titillation (*Titilla'tio*,) and, at others, the sensation which gives rise to the action (*Pruri'tus*,) *Itching*.

CHATRÉ, Castratus.

CHATRURE, Castration.

CHAUDEBOURG, MINERAL WATERS OF. C. is three quarters of a league from Thionville in France. The waters contain iron, sulphate of lime, sulphate of magnesia, and carbonate of lime.

CHAUDEPISSE, Gonorrhœa impura—*c. Cordée*, Gonorrhœa cordata—*c. tombée dans les Bourses*, Hernia humoralis.

CHAUDES-AIGUES, MINERAL WATERS OF. A small town in the department of Cantal, France, where there is a number of saline springs containing carbonic acid, carbonate of soda, and chloride of sodium. Temp. 190° Fahrenheit.

CHAUFFOIR (F.) *Linteum Calefacto'rium*. According to the *Académie*, a warmed cloth, used either for the purpose of warming a patient, or to apply to a female recently delivered.

CHAUSSE, (F.) *Chausse d'Hippocrate, Manche d'Hippocrate, Man'ica Hippoc'ratis, Man'ica. Hippocrates' Sleeve.* A conical bag, made of flannel, for straining liquids.

CHAUSSE-TRAPPE, Centaurea calcitrapa.

CHAUVETÉ, Calvities.

CHAUX, HYDROSULFATE DE, Calcis sulphuretum—*c. Vive*, Calx viva.

CHECKER-BERRY, Arbutus uva ursi.

CHEEK, Gena.

CHEESE, Sax. cere, (L.) *Ca'seus, Tyros*, (F.) *Fromage.* An aliment, prepared from the caseous and oleaginous parts of milk. Fresh cheeses owe their chief medical properties to the immediate principle, essentially cheesy, to which the name *ca'seum* or *casein* has been applied. Those, which have been recently salted, are digested with comparative facility. The flavour of cheese is owing to an ammoniacal caseate. On the whole, cheese itself is not easy of digestion, although it may stimulate the stomach to greater exertion, and thus aid in the digestion of other substances.

CHEESE RENNET, Galium verum.

CHEE'SY, *Casea'rius, Caseo'sus, Tyro'des*, (F.) *Caseux* ou *Caséux.* Having the nature of cheese.

CHEF, Bandage (tail.)

CHEILI'TIS, or CHILI'TIS, from χειλος, 'a lip.' Inflammation of the lip. See Chilon.

CHEILOC'ACĒ, from χειλος, 'a lip,' and κακος, 'evil.' *Labrisul'cium.* A disease, characterized, it is said, by swelling, induration, and slight redness of the lips without inflammation; reputed, but without any authority, to be common in England and Scotland, amongst children. Also, the thickness of the upper lip of scrofulous children. See Stomacace, and Cancer aquaticus.

CHEILOCARCINO'MA, from χειλος, 'a lip,' and καρκινωμα, 'cancer.' Cancer of the lip.

CHEILOMALACIA, Cancer aquaticus, Stomacace.

CHEILON, Chilon.

CHEILOPLAS'TICĒ, *Chiloplasticē*, from χειλος, 'lip,' and πλαστικος, 'forming.' The operation for an artificial lip.

CHEILOS, Lip.

CHEIMA, Cold.

CHEIMETHLON, Chilblain.

CHEIMIA, Rigor.

CHEIR, Manus.

CHEIRAN'THUS CHEIRI, from χειρ, 'the hand,' and ανθος, 'flower.' The systematic name of the *Common Yellow Wall-Flower, Viola lu'tea, Leucoïum lu'teum, Keyri, Cheiri*, (F.) *Geroflée* ou *Violier jaune.* The flowers have been esteemed nervine, narcotic, and deobstruent.

CHEIRAP'SIA. The action of rubbing or scratching, from χειρ, 'the hand,' and απτω, 'I touch.' A troublesome symptom in the itch.

CHEIRIATER, Surgeon.

CHEIRIS'MA, *Cheiris'mus.* The act of touching:—handling. Any manual operation.

CHEIRIXIS, Surgery.

CHEIRONOM'IA, *Chironom'ia*, from χειρονομεω, 'I exercise with the hands.' An exercise, referred to by Hippocrates, which consisted in using the hands, as in our exercise of the dumb-bells.

CHEIROPLETHES, Fasciculus.

CHEIROSIS, Subactio.

CHELA, χηλη. This word has several significations. *Chela*, a forked probe used for extracting polypi from the nose. *Chelæ*—chaps, or cracks on the feet, organs of generation, &c. *Chelæ* likewise means claws, especially those of the crab. See Cancrorum Chelæ.

CHELÆ PALPEBRARUM, see Tarsus.

CHELAPA, Convolvulus jalapa.

CHÉLIDOINE GRANDE, Chelidonium majus—*c. Petite*, Ranunculus ficaria.

CHELIDON, χελιδων, the hollow at the bend of the arm. *Hirun'do.* (q. v.)

CHELIDONIA ROTUNDIFOLIA MINOR, Ranunculus ficaria.

CHELIDONIUM, Bryonia alba.

CHELIDON'IUM MAJUS, from χελιδων, 'a swallow,' because its flowering coincides with the appearance of the swallow. *Papa'ver Corniculu'tum, P. lu'teum, Common Celandine, Tetterwort*, (F.) *Chélidoine grande, L'Éclaire. Family*, Papaveraceæ. *Sex. Syst.* Polyandria Monogynia. The root and recent plant have been considered aperient and diuretic. Externally, the juice has been employed in some cutaneous diseases.

CHELIDONIUM MINUS, Ranunculus ficaria.

CHELIDON'IUS LAPIS. A name given to stones, which, it was pretended, existed in the stomach of young swallows. They were formerly believed capable of curing epilepsy.

CHELOID, Cancroid.

CHELO'NĒ, χελωνη, 'a tortoise.' An instrument for extending a limb; so called, because, in its slow motions, it resembled a tortoise.—Oribasius. See Testudo.

CHELO'NĒ GLABRA, *Common Snake head, Turtle head, Turtle bloom, Shellflower.* An indigenous plant, *Sex. Syst.* Didynamia angiospermia; blossoming from July to November. The leaves are bitter and tonic; without any aromatic smell, and with very little astringency.

CHELO'NIA MYDAS, *The Green Turtle.* This species of turtle abounds on the coast of Florida. It is the one so prized by the epicure.

CHELO'NION, *Chelo'nium*, from χελωνη, 'a tortoise,' from its resembling in shape the shell of that animal. The upper, gibbous part of the back.—Gorræus.

CHELONOPH'AGI, from χελωνη, 'the tortoise,' and φαγω, 'I eat.' An ancient name for certain tribes, who dwelt on the coasts of the Red Sea, and who lived only on tortoises.—Pliny, Diodorus of Sicily.

CHEL'SEA PEN'SIONER. An empirical remedy for rheumatism, sold under this name. (*Gum guaiac*, ℥j, *powdered rhubarb* ℥ij, *cream of tartar* ℥j, *flowers of sulphur* ℥j, *one nutmeg*, finely powdered: made into an electuary with a pound of *clarified honey.*) Dose two spoonfuls.

CHEL'TENHAM, MINERAL WATERS OF. C. is a town in Gloucestershire, England, nine miles from Gloucester, and 94 W. of London. Its water is one of the most celebrated natural purgatives in England. It is a saline, acidulous chalybeate, and is much frequented. Its main constituents are chloride of sodium, sulphate of soda, sulphate of magnesia, carbonic acid and carbonate of iron.

CHELTENHAM WATER, ARTIFICIAL, may be made of *Epsom salt*, gr. xij, *iron filings*, gr. j: *Glauber's salt*, ℥iv: *water*, 4 gallons: impregnated with the gas from *marble powder* and *sulphuric acid*, āā ℥ij.

Cheltenham Salts. These are sometimes made from the waters; at others, factitiously. The following is a formula. *Sodii chlorid., magnes. sulphat., sodæ sulph.*, āā ℔j: dissolve, filter, evaporate to dryness, then add *Ferri sulph.*, ℥ss.

CHELYS, Thorax.

CHELYS'CION, from χελυς, 'the chest.' A short, dry cough.—Galen, Hippocr. Foësius.

CHE'ME, CHA'MA, CHE'RAMIS. An ancient measure, equivalent to about two teaspoonfuls.

CHEMEUTICE, Chymistry.

CHEMIST, Chymist.

CHEMISTRY, Chymistry.

CHEMO'SIS, from χημη, 'an aperture,' or from χυμος, 'an humour.' A name given to ophthalmia, when the conjunctiva, surrounding the cornea, forms a high ring, making the cornea seem as it were at the bottom of a well. By some, it is used synonymously with *ophthalmia membranarum*. See Ophthalmia.

CHENAY, MINERAL WATERS OF. C. is a town in France, two leagues from Rheims. The waters are chalybeate.

CHÊNE, Quercus alba—*c. Marin*, Fucus vesiculosus—*c. Petit*, Teucrium chamædrys—*c. Vert*, Ilex aquifolium.

CHENEVIS. See Cannabis sativa.

CHENOBOSCON, Potentilla anserina.

CHENOC'OPRUS, from χην, 'a goose,' and κοπρος, 'dung.' The *dung of the goose* is so designated in some old Pharmacopœias. It was formerly employed as a febrifuge and diuretic.

CHENOPO'DIUM AMBROSIOÏ'DES, from χην, 'a goose,' and πους, 'a foot.' *Botrys Mexica'na, Chenopo'dium Mexica'num, Botrys, Ambrosioï'des Mexica'na, Botrys America'na, Mexico Tea, Spanish Tea, Artemis'ia Botrys*, (F.) *Ansérine, Thé du Mexique, Ambrosie du Mexique*. The infusion was once drunk as tea. It has been used in paralytic cases; and in the United States is said to be used as an anthelmintic indiscriminately with Ch. anthelminticum.

Chenopo'dium Anthelmin'ticum, *Chenopo'dium, Botrys anthelmin'tica, Wormseed, Wormgoosefoot, Wormseed goosefoot, Jerusalem Oak* of America, *Goosefoot Stinkweed*, (F.) *Ansérine anthelmintique, A. vermifuge*. This plant grows plentifully in the United States. The fruit—*Chenopodium* (Ph. U. S.)—is much used in cases of worms. Dose of the powder, from a tea-spoonful to a table-spoonful or more. The oil, *Oleum Chenopo'dii*, (Ph. U. S.) from 8 to 10 drops, is more frequently exhibited. It is as much used in America as the *Semen Santon'ici* with the English.

Chenopo'dium Bonus Henri'cus, *Chrysolach'anum, Mercuria'lis, Bonus Henri'cus, Tota bona, Lap'athum unctuo'sum, Chenopo'dium, English Mercury, Allgood, Angular-leaved goosefoot*, (F.) *Ansérine Bon Henri, Épinard sauvage*. The leaves are emollient, and have been applied to ulcers, &c. It has also been considered refrigerant and eccoprotic.

Chenopo'dium Botrys, *Botrys, Botrys vulga'ris, Ambro'sia, Artemis'ia Chenopo'dium, At'riplex odora'ta, At'riplex suaveo'lens*; the *Jerusalem Oak*, (Eng.) (F.) *Ansérine Botrys*, possesses anthelmintic properties, and was once given in diseases of the chest, palsy, &c. It is useless.

Chenopodium Fœtidum, Chenopodium vulvaria.

Chenopo'dium Vulva'ria, *At'riplex fœ'tida, At'riplex ol'ida, Vulva'ria, Garos'mum, Raphex, Chenopo'dium Fœ'tidum, Stinking Orach* or *Goosefoot*, (F.) *Vulvaire, Arroche puant, Ansérine fétide*. The fetid smell has occasioned it to be used as an antispasmodic and nervine.

CHEOPINA, Chopine.

CHEQUERBERRY, Gaultheria.

CHERAMIS, Cheme.

CHERBACHEM, Veratrum album.

CHERBAS, Lettuce.

CHERMES, Kermes.

CHERNIBIUM, Urinal.

CHERRY, BIRD, Prunus padus—c. Tree, red, Prunus cerasus—c. Tree, black, Prunus avium—c. Tree, wild, Prunus Virginiana—c. Water, Kirschwasser—c. Wild cluster, Prunus padus—c. Winter, Physalis.

CHERSÆ, Fæces.

CHERVIL, Scandix cerefolium—c. Wild, Chærophyllum sylvestre.

CHEST, Thorax.

CHESTNUT TREE, Fagus castanea.

CHEVAUCHEMENT, (F.) *Os'sium superposi''tio* vel *equita'tio, Parallax'is, Parallag'ma*. The riding of one bone over another after fracture; giving rise to shortening of the limb. See riding of Bones.

CHEVELURE, Scalp.

CHEVESTRE or *CHEVÊTRE, Capis'trum*, from *caput*, 'the head.' A bandage, applied round the head in cases of fracture or luxation of the lower jaw. According to the mode in which it is made, it is called *simple, double, oblique*, &c.

CHEVEU, Capillus.

CHEVILLE DU PIED, Malleolus.

CHEVRE-FEUILLE, Lonicera Periclymemum.

CHEZANAN'CÉ, from χεζω, 'I go to stool,' and αναγκη, 'necessity.' An ointment composed of honey and alum, and rubbed on the anus to occasion evacuations.—Paulus of Ægina.

CHIA, *Chia terra*, from *Chios*, an island where it was found. A kind of white earth, formerly used for burns.—Galen.

CHIACUM COLLYR'IUM. A collyrium consisting of several drugs and Chian wine.—Paulus of Ægina.

CHIADUS, Furunculus.

CHIAS'MOS, *Chias'ma*, from χιαζω, to form like the letter χ. The crucial union of parts,—as the decussation (q. v.) of the optic nerves.

CHIASTER, Kiaster.

CHIAS'TOS. Same etymon. A bandage, so called because it resembles the letter χ.—Oribasius.

CHIBOU, see Bursera gummifera.

CHICHA. A drink made in Peru with Indian meal dried in the sun, and fermented with water. Its taste is that of bad cider.

CHICKENPOX, Varicella.

CHICKWEED, Alsine media.

CHICORÉE DES JARDINS, Cichorium endivia—*c. Sauvage*, Cichorium intybus.

CHIENDENT, Triticum repens.

CHIGOE, Chique.

CHIGGRE, Chique.

CHIL'BLAIN, *Per'nio, Bugan'tia, Erythe'ma Per'nio, Erythe'ma à Fri'gore, Cheimeth'lon*, from *chill*, 'cold,' and *blain*, 'a pustule,' (F.) *Engelure*. An erythematous inflammation of

the feet, hands, &c., occasioned by cold. It is very common in youth—not so in the adult or advanced age. It is apt to degenerate into painful, indolent ulcerations, called *Kibes*. Chilblains are prevented by accustoming the parts to exposure; and are treated by stimulant, terebinthinate and balsamic washes, ointments, and liniments.

CHILD-BED STATE, Parturient state.

CHILDREN'S BANE, Cicuta maculata.

CHILI, see Lima.

CHILI, MINERAL WATERS OF. The most celebrated mineral springs of Chili, in South America, are those of Peldehues and Cauquenes. The former are not far from St. Jago. They consist of two springs, one thermal, the other cold. The hot spring is clear, inodorous, and contains soda and carbonic acid. The cold spring contains iron and sulphate of soda. Cauquenes is much resorted to by invalids during the summer. Mineral waters are very common in Chili.

CHILIOGRAMMA, Kilogramme.

CHILIOPHYLLON, Achillea millefolium.

CHILITES, Cheilitis.

CHILL, Rigor.

CHI'LON, *Chei'lon*, *Cheili'tis*, from χειλος, 'a lip.' Inflammation of the lips.—Vogel. One who has a thick lip.

CHILOPLASTICE, Cheiloplastice.

CHIMAPHILA, Pyrola umbellata.

CHIMIA, Chymistry.

CHIMIATER, Chymiater.

CHIMIATRIA, Chymiatria.

CHIMIE, Chymistry.

CHIMISTE, Chymist.

CHIMON, Cold.

CHINA, Cinchona, Smilax china—c. American or West India, Smilax pseudo-china—c. Occidentalis, Smilax pseudo-china—c. Root, Smilax china—c. Spuria nodosa, Smilax pseudo-china.

CHINCAPIN, Fagus castanea pumila—c. Water, Nelumbium luteum.

CHINCHE, Cimex.

CHINCHINA, Cinchona.

CHINCHUNCHULLI, Ionidium marcucci.

CHINCOUGH, Pertussis.

CHINESE, MEDICINE OF THE, *Medici'na Sin'ica*. Medicine has been long, but most imperfectly, practised by the Chinese. From their therapeutics we have obtained the old operations of acupuncture and moxibustion.

CHINICUS ACETAS, Quinine, acetate of—c. Citras, Quinine, citrate of.

CHININI ACETAS, Quinine, acetate of.

CHININI ACETAS, Quinine, acetate of.

CHININUM, Quinina—c. Sulfuricum, see Quinina.

CHINIOIDINE, *Chinoïdine*, *Chinoidina*; from *China*, 'Cinchona.' A substance presumed to be an alkaloid by Sertürner, who separated it from cinchona. It has been supposed to be a mixture of quinia, cinchonia, and a peculiar resinous matter.

CHINIUM ACETICUM, Quinine, acetate of—c. Ferrocyanogenatum, Quinine, Ferrocyanate of—c. Hydrochloricum, Quinine, muriate of—c. Muriaticum, Quinine, muriate of—c. Nitricum, Quinine, nitrate of—c. Phosphoricum, Quinine, phosphate of—c. Salitum, Quinine, muriate of—c. Sulphuricum, &c., see Quinina.

CHINNEYWEED, Lichen roccella.

CHINWHELK, Sycosis.

CHINQUAPIN, Fagus castanea pumila.

CHIOCOCCÆ RADIX, Caincæ radix.

CHIOLI, Furunculus.

CHION, Snow.

CHIQUE, (F.) *Puce pénétrante*, *Pulex Penetrans*, *Tick*, *Chiggre*, *Chigoe*. A small insect in America and the Antilles, which gets under the epidermis, and excites great irritation.

CHIR or CHEIR, χειρ, 'the hand,' hence:

CHI'RAGRA, from χειρ, 'hand,' and αγρα, 'a seizure.' Gout in the hand.

CHIRAPOTHECA, *Arsenal*.

CHIRAYITA, Gentiana chirayta.

CHIRAYTA, Gentiana chirayta.

CHIRETTA, Gentiana chirayta.

CHIRRHEUMA, Chirrheuma.

CHIRIATER, Surgeon.

CHIRIATRIA, Surgery.

CHI'ROMANCY, *Chiromanti'a*, *Palm'istry*, from χειρ, 'the hand,' and μαντεια, 'divination,' (F.) *Chiromancie*. Art of divining by inspection of the hand.

CHIRONAX, Surgeon.

CHIRO'NIA, (from Chiron, Χειρων, the Centaur, who is said to have discovered its use.) A genus of plants. *Fam.* Gentianeæ.

CHIRO'NIA ANGULA'RIS, *Amer'ican Cen'taury*, *Rosepink*, *Wild Suc'cory*, *Bitterbloom*, *Centry*, *Sabba'tia*, *S. Angula'ris*. Every part of this plant is a pure and strong bitter, which property is communicated alike to alcohol and to water. It is used as a tonic and a stomachic.

CHIRO'NIA CENTAU'RIUM, *Centau'rium minus*, *vulga'rē*, *Centau'rium parvum*, *Gentia'na centau'rium*, *Centau'rium minus*, *Erythræ'a Centau'rium*, *Smaller Centaury*, *Lesser Centaury*, (F.) *Centaurée petite*. The tops of the lesser Centaury, *Centaurii Cucu'mina*, are aromatic and tonic, and are sometimes employed as such.

CHIRO'NIA CHILEN'SIS, *Gentia'na Cachenlahuen*, *Cachen-laguen*, *Erythræ'a Chilensis*, *Gentiana Peruviana*. A very bitter plant, indigenous in Chili. It possesses the virtues of the *Chironeæ*. Given in infusion—(℥j, to water Oj.)

CHIRONI'UM, from χειρων, 'bad, malignant.' An ulcer difficult of cure:—of a swollen, hard, and callous nature.—Galen. Some have supposed the word to come from Chiron, the Centaur; who was unable to cure such ulcers.

CHIRONOMIA, Cheironomia.

CHIROP'ODIST, (F.) *Pédicure*. One who treats diseases of the hands and feet, or rather whose profession it is to remove corns and bunyons, from χειρ, 'the hand,' and πους, 'the foot.'

CHIRORRHEUMA, Chirrheuma.

CHIROSIS, Subactio.

CHIROTHE'CA, from χειρ, 'the hand,' and θηκη, 'a sheath.' A bandage for the hand; a kind of bandage in which the fingers and hand are enveloped in spiral turns. When the whole hand and fingers are covered, it is called the *double* or *complete Chirotheca*, *Ch. comple'ta*, *Vinctu'ra omnibus dig''itis*; and when only a finger is covered, the *half* or *incomplete*, *Ch. incomple'ta*, *Vinctu'ra pro uno dig''ito*. See *Gantelet*.

CHIROTRI'BIA, from χειρ, 'the hand,' and τριβω, 'I rub.' Friction with the hand. According to others, dexterity in an art.—Hippocrates, Galen.

CHIRRHEU'MA, *Chirorrheu'ma*, *Rheumatis'mus manus*, from χειρ, 'the hand,' and ρευμα, 'flux.' Rheumatism of the hand.

CHIRURGEON, Surgeon.

CHIRURGIA, Surgery—c. Anaplastica, Morioplastice—c. Curtorum, Morioplastice—c. Infusoria, Infusion of medicines—c. Transfusoria, Transfusion.

CHIRURGICUS, Surgical.

CHIRURGIE, Surgery—c. *Militaire*, Surgery, military.

CHIRURGIEN, Surgeon—*c. Consultant*, consulting Surgeon—*c. Herniaux*, see Hernial.

CHIRURGIQUE, Surgical.

CHIRURGUS, Surgeon.

CHIST. An Arabic word which signifies the sixth part. The sixth part of the *Congius* or gallon.

CHITON, Tunic.

CHITONISCUS, Indusium.

CHIUM VINUM. From *Chios*, the island where it was produced; *Chian wine*, used by the physicians of antiquity in cases of defluxions and ophthalmiæ.—Scribonius Largus.

CHLI'AROS, χλιαρος, 'tepid.' A name given to slight fevers, in which the heat is not great.—Galen.

CHLIAS'MA, χλιασμα, same etymon. A tepid and moist fomentation.—Hippocr.

CHLOAS'MA, *Pityri'asis versic'olor*, *Éphélide scorbutique*, *Mac'ula hepat'ica*, *Pannus hepat'icus*, (F.) *Taches hépatiques*, *Chaleurs du foie*, *Liverspot*, from χλοος, 'a greenish-yellow colour.' A cutaneous affection, characterized by one or more broad irregular-shaped patches, of a yellow or yellowish-brown colour, and occurring most frequently on the front of the neck, breast, abdomen, groins, &c. The patches do not generally rise above the surface. There is usually some degree of itching.

The causes are not very evident. Sulphur externally—in any and every form—generally removes it speedily. Should there be difficulty, the external use of the remedy by baths or fumigations may succeed.

CHLORA, Chlorine.

CHLORAS KALICUS DEPURATUS, Potassæ murias hyperoxygenatus.

CHLORASMA, Chlorosis.

CHLORETUM CALCARIÆ, Calcis chloridum.

CHLORIASIS, Chlorosis.

CHLORINE, from χλωρος, 'green.' *Chlo'rinum*, *Chlora*, *Oxymuriat'ic Acid Gas*, *Oxygenated Muriatic Acid Gas*, *Dephlogisticated Marine Acid*, *Hal'ogene*, *Mu'rigene*, *Chlorum*. So far as we know, this is an elementary substance. It is a greenish, yellow gas, of a strong suffocating smell, and disagreeable taste; incapable of maintaining combustion and respiration, and very soluble in water. One of its characteristics is, that of destroying, almost immediately, all vegetable and animal colours. It is employed in fumigations as a powerful disinfecting agent. A very dilute solution has been administered internally, in certain cases of diarrhœa and chronic dysentery. Inversion of the hands and arms in it has often removed itch and other cutaneous affections. It has also been inhaled in a dilute state in the early stage of phthisis, but it is of doubtful efficacy, and is better adapted for chronic bronchitis.

CHLO'ROFORM, *Perchloride of Formyl*, so called on account of its connexion with formic acid, is a colourless oleaginous liquid, of a sweetish ethereal odour, hot, aromatic, and peculiar taste, and of the specific gravity 1.480. It may be obtained by distilling from a mixture of chlorinated lime and alcohol,—rectifying the product by re-distillation, first from a great excess of chlorinated lime, and afterwards from strong sulphuric acid. It has been used with advantage in asthma, and in diseases in which a grateful soothing agent is required. Dose f. ʒj, diluted with water.

CHLOROPHYLLE, Fecula, green.

CHLORO'SIS, from χλωρος, 'green,' *Pal'lidus Morbus*, *Fœdus Vir'ginum color*, *Pal'lidus color virgin'eus*, *Icterit'ia alba*, *Ic'terus albus*, *Morbus virgin'eus*, *Morbus Parthenius*, *Dyspep'sia chloro'sis*, *Febris amato'ria*, *Cachex'ia vir'ginum*, *Febris vir'ginum*, *Febris alba*, *Anepithym'ia chloro'sis*, *Green-sickness*, *Chloras'ma*, *Chlori'asis*, *Citto'sis*. (F.) *Chlorose*, *Pâles-couleurs*. A disease which affects young females, more particularly those who have not menstruated. It is characterized by a pale, lurid complexion, languor, listlessness, depraved appetite and digestion, palpitation, &c. The disease generally goes off on the occurrence of the menstrual flux; but sometimes it is long before this is established, and at times, the catamenia are in much larger quantities than usual. To this last form M. Trousseau has given the name *chlorose hémorrhagique*.

The blood of chlorosis is generally thin, light-coloured, and deficient in red corpuscles; and the clot is in less proportion to the serum than in health. On auscultation, *a bellows' sound* has been almost invariably detected over the heart, and a continuous blowing sound in the larger arteries, (especially the carotids and subclavians,) re-enforced by each systole of the ventricle, and resembling the buzzing of a humming-top, the cooing of doves, the whistling of air through a key-hole, &c., (See Bruit.) Very similar sounds are heard in the arteries after copious hemorrhage: they seem, therefore, to coincide with enfeebled circulation.

Tonics—as iron—are usually required in the treatment: the disease most commonly occurring in those in whom there is considerable torpor of the system.

CHLOROSIS AMATORIA, Hectic fever.

CHLOROTIC, *Chlorot'icus*, (F.) *Chlorotique*. Affected with chlorosis, or pertaining to chlorosis;—as *chlorotic female*, *chlorotic symptoms*, &c.

CHLORUM, Chlorine.

CHLORURE D'OR, Gold, Muriate of.

CHLORURETUM OXIDI CALCII, Calcis chloridum.

CHOA, Chu.

CHOA'CUM EMPLAS'TRUM NIGRUM. A black plaster, mentioned by Celsus, and composed of equal parts of litharge and resin. The litharge was first boiled in oil.

CHOAK, Cynanche trachealis—c. Wolf, Lycanche.

CHOANA, Pelvis—c. Cerebri, Infundibulum of the brain.

CHOANE, Infundibulum.

CHOANORRHAGIA, Epistaxis.

CHOAVA, Coffea Arabica.

CHOC'OLATE, *Chocola'tum*, *Chocola'ta*, *Succola'ta*. Dr. Alston says, that this word is compounded of two East Indian words:—*choco*,

'sound,' and *atle*, 'water,' because of the noise made in its preparation. An alimentary paste prepared from the kernels of the *Theobro'ma cacao* or *Cacao*, with sugar, and often aromatics. (See Cacao.) The chocolate thus simply prepared—as it is met with, indeed, in commerce—is called in France, *Chocolat de santé*. It is not very easy of digestion.

The *chocolat à la vanille* contains three ounces of *vanilla* and two of *cinnamon* to twenty pounds of *common chocolate*. The addition of the aromatic renders it somewhat more digestible. Chocolates may likewise be medicated.

CHOCOLATE ROOT, Geum Virginianum.

CHOCUS, Chu.

CHŒNICIS, Trepan.

CHŒNION, Cord.

CHŒNOS, Cord.

CHŒRUS, Scrofula.

CHOIROS, Vulva.

CHOLAGO, Cholas.

CHOL'AGOGUE, *Cholago'gus*, *Chole'gon*, from χολη, 'bile,' and αγω, 'I expel.' The ancients gave this name to cathartics, which were reputed to cause the flow of bile.

CHOLAS, χολας, Plur. χολαδες. The cavity of the hypochondres; *Cholago*. The intestines. —Homer.

CHOLASMA, Cholosis.

CHOLĒ and CHOLOS, χολη, and χολος, 'bile,' (q. v.) in composition.—Hence:

CHOLECYST, Gall-bladder.

CHOLECYSTI'TIS, *Inflamma'tio Vesi'cæ fell'eæ*, *I. cyst'idis fell'eæ*, *Cysti'tis fellea*; from χολη, 'bile,' and κυστις, 'bladder.' (F.) *Inflammation de la Vésicule du Fiel*, *Cholecystite*. Inflammation of the gall-bladder.

CHOL'EDOCH, *Choled'ochus*; from χολη, 'bile,' and δοχος, 'containing or receiving.' The *Ductus choledochus*, *Ductus communis choledochus*, (F.) *Conduit* ou *Canal Cholédoque*, is the duct formed by the union of the hepatic and cystic ducts, which pours the hepatic and cystic bile into the duodenum.

CHOLEDOCI'TIS, from *choledochus*, and *itis*; a suffix denoting inflammation. Inflammation of the choledoch duct.

CHOLEDOG'RAPHY, *Choledogra'phia*, from χολη, 'bile,' and γραφειν, 'to describe.' A description of what relates to the bile.

CHOLEDOL'OGY, *Choledolog''ia*, from χολη, 'bile,' and λογος, 'a discourse.' A treatise on the bile.

CHOLEGON, Cholagogue.

CHOLEHÆMIA, Icterus.

CHOLEIA, Claudication.

CHOLELITHIA ICTERUS, Icterus.

CHOLELITHUS, Calculi, biliary.

CHOLEN'CHYSIS, from χολη, 'bile,' and εγχυσις, 'effusion.' Effusion of bile.

CHOLEPYRA, Fever, bilious.

CHOLEPYRRHIN, see Bile.

CHOL'ERA, *Chol'era-morbus*, *Cholerrha'gia*, *Pas'sio choler'ica*, *Fellif'lua passio*, *Morbus fellif'luus*, *Hol'era*, (F.) *Choléra-morbus sporadique*, *Ch. Europe'en*, from χολη, 'bile,' and ρεω, 'I flow.' According to others, from χολαδες, 'intestines,' or from χολεος, 'the gutter of a house to carry off the rain.' A disease characterized by anxiety, gripings, spasms in the legs and arms, and by vomiting and purging (generally bilious:) vomiting and purging are, indeed, the essential symptoms. The disease is most common in hot climates,—and in temperate climates, during summer. In India, the *spasmod'ic chol'era*, *Asiatic cholera*, *Malignant ch.*, *In'dian cholera*, *Epidem'ic ch.*, *Pestilen'tial ch.*, *Chol'eric Pest'ilence*, *Eastern ch.*, *Orien'tal ch.*, *Cholera orienta'lis*, *Ch. In'dica*, *Ch. Epidem'ica*, *Ganglioni'tis peripher'ica et medulla'ris*, *Cholerrhœ'a lymphatica*, *Psorente'ria*; *Typhoid Fever of India*, *Cholera asphyxia*, *Trisplanch'nia*, *Morbus oryzeus*, *Rice disease*, (because supposed by Tytler to be caused by damaged rice,) (F.) *Mort de Chien*, is frightful in the rapidity of its progress, the patient sometimes dying in a few hours from the first onset. In temperate climates, common cholera is not usually a disease of much consequence. It requires, that the stomach and bowels should be cleared, and afterwards the irritation be allayed by full doses of opium. In the *malignant cholera* of India, bleeding at the outset, without regard to the signs of apparent depression, and large doses of calomel, with opiates, form the great reliance of the practitioner.

CHOLÉRA-EUROPÉEN, see Cholera.

Cholera Infan'tum, *Chol'eric Fever of Infants*; *Cholera of Infants*. A disease so termed by American physicians. It occurs, generally, in the middle states of the Union, in June or July, and continues during the hot weather, hence called the 'summer complaint.' The chief symptoms are vomiting, purging of green or yellow matter, slime or blood, attended with pain or uneasiness; and swelling of the abdomen, with some pyrexia, generally. The heat of the weather seems to be the predisposing, if not the exciting, cause. It is a fatal disease in towns; differing little, if at all, from what is vulgarly called the *Watery Gripes* in England. Clearing, gently, the alimentary canal, so as to remove the offending matter, and then exhibiting chalk mixture and laudanum, with counter-irritants, as sinapisms to the abdomen, is the most satisfactory plan of treatment.

Cholera Morbus, Cholera—c. *Morbus Sporadique*, see Cholera—c. Sicca, Tympanites.

CHOLERAPHOBIA, Choleromania.

CHOL'ERIC, *Choler'icus*. Belonging to cholera morbus or to the bile. The French use the term *Fièvre cholérique* for the fever accompanying cholera.

Choleric Fever, of Infants, Cholera infantum.

Choleric Temperament is the same as *Bilious Temperament*.

CHOL'ERINE. A diminutive of cholera. The first stage of epidemic cholera; also, the precursory symptoms of cholera.

CHOLEROMA'NIA, *Cholerapho'bia*, from *cholera* and *mania*. A dread of cholera to such an extent that the individual fancies himself affected or threatened by it.

CHOLERRHAGIA, Cholera.

CHOLERRHŒA LYMPHATICA, Cholera.

CHOLESTEATINE, Cholesterin.

CHOL'ESTERIN, CHOL'ESTERINE, CHOLESTERI'NA, *Cholesteatinē*, *Cholesteatinē*, from χολη, 'bile,' and στεαρ, 'solid,' or στεαρ, 'suet.' An inodorous, insipid substance, in white, shining scales; fusible and crystallizing, on cooling, in radiated fibres. Soluble in alcohol. It forms the crystalline part of certain biliary calculi. See Adipocire.

CHOLICE'LĒ, from χολη, 'bile,' and κηλη,

'tumour.' A swelling, formed by the bile morbidly accumulated in the gall-bladder.

CHOLICYSTIECTASIE, Turgescentia vesicæ felleæ.

CHOLICYSTITE, Cholecystitis.

CHOLOLITHUS. See Calculi, biliary.

CHOLO'MA, from χωλος, 'lame, maimed.' Distortion of a limb: incapacity of moving it. Also, the act of limping, claudication, (q. v.)

CHOLOS, Bile, Chole.

CHOLO'SES, from χολη, 'bile.' M. Alibert includes, under this head, every morbid affection of the liver and spleen.

CHOLO'SIS, from χωλος, 'lame.' *Cho'lotes*, *Cholas'ma*, *Claudica'tion*. (q. v.) Hippocrates employs this word particularly for a lameness of the hand, which renders a person one-handed, *manchot*, (F.)

CHOLOTES, Cholosis.

CHONDRI'TIS, *Inflamma'tio Cartilag''inis;* from χονδρος, 'cartilage,' and *itis*, a termination, denoting inflammation. Inflammation of cartilage.

CHONDRODES, Cartilaginous.

CHONDROGENES'IA, *Chondrogen'esis;* from χονδρος, 'a cartilage,' and γενεσις, 'formation.' Formation of cartilage. A morbid conversion of parts into cartilage.

CHONDROGLOS'SUS, from χονδρος, 'a cartilage,' and γλωσσα, 'the tongue.' A fasciculus of fleshy fibres, passing from the lesser cornu of the os hyoides to the tongue. It forms part of the Hyoglossus.

CHONDROG'RAPHY, *Chondrogra'phia*, from χονδρος, 'cartilage,' and γραφη, 'description.' A description of cartilages.

CHONDROID, *Chondroïdes*, from χονδρος, 'cartilage,' and ειδος, 'resemblance.' Cartilaginiform. Resembling cartilage.

CHONDROL'OGY, *Chondrolog''ia*, from χονδρος, 'a cartilage,' and λογος, 'a discourse.' A treatise on cartilages.

CHONDRO'MA, *Enchondro'ma*, from χονδρος, 'cartilage.' A cartilaginous growth proceeding from bones, including spina ventosa, osteo-sarcoma, &c., of many.

CHONDRO-PHARYNGE'US, from χονδρος, 'a cartilage,' and φαρυγξ, 'the pharynx.' Fibres of the muscular coat of the pharynx, which arise from the lesser cornua of the os hyoides, and form part of the *Constrictor medius*. See Constrictor pharyngis.

CHONDROS, χονδρος, 'a cartilage.' (q. v.) The *Xiphoid cartilage*, (q. v.) in particular.

CHONDROSYNDES'MUS, from χονδρος, 'a cartilage,' and συνδεσμος, 'a ligament.' Union of bones, by means of fibro-cartilage.—Galen.

CHONDROTO'MY, *Chondrotom'ia*, from χονδρος, 'a cartilage,' and τεμνειν, 'to cut.' Dissection of cartilages.

CHONDRUS, Alica, Fucus crispus—c. Crispus, Fucus crispus—c. Polymorphus, Fucus crispus.

CHONOS. Infundibulum.

CHOPINE, CHOPI'NO, CHEOPI'NA. A measure, which contains 16 ounces. A pint measure.

CHORA, χωρα, 'region.' Any void space. Also, the orbit of the eye.

CHORD, TESTICULAR, Spermatic chord.

CHORDA, *Corda*. A string of an instrument. It has several meanings. A *tendon*,—the *intestines* (*Chordæ*.) Paracelsus calls the genital organs *chordæ*. *Chorda* or *Funic'ulus Tympani;* a branch of the 7th pair of nerves, according to some, but rather of the 5th pair, which passes through the tympanum, *Nerf Tympanique*—(Ch.) *Corde du Tambour* ou *du Tympan*. *Chordæ Willis'ii*, *Trabec'ulæ Willis'ii*, the small fibres which cross the sinuses of the dura mater: so called from their first describer, Willis. *Chordæ Tendin'eæ;* the tendinous and cord-like substances which connect the *columnæ carneæ* of the ventricles of the heart to the valves, &c.

CHORDA, Intestine—c. Veneris, Chordee.

CHORDÆ, Chordee—c. Ferrenii, Chords, vocal.

CHORDÆ LONGITUDINA'LES LANCISII. Two or three longitudinal elevations and lines on the upper surface of the corpus callosum.

CHORDÆ VOCALES, Chords, vocal.

CHORDAP'SUS, from χορδη, 'intestine,' and απτειν, 'to tie.' *Intussusceptio*. Constriction or twisting of the intestines.—Celsus. The Colica Ileus. See Enteritis and Ileus.

CHORDEE' or CORDEE', *Chorda Ven'eris*, *Chordæ*, *Chorda'ta Gonorrhœ'a*. A painful affection of the penis, attending gonorrhœa, and happening chiefly at night. It occurs when the violence of the inflammation is such, that the urethra cannot expand as much as the corpora cavernosa during erection, and consequently the glans seems painfully drawn downwards. The application of cold water topically and the administration of opium internally palliate it.

CHORE'A, *Chorea Sancti Viti*, *Ch. Sancti Modes'ti*, from χορεια, 'a dance.' Sometimes called *Scelotyr'bē*, *Viti Saltus*, *Salta'tio* SANCTI VITI, *Ballis'mus*, *Convul'sio habitua'lis*, *Siph'ita prava*, *Syn'clonus Chorea*, *Myotyr'bē*, *Choreoma'nia*, *Orchestroma'nia*, *Epileps'ia Saltato'ria*, *Morbus saltato'rius*, *Hierano'sis*, *M. gesticulato'rius*, *Scelotyrbē tarantismus*, *St. Vitus's Dance*, because the movements resemble dancing. (F.) *Chorée*, *Danse de* SAINT-WITT, *Danse de* ST. GUY. The characteristics are:—irregular and involuntary motions of one or more limbs, and of the face and trunk. It is a disease, which usually occurs before puberty; and is generally connected with torpor of the system, and of the digestive system in particular. Its duration is long, but it is usually devoid of danger; although frequently but little under the control of medicine. The spasms do not continue during sleep. The indications of treatment are:—to strengthen the general system, and stimulate the intestinal canal. Purgatives, once or twice a week, and chalybeates, with appropriate regimen, will fulfil these.

CHOREA, CHRONIC, see *Tic*,—c. partial, see *Tic*.

CHORE'GIA, from χορος, 'a troop of dancers and singers,' and αγω, 'I lead.' Hippocrates uses this term for the whole of the apparatus necessary for a physician or surgeon.

CHOREOMANIA, Chorea.

CHORIODEI''TIS, *Chorioidei'tis*, *Chorioidi''tis*, *Choroidi'tis*, from χοροειδης, 'the choroid,' and *itis*. Inflammation of the choroid coat of the eye.

CHO'RION, χοριον, 'skin,' from χωρειν, 'to contain,' 'include.' *Camis'ia Fœtus:* the *chemise* or shirt of the fœtus in utero. A thin, transparent membrane, which surrounds the

fœtus in utero on every side. It is exterior to the amnion.

Chorion also means the true skin. See Cutis.

Chorion Fungosum, Decidua—c. reticulatum, Decidua—c. Shaggy, Decidua—c. Spongiosum, Decidua—c. Spongy, Decidua—c. Tomentosum, Decidua.

CHOROID, *Choroïdeus*, *Choroï'des*, from χοριον, 'the chorion,' and ειδος, 'shape,' 'resemblance.' Several parts are so called, which resemble the chorion, in the multitude of their vessels.

Choroidea Tunica, vel Membra'na, or simply the *Choroid*, *Tu'nica vasculo'sa Oc'uli*, *T. aciniform'is*, (F.) *Membrane choroïde*, *Choroïde*. A thin membrane, of a very dark colour, which lines the sclerotica, internally. The part behind the iris is called *Uvea*. It is situate between the sclerotica and retina, has an opening, posteriorly, for the passage of the optic nerve; and terminates, anteriorly, at the great circumference of the iris, where it is continuous with the ciliary processes. According to Ruysch, the choroid consists of two layers, to the innermost of which his son gave the name *Tunica Ruyschia'na*, *Membra'na Ruyschia'na*, (F.) *Membrane Ruyschienne*. The internal surface of the membrane is covered with a dark pigment, called *Pigmen'tum nigrum*, *Æ'thiops animal*, (F.) *Enduit choroïdien*. Its use seems to be, to absorb the rays of light after they have traversed the retina.

Choroi'des Plexus, *Plexus choroïdeus*, *Choroid Plexus*. Two membranous and vascular duplicatures of the pia mater, situate in the lateral ventricles. They are fixed to the *Tela choroïdea* by one edge, and are loose and floating at the other.

Choroidea Tela, (F.) *Toile choroïdienne*. A kind of vasculo-membranous prolongation of the pia mater, which lines the lower surface of the fornix, united with the corpus callosum. It is stretched above the third ventricle, and covers the posterior commissure and corpora quadrigemina. Anteriorly, the tela choroidea is continuous with the plexus choroides.

Choroideæ Venæ, *Venæ Gale'ni*, (F.) *Veines choroïdiennes*. Two veins, which creep along the tela choroidea; and into which almost all those of the lateral ventricles, of the upper part of the cerebellum, of the pineal gland, and the corpora quadrigemina open. The Venæ Galeni open into the *sinus quartus* or *fourth sinus*.

CHOROÏDE, CEINTURE BLANCHE DE LA, Ciliary ligament—*c. Commissure de la*, Ciliary ligament.

CHOROIDITIS, Choriodeitis.

CHOSES CONTRE NATURE, Res contra naturam—*c. Naturelles*, Res naturales—*c. non Naturelles*, Res non naturales.

CHOU CABUS, Brassica capitata—*c. Croûte*, Sauer Kraut—*c. Fleur*, Brassica Florida, Cauliflower excrescence—*c. Marin*, Convolvulus soldanella—*c. Navet*, Brassica rapa—*c. Pommé*, Brassica capitata—*c. Potager*, Brassica—*c. Roquetta*, Brassica eruca.

CHRISIS, χρισις, from χριω, 'I anoint.' The action of anointing. Inunction (q. v.)

CHRISTI MANUS. Troches, prepared from refined sugar boiled in rose-water, with or without prepared pearls.

CHRISTOPHER, HERB, Actæa spicata.

CHRISTOS, χριστος, from χριω, 'I anoint.' Any medicine applied under the form of liniment or ointment.

CHRŒAS, Scrofula.

CHROMATOG"ENOUS; from χρωμα, 'colour,' and γενναω, 'I make.'

Chromatog"enous Appara'tus. A particular apparatus for producing the colouring matter of the skin, composed of a glandular or secreting parenchyma, situate a little below the papillæ, and presenting special excretory ducts, which pour out the colouring matter on the surface of the true skin.—Breschet.

CHROMATOMETABLEPSIA, Achromatopsia.

CHROMATOPSEUDOPSIA, Achromatopsia.

CHROMOP'SIA, *Chromop'ia*, *Chrup'sia*, *Visus colora'tus*, from χρωμα, 'colour,' and οψις, 'vision.' A state of vision in which a coloured impression is made on the retina. Said to be occasionally observed in jaundice.

CHRONAGUNEA, Menstruation.

CHRONIC, *Chron'icus*, *Chro'nius*, *Polychro'nius*, from χρονος, 'time.' Of long duration.

Chronic Diseases, *Morbi chron'ici*, (F.) *Maladies Chroniques*, *Macronos'iæ*, *Macro'siæ*, are those whose duration is long, or whose symptoms proceed slowly. The antithesis to *chronic* is *acûte*. (q. v.)

CHRONO, from χρονος, 'time.' A prefix to terms denoting inflammation of a part, to show that such inflammation is chronic.—Piorry.

CHRONO-HÉPATITE, Hepatitis, chronic.

CHRONO-NÉPHRITE, Nephritis (chronic.)

CHRUPSIA, Chromopsia.

CHRYSALEA, Nitro-muriatic acid.

CHRYSANTHEMUM, Calendula officinalis.

Chrysan'themum Leucan'themum, from χρυσος, 'gold,' and ανθος, 'a flower.' The *Ox-eye daisy*, *Daisy*, *Whiteweed*, *Goldens*, *Maudlin-Wort*, *Bellis major*, *Buphthal'mum majus*, *Leucan'themum vulga're*, *Bellidioï'des*, *Consol'ida media*, *Oc'ulus Bovis*, (F.) *Chrysanthème*, *Chrysène*, *Grande Marguerite des prés*. The flowers and herb are slightly acrid; and were once used in pulmonary diseases.

Chrysanthemum Parthenium, Matricaria parthenium.

CHRYSE, from χρυσος, 'gold.' The name of a yellow plaster, described by Paulus of Ægina, and composed of thus, alum, lead, colophany, resin, oil, and orpiment, boiled in vinegar.

CHRYSÈNE, Chrysanthemum leucanthemum.

CHRYSITIS, see Plumbi oxydum semivitreum.

CHRYSOBALANUS GALENI, see Myristica moschata.

CHRYSOCALIS, Matricaria.

CHRYSOCHALCOS, Brass.

CHRYSOCOLLA, Borax.

CHRYSOCOMA, Millefolium.

CHRYSOLACHANUM, Chenopodium bonus Henricus.

CHRYSOL'ITHUS, *Chrys'olite*, from χρυσος, 'gold,' and λιθος, 'stone.' A precious stone, of a golden colour, regarded by the ancients as cardiac, cephalic, &c.

CHRYSOMELIA, see Citrus aurantium.

CHRYSOPHYL'LUM CAINI'TO, from χρυσος, 'gold,' and φυλλον, 'a leaf.' *Caïnito*, *Siderox'ylon*, *Broad-leaved Star-apple*. A tree of the

Antilles, which produces one of the best fruits of the country. There are several varieties of it.

CHRYSOPUS, Cambogia.

CHRYSOS, Gold.

CHRYSOSPERMUM, Sempervivum tectorum.

CHRYZA FIBRAUREA, Coptis.

CHTHONOPHA'GIA, *Cachex'ia Africa'na, Mala'cia Africano'rum, Pica Africano'rum, Dirt-eating*, (F.) *Mal d'Estomac*, from χθων, 'earth,' and φαγω, 'I eat.' A disorder of the nutritive functions observed amongst the negroes of the West Indies, in which there is an irresistible desire to eat earth. It is accompanied by most of the signs of chlorosis.

CHU, *Choa* or *Chus*, χυς, *Chocus*. A liquid measure amongst the Greeks, answering to the *Congius* of the Romans, and containing six sextarii, or twelve Attic cotylæ, or nine pints.—Galen.

CHURRUS. The resinous juice of *Can'nabis In'dica*, which, in certain seasons, and in warm countries, exudes and concretes on the leaves, slender stems and flowers. In it reside the narcotic powers of Indian Hemp. See Gunjah.

CHUTE, Prolapsus—*c. du Fondement*, Proctocele—*c. de la Matrice*, Procidentia uteri—*c. du Rectum*, Proctocele.

CHYLAIRE, Chylous.

CHYLAR, Chylous.

CHYLARION, Chyle.

CHYLE, *Chylus, Succus nutrit''ius*, from χυω, 'I flow.' The word, in Hippocrates, means *Tisane* or *Decoction of Barley, Chyla'rion*, χυλαριον. Galen first used it in its present sense;—i. e. for a nutritive fluid, extracted from the food by intestinal absorption; after the food has been subjected to the action of the digestive organs. It is of a whitish appearance; is separated from the chyme in the duodenum, and the rest of the small intestines: and is absorbed by the chyliferous vessels, which arise at the mucous surface of the intestine. Along these it passes through the mesenteric glands to the thoracic duct, and is finally poured into the left subclavian. It is composed, like the blood, of a coagulable part and of serum. See Chyme.

CHYLEUX, Chylous.

CHYLIFEROUS VESSELS, *Vasa Chylif'era, Venæ lacteæ, Vasa lactea*. The *Lacteals*. (F.) *Vaisseaux chylifères, V. Lactés*. Vessels which convey the chyle from the intestines to the thoracic duct.

CHYLIFICA'TION, *Chylifica'tio, Chylo'sis, Chylopoie'sis*, from *chylus*, 'chyle,' and *facere*, 'to make.' Formation of chyle by the digestive processes.

CHYLINE, Cyclamen.

CHYLISMA, Extract.

CHYLOCYSTIS, Receptaculum chyli.

CHYLODOCHIUM, Receptaculum chyli.

CHYLOG'RAPHY, from χυλος, 'chyle,' and γραφη, 'a description.' A description of the anatomy, &c. of the chyliferous vessels, &c.

CHYLOPOIESIS, Chylification.

CHYLOPOIET'IC, *Chylopoiet'icus*, from χυλος, 'chyle,' and ποιεω, 'I make.' Any thing connected with the formation of chyle. Chiefly applied to the organs immediately concerned in it; as the stomach, intestines, omenta, and mesentery. *Assistant Chylopoietic*:—those viscera which aid in the formation of chyle, as the liver and pancreas.

CHYLORRHŒA, Cœliac flux—c. Pectoris, Chylothorax—c. Renalis, Chyluria—c. Urinalis, Chyluria.

CHYLOSIS, Chylification.

CHYLOSTAG'MA DIAPHORET'ICUM MINDERE'RI. A compound prepared by distilling the *theriac of* Andromachus, the *mithridate of* Damocrates, and other alexipharmics, &c. It is nearly the same preparation as the *Aqua Theriaca'lis Bezoar'dica*.

CHYLOTHO'RAX, *Pleurorrhœ'a chylo'sa, Chylorrhœ'a Pec'toris, Hydrotho'rax chylo'sus*; from χυλος, 'chyle,' and θωραξ, 'the chest.' Effusion of chyle into the chest, owing to the rupture of a chyliferous vessel.

CHYLOUS or CHYLAR, *Chylo'sus* vel *Chyla'ris*, (F.) *Chyleux, Chylaire*. Relating to the chyle; or having some analogy with that fluid.

CHYLU'RIA, *Diabe'tes lac'tea, D. chylo'sus, Galactu'ria, Fluxus cœliacus per Renes, Pyu'ria lactea, P. Chylo'sa, Cœliaca urina'lis, C. rena'lis, Chylorrhœ'a urina'lis, Ch. rena'lis*, from χυλος, 'chyle,' and ουρον, 'urine.' (F.) *Diabète chyleux*. A discharge of milky urine, without any apparent lesion of the kidneys or bladder.

CHYLUS, Chyle, Decoction, Succus.

CHYME, *Chymus*, χυμος, 'juice,' from χυω, 'I flow.' A kind of grayish or homogeneous pulp, formed by the food, after it has been for some time in the stomach. It continues in the state of chyme as far as the biliary and pancreatic ducts, which open into the duodenum; where the conversion into chyle occurs, which is absorbed by the chyliferous vessels:—the excrementitious portion of the food traversing the large intestine to be evacuated *per anum*. Castelli asserts, that *Chyme* and *Chyle* were used in an inverse sense, by the ancients, from that accepted at present.

CHYMI, Humours.

CHYMIA, Chymistry.

CHYMIA'TER or CHIMIA'TER, from χυμια, 'chymistry,' and ιατρος, 'a physician.' *Iatro-chymicus*. A chemical physician.

CHYMIATRI'A or CHIMIATRI'A, *Iatrochymia, Ars Chymiatrica*, from χυμια, 'chymistry,' and ιατρεια, 'cure.' The art of curing by chemical means.

CHYM'ICAL or CHEM'ICAL. A medicine formed by the aid of chymistry, in contradistinction to *Galenical*.

CHYMICOPHANTA, Chymist.

CHYMICUS, Chymist.

CHYMIE, Chymistry.

CHYMIFICA'TION, *Chymifica'tio* from χυμος, 'juice,' and *facere*, 'to make.' Formation of chyme. *Chymo'sis*.

CHYM'IST or CHEM'IST, *Chymicophan'ta, Chym'icus*, (F.) *Chimiste* ou *Chymiste*. One acquainted with chymistry. In Great Britain it has, also, the signification of "one who sells chemicals."

CHYMISTE, Chymist.

CHYM'ISTRY or CHEM'ISTRY, *Chymi'a, Chimi'a, Chemeu'tice, Philosoph'ia per ignem, Spagyr'ia, Pyroteck'nia, Pyrosoph'ia, Ars hermet'ica, Archima'gia, Ars mago'rum, Ars separato'ria, Ars spagir'ica*; from χυμος, 'juice,' or from Arab. *chema*, 'a secret,' (F.) *Chimie* ou *Chymie*. A branch of the natural sciences, whose object is to investigate the principles of

bodies;—to examine the properties enjoyed by the different compounds, produced by the union of those principles; and to study the force or power, by virtue of which every combination is effected. It investigates the action between the integrant molecules or atoms of bodies.

Animal Chym'istry, Zoöch'emy or *Zoöch'ymy*, is the chymistry of substances, afforded by the dead or living animal body. This branch of chymistry has been farther subdivided into *physiological*, when it considers the changes produced in animal substances by the action of life; *pathological*, when it regards those produced by organic or other diseases. *Anthropochymy* is the chymistry of the human body. Chymistry is called *Therapeu'tical* or *Pharmaceu'tical*, when it is engaged in the analysis of simple medicines; in improving the prescribing and preparing of chemical and Galenical medicines; in the means of preparing them, and detecting adulterations, &c. *Hygien'ic Chym'istry* is that which is applied to the means of rendering habitations healthy, of analyzing the air we breathe, preventing the occurrence of disease, pointing out healthy aliments, and appreciating the influence of professions, &c. on the health of man. All these different subdivisions, with vegetable chymistry, are, at times, included under the head of *Medical Chym'istry*: at others, the term comprehends only the *Animal*, *Vegetable* and *Pharmaceutical* subdivisions.

Vital Chemistry, Biochymi'a, is that which is executed under the influence of vitality.

A knowledge of chymistry is of great importance to the physician. Many of the functions are of a chemical nature: many diseases require a chemical mode of treatment; and, without an acquaintance with it, two or more substances might be given in combination, which, by forming a chemical union, might give rise to other compounds, possessing very different virtues from the components taken singly, and thus the prescriber be disappointed in the results.

CHYMOCHEZIA, Cœliac flux.

CHYMORRHŒA, Cœliac flux, Lientery.

CHYMOSIS, Chymification.

CHYTLEN, RADIX. A cylindrical root, bitter and inodorous, brought from China. It is held by the Chinese to be stomachic.—Murray.

CHYT'LON, χυτλον, from χεω, 'I pour out.' A liquid formerly used for rubbing the body after bathing.

CIBARIUM, Aliment.

CIBA'RIUS PANIS, 'Coarse bread.' Bread made of second flour.—Celsus.

CIBA'TIO. *Trophē*, τροφη. The taking of food. In Pharmacy, it is the same as *Incorporation*.

CIBUS, Aliment—c. Albus, *Blancmanger*.

CICATRICE, Cicatrix.

CICATRIC'ULA. Diminutive of *Cicatrix*. A *small cicatrix*. The term is, also, applied to a small white spot, called the *tread*, observable at the surface of a fecundated egg. See Molecule.

CICATRISAN'TIA, *Epulot'ica, Synulot'ica, Apulot'ica, Ulot'ica*. Remedies formerly considered to be capable of producing cicatrization.

CICA'TRIX, *Cæca'trix, Ulē, Oulē*, from *cæcare*, 'to conceal,' because it conceals the wound, (F.) *Cicatrice*. The union of parts, which have been divided. A *scar* or formation, of a reddish colour, afterwards whitish, and more or less thick, which takes place at the surface of wounds or ulcers after their cure. A cicatrix may vary much in shape, consistence, and thickness. The cicatrix of a bone is called Callus. A *vic''ious cica'trix* (F.) *Cicatrice vicieuse*, is one which interferes with the action of the parts on which it occurs. The *scars*, after small-pox, are called *Pits* or *Pock-marks*, (F.) *Coutures par la petite vérole*.

CICATRIZA'TION, *Cicatrisa'tio, Epulo'sis*. The process by which a cicatrix is formed. Every tissue, except the nails, epidermis, hair, and enamel is, probably, capable of cicatrization.

CICELY, SWEET, Chærophyllum odoratum, Scandix odorata.

CICER ARIETI'NUM. The *Cicer* plant. *Erebin'thus*, (F.) *Cicérole, Pois Chiche*. The seeds are ground into flour, and used as bread in some countries.

CI'CERA TAR'TARI. Small pills of turpentine and cream of tartar—of the size of a vetch or *cicer*.

CICERBITA, Sonchus oleraceus.

CICÉROLE, Cicer arietinum.

CICHO'RIUM ENDIV'IA. The systematic name of the *Endive, Endiv'ia, Endi'va, In'tubum, In'tybum* (*Antiq.*), *Scariola, In'tybus horten'sis*, (F.) *Chicorée des Jardins, Scariole*. *Family*, Cichoraceæ. *Sex. Syst.* Syngenesia Polygamia æqualis. It is a common pot herb, and is eaten as salad.

CICHO'RIUM IN'TYBUS, *Seris, In'tubum errat'icum*. The systematic name of the *Wild Succory, Wild Cich'ory, Cich'ory, Wild Endive, Ambulei'a, Heliotro'pion, Catanan'cē, Cichoreum*, (F.) *Chicorée sauvage*. It is bitter, and was once used as a tonic. The root, roasted and ground, is often used instead of, or mixed with, coffee.

CICHORY, WILD, Cichorium intybus.

CICI, Ricinis communis.

CICINDE'LA, *Lam'pyris, Noctil'uca, Nited'ula*. The *Glow-worm*, (F.) *Ver luisant*. This insect was once thought anodyne and lithontriptic.

CICIS, see Quercus infectoria.

CICON'GIUS; an ancient measure, containing 12 pints.

CICUTA, Conium maculatum.

CICU'TA AQUAT'ICA, *Cicu'ta viro'sa, Cicuta'ria aquat'ica, Water Hemlock, Cowbane*, (F.) *Ciguë aquatique* ou *vireuse*. *Family*, Umbelliferæ. *Sex. Syst.* Pentandria Digynia. A violent poison, often eaten by mistake for the *Wild Smallage, Apium Graveolens*. It produces tremors, vertigo, burning at the stomach, and all the symptoms occasioned by the *Narcotico-Acrid* class of poisons.

CICU'TA MACULA'TA, (F.) *Ciguë d'Amérique, American water hemlock, American Hemlock, Snakeweed, Death of man, Water parsley, Poison root, Wild hemlock, Children's bane*, is analogous in botanical character, and medical properties to the European species.

CICUTA MAJOR, Conium maculatum—c. Major fœtida, Conium maculatum—c. Terrestris, Conium maculatum—c. Virosa, Cicuta aquatica—c. Vulgaris, Conium maculatum.

CICUTARIA, Chærophyllum sylvestre—c. Aquatica, Cicuta aquatica, Phellandrium aquaticum.

CIDER, *Poma'ceum*, (F.) *Cidre*. This word is said to have been, formerly, written *sidre*, and to have come from *Sicera*, σικερα, which signifies any kind of fermented liquor other than wine. It is made from the juice of apples, and, when good, is a wholesome drink.

CIDRE, Cider.

CIGNUS; an ancient measure, which contained about two drachms.

CIGUË AQUATIQUE, Cicuta aquatica—*c. d'Amérique*, Cicuta maculata—*c. d'Eau*, Phellandrium aquaticum—*c. Grande*, Conium maculatum—*c. Ordinaire*, Conium maculatum—*c. Petite*, Æthusa cynapium—*c. Vireuse*, Cicuta aquatica.

CILIA, *Blephar'ides*. The *eyelashes*. The hairs on the eyelids, (F.) *Cils*. Their use seems to be, to prevent the entrance into the eye of light bodies flying in the atmosphere; and to diminish, in certain cases, the intensity of light. Also, the tarsi. Also, a peculiar sort of moving organs, resembling small hairs, *Cil'ia vibrato'ria*, (F.) *Cils vibratils*, which are visible with the microscope in many animals. These organs are found on parts of the body, which are habitually in contact with water, or other more or less fluid matters, and produce motion in these fluids, impelling them along the surface of the parts. Cilia have been found to exist in all vertebrated animals except fishes, having been discovered on the respiratory and uterine mucous membranes of mammalia, birds, and reptiles.

The terms "*vibratory motion*" and "*ciliary motion*" have been used to express the appearance produced by the moving cilia; and it is probable, that this motion is concerned in the progression of fluids along the membranes. As yet, the motion has been observed only in the direction of the outlets of canals.

CILIAIRE, Ciliary.

CIL'IARY, *Cilia'ris*. Relating to the eyelashes, or to *cilia*, (F.) *Ciliaire*. This epithet has, also, been applied to different parts, which enter into the structure of the eye; from the resemblance between some of them (*the ciliary processes*) and the eyelashes.

Ciliary Ar'teries, *Arte'riæ cilia'res*, (F.) *Artères ciliaires*. These are furnished by the ophthalmic artery. They are distinguished into 1. *Short or posterior* (*Art. uvéales*,—Chauss.) 30 or 40 in number, which are distributed to the ciliary processes. 2. *Long*, (*Art. Iriennes* of Chauss.,) two in number, which, by the anastomoses of their branches, form two arterial circles at the anterior surface of the iris: and, 3. The *anterior*, *Arte'riæ cilia'res anterio'res* of Haller, the number of which is variable. These pierce the sclerotic a few lines from its union with the cornea; and are principally distributed to the iris.

Cil'iary Body, *Corpus Cilia'rē*, (F.) *Corps ciliaire*. A ring of the choroid surrounding the crystalline in the manner of a crown; placed behind the iris and the ciliary circle. It resembles the disk of a radiated flower, and is formed by the union of the ciliary processes.

Ciliary Ligament, or C. Circle, *Ligamen'tum cilia'rē*, *An'nulus cilia'ris*, *A. cellulo'sus*, *Com'missure of the Uvea*, *Commissure de la Choroïde*,—(Ch.,) (F.) *Ligament* ou *Cercle ciliaire*, *Cercle de la Choroïde*, *Ceinture blanche de la Choroïde*. A species of grayish ring, of a pulpy consistence, situate between the choroid, iris, and sclerotica. It seems to be nothing more than cellular tissue. The internal surface of the choroid is uniform, until it approaches within ten lines and a-half of the edge of the cornea; here a dentated line is observed, termed *ora serrata*. The outer surface presents the *an'nulus albidus* seu *gangliform'is*, the anterior edge of which unites to the inner surface of the sclerotica and constitutes the *ciliary ligament*.

Cil'iary or Tarsal Margin of the eyelids; (F.) *Bord ciliaire*, the edge in which the cilia or eyelashes are situate.

Cil'iary Motion, see Cilia.

Cil'iary Muscle, *Mus'culus cilia'ris*. The part of the orbicularis palpebrarum in the vicinity of the ciliary margin.

Ciliary Nerves (*Nerfs Iriens*,—Chauss.) (F.) *Nerfs ciliaires*. These are 12 to 16 in number. They arise from the nasal nerve, and particularly from the anterior part of the ophthalmic ganglion. They unite in two fasciculi, which pass around the optic nerve, and pierce the sclerotica near the entrance of that nerve into the eye. They are lost in the ciliary ligament.

Cil'iary Proc"esses, *Proces'sus cilia'res*, *Rad'ii cilia'res*, *Rayons sous-iriens*—(Ch.,) (F.) *Procès ciliaires*. Triangular folds, sixty or eighty in number, placed at the side of each other, and radiating, so as to resemble the disk of a radiated flower. They are lodged in depressions at the anterior part of the vitreous humour. The uses of these processes are not known.

Ciliary Striæ are numerous, pale, radiated striæ, in the posterior portion of the *Corpus ciliare*, but so covered by the *Pigmentum nigrum* as not to be distinctly seen till the paint is removed. The ciliary processes are formed by these striæ.

Ciliary Veins, (F.) *Veines ciliaires*, follow nearly the same course as the arteries. In the choroid they are so tortuous, that they have received the name *Vasa vortico'sa*. They open into the ophthalmic vein.

Ciliary Zone, *Zo'nula Cilia'ris* vel *Membran'ula Coro'næ Cilia'ris*. Under the corpus ciliare, the capsule of the vitreous humour sends off an external lamina, which accompanies the retina, and is inserted, with it, into the forepart of the capsule of the lens, a little before its anterior edge. This is the *Zonula ciliaris* or *Zonula Zinnii*. It is of a striated appearance and circular form, and assists in fixing the lens to the vitreous humour.

CILLEMENT, Nictation.

CILLO. A name given by some authors to those whose upper eyelid is perpetually tremulous;—a trembling, which in some cases is called *Life's blood*. "To have life's blood in the eye," in other words, is to have this affection. Vogel calls it *Cillo'sis*.

CILLOSIS, Cillo.

CILS, Cilia—*c. Vibratils*, see Cilia.

CIMEX, *Koris*, κορις, *Cimex lectula'rius*. The *Wall* or *House* or *Bed Bug* or *Chinche*. (F.) *Punaise*. Six or seven of these, given internally, are said to have prevented ague! There is scarcely any thing which is sufficiently disgusting, that has not been exhibited for this purpose, and with more or less success. The bug has also been esteemed emmenagogue.

CIMICIFUGA, Actæa racemosa.

CIMO'LIA PURPURES'CENS, *Terra Sapona'ria, Terra Fullon'ica, Fuller's Earth.* A compact, bolar earth, employed in the arts. Used at times as a cooling application to inflamed nipples, &c.

CIMO'LIA TERRA, *Cimo'lia alba, Smectis, Smectris, Cimo'lus;* from Κιμωλος, an island in the Cretan Sea, where it is procured. It was formerly used as an astringent, &c.—Scribonius Largus, Pliny. Probably, the same as the last.

CINA CINA, Cinchona.

CINABARIS, Hydrargyri sulphuretum rubrum.

CINABARIUM, Hydrargyri sulphuretum rubrum.

CINARA HORTENSIS, Cynara scolymus.

CINCHO'NA. So called from the Spanish Viceroy's Lady, the Countess de Cinchon, who was cured of fever by it at Lima, about 1638. Called also *Cortex* or *Pulvis Jesuit'icus, Jesuit's Bark* or *Powder, Cortex Patrum*, because it was introduced into Europe by the Jesuits; and also *Pulvis Comitis'sæ* or the *Countess's Powder*, and *Cardinal del Lugo's Powder, Cortex Cardina'lis de Lugo*, because he introduced it at Rome. It is the pharmacopœial name of several kinds of barks from various species of the Cinchona, from the western coast of South America. *Nat. Order*, Cinchonaceæ. *Sex. Syst.* Pentandria Monogynia. Called, also, *Cortex, Bark, Peruvian Bark, English Remedy, Cortex Chinæ, Cortex Chinæ Regius, China, Chinchi'na, Palos de Calentura, Kina Kina, (Bark of Barks,) Kinkina, Cina Cina, Quina Quina, Quinqui'na, Magnum Dei donum.* (F.) *Quinquina.*

CINCHO'NÆ CARIBÆ'Æ CORTEX, from *Exoste'ma Caribæ'um, Caribæan Bark;* the *Saint Lucia Bark*, (F.) *Écorce de Saint Lucie, Quinquina Piton*, from *Exostoma floribundum*, and the *Pitaya Bark, Quinquina bicolor*, from an exostema (?) or from strychnos pseudoquina (?), are useful substitutes for the cinchona of Peru. These are the most important spurious barks. They contain neither quinia nor cinchonia.

CINCHONÆ CORDIFO'LIÆ CORTEX, *Cortex flavus, Cinchonæ officina'lis cortex flavus, Yellow Bark, Calisaya Bark.* (F.) *Quinquina jaune* ou *jaune royal, Calasaya.* Odour aromatic; taste strong, bitter, astringent. Not rolled; often without the epidermis, which is very thick and inert: light, friable; fracture fibrous. Active principle *Quinia.*

CINCHONÆ LANCIFO'LIÆ CORTEX, *Cortex Peruvia'nus, Cortex pal'lidus, Cinchonæ officina'lis cortex commu'nis, Cinchona pallida*—*Pale Bark, Loxa Bark, Crown Bark.* (F.) *Quinquina gris de Loxa, Quinquina Orange.* Its odour is aromatic; taste pleasant, bitter, and astringent. The pieces are rolled in double or single quills. Epidermis brown, cracked; fracture resinous. Internally of a cinnamon colour. Its active principle is *Cinchonia.*

CINCHONÆ OBLONGIFO'LIÆ CORTEX, *Cortex ruber, Cinchonæ officina'lis cortex ruber. Red Bark*, (F.) *Quinquina rouge.* Odour and taste the same as the pale, but more intense: in large flat pieces, solid, heavy, dry: fracture short and smooth; of a deep brownish-red colour. Although this variety of bark is assigned to the Cinchona oblongifolia by some, it would seem, that nothing is certainly known as to its source. Active principles, *Cinchonia* and *Quinia.*

The last three are the only officinal varieties in the Pharmacopœia of the United States. There are many other varieties, however, which are genuine cinchona barks, and yet have not been considered worthy of an officinal position. The Edinburgh Pharmacopœia admits, indeed, *Cinchona cinerea, Gray bark, Silver bark*, or *Huanuco bark*, which is obtained around Huanuco in Peru, and belongs to the class of pale barks. Amongst the genuine but inferior barks are those brought from the northern Atlantic ports of South America, which, in commerce, are variously called *Carthagena, Maracaybo* and *Santa Martha barks.*

CINCHONA OFFICINALIS, (CORTEX FLAVUS,) Cinchonæ cordifoliæ cortex—c. Pallida, Cinchonæ lancifoliæ cortex—c. of Virginia, Magnolia glauca.

All these barks are bitter, astringent, tonic, and eminently febrifuge. The yellow bark is at least equal to any of the others, although the red contains more active principle. The discovery of their active principles is one of the most important gifts of modern chymistry. Still, in pernicious intermittents, the bark, in substance, is often demanded. It is employed in every disease in which there is deficient tone, but in cases where the stomach is much debilitated, the powder had better be avoided, in consequence of the woody fibre, which might disagree. Externally, it is used in enemata, gargles, &c., and in gangrenous ulcerations. When it excites nausea, an aromatic may be added to it; if purging, opium; if costiveness, rhubarb, &c. Dose, ʒss to ʒj or more.

ESSENTIAL SALT OF BARK, as it is called, is an extract prepared, by macerating the bruised substance of bark in cold water, and submitting the infusion to a very slow evaporation.

CINCHONIA, Cinchonine.

CINCH'ONINE, *Cinchoni'na, Cinchonin, Cincho'nia.* The active principle of the *Cincho'na lancifo'lia.* An organic, crystalline alkali; of a white colour, and bitter, slightly astringent taste; very soluble in alcohol and ether, but almost insoluble in water.

Sulphate of Cinchonia, which is formed directly from cinchonia, is soluble in water and alcohol. The action of the sulphate of cinchonia is similar to that of the sulphate of quinia; but it is less energetic, and consequently requires to be given in a stronger dose.

CINCHONINE, TARTRATE OF, see Quinine, tartrate of.

CINCIN'NULUS. A little lock or curl of hair.

CINCIN'NUS. A curled or frizzled lock. The hair on the temples.

CINC'LISIS, κιγκλισις, *Cinclis'mus*, κιγκλισμος, 'agitation; rapid and frequent motion.' The movement of the thorax in dyspnœa.—Hippocr. It has been used, also, synonymously with nictation, (q. v.)

CINE'MA, *Cine'sis*, from κινεω, 'I move.' Motion.

CINERARIA MARITIMA, Achaovan, Abiat.

CINERES CLAVELLATI, see Potash—c. Gravellati, see Potash—c. Russici, Potash of commerce.

CINEREUS, Cineritious.

CINERI''TIOUS, *Ciner'eus*, from *cineres*, 'ashes;' (F.) *Cendré.* Of the colour of ashes,

The *cortical substance* of the brain has, by some, been so called. See Cortex Cerebri.

CINESIS, Cinema, Motion.

CINETH'MICS, from κινεω, 'I move.' The science of movements in general.

CINET'ICA. Same etymon. Diseases affecting the muscles, and characterized by irregular action of the muscles or muscular fibres, commonly demominated *Spasm*. The 3d order in the class *Neurotica* of Good.

CINETUS, Diaphragm.

CINGULARIA, Lycopodium.

CIN'GULUM, *Zone*, from *cingo*, 'I *bind*.' (F.) *Ceinture*. The part of the body, situate below the ribs, to which the girdle is applied. The *waist*.

Cin'gulum Hilda'ni, *Zo'nula Hilda'ni*. (F.) *Ceinture de Hildane*. A leathern girdle formerly used for the reduction of luxations and fractures of the extremities.

Cin'gulum Mercuria'lē, *C. Sapien'tiæ*, *C. Stulti''tiæ*. A woollen girdle, containing mercurial ointment It was used as an antisyphilitic, and in diseases of the skin. (F.) *Ceinture de vif argent*.

Cingulum Sancti Joannis, Artemisia vulgaris.

CINIS FÆCUM, see Potash—c. Infectorius, see Potash.

CINNABARIS, Hydrargyri sulphuretum rubrum—c. Græcorum, see Calamus rotang.

CINNAMOMUM, Laurus cinnamomum—c. Album, Canella alba—c. Aromaticum, see Laurus cinnamomum—c. Culilawan, Laurus Culilawan—c. Indicum, Laurus cassia—c. Malabaricum, Laurus cassia—c. Zeylanicum, Laurus cinnamomum.

CINNAMON, see Laurus cinnamomum—c. Malabar, Laurus ca-sia—c. Wild, Laurus cassia.

CINON'OSI, from κινεω, 'I move,' and νοσος, 'a disease.' Diseases of motion.

CINOPLANE'SIS, from κινεω, 'I move,' and πλανησις, 'a wandering about.' Irregularity of motion.

CINQUEFOIL, Potentilla reptans.

CINZILLA, Herpes zoster.

CION, Uvula.

CI'ONIS. The *Uvula* (q. v.) Also, tumefaction, or elongation of the uvula; *Staphylodial'ysis*.

CIONI'TIS, from κιονις, 'the uvula,' and *itis*, 'inflammation.' Inflammation of the uvula, *uvuli'tis*. (q. v.)

CIPIPA, see Jatropha manihot.

CIRCÆ'A LUTETIA'NA, '*Parisian Circæa*,' from Circe, the enchantress; *Enchant'ers' Nightshade*, (F.) *Herbe de Saint Etienne*, *Herbe aux Sorciers*. This plant, common in the vicinity of Paris, was formerly considered to be resolvent and vulnerary It was also supposed to possess wonderful magical and enchanting properties.

CIRCLE. CILIARY, Ciliary ligament.

CIRCOCELE. Cirsocele.

CIRCONCISION, Circumcision.

CIRCONFLEXE. Circumflexus.

CIRCONSCRIT. Circumscribed.

CIRCONVOLUTION, Convolution.

CIRCUIT, *Circuitus*; in pathological language, generally means 'period,' 'course.'

CIRCUITUS, Period, Circuit.

CIR'CULAR. *Circula'ris*, from *circulus*, 'a circle.' (F.) *Circulaire*. Having the form or figure of a circle; as *Circular Amputation*, &c.

The French use the expression "*Une circulaire*," for a *turn* of a bandage around any part.

CIRCULA'TION, *Circula'tio*, *Cyclophor'ia*, from *circulus*, 'a circle:' or rather, from *circum*, 'around,' and *ferre*, *latum*, 'to carry.' (F.) *Circulation*. Physiologists give this name to the motion of the blood through the different vessels of the body:—to that function, by which the blood, setting out from the left ventricle of the heart, is distributed to every part of the body by the arteries;—proceeds into the veins, returns to the heart, enters the right auricle, and passes into the corresponding ventricle, which sends it into the pulmonary artery to be distributed to the lungs, whence it issues by the pulmonary veins, and passes into the left auricle. From this it is sent into the left ventricle, and is again distributed by means of the arteries.

Circula'tion, Cap'illary, *C. des Parenchymes*, is that which takes place in the capillary vessels; and which is, in some measure, independent of the action of the heart. It is in this capillary circulation, that the various secretions are effected; and that animal heat is evolved. It is the seat of nutrition.

Circulation, Pulmon'ic or lesser, is the circle from the right to the left side of the heart by the lungs.—The greater or systemat'ic or systemic, is that through the rest of the system.

CIRCULATOR, Charlatan.

CIR'CULUS. A circle or ring; *Cyclus*, *Cirios*, (F.) *Cercle*. Any part of the body which is round or annular, as *Cir'culus Oc'uli*—the *globe*, *bulb*, or *orb of the eye*.—Hippocr., Galen. It is, also, applied to objects, which by no means form a circle,—as to the *Circle of Willis*, which is an *anastomotic circle* at the base of the brain, formed by the carotid and basilary arteries.

Circulus Anterio'sus I'ridis. The artery which runs round the iris, and forms a circle.

Circulus Membranosus, Hymen.

Circulus Quad'ruplex; a kind of bandage used by the ancients.

CIRCUMAGENTES, Oblique muscles of the eye.

CIRCUMCAULALIS MEMBRANA, Conjunctiva.

CIRCUMCIS'ION. *Circumcis'io*, *Posthet'omy*, *Præcis'io*, *Abscis'io Præpu'tii*, *Circumcisu'ra*, *Circumsec'tio*, *Perit'omē*, from *circum*, 'around,' and *cædere*, 'to cut.' (F.) *Circoncision*. An ancient operation, performed by some nations as a religious ceremony. It consists in removing, circularly, a portion of the prepuce of infants:—a custom, which was probably suggested with a view to cleanliness. In cases of extraordinary length of prepuce, or when affected with disease, the operation is, sometimes, undertaken by surgeons. A similar operation is performed amongst the Ægyptians, Arabians, and Persians, on the female, by removing a portion of the nymphæ.

CIRCUMCISURA, Circumcision.

CIRCUMDUCTIO, Perisphalsis.

CIRCUMDUCTIONIS OPIFEX, Obliquus superior oculi.

CIRCUMFLEX, *Circumflex'us*, from *circum*, 'around,' and *flexus*, 'bent.' (F.) *Circonflexe*. Curved circularly. A name given to several organs.

Circumflex or Articu'lar Ar'teries of

the arm are distinguished into;—*anterior* and *posterior*. They arise from the axillary, and are distributed around the shoulder.

Circumflex Arteries of the Thigh are distinguished into *external* and *internal* (*A. Sous-trochantériennes*—Ch.) They are given off from the *Profunda*, and surround the head of the thigh bone.

Circumflex Muscle, *Circumflexus Mus'culus*, *Tensor Pala'ti*, *Peristaphyli'nus exter'nus* vel *infe'rior*, *Circumflex'us Pala'ti Mollis*, *Spheno-salpin'go staphyli'nus* seu *Staphyli'nus exter'nus*, *Mus'culus tubæ novæ*, *Pala'to-salpingeus*, *Pter'ygo-staphyli'nus*, *Petro-salpin'go-staphyli'nus*, *Spheno-pter'ygo-palati'nus*, (F.) *Palato-salpingien*. A muscle, which arises from the spinous process of the sphenoid bone, and is inserted into the *velum pendulum palati*. Its use is to stretch the velum.

Circumflex Veins follow the arteries.

CIRCUMFORANEUS, Charlatan.

CIRCUMFU'SA. Hallé has thus designated the first class of subjects that belong to Hygiène—as atmosphere, climate, residence, &c.; in short, every thing which acts constantly on man externally and generally.

CIRCUMLIT'IO, from *circumlino*, 'I anoint all over,' *Peri'chrisis*, *Perichris'ton*. A term formerly used for liniments, but especially for those applied to the eyelids.

CIRCUMOSSALE, Periosteum.

CIR'CUMSCRIBED, *Circumscrip'tus*, (F.) *Circonscrit*. A term applied, in Pathology, to tumours, which are distinct at their base from the surrounding parts.

CIRCUMSECTIO, Circumcision.

CIRE JAUNE ET BLANCHE, Cera flava et alba—*c. des Oreilles*, Cerumen.

CIRIOS, Circulus.

CIRON, Acarus, Psora.

CIRRAGRA, Plica.

CIRRHOSE DU FOIE, Cirronosis.

CIRRHO'SIS, *Cirrono'sis*, *Kirrhono'sis*, from κιρρος, 'yellow.' A yellow colouring matter, sometimes secreted in the tissues, owing to a morbid process. Also called *Cirrho'sis* or *Kirrho'sis*. It is not uncommon in the liver, when it is called, also, *gran'ulated*, *gran'ular*, *mam'millated*, *tuber'culated*, and *hob-nailed liver*, (F.) *Cirrhose du Foie*.

Cirrhosis of the Lung. Dr. Corrigan has described a condition of the lung under this name, the general characters of which have a tendency to consolidation or contraction of the pulmonary tissue, with dilatation of the bronchial tubes.

CIR'SIUM ARVEN'SE, *Car'duus hemorrhoïda'lis*, *Ceano'thos*, (F.) *Chardon hémorrhoïdal*. A common plant used in France in the form of cataplasm in hemorrhoids; and worn as an amulet.

CIRSOCE'LE, *Cir'coce'lē*, from κιρσος, 'varix,' and κηλη, 'hernia.' *Var'icose Her'nia*. The greater part of authors have employed the term synonymously with *Varicocele*, (q. v.) Fott gives it a different signification. *Varicocele*, he calls the tumour formed by the veins of the scrotum; *Circocele*, *Funic'ulus varico'sus*, the varicose dilatation of the spermatic veins. The scrotum feels as if it contained earthworms. It is commonly an affection of no consequence, demanding merely the use of a suspensory bandage.

CIRSOÏ'DES, from κιρσος, 'varix,' and ειδος, 'resemblance.' Varicose, or resembling a varix. Rufus of Ephesus, according to James, applies this term to the upper part of the brain, as well as to the spermatic vessels. (?)

CIRSOM'PHALUS, from κιρσος, 'varix,' and ομφαλος, 'navel.' Varicose dilatation of the veins surrounding the navel. The term, has, likewise, been applied to the aneurismal dilatation of the arteries of that region; called also, *Varicomph'alus*, (F.) *Hargne anévrysmale*, *Aneurismal Hernia*.

CIRSOPHTHAL'MIA, from κιρσος, 'varix,' and οφθαλμος, 'the eye;' *Var'icose ophthal'mia*, *Ophthalmia varico'sa*, *Varicos'itas conjuncti'væ*. A high degree of ophthalmia, in which the vessels of the conjunctiva are considerably injected.

CIRSOT'OMY, *Cirsotom'ia*, from κιρσος, 'a varix,' and τομη, 'an incision.' Any operation for the removal of varices by incision.

CIRSUS, Varix.

CISEAUX, Scissors.

CISSA, Malacia.

CISSAMPELOS, Pareira brava.

CISSARUS, Cistus creticus.

CISSI'NUM, κισσινον, from κισσος, 'ivy.' Name of a plaster of ivy, used in wounds of the nerves or tendons.—Paulus of Ægina.

CISSOIDES, Capreolaris.

CISSOS, Hedera helix.

CIST'ERN, LUMBAR, see Cisterna.

CISTER'NA, from κιστη, (L.) *Cista*, 'a chest.' (F.) *Citerne*. This term has been applied to various parts of the body, which serve as reservoirs for different fluids. The fourth ventricle of the brain has, also, been so called.—Arantius.

Cistern, Lumbar, *Cister'na lumba'ris* or *Res'ervoir of Pecquet*, consists of a dilatation, which the thoracic duct presents in the lumbar region. See Receptaculum chyli.

CISTHORUS, Cistus creticus.

CISTUS CANADENSIS, Helianthemum Canadense.

CISTUS CRETICUS, *Cis'thorus*, *Cissarus*, *Dorycin'ium*, *Gum Cistus*. *Sex. Syst.* Polyandria Monogynia. The systematic name of the plant whence the *Lab'danum* or *Lad'anum* is obtained—*Gum'mi Lad'anum*. *Lad'anum* is a gum-resinous substance, of a very agreeable smell, found in the shops in great masses. Its colour is blackish-green; taste, warm and bitter. It is but little used now. Formerly, it was a component of warm plasters, and was prescribed internally as a stomachic. Ladanum is also obtained from *Cistus ladanif'erus*, and *C. laurifo'lius*.

CISTUS, GUM, Cistus creticus.

CITERNE LOMBAIRE, Receptaculum chyli.

CITHARUS, Thorax.

CITRAGO, Melissa.

CITRARIA, Melissa.

CITREA MALUS, see Citrus medica.

CITREOLUS, Cucumis sativus.

CIT'RIC ACID, *Acidum cit'ricum*, *Acid of Lemons*, *Ac'idum Limo'num*, (F.) *Acide citrique*. This acid is found in the lemon, orange, &c. It is in rhomboidal prisms, which slightly effloresce on exposure to the air. It dissolves in a twelfth part of its weight of boiling water, and has an extremely acid but agreeable taste.

It is employed in medicine as antiseptic, refrigerant and diuretic. Rubbed up with sugar and with a little of the essence of lemon, it forms the *dry Lemonade*, (F.) *Limonade sèche*.

CITRON, see Citrus medica—c. Tree, see Citrus medica.

CITRONELLE, Artemisia abrotanum, Melissa.

CITRUL, SICILIAN, Cucurbita citrullus.

CITRULLUS, Cucurbita citrullus.

CITRUS, see Citrus medica.

Citrus Auran'tium. The systematic name of the *Orange Tree*, *Auran'tium*, *A. Hispalen'sĕ*, *Malus Auran'tia Major*, *Malus Auran'tia*, *Auran'tium vulga'rĕ*, *Malus Auran'tia vulga'ris*. *Ci'trus vulga'ris*. *Nat. Ord.* Aurantiaceæ. *Sex. Syst.* Polydelphia Icosandria. The fruit are called *Mala Aurea*, *Chrysome'lia*, *Neran'tia*, *Martia'na Poma*, *Poma Auran'tia*, *Auran'tia Curassavica*, *Oranges*, *Poma Chinen'sia*. The *Flowers of the Orange*, *Flores Naphæ*, are highly odoriferous, and used as a perfume. On distillation, they yield a small quantity of essential oil—*Oleum* vel *Essen'tia Nero'li*. They were once used in convulsive and epileptic cases. The leaves, *Fo'lia Auran'tii*, have a bitterish taste, and furnish an essential oil. They have been used for the same purposes as the flowers. The yellow rind of the fruit, *Cortex Auran'tii*, *Orange Peel*, is an aromatic bitter, and is used in dyspepsia, and where that class of remedies is required. The *Juice*, *Succus Auran'tii*, *Orange juice*, is a grateful acid, and used as a beverage in febrile and scorbutic affections.

Citrus Med'ica, *C. Limo'num*. The systematic name of the *Lemon Tree*. The *Lemon*, *Limo'num malum*, *Limonum Bacca*, *Malus Med'ica*, *Malus Limo'nia Ac''ida*, *Limon*, *Cit'rea Malus*, *Citrus*, (F.) *Citron*, has a fragrant odour, depending upon the essential oil, *O'leum Limo'nis*, of the rind. The juice, *Succus Limo'nis*, is sharp but gratefully acid, the acidity depending upon the citric acid it contains. The outer rind, *Cortex Limo'num*, *Lemon Peel*, *Zest*, *Flave'do Cor'ticum Citri*, is used in the same cases as the *Cortex Auran'tii*. The *juice* is given as a refrigerant beverage in febrile affections. Alone, or combined with wine, it is prescribed in scurvy, putrid sore throat, &c. Its general properties are refrigerant and antiseptic. Sweetened and diluted, it forms a *Lemonade*.

Citron Tree is likewise considered to belong to the same species—*Citrus Med'ica*. Its fruit is called *cedrome'la*. It is larger and less succulent than the lemon. *Citron juice*, when sweetened with sugar, is called by the Italians *Agro di Cedro*.

Citrus Mella Rosa of De Lamarck, another variety of *Citrus Medica*, affords the Bergamote, (which see.)

Citrus Vulgaris, Citrus Aurantium.

CITTA, Malacia.

CITTARA, MINERAL WATERS OF. These springs are in the Isle of Ischia, near the sea. They contain carbonate and sulphate of lime, and chloride of sodium. Their temperature is 100° Fahrenheit.

CITTOS, Hedera helix.

CITTOSIS, Chlorosis, Malacia.

CIVET'TA, *Zib'ethum*, *Civ'et*, (F.) *Civette*. An unctuous perfume, of a very penetrating odour, obtained from different mammalia of the *Viver'ra* kind, particularly from the *Viver'ra civet'ta*. It is contained in a fold of the skin, situate between the anus and the organs of generation.

CLABBERGRASS, Galium verum.

CLADISCOS, Ramusculus.

CLADONIA ISLANDICA, Lichen islandicus.

Clado'nia Rangiferri'na. The ancients regarded this European plant as pectoral and stomachic. It enters into the composition of the *Poudre de Chypre*.

CLADOS, Ramus.

CLADRAS'TIS TINCTO'RIA, *Virgil'ia*, *Yellow Ash*, *Fustic Tree*, *Yellow Locust*. An indigenous tree, which flourishes from Kentucky to Alabama. The bark of the tree and the roots is cathartic.

CLAIRET, Claret.

CLAIRVOYANCE, (F.) 'Clear-seeing.' A clearness of sight, said to be communicated by animal magnetism, which not only enables the *magnetized* person to see in the dark, through stone walls, &c., but even to observe prospects, whilst he fancies he is flying in the air, which he has never seen previously. It need hardly be said, that the possession of such powers is fabulous.

CLAMMY WEED, Polanisea graveolens.

CLANGOR, Paraphonia.

CLAP, Gonorrhœa impura.

CLAPIER, (F.) A clapper, *Latib'ulum*, from κλεπτειν, 'to conceal.' A purulent *foyer* of disease; concealed in the flesh or under the skin. See Sinus.

CLAPWORT, Orobanche Americana.

CLAR'ET, (*Vin clair* [?]) *Clare'tum*, *Vin de Bordeaux*. (F.) *Clairet*. A pleasant French wine, which may be used, whenever wine is required. Also, a wine impregnated with spice and sugar, called likewise *Vinum Hippocrat'icum*, or *Potus Hippocrat'icus*, *Hip'pocras*, *Hyp'pocras*. Schröder speaks of a *Clare'tum alterans*, and a *C. purgans*.

CLARETA, Albumen ovi.

CLARETUM, Claret.

CLARIFICA'TION, *Clarifica'tio*, *Depura'tion*, from *clarus*, 'clear,' and *facio*, 'I make.' A pharmaceutical operation, which consists in separating from a liquid every insoluble substance held in suspension by it, that affects its transparency. *Decanting* and *filtering* are the operations necessary for this purpose.

CLARY, COMMON, Salvia sclarea.

CLASIS, Fracture.

CLASMA, Fracture.

CLASS, *Clas'sis*, (F.) *Classe*. An assemblage of a certain number of objects. In *Natural History* and in *Medicine*, a class is a group of objects or individuals having one or more common characters. The *classes* are divided into *orders*, the *orders* into *genera*, the *genera* into *species*, and these last into *varieties*.

CLASSIFICA'TION, *Classifica'tio*, from *classis*, 'a class,' and *facio*, 'I make.' The formation of classes. A methodical distribution of beings, or any objects whatever into classes, orders, genera, species, and varieties. See Nosography and Nosology.

CLASSY, MINERAL WATERS OF. Classy is near Laon in Picardy, France. The waters are chalybeate.

CLAUDICA'TION, *Claudica'tio*, from *claudicare*, 'to be lame.' The act of halting or limping. *Lameness*, *Clau'ditas*, *Cholo'sis* (q. v.)

Cholei'a, Cholo'ma. (F.) *Claudication, Boîtement.* This condition is not any particular disease, but is produced by different causes or affections. It may be the effect of the shortening or elongation of one of the lower limbs, of anchylosis of the joints, palsy of the muscles, pain, &c.

CLAUDITAS, Claudication.

CLAUSTRUM GUTTURIS, Isthmus of the fauces—c. Palati, Velum pendulum palati—c. Virginitatis, Hymen.

CLAUSU'RA, from *claudere*, 'to shut.' An imperforation of any canal or cavity.

Clausu'ra Uteri. Preternatural imperforation of the uterus.

CLAVA MYOSA, Acorus calamus.

CLAVALIER A FEUILLES DE FRÊNE, Xanthoxylum clava Herculis.

CLAVA'RIA CORALLOÏ'DES, *Coralloïdes Fungus, Coralwort.* Said to be corroborant and astringent. A kind of clavaria, called *Digital blanc, Digital humain, Champignon de l'appareil des fractures*, formed of digitations, grouped together, and two or three inches in length, is said to have been often found, formerly at the *Hôtel Dieu* of Paris, on the splints of white wood used in the treatment of fractures, in autumn.—H. Cloquet.

CLAVATIO. Gomphosis.

CLAVES CALVARIÆ, Wormiana ossa.

CLAV'ICLE, *Clavic'ula, Claris, Clavic'ulus, Lig'ula, Fur'cula, Os Jug'uli, Cleis, Clei'dion*, from *clavis*, 'a key,' (F.) *Clavicule.* The *collar-bone.* The clavicle is shaped like the letter *S*, and is placed transversely at the upper part of the thorax. It is articulated, at one extremity, with the sternum; at the other with the acromion process of the scapula. It gives attachment, *above*, to the *Sterno-cleido-mastoideus; below*, to the *Subclavius; before*, to the *Pectoralis major* and *Deltoides;* and *behind*, to the *Trapezius.* It serves as a point of support for the muscles of the arm, and protects the vessels and nerves passing to that extremity.

The fibres, connecting the lamellæ or plates of bones, have also been called *Clavic'uli* or *Nails.*

CLAVICULE, Clavicle.

CLAVIS, Clavicle, Key—c. Anglica, Key—c. Secalinus, Ergot—c. Secalis, Ergot.

CLAVUS. A nail, *Helos, Gomphos*, (F.) *Clou.* This word is employed in medicine in various senses. It means, 1. A *Corn*, (q. v.) from its resemblance to the head of a nail. 2. Certain condylomatous excrescences of the uterus. 3. A callous tumour, which forms on the white of the eye, and resembles a nail, the *Clavus Oc'uli*, (F.) *Clou de l'œil.* This last, by some, is considered to be synonymous with staphyloma; by others, with staphyloma of the cornea. Also, the Penis.

Clavus Hysteri'cus, *Monopa'gia*, (F.) *Clou hystérique.* An acute pain, confined to a small point of the head, described by the sick as resembling that which would be produced by a nail driven into the head. It has been particularly noticed in hysterical females, hence its name. It is called *Onum hyster'icum*, when the pain occupies a greater extent.

Clavus Siliginis, Ergot.

CLEANSINGS. Lochia.

CLEAR-SEEING, *Clairvoyance.*

CLEAVAGE; from Anglo-Saxon cleofan, 'to split.' The natural line of separation exhibited by certain substances, as minerals, when subjected to mechanical force. Recently, the term has been applied to the separation of muscles into longitudinal and circular striæ, when mechanical violence is used.—Bowman.

CLEAVERS, Galium aparine.

Cleavers' Bees, Galium aparine.

CLEAVEWORT. Galium verum.

CLEF DU CRANE, Wormianum os—*c. de Garengeot*, Key—*c. à Noix*, see Key—*c. à Pivot*, see Key—*c. à Pompe*, see Key.

CLEIDAGRA, Cleisagra.

CLEIDION, Clavicle.

CLEIDO-COSTAL, Costo-clavicular.

CLEI'DO-MASTOIDEUS. Albinus thus designates the posterior portion of the sterno-cleido-mastoideus, (q. v.) which he considers a separate muscle. It has been corrupted into *cleno-mastoideus.*

CLEIS, Clavicle, Key.

CLEIS'AGRA, *Cleid'agra*, from κλεις, 'the clavicle,' and αγρα, 'a seizure.' Gout in the clavicle.—A. Paré.

CLEMATIS DAPHNOIDES MAJOR, Vinca minor.

Clem'atis Erect'a, *Flam'mula Jovis, Upright Virgin's Bower*, (F.) *Clematite droite.* *Family* Ranunculaceæ. *Sex. Syst.* Polyandria Polygynia. The leaves contain an acrid principle. They have been esteemed anti-venereal; and, in the form of powder, have been used as escharotic.

Clematis Vital'ba, *Vital'ba, Vior'na, Atra'genë, Trav'eller's Joy, Common Virgin's Bower*, (F.) *Clematite, Herbe aux gueux, Aubevigne.* It has been used in the same cases as the former. In infusion it has been applied in cases of itch.

The leaves of Clematis Crispa—c. Flammula, or *sweet-scented Virgin's bower*—c. Virgin'ica, or *common Virgin's bower*—and c. *Viorna, leather-flower*, have similar properties.

CLEMATITE, Clematis vitalba—*c. Droite*, Clematis recta.

CLEO'NIS COLLYR'IUM. A collyrium described by Celsus, composed of equal parts of Samian earth, myrrh, and thus, mixed with white of egg.

Cleo'nis Gluten. An astringent formula of myrrh, frankincense, and white of egg.

CLEP'SYDRA, from κλεπτω, 'I conceal,' and υδωρ, 'water.' An instrument contrived by Paracelsus to convey fumigations to the uterus.

CLEVES, MINERAL WATERS OF. This spring is a quarter of a league from Cleves in Westphalia. It contains carbonate and sulphate of iron.

CLIFFWEED. Heuchera cortusa.

CLIFTON, CLIMATE OF. The vicinity of Clifton and of Bristol, England, appears to be the mildest and driest climate in the west of England; and, consequently, the best winter residence, in that part of the country, for invalids. It is, also, a favourable summer climate, and is surrounded by numerous places of agreeable resort, suited for those who may pass the season there.

CLIGNEMENT, Nictation.

CLIGNOTEMENT, Nictation.

CLIMA, Climate.

CLIMACTERIC, *Climacter'icus* or *Climater'icus*, from κλιμαξ, κλιμακτηρ, 'a step,' (F.) *Climactérique* ou *Climatérique.* A word, which properly sig-

nifies, by degrees. It has been applied to certain times of life, regarded to be critical.

At present the word *Climacteric* is chiefly applied to certain periods of life, at which great changes occur, independently of any numerical estimate of years. Such are the period of puberty, in both sexes; that of the cessation of the menses in women, &c.

Climacteric Years, *Anni Climacterici*, are, according to some, all those in the life of man, which are multiples of the number 7, *Septenniads*. Others have applied the term to years, resulting from the multiplication of 7 by an odd number. Some have admitted only three *climacterics;* others, again, have extended them to multiples of 9. Most, however, have considered the 63d year as the *Grand Climacteric;*—63 being the product of the multiplication of 7 by 9; and all have thought that the period of three, seven, or nine, which they respectively adopted was necessary to the entire renewal of the body; so that there was, at these times, in the economy, none of the parts of which it had previously consisted. The climacteric years, have also been called, (*Anni*) *hebdomad'ici, scala'res, grada'rii, scand'siles, genethliaci, natali''tii, futa'les, crit'ici, decreto'rii, hero'ici*, &c. The whole of the notions on the subject are essentially allied to the doctrine of numbers of Pythagoras.

CLIMATE, *Clima*, (F.) *Climat*. Gr. κλιμα, 'a region.' In geography, the word *climate* is applied to a space on the terrestrial globe, comprised between two circles parallel to the equator, and arbitrarily measured according to the length of the days In a hygienic point of view, we understand by *climate*, since Hippocrates, a country or region, which may differ from another in respect to season, qualities of the soil, heat of atmosphere, &c. Climate, indeed, embraces, in a general manner, all the physical circumstances belonging to each region,—circumstances which exert considerable influence on living beings The dark complexion e. g. of the inhabitants of the torrid zone is easily distinguishable from the paleness of those of the frigid,—so are the diseases. They are all modified, more or less, by climate or locality. Hot climates predispose to abdominal complications in febrile affections, cold climates to thoracic, &c.

One of the most important considerations with regard to climates, is their comparative fitness for the residence of invalids, and especially of those who are liable to, or suffering under catarrhal or consumptive affections. The great object, in such cases, is to select a climate which will admit of regular and daily exercise in the open air, so that the invalid may derive every advantage which this form of revulsion is capable of effecting. To an inhabitant of the northern and middle portions of the United States—and the same applies to Great Britain, France, and the northern parts of the old world—a more southern climate alone affords these advantages in an eminent degree. During the summer months, there are few, if any, diseases, which require a milder climate than that of the United States, or of the milder districts of Europe. The temperature of the winter months is, consequently, the most important object of attention. Equability of temperature is essential, inasmuch as all sudden changes interfere with the great desideratum—exercise in the open air. In the whole continent of North America the changes are very sudden and extensive. It is not uncommon for the range to be 40°, between two successive days. So far, therefore, as this applies, the American climate is not well adapted to the invalid. In the southern portions, however, of the Union, this objection is counterbalanced by many advantages.

The following Tables exhibit the mean temperature of the year, and of the different seasons—with the mean temperature of the warmest and coldest months at different places in America, Europe, Africa, &c., as deduced from the excellent paper of Von Humboldt on Isothermal Lines, the Meteorological Registers kept by the surgeons of the United States army, the work of Sir James Clark on Climate, &c.

The subsequent tables show the mean monthly temperature, maximum, minimum, and range, as well as the greatest daily, and mean daily range during the corresponding months—but of different years—at some of the prominent retreats for the valetudinarian, in Great Britain, on the continent of Europe, and in the African islands. It is proper, however, to remark, that in no situations, except in those to which an asterisk is affixed, was the register thermometer used. In the others, the observations were made during the *day* only, and consequently the numbers given are far below the real range throughout the twenty-four hours. The places are ranged in the order of their mean temperature.

In the United States, the most favourable region for the phthisical invalid is that of Florida,—especially of Pensacola. St. Augustine is frequently chosen, but is liable to north-east storms, which interfere with the movements of the valetudinarian, and are the source of much discomfort. Still, great benefit has often been derived from it as a winter retreat. Of the Atlantic Isles, Madeira appears to be best adapted for the consumptive, and those affected with chronic bronchitis. In Italy, Rome and Pisa,—and in England, Torquay and Undercliff, are to be preferred. Chronic rheumatism and gout are benefited by a warm climate, which, again, is unfavourable to those who are predisposed to cerebral diseases, especially to diseases that are characterized by debility and mobility of the nervous system—as paralysis, epilepsy, mania, &c. Hypochondriasis and dyspepsia require rather change of climate and travelling exercise than a sojourn in any one. (See the Author's Human Health, Philad. 1844.)

For the mortality of different countries and cities, see Mortality.

CLIMATERIC, Climacteric.

CLIMATIC, *Climat'icus*. Belonging to, or dependent upon climate.

Climatic Diseases, *Morbi climat'ici*, are such as are caused by climate.

CLINE, κλινη, 'a bed.' Hence:

CLIN'ICAL, *Clin'icus*, (F.) *Clinique*. Relating to a bed.

Clinical Lecture, (F.) *Leçon Clinique*. One given at the bed-side, or on a particular case or cases.

Clinical Medicine. (F.) *Médecine clinique*. That which is occupied with the investigation of diseases at the bed-side, or individually.

CLINIQUE, Clinical, (q. v.) *Clinique*, in French, is also occasionally used substantively, for *Ecole Clinique*, or *Clinical School*;—a school in which medicine is taught by examining diseases on the patients themselves. Thus, the French say,—La *Clinique* de la Charité; "The *Clinical School* of the Hospital *La Charité*." The term has been introduced into this country, and is occasionally anglicised *Clinic*.

CLINOID, *Clinoïdes*, from κλινη, 'a bed,' and ειδος, 'form.' Resembling a bed.

Clinoid Proc'esses, (F.) *Apophyses clinoïdes*, are four processes at the upper surface of the sphenoid bone, which have been compared to the posts of a bed. On them the pituitary gland rests. They are divided into *anterior* and *posterior*. Each of the anterior terminates in a point called *Transverse Spinous Process*.

CLINOPODIA, Thymus mastichina.

CLINOPO'DIUM VULGA'RE, from κλινη, 'a bed,' and πους, 'foot,' so called from the shape of its flowers. *Wild Basil*. (F.) *Grand Basilic sauvage*. A European plant, which was formerly considered to be an antidote to the bites of venomous animals, to facilitate labour, relieve strangury, stop diarrhœa, &c.

CLIQUETIS. Crepitation.

CLISEOM'ETER, from κλισις, 'inclination,' and μετρον, 'a measure.' An instrument, intended to measure the degree of inclination of the pelvis and to determine the relation between the axis of the pelvis and that of the body.—Osiander, Stein.

CLIT'BUR, Arctium lappa.

CLITORIDES INFERIORES LATI ET PLANI MUSCULI, Constrictores cunni.

CLIT'ORIS, from κλειτω, 'a servant who invites guests.'(?) *Dulce'do Amoris*, *Venus*, *Myrtum*, *Œstrum*, *Penis mulie'bris*, *Mentula mulie'bris*, *Membrum mulie'bre*, *Superla'bia*, *Cerco'sis*, (q. v.) *Crista*. A small, round organ, situate at the upper part of the vulva, and separated by a small space from the anterior commissure of the labia. Its base is surrounded by a slight fold, similar to the prepuce; and it is, internally, of the same structure as the *corpora cavernosa penis*. The artery of the clitoris, (F.) *A. Clitorienne*, is a branch of the internal pudic. The *vein* communicates with the internal pudic, and the *nerve* with the pudic.

CLIT'ORISM; a word, invented to express the abuse made of the clitoris. Also, an unusually large clitoris, *Cercosis externa*.

CLITORIUM, Vulva.

CLOA'CA, (F.) *Cloaque*, from κλυζω, 'I wash.' The pouch at the extremity of the intestinal canal, in which the solid and liquid excretions are commingled in birds, fish and reptiles. In the male it gives exit to the excrements, sperm and urine: in the female, to the eggs, fæcal matters, and urine.

CLOANX. Orpiment.

CLOAQUE, Cloaca.

CLOCHE, (F.) A popular expression in France for a blister or other vesicle.

CLOISON, Septum—*c. des Fosses nasales*, Septum narium—*c. Transparente*, Septum lucidum.

CLONIC, *Clon'icus*, from κλονος, 'agitation,' 'motion,' (F.) *Clonique*. Irregular convulsive motions. Convulsion with alternate relaxation; in contradistinction to *tonic*, which signifies a constant rigidity. *Clonus*, *Clonici partia'les*.

CLONICI UNIVERSALES, Synclonus.

CLONIQUE. Clonic.

CLONISM, *Clonis'mus*; same etymon. Clonic spasm.—Baumes.

CLONO'DES, from κλονος, 'agitation,' and ειδος, 'resemblance.' Convulsive. Galen applies this term to the pulse, when convulsive as it were, and unequal. He compares the sensation it communicates to the finger to that produced by a bundle of sticks or rods in vibration.

CLONOS EPILEPSIA, Epilepsy—*c.* Hydrophobia, Hydrophobia.

CLONUS, Synclonus—*c.* Nictitatio, Nictation—*c.* Palpitatio, Palpitation—*c.* Pandiculatio, Pandiculation—*c.* Pandiculatio maxillarum, Yawning—*c.* Singultus, Singultos—*c.* Sternutatio, Sneezing—*c.* Subsultus, Subsultus tendinum.

CLOPEMANIA Klopemania.

CLOPORTES ORDINAIRES, Onisci aselli.

CLOT, Coagulum—*c.* of Blood, see Blood.

CLOTBUR, Xanthium.

CLOTHING, Vestitus.

CLOTTY, *Grumo'sus*, (F.) *Grumeleux*. Composed of clots.

CLOU, Clavus, Furunculus—*c. Hystérique*, Clavus hystericus—*c. de l'Œil*, Clavus oculi.

CLOUDBERRIES. Rubus chamæmorus.

CLOUDBERRY TREE, Rubus chamæmorus.

CLOVE, see Eugenia caryophyllata—*c.* Bark, see Myrtus caryophyllata—*c.* Pink, Dianthus caryophyllus—*c.* July flower, Dianthus caryophyllus.

CLUBFEET, Kyllosis.

CLUBMOSS, Lycopodium—c. Fir, Lycopodium selago—c. Upright, Lycopodium selago.

CLUNES, Nates.

CLUNE'SIA, from *Clunes*, 'the nates.' *Proctal'gia, Procti'tis.* An inflammation of the buttocks.—Vogel.

CLUPEA THRYSSA. The *Yellow-billed Sprat*; a very poisonous fish of the West Indies.

CLYDON, Flatulence.

CLYSMA, Clyster—c. Tonicum, Enema fœtidum.

CLYSOIRE, (F.) An apparatus consisting of a long funnel-shaped tube of elastic gum, furnished with a pipe at the apex, for administering enemata.

CLYSTER, *Clyste'rium, Clysma, Enclys'ma, Clysmus, En'ema*, (q. v.) from *κλυζειν*, 'to wash.' (F.) *Clystère, Lavement, Remède.* A liquid, thrown into the large intestines by means of a syringe, or bladder and pipe properly prepared, &c.; the nozzle of the syringe or pipe being introduced into the anus. See Enema.

CLYSTER ANODYNE, Enema anodynum—c. Common, Enema commune—c. Domestic, Enema commune—c. Fetid, Enema fœtidum—c. Pipe, Elasma—c. Purging, Enema catharticum—c. Starch and opium, Enema anodynum—c. Tobacco, Enema tabaci—c. Turpentine, Enema terebinthinæ—c Uterinus, Sparallium.

CLYSTÈRE, Enema.

CNEME, Leg, Tibia.

CNEORON, Daphne gnidium.

CNEORUM TRICOC'CUM, *Almeze'rion, Acnes'tos, Chamæ'lea, Widow wail, Spurge-Olive*, (F.) *Camelée.* This plant, a native of Southern Europe, contains a very irritating, acrid principle. The ancients employed its leaves as a powerful purgative. It is now sometimes used for deterging ulcers.

CNESIS, *Cnesmos.* A painful itching.—Galen.

CNESMOS, Cnesis, Itching, Prurigo.

CNICELÆ'UM, from *κνικος*, 'carthamus,' and *ελαιον*, 'oil.' Oil of carthamus.—Dioscorides.

CNICUS, Carthamus tinctorius—c. Sylvestris, Centaurea benedicta.

CNIDELÆ'ON, *Cnidelæ'um*, from *κνιδις*, 'cnidia,' and *ελαιον*, 'oil.' Oil made from the grana cnidia or mezereon berries.—Dioscorides.

CNIDIA GRANA, *Cnid'ii Cocci, Coccognid'ia, Æto'lion, Coccum.* The Berries of the Daphne cnidium.—Foësius.

CNIDO'SIS. A pungent itching, compared to that produced by the *Urtica urens* or *Nettle.* (*κνιδη.*)—Hippoc.

CNIP'OTES, *Pruri'tus.* Itching. The dry ophthalmia, *Xerophthal'mia.*

CNISSA. See Nidorous.

CNISSOREG'MIA, from *κνισσα*, 'the smell of burnt fat,' and *ερεγω*, 'I put forth.' A nidorous eructation.

CNYMA. *κνημα.* A slight itching. Also, a puncture or vellication.—Galen.

COACUM. Phytolacca decandra.

COAGMENTATIO, Gomphosis.

COAG'ULANTS, *Coagulan'tia*, from *coagulare*,—itself from *co* and *agere*, 'to act together' Remedies, or poisons, supposed to possess the power of coagulating the blood, or to give consistency to animal fluids. The word, and the absurd notions connected with it, are equally abandoned.

COAGULA'TION, *Coagula'tio, Thromba'sis.* The conversion of a liquid into a more or less soft and tremulous mass. Many animal and vegetable fluids are capable of coagulation.

COAG'ULUM *Grumus*, (F.) *Caillot, Grumeau* ('a small clot.') A soft mass, formed in a coagulable liquid. The *Clot of the Blood* is particularly so called—the *Cruor, Insula, Placen'ta, Hepar San'guinis, Crassamen'tum:*—the red mass, composed of fibrin, serum, and colouring matter, which separates when the blood is left to itself. See Blood. The word is also applied, in Pathology, to the sanguineous concretions, which form in different natural and accidental cavities; and which, when they occur at the mouth of a divided artery, sometimes suspend the flow of blood. This is, indeed, one of the means by which hemorrhage is arrested.

COAG'ULUM ALU'MINIS, *Coag'ulum Alumino'sum.* This is made by beating the white of egg with a little alum, until a coagulum is formed. It is applied in cases of ophthalmia, where an astringent is necessary.

COALES'CENCE, *Coalescen'tia*, from *coalescere*, 'to run together,' (from *cum*, 'with,' and *alere*, 'to nourish.') *Sym'physis.* The adhesion or union of parts previously separated, as in case of wounds and preternatural adhesions.

COALITION. The same etymon as coalescence. It has been used in the same cases; as well as to express the action of several parts of the frame, which have the same nutrition.

COALTER'NÆ FEBRES. A name given to two intermittents, which attack a person at the same time, but whose paroxysms are distinct: so that the attack of one supervenes when the other has ceased. The term *Double Intermittent* expresses the same meaning.

COAPTA'TION, *Compta'tio*, from *cum*, 'with,' and *aptare*, 'to adjust,' 'adapt;' *Parago'gé.* The act of adapting the two extremities of a fractured bone to each other; or of restoring a luxated bone to its place. Coaptation must be effected gently. Usually, extension and counter-extension are, in the first place, necessary.

COARTICULATIO, Diarthrosis, Synarthrosis

COARCTATIO, Stricture.

COARCTA'TION, *Coarcta'tio*, from *coarctare*, 'to straiten.' Stricture. Avicenna speaks of *Coarctation of the Pulse.*

COAT, BUFFY, Corium phlogisticum.

COBALT, PROTOXIDE OF, Smalt.

COBHAM, MINERAL WATERS OF. Cobham is seven miles from Kingston, in Surrey, England. The waters are weak saline purgatives.

COBRA DE CAPELLO, Crotalus horridus.

COBWEB. Araneæ tela.

COCASH. Erigeron Philadelphicum.

COCCA'RIUM. A very small pill.

COCCHIA. Cochia.

COCCI GRANUM, Kermes—c. Orientales, see Menispermum cocculus.

COCCIGIO-CUTANÉ SPHINCTER, Sphincter ani externus.

COCCINELLA, Coccus cacti.

COCCINEL'LA SEPTEMPUNCTA'TA. *Lady-bird, Lady-cow, Lady-bug.* This insect, bruised upon

an aching tooth, has long been regarded antiodontalgic.

COC'CION, κοκκιον. A weight, mentioned by Myrepsus; the same as the Siliqua.

COCCIONELLA, Coccus cacti.

COCCOBALSAMUM, see Amyris opobalsamum.

COCCOGNIDIA, Cnidia grana.

COCCOLOBA UVIFERA, see Kino.

COCCONES, see Punica granatum.

COCCULÆ OFFICINARUM, see Menispermum cocculus.

COCCULI INDI AROMATICI, see Myrtus pimenta.

COCCULUS CRISPUS, Menispermum tuberculatum—c. Indicus, see Menispermum cocculus—c. Palmatus, Columba—c. Suberosus, see Menispermum cocculus.

COCCUM, Cnidia grana, Kermes—c. Baphicum, Kermes—c. Infectorium, Kermes—c. Scarlatinum, Kermes—c. Tinctorium, Kermes.

COCCUS, Coccus cacti—c. Americanus, Coccus cacti.

Coccus Cacti. The systematic name of the *Coch'ineal Insect. Coccinel'la, Cochinil'la, Coccionel'la, Coccinil'la, Ficus In'diæ grana, Coccus Polon'icus, Scarabæ'olus hemisphæ'ricus, Cochinelif'era cochinil'la, Coccus America'nus, Coccus In'dicus Tincto'rius, Cochinelle, Coccus.* The *Coch'ineal Animal,* (F.) *Cochenille, Graine de l'Ecarlate.* The cochineal insects have a faint, heavy odour; their taste is acrid, bitterish, and astringent: colour blackish-red externally,—purple-red within. They are used chiefly for giving a red colour to tinctures, &c. They were, at one time, esteemed astringent, stimulant, diuretic, and anodyne.

Coccus Ilicis, Kermes—c. Indicus tinctorius, Coccus cacti—c. Indicus, see Menispermum cocculus—c. Polonicus, Coccus cacti.

COCCYCEPH'ALUS, from *coccyx* (q. v.) and κεφαλη, 'the head.' A monster whose head has the shape of the os coccygis.

COCCYGE'US, from κοκκυξ, because it is inserted into the coccyx. *Ischio-Coccygeus,* (F.) *Ischio-coccygien.* Belonging both to the ischium and coccyx. The muscle *Ischio-coccygeus, Leva'tor Coccy'gis, Triangularis Coccy'gis.* It arises from the spinous process of the ischium, and is inserted into the extremity of the sacrum; and into nearly the whole length of the os coccygis laterally. It retains the coccyx in place, and prevents it from being forced backwards during the evacuation of the fæces.

COCCYGIO-ANAL, Sphincter ani externus.

COCCYGIO-CUTANÉ SPHINCTER, Sphincter ani externus.

COCCYMELEA, Prunus domestica.

COCCYX, 'a *cuckoo;*' whose bill it is said to resemble, *Os Coccy'gis, Cauda, Ossis sacri acu'men, Os Al'agas, Rump Bone, Cu'culus, Uropyg'ion.* An assemblage of small bones, attached to the lower part of the sacrum; the curvature of which it prolongs, and of which it seems to be an appendage. Generally, it consists of four bones. Behind the base of the coccyx are two small tubercular eminences. These are called *Cornua of the Coccyx.*

COCHEMAR, Incubus.

COCHENILLE, Coctus cacti.

COCHERIA, Cochia.

COCHIA, *Cocchia, Coche'ria,* from κοκκος, 'berry,' 'seed,' or from κοχυω, 'to flow profusely.' An ancient name for several officinal purgative pills; thus called, either because they produced copious evacuations, or because they were shaped like a seed.

COCHIN LEG, see Elephantiasis.

COCHINEAL, Coccus cacti.

COCHINELIFERA COCHINILLA, Coccus cacti.

COCHINILLA, Coccus cacti.

COCH'LEA. A *Snail's shell,* (F.) *Limaçon, Coquille.* Anatomists have given this name to the most anterior of the three cavities, which constitute the labyrinth of the ear, the *Pelvis Au'rium* or *Concha auris inter'na, Cav'itas cochlea'ta, C. buccina'ta, Antrum buccino'sum, Concha Labyrin'thi;*—and that of *Scalæ of the Cochlea,* (F.) *Rampes du limaçon,* to two spiral cavities in the interior of the cochlea. One of these scalæ terminates at the *Fenes'tra rotun'da,* and is called *Scala tympani:* the other opens at the anterior and inferior part of the vestibule. It is called *Scala vestib'uli.*

Cochlea, Scalæ of the, see Cochlea.

COCHLEAR AURICULARE, Earpick.

COCHLEA'RE, from *cochlea;* its bowl resembling a shell: a *spoonful;* (F.) *Cuillerée,* abbreviated in prescriptions usually to *coch.* See Abbreviation. Also, a scoop, (q. v.)

Cochlea'rē Magnum, a table-spoonful; *C. Me'dium,* a dessert or pap-spoonful; and *C. Min'imum,* a tea-spoonful.

COCHLEA'RIA, from *cochleare,* 'a spoon,' so called from its resemblance.

Cochlea'ria Armora'cia, *Raph'anus rustica'nus, Armora'cia, Raph'anus mari'nus, Raph'anus sylves'tris, Horseradish. Family,* Cruciferæ. *Sex. Syst.* Tetradynamia Siliculosa. (F.) *Raifort sauvage, Le cran.* The root of horseradish is frequently used at table; and has long been in the Materia Medica. It is stimulant and diuretic. Externally it is rubefacient.

Cochlea'ria Coron'opus, *Coron'opus, Coron'opus Ruel'lii, Wild Scurvy Grass, Swine's Cress.* This European plant is considered to be diuretic and antiscorbutic. (F.) *Corne de Cerf.* The term *Coron'opus* was given, by the ancients, to various plants.

Cochlea'ria Hortensis, Cochlearia officinalis.

Cochlea'ria Officina'lis, *C. horten'sis, Lemon Scurvy Grass, Common Scurvy Grass,* (F.) *Cranson, Herbe aux cuillers.* It has been considered a powerful antiscorbutic. It is sometimes eaten in salad.

COCHLEARIFOR'MIS, from *cochleare,* 'a spoon,' and *forma,* 'shape.' (F.) *Bec de Cuiller.*

Cochleariformis Proces'sus. A small, very thin plate, which separates the bony portion of the Eustachian tube from the canal for the passage of the tensor tympani.

COCHO'NĒ, κοχωνη. The junction of the ischium, near the seat or breech.—Foësius. The breech properly, from the hip-bones to the anus. The perinæum, (q. v.)

COCIL'IO. A weight of eleven ounces.

COCKLE-BUR, Agrimony.

COCKLES, INDIAN, see Menispermum Cocculus.

COCKMINT, Tanacetum balsamita.

COCKUPHAT, Stillingia.

COCLES, *Borgne.*

COCO, Cocos nucifera.

Coco of the Maldives, *Cocos de Maldi'vâ.* The fruit of a palm, called *Lodoïce'a* by Com-

merson. It was formerly termed, in the shops, *Nux Med'ica*, and enjoyed great reputation.

COCOA CACAVIFERA, Cacao.

COCOA, Cacao.

COCOBAY, Mal de San Lazaro.

COCOS BUTYRA'CEA. The name of the plant which affords the *palm oil*, *O'leum palmæ*, obtained chiefly from the fruit, by bruising and mixing the kernels with water, without the aid of heat, by which the oil is separated and rises to the surface. It is of the consistence of an ointment, with little taste, and a strong, though not disagreeable, smell. It is applied to sprains, &c.; but has no advantages over other oils. It has been called, also, *O'leum Palmæ seba'ceum*, *O. fixum nucum cocos butyra'ceæ* and *Mackaw fat*. It is procured likewise from the *Ela'is Guineen'sis*, and *Ela'is Occidenta'lis*, two species of palms.

Cocos Nucif'era, (F.) *Cocotier*. *Order*, Palmæ. The systematic name of the plant whose fruit is the cocoa nut, (F.) *Coco*. It is an agreeable kernel, but not easy of digestion. *Emulsions*, *orgeat*, &c. are made from it. The *juice* of the cocoa, when fermented, forms wine, and arrack is distilled from it.

COCOTE, Influenza.

COCOTIER, Cocos nucifera.

COCTIO, Digestion.

COC'TION, *Coc'tio*, *Pepsis*, *Pepan'sis*, *Pepas'mos*, *Concoc'tion*, from *coquere*, 'to boil.' This word has been employed in various senses. 1. With the ancients, *coction* meant the particular kind of alteration which the food experiences in the digestive organs, particularly in the stomach. It meant a preparation from its *crude* state. 2. It expressed the *maturation* or change, which the humeral pathologists believed morbific matter to experience before elimination. It was considered, that coction was produced during the violence of the disease; and hence this was called the *Period of Coction*. See Humorism.

COCYTA, Malis.

COD or CODS, Scrotum.

CODAGAPALA BARK, Nerium antidysentericum.

CODE, Codex.

CODEIA, Codeine.

COD'EINE, *Codei'a*, from κωδια, 'a poppy head.' An alkaloid, discovered, by Robiquet, in opium, in 1832. It is soluble in water, alcohol and ether, and unites readily with acids. As a hypnotic, Magendie thinks one grain of codeia equal to half a grain of morphia. The muriate of codeia appears to be stronger than the pure codeia.

CODESELLA, Anthrax.

CODEX, a collection of laws. (F.) *Code*. By extension, a collection of approved medical formulæ, with the processes necessary for forming the compounds, referred to in it. The Parisian Pharmacopœia is styled *Codex Medicamenta'rius*.

Codex Medicamentarius, Formulary, see Codex.

CODIA, Papaver (capsule.)

CODOCELE, Bubo.

CODOSCELLA, Bubo.

CŒCUM, Cæcum.

COEFFE, Caul.

CŒ'LIA, κοιλια, κοιλη, 'a hollow place.' This word generally meant a cavity in the body:—the abdomen, in particular. It has also been used for the alimentary canal, &c.:—ανω κοιλια, 'the stomach,' κατω κοιλια, 'the abdomen' Also, an alvine evacuation.

CŒ'LIAC, *Cœliacus*. (F.) *Cœliaque* ou *Céliaque*, from κοιλια, 'the abdomen,' 'intestine.' Relating to the abdomen or intestine.

Cœliac Artery, *A. Cœliaca*, (*A. opistogastrique* Ch.,) *A. Cœliaque*, *Tronc cœliaque*, *Trépied de la cœliaque*, is situate above the pancreas, and behind the upper part of the stomach. It arises from the anterior part of the abdominal aorta, where it passes between the pillars of the diaphragm, and soon divides into the *coronaria ventriculi*, *hepatic*, and *splenic* arteries.

Cœliac Flux or Passion, *Cœliaca chylo'sa*, *Diarrhœ'a chylo'sa*, *D. chymo'sa*, *Fluxus cœliacus*, *Passio cœliaca*, *P. Ventriculo'sa*, *Chymoche'zia*, *Fluor albus intestino'rum*, *Chylorrhœ'a*, *Chymorrhœ'a*, *Cœliaca lac'tea*, *Morbus cœliacus*. (F.) *Flux cœliaque*. A species of diarrhœa, in which the food is discharged by the bowels in an undigested condition. By some, defined to be diarrhœa attended with discharges of chyle or chyme. It is, in general, symptomatic of tubercular disease of the mesenteric glands. See Lientery.

Cœliac or Solar Plexus, *Plexus mesenté'rii proprius et maximus*, *P. ganglifor'mis semilunа'ris*, (*Plexus médian* ou *opistogastrique* Ch.,) (F.) *Pl. Cœliaque* ou *solaire*, *Ganglion de* Vieussens, is formed of numerous nervous filaments, which proceed from the semilunar ganglia of the great sympathetic. It is strengthened by several branches of the right and left pneumogastric nerves; is seated around the trunk of the cœliac artery, behind the stomach, and furnishes the secondary plexuses—the *diaphragmatic*, *coronary of the stomach*, *splenic* and *hepatic*, which accompany the arteries of the same name.

CŒLIACA, from κοιλιακος, '*cœliac*,' (q. v.) Diseases of the digestive organs; the 1st class in Good's *Nosology*. It comprises two orders, *Enterica* and *Splanchnica*.

Cœliaca Chylosa, Cœliac flux—c. Lactea, Cœliac flux—c. Renalis, Chyluria—c. Urinalis, Chyluria.

CŒLIALGIA, Tormina.

CŒLIOCELE, see Hernia, hypogastric.

CŒLIAQUE, TRÉPIED DE LA, Cœliac artery.

CŒLIOPYO'SIS, from κοιλια, 'the abdomen,' and πυωσις, 'suppuration.' Suppuration in the abdomen or its parietes.

CŒLIORRHŒA, Diarrhœa.

CŒLO'MA, from κοιλος, 'hollow.' A round ulcer of the cornea, broader and deeper than that described under the name *Bothrion*.

CŒLON, Cavity.

CŒLOPHTHAL'MUS, from κοιλος, 'hollow,' and οφθαλμος, 'eye.' One who is hollow-eyed.

CŒLOSTOM'IA, from κοιλος, 'hollow,' and στομα, 'mouth.' A defect in speaking, when the voice seems as if it came from a cavern;—that is, obscure, and as if at a distance.

CŒLOS'TOMUS, same etymon. One who has a hollow voice.

CŒLOTES, Cavity.

CŒNÆSTHE'SIS, from κοινος, 'common,' and αισθησις, 'feeling.' *Conæsthesis*. Common feeling. Some German writers mean, by this, a sixth sense. It is the feeling of self-existence or individuality, and is manifested by the sense of buoyancy or depression, which we experience

without any known cause;—by involuntary shuddering, feeling of chill or glow, &c.

CŒNOLOGIA, Consultation.

CŒ'NOTES, κοινοτης, 'commonness,' from κοινος, 'common.' The physicians of the methodic sect asserted that all diseases arise from *relaxation*, *stricture*, or a mixture of both. These were called *Cœnotes*: or what diseases have in common.

COETUS, Coition.

CŒUR, Heart.

COF'FEA ARAB'ICA, (F.) *Cafier*, and *Caféyer*. *Family*, Rubiaceæ. *Sex. Syst.* Pentandria Monogynia. The plant which affords coffee, *Jas'minum Arab'icum*, *Choova*, *Bon*. Originally from Yemen *Buna*. (F.) *Café*.

The infusion of coffee is an agreeable and wholesome article of diet. It is, to a certain extent, tonic, and is employed as such in convalescence, especially from fevers, &c. In cases of poisoning by opium, and in old asthmas, its use has been extolled. For this purpose the *Moka* is the best. It ought to be newly torrefied, but not too much burnt; should be strong, and drunk soon after grinding. *Factitious Coffees* have been, from time to time, recommended, but they are infinitely inferior to the genuine. Various *substitutes* have been proposed; *wheat*, *barley*, *hollyberries*, *acorns*, *sunflower seeds*, *beechmast*, *peas*, *beans*, *succory-root*, *seeds of gooseberries* and *currants* left in making wine, and washed,—*sliced turnips*, &c. These have been roasted with the addition of a little butter or oil: but they have not the aroma of coffee. The best substitute is said to be the seeds of the *Yellow water flag*—*Gladiolus luteus* or *Iris pseudacorus*.

Hunt's Œconomical Breakfast Powder consists of rye, roasted with a little butter. It is a good substitute for coffee.

COFFEE-TREE, Gymnocladus Canadensis.

COFFEE, WILD, Triosteum.

COGNITIO PHYSIOLOGICA, Physiology.

COHABITATIO, Coition.

COHABITA'TION, *Cohabita'tio*, from *cum*, 'with,' and *habitare*, 'to dwell.' The act of dwelling together. In legal medicine, it means the consummation of marriage—*Copulation*.

COHE'SION, *Cohæ'sio*, from *cum*, 'with,' and *hærere*, 'to stick.' *Vis cohæsio'nis*, *Vis adhæsio'nis*, *Vis attractio'nis*, *Force of cohe'sion*, *Attraction of cohesion*, *A. of aggregation*, is that force in the particles of matter, whereby they are connected in such a way as to resist any attempt towards their removal or separation. This force has to be attended to, in the management of disease. Emollients, rubbed into a part, act by diminishing the cohesion.

COHOBA'TION, *Cohoba'tio*, *Coho'bium*, *Co'hob*, *Co'hoph*. Distillation of a liquid—already distilled—on the same substances. When this is repeated three or four times, it is called *Rectohobation*.

COHOL. Synonym of Alcohol. Also, a dry collyrium —Avicenna.

COHOSH, Actæa racemosa, Caulophyllum thalictroïdes—c. Black, Actæa racemosa—c. Blueberry, Caulophyllum thalictroïdes.

COHUSH, Caulophyllum thalictroïdes.

COIFFE, Caul.

COIGN see Pyrus Cydonia.

COIGNASSIER, Pyrus cydonia.

COÏNCIDEN'TIA. Some authors have translated, by this term, the word παρεμπτωσις, used by Galen to designate the occlusion of the foramen opticum by a humour, proceeding from the base of the brain, and occasioning blindness.—Castelli.

COÏN'DICANT, *Coïn'dicans*, from *con*, 'with,' and *indico*, 'I indicate.'

COÏN'DICANT SIGNS are those which furnish the same indications; or which confirm the indication afforded by another sign:—συνδειγματικα.

COIRA, Catechu.

COIRAS, Scrofula.

COIT, Coition.

COÏ''TION, *Co'itus*, *Co'etus*, from *coëo*, (*con*, and *eo*, 'to go,') 'to go together.' *Copula'tion*, *Copula'tio*, *Copula Carnal'is*, *Aphrodis'ia*, *Aphrodisiasm'us*, *Acces'sus*, *Basia'tio*, *Amplexa'tio*, *Amplex'us*, *Conven'tus*, *Complex'io*, *Conju'gium*, *Agglut'na'tio*, *Lagnei'a*, *Syndyas'mus*, *Syna'sia*, *Concu'bitus*, *Congres'sus*, *Cohabita'tio*, *Venus*, *Res Vene'rea*, *Concu'bitus vene'reus*, *Ven'ery*, *Sexual intercourse*. (F.) *Coït*, *Approche*, *Accouplement*. The carnal union of the sexes.

COL, Collum.

COLA, Articulation.

COLATIO, Colatura.

COLATUM, Colatura.

COLATO'RIUM, from *colare*, 'to strain.' A strainer of any kind. (F.) *Couloir*. A term, by which the ancient physicians described every canal or conduit, through which the excrementitious humours of the body are evacuated. Ulcers, fistulæ, setons, caustics, &c., have been called *artificial* or *accidental Colatoria*, because they were considered to be passages by which the animal economy is freed from some morbific matter.

COLATU'RA, from *colare*, 'to strain.' *Cola'tum*. (F.) *Colature*. A filtered or strained liquor. It likewise means straining a liquid. *Cola'tio*.

COL'CHESTER, MINERAL WATERS OF. *Aqua Colcestren'sis*. The waters of Colchester are of the bitter purging kind, similar to that of Epsom.

COLCHICIA, see Colchicum Autumnale.

COL'CHICUM AUTUMNA'LE, from the county Colchis. *Meadow Saffron*, *Col'chicum*, *Coum*, (F.) *Colchique*, *Tue-chien*, *Mort aux chiens*, *Safran des prés*, *Safran bâtard*. *Family*, Colchicaceæ. *Class*, Hexandria. *Order*, Monogynia. The bulb or root (*Bulbus* vel *Radix* vel *Cormus*,) and the seeds are the parts used in medicine. The taste is acrid, excoriating the mouth; but the acrimony is lost by drying. It is narcotic, diuretic, and cathartic; and has been given in dropsy, gout, and rheumatism. Dose, from gr. j to vj of the fresh bulb. It is supposed to be the active ingredient of the *Eau médicinale d'Husson*. The active principle is called *Colchic''ia*. The Colchicum, in an over dose, is an acro narcotic poison.

Dr. Wilson's Tincture for the Gout, is said to be merely an infusion of Colchicum, or *Col'chicin*.

COLCHICUM ZEYLANICUM, Kæmpferia rotunda.

COLCHIQUE, Colchicum autumnale.

COL'COTHAR, *Col'cothar Vitrioli*, *Henri'cus rubens*, *Chalci'tis*, *Brown red*, *Rouge*, *Crocus Oxidum Ferri rubrum*, *Tritox'ydum Ferri*, *Sulphas Ferri calcina'tum*, *Ferrum vitriola'tum ustum*, *Terra vitrioli dulcis*, *Crocus martis vitriola'tus* seu *adstrin'gens*. (F.) *Rouge d'Angle-*

terre, Safran de Mars astringent. The *red oxide of iron*, obtained by calcining sulphate of iron to redness, with or without the contact of air. It possesses the general properties of the preparations of iron, and has been applied to stanch blood. &c.

COLD, *Frigus*, *Psychos*, (F.) *Froid*. The sensation produced by the abstraction of caloric from our organs. *Cheima*, *Chimon*. See Heat.

Three degrees of cold are generally distinguished in disease. 1. The simple feeling of cold (*Algor*) 2. *Chilliness* (*Horror*), and 3. *Shivering* (*Rigor*). Cold is employed in medicine, chiefly, as a refrigerant and sedative.

Cold in the Eye, Ophthalmia, catarrhal—c. in the Head, Coryza.

COLEITIS. Colposis.

COLEOPTOSIS, Prolapsus vaginæ.

COLEOSITIS, Leucorrhœa.

COLÈRE, Rage.

COLES. Penis.

COLEUS. Testicle.

COLIBERT, *Cagot*.

COLIC, *Co'licus*, from κωλον, 'the colon.' (F.) *Colique*. Relating to the colon.

Colic Arteries, *Arte'riæ co'licæ*, (F.) *Artères coliques*, are six in number, three of which, given off by the *superior mesenteric*, are called, *Colicæ dextræ*; and three, proceeding from the inferior mesenteric, *Colicæ sinis'træ*. All proceed towards the colon, passing between the two laminæ of the peritoneum, which form the meso-colon, where they ramify and anastomose with each other. The first, *Colica dextra*, *Ramus colica dexter*, is called *C. dextra superior*, (*Méso-colique*,—Ch.) The second, *C. dextra media*, *Colica media*, *Ramus colicus medius*, *Arteria media anastomot'ica*, (*C. droite*, Ch.,) and the third, *C. dextra infe'rior*, or *Ileo-colica*, (*A. cæcale*,—Ch.) Of the three *Colicæ sinistræ*, the first or *superior* is called, by Chaussier, *Colica magna sinistra*; the second or *media* is not distinguished from the preceding, as they often arise from a common trunk; and the third is called by Chaussier *Colica parva sinis'tra*. To these arteries as many veins correspond, which open into the great and little mesenteric.

Colic Lobe of the Liver is the great lobe of that organ.

Colic, *Co'lica Passio*, *Colica*, *Bellyache*, *Colicè*, *Colicodyn'ia*, *Dolo'res intestino'rum*, *Dolor colicus*, *Dysenteroner'via*. *Anenteroner'via*, *Enteral'gia*. *Gripes*, *Mulligrubs*. In its etymological acceptation, this word signifies an affection or pain in the colon. But it is employed in a more extensive signification. It includes every acute pain of the abdomen, aggravated at intervals. The word has, however, epithets affixed to it, which render it more or less precise. See Tormina.

Colic, Devonshire, Colic, metallic—c. Horn. Priapismus—c. Lead, Colic, metallic—c. Madrid, Colica Madridensis—c. Menstrual, Colica menstrualis—c. Metallica, Colica metallica—c. Painter's, Colic, metallic—c. Plumbers', Colic, metallic—c. of Poitou, Colic, metallic—c. Saturnine, Colic, metallic—c. of Surinam, Colic, metallic—c. Worm. Colica verminosa.

COLICA ACCIDENTALIS, Colica crapulosa—c. Acuta, Enteritis.

Co'lica Bilio'sa, *Bilious Colic*, (F.) *Colique Bilieuse*. Colic, occasioned by an accumulation of bile in the intestines or in its own passages. The *treatment* required resembles that proper for the next variety.

Colica Callo'sa. Colic attended with sense of stricture in some part of the intestinal canal; often of flatulency and pain; the flatulency gradually passing off by the stricture; the bowels tardy; at length discharging small liquid stools.

Colica Convulsi'va, *C. Spasmod'ica*, *C. pituito'sa*, *C. nervo'sa*, *C. idiopath'ica*. Colic, not the symptom of any other affection. It is characterized by griping pain in the bowels, chiefly about the navel, with vomiting and costiveness,—the pain increasing at intervals. The indications are to clear the intestines, and allay spasm. Calomel and opium—castor oil and opium—emollient and cathartic enemata, with fomentations, wet or dry, to the abdomen, usually succeed.

Colica Crapulo'sa, *C. accidenta'lis*, *C. helluo'num*, *Surfeit*, (F.) *Colique d'Indigestion*. A colic, arising from eating indigestible aliments, or digestible aliments in too great abundance. The remedy is obvious.

Colica Damnoniorum. Colic, metallic—c. Febricosa, Colica inflammatoria—c. Figulorum, Colica metallica.

Colica Flatulen'ta, *Inflatio*, *Gastrodyn'ia flatulen'ta*, *Physospas'mus*, (F.) *Colique flatulente*, *C. flatueuse*, *C. venteuse*. Colic, arising from an accumulation of air in the intestines. It is very common in infants, and may be relieved by aromatics, especially when combined with antacids—e. g. oil of aniseed with magnesia.

Colica Helluonum, Colica crapulosa.

Colica Hemorrhoida'lis, *Hemorrhoid'al Colic*, (F.) *Colique hémorrhoïdale*. A kind of colic, supposed to precede hemorrhoids or to supervene on their suppression.

Colica Hepat'ica, *Hepatal'gia Calculo'sa*, *Hepat'ic colic*, (F.) *Colique hépatique*. Pain in the region of the liver, chiefly about the gall-bladder, occasioned by the passing of a biliary calculus through the cystic and choledoch ducts.

Colica Idiopathica, Colica convulsiva—c. Ileus, Ileus.

Colica Inflammato'ria, *C. Phlogis'tica*, *C. plethor'ica*, *C. febrico'sa*, *C. pulsat'ilis*, *Inflammatory colic*. The same as enteritis, (q. v.)

Colica Lapponica, see Seta equina—c. Lochialis, Dyslochia—c. Madridensis, Colic of Madrid—c. Nervosa, Colica convulsiva, Colic, metallic—c. Phlogistica, Colica inflammatoria.

Colica Madriden'sis, *Colic of Madrid*, *Madrid Colic*. A species of colic, endemic in several provinces of Spain, whose nature is not clear. Its symptoms resemble those occasioned by lead.

Colica Menstrua'lis, *Men'strual Colic*, (F.) *Colique menstruelle*. Colic, which precedes or accompanies the menstrual evacuation, or which is owing to the suppression of that evacuation.

Colica Metal'lica, *Metal'lic Colic*, *Painters' Colic*, *Colica pic'tonum*, *Colic of Poitou*, *Colica Saturni'na*, *C. Figulo'rum*, *Colic of Surinam'*, *Bellon*, *Devonshire Colic*, *Dry Bellyache*, *Saturnine Colic*, *Lead Colic*, *Plumbers' Colic*, *Rachialgia Pic'tonum*, *R. Pictavien'sium*, *Morbus Metallicus*, *Colicoplé'gia*, *Colica Rachial'gia*. *Rachialgia*, *Colica Damnonio'rum*, *C. Plumbario'rum*, *Paral'ysis rachial'gia*, *Colica nervosa*, *Colica Picto'num*, *Palmus Plumba'rius*. (F.) *Dysenteronervie Saturnine*, *Colique de Poitou*, *Colique*

végétale, (?) *Colique des peintres*, *Colique de plomb*, *C. métallique*, *C. saturnine*, *C. des barbouilleurs*. Under this head is generally described the colic produced by lead, as well as the other colics mentioned in the synonymy; and they certainly resemble each other greatly, although some of them are more like the bilious colic. There is not much to distinguish this variety of colic from others. The same violent pain about the navel is present, with retraction of the abdomen towards the spine. It is apt also to occasion palsy. The only difference of treatment is, the necessity of employing more opium along with the purgative. The paralytic sequelæ must be treated by change of air, rubbing the spine, exercise, &c. Treating the disease upon general principles is infinitely more philosophical, and more successful than the empirical management at *La Charité*, Paris, which it is unnecessary to detail.

COLICA NEPHRET'ICA, *Nephret'ic Colic*, (F.) *Colique Néphrétique*. Acute pains, which accompany nephritis, and especially calculous nephritis, or the passage of a calculus into the ureters.

COLICA PICTONUM, Colic, metallic—c. Pictorum, Colic, metallic—c. Pituitosa, Colica convulsiva—c. Plethorica, Colica inflammatoria—c. Plumbariorum, Colic, metallic—c. Pulsatilis, Colic, inflammatory—c. Rachialgia, Colic, metallic—c. Saturnina, Colica metallica—c. Spasmodica, Colica convulsiva, Ileus—c. Stipata, Colica stercorea—c. Ventriculi, Cardialgia.

COLICA STERCO'REA, *Stercora'ceous Colic*, *Colica Stipa'ta*, (F.) *Colique stercorale*. A species of colic, ascribed to the retention of fæcal matters in the intestines. The retention is itself, however, an effect, that may be caused in the same manner as the colic pains themselves.

COLICA UTERI'NA, *Uterine Colic*, (F.) *Colique utérine*. Pain seated in the uterus, sometimes called *Hysteral'gia*.

COLICA VERMINO'SA, *Helminthocol'ica*, *Worm Colic*, (F.) *Colique vermineuse*. Abdominal pain, occasioned by the presence of worms in the intestines.

COLICODYNIA, Colica.

COLICOPLEGIA, Colic, metallic.

COLIMAÇON, Limax.

COLIQUE, Colic—*c. des Barbouilleurs*, Colica metallica—*c. Hépatique*, Colica hepatica—*c. d'Indigestion*, Colica crapulosa—*c. métallique*, Colica metallica—*c. de Miserere*, Ileus—*c. de Miséricorde*, Ileus—*c. des Peintres*, Colic, metallic—*c. de Plomb*, Colic, metallic—*c. de Poitou*, Colic, metallic—*c. Saturnine*, Colica metallica—*c. Venteuse*, Colica flatulenta—*c. Végétale*, Colic, metallic.

COLIQUES, Pains (after.)

COLI'TIS, from κωλον, 'the colon,' and *itis*, 'denoting inflammation.' *Coloni'tis*, *Enteri'tis co'lica*, (F.) *Inflammation du colon*. Inflammation of the peritoneal or mucous membrane of the colon. The former is termed *Serocoli'tis*, and *Exocoli'tis*; the latter Dysentery, (q. v.)

COLIX, Trochiscus.

COLLA PISCIUM, Ichthyocolla.

COLLAP'SUS, *Collapse*, *Conciden'tia*;—*col*, or *cum*, 'with,' and *labor*, *lapsus*, 'to fall,' (F.) *Affaissement*. A complete prostration of strength, either at the commencement or in the progress of a disease.

COLLAR-BONE, Clavicle.

COLLARD, Dracontium fœtidum—c. Cow, Dracontium fœtidum—c. Polecat, Dracontium fœtidum.

COLLAT'ERAL, *Collatera'lis*, from *cum*, 'with,' and *latus*, 'side.' That which accompanies or proceeds by the side of another.

COLLAT'ERAL AR'TERIES OF THE ARM, *Arte'riæ Collatera'les Bra'chii*, (F.) *Artères collatérales du bras*. They are given off by the *brachial*. They are distinguished into, 1. The *collateral—superior* or *external* (*Grandes musculaires du bras*—Ch.) which arise from the inner part of the brachial, and extend as far as the inferior and external part of the arm. 2. The *collateral—inferior* or *internal* (*Collatérales du Coude*—Ch.) which arise from the brachial, near the elbow-joint, and descend towards the upper part of the fore-arm.

The vessels which pass to the fingers and toes, are also called *collateral*.

Speaking generally, *collateral branches* are those which follow nearly the same course as the vessel whence they emanate.

COLLATERALIS, Ischio cavernosus.

COLLE-CHAIR, Sarcocolla.

COLLE DE POISSON, Ichthyocolla.

COLLEC'TION, *Collec'tio*, from *colligere*, 'to collect.' This word is often united to the epithet *purulent*, *serous*, &c., to express a *gathering* of pus, serum, &c.

COLLESIS, Agglutination.

COLLETICUS, Agglutinant.

COLLIC''IÆ. 'Drains to collect and convey away water.' See GOUTTIÈRE. Union of the ducts passing from the puncta lachrymalia. *Collic''iæ punctorum lachrymalium*.

COLLICULA VAGINÆ, Nymphæ.

COLLICULI NERVI ETHMOIDALIS, Corpora striata—c. Nervorum opticorum, Thalami nervorum opticorum.

COLLICULUS CAVEÆ POSTERIORIS VENTRICULORUM LATERALIUM, Hippocampus minor.

COLLIER, (F.) *A collar*. A name given to certain eruptions which surround the neck like a collar.

COLLIGAMEN, Ligament.

COLLINSONIA CANADENSIS, *Horseweed*, *Horse balm*, *Richweed*, *Richleaf*, *Heal-all*, *Stoneroot*, *Knotroot*, *Knotweed*. This indigenous plant is possessed of diuretic properties, which seem to reside in a volatile oil. Infusion is the best form of administration. The leaves in domestic practice are applied to wounds and bruises.

COLLIQUAMEN'TUM, from *colliqueo*, (*con* and *liquere*,) 'I melt.' The first rudiments of an embryo.—Harvey.

COLLIQUA'TION, *Colliqua'tio*, *Eliqua'tio*, *Syntex'is*, *Ectex'is*, *Solu'tion*, *Dissolu'tion*. The ancients meant, by this term, the progressive diminution of the solid parts, with copious excretion of liquids by one or more passages. They thought, that all the solids melted; and that the liquids, and particularly the blood, lost a portion of their density.

COLLIQ'UATIVE, *Colliquati'vus*, *Colliques'cens*, from *colliquescere*, 'to grow liquid.' (F.) *Colliquatif*. An epithet, given to various discharges, which produce rapid exhaustion. Hence we say, *Colliquative sweats*, *Colliquative diarrhœa*, &c.

COLLIQUESCENS, Colliquative.

COLLISIO, Contusion.

COLLIX, Trochiscus.

COLLODES, Glutinous.

COLLOID, from κολλα, 'glue,' and ειδος, 'resemblance.' An epithet applied to a product of morbid secretion, resembling glue, or particles of jelly inlaid in a regular alveolar bed. The three species of cancer or carcinoma are,—*Encephaloid* (q. v.), *Scirrhus* (q. v.), and *Colloid*.

COLLOSTRUM, Colostrum.

COLLOURION, Collyrium.

COLLUM, *Cervix*, *Trache'los*, *Auchen*, (F.) *Col*, *Cou*. The part of the body situate between the head and chest. Also, a part of an organ resembling the neck, as in the following cases.

Collum or Cervix Astrag'ali, *Neck of the Astragalus*, (F.) *Col de l'astragale*. A depression, which separates the anterior extremity of the astragalus from its body.

Collum or Cervix Costa'rum, *Neck of the Ribs*, (F.) *Col des Côtes*. The narrow part of the ribs, between the head and tubercle.

Collum or Cervix Dentium. *Neck of the Teeth*, (F.) *Col* ou *Collet des Dents*. The part of the teeth between the corona and fang, which is embraced by the gum.

Collum or Cervix Fem'oris. *Neck of the Thigh-bone*, (F.) *Col du Femur*. The long, narrow, and oblique portion of the os femoris, which separates the head from the two trochanters.

Collum or Cervix Fib'ulæ. *Neck of the Fibula*, (F.) *Col du Pérone*. A slight narrowness seated below the head or upper extremity of the fibula.

Collum or Cervix Hu'meri. *Neck of the Hu'merus*. A circular, depressed portion, which separates the head of the os humeri from its two tuberosities. Some surgeons place the neck below the tuberosities, no precise line of demarcation indicating its extent.

Collum or Cervix Mandib'ulæ vel Maxil'læ Inferio'ris, *Neck of the lower jaw*. (F.) *Col de l'os maxillaire inférieure*. A depression observable on each side of the lower jaw, immediately below the condyles.

Collum or Cervix Ossis Magni vel Capita'ti. *Neck of the Os Magnum*, (F.) *Col du grand Os*. A circular depression beneath the head of this bone of the carpus.

Collum or Cervix Radii. *Neck of the Radius*, (F.) *Col du Radius*. A narrow portion of the radius, which supports the head of the bone.

Collum or Cervix Scap'ulæ, *Neck of the Scap'ula*, (F.) *Col de l'Omoplate*. A narrow portion, observable below the glenoid cavity of the scapula, which seems to separate it, as it were, from the rest of the bone.

Collum or Cervix U'teri. *Neck of the Uterus*, (F.) *Col de la Matrice*. A narrow, cylindrical, and flattened portion of the uterus, which terminates it inferiorly, and opens into the vagina by the *Os Uteri* or *Os Tincæ*. This neck is perceptible on examination *per vaginam*, until near the end of utero-gestation. As the uterus enlarges, however, it becomes shorter and wider, so that a manifest difference exists between its condition at seven and nine months.

Collum or Cervix Vesi'cæ. *Neck of the Bladder*, (F.) *Col de la Vessie*. The anterior part of the base of the bladder, which resembles the neck of a bottle, and is continuous with the urethra.

Collum Obstipum, Torticollis.

COLLURIUM, Collyrium.

COLLUTORIUM, Gargarism—c. Adstringens, Mel boracis.

COLLU'VIES, from *colluo*, 'I cleanse.' Filth, excrement. Discharge from an old ulcer.

Colluvies Gastrica, *Embarras gastrique*.

COLLYR'IUM, *Collu'rium*, *Collu'rion*, from κωλυω, 'I check,' and ρεω, 'I flow,' or from κολλα, 'glue,' and ουρα, 'tail.' (F.) *Collyre*. The ancients designated, by this term, a solid medicine, of a long, cylindrical shape; proper to be introduced into the vagina, anus, or nostrils. They are said to have given it this name because it was shaped like a *Rat's Tail*, and because there entered into its composition, powders and glutinous matters.—Celsus, Oribasius, Scribonius Largus. At the present day, Collyrium means an application to the eye. Some are *pulverulent* and *dry*, but the greatest part are *liquid*; when they receive different epithets, as *astringent*, *emollient*, &c. The term is now little more than synonymous with *Eye-water*. Collyria are generally extemporaneous formulæ.

Collyrium Siccum Alexandrinum, see Alexandrine.

COLOBO'MA, κολοβωμα, 'any thing truncated or shortened.' A mutilated or maimed organ.

Colobo'ma Iridis. A congenital peculiarity of the iris, consisting in a fissure of its lower portion, and a consequent prolongation of the iris to the margin of the cornea.

COLOBOSIS, κολοβωσις. The act of curtailing or mutilating; mutilation.

COLOCYNTH, Cucumis colocynthis.

COLOMBINE, COMMON, Aquilegia vulgaris.

COLOMBO, Calumba.

COLON, *Colum*, *Intesti'num majus*, *I. cellula'tum*, *I. crassum et plenum*, *I. grandē*, *I. laxum*. That portion of the large intestines which extends from the cæcum to the rectum. It is said to have been so called from κοιλος, 'hollow,' or from κωλυω, 'I arrest,' because the excrements are arrested, for a considerable time, in its sacs. The colon is usually divided into four portions. 1. The *right lumbar* or *ascending*, *Colon dextrum*, situate in the right lumbar region, and commencing at the cæcum. 2. *Transverse colon*, *Colon transver'sum*, or *transverse arch of the colon*, the portion of the colon which crosses from the right to the left side, at the upper part of the abdomen. 3. The *left lumbar* or *descending*, *Colon sinis'trum*, extending from the left part of the transverse arch, opposite the outer portion of the left kidney, to the corresponding iliac fossa. 4. The *Iliac colon* or *Sigmoid flexure of the colon*, (F.) *Colon iliaque* ou *S. du colon*, the portion of the intestine which makes a double curvature in the left iliac fossa, and ends in the rectum.

Colon, Membrum—c. Inflammation of the, Colitis.

Colon, Torpor of the. A disease in which the muscular coat of the colon acts with deficient energy; giving occasion to distention of the intestine, which, by pressing upon other organs, may interfere so much with their functions, as to lead to distressing gastric, cardiac and other disorder.

COLONITIS, Colitis, Dysentery.

COLONNE, Columna—c. *Vertébrale*, Vertebral column.

COLONNES CHARNUES, Carneæ columnæ—c. *Charnues du cœur*, Columnæ carneæ.

COLOPHANE, Colophonia.

COLOPHANY, Colophonia.

COLOPHO'NIA, so called from COLOPHON, a city of Ionia; *Phrycte*, *Fricta*, *Pix Græca*, *Resi'na nigra*, *Coloph'any*, *Coloph'ony*, *Black Rosin*, *Pitch*, *Brown Rosin*, (F.) *Colophone*, *Colophane*, *Arcanson*, *Brai sec*. The black resin, which remains in the retort, after the distillation, by means of a strong fire, of common turpentine. It is used like the turpentines in general, and in some pharmaceutical preparations.

COLOPHONY, Colophonia.

COLOQUINTE, Cucumus colocynthis.

COLOQUINTIDA, Cucumus colocynthis.

COLOR VIRGINEUS PALLIDUS, Chlorosis—c. Virginum fœdus, Chlorosis.

COLORECTITIS, Dysentery.

COLOSTRA'TION, *Colostra'tio*. The diseases of new-born children, attributable to the colostrum.

COLOS'TRUM, *Colos'tra*, *Collostrum*, *Colus'trum*, *Troph'alis*, *Protog'ala*, *Neog'ala*, (*Biestings* or *Beastings* in the cow, &c.,) from κολλος, 'food,' (?) (F.) *Béton*. The first milk after accouchement. It contains more serum and butter, and less caseum than common milk; and seems to possess an evacuant property, which renders it fit to aid in the expulsion of the meconium. *Colostrum* formerly meant an emulsion prepared of turpentine and yolk of egg.

COLOUR BLINDNESS, Achromatopsia.

COLOURS, ACCIDENTAL. *Opposite colours*, *Complementary* and *Harmonic colours*. If the eye have been for some time regarding a particular colour, the retina becomes insensible to this colour; and if, afterwards, it be turned to a sheet of white paper, the paper will not seem to be white, but will be of the colour that arises from the union of all the rays of the solar spectrum, except the one to which the retina has become insensible. Thus, if the eye be directed for some time, to a *red* wafer, the sheet of paper will seem to be of a *bluish-green*, in a circular spot of the same dimensions as the wafer. This bluish-green image is called an *ocular spectrum*, because it is impressed upon the eye and may be retained for a short time; and the colour *bluish-green*, is said to be the *accidental colour* of the *red*. If this experiment be made with wafers of different colours, other accidental colours will be observed, varying with the colour of the wafer employed, as in the following table:—

Colour of the Water.	Accidental colour, or colour of the ocular spectrum.
Red	Bluish-green.
Orange	Blue
Yellow	Indigo.
Green	Violet, with a little red.
Blue	Orange-red
Indigo	Orange-yellow.
Violet	Yellow-green.
Black	White.
White	Black.

If all the colours of the spectrum be ranged in a circle, in the proportions they hold in the spectrum itself, the accidental colour of any particular colour will be found directly opposite. Hence, the two colours have been termed *opposite colours*. It will follow from what has been said, that if the primary colour, or that to which the eye has been first directed, be added to the accidental colour, the result must be the same impression as that produced by the union of all the rays of the spectrum—*white* light. The accidental colour, in other words, is what the primitive colour requires to make it white light. The primitive and accidental colours are, therefore, *complements* of each other; and hence accidental colours have also been called *complementary colours*. They have likewise been termed *harmonic*, because the primitive and its accidental colour *harmonize* with each other in painting.

COLPATRE'SIA, *Elytratre'sia* from κολπος, 'vagina,' and ατρητος, 'without opening.' Imperforation of the vagina.

COLPEURYNTER, Speculum vaginæ.

COLPITIS, Colposis.

COLPOPTO'SIS, from κολπος, 'the vagina,' and πτωσις, 'fall.' Prolapsus of the vagina, (q. v.)

COLPORRHA'GIA, from κολπος, 'vagina,' and ρηγνυμι, 'I break forth.' Discharge of blood from the vagina.

COLPORRHAPHY, Elytrorrhaphy.

COLPOS, Sinus, Vagina.

COLPO'SIS. Inflammation of the vagina. Synonymous with *Elytri'tis*, *Elytri'tis*, *Colei'tis*, *Colpi'tis*. See Leucorrhœa.

COLPOSTEGNO'SIS, from κολπος, 'vagina,' and στεγνοω, 'I close.' Atresia, or obliteration of the vagina.

COLT'S FOOT, Asarum Canadense, Tussilago.

COLU'BER BERUS. The systematic name of the viper, *Vi'pera*, (F.) *Couleuvre*, *Vipère*. A poisonous reptile—the poison lying in small sacs near its teeth. The flesh is innocent, and has been often taken in scrofula, and in cutaneous disorders in general, but it is inefficacious.

COLUBRINA DRACONTIA, Arum dracunculus—c. Lusitanica, Euphorbia capitata—c. Virginiana, Aristolochia serpentaria.

COLUM. Colon.

COLUMBINE, Aquilegia vulgaris.

COLUMBO, Calumba—c. American, see Calumba—c. Marietta, see Calumba.

COLUMELLA, Pillar, Uvula.

COLUM'NA, *Column*, (F.) *Colonne*. Anatomists use this word for parts which resemble a column or pillar, (q. v.)

COLUMNA ADSTANS INGUINIBUS, Penis—c. Dorsi, Vertebral column—c. Oris, Uvula—c. Spinalis, Vertebral column—c. Virginitatis, Hymen—c. Foraminis ovalis, see Ovalis fossa—c. Valvulæ Vieussenii, see Valvula Vieussenii—c. Vertebralis, Vertebral column.

COLUM'NÆ CAR'NEÆ, *Colum'næ Cordis*, *Lacer'ti* vel *Lacer'tuli* vel *Funes* vel *Fascic'uli ter'etes Cordis*, *Trabes Cordis*, (F.) *Colonnes charnues du cœur*. Small, fleshy columns, which project, more or less, into the auricles and ventricles of the heart, whose use appears to be to prevent too great dilatation of those cavities.

COLUM'NÆ NASI. The cartilaginous part of the septum of the nostrils.

COLUMNEA LONGIFOLIA, Bahel.

COLUMNS OF MORGAGNI OR OF THE RECTUM, see Rectum.

COLUS JOVIS, Salvia sclarea.

COLUSTRUM, Colostrum.

COLU'TEA ARBORES'CENS, *Bladder Senna.* (F.) *Baguenaudier, Faux Séné. Fam.* Leguminosæ *Sex. Syst.* Diadelphia Decandria. The leaves are slightly purgative, and are often mixed with those of the cassia senna.

COLUVRINE DE VIRGINIE, Aristolochia serpentaria.

COLYM'BADES, *Pickled Olives.* These, when bruised and applied to a burnt part, were supposed to be able to prevent vesication.—Dioscorides.

COMA, κωμα. A profound state of sleep, from which it is extremely difficult to rouse the individual. It is a symptom which occurs in many diseases. Two varieties are distinguished, 1. The *Coma vigil, Coma agrypno'des, Pervigil'ium, Vigil'iæ nim'iæ, Typho'nia, Veter'nus, Agrypnoco'ma, Carus lethar'gus vigil, Typhoma'nia,* (q. v.) which is accompanied with delirium. The patient has his eyes closed, but opens them when called; and closes them again immediately. This state is accompanied with considerable restlessness. 2. *Coma Somnolen'tum, C. Comato'des;*—in which the patient speaks when roused, but remains silent and immovable in the intervals. Coma is a deeper sleep than *sopor*, but less so than *lethargy* and *carus.*

Coma, Capillus—c. Apoplexia, Apoplexy—c. Cæsarea, Plica—c. Somnolentum, Somnolency.

COMACON, Myristica moschata.

COMAROS, Arbutus unedo.

CO'MATA, from κωμα. Diseases characterized by diminution of the powers of voluntary motion, with sleep or impaired state of the senses.—Cullen.

COMATEUX, Comatose.

COMATODES, Comatose.

COM'ATOSE, *Comato'des*, (F.) *Comateux.* Relating to or resembling coma:—as *comatose sleep, comatose fever*, &c.

COMBUSTIBILITY, PRETERNATURAL, Combustion, human.

COMBUS'TIO, Burn.

COMBUS'TION, HUMAN, *Spontaneous Combustion*, or *Preternatural Combustibility, Catacau'sis, Incen'dium sponta'neum. Catacau'sis ebrio'sa*, (F.) *Combustion humaine, C. spontanée.* These terms have been applied to the extraordinary phenomenon of a rapid destruction of the human body, (being reduced to ashes,) either spontaneously or by the contact of an ignited substance. It is said to have always occurred in the aged, and in those that were fat and hard drinkers. In such, Dr. Traill has found a considerable quantity of oil in the serum of the blood. Vicq d'Azyr, Lair, and Dupuytren think it necessary, that the body should be placed in contact with an ignited substance. Le Cat, Kopp, and Marc are of opinion that this is not necessary. The former appears to be the true view.

COMBUSTURA, Burn.

COMEDONES, see Acne.

COMES ARCHIATRORUM, see Exarchiater.

COMESTIBLE, (F.) *Edu'lis*, from *comedere*, 'to eat.' *Eatable*, (F.) *Edule.* Esculent (q. v.) When this word is used substantively, in French as in English, it means solid food.

COMEZ. Half a drop.—Ruland.

COMFREY, Symphytum—c. Spotted, Pulmonaria.

COMISTE, Aliment.

COMMANDUCATIO, Mastication.

COMMEM'ORATIVE. *Commemorati'vus*, from *commemorare*, (*con* and *memor*,) 'to cause to remember.' That which recalls, or rather which is recalled.

Commemorative Signs, (F.) *Signes commemoratifs* are those, deduced from circumstances which have gone before: or rather, according to others, those which point out the preceding condition of the patient. They are also called *Anamnes'tic signs.*

COMMERCIUM, Sympathy.

COMMI, Gummi.

COM'MINUTED, *Comminu'tus*, from *comminuere*, (*con* and *minuo*,) 'to break to pieces.' (F.) *Comminutif.* A *comminuted fracture* is one in which the bone is broken into a number of pieces.

COMMINU'TION, *Comminu'tio, Thrypsis, Leio'sis.* Same etymon. Fracture of a bone into a number of pieces.

COMMISSURA, Articulation—c. Magna cerebri, Corpus callosum—c. Ossium carnea, Syssarcosis.

COMMISSU'RAL; same etymon as commissure. Of or belonging to a commissure.

COM'MISSURE, *Commissu'ra, Compa'ges, Compagina'tio, Sym'physis, Sym'bolē*; from *commit'to*, (*con* and *mitto*,) 'I join together.' A point of union between two parts: thus, the commissures of the eyelids, lips, &c., are the angles, which they form at the place of union.

Com'missure, Ante'rior, of the Brain, *Commissu'ra ante'rior cer'ebri*, (F.) *Commissure antérieure du cerveau.* A small medullary fasciculus, situate transversely at the anterior part of the third ventricle, and uniting the two hemispheres.

Commissure, Great, of the Brain, *Commissu'ra Magna Cer'ebri*, (F.) *Grande commissure du cerveau*, which unites the two hemispheres for some extent, is the *Corpus callo'sum.*

Commissure, Oblique or Intercerebral, see Valvula Vieussenii.

Commissure, Posterior, of the Brain. A similar medullary band, situate at the posterior part of the third or middle ventricle.

Commissure of the Uvea, Ciliary ligament.

COMMISSURE DE LA CHOROÏDE, Ciliary ligament.

COMMO'SIS, from κομμοω, 'I adorn.' The art of concealing natural deformities, as by painting the face. See, also, Propolis.

COMMO'TICE, in the older writers, meant the art of communicating factitious beauty to a person —Painting the face,—*Comopor'ia.*

COMMOTIO, Motion.

COMMOTION, Concussion—*c. du Cerveau*, Concussion of the brain.

COMMU'NICANS, from *communis*, 'common.' *Conjun'gens.* That which communicates or establishes a communication. *Commu'nicant.* There are two *Arteriæ Communican'tes;* both within the cranium; the one *anterior*, very short, and extending transversely from one anterior cerebral artery to the other,—the other *posterior*, called also *Commu'nicans Willis'ii*, which passes from the internal carotid to the posterior cerebral artery. It is a branch of the basilary.

COMPACT, *Compac'tus*, from *con* and *pangere*, 'to strike, to fix.' Solid, close, (F.) *Compacte*. The term *Compact Tissue* is given to the hardest and closest parts of bone.

COMPAGES, Articulation, Commissure—c. Vertebrarum, Vertebral column.

COMPAGINATIO, Commissure.

COMPAS D ÉPAISSEUR, see Pelvimeter.

COMPASSIO, Sympathy.

COMPEBA, Piper cubeba.

COMPEPER, Piper cubeba.

COMPER'NIS; from *con*, and *perna*, 'a gammon of bacon with the leg on.' One who has his knees turned inwards. A case of distortion of the legs.

COMPLETIO, Plethora.

COMPLEX, *Complex'us*, from *con*, 'with,' and *plectere*, 'to twist.' Embracing several distinct things. Chaussier uses this term in his anatomical descriptions for *complicated*.

COMPLEXIO, Coition, Confusio, Temperament.

COMPLEX'ION, *Complex'io*. This is often employed, in English, for the colour of the face, as "He has a *good complexion*,"—a "*sallow complexion*," &c. It formerly had a more extensive signification, and still has in France. It signifies the aggregate of physical characters presented by any individual: considered with respect to his external arrangement or condition. It means more than *constitution*, for which it is used synonymously in many cases; and differs from *temperament*, which is less the external condition of the body than the state or disposition of the organs in health.—H. Cloquet.

COMPLEX'US, Complex.

COMPLEXUS MINOR, *Mastoïdeus latera'lis*, *Trachél'o-mastoïdeus*, (F.) *Trachélo-mastoïdien*, *Muscle petit Complexus*. It arises from the transverse processes of the last four cervical vertebræ, and is inserted into the mastoid process.

COMPLEXUS MUS'CULUS, *Biven'ter Cervi'cis*, *Complexus Major*, *Dorso-trachélon-occipital*, *Trachélo occipital* (Ch.) (F.) *Muscle grand complexus*. A muscle, situate at the hind part of the neck, where it extends from the interval that separates the two prominent ridges on the posterior surface of the os occipitis to the transverse and articular processes of the last six cervical vertebræ, as well as to those of the first five dorsal. It serves to straighten, incline, and turn the head.

COMPLICA'TION, *Complica'tio*, from *con*, 'with,' and *plicare*, 'to fold.' In medicine, it means the presence of several diseases, or of several adventitious circumstances, foreign to the primary disease.

COMPOSIT'ION, *Composit'io*, from *componere*, (*con* and *ponere*, 'to place,') 'to place together.' *Syn'thesis*. The act of composing or compounding. Also, the *Compound*, *Compos'itum*, or thing compounded. Likewise, a *combi'nation*.

COMPOSITUM, Compound.

TO COMPOUND. Same etymology; to mix medicines. To mingle different ingredients into one whole. Used adjectively, *Compound* signifies the result of the union of several medicinal agents, as "a *compound* medicine."

COMPREHENSIO, Catalepsy.

COM'PRESS, *Compres'sa*, *Sple'nium*, *Pla'gula*, *Penicil'lum*, *Penic'ulum*, from *comprim'ere*, (*con*, and *premere*, 'to press,') 'to press together.' (F.) *Compresse*. Folded pieces of lint or rag, so contrived as, by the aid of a bandage, to make due pressure upon any part. According to their shape, direction, and use, compresses have been called *long* (F.) *longuettes*,) *square* (*carrées*,) *triangular*, *prismatic*, *graduated* (*graduées*,) *split* (*fendues*,) *fenetrées*, *criblées*, *croix de Malte*, *oblique*, *circular*, *dividing* (*divisives*,) *uniting* (*unisantes*,) *cribriform*, (q. v.) &c.

COMPRESSEUR DE DUPUYTREN, Compressor of Dupuytren—*c. du Nez*, Compressor nasi—*c. de la Prostate*, Compressor prostatæ.

COMPRESSIO, Thlipsis.

COMPRES'SION, *Compres'sio*, *Encrei'sis*. Same etymology. Pressure, Methodical compression. An agent frequently had recourse to in surgery. We *compress* a limb, affected with *œdema*, *varices*, *hydrops articuli*, *callous ulcer*, &c. The abdomen is *compressed* after delivery, after *paracentesis abdominis*, &c. The compression is produced by means of the roller, laced stocking, &c according to the part, and to the particular case. *Moderate pressure* aids the contractility of parts, and excites the action of the absorbents; so that large tumours at times disappear after it has been used for some time. A greater degree of pressure occasions, still more, the emaciation of the part, but it is apt to impede the circulation. *Pressure* is often used to stop or moderate the flow of blood in cases of aneurism or wounds of arteries and veins. In such cases, the compression may be *immediate*, when applied upon the artery itself, or it may be *mediate*, when applied through the integuments and soft parts. The French use the term—*Compression immédiate latérale*—for that which is exerted perpendicularly to the axis of a vessel, so as to flatten its sides. It is practised with the finger, forceps, tourniquet, compresses, &c.

COMPRES'SION OF THE BRAIN. This may arise either from coagula of blood, a soft tumour, a bony excrescence, a depressed portion of the skull, or the presence of some foreign body. The effects vary, according as the compression takes place *suddenly* or *gradually*. When *suddenly*, the symptoms are of the comatose or apoplectic character. When *gradually*, mania, convulsions, &c., are more likely to occur. Compression, arising from a depressed portion of skull, requires the use of the trephine.

COMPRES'SIVE, *Compressivus*. That which compresses. *A compressive bandage* is one that compresses the parts to which it is applied.

COMPRES'SOR OF DUPUYTREN, (F.) *Compresseur de Dupuytren*. An instrument for compressing the femoral artery, invented by Dupuytren. It is constructed on the same principles as the tourniquet of J. L. Petit, from which it only differs in this respect;—that, instead of being maintained in its place by a strap, which always compresses more or less the circumference of the limb, the two pads are placed at the extremities of a semicircle of steel, which, by passing from one to the other without touching the parts, limits the pressure to two opposite points of the thigh, and permits the collateral circulation to go on.

COMPRESSOR NARIS, *Renal'us*, *Nasa'lis*, *Transversa'lis Nasi*, *Myrtifor'mis*, *Dilatato'res ala'rum nasi*, *Constric'tor Nasi*, *C. Narium*, *C. Naris*,

Triangula'ris Nasi, (F.) *Maxillo-narinal*, *Sus-maxillo-nasal*.—(Ch.,) *Compresseur du nez*. *Transversal du nez*. A muscle, situate at the sides of the nose; flat and triangular. It arises from the inner part of the fossa canina, and passes to the dorsum of the nose; where it is confounded with that of the opposite side.

Compressor or Constrictor of Nuck. An instrument for compressing the urethra, to obviate incontinence of urine. It consists of a girdle of iron, which surrounds the pelvis, to which is fixed a plate of the same metal, that compresses the urethra *in perinæo*.

Compressor Pros'tate, *Prostat'icus supe'rior*, *Pubio-prostat'icus*, *Sub-pubio-prostat'icus*, (F.) *Compresseur de la prostate*. A muscle, admitted by Albinus, which is formed of the anterior fibres of the *Levator ani*, that embrace the prostate. It is the *Prostat'icus supe'rior* of Winslow.

Compres'sor Ure'thræ. A muscle consisting of two portions—one of which is *transverse* in its direction, and in consequence of its having been particularly described by Mr. Guthrie, has been called *Guthrie's muscle*. It arises from the ramus of the ischium, and passes inwards to embrace the membranous urethra. The other portion is *perpendicular*, descending from the pubis and passing down to be inserted into the transverse portion of the muscle. This portion has been considered by many to be only the anterior fibres of the levator ani. Having been described by Mr. Wilson, it has been called *Wilson's muscle*.

COMPTO'NIA ASPLENIFO'LIA, *Liquidam'bar peregri'na*, *L. asplenifo'lia*, *Myoica asplenifo'lia*, *Sweet Fern*, *Shrubby Sweet Fern*, *Sweet bush*, *Fern bush*, *Fern gale*, *Spleenwort bush*, *Meadow fern*, *Astringent root*. An indigenous shrubby plant, which grows in sandy or stony woods from New England to Virginia. It possesses tonic and astringent properties, and is used as a domestic remedy in diarrhœa, &c., in the form of decoction.

COMPUNCTIO, Paracentesis, Puncturing.

CONÆSTHESIS, Cœnæsthesis.

CONARIUM, Pineal gland.

CONATUS, Effort.

CONCASSER, (F.) from *conquassare*, (*con*, and *quassare*, 'to shake much,') 'to break to pieces;' 'to comminute.' To reduce roots, woods, &c. into small fragments, in order that their active principles may be more readily separated from them.

CONCAU'SA or CONCAUS'SA, *Synæ'tion*. A cause which co-operates with another, in the production of disease.

CONCAVITAS CONCHULARIS CEREBRI. Infundibulum of the brain.

CONCAVUM PEDIS, Sole.

CONCENTRAN'TIA, from *con* and *centrum*, 'a centre.' A name once given to acids and absorbents.

CONCENTRA'TION, *Concentra'tio*. A word sometimes used, in medical theories, to express an afflux of fluids, or a convergence of sensibility or of vital force, towards an organ. It is applied, also, to the pulsation of arteries, when not easily felt under the finger.

POULS CONCENTRÉ, (F.) is a term applied by the French to a pulse of the above character.

CONCEPTACULA SEMINARIA, Vesiculæ seminariæ.

CONCEPTACULUM, Uterus.

CONCEPTIO VITIOSA, Pregnancy, extra-uterine.

CONCEP'TION, *Concep'tio*, *Cye'sis*, from *concipio*, (*con* and *capio*,) 'I conceive.' The impregnation of the ovum in the ovarium, by the positive contact of the male sperm, whence results a new being. In order that conception may take place, it is necessary that there should be a uterus, and that the female should be capable of menstruating in a healthy manner. There is every reason, also, to believe that, occasionally, the male sperm is not fecundating; but of this we know little. The whole subject of conception is a most mysterious one. It seems to occur as follows. During the sexual union, the male sperm passes along the uterus and Fallopian tubes: the fimbriated extremities of the latter seize hold of the ovarium: and the sperm in this manner comes in contact with an ovum, and impregnates it. The fecundated ovum remains some time in the ovarium, but at length bursts its covering, is laid hold of by the fimbriated extremity of the Fallopian tube, and passes along the tube into the cavity of the uterus, where it remains for the full period of utero gestation.

Concep'tion, False, *Fœtus Concep'tus*, *Spu'rium germen*, (F.) *Fausse conception*, *Faux germe*. An irregular, preternatural conception, the result of which is a mole or some similar production, instead of a properly organized fœtus. See Mole.

CONCEP'TUS. The first rudiments of the fœtus, after conception.

Conceptus Falsus, Conception, false.

CONCHA, κογχη. A liquid measure, amongst the Athenians, equal to half an ounce. Anatomists apply this term to several hollow parts of the body;—as the *Concha of the Ear*,—*Concha Auris*, *Concha auricu'læ*; (F.) *Conque*, the hollow part of the cartilage of the external ear. It has, also, been applied to the genital organs of the female; to the patella, &c.

Concha, Patella, Turbinated bone, (middle,) Vulva—c. Auris interna, Cochlea—c. Cerebri, Infundibulum of the brain—c. Inferior, Turbinated bone, (inferior)—c. Labyrinthi, Cochlea.

CONCHÆ NARIUM, Turbinated bones.

CONCHA'RUM ANTIFEBRI'LE. A febrifuge and sudorific preparation in Bates's *Pharmacopœia*. It was composed of vinegar, mussel-shells, and water of *Carduus benedictus*.

CONCHO-HELIX. A small, fleshy, fasciculus, attached to the concha of the ear and helix. It is also called the *small muscle of the helix*.

CONCHUS, κογχος. The cranium, (q. v.) In the plural, it means the orbitar cavities.—Castelli.

CONCHYLIA, Turbinated bones.

CONCIDENTIA, Collapse.

CONCIL'IUM. A milky plant, referred to by Pliny as aphrodisiac and antiphthisical. Adanson considers it to be a *Campanula*.

CONCOCTION, Coction.

CONCOMBRE ORDINAIRE, Cucumis sativus—*c. Sauvage*, Momordica elaterium.

CONCOMI'TANT, *Concomi'tans*, from *con* and *comitare*, (itself from *comire*,—*cum* and *ire*,) 'to go with.' That which accompanies. A symptom which accompanies others.

CONCREMATIO, Calcination.

CONCRETIO, Adherence—c. Alvina, see Calculus of the stomach and intestines.

CONCRE'TION, *Concre'tio*, from *concrescere*, (*con*, and *crescere*,) 'to condense, thicken, become solid:' *Pexis*, *Sympex'is*, πηξις, συμπηξις. The act of becoming thick or solid. It was once used synonymously with adhesion or growing together,—as, "*concretion of the toes.*" Most commonly, it is applied to extraneous and inorganic bodies, of a solid character, met with in different textures, after certain chronic inflammations: or which make their appearance in the joints or in the reservoirs for excrementitial fluids. *Concretion* is, therefore, frequently synonymous with *Calculus*, and is then rendered, in Latin, by the word *concrementum*. But *Concretion* has a more extensive signification than *Calculus;* thus, accidental ossifications or deposits of phosphate of lime in certain organs, and especially in the liver and lungs, are properly called *osseous concretions*. They could not well be called *osseous calculi*.

Concretion, Fibrinous, Sanguineous, Polypiform or Polypus, of the Heart, see Polypus—c. Intestinalis, Calculus of the Stomach and Intestines.

CONCUBITUS, Coition—c. Venereus, Coition.

CONCUR'SUS, from *concurrere*, (*con*, and *currere*, *cursum*, 'to run,') 'to meet together,' *Syn'dromē*. (q. v.) The congeries or collection of symptoms, which constitute and distinguish a particular disease.

CONCUS'SION or *Commo'tion*, from *concutio*, (*con*, and *quatere*, 'to shake,') 'I shake together.' *Concus'sio*, *Thlasma Concus'sio*, (F.) *Commotion*. In *Surgery*, it is used for the agitation often communicated to one organ by a fall upon another; as to the brain from a fall on the breech, &c.

Concussion of the Brain, *Encephalosis'mus*, (F.) *Commotion du Cerveau*, sometimes gives rise to alarming symptoms, even to abolition of the functions of the brain, yet without any sensible organic disease. Slight concussion of the brain, called *stunning*, consists in vertigo, tinnitus aurium, loss of memory, and stupefaction; all these being temporary. When more severe, there is instant loss of sensation and volition, vomiting, the patient being as if in a sound sleep, but there is no stertorous breathing. Pulse variable, generally more rapid and feeble than in compression; extremities cold. Little can be done here, till reaction has occurred: after this, the case must be treated according to general principles,—by bleeding, blisters, cold applied to the head, &c. After severe concussion, a patient, although apparently well, is not safe till some time after the accident.

CONDENSAN'TIA, from *con*, and *densus*, 'dense.' *Incrassan'tia*, (q. v.) Medicines esteemed proper for inspissating the humours.

CONDENSATIO, Stegnosis.

CONDENSA'TION, *Condensa'tio*, *Inspissa'tio*. Increase in density of the blood and other liquids, or of the solids, which enter into the composition of the human body.

CON'DIMENT, *Condimen'tum*, *Ar'tyma*, *Hedys'ma*, *Conditu'ra*, from *condire*, 'to season.' (F.) *Assaisonnement*. Some substances are called, at times, *aliments*, and at others, *condiments*, according as they constitute the basis or the accessary to any dish: such are cream, butter, mushrooms, olives, &c. Others are always *condiments*, as they are only used to improve the savour of food, and contain but little nutritive matter. Such are pepper, salt, cinnamon, &c. Almost all condiments are possessed of stimulant properties.

CONDIT, Confection.

CONDI'TUM, same etymon. A pharmaceutical compound of wine, honey, and some aromatics, especially pepper. Also, a confection.

CONDITURA CADAVERUM, Embalming.

CONDOM, *Armour*, (F.) *Baudruche*, *Redingote Anglaise*, *Gant des Dames*, *Calotte d'assurance*. The intestinum cæcum of a sheep, soaked for some hours in water, turned inside out, macerated again in weak, alkaline ley,—changed every twelve hours,—and scraped carefully to abstract the mucous membrane, leaving the peritoneal and muscular coats exposed to the vapour of burning brimstone, and afterwards washed with soap and water. It is then blown up, dried, cut to the length of 7 or 8 inches, and bordered at the open end with a riband. It is drawn over the penis prior to coition, to prevent venereal infection and pregnancy.

CONDUCTIO, Tonic spasm, Convulsion.

CONDUC'TOR, *Director*, (q. v.) *Itinera'rium*, (F.) *Conducteur;* from *con*, 'with,' and *ducere*, 'to lead.' That which conducts. The *Conductor* was an instrument, formerly used in the high operation for the stone, for directing the forceps into the bladder.

CONDUIT, Canal—c. *Auditif externe*, Auditory canal, external—c. *Auditif interne*, Auditory canal, internal—c. *Auriculaire*, Auditory canal, external—c. *Cholédoque*, Choledoch duct—c. *Déférent*, Deferens vas—c. *d'Eustache*, Eustachian tube—c. *Gutturale de l'oreille*, Eustachian tube—c. *Labyrinthique*, Auditory canal, internal—c. *Ptérygoïdien*, Pterygoid canal—c. *Sousorbitaire*, Suborbitar canal—c. *Spermatique*, Deferens (vas)—c. *Thoracique*, Thoracic duct—c. *Vidien*, Pterygoid canal.

CONDUITS ADIPEUX, Fatty canals—c. *Aqueux*, see Aqueous—c. *Aveugles de l'urèthre*, see Cæcus—c. *Dentaires*, Dental canals—c. *Éjaculateurs*, Ejaculatory ducts—c. *Lacrymaux*, Lachrymal ducts—c. *Lactifères*, Lactiferous vessels—c. *Nourriciers*, Canals, nutritive—c. *Nutriciers*, Canals nutritive.

CONDULODES, Condyloid.

CON'DYLE, *Con'dylē*, *Con'dylus*, *Capit'ulum*, 'a knot, eminence.' An articular eminence, round in one direction, flat in the other. A kind of process, met with, more particularly, in the ginglymoid joints;—such as the condyles of the occipital, inferior maxillary bone, &c. Some anatomists have applied the term, however, to eminences that are not articular; as to the lateral tuberosities at the inferior extremity of the *os humeri*, and even to certain depressions; as to the concave, articular surfaces or *faces* at the upper extremity of the tibia. Chaussier calls the transverse root of the zygomatic process *Condyle of the temporal bone*.

CONDYLI DIGITORUM MANUS, Phalanges of the fingers.

CON'DYLOID, *Condyloï'deus*, *Condulo'des*, from κονδυλος, a 'condyle,' and ειδος, 'shape.' Having the shape of a condyle.

Condyloid Foram'ina, *Foram'ina Condyloi-*

dea. (F.) *Trous condyloïdiens.* (F.) *Fosses condyloïdiennes.* These are distinguished into *anterior* and *posterior.* They are four in number, seated in the occipital bone; two anterior, and two posterior to the *condyles* or *condyloid processes* of the same bone, and to depressions, which are called *Fossæ Condyloideæ.*

As the word *Condyloïdien* means—"that which has the shape of a condyle,"—it has been judiciously proposed, by some French anatomists, that *condylien* should be used in preference, in the case of the foramina and fossæ.

CONDYLO'MA, *Con'dylus,* from κονδυλος, 'a knot,' 'an eminence.' A soft, fleshy excrescence, of an indolent character, which appears near the orifice of the genital organs and rectum, and occasionally on the fingers and toes. It is the consequence of the syphilitic virus. Such tumours are also called *Dermophy'mata venerea.*

CONDYLUS, Condyloma.

CONESSI CORTEX, Nerium antidysentericum.

CONFEC'TIO, *Confec'tion,* from *confi''cio,* (*con,* and *facere,* 'to make.') 'I make up.' *Alig'ulus.* (F.) *Confiture, Condit.* In general it means any thing made up or preserved with sugar. In the late London Pharmacopœias, it includes the articles before called electuaries and conserves. *Confec'tio* or *Confec'tum* also means *Confectionary.*

Confectio Alkermes, Alkermes.

Confectio Amygdala'rum, *Almond Confection, Almond Paste, Pasta re'gia, P. Amygdali'na, Pasta Emulsi'va, Buty'rum Amygdala'rum Dulcium.* (F.) *Confection d'Amandes.* (*Sweet almonds* ℥j, *gum acacia* ʒj, *white sugar* ʒiv. Blanch the almonds, and beat into a paste.) A good mode of keeping almonds in a state fit for making emulsions.

Confectio Archig''eni, *C. Pauli'na.* (*Castor, long pepper, black pepper, storax, galbanum, costus, opium,* of each ℥ss. *saffron* ʒij, *syrup of wormwood* ʒij.) It was much recommended as a stimulant in nervous affections.

Confectio Aromat'ica, *Electua'rium Aromaticum, C. Cardiaca. C. Raleigha'na, Aromatic Confection, Sir Walter Raleigh's Cordial.* The following is the Ph. U. S. formula. (*Pulv. aromat.* ʒvss., *croci,* in pulv. ℥ss. *syrup aurant.* ℥vj., *Mel. despumat.* ℥ij. Rub the aromatic powder with the saffron; then add the syrup and honey, and beat together until thoroughly mixed.) Dose, ℈j, to ʒj.

Confectio Aurantio'rum, *C. Auran'tii Cor'ticis* (Ph. U. S.), *Conser'va Cor'ticum Aurantiorum, C. Cor'ticis Exterio'ris Aurantii Hispalen'sis. C. Flaved'inis Corticum Aurantiorum Hispalen'sium, Conser'va Aurantii. C. Citri Aurantii, Confection of the Orange, Conserve of Orange Peel.* (*Yellow part of the peel of the orange* ℔j. *rectified sugar* ℔iij, beat into a conserve.) It is stomachic, and an agreeable vehicle, corrigent, and adjuvant for other remedies. Dose, ℥ss.

Confectio Cardiaca, Confectio aromatica.

Confectio Cas'siæ, *Electua'rium Cassiæ Fis'tulæ, E. Cassiæ. E. e Cassiâ; E. laxati'vum, Conserva Cassiæ, Electuarium Cassiæ tamarinda'tum* seu *lenitivum, Electa'rium e Cassiâ, Diacas'sia cum Mannâ, Cassia Confection.* (*Cassia pulp* ℔ss, *manna* ℥ij, *tamarind pulp* ℥j, *syrup of roses* ℔ss. Bruise the manna, dissolve by heat, mix the pulp, and evaporate.) It is gently laxative. Dose, ℥ss.

Confectio Damocratis, Mithridate.

Confectio Hamec;—so called from an Arabian physician,—was composed of the bark of the *yellow myrobalans, black myrobalans, violets, pulp of colocynth, the polypodium of the oak, leaves of wormwood, thyme, aniseed, fennel, red roses, pulps of prunes, raisins, sugar, honey, senna, rhubarb,* &c. It was used as a purgative in glysters.

Confectio Hyacin'thi, *Hyacinth Confection, Electuarium* seu *Confectio de Croco emenda'ta olim dicta de hyacin'this* (P.) A tonic and slightly astringent confection, composed, according to Baumé, of *terra sigillata, crab's stones, cinnamon, leaves of the dittany of Crete, myrrh, saffron, syrup of lemon, camphor, Narbonne honey, oil of lemon,* &c.: and formerly the hyacinth was added, whence its name.

Confectio Opii, *Electua'rium Opia'tum, Confectio Opia'ta, Philo'nium Londinen'se, Theriaca Edinen'sis, Philo'nium Romanum, Opium Confection, Electuarium Theba'icum,* (*Hard opium* in powder, ʒivss; *Pulv. aromat.* ℥vj; *Mel. despumat.* ℥xiv; mix thoroughly. One grain of opium in 36:—Ph. U. S.) It is narcotic and stimulant. Dose, gr. x to ℈j.

Confectio Paulina, Confectio Archigeni—c. ex Capitibus papaveris, Diacodium.

Confectio Pip'eris Nigri, *Ward's Paste for Fistula.* (*Black pepper, elecampane root,* each ℔j, *fennel seed* ℔iij, *white sugar* ℔ij.) Dose, size of a nutmeg three or four times a day.

Confectio Raleighana, Confectio aromatica.

Confectio Rosæ Cani'næ, (L.) *Conserva Rosæ Caninæ, Conserva Cynos'bati, C. Cynorrhodi, Rob Cynosbatos, Confection* or *Conserve of Dog Rose.* (*Pulp of dog rose* ℔j, *sugar* ℥xx. Incorporate.) It is chiefly used as a vehicle for other remedies.

Confectio Rosæ Gal'licæ, (L.) *Conserva Rosæ Gal'licæ, Conserva Rosæ, C. Florum Rosa'rum Rubra'rum, C. Florum Rosæ Rubræ, Rhodosac'charum, C. Rosæ Rubræ, Confection of the Red Rose.* (*Petals* ℔j, *sugar* ℔iij.) In the Pharmacopœia of the United States, (1842,) the *Confectio Rosæ* is directed to be prepared as follows. *Red Roses,* in powder, ℥iv; *Sugar,* in powder, ℥xxx; *Clarified honey,* ℥vj; *Rose water,* f. ℥viij. Rub the roses with the rose water at a boiling heat; then add gradually the sugar and honey, and beat until thoroughly mixed. It is astringent, but chiefly used as a vehicle for other remedies.

Confectio Rutæ, *Confection of Rue.* (*Rue leaves dried, carraway seeds, bay berries,* of each ℥iss, *sagapenum* ʒiv, *black pepper* ʒij, *honey* ℥xvj. Mix.) It is given in clysters, as an antispasmodic and carminative.

Confectio de San'talis, *Confection of the Sanders,* (F.) *Confection de Sandaux.* (*Sandal wood, red coral, bole armeniac, terra sigillata, kermes berries, tormentil root, dittany, saffron, myrtle, red roses, calcined hartshorn, cloves.*) It was formerly used as an astringent.

Confectio Scammo'niæ, *Electua'rium Scammo'nii, Electuarium e Scammonio, Caryocostinum, Confection of Scam'mony.* (*powdered scammony* ℥iss, *bruised cloves, powdered ginger,* āā ʒvj, *oil of carraway* ʒss, *syrup of roses,* q. s.) A stimulating cathartic. Dose, ʒss to ʒj.

Confectio Sennæ, *Electuarium Cassiæ Sennæ, E. Sennæ cum Pulpis, E. Sennæ compos'itum, Benedic'tum Laxati'vum, Electuarium ape'riens, E. catholicum commu'nĕ, E. diapru'num, E. eccoprot'icum, Elect. Sennæ, E. e Sennâ, E. lenitivum, Confection of Senna*, &c. (*Senna leaves* ℥viij, *figs* lbj, *tamarind pulp, cassia pulp, pulp of French prunes*, each lbss, *coriander seed* ℥iv, *liquorice root* ℥iij, *sugar* lbiiss, *water* Oiv. Rub the senna and coriander together: separate 10 ounces of the powder with a sieve. Boil the residue with the figs and liquorice root in the water to one half; press out the liquor, and strain. Evaporate the liquor by means of a water bath to a pint and a half; add the sugar, and form a syrup. Rub the pulps with the syrup, gradually added; throw in the sifted powder, and beat till thoroughly mixed—Ph. U. S.) It is a laxative, and is used in habitual constipation, and in constipation during pregnancy. Dose ℥ss to ℥ss.

Confectio de Thurĕ, *Frankincense Confection*, (F.) *Confection d'Encens*. A compound of the *coriander seeds, nutmeg, thus, liquorice, mastich, cubebs, prepared hartshorn, conserve of red roses, sugar*, &c.

CONFECTION D'AMANDES, Confection, almond—*c. d'Encens*, Confectio de Thure—c. Frankincense, Confectio de Thure—c. of the Orange, Confectio aurantiorum—c. of the Red rose, Confectio rosæ Gallicæ—c. of Rue, Confectio rutæ—*c. de Sandaux*, Confectio de santalis—c. of the Sanders, Confectio de santalis.

CONFECTUM, Confection.

CONFERVA HELMINTHO-CORTOS, Corallina Corsicana.

Conferva Riva'lis. This species of *River Weed* has been recommended in cases of spasmodic asthma, phthisis, &c.

CONFIRMANTIA, Tonics.

CONFITURE, Confection.

CON'FLUENT, *Con'fluens*, from *con*, and *fluere*, 'to flow.' An epithet for certain exanthematous affections, in which the pimples, pustules, &c., run together. It is particularly applied to small-pox, so circumstanced. Some authors have called scarlatina or scarlet fever—*Confluent Measles, Morbil'li Confluentes*.

CONFLUENT DES SINUS, Torcular Herophili.

CONFLUEN'TIA, *Confœdera'tio*; same etymon. A term, employed by Paracelsus to express the concordance between a disease and its remedies.

CONFLUXIO, Sympathy.

CONFŒDERATIO, Confluentia.

CONFORMA'TION, *Conformatio, Diap'lasis*, from *conformare*, (*con*, and *formare*, 'to form,') 'to arrange,' 'dispose.' The natural disposition or arrangement of the body. *Faulty conformation*, (F.) *Vice de conformation*, is vice of original formation;—existing, of course, from birth. In French surgery, *Conformation* is used synonymously with *Coaptation*, and both it, *Diaplasis* and *Anaplasis*, mean, also, restoration to the original form—as in fractures, &c.

CONFORTANTIA, Tonics.

CONFORTATIVA, Tonics.

CONFORTER, (F.) *Confirma're, Confortare, Corrobora're*. To make stronger—to give energy. *Conforter l'estomac*, 'to strengthen the stomach.'

CONFRICA'TION, *Confrica'tio*, from *confricare* (*con*, and *fricare*, 'to rub.') The action of reducing a friable substance to powder, by rubbing it between the fingers; and of expressing the juice of a plant with the hand.

CONFRICA'TRIX; from *con*, 'with,' and *fricare*, 'to rub.' A female who practises masturbation.

CONFU'SÆ FEBRES. Intermittents, whose paroxysms are irregular and confused.—Bellini.

CONFU'SIO, from *confundo*, (*con* and *fundere*, 'to pour.') 'I mix together;' *Syn'chysis*. A disease of the eye, which consists in the mixture of the humours.—Galen. It has, also, been used synonymously with *Complexio*.

CONGELANTIA, Congelativa.

CONGELATIO, Catalepsy.

CONGELA'TION, *Congela'tio, Conglacia'tio, Gela'tio*, from *congelo*, (*con* and *gelare*,) 'I congeal,' 'I freeze.' The action of congealing, of passing to the solid state by the abstraction of heat; as *congelation of water, mercury*, &c. The term had once other acceptations. 1. It was synonymous with *concretion*. 2. With *coagulation*, in which sense it is still occasionally employed. 3. The ancients called all diseases, produced by cold, *congelations*, as well as those in which there was a kind of stupor or torpor—particularly catalepsy. Also, Frost-bite.

CONGELATI'VA MEDICAMEN'TA, *Conglutinan'tia, Congelan'tia*. Medicines, considered capable of uniting, or consolidating wounds, &c.

CON'GENER, *Congen'erous*, from *con*, 'with,' and *genus*, 'kind,' (F.) *Congénère*. Of the same kind or species. Resembling each other in some manner. When applied to muscles, it means that they concur in the same action; in opposition to the word *antagonist*, or that which acts in an opposite direction.

In France, *Congénères* is applied to those who join in the dissection of the same subject.

CONGENITÆ NOTÆ, Nævus.

CONGEN'ITAL, *Con'genite, Congenia'lis, Congen'itus*, from *con*, 'with,' and *genitus*, 'begotten.' (F.) *Congénial* ou *Congénital*. Diseases which infants have at birth: hence, *Congenital affections* are those that depend on faulty conformation; as *congenital hernia, congenital cataract*, &c. See Connate.

CONGES'TION, *Conges'tio*, from *congerere*, 'to amass,' 'accumulate,' &c. *Symphore'ma, Synathroism'us, Engorgement*. Accumulation of blood—*hyperæmia*, (q. v.)—or other fluid in an organ. It is an important symptom in febrile and other disorders. It may arise either from an extraordinary flow of blood by the arteries, or from a difficulty in the return of blood to the heart by the veins. More often, perhaps, it is owing to the latter cause, and is termed *venous congestion, stasis*, or *stagnation*—being not unusually attended with symptoms of oppression and collapse.

CONGESTION CÉRÉBRALE, Encephalohæmia—*c. Sanguine rachidienne*, Hypermyelohæmia.

CONGESTIVE FEVER. See Fever, congestive.

CONGLACIATIO, Congelation.

CONGLO'BATE, *Conglobu'tus*, from *conglobare*, (*con*, and *globus*, 'a ball,') 'to collect,' 'to gather into a ball.' (F.) *Conglobé*.

Conglo'bate Gland, *Glan'dula conglobu'ta*,

Glandula Muco'sa, Globate gland, Lymphat'ic gan'glion, (F.) *Glande conglobée, Ganglion lymphatique.* A round body, formed of lymphatic vessels, connected together by cellular structure, but having neither a cavity nor excretory duct. The mesenteric, inguinal and axillary glands are of this class.

CONGLOBÉ. Conglobate.

CONGLOM'ERATE, *Conglomera'tus,* from *con,* and *glomerare,* 'to gather in a heap,' *Glom'erate, Glomera'tus,* (F.) *Conglomeré.* Heaped together.

Conglom'erate Glands, *Glan'dulæ conglomera'tæ, Glandulæ vasculo'sæ,* are those whose lobules are united under the same membrane; as the liver, kidney, testicle, &c.

CONGLUTINANTIA, Congelativa.

CONGRÈS, (F.) *Congress, Congres'sus,* from *congredi, congressus* (*con,* and *gradi,* 'to go,') 'to go together.' This term, which has often been used synonymously with *Coition,* means, also, the ocular proof, formerly ordered by judicial authority, in the presence of surgeons and matrons, to test the impotence or capabilities of the parties;—a most unsatisfactory and indecent exhibition. It was forbidden by the Parliament of Paris in the year 1667.

CONGRESSUS. Coition.

CONI VASCULO'SI. Conical bundles, formed by the vasa efferentia of the testis: having their base towards the epididymis.

CONIA, κονια. A wine, prepared by fermenting the must of the grape on tar previously washed in sea-water.—Orfila. See, also, Lixivium.

Conia, Lixivium.

CONIASIS, Incrustation.

CONIOSTOSIS, Pulverization.

CONIS, Pulvis.

CONISTERIUM, Apodyterium.

CONI'UM MACULA'TUM, *Coni'um, Cicu'ta, Cicu'ta major, Abi'otes, Cicuta terres'tris, Cicuta major fœ'tida, C. vulgaris, Common Hemlock, Hemlock, Poison parsley, Spotted parsley* (F.) *Ciguë ordinaire, C. grande. Nat. Ord.* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. The leaves and seeds are narcotic and poisonous in an overdose. Light destroys the virtues of the leaves; and, therefore, the powder should be kept in opake bottles, well corked. It has been used as a palliative in cancer and other painful affections; but is not equal to opium. Externally, it has been applied in fomentation to cancerous and scrofulous ulcers. Dose, gr. ij. to x.

Dr'idson's Remedy for Cancer is said to consist of *powdered hemlock* and *arsenious acid.*

CONJONCTIVE, Conjunctiva.

CONJONCTIVITE, see Ophthalmia—*c. Blennorrhagique,* see Ophthalmia.

CONJUGAISON, Conjugation.

CONJUGA'TION, *Conjuga'tio,* from *conjugare,* (*con,* and *jugum,* 'a yoke,') 'to yoke together.') (F.) *Conjugaison.* Assemblage, union, *Conju'gium.*

Conjugatio'nis Foram'ina. (F.) *Trous de conjugaison.* The apertures at the sides of the spine, formed by the union of the notches of the vertebræ. They give passage to the nerves of the spinal marrow, and to the vessels, which enter, or issue from, the vertebral canal.

CONJUGIUM, Coition, Conjugation.

CONJUNC'TI (MORBI.) from *conjungere,* (*con* and *jungere,*) 'to join together.' Diseases joined together. Authors have distinguished two kinds of these:—one, in which the diseases go on simultaneously—*morbi connex'i;*—the other, in which they succeed each other—*morbi consequen'tes.*

CONJUNCTIO, Articulation.

CONJUNCTI'VA MEMBRA'NA, *Circumcaula'lis, Epipeph'ycos, Tu'nica agna'ta, Tu'nica adna'ta, T. conjuncti'va,* (F.) *Conjonctive, Membrane adnée.* A mucous membrane, so called because it unites the globe of the eye with the eyelids. It covers the anterior surface of the eye, the inner surface of the eyelids, and the *caruncula lachrymalis.* It possesses great general sensibility, communicated to it by the fifth pair.

CONJUNCTIVITIS, Ophthalmia—c. Ægyptiaca, Ophthalmia, purulent—c. Biennorrhagica, see Ophthalmia—c. Catarrhalis, Ophthalmia, catarrhal—c. Gonorrhoica, see Ophthalmia—c. Puro-mucosa catarrhalis, Ophthalmia, catarrhal—c. Puro-mucosa contagiosa vel Ægyptiaca, Ophthalmia, purulent.

CONJUNGENS, Communicans.

CONNATE, from *con* and *natus,* 'born with.'

Connate Diseases, (F.) *Maladies connées, Morbi connati,* are such as an individual is born with:—*connate* having the same signification as *congenital.* A difference has been made by some, however; those diseases or conditions, which are dependent upon original conformation, being called *congenital;*—whilst the diseases or affections, that may have supervened during gestation or delivery, are termed *connate.*

CONNECTICUT, MINERAL WATERS OF. There is a mineral spring at Stafford in this state, twenty-four miles from Hartford, which has obtained more celebrity than any one in New England. Its principal ingredients are iron and carbonic acid. It, consequently, belongs to the class of acidulous chalybeates. There are other springs in the state, of which, however, little that is accurate is known.

CONNEXIO OSSIUM CARNOSA, Syssarcosis.

CONNUTRI'TUS, *Syn'trophos,* from *con,* 'with,' and *nutrior,* 'I am nourished.' A disease is so called which has grown up, as it were, with an individual, or has been connate with him.—Hippocr., Galen.

CONOID, *Conoïdeus, Conoï'des,* from κωνος, 'a cone,' and ειδος, 'shape,' (F.) *Conoïde.* Resembling a cone.

Conoid Lig'ament. A ligament, passing from the coracoid process to the scapula, and forming part of the *coraco-clavicular,* (q. v.) ligament of some anatomists.

CONOIDES CORPUS, Pineal gland.

CONOPHTHALMIA, Staphyloma Corneæ.

CONQUASSANT, (F.) *Conquassans,* from *con,* 'with,' 'together;' and *quassare,* 'to shake.' *Douleurs conquassantes* are the pains of parturition, at the time of their greatest intensity, when the head is engaged in the pelvis.

CONQUASSA'TION. Same etymon. A pharmaceutical operation, which consists in dividing, with a pestle, fresh vegetables, fruits, &c. See Confrication.

CONQUE. Concha.

CONSECU'TIVE, *Consecuti'vus,* from *con,* 'with,' and *sequor,* 'to follow.'

Consecutive Phenom'ena or Symptoms, (F.) *Phenomènes ou accidens consécutifs,* are such as

appear after the cessation of a disease, or, according to others, during its decline; but without having any direct connexion with it.

CONSENSUS, Consent of parts, Sympathy.

Consen'sus Oculo'rum. The intimate association between the two eyes, as exemplified in their consentaneous action in health, and often in disease.

CONSENT OF PARTS, *Consen'sus*, *Consen'sus par'tium*, *Sympathi'a*, from *con*, and *sentire*, 'to feel.' (F.) *Consentement des Parties*. That relation of different parts of the body with each other, which is more commonly denominated sympathy, (q. v.)

CONSENTEMENT DES PARTIES, Consent of parts.

CONSERVA'TION, *Conserva'tio*, *Phylax'is*, from *conservare*, (*con*, and *servare*,) 'to preserve.' (F.) *Conservation*, *Asservation*. The art of preserving any object of pharmacy; any remedial agent, &c., from decay.

CONSER'VA, *Conserve*. Same etymon. A pharmaceutical preparation, composed of a vegetable substance and a sufficient quantity of sugar. The London and American pharmacopœias prefer the term Confection, (q. v.)

Conserva Absin'thii, *C. Absin'thii marit'imi*, *Conserve of Wormwood*. (*Leaves* ℔j, *sugar* ℔iij.) It has been employed as a tonic, stomachic, and vermifuge.

Conserva Angel'icæ (P.,) *Conserve d'Angélique*, *C. of Angel'ica*. (*Pulp of root* 250 parts; *white sugar*, boiled in a decoction of the root, and reduced to the consistence of a solid electuary, 1000 parts.) It is tonic, aromatic, and stomachic.

Conserva de Apio Graveolen'tē (P.) *Conserve d'Ache*, *Conserve of Smallage*. Prepared like the preceding. Reputed to have the same properties.

Conserva Ari, *Conserve of Arum*. (*Fresh root* ℔ss, *sugar* ℔iss.) Esteemed diuretic and stimulant.

Conserva Aurantii, Confectio aurantiorum—c. Cassiæ, Confectio cassiæ—c. Citri aurantii, Confectio aurantiorum—c. Corticis exterioris aurantii Hispalensis, Confectio aurantiorum—c. Corticum aurantiorum, Confectio aurantiorum—c. Florum rosarum rubrarum, Confectio rosæ Gallicæ—c. Cynosbati, Confectio rosæ caninæ—c. Cynorrhodi, Confectio rosæ caninæ—c. Flavedinis corticis aurantiorum Hispalensium, Confectio aurantiorum—c. Rosæ, Confectio rosæ Gallicæ—c. Rosæ caninæ, Confectio rosæ caninæ—c. Rosæ Gallicæ, Confectio rosæ Gallicæ.

Conserva Cochlea'riæ Horten'sis, *Conserve of Lemon Scurvy Grass*. (*Leaves* ℔j, *sugar* ℔iij.) Reputed to be stimulant and antiscorbutic.

Conserva Lu'julæ, *C. Folio'rum lu'julæ*, *Conserve of Woodsorrel*. (*Leaves* ℔j, *sugar* ℔iij.) Gratefully acid and refrigerant.

Conserva Menthæ, *C. Menthæ folio'rum*, *C. Menthæ sati'væ*, *Conserve of Mint*. (*Leaves* ℔j, *sugar* ℔iij.) Stomachic in nausea and vomiting.

Conserva Pruni Sylves'tris, *Pulpa pruno'rum sylves'trium condi'ta*, *C. Prunæ sylvestris*, *Conserve of Sloes*. (*Pulp* 1 part, *sugar* 3 parts.) Possessed of astringent properties.

Conserva Scillæ, *Conserve of Squill*. (*Fresh squills* ℥j, *sugar* ℥x.) Possesses the diuretic and other virtues of the squill.

CONSERVE D'ACHE, Conserva de apio graveolente—c. Lemon scurvy grass, Conserva cochleariæ hortensis—c. of Mint, Conserva menthæ—c. of Orange, (red.) Confectio aurantiorum—c. of Aloes, Conserva pruni sylvestris—c. of Smallage, Conserva de apio graveolente—c. of Woodsorrel, Conserva lujulæ—c. of Wormwood, Conserva absinthii.

CONSERVES, Spectacles.

CONSIDENTIA. This word has two acceptations. 1. It is synonymous with *Apocatastasis*; and, 2. It signifies contraction of any cavity or canal:—See Synezisis.

CONSISTEN'TIA. A Latin term employed in two senses. 1. When joined to the word *Morbi* or *Ætatis*, it expresses the acme of a disease, or the *age* at which the constitution has acquired its full strength. 2. By *Consisten'tia humo'ris* is meant the density of a humour.

CONSOLIDA MAJOR, Symphytum—c. Media, Ajuga, Chrysanthemum leucanthemum—c. Minor, Prunella—c. Regalis, Delphinium consolida—c. Rubra, Tormentil—c. Saracenica, Solidago virgaurea.

CONSOLIDAN'TIA, *Consolidati'va Medicamen'ta*, from *con*, and *solidus*, solid. Substances, formerly given for the purpose of consolidating wounds, or strengthening cicatrices.

CONSOLIDATIVA, Consolidantia.

CONSOMMÉ, *Consumma'tum*, *Zomos*. Soup, strongly charged with gelatin, and consequently very nutritious, although not proportionably easy of digestion.

CONSOMPTION. Consumption.

CONSORTIUM, Sympathy.

CONSOUDE, GRANDE, Symphytum.

CONSOUND, MIDDLE, Ajuga.

CONSPERSIO, Catapasma.

CONSPICILLA, Spectacles.

CONSPIRATIO, Sympathy.

CONSTELLA'TUM UNGUEN'TUM An ointment composed of cleansed earthworms! dried and pulverized; and of the fat of the bear or wild boar. It was formerly employed in toothache, and to hasten the cicatrization of wounds.

CONSTERNATIO, Stupor.

CONSTIPATIO, Stegnosis.

CONSTIPATION, *Constipa'tio*, from *constipare*, (*con* and *stipare*,) 'to cram close.' *Obstipa'tio*, *Adstric'tio*, *Obstipa'tio alvi'na*, *Ischocoi'lia*, *Aleus adstric'ta*, *A. Tarda*, *A. Dura*, *Obstruc'tio alvi*, *O. Ductus alimenta'rii*, *O. intestina'lis*, *Torpor intestina'rum*, *Stypsis*, *Constipa'tio alvi*, *Copros'tasis*, *Dyscoi'lia*, (F.) *Echauffement*, *Ventre resserré*, *Costiveness*, *Fæcal Reten'tion*, *Alvine obstruction*. A state of the bowels, in which the evacuations do not take place as frequently as usual; or are inordinately hard, and expelled with difficulty. It may be owing, either to diminished action of the muscular coat of the intestines, or to diminished secretion from the mucous membrane, or to both. Cathartics will usually remove it; after which its exciting and predisponent causes must be inquired into and obviated to render the cure permanent.

CONSTITUTIO, Habit of body—c. Nervosa, Nervous diathesis.

CONSTITU'TION, *Constitu'tio*, *Catas'tasis*, *Status*, from *con*, and *statuere*, from *stare*, 'to stand.' A collection of several parts, forming

a whole. In medicine, *Constitution* means the state of all the organs of the human body considered in regard to their particular and respective arrangement, order, or activity. A *good constitution* is one in which every organ is well developed, and endowed with due energy, so that all perform their functions with equal facility. Any want of equilibrium in their development and energy, forms a difference in the constitution. We say that a man is of a *good* or *robust*, a *delicate* or *weak constitution*, when he is commonly healthy, or commonly labouring under, or unusually susceptible of, disease.

Constitu'tion of the At'mosphere, *Constitu'tio A'eris*, (F.) *Constitution Atmosphérique*. The condition of the atmosphere, as regards dryness and humidity, temperature, heaviness, direction of the winds, &c, considered as respects their influence on the animal economy.

Constitution, Epidem'ic, or Constitution, Med'ical, (F.) *Constitution médicale, C. épidémique*. The aggregate of meteorological conditions, so far as they are appreciable, during which diseases prevail epidemically.

CONSTITU'TIONAL, (F.) *Constitutionnel*. Belonging to the constitution of an individual; to his manner of being; as *constitutional phthisis, c. gout*, &c. By some, this epithet has been given to diseases, produced by the constitution of the atmosphere, but this acceptation is not common.

CONSTRICTEURS DE LA VULVE, Constrictores cunni—c. *du Vagin*, Constrictores cunni.

CONSTRICTIO, Systole.

CONSTRICTIVA, Styptics.

CONSTRIC'TOR, from *constringere*, (*con*, and *stringere*,) 'to bind.' (F.) *Constricteur*. That which binds in a circular direction. A sphincter (q. v.) Different muscles are so called.

Constrictor Ani, Sphincter ani externus.

Constrictor of Nuck, Compressor of Nuck.

Constrictores Alarum Nasi, Depressor Alæ Nasi—c. Isthmi faucium, Glossostaphylinus—c. Nasi, Compressor naris—c. Oris, Orbicularis oris—c. Palpebrarum, Orbicularis palpebrarum.

Constricto'res Cunni, *Clitor'idis inferio'res lati et plani mus'culi, Sphincter Vagi'næ* (F.) *Constricteurs du vagin, C. de la Vulve*. Small muscles, which originate beneath the clitoris, descend along the sides of the vagina, and terminate by becoming confounded with the *transversus perinæi* and *external sphincter ani* muscles. Their use is to contract the entrance of the vagina.

Constricto'res Laryn'gis. Lieutaud describes, under the name *Grand constricteur du larynx*, the muscle *Crico-arytenoideus latera'lis* with the *Thyro-arytenoideus*.

Constrictor Œsoph'agi, *Constrictor of the Œsoph'agus*, (F.) *Constricteur de l'Œsophage, Muscle œsophagien*. A fasciculus of fleshy, circular fibres, at the upper part of the œsophagus.

Constricto'res Pharyn'gis, *Constrictors of the Pharynx, Sphincter Gulæ*. Muscular expansions which assist in forming the parietes of the pharynx. Three of these are generally admitted. 1. The *Constrictor Pharyngis infe'rior, Crico-Pharyngeus* and *Thyro-pharyngeus, Crico-thyro-pharyngien*. It is broad, very thin, quadrilateral, and seated superficially, extending from the thyroid and cricoid cartilages as far as the middle of the pharynx, and uniting, on the median line, with that of the opposite side. 2. The *Constrictor Pharyngis Medius, Hyo-pharyngeus* and *Chondro-pharyngeus, Syndes'mo-pharyngeus, Hyo-glosso basi-pharyngien*, occupies the middle part of the pharynx. It is triangular, and attached, anteriorly, to the great and little cornu of the os hyoides; to the stylo-hyoid ligament; and terminates, posteriorly, by joining its fellow of the opposite side. 3. The *Constrictor Pharyngis supe'rior, Ceph'alo-pharyngeus, Glosso-pharyngeus, Mylo-pharyngeus, Pter'ygo-pharyngeus, Pterigo-syndesmo-staphili-pharyngien*, is quadrilateral, and extends from the internal ala of the pterygoid process, from the inter-maxillary ligament, from the internal oblique line of the jaw, and from the base of the tongue to the posterior part of the pharynx.

The constrictors of the pharynx contract it. They can likewise approximate the ends to each other. Chaussier considers those and the *stylo-pharyngeus* as but one muscle, and includes all under this last name.

CONSTRINGENTIA, Astringents, Styptics.

CONSUETUDO, Habit—c. Menstrua, Menses.

CONSULTA'TION, *Consulta'tio, Delibera'tio, Cœnolog''ia, Conten'tio, Symboleu'sis*, from *consulere, consultum*, 'to hold council.' This word has several acceptations. In English, it means, almost always, the meeting of two or more practitioners, to deliberate on any particular case of disease. In France, it signifies the written result of such deliberations, as well as the opinion of a physician, given to a patient, who consults him, either personally or by writing.

CONSULT'ING PHYSIC''IAN or SURGEON. *Médecin* ou *Chirurgien consultant*. One, who consults with the attending practitioner, regarding any case of disease. Some physicians, surgeons, and accoucheurs confine themselves to consulting practice.

CONSUMMATUM, *Consommé*.

CONSUMP'TION, from *consumere*, (*con* and *sumere*,) 'to waste away.' *Consump'tio, Syntex'is*, (F.) *Consomption*. Progressive emaciation or wasting away. This condition precedes death, in the greater part of chronic diseases, and particularly in *phthisis pulmonalis*: on this account it is, that phthisis has received the name *consumption*.—See Phthisis. *Fièvre de Consomption, Consumptive fever*, is the same as *Hectic fever*, (q. v.)

Consumption, Pulmonary, Phthisis pulmonalis.

CONSUMPTIVA. Same etymology. Caustics, used for the destruction of fungi. *Burnt alum, lunar caustic*, &c., were formerly so called.

CONTABESCEN'TIA, from *contabescere*, (*con* and *tabescere*,) 'to grow lean.' Consumption, marasmus, atrophy, (q. v.) &c.

CONTACT, *Contac'tus*, from *con* and *tangere*, 'to touch.' The state of two bodies that touch each other. In the theory of contagious diseases, we distinguish *immediate* or *direct contact*, as when we touch a patient labouring under one of those diseases; and *mediate* or *indirect contact*, when we touch, not the patient himself, but objects that have touched or emanated from him. The air is, most commonly,

the medium by which this last kind of contact is effected

CONTA'GION, *Conta'gio, Conta'ges, Conta'gium, Aporrhœ'a, Apoc'rysis.* Same etymon. The transmission of a disease from one person to another, by direct or indirect contact. The term has, also, been applied, by some, to the action of miasmata arising from dead animal or vegetable matter, bogs, fens, &c., but in this sense it is now abandoned. Contagious diseases are produced, either by a virus, capable of causing them by inoculation, as in small-pox, cow-pox, hydrophobia, syphilis, &c., or by miasmata, proceeding from a sick individual, as in plague, typhus gravior, and in measles and scarlatina. Scrofula, phthisis pulmonalis, and cancer, have, by some, been esteemed contagious, but apparently without foundation. Physicians are, indeed, by no means unanimous in deciding what diseases are contagious, and what not. The contagion of the plague and typhus, especially of the latter, is denied by many. It seems probable, that a disease may be contagious under certain circumstances and not under others. A case of common fever, arising from *common causes*, as from cold, if the patient be kept in a close, foul situation, may be converted into a disease, capable of producing emanations, which will excite a similar disease in those exposed to them. *Contagion* and *infection* are generally esteemed synonymous. Frequently, however, the former is applied to diseases not produced by contact; as measles, scarlet fever, &c., whilst *infection* is used for those that require positive contact; as itch, syphilis, &c., and conversely. Diseases, which cannot be produced in any other way than by contagion, are said to have their origin in *specific contagion;* as small-pox, cow-pox, measles, hydrophobia, syphilis, &c. Those which are produced by contagion, and yet are sometimes owing to other causes, are said to arise from *common contagion;* as typhus, cynanche parotidæa, &c.

CONTA'GIOUS, *Contagio'sus.* Capable of being transmitted by mediate or immediate contact; as a *contagious disease, contagious fever, contagious effluvia,* &c.

CONTAGIUM, Miasm.

CONTEMPLATIF, (F.) *Contemplati'vus,* (*con* and *templum.*) Appertaining to contemplation. The predominant idea of the melancholic—of the monomaniac—is sometimes called *contemplative.*

CONTEMPLATIO, Catalepsy.

CONTENSIO, Tension.

CONTENTIO, Consultation.

CONTEX'TURE, *Contextu'ra, Contex'tus,* from *con* and *texere,* (quasi *tegsere,* from *tegere,* 'to cover') 'to weave,' 'to make a web.' Arrangement of parts;—texture. A name given, metaphorically, to the structure of organized bodies; as *the contexture of muscles, fibres,* &c. See Tissue and Texture.

CONTIGUITY, DIARTHROSIS OF, see Continuity.

CON'TINENCE, *Continentia,* from *continere,* (*con* and *tenere,* 'to hold or keep,') 'to contain oneself;' 'to restrain.' Abstinence from the pleasures of physical love.

CON'TINENT, *Con'tinens.* This word is synonymous with *Continued.* (F.) *Continu.*

CONTINENT CAUSE, *Causa conjunc'ta,* is a cause, real or presumed, which, having given rise to a disease, continues to act during the whole of its duration. It may be considered synonymous with proximate cause. A *continent fever, Febris continens,* is one which preserves, during its whole course, the same degree of intensity, without any remission or sensible exacerbation. A disease, which continues uninterruptedly, has been, also, called *Æipathei'a,* or *Aeipathei'a.*

CONTIN'UED FEVER, *Febris contin'ua, F. continens, F. anabat'ica, F. assid'ua.* A fever which presents no interruption in its course. Continued fevers form a division in the class *Pyrexiæ* of Cullen, and include three genera,—*Synocha, Synochus, and Typhus.* It is proper to remark, that some of the older writers make a distinction between the continual fever, συνεχης, *febris continua,* and the *synochus* or *febris continens.* Thus, Rhases states that the synochus or *continens* is a fever, which consists of one paroxysm from beginning to end; whilst the *continual* is allied to intermittents.

CONTINUITY, *Continu'itas.* An adhesion of two things between each other, so that they cannot be separated without fracture or laceration

CONTINUITY, DIARTHRO'SES, OF (F.) *Diarthroses de Continuité,* are movable joints, in which the bones are continuous, but do not touch immediately: there being, between them, a ligamentous substance, whose flexibility permits motion. The vertebral articulations are examples of this. DIARTHROSES OF CONTIGU'ITY, *Diathroses de Contiguité,* on the other hand, are movable articulations, in which the bones are not continuous, but touch by surfaces covered with a cartilaginous layer, which is always moistened by synovia.

CONTINUITY, SOLUTION OF, is any division of parts, previously continuous. Wounds and fractures are *solutions of continuity.* The word *Continuity* is opposed to *Contiguity:* the latter meaning the condition of two things which are near each other, or touch without uniting. There is *contiguity* between the head of the humerus and the glenoid cavity of the scapula, but not *continuity.*

CONTONDANT, Contunding.

CONTOR'SION, *Contor'sio,* from *contorqueo,* (*con* and *torquere,* 'to wring,') 'I twist about.' Violent movement of a part, accompanied with a kind of torsion; as *contortion of the face.*

CONTRA-APERTU'RA, from *contra,* 'against,' and *aperio,* 'I open.' A *counter-opening. Contra-incis'io, Incis'io priori opposita,* (F.) *Contre-ouverture.* An incision, made in the most depending part of a wound or abscess, when the first opening is not situate in a manner favourable for the discharge of the pus.

CONTRA-EXTENSIO, Counter extension.

CONTRAC'TILE, *Contrac'tilis,* from *contrahere,* (*con* and *trahere,*)'to draw together.' Capable of contracting. The fibre of muscles is *contractile.*

CONTRACTIL'ITY, *Contractilitas:* same etymon. (F.) *Contractilité.* That vital property, which gives, to certain parts, the power of contracting. The muscles of locomotion are endowed with a power of *voluntary contractility,* or one dependent immediately on the action of the brain; the muscles of the viscera

of digestion, and other internal organs, enjoy an *involuntary contractility*. *Contractility* and *irritability* are frequently used synonymously to signify the property possessed by any tissue of *contracting* on the application of an appropriate stimulus.

CONTRAC'TION. Same etymon. *Sys'tolē*. Action of contracting. When we speak of the *contraction of a muscle*, we mean the phenomenon it exhibits during the time it is in action.

CONTRACTU'RA. Same etymon. *Acamp'sia*, *Enta'sia articula'ris*, *Mus'cular Stiff joint*. A state of permanent rigidity and progressive atrophy of the flexor muscles, which prevents the motions of extension beyond a certain limit. The affected muscles form hard cords beneath the skin. On dissection, they are found converted into tendinous fibres, the fleshy fibres having almost disappeared, when the disease has been of any duration. It succeeds, frequently, other diseases, particularly rheumatism, neuralgiæ, convulsions, syphilis, colica pictonum, &c. The warm bath, vapour bath, or thermal waters, oleaginous embrocations, mechanical extension of the limbs, &c., are the chief means of treatment.

CONTRA-FISSU'RA, from *contra*, 'against,' and *findo*, *fissum*, 'I cleave.' *Repercus'sio*, *Reson'itus*, *Catag'ma Fissura contrajaxens*, *Apeché'ma*, (F.) *Contre-coup*, *Contre-fente*, *Contre-fracture*. A fracture, contusion, or injury, produced by a blow in a part distant from that which is struck. Five species of *contra-fissuræ* or *contre-coups* may occur in the skull. 1. When the internal table yields and fractures. 2. When the bone breaks in any other part than the one struck. 3. When a bone, which has been struck, remains uninjured, and its neighbour is fractured. 4. When the bone is fractured in a place diametrically opposite to that struck, as in fractures at the base of the cranium, from a fall on the vertex; and lastly, when the violence of the blow produces a separation of the neighbouring or distant sutures. These fractures of the skull are also called *Fractures par résonnance*.

CONTRA-INCISIO, Contra-apertura.

CONTRA-INDICATIO, Counter-indication.

CONTRA-IRRITATIO, Counter-irritation.

CONTRACTILITÉ PAR DEFAUT D'EXTENSION, Elasticity—*c. de Tissu*, Elasticity.

CONTRACTILITY, Irritability.

CONTRACTIO CORDIS, Systole.

CONTRAHENTIA, Astringents, Styptics.

CONTRA-LUNA'RIS, from *contra*, 'against,' and *luna*, 'the moon.' An epithet for a woman who conceives during the menstrual discharge.—Dietrich.

CONTRA-STIMULANS, Contro-stimulants.

CONTRAYERVA, Dorstenia contrayerva—*c. Balls*, *pulvis contrayervæ compositus*—*c. Mexican*, Psoralea pentaphylla—*c. Nova*, Psoralea pentaphylla—*c. Lisbon*, Dorstenia contrayerva—*c. Virginiana*, Aristolochia serpentaria.

CONTRE-COUP, Contra-fissura.

CONTRE-EXTENSION, Counter-extension.

CONTRE-FENTE, Contra-fissura.

CONTRE-FRACTURE, Contra-fissura.

CONTRE-INDICATION, Counter-indication.

CONTRE-OUVERTURE, Contra-apertura.

CONTREXEVILLE, MINERAL WATERS OF. Contrexeville is a town in France, in the department of Vosges, four leagues from Neufchâteau. The waters contain carbonate of iron, chloride of calcium, and carbonate of lime, chloride of sodium, a bituminous substance, and free carbonic acid. They are frequented by those labouring under cutaneous, scrofulous, and calculous affections.

CONTRIT''IO, *Syntrimma*, *Syntripsis*, *Tritu'ra*, *Tritus*, *Tri''tio*, from *contero*, 'I bruise or make small:' *Comminu'tion*, *Trituration*.

CONTRO-STIM'ULANT, *Contrastim'ulans*, *Hyposthenic*, from *contra*, 'against,' and *stimulus*, 'that which excites.' A substance that possesses a particular, debilitating property, acting upon the excitability in a manner opposite to stimulus. A name given to therapeutical agents, which, according to the Italian theory of *Contro-stimulus*, are endowed with the property of diminishing excitement by a specific action. These agents are by no means clearly defined.

CONTRO-STIM'ULUS Same etymon. The name given by Rasori, about thirty years ago, to a new medical doctrine, of which he was the originator—*La nuova Dottrina Medica Italiana*. It is founded on the contro-stimulant property, attributed to a certain number of medicines. In this doctrine, as in that of Brown, under the name *excitability*, a fundamental principle of physiology is admitted, by virtue of which living beings are endowed with an aptitude for feeling the action of external agents or exciting influences, and of reacting on these same influences. When this excitability is too great, there is excess of stimulus or *Hypersthéni'a*: when too little, there is deficiency or *Hyposthéni'a*. Diseases, *general* and *local*, are divided into three great classes, or into, 1. *Hypersthenic*; 2. *Hyposthenic*; 3. *Irritative*. The contro-stimulant physicians admit only two classes of medicines—*stimulants* and *contro-stimulants*.

CONTUND'ING, *Contu'sing*, *Contundens*, from *contundere*, (*con*, and *tundere*) 'to bruise.' (F.) *Contondant*. That which causes contusions. An epithet given to round, blunt, vulnerating projectiles, which bruise or lacerate parts without cutting them.

CONTUS, Contused.

CONTUS, Penis.

CONTU'SED. Same etymon. (F.) *Contus*. Affected with contusion. Thus we say—a *contused wound*.

CONTU'SION, *Contu'sio*, a *Bruise*, *Collis'io*, *Phlasma*, *Thlasis*, *Thlas'ma*, *Th. Contusio*, (F.) *Meurtrissure*. Same etymon. An injury or lesion—arising from the shock of a body with a large surface, which presents no loss of substance, and no apparent wound. If the skin be divided, the injury takes the name of *contused wound*. The differences of contusion, as to extent, are of course infinite. When slight, the blood stagnates in the capillaries of the skin, or is effused into the subcutaneous cellular tissue. Time and cold applications remove it. When the texture of the parts has been lacerated, there is effusion of blood, with more or less torpor in the part. Cooling applications, general or topical V. S., emollients, poultices, compression, &c., are here necessary, according to circumstances. In the severest kinds of contusion, all the soft and solid parts, except the skin, are bruised, and, at

times, reduced to a kind of pap. When the disorganization is to this extent, there is no hope except in amputation. A deep contusion of the soft parts has been called *Sarcothlasis*, and *Sarcothlas'ma*.

CONVALES'CENCE, *Convalescen'tia*, from *convalescere*, (*con* and *valescere*) 'to grow well.' *Exanas'trophē*. Recovery of health, after disease. The time which elapses between the termination of a disease, and complete restoration of strength.

CONVALLA'RIA MAIA'LIS, from *convallis*, 'a valley,' from its abounding in valleys. *Lil'ium Conval'lium*, *Convalla'ria*, *Maian'themum*, *Lily of the Valley*, *May Lily*, (F.) *Muguet*, *Muguet de Mai*. The recent flowers are reputed to be aromatic, cephalic, errhine, cathartic. They are not used.

Convalla'ria Polygona'tum. The systematic name of *Solomon's Seal*, *Polygona'tum uniflo'rum*, *Sigil'lum Salomo'nis*, *Polygona'tum*. The root was once used as an astringent and tonic. It is, also, a reputed cosmetic.

Convalla'ria Multiflo'ra, *Polygona'tum multiflo'rum*, which grows in this country and in Europe, has analogous properties.

CONVER'SION, *Conver'sio*, from *con*, and *vertere*, 'to turn.' Change from one state into another.

Conversion of Diseases, (F.) *Conversion des maladies*, is the change or transformation of one disease into another.

CONVENTUS, Coition.

CONVOLU'TION, *Convolu'tio*, from *convolvere*, (*con* and *volvere*) 'to entwine.' *Episphæ'rion*, *Gyrus*, (F.) *Circonvolution*. Rolling of any thing upon itself.

Convolu'tions Cer'ebral, *Gyri* seu *Proces'sus enteroïdei Cer'ebri*, are the round, undulating, tortuous projections, observed at the surface of the brain. In them, Gall's organs, of course, terminate.

Convolu'tion, Inter'nal. *C. of the Corpus Callo'sum*, *Convolution d'Ourlet* (Foville.) A cerebral convolution of great extent, the principal portion of which is found on the inner surface of each hemisphere above the corpus callosum. In front it bends downwards and backwards to the fissure of Sylvius, and behind it extends to the middle lobe and forms the hippocampus major.

Convolu'tions, Intes'tinal, are the turns made by the intestines in the abdomen.

Convolu'tion, Supra-or'bitar. A convolution of the brain, which exists on the inferior surface of the anterior lobe, and rests upon the roof of the orbit.

CONVOLVULUS, Intussusceptio, Ileus.

Convol'vulus Bata'tas. Same etymon. *C. In'dicus*. The *Sweet Potato*, *Spanish Potato*. This is the only esculent root of the genus Convolvulus. It is much eaten in the United States.

Convol'vulus Cantab'rica, *Cantabrica*, *Lavender-leaved Bindweed*. It has been considered anthelmintic and actively cathartic.

Convolvulus Indicus, C. Batatas.

Convol'vulus Jala'pa. A systematic name of the Jalap plant, properly *Ipomœa Jalapa*; *Jala'pium*, *Mechoaca'na nigra*, *Jalappa*, *Jalapa*, *Jalap Root*, *Gialappa*, *Xalappa*, *Bryo'nia Mechoachan'a ni'gricans*, *Bryo'nia Peruvia'na*, *Chela'pa*, *Rhabar'barum Nigrum*, *Gelappium*, (F.) *Jalap*, is procured from South America. Its odour is nauseous; taste sweetish and slightly pungent. It is solid, hard, heavy, brittle: fracture resinous; internally, light gray; externally, covered with a deep brown, wrinkled bark. Its operation is cathartic, the resinous part griping violently. Dose, 10gr. to ʒss. A drop or two of any essential oil may prevent it from griping. An active principle has been separated from Jalap, to which the names *Jalapine* and *Cathartine* have been given.

Convolvulus Major Albus, Convolvulus sepium—c. Maritimus, Convolvulus soldanella.

Convol'vulus Mechoachan, *Mechoaca'næ Radix*, *Jalappa alba*, *Rhabar'barum album*, *Mechoacan*, (F.) *Rhubarbe blanche*. A Mexican convolvulus, the root of which possesses aperient properties, and was once extensively used instead of jalap.

Convolvulus Megalorhizus, C. Panduratus.

Convol'vulus Pandura'tus, *C. Megalorhi'zus*, *Pseudo-mechoaca'na*, *Fiddle-leaved Bindweed*, *Hog Potato*, *Virginian Bindweed*, *Wild Pota'to*, *Meck'ameck*, *M. Bindweed*, *Wild Jalap*, *Man in the ground*, *Wild Rhubarb*, *Wild Potato-Vine*, *Kassau'der*, *Kassa'der*, *Kussander*, (F.) *Liseron Mechamec*. In Virginia, and some other parts of the United States, the root of this plant has been much recommended in cases of gravel. It is used either in powder or decoction.

Convolvulus Perennis, Humulus lupulus.

Convolvulus pes Ca'præ, *Bargada*. A plant used in India as a cataplasm in arthritic cases.

Convolvulus Scammo'nea seu Scammo'nia, *C. Syriacus*. The systematic name of the *Scammony Plant*. A Syrian and Mexican plant; the concrete gummi-resinous juice of which, *Scammo'nia*, *Scammoniæ Gummi Resi'na*, *Scammonium*, *S. Syriacum*, *Diagryd'ium*, *Dacrydion*, *Scammony*, *Mahmoudy*, (F.) *Scammonée d'Alep*, comes to us in blackish-gray fragments, becoming whitish-yellow when touched with wet fingers. It is a drastic, hydragogue cathartic. Dose, gr. iij. to gr. xv., triturated with sugar.

Convolvulus, Sea, Convolvulus Soldanella.

Convol'vulus Se'pium, *Convolvulus major albus*, *Great Bindweed*, (F.) *Liseron des Haies*: *Grand Liseron*. The juice of this plant is violently purgative, and is given in dropsical affections.

Convol'vulus Soldanel'la. The systematic name of the *Sea Convolvulus*, *Bras'sica Mari'na*, *Calyste'gia Soldanella*, *Sea Bindweed*, *Convol'vulus Marit'imus*, *Soldanel'la*, (F.) *Chou Marin*. The leaves of this plant are said to be drastic cathartic; but they are not much, if at all, used.

Convolvulus Syriacus, Convolvulus scammonia.

Convol'vulus Turpe'thum, *Turpe'thum*. The systematic name of the *Turbith plant*, (F.) *Racine de Turbith*. The cortical part of the root of this species of convolvulus is brought from the East Indies. It is a cathartic, but not used.

CONVULSIBILITAS, see Subsultus tendinum.

CONVULSIF, Convulsive.

CONVULSIO HABITUALIS, Chorea—c. Indica, Tetanus—c. Raphania, Raphania—c. Soloniensis, Ergotism—c. Tonica, Tonic spasm—c. Uteri, Abortion.

Convul'sio Cerea'lis, *Convulsio ab Ustilag''ine*, *Cereal Convulsion*, (F.) *Convulsion céréale*,

Ergotisme convulsif, Convulsion de Sologne. A singular disorder, of the convulsive kind, attended with a peculiar tingling and formication in the arms and legs. It is said to be endemic in some parts of Germany, and to arise often from the use of spoiled corn.

CONVUL'SION, *Spasmus, Convul'sio*, from *convellere*, (*con* and *vellere*, 'to tear,') 'to pull together.' *Conduc'tio, Hieran'osos, Distən'tio nervorum, Clonic Spasm, Convul'sio clon'ica, Eclamp'sia, Syspa'sia Convul'sio, Hyperspasmie.* This word has several acceptations. It means any violent perversion of the animal movements. The word *Convul'sions* generally, however, signifies alternate contractions, violent and involuntary, of muscles, which habitually contract only under the influence of the will. This alternate contraction, when slight, is called *Tremor*: when strong and permanent, *tetanus, trismus*, &c. *Spasms, Cramp, Risus Sardonicus*, and *St. Vitus's Dance* are *convulsions*.

Convulsion, Salaam. A name given to a singular kind of convulsion in children, in which there is a peculiar bowing of the head forward.—Sir Charles Clarke.

CONVULSION DE SOLOGNE, Convulsio cerealis.

CONVULSIONS OF CHILDREN, Eclampsia—*c. des Enfans*, Eclampsia—*c. des Femmes enceintes et en couches*, Eclampsia gravidarum et parturientium—c. Puerperal, Eclampsia gravidarum et parturientium.

CONVULSIONNAIRE, (F.) A name given, during the last century, to individuals, who had, or affected to have, convulsions, produced by religious ideas.

CONVUL'SIVE, *Convulsi'vus, Spasmo'des, Agitato'rius*, (F.) *Convulsif.* That which is accompanied by, or is analogous to, convulsions, as *convulsive cough, convulsive disease.*

CONYZA, Inula dysenterica—c. Coma aurea, Solidago Virgaurea—c. Media, Inula dysenterica.

Conyza Squarro'sa, *Brephoc'tonon, Great Fleabane* or *Spikenard*, (F.) *Herbe aux Mouches.* A European plant, whose strong and disagreeable odour was formerly considered to be destructive to flies, fleas, &c. Its infusion in wine was once used as an emmenagogue and anticteric; in vinegar as an anti-epileptic.

COOKERY, Culinary art.

COONTIE or COONTI, see Arrowroot.

COOPERTORIUM, Thyroid cartilage.

COOS'TRUM. The middle part of the diaphragm.—Ruland.

COPAHU, Copaiba.

COPA'IBA. The resinous juice of the *Copaïfera officina'lis*, and other species of Copaifera. *Family*, Leguminosæ. *Sex. Syst.* Decandria Monogynia. It is the *Copaiferæ officina'lis Resina, Bal'samum Copaibæ, B. Brazilien'sē, B. de Copaiba, B. Capi'vi, Balsam of Copaiba* or *Copaiva*, (F.) *Copahu, Baume de Copahu, B. du Brésil, Térébinthe de Copahu.* Its odour is peculiar, but not unpleasant; taste pungent, bitter; consistence, syrupy; colour yellowish, and transparent. It is soluble in alcohol, ether, and the expressed oils. S. g. 0.950. Its properties are stimulant and diuretic: in large doses it is purgative. It acts on the lining membrane of the urethra, and on mucous membranes, in general. It is given in gonorrhœa, gleet, leucorrhœa, &c.: in the dose of gtt. x to ʒj, twice or thrice a day. Should symptoms of urticaria or diarrhœa arise, the dose is too large, and must be diminished. It can be inspissated by means of magnesia so as to be made into pills, and recently a plan has been devised for enveloping it in gelatin, so that its taste is entirely concealed. See Capsules, gelatinous.

COPAIFERA OFFICINALIS, see Copaiba.

COPAL', *Copale, Resina Copal.* A resinous substance brought from the East Indies, South America, and the western coast of Africa, which flows spontaneously, from the *Elæocar'pus Copalif'era* or *Vateria Indica*, and probably from different species of *Hymenæa.* It is a stimulant, like all the resins; and, dissolved in rectified spirit of wine, has been used in cases of spongy gums and looseness of the teeth; but it is now only employed in varnishes.

COPE, Cut.

COPHONIA, Acouophonia.

COPHO'SIS, *Sur'ditas, Epicopho'sis, Paracu'sis, Dysæsthe'sia audito'ria;* from κωφος, 'deaf.' (F.) *Surdité.* Diminution or loss of hearing. Cullen uses the word synonymously with *Dysecœa*, and Pinel with *Paracou'sia* or *Parac'oë.* According to Sauvages, *Cophosis* differs from both: from *Dysecœa*, because, in it the sonorous rays cannot reach the labyrinth; and from *Paracousia*, which consists in a confused state of hearing.

Cophosis seems, usually, to be synonymous with deafness, (q. v.)—*Paracu'sis Sur'ditas.*

COPOS, κοπος. *Lassitu'do, Fatiga'tio, Lassitude, Fatigue.* A state of the body in which most of the animal functions are exerted with less promptitude and vigour than common. The ancients admitted three species: 1. That arising from plethora, *Lassitu'do tensi'va, Tono'des*, 2. From plethora and increased heat combined, *Lassitu'do phlegmono'sa, æstuo'sa, phlegmono'des*, and, 3. Owing to a morbid condition of the humours, *Lassitu'do ulcero'sa, helco'des.*

COPPER, Cuprum—c. Ammoniated, Cuprum ammoniatum—c. Subacetate of, Cupri subacetas—c. Sulphate of, Cupri sulphas—c. Ammoniacal sulphate of, Cuprum ammoniatum.

COPPERAS, Ferri sulphas—c. White, Zinci sulphas.

COPPER-NOSE, Gutta rosea.

COPRACRATIA, Scoracrasia.

COPRAGO'GUM, from κοπρος, 'fæces,' and αγω, 'I bring away.' *Stercus è primis viis educens.* A cathartic. The name of a laxative electuary, mentioned by Ruland.

COPREM'ETOS, *Coproëm'etos*, from κοπρος, 'excrement,' and εμεω, 'I vomit.' One who vomits fæces.—Hippocr.

COPROCRIT'ICUS, from κοπρος, 'excrement,' and κριτικος, 'I separate.' A mild cathartic, (q. v.)—an eccoprotic.

COPROEMETOS, Copremetos.

COPROPHORIA, Catharsis.

COPRORRHŒA, Diarrhœa.

COPROS, Excrement.

COPROSCLERO'SIS, from κοπρος, 'excrement,' and σκληροω, 'I harden.' Induration of fæcal matters

COPROSTASIS, Constipation.

COPTÉ, or COPTON, from κοπτω, 'I beat or pound.' A sort of cake, composed of vegetable substances, which the ancients adminis-

tered internally, and applied to the epigastric region in the form of cataplasm.

COPTIS, *Coptis Trifo'lia, Nigella, Helleb'orus trifo'lius, Fibra au'rea, Chryza fibrau'rea, Anemo'nē Grönlan'dica.* The root of this—*Coptis*, (Ph. U. S.)—is much used in Massachusetts, in aphthous and other ulcerations of the mouth, as a local application. It is a pure bitter, and can be used, wherever such is indicated.

Coptis Teeta, *Mishme Teeta*, (Upper Assam) *Honglane* (Chinese.) The root of this plant is considered to be a powerful tonic and stomachic.

COPTON, Copte.

COPULA, Ligament—c. Carnalis, Coition—c. Magna Cerebri, Corpus Callosum.

COPULATION, Coition.

COPYO'PIA, *Kopyo'pia*, (F.) *Lassitude oculaire*, from κοπος, 'fatigue,' and ωψ, 'the eye.' Fatigue of vision. Weakness of sight. Inability of the eye to sustain continued exertion.

COQ, Phasianus Gallus.

COQUE DU LEVANT, see Menispermum cocculus—*c. d'Œuf*, see Ovum—*c. Levant*, see Menispermum cocculus.

COQUELICOT, Papaver rhœas.

COQUELOURDE, Anemone pulsatilla.

COQUELUCHE, Influenza. Pertussis.

COQUEN'TIA MEDICAMEN'TA, from *coquere*, 'to digest.' Medicines, which were formerly believed to be proper for favouring the coction or digestion of food.

COQUERET, Physalis.

COQUETTE, Influenza.

COQUILLE, Cochlea—*c. d'Œuf*, see Ovum.

COR, A corn. Also, Heart, (q. v.)

Cor Bovinum, Heart, hypertrophy of the.

COR'ACO BRA'CHIAL, *Cor'aco Brachia'lis*. Belonging both to the coracoid process and arm

Coraco-Brachialis (Muscle.) *Coraco humé'ral*—(Ch.) *Perfora'tus* Casse'rii, *Perforatus, Coraco-brachiæ'us*, is situate at the inner and upper part of the arm. It arises from the coracoid process of the scapula, and is inserted at the middle part of the inner side of the humerus. It carries the arm forwards and inwards, raising the humerus a little. It can, also, by acting inversely, depress the shoulder.

CORACO-CLAVIC'ULAR, *Coraco-clavicula'ris* Belonging to the coracoid process and clavicle.

Coraco-Clavicular Ligament, called, also, *Omo clavicular*, serves to unite the clavicle to the coracoid process. It is very irregular, and formed of two fasciculi, which the greater part of anatomists have described as particular ligaments, under the names *Conoid* and *Trapezoid*.

CORACO-HUMERALIS, Coraco-brachialis—c. Hyoideus, Omohyoideus—c. Radialis, Biceps flexor cubiti.

COR'ACOID, *Coracoïdeus, Coracoïdes, C. Proces'sus, Cornicula'ris Processus, Crow's-beak-like Process. Proces'sus anchora'lis, rostriformis, ancyroides*, from κοραξ, 'a crow,' and ειδος, 'resemblance.' (F.) *Coracoïde*. Resembling the beak of a crow. A name given by Galen, (and still retained,) to the short, thick process, situate at the anterior part of the upper margin of the scapula; which has some resemblance to the beak of a crow. This process gives attachment to the *Coraco-clavicular* and *Coraco-acromial* ligaments, and to the *Coraco-brachia'lis Pectora'lis minor*, and *Biceps* muscles.

Coracoid Ligament, *Ligamen'tum coracoideum*, (F.) *L. Coracoïdien*. This name is given to the small fibrous fasciculus, which converts the notch, at the superior margin of the scapula, into a foramen.

CORAIL, Coral—*c. des Jardins*, Capsicum annuum.

CORAL, *Coral'lium, Coral'lus, Arbor Maris, Azur, Bolesis*, from κορεω, 'I adorn,' and αλς, 'the sea.' (F.) *Corail*. One of the most beautiful productions of the deep. It is fixed to submarine rocks, in the form of a shrub; and is of a bright red colour. It is the habitation of a multitude of animals, of the Zoophyta order, and is formed of a calcareous substance, secreted by the animals themselves. It is in very hard, concentric layers; covered, externally, by a species of porous bark, full of cellules, each of which contains one of these animals. Linnæus calls the red coral, *Isis nob'ilis*, and M. de Lamarck, *Coral'lium rubrum*. It is much fished for on the coasts of Barbary and Sicily. Coral was formerly esteemed tonic, absorbent, astringent, &c.; but analysis has shown, that it contains only carbonate of lime and a little gelatin. —Dioscorides, Pliny, Oribasius, the *Geoponica*, &c. The *Corallium album* is a hard, white, calcareous, brittle substance, the nidus of the *Madrep'ora oculata*. It has been given as an absorbent.

CORALLI'NA. Diminutive of *Corallium: Muscus marit'imus, Corallina officina'lis, Brion, Corallina alba, Sea Cor'alline, White Worm-weed*. The production of an animal, which belongs to the genus *Pol'ypi*, and which is found in all the seas of Europe;—particularly in the Mediterranean. It has the appearance of a plant, is homogeneous, an inch or two in height, of a white, reddish, or greenish colour, salt taste, and marine smell. It contains gelatin, albumen, chloride of sodium, phosphate, carbonate and sulphate of lime, carbonate of magnesia, silica, oxide of iron, and a colouring principle. It was once much used as a vermifuge: but it is not now employed. Dose, ʒss to ʒj in powder.

Corallina Corsica'na, *Helmintho-corton, Elmintho-corton, Muscus helmintho-cortos, Melitho-corton, Muscus coralli'nus, M. Mari'nus, Confer'va Helmintho-cortos, Coralli'na rubra, Coralli'na melito-corton, Lemitho-corton, Fucus Helmintho-corton, Corsican Worm-weed*. (F.) *Coralline de Corse, Mousse de Corse*. It is a mixture of several marine plants and zoophytes, as the *fucus, ceramium, ulva, coralline, conferræ*, &c., and has gained great reputation for destroying all kinds of intestinal worms, when given in the form of strong decoction. The Geneva Pharmacopœia directs an officinal syrup—the *Sirop de Coralline*.

CORALLINE DE CORSE, Corallina corsicana.

CORALLOIDES FUNGUS, Clavaria coralloides.

CORALWORT, Clavaria coralloides.

CORD, *Funis, Funic'ulus, Chœnos, Chœ'nion*, χοινος, χοινιον; from the Latin *Chorda*, which is itself derived from χορδη, 'intestine;' and, afterwards, was applied to musical cords or strings, made of the intestines of animals. See Chorda.

Cord, Umbilical, Funiculus umbilicalis.

Cords, Vocal, *Cords of Ferrein, Chordæ voca'les, Ch. Ferre'nii*. A name given to the ligaments of the glottis, which Ferrein compared to stretched cords, and to which he attributed

the production of voice. See Thyreo-arytenoid Ligament.

CORDA, Chorda—c. Hippocratis, Achillis tendo—c. Magna, Achillis tendo.

CORDE DU TAMBOUR, Chorda Tympani—*c. du Tympan*, Chorda tympani.

CORDÉE, Chordee.

CORDIA MYXA, Sebestina—c. Smooth-leaved, Sebestina.

COR'DIAL, *Cordia'lis*, *Cardi'acus*, from *cor*, *cordis*, 'the heart.' Tonic or excitant medicines, which were judged proper for exciting the heart.

CORDIAL, NERVOUS, BRODUM'S, see Tinctura gentianæ composita—c. Sir Walter Raleigh's, Confectio aromatica—c. Warner's, see Tinctura rhei et sennæ.

CORDINE'MA, from καρα, 'the head,' and δινεω, 'I move about.' Headache, accompanied with vertigo. See Carebaria.

CORDIS EMUNCTORIUM, Axilla.

CORDOLIUM, Cardialgia.

CORDON (F.), *Funic'ulus*, diminutive of *funis*, 'a cord.' A term applied to many parts, which resemble a small cord.

CORDON NERVEUX; Ramus nervosus. A principal division of a nerve or the nervous trunk itself.

CORDON OMBILICALE, Funiculus umbilicalis—*c. Spermatique*, Spermatic chord—*c. Testiculaire*, Spermatic chord.

CORDONS SUS-PUBIENS, Round ligaments of the uterus—*c. Vasculaires*, Round ligaments of the uterus.

CORE. Pupil, see Furunculus.

CORECTOMIA, Coretomia.

CORECTOP'IA, from κορη, 'the pupil;' εκ, 'out of,' and τοπος, 'place.' A condition of the iris in which one segment is larger than the other; so that the pupil is not in the centre.—Von Ammon.

COREDIALYSIS, Coretomia.

CORE'MATA, from κορεω, 'I cleanse.' Remedies proper for cleansing the skin.—Paulus of Ægina.

COREMORPHO'SIS, *Conforma'tio Pupill'æ artificia'lis*; from κορη, 'the pupil,' and μορφωσις, 'formation.' The operation for artificial pupil. See Coretomia.

COREON'CION, *Coron'cion*, from κορη, 'the pupil,' and ογκιον, 'a hook.' An instrument, used for the formation of artificial pupil by Langenbeck. It is hooked at its extremity. A *double hooked forceps*, used by Von Gräfe, is similarly named.

CORETODIALYSIS, Coretomia.

CORETOM'IA, from κορη, 'the pupil,' and τεμνειν, 'to cut.' *Coretom'ia*, *Coretotom'ia*, *Iridotom'ia*, *Corectom'ia*, *Coretonectom'ia*, *Iridectom'ia*, *Iridectomedial'ysis*, *Corediał'ysis*, *Coretodial'ysis*, *Iridodial'ysis*. Various operations for the formation of artificial pupil are so termed. The last four signify the separation or tearing asunder of the iris from the ciliary ligament; the four preceding the incision of the iris, *with* loss of substance; and the remainder signify a simple incision of the iris, *without* loss of substance. When a portion of the iris is left strangulated in the wound, it is termed *Irideneleisis*.

CORETONECTOMIA, Coretomia.

CORETOTOMIA, Coretomia.

CORIANDER, Coriandrum sativum.

CORIAN'DRUM SATI'VUM, *Corian'der*, *Corian'non*. (F.) *Coriandre*. *Family*, Umbelliferæ. *Sex. Syst.* Pentandria Digynia. The systematic name of the *Corian'drum* of the pharmacopœias. *Coria'non*. The seeds of the coriander have an aromatic odour, and grateful, pungent taste. They are carminative; but are chiefly used to cover the taste of other medicines.

CORIANNON, Coriandrum sativum.

CORIGEEN, Fucus crispus.

CORION, Corium, Hypericum perforatum.

CORIS, Cimex—c. Monspeliensis, Symphytum Petræum.

CORIUM, *Corion*, (F.) *Cuir*. The skin of several animals is so called, especially when tanned. The *cutis vera* (q. v.), or the thickest part of the human skin.

CORIUM PHLOGIS'TICUM, *Crusta pleuret'ica*, *C. inflammato'ria*, *C. phlogis'tica*, *Inflammatory Crust* or *Buff*, *Buffy coat*. (F.) *Couenne*, *C. Pleurétique*, *C. inflammatoire*. The grayish crust or buff, varying in thickness, observed on blood drawn from a vein during the existence of violent inflammation, pregnancy, &c. It is particularly manifest in pleurisy, and hence one of its names. For its production, it appears to be requisite, that there should be an increase in the proportion of the fibrinous element of the blood over that of the red corpuscles.

The buff is generally believed to consist of fibrin; but according to the researches of Mulder, it is composed of a binoxide of protein, which is insoluble in boiling water, and a tritoxide which is soluble. These oxides are comprehended by Mulder under the name *oxyprotein*.

When the blood presents this appearance, it is said to be *buffy*.

CORK, Suber.

CORMIER, Sorbus domestica.

CORMUS, κορμος. In botany, when the stem of a plant, without creeping or rooting, is distended under ground, retaining a round or oval form it is so called. The Cormus is vulgarly termed a root.—*radix*.

CORN, (Saxon corn,) (G.) Kern. In England, this word means the *Cerealia*, or those seeds, which grow in ears, not in pods. In the United States, *Corn* always means *Indian Corn*. Its English sense corresponds to the French *Blé* or *Bled*.

CORN, *Clavus*, *Clavus Pedis*, *Ecphy'ma Clavus*, *Gemur'sa*, (F.) *Cor*, *Ognon*, from *cornu*, 'horn.' A small, hard, corneous tumour, which forms upon the foot, generally on the toes; and which is commonly produced on the most projecting parts, by the pressure of too tight shoes. A part of the corn is raised above the skin, and forms a round tumour, like the head of a nail: the other portion, which serves as its base, is buried more or less deeply in the integuments, and occasionally extends as far as the tendons and periosteum. Corns may, sometimes, be removed, by immersing the feet in warm water, but commonly they return. They can, likewise, be destroyed by the knife or caustics; but these operations are not as simple as they seem. In the way of palliation,—they must be constantly pared; and, for the purpose of preventing pressure, any soft plaster, spread upon linen or leather, may be applied, with a hole in the centre, to receive the corn; and layer after layer of plaster be added, until they attain the

level of the corn. When very irritable, the lunar caustic, rubbed over the surface, will generally diminish irritability surprisingly, and in a mode not easy of explanation.

Corn, Zea mays—c. Guinea, Panicum Italicum—c. Indian, Zea mays—c. Wild, Matricaria chamomilla—c. Flag, Gladiolus vulgaris—c. Flower, Centaurea cyanus—c. Salad, Valeriana dentata.

CORNALINE, Cornelian.

CORNE, Cornu—*c. d'Ammon*, Cornu ammonis—*c. de Bélier*, Cornu ammonis—*c. de Cerf*, Cervus, Cornu cervi, Cochlearia coronopus—*c. de Chamois*, Cornu rupicapræ—*c. de la Peau*, Cornu.

CORNÉ, Corneus.

COR'NEA, *Cornea transpa'rens, C. pellu'cida, C. lucida, Ceras, Sclerot'ica ceratoï'des, Ceratoï'des, Ceratomé'ninx, Membra'na cornea;* from *cornu*, 'horn.' The *transparent cornea.* (F.) *Cornée.* One of the coats of the eye, so called because it has some resemblance to horn. It is termed *transparent* to distinguish it from the *opake—Cornea opa'ca* or *Sclerotic.* It is convex, anteriorly; concave, posteriorly; forming nearly one-fifth of the anterior part of the eye, and representing a segment of a sphere about seven lines and a half, or in. 0.625 in diameter. It seems to be constituted of laminæ in superposition, but of the precise number anatomists are not agreed.—Henle assigns it four; the third, a very solid cartilaginous lamella, being called *Membrane de Demours* or *M. de Descemet.*

Cornea, Opake, Caligo—c. Opaca, Sclerotic—c. Sugar-loaf, Staphyloma of the Cornea.

CORNÉE, Cornea.

CORNEL, AMERICAN RED-ROD, Cornus sericea—c. Large-flowered, Cornus Florida.

CORNE'LIAN, *Carne'lian, Chalcedo'nius, Carné'olus Lapis Carne'olus, Corné'lus, Corné'olus, Lapis Sardius.* (F.) *Cornaline.* A precious, semi-transparent stone, found in Sardinia. The ancients ascribed to it a number of absurd properties.

CORNELUS, Cornelian.

CORNEOLUS, Cornelian.

COR'NEOUS, *Corneus*, (F.) *Corné.* Having the nature or appearance of horn.

Corneous Tissue is that which forms the nails. The *corneous membrane* is the *cornea.*

CORNES DE LIMACON (F.), *Snail's Horns.* A name given, by 'Anel, to the lachrymal puncta and ducts.

CORNES DE LA MATRICE, Cornua uteri—*c. de la Peau*, Horny excrescences.

CORNESTA, Retort.

CORNET ACOUSTIQUE, Ear-trumpet—*c. Moyen*, Turbinated bone, middle—*c. de Morgagni*, Turbinated bone, superior.

CORNETS DE BERTIN, Sphenoidal cornua—*c. Sphénoïdaux*, Sphenoidal cornua.

CORNICHON, see Cucumis sativus.

CORNICULA'RIS PROCES'SUS, Coracoid process.

CORNIC'ULUM, diminutive of *cornu*, 'a horn,' 'a little horn.' A species of cupping instrument, shaped like a trumpet, having a hole at the top for sucking the air out, to diminish the pressure in its interior.—Scultetus, Hildanus.

Corniculum Laryn'gis, *Capit'ulum Santori'ni, Supra-arytenoid Car'tilages, Capit'ulum Cartilag''inis arytenoidææ.* A small, very movable, cartilaginous tubercle, found on the arytenoid cartilages. (q. v.)

CORNIER, Cornus Florida.

CORNOUILLER, Cornus Florida—*c. à Feuilles arrondies*, Cornus circinata—*c. à Grandes fleurs*, Cornus Florida—*c. Soyeux*, Cornus sericea.

CORNU, *Ceras, Corn*, Horn. (F.) *Corne.* A conical, hard, epidermeous projection, which grows on the heads of certain animals, serving them as a weapon of offence and defence. Anatomists have given this name to parts of the human body, which have nearly the same shape as the horns of animals.

Cornu. A *horny excrescence.* A *Corneous Wart*, which occasionally forms on the skin, and requires the use of the knife. (F.) *Corne de la Peau.* See Corn. Also, Cornu Cervi. (q. v.) See Cervus. Also, a Retort. (q. v.)

Cornu Acusticum, Ear-trumpet.

Cornu Ammon'is, *Cornu Arié'tis, Hippocam'pus major, Protuberan'tia cylin'drica, Vermis Bombyc''inus, Proces'sus cer'ebri latera'lis.* (F.) *Corne d'Ammon, Corne de Bélier, Grande Hippocampe, Pied de cheval marin, Protubérance cylindroïde* (Ch.), *Bourrelet roulé.* A broad, considerable eminence, curved on itself, and situate at the posterior part of the lateral ventricle. Its surface presents two or three tubercles separated from each other by shallow grooves.

The *Accesso'rius Pedis Hippocam'pi*, (F.) *Accessoire du pied d'hippocampe*, is a prominence, usually formed by the base of the inferior cornu of the lateral ventricle of the brain. It is merely a fold of the hemisphere, and was by Malacarne called *Cuissart* ou *Armure des Jambes.*

Cornu Anterius Ventric'uli Latera'lis; *Anterior Cornu of the Lat'eral Ven'tricle.* The portion of the lateral ventricle of the brain, which is lodged in the middle of the lobe, and forms the commencement of that cavity.

Cornu Cervi, *Cornu, Hartshorn, Cornu Cervi'num, Cervi Elaphi Cornu.* (F.) *Corne de cerf.* The horns of various species of the stag. They contain about 27 per cent. of gelatin. The *shavings, Raspatu'ra* seu *Ras'ura Cornu Cervi, C. C. raspa'tum*, boiled in water, have, consequently, been esteemed emollient and nutritive.

When burnt, they constitute the *Cornu cervi calcinu'tum* or *Cornu ustum, Phosphas Calcis, Calca'ria phosphor'ica*, (F.) *Corne de cerf calcinée*, which consists of 57.5 per cent. of phosphate of lime. It has been used as an antacid, but is wholly inert, as its composition would indicate. It contains only 1 per cent. of carbonate of lime.

Hartshorn was once supposed to possess a bezoardic power.—J. Vesti.

Cornu (Cervinum.) Cervus, Plantago coronopus—c. Ethmoidal, Turbinated bone, middle.

Cornu Descen'dens Ventric'uli Latera'lis, *Dig''ital Cav'ity, Descending* or *inferior cornu of the lateral ventricle.* The termination of the lateral ventricle in the middle lobe of the brain, behind the fissure of Sylvius.

Cornu, Middle, Turbinated bone, middle.

Cornu Rupica'præ, (F.) *Corne de Chamois.* The horn of the chamois. It has the same properties as the *Cornu Cervi.*

CORNUA, Turbinated bones.

Cornua Cartilag''inis Thyroideæ. Eminences on the thyroid cartilage, distinguished into *great* or *superior;*—which are articulated

with the great cornu of the os hyoides;—and into *small* or *inferior*, united with the cricoid cartilage.

Cornua Coccy'gis, *Cornua of the Coccyx.* Two small, tubercular eminences at the base of the coccyx, which are articulated with those of the sacrum.

Cornua Cutanea, Horny excrescences.

Cornua Hyoidei Ossis, *Cornua of the Hyoid Bone.* Four fragments of the os hyoides, situate above the body of the bone, and distinguished into the *small* or *superior*, and the *great* or *lateral.*

Cornua Lachrymalia, Lachrymal ducts—c. Limacum, Lachrymal ducts.

Cornua Poste'rius Ventric'uli Latera'lis, *Posterior Cornu of the Lateral Ventricle.* The triangular prolongation of the lateral ventricle of the brain into the substance of the occipital lobe.

Cornua Sacra'lia, *Cornua of the Sacrum.* Two tubercles, situate at the posterior and inferior surface of the sacrum, which are sometimes united.

Cornua U'teri, *Cornua of the Uterus, Ceratæ, κεραιαι, Plec'tanæ,* (F.) *Cornes de la Matrice.* The angles of the uterus, where the Fallopian tubes arise. Sometimes applied to the Fallopian tubes themselves.

CORNUE, Retort.

CORNUMUSA, Retort.

CORNUS AMOMUS, C. sericea—c. Blueberried, c. Sericea.

Cornus Circina'ta, *Round-leaved Dogwood,* (F.) *Cornouiller à feuilles arrondies.* The bark of this variety has been used for similar purposes with the next.

Cornus Flor'ida, *Dogwood, Dogtree, Boxtree, Bitter Redberry, Large-flowered Cornel, Great-flowered Dogwood, Florida Dogwood, Male Virginian Dogwood, Boxwood, (New England,)* (F.) *Cornouiller, Cornier, C. à grandes fleurs.* The bark of this beautiful tree, which grows every where in the United States, has been long employed as a substitute for the cinchona. Dose, from ʒss to ʒj. Its active principle has been separated from it, and received the name of *Cornine.*

Cornus Fœmina, C. sericea—c. Mas odorata, Laurus sassafras—c. Rubiginosa, C. sericea—c. Sanguinea, Sebestina, C. sericea.

Cornus Seri''cea, *Cornus amo'mus, C. fœmina, C. rubigino'sa, C. sanguin'ea, Swamp Dogwood, Red Willow, Rose Willow, New England Dogwood, Female Dogwood, Silky-leaved Dogwood, American red-rod Cornel, Blueberried Dogwood, Blueberried Cornus,* (F.) *Cornouiller soyeux.* The bark, it is said, has been found little inferior to the *Cincho'na Pal'lida* in intermittents.—Barton.

CORNUTA, Retort.

CORODIALYSIS, Coretomia.

CORONA, Crown—c. Dentis, Crown of a tooth—c. Glandis, Crown of the glans—c. Posterior ulnæ, Olecranon—c. Regia, Trifolium melilotus—c. Ulnæ, Olecranon—c. Veneris, Crown of Venus.

CORONÆ CILIARIS MEMBRANULA, Ciliaris (zonula)—c. Palpebrarum, see Tarsus.

COR'ONAL, *Corona'lis, Corona'rius.* Relating to the *crown;* from *corona*, 'a crown.' A name formerly given to the frontal bone, because on it partly reposes the crown of kings, &c.

Coronal Suture, *Sutu'ra corona'lis, S. Fronto-parieta'lis, Puppis Sutura, S. Arcua'lis.* The suture of the head, which extends from one temporal bone to the other, over the *crown* of the head, and unites the parietal bones with the frontal. The *Suture Coronale*, of the French anatomists, is the suture which unites the two halves of the os frontis at the early period of life. It is a prolongation of the sagittal.

CORONALE, MINERAL WATERS OF. These waters are found near Lucca, in Italy. They received their name from an erroneous notion, that they are particularly adapted for curing diseases of the os frontis. Their temperature is 95° Fahrenheit. They contain free carbonic acid, sulphates of lime and magnesia, chlorides of sodium and magnesium, &c., and some iron.

CORONARIUS, Coronal.

COR'ONARY, *Corona'rius,* (F.) *Coronaire,* from *corona*, 'a crown.' Resembling a crown.

Cor'onary Ar'tery of the Stomach, *Arté'ria Corona'ria Ventric'uli, A. Gas'trica supe'rior,* (F.) *Artère coronaire stomachique, A. Stomogastrique* (Ch.), is one of the branches of the cœliac, which passes towards the superior orifice of the stomach, extends along its lesser curvature, and ends by anastomosing with the pyloric branch of the hepatic. This artery furnishes branches to the inferior part of the œsophagus, the cardiac orifice, the great *cul-de-sac*, the middle part of the stomach; the lesser omentum, and anastomoses with the other arteries of those organs.

Coronary Ligament of the liver is a reflection of the peritoneum, which surrounds the posterior margin of the liver. The same term is likewise applied to ligaments, which unite the radius and ulna.

Coronary Vein of the Stomach, *Vena Coronaria Ventric'uli,* accompanies the artery and terminates in the vena porta. Sömmering, and some other anatomists, call all the four arteries of the stomach *Coronariæ stomachicæ.*

CORONCION, Coreoncion.

CORO'NÉ, from κορωνη, 'a crow.' The coronoid process of the lower jaw.

COR'ONOID, *Coronoï'des,* from κορωνη, 'a crow,' and ειδος, 'shape,' 'resemblance.' Resembling the beak of a crow. This name has been given to two *processes. One*, situate at the anterior and superior part of the ramus of the os maxillare inferius, and affording attachment to the temporal muscle: the other, called, also, *sharp process*, situate at the superior part of the ulna, anterior to the great sigmoid fossa, and forming a part of the hinge of the elbow-joint.

CORONOPODIUM, Plantago coronopus.

CORONOPUS, Cochlearia coronopus — c. Ruellii, Cochlearia coronopus.

COROTOMIA, Coretomia.

CORPORA ALBICANTIA, Mamillary tubercles—c. Arantii, Noduli Arantii, Tubercula A.—c. Bigemina, Quadrigemina corpora—c. Candicantia, Albicantia corpora, Mamillary tubercles—c. Fibrosa, *Corps Fibreux.*

Cor'pora Fimbria'ta, *Tænia Hippocam'pi, Fimbriated* or *fringed bodies.* (F.) *Corps Frangés, C. Bordés, Bandelettes des Cornes d'Ammon, Bandelette de l'Hippocampe.* The thin, flattened, and very delicate band, situate along the concave edge of the cornu ammonis, and

which is a continuation of the posterior crura of the fornix.

Corpora Geniculata, (F.) *Corps geniculés. C. génouillés.* Two tubercles, situate at the lower and outer part of the optic thalami, which furnish several filaments to the optic nerves.

Corpora Globosa Cervicis Uteri, Nabothi glandulæ.

Cor'pora Malpighia'na, *Malpig'hian Bodies, Ac''ini of Malpig'hi.* Scattered through the plexus formed by the blood-vessels and uriniferous tubes in the kidney, a number of small dark points may be seen with the naked eye, which received the name from Malpighi, their describer. Each of these, under the microscope, is found to consist of a convoluted mass of blood-vessels. It was at one time supposed, that the tubuli uriniferi originate in them; but this does not appear to be the case. Their use is not positively known, as they have been lately traced by Mr. Bowman into the commencement of the urinary tubes, in which they lie uncovered; it has been supposed that their office may be to separate the watery portions of the blood to be mixed with the proper urinous matter.

Corpora Nerveo-Spongiosa Penis, Corpora cavernosa—c. Nervosa, Corpora cavernosa.

Corpora Oliva'ria, *C. ova'ta, Eminen'tiæ Olivares,* (*Éminences latérales*, Ch.) Oblong, whitish eminences, situate at the occipital surface of the medulla oblongata, exterior to the corpora pyramidalia.

Corpora Ovata, Corpora olivaria.

Corpora Pyramida'lia, *Eminen'tiæ pyramida'les,* (F.) *Corps pyramidaux, Pyramides antérieures* (Gall,) *Éminences pyramidales* (Ch.) Two small medullary eminences, placed alongside each other, at the occipital surface of the medulla oblongata, between the corpora olivaria. These bodies have also been called *Corpora Pyramidalia anti'ca,* to distinguish them from the *C. olivaria,* which have been called *Corpora Pyramidalia latera'lia.*

Corpora Pyramidalia Posteriora, Corpora restiformia—c. Quadrigemina, Q. corpora.

Corpora Restifor'mia, *Crura medul'læ oblonga'tæ, Pedun'culi medullæ oblongatæ, Corpora pyramidalia posterio'ra, Ped'uncles of the medul'la oblonga'ta;* (F.) *Corps restiformes, Cuisses postérieures. Pyramides postérieures du cervelet, Racines, Bras* ou *Jambes du cervelet, Petites branches de la moëlle allongée, Pédoncules du cervelet.* Two medullary projections, oblong, and of a whitish appearance, which proceed from each side of the upper extremity of the medulla oblongata, and contribute to the formation of the cerebellum.

Corpora Stria'ta, *Grand ganglion supérieur du cerveau* (Gall,) *Couches des nerfs ethmoïdaux, Corps cannelés, Eminen'tiæ Lenticula'res, Collic'uli Nervi Ethmoïda'lis, Ap'ices Crurum medul'læ oblonga'tæ.* (F.) *Corps striés.* Pyriform eminences, of a slightly brownish-gray colour, which form part of the floor of the lateral ventricles of the brain. When cut, a mixture of gray and white substance is seen, arranged alternately, to which they owe their name. All the white bands are continuous with the primary fasciculi of the corpora olivaria. Willis considered that the soul resided there.

Corpora Striata Superna Posteriora, Thalami nervorum opticorum.

CORPS, Body—*c. Bordés,* Corpora fimbriata—*c. Calleux,* Corpus callosum—*c. Cannelés,* Corpora striata—*c. Caverneux,* Corpora cavernosa—*c. Cendré,* Corpus dentatum—*c. Ciliaire,* Corpus dentatum—*c. Dentelé,* Corpus dentatum—*c. Étranger,* Extraneous body—*c. Festonné,* Corpus dentatum.

Corps Fibreux, *Corpora fibro'sa.* Bayle has given this name to adventitious, fibrous productions, of a round form,—more or less adherent, and sometimes having a pedicle,—which form in certain parts of the body, particularly in the substance of the uterus.

Corps Frangés, Corpora fimbriata—*c. Geniculés,* Corpora geniculata—*c. Hyaloïde,* Corpus vitreum—*c. d'Hygmore* ou *d'Highmore,* Corpus Highmori—*c. Jaune,* Corpus luteum—*c. Muqueux,* Corpus mucosum—*c. Organisés,* Organized bodies—*c. Pampiniforme,* Corpus pampiniforme—*c. Pyramidaux,* Corpora pyramidalia—*c. Restiformes,* Corpora restiformia—*c. rhomboïde,* Corpus dentatum—*c. Striés,* Corpora striata—*c. Thyroïde,* Thyroid gland—*c. Variciforme,* Epididymis—*c. Variqueux,* Corpus pampiniforme, Epididymis—*c. Vitré,* Corpus vitreum.

CORPULEN'TIA, *Cor'pulence,* from *corpus,* 'the body,' and *lentus,* 'thick,' is synonymous with *Obesity* and *Polysarcia.* (q. v.)

Corpulentia Carnosa, Torositas.

CORPUS, *Soma,* A *Body.* (q. v.) Any object which strikes one or more of our senses. Gases, liquids, metals, vegetables, animals, are so many bodies. Natural bodies have been divided into *animal, vegetable,* and *mineral;* or into *inorganic,* including the mineral kingdom; and *organized,* including the animal and vegetable. The chief differences between organized and inorganic bodies consists in the former having an *origin by generation, growth by nutrition,* and *termination by death:* the latter, a *fortuitous origin, external growth,* and a *termination by chemical or mechanical force.*

Many parts of the frame have, also, been distinguished by this name, as *Corpus Callosum, C. Mucosum,* &c.—See Body.

Corpus Adeniforme, Prostate—c. Adenoides, Prostate—c. Adiposum, Pinguedo—c. Alienum, Extraneous—c. Annulare, Pons varolii.

Corpus Callosum, *Commissu'ra Magna cer'ebri, Trabs Medulla'ris, Trabec'ula, Cop'ula magna cer'ebri,* (F.) *Corps calleux, Voûte medullaire, Plafond des ventricules du cerveau, Mésolobe* (Ch.) A white, medullary band, perceived on separating the two hemispheres of the brain, which it connects with each other. La Peyronie regarded it as the seat of the soul.

Corpus Ciliare, Ciliary Body, Corpus dentatum, see Ciliary—c. Cinereum, Corpus dentatum—c. Conoides, Pineal gland—c. Crystalloides, Crystalline.

Corpus Denta'tum vel Denticula'tum, *C. Cilia'rē,* (F.) *Corps dentelé, Corps festonné.* A central, oval nucleus, of cineritious substance, met with in the cerebellum; the circumference of which exhibits a number of indentations, surrounded by medullary substance—Vicq d'Azyr. It is seen by dividing the cerebellum vertically into two equal parts—The same body has been called *Corps cendré* ou *ciliaire,* ou

rhomboïde, Corpus Cine'reum, C. Rhomboïdeum, Ganglion du cervelet, Noyau central des Pédoncules du cervelet, Nucleus dentatus seu *fimbria'tus* seu *centra'lis* seu *rhomboida'lis, Substan'tia rhomboïdea, Gan'glion ciliā're, Gan'glion cerebelli.*

Corpus Discoides, Crystalline—c. Externum, Extraneous body—c. Extraneum, Extraneous body—c. Glandiforme, Prostate—c. Glandosum, Prostate—c. Glandulosum, Prostate.

Corpus Glandulo'sum Mulie'rum, *Glandu'læ Pros'tatæ Mulierum.* A vascular, spongy eminence, which surrounds the orifice of the urethra, and projects at its under part.

Corpus Highmo'ri, *C. Highmoria'num, Mea'tus semina'rius,* (F.) *Corps d'Hygmore* ou *d'Highmore, Sinus des vaisseaux séminifères,* (Ch.) An oblong eminence, along the superior edge of the testicle, which seems formed of a reflection of the tunica albuginea, through which the principal trunks of the seminiferous vessels pass before they reach the epididymis.

Corpus Lu'teum, (F.) *Corps jaune.* A small yellowish body, perceived in the ovarium, owing to the rupture of one of the vesicles. It was, for a long time, considered an evidence of previous impregnation: but it is now maintained, that *Corpora lutea* may be met with in unquestionable virgins.

Corpus Muco'sum, *C. reticula're, Retē muco'sum, Mucus Malpig'hii, Rete Malpig'hii, Mucous web,* (F.) *Corps muqueux.* The second layer of the skin has been so called. It is situate between the *cutis vera* and *cuticle,* and gives colour to the body. In the white varieties of our species it is colourless; in the negro, black. By some anatomists the existence of such a distinct layer is denied.

Corpus Okense, Corpus Wolffianum.

Corpus Pampinifor'mē, *C. varico'sum,* from *pampinus,* 'a tendril.' *Cor'pus pyramida'lē, Hedera'ceus plexus,* (F.) *Corps pampiniforme, C. Variqueux.* The plexus or retiform arrangement of the spermatic arteries and veins, in the cavity of the abdomen, anterior to the psoas muscle.

Corpus Papilla'rē. *Textus papilla'ris, Corpus recticula're.* The nervous and vascular papillæ, situate beneath the epidermis, called by Breschet *Neurothelic apparatus.*

Corpus Phacoides, Crystalline—c. Pituitare, Pituitary gland—c. Psalloides, Lyra—c. Pyramidale, Corpus pampiniforme—c. Reticulare, Corpus mucosum, Corpus Papillare—c. Rhomboideum, Corpus dentatum—c. Thymianum, Thymus—c. Thymicum, Thymus—c. Thyreoideum, Thyroid gland—c. Turbinatum. Pineal gland—c. Varicosum, Corpus pampiniforme, Spermatic chord—c. Varicosum testis, Epididymis.

Corpus Spongio'sum Ure'thræ, *Substan'tia spongio'sa ure'thræ.* This substance arises before the prostate gland, surrounds the urethra, and forms the bulb. It then proceeds to the end of the corpora cavernosa, and terminates in the glans penis, which it forms.

Corpus Vit'reum, *Humor Vitreus, H. Hyaloïdes, Glacia'lis humor, Vitreous humor.* (F.) *Corps vitré, C. hyaloïde, Humeur hyaloïde.* The transparent mass of a gelatinous consistence, which fills the eye, behind the crystalline. It is contained in cells, formed by the *tunica hyaloidea.*

Corpus Wolffia'num, *Corpus Oken'sē.* At a very early period of fœtal formation, bodies are perceptible, which were first described, as existing in the fowl, by Wolff, and in the mammalia, by Oken. According to Müller, they disappear in man very early, so that but slight remains of them are perceptible after the 9th or 10th week of pregnancy. They cover the region of the kidneys and renal capsules, which are formed afterwards; and they are presumed to be the organs of urinary secretion during the first periods of fœtal existence.

CORPUSCLES, BLOOD, Globules of the blood—c. Glandiform, Acinus—c. Lymph, see Lymph.

Corpuscles, Pacin'ian, so called from Filippo Pacini, an Italian physician, who first noticed them in 1830. Small bodies connected with the cutaneous nerves of the palm and sole. They have also been found, sparingly and inconstantly in nerves at the wrist and elbow; in the upper arm, forearm, and thigh, and intercostal nerve, the sacral plexus, solar plexus and the plexuses adjacent to it. In each corpuscle is the termination of a nervous filament. Their uses are not known.

Corpuscles Splenic, see Spleen—c. White granulated, see Globulin.

CORPUSCULA ARANTII, Tubercula A—c. Glandularum similia intestinorum, Peyeri glandulæ—c. Globosa cervicis uteri, Nabothi glandulæ.

CORPUSCULUM ARANTII, see Sigmoid valves—c. Sesamoideum, see Sigmoid valves.

CORRAGO, Borago officinalis.

CORRĒ, *Corsē,* from χειρω, 'I shave.' (?) The temples or the part of the jaws, which it is usual to shave.—Gorræus.

CORRECTIF, Corrigent.

CORRECTION, *Correc'tio,* from *corrigere,* (*con,* and *regere,* 'to rule or order,') 'to correct.' The act of correcting medicines; that is, of diminishing their energy or obviating unpleasant effects, by mixing them with substances which mitigate their operation.

CORRECTORIUS, Corrigens.

CORRIGEEN MOSS, Fucus crispus.

COR'RIGENT, *Cor'rigens, Correcto'rius, Casti'gans, Infrin'gens, Emen'dans:* same etymon. (F.) *Correctif.* That which corrects. A corrigent, in a pharmaceutical formula, is a substance added to a medicine to mollify or modify its action. In the following formula, the aloes, if not corrected, might induce tormina. The *Oleum Menthæ* is added as a corrigent.

℞	*Aloes,*	℥j
	Olei Menthæ,	gtt. v
	Syrup q. s. *ut fiant Pilulæ*	xvj

CORRI''GIA. A leathern strap. By extension, the term has been applied to the tendons and ligaments.

CORROB'ORANT, *Corrob'orans, Rob'orans, Bracing,* from *corroborare,* (*con,* and *robur,* 'strength,') 'to strengthen.' (F.) *Corroborant, Corroboratif, Fortifiant.* Any substance which strengthens and gives tone. Wine, e. g., is a corroborant. See Tonic.

CORROBORANTIA. Tonics.

CORROBORATIF, Corroborant.

CORRODANT, Corrosive.

CORRODENS, Corrosive.

CORROSIF, Corrosive.

CORRO'SION, *Corro'sio, Diabro'sis, Anabro'-*

sis, *Ero'sio*, from *con*, and *rodere*, *rosum*, 'to gnaw.' The action or effect of corrosive substances

CORRO'SIVE, *Corro'dens*, *Diabrot'icus*, *Corrosi'vus*, same etymon. (F.) *Corrosif*, *Corrodant*. Corrosives are substances, which, when placed in contact with living parts, gradually disorganize them. *Caustic alkalies*, *Mineral acids*, *Corrosive sublimate*, are *corrosives*. They act either *directly*, by chemically destroying the part, or *indirectly*, by causing inflammation and gangrene.

CORRUGA'TION, *Corruga'tio*, from *con*, and *ruga*, 'a wrinkle.' Wrinkling, Frowning, (F.) *Froncement*; the contraction of the *Corrugato'res Supercil'ii* muscles. Corrugation of the skin is often owing to the application of styptic medicines: it is rendered by them unequal and rugous.

CORRUGATOR COITERII, Corrugator supercilii.

Corruga'tor Supercil'ii, from *corrugare*, 'to wrinkle;' same etymon. *Mus'culus supercil'ii*, *Supercilia'ris*, *Mus'culus fronta'lis verus* seu *Corruga'tor Coite'rii*; (F.) *Cutanéo-sourcilier*, *Muscle Sourcilier* ou *Surcilier*, *M. Fronto-Sourcilier*. A muscle situate in the eyebrows. It is attached, by its inner extremity, to the superciliary ridge, and is confounded, externally, with the occipito-frontalis and orbicularis palpebrarum. It carries the eyebrow inwards, and wrinkles the skin of the forehead.

CORRUP'TION, *Corrup'tio*, *Phthora*, *Diaph'thora*, from *corrumpere*, *corruptum*, (*con*, and *rumpere*, 'to break,') 'to destroy.' Act of corrupting. State of being corrupted. Reaction of the particles of a body upon each other. It is probable that something like corruption may take place even in the living body.

CORSE, Corre.

CORSET, from (F.) *corps*, 'the body.' *Stethodes'mium*, *Tu'nica Thora'cis*, *Thorax*. An article of dress, which closely embraces the trunk, and is much used by females in civilized countries. When corsets or stays are worn very tight, many serious evils result from the unnatural compression.

Different bandages, more or less complicated, which embrace the greater part of the trunk, are likewise so called.

CORSET DE BRASDOR. The name of a bandage invented by one Brasdor, to keep *in situ* the fragments of a fractured clavicle.

CORTALON, Senecio.

CORTEX, *Phloios*, *Phloos*, *Phlous*, φλοιος, φλοος, φλους, *Bark*, (F.) *Ecorce*. This word has often been applied, exclusively, to Cinchona: thus, we say *Bark—the cortex* or *bark κατ' ἐξοχην*. It means, also, any bark.

Cortex Alcomoco, *Alcomoque*—c. Anisi stellati, see Illicium anisatum—c. Antiscorbuticus, Canella alba—c. Aromaticus, Canella alba—c. Aurantii, see Citrus Aurantium—c. Canellæ Malabaricæ, Laurus cassia—c. Cardinalis del Lugo, Cinchona—c. Caryophyllatus, see Myrtus caryophyllata—c. Caryophylloides, Laurus culilawan.

Cortex Cer'ebri. The *Cortical*, *Cineritious*, *Vesicular* or *Gray substances of the Brain*. The gray portion observed at the exterior of the cerebrum and cerebellum; so called because it forms a kind of bark to the medullary substance. Gall considers, that this substance forms the nerves; and therefore calls it *Substance matrice des nerfs*.

The name *cortical* is likewise given to the external substance of the kidneys, because it is of a deeper colour than the inner part of the organ, and forms a kind of envelope to it.

Cortex Chacarillæ, Croton cascarilla—c. Chinæ, Cinchona—c. Chinæ regius, Cinchona—c. Crassior, Laurus cassia—c. Culilawan, Laurus culilawan—c. Eleutheriæ, Croton cascarilla—c. Flavus, Cinchonæ cordifoliæ cortex—c. Lavola, see Illicium anisatum—c. Magellanicus, see Wintera aromatica.

Cortex Ovi, *Cortical Membrane*. This membrane, so called by Boer and Granville, is usually regarded as a uterine production, and designated *Decidua reflexa*. They consider it to surround the ovule, when it descends into the uterus, and to enclose the shaggy chorion. It is absorbed during the first months of utero-gestation, so as to expose the next membrane to the contact of the decidua, with which a connexion takes place at the part where the placenta is to be formed. In that part, Boer and Granville consider, that the Cortex Ovi is never altogether obliterated, but only made thinner, and in process of time is converted into a mere pellicle or envelope, which not only serves to divide the filiform vessels of the chorion into groups or cotyledons, in order to form the placenta, but also covers those cotyledons. This, Granville calls *membra'na pro'pria*. See Decidua membrana.

Cortex Pallidus, Cinchonæ lancifoliæ cortex—c. Patrum, Cinchona—c. Profluvii, Nerium antidysentericum—c. Ruber, Cinchonæ oblongifoliæ cortex—c. Striata dentium, Enamel of the teeth—c. Thuris, Croton cascarilla—c. Winteranus, see Wintera aromatica—c. Winteranus spurius, Canella alba.

COR'TICAL, *Cortica'lis*, from *cortex*, 'bark.' Belonging to bark. See Cortex cerebri.

Cortical Membrane, Cortex ovi.

CORTUSA AMERICANA, Heuchera cortusa.

CORU. An Indian tree, the bark of whose root furnishes a milky juice, which is employed in diarrhœa and dysentery. It is also called *Coru Canar'ica*.

CORUSCATIO, Astrape.

CORYBAN'TIASM, *Corybantias'mus*, from Κορυβας, one of the Corybantes. A name formerly given to a kind of phrensy, in which the sick were tormented by fantastic visions, and perpetual want of sleep.

CORYDALUS BULBOSUS, Fumaria bulbosa.

COR'YLUS AVELLA'NA, *Bundurh*, *Cor'ylus*. The *Hazel-nut Tree*. (F.) *Coudrier*, *Noisetier*. *Family*, Amentaceæ. *Sex. Syst.* Monœcia Polyandria. The nut of this tree is much eaten in many countries. Like all nuts, it is by no means easy of digestion. It is the *Nux avella'na*, καρυον ποντικον, of the ancients; (F.) (*the nut*) *Aveline Noisette*.

Cor'ylus Rostra'ta, *Beaked Hazel*. An indigenous shrub, *Nat. Ord.* Amentaceæ; *Suborder*, Cupuliferæ: *Sex. Syst.* Monœcia Polyandria; the nut of which is surrounded by a coriaceous and scaly involucre, terminating in a tube covered with short and thick bristles. These bristles have been given as an anthelmintic in the same cases and doses as mucuna.

CORYMBETRA, Hedera helix.

CORYPHE, Vertex.

CORY'ZA, *Grave'do, Rhini'tis, Catastag'mos, Catastalag'mos, Stillicid'ium Narium, Phlegmatorrha'gia, Blennorrhœ'a nasalis, Blennorrhin'ia, Des'tillatio, Catar'rhus ad Nares:* vulgarly, '*running at the nose*,' '*A cold in the head*:' In French, *Rhume de cerveau Catarrhe nasal, Enchifrènement;* in Old English *Pose* or *Mur;* whence *Murren* and *Murrain;* from κορυς, or καρα, 'the head, and ζεω, 'I boil.' Inflammation (attended with increased discharge) of the Schneiderian membrane lining the nose, and the sinuses communicating with it. The affection generally subsides without any medical treatment.

Coryza Entonica, Ozæna—c. Maligna, Ozæna—c. Ozænosa, Ozæna—c. Ulcerosa, Ozæna—c. Virulenta, Ozæna.

COSCINISMUS, Cribration.

COSCINOI, see Cribration.

COSMESIS, Cosmetics.

COSMET'ICS, *Ars cosmet'ica, Callipis'tria, Cosme'sis,* (F.) *Cosmétique,* from κοσμειν, 'to adorn,' 'to embellish.' The art of preserving the beauty. *Cosmetic, Stilbo'ma,* is, also, used for the different means employed for that purpose; as the compounds which enter into the oxides of lead, bismuth, mercury, arsenic, &c. All these, however, injure the skin, and often give rise to unpleasant cutaneous affections. Frequent ablution with cold water and bathing are the best cosmetics. Essences, soaps, and all the preparations intended for the toilet, fall, also, under this head.

COSMETIQUE, Cosmetics.

COSMOS, from κοσμος, 'the world,' 'order,' &c. The *order* which was supposed to preside over critical days. Hippocrates and others have so termed *bracelets*, employed, not only as ornaments (κοσμειν, 'to adorn,') but as therapeutical agents.

COSSA. Haunch.

COSSUM. A malignant ulcer of the nose, often of a syphilitic character.—Paracelsus.

COSSUS or COSSIS. A sort of white, short, thick worm or larve, found in trees, logs of wood, &c., and used by the Romans as a great article of gourmandise. They were, also, applied to ulcers.—Pliny. The term has, likewise, been given to those small vermiform pimples on the face, Acne (q. v.), which arise from inflammation of the sebaceous follicles.

COSTA. A *Rib*, from *custodire*, 'to guard,' 'defend:' (F.) *Côte*. The ribs are 24 in number;—12 on each side. They are irregular, long, bony curves: slightly flattened, and situate obliquely at the sides of the chest. The intervals between them are called *Intercos'tal spaces*, (F.) *Espaces intercostaux*, and they are numbered *first, second, third*, &c., reckoning from above to below. They have been distinguished into *Costæ veræ, True ribs*, (F.) *Vraies Côtes, Côtes sternales, Côtes vertébro-sternales* (Ch.;) and into *Costæ spu'riæ, Mendo'sæ Costæ, False ribs, Côtes asternales*, (Ch.,) *Fausses Côtes*. The *true* or *sternal ribs*, as they have also been called, are the first 7; which are articulated, at one extremity to the spine, and at the other, by means of their cartilages to the sternum. The *false ribs* are the remaining 5: the uppermost three being united, by means of their cartilages, to the cartilage of the last true rib. The others are free at their external extremity, and, hence, have been called *Floating ribs, Côtes flottantes*. The vertebral extremity of each rib is slightly expanded. It is called the head of the rib—*Capit'ulum Costæ:* the space between this and the *tubercle* is the *collum* or *neck*. Anterior to the tubercle is the *angle*. The *angle* is the part where the bone bends to form the lateral part of the thorax.

COSTIVENESS, Constipation.

COSTMARY, Tanacetum balsamita.

COSTO-ABDOMINAL, Obliquus externus abdominis—*c. Basi-scapulaire*, Serratus magnus—*c. Claviculaire*, Subclavian muscle.

COSTO-CLAVIC'ULAR, *Costo-Clavicula'ris*. Belonging to the ribs and clavicle.

Costo-Clavic'ular Lig'ament, *Cleidocostal L.*, is a fibrous, flattened fascia, which extends, obliquely, from the cartilage of the first rib to the inferior surface of the clavicle.

COSTO-CORACOÏDIEN, Pectoralis minor—*c. Scapulaire*, Serratus magnus.

COSTO-STERNAL, *Costo-Sterna'lis*. Relating to the ribs and sternum. The articulation of the sternum with the anterior extremity of the first seven ribs.

COSTO-TRACHELIA'NUS. Relating to the ribs and to the *trachelian* or transverse processes of the neck. Under the name *Costo-trachel'ian*, Chaussier designates the *anterior* and *posterior scaleni*.

COSTO-TRANSVERSA'RIUS. Relating to the ribs, and to the transverse processes.—Bichat gave this name to the articulation of the tuberosities of the ribs with the transverse processes of the spine.

COSTO-VERTEBRAL, *Costo-Vertebra'lis*. Belonging to the ribs and vertebræ.—Bichat gave this name to the articulation of the head of the ribs with the vertebræ, and to the ligaments connected with it.

COSTO-XYPHOID, *Costo-xyphoïdeus*. The name of a ligament, which unites the cartilage of the seventh rib to the xyphoid or ensiform cartilage.

COSTUS. The ancients seem to have given this name to several plants. One has borne the appellation, since the time of Dioscorides, — the *Costus Arab'icus, Costus In'dicus, C. ama'rus, dulcis, orienta'lis, Tsia'na, Canne Congo, Canne de Rivière: Family*, Amomeæ, *Sex. Syst.* Monandria Monogynia; the root of which is aromatic, and has been considered tonic, carminative, diuretic, emmenagogue, &c. The virtues of the ancient costus are highly extolled. —Theophrastus, Dioscorides, Pliny, Galen.

Costus Corticosus, Canella alba—*c. Hortorum*, Tanacetum balsamita—*c. Hortorum minor*, Achillea ageratum—*c. Nigra*, Cynara scolymus.

COSTYLE, Cotyle.

COTA, Anthemis cotula.

COTARO'NIUM; an obscure term, used by Paracelsus for a universal solvent: such a thing as does not exist.

CÔTE, Costa.

COTES, COL DES, Collum costarum.

COTIGNAC. A kind of conserve or preserve, prepared from quinces, not entirely ripe, and sugar. It is esteemed stomachic and astringent.

COTON, Gossypium.

COTTON, Gossypium.

COTULA, Anthemis cotula.

COTULA FŒTIDA, Anthemis cotula.

COTUN'NIUS, LIQUOR OF. *Liq'uor Cotun'nii, L. of Cotug'no, Aquula acus'tica, Aqua audito'ria, Per'ilymph*, (F.) *Lymphe de Cotugno.* A transparent, slightly viscid fluid, which fills all the cavities of the internal ear, and of which Cotugno made mention. It is also called *Aqua Labyrinthi.*

COTURNIX. Tetrao coturnix.

COTYLE, *Cot'yla, Cotyle'don, Cos'tylē;* the same as *Acetab'ulum.* A hollow cavity in a bone, which receives the head of another bone: particularly th *cotyloid* cavity. Κοτυλη signified a drinking cup, and, indeed, any thing hollow, as the hollow of the hand.—Athenæus.

COTYLEDON, Cotyle—c. Marina, Umbilicus marinus.

COTYLEDONS, (Κοτυλιδων, 'a cavity,') *Acetab'ula uteri'na.* The lobes which, by their union, form the placenta.

COTYLOID, *Cotyloï'des, Cotyloï'deus, Cotylo'des,* from κοτυλη, 'a drinking cup,' and ειδος, 'form.' Resembling the ancient κοτυλη. The name of a hemispherical cavity, situate in the os innominatum, which receives the head of the os femoris;—*Fossa cotyloïdea, Sinus Coxæ, Acetab'ulum, Pyxis.*

COTYLOID LIGAMENT, *Ligamen'tum Cotyloïdeum,* (F.) *Ligament cotyloïdien,* is a very thick, fibro-cartilaginous ring, surrounding the cotyloid cavity, the depth of which it increases.

COU, Collum—c. *Gros,* Bronchocele.

COUCH GRASS, Triticum repens.

COUCHE ou *COUCHES* (F.) from *coucher,* 'to lie down.' This word is used, 1. For *parturition* (q. v.), *accouchement* or *delivery (puerpe'rium, parturi''tio:* hence, *une couche heureuse,* 'a happy delivery;' *une fausse couche,* 'a premature delivery:' and, 2. For the time during which a female remains in bed on account of delivery,—*Tempus puerpe'rii,* the *child-bed state.* The *Lochia* have been termed *Suites de couches. Couche* also means a bed or thalamus (q. v.) as,

COUCHES DES NERFS ETHMOIDAUX, Corpora striata—c. *des Nerfs oculaires,* Thalami nervorum opticorum—c. *des Nerfs optiques,* Thalami nervorum opticorum—c. *Optiques,* Thalami nervorum opticorum.

COUCHER, Decubitus.

COUCHING, see Cataract.

COUCINEA COCCINEA, Cacoucia coccinea.

COUDE, Elbow.

COUDE-PIED, Instep.

COUDÉE, Cubitus.

COUDRIER, Corylus avellana.

COUENNE, (F.) *Cutis suil'la.* A term given to various parts of the human skin, which are prominent, hard, brownish, and often covered with rough hairs, so as to form patches not very unlike the skin of the hog. It is a mal-formation, occurring during intra-uterine existence, and remaining for life. See also, Nævus, and Corium phlogisticum.

COUENNE INFLAMMATOIRE, Corium phlogisticum—c. *Pleurétique,* Corium phlogisticum.

COUGH, Tussis—c. Bronchial, C. tubal—c. Root, Trillium latifolium.

COUGH, TUBAL, *bronchial cough, Tussis bron'chica,* (F.) *Toux tubaire, T. bronchique.* Cough is so termed, when the succussion communicated by it to the parietes of the chest is very energetic, and a sensation is experienced by the ear as if a column of air was traversing with much noise, strength, and rapidity, tubes with solid walls.

COUGH, WINTER, Bronchitis, (chronic.)

COULER, To strain.

COULEUVRE, Coluber berus.

COULEUVRÉE, Bryonia alba.

COULISSE, (F.) 'A groove, a gutter.' Anatomists designate, by this name, every deep groove or channel in a bone, in which a tendon plays;—such as the *Coulisse Bicipitale* or *Bicipital Groove* of the Humerus.

COULISSE BICIPITALE, Bicipital groove—c. *Humérale,* Bicipital groove.

COULOIR, Colatorium.

COUM, Colchicum autumnale.

COUNTENANCE, *Vultus, Visage,* (F.) *Figure, Visage:* from *cum,* 'with,' and *teneo,* 'I hold' The form of the face. The system of the features.

COUNTER-EXTEN'SION, *Contra exten'sio, Antit'asis,* (F.) *Contre-extension,* from *contra-exten'dere,* 'to extend in a contrary direction.' It consists in retaining firmly and immovably the upper part of a limb, whilst extension is practised on the lower, in cases of fracture or luxation.

COUNTER-INDICATION, *Contra-indica'tio, Antendeix'is.* An indication contrary to another, (F.) *Contre-indication.* Any circumstance, which acts as an obstacle to the employment of such therapeutical means as seem to be indicated by other circumstances.

COUNTER-IRRITANT, see Counter-irritation—c. Granville's, (Lotion,) Granville's Counter-irritant.

COUNTER-IRRITATION, *Contra-irrita'tio.* An irritation, excited in a part of the body, with the view of relieving one existing in another part. The remedies used for this purpose are called *Counter-irritants,* and form a most valuable class of remedial agents. See Derivation.

COUP, Blow—c. *de Feu,* Wound, gunshot.

COUP DE MAITRE ou *TOUR DE MAITRE,* (F.) A masterly stroke or performance. A mode of introducing the sound or catheter into the bladder, which consists in first passing it with its convexity towards the abdomen of the patient, and afterwards giving it a half turn towards the right groin, when its extremity has reached the root of the penis under the symphysis pubis There is no advantage in this mode of introduction.

COUP DE SANG, (F.) A common term, used by some physicians in France, to designate the loss of sensation and motion, which results from hemorrhage in the brain, or from simple congestion in the vessels of that organ. See Apoplexy. Some authors have comprehended, under the same denomination, different hemorrhages, which occur in the cellular texture of the face, lungs, skin, &c.

COUP DE SOLEIL, (F.) *Siri'asis, Seiri'asis, Siriasis Ægyptiaca, Ictus solis, Ictus solu'ris, Insola'tio, Encephali'tis insolatio'nis, Phreni'tis calentu'ra,—a stroke of the sun. Ægyptian Star-stroke* or *Sunstroke.* Any affection produced by the action of the sun on some region of the body;—head, hands, arms, &c. A very common effect of exposing the naked head to the

sun is inflammation of the brain or its meninges, which Sauvages calls *Carus ab Insolatione*.

COUPE-BRIDE. Kiotome.

COUPEROSE, Gutta rosea.

COUPURE, Cut, Wound (incised)

COURANTE, Diarrhœa.

COURAP. A distemper, very common in India, in which there is a perpetual itching of the surface, and eruption. It is of an herpetic character, and appears chiefly on the axilla, groins, breast, and face.

COURBARIL, see Anime.

COURBATURE, (F.) *Acerba lassitudo*, *Violent lassitude*, *fatigue*. An indisposition, characterized by a sensation, as if the limbs were bruised; general feeling of debility, extreme lassitude; and, sometimes, slight fever. It appears immediately after severe exercise, but sometimes not till the next day. Rest removes it.

COURBURE, Curvature.

COURGE, Cucurbita pepo.

COURMI or CURMI, κορμι, κυρμι. A fermented liquor, made from barley. A kind of ale or beer.—Dioscorides.

COURO-MOELLI. An Indian tree, the bark of which is said to be anti-venomous.

COURON'DI, *Couron'do*. An evergreen tree of India, the juice of which, mixed with warm whey, is said to cure dysentery.—Ray.

COURONNE CILIAIRE, *Godronné canal*—*c. du Dent*, Crown of a tooth—*c. du Gland*, Crown of the glans—*c. du Trépan*, Crown of the trepan—*c. de Venus*, Crown of Venus.

COURONNE RAYONNANTE, (F.) A term given by Reil to the fan-shaped terminations of the crura cerebri in the brain.

COURONNEMENT, (F.) *Coro'na*. A vulgar expression, sometimes used to designate the circular ring, which the os uteri forms around the head of the child at a certain period of accouchement:—the head seeming to be surrounded, as it were, by a crown. The head is then said to be *au couronnement*.

COURS DE VENTRE, Diarrhœa.

COURSE, Running.

COURSES, Menses.

COURT, Short.

COURTE HALEINE, Dyspnœa.

COUSIN, Culex.

COUSSINET, Pad.

COUTEAU, Knife—*c. à Amputation*, Knife, amputation—*c. à Cataracte*, Knife, cataract—*c. Courbe*, Knife, crooked—*c. à Crochet*, Knife, crotchet—*c. Désarticulateur*, Knife, double-edged—*c. Droit*, Knife, amputation—*c. de Feu*, *Cultellaire*—*c. Interosseux*, Knife, double-edged—*c. Lenticulaire*, Knife, lenticular—*c. Lithotome*, Knife, lithotomy—*c. en Serpette*, Knife *en serpette*—*c. Symphysien*, see Symphyseotomy—*c. à deux tranchans*, Knife, double-edged.

COUTOU'BEA ALBA, *Exacum spicatum*, *Pterium spicatum*. A plant of Guiana, which is very bitter, and is considered, in the country, to be emmenagogue, anthelmintic, and anti-dyspeptic.

COUTURES PAR LA PETITE VEROLE, see Cicatrix.

COUTURIER, Sartorius.

COUVERCLE, see Crucible.

COUVRECHEF, (F.) *Cucullus*, *Fasciatio cucullata*. A bandage, applied to the head for retaining certain dressings, &c. *in situ*. The French surgeons distinguish two kinds. 1. The *Grand Couvrechef* ou *Serviette en carré* (*Cucullus major*,) which is formed of a napkin or large square compress: and, 2. The *Petit Couvrechef* ou *Mouchoir en triangle* (*Cucullus minor*,) formed of a napkin or other square compress, folded from one angle to the other diagonally opposite to it.

COUVRECHEF, see Bandage, Galen's.

COVE, (CLIMATE OF.) On the northern side of Cork Harbour, in Ireland, is the Island of Cove. The town of Cove is on the southern acclivity of a hill running from east to west. It is, consequently, sheltered from the north winds, and receives the full force of the sun. It is one of the mildest climates in Great Britain, and corresponds in its influence on disease with the south-west of England. It is well adapted as a winter retreat for the phthisical.

COVOLAM, *Crataeva Marmelos*. The bark of this tree is tonic: the unripe fruit is astringent: but, when ripe, is delicious.

COWBANE, Cicuta aquatica.

COWBERRY, Vaccinium vitis idæa.

COWHAGE, Dolichos pruriens.

COWITCH, Dolichos pruriens.

COWPARSNEP, Heracleum lanatum.

COWPER'S GLANDS, *Accessory glands*, (F.) *Glandes accessoires*, *G. de Cowper*, *Prostates inférieures* ou *petites prostates*. Two small ovoid groups of mucous, reddish follicles, situate behind the bulb of the urethra, before the prostate, the excretory ducts of which open into the bulbous portion of the urethra. They are also called *Glandulæ antepros'tatæ*, and *G. prostatæ inferiores*.

COWPER'S GLANDS IN THE FEMALE. *Glands of Duverney*, *Glands of Bartholinus*, are situate at each side of the entrance of the vagina, beneath the skin covering the posterior or inferior part of the labia. They are rounded, but elongated, flat, and bean-shaped; their long diameter varying from five to ten lines; their transverse, from two and a half to four and a quarter; and their thickness from two and a quarter to three lines. Like Cowper's glands in the male, they are not invariably present. The secretion from them is a thick, tenacious, grayish-white fluid, which is emitted in great quantity during sexual intercourse; and is probably the fluid, supposed, of old, to be the female sperm.

COWPOX, Vaccina—c. Inoculation, Vaccination.

COWRAP, Impetigo.

COWSLIP, Primula veris—c. Jerusalem, Pulmonaria.

COWWEED, Chærophyllum sylvestre.

COXA, Haunch.

COXÆLUVIUM, Bath, hip.

COXAGRA, Neuralgia femoro-poplitæa.

COXAL'GIA, *Osphyalgia*. A word of hybrid origin, from *coxa*, 'hip,' and αλγος, 'pain.' Pain in the hip. A sign of rheumatic or other inflammation, or of some disease about the hip-joint. See Neuralgia femoro-poplitæa, and the next.

COXARTHROCACE, Coxarum morbus

COXA'RUM seu COXEN'DICUS seu COXARIUS MORBUS, *Arthrocacē coxarum*, *Coxarthrocacē*, *Coxalgia* (of some.) *Hip disease*. A scrofulous caries, and often spontaneous luxation of the head of the os femoris, occasion-

ing permanent shortening of the limb, and not unfrequently hectic and death.

COXENDIX, Haunch. This word has also been used synonymously with ischium. The haunch (q. v.) Anatomists, too, have called the ilia, *Ossa Coxendicis*.

COXI'TIS; a hybrid term, from *Coxa*, 'the hip,' and *itis*, denoting inflammation. Inflammation of the hip-joint.

COXO-FEM'ORAL, *Coxo-femora'lis*. Belonging to the coxal bone or ilium, and to the os femoris. *Ilio-femoral* has the same signification.

COXO-FEM'ORAL or IL'IO-FEM'ORAL ARTICULA'TION, (F.) *Articulation de la Hanche*, is the *Hip-joint*. The head of the femur and articular cavity are covered by a *diarthrodial cartilage* and *synovial capsule*; and by a very *strong capsular* or *articular ligament* attached to the circumference of the cotyloid cavity, and to the neck of the femur. There is, also, a *round* or *interarticular ligament*, passing from the inferior notch of the cotyloid cavity to the rough depression at the top of the caput femoris; and a *cotyloid ligament*,—a sort of thick, cartilaginous ring, situate on the edge of the cotyloid cavity, and converting the inferior notch into a foramen. These are the great means of union in this extensive articulation.

CRAB, *Astacus fluviat'ilis*, *Cancer*, *Gam'marus*, *Cam'marus*. (F.) *Crabbe*, *Ecrevisse*, *Escrevice*. A shell-fish much used as an article of diet. Like other shell-fish it is apt to disagree, and excite urticaria, &c.

CRABE, Crabyaws.

CRABLOUSE; a species of *Pedic'ulus*, *P. Pubis*, which infests the pudendum and axilla. (F.) *Morpion*. It is easily destroyed by the white precipitate of mercury, or by mercurial ointment.

CRABS' EYES, Cancrorum chelæ—c. Stones, Cancrorum chelæ.

CRABYAWS. (F.) *Crabe*. A name, in the West Indies, for a kind of ulcer on the soles of the feet, with edges so hard, that they are difficult to cut.

CRACHAT, Sputum.

CRACHEMENT, Excreation—*c. de Pus*, Vomica, Phthisis pulmonalis—*c. de Sang*, Hæmoptysis.

CRACHOTEMENT, (F.) from *cracher*, 'to spit.' The frequent spitting of a small quantity of saliva.

CRACKLING OF LEATHER, see *Craquement de cuir*.

CRACOW GROATS, Semolina.

CRADLE, Sax. cpaꝺel, *Ar'culus*, *Solen*, (F.) *Arceau* ou *Archet*. A semicircle of thin wood, or strips of wood, used for preventing the contact of the bed-clothes in wounds, &c. An ordinance of the Grand Duke of Tuscany forbade mothers and nurses to sleep with a child near them, unless it was placed under a solid cradle of this kind, in order that no accident might arise from *overlaying*.

CRÆ'PALE, from κραιπαλη, *Crap'ula*, 'drunkenness, surfeit.' A derangement of the functions of the brain, &c., produced by wine or any other fermented liquor.—Galen.

CRAIE, Creta.

CRAMA, κρᾶμα, from κεράω, 'I mix.' A mixture of any kind. Dilute wine.

CRAMBE, Cabbage.

CRAM'BION, from κραμβη, 'cabbage.' A decoction of cabbage.—Hippocr.

CRAMP, from (G.) krampfen, 'to contract,' *Crampus*, *Enta'sia systrem'ma*, *Tet'anus dolorif'icus*. A sudden, involuntary, and highly painful contraction of a muscle or muscles. It is most frequently experienced in the lower extremities, and is a common symptom of certain affections:—as of *Colica Pictonum* and *Cholera Morbus*. Friction and compression of the limb, by means of a ligature applied round it above the muscles affected, will usually remove the spasm.

CRAMP OF THE STOMACH, (F.) *Crampe de l'Estomac*. A sudden, violent, and most painful affection of the stomach, with sense of constriction in the epigastrium. It seems to be the effect of the spasmodic contraction of the muscular coat of the stomach, and requires the use of the most powerful stimulants and antispasmodics, of which opium is the best.

CRAMP, WRITERS', *Stammering of the Fingers*. A condition of the fingers, in which they are unable to hold the pen, or in which one or more of the muscles of the fingers are irregularly and irresistibly contracted.

CRAMPE DE L'ESTOMAC, Cramp of the stomach.

CRANBERRY, Vaccinium oxycoccos—c. Upland, Arbutus uva ursi.

CRANE, Cranium—*c. Humain*, Cranium humanum.

CRANE'S BILL, Geranium—c. Spotted, Geranium maculatum—c. Stinking, Geranium Robertianum.

CRANIOL'OGY or CRANIOS'COPY, *Craniolog''ia*, *Phrenol'ogy*, *Cranioscop'ia*, *C. Gallia'na*, *Encephaloscop'ia*, *Doctri'na Gallia'na*. Words, introduced, since Gall, into medical language. The first two terms are respectively derived from κρανιον, 'cranium,' λογος, 'a discourse,' and σκοπειν, 'to examine.' They signify the description, or simply, the examination of the different parts of the external surface of the cranium, in order to deduce from thence a knowledge of the different intellectual and moral dispositions. Strictly speaking, it is by *Cranioscopy* that we acquire a knowledge of *Craniology* or of *Organology* or *Cranology*, as it has, also, been termed. These words are generally, however, used in the same sense. The cranium being exactly moulded to the brain, there are as many prominences on the bone as there are projections at the surface of the brain. According to Gall, each projection, which he calls an *organ*, is the seat of a particular intellectual or moral faculty, and all persons endowed with the same faculty, have, at the same part of the brain, a prominence, which is indicated, externally, by a bump or projection in the bony case. The *System* of Gall is made to comprise 27 prominences, which answer to 27 faculties. The following Table exhibits these supposed organs, and their seat.

CEREBRAL ORGANS, AND THEIR SEAT, ACCORDING TO GALL.

1. *Instinct of generation, of reproduction; amativeness; instinct of propagation; venereal instinct.* (*German*) Zeugungstrieb, Fortpflanzungstrieb, Geschlechtstrieb.	Seated in the cerebellum. It is manifested at the surface of the cranium by two round protuberances, one on each side of the nape of the neck.
2. *Love of progeny; philoprogenitiveness.* (*G.*) Jungenliebe, Kinderliebe.	Indicated at the external occipital protuberance.
3. *Attachment; friendship.* (*G.*) Freundschaftsinn.	About the middle of the posterior margin of the parietal bone; anterior to the last.
4. *Instinct of defending self and property; love of strife and combat; combativeness; courage.* (*G.*) Muth, Raufsinn, Zanksinn.	Seated a little above the ears; in front of the last, and towards the mastoid angle of the parietal bone.
5. *Carnivorous instinct; inclination to murder; destructiveness; cruelty.* (*G.*) Wurgsinn, Mordsinn.	Greatly developed in all the carnivorous animals; forms a prominence at the posterior and superior part of the squamous surface of the temporal bone, above the mastoid process.
6. *Cunning; finesse; address; secretiveness.* (*G.*) List, Schlauheit, Klugheit.	Above the meatus auditorius externus, upon the sphenoidal angle of the parietal bone.
7. *Desire of property; provident instinct; cupidity; inclination to robbery; acquisitiveness.* (*G.*) Eigenthumssinn, Hang zu stehlen, Einsammlungssinn, Diebsinn.	Anterior to that of cunning, of which it seems to be a prolongation, and above that of mechanics, with which it contributes to widen the cranium, by the projection which they form at the side of the frontal bone.
8. *Pride; haughtiness; love of authority; elevation.* (*G.*) Stolz, Hochmuth, Hohensinn, Herrschsucht.	Behind the top of the head, at the extremity of the sagittal suture, and on the parietal bone.
9. *Vanity; ambition; love of glory.* (*G.*) Eitelkeit, Ruhmsucht, Ehrgeiz.	Situate at the side of the last, near the posterior internal angle of the parietal bone.
10. *Circumspection; foresight.* (*G.*) Behutsamkeit, Vorsicht, Vorsichtigkeit.	Corresponds to the parietal protuberance.
11. *Memory of things; memory of facts; sense of things; educability; perfectibility; docility.* (G) Sachgedächtniss, Erziehungsfähigkeit, Sachsinn.	Situate at the root of the nose, between the two eyebrows, and a little above them.
12. *Sense of locality; sense of the relation of space; memory of places.* (*G.*) Ortsinn, Raumsinn.	Answers to the frontal sinus, and is indicated externally by two prominences at the inner edge of the eyebrows, near the root of the nose, and outside of the organ of memory of things.
13. *Memory of persons; sense of persons.* (*G.*) Personensinn.	At the inner angle of the orbit.
14. *Sense of words; sense of names; verbal memory.* (*G.*) Wordgedächtniss, Namensinn	Situate at the posterior part of the base of the two anterior lobes of the brain, on the frontal part of the bottom of the orbit, so as to make the eye prominent.
15. *Sense of spoken language; talent of philology; study of languages.* (*G.*) Sprachforschungssinn, Wortsinn, Sprachsinn.	Also at the top of the orbit, between the preceding and that of the knowledge of colour.
16. *Sense of the relations of colour; talent of painting.* (*G.*) Farbensinn.	The middle part of the eyebrows; encroaching a little on the forehead.
17. *Sense of the relations of tones; musical talent.* (*G.*) Tonsinn.	A little above and to one side of the last; above the outer third of the orbitar arch.
18. *Sense of the relations of numbers; mathematics.* (*G.*) Zahlensinn.	On the outside of the organ of the sense of the relations of colour, and below the last.

19. *Sense of mechanics; sense of construction; talent of architecture; industry.* (*G.*) Kunstsinn, Bausinn.	A round protuberance at the lateral base of the frontal bone, towards the temple, and behind the organs of music and numbers.
20. *Comparative sagacity.* (*G.*) Vergleichender Scharfsinn.	At the middle and anterior part of the frontal bone, above that of the memory of things.
21. *Metaphysical penetration; depth of mind.* (*G.*) Metaphysischer Tiefsinn.	In part, confounded with the preceding. Indicated at the outer side of the last, by a protuberance, which gives to the forehead a peculiar hemispherical shape.
22. *Wit.* (*G.*) Witz.	At the lateral and outer part of the last; and giving greater width to the frontal prominence.
23. *Poetical talent.* (*G.*) Dichtergeist.	On the outer side of the last; divided into two halves by the coronal suture.
24. *Goodness; benevolence; mildness; compassion; sensibility; moral sense; conscience; bonhommie.* (*G.*) Gutmüthigkeit, Mitleiden, moralischer Sinn, Gewissen.	Indicated by an oblong prominence above the organ of comparative sagacity; almost at the frontal suture.
25. *Imitation; mimicry.* (*G.*) Nachahmungssinn.	At the outer side of the last.
26. *God and religion; theosophy.* (*G.*) Theosophisches Sinn.	At the top of the frontal bone and at the superior angles of the parietal bone.
27. *Firmness; constancy; perseverance; obstinacy.* (*G.*) Stetigkeit, Fester Sinn.	The top of the head; at the anterior and most elevated part of the parietal bone.

The first nineteen of these, according to Gall, are common to man and animals; the remaining eight, man possesses exclusively. They are, consequently, the attributes of humanity.

ORGANS ACCORDING TO SPURZHEIM.

1. Amativeness.—2. Philoprogenitiveness.—3. Inhabitiveness.—4. Adhesiveness or Attachment.—5. Combativeness.—6. Destructiveness.—7. Constructiveness.—8. Acquisitiveness.—9. Secretiveness.—10. Self-esteem.—11. Love of Approbation.—12. Cautiousness.—13. Benevolence.—14. Veneration.—15. Firmness.—16. Conscientiousness or Justice.—17. Hope.—18. Marvellousness.—19. Wit.—20. Ideality.—21. Imitation.—22. Individuality.—23. Form.—24. Size.—25. Weight and Resistance.—26. Colour.—27. Locality.—28. Numeration.—29. Order.—30. Eventuality.—31. Time.—32. Melody or Tune.—33. Language.—34. Comparison.—35. Causality.

A fundamental principle with the *Craniologists* or *Phrenologists*, is,—that the brain does not act as a single organ, but that it consists of a plurality of organs: but, were we able to admit this, the assignment of the seat of different faculties could not but be considered premature.

CRANIOSCOPY, Craniology.

CRA'NIUM, *Cra'nion*, *Calva'ria*, *Sca'phion*, *Conchus*, *Calva*; the skull; from κρανος, 'a helmet,' or from κρανον, 'head.' (F.) *Crane*. The collection of bones, which form the case for lodging the brain and its membranes, as well as their vessels, and some of the nerves. These bones are eight in number—the *frontal*, *occipital*, two *parietal*, two *temporal*, the *sphenoid*, and *ethmoid*. Besides these, there might be considered, as belonging to the cranium, the cornua sphenoidalia, the bones of the ear, and the ossa wormiana. Dr. Prichard has characterized the primitive forms of the skull according to the width of the *Bregma*, or space between the parietal bones: 1. The *Stenobregmate*, (στενος, 'narrow,') or Ethiopian variety. 2. The *Mesobregmate*, (μεσος, 'middle,') or Caucasian variety; and 3. The *Platybregmate*, (πλατυς, 'broad,') or Mongolian variety.

CRANIUM HUMA'NUM, *Human Cra'nium*, (F.) *Crane humain*. This was anciently much used in prescriptions, and was considered anti-epileptic, alexipharmic, antiloimic, &c.

CRA'NOMANCY, *Cranomanti'a*, from κρανον, 'the head,' and μαντεια, 'divination,' (F.) *Cranomancie*. The art of divining—from the inspection of the head or cranium—the moral dispositions and inclinations of individuals.

CRANSON, Cochlearia officinalis.

CRANSSAC, MINERAL WATERS OF. Cranssac is a village in the department of Aveyron, six leagues from Rhodez, which possesses acidulous chalybeate springs, that have been known for a long time.

CRANTER, from κραινειν, 'to finish,' 'render perfect.' The *Dens Sapien'tiæ* has been so called.

CRAPULA, Crapale.

CRAQUEMENT DE CUIR, (F.) 'Crackling of leather.' A sound like the crackling of new leather, sometimes heard on examining the heart with the stethoscope. It has been supposed to be symptomatic of pericarditis.

CRASIS; κρασις, from κερανυμι, 'I mix.' A mixture of the constituents of a fluid; as the *crasis of the blood*, *humours*, &c. The word has, also, been employed in a more extensive signification, as synonymous with *Constitution*, *Temperament*, (q. v.) &c.

CRASPEDON, Staphylœdema.

CRASSAMENTUM, from *crassus*, 'thick.' The thick part or deposit of any fluid. It is particularly applied to the clot of the blood.

CRASSAMENTUM SANGUINIS, see Blood.

CRASSE, (F.) Dirt or impurity. A sort of layer or *enduit*, which covers the skin, where cleanliness is not attended to; and which is sometimes the result of the cutaneous exhala-

tion; at others, of extraneous matter adhering to the surface of the body.

CRASSE'NA. A term by which Paracelsus designated the saline, putrescent, and corrosive principles, which, he thought, gave rise to ulcers and tumours of different kinds.

CRASSULA, Sedum telephium.

CRATÆ'GUS A'RIA, from κρατος, 'strength,' owing to the hardness of the wood. *Mes'pilus, Aria* seu *Sorbus, White Beam Tree,* (F.) *Alisier blanc; Alouche, Alouchier.* The fruit, which is of the size of a small pear, is slightly astringent, and somewhat agreeable to the taste. It has been employed in diarrhœa.

CRATÆVA MARMELOS, Covolam.

CRATEVÆSIUM, Sisymbrium nasturtium.

CRATOS, Force.

CRAUTE, MINERAL WATERS OF. Craute is a village five leagues from Autun, in France, where are mineral springs, containing sulphohydrate of magnesia, chloride of sodium, chloride of lime, sulphate of lime, and carbonate of magnesia.

CRAYEUX, Cretaceous.

CRAYON NOIR, Graphites.

CRAZINESS, Insanity.

CREA, Shin.

CREAM, *Cremor,* (F.) *Crème.* A thick, unctuous matter, of a yellowish-white colour, and sweet, agreeable taste, which rises to the surface of milk, if kept at rest. It is composed of butter, serum, and casein.

Crème is a name given in France to *bouillies* prepared with farina of different kinds; as the *Cream of Rice, Crème de Riz, C. of Barley, C. d'orge,* &c.

Cream, Cold, Ceratum Galeni, Unguentum Aquæ rosæ—c. of Tartar, Potassæ supertartras.

CRE'ASOTE, *Cre'osote, Creaso'tum, Kre'asote, Creaso'ton;* from κρεας, 'flesh,' and σωτηρ, 'a preserver.' A substance discovered a few years ago by Reichenbach. It is obtained from tar, by distillation, and appears to be the active antiseptic and medicinal agent in tar-water and crude pyroligneous acid. It is a colourless transparent fluid, of a penetrating and disagreeable odour, and is freely soluble in alcohol and acetic acid. Its taste is bitter. S. g. 1.037. It coagulates albumen, whence its hæmostatic power. It is a most powerful antiseptic; and has been largely administered in hemorrhages both internally and externally. As an external application, it has been used in burns, ulcers, especially those of a sloughing character, chronic cutaneous affections, and has been applied to tapeworm when protruded, &c. Internally, it has been administered in phthisis, vomiting, diabetes mellitus, nervous diseases, chronic glanders, &c. The dose internally is one or two drops. Externally, it is sometimes applied pure; at others diluted, and commonly with water, (f. ℥ss to f. ℥vj;) or in the form of ointment, (gtt. xv to ℥j of cerate.)

CREATOPHAGUS, Carnivorous.

CREMASON, Pyrosis.

CREMAS'TER, *Suspendic'ulum, Eleva'tor Testic'uli, Mus'culus Testis, M. Testicon'dus.* That which suspends; from κρεμαω, 'I suspend.' The Greeks designated, by this term, the spermatic chord, or all the parts by which the testicle is, as it were, suspended; but, since Vesalius, it has received its present limited meaning. The cremaster is a very thin, muscular fascia —sometimes hardly perceptible—which detaches itself from the internal oblique muscle; passes through the abdominal ring, and vanishes around the tunica vaginalis; serving to draw up the testicle, and to move it slightly. It has been, also, called *Tunica Erythroïdes* and *Suspenso'rium Testis.*

CRÈME, Cream—*c. de Soufre*, Sulphur præcipitatum—*c. de Tartre*, Potassæ supertartras.

CREMER. The common name for a disease frequent in Hungary, which is produced by excess in eating and drinking.—Chomel.

CREMNOI, plural of κρημνος, 'a steep bank.' The lips of an ulcer. The *Labia Puden'di,* (q. v.) —Hippocrates, Foësius. Hence:

CREMNON'CUS, from κρημνος, 'the labia pudendi,' and ογκος, 'a tumour.' A swelling of the labia pudendi.

CREMOR, Cream—c. Tartari, Potassæ supertartras—c. Urinæ, see Urine.

CRENA, *Crenatu'ra, Dentic'ulus,* (F.) *Crénelure.* In the plural, the small teeth or projections in the bones of the cranium, by means of which an accurate junction is formed at the sutures. *Crénelure* has also been used, in *surgery,* for the gutter or groove in certain instruments, which is generally intended to secure the passage of cutting instruments;—the groove for example, of a director.

CRENATURA, Crena.

CRÉNELURE, Crena.

CREOPHAGUS, Carnivorous.

CREPANELLA, Plumbago Europæa.

CREPA'TIO, *Crepatu'ra,* from *crepare,* 'to make a noise.' The action of bursting any seed by ebullition.—*Coque ad crepatu'ram,* 'Boil till it bursts.'

CREPATURA, Hernia.

CREPIDINES PALPEBRARUM, see Tarsus.

CREPITANT, *Crep'itating, Crepitans;* same etymon. Crackling.

RÂLE CREPITANT SEC À GROSSES BULLES, 'dry crackling noise with formation of large bubbles,' is heard in pulmonary emphysema, when the distention becomes greater and greater, and is followed by rupture of the vesicles. The air forcing itself a passage in the interlobular cellular tissue, gives rise to this *Râle* during inspiration.

RÂLE CREPITANT SEC, OF LAËNNEC, R. vésiculaire. The *crepitant rattle,* heard, during respiration, in severe pneumonia and in œdema of the lung; so termed on account of the analogy between the sound and that occasioned by pressing a healthy lung between the fingers.

CREPITA'TION, *Crep'itus,* from *crepitare,* 'to make a noise.' *Crackling.* Crepitation or *crepitus,* (F.) *Cliquetis,* has been used, in *Surgery,* to designate the noise occasioned by the friction of fractured bones, when the surgeon moves them in certain directions. When it cannot be heard at a distance, it may be detected by the immediate application of the ear, or by the use of the stethoscope. *Crepitus* or *crackling* is, likewise, met with in cases of gangrene, when air is effused into the cellular membrane—provided the part be carefully examined with the fingers. The same term is used for the cracking of the joints in health or disease. *Crep'itus, Physa, Physē, Pordē, Flatus,* also means a discharge of wind per anum. See Fart.

CREPITUS, Crepitation, Fart—c. Lupi, Lycoperdon.

CRESCENTIA, Growth.

Crescen'tia Cujē'te, (called after Crescentio, an Italian writer on agriculture;) *Cujete, Narrow-leaved Calabash Tree.* The pulp of the fruit of this West India plant is acidulous. It is used in diarrhœa and headache; and, in syrup, for diseases of the chest.

CRESCENTIÆ, Waxing kernels.

CRESERA, see Cribration.

CRESPINUS, Oxycantha Galeni.

CRESS, GARDEN, Lepidium sativum—c. Indian, Tropæolum majus—c. Penny, Thlaspi—c. Swines', Cochlearia coronopus—c. Water, Sisymbrium nasturtium—c. Water, marsh, Nasturtium palustre.

CRESSES, DOCK, Lapsana—c. Sciatica, Lepidium Iberis.

CRESSI, Sisymbrium nasturtium.

CRESSON, ALÉNOIS, Lepidium sativum—*c. Élégant*, Cardamine pratensis—*c. de Fontaine*, Sisymbrium nasturtium—*c. des Indes*, Tropæolum majus—*c. des Jardins*, Lepidium sativum—*c. du Mexique*, Tropæolum majus—*c. de Para*, Spilanthus oleraceus—*c. des Près*, Cardamine pratensis.

CRETA, *Car'bonas calcis, Car'bonas calcarreus, Glisomargo, Melia Terra, Chalk, Carbonate of Lime*, (F.) *Craie.* Native friable carbonate of lime.

Creta Prepara'ta, *Car'bonas Calcis præpara'tus, Prepared Chalk.* (Prepared by levigation.) Used, externally, as an absorbent; internally, as an antacid. Dose, gr. x to ʒj or more.

CRÉTACEOUS, *Creta'ceus*, (F.) *Crayeux*, from *creta*, 'chalk.' Containing or relating to chalk; as 'cretaceous mixture.'

CRÊTE, Crista—*c. de Coq*, Crista galli—*c. de l'Ethmoïde*, Crista galli—*c. Uréthrale*, Gallinaginis caput—*c. Urêtrale*, Caput Gallinaginis.

CRÊTES DE COQ, see Crista.

CRÉTIN. One affected with cretinism. The word is said to come from *Chrétien*, "Christian," because the Crétin, being in a state of idiocy, is incapable of committing any sin. See Cagot.

CRET'INISM, *Cret'inage, Cyrto'sis Cretinis'mus, Cretinis'mus.* An epidemic affection in the low, deep, narrow situations of the Valais; in the valley of Aost, Maurienne, a part of Switzerland, the Pyrenees, Tyrol, &c. It is a state of idiocy, commonly accompanied by an enormous goître, and is often hereditary. The unfortunate crétin is little better than the animals around him. He rarely attains an advanced age. Like idiocy, cretinism has been divided into *complete* and *incomplete.*

CREUSET, Crucible.

CREUX DE L'AISSELLE, see Axilla.

CREUX DE L'ESTOMAC, Fossette du cœur.

CREUX DE LA MAIN, Palm.

CREUZNACH, MINERAL WATERS OF, The springs of Creuznach are in Germany. They contain iodine, bromine, and the chlorides of sodium and calcium.

CREUZOT, MINERAL WATERS OF. C. is a mountain to the north-east of Mount Cenis. Near it is a saline chalybeate spring.

CREVASSE, (F.) *Rima*, from *crever*, 'to break or crack.' A *Crack*, a *Cleft.* The words *crevasse, gerçure, fissure*, and *rhagade* are often used synonymously for small longitudinal cracks or chaps of a more or less painful character. Sometimes, *crevasse* is employed to designate the solutions of continuity or ruptures, which supervene in distended parts, in the urinary passages, uterus, &c.: it is then synonymous with rupture.

CRI, Cry.

CRIBLÉ, (F.) *Cribra'tus, Cribro'sus*, from *cribrum*, 'a sieve.' Having holes like a sieve. *Lame criblée, Crib'riform plate*, is the horizontal lamina of the ethmoid bone—so called because it is perforated like a sieve. Through the perforations the olfactory nerves pass.

La'mina Cribro'sa of Albinus;—a circular spot, perforated with small holes, seen when the optic nerve is regarded from the inside, after removing the retina and choroid. From these holes the medullary matter may be expressed.

CRIBRA, see Cribration.

CRIBRA'TION, *Cribra'tio, Coscinis'mus*, from *cribrare*, 'to sift,' *Sifting.* A pharmaceutical operation, which consists in separating the finest parts of drugs from the coarser. Sieves are used for this purpose. These were formerly called *Cribra; Coscinoi.* A sieve for separating the bran from meal, was termed *Cre'sera, Aleurote'sis, Cribrum Pollina'rium.*

CRIBRATUS, see *Criblé.*

CRIB'RIFORM, *Cribrifor'mis*, from *cribrum*, 'a sieve,' and *forma*, 'form.' The ethmoid bone was formerly so called:—*Os Cribrifor'mē.*

Cribriform Compress. A square piece of linen pierced with a number of holes. This is spread with cerate and applied to a suppurating surface, the holes being intended for the escape of the pus.

CRIBROSUS, see *Criblé.*

CRIBRUM POLLINARIUM, see Cribration.

CRICELA'SIA, *Cricila'sia*, from κρικος, 'a circle,' and ελαυνω, 'I drive.' An exercise with the ancients, which appears to have been the same as the childish play of rolling the hoop.

CRICK IN THE NECK. A painful rheumatic affection of the muscles of the neck, which causes the person to hold his head to one side in a characteristic manner.

CRICO-ARYT'ENOID, *Cri'co-arytenoïdeus.* Relating to the cricoid and arytenoid cartilages.

Crico-Aryt'enoid Muscle, *Crico-arytenoïdeus latera'lis, Crico-lateri-ariténoïdien.* A muscle which proceeds from the lateral part of the superior edge of the cricoid cartilage to the outer and anterior part of the base of the arytenoid cartilage. It carries the arytenoid cartilage outwards and forwards.

Crico-Aryt'enoid, Poste'rior; *Crico-arytenoïde'us posti'cus, Crico-crêti-ariténoïdien, Dilatateur postérieur du Larynx.* A small, triangular muscle, seated at the back part of the larynx. It extends from the prominent line, at the middle of the posterior surface of the cricoid cartilage, to the outer and posterior part of the base of the arytenoid cartilage.

Crico-Arytenoidæ'us Supe'rior, of Winslow, forms part of the *Arytenoïde'us* of modern anatomists.

CRICO-CRÊTI-ARITÉNOÏDIEN, Crico-arytenoid, posterior—*c. Latéro-aryténoïdien*, Crico-arytenoid—*c. Pharyngeus, C. pharyngeal.*

CRICO-PHARYNGEAL, *Crico-pharyngeus.* Belonging to the cricoid cartilage and pharynx.

Crico-Pharyngeus muscle, of Winslow, is a fleshy bundle, which forms part of the *Constrictor Pharyngis inferior*, (q. v.) He

calls the other part *Thyro-pharyngeus*, and proposes to call the whole *Thyro crico-pharyngeus*.

CRICO-THYROIDEAN, *Crico-Thyroid*. Belonging to the cricoid and thyroid cartilages.

Crico-Thyroid Membrane is of a fibrous nature; and extends from the upper edge of the cricoid cartilage to the inferior edge of the thyroid.

Crico-Thyroid Muscle, *Crico-Thyroïdeus*, *Dilatateur antérieur du larynx*, is a small, fleshy bundle, of a triangular shape, at the anterior and inferior part of the larynx. It extends from the outer surface of the cricoid cartilage to the lateral parts of the inferior margin of the thyroid cartilage; and its use is, to approximate, anteriorly, the corresponding margins of the cricoid and thyroid cartilages; and thus to stretch the ligaments of the glottis, which it contracts by separating the thyroid cartilage from the arytenoid.

CRICO-THYRO-PHARYNGIEN, Constrictor pharyngis.

CRICOÏDES, Annular.

CRICOID, *Cricoï'deus*, *Cricoï'des*, *Annula'ris*, *Cymbala'ris*, *Cartila'go innomina'ta*, from κρικος, 'a ring,' and ειδος, 'form.' Having the form of a ring, (F.) *Cartilage anonyme*. A name given to one of the cartilages of the larynx, which is situate at its lower part, between the thyroid and first ring of the trachea. It is much higher behind than before.

CRICOS, Ring.

CRIMNO'DES, *Crimnoï'des*, from κριμνον, 'coarse meal,' and ειδος, 'resemblance.' Resembling meal.

Crimno'des Uri'na. Urine that deposits a sediment like meal.

CRIMNON, Farina.

CRINA'LE, from *crinis*, 'hair.' An instrument, formerly used to compress, in cases of fistula lachrymalis. It has its name from the circumstance of its having at one end a small cushion stuffed with hair.—Scultetus.

CRINA'TUM. A species of fumigation, used by Paulus of Ægina. The roots of lilies entered into the process; hence its name, from κριον, 'the lily.'

CRINES, Hair.

CRINIS, Capillus.

CRINOMYRON, from κριον, 'the lily,' and μυρον, 'ointment.' *Unguen'tum lilia'ceum*, *U. Ægyp'tium album*, *U. Susi'num*. An ointment, composed of lilies and some aromatic plants.—Gorræus.

CRINON, Lilium candidum.

CRIOMYX'OS, κριομυξος. In antiquity, one who had much mucus flowing from his nasal fossæ, like the ram; from κριος, 'a ram,' and μυξος, 'mucus.'

CRISIS, *Diac'risis*, judgment; from κρινω, 'I judge.' This word has been used in various acceptations. Some mean by *crisis of a disease*, when it augments or diminishes considerably, becomes transformed into another, or ceases entirely. Some have used the word to signify only the favourable changes, which supervene in disease; others, for the change going on in the acme or violence of the disease. Others, again, have given this name only to a rapid and favourable change, joined to some copious evacuation or eruption; whilst others have applied the term to the symptoms that accompany such change, and not to the change itself;—thus including, under the same denomination, the *critical* phenomena and the *crisis*.

CRISPA'TION, *Crispatu'ra*, from *crispare*, 'to wrinkle.' A contraction, or spasmodic constriction, which supervenes in certain parts, either spontaneously or by the influence of some morbific cause or therapeutical agent. The capillary vessels of a wound are, by the French, termed *crispés*, when, immediately after an operation, the blood does not flow from them. The skin is said to be *crispée*, when contracted, and the bulbs of the hair become more prominent. *Crispation* of the nerves is a slight convulsive motion of external or internal parts, much less than that which occurs in convulsion.

CRISTA. A crest, (F.) *Crête*. A name given to several bony projections; also, to the clitoris.

The word *Crêtes* (F.), *Cristæ*, is also used, in France, for fimbriated excrescences, which form at the anus, and near the genital organs; and are commonly owing to the syphilitic virus. *Crêtes de Coq*, are syphilitic excrescences, resembling, in form, the crest of the cock.

Crista Galli; two Latin words, signifying the *comb of a cock*, (F.) *Crête de l'ethmoïde*, *C. de Coq*. A flat, triangular process, rising above the cribriform plate of the ethmoid bone, and resembling a cock's comb. It gives attachment to the anterior part of the falx cerebri.

Crista of the Il'ium is the superior margin of the ilium:—the *Crista of the Tib'ia*, the anterior edge, the *shin*. Winslow calls the nymphæ, *Cristæ of the clit'oris*; and Chaussier, the verumontanum, *Crista Urethra'lis*.

Crista Urethralis, Gallinaginis caput—c. Interna, Frontal spine.

CRISTALLIN, Crystalline.

CRISTALLINE, Mesembryanthemum crystallinum.

CRITHE, Hordeolum, Hordeum, Penis.

CRITHIDION, Hordeolum.

CRITHMUM MARIT'IMUM, *Crithmum*, *Samphire*, (F.) *Passe-pierre*, *Perce-pierre*, *Fenouil marin*, *Bacile*. *Family*, Umbelliferæ. *Sex. Syst.* Pentandria Digynia. A plant which grows on the sea-coasts, has a spicy, aromatic flavour, and is used, pickled, as a condiment.

The *Caaponga* of Brazil is a kind of crithmum.

CRIT'ICAL, *Crit'icus*. Belonging to a crisis.

Critical Days, *Dies crit'ici*, *D. judicato'rii*, *D. Decreto'rii*, *D. Prin'cipes*, *D. Radica'les*, (F.) *Jours critiques*, are those on which a crisis, it was imagined, would be likely to happen. According to Hippocrates and Galen, the greatest number of fevers terminate favourably on the 7th day, and many on the 14th;—these two days being the most propitious. Next to these come, in order of efficiency, the 9th, 11th, 20th or 21st, 17th, 5th, 4th, 3d, 18th, 27th, and 28th. The sixth day was called by Galen, the *Tyrant*, τυραννος, because the crises, that happened then, were generally unfavourable. After this, the most unfavourable were the 8th, 10th, 12th, 16th, and 19th. The 13th was a sort of neutral day, the crises, which happened on it, being neither favourable nor unfavourable. Days were, also, divided into *Intercal'ary*, in which the crises happened less frequently, and were less complete than on the *critical* or *indicatory*;—and into *vacant* and *non-decretory*, in which

a crisis hardly ever occurred. According to this division, they were enumerated as follows:

Critical days,	7th, 14th, 20th, 27th, 34th, 40th, 60th, &c.
Indicatory days,	4th, 11th, 17th, 24th, &c.
Intercalary days,	3d, 5th, 6th, 9th, &c.
Non-decretory days,	2d, 8th, 10th, 12th, 13th, &c.

Fortunate crises were considered to be indicated by favourable signs appearing three days before.

CROCHET, Crotchet.

CROCIDISMUS, Carphologia.

CROCIDIXIS, Carphologia.

CROCINUM, from κροκος, 'saffron.' Made with saffron; coloured with saffron.

CROCO'DES, from κροκος, 'saffron,' and ειδος, 'resemblance.' Certain troches into which saffron entered as an ingredient.—Paulus of Ægina.

CROCODI'LEA, *Stercus Lacer'tæ*. The excrements of the crocodile, which the Arabists extolled as a remedy for cutaneous diseases, and which was long used as a cosmetic.

CROCODILIUM, Echinops.

CROCOMAG'MA, from κροκος, 'saffron,' and μαγμα, 'a kneaded or squeezed mass.' A kind of troch, composed of saffron and spices.—Galen, Dioscorides, Paulus of Ægina, Scribonius Largus

CROCUS, *C. sati'vus*, *C. Austriacus*, *Medici'na Tristil'iæ*, *Panace'a vegetabi'lis*, *Zaffran*, *Anti'ma Pulmo'num*, *C. Orienta'lis*, *Saffron*. *Order*, Irideæ. (F.) *Safran*. The stigmata are the parts used in medicine. They are brought from the East. The odour is aromatic, and the taste aromatic, pungent, and bitter:—the colour deep orange red. Its virtues are yielded to alcohol, wine, vinegar and water. Its operation has been considered stimulant, exhilarating and diaphoretic. It is not much used.

Cake Saffron is sometimes met with. It consists of one part of saffron and nine of marigold, made into a cake with oil, and pressed.

Crocus, Colcothar—c. Antimonii, Oxydum stibii sulphuratum—c. Germanicus, Carthamus tinctorius—c. Indicus, Curcuma longa—c. Martis adstringens, Colcothar—c. Martis aperiens, Ferri subcarbonas—c. Martis vitriolatus, Colcothar—c. Metallorum, Oxydum stibii sulphuratum—c. Saracenicus, Carthamus tinctorius.

CROISÉ, (F.) *Crossed*. An epithet given to paralysis, when it attacks the arm of one side, and the leg of another.

CROISSANCE. Growth.

CROISSANCES, Waxing kernels.

CROISSANTS, Waxing kernels.

CROIX DE MALTE, *Sple'nium Crucia'tum*, *Maltese Cross*, *Cross of Malta*. A compress, having the form of the Maltese cross. It is made of a piece of square linen, folded in four, and divided with scissors from each angle to a small distance from the centre. It is used especially after amputation of the fingers, penis, and limbs.

When the compress is cut in two of its angles only, it is called the *Half Maltese Cross*,—*Demi-Croix de Malte*.

CROMMYON, Allium cepa.

CROMMYOXYREG'MIA, from κρομμυον, 'an onion,' οξυς, 'acid,' and εγγυμι, 'to break out.' Sour, fetid eructations, exhaling a smell similar to that of onions.

CROPALE, Nerium antidysentericum.

CROSS, MALTESE, *Croix de Malte*.

CROSSE DE L'AORTE. Arch of the aorta.

CROSSES PALMAIRES, Palmar arches.

CROSSWORT, Eupatorium perfoliatum.

CROTALOPHORUS, Crotalus horridus.

CROT'ALUS HOR'RIDUS, *Crotaloph'orus*. The *Rattlesnake*, *Cobra de Capello*, (F.) *Crotale*. A venomous reptile of North America. Its poison is virulent. It is so called from the rattle in its tail. (Κροταλον, 'a rattle,' 'a small bell.')

CROT'APHE or CROTA'PHIUM, from κροταφος, 'temple.' *Cephalal'gia Pulsat'ilis*, *Cephalæ'a Pulsat'ilis*, *Sphygmoceph'alus*. A pulsatory pain, chiefly in the temples, with drumming in the ears.

CROTAPHITE ARTERIES, Temporal A.

CROTAPHITES, Temporal muscle.

CROTAPHUS, Temple, Temporal bone.

CROTCHET, *Hamus*. A small hook or crook. (F.) *Crochet*. An obstetrical instrument, whose name indicates its shape; and which is used in the extraction of the fœtus, when it becomes necessary to destroy it to expedite delivery. Crotchets are differently formed: some are sharp, others blunt; some contained in a sheath, others naked.

CROTON BENZOE, Benjamin.

Croton Cascaril'la, *Cortex Eleuthe'riæ*, *Croton Eleuthe'ria*, *Thus Judæo'rum*, *Chacaril'læ cortex*, *Cascaril'la*, *Elute'ria*, *Gascaril'la*. *Order*, Euphorbiaceæ. *Sex. Syst.* Monœcia Monadelphia. (F.) *Quinquina aromatique*, *Cascarille*. The bark of the *Croton Cascarilla* of the Bahamas, *Cortex Thuris*, has a slightly aromatic odour, and bitterish, aromatic taste. The smoke has the odour of musk. The active parts are an essential oil and bitter extractive. They are completely extracted by proof spirit. It is tonic and stomachic. Dose, gr. xv. to ʒss or more in powder.

Croton Eleutheria, Croton cascarilla—c. Lacciferum, see Lacca—c. Oil, Croton tiglium.

Croton Racemo'sum, *Beenel*. A small Malabar tree, whose aromatic root, boiled in oil of sesame, is employed, by the orientals, as a liniment in headache and rheumatism.

Croton Tig'lium, *Cadel-Avanacu*. A Ceylonese plant, every part of which is endowed with medicinal power. The *root* is a drastic cathartic: the wood, (*Lignum Pava'næ*,) *Pavana wood*, and the *seed*, have like virtues. The seeds have been long known under the names, *Grana Moluc'cæ*, *Tilii Grana*, and *Grana Tiglii*. From these seeds the *Croton Oil*, *O'leum Tiglii* is expressed. It is of a pale, brownish-yellow colour, and hot, biting taste; and is a most powerful drastic cathartic. Dose, from half a drop to three drops, made into pills with crumb of bread. It is also applied externally as a rubefacient, 3 to 5 drops being rubbed on the part; or one part of the oil and three parts of olive oil may be added together, and a little of this be rubbed on.

CROTO'NE, κροτωνη. A fungus, which grows on trees, and is produced by an insect, from κροτων, 'a tick.' By extension, applied to a fungous tumour developed on the periosteum.

CROUP, Cynanche trachealis—c. Bronchial, Polypus bronchialis—c. Cerebral spasmodic, Carpo-pedal spasm—c. Cerebral, Asthma thy-

micum—c. Chronic, Polypus bronchialis—c. *Faux*, Asthma thymicum, see Cynanche trachealis.

Croup, Hyster'ic. A spasmodic affection of the laryngeal muscles by no means unfrequent in hysterical females,—the paroxysm consisting in a long protracted, loud and convulsive cough, followed at times by crowing respiration, and by dyspnœa so great as to threaten suffocation. The treatment is that advised for hysteria. (q. v.)

Croup, Pseudo, Asthma thymicum—c. Spasmodic, see Cynanche trachealis, and Asthma thymicum—c. Spurious, Asthma thymicum.

CROUPE, see Croupion.

CROUPION (F.), *Uropyg'ium*, the *Rump*. The region of the coccyx. The *Crupper*, (F.) *Croupe*.

CROUP-LIKE INSPIRATION OF INFANTS, Asthma thymicum.

CROÛTE, Crusta—*c. de Lait*, Porrigo larvalis—*c. Laiteuse*, Porrigo larvalis.

CROÛTEUX, *Crustacé*.

CROWFOOT, Geranium maculatum—c. Bulbous-rooted, Ranunculus bulbosus—c. Marsh, Ranunculus sceleratus—c. Meadow, Ranunculus acris—c. Water, smaller, Ranunculus flammula.

CROWN, *Coro'na*, *Steph'anē*. In anatomy, this name is given to parts of a circular form, which surmount other portions of the same body. Thus, the *Crown of a Tooth*, *Coro'na Dentis*, (F.) *Couronne du Dent*, is the portion of the tooth which projects above the gum.

Crown of the Glans, *Coro'na glandis* (F.) *Couronne du gland*, is the round, almost circular, ring, which circumscribes the base of the glans.

Crown of the Trepan, *Modiolus*, (F.) *Couronne de Trépan*, is a species of saw, in form of a crown, or rather of a portion of a cylinder, having grooves on its external surface, and teeth at its lower extremity: the other being fitted to the handle of the trepan.

Crown of Venus, *Coro'na Ven'eris*, *Gutta Rosa'cea Syphilit'ica*, (F.) *Couronne de Vénus*. Red, rosy pustules, dry or moist, on the face; but particularly on the forehead and temples, owing to constitutional syphilis.

CROWSBEAK-LIKE PROCESS, Coracoid process.

CRU'CIAL, from *crux*, *crucis*, 'a cross,' *Cucia'lis*. Having the shape of a cross.

Crucial Bandage, T. Bandage.

Crucial Incis'ion, (F.) *Incision cruciale*. An incision made in the form of a cross. Often employed for exposing the cranium, for the purpose of applying the trepan.

Crucial Lig'aments, (F.) *Ligaments croisés*, *L. cruciformes*. Two strong ligaments within the knee-joint. The *anterior* passes obliquely from a depression anterior to the spine of the tibia to the posterior and inner part of the external condyle of the femur:—the *other*, the *posterior*, extends from the posterior part of the spine of the tibia to the anterior and outer part of the internal condyle.

CRU'CIBLE, from *crux*, *crucis*, 'a cross;' so called—it has been supposed—from being made in the shape of a cross, or from having a cross impressed upon it; *Crucib'ulum*, *Cati'nus fuso'rius*, *Tigil'lum*, *Albot*, *Cemente'rium*. (F.) *Creuset*. A vessel of earth, silver, platinum, gold, black-lead, &c, for receiving substances, which have to be exposed to a strong heat. It is sometimes covered with a *top* or *lid*, (F.) *Couvercle*.

CRU'CIFORM, from *crux*, *crucis*, 'a cross,' and *forma*, 'shape;' *Crucifor'mis*, *Cross-shaped*. A name given to the ligaments which close the articulations of the phalanges; and likewise to the *crucial* ligaments.

CRU'DITY, *Cru'ditas*, from *crudus*, 'crude,' 'unprepared' *Rawness*, *crudeness*. This has received several acceptations. 1. It expresses the quality of certain aliments, which have not experienced the action of fire. 2. The condition of matters in the digestive tube, which have not undergone the digestive changes; and, 3. In the language of the Humorists, it means the condition of the morbific matter in a sick individual, when it has not yet been prepared or concocted by the action of the organs.

The word is used in the plural, *Crudities*, synonymously with *crude matters*. (F.) *Matières crues*. It is applied to those, when contained in the stomach and intestines.

CRUENTA EXPUITIO, Hæmoptysis.

CRUES (*Matières*.) see Crudity.

CRUOR. The signification of this word is very vague. It has been used to designate blood (q. v.) in general, venous blood, extravasated or coagulated blood, and the colouring matter.

Cruor Sanguinis, see Blood.

CRUORINE, Hæmatine.

CRUPPER, *Croupion*.

CRUPSIA, Metamorphopsia.

CRURA. The plural of *Crus*, 'a leg.' (F.) *Cuisse*. Applied to some parts of the body, from their resemblance to a leg or root; as the *Crura cerebri*, *Crura cerebelli*, &c.

Crura Anteriora Medullæ Oblongatæ, Peduncles of the brain—c. Medullæ oblongatæ, Corpora restiformia—c. Medullæ oblongatæ, Thalami nervorum opticorum—c. Posteriora medullæ oblongatæ, Peduncles of the cerebellum.

CRURÆUS, Cruralis.

CRURAL, *Crura'lis*, from *crus*, 'the thigh and the lower limb.' What belongs to the thigh or lower limb.

Crural or Fem'oral Artery, (F.) *Artère crurale*, *A. Pelvi crurale*,—(Ch.,) is the continuation of the external iliac. It extends from the crural arch to the aperture in the triceps, or to the ham. Chaussier applies the name *Artère crurale* to the trunk, which extends from the primitive or common iliac to the tibial arteries; embracing, of course, the external iliac, femoral, and popliteal.

Crural or Fem'oral Canal or Ring. M. Jules Cloquet has described this canal with minuteness, and given it the name *Anneau crural*, *Anneau fémoral*. It is nearly an inch long, is triangular, more spacious above than below, and shorter and broader in the female than in the male. Its upper orifice is bounded, anteriorly, by the crural arch; posteriorly, by the crista of the pubis; on the outer side by the psoas and iliacus muscles, covered by the iliac aponeurosis, and, at the inner, by Gimbernat's ligament. This orifice is covered by the peritoneum, and, according to M. Cloquet, is closed by a more or less resisting septum, which he has named *Septum crurale*. In its course, the crural canal has its anterior paries formed by

the superficial expansion of the fascia lata: the posterior by the pectineus, covered by the deep-seated expansion of the fascia; and more externally by the psoas and iliacus muscles, covered by an expansion of the *fascia iliaca*. Its inferior orifice is formed by the foramen of the fascia lata, which gives passage to the vena saphæna. It is at the upper orifice of this canal, that *Femoral* or *Crural Hernia*, the *Hernia inguinale* of Chaussier, occurs; which would be more common, were it not for the fibrous cellular septum there situate.

Crural or Inguinal Arch, (F.) *Arcade crurale, A. inguinale* (Ch.,)—Poupart's *Lig'ament, L. of Fallo'pius*. This arch is formed by the internal portion of the inferior edge of the aponeurosis of the obliquus externus muscle, which is attached, at one end, to the pubis; at the other, to the anterior and superior spinous process of the ilium. At its posterior and inner part, the aponeurosis, forming the arch, sends off a falciform reflection, which is attached along the crest of the pubis, and is known under the name of Gimbernat's *Ligament*. Beneath this arch, the vessels, nerves, and muscles make their exit from the pelvis to the thigh.

Crural Nerve proceeds from the lumbar plexus, and is situate at the outer side of the psoas muscle and crural artery. After it has passed under the crural arch, it divides into cutaneous and muscular branches. One of the branches, which is larger than the rest, is called the *Saphæ'na nerve*. It gives off filaments to the integuments of the knee, to the inner part of the leg, and to the dorsal surface of the foot. The remainder of the branches of the *crural* are distributed to the anterior and inner part of the thigh. The *Ac'cessory of the Crural Nerve* is a term given to the 4th and 5th pairs of lumbar nerves.

Crural Plexus of Chaussier is the union of the anterior branches of the last four pairs of lumbar nerves, and the first four sacral; forming the *lumbar* and *sacral* plexuses of most anatomists.

Crural or Femoral Vein has the same arrangement as the artery. It receives only one great branch, the saphæna.

CRURAL, Triceps cruris.

CRURA'LIS or CRURÆ'US. A part of the *Triceps crural* of the French, or of the *Trifémoro-rotulien* of Chaussier. The cruralis is situate at the anterior, outer, and inner part of the thigh. It arises, fleshy, from between the two trochanters, adheres firmly to most of the fore part of the os femoris, and is inserted, tendinous, into the upper part of the patella, behind the rectus. Its use is to assist the vasti and rectus in the extension of the leg. Under *Muscle Triceps Crural*, the French describe the cruralis and the two vasti. Some small muscular slips, sometimes found under the cruræus muscle, and inserted into the capsular ligament of the knee-joint, have been called *Sub-cruræ'i*.

CRURIS RADIUS, Fibula.

CRUS, Leg, Thigh.

CRUST, Eschar.

CRUSTA. A crust or scab, (F.) *Croûte*. An assemblage of small flakes, formed by the drying up of a fluid secreted by the skin.

The lining membrane of the stomach and intestines has been called *Crusta villo'sa*.

Crusta Adamantina Dentium, Enamel of the teeth.

Crusta Genu Equi'næ, *Sweat* or *Knee Scab, Mock* or *Encircled Hoof Knees, Hangers, Dew Claws, Night Eyes, Horse Crust*. This morbid secretion from the horse has been advised in cases of epilepsy. It is used in the form of powder, (gr. ij to gr. xx;) and of tincture.

Crusta Inflammatoria, Corium phlogisticum—c. Lactea, Porrigo larvalis, P. lupinosa—c. Membranacea, Peristroma—c. Petrosa, see Tooth—c. Phlogistica, Corium phlogisticum—c. Pleuretica, Corium phlogisticum—c. Prurigi-nosa, Gutta rosea—c. Serpiginosa, Gutta rosea—c. Vermicularis, Peristroma—c. Villosa linguæ, see Tongue.

CRUSTACÉ, (F.) Alibert has substituted this word, in his Nosology, for *croûteux*, 'crusty.' Having crusts or scabs; as *Dartre crustacée*.

CRUS'TULA. A small shell or scab. An ecchymosis of the conjunctiva.

CRUSTUMINA'TUM. A rob, prepared from the *Pyra Crustumi'na* or *Crustumeri'na* (so called from Crustuminum, a town in Italy, where they grew,) boiled with honey or in rain-water.—Aëtius.

CRUX CERVI. An ancient appellation for the bone in the heart of the stag. It was once considered useful in diseases of the heart.

CRY, *Clamor*, (F.) *Cri*. The sound of the unarticulated voice. The native voice, which the idiot and deaf possess equally with the man of genius and hearing. The cry of the newborn child has been called *Vagi'tus*, (F.) *Vagissement*. We say, "*A cry of joy, of pleasure, of pain*," &c., according to the expression, which it may convey to the hearer.

CRYMO'DES, from κρυμος, 'cold.' A continued fever, in which the internal parts feel hot, and the external cold; and which was attributed to an erysipelatous inflammation of the lungs.—Aëtius, Gorræus.

CRYMODYN'IA, from κρυμος, 'cold,' and οδυνη, 'pain.' Chronic rheumatism, and all its modifications.—Baumes.

CRYMO'SIS, from κρυμος, 'cold.' Diseases caused by the action of cold.—Baumes.

CRYPSOR'CHIS, from κρυπτω, 'I conceal,' and ορχις, 'a testicle,' *Cryptor'chis, Testicon'dus*. One in whom the testes have not descended into the scrotum. The state is called, *Cryptorchidis'mus, Parorchid'ium*.

CRYPTA, from κρυπτος, 'concealed.' *Follic'ulose gland, Lacu'na, Follic'ulus*, (F.) *Crypte, Follicule*. A *crypt* or *follicle* is a small, roundish, hollow body, situate in the substance of the skin or mucous membranes, and constantly pouring the fluid which it secretes on their surfaces.

The use of the cryptal or follicular secretion, is to keep the parts, on which it is poured, supple and moist, and to preserve them from the action of irritating bodies, with which they have to come in contact.

The little rounded appearances at the ends of the small arteries, in the cortical substance of the kidney, are also called *Cryptæ*.

CRYPTÆ SEBACEÆ, Sebaceous glands.

CRYPTE, Crypta.

CRYPTOCEPH'ALUS, from κρυπτος, 'concealed,' and κεφαλη, 'head.' A monster whose head is excessively small, and does not appear externally.—G. St. Hilaire.

CRYPTODID'YMUS, *Fœtus in fœtu*. A

monstrosity, in which one fœtus is found contained in another.

CRYPTOG'AMOUS, *Cryptogam'ic, Cryptogam'icus;* from κρυπτος, 'concealed,' and γαμος, 'marriage.' An epithet applied by botanists to plants whose organs of fructification are concealed or not manifest. *Ag'amous* plants are those whose sexual organs are unknown.

CRYPTOPHYICUS, Cryptopyic.

CRYPTOPY'IC, *Cryptophy'icus,* from κρυπτω, 'I conceal,' and πυον, 'pus.' A state of disease, kept up by an occult abscess.

CRYPTORCHIDISMUS, see Crypsorchis.

CRYPTORCHIS, Crypsorchis.

CRYPTS, SYNOVIAL, Bursæ mucosæ.

CRYSTAL, MINERAL, Potassæ nitras fusus sulphatis paucillo mixtus.

CRYSTAL'LI. Vesicles, filled with a watery fluid. They are also called *crystal'linæ.* Probably the pemphigus of modern writers.

Crystalli Lunæ, Argenti nitras.

CRYSTALLIN, Crystalline.

CRYS'TALLINE, *Crystal'linus.* Having the appearance of crystal.

Crys'talline, *Crys'talline humour, C. Lens, Crys'talline body, Crystallinus, Lens crystal'lina, Lens crystalloï'des* vel *Corpus Crystal'linum, C. Discoï'des, C. Crystalloï'des, C. Phacoïdes, Humor crystal'linus, H. glacia'lis, Gemma Oculi,* (F.) *Cristallin* ou *Crystallin, Humeur crystalline, Corps crystallin, Lentille crystalline.* A lenticular, transparent body, situate between the vitreous and aqueous humours of the eye, at the union of the anterior third with the two posterior thirds of this organ. It is composed of a soft, exterior substance; and an interior, forming a solid nucleus, in which a number of elliptical layers are perceptible. It is contained in a *capsule,* called *Tunica aranea* vel *crystal'lina,* and receives, at its posterior surface, a small branch of the central artery of the retina, which is always readily distinguishable in the fœtus, prior to the 7th month of utero-gestation.

The use of the crystalline is to refract the rays of light, and to serve as an achromatic glass: for which its laminæ or layers, composed of substances of different refractive powers, admirably adapt it.

CRYSTAL'LINA, from κρυσταλλος, 'crystal.' A vesicle or phlyctæna, filled with serum, and appearing on the prepuce or in the vicinity of the anus, surrounded by a reddish extravasated aureola. It may be syphilitic or not. See Crystalli.

CRYSTALLION, Plantago psyllium.

CRYS'TALLOID, *Crystalloïdes,* from κρυσταλλος, 'crystal,' and ειδος, 'form,' 'resemblance.' Resembling crystal or the crystalline. The *capsule* or *membrane of the crystalline.* Also, the crystalline itself.

CRYSTALLUS MINERALIS, Potassæ nitras fusus sulphatis paucillo mixtus.

CRYTHE, Hordeolum.

CTEDON, Fibre.

CTEIS, Pubes.

CTESIPHON'TIS MALAGMA. A plaster, employed and described by Celsus.

CUBA, see Havannah.

CUBAL SINI, Piper cubeba.

CUBEBA, Piper cubeba.

CUBIFORMIS, Cuboid.

CUBIT, Ulna—c. Top of the, Olecranon.

CU'BITAL, *Cubita'lis.* Connected with, or relating to the *cubitus,* or to the inner and posterior part of the forearm.

Cubital Artery, *Arte'ria cubita'lis, A. ulna'ris,* arises from the humeral a little below the bend of the elbow; proceeds along the anterior and inner part of the forearm; passes anterior to the ligamentum annulare of the carpus, and goes to form, in the palm of the hand, the superficial palmar arch. Besides the numerous muscular branches, which it gives off in its course, it sends posteriorly, the common trunk of the *interosseous arteries,* and internally, the two *cubital recurrents, anterior* and *posterior,* —articular branches, which anastomose on the inside of the elbow with the divisions of the humeral artery.

Cubital Muscles are two in number. 1. The *Cubita'lis ante'rior, C. inter'nus, Flexor carpi ulnaris, Ulnaris internus, Epitrochli-cubito-carpien, Cubito-carpien*—(Ch.), is a long muscle, situate at the interior and inner part of the forearm. It arises from the inner condyle of the os humeri, at the inner side of the olecranon, and from the posterior edge of the ulna, and is inserted by a tendon, into the os pisiforme. Its use is to bend the hand on the forearm, by directing it slightly inwards. 2. The *cubita'lis poste'rior* or *exter'nus, Extensor Carpi ulna'ris, Ulna'ris exter'nus, Cubite'us externus, Cubito-sus-metacarpien*—(Ch.), is situate at the posterior part of the forearm. It arises from the external condyle of the os humeri, and is inserted into the superior extremity of the fifth bone of the metacarpus. Its use is to extend the hand inclining it a little inwards.

Cubital Nerve, *Ulnar nerve, Cubito-digital* —(Ch.), is furnished by the last two or three nerves of the brachial plexus, and is distributed to the inner and anterior side of the forearm; to the inner part of the palm and of the back of the hand, and to the last two or three fingers.

Cubital Veins, deep-seated, and the *recurrent cubital veins,* accompany the corresponding arteries. The superficial cubital veins belong to the basilic. Chaussier calls them *cuta'neous cubital.*

CUBITALE (OS) Cuneiform bone.

CUBITALIS RIOLANI, see Anconeus.

CUBITEUS EXTERNUS, see Cubital muscles.

CUBITO-CARPIEN, see Cubital muscles—*c. Cutané (nerf,)* Cutaneous nerve—*c. Phalangettien commun,* Flexor profundus perforans—*c. Radi-sus-métacarpien du pouce,* Abductor longus pollicis—*c. Radial,* Pronator radii quadratus.

CUBITO-SUPRA-PALMA'RIS. Belonging to the cubitus and to the supra-palmar or dorsal surface of the hand. Chaussier gives this name: 1. To a small artery, which is given off by the cubital or ulnar, a little above the wrist. 2. To a vein, which accompanies this artery.

CUBITO-SUS-MÉTACARPIEN, see Cubital muscles—*c. Sus-métacarpien du pouce,* Abductor longus pollicis—*c. Sus-Phalangettien de l'index,* Extensor proprius indicis—*c. Sus-phalangettien du pouce,* E. longus pollicis—*c. Sus-phalangien du pouce,* E. pollicis brevis.

CU'BITUS, κυβιτον, *Cybiton.* The *Elbow,* (q. v.) Also, one of the bones of the forearm. See Ulna and Forearm.

Cubitus, (F.) *Coudée,* the ancient name of a measure 18 inches long.

CU'BOID, *Cuboï'des, Cubifor'mis, Cyboï'des,*

Cyrtoï'des, Grandino'sum Os, Tes'sara, Tesseræ os, Os varium, from κυβος, 'a cube,' and εἰδος, 'form.' Having the form of a cube. This name was given, by Galen, to one of the bones of the tarsus, and is still retained. It is situate at the anterior and outer part of the tarsus; and is articulated, *behind*, with the calcaneum; *before*, with the last two metatarsal bones, and *within*, with the third os cuneiforme, and sometimes with the scaphoides. Its inferior surface has an oblique groove for the tendon of the *peroneus longus*.

CUCKOO FLOWER, Cardamine pratensis.

CUCKOWBREAD, Oxalis acetosella.

CUCKOW PINT, Arum maculatum.

CUCU'BALUS BEHEN, *Behen officina'rum*. This plant was once considered alexipharmic and cordial. It is the *Spatling Poppy*.

CUCULA'TUM MAJUS. A barbarous term, used by Ruland for brandy and spirit of wine.

CUCULLARIS, Trapezius.

CUCULLATA, Sanicula.

CUCULLUS, *Couvre-chef*, Cucupha, Infundibulum of the cochlea.

CUCULUS, Coccyx.

CUCUMBER, Cucumis sativus—c. Indian, Medeola Virginica—c. Squirting or wild, Momordica elaterium—c. Tree, Magnolia acuminata.

CUCUMER, Cucumis sativus.

CUCUMIS, Penis—c. Agrestis, Momordica elaterium—c. Asininus, Momordica elaterium.

Cu'cumis Colocyn'this. The officinal name of the *Col·ocynth* or *Bitter Apple*, *Co'cyn'this*, *Coloquin'tida*, *Bitter Gourd*, *Bitter Cucumber*, (F.) *Coloquinte*. *Family*, Cucurbitaceæ. *Sex. Syst.* Monœcia Monadelphia. A Turkey and Cape of Good Hope plant. The spongy part or medulla of the fruit, *Colocyn'thidis Pulpa*, *Cucu'meris Colocyn'thidis Pulpa*, has a bitter, nauseous, and acrimonious taste, and is a strong cathartic, acting chiefly on the upper part of the intestines. It is scarcely ever used, except in combination.

Cucumis Melo. The systematic name of the *Melon Plant*, *Melo*, *Common Melon*, (F.) *Melon*. The fruit is an agreeable article of diet, but not very digestible, unless when ripe. The seeds possess mucilaginous properties.

Cucumis Sati'vus. The systematic name of the *Cu'cumber plant*, *Cucumis*, *Angou'rion*, *Citreolus*, *Cu'cumer*, or *Curvimer*, from its curved shape, (F.) *Concombre ordinaire*. The cucumber is used, when young, as a pickle, when it is called a *Gherkin*. (F.) *Cornichon*. It is not a fruit easy of digestion. The seeds are mucilaginous.

Cucumis Sylvestris, Momordica elaterium

CU'CUPHA, *Cu'cullus*, *Pi'leus*, *Sac'culus cephal'icus*. A sort of coif or cap, with a double bottom, between which is enclosed a mixture of aromatic powders, having cotton for an excipient. It was formerly used as a powerful cephalic.

CUCURBITA, *à curvitate*, owing to its shape. A gourd. See Cupping-glass.

Cucur'bita Citrul'lus. The systematic name of the *Water-melon* plant. *Citrul'lus*, *Angu'ria*, *Tetrangu'ria*, *Sicilian Citrul*, *Water-melon*. *Family*, Cucurbitaceæ: *Sex. Syst.* Monœcia Monadelphia. (F.) *Melon d'eau*, *Pastèque*. The juice of this fruit is very abundant, whence its name. The *Water Melon* is extremely refreshing and agreeable, when made cool, and is eaten like the common melon. It is very much used in the United States.

Cucur'bita Pepo, *Pepo*. The systematic name of the *Common Pompion*, *Cucur'bita*. The seeds of this plant, as well as those of *Cucur'bita lagena'ria* or *Bottle-gourd*, contain a large proportion of oil, capable of forming emulsions: but they are not used.

Both the fruit of Cucur'bita Lagena'ria, (F.) *Calebasses*,) and that of Cucur'bita Pepo, (F.) *Potiron Courge*,) are eaten.

CUCURBITAIN, Cucurbitinus.

CUCURBITATIO, Cupping.

CUCURBITI'NUS, (F.) *Cucurbitain*. This name was formerly given to the *Tænia solium*, because composed of rings which resemble the seeds of the *gourd*, *cucurbita*. The ancients believed, that the rings, which are sometimes discharged, were so many separate worms.—See Tænia.

CUCURBITULA, Cupping-glass.

Cucurbitulæ Cruentæ, Cupping with the scarificator—c. cum Ferro, Cupping with the scarificator—c. Siccæ, Cupping, dry.

CUDWEED, Gnaphalium margaritaceum.

CUILLERÉE, Cochleare.

CUIR, Corium.

CUISSART. A wooden leg. See Cornu ammonis.

CUISSE, Thigh, Crus—*c. Postérieure du cervelet*, Corpus restiforme.

CUISSON, (F.) A smarting, burning pain.

CUIVRE, Cuprum—*c. et Ammoniaque sulfate de*, Cuprum ammoniatum—*c. Limailles de*, see Cuprum—*c. Sous-acétate de*, Cupri subacetas—*c. Sulfate de*, Cupri sulphas.

CUIVREUX, (F.) *Copper-coloured*. (F.) *Teint cuivreux*; a copper-coloured complexion, such as is observed in cancerous affections. Syphilitic ulcers of the throat, &c. are often copper-coloured.

CUJETE. Crescentia cujete.

CULBIC''IO. A Latin word, employed by old writers, as synonymous with ardor urinæ and gonorrhœa.

CULBUTE, (F.) 'a tumble head-over-heels.' A movement, which the fœtus has been supposed to execute at the end of the 7th month of utero gestation; and by means of which, it was presumed, the head presented towards the orifice of the uterus: a change of situation, which is impracticable in ordinary circumstances.

CU'LEUS, a measure containing 20 barrels, or 40 urns, equal to 180 gallons.—Pliny, Gorræus.

CULEX, (F.) *Cousin*. A genus of insects, unhappily too well known in almost every part of the world, on account of their bites, which give rise to painful, local inflammation. The *gnats* and *musquitoes* belong to this genus.

CULI FLOS, Cardamine pratensis.

CULILAWAN, see Laurus culilawan.

CU'LINARY ART, from *culina*, 'a kitchen.' *Cookery*, *Res culina'ria*, *Res coqua'ria*, *Ars culina'ria*, *A. coquina'ria*, *Mageiricè*. The art of preparing meats for the table. In judging of the dietetic properties of various kinds of aliment, the culinary process to which they have been subjected will always have to be consi-

dered. Many of the writers on the culinary art have been physicians.

CULLITLAWAN, see Laurus culilawan.

CULTELLAIRE, (F.) from *Cultel'lus*, a 'little knife.' *Le cautère cultellaire*, known also under the name *Couteau de feu*, *Fire-knife*, is used for what the French term the *Cautère transcurrente*. (See Cauterization.) It is shaped like a small hatchet.

CULTELLUS, Culter, Knife—c. Anceps, Knife, double-edged—c. Uncus, Knife, crotchet.

CULTER, *Cultel'lus*, from *colo*, *cultum*, 'I cultivate.' A *coulter*, a *knife*, (q. v) *scalpel*, (q. v.) *machæ'ra*, *machæ'rion*, *machæ'ris*. Also, the third lobe of the liver, so called, from some fancied resemblance.—Theophilus Protospatarius.

CULTER, CURVUS, Knife, crooked—c. Falcatus, Knife, crooked—c. Lenticularis, Knife, lenticular—c. Rectus, Knife, amputation—c. Tonsorius, Razor.

CULTRIV'OROUS, *Cultriv'orus*, from *culter*, 'a knife,' and *vorare*, 'to devour.' Individuals, who have seemed to swallow knives with impunity, have been so called;—*Knife-eaters*.

CULUS, Anus.

CULVERT ROOT, Leptandria purpurea.

CUMAMUS, Piper cubeba.

CUMIN, Cuminum cyminum—c. *des Près*, Carum.

CUMI'NUM CYMI'NUM. The systematic name of the *Cummin plant*. *Cumi'num*, *Carnaba'dium*. *Family*, Umbelliferæ. *Sex. Syst.* Pentandria Digynia. (F.) *Cumin*, *Anis aigre*. The seeds of cummin, which is a native of Egypt, have a warm, bitterish, disagreeable taste. Water extracts their odour, and spirit takes up both odour and taste. They are not used, except in a plaster, which bears their name. When drunk in wine, the ancients believed they produced paleness; hence, Horace called cummin *exsanguĕ;* and Juvenal, *pallens*. —Dioscorides, Pliny.

CUMINUM NIGRUM, Nigella—c. Pratense, Carum.

CUMMIN, Cuminum cyminum.

CU'MULUS, 'a heap or pile.' A rounded prominence, in the centre of the proligerous disk, in which there is a small opake cavity, that contains the ovum.

CUNEA'LIS SUTU'RA. The suture formed between the great and little alæ of the sphenoid bone and the os frontis.—Blasius.

CUNÉEN (F.) *Cunea'nus*. Relating to the cuneiform bones.

Articulations Cunéennes;—the joints between the cuneiform bones, as well as between them and other parts.

Ligaments Cunéennes; the ligaments which hold the cuneiform bones together.

CU'NEIFORM, *Cuneifor'mis*, *Sphenoïdes*, from *cuneus*, 'a wedge,' and *forma*, 'shape.' *Wedge-shaped*. This name has been given to several bones. 1. To the sphenoid. 2. To a bone of the carpus, situate between the os lunare and os orbiculare. It is, also, called *Os Pyramida'lĕ*, *Os Triq'uetrum*, and *Os Cubita'lĕ*. 3. To the basilary process of the occipital bone: and 4. To three of the bones of the tarsus, which are distinguished, according to *situation*, reckoning from within outwards, into *first*, *second*, and *third*,—or *internal*, *middle*, and *external:* and according to *size*, reckoning in the same order, into *great*, *small*, and *middle sized*. The posterior surface of these bones is united to the anterior face of the scaphoides; the anterior surface with the corresponding metatarsal bones; and, in addition, the external surface of the third is articulated, behind, with the cuboides. They are also called *Chalchoïdea* or *Calcoïdea ossic'ula*.

CUNEO-CUBOID, *Cuneo-cuboïdeus*. Belonging to the cuneiform bones and cuboides.

CUNEO-CUBOID ARTICULA'TION, is formed by the third cuneiform bone and cuboides. It is furnished with a synovial capsule, and two *cuneo-cuboid ligaments:*—a *dorsal* and a *plantar*.

CUNEO-SCAPHOID, *Cuneo-scaphoïdeus*. Belonging to the cuneiform bones and scaphoid.

CUNEO-SCAPHOID ARTICULA'TION, is formed by the posterior surfaces of the three ossa cuneiformia, and the anterior surface of the scaphoid. It is furnished with a synovial capsule and ligaments, some of which are *dorsal*, others *plantar*.

CUNILA, Satureia capitata—c. Bubula, Origanum.

CUNI'LA MARIA'NA, *Saturei'a organoïdes*, *Calamin'tha erec'ta Virginia'na*, *Ditt'any*, *American Dit'tany*, *Mountain Dittany*, *Mint-leaved Cunila*, *Maryland Cunila*, *Stone mint*, *Wild Basil*, *Sweet Horsemint*, (F.) *Cunile d'Amérique*. A small indigenous herb, growing on dry shady hills, from New England to Georgia, and flowering in June and July. Its medical properties are dependent upon essential oil, like the mints.

CUNILA, MARYLAND, Cunila Mariana—c. Mint-leaved, C. Mariana—c. Muscula, Inula dysenterica—c. Pulegioides, Hedeoma pŭlegioides—c. Sativa, Satureia hortensis.

CUNILAGO, Inula dysenterica.

CUNILE D'AMÉRIQUE, Cunila mariana.

CUNNUS, Vulva.

CUP, *Scutel'la*, *Catil'lus*, *Patel'la*, *Excip'ula*. (F.) *Palette*, *Poêlette*, *Poîlette*, *Vase à saigner*. A small vessel of a determinate size, for receiving the blood during venesection. It generally contains about four ounces. A bleeding of two cups is, consequently, one of eight ounces.

CUPIDO, Appetite.

CUPOLA, see Infundibulum of the cochlea.

CUPPING. (F.) *Couper*, 'to cut;' or to draw blood in vessels resembling *cups*, *Applica'tio cucurbita'rum* seu *cucurbitula'rum*, *Cucurbita'tio*. A species of blood-letting, performed by a *scarificator* and glass called a cupping-glass; *Cucurbit'ula*, *Cucurbi'ta*, σικυα, *Sicua*, (F.) *Ventouse*. The lancets are placed in such a manner in the scarificator, that, when it is applied upon the affected part, the whole are, by means of a spring, pushed suddenly into it. After scarification, the cupping-glass, which has been previously exhausted by heat, or by an exhausting syringe, is applied. The pressure of the air within the glass being thus diminished, the necessary quantity of blood may be drawn. See Bdellometer. *Dry cupping*, *Cucurbit'ulæ siccæ*, is the application of the glasses, without previous scarification, (F.) *Ventouses sèches*. It is used to prevent the activity of absorption from any wounded part; occasionally, to excite suppuration in indolent abscesses; and to remove

the pus when an abscess is opened. *Cupping*, taken without any epithet, means the abstraction of blood by means of the scarificator and cups:—(F.) *Ventouses scarifiées*, (L.) *Cucurbitulæ cruentæ, C. cum Ferro.* The verb 'to cup,' signifies to draw blood by cupping.

CUPRES'SUS SEMPERVI'RENS. The systematic name of the *Cupres'sus, Cyparis'sus, Cypress*, (F.) *Cyprès.* The berries, leaves, and wood, have been considered astringent and useful in intermittents. The whole plant abounds with a bitter, aromatic, and terebinthinate fluid.

CUPRI ET AMMONIÆ SULPHAS, Cuprum ammoniatum—c. Diacetas, C. Subacetas.

Cupri Limatu'ra, *Filings of Copper*, (F.) *Limailles de Cuivre*, have been used in hydrophobia. It has been remarked, under *Cuprum*, that they are inert.

Cupri Rubigo, Cupri subacetas.

Cupri Subace'tas, *C. Diace'tas, Æru'go, Ver'digris, Hispan'icum vir'idē, Prasi'num viridē, Cupri Rubi'go, Crystals of Venus, Vir'idē Æ'ris, Æruca, Calcithos, Subacetate of Copper*, (F.) *Sous-acétate de Cuivre, Vert-de-gris, Crystaux de Vénus, Verdet.* Impure subacetate of copper. This, as usually met with, is in masses, difficult to break; not deliquescent; foliaceous; of a fine bluish-green colour, and salt taste. It is tonic, emetic, escharotic, and detergent; but scarcely ever employed internally. Chiefly used in detergent ointments. Dose, as a tonic, under ½ gr.: emetic, from gr. j to gr. ij. Powdered verdigris appears to be the active ingredient in *Smellome's Eye-Salve*, which may be imitated by rubbing half a drachm of finely powdered verdigris with a little oil, and then mixing it with an ounce of yellow basilicon.

An ointment composed of one drachm of finely powdered verdigris, with an ounce of lard or spermaceti ointment, is used in psoriasis, tetter, &c.

Cupri Sulphas, *Vitriolum Cupri, Vitriolum Ven'eris, V. Cyp'rium, V. Cyprinum, V. Cæru'leum, V. Roma'num, Cuprum Vitriola'tum, Lapis Cæru'leus, Sulphate of Copper, Blue Stone, Blue Vitriol, Roman Vitriol, Mortooth*, (F.) *Sulfate de Cuivre*, is in rhomboidal, rich blue, semi-transparent, effloresceing crystals. The taste is harsh, styptic, and corrosive. It is soluble in four parts of water at 60°, and is tonic, emetic, astringent, and escharotic. As a tonic, it has been used in epilepsy, intermittents, &c. Dose as a tonic, gr. ¼ to gr. ij. in pill; as an emetic, gr. ij to x in water. A very weak solution is sometimes used in ophthalmia and in gleet; and it forms the basis of Bates's *Aqua camphora'ta*, which has been recommended in the purulent ophthalmia of children, diluted with sixteen parts of water.

Cupri Sulphas Ammoniacalis, Cuprum ammoniatum—c. Vitriolum, Cupri sulphas.

CUPRUM, *Chalcos, Æs, Venus* of the Alchymists: *Copper, Cyp'rium*, (F.) *Cuivre.* Its odour is peculiar and sensible when rubbed; taste disagreeable and metallic; colour red-yellow. S. G. 7.87: ductile: very malleable: less hard than iron: easily oxidized. In its metallic state, it exerts no action on the system. When swallowed, it undergoes no deleterious change. Copper cannot be dissolved whilst tin is in the mixture, and hence the utility of tinning copper vessels. Copper culinary vessels are harmless under ordinary cleanliness, provided the substances be not suffered to remain in them till cold. The salts of copper are very deleterious.

Cuprum Ammonia'tum, *C. Ammoniaca'lē, C. Ammoni'acum, C. Ammoni'aco-sulphu'ricum, Ammonia'ted Copper, Ammoniacal Sulphate of Copper, Ammoniure'tum Cupri, Sal anti-epilep'ticus of* Weissman, *Sulfas Cupri ammoniaca'lis, S. ammoni'acæ cupra'tus, Sub-sulfas Ammo'nio-cu'pricus, Sulfas Cupri et Ammo'niæ, Deuto-Sulfas Cupri et Ammo'niæ*, (F.) *Sulfate de cuivre et d'ammoniaque.* (*Cupri Sulph.* ℥ss; *Ammon. Carb.* ℥vj. Rub in a glass mortar till effervescence ceases. Wrap the ammoniated copper in bibulous paper, and dry with a gentle heat. Keep in a well-stopped glass bottle.—Ph. U. S.) A crystalline powder of a rich violet colour, and hot, styptic taste. By exposure to air, it becomes partly converted into carbonate of copper. It is tonic and astringent, and has been chiefly employed in epilepsy, and other obstinate spasmodic diseases. Dose, gr. ¼ gradually increased to gr. iv, in pill.

Cuprum Vitriolatum, Cupri sulphas.

CUPULAR, *Cupula'ris*, (F.) *Cupulaire*; from *cupula*, 'a small cup.' Of or belonging to a cupula.

Cupular Cautery, *Cautère cupulaire*, is an iron in the shape of a cupula, formerly used to cauterize the skin of the cranium in certain diseases, as epilepsy, chronic headache, &c.

CURA, CURATIO. Attention to, or treatment or cure of, a disease. R. Keuchen defines *Cura*, 'medicine,' and *Curator*, 'the physician.' Curatio, also, sometimes means purification; as, *Adeps suilla curata.*—Scribonius Largus.

Cura Avena'cea. A decoction of oats and succory roots, in which a little nitre and sugar are dissolved. Used as a refrigerant.

Cura Medeana, Transfusion.

CU'RABLE, *Sanab'alis, Acestos, Iäsimos*, (F.) *Guérissable.* That which is susceptible of cure. An epithet applied to both patients and diseases.

CURARE. A very energetic, vegetable poison, employed by the South American Indians to poison their arrows. It is obtained from the bark of a species of convolvulus, called *Vejuco de Mavacure.*

CURATION, (F.) *Cura'tio, Mede'la, Sana'tio, Ac'esis, Althex'is, Althax'is, Therapei'a, Iasis*, &c. The aggregate of means employed for the cure of a disease. See Therapeutics.

CU'RATIVE, *San'ative.* Relating to the cure of a disease. *Curative Indications* are those which point out the treatment to be employed. *Curative Treatment*, that employed in the cure of the disease, in opposition to *preservative* or *prophylactic treatment.* We say, also, *Curative Process, Curative Means*, &c.

CURATOR INFIRMORUM, *Infirmier.*

CUR'CUMA LONGA, *Cur'cuma, Borri, Bor'riborri, Cober'ri*, (Hindusthan,) *Crocus In'dicus, Terra Merita, Cannac'orus radi'cē croceo, Family*, Amomeæ. *Sex. Syst.* Monandria Monogynia. *Mayel'la, Kua Kaha, Cype'rus In'dicus*, κυπειρος Ινδικος, of Dioscorides (?) *Turmeric*, (F.) *Racine de Safran, Safran des Indes, Souchet des Indes.* Turmeric root—the rhizoma of cur-

cuma longa—is brought from the East Indies; but is possessed of very little, if any, medicinal efficacy. It is one of the ingredients in the *Curry Powder*.

CURCUMA ZEDOARIA, see Kæmpferia rotunda—c. Zerumbet, see Kæmpferia rotunda.

CURDS, *Curds of Milk*, (F.) *Caillebotte, Lait caillé*. Milk decomposed by some agent.

CURE; from *cura*, 'care.' *Cura'tio felix, Sana'tio, Sal'itas*, (F.) *Guérison*. A restoration to health; also, a remedy. A restorative.

CURE-ALL, Geum Virginianum.

CUREDENT, Dentiscalpium.

CURE DU RAISIN, Grape-cure.

CURE-LANGUE, (F.) *Linguæ scal'pium*. A *Tongue-scraper*. An instrument of ivory, tortoise-shell, &c., shaped like a knife or rasp, for removing the mucous coating which covers the tongue after sleep, &c.

CURE OREILLE, Ear-pick.

CURETTE, Scoop.

CURMI, Courmi.

CURRANT, BLACK, Ribes nigrum—c. Red, Ribes rubrum.

CURRANTS, see Vitis Corinthiaca.

CURRY or CURRIE POWDER. A condiment, formed of various spices; and eaten with rice, particularly in India. The following is one of the forms of its preparation. *Sem. coriand.* ℥xviii, *pip. nigr.* ℥ij, *cayen.* ℥j. *rad. curcumæ, sem. cumini*, aā ℥iij, *sem. fœnugr.* ʒiv: mix.

CURSUMA HÆMORRHOIDALIS HERBA, Ranunculus ficaria.

CURSUS, Running—c. Matricis, Leucorrhœa.

CURVAMEN, Curvature.

CURVATEUR DU COCCYX, Curvator Coccygis.

CURVATIO, Campsis.

CURVA'TOR COCCY'GIS, (F.) *Curvateur du Coccyx*. Sömmering gives this name to a small bundle of fleshy fibres, which descends on the middle of the coccyx, uniting on each side with the ischio-coccygei muscles. It is a part of those muscles.

CUR'VATURE, *Curvatu'ra, Curva'men*, from *curvus*, 'crooked,' *Cyrto'ma*, (F.) *Courbure*. The condition of a line or surface, which approximates more or less to the form of an arc; as the curvatures of the spine, duodenum, stomach, &c. Accidental curvatures of bones are the effect of rickets, or *Mollities ossium*. The Greeks called the curvature of the spine, ὑβώς, σκολίωσις, or λόρδωσις, according as the deviation was backwards, laterally, or forwards.

CURVED LINES, (F.) *Courbes Lignes*. Two crooked lines or projections on the posterior surface of the occipital bone. They are distinguished into *superior* and *inferior*. Some lines on the os innominatum are also so called.

CURVIMER, Cucumis sativus.

CUSCU'TA EPITH'YMUM. The systematic name of the *Dodder of Thyme*. *Epith'ymum Cuscu'ta*. A parasitical plant, possessed of a strong, disagreeable smell; and a pungent taste, very durable in the mouth. It was once used as a cathartic in melancholia.

CUSCU'TA EUROPE'A, was conceived to possess similar properties.

CUSPA'RIA FEBRIF'UGA, *Bonplan'dia trifolia'ta, Angustura, Galipæ'a febrif'uga*. *Order*, Rutaceæ. The South American tree, which furnishes the *Cuspa'ria* or *Angustu'ra Bark*, (F.) *Angusture vraie, Quinquina faux de Virginie*. According to Hancock, however, the Angustura bark is derived from the *Galipæ'a officinalis, Sex. Syst.* Decandria Monogynia, *Nat. Ord.* Diosmeæ; and this view has been adopted in the Pharmacopœia of the United States. Its odour is peculiar; taste intensely bitter, and slightly aromatic; pieces thin; externally, gray and wrinkled; internally, yellowish-fawn; fracture, short and resinous. It yields its virtues to water and proof spirit. It is tonic, stimulant, and aromatic. Dose, gr. v. to xx or more in powder.

CUSPIS. A spear. This name has been given to the glans penis, (q. v.)—Rolfink. It meant, also, a kind of bandage.

CUSTODIA VIRGINITATIS, Hymen.

CUSTOS, Vulva.

CUT, from (F.) *couteau*, 'a knife,' or from West Gothic *kota*, 'to cut;' or from κοπτω, 'I cut.' *Cæsu'ra, Tomē, Incis'io, Vulnus simplex, Tresis vulnus simplex, Copē*, (F.) *Coupure*. A common expression for the division or solution of continuity, made by a sharp instrument.

CUTAM'BULUS, from *cutis*, 'skin,' and *ambulo*, 'I walk.' *Walking in the skin*. An epithet given to certain parasitical animals, which creep under the skin; such as the Guinea-worm; and to certain pains felt between the skin and flesh, as it were.

CUTANEO-SOURCILIER, Corrugator supercilii.

CUTA'NEOUS, *Cuta'neus*, from *cutis*, 'the skin.' Belonging to the skin.

CUTANEOUS DISEASES, *Eruptions, Epiphy'mata*, are the numerous affections of a morbid character, to which the skin is liable.

CUTANEOUS EXHALATION AND ABSORPTION, are those which take place from the skin.

CUTANEOUS or CUTANEAL NERVES, so called, are two in number, and belong to the upper extremity. They are given off from the brachial plexus. The *internal cutaneous, Cubito-cutané*, (Ch.,) descends along the inner part of the arm, and divides, above the elbow, into two branches; the outermost of which follows the outer edge of the biceps, and spreads over the anterior and inner part of the forearm; and the innermost accompanies the basilic vein; passing to the corresponding side of the hand and little finger. The *external cutaneous, Radio-cutané*, (Ch.,) *Mus'culo-Cutaneus, Per'forans* CASSE'RII, passes outwards, perforates the coraco-brachialis; descends along the anterior and outer part of the arm; passes as far as the middle of the fold of the elbow, under the median cephalic; and descends along the anterior and outer edge of the forearm. At some distance above the wrist, it divides into two branches; an *outer*, which is distributed on the back of the hand, the thumb and index finger; and an *inner*, which descends on the muscles of the thumb, into the palm of the hand, and divides into fine filaments, which may be traced to the fingers.

Nervus Cutaneus Minor, of Wrisberg, also takes its origin from the axillary plexus, but is more particularly connected with the ulnar nerve. It soon separates from the ulnar, running afterwards between it and the inner side of the arm. A little below the axilla it divides

into two branches, which are distributed to the arm.

Chaussier calls the *cephalic* and *basilic veins* the *Radial* and *Cubital Cutaneous*.

CUTCH, Catechu.

CUTI, Catechu.

CUTICULA, Epidermis.

CUTIO, Oniscus.

CUTIS, *Pellis*, *Co'rium*, *Derma*, *Deris*, *Anthro'pe*, *Anthro'pen*, *Skin*, (F.) *Peau*. A dense, resisting membrane, of a flexible and extensible nature, which forms the general envelope of the body; and is continuous with the mucous membranes, through the different natural apertures. It is generally considered to be formed of three distinct layers—the *epidermis*, *rete* or more properly *corpus mucosum*, and *corium*. Some anatomists, however, separate it into several others. Its outer surface is covered by a number of small eminences, called papillæ, which are generally regarded as eminently nervous and vascular. The skin is our medium of communication with external bodies. It protects the subjacent parts; is the seat of touch, and, through it, are exhaled the watery parts of the blood, which are not needed in the nutrition of the body. The state of the skin, as regards heat and dryness, affords us useful information in our pathological investigations. Its colour, too, requires attention: the paleness of disease is as characteristic as the rosy complexion of health. The colour of the skin varies according to the age, sex, &c. As a general principle, it is finer in the female and child than in the male and adult. In old age it becomes light-coloured, thin, and dry. It likewise varies according to the races, &c.

Cutis Anserina, Horrida cutis—c. Carnosa, Carnosus panniculus—c. Extima, Epidermis—c. Linguæ, see Tongue—c. Suilla, *Couenne*—c. Summa, Epidermis—c. Ultima, Epidermis.

CUTITIS, Erysipelatous inflammation.

CUTTING ON THE GRIPE, see Lithotomy.

CUTTLE FISH, Sepia.

CUTTUBUTH. The Arabian physicians have given this name to a species of melancholy, accompanied with so much agitation, that the patients cannot remain tranquil for the space of an hour.

CUURDO CANELLA, Laurus cinnamomum.

CYANODERMIA, Cyanopathy.

CYANOP'ATHY, *Cyanopathi'a*, *Cyano'sis*, *C. cardi'aca*, *Cyanoder'mia*, *Acleitro-cardia*, (Piorry) *Hæmato-cyano'sis*, *Kyano'sis*, *Morbus cæru'leus*, *Cærulo'sis neonato'rum*, from κυανος, 'blue,' and παθος, 'affection,' (F.) *Cyanose*, *Maladie bleue*, *Ictère bleu*. A disease, in which the whole of the surface of the body is coloured blue. It is often symptomatic, and commonly depends on a direct communication between the cavities of the right and left side of the heart. Such communication does not, however, always occasion the *blue disease*, but it is generally thought that the disease never exists without this state of parts; or without some obstacle to the circulation in the right side of the heart. The blueness does not seem to be owing to the admixture of black and red blood. A child affected with blueness is said to be *cyanosed*, (F.) *Cyanosé*.

CYANOSE, Cyanosis.

CYANOSÉ, Cyanosis.

CYANOSIS, Cyanopathy.

CYANURETUM FERRO-ZINCICUM, Zinci Ferro-hydrocyanas.

CYANUS, Centaurea cyanus—c. Ægyptiacus, Nymphæa nelumbo.

Cy'anus Seg''etum, *Bluebottle*, (F.) *Bluet des Moissons*, *Barbeau*, *Aubifoin*, *Casse-Lunettes*. The flowers of this European plant, when distilled with water, have been used in ophthalmia.

CYAR, κυαρ. 'The eye of a needle,' 'a small hole.' The *Meatus audito'rius internus*. See Auditory canal, (internal.)

CYATHIS'CUS, diminutive of κυαθος, 'a bowl.' The concave part of a sound, made like a small spoon, as in the case of the ear-pick.

CY'ATHUS, 'a bowl.' A measure, both of the liquid and dry kind, equal to about an ounce and a half, or to the 10th part of a pint. According to Pliny and Galen, about 10 drachms.

Cyathus Cerebri, Infundibulum of the brain.

CYBE, Head.

CYBITON, Cubitus.

CYBOIDES, Cuboid.

CYC'EON, from κυκαω, 'I mix together.' The ancient name of a medicine of the consistence of pap, composed of wine, water, honey, flour, barley meal, and cheese.—Hippocr.

CYC'LAMEN EUROPÆ'UM, *Arthani'ta*, (q. v.) *A. cyc'lamen*, *Cyclaminus*, *Cyssan'themon*, *Cyssophyl'lon*, *Panis porci'nus*, *Cas'amum*, *Chyli'nē*, 'sow-bread.' *Fam.* Primulaceæ. *Sex. Syst.* Pentandria Monogynia. (F.) *Pain du Pourceau*. The fresh root is said to be acrid, bitter, drastic, and anthelmintic. Dose, ʒj. For external use, see Arthanita.

CYCLE, *Cyclus*, from κυκλος, 'a circle.' A period or revolution of a certain number of years. The Methodists gave this name to an aggregate of curative means, continued during a certain number of days. Nine was the usual number.

CYCLIS'MOS. A *troch*, *Trochis'cos*, (q. v.) The name, as well as *Cyclis'cus*, was also given to a circular kind of rasp. They have the same etymon as cycle.

CYCLOCEPH'ALUS, from κυκλος, 'a circle,' and κεφαλη, 'head.' A monster, whose eyes are in contact, or united in one.

CYCLOPHOR'IA, from κυκλος, 'a circle,' and φερω, 'I bear.' The circulation (q. v.) of the blood or other fluids.

CYCLO'PIA. Same etymon as *Cyclops*. State of a monster that has both eyes united into one. Called, also, *Monopsia* and *Rhinencephalia*.

CYCLOPS, κυκλωψ, from κυκλος, 'an orb or circle,' and ωψ, 'an eye.' *Monoc'ulus*, *Monops*, *Monophthal'mus*, *Monom'matos*, *Unioc'ulus*, *Unoc'ulus*. A monster having but one eye, and that placed in the middle of the forehead, like the fabulous Cyclops.

CYCLOTOME, *Cyclot'omus*, from κυκλος, 'a circle,' and τεμνειν, 'to cut.' An instrument, composed of a ring of gold and a cutting blade, by means of which the ball of the eye can be fixed, whilst the cornea is cut. It was invented by a surgeon of Bordeaux, named Guérin, for extracting the cataract. It is not used.

CYCLUS. Circulus.

CYDONIA'TUM. *Cydona'tum*, *Dyacydoni'tes*. A composition of the *Cydonia mala* or quinces, with the addition of spices.—Paulus of Ægina.

CYDONIUM MALUM, see Pyrus cydonia.

CYE'MA, *κυημα*, from *κυω*, 'I conceive.' *Conception.* Likewise the product of conception. See Embryo and Fœtus.

CYESIOL'OGY, *Cyesiolog''ia*, from *κυησις*, 'pregnancy,' and *λογος*, 'a description.' The doctrine of gestation.

CYESIS, Conception, Fecundation, Pregnancy.

CYESTEINE, Kiesteine.

CYLICH'NĒ, *Cylich'nis.* A pill-box or earthenware pot, or small cup; from *κυλιξ*, 'a cup.'—Galen, Foësius.

CYLINDRI, see Villous membranes—c. Membranacei renum, see Calix.

CYL'INDROID, *Cylindroï'des*, from *κυλινδρος*, 'cylinder,' and *ειδος*, 'form.' Having the form of a cylinder. Chaussier calls the *Cornu Ammonis*,—*Protubérance cylindroïde.*

CYLINDROIDES, Teres.

CYLLO'SIS, *κυλλωσις*. 'Lameness, mutilation, or vicious conformation.'—Hippocrates. Galen. See Kyllosis.

CYMATO'DES, *Undo'sus*, from *κυμα*, 'a wave,' and *ειδος*, 'resemblance.' The vacillating, undulatory character of the pulse in weak individuals.

CYMBA, Vulva.

CYMBALARIS, Cricoid.

CYNAN'CHĒ, *Angi'na*, from *κυων*, 'a dog,' and *αγχω*, 'I suffocate,' (?) *Sore Throat, Paracynan'chē, Paristh'mia, Synan'chē, Prunel'la, Squinan'thia, Empres'ma Paristhmi'tis, Cauma Paristhmi'tis, Isthmi'tis, Paristhmi'tis, Inflamma'tio Fau'cium*, '*Dog choak.*' Inflammation of the supradiaphragmatic portion of the alimentary canal, and of the lining membrane of the upper part of the air-passages. (F.) *Angine, Esquinancie, Mal de Gorge, Synancie, Squinancie, Kinancie.* It comprises the following chief varieties.

Cynanche Epidemica, Cynanche maligna—c. Faucium, C. tonsillaris—c. Gangrænosa, Cynanche maligna—c. Laryngea, Laryngitis.

Cynanche Malig'na, *C. gangræno'sa, Angi'na ulcero'sa, Febris epidem'ica cum Angi'nâ, Empres'ma Paristhmi'tis Maligna, Tonsilla'rum gangræ'na, Cynanchē epidem'ica, C. pur'puro-parotidæa, Cynanchē ulcero'sa, Epidem'ica gutturis lues, Pes'tilens fau'cium affec'tus, Pædanchonē,* (?) *Gangræ'na Tonsilla'rum, Ulcus Syriacum, Garrotil'lo, Carbun'culus angino'sus, Angina ulcusculo'sa, A. epidemica, A. gangræno'sa. A. malig'na. Putrid, Ulcerous Sore Throat, Gangrenous Inflammation of the Pharynx.* (F.) *Angine gangréneuse, A. Maligne.* It is characterized by crimson redness of the mucous membrane of the fauces and tonsils; ulcerations, covered with mucus, and spreading sloughs, of an ash or whitish hue: the accompanying fever typhus. It is often epidemic, and generally contagious; and is frequently found accompanying scarlet fever, giving rise to the variety, *Scarlatina maligna.*

The general treatment is the same as in typhus; and stimulant antiseptic gargles must be used, consisting, for example, of the decoction of bark and muriatic acid.

Cynanche Maxillaris, c. Parotidæa—c. Œsophagea, Œsophagitis.

Cynanche Parotidæ'a, *Empres'ma Paroti'tis, Parotitis, Perot'ia, Parotidi'tis, Cynan'chē Parotides, Angina maxilla'ris, Gissa, Angina externa, Angi'na parotidæ'a exter'na, P. epidem'ica, P. contagio'sa, P. spu'ria, P. sero'so glu'tinē tu'mens, Cynan'chē maxilla'ris, Inflamma'tio paro'tidum, Infla'tio paro'tidum, Catar'rhus Bellinsula'nus, Branks* (Scotch,) *Mumps,* (F.) *Inflammation de la Parotide, Oreillons, Ourles.* The characteristic symptoms are:—a painful tumour of the parotid gland, or of the cellular tissue surrounding it, or of both, not of the suppurative kind; frequently extending to the maxillary gland. It is very conspicuous externally, and is often accompanied with swelling of the testes in the male, and of the mammæ in the female; the testes being sometimes absorbed afterwards. It is epidemic, and apparently contagious. The treatment is very simple; the adoption merely of the antiphlogistic plan, under which it usually soon disappears. When inflammation of the mammæ or testes supervenes, it must be treated as if idiopathic.

Cynanche Pharyngæ'a, *Empres'ma Paristhmi'tis Pharyngea, Isthmi'tis, Pharyngi'tis, Inflammatio Pharyn'gis, Parasynan'chē, Anginæ inflammatoriæ, Sp.* iv.—(Boerhaave.) (F.) *Angine Pharyngée, Catarrhe pharyngien.* Inflammation of the pharynx.

This disease can hardly be said to differ, in pathology or treatment from the Cynanche tonsillaris. The same may be remarked of the *Cynanchē Œsophagæ'a, Œsophagi'tis.*

Cynanche Prunella, C. tonsillaris—c. Purpuro-parotidæa, Cynanche maligna.

Cynanche Tonsilla'ris, *Emprésma Paristhmi'tis Tonsilla'ris, Synanchē, Cynanchē fau'cium, Amygdali'tis, Tonsilli'tis, Cynanchē Prunel'la, Dyspha'gia inflammato'ria, Antiadi'tis, Angina inflammato'ria, A. cum tumo're, A. tonsilla'ris, A. synocha'lis, A. sanguin'ea, A. vera et legit'ima, Inflamma'tio Tonsilla'rum, Antiadon'cus inflammato'rius, Inflammatory Sore Throat, Common Squinancy, Squinsy or Quinsy,* (F.) *Amygdalite, Inflammation des Amygdales, Angine tonsillaire, Pharyngite tonsillaire, Esquinancie, Squinancie, Catarrhe guttural, Angine gutturale inflammatoire.* The characteristic symptoms of this affection are, swelling and florid redness of the mucous membrane of the fauces, and especially of the tonsils; painful and impeded deglutition, accompanied with inflammatory fever. It is generally ascribed to cold, and is one of the most common affections of cold and temperate climates. It usually goes off by resolution, but frequently ends in suppuration.

Common sore throat is an affection of no consequence. It requires merely rest, and the observance of the antiphlogistic regimen. When more violent—in addition to this,—purgatives, inhalation of the steam of warm water; acid, or emollient gargles; rubefacients externally, or sinapisms or blisters. When suppuration must inevitably occur, the continued use of the inhaler must be advised, and an opening be made into the abscess as soon as it shall have formed. If the patient be likely to be suffocated by the tumefaction, bronchotomy may be necessary.

Cynanche Stridula, C. trachealis.

Cynanche Trachea'lis; the *Cynanche laryngæ'a* of some, *Suffoca'tio strid'ula, Angina pernicio'sa, Asthma Infan'tum, Cynanche stridula, Catar'rhus suffocati'vus Barbaden'sis, Angina polypo'sa* sive *membrana'cea* sive *pulpo'sa, Em-*

pres'ma Bronchi'tis, E. Bronchlemmi'tis, Angina inflammato'ria, A. suffocato'ria, A. strepito'sa, Laryngi'tis et Tracheï'tis infantilis, Laryngos'tasis seu *Laryngo-tracheï'tis, Laryngo-tracheitis with diph'theritic exuda'tion, A. exsudato'ria, Orthopnœ'a cynan'chica, Pædan'chonē*, (?) *A. Trachea'lis, Morbus Strangulato'rius, Trachi'tis, Tracheï'tis, Tracheli'tis, Diphtheri'tis trachea'lis, Expectora'tio Solida, Cauma Bronchi'tis, Angina canina, Croup, Roup, Hives, Choak, Stuffing, Rising of the lights.* (F.) *Angine laryngée et trachéale, Laryngite avec production de fausses membranes, Laryngite pseudo-membraneuse.* A disease characterized by sonorous and suffocative breathing; harsh voice; cough, ringing or like the barking of a dog; fever, highly inflammatory. It is apt to be speedily attended with the formation of a false membrane, which lines the trachea beneath the glottis, and occasions violent dyspnœa and suffocation, but is sometimes expectorated. The dyspnœa, as in all other affections of the air-passages, has evident exacerbations. It differs in its character in different situations; being infinitely more inflammatory in some places than in others, and hence the success obtained by different modes of treatment. It chiefly affects children, and is apt to recur, but the subsequent attacks are usually less and less severe.

As a general principle, it requires the most active treatment; bleeding from the arm or neck, so as to induce paleness; leeches applied to the neck, &c., according to the age—the warm bath, blisters, to the neck or chest, and purgatives. Formidable as the disease may be, if this plan be followed *early*, it will generally be successful. Many specifics have been recommended for it, but the search has been idle and fruitless. The majority of cases of what are called croup are not of this inflammatory cast; but are more of a spasmodic character, and have been termed by the French *faux croups*, and with us are occasionally termed *spasmodic croup*. They generally yield to an emetic and the warm bath.

Cynanche Trachealis Spasmodica, Asthma acutum, A. Thymicum—c. Ulcerosa, Cynanche Maligna.

CYNAN'CHICA. Medicines used in cases of quinsy were formerly so called.

CYNAN'CHUM. Same etymon. A genus of plants, of which the following are used in medicine.

Cynanchum Monspeliacum, *Scam'mony of Montpellier.* The plant furnishes a blackish kind of gum resin, which is purgative, and but little used.

Cynanchum Vincetoxicum, Asclepias vincetoxicum.

Cynanchum Vomito'rium, *Ipecacuan'ha of the Isle of France.* As its name imports, this plant resembles ipecacuanha in properties. It is emetic, in the dose of from 12 to 24 grains of the powder.

CYNANTHEMIS, Anthemis cotula.

CYNANTHRO'PIA, from κυων, 'dog,' and ανθρωπος, 'a man.' A variety of melancholia, in which the patient believes himself changed into a dog; and imitates the voice and habits of that animal.

CYN'ARA or CIN'ARA SCOL'YMUS. The systematic name of the *Ar'tichoke. Alcoc'alum, Articoc'ulus, Artiscoc'cus lævis, Costus nigra, Car'duus Sati'vus non spino'sus, Cinara horten'sis, Scolymus Sati'vus, Car'duus sati'vus, Car'duus domesticus capitè majorē, Carduus al'tilis,* (F.) *Artichaut. Family*, Carduaceæ. *Sex. Syst.* Syngenesia Polygamia æqualis. Indigenous in the southern parts of Europe; much used as an agreeable article of diet. The juice of the leaves, mixed with white wine, has been given in dropsies.

CYN'ICUS, from κυων, 'a dog.' *Cynic.* Relating to, or resembling, a dog. *Cynic spasm* is a convulsive contraction of the muscles of one side of the face—dragging the eye, cheek, mouth, nose, &c. to one side. See Canine.

CYNIPS QUERCUS FOLII, see Quercus infectoria.

CYNOCOPRUS, Album græcum.

CYNOCRAMBE, Mercurialis perennis.

CYNOCTONON, Aconitum.

CYNOCYTISUS, Rosa canina.

CYNODEC'TOS, from κυων, 'a dog,' and δηκω, 'I bite.' One who has been bitten by a dog.—Dioscorides.

CYNODENTES, Canine teeth.

CYNODESMION, Frænum penis.

CYNOGLOS'SUM, from κυων, 'a dog,' and γλωσσα, 'a tongue.' *Cynoglos'sum officina'lē, Lingua Cani'na, Hound's tongue, Caballation,* (F.) *Langue de Chien. Family*, Boragineæ. *Sex. Syst.* Pentandria Monogynia. It is aromatic and mucilaginous, and has been supposed to be possessed of narcotic properties.

CYNOLOPHOI, Spinous processes of the vertebræ.

CYNOLYSSA, Hydrophobia.

CYNOMOIA, Plantago psyllium.

CYNOMO'RIUM COCCIN'EUM, from κυων, 'a dog,' and μοριον, 'the penis.' (F.) *Champignon de Malte.* Improperly called *Fungus Meliten'sis* or the *Fungus of Malta*, as it is not a fungus. The powder has been given as an astringent in hemorrhage, dysentery, &c.

CYNOREXIA, Boulimia.

CYNORRHODON, Rosa canina.

CYNOSBATOS, Rosa canina.

CYNOSORCHIS, Orchis mascula.

CYNOSPASTUM, Rosa canina.

CYON, κυον. The word sometimes signifies the frænum of the prepuce; at others, the penis.

CYOPHORIA, Pregnancy.

CYPARISSUS, Cupressus sempervirens.

CYPERUS ANTIQUORUM, Lawsonia inermis—c. Indicus, Curcuma longa.

Cype'rus Longus, from κυπελλος, 'a round vessel,' which its roots have been said to resemble. *Galangale,* (F.) *Souchet odorant.* It possesses aromatic and bitter properties, but is not used. See, also, Dorstenia contrayerva.

Cyperus Odorus, Dorstenia contrayerva—c. Peruanus, Dorstenia contrayerva.

Cyperus Rotun'dus; the *Round Cyperus,* (F.) *Souchet rond.* It is a more gratefully aromatic bitter than the *C. Longus.*

CYPHO'MA. *Cyphus, Cypho'sis, Cyrto'ma, Cyrto'sis, Opisthocypho'sis,* from κυφος, 'gibbous.' Gibbosity of the spine. See Vertebral Column, &c. *Cyrtosis* forms a genus in the order *Dysthet'ica*, and class *Hæmat'ica* of Good, and is defined: 'head bulky, especially anteriorly; stature short and incurvated; flesh flabby, tabid, and wrinkled.' It includes *Cretinism* and *Rickets.*

CYPHOSIS, Gibbositas. See Hump, and Kyphosis.

CYPRÈS, Cupressus sempervirens.

CYPRESS, Cupressus sempervirens—c. Tree, Liriodendron.

CYP'RINUM O'LEUM, *Oil of Cypress;* prepared of olive oil, cypress flowers, calamus, myrrh, cardamom, inula, bitumen of Judæa, &c. It was formerly employed in certain diseases of the uterus, pleurisies, &c., and was regarded to be both stimulant and emollient.

CYPRIPEDIUM CALCEOLUS, C. luteum—c. Flavescens, C. luteum.

CYPRIPE'DIUM LU'TEUM, *C. Calcéolus, C. Flaves'cens, C. Pubes'cens* and *C. Parviflo'rum, Yellow ladies' slipper, Mocasin flower, Yellows, Bleeding heart, American vale'rian, Yellow umbil, male Mervine, Noah's ark,* (F.) *Sabot de Vénus jaune.* An indigenous plant, *Nat. Order,* Orchideæ, which is found all over the United States; blossoming in May and June. The root is considered to be antispasmodic, and is used in the same cases as valerian.

CYPRIPEDIUM PARVIFLORUM, C. luteum—c. Pubescens, C. luteum.

CYPRIUM, Cuprum.

CYPSELE, Cerumen.

CYRCEON, Anus.

CYRTOIDES, Cuboid.

CYRTOMA, Curvature, Cyphoma.

CYRTONOSOS, Rachitis.

CYRTOSIS, Cyphoma—c. Cretinismus, Cretinism—c. Rachia, Rachitis.

CYSSANTHEMON, Cyclamen.

CYSSAROS, Anus, Rectum.

CYSSOPHYLLON, Cyclamen.

CYSSOTIS, from κυσος, 'the anus.' Inflammation of the lower part of the rectum: *Proctitis,* (q. v.); tenesmus.

CYST, Kyst.

CYSTAL'GIA, from κυστις, 'the bladder,' and αλγος, 'pain.' Pain in the bladder.

CYSTANENCEPHA'LIA, from κυστις, 'a bladder,' and *anencepha'lia,* 'absence of brain.' A monstrosity, in which in place of a brain, a bladder is found filled with fluid.—G. St. Hilaire.

CYSTAUCHENOTOM'IA, *Cystotrachelotomia,* from κυστις, 'a bladder,' αυχην, 'the neck,' and τομη, 'incision.' An incision into the neck of the bladder.

CYSTECTASY, Lithectasy.

CYSTENCEPH'ALUS, from κυστις, 'bladder,' and κεφαλη, 'head.' A monster having a head with a vesicular brain.—G. St. Hilaire.

CYSTEOLITHOS, from κυστις, 'the bladder,' and λιθος, 'a stone.' Stone in the bladder. Also, a medicine, employed to dissolve or break stone.

CYSTERETHIS'MUS, *Vesi'cæ Irritabil'itas;* from κυστις, 'the bladder,' and ερεθιζω, 'I irritate.' Irritability of the bladder.

CYSTHEPAT'ICUS, from κυστις, 'the bladder;' and 'ηπαρ, 'the liver.' Belonging to the gall bladder and liver. This name was given, formerly, to imaginary excretory ducts for the bile, which were supposed to pass directly from the liver to the gall-bladder.

CYSTHEPATOLITHI'ASIS, from κυστις, 'the bladder,' 'ηπαρ, 'the liver,' and λιθιασις, 'pain caused by a calculus.' It has been proposed to call thus, the symptoms caused by the presence of biliary calculi. See Calculi, biliary.

CYSTHITIS, Kysthitis.

CYSTHOS, Anus.

CYSTIC, *Cys'ticus,* from κυστις, 'a bladder.' Belonging to the gall-bladder.

CYSTIC ARTERY, *Arteria Cys'tica,* is given off from the right branch of the hepatic, and divides into two branches, which proceed to the gall-bladder. It is accompanied by two *cystic veins,* which open into the vena porta abdominalis.

CYSTIC BILE. Bile contained in the gall-bladder.

CYSTIC CALCULI. Calculi formed in the gall-bladder.

CYSTIC DUCT, *Ductus cys'ticus, Mea'tus cys'ticus.* The duct proceeding from the gall-bladder, which, by its union with the hepatic, forms the *ductus communis choledochus.*

CYSTIC OXIDE CALCULI, see Calculi.

CYSTIC SARCO'MA, of AB'ERNETHY, *Emphy'ma Sarcoma cellulo'sum.* Tumour, cellulose or cystose; cells oval, currant-sized or grape-sized, containing serous fluid; sometimes caseous. Found in the thyroid gland (forming bronchocele.) testis, ovarium, &c.

CYS'TICA, *Cystic Remedies.* Such medicines as were formerly believed proper for combating diseases of the bladder.

CYSTICER'CUS, from κυστις, 'a bladder,' and κερκος, 'a tail.' A genus of entozoa of the family of the hydatids, distinguished by the caudal vesicle in which the cylindrical or slightly depressed body of the animal terminates. The *Cysticercus cellulosæ* has been often found in the cellular membrane.

CYSTINURIA, Urine, cystinic.

CYSTINX, Vesicula.

CYSTIPHLOGIA, Cystitis.

CYSTIRRHA'GIA, from κυστις, 'the bladder,' and ρηγνυω, 'I break forth.' *Hemorrhage from the bladder;* (F.) *Hémorrhagie de la Vessie.* By some used synonymously with cystirrhœa.

CYSTIRRHŒ'A, from κυστις, 'the bladder,' and ρεω, 'I flow.' *Paru'ria Stillati'tia Muco'sa, Blennu'ria, Blennorrhœ'a urinalis, B. vesi'cæ, Cysto-blennorrhœa, Cystorrhœ'a, Urina mucosa, Cystocatar'rhus, Dysu'ria Mucosa, Pyu'ria Mucosa, P. vis'cida, P. sero'sa, Morbus cystophlegmat'icus, Catar'rhus vesi'cæ,* (F.) *Cystite muqueuse, Flux muqueux de la vessie, Catarrhe vésical.* A copious discharge of mucus from the bladder, passing out with the urine, and generally attended with dysuria. It is commonly dependent upon an inflammatory or subinflammatory condition of the lining membrane. The treatment must be regulated by the cause. If it be not produced by an extraneous body: the antiphlogistic plan,—the exhibition of warm diluents, and keeping the surface in a perspirable state, by wearing flannel. Some of the turpentines may, at times, be given with advantage; and astringent or other appropriate injections be thrown into the bladder.

CYSTIS, Urinary bladder—c. Choledochus, Gall-bladder—c. Fellea, Gall-bladder—c. Serosa, Hygroma.

CYSTITE, Cystitis—c. *Muqueuse,* Cystitis.

CYSTI'TIS, from κυστις, 'the bladder.' *Inflamma'tio Vesi'cæ, Empres'ma Cysti'tis, Cysti'tis u'rica, Uro-cysti'tis, Cystiphlo'gia, Cystophlo'gia, Inflammation of the bladder.* (F.) *Cystite, Inflammation de la vessie;* characterized by pain and swelling in the hypogastric region: dis-

charge of urine painful or obstructed, and tenesmus. It may affect one or all of the membranes; but commonly it is confined to the mucous coat. In the chronic condition, it appears in the form of cystirrhœa. It must be treated upon the same energetic principles, that are required in other cases of internal inflammation. Venesection, general and local, the warm bath, and warm fomentations, warm, soothing enemata, diluents, &c. Cantharides must be avoided, even in the way of blisters, unless with precautions, as the disease is often occasioned by them.

CYSTITIS FELLEA, Cholecystitis—c. Urica, Cystitis.

CYSTITOME, Cystit'omus, Kibis'titome, from κυστις, 'the bladder,' and τεμνειν, 'to cut.' An instrument, invented by Lafaye, for dividing the anterior part of the capsule of the crystalline in the operation for extracting the cataract. It was formed like the *Pharyngotome*.

CYSTO-BLENNORRHŒA, Cystirrhœa.

CYSTO-BU'BONOCE'LĒ, from κυστις, 'the bladder,' βουβων, 'the groin,' and κηλη, 'a tumour.' Hernia of the bladder through the abdominal ring.

CYSTO-CATARRHUS, Cystirrhœa.

CYSTOCE'LĒ, *Cystoce'lia*, from κυστις, 'the bladder,' and κηλη, 'a tumour.' *Hernia of the bladder*. (F.) *Hernie de la Vessie*. It is not common. It occurs, most frequently, at the abdominal ring; less so at the crural arch, perinæum, vagina, and foramen thyroideum. It may exist alone, or be accompanied by a sac, containing some abdominal viscus. The tumour is soft and fluctuating; disappears on pressure, and increases in size, when the urine is retained. It must be reduced and kept in position by a truss. *Vaginal cystocele* is kept in place by a pessary.

CYSTOCE'LĒ BILIO'SA, *Turgescen'tia vesic'ulæ fell'eæ*.

CYSTODYN'IA, from κυστις, 'the bladder,' and οδυνη, 'pain.' Pain of the bladder; particularly rheumatic pain.

CYSTO-LITHIASIS, Calculi, vesical.

CYSTO-LITHIC, *Cystolith'icus*, from κυστις, 'the bladder,' and λιθος, 'a stone.' Relating to stone in the bladder.

CYSTO-MEROCE'LĒ, from κυστις, 'the bladder,' μηρος, 'the thigh,' and κηλη, 'hernia.' Femoral hernia, formed by the bladder protruding beneath the crural arch.

CYSTON'CUS, from κυστις, 'the bladder,' and ογκος, 'tumour.' Swelling of the bladder.

CYSTO-PHLEGMAT'IC, *Cystophlegmat'icus*, from κυστις, 'the bladder,' and φλεγμα, 'mucus, phlegm.' Belonging to the vesical mucus. *Morbus cystophlegmaticus*, Cystirrhœa.

CYSTOPHLOGIA, Cystitis.

CYSTOPLASTIC, *Cystoplasticus:* from κυστις, 'the bladder,' and πλασσω, 'I form.' An epithet for operations for the cure of fistulous openings into the bladder; sometimes restricted to the cure by translation of skin from a neighbouring part.

CYSTOPLEG''IC, *Cystopleg''icus*. Belonging to paralysis of the bladder; from κυστις, 'the bladder,' and πλησσω, 'I strike.'

CYSTOPLEX'IA, same etymon. Paralysis of the bladder.

CYSTOPTO'SIS, from κυστις, 'the bladder,' and πιπτειν, 'to fall.' Relaxation of the inner membrane of the bladder, which projects into the canal of the urethra.

CYSTOPY'IC, *Cystopy'icus*, from κυστις, 'the bladder,' and πυον, 'pus.' Relating to suppuration of the bladder.

CYSTORRHŒA, Cystirrhœa.

CYSTOSOMATOM'IA, *Cystosomatotom'ia*, from κυστις, 'the bladder,' σωμα, 'body,' and τομη, 'incision.' An incision into the body of the bladder.

CYSTOSPASMUS, see Cystospastic.

CYSTOSPAS'TIC, *Cystospas'ticus*, from κυστις, 'the bladder,' and σπαω, 'I contract.' Relating to spasm of the bladder, and particularly of its sphincter, *Spasmus Vesi'cæ, Ischu'ria spasmod'ica*. (F.) *Spasme de la Vessie*.

CYSTOTHROM'BOID, *Cystothromboï'des*, from κυστις, 'the bladder,' and θρομβος, 'a clot.' Relating to the presence of clots in the bladder.

CYSTOTOME, Cystot'omus, from κυστις, 'the bladder,' and τεμνειν, 'to cut.' An instrument intended for cutting the bladder. Instruments of this kind have been more frequently, although very improperly, called *Lithotomes*.

CYSTOTOM'IA, same etymon. Incision of the bladder, *Sectio vesica'lis*. *Cystotomia* means cutting into the bladder for any purpose; (F.) *Incision de la vessie*. Commonly, it is applied to the puncturing of the bladder, for the purpose of removing the urine; whilst *Lithotomy* has been employed for the incisions made with the view of extracting calculi from the bladder. See Lithotomy.

CYSTOTRACHELOTOMIA, Cystauchenotomia.

CYT'INUS, *Cytinus Hypocis'tus, Hypocist'us*. A small, parasitical plant, which grows in the south of France and in Greece, on the roots of the woody cistus. The juice of its fruit is acid, and very astringent. It is extracted by expression, and converted into an extract, which was called *Succus Hypocis'ti*, and was formerly much used in hemorrhages, diarrhœa, &c.

CYTISI'NA, *Cytisine*. An immediate vegetable principle, discovered by Chevalier and Lassaigne, in the seeds of the *Cytisus Labur'num* or *Bean-Trefoil tree*. *Family*, Leguminosæ. *Sex. Syst.* Diadelphia Decandria. Cytisine has analogous properties to emetine. In the dose of one or two grains, it produces vomiting and purging; and, in a stronger dose, acts as an acrid poison. The seeds of the *Cytisus Laburnum*, (F.) *Aubours*, have been long known to produce vomiting and purging.

CYTISMA ECZEMA, Eczema—c. Herpes, Herpes.

CYTISO-GENISTA, Spartium scoparium.

CYTISUS LABURNUM, see Cytisine—c. Scoparius, Spartium scoparium.

CYTI'TIS, *Scyti'tis, Dermati'tis, Dermi'tis*, from κυτις, 'the skin,' and *itis*, 'denoting inflammation.' Inflammation of the skin.

CY''TOBLAST, from κυτος, 'cell,' and βλαστος, 'germ,' *Cell-germ, Nu'cleus*. A primary *granule*, from which all animal and vegetable bodies are presumed to be formed.—When the nucleus or cytoblast forms a cell, and is attached to its walls—the *germinal cell*, thus formed, is called a *nucleated cell*. When the nucleus contains a simple granule, the latter is termed a *nucleolus*.

CYTOBLASTE'MA; same etymon. *Intercellular substance, Hyaline substance, Substan'tia vit'rea* seu *hyali'na, Matrix.* The gum or mucus in the vegetable, and probably the liquor sanguinis after transudation from the vessels in the animal, in a state fully prepared for the formation of the tissues.—Schwann and Schleiden. By many, *Blastema* is preferred, inasmuch as it does not convey the idea of cellular development.

CYTTAROS, Glans.

D.

The figure of the Greek Δ, according to Galen, was the sign for the quartan fever.

DABACH, Viscum album.

DACNE'RON, δακνηρον, from δακνειν, 'to bite.' An ancient name for a 'collyrium,' composed of oxide of copper, pepper, cadmia, myrrh, saffron, gum Arabic, and opium.

DACRY, *Dac'ryon*, δακρυ, δακρυον, 'a tear:' Hence:

DACRYADENAL'GIA, *Dacryoädenal'gia*, from δακρυω, 'I weep,' αδην, 'a gland,' and αλγος, 'pain.' Disease or pain in the lachrymal gland.

DACRYADENI'TIS, *Dacryoädeni'tis:* from δακρυω, 'I weep,' αδην, 'a gland,' and *itis.* Inflammation of the lachrymal gland.

DACRYDION, Convolvulus scammonia.

DACRYGELO'SIS, from δακρυω, 'I weep,' and γελαω, 'I laugh.' A kind of insanity, in which the patient weeps and laughs at the same time.

DACRYNOMA, Epiphora.

DACRYOADENALGIA, Dacryadenalgia.

DACRYOADENITIS, Dacryadenitis.

DACRYOBLENNORRHŒ'A, from δακρυω, 'I weep,' βλεννα, 'mucus,' and ρεω, 'I flow.' Discharge of tears mixed with mucus.

DACRYOCYSTAL'GIA, from δακρυω, 'I weep,' κυστις, 'a sac,' and αλγος, 'pain.' Disease or pain in the lachrymal sac.

DACRYOCYSTI'TIS, from δακρυον, 'a tear,' and κυστις, 'bladder.' Inflammation of the lachrymal sac.

DACRYO'DES, *Lachrymo'sus*, from δακρυω, 'I weep.' A sanious ulcer, a weeping sore.

DAC'RYOLITE, *Dacryo'lithus*, from δακρυω, 'I weep,' and λιθος, 'a stone.' A concretion found in the lachrymal passages.

DACRYO'MA. Same etymon. The effusion of tears, occasioned by an occlusion of the puncta lachrymalia.—Vogel.

DACRYON, Tear.

DACRYOPŒ'US, from δακρυω, 'I weep,' and ποιεω, 'I make.' A substance, which excites the secretion of tears,—as the *onion, horseradish, garlic,* &c.

DAC'RYOPS, from δακρυω, 'I weep,' and ωψ, 'the eye,' 'a weeping eye.' A tumefaction of the lachrymal passages.

DACTYLE'THRA, DACTYLI'THRA, from δακτυλος, 'a finger.' A name given by the ancients to different topical applications, having the form of a finger; and proper for being introduced into the throat to excite vomiting.

DACTYLETUS, Hermodactylus.

DACTYLI'ON, *Dactyl'ium*, from δακτυλος, 'a finger.' The union of the fingers with each other. This affection is generally congenital. But it may be owing to burns, ulcerations, inflammation of the fingers, &c.

DACTYL'IOS, from δακτυλος, 'a finger.' A troch or lozenge, when shaped like a finger.

DACTYLITIS, Paronychia.

DACTYLIUS, from δακτυλιος, *annulus*, 'a ring.' The Dactylius aculeatus is a worm of a light colour, annulated, cylindrical, but tapering slightly towards both extremities; from two-fifths to four-fifths of an inch long, which has been found in the urine.

DACTYLODOCHME, Dochme.

DAC'TYLOS, δακτυλος, *Dig''itus*, (q. v.) 'a finger.' The smallest measure of the Greeks, the sixth part of a foot.

DACTYLOTHE'KĒ, δακτυλοθηκη, from δακτυλος, 'a finger,' and θηκη, 'a case or sheath.' An instrument for keeping the fingers extended, when wounded.—Ambrose Paré.

DACTYLUS, Date.

DÆDA'LEA SUAVEOLENS, *Bole'tus Sal'icis.* (F.) *Bolet odorant.* A champignon, which grows on the trunks of old willows. It has a smell of anise, which is penetrating and agreeable; and has been recommended in phthisis pulmonalis in the dose of a scruple four times a day. See Boletus suaveolens.

DÆDALUS, Hydrargyrum.

DÆDION, Bougie.

DÆMONOMANIA, Demonomania.

DÆS, Tædæ.

DAFFODIL, Narcissus pseudonarcissus.

DAISY, Chrysanthemum leucanthemum, Erigeron Philadelphicum—d. Common, Bellis—d. Ox-eye, Chrysanthemum leucanthemum.

DALBY'S CARMIN'ATIVE. A celebrated empirical remedy, much used as a carminative for children. The following is a form for its preparation: (*Magnesiæ alb.* ℈ij, *ol. menthæ piper.* gtt. j, *ol. nuc. moschat.* gtt. iij, *ol. anisi,* gtt. iij, *tinct. castor.* gtt. xxx, *tinct. asafœtid.* gtt. xv, *tinct. opii,* gtt. v, *sp. pulegii,* gtt. xv, *tinct. cardam. c.* gtt. xxx, *aquæ menthæ pip.* ℥ij. M.) A Committee of the Philadelphia College of Pharmacy recommend the following form:—(*Aquæ,* Ox, *Succhar. alb.* ℥xxxij, *Carbon. Potass.* ℥ss, *Carb. Mag.* ℥xij, *Tinct. Opii.* f. ℥vj, *Ol. menth. piper. Ol. Carui, Ol. Anethi Fœnicul.* āā f. ℈ij. M.)

DALTO'NIAN. An absurd name given to one who cannot distinguish colours; because the celebrated chemist Dalton had the defect. See Achromatopsia.

DALTONISM, Achromatopsia,

DAMSON, Prunum Damascenum—d. Mountain, Quassia simarouba—d. Tree, Prunus domestica.

DANCING, *Salta'tio,* (F.) *Danse.* A kind of exercise and amusement, composed of a succession of motions, gestures, and attitudes, executed by measured steps to the sound of the

voice or musical instrument. It is a healthy exercise.

DANDELION, Leontodon taraxacum.

DANDRIFF, Pityriasis.

DANDRUFF, Pityriasis.

DANDY, Dengue.

DANEVERT, MINERAL WATERS OF. A spring, a league and a half from Upsal, in Sweden. The waters contain carbonic acid, holding in solution carbonate of iron, sulphate of iron, sulphates of soda and lime, chloride of sodium, and silica. It is frequently employed in medicine.

DANEWORT, Sambucus ebulus.

DANICH; an Arabic word, signifying the weight of 8 grains.

DANSE, Dancing—*d. de St. Guy*, Chorea—*d. de St. Witt*, Chorea.

DAPHNE, Laurus.

DAPHNE ALPI'NA, *Chamæle'a*, *Chamælæ'a*, *Widow wail. Family*, Thymelææ. *Sex. Syst.* Octandria Monogynia. A sort of dwarf-olive. An acrid, volatile, alkaline principle has been separated from the bark of this plant by M. Vauquelin, to which he has given the name *Daphnine*. The plants of this genus owe their vesicating property to this principle.

DAPHNÉ BOISGENTIL, Daphne mezereum—d. Flax-leaved, Daphne gnidium—*d. Garou*, Daphne gnidium.

DAPHNE GNID'IUM, *Thymelæ'a*, *Cneo'ron*, *Spurge Flax*, *Flax-leaved Daphnē*. The plant which furnishes the *Garou Bark*. (F.) *Daphné Garou*, *Sain-bois*. It is chiefly used, when used at all, for exciting irritation of the skin. The *Grana Gnid'ia*, (see *Cnid'ia grana*,) are acrid poisons, like all the plants of this genus, when taken in quantity. According to others, the garou bark and grana gnidia are obtained from the *daphne laureola*.

DAPHNE LAUREOLA. The systematic name of the *Spurge Laurel*, *Laureola*. The bark of this plant has similar properties to the last.

DAPHNE MEZE'REUM. The systematic name of the *Meze'reon*, *Meze'reum*, *Spurge olive*. (F.) *Daphné Boisgentil*. The bark of the mezereon, *Mezereum*, (Ph. U. S.) possesses analogous properties to the other varieties of Daphne. It is considered stimulant and diaphoretic; and, in large doses, is emetic. It has been employed in syphilitic cases, but its efficacy is doubtful. Soaked in vinegar,—like the other varieties of Daphne, it has been employed to irritate the skin, especially to keep issues open.

DAPHNELÆ'ON, *O'leum Lauri'num*, from δαφνη, 'the laurel or bay tree,' and ελαιον, 'oil.' *Oil of Bay*.

DAPHNINE, see Daphne Alpina.

DARSENI, Laurus cinnamomum.

DARSINI, Laurus cinnamomum.

DARSIS, from δερω, 'I excoriate,' 'I skin.' The Greek physicians seemed to have used this word to designate the anatomical preparation, which consists in removing the skin for exposing the organs covered by it.

DARTA, Impetigo.

DARTOS. Same derivation; *Membra'na carno'sa*, *Tu'nica muscula'ris*, *T. rubicun'da scroti*, *Marsu'pium muscula'sum*; from δαρτος, 'skinned.' A name, given to the second covering of the testicle, which the ancient anatomists conceived to be muscular, but which is merely cellular. Its external surface is towards the scrotum; the internal, towards the tunica vaginalis. Frederick Lobstein and Breschet consider, that it proceeds from an expansion of the cellular cord, known by the name, *Gubernaculum Testis*.

DARTRE, Herpes, Impetigo—*d. Crustacée*, Ecthyma Impetigo—*d. Crustacée flavescente*, Porrigo lupinosa—*d. Écailleuse*, Psoriasis—*d. Fongueuse*, Ecthyma—*d. Furfuracée arrondie*, Lepra, Lepra vulgaris—*d. Furfuracée volante*, Lichen, Pityriasis—*d. Phlycténoïde*, Herpes phlyctænoides—*d. Pustuleuse couperose*, Gutta rosea—*d. Pustuleuse disseminée*, Acne—*d. Pustuleuse mentagra*, Sycosis—*d. Rongeante*, Herpes exedens—*d. Squammeuse humide*, Eczema—*d. Squameuse lichénoïde*, Psoriasis—*d. Vive*, Eczema.

DARTREUX (F.), *Herpet'ic*. Participating in the characters of *Dartre* or *Herpes*. Also, one affected with dartre. *Dartre* has been used, at one time or other, for almost every disease of the skin.—See Herpes.

DASYM'MA, from δασυς, 'rough,' 'hairy.' A disease of the eye—the same as Trachoma, but less in degree.—Aëtius, Gorræus.

DAS'YTES. Same etymon. Roughness, particularly of the tongue and voice.

DATE, *Pal'mula*, *Dac'tylus*, *Bal'anos*, *Phœ'nicos*, the fruit of the *Phœnix Dactylif'era*, (F.) *Datte*. The unripe date is astringent. When ripe it resembles the fig. The juice of the tree is refrigerant.

DATE PLUM, INDIAN, Diospyrus lotus.

DATTA, Date.

DATURA, Daturine.

DATU'RA STRAMO'NIUM, *Stramo'nium*, *Barycoc'colon*, *Sola'num mani'acum*, *Stramo'nium spino'sum*, *Solanum fœ'tidum*, *Stramo'nium majus album*, *Thorn Apple*, *James-town Weed*, *Jimston Weed*, *Stinkweed*, (F.) *Stramoine*, *Pomme épineuse*. The herbaceous part of the plant and the seeds are the parts used in medicine. They are narcotic and poisonous;—are given internally as narcotics and antispasmodics, and applied externally as sedatives, in the form of fomentation. The seeds are smoked like tobacco, in asthma. The dose of the powder, is gr. j to gr. viii.

DA'TURINE, *Daturi'na*, *Datu'ria*, *Datu'rium*. The active principle of the *Datura Stramonium*, separated by Brandes, a German chemist. It has not been rendered available in medicine.

DATURIUM, Daturine.

DAUCITES VINUM. Wine, of which the *Daucus* or *Wild Carrot* was an ingredient. The seeds were steeped in must. It was formerly used in coughs, convulsions, hypochondriasis, diseases of the uterus, &c.

DAUCUS CARO'TA. The systematic name of the *Carrot Plant*; *Daucus*, *Daucus sylvestris*, *Pastina'ca sylvestris tenuifo'lia officinarum*, *Addrion*. *Order*, Umbelliferæ, (F.) *Carotte*. The root, and seed, *Carota*—(Ph. U. S.)—have been used in medicine. The root is sweet and mucilaginous; and the seeds have an aromatic odour, and moderately warm, pungent taste. The *root* has been used, as an emollient, to fetid and ill-conditioned sores. The *seeds* have been regarded as stomachic, carminative and diuretic; but they have little efficacy. The seeds of the *wild* plant are, by some, preferred to those of the *garden*.

Daucus Candianus, Athamanta cretensis—d. Creticus, Athamanta cretensis—d. Cyanopus, Pimpinella magna—d. Seprinius, Scandix cerefolium—d. Sylvestris, D. carota.

DAUPHINELLE, Delphinium staphisagria.

DAVIER, Dentagra.

DAWLISH, CLIMATE OF. A town in Devonshire, frequented by phthisical invalids during the winter. It is well protected from northerly winds, and also from the violence of the south-westerly gales. It offers, however, but a confined space.

DAX, MINERAL WATERS OF. Dax is a city two leagues from Bordeaux, where there are four springs, that are almost purely thermal; containing only a very small quantity of chloride of magnesium, and sulphate of soda and lime. Temperature 76° to 133° Fahrenheit.

DAYMARE, Incubus vigilantium.

DAY-SIGHT, Hemeralopia—d. Vision, Hemeralopia.

DAZZLING, *Caliga'tio*, (F.) *Éblouissement*. A momentary disturbance of sight, occasioned either by the sudden impression of too powerful a light, or by some internal cause; as plethora.

DEAF-DUMBNESS, Mutitas surdorum.

DEAFNESS, from Anglo-Saxon ðeax. *Surditas*, *Cophó'sis*, *Dysecoi'a*, *Dysecæ'a organ'ica*, *Baryecoia*, *Hardness of hearing*, *Hypocophó'sis*, *Subsur'ditas*, *Bradycoia*, (F.) *Surdité*, *Dureté de l'ouie*. Considerable diminution or total loss of hearing. It may be the effect of acute or chronic inflammation of the internal ear, paralysis of the auditory nerve or its pulpy extremity, or of some mechanical obstruction to the sonorous rays. In most cases, however, the cause of the deafness is not appreciable, and the treatment has to be purely empirical. Syringing the ear, dropping in slightly stimulating oils, fumigations, &c., are the most likely means to afford relief.

Deafness, Taylor's Remedy for, see Allium.

DEAMBULATIO, Walking.

DEARTICULATIO, Diarthrosis.

DEASCIATIO, Aposceparnismus.

DEATH, (Sax. ðeaþ,) *Apobio'sis*, *Le'thum*, *Le'tum*, *Mors*, *Inter'itus*, *Than'atos*, *Death*, (F.) *Mort*. Definitive cessation of all the functions, the aggregate of which constitute life. *Real Death*, *Apothana'sia*, is distinguished from asphyxia or *apparent death*:—the latter being merely a suspension of those same functions. But it is often difficult to judge of such suspension, and the only certain sign of real death is the commencement of putrefaction. At times, therefore, great caution is requisite to avoid mistakes. Death is commonly preceded by some distressing symptoms, which depend on lesion of respiration, circulation, or of the cerebral function, and which constitute the *agony*. That which occurs suddenly, and without any, or with few, precursory signs, is called *sudden death*. It is ordinarily caused by disease of the heart; apoplexy; the rupture of an aneurism, or by some other organic affection. Death is *natural*, when it occurs as the result of disease: *violent*, when produced by some forcible agency. It may likewise affect the whole body, or a part only; hence the difference between *somatic* and *molecular* death.

All sudden deaths must begin by the interruption of circulation, of the action of the brain, or of respiration. One of these functions stops first; and the others terminate successively;—the series of phenomena ceasing nearly as follows.

Death beginning in the Heart.

1. Impulse received by the brain.
2. Action of the brain.
3. Action of the voluntary muscles.
4. Action of the mixed muscles.
5. The mechanical phenomena of respiration.
6. The chymical phenomena of respiration.
7. The phenomena of nutrition.

Death beginning in the Brain.

1. Interruption of the brain's action.
2. That of voluntary or mixed muscles.
3. Mechanical phenomena of respiration.
4. Chymical phenomena of respiration.
5. Cessation of heart's action.
6. Cessation of general circulation.
7. Functions of nutrition.

Death beginning in the Lungs.

I. *When the Mechanical Phenomena are interrupted, as in Suffocation.*

1. Mechanical phenomena.
2. Chymical phenomena.
3. Action of the brain.
4. Extinction of animal life.
5. Cessation of the general circulation.
6. Of the functions of nutrition.

II. *When the Chymical Phenomena are interrupted.*

1. Interruption of chymical phenomena.
2. Action of the heart.
3. Action of the brain.
4. Sensation, locomotion, voice, and mechanical phenomena of respiration.
5. Functions of nutrition, generally.

Death, Apparent, Asphyxia.

Death, Black. The plague of the 14th century was so called, which is supposed to have proved fatal in Europe to 25,000,000 of people.—Hecker.

Death of Man, Cicuta maculata.

DEBILITANTS, *Debilitan'tia*, from *debilitare*, itself from *debilis*, quasi *dehabilis*, 'weak,' 'to weaken.' Remedies exhibited for the purpose of reducing excitement. Antiphlogistics are hence, debilitants.

DEBILITAS ERETHISICA, see Irritable—d. Nervosa, Neurasthenia—d. Nervosa, see Irritable—d. Visûs, Asthenopia.

DEBILITY, *Debil'itas*, *Asthenî'a*, *Blaci'a*. Weakness, (F.) *Faiblesse*. A condition, which may be induced by a number of causes. It must not be confounded with *fatigue*, which is temporary, whilst debility is generally more permanent.

Debility may be *real*, or it may be *apparent*; and, in the management of disease, it is important to attend to this. At the commencement of fever, for example, there is often a degree of apparent debility, which prevents the use of appropriate means, and is the cause of much evil. Excitement is more dangerous than debility.

DÉBOITEMENT, Luxation.

DÉBORDEMENT (F.), from *déborder*, (*de* and *border*,) 'to overflow.' A popular term for one or more sudden and copious evacuations from the bowels. It is chiefly applied to bilious evacuations of this kind—*Débordement de Bile*.

DÉBRIDEMENT (F.) *Frænó'rum solu'tio*, from (F.) *débrider*, (*de* and *brider*,) 'to unbridle.' The removal of filaments, &c., in a wound or abscess, which prevent the discharge of pus. In a more general acceptation, it means the cutting of a soft, membranous or aponeurotic part,

which interferes with the exercise of any organ whatever: thus, in paraphymosis, *débridement* of the prepuce is practised to put an end to the inflammation of the glans: in strangulated hernia, *débridement* of the abdominal ring is had recourse to, to remove the stricture of the intestine, &c.

DEC'AGRAMME, from δεκα, 'ten,' and γραμμα, 'a gramme.' The weight of ten grammes, 154.44 grains Troy.

DECAMYRON, from δεκα, 'ten,' and μυρον, 'ointment.' An ancient cataplasm, composed of *malabathrum, mastich, euphorbium, spikenard, styrax calamita, carbonate of lime, common pepper, unguentum nardi, opobalsamum*, and *wax*.

DECANTA'TION, *Decanta'tio, Defu'sio, Elutria'tio, Metangismos, Catach'ysis*. A pharmaceutical operation, which consists in pouring off, gently, by inclining the vessel, any fluid, which has left a deposit.

DECARBONIZATION, Hæmatosis.

DECESSIO, Ecpiesma.

DÉCHARNÉ, Demusculatus.

DÉCHAUSSEMENT (F.) (*de* and *chausser*.) The state, in which the gums have fallen away from the teeth, as in those affected by mercury, in old persons, &c. Also, the operation of lancing the gums. See Gum lancet.

DÉCHAUSSOIR, Gum lancet.

DÉCHIREMENT, Laceration.

DÉCHIRURE, Wound, lacerated.

DECID'UA MEMBRA'NA, *Decid'ua*, from *decidere*, 'to fall off,' (*de*, and *cado*.) The outermost membrane of the fœtus in utero. Chaussier calls it *Epicho'rion*: by others, it has been called *Membra'na cadu'ca Hunte'ri, M. flocculen'ta, M. cellulo'sa, M. sinuo'sa, M. commu'nis, M. præexis'tans, Decidua externa, Tu'nica exterior ovi, T. cadu'ca, T. crassa, Membra'na cribro'sa, Membra'na ovi mater'na, M. muco'sa, Decidua spongio'sa, Epione, Perione, Membra'na u'teri inter'na evolu'ta, Nidamen'tum, Anhis'tous membrane, Cho'rion spongio'sum, C. tomento'sum, fungo'sum, recticula'tum*, &c. *Tu'nica filamento'sa*, (F.) *Membrane caduque, Shaggy Chorion, Spongy Chorion*, &c. Great diversity has prevailed, regarding this membrane and its reflected portion. It has been conceived by some that it exists before the germ arrives in the uterus,—as it has been met with in tubal and ovarial pregnancies; and that it is occasioned by a new action, assumed by the uterine vessels at the moment of conception. Chaussier, Lobstein, Gardien, Velpeau and others consider the decidua to be a sac, completely lining the uterus, and without apertures, and that when the ovum descends through the tube, it pushes the decidua before it, and becomes enveloped in it, except in the part destined to form the placenta. That portion of the membrane, which covers the ovum, forms the *Membra'na decid'ua reflex'a*, (F.) *M. caduque réfléchie*, according to them;—the part lining the uterus being the *Decidua U'teri*. Towards the end of the fourth month, the decidua reflexa disappears. The very existence of a *Tunica decidua reflexa* has, however, been denied. This membrane has received various names. Dr. Granville, regarding it as the external membrane of the ovum, has termed it *Cortex ovi*, (q. v.) It has also been termed *Involucrum membrana'ceum, Membra'na retifor'mis cho'rii, Membra'na filamento'sa, M. adventitia* and *M. crassa, Ovuline* and *Decidua protrusa*. The decidua becomes thinner and thinner, until the end of gestation. Its use seems to be, to fix the ovum to the uterus, and to fulfil some important purposes in the nutrition of the fœtus. To the membrane which, according to Bojanus, is situate between the placenta and the uterus, and which he considers to be produced at a later period than the decidua vera, he gives the name *membra'na decid'ua seroti'na*.

DECIDUA PROTRUSA, Decidua reflexa.

DEC''IGRAMME, *Decigram'ma*, from *decimus*, 'the tenth part,' and γραμμα, 'gramme.' The tenth part of the gramme in weight: equal to a little less than two grains, French; 1.544 Troy.

DECIMA'NA FEBRIS, from *decem*, 'ten.' An intermittent, whose paroxysms return every 10th day or every 9 days. It is supposititious.

DECLAMA'TION, *Déclama'tio*, from *de*, and *clamare*, 'to cry out.' The art of depicting the sentiments, by inflections of the voice, accompanied with gestures, which render the meaning of the speaker more evident, and infuse into the minds of the auditors the emotions with which he is impressed. Declamation may become the cause of disease: the modification, produced in the pulmonary circulation,—accompanied by the great excitement, sometimes experienced,—is the cause of many morbid affections: particularly of pneumonia, hæmoptysis, and apoplexy. In moderation, it gives a healthy excitement to the frame.

DÉCLIN, Decline.

DECLINE, *Declina'tio, Inclina'tio, Decremen'tum, Remis'sio, Paracmē*, (F.) *Déclin*, from *de*, and *clinare*, 'to bend.' That period of a disorder or paroxysm, at which the symptoms begin to abate in violence. We speak, also, of the decline of life, or of the powers, (F.) *Déclin de l'age, L'age de déclin*, when the physical and moral faculties lose a little of their activity and energy. See Phthisis and Tabes.

DÉCLIVE, (F.) *Decli'vis*, from *de*, 'from,' and *clivus*, 'declivity.' Inclining downwards. This epithet is applied to the most depending part of a tumour or abscess.

DECOC'TION, *Decoc'tio*, from *decoquere*, 'to boil:' (*de* and *coquere*,) *Epse'sis, Aphepsis*, χυλος, *Chylus*. The operation of boiling certain ingredients in a fluid, for the purpose of extracting the parts soluble at that temperature. Decoction, likewise, means the product of this operation, to which the terms *Decoctum, Zema, Aphepse'ma, Ap'ozem*, and *Epse'ma*, have been applied according to ancient custom, in order to avoid any confusion between the operation and its product;—as *præparatio* is used for the act of preparing; *præparatum*, for the thing prepared.

DECOCTION OF ALOES, COMPOUND, Decoctum aloes compositum—d. of Bark, Decoctum cinchonæ—d. of Barley, Decoctum hordei—d. of Barley, compound, Decoctum hordei compositum—d. Bitter, Decoctum amarum—d. of Cabbage tree bark, Decoctum geoffrææ inermis—d. of Cassia, Decoctum cassiæ—d. of Chamomile, Decoctum anthemidis nobilis—d. of Cinchona, Decoctum cinchonæ—d. of Cinchona, compound laxative, Decoctum kinæ kinæ compositum et laxans—d. of Colomba, compound, Decoctum Calumbæ compositum—d. of Dandelion,

Decoctum Taraxaci—d. of Dogwood, Decoctum Cornûs Floridæ—d. of Elm bark, Decoctum ulmi—d. of Foxglove, Decoctum digitalis—*d. de Gayac composée*, &c., Decoctum de Guyaco compositum—d. of Guaiacum, compound, Decoctum Guaiaci compositum—d. of Guaiacum, compound purgative, Decoctum de Guyaco compositum—d. of Hartshorn, burnt, Mistura cornu usti—d. of Hellebore, white, Decoctum veratri—d. of Iceland Moss, Decoctum Cetrariæ—d. of Liverwort, Decoctum lichenis—d. of Logwood, Decoctum Hæmatoxyli—d. of Marshmallows, Decoctum althææ—*d. de Mauve composée*, Decoctum malvæ compositum—d. of Oak bark, Decoctum quercûs—*d. d'Orge*, Decoctum hordei—*d. d'Orge composée*, Decoctum hordei compositum—d. of Pipsissewa, Decoctum chimaphilæ—d. of Poppy, Decoctum papaveris—d. of Quince seeds, Decoctum cydoniæ—*d. de Quinquina composée et laxative*, Decoctum kinæ kinæ compositum et laxans—*d. de Salsapareille composée*, Decoctum sarsaparillæ compositum—d. of Sarsaparilla, Decoctum sarsaparillæ—d. of Sarsaparilla, compound, Decoctum sarsaparillæ compositum—d. of Sarsaparilla, false, Decoctum Araliæ nudicaulis—d. of Squill, Decoctum scillæ—d. of Uva Ursi, Decoctum uvæ ursi—d. of the Woods, Decoctum Guaiaci compositum—d. of Woody nightshade, Decoctum dulcamaræ—d. of Zittmann, Decoctum Zittmanni.

DECOCTUM, Decoction—d. Album, Mistura cornu usti.

Decoctum Al'oes Compos'itum, *Balsam of Life, Compound Decoction of Aloes.* (*Ext. glyc.* ℥iv, *potass. subcarb.* ℈ij, *aloes spicat. ext.: myrrhæ* contrit.: *croci stigmat.* ää ℥j, *aquæ* Oj. Boil to f. ℥xij: strain, and add *tinct. card. c.* f. ℥iv. *Pharm. L.*) The gum and extractive are dissolved in this preparation. The alkali is added to take up a little of the resin. The tincture prevents it from spoiling. It is gently cathartic. Dose, f. ℥ss to ℥ij.

Decoctum Althæ'æ, *D. althææ officina'lis; Decoction of Marsh-mallows*, (F.) *Décoction de Guimauve.* (*Rad. althææ* sicc. ℥iv. *uvar passar* ℥ij, *aquæ*, Ovij. Boil to Ov. Pour off the clear liquor. *Pharm. E.*) It is used as a demulcent.

Decoctum Ama'rum; *Bitter Decoction.* (*Rad. gent.* ℥j, *aquæ* Oijss. Boil for a quarter of an hour; add *species amaræ* ℥ij. Infuse for two hours and filter, without expressing. *Pharm. P.*) It is tonic. Dose, f. ℥ss to ℥ij.

Decoctum Anthem'idis Nob'ilis, *D. Chamæme'li; Decoction of Cham'omile.* (*Flor. anthemid. nobil.* ℥j, *sem. carui* ℥iv, *aquæ* Ov. Boil for fifteen minutes and strain. *Pharm. E.*) It contains bitter extractive and essential oil, dissolved in water. It is used, occasionally, as a vehicle for tonic powders, pills, &c., and in fomentations and glysters; but for the last purpose, warm water is equally efficacious. The Dublin college has a compound decoction.

Decoctum Ara'liæ Nudicau'lis; *Decoction of False Sarsaparil'la.* (*Araliæ nudicaul.* ℥vj, *aquæ* Oviij. Digest for four hours, and then boil to four pints: press out and strain the decoction. Former *Ph. U. S.*) It is used as a stomachic, but it is an unnecessary and laborious preparation.

Decoctum Cassiæ; *Decoction of Cassia.* (*Cassiæ pulp.* ℥ij, *aquæ* Oij. Boil for a few minutes, filter without expression, and add *syrup. violar.* ℥j, or *mannæ pur.* ℥ij. *Pharm. P.*) It is laxative, in the dose of ℥vj.

Decoctum Cetra'riæ, *Decoction of Iceland Moss.* (*Cetrar.* ℥ss, *aquæ* Oiss. Boil to a pint, and strain with compression. *Pharm. U. S.*) Dose, f. ℥iv, to Oss and more.

Decoctum Chamæmeli, Decoctum Anthemidis nobilis.

Decoctum Chimaph'ilæ, *Decoction of Pipsissewa.* (*Chimaph. contus.* ℥j. *aquæ* Oiss. Boil to a pint, and strain. *Pharm. U. S.*) Dose, f. ℥iss.

Decoctum Cincho'næ, *Decoctum Cinchonæ lancifoliæ, D. Cor'ticis Cinchonæ; Decoction of Cinchona, D. of Bark, Decoctum Kinæ Kinæ.* (*Cinchon. cort.* contus. ℥j, *aquæ* Oj. Boil for ten minutes, in a slightly covered vessel, and strain while hot. *Pharm. U. S.*) It contains cinchonia and resinous extractive, dissolved in water. Long coction oxygenates and precipitates the extractive. It can be given where the powder does not sit easy, &c. Dose, f. ℥j to ℥iv.

Decoctum Colom'bæ Compos'itum; *Compound Decoction of Colomba.* (*Colomb.* contus. *quassiæ*, ää ℥ij. *cort. aurant.* ℥j, *rhej* pulv. ℈j, *potassæ carbonat.* ℥ss, *aquæ* ℥xx. Boil to a pint, and add *tinct. lavand.* f. ℥ss. Former *Ph. U. S.*) Given as a tonic, but not worthy of an officinal station.

Decoctum Commune pro Clystere, D. malvæ compositum—d. Cornu cervini, Mistura cornu usti.

Decoctum Cornûs Flor'idæ, *Decoction of Dogwood.* (*Cornûs Florid.* cont. ℥j, *aquæ* Oj. Boil for ten minutes in a covered vessel, and strain while hot. *Pharm. U. S.*) Dose, f. ℥iss.

Decoctum Cydo'niæ, *Mucila'go Sem'inis Cydo'nii Mali, M. Sem'inum Cydonia'rum; Decoction* or *Mu'cilage of Quince seeds.* (*Cydoniæ sem.* ℥ij. *aquæ* Oj. Boil for ten minutes over a gentle fire, and strain. *Pharm. L.*) It is merely a solution of mucilage in water, and is used as a demulcent.

Decoctum Daphnes Meze'rei, *Decoctum Meze'rei; Decoction of Mezereon.* (*Cort. rad. daphn. mezerei*, ℥ij, *rad. glycyrrh.* cont. ℥ss, *aquæ* Oiij. Boil over a gentle fire to Oij, and strain.) The acrimony of the mezereon and the saccharine mucilage of the liquorice root are imparted to the water. It is somewhat stimulant, and has been used in secondary syphilis; but is devoid of power. Dose, f. ℥iij to ℥vj.

Decoctum Diaphoreticum, D. Guaiaci compositum—d. pro Enemate, D. malvæ compositum.

Decoctum Digita'lis, *Decoction of Foxglove.* (*Fol. digit.* sicc. ℥j, *aquæ* q. s. ut colentur f. ℥viij. Let the liquor begin to boil over a slow fire, and then remove it. Digest for fifteen minutes, and strain. *Pharm. D.*) It possesses the properties of the plant. Dose, f. ℥ij to ℥iij.

Decoctum Dulcama'ræ; *Decoction of Woody Nightshade.* (*Dulcamaræ* cont. ℥j. *aquæ* Oiss. Boil to Oj, and strain. *Pharm. U. S.*) This decoction has been considered diuretic and diaphoretic, and has been administered extensively in skin diseases. It is probably devoid of efficacy.

Decoctum pro Fomento, D. papaveris.

Decoctum Geoffræ'æ Inermis; *Decoction of Cabbage-Tree Bark.* (*Cort. geoffr. inermis* in pulv. ℥j. *aquæ* Oij. Boil over a slow fire to a pint, and strain. *Pharm. E.*) It is possessed of anthelmintic, purgative, and narcotic proper-

ties, and has been chiefly used for the first of these purposes. Dose, to children, f. ʒij—to adults, f. ʒss to ʒij.

Decoctum Guaiaci Compositum, *D. Guaiaci officinalis compositum, Decoctum Lignorum, D. de Guyaco compositum, D. sudorificum. D. diaphoreticum; Compound decoction of Guaiacum, Decoction of the Woods.* (*Lign. guaiac.* rasur. ʒiij, *fruct. sicc. vitis vinifer.* ʒij, *rad. lauri sassafr.* concis., *rad. glycyrrh.* āā ʒj, *aquæ* Ox. Boil the guaiacum and raisins over a slow fire to Ov; adding the roots towards the end, then strain. *Pharm. E.*) It is possessed of stimulant properties, and has been given in syphilitic, cutaneous, and rheumatic affections. The resin of the guaiacum is, however, insoluble in water, so that the guaiac wood in it cannot be supposed to possess much, if any, effect. The Parisian Codex has a

Decoctum de Guyaco Compositum et Purgans, (F.) *Décoction de Gayac Composée et purgative; Compound purgative Decoction of Guaiacum.* (*Lign. guaiac.* rasp., *rad. sarsap.* āā ʒj, *potass. carbonat.* gr. xxv. Macerate for twelve hours, agitating occasionally, in *water* Oiv, until there remain Oiij. Then infuse in it *fol. sennæ* ʒij, *rhej.* ʒj, *lign. sassafr., glycyrrh. rad.* āā ʒij, *sem. coriand.* ʒj. Strain gently, suffer it to settle, and pour off the clear supernatant liquor.) The title sufficiently indicates the properties of the composition.

Decoctum Hæmatoxyli, *Decoction of Logwood.* (*Hæmatoxyl.* rasur. ʒj, *aquæ* Oij. Boil to a pint, and strain. *Pharm. U. S.*)

Decoctum Hellebori Albi, D. veratri—d. Kinæ kinæ, D. Cinchonæ.

Decoctum Hordei, *Decoctum Hordei Distichi, Ptisana Hippocratica, Tipsaria* or *Tapsaria, Aqua Hordeata, Barley Water, Decoction of Barley.* (F.) *Décoction d'Orge, Tisane Commune.* (*Hord.* ʒij, *Aquæ* Oivss. Wash the barley well, boil for a few minutes in *water* Oss: strain this, and throw it away, and add the remainder, boiling. Boil to Oij, and strain. *Pharm. L.*) It is nutritive and demulcent, and is chiefly used as a common drink, and in glysters.

Decoctum Hordei Compositum, *Decoctum pectorale, Ptisana communis; Compound Decoction of Barley,* (F.) *Décoction d'Orge composée.* (*Decoct. hord.* Oij, *caricæ fruct.* concis. ʒij, *glycyrrh. rad.* concis. et contus. ʒss, *uvarum pass.* demptis acinis. ʒij, *aquæ* Oj. Boil to Oij, and strain. *Pharm. L.*) It has similar properties to the last.

Decoctum Kinæ Kinæ Compositum et Laxans, *Décoction de quinquina composée et laxative; Compound laxative decoction of Cinchona.* (*Cort. cinchon.* ʒj, *aquæ* Oij. Boil for a quarter of an hour, remove it from the fire; then infuse in it for half an hour, *fol. sennæ, sodæ sulph.* āā ʒij, add *syrup. de sennâ* f. ʒj.) Its title indicates its properties.

Decoctum Lichenis, *Decoctum Lichenis Islandici; Decoction of Liverwort.* (*Lichen* ʒj, *aquæ* Oiss. Boil to a pint, and strain. *Pharm. L.*) It consists of bitter extractive and fecula, dissolved in water, and its operation is tonic and demulcent. Dose, f. ʒj to ʒiv. It is also nutrient, but hardly worthy of the rank of an officinal preparation.

Decoctum Lignorum, D. Guaiaci compositum.

Decoctum Malvæ Compositum, *Decoctum pro enemate, Decoctum communē pro clystērē; Compound Decoction of Mallow,* (F.) *Décoction de Mauve composée.* (*Malvæ exsicc.* ʒj, *anthemid. flor. exsicc.* ʒss, *aquæ* Oj. Boil for fifteen minutes, and strain.) It consists of bitter extractive, and mucilage in water, and is chiefly used for clysters and fomentations. It is unworthy a place in the pharmacopœias.

Decoctum Mezerei, D. daphnis mezerei—d. Pectorale, D. hordei compositum.

Decoctum Papaveris, *Decoctum pro Fomento, Fotus communis; Decoction of Poppy.* (*Papav. somnif. capsul.* concis. ʒiv, *aquæ* Oiv. Boil for fifteen minutes, and strain. *Pharm. L.*) It contains the narcotic principle of the poppy, and mucilage in water: is anodyne and emollient, and employed as such in fomentation, in painful swellings, ulcers, &c.

Decoctum Polygalæ Senegæ, D. senegæ.

Decoctum Quercûs Albæ, *D. Quercûs Roboris; Decoction of White Oak Bark.* (*Quercûs cort.* ʒj. *aquæ* Oiss. Boil to a pint, and strain. *Pharm. U. S.*) It is astringent, and used as such, in injections, in leucorrhœa, uterine hemorrhage, &c., as well as in the form of fomentation to unhealthy ulcers.

Decoctum Sarsaparillæ, *D. Smilacis Sarsaparillæ; Decoction of Sarsaparilla.* (*Sarsaparill. rad.* concis. ʒiv, *aq. fervent.* Oiv. Macerate for four hours, near the fire, in a lightly covered vessel: then bruise the root; macerate again for two hours; then boil to Oij, and strain. *Pharm. L.*) It contains bitter extractive, and mucilage in water; is demulcent, and has been used, although it is doubtful with what efficacy, in the sequelæ of syphilis. Dose, f. ʒiv. to Oss.

Decoctum Sarsaparillæ Compositum; *Compound Decoction of Sarsaparilla,* (F.) *Décoction de Salsapareille Composée.* (*Sarsaparill.* concis. et contus. ʒvj. *Sassafr. Cort.* concis., *Lign. Guaiac.* rasur.; *Rad. Glycyrrhiz.* contus. āā ʒj. *Mezerei*, concis. ʒiij; *Aquæ*, Oiv. Boil fifteen minutes, and strain. *Pharm. U. S.*) This is considered to be possessed of analogous properties to the celebrated *Lisbon Diet-Drink, Decoctum Lusitanicum*, which it resembles in composition.

Decoctum Scillæ; *Decoction of Squill.* (*Scillæ* ʒiij, *juniper* ʒiv, *senega snake-root* ʒiij, *water* Oiv. Boil till one half the liquor is consumed; strain, and add *spirit of nitrous ether* f. ʒiv. *Pharm. A.*) Dose, f. ʒss.

Decoctum Senegæ, *D. Polygalæ senegæ; Decoction of Senega.* (*Rad. seneg.* ʒj, *aquæ* Oiss. Boil to Oj. and strain. *Pharm. L.*) It is reputed to be diuretic, purgative, and stimulant, and has been given in dropsy, rheumatism, &c.

Decoctum Smilacis Sarsaparillæ, D. sarsaparillæ—d. Sudorificum, D. Guaiaci compositum.

Decoctum Taraxaci, *Decoction of Dandelion.* (*Taraxac.* contus. ʒij; *aquæ* Oij. Boil to a pint and strain. Ph. U. S.) Dose, f. ʒiss.

Decoctum Ulmi, *D. Ulmi Campestris; Decoction of Elm Bark.* (*Ulmi cort.* recent. cont. ʒiv, *aquæ* Oiv. Boil to Oij, and strain. *Pharm. L.*) It is a reputed diuretic; and has been used in lepra and herpes; but, probably, has no efficacy. Dose, f. ʒiv. to Oss.

Decoctum Uvæ Ursi, *Decoction of uva ursi,* (*Uvæ ursi*, ʒj, *aquæ* f. ʒxx. Boil to a pint and strain.—Ph. U. S.) Dose, f. ʒiss.

Decoctum Veratri, *Decoctum Hellebori albi; Decoction of White Hellebore.* (*Veratri rad.* cont. ʒj, *aquæ* Oij, *spir. rect.* f. ʒij. Boil the watery

decoction to Oj; and, when it is cold, add the spirit. *Pharm. L.)* It is stimulant, acrid, and cathartic; but is used only externally. It is a useful wash in *tinea capitis*, *psora*, &c. Should it excite intense pain on being applied, it must be diluted.

DECOC'TUM ZITTMAN'NI, *Zittmann's Decoction.* A most absurd farrago, extolled by Theden in venereal diseases, the formula for which, according to Jourdan, "some blockheads have lately reproduced among us as a novelty." It is composed of *Sarsaparilla*, *pulvis stypticus*, *calomel* and *cinnabar*, boiled in *water* with *aniseed*, *fennel seed*, and *liquorice root*. A *stronger* and a *weaker* decoction were directed by Zittmann. Formulæ for its preparation are contained in Jourdan's Pharmacopœia Universalis; and in Lincke's Vollständiges Recept—Taschenbuch Leipz., 1841.

DÉCOLLEMENT, (F.) *Deglutina'tio*, *Reglutina'tio*, (from *de* and *coller*, 'to glue.') The state of an organ that is separated from the surrounding parts, owing to destruction of the cellular membrane which united them. The skin is *decollée*; i. e. separated from the subjacent parts, by a burn, subcutaneous abscess, &c.

DÉCOLLEMENT DU PLACENTA is the separation or detachment of the whole, or a part of the placenta from the inner surface of the uterus. *Décollement*, from *de*, 'from,' and *collum*, 'the neck,' *obtrunca'tio*, also means the separation of the head of the fœtus from the trunk, the latter remaining in the uterus.

DECOLORA'TION, *Decolora'tio*, *Discolora'tio*, from *de*, 'from,' and *colorare*, 'to colour.' Loss of the natural colour.

DÉCOMPOSÉE, (F.) from *de*, 'from,' and *componere*, 'to compose.' *Decompo'sed*, *Dissolu'tus*. An epithet, applied to the face, when extensively changed in its expression and colour; as in the moribund.

DECORTICA'TION, from *de*, 'from,' and *cortex*, 'bark.' An operation, which consists in separating the bark from roots, stalks, &c.

DECOS'TIS, *Apleu'ros*, from *de*, priv., and *costa*, 'a rib.' One who has no ribs.

DECREMENTUM, Decline.

DECREPI'TUDE, *Decrepitu'do*, *Ætas decrep'ita*, *Ultima senec'tus*, from *decrep'itus*, (*de*, and *crepare*, 'to creak,') 'very old.' The last period of old age, and of human life; which ordinarily occurs about the eightieth year. It may, however, be accelerated or protracted. Its character consists in the progressive series of phenomena, which announce the approaching extinction of life.

DECU'BITUS, from *decumbere*, (*de*, and *cumbere*, 'to lie,') 'to lie down.' Lying down. Assuming the horizontal posture. (F.) *Coucher. Horâ decubitûs*, 'at bed time.' The French say—*Decubitus horizontal, sur le dos, sur le coté*, for, lying in the horizontal posture, on the back or side.

DECURTA'TUS, μειουρος, or μειουριζων, from *de*, and *curtus*, 'short,' 'shortened, curtailed,' 'running to a point.' When applied to the pulse, it signifies a progressive diminution in the strength of the arterial pulsations, which, at last, cease. If the pulsations return and gradually acquire all their strength, it is called *Pulsus decurta'tus recip'rocus*.—Galen.

DECUSSA'TION, *Decussa'tio*, *Chias'mos*, *Incrucia tio*, *Intersec'tio*, *Intricatu'ra*, from *decussis*, (that is, *decem asses*;) also, the figure of the letter X. Union in the shape of an X or cross. Anatomists use this term chiefly in the case of the nerves,—as for the *decussation of the optic nerves*, which cross each other within the cranium.

DECUSSO'RIUM, from *decutio*, (*de* and *quatio*,) 'I shake down.' An instrument used, by the ancients, for depressing the dura matter, and facilitating the exit of substances, effused on or under that membrane. It is described by Scultetus, Paré, &c. See Meningophylax.

DÉDAIGNEUR, Rectus superior oculi.

DEDOLA'TION, from *dedolare*, (*de*, and *dolare*,) 'to cut and hew with an axe.' This word has been used by surgeons to express the action by which a cutting instrument divides obliquely any part of the body, and produces a wound with loss of substance. It is commonly on the head, that wounds by dedolation are observed. When there was a complete separation of a portion of the bone of the cranium, the ancients called it *Aposceparnis'mos*.

DEERBERRY, Gaultheria.

DEERFOOD, Brasenia hydropeltis.

DÉFAILLANCE, Syncope.

DEFECA'TION, *Defeca'tio*, from *de*, and *fæces*, 'excrements.' The act, by which the excrement is extruded from the body. *Cacá'tio*, *Excre'tio alvi*, *E. alvi'na*, *E. fæcum alvina'rum*, *Dejectio alvi*, *Secessio*, *Expulsio* vel *Ejectio fæcum*. The fæces generally accumulate in the colon, being prevented by the annulus at the top of the rectum from descending freely into that intestine. In producing evacuations in obstinate constipation, it is well, therefore, by means of a long tube, to throw the injection up into the colon, as suggested by Dr. O'Beirne.

In *Pharmacy*, defecation means the separation of any substance from a liquid in which it may be suspended. See Clarification.

DEFECTIO ANIMI, Syncope.

DEFENSI'VUM, from *defendere*, (*de*, and *fendere*,) 'to defend.' A preservative or defence. The old surgeons gave this name to different local applications, made to diseased parts, for the purpose of guarding them from the impression of extraneous bodies, and particularly from the contact of air.

DEFE'RENS, from *defero*, (*de*, and *ferre*,) 'I bear away,' 'I transport.'

DEFERENS, VAS, or *ductus deferens*, (F.) *Conduit spermatique*, *Conduit déférent*, is the excretory canal of the sperm, which arises from the epididymis, describes numerous convolutions, and with the vessels and nerves of the testicle concurs in the formation of the spermatic chord, enters the abdominal ring and terminates in the ejaculatory duct.

DEFLECTENS, Derivative.

DEFLECTIO, Derivation.

DEFLORATION, Stuprum.

DEFLORA'TION, *Deflora'tio*, *Devirgina'tio*, from *deflorescere*, (*de*, and *florescere*,) 'to shed flowers.' The act of depriving a female of her virginity. Inspection of the parts is the chief criterion of defloration having been forcibly accomplished; yet inquiry must be made, whether the injury may not have been caused by another body than the male organ. *Recent defloration* is infinitely more easy of detection than where some time has elapsed.

DEFLUXIO, Catarrh, Diarrhœa.

DEFLUX'ION, *Defluxio*, *Defluxus*, *Catar'-*

rhysis, Catar'rhus. A falling down of humours from a superior to an inferior part. It is sometimes used synonymously with inflammation.

DEFLUXUS DYSENTERICUS, Dysentery.

DEFORMA'TION, *Deforma'tio, Cacomor'phia, Deform'itas, Disfigura'tion, Deform'ity, Inform'itas,* (F.) *Difformité,* from *de,* and *forma.* Morbid alteration in the form of some part of the body, as of the head, pelvis, spine, &c. A deformity may be natural or accidental.

DEFRU'TUM, *Vin cuit,* from *defrutare,* 'to boil new wine.' Grape must, boiled down to one half and used as a sweetmeat.—Plin. Columell. Isidor. See Rob.

DEFUSIO, Decantation.

DEGENERATIO ADIPOSA CORDIS, Steatosis cordis.

DEGENERA'TION, *Notheu'sis, Nothi'a,* from *degener,* 'unlike one's ancestors,' (*de,* and *genus,* 'family,') *Degen'eracy,* (F.) *Abatardissement.* A change for the worse in the intimate composition of the solids or fluids of the body. In pathological anatomy, *degeneration* means the change which occurs in the structure of an organ, when transformed into a matter essentially morbid; as a *cancerous,* or *tubercular,* degeneration.

Dégénérescence is, by the French pathologists, employed synonymously with Degeneration.

DÉGÉNÉRESCENCE, Degeneration.

DÉGÉNÉRESCENCE GRAISSEUSE DU FOIE, Adiposis hepatica—*d. Granulé du Rein,* Kidney, Bright's disease of the.

DEGLUTINATIO, *Decollement.*

DEGLUTITIO DIFFICI'LIS, Dysphagia—d. Impedita, Dysphagia—d. Læsa, Dysphagia.

DEGLUTITION, *Deglutit'io, Catap'osis,* from *de,* and *glutire,* 'to swallow.' The act, by which substances are passed from the mouth into the stomach, through the pharynx and œsophagus. It is one of a complicated character, and requires the aid of a considerable number of muscles; the first steps being voluntary, the remainder executed under spinal and involuntary nervous influence.

DEGMOS, *Morsus:* (F.) *Morsure,*—a bite in general, from δαχνω, 'I bite.' A gnawing sensation about the upper orifice of the stomach, which was once attributed to acrimony of the liquids, contained in that viscus.

DÉGORGEMENT, Disgorgement.

DÉGOUT, Disgust.

DEGREE', from *degré,* originally from *gradus,* 'a step.' Galen used this expression to indicate the qualities of certain drugs. Both he and his school admitted *cold, warm, moist,* and *dry* medicines, and four different degrees of each of those qualities. Thus, *Apium* was warm in the *first* degree, Agrimony in the *second,* Roche Alum in the *third,* and Garlic in the *fourth. Bedegar* was cold in the *first,* the flower of the Pomegranate in the *second,* the Sempervivum in the *third,* Opium in the *fourth,* &c. The French use the term *degré* to indicate, 1. The intensity of an affection: as a burn of the *first, second, third degree,* &c. 2. The particular stage of an incurable disease, as the *third degree* of phthisis, cancer of the stomach, &c.

DEGUSTA'TION, *Degusta'tio,* from *de,* and *gustare,* 'to taste.' *Gustation.* The appreciation of sapid qualities by the gustatory organs.

DEICTICOS, Index.

DEIRONCUS, Bronchocele.

DEJECTIO ALVI, Defecation—d. Alvina, Excrement

DEJECTION, from *dejicere, dejectum,* (*de,* and *jacere,*) 'to cast down,' *Dejectio, Subduc'tio, Hypagog̃, Hypochoré'sis.* The expulsion of the fæces. Also, a fæcal discharge:—generally, however, with *alvine* prefixed,—as an *alvine Dejection, Dejectio alvi'na, Ejec'tio, Eges'tio.*

DEJECTORIUM REMEDIUM, Cathartic.

DELACHRYMATIO, Epiphora.

DELACHRYMATIVUS, Apodacryticus.

DELAPSIO, Prolapsus.

DELAPSUS PALPEBRÆ, Blepharoptosis.

DELATIO, Indication.

DÉLAYANTS, Diluentia.

DELETE'RIOUS, *Pernicio'sus,* (F.) *Pernicieux,* from δηλεω, 'I injure.' That which produces destructive disorder in the exercise and harmony of the functions.

DELETERIUM, Poison.

DELIGATIO, Ligature, see Bandage.

DELIGA'TION, *Deliga'tio, Epidei'sis, Deligatu'ra, Vul'nerum deliga'tio, Fascia'rum Applica'tio, Plaga'rum Vinctu'ra, Fascia'tio,* from *deligare,* (*de,* and *ligo,*) 'to bind.' The deligation of wounds formerly embraced the application of apparatus, dressings, &c.,—the denomination *Deliga'tor Plaga'rum* being synonymous with *Medicus Vulnera'rius,* and in derivation, with the Wundarzt, 'wound physician,' or surgeon, of the Germans. Deligation is hardly ever used now as an English word. In France, it is applied to the regular and methodical application of bandages, and to the ligature of arteries.

DELIQUES'CENT, from *deliquescere,* (*de,* and *liquescere,*) 'to melt,' 'to dissolve.' Any salt which becomes liquid by attracting moisture from the air. The deliquescent salts require to be kept in bottles, well stopped. Chloride of lime, acetate of potassa and carbonate of potassa are examples of such salts. The ancient chemists expressed the condition of a body, which had become liquid in this manner, by the word *Deliquium.*

DELIQUIUM ANIMI, Syncope.

DELIRANS, Delirious.

DÉLIRANT, Delirious.

DELIRATIO, Delirium.

DÉLIRE, Delirium—*d. Crapuleux,* Delirium tremens—*d. Tremblant,* Delirium tremens.

DELIRIA, Insanity.

DELIR'IOUS. Same etymon as DELIRIUM, *Deli'rans, Excerebra'tus, Allochoos, Alie'nus,* raving, (F.) *Délirant.* One who is in a state of delirium. That which is attended by delirium. The French use the term *Fièvre pernicieuse délirante* for a febrile intermittent, in which delirium is the predominant symptom.

DELIR'IUM, from *de,* 'from,' and *lira,* 'a ridge between two furrows:' *Parac'opē, Phreni'tis, Phledoni'a, Desipien'tia, Paraphros'ymē, Emo'tio, Leros,* λερος. *Paranœa, Alloph'asis, Delira'tio,* (F.) *Délire, Égarement d'esprit,* &c. *Transport, Ideosynchysie.* Straying from the rules of reason; wandering of the mind. Hippocrates used the word μανια, *mania,* for *delirium sine febre,* and the Greek words given above for *delirium cum febre.* In different authors, also, we find the words, *Paraph'ora, Paraph'rotes, Paraphrené'sis, Paraphren'ia, Phrené'sis, Phrenetiasis,* &c., for

different kinds of delirium. Delirium is usually symptomatic.

Delirium Ebriositatis, D. tremens—d. Epileptic, see Epilepsy—d. Furiosum, Mania—d. Maniacum, Mania—d. Potatorum, D. tremens—d. Tremifaciens, D. tremens.

Delirium Seni'lĕ, *Senile Insanity.* The insanity of the aged,—a form of moral insanity, in which the whole moral character of the individual is changed.

Delirium Tremens, *Ma'nia à Potû, Œnoma'nia, Ma'nia e temulentiâ, D. potato'rum, D. ebriosita'tis, D. tremifa'ciens, D. vig''ilans, Erethis'mus ebrioso'rum, Dipsoma'nia, Meningi'tis* seu *Phreni'tis potato'rum*, (F.) *Encephalopathie crapuleuse, Délire tremblant, D. crapuleux, Folie des Ivrognes.* A state of delirium and agitation, peculiar to those addicted to spirituous liquors, with great sleeplessness. It is preceded by indisposition, lassitude, watchfulness, headache, and anorexia, the delirium and tremors most commonly recurring in paroxysms. It is caused by the habitual and intemperate use of ardent spirits or opium or tobacco; or rather by abandoning them after prolonged use. The treatment is various. Many have regarded stimulants, with large doses of opium to induce rest, to be indispensable. It is certain, however, that the expectant system will often, if not generally, be successful, and it is probable, a cure effected in this manner will be more permanent than when produced by excitants.

DÉLITESCENCE, see Repercussion.

DÉLIVRANCE, (F.) An expression, which, in common language, signifies the action of delivering, *libera'tio*, but, in the practice of obstetrics, means the extrusion of the secundines, either spontaneously or by the efforts of art. This completion of delivery—*partus secunda'rius, secundina'rum expul'sio* vel *extrac'tio*, is produced by the same laws as the expulsion of the fœtus. Sometimes, the after-birth follows the child immediately; at others, it is retained; and requires manual interference to remove it. The following are the chief cases in which this becomes necessary. 1. Intimate adhesion between the placenta and parietes of the uterus. 2. Spasmodic contraction of the orifice of the uterus. 3. Hour-glass contraction. 4. Torpor or hemorrhage after the expulsion of the child, and,—5. Insertion of the placenta at the orifice of the uterus.

DELIVERY, FALSE, False water.

DÉLIVRE, Secundines.

DELOCATIO, Luxatio.

DELPHIN'IUM CONSOL'IDA, from δελφις, or δελφιν, 'a dolphin,' which the flowers resemble. *Calcitrap'pa, Consol'ida Rega'lis, Branching Larkspur. Family*, Ranunculaceæ. *Sex. Syst.* Polyandria Trigynia. (F.) *Pied d'alouette des champs.* It has been employed as a vermifuge. The flowers have been used in ophthalmia, and the seeds have the same property as those of *Stavesacre.*

Delphin'ium Staphisa'gria. The systematic name of the *Staves'acre, Staphisagria, Phtheiroc'tonum, Phthei'rium, Staphis, Pedicula'ria*, (F.) *Staphisaigre, Herbe aux Poux, Dauphinelle.* The seeds have a disagreeable smell; a nauseous, bitterish, hot taste; and are cathartic, emetic, and vermifuge: owing, however, to the violence of their operation, they are seldom given internally, and are chiefly used in powder, mixed with hair powder, to destroy lice. The active principle of this plant has been separated, and received the name *Delphinia.* It is extremely acrid, and has been recently used, like veratria, in tic douloureux, paralysis and rheumatism. It is used in the form of ointment, or in solution in alcohol, (gr. x to xxx, or more, to ℥j.) applied externally.

DELPHYS, Uterus, Vulva.

DELTA, Vulva.

DELTIFORMIS, Deltoid.

DELTOID, *Deltoï'des, Delto'des, Deltiform'is*, from the Greek capital letter Δ, δελτα, and ειδος, 'resemblance.' *Sous-acromio-clavi-huméral* of Dumas; *sus-acromio-huméral* of Chaussier. A triangular muscle forming the fleshy part of the shoulder, and covering the shoulder-joint. It extends from the outer third of the clavicle, from the acromion and spine of the scapula, to near the middle and outer part of the os humeri, where it is inserted by means of a strong tendon. This muscle raises the arm directly upwards, when the shoulder is fixed, and carries it anteriorly or posteriorly, according to the direction of the fibres, which are thrown into action. If the arm be rendered immovable, the deltoid acts inversely and depresses the shoulder.

DEM EL MUCA. A name given by Prosper Alpinus to a cerebral disease, which, he says, is proper to Egypt. He considers it to be inflammation of the brain; but others describe it as a pernicious intermittent.

DÉMANGEAISON, Itching.

DEMANUS, Acheir.

DÉMENCE, Dementia.

DEMEN'TIA, *Amen'tia, Fatu'itas*, (q. v.) *Anœ'a, Ecnœ'a, Paranœ'a, Mo'ria demens, Noasthenia;* from *de*, 'from,' or 'out of,' and *mens*, 'mind,' or 'reason.' (F.) *Démence, Bétise.* In common parlance, and even in legal language, this word is synonymous with insanity. Physicians, however, have applied it to those cases of unsound mind which are characterized by a total loss of the faculty of thought, or by such an imbecility of intellect that the ideas are extremely incoherent, there being at the same time a total loss of the power of reasoning. Mania and melancholia are apt to end in this, if possible, more deplorable state. *Dotage* is the *Dementia* of the aged—*Mo'ria demens lere'ma, Lere'ma, Anil'itas.*

DEMI, Semi—*d. Bain*, Semicupium—*d. Épineux*, Semi-spinalis colli—*d. Épineux du dos*, Semi-spinalis dorsi—*d. Gantelet, Gantelet*—*d. Interosseux du pouce*, Flexor brevis pollicis manus—*d. Lunaire*, Semi-lunar—*d. Membraneux*, Semi-membranosus—d. Orbicularis, Orbicularis oris—*d. Tendineux*, Semi-tendinosus.

DEMISSOR, Catheter.

DEMONOMA'NIA, *Dæmonoma'nia, Entheoma'nia*, from δαιμων, 'demon,' a spirit of good or evil, and μανια, 'madness.' Religious insanity. A variety of madness, in which the person conceives himself possessed of devils, and is in continual dread of malignant spirits, the pains of hell, &c.

DEM'ONSTRATOR, from *demonstrare*, 'to show;' 'exhibit.' One who exhibits.

Dem'onstrator of Anat'omy. One who exhibits the parts of the human body. A teacher of practical anatomy.

DEMOTI'VUS LAPSUS, *Repenti'na mors*, from *demovere*, (*de*, and *movere*,) 'to move off,' 'remove,' and *lapsus*, 'a fall.' Sudden death.

DEMUL'CENTS, *Demulcen'tia, Involven'tia, Obvolventia*, from *demulcere*, (*de*, and *mulcere*,) 'to sooth,' 'to assuage,' (F.) *Adoucissant*. Medicines supposed to be capable of correcting certain acrid conditions imagined to exist in the humours. Substances of a mucilaginous or saccharine nature belong to this class. Demulcents may act *directly* on the parts with which they come in contact; but in other cases, as in catarrh, their effect is produced by contiguous sympathy;—the top of the larynx being soothed by them first, and *indirectly* the inflamed portion of the air-passages. In diseases of the urinary organs, they have no advantage over simple diluents.—See Diluents and Emollients. The following are the chief demulcents:—Acaciæ Gummi; Althææ Folia et Radix; Amygdalæ; Amylum; Avenæ Farina; Cera; Cetaceum; Cydoniæ Semina; Fucus Crispus; Glycyrrhiza; Hordeum; Lichen; Linum; Olivæ Oleum; Sassafras Medulla; Sesamum; Sevum; Tragacantha, and Ulmus.

DEMUSCULA'TUS, from *de*, and *musculus*, 'a muscle.' (F.) *Décharné*. Emaciated, devoid of flesh.

DENA'RIUS; a Roman coin, equal in value to about 10 cents, or 8 pence English. It was marked with the letter X, to signify 10 asses.

Also, the 7th part of the Roman ounce.

DENDROLIBANUS, Rosmarinus.

DENGUE, *Dingee, Dunga, Dandy, Bouquet* and *Bucket Fever, Rheumatis'mus febri'lis, Scarlati'na rheumat'ica, Exanthe'sis arthro'sia, Eruptive articular fever, E rheumatic fever*. A disease, which appeared in the years 1827 and 1828, in the West Indies, and in the southern states of North America. It was extremely violent in its symptoms, but not often fatal. It usually commenced with great languor, chilliness, and pain in the tendons about the smaller joints. To these symptoms succeeded burning heat and redness of the skin, pains in the muscles of the limbs or in the forehead, with vomiting or nausea. The fever continued for one, two, or three days, and usually terminated by copious perspiration. In different places, it put on different appearances; but seems in all to have been a singular variety of rheumatic fever. The usual antiphlogistic treatment was adopted, and successfully.

DENIACH, MINERAL WATERS OF. Deniach is a village in Swabia, at the entrance of the Black Forest. The waters contain carbonic acid, carbonate of iron, carbonate of lime, sulphate of magnesia, and carbonate of soda.

DENIGRA'TIO, from *denigrare*, (*de*, and *niger*,) 'to become black.' The act of becoming black, as in cases of sphacelus, sugillation, &c.

DENS, Tooth—d. Leonis, Leontodon taraxacum—d. Sapientiæ, see Dentition—d. Sophroreticus, see Dentition—d. Sophronista, see Dentition—d. Sophronister, see Dentition.

DENT, Tooth—*d. de Sagesse*, see Dentition.

DENTAGOGUM, Dentagra.

DEN'TAGRA, *Den'ticeps, Dentar'paga, Dentidu'cum, Dentic'ulum, Dentago'gum, Denta'lis forfex, Forfex denta'ria, Odon'tagra, Odontago'gon*, from *dens*, 'a tooth,' and ἄγρα, 'a seizure.' (F.) *Davier*. A tooth-forceps.

DENTAL, *Denta'lis, Denta'rius*, from *dens*, 'a tooth.' That which concerns the teeth.

DENTAL ARCHES, (F.) *Arcades dentaires*, are the arches formed by the range of alveoli in each jaw.

DENTAL AR'TERIES are those arteries which nourish the teeth. They proceed from several sources. The teeth of the upper jaw, e. g., receive their arteries from the *infraorbitar* and *superior alveolar*,—themselves branches of the *internal maxillary*. The teeth of the lower jaw receive their branches from the *inferior dental* or *inferior maxillary*, which is given off, by the internal maxillary and runs through the dental canal, issuing at the mental foramen, after having given numerous ramifications to the teeth and jaw.

DENTAL CANALS, (F.) *Conduits dentaires, Max'illary canals*. The bony canals, through which the vessels and nerves pass to the interior of the teeth.

DENTAL CAR'TILAGE. *Cartila'go denta'lis*. The cartilaginous elevation, divided by slight fissures, on the biting margins of the gums in infants, prior to dentition. It is a substitute for the teeth.

DENTAL CAV'ITY, (F.) *Cavité dentaire*. A cavity in the interior of the teeth in which is situate the *dental pulp*.

DENTAL FOL'LICLE, (F.) *Follic'ulus Dentis, Cap'sula dentis, Follicule dentaire*. A membranous follicle, formed of a double lamina, in which the teeth are contained before they issue from the alveoli, and which, consequently, aids in the formation of the alveolo-dental periosteum, and of the membrane that envelops the pulp of the teeth. The dental follicles are lodged in the substance of the jaws.

DENTAL GANGRENE, *Caries Den'tium, Odontalg''ia cario'sa, Necro'sis Den'tium*. (F.) *Carie des Dents*. Gangrene or caries of the teeth. See Caries.

DENTAL NERVES. (F.) *Nerfs dentaires*. Nerves which pass to the teeth. Those of the upper incisors and canine are furnished by the infra-orbitar nerve, a branch of the superior maxillary; and those of the molares by the trunk of the same nerve. The teeth of the lower jaw receive the nerves from the inferior maxillary, which, as well as the superior maxillary, arises from the 5th pair.

DENTAL PULP, *Pulpa Dentis, Germen denta'le*. (F.) *Pulpe dentaire*. A pultaceous substance, of a reddish-gray colour, very soft and sensible, which fills the cavity of the teeth. It is well supplied with capillary vessels.

DENTAL SURGEON, Dentist.

DENTAL VEINS have a similar distribution with the arteries.

DENTALIS, Odontoid—d. Forfex, Dentagra.

DENTA'LIUM, from *dens*, 'a tooth,' the *dog-like tooth shell*. A genus of shells in the shape of a tooth. They formerly entered into several pharmaceutical preparations, but were useless ingredients; consisting—like shells in general—of carbonate of lime and gelatin.

DENTARIA, Anthemis Pyrethrum, Plumbago Europæa.

DENTARIUS, Dentist.

DENTARPAGA, Dentagra.

DENTELARIA, Plumbago Europæa.

DENTELÉ ANTÉRIEUR, PETIT, Pectoralis minor—*d. Grand*, Serratus magnus—*d. Postérieur et inférieur, petit*, Serratus posticus inferior—*d. Supérieur, petit*, Serratus posticus superior.

DENTES, Teeth, see Tooth—d. Angulares, Canine teeth—d. Canini, Canine teeth—d. Columellares, Canine teeth—d. Ctenes, Incisive teeth—d. Cuspidati, Canine teeth—d. Dichasteres, Incisive teeth—d. Gelasini, Incisive teeth—d. Incisores, Incisive teeth—d. Lactei, see Dentition—d. Laniarii, Canine teeth—d. Molares, Molar teeth—d. Mordentes, Canine teeth—d. Oculares, Canine teeth—d. Primores, Incisive teeth—d. Rasorii, Incisive teeth—d. Serotini, see Dentition—d. Sophronistæ, see Dentition—d. Sophronisteres, see Dentition—d. Tomici, Incisive teeth.

DENTICEPS, Dentagra.

DENTICULA'TUM, (*Ligamentum,*) diminutive of *dens*, 'a tooth.' A slender cord, situate between the anterior and posterior fasciculi of the spinal nerves, and between the tunica arachnoidea and pia mater. It is attached to the dura mater, where that membrane issues from the cranium, and accompanies the spinal marrow to its inferior extremity. It sends off, from its outer edge, about 20 slender processes, in the form of *denticuli*, each of which is fixed by minute fibres to the dura mater in the interstices of the *fasciculi*.

DENTICULUM, Dentagra.

DENTICULUS, Crena.

DENTIDUCUM, Dentagra.

DENTIER, (F.) from *dens*, 'a tooth,' *Denture*. A set or row of teeth, mounted on metal or ivory, to be adjusted to the alveolar margin. *Dentiers* are simple or double. To the latter, the name *Râteliers* is given, i. e. to the full set.

DEN'TIFORM, *Dentiform'is*, from *dens*, 'a tooth,' and *forma*, 'form.' Resembling a tooth in shape.

DENTIFORMIS, Odontoid.

DEN'TIFRICE, *Dentifric''ium*, *Tooth powder*, *Odontotrim'ma*, *Odontosmeg'ma*, from *dens*, 'a tooth,' and *fricare*, 'to rub;' a name, given to different powders and pastes proper for cleansing the enamel of the teeth, and removing the tartar which covers them. Powdered bark, and charcoal, united to any acidulous salt—as cream of tartar—form one of the most common *dentifrices*.

Electuaire ou *Opiate Dentifrice*, of the Codex, consists of *coral* ʒiv, *cuttlefish bones* and *cinnamon* āā ʒij, *cochineal* ʒss, *honey* ʒx, *alum* gr. iv or v.

Poudre Dentifrice of the Parisian Codex is composed of *Bole Armeniac*, *red coral*, [prepared,] and *cuttlefish bones*, āā ʒvj, *dragon's blood* ʒiij, *cochineal* ʒj, *cream of tartar*, ʒix, *cinnamon* ℈ij, *cloves*, gr. xij, well mixed.

Charcoal finely powdered and mixed with chalk forms as good a dentifrice as any.

DENTINE, see Tooth.

DENTISCAL'PIUM, from *dens*, 'a tooth,' and *scalpere*, 'to scrape,' *Odonto'glyphum*. This word has been applied to the instrument used for scaling the teeth; to the *tooth-pick*, (F.) *Cure-dent;* and to the *gum lancet*, (q. v.)—the *déchaussoir* of the French.

DENT'IST, *Denta'rius*, *Dental Surgeon*, *Surgeon-Dentist*. One who devotes himself to the study of the diseases of the teeth, and their treatment.

DEN'TISTRY, *Dental Surgery*, *Odontotech'ny*. The art of the dentist.

DENTIT''ION, *Denti''tio*, *Odontophy'ia*, *Teething*, *Odonti'asis*, from *dentire*, 'to breed teeth.' The exit of the teeth from the alveoli and gums; or rather the phenomena which characterize the different periods of their existence. The germs of the first teeth, *dentes lactei* or *milk teeth*, (F.) *dents de lait*, are visible in the fœtus about the end of the second month; and they begin to be ossified from the end of the third to that of the sixth month. At birth, the corona of the incisors is formed, but that of the canine is not completed; and the tubercles of the molares are not yet all united. Gradually the fang becomes developed; and at about 6 or 8 months begins, what is commonly called, the *first dentit''ion*, *Odon'tia dentitio'nis lactan'tium*. The two middle incisors of the lower jaw commonly appear first; and, some time afterwards, those of the upper jaw; afterwards, the two lateral incisors of the lower jaw; and then those of the upper, followed by the four anterior molares: the *canine* or *eye-teeth*, at first, those of the lower, and afterwards, those of the upper jaw next appear; and, subsequently and successively, the first 4 molares—2 above and 2 below, 1 on each side. The whole number of the *primary*, *temporary*, *deciduous*, *shedding*, or *milk-teeth*, (*dentes tempora'rii,*) (F.) *Dents de lait*, is now 20.

The *second denti''tion* or *shedding of the teeth*, *odon'tia dentitio'nis pueri'lis*, begins about the age of 6 or 7. The germs or membranous follicles of these second teeth—to the number of 32—as well as the rudiments of the teeth themselves, are visible, even in the fœtus, with the exception of those of the small molares, which do not appear till after birth. They are contained in alveoli of the same shape as those of the first dentition. Their ossification commences at from 3 to 6 months after birth, in the incisors and first molares; at 8 or nine months in the canine; about three years, in the molares, 3½ in the second great molares, and about 10 years in the last. As the alveolus of a new tooth becomes gradually augmented, the septum between it and that of the corresponding milk tooth is absorbed, and disappears. The root of the milk tooth is likewise absorbed; its corona becomes loose and falls out, and all the first teeth are gradually replaced by the *permanent teeth*, *Dentes serot'ini*. This second dentition becomes necessary in consequence of the increased size of the jaws. The new teeth have neither the same direction nor the same shape as the old; and they are more numerous; amounting, till the age of 25 (sooner or later,) to 28. About this period, a small molaris appears at the extremity of each jaw, which is called *Dens sapientiæ* or *wisdom tooth*, *Dens serot'inus*, *Dens sophroret'icus*, *D. sophronis'ta*, *D. sophronis'ter*, (F.) *Arrière dent*, *Dent de sagesse*, making the whole number of permanent teeth 32. During the period of dentition, i. e. of the first dentition, the infant is especially liable to disease. The irritation, produced by the pressure of the tooth on the superincumbent gum, sometimes occasioning pyrexia, convulsions, diarrhœa, &c., which symptoms are often strikingly relieved by a free division of the distended gum. This disordered condition is called *teething*, *Odon'tia dentitio'nis*, *Odonti'asis*, *Odontal'gia dentitio'nis*, *Odaxis'mus*.

DENTIUM CORTEX, Enamel of the teeth—d. Dolor, Odontalgia—d. Nitor, Enamel of

the teeth—d. Scalptura, (Lancing the gums,) see Gum lancet.

DENTOIDEUS, Odontoid.

DENTS BICUSPIDÉES, Bicuspid teeth—*d. Col des*, Collum dentium—*d. Conoïdes*, Canine teeth—*d. de Lait*, see Dentition—*d. Mâchelières*, Molar teeth—*d. Molaires*, Molar teeth—*d. Multicuspidées*, Molar teeth, great—*d. Œillières*, Canine teeth.

DENTURE, *Dentier*.

DENUDA'TION, *Denuda'tio*, *Gymno'sis*, from *denudare*, (*de*, and *nudare*,) 'to lay bare.' Condition of a part, deprived of its natural coverings, whether by wounds, gangrene, or abscess. It is particularly applied to the bones, when deprived of their periosteum, and to the teeth when they lose their enamel or dental substance.

DEOB'STRUENT, *Deob'struens*, *Dephrac'ticum*, *Deoppi'lans*, *Deoppilati'vum*, *Ecphrac'tic*, from *de*, and *obstruere*, (*ob*, and *struere*,) 'to obstruct.' (F.) *Désobstruant*, *Désobstructif*, *Desopilatif*, *Désopilant*. Medicines, given with the view of removing any obstruction. The word corresponds to *aperient*, in its *general*, not in its *particular* sense. It is now almost abandoned, and, when used, conveys by no means definite ideas.

DEOPPILATIVUM, Deobstruent.

DEPAUPERATUS, Impoverished.

DEPERDITIO, Abortion.

DEPHRACTICUM, Deobstruent.

DÉPILATIF, Depilatory.

DEPILATIO, Alopecia—d. Capitis, Calvities.

DEPILA'TION, *Depila'tio*, *Dropacis'mus*, *Made'sis*, *Madi'sis*, *Psilo'sis*, from *de*, and *pilus*, 'hair.' Loss of hair, either spontaneously or by art.

DEPIL'ATORY, *Depilato'rium*, *Dropax*, *Psilo'thron*, *Ectillot'icus*, *Epilato'rium*. (F.) *Dépilatoire*, *Dépilatif*. Any thing which causes the loss of the hair. Depilatories are, usually, caustic applications, in which quicklime or some other alkaline substance, sulphuret of iron, &c., enters.

DEPILATORY, COLLEY'S, seems to consist of *quicklime* and a portion of *sulphuret of potassa*. A pitch plaster is sometimes used as a *depilatory*. It, of course, pulls the hair out by the roots.

DEPLE'TION, *Deple'tio*, from *deplco*, 'I unload.' The act of unloading the vessels, by blood-letting, and the different evacuants. Also, inordinate evacuation.

DEPLE'TORY, *Deple'ting*; having relation to depletion:—as 'a *depletory* or *depleting* agent.'

DEPLUMA'TIO, *Ptilo'sis*, from *deplumis*, (*de* and *pluma*,) 'without feathers.' A disease of the eyelids, in which they are swollen, and the eyelashes fall out. See Madarosis.

DEPOSIT, Feculence.

DÉPÔT, Abscess, Sediment—*d. Laiteuse sur la Cuisse*, Phlegmatia dolens—*d. de l'Urine*, Sediment (of the urine.)

DEPRAVA'TION, *Deprava'tio*, from *pravus*, 'bad.' Perversion, corruption;—as depravation of the taste, &c.

DEPREHENSIO, Diagnosis, Epilepsy.

DEPRES'SION, *Depressio*, from *deprimere*, *depressum*, (*de* and *premere*,) 'to depress;' *Esphlasis*. In *Anatomy*, it means an excavation, hollow, or fossa. In *Surgery*, it is applied to a fracture of the cranium, in which the portions of fractured bone are forced inwards; (F.) *Subgrondation*, *Entablement*; called, also, *Campsis Depres'sio*, *Thlasis Depres'sio*. *Depression*, (F.) *Abaissement*, also, means Couching.—See Cataract.

DÉPRESSOIRE, Meningophylax.

DEPRES'SOR, (F.) *Abaisseur*. Same etymon. Several muscles have been so termed, because they depress the parts on which they act.

DEPRESSOR ALÆ NASI, *D. labii superio'ris alæque nasi*, *Incisi'vus me'dius*, *Myrtifor'mis*, *Depressor Labii superio'ris proprius*, *Constricto'res ala'rum nasi ac depresso'res la'bii superioris*—*Maxillo-alvéoli-nasal*:—part of the *labialis* (Ch.,) (F.) *Abaisseur de l'aile du nez*. It arises from the superior maxillary bone immediately above the junction of the gums with the two incisor and canine teeth; and passes upwards to be inserted into the upper lip and root of the ala nasi, which it pulls downwards.

DEPRESSOR AN'GULI ORIS, *Triangula'ris*, *Depressor labio'rum commu'nis*, *Depressor labiorum*,—*Sousmaxillo-labial*, *Maxillo-labial* (Ch.) (F.) *Abaisseur de l'angle des lèvres* ou *Muscle Triángulaire*. A muscle, situate at the lower part of the face. Its form is triangular. It arises from the outer, oblique line on the lower jawbone, and terminates in a point at the commissure of the lips, which it pulls downwards.

DEPRESSOR LA'BII INFERIO'RIS; *Quadra'tus*, *Quadra'tus menti*, *Depressor labii inferio'ris proprius*,—*Mentonnier-labial*, *Mento-labial*, (Ch.) (F.) *Carré du Menton*, *Houppe du Menton*, *Abaisseur de la lèvre inférieure*. A small, thin, and quadrilateral muscle, which arises from the external oblique line of the lower jaw, and ascends to the lower lip, where it becomes confounded with the orbicularis oris. It pulls the lower lip downwards and outwards.

DEPRESSOR LABII SUPERIORIS PROPRIUS, D. Alæ nasi—d. Labiorum communis, D. Anguli oris—d. Oculi, Rectus inferior oculi.

DEPRESSOR PAL'PEBRÆ INFERIO'RIS. A fleshy bundle, which forms part of the palpebralis muscle. Heister describes it separately, but it is not admitted now.

DEPRESSORIUM, Meningophylax.

DEPRIMENS AURICULÆ, Retrahens auris—d. Maxillæ biventer, Digastricus—d. Oculi, Rectus inferior oculi.

DEPURAN'TIA, from *depurare*, (*de*, and *purus*,) 'to purify.' (F.) *Dépuratifs*. Medicines were formerly so called, which were supposed to possess the property of removing, from the mass of blood or humours, those principles which disturbed their purity; and of directing them towards some one of the natural emunctories. The juices of what were called antiscorbutic herbs, sulphur, and many other medicines were ranked under this class.

DÉPURATIFS, Depurantia.

DEPURA'TION. Same etymon. *Catharis'mos*, *Munda'tio*. In *Pathology*, depuration has been used for the process by which nature purifies the animal economy, either by the agency of some eruptive disease, or some spontaneous evacuation, or by the assistance of medicine. See Clarification.

DEP'URATORY. Same etymon. *Depurato'rius*. That which causes depuration, as the *urinary* and *cutaneous depurations*. Applied, also, to diseases, which have been considered capable of modifying the constitution advan-

tageously, by acting on the composition of the fluids—such as certain eruptions, intermittents, &c. The word is, also, appropriated to medicines and diet, by which the same effect is sought to be induced.

DERADENI'TIS, from δειρη, 'neck;' αδην, 'a gland;' and *itis*, denoting inflammation. Inflammation of the glands of the neck.

DERANENCEPHA'LIA, from δειρη, 'neck,' and *anencepha'lia*, 'absence of brain.' A monstrosity in which only a small portion of the brain exists, resting on the cervical vertebræ—more properly *derencepha'lia*.

DERANGEMENT, Insanity.

DERBIA, Impetigo.

DERENCEPHALIA, Deranencephalia.

DERENCEPH'ALUS, from δειρη, 'the neck,' and κεφαλη, 'head.' A monster whose brain is in the neck.—G. St. Hilaire.

DERIS, Cutis.

DERIVANS, Derivative.

DÉRIVATIF, Derivative.

DERIVA'TION, *Deriva'tio*, *Deflec'tio*, *Parocheteu'sis*, *Revul'sion*, from *de*, and *rivus*, 'a river.' When a 'centre of fluxion' is established in a part, for the purpose of abstracting the excited vital manifestations from some other, a *derivation* is operated.

The term Derivation has likewise been applied to the suction power of the heart,—an important agency in the circulation of the blood.

DERIV'ATIVE, *Deflec'tens*, *Deri'vans*, from *derivare*, 'to drain off,' *Antispas'tic*, *Revellent*, *Revulsive*. (F.) *Dérivatif*, *Revulsif*. Same etymon. A remedy, which by producing a modified action in some organ or texture *derives* from the morbid condition of some other organ or texture. Revellents are amongst the most important of remedies: they include, indeed, every physical and moral agent, which is capable of modifying the function of innervation, and therefore almost every article of the materia medica. The following is a list of the chief local Derivatives.

1. Epispastics.
Acidum Aceticum,
——— Nitricum,
——— Sulphuricum,
Allium Sativum,
Ammonia,
Ammoniacum,
Asafœtida,
Capsicum,
Galbanum,
Olea Essentialia,
Pix Abietis,
Sinapis,
Caloric,
Friction.

2. Vesicants.
Ammonia,
Argenti Nitras,
Cantharis,
——— Vittata,
Hydrargyri Iodidum rubrum,
Ranunculus,
Sinapis,
Caloric.

3. Suppurants.
Acida Mineralia,
Antimonii et Potassæ Tartras,
Cantharis,
Mezereum,
Pix Abietis,
Sabina,
Tiglii Oleum,
Fonticulus,
Setaceum.

4. Escharotics.
a. *Erodents.*
Acidum Aceticum,
Acida Mineralia,
Alumen Exsiccatum,
Argenti Nitras,
Cupri Acetas,
—— Sulphas,
Sabina,
Saccharum Purissimum,
b. *Actual Cauterants.*
Caloric { White Hot Iron, Moxa.
c. *Potential Cauterants.*
Acidum Arseniosum,
——— Nitricum,
——— Sulphuricum,
Antimonii Murias,
Argenti Nitras,
Calx,
Potassa,
——— cum Calce.

DERMA, Cutis.

DERMAL'GIA, from δερμα, 'the skin,' and αλγος, 'pain.' Pain in the skin. Neuralgia of the skin. *Rheumatic Dermalgia* or *Rheumatism of the skin*, is a form of neuralgia, which is referred, at times, to the nervous trunks, muscles, &c., but appears to be seated in the cutaneous nerves.

DERMATAGRA, Pellagra.

DERMATITIS, Cytitis, Erysipelatous inflammation.

DER'MATOID, *Dermatoï'des*, from δερμα, 'the skin,' and ειδος, 'form.' That which is similar to the skin. This name is given to different tissues, which resemble the skin. The dura mater has been so called by some.

DERMATOL'OGY, *Dermatolog''ia*, *Dermol'ogy*, from δερμα, 'the skin,' and λογος, 'a discourse.' A discourse or treatise of the skin.

DERMATOLYLUS, Callosity.

DERMATOSIES VÉROLEUSES, *Syphilides*.

DERMATIATRI'A, *Diadermiatri'a*, from δερμα, 'the skin,' and ιατρεια, 'the healing art.' The treatment of disease through the skin.

DERMITIS, Cytitis.

DERMOG'RAPHY, *Dermograph'ia*, from δερμα, 'the skin,' and γραφω, 'I describe.' An anatomical description of the skin.

DERMOHÆ'MIA, from δερμα, 'skin,' and 'αιμα, 'blood.' Hyperæmia or congestion of the skin.

DERMOID, *Dermoïdes*, *Dermo'des*, from δερμα, 'the skin,' and ειδος, 'form.' Resembling, in consistence, texture, and configuration, the skin:—as *dermoid texture*, applied to mucous membranes, &c.

DERMOLOGY, Dermatology.

DERMO-SYPHILIDIES, *Syphilides*.

DERMOT'OMY, *Dermotom'ia*, from δερμα, 'the skin,' and τεμνειν, 'to cut.' The part of anatomy which treats of the structure of the skin.

DERODYMUS, Dicephalus.

DERONCUS, Bronchocele.

DERTRON. This word, which is used by Hippocrates, signified, according to some, the omentum or peritoneum, but according to others, the small intestine. See Epiploon.

DÉSARTICULATION, (F.) from *de*, and *artic'ulus*, 'a joint.' *Disjointing*. A word used to express the part of the operation, in amputation at an articulation, which consists in dividing the ligaments, and separating the articular surfaces. The word has, also, been used for that kind of anatomical preparation, the object of which is to separate the different bones of the skeleton, and especially those of the head.

DESCALORINÈSES, from *de*, 'from,' and *calor*, 'heat.' A name given by Baumes to diseases which are characterized by diminished heat.

DESCENTE, Hernia—*d. de la Matrice*, Procidentia uteri.

DESECTUS, Castratus.

DÉSENFLURE, *Détumescence*.

DESICCATIO, Draining.

DESICCATION, Drying.

DESICCATI'VA, *Siccan'tia*, *Exsiccati'va*, from *desiccare*, (*de*, and *siccare*,) 'to dry up.' (F.) *Dessiccatifs*. Remedies, which, when applied externally, dry up the humours or moisture from a wound.

DESIPIENTIA, Delirium.

DES'MA, *Des'mē*, *Desmos*. A bandage, a ligament. (q. v.) Hence:

DESMEDION, Fasciculus.

DESMOCHAUNO'SIS, from δεσμος, 'ligament,' and χαυνωσις, 'relaxation.' Relaxation of an articular ligament.

DESMOGRAPHY, *Desmograph'ia*, from δεσμος, 'a ligament,' and γραφη, 'a description.' An anatomical description of the ligaments.

DESMOID TISSUE, (δεσμος, 'a ligament,' and ειδος, 'shape.') *Ligamen'tous Tissue*, *Tex'tus desmo'sus*. This tissue is very generally diffused over the human body; has a very close connexion with the cellular tissue, and is continuous with it in divers places. It constitutes the ligaments, and aponeuroses, &c.

DESMOL'OGY, *Desmolog''ia*, from δεσμος, 'a ligament,' and λογος, 'a discourse,' 'a treatise.' That part of anatomy which describes the ligaments.

DESMOPH'LOGY, *Desmophlog''ia*, from δεσμος, 'a ligament,' and φλογεος, 'inflamed.' Inflammation of the ligaments.

DESMORRHEX'IS, from δεσμος, 'a ligament,' and ρηξις, 'rupture.' Rupture of an articular ligament.

DESMOS, Ligament.

DESMOT'OMY, *Desmotom'ia*: from δεσμος, 'a ligament,' and τεμνειν, 'to cut.' The part of anatomy which teaches the mode of dissecting the ligaments.

DÉSOBSTRUANT, Deobstruent.

DÉSOBSTRUCTIF, Deobstruent.

DÉSOPILATIF, Deobstruent.

DÉSORGANISATION, Disorganization.

DÉSOXYGENÈSES. M. Baumes includes under this title an order of diseases, which he considers dependent upon a diminution in the quantity of the oxygen necessary for the animal economy.

DESPOTATS. (F.) Infirm soldiers, formerly charged with the office of removing the wounded from the field of battle: perhaps from *desporta'tor*, 'one who bears away.' The class of *Despotats* was introduced by Leo VI., at the commencement of the 9th century.

DESPUMA'TION, *Despuma'tio*, *Apaphris'mos*, *Epaphris'mos*, from *despumare*, (*de*, and *spuma*,) 'to skim,' 'to remove the froth.' The separation of the froth and other impurities, which rise, by the action of the fire, to the surface of any fluid.

DESQUAMA'TION, *Desquama'tio Cutis*, *Eclep'isis*, *Aposyr'ma*, from *desquamare*, (*de*, and *squama*,) 'to scale off.' Exfoliation, (q. v.) or separation of the epidermis, in the form of scales, of a greater or less size. This affection is a common consequence of exanthematous diseases.

DESQUAMATORIUS, Exfoliative.

DESSÈCHEMENT, Atrophy, Draining.

DESSICCATIFS, Desiccativa.

DESTILLATIO, Coryza—d. Pectoris, Catarrh.

DESUDA'TIO, *Ephidro'sis*, *Sudam'ina*, *Hidro'a*, from *desudare*, (*de*, and *sudare*.) *Desudation* means a profuse and inordinate sweating; but, most commonly, the term is applied to an eruption of small pimples, similar to millet seed, which appears chiefly on children, and is owing to want of cleanliness.

DÉSYMPHYSER, see Symphyseotomy.

DETENTIA, Catalepsy.

DETERGENS, Abstergent.

DETER'GENTS, from *detergere*, (*de*, and *tergere*,) 'to cleanse.' *Detergen'tia*, *Abstergen'tia*, *Smec'tica*, *Emundan'tia*, *Mundificati'va*, *Rhyp'tica*, (F.) *Détersifs*, *Mondificatifs*. Medicines, which possess the power to deterge or cleanse wounds, ulcers, &c. They belong to the class of stimulants, or to that of emollients.

DÉTERSIFS, Detergents.

DETESTATIO, Castratio.

DETORSE, Sprain.

DETRI'TUS, from *deterere*, (*de*, and *terere*,) 'to bruise or wear out.' The inorganic residuum, occupying the place of the organic texture of parts which have undergone disorganization.

DÉTROIT ABDOMINAL, Pelvis (brim)—*d. Inférieur*, Pelvis (outlet)—*d. Périnéal*, Pelvis (outlet)—*d. Supérieur*, Pelvis (brim).

DÉTRONCATION, Detruncatio.

DETRUNCA'TION, *Detrunca'tio*, (F.) *Détroncation*, from *de*, and *truncus*, 'a trunk.' Separation of the trunk from the head of the fœtus, the latter remaining in the uterus.

DETRU'SOR URI'NÆ, from *detrudere*, (*de*, and *trudere*,) 'to thrust out.' The muscular coat of the urinary bladder was formerly so called. It was, also, named, *Constrictor Vesi'cæ Urina'riæ*.

DÉTUMESCENCE, (F.) *Detumescen'tia*, from *detumere*, (*de*, and *tumere*,) 'to cease to swell.' A diminution of swelling. This word has nearly the same signification as the French word *Désenflure*. The latter is, however, more particularly applied to the diminution of œdema or anasarca; the other, to the resolution of a tumour properly so called.

DEUNX. The ancient name of a weight of 11 ounces, supposing the pound to consist of 12.

DEURENS (FEBRIS,) Causus.

DEUTERA, Secundines.

DEUTERI'A, from δευτερος, 'the second.' Vogel has used this term for the symptoms produced by retention of the secundines. The word was also applied, by the Greeks, to a second or inferior wine.

DEUTEROPATHI'A, *Mor'bus secunda'rius*, from δευτερος, 'the second,' and παθος, 'disease.' A secondary disease. One produced by another, and of which it is only, in some measure, symptomatic, or the sympathetic effect.

DEUTO, δευτερος, 'second.' A prefix denoting two or double,—as *deutoxide*, having two degrees of oxidation.

DEVEL'OPMENT, from (F.) *développer*, 'to unfold.' In Physiology, it means growth or increase; and in Pathology, its signification is similar. By development of the pulse, e. g. is understood an increase in its strength and fulness.

DEVIA'TION, *Devia'tio*, from *de*, 'from,' and *via*, 'the way.' Out of the way. By this word is meant—a vicious curvature of the spine or other bones;—faulty direction of the teeth or other part:—the passage of blood, bile, urine, milk, &c. into vessels not natural to them, &c.

DÉVIATION DES RÈGLES, Menstruation (Vicarious.)

DEVIL IN A BUSH, Nigella.

DEVIL BIT, Veratrum viride.

DEVIL'S BIT, Aletris farinosa, Scabiosa succisa.

DEVIL'S BITE, Liatris.

DEVIL'S DUNG, Asafœtida.

DEVIRGINATIO. Defloration, Stuprum.

DÉVOIEMENT, Diarrhœa.

DEWBERRY, AMERICAN, see Rubus cæsius—d. Plant, Rubus cæsius.

DEWCLAWS, Crusta genu equinæ.

DEXOCARDIA; from δεξιος, 'right,' and καρδια, 'the heart.' A case in which the heart is found to beat on the right side. It is met with in pleurisy and pneumothorax.

DEX'TANS. A weight of 10 ounces, supposing the pound to consist of 12.

DEXTRINE, from *Dexter*, 'right-handed.' So called, from its refracting the rays, in the polarization of light, more to the right hand than any substance known. A substance obtained by the continued action of diluted sulphuric acid upon starch at the boiling point. It is used in the treatment of fractures, by the "immovable apparatus." The bandages are soaked in a solution, in water, of the dextrine—previously moistened thoroughly with tincture of camphor, to prevent it from leaking when the water is added. The solution should be of the consistence of molasses.

DI, δι, δις, 'bis, twice, double.' Hence, *Dicrotus*, *Digastricus*, &c.

DIA, δια, in composition, 'through, asunder, out of, separated.' When prefixed to any therapeutical agent, it meant, in ancient pharmacy, a preparation into which that agent entered.

DIABEBOS, Astragalus, Malleolus.

DIABÈTE CHYLEUX, Chyluria—*d. Faux*, Diabetes—*d. Insipide*, Diabetes—*d. Sucrée*, Diabetes (mellitus.)

DIABE'TES, from δια, 'through,' and βαινω, 'I pass.' *Uri'næ profluvium*, *Sipho urinæ*, *Urorrhag''ia*, *Polyu'ria*, *Hydrops ad mat'ulam*, *H. Matel'læ*, *Polyure'sis*, *Dip'sacos*, *Diarrhœ'a in Urinâ*, (F.) *Diabète*, *Flux d'Urine*. A disease, characterized by great augmentation and manifest alteration in the secretion of urine; with excessive thirst, and progressive emaciation. Cullen has described two species:—*Diabetes insip'idus* and *D. Melli'tus*, (F.) *Diabète faux* ou *insipide*, *et Diabète*; the former being, simply, a superabundant discharge of limpid urine, of its usual, urinary taste: the latter:—the *D. Melli'tus*, called, also, *Paru'ria Melli'ta*, *Diabetes An'glicus*, *D. verus*, *Melitu'ria*, *Glucosu'ria*, *Phthisu'ria*, *Dyspep'sia saccharig''ena*, *Apocenō'sis Diabetes Mellitus*, *Diabète sucré*, *Hyperurorrhée saccharine*, *Phthisurie sucrée*,—falls under the definition given above. The quantity of urine, discharged in the 24 hours, is sometimes excessive, amounting to 30 pints and upwards: and each pint containing sometimes 2¼ oz. of saccharine matter. This replaces the urea; which is not found in quantity in the urine of those labouring under diabetes. Where the disease is situate is not clear. The whole system of nutrition, however, seems to be morbidly implicated. A part of the urine must be formed at the expense of the system, as the egesta frequently far exceed the solid and liquid ingesta. On dissection, no morbid appearance is met with, sufficient to enable us to fix on the seat of this distressing affection.

All the remedies that have been tried have usually been found insufficient in *D. Mellitus*. *D. insip'idus*, *Hyperure'sis aquo'sa*, *Hydru'ria*, *Hydrure'sis*, *Paru'ris incon'tinens aquo'sa*, *Diabe'tes spu'rius*, *Urorrha'a*, (F.) *Polyurie*, *Hyperurrorrhée*, *Diabète insipide*, *Faux diabète*, which occurs in hysterical habits, and has, hence, been called *D. hyster'icus*, is of comparatively trifling moment. Exclusive diet, and attention to the state of the cutaneous transpiration, which have sometimes produced good effects in D. Mellitus, have most commonly failed.

DIABETES CHYLOSUS, Chyluria—d. Lactea, Chyluria—d. Spurious, see Diabetes—d. Verus, Diabetes (mellitus.)

DIABOT'ANUM, from δια, and βοτανη, 'an herb.' A medicine, prepared with herbs.—Galen.

DIABROSIS, Erosion, Corrosion.

DIABROT'ICUS, from δια, and βρωσκω, 'I eat or corrode.' A substance, capable of causing erosion of the part to which it is applied. It ordinarily means a medicine, whose activity places it between escharotics and caustics. See Corrosive.

DICAR'YON, from δια, and καρυον, 'a nut.' *Rob nucum*. The rob of nuts or of walnuts.

DIACASSIA CUM MANNÂ, Confectio cassiæ.

DIACATHOL'ICON, *Diacatholi'cum*, from δια, and καθολικος, 'universal.' The name of a purge, so called from its general usefulness. It was an electuary, and composed of the *pulp of cassia, tamarinds, leaves of senna, root of polypody, flowers of the violet, rhubarb root, aniseed, sugar, liquorice*, and *fennel*.

DIACAU'SIS, from διακαυω, 'I burn.' Excessive heat. Over-heating.

DIACAUSTIC. Same etymon. *Diacaus'ticus*. That which is caustic by refraction; as a double convex lens, which has been sometimes used for cauterizing an ulcer by directing the sun's rays upon it.

DIACELTATESSON PARACELSI, Pulvis Cornachini.

DIACHALA'SIS, from διαχαλαειν, 'to be open or relaxed.' Hippocrates uses this word for fracture of the bones of the skull; or for relaxation and separation at the sutures, in consequence of a wound of the head.—Hippocrates.

DIACHALCIT'EOS, from δια, and χαλκιτις, 'chalcitis or colcothar.' A plaster, whose composition is the same as that of the diapalma, except that, in place of the sulphate of zinc, a mixture of oil and colcothar is substituted.

DIACHEIRIS'MOS, *Tracta'tio manua'ria*; from δια, and χειρ, 'the hand.' The preparation, administration, and dispensing of medicines.—Hippocrates.

DIACHORE'MA, *Diachore'sis*, from διαχωρεω, 'I separate from.' Every kind of excreted matter and excretion; but more particularly the fæces and alvine excretion.—Foësius, Gorræus. See Excrement.

DIACHORESIS, Excretion.

DIACHRISIS, Inunction.

DIACHRISTA, from δια, and χριω, 'I anoint.' Medicines, applied as abstergents to the velum palati, the palate itself, the tongue, &c. Probably gargles.—Paulus of Ægina.

DIACH'YLON or DIACH'YLUM, from δια, and χυλος, 'juice;' i. e. composed of juices. The plaster of this name was formerly made of certain juices. The term is now confined to the EMPLASTRUM PLUMBI or *Lead Plaster*.

DIACHYLON CUM GUMMI, Emplastrum gummosum—*d. Gommé*, Emplastrum cum gummiresinis—d. Gum, Emplastrum gummosum—d. Magnum cum gummi, Emplastrum galbani comp.—d. Simplex, Emplastrum plumbi—d.

White, Emplastrum plumbi—d. Yellow, Emplastrum gummosum.

DIACHYTICA, from διa, and χυω, 'I pour out.' Medicines, which discuss tumours.

DIACINE'MA, from διa, and κινεω, 'I move.' A slight dislocation.—Celsus, Galen. A subluxation.

DIACLYSMA, Gargarism.

DIACOCCYMELON, Diaprunum.

DIACODION, Syrupus papaveris.

DIACO'DIUM, *Confec'tio ex Capit'ibus Papav'eris;* from διa, and κωδια, 'a poppyhead.' (F.) *Diacode.* The ancients had various forms for preparing it. The *Syrup of Poppies—Syrupus Papav'eris*—is now substituted for it.

DIACOPĒ, Abscission, Dissection, Intersection.

DIAC'OPĒ, *Ent'opē*, from διa, and κοπτειν, 'to cut.' A cut, incision, fissure, or longitudinal fracture. When used, since Galen, it generally signifies an oblique incision, made in the cranium by a sharp instrument, without the piece being removed. It is not now employed.

DIACOPRÆ'GIA, from διa, κοπρος, 'excrement,' and αιξ, αιγος, 'a goat.' A name given, in Blancard's Lexicon, to a medicine, composed of goat's dung, which the ancients praised in diseases of the spleen, parotids, &c.

DIACRISES; from διa, and κρινω, 'I separate.' A class of diseases characterized by alterations of secretion.—Gendrin.

DIACYDONITES, Cydoniatum.

DIADE'MA, *Fascia cap'itis, Redimic'ulum*, from διαδεω, (διa, and δειν, 'to bind.') 'I surround.' A sort of bandage; advised in headache, in which relaxation of the sutures was apprehended.—Forestus.

DIADERMIATRI'A, from διa, δερμa, 'the skin,' and ιατρεια, 'healing.' Treatment by the skin, as by the endermic and iatraleptic methods.

DIADEX'IS, *Diad'ochē, Metatopto'sis*, from διαδεχομαι, (διa, and δεχομαι, 'to take or receive.') 'I transfer.' 'I succeed to.' A transformation of a disease into another differing from the former, both in its nature and seat.

DIADOCHE, Diadexis.

DIAD'OSIS, from διαδιδωμαι, 'to distribute.' In some authors, it means the distribution of nutritive matter over the whole body,—in other words, *nutrition;* whilst, in others, it is synonymous with the remission or cessation of a disease.

DIÆ'RESIS, from διαιρεω, διa, and αιρεω, 'I take away,' 'I divide,' 'I separate.' A division (q. v.) or solution of continuity. A surgical operation, which consists in dividing any part of the body,

DIÆRETICUS, Caustic.

DIÆTA, Diet.

DIÆTE'MA. It has the same signification as diet with most authors. Galen gives it a more extensive meaning; comprising, under it, what constitutes Hygiène.

DIAGNO'SIS, *Digno'tio, Diagnos'ticē, Depreken'sio*, from διa, and γινωσκω, 'I know.' *Discrimination*, (F.) *Diagnose, Diagnostique.* That part of medicine whose object is the discrimination of diseases—the knowledge of the pathognomonic signs of each. It is one of the most important branches of general pathology.

DIAGNOS'TIC, *Discreti'vus, Diagnos'ticus;* same etymon. A symptom which is characteristic of a disease.

TO DIAGNOSTICATE, sometimes "to diagnose." To discriminate one disease or phenomenon from another.

DIAGRYDIUM, Convolvus scammonia.

DIAGRYD'IUM CYDONIA'TUM, from *diagrydium*, 'scammony,' and *cydonium*, 'quince.' A pharmaceutical preparation, obtained by inspissating and drying, by means of heat, two parts of *scammony* and one of *quince juice.* It was formerly used as an energetic purgative.

DYAGRYD'IUM GLYCYRRHIZA'TUM. An analogous preparation, containing extract of liquorice in place of quince juice.

DIAGRYD'IUM SULPHURA'TUM. Scammony, which has been exposed to the vapour of burning sulphur. These *diagrydia* are not now used.

DIALEIMA, Apyrexia.

DIALEIPSIS, Intermission.

DIALEIPYRA, Intermittent fever.

DIALEP'SIS, *Intercep'tio*, from διαλαμβανω, 'I intercept.'—Hippocrates employs this word for the interstices, or intervals, left between the turns of a bandage.

DIAL'YSIS, *Dissolu'tio*, from διa, and λυσις, 'solution.' A dissolution (q. v.) or loss of strength. Weakness of the limbs. Also, a solution of continuity.

DIAMANT, Diamond.

DIAMASTEMA, Masticatory.

DIAM'BRÆ SPE'CIES. A name given by the ancients to powders, one of which bore the name—*Spe'cies diam'bræ sine odora'tis*, the other, that of *Spe'cies diam'bræ cum odora'tis.* The *former* was composed of *cinnamon, angelica root, cloves, mace, nutmeg, galanga, cardamom*, and numerous other substances; the *latter*, besides, had *ambergris* and *musk.* These powders were used as tonics, in cases of debility of the stomach, and in certain nervous affections.

DIAMNES, Enuresis.

DI'AMOND, *Ad'amas*, from α, privative, and δαμαω, 'I conquer,' (F.) *Diamant.* Invincible; so called from its hardness. It is the most precious of all stones, and was formerly conceived to possess extraordinary cordial virtues.

DIAMO'RUM, *Rob ex moris*, from διa, and μωρον, 'a mulberry.' An ancient syrup prepared with honey and mulberry juice. It was employed as a gargle in sore throat.—Galen.

DIAMOTO'SIS, from μοτος, 'charpie,' 'lint.' The introduction of lint into an ulcer or wound.

DIANA, Argentum.

DIANANCAS'MOS, *Dianancas'mus*, from διa, and αναγκαζω, 'I force.' Coaptation, reduction of a fractured or luxated limb.

DIANŒMA, Imagination.

DIAN'THUS CARYOPHYL'LUS, from Δις, 'Jove,' (?) ανθος, 'flower,' and *caryophyl'lum*, 'the clove.' *Clove Pink.* Also, called *caryophyl'lum rubrum, Tu'nica, Tu'nica horten'sis, T. rubra, Caryophyl'lus hortensis, Clove July flower, Gilliflower. Order*, Caryophylleæ, (F.) *Œillet giroflée.* The flowers were once much used; but are now only employed in syrup, as a useful and pleasant vehicle for other medicines.

DIAPAL'MA, *Phœnic''ium Emplas'trum.* A plaster composed of equal parts of *litharge, olive oil, axunge, water*, a certain quantity of *sulphate of zinc* dissolved in water, and *white wax.* It is classed amongst the topical, desiccative, emol-

lient, resolvent, detersive, and cicatrizing medicines. Mixed with a quarter of its weight of *olive oil*, it acquires the consistence of an ointment, and forms the *Cerate of Diapalma*.

DIAPAS'MA, from διαπασσειν, 'to sprinkle.' A medicine reduced to powder, and sprinkled over the body, or some part of it.

DIAPEDE'SIS, *Transuda'tio*, *Persuda'tio*, from διαπηδαω, 'I leap through.' Exhalation of blood, in the form of dew at the surface of the skin, or of any membrane. *Sweating of blood* (F.) *Sueur de Sang*. *Hæmorrha'gia per diapede'sin*, *Hæmatopede'sis*, *Hæmidro'sis*.

DIAPENSIA CORTUSA, Sanicula.

DIAPEN'TES or DIAPENTE, from δια, and πεντε, 'five.' A medicine composed of five ingredients. See Diatessaron.

DIAPHŒ'NICON, *Diaphœ'nix*, *Medicamen'tum ex Pal'mulis*, from δια, and φοινιξ, 'a date.' A drastic electuary, of which the date was the chief excipient.

DIAPHORE'SIS, from διαφορεω, (δια, and φορεω, 'I convey,') 'I dissipate.' A greater degree of perspiration than natural, but less than in sweating. Every kind of cutaneous evacuation.

DIAPHORET'IC. Same etymon; *Diapno'icus*, *Diaphoret'icus*. Medicines which excite diaphoresis. They are very uncertain as a class. The following is a list of the chief reputed Diaphoretics:—Ammoniæ Acetatis Liquor; Ammoniæ Carbonas; Antimonialis pulvis; Antimonii et Potassæ Tartras; Antimonii Sulphuretum præcipitatum; Asclepias tuberosa; Camphora; Contrayerva; Dulcamara; Eupatorium perfoliatum; Guaiaci Lignum; Guaiacum; Ipecacuanha; Mezereum; Opium—and its active principle Morphia; Sarsaparilla; Sassafras; Serpentaria; Spiritus Ætheris Nitrici; Sulphur; Xanthoxylum; Caloric; Exercise, (active;) and Friction.

The epithet *Diaphoretic* has also been given by some to continued fever, accompanied with constant perspiration.

Diaphoretic, Mineral, Antimonium diaphoreticum.

DIAPHORETICUM JOVIALE, see Antihectic.

DI'APHRAGM, *Diaphrag'ma*, διαφραγμα, *Discreto'rium*, *Phrenes*, *Septum transver'sum*, *Discri'men Thora'cis et Ventris*, *Disceptum*, *Cine'tus*, *Diazo'ma*, *Dissep'tum*, *Præcor'dia*, *Succin'gens membra'na* vel *mus'culus*; the *Midriff*, from δια, 'between,' and φρασσω, 'I close.' A large, azygous muscle; stretched transversely between the thoracic and abdominal cavities, which it separates from each other; tendinous in the centre; thin, almost circular, and unequally convex, upwards. It is fleshy at its circumference, which is attached to the cartilago ensiformis, to the last six ribs, to the aponeurosis stretched from the last rib to the transverse process of the first lumbar vertebra; and, lastly, to the bodies of the first three or four lumbar vertebræ. When it contracts, its fibres become straight, the chest is enlarged, and the abdomen diminished. It is then an inspiratory muscle. It may, also, diminish the capacity of the chest; and be an expiratory muscle. This muscle plays an important part in sighing, yawning, coughing, sneezing, laughing, sobbing, crying, hiccoughing, singing, vomiting, the excretion of the fæces and urine, the expulsion of the fœtus, &c.

DIAPHRAGMA CEREBRI, Tentorium—d. Narium, Septum narium—d. Ventriculorum lateralium cerebri, Septum lucidum.

DIAPHRAGMAL'GIA, from διαφραγμα, 'the diaphragm,' and αλγος, 'pain.' Pain in the diaphragm.

DIAPHRAGMAT'IC, *Diaphragmat'icus*. Belonging to the diaphragm. A name given to several vessels and nerves.

Diaphragmat'ic or Phrenic Ar'teries.—These are distinguished into *superior* and *inferior*. The *former*, called, also, *supradiaphragmatic*, are two in number, one on each side. They arise from the internal mammary, and descend along the phrenic nerve, to be distributed on the upper surface of the diaphragm. The latter, or *infradiaphragmatic*, are also two in number. They arise from the upper part of the abdominal aorta or from the cœliac artery, and divide into two principal branches, which are distributed on the lower surface of the diaphragm and in its substance.

The *superior diaphragmatic veins* follow the same course as the arteries, and empty themselves—the *right*, into the vena cava superior; the *left*, into the corresponding subclavian vein. The two *inferior diaphragmatic veins* open into the vena cava inferior.

Diaphragmat'ic Hernia, *Phrenic Hernia*, *Diaphragmatoce'lē*. The abdominal viscera are occasionally protruded through the diaphragm, either through some of the natural apertures in the muscle, or through deficiencies, or wounds, or lacerations in it.

Diaphragmat'ic or Phrenic Nerves are two in number; one on the left side, the other on the right. They arise from the second and third nerves of the cervical plexus, about the middle of the neck. They receive two or three filaments from the brachial plexus, after which they descend into the chest at the sides of the pericardium, and are distributed on the diaphragm.

Diaphragmat'ic Plex'uses are two in number; one right, and the other left. They arise from the upper part of the solar plexus, by a small number of branches, which are distributed to the diaphragm, following exactly the branches of the inferior diaphragmatic arteries.

Diaphragmat'ic Ring, (F.) *Anneau diaphragmatique* of Chaussier, is a name given to the irregularly quadrilateral aperture, by which the vena cava inferior passes through the diaphragm.

DIAPHRAGMATITIS, Diaphragmitis.

DIAPHRAGMI'TIS, from διαφραγμα, 'the diaphragm,' and *itis*, a suffix denoting inflammation. *Diaphragmati'tis*, *Inflamma'tio septi transver'si*, *Paraphreni'tis*, *Empresma Pleuri'tis Diaphragmat'ica*, *Paraphrene'sis Diaphragmat'ica*, *Inflamma'tion of the Di'aphragm*. The terms, *Paraphreni'tis* and *Paraphrene'sis* have been obtained from the Peripatetic philosophy, which supposed the seat of the φρην or soul to be the præcordia. The essential symptoms of diaphragmitis are:—painful constriction around the præcordia, with small, quick, laborious breathing. It is a rare disease.

DIAPHRA'TTON HYMEN, Mediastinum—d. Membrana, Mediastinum.

DIAPH'THORA, from δια, and φθειρειν, 'to corrupt.' Corruption (q. v.) in general; more especially corruption of the fœtus in utero.—

Hippocr. Also, corruption of the blood in the stomach.—Galen. See Abortion.

DIAPHYLACTIC, Prophylactic.

DIAPH'YSIS, from διαφυω, 'I rise between.' *Intersti"tium*, *Discrimina'tio*: 'an interstice, interval, division.' Any thing that separates two bodies. Also, the middle part or body of a long bone, *Corpus Ossis*. One of the ligaments of the knee.—Hippocrates, Paré.

DIA'PIA. Some lexicographers use this word synonymously with Diapyesis, or Suppuration; others have employed it in opposition to Myopia.

DIAPLASIS, Conformation.

DIAPNOE, Perspiration.

DIAPNOGENOUS APPARATUS, see Perspiration.

DIAPNOICUS, Diaphoretic.

DIAPORE'MA, Anxiety, jactitation; from διαπορεω, 'I doubt.'

DIAPRU'NUM, *Diacoccyme'lon*. A purgative electuary of which the *pulps of prunes* and *rhubarb* form the base. By adding to the *diaprunum simplex* a 24th part of powdered scammony, the *Diapru'num resoluti'vum* or *compos'itum* is formed. It is more active than the former.

DIAPYEMA, Empyema, Suppuration.

DIAPYESIS, Suppuration—d. Oculi, Hypopyon.

DIAPYET'ICA, *Dyapye'mata*, from διαπυημα, διαπυησις, (δια, and πυον, 'pus,') 'suppuration.' Medicines which promote suppuration.

DIAPYETICUS, Suppurative.

DIARÆMIA, (F.) *Diarémie*, from δια, 'through,' ρεω, 'I flow,' and 'αιμα, 'blood.' A pathological condition, said to be common in sheep, in which the globules of the blood are diminished in quantity; the blood itself thinner, and transuding through the coats of the vessels into the cavities.—Delafore.

DIARÉMIE, Diaræmia.

DIARIA, Ephemera.

DIARRHAGE, Fracture.

DIARRHŒ'A, from δια, 'through,' and ρεω, 'I flow.' *Enterorrhœ'a*, *Incontinen'tia alvi*, *Alvi profluvium*, *A. fluxus aquo'sus*, *Ventris profluvium*, *Cœliorrhœ'a*, *Cacato'ria*, *Coprorrhœ'a*, *Catar'rhus intestina'lis*, *Alvi fluxus*, *Defluxio*, *Lax*, *Looseness*, (F.) *Diarrhée*, *Dévoiement*, *Catarrhe intestinal*, *Flux de Ventre*, *Cours de Ventre*, *Courante*. A disease characterized by frequent, liquid, alvine evacuations, and generally owing to inflammation or irritation of the mucous membrane of the intestines. It is commonly caused by errors in regimen, the use of food noxious by its quality or quantity, &c., constituting the *Diarrhœ'a stercora'ria*, *D. Crapulo'sa* of writers. It may be acute or chronic. Many varieties have been made by some nosologists—e. g. *mucous*, *bilious*, *serous*: dependent upon the matters evacuated. Diarrhœa requires different treatment, according to its nature. If caused, as it often is, by improper matters in the intestinal canal, these must be evacuated; and the astringent plan of treatment must not be adopted, unless the discharges seem kept up by irritability of the intestines, or unless they are colliquative. The indiscriminate use of astringents is to be deprecated.

A very fatal diarrhœa prevails amongst the native inhabitants of India, to which Mr. Tytler has given the name *Diarrhœ'a hec'tica*, because, like hectic fever, it seems to obtain habitual possession of the constitution, to operate upon it with scarcely any perceptible intermission, and, in general, to defy the most powerful remedies.

Diarrhœa Adiposa, *Gras-fondure*—d. cum Apepsiâ, Lientery—d. Carnosa, Dysentery—d. Chylosa, Cœliac flux—d. Chymosa, Cœliac flux—d. Crapulosa, see Diarrhœa—d. Cruenta, Hæmatochezia—d. Dyspeptica, Lientery—d. Hepatica, Hepatirrhœa—d. Indigestorum, Lientery—d. Lienteria, Lientery—d. Stercoraria, see Diarrhœa—d. in Urinâ, Diabetes.

DIARTHRO'DIAL, *Diarthrodia'lis*. Relating to diarthroses or movable articulations, as *diarthro'dial articulation*. *Diarthro'dial cartilages* or *incrusting cartilages* are the cartilages which invest the articular extremities of bones.

DIARTHRO'SIS, from διαρθροω, (δια, and αρθροω, 'I separate the limb,') 'I articulate.' *Dearticula'tio*, *Prosarthro'sis*, *Aparthro'sis*, *Abarticula'tio*, *Coarticula'tio*. (F.) *Emboîture*. A movable articulation. One which permits the bones to move freely on each other in every direction, as in the case of the shoulder joint.

DIASATYRI'ON, from δια, and σατυριον, 'the *orchis mas'cula*.' An electuary, of which this plant formed the base. (?)—Myrepsus. The ancients attributed to it the faculty of exciting the organs of generation.

DIASCINCI ANTIDOTUS, Mithridate.

DIASCOR'DIUM, from δια, and σκορδιον, 'the water germander.' An electuary, so called because this plant enters into its composition. The Parisian Codex has a formula for its preparation, under the title, *Electua'rium opia'tum astrin'gens* vel *diascor'dium*. (*R. fol. scord.* ℥iss, *rosar. rubr.*, *bistort. rad.*, *gentianæ*, *tormentillæ*, *sem. berber.* āā ℥ss, *zingib.*, *piper. long.* āā ℥ij, *cassiæ ligneæ*, *cinnamom.*, *dictamn. cretens.*, *styrac calamit.*, *galban.*, *gum. acaciæ* āā ℥ss. *bol. oriental. præpar.* ℥ij, *extract. vinos. opii* ℥ij, *mel. rosat. præp.* ℔ij, *vin. hispan.* ℔ss: *fiat electuarium*.) In place of the *styrax calamita*, the balsam of tolu or benjamin may be used. The opium is, in this preparation, in the proportion of 1 to 184. The diascordium is employed in diarrhœa and dysentery, as a tonic, stomachic, and astringent. The common dose is from a scruple to a drachm and a half. See Pulvis cretæ compositus.

DIASOSTIC, Prophylactic.

DIASPASIS, Divulsio.

DIASPER'MATON. The ancient name of two cataplasms, composed of seed.—Galen, Paulus.

DIASPHYXIS, Pulse.

DIASTASÆ'MIA, (F.) *Diastasémie*, from διαστασις, 'separation,' and 'αιμα, 'blood.' A pathological condition, characterized by a separation of the elements of the blood globules;—the fibrin and albumen separating also from the colouring matter, whilst the fibrin attaches itself to the valves of the heart.—Delafore.

DIASTASE. Same etymon as the next but one. A vegetable principle, allied in its general properties to gluten, which appears in the germination of barley and other seeds, and, by its presence, converts their starch into sugar and gum.

DIASTASÉMIE, Diastasæmia.

DIAS'TASIS, from δια, and ιστημι, 'to place,' 'separation,' 'distance.' *Diaste'ma*, *Dissiden'tia*. A separation of bones from each other, and par-

ticularly of the bones of the cranium; of the radius from the ulna, and the fibula from the tibia. The ancients used this word to designate the three dimensions of the body,—length, breadth, and thickness; for the interval separating the patient from the physician; the swelling of varicose veins; the time at which some change occurred in disease, &c.

DIASTEMA, Diastasis, Interstice.

DIASTEMATELYT'RIA, from διαστημα, 'interstice,' and ελυτρον, 'vagina.' An organic deviation, characterized by a longitudinal division or fissure of the vagina.—Breschet.

DIASTEMATENCEPHA'LIA, from διαστημα, and εγκεφαλος, 'the brain.' An organic deviation, consisting in a longitudinal division of the brain.—Breschet.

DIASTEMATOCAU'LIA, from διαστημα, and καυλος, 'trunk.' An organic deviation, characterized by a longitudinal division of the trunk.

DIASTEMATOCHEI'LIA, from διαστημα, and χειλος, 'the leg.' An organic deviation, consisting in a longitudinal division or fissure of the leg.

DIASTEMATOCRA'NIA, from διαστημα, and κρανιον, 'the cranium.' An organic deviation, consisting in a longitudinal deviation of the cranium.

DIASTEMATOCYS'TIA, from διαστημα, and κυστις, 'bladder.' An organic deviation, characterized by a longitudinal division of the urinary bladder.

DIASTEMATOGAS'TRIA, from διαστημα, and γαστηρ, 'the stomach.' An organic deviation, characterized by a longitudinal division of the stomach.

DIASTEMATOGLOS'SIA, from διαστημα, and γλωσσα, 'tongue.' An organic deviation, characterized by a longitudinal division or fissure of the tongue.

DIASTEMATOGNA'THIA, from διαστημα, and γναθος, 'jaw.' An organic deviation, characterized by a longitudinal division of the jaws.

DIASTEMATOME'TRIA, from διαστημα, and μητρα, 'womb.' An organic deviation characterized by a longitudinal division or fissure of the womb.

DIASTEMATOPYEL'IA, from διαστημα, and πυελος, 'pelvis.' An organic deviation, characterized by a longitudinal division or fissure of the pelvis.

DIASTEMATORA'CHIA, from διαστημα, and ραχις, 'spine.' An organic deviation, characterized by a longitudinal division or fissure of the spine.

DIASTEMATORHI'NIA, from διαστημα, and ρις, 'the nose.' An organic deviation, characterized by a longitudinal division of the nose.

DIASTEMATOSTAPHYL'IA, from διαστημα, and σταφυλη, 'uvula.' An organic deviation, characterized by a longitudinal division of the uvula.

DIASTEMATOSTER'NIA, from διαστημα, and στερνον, 'the sternum.' An organic deviation, characterized by a longitudinal division of the sternum.

DIASTEMENTER'IA, from διαστημα, and εντερον, 'intestine.' An organic deviation, characterized by a longitudinal division of the intestine.

DIASTEMA'TIA, from διαστημα. A term employed by Breschet for an organic deviation, characterized by the presence of a fissure in the mesial line of the body.

DIAS'TOLE, from διαστελλω, (δια and στελλω, 'I send,') 'I dilate,' 'I open.' Dilatation of the heart and arteries, when the blood enters their cavities. It is the opposite movement to *systole*, in which the heart and arteries contract to send forth the blood. *Diastole* and *systole* are, consequently, successive movements. *Diastole* occurs simultaneously in the two ventricles. The almost inappreciable time, which elapses between the diastole and systole has been called *perisystole*, and that which succeeds to the diastole, *peridiastole*. When we speak of the *contraction* or *systole* of the heart, as well as of its *diastole* or *dilatation*, we mean that of the ventricles. This dilatation is active.

DIAS'TOLIC, *Diastol'icus*; same etymon. Belonging to the diastole of the heart—as 'diastolic impulse of the heart,' (q. v.)

DIASTOLIC IMPULSE OF THE HEART, see Impulse, diastolic.

DIASTOMO'TRIS, from διαστομοω, (δια, and στομα, 'mouth.') 'I dilate an aperture.' Dilating instruments, such as the different kinds of specula for the mouth, anus, vagina, &c.

DIASTREMMA, Distortion, Perversion, Sprain.

DIASTROPHE, Distortion, Perversion, Sprain.

DIAT'ASIS, *Disten'sio*, from διατεινω, (δια, and τεινω, 'I stretch,') 'I distend.' *Tension.* (q. v.) The reduction of a fracture, by extension and counter-extension.

DIATES'SARON, from δια, and τεσσαρες, 'four.' An electuary, into the composition of which entered four medicines; viz. the roots of *gentian* and *aristolochia rotunda*, and *bay-berries*, each ℥ij, *honey* lbij. The whole was incorporated with *extract of juniper*. The *diapentes* is nothing more than this electuary, mixed with two ounces of *ivory shavings*. The *diatessaron* is tonic, and it was formerly employed in cases of stings and bites of venomous animals. It was regarded as emmenagogue, alexiterial, and alexipharmic.

DIATH'ESIS, from διατιθημι, (δια, and τιθημι, 'to place,') 'I dispose.' Disposition, constitution, affection of the body: predisposition to certain diseases rather than to others. (F.) *Imminence morbide*. The principal diatheses, mentioned by authors, are, the *cancerous*, *scrofulous*, *scorbutic*, *rheumatic*, *gouty* and *calculous*.

DIATHESIS HÆMORRHOIDALIS, see Hæmorrhoids—d Nervosa, Nervous diathesis—d. Sthenica, Sthenia.

DIATRAGACAN'THUS. A powder composed of *gum tragacanth*, ℥ij, *gum Arabic*, ℥j and ℥ij, *starch*, ℥ss, *liquorice*, ℥iij, as much of the *seed of the melon and white poppy; seeds of the water-melon, cucumber, and gourd, and sugar candy*, ℥iij. It was used as a demulcent.

DIATRI'ON or DIATRI'UM, from δια, and τρεις, 'three.' A medicine composed of three ingredients. There were formerly two kinds. The first was called *Diatri'um, Pipe'reon species*, and was formed of *black and long pepper, aniseed, thyme*, and *ginger*. It was highly stimulating. The second species was known under the name, *Diatrinsan'talon, Diatri'um Santalo'rum pulvis*, or *Powder of the three Sanders*. They were considered diaphoretic.

DIATRITA'RII. The *Methodists* were so

called, who pretended to cure all diseases by subjecting the patients for three days to a rigid diet.

DIATRITOS. *Diet of three days.* The means used by the Methodists to cure disease.

DIAZOMA, Diaphragm.

DIAZOS'TER, from διαζωννυμι, (δια, and ζωννυμι, 'to gird,') 'I surround.' The twelfth vertebra of the back, because it corresponds to the girdle. ζωστηρ.

DICEPHALIUM, Bicephalium.

DICEPH'ALUS, *Biceph'alus, Derod'ymus et Iod'ymus,* from δι, 'double,' and κεφαλη, 'head.' A monster with two heads.

DICERAS RUDE, *Ditrachyceras rudis,* see Worms.

DICHAL'CON. A weight, equal to a third part of the obolus.

DICHROMOS, Verbena officinalis.

DICHOPHY'IA, from διχα, 'double,' and φυω, 'I grow.' A disease of the hairs, in which they split and grow forked.

DICIATRIA, Medicine, legal.

DICLIDOSTO'SIS, from δικλις, 'a double door,' and οστωσις, 'ossification.' Ossification of valves—as of the heart.

DICOR'YPHUS, *Dicranus:* from δι, 'double,' and κορυφη, 'the crown of the head.' A monster with a double vertex or cranium.

Dicoryphus Dihypogastrius, Hemipages.

DICRANUS, Dicoryphus.

DI'CROTUS, *Bisfer'iens,* from δις, 'twice,' and κρουω, 'I strike.' An epithet, given to the pulse, when it seems to beat twice as fast as usual. It is synonymous with the term, *rebounding pulse,*—the artery rebounding after striking, so as to convey the sensation of a double pulsation. It has been considered, and with truth, to frequently foretell hemorrhage. In bad cases of typhus, it certainly announces such a tendency.

DICTAMNE, Dictamnus albus—*d. de Crète,* Origanum dictamnus.

DICTAM'NUS ALBUS; from Dictamnus, a town in Crete; *White Fraxinel'la* or *Bastard Dit'tany, Fraxinel'la,* (F.) *Dictame, Fraxinelle.* The fresh root has been considered nervine, anthelmintic, and emmenagogue. It is not used.

Dictamnus Creticus, Origanum dictamnus.

DICTYITIS, Retinitis.

DICTYON, Rete.

DIDYMAL'GIA, from διδυμοι, 'the testicles,' and αλγος, 'pain.' Pain in the testicles.

DIDYMITIS, Hernia humoralis.

DIDYMOS, Gemellus.

DIDYMUS, Testicle—d. Symphyogastrius, Gastrodidymus—d. Symphyohypogastrius, Hypogastrodidymus—d. Symphyoperinæus, Pygodidymus—d. Symphyothoracogastrius, Thoracogastrodidymus.

DIECBOL'ION, from δια, and εκβαλλω, 'I cast out.' A name given, by the ancients, to a remedy, which they believed capable of producing abortion.

DIERENBACH, MINERAL WATERS OF. Dierenbach is a city in Bavaria, two leagues from which is a sulphurous spring.

DIES, *He'mera.* A *Day.* The day is, properly, the period during which the solar light illumines our horizon: but commonly, also, we designate by the word *day,* the period of 24 hours, or *Nycthe'meron,* which is frequently divided into four parts—morning, midday, evening, and midnight. In antiquity, great importance was attached to the observation of days in disease. The medical day is usually reckoned at 24 hours; universally, in estimating the duration of a disease. In parts of the United States, it comprises only the time when the sun is above the horizon, as regards the administration of medicine. If a medicine be ordered to be taken four times a day, it is understood to mean during the 12 hours of day. (F.) *Jour.*

Dies Contemplantes, Indicating days—d. Critici, Critical days—d. Decretorii, Critical days—d. Indicatorii, Indicating days—d. Indices, Indicating days—d. Judicatorii, Critical days—d. Radicales, Critical days.

DIET, *Diæ'ta, Ra'tio victûs.* Originally, this word signified nearly the same thing as *Hygiène* and *Regimen,* i. e. Diet was the employment of every thing necessary for the preservation of health and life. At the present day, it signifies a particular kind of food, and, at times, a privation of food and drink;—abstinence. To put any one upon diet, (F.) *Mettre quelqu'un à la diète,* means to deprive him of his usual nourishment:—*milk diet,* means a diet of milk, &c. See Aliment, Dietetics, Hygiene, and Regimen.

Diet Scale. Every well regulated hospital has certain dietetic regulations. The following *Table of Dietary* shows the particular regimen selected for the sick, in certain hospitals.

DIET-TABLE OF DIFFERENT HOSPITALS OF GREAT BRITAIN, IRELAND, AND THE UNITED STATES.

I. ENGLAND.

London Hospitals.

1. *London Hospital.*

	COMMON DIET.	MIDDLE DIET.	LOW DIET.	MILK DIET.
Per Day	12 oz. Bread. 1 pint Porter. *Men.* ½ pint do. *Women.*		8 oz. Bread.	12 oz. Bread.
Breakfast	Gruel.		Gruel.	Gruel.
Dinner	8 oz. Beef, with Potatoes, thrice a week. 8 oz. Mutton, with Potatoes, twice a week. 8 oz. Potatoes and Soup, with vegetables, twice a week.	The same except that 4 oz. of Meat shall be given instead of 8 oz.	Broth.	1 pint Milk.
Supper	1 pint of Broth		Gruel or Broth.	1 pint Milk.

2. *St. Bartholomew's Hospital.*

	COMMON DIET.	BROTH DIET.	THIN OR FEVER DIET.	MILK DIET.
Daily....	Milk Porridge. 12 oz. Bread. 6 oz. Mutton or Beef. 1 pint Broth (with Peas or Potatoes, 4 times a week.) 2 pints Beer, *Men.* 1 pint, *Women.* 1 oz. Butter, twice a week.	Milk Porridge. 12 oz. Bread. 2 pints Broth. 1 pint Beer. 1 oz. Butter.	Milk Porridge. 12 oz. Bread. 1 pint of Milk, with Tapioca, Arrow-root, Sago, or Rice, as may be prescribed. Barley water.	Milk Porridge. 12 oz. Bread. 2 pts. Milk, with Tapioca, Arrow-root, Sago, or Rice, as may be prescribed. Barley water. 1 oz. Butter. Bread Pudding, 3 times a week, when ordered.

3. *St. Thomas's Hospital.*

	FULL DIET.	MILK DIET.	DRY DIET.	FEVER DIET.
Daily.....	2 pints of Beer; 14 oz. of Bread.	12 oz. of Bread.	14 oz. of Bread, 2 pints of Beer.	12 oz. of Bread; 2 pints of Beer.
Breakfast.....	Water Gruel.	1 Pint of Milk.	Water Gruel.	Water Gruel.
Dinner.....	½ lb. of Beef, when dressed, twice a week; 4 oz. of Butter, or 6 oz. of Cheese, thrice a week: ½ lb. of Mutton, when boiled, thrice a week.	1 pint of Milk four times a week. Rice Pudding thrice a week.	4 oz. of Butter, four times a week, Rice Pudding and 4 oz of Butter, three times a week.	½ of a lb. of Beef, for tea.
Supper.....	1 pint Broth, four times a week.	1 pint of Milk.		

4. *St. George's Hospital.*

	EXTRA DIET.	ORDINARY DIET.	FISH DIET.	FEVER DIET.	BROTH DIET.	MILK DIET.
Daily.....	12 oz. Bread. *Men.* 2 pints Beer. *Women.* 1½ pints Beer.	12 oz. Bread. 1 pint Beer.	12 oz. Bread.	12 oz. Bread. Barley Water *ad libitum.*	12 oz. Bread.	12 oz. Bread.
Breakfast...	1 pint Tea, ½ pint Milk.	1 pint Tea. ½ pint Milk.	1 pint Tea. ½ pint Milk.	1 pint Tea. ½ pint Milk.	1 pint Tea. ½ pint Milk.	1 pint Tea. ½ pint Milk.
Dinner.....	12 oz. Meat, roasted (weighed with the bone before it is dressed) four days,—boiled three days. ½ lb. Potatoes.	One half the meat allowed for extra diet. ½ lb. Potatoes.	4 oz. of plain boiled white fish (as Whiting, Plaice, Flounders, or Haddock.)	Arrow-root, &c., must be specially directed.	1 pint Broth. 6 oz. light Pudding.	1½ pints Rice Milk four days. ½ lb. Bread or Rice Pudding three days.
Supper.....	1 pint Gruel. ½ pint Milk.	1 pint Gruel. ½ pint Milk.	1 pint Gruel. ½ pint Milk.	1 pint Tea. ½ pint Milk.	1 pint Gruel. ½ pint Milk.	½ pint Milk

5. *Guy's Hospital.*

	FULL DIET.	MIDDLE DIET.	LOW DIET.	MILK DIET.	FEVER DIET.
Daily.....	14 oz. Bread. 1½ oz. Butter. 1 quart Table Beer. 8 oz. Meat when dressed.	12 oz. Bread. 1½ oz. Butter. 1 pint Table Beer. 4 oz. Meat, when dressed, and ½ pint Broth.	12 oz. Bread. 1 oz. Butter. Tea and Sugar.	12 oz. Bread. 1 oz. Butter. 2 pints Milk.	6 oz. Bread. 1 oz. Butter. Tea and Sugar.
	Half a pound of Beef, (for Beef-tea,) or Arrow-root or Sago, when ordered.				
	For each diet, Gruel or Barley-water, as required.				

6. *Westminster Hospital.*

	FULL DIET.	MIDDLE DIET.	LOW DIET.		SPOON, OR FEVER DIET.	INCURABLES' DIET.
			Fixed.	*Casual.*		
Daily.....	14 oz. Bread.	10 oz. Bread.	½ lb. Bread.	—	½ lb. Bread.	¾ lb. Bread. ½ lb. Meat. ½ lb. Potatoes. ½ pint Milk. 1 pint Porter.
Breakfast...	1 pint Milk Porridge, or Rice Gruel.	1 pint Milk Porridge, or thin Gruel.	1 pint Tea, with Sugar and Milk.	—	1 pint Tea, with Sugar and Milk.	
Dinner.....	½ lb. Meat roasted, boiled, or chops. ¾ lb. of Potatoes.	¼ lb. Meat roasted, boiled, or chops. ¾ lb. of Potatoes.	No fixed Diet for Dinner.	1 pint of Broth, or ½ lb. of Bread, or Rice Pudding, or 1 pint Beef Tea, or a Chop, or Fish.	Barley Water.	
Supper.....	1 pint Milk Porridge, or Rice Gruel.	1 Pint Milk Porridge, or thin Gruel.	1 pint Tea, with Sugar and Milk.	—	1 pint Tea, with Sugar and Milk.	

7. *Middlesex Hospital.*

	DIÆTA CARNIS, OR MEAT DIET.	DIÆTA JUSCULI, OR SOUP DIET.	DIÆTA LACTIS, OR MILK DIET.	DIÆTA SIMPLEX, OR SIMPLE DIET.	CANCER DIET.
Daily	12 oz. Bread.	12 oz. Bread.	12 oz. Bread.	6 oz. Bread.	12 oz. Bread. ½ lb. Meat. ½ lb. Potatoes. 1 pint Milk.
Breakfast	1 pint Milk.	1 pint Milk.	1 pint Milk.	1 pint Barley-water.	
Dinner	*Physician's Patients.* ½ lb. Potatoes, 4 oz. dressed meat (beef or mutton,) roast and boiled alternately, 4 days. 4 oz. Meat in Soup, 3 days. *Surgeons' Patients.* ½ lb. Potatoes, 4 oz. dressed meat (beef or mutton,) roast and boiled alternately.	1 pint Soup made with 4 oz. Beef, alternately with 1 pint of Broth with Barley.	½ pint Milk with Rice Pudding, 4 days, and with Batter Pudding 3 days.	1 pint Gruel.	
Supper	1 pint Gruel alternately, with 1 pint of Barley-water.	1 pint Gruel.	½ pint Milk, or 1 pint Gruel.	1 pint of Gruel or Barley-water.	

8. *King's College Hospital.*

Daily	1 pint Beer, or ½ pint Porter. 14 oz. Bread.	14 oz. Bread.	1 lb. Bread.	8 oz. Bread.	—
Breakfast	1 pint Milk Porridge.	1 pint Milk Porridge.	1 pint Milk.	1 pint Gruel.	1 pint Gruel.
Dinner	½ lb. Meat. ½ lb. Potatoes.	½ lb. Meat. ½ lb. Potatoes.	1 pint Milk.	1 pint Broth.	2 pints Barley-Water.
Supper	1 pint Milk Porridge.	1 pint Milk Porridge.	1 pint Gruel.	1 pint Milk Porridge.	1 pint Milk Porridge.

9. *Dreadnought Hospital Ship.*

	FULL DIET.	ORDINARY DIET	LOW DIET.	MILK DIET.	FEVER DIET.
Breakfast	1 pint Tea. 1 lb Bread.	Ditto. Ditto.	Ditto. ½ lb. Bread.	Ditto. 1 lb. Bread.	Ditto.
Dinner	½ lb Meat. ½ lb Potatoes. 2 pints Beer, (if ordered.)	½ lb. Meat. ½ lb. Potatoes. 1 pint Beer, (if ordered.)	1 pint of Beef Tea.	1 pint Milk.	Gruel.
Supper	1 pint Broth.	1 pint Broth or Gruel.	1 pint Gruel or Milk, (if ordered.)	1 pint Milk.	Gruel or Barley-Water.

10. *North London Hospital.*

	FULL DIET.	MIDDLE DIET.	LOW DIET.	MILK DIET.
Daily	16 oz. Bread. ¼ pint Milk. ½ lb. Meat and ½ lb Potatoes 4 days. 1 pint Soup or Rice three days.	16 oz. Bread. ¼ pint Milk. 1 pint Soup or Rice.	8 oz. Bread. ¼ pint Milk. Oatmeal for Gruel.	17 oz Bread. 2 pints Milk.

HOSPITALS.	ORDINARY DIET.	LOW DIET.
LIVERPOOL.	*Breakfast.*—A pint of milk porridge, breaded every morning. *Dinner.*—(1, 5, 7*)—Boiled beef and vegetables.——(2)—Rice, milk, and bread.——(3)—Stewed beef and potatoes.——(4)—Pea soup and bread.——(6)—Ale, gruel, and bread. *Supper.*—A pint of broth and bread on Sunday and Thursday. A pint of milk and bread on the other days. FULL DIET.—The same as the ordinary diet.	Consists throughout the day of milk porridge, common batter, or rice pudding. The ale and beer are bought.

* The figures in parentheses denote the days of the week.

Hospitals.	Ordinary Diet.	Low Diet.
Bristol.	*Breakfast*.—On Sunday, Tuesday, Thursday, and Saturday, milk porridge; Monday, Wednesday, and Friday, meat broth; 12 oz. of bread on meat days; 14 oz. on the other days. *Dinner*.—(1, 3, 5)—Three-fourths of a pound of meat, with vegetables; two pints of beer daily.—(2, 4, 6, 7)—A pint of gruel or pap. *Supper*.—A wine pint of gruel of meal broth, on Sunday; 2 oz. of cheese for the men, one-fourth of an oz. of butter for the women, on Monday, Wednesday, Friday, and Saturday. Full Diet.—The patients have meat every day.	*Breakfast*.—A wine quart of milk porridge or milk. *Dinner*.—A wine quart of weak broth. *Supper*.—The same as breakfast, 14 oz. of bread, and barley water for common drink. Twenty bushels of malt, 15 pounds of hops, to 14 gals. of strong ale; 21 bushels of malt, and 12 pounds of hops, to 360 gals of ale; 11 bushels of malt, 7 pounds of hops, to 360 gals. of small beer.
Birmingham. Revised 1819.	*Breakfast*.—To each man a pint and a-half of milk porridge, with 4 oz. of bread added to it. To each woman or child, one pint of milk porridge, without bread. To each patient 2 oz. of bread daily. *Dinner*.—(1, 3, 5)—To each man 8 oz. of baked or boiled meat; to each woman or child, 6 oz. To each patient, 6 oz. of vegetables, and one pint of beer daily.——(2)—To each man, a quart of rice or barley broth, made with a variety of vegetables; to each woman or child, one pint and a-half.——(4)—Twelve ounces of boiled rice or bread pudding.——(6)—Four oz. of boiled or baked meat, a pint of rice or barley broth, made with a variety of vegetables.——(7)—Six oz. of baked rice or bread pudding, or a pint of rice or barley broth, made with a variety of vegetables. *Supper*.—A pint of broth, milk porridge, or gruel. Full Diet.—Breakfast the same as in ordinary diet. Dinner, 6 oz. of boiled or baked meat, 6 oz. of vegetables, 6 oz. of baked rice or bread pudding. Supper, the same as ordinary diet.	*Breakfast*.—The same as ordinary diet. *Dinner*.—A pint of broth or rice milk, 6 oz. of baked rice or bread pudding to each patient every day. *Supper*.—The same as ordinary diet.

II. SCOTLAND.

Edinburgh.	*Breakfast*.—One mutchkin of porridge, three gills of milk or beer; or five and one fourth ounces of fine bread, milk or beer. *Dinner*.—(1, 4)—One choppin of broth, 8 ounces of butcher's meat boiled in the broth, or beef-steak; five and one-fourth ounces of bread.—(2, 5, 7)—A choppin of broth made of beef and bones, barley, groats, potatoes, and vegetables; five and a-half ounces of bread——(3, 6)—Potato soup, with beef and veal, or bones; bread as above. *Supper*.—As the breakfast each day. Full Diet.—At discretion.	At discretion.
Glasgow.	*Breakfast*.—Milk porridge, quantity not limited, with half a mutchkin of sweet milk, or one mutchkin of buttermilk or beer. *Dinner*.—(1)—Broth made of barley, vegetables, and the dripping of the meat roasted during the week, with a quartern loaf to a man, and half to a woman.——(2, 4)—Beef boiled; 8 oz. to the men, and 6 oz. to the women; a quartern loaf to a man, and half to a woman, or vegetables——(3, 6)—Broth, made with beef, barley, and vegetables; a quartern loaf to men, and half to women.——(5)—Potato soup, with cow heels, bones, &c——(7)—Six oz. of cheese to men, 4 oz. to women; bread as above. *Supper*.—As the breakfast each day. Full Diet.—At discretion.	At discretion.

III. IRELAND.

5. Hospitals of House of Industry.	*Per diem*.—Sixteen oz. of white bread, one quart of new milk, and one quart of buttermilk for whey. Full Diet.—Two ounces of bread *per diem*, one quart of broth, one quart of new milk.	One pint of flummery *per diem*, one quart of new milk, and one quart of buttermilk for whey.
Stephen's Hospital.	*Breakfast*.—Half a pound of bread, one pint of milk. *Dinner*.—(1, 2, 3, 5, 7)—One quart of soup, half a pound of bread, or two pounds of potatoes; one pint of milk or beer.——(4, 6)—Twelve oz. of bread, one quart of sweetened gruel.	Daily, half a pound of bread, two quarts of new milk, and one quart of buttermilk.
Royal Hospital, Phœnix Park.	*Breakfast*.—One pint of oatmeal or rice gruel. *Dinner*.—Half a pound of meat, three-fourths of a pound of bread; one pound of potatoes. *Supper*.—One pint of oatmeal or rice gruel. Full Diet.—Three-fourths of a pound of meat, one pound of bread, half a pound of potatoes, one quart of beer.	*Breakfast*.—Tea. *Dinner*.—Half a pound of bread made into panada or pudding.

III. IRELAND.—Continued.

Richmond Hospital.	*Breakfast.*—One quart of stirabout, one pint of new milk. *Dinner.*—Bread, 8 oz.; soup, one quart. *Supper.*—Bread, 4 oz.; new milk, one pint. Full Diet.—Breakfast, bread, 8 oz; new milk, one pint.—Dinner, bread, 8 oz.; mutton or beef, 8 oz.—Supper bread, 4 oz.; new milk, one pint.	*Breakfast.*—Flummery, one pint; new milk, one pint. *Supper.*—Half a pound of bread, one pint of milk.
Belfast Hospital.	*Breakfast.*—One pint of stirabout, one pint of new milk. *Dinner.*—Half a pound of bread, one pint of new milk. *Supper.*—One pint of flummery, one pint of new milk. Full Diet.—Breakfast, one quart of stirabout, one pint of new milk.—Dinner, 2 lbs. of potatoes, one pint of milk.—Supper, one pint of flummery, one pint of new milk.	*Per diem.*—Quarter of a pound of bread, one quart of gruel, three pints of new milk, half a pint of flummery. Barley water at occasions.
Cork Fever Hospital.	*Breakfast.*—One half quartern loaf for every four, and one pint of new milk each. Under 12 years, half a quartern loaf for every eight. *Dinner.*—(1, 3, 5)—One pound of beef, and two pounds of potatoes. Under 12 years, half a pound of beef, and one pound of potatoes.—(2, 4, 6, 7)—Potatoes and milk. *Supper.*—One pint of milk and one of stirabout, for adults; half do. for children.	*Breakfast.*—One-fourth of a lb. of bread, with milk and water sweetened. *Dinner.*—Gruel, broth, wine, and porter, as ordered by the physicians.

IV. UNITED STATES.

Pennsylvania Hospital, Philadelphia.	*Breakfast.*—Tea, coffee, or chocolate, with sugar or molasses and milk, and common baker's bread at discretion. *Dinner.*—Soup, always;—meat of two kinds—mutton and beef, generally—pork frequently; vegetables, according to the season; potatoes and rice, always. *Supper.*—Tea and bread: no butter allowed either to breakfast or supper, unless prescribed.	Gruel, gum water, barley water; and other articles prescribed by the physician.
Philadelphia Hospital, (Blockley.)	House Diet.—Arrow-root, grue, sago, tapioca, rice, beef tea, beef essence, chicken water, rice water, barley water, gum water, flaxseed tea, lemonade. (The diet on which the sick are placed on entering the house until otherwise directed.) Moderate Diet.—Tea, crackers, broth, rice, mush, milk, potatoes, &c. Full Diet.—Bread, coffee, tea, white meat, mutton, beef, ham, eggs, butter, soup, potatoes, &c.	The kind and quantity left to the physician. The House Diet may be regarded as low diet.
New York Hospital, New York City.	*Breakfast.*—Bread and black tea, one ounce of tea to every six, and a pint of milk to every eight patients. *Dinner.*—Tuesdays, Wednesdays, Thursdays, and Saturdays, beef soup, with beef and potatoes, and bread. On Mondays, boiled rice, with one gill of molasses. *Supper.*—The same as breakfast.	Special diet is directed by the attending physician, and adapted to each case.

The *Diet Scale of the British Navy* allows from 31 to 35½ ounces of dry nutritious matter daily; of which 26 ounces are vegetable, and the rest animal—9 ounces of salt meat, or 4½ ounces of fresh. In the Edinburgh workhouse the total allowance of dry food is about 17 ounces—13 ounces vegetable, and 4 ounces animal. In the Edinburgh children's poor house, the diet consists of milk and porridge, barley broth and bread, amounting to 13 ounces of vegetable food to 3 ounces of animal. These allowances have been found ample for the maintenance of health. Perhaps the case of the smallest quantity of food on which life was vigorously supported was that of Cornaro,—not more than 12 ounces a day, chiefly of vegetable matter, for a period of 58 years.

DIET DRINK. A decoction or potion, variously composed, and used in considerable quantity, for the purpose of purifying the blood. The *Decoctum Lusitanicum*, or *Lisbon Diet-drink*, is one of the most celebrated. See Decoctum Sarsaparillæ Compositum.

DIETETICS, DIÆTETICE, DIÆTETICA, *Medici'na Diætet'ica;* same etymon, (F.) *Diététique* A branch of medicine, comprising the rules to be followed for preventing, relieving, or curing diseases by diet. Dietetics is diet administered according to principle. It is an important part of Hygiene, (which see.) A well regulated system of diet has great power in checking disease, and likewise in preventing it. A proper knowledge of dietetics is, indeed, as important as that of the Materia Medica, strictly so called.

Dietetics is used, also, synonymously with *Hygiene.*

DIÉTÉTIQUE, Dietetics.

DIETET'ISTS, *Diætetis'ti.* Physicians who apply only the rules of dietetics to the treatment of disease.

DIEU-LE-FILT, MINERAL WATERS OF. The waters of Dieu-le-filt, in France, are chalybeate, and much sought after.

DIEURYSMUS, Dilatation.

DIEX'ODOS, from διὰ, and ἔξοδος, 'an exit or way out.' *Di'odos.* Any opening, by which an excretion takes place.

DIFFICULTAS INTESTINORUM, Dysentery.

DIFFLATIO, Perspiration.

DIFFORMITÉ, Deformation.

DIFFU'SIBLE, (stimulants) from *diffundere*, (*dis* and *fundere*, *fusum*, 'to pour,') 'to pour apart or abroad.' Those stimulating medicines, which augment the action of the vascular and nervous systems in an acute but transitory manner.

DIGAS'TRICUS, from δίς, 'twice,' and γαστὴρ, 'a belly:' *Biven'ter, B. Maxill'æ, Dep'rimens Maxillæ Biven'ter, Bigaster, Mastoïdo-hyogénien, Mastoïdo-génien*—(Ch.,) (F.) *Digastrique, Abais-*

seur de la machoire inférieure. The name *Digastricus*, was formerly given to several muscles. It is now restricted to one of the muscles of the superior hyoid region. The digastricus is thick and fleshy at its extremities; thin and tendinous at its middle. It is attached to the mastoid groove of the temporal bone, and to a fossette at the side of the symphysis menti. Its tendon passes through an aponeurotic ring, which is attached to the os hyoides.

The use of the digastricus is, to depress the lower jaw, or to raise the os hyoides, and to carry it forwards or backwards, as in deglutition.

The strong double-bellied muscle, which forms the gizzard of birds, is also called *Digastricus.*

Digastricus Cranii, Occipito-frontalis.

DIGASTRIQUE, Digastricus.

DIGERENTIA, Digestives.

DIGES'TIBLE, *Concoc'tûs hal'ilis.* Capable of being digested. All food is not equally digestible, and some of the most nourishing is the least so:—the fat of meat, for example Certain substances again are entirely rebellious. The following table exhibits the time required for the stomachal digestion of different alimentary substances, in a well-known case, which fell under the care of Dr. Beaumont. The table is extracted from the Author's Human Health, Philadelphia, 1844. The most digestible substances are taken as the standard, which has been arbitrarily fixed at 1,000; and accordingly, *aponeurosis*, the first article in the table, requiring 3 hours, whilst *pigs' feet soused*, *rice*, &c. require but one, its digestibility, compared with that of these aliments, is as 333 to 1000; and so of the others. It need scarcely be said, that all these tabular results apply, in strictness, to the individual concerned only; yet they afford useful comparative views, which with exceptions depending upon individual peculiarities, may be regarded as approximations, applicable to mankind in general.

Aliments.	Form of preparation.	Time required for stomachal digestion.	Ratio of digestibility compared with the most digestible articles in the table.*	Aliments.	Form of preparation.	Time required for stomachal digestion.	Ratio of digestibility compared with the most digestible articles in the table.
		h. m.				h. m.	
Aponeurosis	boiled	3	333	Marrow, animal, spinal	boiled	2 40	375

Hare, animal	fried	4	250	Venison, steak	broiled	1 35	631
Lamb, fresh	boiled	2 30	400				
Liver, beef's, fresh	do.	2	500				

* Pigs' feet soused, rice, and tripe soused, being the most digestible articles in the table, are estimated at 1000.

† In the case of oils, and other substances of similar nature, which undergo little digestion in the stomach, the time merely indicates the period that elapses before they are sent into the duodenum.

DIGESTIO DEPRAVATA, Dyspepsia—d. Difficilis, Dyspepsia—d. Læsa, Dyspepsia.

DIGES'TION, *Digest'io*, from *digerere*, 'to dissolve.' *Coc'tio*, *Pep'sis*. Digestion is a function, by means of which alimentary substances, when introduced into the digestive canal, undergo different alterations. The object of this is to convert them into two parts; the one, a reparatory juice, destined to renew the perpetual waste occurring in the economy: the other, deprived of its nutritious properties, to be rejected from the body. This function is composed of a series of organic actions, differing according to the particular organization of the animal. In man they are eight in number, viz. 1. Prehension of food. 2. Mastication. 3. Insalivation. 4. Deglutition. 5. Action of the stomach. 6. Action of the small intestine. 7. Action of the large intestine. 8. Expulsion of the fæces.

Digestion is also a *pharmaceutical* operation, which consists in treating certain solid substances with water, alcohol, or other menstruum, at a slightly elevated temperature; for example, in a sand-bath, or by leaving them exposed for some time to the sun.

DIGESTIVE TUBE, Canal, alimentary.

DIGES'TIVES, *Digesti'va*, *Digeren'tia*; same etymon. (F.) *Digestifs*. A term given, by surgeons, to those substances, which, when applied to a wound or ulcer, promote suppuration; such as the *ceratum resinæ*, *warm cataplasms*, *fomentations*, &c. Dr. Paris uses the term *Digestive Texture* for the particular organic condition of substances which affects their digestibility.

DIG''ITAL, *Digita'lis*; from *digitus*, 'a finger:' having the shape of a finger, *digitated*; or belonging to the fingers.

The *Appen'dix vermifor'mis cæci* is sometimes called Dig''ital Appen'dix.

Digital Arteries, Veins, and Nerves are those distributed to the fingers.

Digital Impressions are the slight impressions observable on the inner surface of the bones of the cranium, which correspond to the cerebral convolutions.

DIGITAL BLANC, Clavaria—d. Cavity, Cornu descendens ventriculi lateralis—*d. Humain*, Clavaria.

DIGITA'LE. Same etymon. (F.) *Doigtier*. A finger stall. The term *Doigtier d'Asdrubal* has been given to a small iron instrument used in measuring the dimensions of the pelvis. Placed at the end of the index finger, it adds to its length and enables it to reach the promontory of the sacrum.

DIGITALINE, see Digitalis.

DIGITA'LIS, from *digitus*, 'a finger,' because its flower represents a finger; *Digita'lis purpu'rea*, *Fox-glove*, *Bac'charis*, *Baccha'r*, *Baccar*. (?) *Family*, Scrophularineæ. *Sex. Syst.* Didynamia Angiospermia; (F.) *Digitale*, *Gants de notre dame*, *Doigtier*. The leaves of this plant, which are indigenous in Great Britain, are powerfully sedative, (diminishing the velocity of the pulse,) diuretic, and sorbefacient. In over-doses, Digitalis causes vomiting, purging, dimness of sight, vertigo, delirium, hiccough, convulsions, and death:—all the symptoms, in short, which characterize the acro-narcotic class of poisons. Its active principle has been called *Dig''italine*.

Digitalis has been administered in inflammatory diseases, phthisis, active hemorrhage, dropsy, &c.; but although it is a powerful remedy, it has not been as much employed as it probably would have been in *particular* cases, owing to the over-strained eulogiums, which many have passed upon it in almost all diseases. The dose is from one to three grains, in the form of pill, which may be repeated every six or eight hours.

Digitalis Minima, Gratiola officinalis.

DIGITA'TION, *Digita'tio*, *Produc'tio denta'ta*, *Inser'tio denticula'ta*, *I. digita'ta*. A division, in the form of a finger. Several muscles, as the *serrati*, exhibit digitations, similar to those which the fingers form, when held separate.

DIGIT''IUM. Desiccation or atrophy of the fingers.—Linnæus. Sauvages calls the same affection *Paronych'ia Digit''ium*.

DIGITORUM TENSOR, Extensor brevis digitorum pedis.

DIG''ITUS, *Dac'tylos*, a *Finger*, (F.) *Doigt*. A name given to the prolongations which form the extremity of the hand. There are five on each hand: the first, or the thumb, *Anticheir*, *Pollex*, *Manus parva majo'ri adjutrix*, *Dig''itus primus*, *D. magnus*, *Pro'manos*, (F.) *Pouce*; the second, the *index* or *indicator*, λιχανος, *Lichanos*; the third, the *me'dius*, μεσος, (F.) *Doigt du milieu*, *middle finger* or *long finger*; the fourth, the *ring finger*, *annula'ris*, παραμεσος, *Param'esos*, (F.) *Annulaire*; and the *little finger*, *Oti'tes*, ωτιτης, *Dig''itus auricula'ris*, (F.) *Auriculaire*, *Petit doigt*. All of these have three phalanges, except the first, which has only two.

Dig''itus Annularis, Annular finger—d. Indicatorius, Index.

Dig''itus Pedis. A *Toe*. (F.) *Orteil*. The toes are five in number, and distinguished numerically, reckoning from within to without. The first is, also, called *great toe*, (F.) *gros orteil*; the fifth, the *little toe*, *petit orteil*. They have nearly the same organization as the fingers.

DIGNATHUS; from δι, 'double,' and γναθος, 'lower jaw.' A monster having two lower jaws.—Gurlt.

DIGNOTIO, Diagnosis.

DIHYSTE'RIA, *Dimi'tra*; from δι, 'double,' and 'υστερη, 'uterus.' The state in which there is a double uterus.

DILACERATIO, Laceration.

DILATANTS, Dilating agents.

DILATATEUR, Dilator—*d. Antérieur du larynx*, Crico-thyroid muscle—*d. Postérieur du larynx*, Crico-arytenoid, posterior.

DILATATIO BRONCHIORUM, Bronchiectasis—d. Ventriculi, Gastrectasis—d. Intestinorum, Enterectasis.

DILATA'TION, *Dilata'tio*, from *dilatare*, (*latum facere*,) 'to enlarge;' *Eurys'mus*, *Aneurys'mus*, *Diurys'mus*. Augmentation of the bulk of a body, occasioned by a separation of some of its molecules. Caloric has the property of dilating all bodies. In Surgery, it means the accidental or preternatural augmentation of a canal or opening; as in aneurisms, varices, &c., or the process of enlarging any aperture or canal. When used so as to obtain a view of parts, as by the speculum, it is termed *Dioptrismus*.

DILATATOIRE, Dilator.

DILATATORIUS, Dilator.

DILA'TING AGENTS, *Dilatan'tia*, (F.) *Di-*

latants. Certain substances used in surgery, either to keep parts separate which have a tendency to unite—as after opening an abscess, to prevent the edges of the incision from uniting; or to increase and dilate openings or canals, either when natural, or formed accidentally or artificially. These agents differ from each other: the chief are,—*prepared sponge tents, gentian root, bougies, sounds, dried peas* for issues, &c.

DILA'TOR, *Dilatato'rius*, (F.) *Dilatateur*, ou *Dilatatoire*. A muscle, whose office it is to dilate certain parts; such as the inspiratory muscles, which dilate the chest.

DILATOR, *Dilatato'rium* (F.) *Dilatateur*. An instrument, used for dilating a wound, excretory canal, or other natural or artificial opening. When employed to obtain an inspection of internal parts, it is termed *Spec'ulum*, *Dioptra* or *Diop'tron*. There are several instruments of this kind, each taking its name from the part to which it is applied; as the *Speculum Oris*, *S. Nasi*, *S. Uteri*, &c.

DILATOR, ARNOTT'S. A modification of the old dilators for strictures of the urethra. It consists of a tube of oiled silk; lined with the thin gut of some small animal to make it air-tight, and fixed on the extremity of a small canula, by which it is distended with air or water, from a bag or syringe at the outer end, whilst a stop-cock or valve serves to keep the air or water in, when received. As soon as the bag is passed within the stricture or strictures, as much air is to be injected into it as the patient can easily bear. The instrument is not much used.

DILATORES ALARUM NASI, Compressor naris.

DILL, Anethum graveolens.

DILLY, Anthemis cotula.

DILUEN'TIA, from *diluo* (*dis*, and *luere*,) 'I wash away.' (F.) *Délayants*. Medicines which have been conceived proper for augmenting the fluidity of the blood and other animal liquids. All aqueous drinks are diluents. They are administered, with great advantage, in various diseases. In fever, water, which is the most familiar diluent, may be freely allowed; the only precaution being to give it *hot* in the cold stage, *cold* in the hot, and *tepid* in the sweating. In diseases, where it is considered necessary to abstract blood largely, diluents should not be given too freely. The abstraction of blood occasions activity of absorption, and the mass is speedily restored. In cases of inflammation of the mammæ, in nurses, it is also obvious, that diluents should not be freely allowed, as they increase the secretion of milk, and add to the irritation. When *demulcents* are exhibited in cases of urinary disease, they act simply as diluents: their mucilaginous portion is digested in the stomach and small intestine,—the watery portion alone being separated by the kidney.

DILWEED, Anthemis cotula.

DIMETRA, Dihysteria.

DINANT, MINERAL WATERS OF. Dinant' is a small town, six leagues from St. Malo, in France, where are mineral waters, containing carbonate of iron, chloride of sodium, &c. They are much esteemed.

DINGEE, Dengue.

DIN'ICA, from δινεω, 'I turn round.' Medicines which relieve vertigo.

DINOS, Vertigo.

DINUS SCOTOMA, Scotodynia—d. Vertigo, Vertigo.

DIOBOLON, Scruple.

DIOCRES, Pastil.

DIODOS, Diexodos.

DIŒCESIS, Dispensation.

DIONCO'SIS, from δια, and ογκος, 'a tumour.' The Methodists applied this name to a sort of tumefaction or plethora, occurring either directly from too great a quantity of fluid circulating in the system, or owing to the retention of substances which ought to be excreted. It is the antithesis to *symptosis*. See Intumescence.

DIONYSIA'NUS, from Διονυσος, 'Bacchus,' who is represented by the poets as wearing horns. One who has long or horn-like excrescences.

DIONYSIS'CUS, same etymon. One who has a long horn-like excrescence on the frontal region.—Vogel.

DIOPHTHALMUS, Binoculus.

DIOPTRA, Speculum, see Dilator.

DIOPTRON, Speculum, see Dilator.

DIOPTRISMUS, Dilatation.

DIORTHO'SIS, from διορθοω, 'I make straight.' The reduction of a fractured or luxated limb.

DIOSCOREA, see Yam.

DIOS'MA, D. crenata.

DIOS'MA CRENA'TA, from διος, 'divine,' and οσμη, 'odour.' *Baros'ma crena'ta*, *Agathos'ma crena'tum*, *Buchu Leaves*—*Diosma* (Ph. U. S.)—*Buckho*. A South African plant, the powder of whose leaves is used by the Hottentots to perfume their bodies. It has been employed in chronic affections of the bladder and urinary organs in general. It has also been given in cholera.

DIOS'PYROS LOTUS, apparently from διος, 'divine,' and πυρος, 'wheat,' but why is not clear; *Faba Græca*, the *Indian Date Plum*. (F.) *Plaqueminier d'Europe*. This tree grows in some of the southern parts of Europe. Its fruit is very astringent, and has been recommended in dysentery and hemorrhages.

DIOS'PYROS VIRGINIA'NA, *Lotus Virginia'na*, *Persim'mon*. A common tree in the middle parts of the United States. The fruit, *Persim'mons*, *Yellow Plums*, *Winter Plums*, *Seeded Plums*, which is only eatable after frost (when it is tolerable) is sometimes made into cakes with bran. These, being dried in an oven, are kept to make beer. When bruised in water, fermentation takes place. The unripe fruit is distressingly acerb and astringent. The bark of the tree is extremely bitter, *Diospyros* (Ph. U. S.); and may be used where bitters are indicated.

DIOTA or DYOTA. A wooden cup, lined with a composition of *resin*, *cinnamon*, *cloves*, and *ginger*, to give more flavour to beer. It was formerly much used in the north of Europe.

DIPH'RYGES. The oxide of copper, more or less pure. The ancients reckoned three kinds of diphryges, which they used as astringents.

DIPHTHERIA, Diphtheritis.

DIPHTHÉRITE BUCCALE, Stomatitis pseudomembranous.

DIPHTHERI'TIS, *Diphthe'ria*, *Diphtherit'ic Inflammation*, *Pellic'ular Inflammation*, from διφθερα, 'a membrane.' A name given by M.

Bretonneau, to a class of diseases, characterized by a tendency to the formation of false membranes, and which affect the dermoid tissue, as the mucous membranes, and even the skin.

Diphtheritis of the Throat, Angina pellicularis.

Diphtheritis Trachealis, Cynanche trachealis.

DIPLASIASMUS, Duplication.

DIP'LOË, from διπλοω, 'I double,' *Diplo'sis, Meditul'lium, Medium Calvariæ Discri'men.* The cellular structure, which separates the two tables of the skull from each other. The ancients applied the term, also, to the proper coat of the uterus (?)—Rolfink, in Castelli.

The Diploë has the same use as the cellular structure of bones in general. See Cancelli.

DIPLOGEN'ESIS; διπλοος, 'double,' and γενεσις, 'generation.' An organic deviation, which is owing to the union of two germs.

DIPLOLEPIS GALLÆ TINCTORIÆ, see Quercus infectoria.

DIPLO'MA. Same etymon as Diploë. A letter or writing conferring some privilege. Usually applied to the document, certifying that a person has obtained the title of Doctor. It was so called because formerly written on waxed tables, folded together. Diploma is also used in pharmacy for a vessel with durable walls, as a water bath.

DIPLO'PIA, from διπλοος, 'double,' and οπτομαι, 'I see.' *Visus Duplica'tus, Ditto'pia, Dittop'sia, Amphamphoterodiop'sia, Amphodiplopia, Double Vision* (F.) *Bévue.* An affection of the sight, in which two distinct sensations are produced by the same object, which consequently seems double. Sometimes more than two are seen; but still the disease is termed *Diplo'pia* and *Suffu'sio Mult'iplicans.* This affection arises from some derangement in the visual axes; in consequence of which, the images are not impressed on corresponding parts of the retina of each eye.

DIPLOSIS, Diploë, Duplication.

DIPLOSO'MA; from διπλοος, 'double,' and σωμα, 'body.' The *Diplosoma crenata* is an imperfectly described entozoon, which has been passed from the urinary bladder. It varies in length from four to six or eight inches, and is thinnest at the middle, where it is bent at an acute angle upon itself, so that the two halves hang nearly parallel, and give to it an appearance as if two worms had been tied together by their heads. It has been confounded with the *Spiroptera hominis*, (q. v.)

DIPNOOS, from δις, and πνοη, 'breath.' Having two vent holes. *Bispirus.* An epithet applied to wounds which pass through any part, and admit the air at both ends.—Galen.

DIPROSO'PUS, *Iriod'ymus*, et *Opod'ymus*, from δις, 'double,' and προσωπον, 'countenance.' A monster having a double face.

DIPSA, Thirst.

DIPSACOS, Diabetes.

DIP'SACUS SYLVES'TRIS, from διψα, 'thirst,' said to be so called owing to the leaves being so placed as to hold water. *Cultivated Teasel*, (F.) *Cardère.* The roots of this European plant are diuretic and sudorific. The water, which collects at the base of the leaves, has been recommended as an eye-water.

Dip'sacus Fullo'num, *Herba Car'dui Ven'eris;* (F.) *Cardère cultivé, Chardon à foulon, Chardon à bonnetier*, has had similar properties ascribed to it. Both have been also regarded as stomachic.

DIPSET'ICOS, from διψα, 'thirst.' A remedy believed to be capable of exciting thirst. See Alterative.

DIPSOMANIA, from διψα, 'thirst,' and mania. Drunkenness: also, delirium tremens.

DIPSO'SIS. Same etymon; *Morbid thirst.* The desire, for drinking, excessive or impaired. A genus in the class *Cœliaca*, order *Enterica*, of Good.

Dipso'sis Avens, Polydipsia—d. Expers, Adipsia.

DIPYRE'NON, from δις, 'twice,' and πυρην, 'a kernel.' A *specil'lum* or probe with two buttons or kernels—one at each end.

DIPYRITES, Biscuit.

DIPYROS, Biscuit.

DIRCA PALUS'TRIS, *Leatherwood, Swamp Leatherwood, Moosewood, Swampwood, Ropebark, Bois de plomb, (Canada.)* An indigenous shrub, which grows in boggy woods and low wet places throughout the United States. It is analogous to mezereon, in its action,—six or eight grains of the fresh bark producing violent vomiting, preceded by a sense of heat in the stomach, often followed by purging. Applied to the skin, the bark vesicates.

DIREC'TOR, *Itinera'rium*, from *dirigere, directum*, (*dis*, and *regere*, 'to rule,') 'to direct.' A *Conductor*, (q. v.) A grooved sound for guiding a knife, in dividing any part. (F.) *Sonde cannélée.*

Director Penis, Ischio-cavernosus.

DIRT-EATING, Chthonophagia.

DISCEPTUM, Diaphragm.

DISCHARGE', (*dis*, and *charge*,) *Ec'roë, Fluxus, Profiu'vium.* (F.) *Écoulement.* In pathology, an increased discharge from any part, that naturally secretes a fluid.

DISCHROA, Dyschroa.

DISCREET', from *discernere, discretum*, 'to separate,' *Discre'tus, Intertinc'tus, Separated*, (F.) *Discret.* This epithet is given to certain exanthemata, in which the spots or pustules are separated from each other. It is opposed to confluent.

Discre'ta Purga'tio. The purgation or expulsion of some particular matter.

DISCRET, Discreet.

DISCRETIVUS, Diagnostic.

DISCRETORIUM, Diaphragm.

DISCRI'MEN, *Separation, Division.* A bandage, used in bleeding from the frontal vein; so called, because, in passing along the sagittal suture, it divides the head into two equal parts.

Discrimen Calvariæ Medium, Diploë—d. Narium, Septum N.

Discrimen Nasi; a bandage, in the form of the letter X, intended to support the nose, in transverse wounds of the organ.

Discrimen Thoracis et Ventris, Diaphragm.

DISCUSSIFS, Discutients.

DISCUSSIVA, Discutients.

DISCUSSIO, Resolution.

DISCUSSORIA, Discutients.

DISCU'TIENTS, *Discutien'tia, Resolven'tia, Discussi'va, Discusso'ria*, from *discutere*, 'to shake apart,' (*dis*, and *quatere*, 'to shake.') (F.) *Discussifs.* Substances which possess the power of repelling or resolving tumours.

DISEASE', from old French *désaise*, *dis*, and *ease*: *Mαrbus*, *Nosos*, *Nose'ma*, *Pathos*, *Pathe'ma*, *Ægritu'do*, *Arrhos'tia*, *αρρωστια*, *Arrhoste'ma*, *αρρωστημα*, *Arrhostenia*, (F.) *Maladie*. An opposite state to that of health, consisting in a change either in the position and structure of parts, or in the exercise of one or more of their functions.

DISEASE, BLUE, Cyanopathy—d. of Bright, Kidney, Bright's Disease of the—d. English, Rachitis—d. Extrinsic, External disease—d. Pretended, Feigned disease—d. Simulated, Feigned disease—d. Surgical, External disease.

DISECOIA, Baryecoia.

DISFIGURATION, Deformation.

DISGORGE'MENT, (F.) *Dégorgement*, from *de*, and *gorge*, 'the throat.' An opposite condition to that of *Engorgement*. The discharge or abstraction of a certain quantity of fluid, which had previously collected in a part; as *Disgorgement of bile*. It also means particularly, a vomit.

DISGUST', from *de*, and *gustare*, 'to taste.' *Cibi fastid'ium*, *Aposit'ia*, *Abomina'tio*, *Siccha'sia*, *Loathing*. An aversion for food. (F.) *Dégout*. *Disgust* is not the same as *Anorexia*. The latter is only a want of appetite; the former consists in real repugnance for food.

DISINFEC'TANT, *Disinfectans*, from *dis*, and *infect*. This term has been restricted by some to agents that are capable of neutralizing morbific effluvia; but the author includes under it, also, agents that are capable of removing any incipient or fully formed septic condition of the living body, or of any part of it.

DISINFECTING, LIQUID, LABARRAQUE'S, Liquor sodæ chlorinatæ.

DISINFEC'TION, *Disinfec'tio*. The act of destroying miasmata, with which the air, clothing, &c., may be infected. Various means have been proposed for this purpose. Those most commonly employed are:—*chlorine*, *sulphurous*, and *chlorohydric acid gases*, *vapours of vinegar*, *nitrous acid*; and, what is, perhaps, the most manageable of any, and the most efficacious,—*chlorinated lime*, or any of the chlorides of the alkalies. It is probable that a true chemical action occurs between these agents and the miasmata, whence results a compound which is harmless. D. also includes the action of antiseptics.

Chlorine or Oxymuriat'ic Fumiga'tion, *Solu'tio alexite'ria Gaubia'na*, *Fumiga'tio antiloim'ica Gaubii*, *Alexite'rium chlo'ricum*, *Fumiga'tio Guytonien'sis*, is made by adding *common salt* ℥iij, to *black oxide of manganese* ℥j, *sulphuric acid* ℥j, and *water* f. ℥ij. This may be carried through an apartment, or be shut up in it.

Nitrous Fumiga'tion, *Alexite'rium Nitricum*. *Fumiga'tio Smithia'na*, may be formed by placing *nitrate of potass* ℥iv, and *sulphuric acid* ℥ij, in a saucer or on hot sand.

DISJUNC'TI MORBI. (From *dis*, and *jungere*, *junctum*, 'to join.') *Disjoined diseases*. Fernelius has thus denominated diseases which occupy different organs, and are not produced by each other.

DISLOCATIO LIENIS SEU SPLENIS, Splenectopia.

DISLOCATION, Luxation.

DISORGANIZA'TION, *Organo'rum destructio*, (F.) *Désorganization*. A complete morbid change in the structure of an organ, or even total destruction of its texture. In sphacelus and sloughy ulcers we have examples of this change.

DISPENSAIRE, Dispensary, Dispensatory.

DISPEN'SARY, *Dispensa'rium*, from *dispendere*, (*dis*, and *pendere*, 'to weigh.') 'to take from a weight or mass,' 'to distribute.' The shop or place in which medicines are prepared. Also, an institution in which the poor are furnished with advice and necessary medicines. (F.) *Dispensaire*. This word is also used by the French synonymously with Dispensatory.

DISPENSA'TION, *Dispensa'tio*, *Diœce'sis*. The composition and distribution of medicines, according to prescription. In France, it is more commonly applied to the weighing, measuring, and arranging the articles, which have to enter into a formula, prior to combining them.

DISPENSATOR, Apothecary.

DISPEN'SATORY, *Dispensato'rium*; same etymon. *Antidota'rium*, (F.) *Dispensaire*. A book which treats of the composition of medicines. A Dispensatory differs from a Pharmacopœia, in containing the physical and medical history of the various substances; whilst the Pharmacopœia is restricted to the mode of preparing them, &c. The Pharmacopœia, too, is published under the authority of, and by, the members of a college or association; whilst a dispensatory contains the whole of the Pharmacopœia or Pharmacopœias, with additions by the author, under whose authority, alone, it usually appears. The Pharmacopœia, in other words, is *officinal*; the Dispensatory, generally, *private*. Formerly, the words were used indiscriminately. See Formulary and Pharmacopœia.

DISPLACEMENT, Percolation.

DISPOSIT'ION, *Disposi'tio*, from *dis*, and *ponere*, 'to put or set.' A particular condition of the body, which renders it susceptible of altering, suddenly, to a state of health or disease;—of improving, or becoming changed for the worse. The *disposition* to phthisis pulmonalis is sometimes so strong, owing to original conformation, that the disease will make its appearance, notwithstanding every care. See Diathesis.

DISPUTATIO, Thesis.

DISRUP'TIO, from *disrumpere*, 'to break off.' A puncture, which interests deep-seated parts.

DISSECTING ANEURISM, see Aneurism.

DISSEC'TION, *Disse'tio*, from *dissecare*, (*dis*, and *secare*, 'to cut,') 'to cut open;' *Diacopē*, *Practical Anatomy*, *Necrot'omy*. An operation, by which the different parts of the dead body are exposed, for the purpose of studying their arrangement and structure. Dissection has received various names, according to the organ concerned;—as *Osteotomy*, *Syndesmotomy*, *Myotomy*, *Angiotomy*, *Neurotomy*, *Desmotomy*, &c.

DISSEC'TOR, *Prosec'tor*, *Pro'tomus*, same etymon. (F.) *Prosecteur*. A practical Anatomist. One who prepares the parts for the Anatomical Lecture.

DISSEPIMENTUM NARIUM, Septum narium.

DISSEPTUM, Diaphragm.

DISSERTATION, INAUGURAL, Thesis.

DISSIDENTIA, Diastasis.

DISSOLUTIO VENTRICULI, Gastromalacia.

DISSOLU'TION, *Dissolu'tio*, *Dial'ysis*, from *dissolvere*, (*dis*, and *solvere*,) 'to loosen,' 'to melt.' This word is in frequent use, in the writings of the humorists. It is employed, particularly, in speaking of the blood;—to designate, not its entire decomposition or putrefaction,—but a diminution in its consistence.

DISSOLUTION, Solution.

DISSOLVANTS, Dissolventia.

DISSOLVEN'TIA, *Solvents*, (F.) *Dissolvants*. Medicines believed to be capable of dissolving swellings, concretions, &c.

DISTENSIO, Diatasis, Tension, Tetanus, (q. v.)

Distensio Nervorum, Convulsion.

DISTENSION DE LA VÉSICULE DU FIEL. Turgescentia vesicæ felleæ.

DISTICHI'ASIS, *Distich'ia*, *Districhi'asis*, from δις, 'double,' and στιχος, 'a row.' An increased number of eyelashes; some turned towards the eye, and irritating the organ; whilst others preserve their natural direction.—Galen, Paulus of Ægina. See Entropion.

DISTILLATIO UTERI, Leucorrhœa.

DISTILLATION, *Stalag'mos*, from *destillare*, (*de*, and *stillare*,) 'to drop, little by little.' *Catastalag'mos*. An operation, by which—by the aid of heat and in close vessels—the volatile are separated from the fixed parts of bodies, with the view of collecting the former, when condensed, in appropriate receivers. The ancients distinguished distillation *per latus*, *per ascen'sum*, and *per descen'sum*, according to the direction which the volatilized matters were made to take.

DIS'TOMA HEPAT'ICUM, from δις, and στομα, 'mouth.' *Fasci'ola hepat'ica*, *Plana'ria latius'cula*, *Fasciola huma'na*, *F. lanceola'ta*, the *Gourd-worm*, *Fluke*, or *Liver Fluke*. (F.) *Douve*, *D. du Foie*. An obovate, flat worm, an inch in length, and nearly an inch broad; sometimes found in the gall bladder of man, whence it occasionally passes into the intestinal canal. It is one of the most common varieties of worms, infesting the livers of the sheep, goat, ox, stag, fallow-deer, horse, ass, hog, hare, &c. The treatment is like that required for other worms.

DISTORSIO, Sprain, Strabismus—d. Oris, Risus Sardonicus.

DISTOR'TION, *Distor'sio*, from *distorquere*, (*dis*, and *torquere*,) 'to wrest aside.' *Diastrem'ma*, *Dias'trophē*, *Ligys'ma*, (F.) *Distorsion*. Usually applied to the preternatural curvature of a bone; as *distortion of the spine*, *limbs*, &c. It signifies, also, a convulsive state of the muscles of the eye, constituting squinting or strabismus.

DISTORTOR ORIS, Zygomaticus major.

DISTRIBUTORIA LACTEA THORACICA, Thoracic duct.

DISTRICHIASIS, Distichiasis.

DISTRIX, from δις, 'double,' and θριξ, 'the hair.' *Trichio'sis distrix*, *Fissu'ra capillo'rum*. Hairs of the scalp, weak, slender, and splitting at their extremities.

DITRACHYC'ERAS, from δις, 'two,' τραχυς, 'rough,' and κερας, 'horn.' A genus of intestinal worms. The *Ditrachyc'eras rudis*, *Diceras rudē*, (F.) *Bicorne rude*. This Entozoon was first observed in the evacuations of a female, by M. Sulzer of Strasburg. It is of a fawn colour, from 3 to 5 lines in length, with an oval head, flattened and terminating in a point posteriorly; contained in a membranous sac, and furnished, anteriorly, with a bifurcated, rugous horn. Laënnec considers it a vesicular worm or hydatid. See Worms.

DITTANDER, Lepidium sativum.

DITTANY, Cunila Mariana—d. American, Cunila Mariana—d. Bastard, Dictamnus albus—d. of Crete, Origanum dictamnus—d. Mountain, Cunila Mariana.

DITTOPIA, Diplopia.

DITTOPSIA, Diplopia.

DIURE'SIS, from δια, 'through or by,' and ουρεω, 'I pass the urine.' An abundant excretion of urine.

DIURET'IC, *Diuret'icus*, same etymon; *Uret'icus*. A medicine which has the property of increasing the secretion of urine. Diuretics act by producing a discharge of the watery and other parts of the blood; and, by such discharge, indirectly promote absorption over the whole system. Hence, they are employed in dropsy. The following are the chief Diuretics:—Cantharis; Cantharis Vittata; Potassæ Acetas; Potassæ Liquor; Cahinca; Colchici Radix; Colchici Semen; Digitalis; Diosma Crenata; Juniperus; Oleum Terebinthinæ; Potassæ Nitras; Potassæ Bitartras; Scilla, Sodæ Sales, and Spiritus Ætheris Nitrici.

DIURETICA, Arnica montana.

DIVARICATIO, Ectropion.

DIVERSORIUM CHYLI, Receptaculum chyli.

DIVERTICULA SPIRITUUM ANIMALIUM, Ganglions, nervous.

DIVERTIC'ULUM. 'A turning;' from *divertere*, (*di*, and *vertere*,) 'to turn aside.' An organ, which is capable of receiving an unusual quantity of blood, when the circulation is obstructed or modified elsewhere, is said to act as a diverticulum. Also, a malformation or diseased appearance of a part, in which it goes out of its regular course. It is sometimes applied to such a condition of the alimentary canal. Also, a hole to get out at. A by-passage. See Ectrope.

Diverticulum Nuc'kii. The opening through which the round ligaments of the uterus pass.—Parr.

Diverticulum Pharyngis, Pharyngocele.

DIVI'DING, *Div'idens*, from *di* or *dis*, and the Hetruscan verb *iduo*, 'to part or portion.' That which divides or separates.

Dividing Bandage, *Fascia div'idens*, (F.) *Bandage divisif*, is a bandage employed for the purpose of keeping parts separated from each other. It is used particularly to prevent improper union; as in cases of burns of the neck or other parts.

DIVISION, *Divis'io*, *Diæ'resis*. The accidental separation of parts, naturally united; in other words, a wound or solution of continuity. Most frequently, however, it means an operation, which consists in cutting certain parts, with the view of fulfilling some therapeutical indication

DIVUL'SIO, *Dias'pasis*, from *divellere*, (*dis*, and *vellere*,) 'to pull asunder.' A term used in Surgery, to express the rupture or laceration of organs by external violence.

Divul'sio Uri'næ, Cloudiness of urine.—See Enæorema.

DIZZINESS, Vertigo.

DOCCIONE, MINERAL WATERS OF. This spring is at Lucca, in Italy. It is a thermal saline.

DOCH'MĒ, δοχμη. A measure of the Greeks, equal to about four fingers' breadth: *Dactylodoch'mē*.

DOCIMA'SIA, *Docimas'ticē*, from δοκιμαζω, 'I try or prove the quality of any thing.'

Docima'sia Medicamento'rum et Veneno'rum means the testing of medicines and poisons.

Docima'sia Pulmo'num, *D. Pulmona'lis, Pneobiomanti'a, Pnevobiomanti'a, Lung proof, Respiration proof.* Different proofs, to which the organs of respiration of a new-born child are subjected, for the purpose of detecting whether it has or has not respired after birth; in other words, whether it was born alive or dead. These consist, chiefly, 1. In testing them with water, for the purpose of seeing whether the lungs are specifically heavier or lighter than that fluid. This is called *Docimasia Pulmonum hydrostat'ica* or the *Hydrostatic Test.* If lighter, it would be some evidence that the fœtus had respired: 2. In comparing the weight of the lungs with that of the whole body; the weight of lungs in which respiration has taken place being nearly twice as great. This is *Docima'sia Pulmo'num Stat'ica*, or Ploucquet's *Test:* and, 3. By measuring the circumference of the thorax and lungs; and comparing their dimensions with those of an infant, which has not respired. This is *Daniel's Test.* These tests, singly, afford only probable evidence; but, when united, the deductions may be more conclusive.

DOCK, BLOODY, Rumex sanguineus—d. blunt-leaved, Rumex obtusifolius—d. Cresses, Lapsana—d. Sour, Rumex acetosa—d. Sour, boreal, Oxyria reniformis—d. Water, Rumex hydrolapathum—d. Wild, sharp-pointed, Rumex acutus.

DOCNA SURA, MINERAL WATERS OF. This spring is in the Krapach mountains. The water contains sulphate of soda, carbonate of soda, chloride of sodium, carbonate of lime, silica, and iron.

DOCTOR, *Med'icus*, from *doctus*, 'learned;' '*un homme qui devrait être docte.*' A *Physician.* Frequently applied to any one who practises medicine; although properly confined to him who has received his degree of Doctor of Medicine.

DOCTRINA GALLIANA, Craniology.

DOCTRINE, MED'ICAL, *Doctri'na Med'ica.* The principles or positions of any medical sect or master. Medicine has been too full of doctrines. One of the first was that of Herodicus of Selivræa, who recommended gymnastic exercises in disease. The chief founders of doctrines have been Hippocrates, Serapion of Alexandria, Philinus of Cos, Herophilus, Asclepiades, Themison of Laodicea, Thessalus of Tralles, Soranus of Ephesus, Leonides of Alexandria, Athenæus of Attalia, Archigenes of Apamæa, Agathinus of Sparta, Galenus, Paracelsus, John Baptist van Helmont, Sylvius de le Boe, Keill, Hamberger, Pitcairne, H. Boerhaave, J. E. Stahl, Frederick Hoffman, George Baglivi, Cullen, Darwin, John Brown, Beddoes, Girtanner, Reil, Rush, Rasori and Broussais.

Doctrine, Physological, Broussaism.

DODDER OF THYME, Cuscuta epithymum.

DODECADACTYLITIS, Duodenitis.

DODECADACTYLON, Duodenum.

DODECAPHAR'MACUM, from δωδεκα, 'twelve,' and φαρμακον, 'a medicine.' An ancient name given to all medicines which consisted of twelve ingredients. See Apostolorum Unguentum.

DODECATH'EON, from δωδεκα, 'twelve,' and τιθημι, 'I put.' An antidote, consisting of twelve simple substances.—Paulus of Ægina.

Dodecatheon, Sanicula—d. Plinii, Pinguicola vulgaris.

DODONÆA, Myrica gale.

DODRANS, Spithama.

DOGCHOAK, Cynanche.

DOGDAYS, (F.) *Jours Caniculaires.* During these days comprised between the 24th of July and the 23d of August, the temperature of the air in Europe is generally high and oppressive. They have received this name from the dogstar, *Canic'ula*, Σειριος, *Sirius*—a very brilliant star in the constellation of the *great dog*, which rises and sets, at this time, with the sun. It was formerly believed to be a period particularly unpropitious to health; that it was dangerous to purge during it; and other phantasies were indulged in regard to it.

DOGGRASS, Triticum repens.

DOGMAT'IC, from the Greek δογμα, from δοκεω, 'I think.' *Dogmat'icus.* The name of an ancient medical sect; so called, because its members endeavoured, by reasoning, to discover the essence of diseases and their occult causes; whilst the *Empirics*, their rivals, confined themselves strictly to experience; i. e., to the observation of facts. The union of the two modes of investigation makes the rational physician. These sectarians are likewise called *Dog'matists*, and their doctrine *Dog'matism.* The founders of this sect were Hippocrates, Thessalus, Draco, and Polybius; and the most celebrated of its supporters were Diocles of Carysta, Praxagoras of Cos, Chrysippus of Soli, Herophilus, Erasistratus, &c.

DOGS' BANE, Apocynum androsæmifolium—d. Bane, bitter, Apocynum androsæmifolium.

DOGS' GRASS, Triticum repens.

DOGS' STONES, Orchis mascula.

DOGSTAR, Canicula.

DOGTREE, Cornus Florida.

DOGWOOD, Cornus Florida—d. Blueberried, Cornus sericea—d. Female, Cornus sericea—d. Florid, Cornus Florida—d. Great flowered, Cornus Florida—d. Jamaica, Piscidia erythrina—d. New England, Cornus sericea—d. Pond, Cephalanthus occidentalis—d. Silky-leaved, Cornus sericea—d. Virginian, male, Cornus Florida—d. Round-leaved, Cornus circinata—d. Swamp, Cornus sericea.

DOIGT, Digitus—*d. Auriculaire*, Auricular finger—*d. Milieu*, see Digitus—*d. Petit*, see Digitus.

DOIGTIER, Digitale, Digitalis—*d. d'Asdrubali*, see Digitale.

DOL'ICHOS, from δολιχος, 'long.' A genus of plants of the leguminous family. It includes a number of species, generally indigenous in India or America. The *Dol'ichos Lablab*, or *Lablab*, is found in Egypt. (Prospero Alpini.) Its fruit is eaten there, like the haricot with

us. The *Dol'ichos Sinen'sis* is eaten in China, and is stored up as a provision for long voyages. The *Dol'ichos Tubero'sus*, (F.) *Pois Patate* of Martinique, has tuberous roots of the size of both fists, and has the consistence and taste of the turnip. The *Dol'ichos Bulbo'sus*, of the West Indies resembles the turnip;—and from the *Dol'ichos Soja*, the Japanese prepare the well-known sauce *Soy*, which they term *Sooja*. The most important in medicine, is the

DOL'ICHOS PRU'RIENS, *Dol'ichos*, *Stizolo'bium*, *Mucu'na pru'riens*, *Cowhage*. *Cowitch*, *Adsaria Pala*. *Order*, Leguminosæ. (F.) *Pois à gratter*. The stiff hairs of the *Dolichos Pods*, called *Dolichos Pubes*, *D. Prurien'tis pubes*, *Dolichi Setæ Legu'minum*, *Lanu'go Sil'iquæ hirsu'tæ*, *Mucuna*, (Ph. U. S.,) are the parts used in medicine. They excite an intolerable, prurient sensation when applied to the skin; but do not irritate the mucous membrane over which they pass, when administered internally. The Dolichos is a mechanical anthelmintic, and is useful in cases of ascarides lumbricoides, and oxyures vermiculares. Dose, gr. v to x of the pubes, in molasses.

Mucu'na pruri'ta, a distinct species, but possessing similar properties, grows in the E. Indies.

DOLOIRE, (F.) *As'cia Dola'bra*, 'a carpenter's axe.' A *Bandage en doloire* is one in which the turns are so placed, that each one covers two-thirds of that which is immediately beneath it. It has received the name *Doloire* from its representing the obliquity of the edge of the instrument, whose name it bears. See Bandage.

DOLOR, Pain—d. Capitis, Cephalalgia—d. Colicus, Colic—d. Crucians faciei, Neuralgia, facial—d. Dentium, Odontalgia—d. Dentium à stridore, Hæmodia—d. Faciei, Neuralgia, facial—d. Ischiadicus nervosus, Neuralgia, femoropoplitæa—d. Nephreticus, Nephralgia—d. Pectoris externus, Pleurodynia—d. Rheumaticus et arthriticus, Rheumatism.

DOLORES AD PARTUM, Pains, labour—d. Intestinorum, Colic—d. Parturientis, Pains, labour—d. Post partum, Pains, after—d. Puerperarum, Pains, after.

DOMBEY'A EXCEL'SA, *Arauca'ria Dombey'i*. A tree, which inhabits Chili, and furnishes *Dombeya turpentine;* a glutinous, milky-looking fluid of a strong odour and taste.

DOMES'TIC, *Domes'ticus*, from *domus*, 'a house.' The term *Domestic* or *Pop'ular Med'icine*, has been given to treatises written for the purpose of enabling those who are not of the profession to treat diseases, which may occur in their families, without the necessity of calling in a physician. The term, likewise, signifies—Medicine, when thus practised. It is probable, that such works have been attended with more mischievous than advantageous results.

DOMINA'RUM AQUA. A medicine described by Myrepsus, which he considered emmenagogue.

DOMPTE-VENIN, Asclepias vincetoxicum.

DONDO, Albino.

DONESIS, Agitation

DORADILLA, Asplenium ceterach.

DORCADIZON, Caprizans.

DOREA, Hemeralops.

DOREMA AMMONIACUM, see Ammoniac, Gum.

DORMITIO, Sleep.

DORONIC, Doronicum pardalianches.

DORONICUM GERMANICUM, Arnica montana.

DORON'ICUM PARDALIAN'CHES, *D. Roma'num*, *Roman Leop'ard's Bane*, (F.) *Doronic*, *Mort aux Panthères*. The root of this plant resembles *Arnica Montana* in its properties.

DORSAL, *Dorsa'lis*: from *dorsum*, 'the back,' *Notiæ'us*. Relating to the back of the body, or of one of its parts; as the *Dorsal vertebræ*, *nerves*, &c.; *Dorsal artery of the tongue*, *penis*, &c.; *Dorsal region of the foot*, *hand*, &c.; *Dorsal Consumption*, &c.

DORSAL, LONG, Longissimus dorsi.

DORSO-COSTAL, Serratus posticus superior—*d. Lombo-costal*, Serratus posticus inferior—*d. Lombo-sacro huméral*, Latissimus dorsi—*d. Susacromien*, Trapezius—*d. Trachélon-occipital*, Complexus.

DORSTENIA BRAZILIENSIS, Caa-apia.

DORSTENIA CONTRAYER'VA, called after Dr. Dorsten; *Contrayer'va*, *Drake'na*, *Cype'rus longus*, *d'dorus* seu *perua'nus*, *Bezoar'dica Radix*, *Dorste'nia Housto'nii*, *Lisbon Contrayer'va*, (F.) *Racine de Charcis*, *R. de Dracke*, *Racine des Phillippines*. *Family*, Urticeæ. *Sex. Syst.* Tetrandria Monogynia. A plant of South America, whose root, *Contrayer'va* (Ph. U. S.,) is aromatic, bitter, and astringent. It has been given as a tonic, stimulant and sudorific. Dose, gr. xij to ʒss.

DORSUM, *Notos*, *Noton*. The back. *Metaph'renon*, *Tergum*, (F.) *Dos*. The posterior part of the trunk, extending from the inferior and posterior region of the neck as far as the loins. The *back of the foot*, *Dorsum pedis*, is the upper part of that organ, opposite the sole: the *back of the hand*, *Dorsum manûs*, the part opposed to the palm. In the same sense, we say *Dorsum penis*, *Dorsum nasi*, for the upper part of those organs.

DORSUM, Vertebral column.

DORYCIMUM, Costus creticus.

DOS, Dorsum.

DOSE, *Dosis*, *Præ'bium*. The quantity of any substance, which ought to form part of a compound medicine, or ought to be exhibited singly, to produce a desired effect. Many circumstances influence the doses of medicine. *Women* require smaller doses, as a general principle, than *men*. *Habit* has a great effect, as well as *climate*, *age*, *idiosyncrasy*: all these, and other circumstances, must be taken into account; and every general rule, on the subject, will be found to have numerous exceptions. Some of the mechanical physicians laid it down as a rule, that the doses of medicines must always be as the *square of the constitution!* A matter not easy of calculation.

The following Tables will exhibit an approximation to the proper doses (according to age) of most substances.

TABLE OF DOSES ACCORDING TO AGE.

Age 24	Let the full dose be	1	1 drachm.
18	will require	2-3ds.	2 scruples.
14	- - - - -	half.	½ drachm.
7	- - - - -	1-3d.	1 scruple.
4	- - - - -	1-4th.	15 grains.
3	- - - - -	1-6th.	10 grains.
2	- - - - -	1-8th.	8 grains.
1	- - - - -	1-12th.	5 grains.

The table of doses, recommended by Dr.

Thomas Young, according to age, differs in some respects from the above. Either affords a sufficient general approximation. His rule is, that

For children, under twelve years of age, the doses of most medicines must be diminished in the proportion of the age to the age increased by twelve:

thus, at two years, to 1-7th; i. e., $1\text{-}7 = \frac{2}{2+12}$

At twenty-one the full dose is given.

DOSIS, Dose.

DOTAGE, Dementia.

DOTHIEN, Furunculus.

DOTHIENENTÉRIE, Dothinenteritis.

DOTHIENTERITIS, Dothinenteritis.

DOTHINENTERI'TIS, Properly *Dothien'teritis; Enterodothie'nia, Helcenteri'tis*, from δοθιην, 'a pustule,' and εντερον, 'intestine.' (F.) *Dothinentérite, Dothinentérie, Dothiénentérie, Dothiénentérite, Follicular Gastroënteritis.* An inflammation and ulceration of the glands or follicles of Peyer and Brunner, which Bretonneau considers to be the essence of a large class of fevers, particularly of those of the typhoid character. See Typhus.

DOTTRINA MEDICA ITALIANA, Contro-stimulus, (doctrine of.)

DOUBLE-HEARING, *Pgracu'sis duplica'ta, P. Imperfec'ta.* The action of the one ear inaccordant with that of the other: sounds heard doubly, and in different tones or keys.

DOUCE-AMÈRE, Solanum dulcamara.

DOUCHE, (F.) In Italian, *doccia;* modern Latin, *ducia; Cataclys'mus, Douse.* This term is applied to the shock of a column of fluid, of a determinate nature and temperature, let fall upon the body. *Pumping* is a variety of the *Douche.* In using this kind of bath, the fluid is directed upon the part on which we are desirous of acting. The *douches descendantes* are those in which the fluid falls from a height,—the *douches ascendantes*, those administered in diseases of the uterus,—the *douches horizontales*, where the fluid is impelled horizontally, &c. They may be *cold* or *warm*, according to circumstances. The apparatus consists of a reservoir of water having a pipe or plug, by means of which the water can be directed as the practitioner may desire. The *Douche* communicates a considerable and peculiar shock to the nervous system; and is one of the most successful means for taming the furious maniac. It is, also, useful in chronic rheumatism, stiff joints, &c.

Douches of air are, also, occasionally used, as in cases of obstruction of the Eustachian tube by mucus. The Douches are sent from an air-press—of which Deleau and Kramer have invented one each—through a catheter introduced through the nose into the tube.

DOULEUR, Pain—*d. de Côté*, Pleurodynia—*d. des Dents*, Odontalgia—*d. de l'Estomac*, Cardialgia—*d. Névralgique de l'Estomac*, Cardialgia—*d. Pulsative*, see Throbbing.

DOULEURS, Pains, labour—*d. Conquassantes*, see *Conquassant.*

DOUSE, *Douche.*

DOUVE, Distoma hepaticum—*d. du Foie*, Distoma hepaticum—*d. Petite*, Ranunculus flammula.

DRACHION, Pugillus.

DRACHM, *Drachma, Dram*, (F.) *Gros.* The ancient name of a piece of money, weighing the eighth part of an ounce. At the present day it is used for this weight.

DRACO MITIGATUS, Hydrargyri submurias—d. Sylvestris, Achillea ptarmica.

DRACOCEPH'ALUM CANARIEN'SE, *D. Moldav'icum, Melis'sa Tur'cica, Turkey Balsam, Cana'ry Balsam, Balm of Gil'ead Tree, Alpi'ni Bal'samum*, (F.) *Mélisse de Moldavie.* A Turkish and Siberian plant, which has an aromatic taste, joined with an agreeable flavour. It has been used as a tonic.

DRACONTHÆMA, see Calamus rotang.

DRACONTIUM, Dracunculus. See, also, Dracontium fœtidum.

DRACON'TIUM FŒ'TIDUM, *Dracon'tium, Icto'des fœ'tidus, Symplocar'pus fœtida, Pothos fœtida, Arum America'num betæ folio, Pothos Puto'rii, Spathye'ma fœ'tida, Skunk Cabbage, Polecat Collard, Coccollard, Collard, Skunk weed, Itch weed, Stink poke, Swamp cabbage, Pole'cat weed, Hellebore, Ellebore, Irish Cabbage. Nat. Ord.* Aroideæ. *Sex. Syst.* Tetrandria Monogynia. This indigenous plant, as some of its names import, is extremely fetid. The property on which its medical virtues are dependent, resides in a volatile principle, which is impaired by long keeping, especially in powder. Dose, of the dried root, *Dracontium*, (Ph. U. S.), ten to twenty grains. It resembles asafœtida and other fetid gums in its properties; in other words, belongs to the class of reputed antispasmodics.

DRACONTIUM ANGUSTISPATHA, *Symplocar'pus Angustispatha, Narrow-spathed Skunk Cabbage* is possessed of similar properties.

DRACUN'CULUS, *Dracon'tium, Vena Medi'na Ar'abum, Gor'dius Medinen'sis, Vermic'ulus Capilla'ris, Dracun'culus Gordius, Fila'ria Medinen'sis, Malis dracun'culus, Malis Gordii, Muscular Hairworm, Bichios, Bicho.* The *Guinea Worm*, (F.) *Dragonneau, Ver de Guinée, Ver Filaire, V. de Médine, V. cutané, Veine de Médine.* A genus of worms, frequently met with in Indian and African climes. They are characterized by a filiform body, and are smooth and nearly of equal thickness throughout. The Guinea worm, when small, insinuates itself through the cutaneous pores, and penetrates into the cellular membrane and between the muscles; especially between those of the lower limbs, where it occasions a tumour like a boil, which subsequently suppurates, and the head of the worm appears and emerges gradually. The head must then be seized, and the worm be cautiously rolled round a small cylinder of linen or other substance. Care must be taken not to break it, as great pain and obstinate suppuration might be the consequence.

Considerable obscurity rests on this subject. Some even deny that the cases of Dracunculus, on record, are really those of worms.

DRACUNCULUS POLYPHYLLUS, Arum dracunculus—d. Pratensis, Achillea ptarmica.

DRAGÉES, (F.) Almonds or dried preserves, covered with white sugar. *Sugar plums.*

DRAGÉES DE KEYSER; a pharmaceutical preparation, formerly much celebrated in syphilis. It was composed of *acetate of mercury, manna, starch, mucilage,* and *gum tragacanth.*

DRAGMIS, Pugillus.

DRAGON (F.), *Dragon.* Some authors have

given this name to opake spots on the cornea, and to cataract.

Dragon Claw, Scaly, Pterospora andromedea—d. Root, Arum triphyllum, Pterospora andromedea—d. Turnip, Arum triphyllum.

DRAGON'S BLOOD, see Calamus rotang.

DRAGONNEAU, Dracunculus.

DRAINING, *Desicca'tio*, (F.) *Dessèchement*. The act of drawing off the water from marshes, for the purpose of destroying the unhealthy emanations which proceed from them. It is a well known fact, that from marshes arise certain emanations or miasmata, with the nature of which we are, however, totally unacquainted, but which are the fertile source of intermittents and other diseases. Draining the soil and converting it into arable land changes its character, and the malaria ceases to be given off. It has happened, however, that although, in such situations, intermittents have been got rid of, consumptions have taken their place.

DRAKENA, Dorstenia contrayerva.

DRAPEAU, (F.) *Vexil'lum*, from *drap*, 'cloth.' A bandage, used in wounds, &c. of the nose, to keep the dressings *in situ*. It is composed of a small triangular compress, having two openings at its inferior part, corresponding to those of the nostrils. It is fixed by means of a bandage, passing from its superior angle over the head; and another passing round the head, under the orbits, so as to join the first at the nape of the neck. Also, Pterygion (q. v.)

DRAP-FANON, see *Fanon*.

DRASTIC, *Drasticus*, *Cenot'ic*, from δραω, 'I operate strongly.' Active (q. v.) An epithet, given to purgatives, which operate powerfully; as *elaterium*, *oil of croton*, &c.

DRAUGHT, Haustus—d. Black, see Infusum sennæ compositum.

DRAX, Pugillus.

DREAM, Somnium—d. Waking, Hallucination.

DRÈCHE, Malt.

DREGS, Feculence.

DREPANOIDES, Falciform.

DRESS, Vestitus.

DRESSER, from (F.) *dresser*, 'to put right.' An hospital assistant, whose office it is to dress wounds, ulcers, &c. He corresponds in function to the *Élève externe* of the French hospitals.

DRESSING, *Cura*, *Curatio*. (F.) *Pansement*. The methodical application of any remedy or apparatus to a diseased part. Also, the remedy or apparatus itself.

DRIMYPHA'GIA, from δριμυς, 'acrid,' 'aromatic,' and φαγω, 'I eat.' An aromatic and exciting diet.

DRINK, from Sax. ᵹpencan, *Potus*, (F.) *Boisson*. Every liquid introduced into the alimentary canal for the purpose of repairing the loss of the fluid parts of the body. The necessity for its use is indicated by the sensation of thirst. Fluid, taken during a meal, aids in the digestion of the food. Some drinks are exciting and tonic, as the different varieties of beer, wine, and spirits, which we use at table. In a therapeutical point of view, drinks are used to appease the thirst which prevails in febrile affections, or to act as diluents in those and other cases.

Table of Ordinary Drinks, according to their Chemical Composition.

1. *Water.*	Spring water, River water, Well water, &c.
2. *Juices and infusions of Animal and Vegetable substances.*	Lemon juice, Currant juice, Whey, Tea, Coffee, Mattee, &c.
3. *Fermented Liquors.*	Wines, Ale, Beer, Cider, Perry,
4. *Spirituous Liquors.*	Brandy, Alcohol, Ether, Kirschwasser, Rum, Arrac, Gin, Whiskey, Ratifies, Cordials, &c.

DRIVELLING, Slavering.

DROGUE, Drug.

DROGUIER, (F.) Same etymon as drug. A collection of different simple medicinal substances.

DROGUISTE, Druggist.

DROIT DE L'ABDOMEN, Rectus abdominis—*d. Antérieur de la cuisse*, Rectus femoris—*d. Antérieur de la tête*, Rectus capitis internus minor—*d. Antérieur de la tête, grand*, Rectus capitis internus major—*d. externe de l'œil*, Rectus externus oculi—*d. Inférieur de l'œil*, Rectus inferior oculi—*d. Interne de la cuisse*, Gracilis—*d. Interne de l'œil*, Rectus internus oculi—*d. Latéral de la tête*, Rectus capitis lateralis—*d. Postérieur de la tête, grand*, Rectus capitis posticus major—*d. Postérieur de la tête, petit*, Rectus capitis posticus minor—*d. Supérieur*, Rectus superior oculi.

DROP, Gutta, (q. v.)

Drop, Ague, tasteless, Liquor arsenicalis—d. Black, Guttæ nigræ—d. Red, Ward's, see Vinum antimonii tartarizati—d. Serene, Amaurosis.

DROPACISMUS, Depilation.

DROPAX, Depilatory.

DROPPED HANDS, see Hands, dropped.

DROPS, ABBÉ ROUSSEAU'S, Laudanum Abbatis Rousseau—d. Anodyne, Liquor morphinæ acetatis—d. Antiscorbutic, Marsden's, see Infusum gentianæ compositum—d. Antivenereal, see Tinctura ferri muriatis—d. Chamomile, see Anthemis nobilis—d. Dutch, Balsam of sulphur, Balsam of Turpentine—d. Fit, Spiritus ammoniæ fœtidus, see Fuligo—d. Golden, de la Motte's, Tinctura seu alcohol sulfurico-æthereus ferri—d. Green's, see Liquor Hydrargyri oxymuriatis—d. Jesuit's, Tinctura benzoini composita—d. Lavender, Spiritus Lavandulæ compositus—d. Nitre, Spiritus ætheris nitrici—d. Norris's, see Antimonium tartarizatum—d. Pectoral, Pectoral drops, Bateman's—d. Peppermint, Pastilli de menthâ piperitâ—d. Soot, see Fuligo—d. Wade's, Tinctura benzoini composita—d. White, Ward's, see Hydrargyri nitras.

DROPSY, Hydrops—d. of the lower belly, Ascites—d. of the Brain, Hydrocephalus—d. of the cellular Membrane, Anasarca—d. of the Chest, Hydrothorax—d. of the eye, Hydrophthalmia—d. General, Anasarca—d. of the Head,

Hydrocephalus—d. of the lachrymal Sac, Fistula lachrymalis—d. of the lachrymal Sac, Lachrymal hernia—d. of the Pericardium, Hydropericardium—d. of the Peritoneum, Ascites—d. of the Pleuræ, Hydrothorax—d. Water of, Serum of Serous membranes—d. Wind, Emphysema—d. of the Womb, Hydrometra.

DROPWORT, Spiræa filipendula—d. Hemlock, Œnanthe—d. Water, Hemlock, Œnanthe—d. Western, Gillenia trifoliata.

DROSE'RA ROTUNDIFO'LIA. The systematic name of the *Sundew*, *Ros'solis*, *Drosiobot'anon*, *Dro'sium*, *Rorel'la*, (F.) *Rossolis*. This plant has a bitter, acrid, and caustic taste. It has been used as a rubefacient, and to destroy warts and corns. It has, also, been regarded as a pectoral.

DROSIOBOTANON, Drosera rotundifolia.

DROSIUM, Drosera rotundifolium.

DROSOMELI, Fraxinus ornus.

DRUG, *Medicamen'tum*, (F.) *Drogue*. A name ordinarily applied to simple medicines, but by extension, to every substance employed in the cure of disease. Ménage derives it from *droga;* and this from the Persian *droa*, 'odour;' because many drugs have a strong odour. It is from the Teutonic *trocken*, Sax. ᵹpizan, 'to dry.'

DRUGGIST, DRUGGER, DRUGSTER. Same etymon. *Pharmacopo'la*, *Materialis'ta*, (F.) *Droguiste*. One who sells drugs.

DRUM OF THE EAR, Tympanum.

DRUNKENNESS, Temulentia.

DRYING, *Desicca'tion*, *Sicca'tio*, *Xeran'sis*, *Desicca'tio*, *Exsicca'tio;* same etymon as Drug. Evaporation or removal of the superfluous humidity in a body.

Drying or Desiccation of Plants. Those which are very succulent, should be dried quickly. They must be spread upon lattice work, covered from the light, and exposed to the heat of the sun or to that of a stove, not exceeding 110° Fahrenheit. The drying of less succulent plants can be effected at a lower temperature. *Flowers* must be dried very carefully, excluding the light. Seeds are dried in a place where there is a free current of air. *Pulpy fruits* may be exposed to a gentle heat in a stove, which may be gradually elevated. *Roots* may also be dried in the stove: the tuberous require to be cut in slices.

DRYMIS WINTERI, Wintera aromatica.

DTHOKE. Framboesia.

DUCKSFOOT, Podophyllum montanum.

DUCT, ALIMENTARY, Canal alimentary, Thoracic duct—d. of Bellini, Uriniferous tube—d. Nasal, Lachrymal duct—d. of Pecquet, Thoracic duct—d. of Wirsung, see Pancreas.

DUCTOR CANALICULATUS, Gorget—d. Urinæ, Ureter.

DUCTUS, Canal—d. Arteriosus, Arterial Duct—d. Auris palatinus, Eustachian Tube—d. Belleniani, Uriniferous Tubes.

Ductus Bartholinia'nus, Bar'tholine's *Duct*, (F.) *Canal de* Bartholin. The excretory duct of the sublingual gland.

Ductus Botalli, Arterial duct—d. Choledochus, Choledoch duct—d. Chyliferus, Thoracic duct—d. Cibarius, Canal, alimentary—d. Ferreini, Ferrein, canal of—d. Hepaticus, Hepatic duct—d. Incisivus, Palatine duct (anterior)—d. Intestinalis, Canal, alimentary—d. Lacteus, Thoracic duct—d. Lachrymalis, Lachrymal duct—d. Lacrumalis, Lachrymal duct—d. Nasalis orbitæ, Lachrymal or nasal duct—d. Nasalo-palatinus, Palatine duct (anterior)—d. ad Nasum, Lachrymal or nasal duct—d. Nutritii, Canals, nutritive—d. Pancreaticus, see Pancreas—d. Pecqueti, Thoracic duct—d. Punctorum lachrymalium, Lachrymal ducts—d. Riviniani, see Sublingual gland—d. Rorifer, Thoracic duct.

Ductus Saliva'lis Inferior, *Ductus Warthonia'nus*, (F.) *Canal de* Warthon. The excretory duct of the submaxillary gland.

Ductus Saliva'lis Superior, *Ductus Stenonia'nus*, Ste'no's *Duct*, (F.) *Canal de* Stenon. The excretory duct of the parotid gland which opens into the mouth opposite the second upper molar tooth.

Ductus Serosi, Lymphatic vessels—d. Stenonianus, Ductus salivalis superior—d. Thoracicus, Thoracic duct—d. Urinæ, Ureter—d. Urinarius, Urethra—d. Uriniferi Bellini, Uriniferous tubes—d. Varicosi uteri, Tubæ Fallopianæ—d. Venosus, Canal, venous—d. Waltheriani, see Sublingual gland—d. Warthonianus, Ductus salivalis inferior.

DUELECH, Dulech.

DUELLA. The ancient name of a weight, which was equivalent to eight scruples.

DUG, Nipple.

DULCAMARA, Solanum dulcamara.

DULCEDO AMORIS, Clitoris.

DULECH or DU'ELECH. A term employed by Paracelsus and Van Helmont, to designate a pretended tartarized substance, which forms in the human body, and produces acute pain, accompanied with great danger.

DULSE, Rhodomela palmata—d. Pepper, Laurentia pinnatifida.

DUMBNESS, Mutitas.

DUNBLANE, MINERAL WATERS OF. The springs of Dunblane, in Scotland, contain sulphate of soda, chlorides of sodium and calcium, and carbonate of iron.

DUNG, Fimus—d. Cow's, Fimus Vaccæ—d. Goose, Fimus anseris—d. Stone-horse, Fimus equinus.

DUNGA, Dengue.

DUODENI'TIS, *Dodecadactyli'tis*. A hybrid term, from *duodenum*, and *itis*, denoting inflammation. Inflammation of the duodenum, characterized by white tongue; bitter taste; anorexia; fulness and tenderness in the region of the duodenum; and often yellowness of skin; along with the ordinary signs of febrile irritation.

DUODE'NUM, *Ventric'ulus Succenturia'tus*, *Ec'physis* seu *Appen'dix* seu *Proces'sus Ventriculi*, *Portona'rium*, *Dodecadac'tylon*, from δωδεκα, 'twelve,' and δακτυλος, 'a finger.' The duodenum is the first part of the intestinal canal, commencing at the pyloric orifice of the stomach, and terminating in the jejunum. Its length is about 12 fingers' breadth, and as it is only partially covered by the peritoneum, it is susceptible of considerable dilatation; hence its name *Ventriculus succenturiatus*. In the duodenum, *chylification* takes place after the admixture of the biliary and pancreatic fluids with the chyme.

DUO-STER'NAL. Béclard thus names the second osseous portion of the sternum, which corresponds to the second intercostal space.

DUPLICA'TION, (*duo*, 'two,' and *plicare*, 'to fold.') *Duplica'tio*, *Duplic''itas*, *Diplasias'-*

mus, Diplo'sis. A species of malformation, characterized by the parts concerned being doubled. —Meckel.

DU'PLICATURE, *Duplicatu'ra, Reflec'tion,* from *duplex,* 'double,' 'twofold.' The folding or reflection of a membrane upon itself; as *Duplicature* or *reflection of the pleura, peritoneum,* &c.

DUPON'DIUM. A weight of four drachms. —Galen.

DUR, Hard.

DURA MATER, *Crassa meninx, Dura meninx, Meninx exte'rior, Meninx sclera, pachei'a of* Galen, *Dura membra'na cer'ebrum am'biens, Cuticula'ris membra'na, M. dermato'des, Méninge,* —(Ch.) It has been called *dura,* because of its great resistance; and, *mater,* because it was believed to give rise to every membrane of the body. (F.) *Dure mère. Dure-Taye* (Paré.) It is a fibrous, semitransparent membrane, of a pearly-white colour, thick, and very resisting; lines the cavity of the cranium, and contains the spinal marrow; protects the brain and marrow; and, by its various expansions—the *falx cerebri, tentorium,* &c.,—supports the different parts of the cerebral mass. The largest artery of the dura mater is the *A. meningæ'a me'dia*

DURA MATER, LATERAL PROCESSES OF THE, Tentorium.

DURE MÈRE, Dura mater.

DURE TAYE, Dura mater.

DURÉTE D'OREILLE, Baryecoia—*d. de l'Ouie,* Deafness.

DURILLON, Callosity.

DURUS, Hard.

DWARF, Nanus.

DWARFISH, see Nanus.

DYCTOIDES, Reticular.

DYERS' BROOM, Genista tinctoria—d. Weed, Genista tinctoria, Reseda luteola.

DYNAMETER, Dynamometer.

DYNAM'IC, *Dyam'icus,* (F.) *Dynamique:* same etymon. In Mechanics, the part, which investigates the powers whereby bodies are put in motion, and the laws resulting therefrom. In Biology, that which relates to the vital forces. Those influences of agents on the organism, which are ascribable to neither mechanical nor chemical causes, are sometimes termed *dynamic.*

DYNAMICUS, Dynamic.

DYNAMIS, Force.

DYNAMOM'ETER, *Myodynamiom'eter, Myodynamom'eter,* from δυναμις, 'force,' 'vital power,' and μετρον, 'measure.' An instrument, contrived by M. Regnier, for measuring the comparative muscular strength of man and animals. It consists of a spring, which, when pressed upon, causes a needle to move upon a portion of a circle, furnished with a scale of kilogrammes and one of myriagrammes. To measure the strength of the hands, the two branches of the spring are firmly grasped, and brought as near together as the force can carry them. This effort makes the needle traverse, and indicates, on the scale of kilogrammes, the strength of the experimenter's hands. A man, 25 or 30 years of age, exerts a force commonly equal to 50 kilogrammes or 100 pounds.

The strength of the loins of a man, about 30 years of age, as indicated by this instrument, is usually about 13 myriagrammes, or 265 pounds, which shows the weight he is capable of raising.

From experiments made by Peron, in his voyage, on 12 individuals of Van Dieman's Land, 17 of New Holland, 56 of the Island of Timor, 17 Frenchmen belonging to the expedition, and 14 Englishmen in the colony of New South Wales, he found their comparative strength, indicated by the dynamometer, to be as follows:

TABLE.

NATIVES OF	STRENGTH of the arm.		of the loins.	
	Kilog.	*lbs.*	*Myri.*	*lbs.*
1. Van Dieman's Land	50.6	101.2		
2. New Holland	50.8	101.6	10.2	208.08
3. Timor	58.7	117.4	11.6	238.64

DYNAMOMETER or DYNAMETER, MEDICINAL. An instrument, invented by Dr. Paris, for the purpose of showing the quantity of active matter contained in a given weight or measure of any officinal compound, with the dose of any preparation, which will be equivalent in strength to a given quantity of any other of the same class. The instrument is more ingenious than useful.

DYOTA, Diota.

DYS, δυς, in composition, 'difficult, faulty:' sometimes privative; mostly answering to the particles *dis, in, mis,* or *un,* in English. Hence:

DYSÆSTHE'SIA, from δυς, 'with difficulty,' and αισθανομαι, 'I feel.' Obscure, diminished, or even abolished sensation.

DYSÆSTHESIA AUDITORIA, Cophosis—d. Gustatoria, Ageustia—d. Interna, Amnesia—d. Olfactoria, Anosmia.

DYSÆSTHE'SIA VISUA'LIS, *Parop'sis.* Sense of sight vitiated or lost.

DYSANAGO'GOS, from δυς, 'with difficulty,' and αναγω, 'I bring up.' That which is expectorated with difficulty. An epithet given, by the Greek writers, to the sputa, when expectorated with difficulty, on account of their viscidity.

DYSANNARRHOPHE'SIS, *Dysanarrhophi'a;* from δυς, 'with difficulty,' and αναρροφησις, 'absorption.' Diminished absorption from morbid causes.

DYSCATABROSIS, Dysphagia.

DYSCATAPOSIS, Dysphagia.

DYSCATAPO'TIA, from δυς, and καταπινω, 'I drink.' Difficulty of swallowing liquids. This term is recommended by Dr. Mead as a substitute for hydrophobia, which means dread of liquids. The dread seems to be partly caused by the difficulty of deglutition.

DYSCHRŒ'A, from δυς, 'with difficulty,' and χροα or χροια, 'colour' *Dischro'a.* Sickly or unhealthy colour of the skin. Used synonymously with the *maculæ* (q. v.) of Willan.

DYSCINE'SIA, from δυς, 'with difficulty,' and κινεω, 'I move.' Difficulty or utter incapability of moving —Galen.

DYSCOILIA, Constipation.

DYSCOPHO'SIS, from δυς, 'with difficulty,' and κοφοω, 'I am deaf.' A defect in the sense of hearing.—Hippocrates.

DYSCO'RIA, from δυς, and κορη, 'the pupil.' Irregularity of shape of the pupil.

DYSCRA'SIA, from δυς, and κρασις, 'temperament.' *Intempe'ries* (q. v.) A bad habit of body.

Dyscrasia Scrofulosa, Scrofula—d. Tuberculosa, see Tubercle.

DYSCRASIÆ, Dysthetica.

DYS'CRITOS, from δυς, 'with difficulty,' and κρισις, 'judgment.' That which it is difficult to judge of.—Hippocrates.

DYSDA'CRIA, from δυς, and δακρυον, 'a tear.' A morbid condition of the tears.

DYSECCRIS'IA, from δυς, and εκκρισις, 'excretion.' Difficult or defective excretion.

DYSECŒA, Baryecoia, Deafness.

DYSEL'CIA, *Dysepulo'tus*, from δυς, 'with difficulty,' and ελκος, 'an ulcer.' An ulcer difficult to heal.—Hippocrates, Foësius.

DYSEMESIA, Vomiturition.

DYSENTERIA HEPATICA, Hepatirrhœa.

DYSENTERONERVIA, Colic—d. Saturnina, Colica metallica.

DYS'ENTERY, *Difficul'tas intestino'rum*, from δυς, and εντερον, 'an intestine.' *Dissolu'tus morbus, Diarrhœ'a carnosa, Coli'tis, Coloni'tis, Colo-recti'tis, Endocoli'tis, Esocoli'tis, Defluxus Dysenter'icus, Febris Dysenter'ica, Flumen dysenter'icum, Fluxus dysenter'icus, F. cruen'tus cum Tenes'mo, Rheumatis'mus intestino'rum cum ulcere, Tor'mina Celsi, Tor'mina, Blennenter'ia, Bloody Flux; Flux*, (F.) *Flux dysentérique, Flux de sang.* Inflammation of the mucous membrane of the large intestine; the chief symptoms of which are:—fever, more or less inflammatory, with frequent mucous or bloody evacuations; violent tormina and tenesmus. When the evacuations do not contain blood, it has been called *Dysenter'ia alba* or *simple Dysentery.* The seat of the disease is, generally, in the colon and rectum. It occurs, particularly, during the summer and autumnal months, and in hot climates more than in cold: frequently, also, in camps and prisons, in consequence of impure air, and imperfect nourishment: and is often epidemic. Sporadic cases of dysentery are, generally, easily managed; but when the disease occurs epidemically, it often exhibits great malignancy. Generally, it yields to mild laxatives, as castor oil, combined with diaphoretic narcotics, such as the *pulvis ipecacuanhæ compositus*, and counter-irritants to the abdomen; but, at times, the inflammation runs on so speedily to ulceration, that, unless a new action be rapidly excited, death will be the consequence. In such cases, mercury must be rapidly introduced into the system, and narcotics may be combined with it. The whole management in acute dysentery must, of course, be strictly antiphlogistic.

DYSEPULOTOS, Dyselcia.

DYSGA'LIA, from δυς, and γαλα, 'milk.' An unhealthy condition or depravation of the milk.

DYSGENNE'SIA, from δυς, and γενεσις, 'generation.' Lesion of the generative organs or functions.

DYSGEU'SIA, from δυς, and γευσις, 'taste.' A morbid condition of the sense of taste.

DYSHÆMORRHŒ'A, from δυς, 'with difficulty,' and 'αιμορρεω, 'I pass blood.' Diminution or suppression of the hemorrhoidal flux. Also, symptoms occasioned by its diminution or suppression.—Sagar.

DYSHAPH'IA, *Dysaph'ia*, from δυς, and αφη, 'touch.' A morbid condition of the sense of touch.

DYSHÆ'MIA, from δυς, and αιμα, 'blood.' A morbid condition of the blood.

DYSHÆMORRHŒ'A, from δυς, αἱμα, 'blood,' and ρεω, 'to flow.' Difficulty of the flow of blood,—according to some, of the hemorrhoidal flux.

DYSHI'DRIA, from δυς, and ἱδρως, 'sweat.' A morbid state of the perspiration.

DYSIATOS, δυσιατος, from δυς, 'with difficulty,' and ιαμαι, 'to heal;' *Cura'tu diffi'cilis.* Difficult of cure.—Hippocrates.

DYSLALIA, Balbuties.

DYSLOCHI'A, *Col'ica lochia'lis, Hysteral'gia lochialis*, from δυς, and λοχιος; 'relating to parturition.' Diminution or suppression of the lochial discharge.

DYSMASÉ'SIS, *Dysmasse'sis, Bradymase'sis*, from δυς, 'with difficulty,' and μασησις, 'mastication.' Difficult or impeded mastication.

DYSMENIA, Dysmenorrhœa.

DYSMENORRHÉE, Dysmenorrhœa.

DYSMENORRHŒ'A, *Dysme'nia, Parame'nia diffi'cilis, Menorrha'gia stillati'tia, Amenorrhœ'a diffi'cilis, Menses dolorif'icæ, Menorrha'gia difficilis, Menstrua'tio difficilis, M. dolorif'ica, Labo'rious Menstrua'tion*, (F.) *Dysmenorrhée, Menstruation difficile, Règles difficiles, Strangurie menstruelle.* Catamenia passed with great local pain, especially in the loins:—with sometimes a membranous discharge. Dysmenorrhœa is very difficult of removal, and prevents conception. In the married female, if she should be able to pass one period without pain, and subsequently become pregnant, the morbid action may be broken in upon, by gestation, and a perfect cure be obtained. Change of air, soon after marriage, will sometimes give occasion to this desirable result. The affection generally depends upon subinflammation of the interior of the uterus, called into action at each catamenial period. The violence of the pain requires the liberal use of narcotics.

DYSMNE'SIA; from δυς, 'badly,' and μνησις, 'memory.' Defective memory.

DYSNÉPHRONERVIE, Nephralgia.

DYSO'DIA; δυσωδια, 'fœtor,' from δυς, 'badly,' and οζω, 'I smell.' (F.) *Puanteur.* Sauvages has given this generic name to all diseases, characterized by fetid emanations, from whatever part proceeding;—from the mouth, nasal fossæ, bronchia, stomach, axillæ, groins, &c. Also, a stench or stink.

DYSODONTI'ASIS, from δυς, 'with difficulty,' and οδοντιασις, 'dentition.' Difficult dentition.

DYSONEI'ROS, from δυς, 'with difficulty,' and ονειρος, 'a dream.' Insomnia, with restlessness.

DYSO'PIA, properly *Dysop'sia*, δυσωπια, signifying 'shame,' from δυς, 'with difficulty,' and οπτομαι, 'I see.' Difficulty of seeing: obscurity of vision.

Dysopia Dissitorum, Myopia.

Dysopia Latera'lis, *Parop'sis latera'lis, Skue-sight, Sight askew.* Vision only accurate when the object is placed obliquely. This state is generally caused by some opacity of the cornea.

Dysopia Luminis, Nyctalopia—d. Proximorum, Presbytia—d. Tenebrarum, Hemeralopia.

DYSOPSIA, Dysopia.

DYSOREX'IA, from δυς, 'with difficulty,' and ορεξις, 'appetite.' Diminution of appetite.

DYSOS'MIA, from δυς, 'with difficulty,' and οσμη, 'smell.' Diminution of smell.

DYSOSPHRE'SIA, *Dysosphre'sis*, from δυς, and οσφρησις, 'the sense of smell.' A morbid state of the sense of smell.

DYSOSTO'SIS; from δυς, and οστεον, 'a bone.' A faulty conformation or morbid condition of bone.

DYSPEPSIA, from δυς, 'with difficulty,' and πεπτω, 'I concoct.' *Limo'sis Dyspep'sia, Anorex'ia, Apep'sia, Bradypep'sia, Gastroatax'ia, Diges'tio deprava'ta, D. difficʺilis, D. læsa, Gastro-ato'nia, Indigestion, Difficulty of Digestion.* A state of the stomach, in which its functions are disturbed, without the presence of other diseases, or when, if other diseases be present, they are of but minor importance. The symptoms of dyspepsia are very various. Those affecting the stomach itself are:—loss of appetite; nausea; pain in the epigastrium or hypochondrium, heart-burn; sense of fulness, or weight in the stomach; acrid or fetid eructations; pyrosis, and sense of fluttering or sinking at the pit of the stomach. The sympathetic affections are of the most diversified character. Dyspepsia, being generally of a functional nature, is devoid of danger. When arising from disease of the stomach itself, it is, of course, more serious.

It is usually dependent on irregularity of living; either in the quantity or quality of the food taken: and the most successful treatment is, to put the patient on a diet easy of digestion; to combat the causes, where such are apparent; and, by proper remedies and regimen, to strengthen the system in every practicable manner. A great error exists in regarding it as always a disease of debility. It is often connected with an inflammatory or subinflammatory condition of the mucous lining of the stomach, and of course a very different plan of treatment is required in the two cases. Dyspepsia is often attended with too great a secretion of the gastric acids; but, on other occasions, they would appear to be too small in quantity, so as to constitute *alkaline indigestion* or *neutral indigestion*.

Dyspepsia Chlorosis, Chlorosis—d. Hypochondriasis, Hypochondriasis—d. Pyrosis, Pyrosis.

DYSPEPSODYNIA, Cardialgia.

DYSPERMA'SIA, *Dyspermatis'mus*, from δυς, 'with difficulty,' and σπερμα, 'sperm' Difficulty—sometimes incapacity—of voiding the sperm.

DYSPHA'GIA, *Dyscatabro'sis, Dyscataposis, Deglutitʺio difficʺilis, D. læ'sa, D. impedi'ta*, from δυς, 'with difficulty,' and φαγω, 'I eat.' Difficulty of deglutition. Dysphagia is almost always symptomatic; either of inflammation or of other disease of the organs of deglutition, or of incomplete obstruction of the œsophagus, by some obstacle within it, or by a neighbouring tumour. At times, it is produced by spasm or paralysis of the œsophagus. The prognosis and treatment vary according to the cause.

Dysphagia Atonica, Pharyngoplegia—d. Inflammatoria, Œsophagitis—d. Pharyngea, D. Constricta—d. Œsophagea, D. Constricta—d. Spasmodica, Œsophagismus—d. Callosa, D. Constricta—d. Paralytica, Pharyngoplegia—d. Nervosa, Œsophagismus—d. Torpida, Pharyngoplegia—d. Globosa, Angone—d. Hysterica, Angone—d. Inflammatoria, Cynanche tonsillaris—d. Linguosa, Paraglossa—d. Ranula, Ranula—d. Uvulosa, Staphylœdema.

Dysphagia Constricta, *D. Pharyngea, D. Œsophagea, D. Callosa, Strictu'ra Pharyngis seu Œsoph'agi vera, S. Œ. Callosa, Stenocho'ria Œsoph'agi, Œsophagiarc'tia.* Stricture of the pharynx and œsophagus is an affection which may be the result of pharyngitis or œsophagitis; but more frequently of malignant disease in the parietes of the tube. The only remedy is the bougie.

DYSPHO'NIA, from δυς, and φωνη, 'the voice.' Difficulty of producing and articulating sounds: voice imperfect or depraved. *Apho'nia* (of some.)

Dysphonia Immodulata Nasalis, Rhinophonia—d. Immodulata palatina, Asaphia.

DYSPHOR'IA, *Inquietu'do, Asta'sia*, Dissatisfaction; restlessness; suffering; from δυς, and φερω, 'I bear.'

Dysphoria Anxietas, Anxiety—d. Nervosa, Fidgets—d. Simplex, Fidgets.

DYSPIO'NIA, from δυς, and πιων, 'fat.' A morbid condition of the adipous substance.

DYSPLASMATIC, Cacoplastic.

DYSPNŒ'A, from δυς, and πνεω, 'I breathe,' *Pseudo-asthma, Respira'tio difficʺilis, Brachypnœ'a, Retentio aëʹrea, Anhela'tion, Short breath, Difficulty of breathing*, (F.) *Courte Haleine.* Dyspnœa may be idiopathic or symptomatic; the latter accompanies almost all thoracic diseases. Urgent dyspnœa has been called *amphipneu'ma*, αμφιπνευμα —Hippocrates.

Dyspnœa Convulsiva, Asthma—d. Hydrothoracica, Hydrothorax—d. Physothoracica, Pneumothorax—d. Pinguedinosa, Pursiness—d Pneumatica, Pneumothorax—d. Pyothoracica, Empyema.

DYSSIA'LIA, from δυς, and σιαλος, 'saliva.' A morbid condition of the saliva.

DYSSYNOR'RIA, from δυς, and συνουσια, 'coition.' Difficulty of sexual intercourse.

DYSTHAN'ATOS, from δυς, and θανατος, 'death.' That which causes a slow and painful death. One who experiences this kind of death.—Hippocrates.—Galen.

DYSTHELA'SIA, from δυς, and θηλαζω, 'I give suck.' Inaptitude for suckling.

DYSTHERAPEU'TOS, *Difficiliter curaʹbilis*; from δυς, and θεραπεια, 'medical treatment.' That which is difficult of cure.

DYSTHE'SIA. Bad humour. Impatience in disease; from δυς, 'badly,' and τιθημι, 'I am situate.'—Erotian.

DYSTHET'ICA, *Cachexʹiæ, Cachexies*; same etymon. A morbid condition of the blood or blood-vessels; alone or connected with a morbid state of other fluids, producing a diseased habit. The 4th order in the class *Hæmatica* of Good, including *Plethora, Hæmorrhagia*, &c.

DYSTHYM'IA, from δυς, and θυμος, 'mind.' *Depression, Despondency.* A bad sign in acute diseases.

DYSTOCI'A, *Mogosto'cia*, from δυς, and τοκος, 'accouchement.' *A laborious accouchement, Parodynia, morbid labour, difficult labour. Partus difficʺilis.* See Laborious.

Dystocia Abortiva, Abortion—d. Dyscyesis, Pregnancy, morbid—d. Dyscyesis extrauterina, see Pregnancy, preternatural.

DYSTŒCHIASIS, *Hispid'itas*, from δυς, 'bad,' and στοιχος, 'order.' Irregular position of the eye-lashes.—Forestus.

DYSTON'IA, from δυς, and τονος, 'tone.' Morbid condition of the tone of a tissue or organ.

DYSU'RIA, *Uri'næ diffic"ilis excre'tio*, from δυς, 'with difficulty,' and ουρον, 'urine.' *Stran'gury* (q. v.) (*of some.*) Difficulty of passing the urine. In this affection the urine is voided with pain, and a sensation of heat in some part of the urethra. Dysuria is the first degree of retention of urine. It differs from strangury, in which the urine can only be passed in drops and with great straining.

Dysuria Calculosa, Calculi, vesical—d. Irritata, Calculi, vesical—d. Mucosa, Cystirrhœa.

E.

EAGLE-STONE, Ætites.

EAR, *Auris*, *Ous*, ους, Saxon, eare, (F.) *Oreille*. The organ of audition. It is composed of a series of more or less irregular cavities, in which the sonorous rays are successively received and reflected, until they agitate the nerves which are destined to convey the impression to the brain. The ear is contained partly in the substance of the temporal bones; and a part projects externally, behind the joint of the lower jaw. It may be divided into three portions;—the *outer* or *external ear*, formed by the auricle and meatus auditorius; the *middle ear*, comprising the cavity of the tympanum and its dependencies; and the *internal ear*, comprehending the three semicircular canals, the cochlea and the vestibule; which, together, constitute the *osseous* labyrinth. Within the cavity of this labyrinth are contained membranes having nearly the shape of the vestibule and semicircular canals, but not extending into the cochlea. These membranes form the *membranous labyrinth*. Between the osseous and the membranous labyrinth is situate the liquor of Cotunnius, and within the membranous labyrinth, is a fluid termed by De Blainville *vitrine auditive*, from its supposed analogy to the vitreous humour of the eye. The form of the membranous vestibule is not an exact imitation of the osseous cavity, being composed of two distinct sacs, which open into each other,—the one termed the *Sacculus vestibuli;* the other the *Sacculus* (q. v.) Each sac contains in its interior a small mass of white calcareous matter resembling powdered chalk, which seems to be suspended in the fluid of the sacs by means of a number of nervous filaments proceeding from the auditory nerve. These are the *otoconies* and *otolithes* of Breschet.

The auditory nerve is distributed to the cavities of the internal ear.

Ear, Flap, Proptoma auricularum.

EAR-PICK, *Oto'glyphis*, *Coch'lear auricula'rē*, *Auriscal'pium*. (F.) *Cure-oreille*. A species of small scoop, used for extracting hardened cerumen from the meatus auditorius externus; or to remove foreign bodies from the ear. If carelessly used, it is apt to excite inflammation of the tube.

EAR-TRUMPET, *Tubus acus'ticus*, *Acus'ticum Cornu*, (F.) *Cornet acoustique*. An instrument for collecting sound and increasing its intensity, used by those who are hard of hearing. It is, commonly, a kind of cone, formed of silver, tin, or elastic gum, the base of which is turned towards the person who is speaking, and the apex placed in the entrance of the meatus auditorius externus.

EARTH, CLUB, Orobanche Americana—e. Fuller's, Cimolia purpurescens—e. Gall, Veratrum viride—e. Heavy, Baryta—e. Japan, Catechu—e. Lemnian, Terra Lemnia—e. Ponderous, Baryta—e. Samian, Sami terra—e. Sealed, Terra sigillata.

EARTHNUT, Pignut, Bunium bulbocastanum.

EAU, Water—*e. d'Aix-la-Chapelle*, see Aix-la-Chapelle.

EAU D'ALIBOUR. This compound is made of *sulphate of zinc*, and *sulphate of copper*, each ℥j; *camphor*, ten grains; *saffron*, four grains; *water*, four fluidounces. Employed in chronic inflammation of the eyelids, and as a vulnerary.

EAU DE L'AMNIOS, Liquor amnii—*e. d'Amandes amères*, Aqua amygdalarum concentrata.

EAU ANTIPUTRIDE DE BEAUFORT. Mineral lemonade prepared with sulphuric acid.

EAU D'ARMAGNAC, Tinctura cinnamomi composita—*e. de Balaruc*, Balaruc waters—*e. de Barèges*, Barèges water—*e. Blanche*, Liquor plumbi subacetatis dilutus—*e. de Bonferme*, Tinctura cinnamomi composita—*e. de Bonnes*, Bonnes, mineral waters of—*e. de Boule*, see Ferrum tartarizatum—*e. de Bourbonne-les-Bains*, Bourbonne-les-Bains, mineral waters of—*e. des Carmes*, see Melissa—*e. de Chaux*, Liquor calcis—*e. de Chaux composée*, Liquor calcis compositus—*e. de Cuivre ammoniacal*, Liquor cupri ammoniati—*e. distillée*, Water distilled—*e. de Fontaine*, Water, spring—*e. des Fontaines de la Maréguerie*, Rouen, mineral waters of—*e. contre la Gangrène*, Liquor hydrargyri nitrici—*e. de Goudron*, see Pinus sylvestris—*e. de Goulard*, Liquor plumbi subacetatis dilutus—*e. d'Husson*, Want's Vinum colchici—*e. des Hydropiques*, Serum of serous membranes—*e. Hydrosulfurée simple*, Hydrosulphuretted water.

EAU DE JAVELLE. Bleaching liquid, Aqua alkali'na oxymuriat'ica, (*Common salt* ℔ij, *black oxide of manganese* ℔j, *water* ℔ij. Put into a retort, and add, gradually, *oil of vitriol* ℔ij. Pass the vapour through a solution of *subcarbonate of potass* ℥iij, in water ℥xxix, applying heat towards the last. S. G. 1.087.) It is stimulant, detergent, and antiseptic,—applied externally.

EAU DE LAC, Water, lake—*e. de Luce*, Spiritus ammoniæ succinatus—*e. de Marais*, Water, marsh—*e. Médicinale d'Husson*, see Colchicum autumnale—*e. de Mer*, Water, sea—*e. Mercurielle*, Liquor hydrargyri nitrici—*e. Minérale*, Water, mineral—*e. de Naples*, Naples water, factitious—*e. de Neige*, Water, snow—*e. de Pluie*, Water, rain—*e de Potasse*, Liquor potas-

sæ—*e. de Puit*, Water, well—*e. Régale*, Nitromuriatic acid—*e. de Source*, Water, well—*e. Sucrée*, Hydrosaccharum—*e. Végeto-minérale*, *Liquor Plumbi subacetatis dilutus*—*e. de Vichy*, Vichy water—*e. de Vie*, Brandy—*e. de Vie Allemande*, tinctura jalapii composita—*e. de Vie camphré*, Spiritus camphoræ.

EAUX, LES, Liquor amnii—*e. Hépatiques*, Waters, mineral, sulfureous—*e. Minérales artificielles*, Waters, mineral, artificial—*e. Minérales factices*, Waters, mineral, artificial—*e. Minérales ferrugineuses*, Waters, mineral, gaseous, &c.—*e. Minérales gaseuses* ou *acidules*, Waters, mineral, gaseous, &c.—*e. Minérales salines*, Waters, mineral, saline—*e. Minérales sulfureuses*, Waters, mineral, sulfureous—*e. Sulfurées*, Waters, mineral, sulfureous.

EBEAUPIN, MINERAL WATERS OF. An acidulous chalybeate, in the department of *Loire Inférieure*, near Nantes.

ÉBLOUISSEMENT, Dazzling.

EBRIECA'SUM. A term employed by Paracelsus to denote a disturbance of the reason, similar to what occurs in drunkenness.

EBRIETAS, Temulentia.

EBULLITIO. Strophulus.

EBULLITION, *Ebullitio*, *Æstua'tio*, *Anaz'esis*, *Causis*, from *ebullire*, 'to bubble up.' *Boiling*; (F.) *Bouillonnement*. The motion of a liquid, by which it gives off bubbles of vapour, by heat or fermentation. The boiling point of liquids varies according to the pressure to which they are subjected. For the point of ebullition of different substances, see Heat.

Ebullition is used in France, in a vague manner, for every kind of transient eruption of the skin, occurring without fever or with a slight febrile attack.

EBULUS, Sambucus ebulus.

EBUR, Ivory.

EC, (before a vowel *Ex*,) ἐκ, ἐξ, 'out of, from, of.' Hence, Ecchymoma, Eclectic, &c.

ÉCAILLE, Scale.

ÉCAILLES D'HUÎTRES, Ostreæ testes.

ÉCAILLEUX, Squamous.

ECBESOMENON, Eventus.

ECBOLIC, Abortive.

ECBOLIUS, Abortive.

ECBOLIUM ELATERIUM, Momordica elaterium

ECBRAS'MATA, from ἐκβράζω, 'I boil up' *Ecchym'ata*. Hippocrates uses this word for certain burning eruptions.

ECCATHARTICUS, Cathartic.

ECCEPHALO'SIS, *Excerebra'tio*; from ἐκ, 'out,' and κεφαλη, 'head.' The removal of the brain of the child to facilitate delivery.

ECCHELYSIS, Expectoration.

ECCHYLOMA, Extract.

ECCHYMATA, Ecbrasmata.

ECCHYMO'MA, *Ecchymo'sis*, *Pelidna'ma*, *Peliō'ma*, from ἐκ, 'out of,' and χυμος, 'juice,' 'humor.' *Effu'sio*, *Exsucca'tio*. A liquid black, or yellow spot, produced by blood effused into the cellular tissue from a contusion. Spontaneous effusions, occurring as the result of disease or after death, are called *suggillations*. It is important, at times, in a medico-legal point of view, to distinguish between the *ecchymosis*, produced during life, and *suggillation*, occurring after death.

ECCHYMOMA ARTERIOSUM, see Aneurism—*e.* Hyponychon, Hyponychon—*e.* Lymphaticum, Phlegmatia dolens—*e.* Melasma, Melasma.

ECCHYMOSIS, Ecchymoma.

ECCHYSIS, Effusion.

ECCLISIS, Luxation.

EC'COPĒ, from ἐκ, and κοπτειν, 'to cut.' The act of cutting out: also, a perpendicular division of the cranium, by a cutting instrument. See *Entaille*.

ECCOP'EUS. Same etymon. A knife or instrument for cutting. An ancient instrument—the *raspatory*—used in trepaning.

ECCOPROT'IC, *Eccoprot'icus*, *Ectoprot'ic*, from ἐξ, 'out of,' and κοπρος, 'excrement.' Mild purgatives or laxatives, whose operation is confined to simply clearing out the intestinal canal.

ECCORTHAT'ICUS, from ἐκ, 'out of,' and κορθοω, 'I collect.' An ancient epithet for remedies to which was attributed the property of evacuating collections of humors.

ECCRINOL'OGY, *Eccrinolog''ia*, from ἐκκρινω, (ἐκ and κρινω,) 'I separate,' and λογος, 'a discourse.' A treatise on the secretions.

EC'CRISIS. Same etymon. *Excre'tio*. The excretion or egestion, either of an excrementitious, or morbific matter, by any of the outlets.

ECCRIT'ICA. Diseases of the excernent function. The 6th class in Good's Nosology.

ECCYE'SIS. Pregnancy, extra-uterine—*e.* Abdominalis, Pregnancy, abdominal—*e.* Ovaria, Pregnancy, ovarial—*e.* Tubalis, Pregnancy, tubal.

EC'DORA, from ἐκ and δερω, 'I flay.' *Anad'ora*. *Excoria'tio*. Excoriation in general, but more especially of the urethra.

ÉCHALOTTE, *Eschalotte*, *Al'lium Ascalon'icum*, *Cepa Ascalonica*, *The shallot'*. A species of allium, employed in culinary preparations.

ÉCHANCRURE, (F.) *Emargina'tio*, *Emarginatu'ra*. A French word, employed by anatomists to designate depressions and notches (q. v.) of various shapes, observed on the surface or edges of bones.

ÉCHANCRURE ETHMOÏDALE is on the nasal bone, which unites with the ethmoid. See Ethmoid.

ÉCHANCRURE NASALE, *Nasal Notch*, belongs to the os frontis, and is articulated with the bones of the nose.

ÉCHANCRURE PAROTIDIENNE is a triangular space, comprised between the parotidean edge of the inferior maxillary bone and the mastoid process, so called because it lodges the parotid gland.

ÉCHARDE, Splinter.

ÉCHARPE GRANDE, *et É. MOYEN*, see Sling—*é. de J. L. Petit*, see Sling—*é. Petite*, see Sling.

ÉCHAUBOULURES, (F.) *Sudam'ina*, *Hidro'a*. A word whose meaning is not fixed. It is applied to any eruption on the surface of the body, accompanied with pricking and other uneasy sensations.

ÉCHAUFFANTS, Calefacients.

ÉCHAUFFEMENT, (F.) *Calefac'tio*, *Excalefac'tio*, from *échauffer*, *calefacere*, 'to make warm.' Augmentation of heat in the animal economy; the symptoms of which are a more than ordinary sensation of heat, disposition to perspiration, great thirst, general indisposition, flushed countenance, &c. It goes off by the use of antiphlogistics and abstinence. In the vulgar

language, it is often used synonymously with *constipation*, (q. v.) and sometimes for simple gonorrhœa, (q. v.) and for chafing, (q. v.)

ECHECOL'LON, from ἐχω, 'I have,' and κολλα, 'glue.' *Echecol'lum*. Any topical, glutinous remedy.—Gorræus, Galen.

ÉCHELLES DU LIMAÇON, Scalæ of the cochlea.

ECHENEIS, Remora Hildani.

ECHETROSIS, Bryonia alba.

ÉCHINE, Vertebral column.

ECHINOCOCCUS, HOMINIS, see Worms—e. Humanus Hydatid.

ECHINOGLOSSUM, Ophioglossum vulgatum.

ECHINOPHTHAL'MIA, from ἐχινος, 'a hedgehog,' and οφθαλμια, 'inflammation of the eye.' Ophthalmia of the eyelids in which the cilia project like the quills of the hedgehog.

ECHI'NOPS, from ἐχινος, 'hedgehog,' and ωψ, 'the appearance.' *Crocodil'ion*, *Acanthalzuca*, *Scabio'sa carduifo'lia*, *Sphæroceph'ala elatior*, *Echinopus*, *Echinops Sphæroceph'alus*. *The globe thistle*. The root and seeds are reputed to be moderately diuretic.

ECHINOPUS, Echinops.

ECHINUS SCANDENS, Allamanda.

ECHOS, Tinnitus aurium.

ECHOSCOPIUM, Stethoscope.

ECHTHYSTEROCYESIS, Pregnancy, extra-uterine.

ECLACTIS'MA, *Eclamp'sis*, *Eclamp'sia*, *Epilamp'sis*, *Effulgescen'tia*, from ἐκλακτιζω, 'I kick.' Epilepsy is often accompanied with flashings of light; and hence Hippocrates has used the last two words for epilepsy. They have all been applied to the convulsions of children.

ÉCLAIRE, Chelidonium majus—*é. Petite*, Ranunculus ficaria.

ECLAMPSIA, Convulsion: also, the convulsions of children, *Eclamp'sia infan'tum*, *Epilep'sia acu'ta infan'tum*, *E. febri'lis infan'tum*, *E. pueri'lis*, (F.) *Convulsions des Enfans*, *Eclampsie*.

ECLAMP'SIA GRAVIDA'RUM ET PARTURIEN'TIUM; *Convulsions des femmes enceintes et en couche*, *Puerperal Convulsions*. Convulsions of pregnant and parturient women.

ECLAMPSIA INFANTUM, see Eclampsia—e. Typhodes, Raphania.

ECLAMPSIE DES ENFANS, Eclampsia infantum.

ECLECTIC, (PHYSICIANS,) *Eclec'tici Med'ici*, from ἐκλεγω, 'I choose.' A sect of physicians, who professed to choose, from other sects, all the opinions which appeared to them best founded. Agathinus of Sparta, master of Archigenes of Apamæa, in Syria, was its reputed founder; and Archigenes and Aretæus were its greatest ornaments.

Every judicious physician must be an eclectic.

ECLEC'TOS, *Eclig'ma*, *Elig'ma*, *Elix'is*, *Lambiti'vum*, *Linctus*, *Linctua'rium*, from ἐκλειχω, 'I lick.' (F.) *Looch*, (q. v.) A medicine, of a thick, syrupy consistence, chiefly used to allay cough; and consisting of pectoral remedies. It was formerly sucked from the end of a liquorice stick, made into a kind of pencil; hence its name *Linctus*, from *lingere*, 'to lick.' Although the linctus is usually exhibited in thoracic affections, it may have tonic virtues combined with it.

ECLEGMA ALBUM, Looch album—e. Gummoso-oleosum, Looch album.

ECLEIPSIS, Exfoliation.

ECLEPISIS, Desquamation.

ECLEPISITREPANON, Exfoliative trepan.

ECLIGMA, Eclectos.

ECLIMIA, Boulimia.

ECLIPSIS, Syncope.

ÉCLISSE, Splint.

EC'LYSIS, *Exsolu'tio*; from ἐκλυω, 'I loosen.' Resolution, prostration of strength; faintness.

ECLYSIS PNEUMO-CARDIACA, Asphyxia.

ECMYZESIS, Exsuctio.

ECNŒA, Dementia.

ÉCOLE, School.

ECON'OMY, *Œconom'ia*, from οικια, 'a house,' 'family,' and νεμω, 'I rule.' "By the term *animal economy* is understood, the aggregate of the laws which govern the organism. The word *economy* is, also, used for the aggregate of parts which constitute man or animals.

ÉCORCE, Cortex—*é. Cariocostine*, Canella alba—*é. de Saint Lucie*, Cinchonæ Caribææ cortex—*é. de Winter*, see Wintera aromatica—*é. Fausse de Winter*, Canella alba.

ÉCORCHURES, Chafing, Excoriation.

ÉCOULEMENT, Discharge, Gonorrhœa—*é. Blanc*, Leucorrhœa—*é. de Sang par l'Intestin*, Hæmatochezia.

ÉCOUVILLON, see *Écouvillonnement*.

ÉCOUVILLONNEMENT, (F.) from *Écouvillon*, 'a kind of mop, the sponge of a gun.' A term used by the French therapeutists for the act of cleansing or applying remedies to a part by means of a mop or brush fixed to the end of a piece of whalebone. Such mop or brush is termed *Ecouvillon*.

ECPHLOGOSIS, Inflammation.

ECPHLYSIS, Vesicula—e. Herpes, Herpes—e. Herpes circinatus, Herpes circinatus—e. Herpes exedens, Herpes exedens—e. Herpes miliaris, Herpes phlyctænodes—e. Herpes zoster, Herpes zoster—e. Pompholyx, Pompholyx—e. Rhypia, Rupia.

ECPHRACTIC, Deobstruent.

ECPHRAX'IS, from ἐκφραστω, 'I remove obstruction.' The action of deobstruent remedies.

ECPHRONIA, Insanity—e. Melancholia, Melancholy.

ECPHYAS, Appendix vermiformis cæci.

ECPHYMA, Excrescence, Tumour—e. Callus, Callosity—e. Caruncula, Caruncle—e. Clavus, Corn—e. Œdematicum, Phlegmatia dolens—e. Physconia, Physconia—e. Verruca, Verruca.

ECPHYSE'SIS, from ἐκφυσαω, 'I breathe through,' *Exsuffla'tio*. A quick and forced expulsion of air from the lungs.

ECPHYSIS, Apophysis—e. Ventriculi, Duodenum.

ECPIES'MA, from ἐκπιεζω, 'I compress.' *Effractu'ra*, *Impac'tion*, *Deces'sio*. A fracture of the cranium, with depression of the fragments and compression of the brain.

ECPIES'MOS, *Expres'sio*, (q. v.) *Ex'itus*, *Ecpies'mon*, same etymon. Celsus uses these words to signify the forcing of the eye from the orbitar cavity, with apparent but not real augmentation of the organ. See Exophthalmia.

ECPLERO'MA, from ἐκ, and πληροω, 'I fill,' *a cushion*, *a pad*. Hippocrates means, by this term, a small pad or ball of leather or

other substance intended to fill the hollow of the arm-pit; used probably in reducing luxations of the shoulder.

ECPLEXIS, Stupor.

ECPNEUMATOSIS, Expiration.

ECPNEUSIS, Expiration.

ECPNOE, Expiration.

ECPTO'MA, *Ecpto'sis*, *Exciden'tia*; from ἐκπίπτω, 'I fall out.' This word has been used in various senses. 1. Synonymously with luxation. 2. For the separation of gangrenous parts. 3. For the expulsion of the secundines. 4. For the prolapsus of the womb: and 5. For intestinal or omental hernia, &c.

ECPTOSIS, Luxation.

ECPYCTICA, Incrassantia.

ECPYEMA, Abscess, Suppuration, Empyema.

ECPYESIS, Abscess, Pustule, Empyema—e. Impetigo, Impetigo—e. Porrigo, Porrigo—e. Porrigo crustacea, Porrigo larvalis—e. Porrigo favosa, Porrigo favosa—e. Porrigo furfuracea, Porrigo furfurans—e. Porrigo galeata, Porrigo scutulata—e. Porrigo lupinosa, Porrigo lupinosa—e. Scabies, Psora.

ECPYETICUS, Suppurative.

ECPYISCONTUS, Suppurative.

ÉCREVISSE, Crab.

ECREX'IS, *Ruptu'ra*, from ἐκρηγνυμι, 'to break.' Rupture, laceration.

ECRHYTH'MOS, ἐκ, and ῥυθμος, 'rhythm.' A term applied to the pulse, particularly when irregular.—Galen.

ECROE, Discharge.

ÉCROUELLES, Scrofula—*é. Mésentériques*, Tabes mesenterica.

EC'RYSIS, from ἐκρεω, 'I run from.' A discharge.

ECSARCO'MA, from ἐκ, and σαρξ, 'flesh.' A fleshy excrescence of various kinds. See Fungosity and Sarcoma.

EC'STASIS, from ἐξισταμαι, 'I am beside myself.' An *ec'stasy* or *trance*, *Carus ec'stasis*, *Cat'ochus*, *Ex'tasis*, *Catalep'sia spu'ria*, *Hyperplexie*. (F.) *Extase*. A state in which certain ideas so completely absorb the mind, that the external sensations are suspended, the voluntary movements arrested, and even the vital action retarded. In catalepsy, there is, in addition, complete suspension of the intellectual faculties. This last condition is in general described as *trance*. See, also, Luxation.

ECTASIA, Aneurism—e. Venarum, Varix.

EC'TASIS, 'Extension,' (q. v.) 'Expansion.'

Ec'tasis I'ridis, is the extension or expansion of the iris, which occasions diminution of the pupil.

ECTEXIS, Colliquation.

ECTHLIM'MA, *Exulcera'tio*, from ἐκθλιβω, 'I express,' 'I bruise.' Attrition (q. v.) Chafings or excoriations, produced by external violence.—Hippocrates.

ECTHLIPSIS, Expression.

EC'THYMA, from ἐκθυω, 'I break out.' *Ecpye'sis ecthyma*, *Phlysis ecthyma*, *Phlyza'cia agria*, *Scabies Vera*, *Furunculi atonici*, (F.) *Dartre crustacée*, *D. fongueuse*. A cutaneous eruption, characterized by large round pustules always distinct and seated upon an indurated and highly inflamed base. In the course of a day or two the pustules generally break, and olive-brown incrustations are formed, which adhere firmly to the skin. These separate in about a fortnight. The disease requires the antiphlogistic treatment. Under the *Ecthymata*, Vogel has designated certain hard, unequal tumours, which appear transitorily on the skin. See Efflorescence and Pustule.

ECTHYSTEROCYESIS, Pregnancy, extrauterine.

ECTILLOTICUS, Depilatory.

ECTILMOS, Evulsion.

ECTOME, Castration, *Entaille*, Excision.

ECTOMIUS, Castratus.

ECTONION, Helleborus niger.

ECTOP'IA, *Ectop'isis*, *Ectopis'mus*, from ἐκτοπος, 'out of place.' Morbid displacement of parts. See Luxation.

Ectopia Ani, Proctocele—e. Cordis, Displacement of the heart—e. Herniosa, Hernia.

ECTOPOCYS'TICUS, from ἐκτοπος, 'out of place,' and κυστις, 'bladder.' A disease dependent upon displacement of the bladder.

ECTOPROTIC, Eccoprotic.

ECTOZO'A, *Ectozo'a*, *Ectozoa'ria*, (F.) *Ectozoaires*. Parasitic animals that infest the exterior of the body,—as lice.

ECTRIM'MA, from ἐκτριβω, 'I rub off.' Ulceration of the skin; and particularly that which arises from the pressure of the bed on different parts of the body, after a protracted confinement.—Hippocrates.

ECTROMA, Abortion.

ECTRO'MELES; from ἐκτρωσις, 'abortion,' and μελος, 'a limb.' A genus of monsters, in which the limbs are nearly or altogether deficient, as in the ordinary cetacea.—J. G. St. Hilaire.

EC'TROPÉ, *Divertic'ulum*, from ἐκτρεπω, 'I turn off,' 'divert.' Any duct by which peccant or morbific matter was supposed to be drawn off.—Hippocrates.

ECTROP'ION, same etymon. *Ectropium*, *Ever'sio pal'pebræ*, *Blepharopto'sis Ectropium*, *Blepharoto'sis*, *Pal'pebra infe'rior extror'sum flexa*, *Divarica'tio*, (F.) *Eraillement des Paupières*, *Renversement des Paupières*. Eversion of the eyelids, so that they do not completely cover the globe of the eye. It happens more commonly to the lower than to the upper eyelid. It may be owing to the retraction of the skin, after the cure of an ulcer, wound, or burn of the eyelid; or it may depend on tumefaction or relaxation of the conjunctiva. In the majority of cases, removal of a portion of the conjunctiva will operate a cure; but there are many which defy the efforts of art. The ancients called Ectropion of the upper eyelid *lagophthalmia*.

ECTROSIS, Abortion.

ECTROSMOS, Abortion.

ECTROT'IC, from ἐκτρωμα, (ἐκ, and τιτρωσκω, 'I wound,') 'abortion.' *Ectrot'icus*, *Abortive*, (q. v.) An epithet applied to methods for preventing the development or causing the abortion of any disease—as of chancres by the use of caustic; small pox pustules, by the use of mercurial ointment, &c.

ECTYLOTICUS, Catheretic.

ÉCUMEUX, Frothy.

EC'ZEMA, from ἐκζεω, 'I boil out,' 'I effervesce.' *Eczis'ma*, *Pus'tula ardens*, *Cytis'ma ec'zema*, *Humid Tetter*, *Running Scall*, (F.) *Dartre squammeuse humide*, *D. vive gale épidémique*. Heat eruption. An eruption of small vesicles on various parts of the skin, usually set close or crowded together; with little or no inflam-

mation around their bases, and unattended by fever.

Ec'zema Mercuria'lē, *Ec'zema rubrum, Erythe'ma mercuria'lē, Hydrargyr'ia, Hydrargyro'sis, Hydrargyri'asis, Morbus mercuria'lis, Mercu'rial lepra.* A variety of eczema, arising from the irritation of mercury. The treatment is chiefly palliative, consisting in ablution with mucilaginous infusions or decoctions; mild dressings, where the cuticle has exfoliated; avoiding all irritation; keeping the bowels open; with the use of the sulphuric acid and cinchona. The *Ec'zema Impetigino'des, Gall* or *Grocer's Itch*, is produced by the irritation of sugar.

Eczema of the Face, at an advanced stage, and occurring in young children, has been described under the names *Crusta lactea* and *Porrigo larvalis* (q. v.)

Eczema of the Hairy Scalp is often confounded with other affections under the names of Porrigo and Tinea, which are pustular, not vesicular in their form. It occurs during dentition, and even afterwards, and the discharge is so profuse, that the head appears as if dipped in some glutinous liquid. By and by, the secretion dries into crusts and mats the hair into little separate tufts. The scalp gives evidence of inflammatory excitement, and the lymphatic ganglions of the neck are apt to become inflamed and suppurate.

A variety of humid scalled head, in which the humour from the excoriated surface runs down upon the hairs, and encloses them in little silvery pellicles or sheaths, has received the name of *Asbestos Scall.*

Eczema Rubrum, Eczema mercuriale.

ECZESIS, Effervescens.

ECZESMA, Eczema, Lichen tropicus.

EDENTATUS, Edentulus.

ÉDENTÉ, Edentulus.

EDEN'TULUS, *Edenta'tus*, from *e*, and *dens, dentis*, 'a tooth.' *Ano'dos, Carens den'tibus*, (F.) *Édenté*. One without teeth. This defect can only be remedied by artificial means.

EDERA, Hedera helix.

EDULCORA'TION, *Glycan'sis, Edulcora'tio*, from *edulcorare*, (*dulcis*, 'sweet,) 'to sweeten,' 'to render mild.' An operation, the object of which is to deprive a substance of its acrid and disagreeable taste, or at least to disguise it. Also, the addition of a saccharine substance to a medicine, whose taste it is desirable to modify agreeably.

ÉDULE, Comestible.

EDULIS, *Comestible.*

EF'FERENT, *Ef'ferens*, from *effero*, (*e*, and *ferro*,) 'I carry,' 'transport.' *Vasa efferen'tia* are those lymphatics, which issue from the lymphatic glands to convey their lymph to the thoracic duct; so called to distinguish them from those which pass to those glands, and which have been termed *vasa afferen'tia.* Also, nerves that convey the nervous influence from the nervous centres to the circumference. See Afferent.

EFFERVES'CENCE, *Effervescen'tia, Zesis, Ec'zesis*, from *effervescere*, (*e*, and *fervescere*,) 'to grow hot.' That agitation, which is produced by the escape of gas through a liquid, independently of the heat of the mixture; such as, e. g. results from the mixture of acetic acid and carbonate of potassa.

In *Pathology* it has a similar signification. It expresses, in the language of the humorists, a sort of ebullition in the fluids of the living body, produced either by elevation of temperature or by the reaction on each other of the principles contained in the fluids in circulation.

EFFETUS, Impoverished.

EFFICA'CIOUS, *Ef'ficax*, from *efficere*, (*e*, and *facere*,) 'to accomplish.' That which produces a great effect, as an *efficacious remedy.*

Medici'na efficax, La médecine efficace, is a term sometimes applied to surgery.

EFFILA, Ephelides.

EFFLORATIO, Exanthem.

EFFLORES'CENCE, *Efflora'tio, Efflorescen'tia*, from *efflorescere*, (*e*, and *florescere*,) 'to blow as a flower.' *Stribili'go, Ecthyma.* The conversion of a solid substance into a pulverulent state by exposure to the air. In salts this is generally owing to the loss of a part of their water of crystallization.

In *Pathology*, efflorescence has the same meaning as exanthema; and, in the nosology of Sauvages, the name is given to that order of diseases. Sometimes, it is confined to the *cutaneous blush*, the *exanthe'sis* of Good.

EFFLORESCENTIA, Exanthem.

EFFLORESCENTIÆ, *Élévures.*

EFFLUVIUM, Emanation—e. Latrinarium, *Mitte*—e. Palustre, Miasm, Marsh.

EFFORT, (*e*, and *fortis*, 'strong.') *Nisus, Conatus, Peira.* A muscular contraction of greater or less strength, the object of which is, either to resist an external force, or to accomplish a function, which has become naturally laborious:—such are, the act of pushing away, or of drawing a body toward us, and the more or less painful efforts used by the mother to cause the expulsion of the fœtus. In France, the word *effort* is often used synonymously with hernia; and signifies likewise, the painful twitches of muscles, occasioned by over-exertion, or by the rupture of some of their fleshy fibres. Sauvages calls *Efforts des reins, Lumbago à nisu*, the pain in the loins occasioned by bearing too heavy a burden.

EFFORT, Hernia—*e. des Reins*, see Effort.

EFFOSSIO, Exhumation.

EFFRACTURA, Ecpiesma.

Effractu'ra Cranii, *Enthla'sis Cra'nii.* Fracture of the cranium, with depression.—Paré.

EFFUSION, *Effu'sio, Ec'chysis*, from *effundere*, (*e*, and *fundere*,) 'to pour out.' (F.) *Épanchement*, (*Infiltration* is the term generally employed for effusion into the cellular membrane.) The pouring out of blood or of any other fluid into the cellular membrane, or into the cavities of the body. The *effusion of serum* or of *coagulable* lymph, e. g. is a common result of inflammation of serous membranes.

ÉGARÉ, Wild.

ÉGAREMENT D'ESPRIT, Delirium, Insanity.

EGER, MINERAL WATERS OF THE. In the valley of the Eger, at the western extremity of Bohemia, there are several acidulous springs. One of the most frequented of these, is Franzensbad, (q. v.)

EGESTAS, Want.

EGESTIO, Dejection, Excretion.

EGG-PLANT, Solanum melongena—e. White of, Albumen ovi.

EGLANTIER DE CHIEN, Rosa canina—*e. Sauvage*, Rosa canina.

EGOBRONCHOPHONY, see Egophony.

EGOPH'ONY, *Ægopho'nia*, from αἰξ, 'a goat,' and φωνη, 'voice.' *Caprilo'quium*, *Goat's Voice*, *Bleating Voice*, (F.) *Voix chévrotante*, *V. égophonique*, *V. de Polichinelle*, *V. sénile*, *Pectoriloquie chévrotante*. Laënnec has designated by this name, the kind of resonance of the voice through the stethoscope, when we examine the chest of one labouring under moderate effusion into one of the pleuræ. The voice, which strikes the ear through the cylinder, is more sharp and harsh than usual, and tremulous and broken like that of the goat. The patient himself is called *Égophone*. Bouillaud affirms that the "bronchial and bleating voice," (*égobronchophonie*) is the principal symptom of pleuropneumonia.

EGREGOR'SIS, from εγρεγορεω, 'I watch,' *Vigil'ia*. A watchfulness. A morbid want of sleep.—Galen.

EGRESSUS VENTRICULI, Pylorus.

EIDOS, ειδος, 'form, resemblance.' The ει, is often changed into ω, at the termination of a word. Thus, *Hæmatoï'des* or *Hæmatodes*.

EILAMIDES, Meninges.

EILE'MA, from ειλεος, *il'eus*, (ειλεω, 'I roll,') 'a convolution.' Vogel has given this name to a fixed pain, occupying some portion of the intestinal canal, which the patient compares to the sensation that would be produced by a nail driven into the part.

EILEON, Ileon.

EILEUS, Ileus.

EILOID, (*Tumour*,) *Eiloïdes*, from ειλεω, 'I roll,' and ειδος, 'resemblance.' A morbid growth of the cutis, coiled or folded.

EISANTHE'MA, *Exanthe'ma inter'num*, from εις, 'within,' and ανθημα, 'efflorescence.' An eruption on a mucous membrane;—aphthæ, for example.

EISBOLE, Attack, Injection.

EISPNOE, Inspiration.

EJACULA'TION, from *e*, and *jaculare*,—itself from *jacere*, 'to throw.' *Gonobolia*, *Gonobolis'mus*, *Ejaculatio Semi'nis*, *Expatra'tio*, *Patra'tio*. The emission of sperm. The act, by which that fluid is darted out through the urethra.

EJACULATOR. Same etymon. That which effects the emission of sperm. See Transversus perinæi.

EJACULATOR SEMINIS, Accelerator urinæ.

EJAC'ULATORY, *Ejaculato'rius*, *Ejac'ulans*: same etymon. Concerned in the ejaculation of sperm.

EJACULATORY DUCTS or CANALS, (F.) *Conduits* ou *Canaux éjaculateurs*, are formed by the union of the vasa deferentia with the ducts of the vesiculæ seminales. They open at the lateral and anterior parts of the verumontanum, and convey into the urethra the sperm which is discharged from the vesiculæ, as well as that which comes directly from the testicle by the vas deferens.

EJECTIO, Excretion—*e.* Fæcum, Defecation.

EJEC'TION, *Ejec'tio*; from *ejicere*, (*e* and *jacere*,) 'to throw out or eject.' The excretion of the fæces, urine, sputa, &c.

EL NISPERO, Achras sapota.

ELABORA'TION, *Elabora'tio*; from *e*, and *laborare*, 'to work.' This word is used, by physiologists, to signify the various changes which substances susceptible of assimilation undergo, through the action of living organs, before they are capable of serving for nutrition. The food is said to be *elaborated in the stomach* during the formation of chyme; the chyme is *elaborated* in the small intestine before it is chyle, &c.

ELÆ, Olea Europæa.

ELÆAGNUS, Myrica gale—*e.* Cordo, Myrica gale.

ELÆOCARPUS COPALIFERA, Copal.

ELÆOM'ELI, from ελαιον, 'oil,' and μελι, 'honey.' Dioscorides means, by this, an oil thicker than honey, and of a sweet taste, which flows from the trunk of a tree in Syria. It is acrid and purgative; and sometimes occasions serious symptoms, according to that author.—Gorræus.

ELÆON, Oil.

ELÆOPH'ANES, from ελαιον, 'oil,' and φαινομαι, 'I appear.' That which has the appearance of oil; as *Uri'na elæoph'anes*.

ELÆ'O-SAC'CHARUM, from ελαιον, 'oil,' and σακχαρ, 'sugar.' *O'leo-Sac'charum*, *Bal'samo-Sac'charum*. A medicine, composed of essential oil and sugar. It was made by pouring upon an ounce of sugar, reduced to an impalpable powder, ʒss or ʒj of an essential oil; the mixture being triturated until the two substances were perfectly united.—Rolfink.

ELAIN, see Pinguedo.

ELAIS GUINEENSIS, see Cocos butyracea—*e.* Occidentalis, see Cocos butyracea.

ÉLAN, Cervus alces.

ÉLANCEMENT, see Lancinating.

ELAPHOBOSCUM, Pastinaca sativa.

ELAPHRIUM TOMENTOSUM, Fagara octandra.

ELAPSUS, Luxation.

ELAS'MA, from ελαυνω, 'I drive up.' A Clyster pipe.—Linden.

ELASTES, Elasticity.

ELASTIC''ITY, *Elastic''itas*, *Elater*, *Elas'tes*, *El'ates*, *Vis elastica*, *Tone*, *Tonic''ity*, *Contractilité de Tissu*, *Contractilité par défaut d'extension*, from ελαυνω, 'I impel.' The property by which certain bodies return to their proper size and shape where these have been modified by pressure or otherwise. It is possessed by the dead as well as living solid.

ELATE, Pinus picea—*e.* Theleia, Pinus rubra.

ELATER, Elasticity.

ELATERINE, see Momordica elaterium.

ELATERIUM, Extractum elaterii, Momordica elaterium.

ELATES, Elasticity.

ELATIN, see Momordica elaterium.

ELATINE, Antirhinum elatine.

ELBOW, Sax elboga, from *ell*, and *bow*; the bend of the ulna, *Cu'bitus*, *Ancon*, *Pechys*, *Ulna*, (q. v.) (F.) *Coude*. This word, abstractedly, means the angle formed by the union of two straight bodies. It is particularly applied to the articulation of the arm with the forearm, and especially to the projection formed by the olecranon process at the posterior part of the joint.

ELBOW, MINERS', see Miners' Elbow.

ELCOMA, Ulcer.

ELCO'SIS or HELCO'SIS, *Elco'ma* or *Helco'ma*, from ελκος, 'an ulcer.' Ulceration in

general. An ulcer, (q. v.) A deep ulceration of the cornea, in consequence of a blow or of violent inflammation.—Galen, Paré.

Sauvages applies the term to a state of the body, in which there are numerous ulcerations, of an obstinate character, complicated with caries, putrescency, low fever, &c.

ELCUSTER, Embryulcus.

ELDER, Sambucus—e. Common, Sambucus Canadensis—e. Dwarf, Aralia hispida, Sambucus ebulus—e. Prickly, Aralia spinosa.

ELECAMPANE, Inula helenium.

ELECTARIUM E CASSIA, Confectio cassiæ.

ELECTRICITAS ANIMALIS, Galvanism—e. Galvanica, Galvanism—e. Metallica, Galvanism.

ELECTRIC'ITY, *Electric'itas*, from ηλεκτρον, 'amber,'—the substance in which it was first noticed. Electricity is used medicinally as an excitant. It has been occasionally employed with success in paralysis, rheumatism, accidental deafness, amaurosis, amenorrhœa, &c., but it is uncertain, and not much used; and the cases are by no means clear in which it could be of service. It may be communicated by means of the *electric bath—Bain électrique*, as it has been called; which consists in placing the patient upon an isolated stool, and connecting him with the prime conductor, of which he thus becomes a part. The fluid may be communicated by points, sparks, or by shocks, according to the required intensity.

ELECTRICITY, MAGNETIC, Electro-Magnetism—e. Voltaic, Galvanism.

TO ELEC'TRIFY, from *electric*, and *fio*, 'I make.' (F.) *Électriser*. To produce the electrical condition in a body, or to render it susceptible of producing electrical phenomena. It is often used to signify the act of communicating the electric fluid to man.

ÉLECTRISER, to electrify.

ELECTRO'DES, from ηλεκτρον, 'amber,' and ειδος, 'resemblance.' An epithet for evacuations, which shine like amber.—Hippocr.—Foësius.

ELEC'TRO-MAG'NETISM, *Magnet'ic electric''ity*. An electro-magnetic apparatus is occasionally used in cases of paralysis. A convenient form consists of a battery of six curved permanent magnets, and an intensity armature, around whose cylinders 1500 yards of fine insulated copper wire are coiled. The ends of the wire communicate respectively, with a pair of directors, each of which holds a piece of sponge, dipped in vinegar or a solution of common salt. When the armature is rotated, and a portion of the body is interposed between the directors, a succession of shocks is received.

ELEC'TROPUNCTURE, *Electropunctura'tion*, *Galvanopuncture*. The operation of inserting two or more wires, and then connecting them to the poles of the Galvanic apparatus.

ELECTRUM, Succinum.

ELECTUAIRE DENTIFRICE, Dentifrice.

ELECTUA'RIUM, *Electa'rium*; an *Electuary*, from *eligere*, 'to make choice.' (F.) *Electuaire*. A pharmaceutical composition of a soft consistence, somewhat thicker than honey, and formed of powders, pulps, extracts, syrup, honey, &c. In the London and American Pharmacopœias, electuaries are called Confections, which see.

ELECTUARIUM DE ALOE, Opiatum mesentericum—e. Aperiens, Confectio sennæ—e. Aromaticum, Confectio aromatica—e. Cassiæ, Confectio cassiæ—e. Cassiæ fistulæ, Confectio cassiæ—e. Cassiæ sennæ, Confectio sennæ—e. Cassiæ tamarindatum seu lenitivum, Confectio cassiæ—e. Catholicum commune, Confectio sennæ—e. Cinchonæ, Opiatum febrifugum—e. de Croco emendatum, Confectio hyacinthi—e. Diaprunum, Confectio sennæ—e. Ecoproticum, Confectio sennæ—e. de Kinâ kinâ, Opium febrifugum—e. Laxativum, Confectio cassiæ—e. Lenitivum, Confectio sennæ—e. Opiatum, Confectio opii—e. Scammonii, Confectio scammoniæ—e. è Scammonio, Confectio scammoniæ—e. Sennæ, Confectio sennæ—e. Sennæ compositum, Confectio sennæ—e. Sennæ cum pulpis, Confectio sennæ—e. Thebaicum, Confectio opii.

ELÉENCÉPHALE, from ελαιον, 'oil,' and εγκεφαλον, 'encephalon.' A fatty matter found by Couerbe in the encephalic neurine.

ELELISPHACOS, Salvia.

EL'EMENT, *Elemen'tum*, from ancient *eleo* for *oleo*, 'to grow,' (?) *Princip'ium*, *P. primitï'vum*, *Stochei'on*. A simple, ultimate constituent or principle in the human body, which forms the basis of a fibre or tissue. Also, a constituent of a compound organ. The *inorganic elements* are simple principles. An *organic element*, *proximate principle or compound of organization*, results from the union of certain inorganic elements. Oxygen, hydrogen, carbon, and azote, are inorganic elements; fibrin, albumen, osmazome, &c., organic elements.

ELEMENTS, ORGANIC, Principles, immediate.

ELEMENTUM ACIDIFICUM, Oxygen.

ELEMI, Amyris elemifera.

ELEOSELINUM, Apium petroselinum.

ELEPHANTI'ASIS, *Elephanti'a*, *Elephantias'mus*, *El'ephas*, *Laz'ari morbus* vel *malum*, *Phœnic''eus morbus*, *Phymato'sis Elephanti'asis*, from ελεφας, 'an elephant.' Various affections have been described under this name, by adding an epithet. It is ordinarily and generically applied to a condition, in which the skin is thick, livid, rugous, tuberculate, and insensible to feeling.

ELEPHANTI'ASIS ARAB'ICA, *Maladie glandulaire*, *Ladrerie*, *Tyriasis*, τυριασις, *El'ephas*, *Elephanti'asis*, *E. Ind'ica*, *Elephantia Ar'abum*, *Lepra Arabum*, (of some.) In this the tubercles are chiefly on the face and joints. There is loss of hair, except on the scalp; voice, hoarse and nasal; and the disease is said to be contagious and hereditary. It most frequently attacks the feet; and gives the lower extremity a fancied resemblance to the leg of the elephant, whence its name. The seat of the disease seems to be in the lymphatic vessels and glands, and in the subcutaneous cellular tissue: the inflammatory condition of which is accompanied with general morbid symptoms. Medicine has little or no effect on this loathsome complaint. See Lepra.

ELEPHANTIASIS OF CAYENNE, *Mal rouge de Cayenne*, seems to be a variety of Lepra, characterized by red and yellow spots, occupying the forehead, ears, hands, loins, &c., afterwards extending and becoming scaly, with deformity of the parts where they are seated, particularly of the face; and ultimately producing cracks, ulcers, caries, and sometimes death.

ELEPHANTIASIS OF THE GREEKS, *E. Græco'-*

rum, is probably the same disease as Lepra, which see.

Elephantiasis of India is characterized by red, livid, or yellowish spots, slightly prominent, to which succeed indolent tumours, formed in the cellular texture. At a more advanced period the phalanges swell, and become ulcerated; the bones of the nose carious, the lips thickened, and emaciation gradually carries off the patient. It belongs, likewise, to lepra.

Elephantiasis Italica, Pellagra.

Elephantiasis of Java is likewise a variety of lepra, characterized by large, white tumours on the toes and fingers, resembling scrofulous tumefactions. These tumours ulcerate, and the ulcerations spread from the extremities towards the trunk, destroying even the bones. Amputation can alone arrest its progress. The disease is often accompanied by alopecia, and by an eruption of red spots.

Elephantiasis of the Antilles, *Barba'does Leg*, *Glandular disease of Barbadoes*, *Jambes de Barbade*, is the Elephantiasis of many writers, *Bucnemia*. It is characterized by the leg being enormously tumid and misshapen: skin thickened, livid, and rugose; often scaly: scrotum, arms, or other parts sometimes participating in the affection. The *Bucnemia Tropica*, or *Cochin leg*, is an affection of this kind.

ELEPHANTʹINUM EMPLASʹTRUM, ελεφαντινον. An ancient plaster, composed of 30 parts of *ceruss*, 45 of *wax*, *oil* ℔ss, *water* ℔j.—Castelli. Oribasius and Celsus both mention a plaster of this name, but by no means similar in composition.

ELEPHANʹTOPUS, (F.) *Eléphantope*; from ελεφας, 'elephant,' and πους, 'foot.' One affected with elephantiasis.

ELEPHAS, Elephantiasis, Ivory.

ELETTARIA CARDAMOMUM, Amomum cardamomum.

ELEUTERIA, Croton cascarilla.

ÉLÉVATEUR, Elevator—*é. Common de l'aile du nez et de la lèvre supérieure*, Levator labii superioris alæque nasi—*é. de l'Œil*, Rectus superior oculi—*é. de la Paupière supérieure*, Levator palpebræ superioris.

ELEVAʹTOR, from *elevare*, (*e*, and *levare*,) 'to lift up.' (F.) *Elévateur*. A muscle, whose function it is to raise the part into which it is inserted. See Levator.

Elevator Ani, Levator ani—e. Labii inferioris, Levator labii inferioris—e. Labii superioris proprius, Levator labii superioris proprius—e. Labiorum communis, Levator anguli oris—e. Oculi, Rectus superior oculi—e. Patientiæ, Levator scapulæ—e. Scapulæ, Levator Scapulæ.—e. Testiculi, Cremaster—e. Urethræ, see Transversus perinæi.

Eleva'tor, *Elevato'rium*, *Vectis elevato'rius*. A name given to different surgical instruments, employed for raising portions of bone, which have been depressed, or for raising and detaching the portion of bone separated by the crown of the trepan.

Elevator, Common. This is a mere lever; the end of which is somewhat bent and made rough, in order that it may less readily slip away from the portion of bone which is to be raised. The instrument is used, by forming a fulcrum for it, either on the hand which holds it, or upon the fingers of the other hand; or by making a fixed point for it on the edge of the opening made with the trephine.

Elevator of Louis differed from the last only in the circumstance of the screw-peg being united to the bridge by a kind of pivot instead of hinge, so that greater extent of motion was permitted.

Elevator of Petit consists of a lever mounted on a handle, and straight throughout its whole length, except at its very end, which is slightly curved, in order that it may be more conveniently put under the portion of bone, intended to be elevated. The lever is pierced at various distances from its but-end with several holes, intended for the reception of a movable screw-peg, fixed on the top of a kind of bridge. This part of the instrument consists of an arch, the ends of which are long, and covered with small pads, and on its centre is the screw-peg already mentioned. By means of these holes the arm of the lever can be lengthened at pleasure.

Elevator, Triploid, *Vectis triploï'des*. This was so called from its consisting of three branches, uniting above in one common trunk. The latter part was traversed by a long screw, having below a kind of hook, and above a handle for turning it. By turning the screw, the hook was drawn up, and the bone thus elevated.

The simple lever is the only one now used, owing to the want of facility and advantages in the use of the others.

ÉLÈVE INTERNE, House surgeon.

ÉLEVURES, (F.) *Efflorescentiæ*. A generic name, including all the exanthemata, in which there is tumefaction of the tissue of the skin. See Exanthem.

ELIASTER, Ilech.

ELICHRYSUM, Solidago virgaurea—e. Montanum, Antennaria dioica.

ELICOIDES, Capreolaris.

ELIGMA, Eclectos.

ELIQUATIO, Colliquation.

ELIXAʹTIO, *Epse'sis*, from *elix'us*, 'boiled,' 'sodden.' This word has been used synonymously with Decoction. The act of boiling.

ELIXʹIR, *Isir*, *Ixir*, *Quelles*, *Alex'ir*. The etymology of this word is not clear. Lemery derives it from ελκω, 'I extract;' and also from αλιζω, 'I aid.' Others believe it to be from Arabic, *al-ecsir*, or *al-eksir*, 'chymistry.' An elixir is a medicine, composed of various substances held in solution in alcohol. The name has been used, however, for preparations, which contain no spirit of wine.

Elixir Ac''idum Halleri, seu Dippe'lii, *Elixir Antipodag'ricum*, *E. Antinephret'icum*, *E. Sulphu'rico-ac''idum*, *Guttæ ac''idæ ton'icæ*, *Aqua Rabe'lii*, *Liquor ac''idus Halleri*, *Mistu'ra sulphu'rico-ac''ida*, *Æther sulphu'ricus ac''idus*, *Ac''idum sulphu'ricum alcoolisa'tum*, *A. vitriol''icum vino'sum*, *Alcohol Sulphurica'tum*, *A. Sulphu'ricum*, is a mixture of concentrated sulphuric acid and alcohol:—in the *Eau de Rabelle*, of one part of the former to three of the latter. It is employed as an astringent in hemorrhages, &c.

Elixir Aloes, Tinctura aloes composita—e. Anthelminticum Succorum, Tinctura jalapii composita.

Elixir, Anti Asthmat'ic, of Boerhaave. This elixir is composed of *alcohol*, *aniseed*, *camphor*, *orris*, *asarabacca root*, *calamus aroma-*

ticus, liquorice, and *elecampane*. It is given in asthma, in the dose of 20 or 30 drops.

Elixir Antihypochondriacum, Tinctura cinchonæ amara—e. Antinephreticum, E. acidum Halleri—e. Antipodagricum, E. acidum Halleri—e. Aperitivum, Tinctura aloes composita.

Elixir, Antiscrof'ulous of Peyrilhe; composed of weak *alcohol*, *subcarbonate of potassa*, and *gentian root*. It is administered in scrofula.

Elixir Carminative, of Sylvius, Tinctura carminativa Sylvii—e. Daffy's, Tinctura sennæ comp.—e. Danorum, E. pectorale regis Daniæ—e. Fœtidum, Tinctura castorei composita—e. of Garus, Tinctura de croco composita—e. Guaiaci volatilis, Tinctura Guaiaci ammoniata—e. Jalappæ compositum, Tinctura jalapii composita—e. of Long Life, Tinctura aloes composita—*e. de Longue vie*, Tinctura aloes composita—*e. d'Or de M. le Général de la Motte*, Tinctura seu alcohol sulfurico-æthereus—e. Paregoric, Edinburgh, Tinctura opii ammoniata—e. Paregoricum, Tinctura camphoræ compositum—e. Pectorale dulce, E. pectorale regis Daniæ.

Elix'ir Pectora'lē Regis Daniæ, *Elix'ir Dano'rum, E. Ringelman'ni, E. ex succo Glycyrrhi'zæ, E. pectora'lē dulcē, E. è succo liquiritiæ: (Succ. glycyrrhiz.* p. 1; *Aq. Fœnicul.* p. 2. *Alcohol. ammoniat.* p. 6. A formula in many of the Pharmacopœias of continental Europe.) With the addition of opium it constitutes the *Elixir ammoniato-opia'tum, Extractum thebai'cum ammoniara'lē* of some Pharmacopœias.

Elixir Proprietatis, Tinctura aloes composita—e. Purgans, Tinctura jalapii composita—e. Radcliffe's, see Tinctura aloes composita—e. Rhej dulce, Vinum rhej palmati—e. Ringelmanni, E. pectorale regis Daniæ—e. Roborans Whyttii, Tinctura cinchonæ amara—e. Sacrum, Tinctura rhej et aloes—e. Salutis, Tinctura sennæ comp.—e. Squire's, see Tinctura camphoræ composita—e. Stomachicum, Tinctura gentianæ composita—e. Stomachicus spirituosus, Tinctura cinchonæ amara—e. Stoughton's, see Tinctura gentianæ composita—e. ex Succo glycyrrhizæ, E. pectorale regis Daniæ—e. Succo liquiritiæ, E pectorale regis Danorum—e. Sulphurico-acidum, E. acidum Halleri—e. Traumaticum, Tinctura Benzoini compositum.

Elixir Vitæ of Mathi'olus; composed of *alcohol* and 22 aromatic and stimulating substances. It was formerly employed in epilepsy.

Elixir of Vitriol, Sulphuric acid, dilute—e. Vitrioli, Sulphuricum acidum aromaticum—e. Vitrioli acido-aromaticum, Sulphuricum acidum aromaticum—e. Vitrioli dulce, Spiritus ætheris aromaticus, Sulphuricum acidum aromaticum—e. Vitrioli Edinburgensium, Sulphuricum acidum aromaticum—e. Vitrioli Mynsichti, Sulphuricum acidum aromaticum—e. of Vitriol, sweet, Spiritus ætheris aromaticus—e. Vitrioli cum tincturâ aromaticâ, Sulphuricum acidum aromaticum—e. of Vitriol, Vigani's, Spiritus ætheris aromaticus—e. Whyttii, Tinctura cinchonæ amara.

ELIXIRIUM ANTISEPTICUM DOCTORIS CHAUSSIER, Tinctura cinchonæ ætherea composita.

ELIXIS, Eclectos.

ELIXIVIATION, Lixiviation.

ELK, Cervus alces—e. Bark, Magnolia macrophylla—e. Tree, Andromeda arborea—e. Wood, Andromeda arborea, Magnolia macrophylla.

ELLEBORASTER, Helleborus fœtidus.

ELLEBORE, Dracontium fœtidum.

ELLEBORISMUS, Helleborismus.

ELLEBORUM ALBUM, Veratrum album.

ELLYCHNIO'TOS, from ἐλλυχνιον, 'the wick of a lamp.' A sort of tent, used by the ancient surgeons, so called, because it was shaped like a wick, or because it was made of a similar material.

ELM, COMMON, Ulmus—e. Red, Ulmus Americana—e. Rough-leaved, Ulmus Americana—e. Slippery, Ulmus Americana.

ELMINTHOCORTON, Corallina Corsicana.

ELO'DES, *Marshy, Febris Elodes, Helodes, Helop'yra, Helopyr'etos*, from ἕλος, 'a marsh,' and εἶδος, 'resemblance.' Marsh fever. Also, a kind of fever, characterized by great moisture or sweating.

ELOME, Orpiment.

ELONGA'TIO, *Parathra'ma, Elonga'tion*, from *elongare* (*e*, and *longus*,) 'to lengthen,' 'extend.' An incomplete luxation, in which the ligaments of an articulation are stretched and the limb lengthened, without total luxation. The word has also, been used for the extension required in the reduction of fractures and luxations, and for the increased length of limb (F.) *Allongement*, in diseases and dislocations of the hip-joint.

ELUTRIATIO, Decantation.

ELU'VIES, from *eluo*, 'I wash out.' An inordinate discharge of any fluid, and also the fluid itself. In the works of some authors it is particularly applied to the mucus which flows from the vagina in cases of leucorrhœa.

ELUXATION, Luxation.

ELYTRATRESIA, Colpatresia.

ELYTREURYNTER, Speculum vaginæ.

ELYTRITIS, Colposis leucorrhœa.

ELYTROBLENNORRHŒA, Leucorrhœa (vaginal.)

EL'YTROCE'LĒ, from ἐλυτρον, 'an envelope,' and κηλη, 'a tumour.' Vogel has given this name to vaginal hernia. *Colpoce'lē.*

ELYTROITIS, Colposis.

EL'YTRON, from ἑλυω, 'I involve.' A sheath. The vagina. The membranes which envelop the spinal marrow are called *elytra*.

ELYTRON'CUS, *Elytrophy'ma*, from ἐλυτρον, 'a vagina or sheath,' and ὀγκος, 'a tumour.' A swelling of the vagina.

ELYTROPHYMA, Elytroncus.

ELYTROPTO'SIS, from ἐλυτρον, 'a sheath,' and πτωσις, 'fall.' Callisen gives this name to inversion of the vagina. Also, Prolapsus vaginæ, (q. v.)

ELYTRORRHAPHY, *Elytrorrhaph'ia; Colpor'rhaphy, Kolpor'rhaphy;* from ἐλυτρον, 'the vagina,' and ῥαφη, 'a suture.' The operation of closing the vagina by suture in cases of procidentia uteri.

EM and EN, ἐν, 'in, into, within.' Also, 'excess;'—frequently used in this last sense by Dr. Good. A common prefix, generally answering to the prefixes *im* and *in*, in English. In composition, before β, π, φ, ψ, and μ, the ν is changed into μ; before γ, κ, ξ, and χ, into γ; before λ, into λ, and before ῥ generally into ῥ.

EMACIA'TION, *Emacia'tio*, from *emaciare*,

'to grow lean.' *Extenua'tio, Macies, Macritu'do, Macror, Marcu'res, Skeleti'a, Leptysm'us, Pingued'inis diminu'tio.* (F.) *Amaigrissement, Maigreur.* That condition of the body, or of a part of the body, in which it grows lean. The state of one who is lean;—*Leanness; Isch'notes.*

ÉMAIL DES DENTS, Enamel of the teeth.

EMANA'TION, *Emana'tio, Effla'vium*, from *emanare*, (*e*, and *manare*,) 'to issue or flow from.' The term is applied to bodies which proceed or draw their origin from other bodies; such as the light which *emanates* from the sun; the miasmata which arise from the putrid decomposition of animal or vegetable substances, &c. See Miasm.

EMAN'SIO MEN'SIUM, from *e*, and *manere*, 'to stay.' This term has been applied to amennorrhœa (q. v.) or obstruction of the menses before they have been established. Some have used it for the retention which occurs even after they have been established. The former is the general acceptation.

EMARGINATIO, *Échancrure*, Notch.

EMARGINATURA, *Échancrure*, Notch.

EMASCULA'TION; *Emascula'tio*, from *emasculare*, (*e*, and *masculus*, 'a male,') 'to render impotent.' The act of removing or destroying the generative organs of a male animal.

EMASCULATUS, Castratus, Eunuch.

EMBALM'ING, from *em*, *en*, 'in,' and *balsamum*. *Balsama'tio, Smyrnis'mos, Cedeia, Pollinctu'ra, Conditu'ra Cadav'erum*, from *Balsamum, Balsam*. (F.) *Embaument, Imbalsamation*. An operation which consists in impregnating the dead body with substances capable of preventing it from becoming putrid, and thus putting it in a condition to be preserved.

EMBAM'MA, from εμβαπτω, 'I immerse in.' A medicated pickle or sauce —Gorræus.

EMBARRAS, Emphraxis.

EMBARRAS GASTRIQUE, (F.) *Gastric disorder* or *impediment, Collu'vies gas'trica*. Disorder of the stomach, in which there is loss of appetite, with bitterness and clamminess of mouth, white and yellow tongue, feeling of oppression in the epigastrium, and sometimes pain in that region, nausea and bilious or bitter vomiting; this state being accompanied with headache, lassitude, and pain in the back and limbs.

EMBARRAS GASTRO-INTESTINAL. *Gastro-intesti'nal disorder*. Slight gastro-enteritis, according to the Broussaist, in which the symptoms of the *Embarras gastrique* and *E. intestinal* are united.

EMBARRAS INTESTINAL, *Intes'tinal disorder*. The principal characters assigned to this are:—tension of the abdomen, colic, borborygmi, discharge of flatus *per anum*, constipation or diarrhœa, &c.

EMBARRURE, Engisoma.

EMBAUMENT, Embalming.

EMBOITEMENT, (F.) 'Encasing,' from *em*, 'in,' and *boîte*, 'a box.' *Enadelph'ia*. This term has been applied to that theory of generation which considers that the germs are encased in each other in the ovary of the female, in such sort that they are developed in succession after impregnation. It is the theory of *encasing of germs*, or of *monstrosity by inclusion*.

EMBOITURE, Diarthrosis.

EMBOLE, from εμβαλλω, 'I put in place.' Reduction of a luxated bone. *Reposi'tio*.

EMBOLIMOS, Intercalary.

EMBOLUM CEREBRI, Infundibulum of the brain.

EMBONPOINT. (F.) "In good point or plight." *Bona cor'poris habitu'do*. The state of the animal body when in full health. Excessive *embonpoint* constitutes corpulence and obesity, and may become a morbid condition.

EMBORISMA, Aneurism.

EMBROCA'TION, *Embroca'tio, Embreg'ma, Em'brochē, Implu'vium*, from εμβρεχω, 'I sprinkle.' A fluid application to be rubbed on any part of the body. It is often used synonymously with liniment. Originally, it was employed in the sense of *Fomentation*.

EMBROCATION, GUESTONIAN, see Oleum Terebinthinæ rectificatum.

EMBROCHE, Embrocation.

EMBRYEMA, Embrocation.

EM'BRYO, *Em'bryon*, from εν, 'in,' and βρυω, 'I grow.' *Cye'ma*. The fecundated germ, at the early stages of its development in utero. At a certain period of its increase, the name *fœtus* is given to it, but at what period is not determined. Generally, the *embryo state* is considered to extend to the period of quickening.

EMBRYOC'TONY, *Fœtûs Trucida'tio*, from εμβρυον, 'the embryo,' and κτονος, 'destruction.' The act of destroying a fœtus in utero, when insurmountable obstacles—as certain deformities of the pelvis—oppose delivery.

EMBRYOG'RAPHY, *Embryogra'phia*, from εμβρυον, 'the embryo,' and γραφη, 'a description.' The part of anatomy which describes the embryo.

EMBRYOTHLAS'TA, *Embryothlas'tes, Embryothlas'tum*, (F.) *Embryotome*, from εμβρυον, 'the embryo,' and θλαω, 'I break.' An instrument for dividing the fœtus piecemeal, in order to effect delivery. A crotchet or other instrument used, in certain cases of laborious parturition, to break the bones of the fœtus, for the purpose of extracting them with greater facility—Hippocr., Galen.

EMBRYOTOME, Embryothlasta.

EMBRYOT'OMY, *Embryotom'ia*, from εμβρυον, 'an embryo,' and τεμνειν, 'to cut.' A division of the fœtus into fragments, to extract it by piecemeal, when the narrowness of the pelvis or other faulty conformation opposes delivery.

EMBRYUL'CIA, *Embryusterul'cia*, from εμβρυον, 'embryo, fœtus,' and ελκω, 'I extract,' 'I draw.' A surgical operation, by which the fœtus is extracted by means of appropriate instruments, when a faulty conformation or other circumstances prevent delivery by the natural efforts.

EMBRYUL'CUS, *Elcus'ter*, same etymon. An iron hook or crotchet, described by Fabricius ab Acquapendente, which was used to extract the fœtus in some cases of laborious labour.

EMBRYUSTERULCIA, Embryulcia.

EMENDANS, Corrigent.

ÉMERAUDE, Smaragdus.

EMESIA, Vomiturition.

EMETATROPH'IA, from εμεω, 'I vomit,' and ατροφια, 'want of nourishment.' Atrophy induced by vomiting.

EMESIS, Vomiting.

EMETIA, Emetine.

EMET'IC, *Emet'icum, Vomito'rium, a Puke*, from εμεω, 'I vomit.' A substance capable of

producing vomiting. (F.) *Émétique.* [This term is also restricted by the French to *tartarized antimony—the emetic*, as it were, *par excellence.*] *Vomitif. Tartarized antimony, emetine, ipecacuanha*, and *sulphate of zinc*, are the chief emetics. Emetics are valuable agents in disease. They may either act *primarily* on the stomach, or *secondarily* on other parts of the system:—the sympathy between the stomach and other parts of the body being very extensive, and an important object of study.

The following are the chief emetics:—Antimonii et Potassæ Tartras; Cupri Acetas; Cupri Sulphas; Emetina; Gillenia; Hydrargyri Sulphas Flavus; Ipecacuanha; Lobelia; Sanguinaria; Scilla; Sinapis, and Zinci Sulphas.

Emetic Root, Euphorbia corollata—e. Tartar, Antimonium tartarizatum—e. Weed, Lobelia inflata.

EM'ETINE, *Emeti'na, Emet'ia, Vom'itine.* A vegetable alkali, discovered by M. Pelletier in ipecacuanha, to which ipecacuanha owes its emetic power. It is obtained from different ipecacuanhas, but chiefly from the *psychotria emetica, callicocca ipecacuanha*, and *viola emetica.* It is in transparent scales, of a reddish-brown colour, almost inodorous, of a bitter, slightly acrid taste; is unchangeable in the air, soluble in water and alcohol, and insoluble in ether. Three grains of impure emetia or one grain of pure are equal to 18 of ipecacuanha. See Ipecacuanha.

ÉMÉTIQUE, Antimonium tartarizatum, Emetic.

EM'ETO-CATHAR'TIC, *Em'eto-cathar'ticus*, from εμετος, 'vomiting,' and καθαρτικος, 'a purgative.' A remedy, which at the same time excites vomiting and purging.

EMETOL'OGY, *Emetolog''ia*, from εμετος, 'vomiting,' and λογος, 'a discourse.' A treatise on vomiting and on emetics.

EM'INENCE, *Eminen'tia, Protuberan'tia, Ex'ochē, Exanthe'ma.* A projection at the surface of a healthy or diseased organ.

ÉMINENCE PORTE ANTÉRIEURE, Lobulus anonymus—*e. Porte postérieure*, Lobulus Spigelii—*e. Sus pubienne*, Mons veneris.

ÉMINENCES BIGÉMINÉES, Quadrigemina corpora—*e. Latérales*, Corpora olivaria—*e. Pyramidales*, Corpora pyramidalia—*e. Vermiformes du cervelet*, Vermiformes processus.

EMINENTIA ANNULARIS, Pons varolii—e. Pyramidalis tympani. Pyramid.

EMINENTIÆ CANDICANTES, Mamillary Tubercles—e. Lenticulares, Corpora striata—e. Magnæ cerebri, Thalami nervorum opticorum—e. Olivares, Corpora olivaria—e. Pyramidalia, Corpora pyramidalia—e. Quadrigeminæ, Quadrigemina tubercula.

ÉMISSAIRE, Emunctory.

EMISSA'RIA SANTORI'NI. A name given to some small veins, which communicate with the sinuses of the dura mater, by apertures in the cranium. Such are the parietal, posterior condyloid, mastoid veins, &c.

EMIS'SION, *Emis'sio*, from *emittere*, (*e*, and *mittere*,) 'to send out,' 'drive out.' The act by which any matter whatever is thrown from the body. Thus, we say *Emission of urine, Emission of semen*, &c.

EMMEN'AGOGUES, *Emmeniago'ga*, from εμμηνα, 'the menses,' and αγω, 'I drive,' or 'expel.' *Men'agogues.* A name given to medicines believed to have the power of favouring the discharge of the menses. It is doubtful whether there be any substance which possesses this power directly. According to different conditions of the system, the most opposite remedies may act as emmenagogues. *Black hellebore, savin, madder, polygala senega*, and *ergot*, are reputed to be specific emmenagogues. The following list comprises the chief of them;—Cunila Pulegioides; Helleborus Niger; Mentha Pulegium; Rosmarinus; Rubia; Sabina; Secale Cornutum; Senega, and Tanacetum.

EMMENAGOLOG''IA, from εμμηναγωγα, and λογος, 'a discourse.' A treatise of emmenagogues.

EMMENIA, Menses.

EMMENIAGOGA, Emmenagogues.

EMMENOLOG''IA, from εμμηνα, 'menses,' and λογος, 'a discourse.' A treatise on Menstruation.

EMMYXIUM ARTICULARE, Hydrarthrus.

EMOL'LIENTS, *Emollien'tia, Malthac'tica, Relaxan'tia, Epicras'tica, Malac'tica*, from *emollire*, (*e*, and *mollire*, 'to soften.') Substances which relax and soften parts that are inflamed, or too tense. They are used both internally and externally; the former, however, consisting of mucilaginous substances, being generally reckoned as demulcents; the latter, or proper emollients, consisting of oils, cataplasms, fomentations, &c. Oleaginous bodies, rubbed on a part, act by diminishing its cohesion. Fomentations, in cases of internal inflammation, act probably through contiguous sympathy. The following are the chief emollients:—Adeps; Amygdalæ Oleum; Avenæ Farina; Cera; Cetaceum; Linum; Olivæ Oleum; Sesamum; Tritici Farina, and Ulmus.

EMOLLITIES OSSIUM, Mollities ossium.

EMOLLITIO VENTRICULI, Gastromalacia.

ÉMONCTOIRE, Emunctory.

EMOTIO, Delirium, Luxation.

EMPASMA, Catapasma.

EMPÂTEMENT, from *empâter*, 'to render pasty or doughy.' A non-inflammatory engorgement, which retains, more or less, the impression of the finger.

EMPATHE'MA, *Ma'nia a pathe'matē, Manie sans délire;* ungovernable passion, from εμ, or εν, 'in,' and παθος, 'suffering.'—Good.

EMPEIRIA, Experience.

EMPETRUM, Herniaria glabra.

EM'PHLYSIS, from εμ, or εν, 'in,' and φλυσις, 'a vesicular tumour or eruption.' *Ich'orous Exan'them.* An eruption of vesicular pimples, filled progressively with an acrid and colourless, or nearly colourless, fluid; terminating in scurf or laminated scabs. A genus in the order *Exanthematica*, class *Hæmatica* of Good.

Emphlysis Aphtha, Aphthæ, and Stomatitis, aphthous—e. Erysipelas, Erysipelas—e. Miliaria, Miliary fever—e. Pemphigus, Pemphigus—e. Vaccina inserta, Vaccina—e. Varicella, Varicella.

EMPHRACTICA, Physconia.

EMPHRACTIC, Emphracticus.

EMPHRAC'TICUS, *Emphractic*, from εμφραττω, 'I close,' 'I obstruct.' *Emplas'ticus*, εμπλαστικος, *Emplattom'enos.* Any substance which, when applied to the skin, closes the pores.

EMPHRAG'MA, same etymon. *Obturamen'-*

tum, Impedimen'tum. Any thing that obstructs. Hippocrates uses this term to designate the obstacle to delivery on the part of the fœtus, when the presentation is preternatural.

Emphrag'ma Lachrymale, Fistula lachrymalis—e. Salivare, Ranula.

EMPHRAX'IS, *Obstruc'tio, Obtura'tio, Oppila'tio.* Same etymon. 'Obstruction.' An *Embarras* or repletion of canals or cavities by any substance, which is either morbid from quantity or quality.

EMPHYMA, Tumour—e. Encystis, Encystis—e. Encystis atheroma, Atheroma—e. Encystis ganglion, Ganglion, Testudo—e. Encystis meliceris, Meliceris—e. Encystis steatoma, Steatoma—e. Exostosis ossea, Exostosis—e. Exostosis periostea, Node—e. Sarcoma, Sarcoma—e. Sarcoma adiposum, Adipose sarcoma—e. Sarcoma cellulosum, Cystic sarcoma—e. Sarcoma mammarum, Mammary sarcoma—e. Sarcoma pancreaticum, Pancreatic sarcoma—e. Sarcoma scirrhosum, Scirrhous sarcoma—e. Sarcoma tuberculosum, Tuberculate sarcoma—e. Sarcoma vasculosum, Sarcoma, vascular.

EMPHYSE'MA, from εμφυσαω, (εν, and φυσαω, 'I blow,') 'I inflate,' *Infla'tio, Empneumato'sis, Sarci'tes flatuo'sus, Emphyse'ma cellula'rē, Emphyse'ma pneumato'sis, Physon'cus, Tumor flatulentus, Pneumato'sis, Infla'tion, Winddropsy.* This term is commonly applied to any white, crepitant, shining, elastic, indolent tumour, caused by the introduction of air into the cellular texture. Injuries of the larynx, trachea, or lungs; fractures of the ribs, or wounds penetrating the chest are the most frequent causes of this affection, which is owing to the air escaping from the air passages and insinuating itself into the cellular texture surrounding the wound. There are some cases of emphysema, which are owing to internal causes; and hence a division has been made into the *accidental* and *symptomatic*, and the *spontaneous* and *idiopathic.*

Emphysema Abdominis, Tympanites.

Emphyse'ma of the Lungs, *E. Pulmo'num, Asthma aëreum ab Emphyse'matē Pulmo'num,* (F.) *Pneumoëctasie, Emphysème du Poumon.* A considerable pressure or contusion of the chest, or any violent concussion of the lung, may produce a laceration in that viscus, without injury being done to the parietes of the thorax, and may give place to the infiltration of air into the cellular texture, *interlobular emphysema.* Laënnec has described another species of emphysema of the lungs, *Vesicular emphysema,* consisting in excessive dilatation of the air-cells, some of which become as large as hemp-seed, ultimately break, and give rise to irregular vesicles at the surface of the lung, some of which are as large as a hazel nut. *Physical Signs.* The thorax externally, generally or locally, appears unnaturally convex and prominent. The intercostal spaces are widened, but depressed. The inspiratory efforts are increased. The sound on percussion is morbidly clear, but not tympanitic. On auscultation, the inspiratory murmur is feeble or suppressed. The expiration, which is more frequently audible, is prolonged, laborious and wheezing. There are no certain physical signs which can distinguish *interlobular emphysema* from the *vesicular.*

Emphysema Pectoris, Pneumothorax—e. Scroti, Physocele—e. Tympanites, Tympanites—e. Uteri, Hysterophysis, Physometra.

EMPHYSÈME DU POUMON, Emphysema of the lungs.

EMPI'RIC, *Empi'ricus,* from εμπειρια, (εν, and πειρα, 'a trial,') 'experience.' One who follows only experience. A sect of physicians, who rejected all theory and took for their guide experience alone. It was opposed to the dogmatic sect. The Empiric sect prevailed till near the time of Galen. Amongst its most eminent members, after Philinus and Serapion, were Apollonius, Glaucias, Bacchius of Tanagra, and Zeuxis,—both disciples of Herophilus,—Heraclides of Tarentum, Cleophantus, master of Asclepiades, Menodotus of Nicomedia, and Theudas of Laodicea. They occupied themselves, chiefly, with discovering the properties of drugs, and did important service, in this manner, to medicine.

At the present day, the word *Empiric* is only taken in a bad sense, being employed in nearly the same signification as *charlatan,* (q. v.) or *quack.*

EMPIRICE, Empiricism.

EMPIR'ICISM; same etymon. *Empi'rica Ars, Empi'ricē,* (F.) *Empirisme.* Medicine founded on experience. It generally, at the present day, signifies *quackery.*

EMPIRISME, Empiricism.

EMPLASTICUS. Same etymon as the next. Also a remedy, which adheres like a plaster to the surface, and in this manner may obstruct the pores: an emphractic, (q. v.)

EMPLASTRO-ENDERMIC, Endermic.

EMPLAS'TRUM, from the Greek, εμπλαττω, (εν, and πλασσειν, 'to form,') 'I spread upon.' (F.) *Emplâtre.* A solid and tenacious compound, adhesive at the ordinary heat of the human body. Some of the plasters owe their consistence to wax and resin; and others to the chemical union which takes place between the semivitreous oxide of lead and oil. Most of them become too consistent by age. When such is the case, they may be re-melted by a gentle heat, and oil be added to them.

Emplastrum Adhæsivum, Emplastrum resinæ—e. Adhæsivum Woodstockii, see Sparadrapum adhæsivum—e. Alexandri, Alexandrine—e. de Althæâ, Unguentum de Althæâ.

Emplastrum Ammoni'aci, *Ammoni'acum Plaster,* (*Ammoniac. pur.* ℥v, *acidi acetici* Oss. Dissolve the ammoniac in the vinegar, and strain: then evaporate the solution by means of a water bath, stirring constantly until it acquires a proper consistence.—Ph. U. S.) It is used as a discutient plaster.

Emplastrum Ammoni'aci cum Hydrar'gyro, *Ammoniacum plaster with mercury* (*Ammoniaci, pur.* ℔j, *hydrarg. pur.* ℥iij, *olei sulph.* ℥j. Rub the mercury with the oil until the globules disappear, then add the ammoniac, previously melted, and mix. *Ph. L.*)

Emplastrum Andreæ de Cruce, E. de pice et resinis glutinans—e. Anglicum, see Sparadrapum adhæsivum.

Emplastrum Aromat'icum, *Aromat'ic plaster.* (*Thuris.* ℥iij, *ceræ flavæ* ℥ss, *pulv. cort. cinnam.* ℥vj. *ol. ess. piment., ol. ess. Limon.* āā ℥ij. Melt the frankincense and wax together, and strain; then add, as it cools, the cinnamon, previously rubbed with the oils, and form a plaster. *Ph. Dubl.*) Used as a stimulating plaster.

Emplastrum Asafœ'tidæ, *Asafœt'ida plaster, E. antihyster'icum,* (*Empl. plumb., Asafœt., sing.*

℔j, *Galban.*, *Ceræ flavæ* āā ℔ss, *Alcohol. dilut.* Oiij. Dissolve the asafœtida and galbanum in the alcohol, in a water bath, strain while hot, and evaporate to the consistence of honey: add the lead plaster and wax previously melted together, stir the mixture well, and evaporate to the proper consistence.—*Ph. U. S.*) Used as an antispasmodic and anodyne plaster.

Emplastrum Attrahens, E. ceræ.

Emplastrum Belladon'næ, *Plaster of Belladon'na.* (*Empl. resin.* ℥iij, *Ext. Belladon.* ℥iss. Add the extract to the plaster, previously melted in a water bath, and mix.—*Ph. U. S.*)

Emplastrum Calefa'ciens, *E. Picis cum canthar'idē.*—(Ph. U. S.) *Calefa'cient plaster, Warm plaster.* (F.) *Emplâtre échauffant.* (*Cerat. cantharid.* (Ph. U. S.) ℔ss, *Picis abiet.* ℔iijss.) Melt together, and form into a plaster. *Ph. U. S.* It is rubefacient and stimulant.

Emplastrum Cantharidis, E. lyttæ—e. Cantharidis vesicatorii compositum, E. lyttæ comp.—e. Cephalicum, E. picis comp.

Emplastrum Ceræ, *E. simplex, Wax plaster, E. At'trahens.* (*Ceræ flavæ, Sevi Præp.* āā ℔iij, *resinæ flavæ* ℔j. Melt them together and strain. *Ph. L.*) It has been considered drawing. It is stimulating.

Emplastrum Cicu'tæ, *E. de Cicu'tâ, E. coni'i macula'ti, Unguen'tum sol'idum de cicu'tâ, Hemlock plaster.* (F.) *Emplâtre de Cigue.* (*Resinæ abiet.* 960 p. *Ceræ flav.* 640 p. *Picis albæ*, 448 p. *Ol. cicutæ per decoct. præparat.* 128 p. *Fol. cicut. recent.* 2000 p. Melt the resins, wax and oil; add the cicuta leaves, and boil; strain and add, after having dissolved it in vinegar of squills and cicuta juice, *gum ammoniac*, 500 p. *Ph. Par.*) It is used as a discutient, especially to scirrhous tumours.

Emplastrum Citrinum, Unguentum de althæâ—e. Commune, E. plumbi—e. Commune, cum resinâ, E. resinæ—e. Conii, E. cicutæ.

Emplastrum Cumi'ni, *Cummin plaster.* (*Cumin. semin., carui sem., lauri bacc.* sing. ℥iij, *picis aridæ* ℔iij, *ceræ flavæ* ℥iij. Melt the pitch and wax together, then add the other ingredients. *Ph. L.*) It is used as a warm, discutient plaster.

Emplastrum Diachylon, E. plumbi—e. Divinum Nicolai, see Magnet—e. Emolliens, Unguentum de althæâ—e. Epispasticum, E. lyttæ.

Emplastrum Ferri, *E. rob'orans, Iron Plaster, Strength'ening Plaster.* (*Ferri subcarb.* ℥iij, *Emp. plumbi*, ℔ij, *Picis abietis*, ℔ss. Add the subcarbonate of iron to the lead plaster and Burgundy pitch previously melted together, and stir constantly until they thicken upon cooling.—Ph. U. S.)

Emplastrum Ferri Rubri, E. oxidi ferri rubri—e. Flavum, Unguentum de althæâ—e. ad Fonticulos, Ceratum Galeni.

Emplastrum Gal'bani, *Galb'anum plaster,* (*Empl. litharg.* ℔ij, *gum. galban.* ℔ss, *ceræ flavæ* ℥iv. Melt the galbanum before adding the plaster and wax, then melt all together. *Ph. D.*) A stimulant and discutient.

Emplastrum Gal'bani Compos'itum, *E. lithar'gyri compos'itum, Diach'ylon magnum cum gummi, Compound galbanum plaster.* (*Galb. pur.* ℥viij, *Emp. plumbi*, ℔iij, *tereb. vulg.* ℥x, *abietis resin.* contus. ℥iij. Melt the galbanum and turpentine together, then mix in the resin, and afterwards the plaster, previously melted. It is stimulant and discutient.

Emplastrum Glutinosum, see Sparadrapum adhæsivum—e. cum Gummatibus, E. gummosum.

Emplastrum Gummo'sum, *Gum plaster, Emplastrum lithar'gyri cum gummi, E. cum gummat'ibus, E. e gum'mis resino'sis, E. Ox'ydi Plumbi semivit'reum gummo'sum, Yellow diach'ylon, Gum diachylon, Diachylon cum gummi.* (*Emp. oxid. plumbi semivitr.* p. viii, *g. resin. ammoniac, g. resin. bubon. galbani, ceræ flavæ*, āā, p. i. *Ph. E.*) Properties and uses like the last.

Emplastrum e Gummis Resinosis, E. gummosum.

Emplastrum cum Gummi-Resi'nis, *Emplâtre de gomme résine, Diachylon gommé, Plaster of gum resins.* (*Emplastr. simpl.* p. 1600, *ceræ flavæ*, p. 96, *picis albæ*, p. 96, *terebinth.* p. 96. Melt by a gentle heat, and add *gum ammoniac*, p. 32, *bdellium* 32, *galban.* 32, and *sagapenum*, p. 32. Dissolve in a sufficient quantity of *alcohol*, evaporate to the consistence of honey, and mix carefully all together. *Ph. P.*) A discutient.

Emplastrum Hydrar'gyri, *Mercu'rial plaster, Emplaster. lithar'gyri cum hydrar'gyro.* (*Hydrarg. purif. pond.* ℥vj, *ol. olivæ. resin*, āā ℥ij, *emplast. plumbi*, ℔j. Melt the oil and resin together, and when cool rub the mercury with them till the globules disappear; then gradually add the lead plaster, previously melted, and mix all. *Ph. U. S.*) It is a stimulant, resolvent and discutient. Applied as a discutient to venereal and other tumours.

Emplastrum Hydrar'gyri Compos'itum, *E. de hydrar'gyro compos'itum, E. de Vigo cum mercu'rio emenda'tum, Compound plaster of mer'cury.* (*Empl. simpl.* p. 1250, *ceræ flavæ*, p. 64, *resinæ*, p. 64. Melt, and before it congeals, add *pulv. g. ammoniac*, p. 20, *bdellium*, p. 20, *oliban.* p. 20, *myrrh*, p. 20, *Saffron*, p. 12. Mix carefully. *Take of mercury*, p. 380, *pure turpentine*, p. 64, *liquid* and *pure storax*, p. 192. Triturate in an iron mortar till the globules disappear: melt all together, and before congealing add *essential oil of Lavender*, p. 8. *Pharm. P.*) The same properties as the last.

Emplastrum Ichthyocollæ telæ inductum, see Sparadrapum adhæsivum—e. Irritans, E. lyttæ—e. Lithargyri, E. Plumbi—e. Lithargyri compositum, E. galbani compositum—e. Lithargyri cum gummi, E. gummosum—e. Lithargyri cum hydrargyro, E. hydrargyri—e. Lithargyri cum resinâ, E. resinæ—e. Lithargyricum cum resinâ pini, E. resinæ.

Emplastrum Lyttæ, *E. canthar'idis, E. cantharidis vesicato'rii, Plaster of the Spanish or blistering fly, Blistering Plaster, Fly Plaster, E. mel'oës vesicato'rii, E. vesicato'rium, E. epispas'ticum, E. e cantharid'ibus epispas'ticum solid'ius et tena'cius hærens, E. irri'tans, E. rubefi'ans.* (*Cantharides* in powder, ℔j, *Emp. ceræ* ℔iss, *Adipis præp.* ℔j. Melt the plaster and lard together, and as the mixture becomes thick on cooling, sprinkle in the flies, and mix. *Pharm. L.*) This is the common blistering plaster. Too much heat must not be used in its preparation. It requires to remain on 6 or 8 hours before its full effect is induced, and it acts sufficiently well, provided even a piece of thin gauze or tissue paper be placed between it and the skin, whilst absorption of the flies is thus prevented. See Blister. The Blistering Plaster of the Pharmacopœia of the United States, *Cera'tum Canthar-*

idis, is made as follows:—*Cantharid.* in pulv. subtiliss. ℔j, *ceræ flavæ, resinæ, adipis*, āā, ℥viij. To the wax, resin, and lard, previously melted, add the Spanish flies, and stir the mixture constantly until cool.

Emplastrum Lyttæ Compos'itum, *E. canthar'idis vesicato'rii compos'itum, E. mel'oës vesicato'rii compos'itum, Compound plaster of canthar'ides* or *Spanish flies.* (*Resin. liq. pini laric's.* p. 18, *resinæ concret. pini abietis, meloës vesicat.* āā p. 12, *ceræ flavæ*, p. 4, *subacet. cupri*, p. ij, *semin. sinapis alb., fruct. pip. nigr.* āā p. j. Melt the pitch and wax, then add the turpentine, and as these cool sprinkle in the other substances in the form of powder, so as to make a plaster. *Ph. E.*) The same properties as the last, but more energetic and speedy in its action.

Emplastrum Meloes Vesicatorii, E. lyttæ—e. Meloes vesicatorii comp., E. lyttæ comp.—e. Mucilaginosum, Unguentum de althææ—e. Nigrum, of Augsburg, see Magnet.

Emplastrum Norimbergen'sē, *E. ex ox'ido plumbi rubro camphora'tum, Emplâtre de Nuremberg, Nuremberg plaster.* (*Oxid. plumb. rubr.* p. 300, *ol. olivæ*, p. 600, *aquæ*, q. s. Boil until the oxide is dissolved, and almost to dryness. Remove the vessel from the fire and add, *yellow wax*, p. 500. Put the vessel again on the fire, and after the wax is melted, add, before it congeals, *camphor*, p. 24: mix. *Ph. P.*) It is considered a desiccative, and has been employed in gangrene.

Emplastrum Opii, *O'pium Plaster.* (*Opii* in pulv. ℥ij, *Picis abiet.* ℥iij; *emplastr. plumbi* ℔j, *aq. bullient.* f. ℥iv. Melt together the lead plaster and Burgundy pitch; then add the opium previously mixed with the water, and boil over a gentle fire to the proper consistence.—*Ph. U. S.*) It is employed as an anodyne, and to give support.

Emplastrum Ox'idi Ferri Rubri, *E. Ferri rubri, E. Rob'orans, Plaster of red oxide of iron, Strength'ening plaster.* (*Empl. oxid. plumb. semivitr.* p. xxiv, *resinæ pin.* p. vi. *ceræ flavæ, olei oleæ Europ.* sing. p. iij. *oxidi ferri rubr.* p. viij. Rub the red oxide of iron with the oil, and add the other ingredients melted. *Ph. E.*) It is employed as a strengthening plaster.

Emplastrum Phœniceum, Diapalma—e. ex Oxido plumbi rubro compositum, E. Norimbergense.

Emplastrum Picis Compos'itum, *E. picis Burgun'dicæ, E. cephal'icum, Cephal'ic plaster, Compound pitch plaster.* (*Picis arid.* ℔ij *abietis resinæ* ℔ij. *resinæ flavæ*, āā ℥iv, *ceræ flavæ* āā ℥iv, *myrist. ol.* ℥j. To the pitch, resin, and wax, melted together, add the other matters and mix. *Ph. L.*) It is stimulant and rubefacient. Sometimes used in headache,—applied to the temples.

Emplastrum ex Oxido plumbi semivitreo, E. plumbi—e. Oxidi plumbi semivitreum, E. plumbi—e. Oxidi plumbi semivitreum gummosum, E. gummosum.

Emplastrum de Picē et Resi'nis Glu'tinans, *E. Andreæ de Cruce, Emplâtre d'André de la Croix, E. collant de poix et de résines. Adhesive plaster of pitch and resins.* (*Picis albæ*, p. 128, *resin elemi* p. 32, *terebinth. pur.* p. 16, *ol. laur.* p. 16. Melt with a gentle heat, and pass through linen. *Ph. P.*) Used in contusions and fractures as a support.

Emplastrum Plumbi, *E. lythar'gyri, E. commu'nē, E. diach'ylum, E ox'idi plumbi semivi'treum, E. ex ox'ido plumbi semivi'treo, Diach'ylon simplex, White Diach'ylon, Lead plaster, Diach'ylon plaster.* (*Plumbi oxid. semivitr. in* pulv. ℔v. *olei olivæ.*, Oviij. *aquæ* Oij. Boil together over a slow fire, stirring constantly until the oil and oxide of lead cohere. *Ph. U. S.*)

Emplastrum Polychrestum, E. resinæ.

Emplastrum Resi'næ, *E. adhæsi'vum, E. lithar'gyri cum resi'nâ, E. resino'sum. Resin plaster, Adhe'sive* or *sticking plaster. Emplastrum commu'nē cum resinâ, E. Polychres'tum, E. lithargyr'icum cum resi'na pini.* (*Resin. flav.* ℔ss, *emp. plumb.* ℔iij. Melt the plaster, with a gentle heat, add the resin, and mix. *Ph. U. S.*) Employed in wounds and ulcers.

Emplastrum Resinosum, E. Resinæ—e. Roborans, E. Ferri (Ph. U. S.) E. oxidi ferri rubri—e. Rubefians, E. lyttæ.

Emplastrum Sapo'nis, *E. sapona'ceum, Soap plaster.* (*Saponis concis.* ℔ss, *emplastr. plumb.* ℔iij. Mix the soap with the melted plaster, and boil to a proper consistence. *Ph. U. S.*) It is a mild discutient. Applied to tumours, corns, &c.

Emplastrum Simplex, E. ceræ—e. Spermatis ceti, Ceratum cetacei.

Emplastrum Thuris, *Frank'incense plaster.* (*Emp. lithargyri*, ℔ij, *thuris*; ℔ss, *oxid. ferri. rubr.* ℥iij. *Ph. D.*) *Use:*—the same as the plaster of red oxide of iron.

Emplastrum Vesicatorium, Blister, E. lyttæ—e. de Vigo cum mercurio emendatum, E. hydrargyri compositum.

EMPLÂTRE, Emplastrum—*e. d'André de la Croix*, Emplastrum de pice et resinis glutinans—*e. de Ciguë*, Emplastrum cicutæ—*e. Collant de poix et de résines*, Emplastrum de pice et resinis glutinans—*e. de Gomme résine*, Emplastrum cum gummi-resinis—*e. de Nuremberg*, Emplastrum Norimbergense.

EMPLATTOMENOS, Emphracticus.

EMPNEUMATOSIS, Emphysema, Inspiration.

EMPOISONNEMENT, Poisoning.

EMPO'RIUM, ἐμπορειον, (ἐμ or ἐν, and πορος,) 'a market or depôt.' The brain was so called, of old, because there all the mental affairs are transacted.

Emporium Spirituum, Sensorium.

EMPREINTE, Impression.

EMPRES'MA, from ἐμπρηθω, 'I burn internally.' *Phlegma'tiæ membrano'sæ et parenchymato'sæ, Phlegma'tici, Febres continuæ inflammato'riæ, Inflamma'tio inter'na, Cau'ma, Inter'nal inflammation:* a genus in the class *hæmatica*, order *phlogotica* of Good.

Empresma Bronchitis, Cynanche trachealis—e. Bronchlemmitis, Cynanche trachealis—e. Carditis, Carditis—e. Cephalitis, Phrenitis—e. Cystitis, Cystitis—e. Enteritis, Enteritis—e. Gastritis, Gastritis—e. Hepatitis, Hepatitis—e. Hysteritis, Metritis—e. Nephritis, Nephritis—e. Orchitis, Hernia humoralis—e. Otitis, Otitis—e. Paristhmitis, Cynanche—e. Paristhmitis tonsillaris maligna, Cynanche maligna—e. Paristhmitis pharyngea, Cynanche parotidæa—e. Paristhmitis tonsillaris, Cynanche tonsillaris—e. Parotitis, Cynanche parotidæa—e. Peritonitis, Peritonitis—e. Peritonitis mesenterica, Mesenteritis—e. Peritonitis omentalis, Epiploitis—e. Picis cum Cantharide, E. calefaciens—e. Pleuritis, Pleuritis—e. Pleuritis diaphragmatica, Diaphragmitis—e. Pneumonitis, Pneumonia—e. Splenitis, Splenitis.

EM'PRION, from ἐν, and πρίων, 'a saw,' 'serrated.' Galen has given this name to the pulse, when the sensation produced by the artery under the fingers is analogous to that which would be caused by the unequal teeth of a saw.

EMPROSTHOT'ONOS, *Emprosthoton'ia, Enta'sia tet'anus anti'cus, Tetanus anticus*, from ἐμπροσθεν, 'forwards,' and τεινω, 'I stretch,' 'I extend.' A variety of tetanus, in which the body is drawn forwards by the permanent contraction of the muscles.

EMPSYCHO'SIS, from ἐμψυχοω, (ἐν, and ψυχη, 'life,') 'I animate,' 'I vivify.' A word formerly used for the act of animating: the union of the soul with the body.

EMPTOE, Hæmoptysis.

EMPTOICA PASSIO, Hæmoptysis.

EMPTOSIS, Imbibition.

EMPTYSIS, Hæmoptysis.

EMPYE, Empyema.

EMPYE'MA, *Empye'sis, Em'pyē* from ἐν, 'in,' and πυον, 'pus.' *Aposte'ma empye'ma.* A collection of blood or pus, and conventionally of other fluid, in some cavity of the body, and particularly in that of the pleura. Empyema is one of the terminations of inflammation of the pleura, and is called, also, *Pyotho'rax verus, Pleurorrhœ'a purulen'ta, Diapye'ma, Ecpye'ma, Ecpye'sis, Empye'sis pectoris, Pyo'sis pec'toris, Hydrotho'rax purulen'tus, Dyspnœ'a pyothorac''ica, Pneumo'nia suppurato'ria, Absces'sus pec'toris, A. Thora'cis, A. Pulmo'num*, (F.) *Pyopleurite.* The operation for empyema properly means the making of an opening into the thorax, for the purpose of giving issue to the matter collected in the cavity of the pleura, although it has been used for the operation required for the evacuation of any fluid from the chest, or synonymously with *Paracentesis thoracis.*

EMPYE'SIS; same etymon. Suppuration. An eruption of phlegmonous pimples, gradually filling with a purulent fluid, and terminating in thick scabs, frequently leaving pits or scabs. *Pus'tulous Exan'them.* A genus in the order *Exanthematica*, class *Hæmatica* of Good. See Empyema.

Empyesis Oculi, Hypopyon—e. Pectoris, Empyema—e. Variola, Variola.

EMPYOCE'LE, from ἐν, 'in,' πυον, 'pus,' and κηλη, 'tumour,' 'hernia.' A tumour, formed by an accumulation of pus in the scrotum. Different diseases have been described under this name, such as suppuration of the testicle, empyema of the tunica vaginalis, accumulation of pus in the cavity of a hernial sac, abscesses of different kinds formed in the cellular texture of the scrotum, &c.

EMPYOM'PHALUS, from ἐν, 'in,' πυον, 'pus,' and ομφαλος, 'the navel.' This word has been used to designate a suppurating tumour at the umbilicus; or, at times, umbilical hernia, the sac of which is filled with blood.

EMPYOS, Purulent.

EMPYREU'MA, from πυρευω, (ἐν, and πυρ, 'fire,') 'I kindle.' The burnt smell and acrid taste, which volatile products—gaseous and liquid—contract, when animal or vegetable substances are decomposed with a strong heat. The cause of this smell is seated in an oil, called *empyreumat'ic*, which does not exist in the substance subjected to the operation, but is the result of its decomposition. If the empyreuma occurs when the organic substance is placed in a still with a liquid, it is owing to the solid matter touching the bottom of the vessel to which the fire is applied.

EMPYREUMATIC, *Empyreumat'icus:* same etymon. Belonging to empyreuma,—as an *empyreumatic* odour.

EM'PYROS, *Febric''itans*, from πυρ, 'fire or fever.' One who has fever.—Hippocrates.

EMS, MINERAL WATERS OF. Celebrated springs on the river Lahn, duchy of Nassau. They are thermal (from 83 to 115° Fahr.,) and carbonated salines, containing carbonic acid, bicarbonate of soda, and chloride of sodium; and are much used in gastric and intestinal affections, &c.

EMUL'GENT, *Emulgens*, from *emulgere*, (*e*, and *mulgere*,) 'to milk out,' 'to draw out.' A name given to the renal artery and vein, because the ancients imagined they milked, as it were, the urine through the kidneys. See Renal.

EMUL'SIO, *Emul'sion;* same etymon. A pharmaceutical preparation, of a milky-white opaque appearance, which is composed of a fixed oil, divided and held in suspension in water by means of mucilage. Emulsions have been divided into the *true* and *oily*, and into the *false* or *not oily;* the latter being composed of resinous substances, balsams, or camphor, rubbed up with dilute alcohol, mucilage, or yolk of egg.

Emulsio Aca'ciæ Arab'icæ, *Emul'sio Arab'ica; Gum Ac'abic Emul'sion.* (*Nucleor. amygd. comm.* ℥j, *aquæ* ℔jss, *mucilag. acac.* ℥ij, *sacch.* ℥iv. While beating the decorticated almonds with the sugar and water, add the mucilage. —*Ph. E.*) Used in the same cases as the last.

Emulsio Amyg'dalæ, *Lac amyg'dalæ, Emul'sio simplex, Amygdala'tum, Mistu'ra amygdalæ, Emulsio* sive *Lac Amygdala'rum, Almond Emulsion, Almond Milk*, (F.) *Lait d'amandes.* (*Amygdal. dulc.* ℥ss; *Acaciæ*, in pulv. ℥ss; *Sacchar.* ℥ij; *Aquæ destillat.* f. ℥viij. Macerate the almonds in water, and having removed their external coat, beat them with the gum Arabic and sugar, in a marble mortar, till they are thoroughly mixed: then rub the mixture with the distilled water gradually added, and strain.—Ph. U. S.) It is used as a diluent and demulcent.

Emulsio Antihysterica, Mistura asafœtidæ —e. Arabica, Emulsio acaciæ Arabicæ.

Emulsio Cam'phoræ, *E. Camphora'ta, Mistu'ra Camphoræ; Camphor Emulsion.* (*Camphoræ* ℈j *amygd. com.* decortic., *sacch. pur.*, ää ℥iv, *aquæ* ℥vj.—*Ph. E.*) A convenient form for giving camphor.

Emulsio Guaiacina, Mistura guaiaci—e. Leniens. Looch ex ovo.

Emulsio O'lei Amygdala'rum; *Emulsion of Oil of Almonds* (*Ol. amygd.* ℥j, *gum acac. pulv.* ℥ij, *syrup.* ℥j, *aquæ destill.* ℥iv. Mix.) A good pectoral or cough mixture.

Emulsio O'lei Ric''ini; *Castor Oil Emulsion* (*Ol. ricini* ℥ss, *vitelli ovi* q. s., *aquæ destillat.* ℥j.) An aperient draught.

Emulsio O'lei Terebin'thinæ; *Emulsion of Oil of Tur'pentine.*, (*Ol. terеb. rect.* ℈ij. *sacch. alb.* ℥ss, *vitell. ovi* j. *emuls. amygd.* vel *aquæ destillat.* ℥vj. Mix.) In rheumatic and nephritic affections. Dose ℥iss.

Emulsio Oleoso, Looch ex ovo.

Emulsio Purgans cum Jala'pæ Resi'nâ, *Purging Emulsion with Resin of Jalap.* (*Jalapæ*

resin. gr. xij, *sacch. alb.* ʒij. Triturate for some time, and add gradually half the yolk of an egg: continue to triturate, adding by degrees *emuls. simpl.* ℥v, *aq. flor. aurant.* ʒij.—*Ph. P.*)

Emulsio Purgans cum Scammo'nio; *Purging Emulsion with Scam'mony.* It is prepared like the preceding, substituting only scammony for the jalap.

Emulsio Simplex, E. amygdalæ.

EMULSION, Emulsio—e. Almond, Emulsio amygdalæ—e. Camphor, Emulsio camphoræ—e. Castor oil, Emulsio olei ricini—e. Gum Arabic, Emulsio acaciæ Arabicæ—e. *Huileuse*, Looch ex ovo—e. of Oil of almonds, Emulsio olei amygdalarum—e. of Oil of turpentine, Emulsio olei terebinthinæ—e. Purging with resin of jalap, Emulsio purgans cum jalapæ resinâ—e. Purging, with scammony, Emulsio purgans cum scammonio.

EMUL'SIVE, *Emulsi'vus*, same etymon. An epithet given to seeds whence oil may be extracted by expression; such as almonds, apricots, peaches, hemp, rape, melons, gourds; those of the nut kind and cucurbitaceous and cruciferous plants in general.

EMUNC'TORY, *Emuncto'rium*, from *emungere*, (*e*, and *mungere*,) 'to drain off, to cleanse.' *Emissa'rium*, (F.) *Émonctoire*, *Émissaire*. Any organ whose office it is to give issue to matters which ought to be excreted. The ancients believed that some organs were more particularly destined to serve as emunctories of others. The nasal fossæ, for example, they believed to be the emunctories of the brain.

EMUNDANTIA, Detergents.

EMYS PALUS'TRIS, *Salt Water Ter'rapin.* This species of turtle is found exclusively in salt or brackish waters, near the sea shore, along the whole Atlantic coast. It is much prized by the epicure, and is nutritious and tolerably easy of digestion when dressed plain.

ENADELPHIA, *Emboîtement.*

ENÆMON, Styptic.

ENÆORE'MA, from ἐν, 'in,' and αἰωρεω, 'I lift up,' 'that which hangs or floats in.' The *Neph'elē*, *Nubes*, *Sublimamen'tum*, *Suspen'sum*, *Nebec'ula* or cloud, which is suspended in the urine, as it cools.

ENAM'EL OF THE TEETH, *Den'tium Nitor*, *Cortex*, *Cortex stria'ta*, *Substantia filamentosa* of Malpighi, *S. adaman'tina den'tium*, *Crusta Den'tium adaman'tina.* The substance which covers the coronæ of the teeth, and which has, also, been called the *vitreous substance*, *Substan'tia vit'rea*, (F.) *Substance vitrée* ou *émaille*, *Émail des Dents.* The enamel is of a milky-white colour, and sufficiently hard to strike fire with steel. Its surface is very smooth and polished, and it forms a thicker layer towards the part where the teeth come in contact, and becomes thinner towards the cervix. The fibres of the enamel are perpendicular to the surface of the teeth, on the ivory of which they seem, as it were, planted. This gives them a velvety appearance, when examined by the microscope. The enamel has no blood-vessels, and is not renewed when removed. It is formed of phosphate of lime, and a very small portion of animal matter.

ENANTHE'MA, same etymon as the next. A name recently given to certain eruptions of the mucous membrane, as exanthema is to certain eruptions of the skin.

ENANTHE'SIS, from ἐν, 'in,' and ἀνθεω, 'I flourish.' *Rash exan'them.* Eruption of red, level or nearly level patches, variously figured, irregularly diffused, often confluent, and terminating in cuticular exfoliations. A genus in the order *Exanthematica*, class *Hæmatica* of Cullen, including scarlet fever, measles, &c.

Enanthesis Rosalia, Scarlatina—e. Urticaria, Urticaria.

ENANTIOPATHIC, Palliative.

ENARTHRO'SIS, *Inarticula'tio*, *Ball and Socket-joint*, from ἐν, 'in,' and ἀρθρωσις, 'an articulation.' A kind of diarthrodial articulation, in which the head of a bone is received into the cavity of another, and can be moved in all directions. The joint of the os femoris with the os innominatum is one of this character.

ENAUSMA, Fomites.

ENCAN'THIS, from ἐν, 'in,' and κανθος, 'the angle of the eye.' A tumour, formed by an increase in size, or a degeneration of the caruncula lachrymalis.

Encanthis Benig'na, simple excrescence of the caruncula, commonly yields to astringent collyria.

Encanthis Malig'na has often a cancerous character, and requires extirpation before it has attained any considerable size.

ENCARPOS, Pregnant.

ENCASING, *Emboîtement.*

ENCATALEPSIS, Catalepsy.

ENCATHISMA, *Semicupium.* With the ancients *Encathis'ma*, ἐγκαθισμα, meant a vapour bath taken sitting.

ENCAU'MA, from ἐν, 'in,' and καιω, 'I burn.' *Epicau'mis*, *Epicau'sis*, *Encau'sis.* A tumour produced by a burn. A Burn. Also, an ulcer of the transparent cornea, occasioning the loss of the humours.—Aëtius, Gorræus.

ENCAUSIS, Burn, Encauma, Moxibustion.

ENCAUSSE, MINERAL WATERS OF. Encausse is a village in the department of the Haute-Garonne, which possesses several saline, acidulous springs.

ENCAVURE, Argema.

ENCEINTE, Pregnant.

ENCENS, Juniperus lycia.

ENCEPHALALGIA, Cephalalgia—e. Hydropica, Hydrocephalus internus.

ENCEPHAL'IC, *Encephal'icus*, from ἐν, 'in,' and κεφαλη, 'the head.' That which is situate in the head. A name given to several parts which relate to the encephalon, as the *encephalic membranes*, *muscles*, &c.

ENCEPHALI'TIS: same etymon. This term has been used, by some Nosologists, synonymously with *Cephali'tis* and *Phreni'tis*, (q. v.) By others, it has been appropriated to inflammation of the brain, in contradistinction to that of the membranes.

Encephalitis Exsudatoria, Hydrocephalus internus—e. Insolationis, *Coup-de-soleil*—e. Potatorum, Delirium tremens.

ENCEPHALOCE'LE, from εγκεφαλος, 'the brain,' and κηλη, 'a tumour,' *Hernia Cer'ebri*, *Fungus Cerebri*, *Hernia of the Brain.* This may be a *congenital* or *accidental* affection. In the former case, it is dependent upon tardy ossification of the fontanelles or some faulty conformation. In the latter, it is owing to some considerable loss of substance in the parietes of the cranium, produced by fractures, wounds with a cutting instrument, caries, the application of

the trephine, &c. In slight congenital encephalocele, gentle pressure may be exerted upon the protruded portion. When the disease is of considerable extent, it is fatal. In accidental encephalocele, similar means must be used for confining the tumour, and preserving it from the action of external bodies.

ENCEPHALOHÆ'MIA, (F.) *Hyperémie du Cerveau*, *Hyperémie cérébrale*, *Congestion cérébrale*, from εγκεφαλον, 'the brain,' and αιμα, 'blood.' Hyperæmia or congestion of the encephalon.

ENCEPH'ALOID, *Encephaloïdes*, from εγκεφαλον, 'the brain,' and ειδος, 'resemblance.' Laënnec has given the term *Encepha'loid* or *Cer'ebriform* matter to one of the morbid substances commonly formed by scirrhous or cancerous tumours. It is either encysted, in irregular masses without cysts, or infiltered into the texture of the diseased organ. This name was given to it in consequence of its resemblance, when fully developed, to the medullary substance of the brain. It is also called *Fungus medulla'ris*, *F. Cancro'sus medulla'ris*, *Sarco'ma medulla're*, *Spongoid inflammation*, *Fungus cerebra'lis*, *Cancer cerebrifor'mē*, *Cancer mollis*, *Tela accidenta'lis medulla'ris*. See Cancer.

Encephaloid Tumour of the Lung, Phthisis, cancerous.

ENCEPHALOMALACIA, Mollities cerebri.

ENCEPH'ALON, *Encephalum*, properly *Encepha'los*, εγκεφαλος, from εν, 'in,' and κεφαλη, 'the head.' That which is situate in the head. This name has generally been given to the *brain*, *cerebellum*, and *mesocephalon*. At times, it includes likewise the *medulla spinalis*, when it is also called the *Cer'ebro-spinal axis*.

ENCEPHALOPATHIA SATURNINA, see *Encéphalopathie saturnine*.

ENCÉPHALOPATHIE CRAPULEUSE, Delirium tremens.

ENCÉPHALOPATHIE SATURNINE, *Encephalopathia Saturni'na*, from εγκεφαλος, 'the encephalon,' παθος, 'disease,' and *saturnus*, 'lead.' Encephalic disorder occasioned by the poison of lead.

ENCEPHALOPYO'SIS, from εγκεφαλος, 'the brain,' and πυον, 'pus.' *Apostе'ma cer'ebri*. Suppuration of the brain.

ENCEPHALOSE'PSIS, Mollities cerebri.

ENCEPHALOSCOPIA, Craniology.

ENCEPHALOSIS OF THE LIVER, *Hépatosacomie*.

ENCEPHALOSISMUS, Concussion of the brain.

ENCEPHALOSTRUMOSIS, see Hydrocephalus internus.

ENCEROSIS, Inceration.

ENCHARAXIS, Scarification.

ENCHEIRE'SIS, *Enchei'ria*, from εν, and χειρ, 'the hand.' Galen uses this term as a part of the title to one of his works, which treats of dissection. It means the manual treatment of any subject.

ENCHIFRÈNEMENT, Coryza.

ENCHONDROMA, Chondroma.

ENCHORIOS, Endemic.

ENCHRISTON, Liniment.

ENCHYLOSIS, Extraction.

ENCHYMA, Infusum, Plethora.

ENCHYMO'MA, *Enchymo'sis*, from εν, and χυω, 'I pour.' By the ancients, this word was used to designate the sudden effusion of blood into the cutaneous vessels which arises from joy, anger, or shame; in the last instance constituting blushing. It differs from ecchymosis in there being, in the latter, extravasation of blood into the cellular texture, and its being produced by an external cause; a contusion, for example.—Hippocrates.

ENCHYSIS, Infusion.

ENCLAVÉE, Wedged.

ENCLAVEMENT, see Wedged.

ENCLUME, Incus.

ENCLYDAS'TICOS, *intus fluctuans*, from εγκλυδαζομαι, 'to float in.' Applied to liquids, e. g. to serum, pus, &c., contained in any cavity.

ENCLYSMA, Clyster.

ENCŒ'LIA, from εν, 'in,' and κοιλια, 'the belly.' The abdominal viscera. The entrails, (q. v.)

ENCŒLIALGIA, Tormina—e. Inflammatoria, Encœlitis.

ENCŒLI'TIS, *Encœlii'tis*, *Encœlial'gia inflammato'ria*, *Inflamma'tio abdomina'lis*, from εγκοιλια, 'the abdominal contents,' and *itis*, inflammation. Inflammation of any of the abdominal viscera.

ENCOLPIS'MUS, from εν, 'in,' κολπος, 'the vagina.' Injection or introduction of any thing into the vagina.

ENCOPE, Diacope, Incision.

ENCRANION, Cerebellum.

ENCRANIS, Cerebellum.

ENCRE, Atramentum.

ENCYESIS, Fecundation, Pregnancy.

ENCYMON, Pregnancy.

ENCYMOSIA, Fecundation, Pregnancy.

ENCYSTED, *Cystidē obduc'tus*. Enclosed in a kyst or cyst; from εν, 'in,' and κυστις, 'bladder.' (F.) *Enkysté*. An epithet given to certain tumours, or solid or fluid collections enclosed in a particular envelope or cyst. They are movable, and often elastic to the touch.

ENCYS'TIS, *Tumor tunica'tus*, *T. cys'ticus*, *Emphy'ma encys'tis*. Same etymon. *Lupia*. An encysted tumour.

ENDEICTICOS, Indicant.

ENDEIXIS, Indication.

ENDEM'IC, *Endem'ical*, *Regiona'lis morbus*, *Endem'icus*, from εν, 'in,' and δημος, 'the people;' *Encho'rios*, *Vernac'ulus mor'bus*, *Ende'mia*, *Endemy*. A disease is said to be endemic when it arises from some peculiarity in a situation or locality. Thus, ague is endemic in marshy countries; goître at the base of lofty mountains, &c. Some authors use the term in the same sense as epidemic. We have no accurate knowledge of the emanations or other circumstances, which give occasion to endemic affections. We seem to know that some emanation from marshy lands does produce intermittent; but we are ignorant of the nature of such emanation.

ENDEMY, Endemic.

ENDER'MIC, *Ender'micus*, *Emplas'tro-ender'mic*, from εν, 'in,' and δερμα, 'the skin.' An epithet given to the method of treating diseases by placing the therapeutical agent in contact with the skin, especially after the cuticle has been removed. Morphia, strychnia, &c., are often administered in this way.

EN'DESIS, from εν, 'in,' and δεω, 'I bind.' A ligature, bandage, connexion. Hippocrates has so termed the ankle-joint.

ENDIVE, Cichorium endivia—e. Wild, Cichorium intybus.

ENDIVIA, Cichorium endivia.

ENDO, from ἔνδον, 'within.' A common prefix, as in the following terms.

ENDO-AORTI'TIS, from ἔνδον, 'within,' and *aortitis*, 'inflammation of the aorta.' Inflammation of the lining membrane of the aorta.

ENDO-ARTERITIS, see Arteritis.

ENDOCAR'DIAC, *Endocar'dial, Endocardi'acus:* same etymon as the next. Relating to the endocardium; as *endocardiac* sound or murmur. A sound produced within the cavities of the heart, in contradistinction to *exocardiac*, or *exocardial* sounds or murmurs, which are induced by conditions of the external surface of the organ.

ENDOCARDI'TIS, *Cardi'tis inter'na*, from *Endocar'dium*, the lining membrane of the heart, and *itis*, inflammation. Inflammation of the lining membrane of the heart. In this disease, the heart's action is visibly increased, and very manifest to the touch; the hand is strongly repelled, and, at moments, is sensible of a trembling vibratory motion. Percussion gives a dull sound over a surface of several inches, owing, according to Bouillaud, to the inflammatory turgescence of the heart, and the engorged state of its cavities. On auscultation, a *bruit de soufflet* is generally heard, masking one or both sounds of the heart; and the ear is sensible of a metallic ringing with each systole of the ventricle. The pulsations are rapid as well as strong, and, with few exceptions, irregular, unequal and intermittent. The pulse, by the way, does not always indicate the force or number of the heart's contractions.

ENDOCAR'DIUM, from ἔνδον, 'within,' and καρδία, 'the heart.' The membrane that lines the interior of the heart.

ENDOCOLITIS, Dysentery.

ENDODONTI'TIS, *Odonti'tis, Inflammation de la Pulpe dentaire, Inflammation of the Dental membrane*, from ἔνδον, 'within,' ὀδούς, 'a tooth,' and *itis*, denoting inflammation. Inflammation of the lining membrane of the tooth.

ENDO-ENTERITIS, see Enteritis.

ENDOGASTRI'TIS, *Esogastri'tis;* from ἔνδον, 'within,' and *gastritis*, (q. v.) 'inflammation of the stomach.' Inflammation of the lining membrane of the stomach.

ENDOLYMPH, *Vitrine auditive.*

ENDOMETRI'TIS, from ἔνδον, 'within,' and *metritis*, 'inflammation of the uterus.' Inflammation of the lining membrane of the uterus.

ENDONARTERITIS, see Arteritis.

ENDOSIS, Remission.

ENDOSMOSE, *Imbibition*, (q. v.) from ἔνδον, 'within,' and ὠσμος, 'impulse.' A term used by Dutrochet, to express the action by which fluids pass through organic membranes. This is done by the porosity of the tissue, in the same manner as it is effected through inorganic substances, as through fissured glass. The rapidity with which it is accomplished varies according to the nature of the septum or tissue of the penetrating body, and to the penetrability of the tissue.

ENDOS'MOTIC, *Endosmot'icus;* same etymon. Belonging to endosmose:—as an *endosmotic* current.

ENDOSTEI'TIS, from ἔνδον, 'within,' ὀστέον, 'a bone,' and *itis*, denoting inflammation. Inflammation of the internal periosteum.

ENDUIT, (F.) from *induere*, 'to put upon,' 'to put on.' A *coat;* a *fur*. This term is often applied to a layer of greater or less thickness, which covers the surface of certain organs, and particularly the tongue and interior of the mouth. The *enduit* is designed variously, according to its appearance,—*enduit bilieux, jaune, blanc*, &c.—a *bilious, yellow, white coat* or *fur*, &c. It is at times owing to the evaporation of the watery portions of a secretion; generally, to both causes combined.

ENDUIT CHOROÏDIEN, see Choroid.

ENDURCISSEMENT, Induration—*e. du Cerveau*, Sclerencephalia—*e. Rouge*, see Hepatization—*e. du Cœur, Cardiosclerosie*—*e. du Tissu cellulaire*, Induration of the cellular tissue.

ENECHEMA, Tinnitus aurium.

ENECIA CAUMA, Synocha—e. Synochus Puerperarum, see Peritonitis.

EN'EMA, from ἐνιημι, (ἐν, and ἱημι,) 'to inject.' An *Injection, Clyster*, (q. v.) (F.) *Clystère, Lavement*. A well known form of conveying medicine into the body, under certain morbid circumstances. See Clyster.

Enema Anod'ynum, *Enema O'pii; An'odyne Clyster, Starch and Opium Clyster.* (*Gelat. amyli* Oss, *tinct. opii* gtt 40 vel 60.) Exhibited in cases of severe diarrhœa or dysentery.

Enema Commu'nē; *Common Clyster, Domestic Clyster.* (*Water gruel* or *molasses and water* Oss or Oj: *add a little oil or lard, and a spoonful of common salt.*) Given as a cathartic enema; and, without the common salt, as an emollient.

Enema Cathar'ticum; *Purging Clyster.* (*Mannæ* ℥j, *decoct. chamæm. comp.* ℥x. *olei oliv.* ℥j. *sulph. magnes.* ℥ss. *Ph. D.*)

Enema Fœt'idum, *Fetid Clyster; Mistu'ra asafœt'idæ pro clys'matē, Clysma ton'icum et antispasmod'icum* seu *in'citans et sedans.* (F.) *Lavement antispasmodique.* (*The last with the addition of* ℥ij *of the tincture of asafœtida. Ph. D.*) Given as an antispasmodic and anodyne.

Enema Nicotia'næ; *Tobac'co Clyster.* This generally consists of from half a pint to a pint of the *Infusum Tabaci.* It is employed in cases of strangulated hernia; but occasionally acts as a fatal poison when given in this way. The smoke of *tobacco* is sometimes thrown up the rectum to produce the same medicinal effects as the infusion.

Enema Opii, E. anodynum.

Enema Terebin'thinæ; *Tur'pentine Clyster.* (*Ol. tereb.* f. ℥iij, *gruel* Oss, *one yolk of egg.* Incorporate the turpentine with the yolk, then add the gruel.) To be administered in cases of ascarides, (*oxyures.*)

ENEPIDERM'IC, *Enepider'micus*, from ἐν, 'in,' ἐπι, 'upon,' and δερμα, 'the skin.' An epithet given to the method of treating diseases, which consists in the application of medicines; as plasters, blisters, &c., to the skin.

ENEREISIS, Compression.

ENERGIA, Action, Force.

EN'ERGY, *Energi'a*, from ἐνεργεω, (ἐν, and ἐργον, 'action.') 'I act.' Action. Acting power. Also, vigour; as the '*muscular energy;*' the '*brain acts with energy.*'

ENERVA'TION, *Enerva'tio*, from *e*, 'out of,' and *nervi*, 'strength.' The act of weakening—the state of being weakened. See Debility.

ENFANCE, Infancy.

ENFANT, Infans—*e. Légitime*, see Legitimate.

ENFLURE, Swelling—*e. des Jambes et des cuisses de la femme accouchée*, Phlegmatia dolens.

ENFONCEMENT SCAPHOÏDE, Scaphoïdes fossa.

ENGASTERION, Laboratory.

ENGASTRIM'YTHOS, *Englottogastor*, *Gastril'oquist*, *Eu'rycles*, *Eurycli'tus*, from εν, 'in,' γαστηρ, 'the belly,' and μυθεομαι, 'I discourse.' A *Ventril'oquist*. (F.) *Ventriloque*, *Gastriloque*. One who possesses the art of modifying his natural voice, so that it seems to come from a greater or less distance, and from different directions. It was formerly believed, that such persons spoke from their belly; hence their name. It is an imitative art, and is called VENTRILOQUISM.

ENGELURE, Chilblain.

ENGHIEN MONTMORENCY, MINERAL WATERS OF. A hydrosulphurous water four leagues from Paris, near Montmorency, which is possessed of some celebrity. It contains chloride of sodium, chloride of magnesium, sulphate of magnesia, sulphate of lime, carbonate of magnesia, carbonate of lime, silica, sulphohydrate of lime and magnesia, sulphohydric acid, carbonic acid and azote.

ENGISO'MA, *Engizo'ma*, from εγγιζω, 'I approximate.' (F.) *Embarrure*. A species of fracture of the skull, in which a splinter passes beneath the sound portion of the bone, and compresses the brain.—Galen. Also, a kind of instrument used in fractures of the clavicle.

ENGLISH DISEASE, Rachitis.

ENGLOTTOGASTOR, Engastrimythos.

ENGOMPHOSIS, Gomphosis.

ENGORGEMENT, from *en*, 'in,' and *gorge*, 'the throat.' An obstruction occurring in the vessels of a part, giving rise to augmentation of volume. A congestion, (q. v.)

ENGORGEMENT DES MEMBRES ABDOMINAUX À LA SUITE DES COUCHES, Phlegmatia dolens—*e.* Hepatic, Hepatohæmia—*e. Laiteux des membres abdominaux*, Phlegmatia dolens.

ENGOUEMENT, (F.) *Obstruc'tio*, *Incu'bia*, from *angere*, 'to choke.' Accumulation, in a hollow organ, of the matters secreted by it or carried to it. There is said to be *Engouement des bronches*, when the mucus accumulates there; and *Engouement des intestins*, when the matters which ought to pass through them are detained; as in a case of strangulated hernia. *Engouement des poumons*, *E. of the lungs*, in Pathological Anatomy, signifies that state of the lungs, in which a mixture of air and thin fluid escapes from them when cut into.

ENGOURDISSEMENT, Torpor.

ENGRENURE, Suture.

ENKYSTÉ, Encysted.

ENKYSTEMENT, *Chatonnement*.

ENNEAPHAR'MACOS, from εννεα, 'nine,' and φαρμακον, 'a medicine.' A medicine, composed of nine simple ingredients. A pessary, so formed.—Galen, Paulus. An *Antid'otus Heracli'dis*, described by Galen, and some plasters by Aëtius and Celsus are, likewise, termed *Enneapharmaca*.—Gorræus.

ENOR'MON, ενορμων, from εν, 'in,' and ορμαω, 'I rouse,' 'excite.' A word used by Hippocrates in the same sense as *vital principle* is by modern physiologists.

ENOSIS, Insertion.

ENRHYTH'MOS, from εν, and ρυθμος, 'number.' Having rhythm. An epithet, applied to the pulse when its pulsations occur with some degree of order. It is opposed to *Aryth'mos*. It differs from *Eurhythmos*, which signifies 'regular.'

ENROUEMENT, Raucedo.

ENS. A being. Paracelsus meant, by this term, the power exerted by certain beings on our body. He speaks of the *Ens Dei*, the *Ens Astro'rum*, the *Ens natura'lē*, the *Ens virtu'tis*, *Ens morbo'rum*, *Ens de poten'tibus spirit'ibus*, &c. These absurd denominations suggested to some of the ancient chymists a name for certain chemical preparations. The muriate of ammonia and iron was called *Ens martis;* the muriate of ammonia and copper, *Ens veneris;* and *Ens primum* was, with the alchymists the name of a tincture which they considered possessed of the power of transmuting metals.

ENS MARTIS, Ferrum ammoniatum—e. Veneris Boylei, Ferrum ammoniatum.

EN'SIFORM, *Ensifor'mis*, from *ensis*, 'a sword,' and *forma*, 'form.' Sword-like.

ENSIFORM APOPH'YSES or PROC''ESSES, are the lesser alæ of the sphenoid bone.

ENSIFORM APPEN'DIX or CAR'TILAGE, is the xiphoid appendix of the sternum, &c. See Xiphoid.

ENSIFORMIS, Xiphoid.

ENSI-STERNAL. Relating to the ensiform process of the sternum. Béclard gave this name to the last osseous portion of the sternum. He also called it *l'os ultimi-sternal*. See Ultimosternal.

ENSOMATOSIS, Incorporation.

ENSTALAX'IS, *Instilla'tio*, Instillation, (q. v.) The act of pouring by drops.

ENTABLEMENT, Depression.

ENTAILLE, (F.) from *en*, 'in,' and *tailler*, 'to cut.' *Excis'io*, *Ec'copē*, *Ec'tomē*. A deep wound made by a sharp instrument obliquely. *Entailles* and *Taillades*, are, also, used to designate deep scarifications, made for the purpose of producing a speedy *dégorgement* of any tumefied part; such, e. g., as are made in the tongue in certain cases of glossitis.

ENTASIA, Tonic spasm—e. Articularis, Contractura—e. Loxia, Torticollis—e. Priapismus, Priapismus—e. Systremma, Cramp—e. Tetanus, Tetanus—e. Tetanus anticus, Emprosthotonos—e. Trismus, Trismus.

ENTAT'ICOS, *Intensi'vus*, from εντεινω, 'I make tense.' A medicine which excites the venereal appetite.

ENTELIPATHIA, Nymphomania.

ENTELMINTHA, Worms.

ENTENDEMENT, Intellect.

ENTERADE'NES, from εντερον, 'an intestine,' and αδην, 'a gland.' The mucous glands of the intestines. See Peyeri glandulæ.

ENTERADENOG'RAPHY, *Enteradenogra'phia*, from εντερον, 'intestine,' αδην, 'gland,' and γραφη, 'a description.' A description of the intestinal glands.

ENTERADENOL'OGY, *Enteradenolog''ia*, from εντερον, 'intestine,' αδην, 'gland,' and λογος,

'a treatise.' That part of anatomy which treats of the intestinal glands.

ENTERAL'GIA, from εντερον, 'intestine,' and αλγος, 'pain.' Pain in the intestines. Colic (q. v.)

Enteralgia Acuta, Enteritis—e. Inflammatoria, Enteritis—e. Saturnina, Colica metallica.

ENTERANGIEMPHRAX'IS, from εντερον, 'intestine,' αγχω, 'I strangle,' and εμφραασω, 'I obstruct.' Obstruction of the intestines by strangulation or otherwise.—Ploucquet.

ENTERATROPH'IA, *Atroph'ia Intestino'rum*, from εντερον, 'intestine,' and *atrophia*, 'want of nutrition.' Atrophy of the coats of the intestines.

ENTEREC'TASIS, *Dilata'tio Intestino'rum*, from εντερον, 'intestine,' and εκτασις, 'dilatation.' Dilatation of the intestines.

ENTERELE'SIA, from εντερον, 'intestine,' and ελειν, ειλειν, 'to fold.' Invagination or strangulation of the intestines —Alibert.

ENTEREMPHRAX'IS, *Infarc'tus Intestino'rum*, *Incarcera'tio intestino'rum interna*, (F.) *Etranglement des Intestins*, from εντερον, 'intestine,' and εμφραξις, 'obstruction.' *Obstruction of the Intestines* from accumulation of fæces or otherwise.

ENTEREN'CHYTA, from εντερον, 'an intestine,' εν, 'in,' and χεω, 'I pour.' Any surgical instrument for administering injections.—Sculletus.

ENTERHYPERTROPH'IA, *Hypertroph'ia intestino'rum*, from εντερον, 'intestine,' and *hypertrophia*, 'excessive nutrition.' Hypertrophy of the coats of the intestines.

ENTER'ICA, from εντερον, 'an intestine.' Diseases affecting the alimentary canal. Order I, Class I, (*Cœliaca*,) of Good.

ENTÉRITE FOLLICULEUSE, see Typhus—e. *Typhohémique*, Typhoid fever.

ENTERI'TIS, from εντερον, 'an intestine,' and *itis*, denoting inflammation. Inflammation of the intestines. *Empres'ma Enteritis*, *Intestino'rum inflamma'tio*, *Ileo-coli'tis*, *Chordap'sus*, *Cauma Enteritis*, *Enterophlog"ia*, *Co'lica acuta*, *C. inflammatoria*, *Ileus inflammato'rius*, *Enteral'gia acuta*, *E. Inflammato'ria*, *Febris intestino'rum*, *F. ill'aca inflammato'ria*, *Enteropyr'ia*, (F.) *Entérite*, *Inflammation des Intestins*. The essential symptoms of this disease are:—violent abdominal pain increased on pressure; with vomiting and inflammatory fever. Enteritis may affect both the peritoneal and the mucous coat of the intestines; and in violent cases, all the coats may be implicated. The structure of the mucous and peritoneal coats is different; so are their functions in health and disease. The inflammation of the serous coat, *Sero-enteritis*, resembles that of the cellular membrane: the inflammation of the mucous coat that of the skin. The former is usually, therefore, of a more active character. Inflammation of the mucous coat, *Eso-enteri'tis*, *Endo-enteri'tis*, *Muco-enteri'tis*, *Mucous Enteritis*, *Phlegmymeni'tis enter'ica*, is generally attended with diarrhœa, and its pathology is identical with that of Dysentery, which see. Inflammation of the peritoneal coat is, on the other hand, generally attended with constipation. Enteritis of the peritoneal coat, for such usually is the meaning of the word in the abstract, requires the most active treatment. Copious bleeding, followed up by a large dose of opium—and if the symptoms be not decidedly ameliorated, repeating the bleeding and opium—warm fomentations, and blisters are the chief agents to be relied upon. Purgatives ought not to be exhibited until the inflammation and spasm are abated by the use of the bleeding and opium. When the physician is called early, this plan will usually succeed. Sometimes, Enteritis passes into a chronic state, requiring much careful management. Broussais considered inflammation of the mucous coat of the stomach and intestines as the proximate cause of the phenomena of fever.

Enteritis Colica, Colitis—e. Epiploitis, Epiploitis—e. Follicular, Typhoid fever—e. Mesenterica, Mesenteritis—e. Mucous, see Enteritis.

ENTERO, from εντερον, 'an intestine.' In compound words signifies intestine, as in the following:

ENTEROBRO'SIS, *Enterorrhex'is*, *Perfora'tio Intestino'rum*, (F.) *Perforation des Intestins*; from εντερον, 'an intestine,' and βρωσις, 'the act of gnawing.' Perforation of the intestines.

ENTEROCE'LE, *Hernia intestina'lis*, from εντερον, 'an intestine,' and κηλη, 'a hernia,' 'tumour.' Abdominal herniæ are so called, which contain only a portion of the intestine.

ENTEROCYSTOCE'LE, from εντερον, 'an intestine,' κυστις, 'a bladder,' and κηλη, 'a tumour.' Hernia formed by the bladder and a portion of intestine.

ENTERODOTHIENIA, Dothinenteritis.

ENTERO-EPIPLOCE'LE, from εντερον, 'intestine,' επιπλοον, 'the omentum,' and κηλη, 'tumour.' Hernia, formed by intestine and omentum.

ENTERO-EPIPLOM'PHALUS, from εντερον, 'intestine,' επιπλοον, 'the omentum,' and ομφαλος, 'the umbilicus.' Umbilical hernia, containing intestine and omentum. Almost all umbilical herniæ are of this kind.

ENTEROG'RAPHY, *Enterogra'phia*, from εντερον, 'intestine,' and γραφη, 'description.' The part of anatomy which describes the intestines.

ENTERO-HÆMORRHAGIA, Hæmatochezia.

ENTERO-HYDROCE'LE, from εντερον, 'intestine,' υδωρ, 'water,' and κηλη, 'tumour.' Intestinal hernia complicated with hydrocele.

ENTERO-HYDROM'PHALUS, from εντερον, 'intestine,' υδωρ, 'water,' and ομφαλος, 'the navel.' Umbilical hernia, in which the sac contains, along with a portion of intestine, a quantity of serum.

ENTERO-ISCHIOCE'LE, from εντερον, 'intestine,' ισχιον, 'ischium,' and κηλη, 'tumour.' *Ischiat'ic hernia*, formed of intestine.

ENTEROLITHUS, Calculi of the stomach and intestines—e. Bezoardus, Bezoar—e. Scybalum, Scybala.

ENTEROL'OGY, *Enterolog"ia*, from εντερον, 'intestine,' and λογος, 'a discourse.' The part of anatomy which treats of the intestines.

ENTEROMALA'CIA, *Enteromalax'ia*, (F.) *Ramollissement de l'Intestin*; from εντερον, 'an intestine,' and μαλασσω, 'I soften.' Softening of the mucous or other coats of the intestine.

ENTEROMALAXIA, Enteromalacia.

ENTERO-MEROCE'LE, from εντερον, 'intestine,' μηρος, 'the thigh,' and κηλη, 'tumour.' Crural hernia, formed of intestine.

ENTERO-MESENTER'IC, *Febris entero-mesenter'ica*. Messrs. Petit and Serres have given this name to a species of adynamic fever or typhus, in which the intestines are ulcerated, with enlargement of the corresponding mesenteric glands. See Typhus.

ENTÉRO-MÉSENTÉRITE, Tabes mesenterica—*e. Mésenterite typhoïde*, see Typhus.

ENTEROMOR'PHIA COMPRES'SA. One of the Algæ, used by the Sandwich Islanders as an esculent.

ENTEROM'PHALUS, from εντερον, 'intestine,' and ομφαλος, 'umbilicus.' Umbilical hernia, formed of intestine.

ENTERON, Intestine.

ENTEROPATHI'A, *Enterop'athy*; from εντερον, 'intestine,' and παθος, 'disease.' Disease of the intestines in general.

ENTEROPATHI'A CANCERO'SA, *Enterosteno'sis organ'ica, Enterosarco'mia, Indura'tio* seu *Scirrhus* seu *Cancer Intestino'rum*, (F.) *Cancer des Intestins*. Cancer of the intestines.

ENTEROPERIS'TOLE, from εντερον, 'intestine,' and περιστελλω, 'I conceal,' 'I envelop.' Constriction or obstruction of the intestines, from a cause which acts either within the abdomen or without it, as in strangulated hernia.

ENTEROPHLOGIA, Enteritis.

ENTEROPYRIA, Enteritis. Also, entero-mesenteric fever.—Alibert.

ENTERORRHAGIA SIMPLEX, Hæmatochezia.

ENTERORRA'PHIA or ENTERORRAPHE, from εντερον, 'intestine,' and ραφη, 'a suture.' Suture of the intestines, for the relief of injuries done to them.

ENTERORRHEXIS, Enterobrosis.

ENTERORRHŒA, Diarrhœa.

ENTEROSARCOCE'LE, from εντερον, 'intestine,' σαρξ, 'flesh,' and κηλη, 'a tumour.' Intestinal hernia, complicated with fleshy excrescence, or rather sarcocele.

ENTEROSARCOMIA, Enteropathia cancerosa.

ENTEROSCHEOCE'LE, from εντερον, 'an intestine,' οσχεον, 'the scrotum,' and κηλη, 'tumour.' Scrotal hernia consisting of intestine.

ENTERO'SES, from εντερον, 'an intestine.' A class of diseases, comprehending all those that are seated in the intestines.—Alibert.

ENTEROSTENOSIS ORGANICA, Enteropathia cancerosa.

ENTEROTOME, Enterot'omus, from εντερον, 'intestine,' and τεμνω, 'I cut.' A name given by J. Cloquet to an instrument for promptly opening the intestinal canal through its whole extent. It consists of a pair of scissors, one blade of which is much longer than the other, and rounded at its extremity. This is passed into the intestine.

ENTEROTOM'IA: same etymon. In *anatomy*, it signifies dissection of the intestines. In *surgery*, it means an operation, little used, which consists in opening the intestine, in order to evacuate the fæcal matters accumulated in it, e. g. in certain cases of hernia, accompanied with contraction of the intestinal canal; in operations for an artificial anus, performed on the new-born, where the rectum is imperforate or not existing, &c.

ENTEROZOA, Worms.

ENTHELMINTHES, Worms.

ENTHEOMANIA, Demonomania.

ENTH'LASIS, *Esphlasis*, from εν, 'in,' and θλαω, 'I break.' A fracture of the cranium with comminution, in which the bone is depressed or has lost its level.

ENTHLASIS CRANII, Effractura cranii.

ENTONIA, Tension, Tonic spasm.

ENTONIC, *Enton'icus*; from εν, denoting excess; and τονος, 'tone.' Having great tension or exaggerated action.

ENTONNOIR, Calix, Infundibulum—*e. du Ventricule Moyen du Cerveau*, Infundibulum of the brain.

ENTORSE, Sprain.

ENTOXICISMUS, Poisoning.

ENTOXISMUS, Poisoning.

ENTOZOA, Worms.

ENTOZOAIRES, Worms.

ENTOZOARIA, Worms.

ENTOZOOGENESIS, Helminthiasis.

ENTOZOON FOLLICULORUM, Acarus Folliculorum.

ENTRAILLES, Entrails.

EN'TRAILS, *Splanchna, Encœ'lia, Vis'cera*, from *enteralia*, a word of bad Latin coming from εντερον, 'intestine.' It is used for the viscera enclosed in the splanchnic cavities, and especially for those in the abdomen; *Bowels, Guts*. (F.) *Entrailles, Viscères*.

ENTRE FESSON, Chafing.

ENTRICO'MA, from εν, 'in,' and τριχωμα, 'hair.' The tarsal cartilage, and the edge of the eyelids, in which the cilia are implanted.

ENTROP'ION, from εν, 'in,' and τρεπω, 'I turn.' *Inver'sio palpebra'rum, Capilli'tium, Trichi'asis, Introsuscep'tio entropium, Blepharelo'sis, Blepharopto'sis entropium, Tri'chia, Tricho'sis*. A name given to the inversion or turning inwards of the eyelids, so that the eyelashes are directed towards the globe of the eye; irritate and inflame it, and give rise to the affection called *Trichiasis*.

The contact of the hair with the surface of the eye occasions considerable irritation of the conjunctiva, which is soon followed by chemosis, ulceration of the eye, and other symptoms, such as fever, watchfulness, &c.

If the disease be *entropion*, as above defined, that is, dependent upon the inversion of the eyelids, it must be remedied,—either by dispersing the œdema or swelling of the eyelids, or by cutting out a portion of the skin. When the disease is dependent upon a vicious direction of the cilia, they must be plucked out and the bulbs be cauterized.

ENTYPOSIS, see Glene.

ENUCLEA'TION, *Enuclea'tio*, from *enucleare*, (*e*, and *nucleus*,) 'to take out a kernel.' This term has been proposed for the operation of removing tumours, &c., without cutting into them.—Percy.

The word is used in *Pharmacy*, for the operation of shelling or removing the kernels of the almond or of any nut.

ENULA CAMPANA, Inula Helenium.

ENU'LON, from εν, 'in,' and ουλον, 'the gum.' The inner part of the gums. The external part was called ουλον, and that between the teeth αφυσς.—Pollux.

ENURE'SIS, from ενουρεω, (εν and ουρεω,) 'I void the urine in bed.' *Paru'ria incon'tinens, Incontinen'tia uri'næ, Excre'tio Urinæ involunta'ria, Mic'tio involunta'ria, E. inopportu'na, Ura-*

cra'sia, Urorrhœ'a, Perirrhœ'a, Stranguʹria (Galen,) *Hyperuré'sis, Diam'nes, Involuntary discharge of urine, Incontinence of urine.* This affection is most common in advanced life. It may depend on too great irritability of the bladder, or on distention, or injury of the fibres about its neck, paralysis of the organ, the presence of an irregularly shaped calculus impacted in the urethra near its commencement; rupture of the bladder and urethra; renal disease; or on pressure exerted on the bladder by the distended womb or by some tumour. It often occurs after difficult labour, but generally yields, in the course of a week or ten days; the catheter being introduced twice a day in the mean time.

The treatment must of course vary according to the cause; and when the affection, on which it is dependent, cannot be removed, the discharge of urine may be prevented by exerting a degree of compression on the urethra, by means of appropriate instruments; or a urinal may be employed to receive the urine as it passes off.

ENVIE, Hangnail, Malacia, Nævus—*e. de Vomir*, Nausea.

ENYPNION, Somnium.

ENYSTRON, Abomasus.

ENZOÖTIA, Enzooty.

ENZOOTY, *Enzoötʹia*, (F.) *Enzoötie*, from εν, 'in,' and ζωον, 'animal.' An *endemic* disease attacking animals.

EP, EPH, EPI, επ, εφ, επι, 'upon, above;' in composition, generally means, 'augmentation, addition, increase, reciprocal action, repetition.' Hence:

EPACMAS'TICOS, from επι, and ακμαζω, 'I increase.' An epithet applied to fevers, *Febres epacmas'ticæ*, whose symptoms go on augmenting in violence, from the commencement to the termination. Such fevers are, also, called *Epanadidontes.*

EPAGOGIUM, Prepuce.

EPANADIPLOSIS, Anadiplosis.

EPANALEPSIS, Anadiplosis.

EPANASTASIS, Pustule.

ÉPANCHEMENT, Effusion.

EPANETUS HECTICA, Hectic fever—*e.* Malignus flavus, Fever, yellow—*e.* Mitis, Remittent fever.

EPAPHÆ'RESIS, from επαφαιρεω, 'I take away.' *Repetiʹta sublaʹtio* vel *evacuaʹtio.* A repeated abstraction or evacuation. It was formerly used synonymously with *repeated bloodletting; Phlebotomʹia iteraʹta.*—Galen.

EPAPHRISMOS, Despumation.

EPARMA, Tumour.

EPARSIS, Tumour.

ÉPAULE, Humerus.

EPENCRANIS, Cerebellum.

EPENDYMA, Membrane.

ÉPERON, Hippocampus minor—*e. des Artères*, Spur.

ÉPERVIER, Accipiter.

ÉPERVIÈRE DES MURAILLES, Hieracium murorum.

EPHEBÆ'ON, from επι, 'upon,' and ηβη, 'pubes.' The parts of generation: also, the region of the pubes, as well as the hair upon the pubes. It was likewise a part of the ancient gymnasium in which the rhetoricians, philosophers, &c., disputed.

EPHEBEUM, Mons veneris.

EPHE'BIA, *Ephebʹia, Pubertas.* Same etymon. The age of puberty, (q. v.)

EPHEBOSYNE, Puberty.

EPHEBOTES, Puberty.

EPHE'BUS, *Pubens, Puber*, (F.) *Pubère, Éphèbe.* One who has attained the age of puberty.

EPHEDRANA, Nates.

EPHEL'CIS, from επι, 'upon,' and ελκος, 'an ulcer.' The crust of an ulcer.

ÉPHÉLIDE SCORBUTIQUE, Chloasma.

EPHE'LIDES, from επι, 'upon,' and ηλιος, 'the sun.' *Epichro'sis, Macʹula solaʹris, Ephe'lis lenticʹula, Vitiligʺines, Phaci, Pannus lenticulaʹris, Lenticʹula, Lentiʹgo, Ephelis Lentiʹgo, Ephelis à solē, Nigredo à solē, Spiloʹsis ephelis, Æstaʹtes, Effila, Freckles, Sunburn.* (F.) *Taches de roussure, Hale.* This term includes, not only the yellow *lentigines*, which appear on persons of fair skin, and the larger brown patches, which also arise from exposure to the direct rays of the sun, but also those large dusky patches which are very similar in appearance, but occur on other parts of the surface, that are constantly covered. See Chloasma. They do not extend farther than the skin. Many cosmetics have been recommended for their removal. Simple spirituous lotions or weak mineral acids, applied a few times in the day, are as effectual as any other means.

EPHELIS LENTIGO, Ephelides—*e. à Sole*, Ephelides.

EPHE'MERA, *Diaʹria*, from επι, 'during,' and ημερα, 'a day.' That which continues a day. This epithet is given to diseases, and particularly to fevers, which last only a day. *Febris diaʹria, Ephemeropʹyra, Febris simplex, F. Ephe'mera.* The term *prolonged ephem'era* is sometimes used for fevers, which cease after two or three days' duration.

EPHEMERA ANGLICA PESTILENS, Sudor anglicus—*e.* Britannica, Sudor Anglicus—*e.* Maligna, Sudor Anglicus—*e.* Sudatoria, Sudor Anglicus.

EPHEMEROPYRA, Ephemera.

EPHEMERUS, Quotidian.

EPHIALTES HYPOCHONDRIACA, Incubus vigilantium—*e.* Nocturnus, Incubus—*e.* Vigilantium, Incubus vigilantium.

EPHIDRO'SIS, from επι, 'upon,' and ιδρως, 'I sweat.' A copious sweat. *Ephidrosis profuʹsa, E. spontaʹnea, E. idiopathʹica, Hydropedeʹsis, Exsudaʹtio, Exudaʹtio, Hyperephidroʹsis, Hyperhidroʹsis, Hyperidroʹsis, Sudaʹtio, Sudatoʹria*, (F.) *Flux de Sueur.* An excessive sweating, inducing debility and emaciation. A colliquative sweat. Such copious perspirations are generally owing to debility of the exhalants, and require the use of tonics, especially of the mineral acids, opium, &c.

EPHIDROSIS, Desudatio—*e.* Cruentum, Sudor cruentus.

EPHIPPIUM, Pituitaria fossa, Sella Turcica.

EPH'ODOS, from επι, 'upon,' and οδος, 'a way,' 'a road or avenue to a place.' Hippocrates uses this word in three senses: 1. For the vessels or canals, which give passage to the excrements of the body. 2. For a periodical attack or accession of fever; and 3. For the approach of similar or dissimilar things which may be useful or hurtful to the body.—Castelli.

ÉPI, Spica.

EPIALOS, *Hepialos.* A name given by the

ancients to fever, when the hot stage was mingled with irregular chills.

EPIALTES, Incubus.

EPIAN, Framboesia.

EPIBLEMA, Catablema.

EPIBOLE, Incubus.

EPICANTHIS, Canthus.

EPICAN'THUS, from ἐπι, 'upon,' and κανθος, 'the angle of the eye.' A defective formation, in which a fold of skin passes from the root of the nose over the inner canthus of the eye.

EPICAR'PIUM, *Pericar'pium*, from ἐπι, 'upon,' and καρπος, 'the wrist.' Applications made to the wrists or to the region of the pulse were so called. These were plasters, ointments, febrifuge cataplasms, &c.

EPICAUMA, Encauma.

EPICAUSIS, Encauma.

EPICERASTICA, Emollients.

EPICHOLOS, Bilious.

EPICHORION, Decidua.

EPICHRISIS, Inunctio.

EPICHRO'SIS, *Spilo'sis*, from ἐπι, and χρωμα, 'colour.' Simple discoloration of the surface.—Good. Ephelides, (q. v.)

Epichrosis Spili, see Nævus.

EPICHYSIS, Affusion.

EPICŒ'MASIS, from ἐπικοιμαομαι, (ἐπι, and κοιμαομαι,) 'to lie down to rest,' 'to sleep.' *Decu'bitus ad dormien'dum et Dormi''tio.* The position of sleeping, as well as sleeping itself.

EPICOL'IC, from ἐπι, 'upon,' and κωλον, 'the colon.' The *epicolic regions, regio'nes epicol'icæ*, are those parts of the abdomen which correspond to the colon.

EPICOLLESIS, Agglutination.

EPICONDYLE, *Epicon'dylus;* from ἐπι, 'upon,' and κονδυλος, 'a condyle.' A name given, by Chaussier, to an eminence at the outer part of the inferior extremity of the os humeri; so called, because it is seated above the condyle. The epicondyle gives attachment to the outer lateral ligament of the elbow joint, and to a very strong tendon to which several of the muscles of the posterior part of the forearm are attached.

EPICONDYLO-CUBITALIS, see Anconeus—*e. Radial*, Supinator radii brevis—*e. Sus-métacarpien*, see Radialis—*e. Sus-phalangettien commun*, Extensor digitorum communis—*e. Sus-phalangettien du petit doigt*, Extensor proprius minimi digiti.

EPICOPHOSIS, Cophosis.

EPICRA'NIUM, from ἐπι, 'upon,' and κρανιον, 'the cranium.' A name given to different parts seated on the cranium. The skin, aponeurosis between the occipital and frontal muscles, and the whole of the scalp have been so called. Portal includes under this name the occipito-frontalis muscle, pyramidalis nasi, and superior and anterior auricular muscles.

EPICRANIUS, Occipito-frontalis.

EPICRA'SIS, *Contemperd'tio*, from ἐπικεραννυμι, (ἐπι, and κεραννυμι, 'I mix,') 'I temper.' A term used by the humorists for *an amelioration of the humours.* They called *Cure by Epicrasis, per epicrasin*, a mode of treatment by imagined alteratives, which they supposed to be possessed of the power of gradually correcting the vitiated humours.

EPICROUSIS, Percussion.

EPICYEMA, Fœtus, Superfœtation.

EPICYESIS, Superfœtation.

EPICYSTOTOMIA, see Lithotomy.

EPIDEISIS, Deligation.

EPI'DEMY, *Epidem'ic, Epide'mia, Epidé'mios, Epide'mos, Morbus publ'icus, Morbus popula'ris*, from ἐπι, 'upon,' and δημος, 'the people.' A disease which attacks at the same time a number of individuals, and which is depending upon some particular *constitutio aeris*, or condition of the atmosphere, with which we are utterly ignorant. It differs from *endemic*, the latter being owing to locality; but it is obvious, that should a particular epidemic constitution of the air exist along with a favourite endemic condition, these combined influences may act in the causation of several of those serious and fatal complaints, which at times visit a district and are never afterwards met with, or at least not until after the lapse of a considerable period.

EPIDENDRUM VANILLA, see Vanilla.

EPID'ERIS, *Epider'rhis, Hypod'eris*, or *Hypoder'mis*, from ἐπι, 'upon,' and δερας, 'the skin.' This word, with some, means the nymphæ: with others, the clitoris; with others, again, the prepuce of the clitoris.

EPIDER'MIS, *Epider'mion, Cutic'ula, C. extima, C. extre'ma, Cutis extima, C. summa, C. ul'tima, Pellis summa, Pellic'ula summa, P. supe'rior, Lam'ina prima cutis, Oper'culum cutis*, from ἐπι, 'upon,' and δερμα, 'the true skin.' Scarf-skin, cuticle. (F.) *Surpeau, Cuticule.* A transparent, dry, thin membrane, devoid of nerves and vessels, which covers all the surface of the body, except the parts that correspond to the nails. It appears to consist of minute scales, placed one above the other. Chaussier considers it to be formed and reproduced by an excretory action of the true skin; to act like a dry varnish, which prevents the immediate contact of bodies with the nervous papillæ, and consequently to deaden tactile impressions, which, without its intervention, might be painful. The *Epider'mic, Epider'meous*, or *Epider'moid* (as Bichat called it) *System*, in general anatomy, comprises three parts. 1. External Epidermis. 2. Epidermis spread over the mucous membranes. 3. The Nails and Hair.

Epidermis Linguæ, see Tongue.

EPIDERRHIS, Epideris.

EPIDESIS, see Bandage—e. Hæmostasia, Ligature.

EPIDES'MOS, from ἐπι, 'upon,' and δεω, 'I bind.' A Fascia, (q. v.) bandage, (q. v.) or ligature, by which dressings are secured.—Hippocrates.

EPIDID'YMIS, from ἐπι, 'upon,' and διδυμος, 'a testicle.' *Epidid'ymus, Paras'tata, Testic'ulus accesso'rius, Caput testis, Corpus varico'sum* seu *varicifor'mē testis, Corps varigueux* ou *variciforme, Supergemina'lis*: that which is placed upon the testicle. A small, oblong, vermiform, grayish body lying along the superior margin of the testicle. The Epididymis is a canal, formed by the union of all the seminiferous vessels, folded several times upon themselves, after having traversed the *Corpus Highmorianum.* Its lower portion or tail, *Cauda* vel *globus minor*, is curved upwards, and is continuous with the vas deferens; the opposite extremity is called the head, *globus major.* The length of this canal, folded as it is upon itself

and describing numerous curvatures, is, according to Monro, 32 feet.

EPIDIDYMITIS, Parastatitis—e. Blennorrhagic, Hernia humoralis.

EPID'OSIS, from επι, 'upon,' and διδωμι, 'to give.' Augmentation, increase. A word applied to the natural increase of the body or to the increase of a disease.

EPID'ROMĒ, from επιδρεμω, (επι, and δρεμω,) 'I run upon.' An afflux or congestion of humours.—Galen.

EPIFAGUS AMERICANUS, Orobanche Virginiana—e. Virginianus, Orobanche Virginiana.

EPIGASTRAL'GIA, from επιγαστριον, 'the epigastrium,' and αλγος, 'pain.' Pain at the epigastrium.

EPIGAS'TRIC, *Epigas'tricus*, *Epigas'trius*, from επι, 'upon,' and γαστηρ, 'the stomach.' This name has been given to several parts.

Epigastric Ar'tery. *Arte'ria epigas'trica*, *A. sus-pubienne*, (Ch.) It arises from the *external iliac*, on a level with the crural arch; sometimes by a trunk proper to it, at others by a trunk common to it and the *Obturator artery*. It ascends upwards and inwards, behind the spermatic cord, follows the outer edge of the rectus abdominis muscle, and anastomoses, towards the umbilicus, with the internal mammary. The epigastric artery anastomoses, also, with the obturator, spermatic, lumbar, and intercostal vessels.

Epigastric Region, *Regio epigas'trica*, *R. cardi'aca*, *R. stomach'ica*, *R. Stomacha'lis*, is the superior region of the abdomen, comprised between the false ribs on each side, and extending from the lower surface of the diaphragm to two fingers' breadth above the umbilicus. It is divided into three parts, one *middle*, the *epigas'trium*,—and two *lateral*, the *hypochon'dria*.

Epigastric Vein follows nearly the same course as the artery.

EPIGASTRICUS, Epigastric.

EPIGAS'TRIUM. Same etymon. The belly; the epigastric region.

EPIGASTRIUS. Epigastric.

EPIGASTROCE'LĒ, from επι, 'upon,' γαστηρ, 'the stomach,' and κηλη, 'a tumour.' Hernia, formed by the stomach; *Gas'troce'lē*. This name has been given more especially to hernia, which occurs towards the upper part of the linea alba or in the epigastric region, whether formed or not by the stomach.

EPIGENEMA, Epigenesis.

EPIGEN'ESIS, from επι, 'upon,' and γενεσις, 'generation.' A theory of conception, according to which the new being is created entirely anew; and receives at once from each parent the materials necessary for its formation.

Epigenesis, as well as *Epigene'ma*, or *Epigenne'ma*, is also, applied to any symptom occurring during a disease, without changing its nature. An accessary symptom. *Epiginom'enos*. *Superve'niens*, has a similar acceptation.

EPIGINOMENOS, Epigenesis.

EPIGLOT'TIC, *Epiglot'icus*: same etymon. Relating to the epiglottis.

Epiglottic Gland, *Periglot'tis*, *Caro glandulo'sa*. A collection of small, glandular granula, situate in the adipose, cellular texture at the base of the anterior surface of the epiglottis, in a triangular space, bounded anteriorly by the thyro-hyoid membrane and thyroid cartilage. It pours out an unctuous and mucous fluid, which lubricates the epiglottis, keeps it supple and movable, and prevents the larynx from being irritated by the constant passage of the air, in the act of respiration.

EPIGLOT'TIS, from επι, 'upon,' and γλωττις, 'the glottis.' *Epiglot'tic cartilage*, *Lig'ula*, *Oper'culum laryn'gis*. A fibro-cartilage, situate at the upper part of the larynx, behind the base of the tongue. Its form is oval; texture elastic; thickness greater below than above, and greater in the middle than at the sides. By its smaller extremity, which is the lower, it is attached to the thyroid cartilage; its two surfaces are covered by the mucous membrane of the pharynx and larynx. The special use of the epiglottis would seem to be to cover the glottis accurately at the moment of deglutition, and, thus, to assist in opposing the passage of alimentary substances into the air tubes.

EPIGLOTTITIS, *Inflamma'tio Epiglot'tidis*, (F.) *Inflammation de l'Epiglotte*, *Angi'na epiglottidea*. Inflammation of the epiglottis.

EPIGLOT'TUM. An instrument, mentioned by Paracelsus, for raising the eyelids. It resembled the epiglottis in shape.

EPIGLOU'TIS, from επι, 'upon,' and γλουτος, 'the buttocks.' The superior region of the nates.—Gorræus.

EPIGONATIS, Patella.

EPIGONION, Fœtus.

EPIGONON, Superfœtation.

EPIGOUNIS, Patella.

EPILATORIUM, Depilatory.

EPILEMPSIS, Epilepsy.

EPILENTIA, Epilepsy.

EPILEPSIA ACUTA INFANTUM, Eclampsia—e. Algetica, see Algos—e. Febrilis infantum, Eclampsia—e. Nocturna, Incubus—e. Puerilis, Eclampsia infantum—e. Saltatoria, Chorea—e. Uterina, Lorind matricis.

ÉPILEPSIE, Epilepsy—*e. Utérine*, Hysteria—*e. Vertige*, see Epilepsia.

EP'ILEPSY, 'ιερη νουσος, σεληναια νουσος, *Epilep'sia*, *Epilep'sis*, *Epilemp'sis*, *Epilen'tia*, *Syspa'sia Epilep'sia*, *Catalen'tia*, *Morbus comi'tialis*, *M. cadu'cus*, *M. Hercu'leus*, *Heracle'us morbus*, *M. sacer*, *M. pueri'lis*, *Deprehen'sio*, *Clonos epilep'sia*, *Hieran'osos*, *Prehen'sio*, *Morbus magnus*, *M. Major*, *M. Interlu'nius*, *M. divi'nus*, *M. dæmo'nius*, *M. son'ticus*, *M. Seleni'acus*, *M. lunat'icus*, *M. mensa'lis*, *M. deif'icus*, *M. sceles'tus*, *M. vitriola'tus*, *M. viridellus*, *M. Sancti Valenti'ni*, *Analepsia*, *Catapto'sis*, *Insa'nia cadu'ca*, *The falling sickness*, (F.) *Mal caduc*, *Mal divin*, *Mal Saint-Jean*, *Mal de Terre*, *Haut-mal*. The word is derived from επιλαμβανω, 'I seize upon.' It is a disease of the brain, which may either be idiopathic or symptomatic, *spontaneous* or *accidental*, and which occurs in paroxysms, with uncertain intervals between. These paroxysms are characterized by loss of sensation and convulsive motions of the muscles. Frequently, the fit attacks suddenly; at other times, it is preceded by indisposition, vertigo, and stupor. At times, before the loss of consciousness occurs, a sensation of a cold vapour is felt, hence called *aura epilep'tica*. This appears to rise in some part of the body, proceeds towards the head; and as soon as it has reached the brain the patient falls down. The ordinary duration of a fit is from 5 to 20 minutes. Sometimes it

goes off in a few seconds; at others, it is protracted for hours. In all cases, there is a loss of sensation, sudden falling down, distortion of the eyes and face; countenance of a red, purple or violet colour; grinding of the teeth; foaming at the mouth; convulsions of the limbs; difficult respiration, generally stertorous; with sometimes involuntary discharge of fæces and urine. After the fit, the patient retains not the least recollection of what has passed, but remains, for some time, affected with head-ache, stupor, and lassitude.

The disease is in the brain, and is generally organic; but it may be functional and symptomatic of irritation in other parts, as in the stomach, bowels, &c. The prognosis, as to ultimate recovery, is unfavourable. It does not, however, frequently destroy life, but is apt to lead to mental imbecility. Dissection has not thrown light on its pathology.

To the attacks of epilepsy which are unaccompanied by convulsions, as is sometimes the case, the French give the name *Petit-mal*, and *Épilepsie Vertige*. When furious mania succeeds to a paroxysm, it is termed *Mania epileptica* and *Epileptic Delirium*.

In the *treatment*, the cause must be sought after, and if possible removed. In the paroxysm, but little can be done; but as the tongue is liable to be injured by the teeth, the jaws may be kept open by putting a cork or piece of wood between them. If the fit have been brought on by indigestible food, the stomach must be cleared. It is between the paroxysms that the great effort must be made. Generally, there is considerable irritability and debility about the brain, and hence tonics have been found the best remedies. Of these, perhaps the most powerful, in epilepsy, is the *argenti nitras*, given regularly and continued for months, if necessary. Preparations, of iron, copper, and zinc have, also, been used, and the general class of the vegetable tonics and antispasmodics. Counter-irritants, as blisters, moxa, &c., may be employed, if necessary, along with this course.

Unfortunately, in many cases, these means are found insufficient, and all that can be done is to palliate, removing carefully all exciting causes; such as the use of spirituous liquors, strong emotions, violent exercise, &c., and regulating the diet.

EPILEP'TIC, *Epilepticus;* same etymon. One attacked with epilepsy. Any thing relating to epilepsy; as an *epilep'tic individual*, an *epilep'tic symptom*. Some authors, also, speak of *epileptic remedies*.

EPIM'ANES. A name given to a maniac when in a paroxysm.

EPIMELE'TAI, from ἐπιμελέομαι, (ἐπι, and μέλω,) 'I take care of.' A name by which the ancient Persians called the *curers of wounds*, who followed their armies.

EPIMOR'IOS, 'unequal;' from ἐπι, and μείρω, 'I divide.' An epithet applied to the pulse when unequal.—Galen.

ÉPINARD, Spinacia—*é. Sauvage*, Chenopodium bonus Henricus.

ÉPINE, Spine—*é. du Dos*, Vertebral column—*é. Gutturale*, Nasal spine, inferior and posterior—*é. Sphénoïdale*, Sphenoidal spine—*é. Vinette*, Oxycantha Galeni.

EPINEPH'ELOS, *Nubilo'sus*. Presenting a cloud. Applied to the urine.—Hippocrates.

ÉPINEUX, Spinous—*é. du Dos, grand*, Spinalis dorsi major: see Interspinales dorsi et lumborum—*é. du Dos, petit*, see Interspinales dorsi et lumborum.

ÉPINIÈRE, Spinal.

ÉPINGLE, Pin.

EPINOTION, Scapula.

EPINYC'TIDES, from ἐπι, 'upon,' and νυξ, 'the night.' Eruptions which appear on the skin in the night, and disappear in the day. *Pus'tula livens et noc'tibus inquie'tans.*—Pliny.

EPINYCTIS PRURIGINO'SA, Urticaria.

ÉPIONE, Decidua.

EPIPAROXYS'MUS. A paroxysm superadded to an ordinary paroxysm.

EPIPAST'ON, Catapasma.

EPIPE'CHU, ἐπιπηχυ, from ἐπι, 'upon,' and πηχυς, 'the elbow.' The upper part of the elbow.—Gorræus.

EPIPEPHYCOS, Conjunctiva.

EPIPHA'NIA, from ἐπι, 'upon,' and φαινω, 'I exhibit.' The external appearance of the body.—Castelli.

ÉPIPHÆNOM'ENON, *Post appa'rens;* same etymon. Any kind of adventitious symptom which occurs during the progress of an affection; and which is not as intimately connected with the existence of the disease as the symptoms—properly so called.

EPIPH'LEBOS, from ἐπι, 'upon,' and φλεψ, 'a vein.' An epithet given to those whose veins are very apparent.—Hippocr., Aretæus.

EPIPHLOGIS'MA, from ἐπι, 'upon,' and φλογιζω, 'I inflame.' Violent inflammation or burning heat in any part.—Hippocrates.

EPIPH'ORA, *Dacryno'ma*, *Lachryma'tio*, *Delachryma'tio*, *Illachryma'tio*, *Oc'ulus lach'rymans*, from ἐπιφερω, (ἐπι, and φερω,) 'I carry to.' Weeping, (F.) *Larmoiement*. The *watery eye;*—an involuntary and constant flow of tears upon the cheek. It is almost always symptomatic of some disease of the lachrymal passages, and occurs when the tears cannot pass into the *ductus ad nasum*. Occasionally, it is owing to the tears being secreted in too great quantity; as in certain cases of ophthalmia. The treatment must of course be directed to the removal of the cause.

EPIPHORA, Ophthalmia—e. Ptyalismus, Salivation.

'EPIPHYMATA, Cutaneous diseases.

EPIPH'YSIS, *Additamen'tum*, (q. v.) from ἐπι, 'upon,' and φυω, 'I arise.' Any portion of a bone, separated from the body of the bone by a cartilage, which becomes converted into bone by age. The *epiphysis* of the fœtus becomes the *apophysis* of the adult.

EPIPHYSIS CRURIS LONGIORIS INCUDIS, Os orbiculare.

EPIPLASM, from ἐπι, 'upon,' and πλασσω, 'I spread.' A cataplasm. Galen uses it especially for an application of wheaten flour, boiled in *hydrelæum*, and applied to wounds.

EPIPLEGIA, Hemiplegia.

EPIPLERO'SIS, from ἐπι, 'augmentative,' and πληρωσις, 'repletion.' Excessive repletion, distention.

EPIPLOCE'LÈ, from ἐπιπλοον, 'omentum,' and κηλη, 'tumour.' *Epiploic hernia*, *Zirba'lis hernia*, *Omental hernia*, (F.) *Hernie de l'épiploon*. Omental hernia is recognised—but at times with difficulty—by a soft, unequal, pasty tu-

mour, in which no gurgling sound is heard, on pressing or reducing it. It is less dangerous than hernia of the intestines.

EPIPLO-ENTEROCE'LĒ, from επιπλοον, 'the omentum,' εντερον, 'intestine,' and κηλη, 'tumour.' Hernia, formed by the epiploon and a portion of the intestines. It is more commonly called *En'tero-epiploce'lē.*

EPIP'LOIC, *Epiplo'icus.* Relating to the epiploon.

Epiploic Appen'dages; *Appendic'ulæ epiplo'icæ, A. pinguedino'sæ, Fim'briæ carno'sæ coli.* Prolongations of the peritoneum beyond the surface of the large intestine, which are analogous in texture and arrangement to the epiploon.

Epiploic Ar'teries; *Arte'riæ Epiplo'icæ.* The arterial branches, which are distributed to the epiploon, and which are given off by the gastro-epiploicæ

EPIPLO-ISCHIOCE'LĒ, from επιπλοον, 'the epiploon,' ισχιον, 'the ischium,' and κηλη, 'a tumour.' Hernia, formed by the epiploon through the ischiatic notch.

EPIPLOI'TIS, from επιπλοον, 'the omentum,' and *itis,* denoting inflammation. Inflammation of the omentum. *Omenti'tis, Empresma peritoni'tis omenta'lis, Omenti inflamma'tio, Enteri'tis epiploï'tis, Omente'sis:* a form of partial peritonitis.

EPIPLOMEROCE'LĒ, from επιπλοον, 'the omentum,' μηρος, 'the thigh,' and κηλη, 'a tumour.' Femoral hernia, formed by the epiploon.

EPIPLOM'PHALON, *Epiploöm'phalon, Hernia umbilica'lis,* from επιπλοον, 'the omentum,' and ομφαλος, 'the navel.' Umbilical hernia, formed by the epiploon.

EPIPLOM'PHRASIS, from επιπλοον, 'the epiploon,' and εμφρασσω, 'I obstruct.' Induration of the epiploon.

EPIPLOOCOMIS'TES, from επιπλοον, 'the epiploon,' and κομιζω, 'I carry.' One who has the omentum morbidly large. Also, one labouring under epiplocele.

EPIP'LOON, *Epip'loum,* from επι, 'above,' and πλεω, 'I swim, or float.' *Omen'tum, Retē, Retic'ulum; Dertron;* The *Caul.* A prolongation of the peritoneum, which floats above a portion of the intestines; and is formed of two membranous layers, with vessels and fatty bands distributed through it. Anatomists have described several epiploons. The uses of the omentum are but little known. The chief one seems to be, to retain the viscera *in situ,* and to give passage to vessels.

Epiploon, or Omentum, Colic, *O. co'licum, Third Epiploon* or *Omentum,* is a duplicature of the peritoneum, situate along the ascending portion of the colon, as far as its junction with the transverse portion. It is behind the great epiploon, and fills up the angle formed by the junction of the ascending with the transverse colon. Its two laminæ are separated by colic arteries and veins.

Epiploon, Gastro-Colic, or Great Omentum, *Omentum gastro-co'licum, Omentum majus,* consists of an extensive duplicature, which is free and floating on the folds of the intestines. It is quadrilateral, and longer on the left side than on the right:—its base being fixed, anteriorly, to the great curvature of the stomach; and, posteriorly, to the arch of the colon. It is formed of two laminæ, each consisting of two others. In this epiploon a number of vessels is distributed, and there is much fat.

Epiploon, Gastro-Hepatic, or Lesser Omentum, *Omentum hep'ato-gas'tricum* or *Omentum minus, Membra'na macilen'tior,* is a duplicature of the peritoneum, which extends transversely from the right side of the cardia to the corresponding extremity of the fissure of the liver, and downwards from this fissure to the lesser curvature of the stomach, the pylorus and duodenum. Below it is the *foramen* or *hiatus* of Winslow; and between its laminæ are lodged the biliary and hepatic vessels. It contains but little fat. If air be blown in at the foramen of Winslow, the cavity of the omentum will be rendered perceptible.

Epiploon, or Omentum, Gastro-Splenic, *O. Gastro-sple'nicum.* A reflection of the peritoneum, which passes between the concave surface of the spleen and the stomach, from the cardiac orifice to near its great curvature, and which lodges the vasa brevia and splenic vessels between its laminæ.

EPIPLOSARCOM'PHALUS, from επιπλοον, 'the epiploon,' σαρξ, 'flesh,' and ομφαλος, 'the navel.' Umbilical hernia, formed of indurated omentum.

EPIPLOSCHEOCE'LĒ. from επιπλοον, 'the epiploon,' οσχεον, 'the scrotum,' and κηλη, 'tumour,' Scrotal hernia, formed by a displacement of the epiploon.

EPIPLOUM, Epiploon.

EPIPORO'MA, from επιπωροω, (επι, and πωροω,) 'I harden.' A tophaceous concretion, which forms in the joints. The callus of fracture.

EPIRRHŒA, Epirrhoe.

EPIR'RHOE, *Epirrha'a,* from επι, 'upon,' and ρεω, 'I flow.' Afflux or congestion of humours.—Hippocrates.

EPISARCIDIUM, Anasarca.

EPIS'CHESIS, Retention; from επισχυω, 'I restrain.' A suppression of excretions.

EPISCHION, Abdomen, Pubes.

EPISCOPALES VALVULÆ, Mitral valves.

EPISEION, Pubis, (os,) Vulva, Labium Pudendi, Tressoria.

EPISEMA'SIA, from επισημαινω, (επι, and σημα, 'a sign,') 'I afford some sign.' *Semasia.* It has been used synonymously with *sign,* and also with the invasion of an attack of fever. See Annotatio.

EPISIOCELE, see Hernia, vulvar.

EPISION, Episeion.

EPISIONC'US, from επισιον, (modern,) 'the labium pudendi,' and ογκος, 'a tumour.' *Tumor labio'rum.* A swelling or tumour of the labia pudendi.

EPISIOR'RAPHY, *Episiorraph'ia,* from επισιον, (modern,) 'the labia pudendi,' 'the vulva,' and ραφη, 'suture.' An operation practised in cases of prolapsus uteri, which consists in paring the opposing surfaces of the labia pudendi, bringing them together and uniting them by suture, so as to diminish the outlet of the vulva.

EPISPA'DIAS, from επι, 'above,' and σπαω, 'I draw.' The opposite to Hypospadias. Epispadias consists of a preternatural opening of the urethra at the upper part of the penis.

EPISPAS'TICS, *Epispas'tica, Hele'tica;* same etymon. An epithet for every medicinal substance, which, when applied to the skin, excites

pain, heat, and more or less redness, followed by separation of the epidermis, which is raised up by effused serum. Cantharides and mustard are epispastics. See Blister and Derivative.

EPISPASTICUM, Blister.

EPISPHÆ'RIA, from επι, 'upon,' and σφαιρα, 'a sphere.' Some physiologists have applied this expression to the different convolutions and sinuosities presented by the external surface of the brain.

EPISPHÆRION, Convolution.

EPISPHAGISMOS, Signature.

EPIS'TASIS, *Insiden'tia* (q. v.) from επι, 'upon,' and στημι, 'I rest.' A substance which swims at the surface of urine. It is opposed to the *hypostasis* or sediment. Epistasis has also been employed synonymously with suppression.

EPISTAX'IS, from επι, 'upon,' and σταζω, 'I flow, drop by drop.' *Hæmorrha'gia activa na'rium, Epistax'is junio'rum, Epistax'is arterio'sa, Hæmorrhin'ia, Hæmorhinorrhagia, Choanorrhag''ia, Rhinorrhag''ia, Stillicid'ium* seu *Stilla'tio Sang'uinis e nar'ibus, Hemorrhage from the pituitary membrane, Bleeding at the nose,* (F.) *Hémorrhagie nasale, Saignement du nez, Hémorrhinie.* This is one of the most common varieties of hemorrhage; the organization of the Schneiderian membrane being favourable to it, as the blood vessels are but slightly supported. It does not generally flow from both nostrils, and is very apt to recur. Puberty is the period at which it is most common. Its *exciting causes* are:—any thing that will excite local congestions, such as running, coughing, blowing the nose, &c., provided there be a predisposition to it. A common case of epistaxis requires but little treatment, especially if in a young person. Light diet and a dose or two of the sulphate of magnesia will be sufficient. In more severe attacks, cold and astringent washes of alum, sulphate of zinc, weak sulphuric acid, or creosote may be used, and the nostrils be plugged anteriorly; but if the bleeding goes on posteriorly, the posterior nares must be plugged likewise:—the patient being kept with the head raised. To prevent the recurrence, strict diet must be inculcated.

EPISTER'NAL, *Episterna'lis,* from επι, 'upon,' and στερνον, 'the sternum.' An epithet applied to two bones, which form part of the sternum, and are situate upon its superior and lateral part. In the young subject, they are attached to the sternum by a synovial membrane, and a fibrous capsule. They have somewhat the appearance of the pisiform bones, but are of a greater size.

EPISTHOT'ONOS, from επισθεν, 'forwards,' and τεινω, 'I extend.' A spasm of the muscles, drawing the body forwards. The word *emprosthotonos* is more commonly employed.

EPISTROPHEUS, Axis.

EPISYNAN'CHE, (επι, and *synanche* or *cynanche,*) *Episynangi'na.* A Greek word, used by a modern writer for spasm of the pharynx, by which deglutition is prevented, and the solid and liquid food driven back towards the mouth or nasal fossæ.

EPISYNTHET'IC, *Episynthet'icus,* from επισυντιθημι (επι, συν, and τιθημι,) 'to collect, accumulate.' The name of a medical sect, whose object it was to reconcile the principles of the Methodists with those of the Empirics and Dogmatists. Leonides of Alexandria seems to have been one of the first partisans of this sect; of which we know little.

EPIT'ASIS, from επι, and τεινειν, 'to extend.' The period of violence of a fever, attack or paroxysm. Sometimes it is used in the same sense as epistasis, for '*suppression.*'

EPITHE'LIUM, *Epithe'lis,* from επι, 'upon,' and θηλη, 'a nipple.' The thin layer of epidermis, which covers parts deprived of *derma,* properly so called,—as the nipple, mucous membranes, lips, &c. Modern histological researches have shown, that it exists, in different forms, *pavement* and *cylinder epithelium;* and that it is seen in various parts—in the blood vessels, and even in the ventricles of the brain.

EP'ITHEM, *Epith'ema,* or *Epithe'ma,* from επι, 'upon,' and τιθημι, 'I put.' This term is applied to every topical application which cannot be classed either under ointments or plasters. Three sorts of epithems have been usually distinguished,— the *liquid, dry* and *soft,* which comprise *fomentations, bags filled with dry substances,* and *cataplasms.*

EPITH'ESIS. Same etymon. The rectification of crooked limbs by means of instruments.

EPITROCH'LEA, from επι, 'upon,' and τροχαλια, 'a pulley.' That which is situate above a pulley. Chaussier gives this name to the unequal, round protuberance, situate on the inside of the inferior extremity of the humerus above its articular trochlea. It is the part usually called the *inner condyle* or *lesser condyle* of the humerus. From it originate several muscles of the forearm, to which it has given part of their names, according to the system of Chaussier.

ÉPITROCHLO-CARPI-PALMAIRE, Palmaris longus—*é. Cubito-carpien,* see Cubital muscles—*é. Métacarpien,* Palmaris magnus—*é. Phalanginien commun,* Flexor sublimis perforatus—*é. Radial,* Pronator radii teres.

EPIZO'A, (F.) *Epizoaires,* from επι, 'upon,' and ζωον, 'an animal.' Parasitic animals, which infest the surface of the body; or the common integument.

EPIZOO'TIA, *Epizoöty.* Same etymon. A disease which reigns amongst animals. It corresponds, in the veterinary art, to Epidemy in medicine.

EP'OCHĒ, from επι, and εχω, 'to have or to hold.' Doubt, suspension of judgment—*Suspensa senten'tia.* Sometimes employed in the same sense as *epischesis* or suppression.

EPOCHETEUSIS, Derivation.

EPODE, Incantation.

EPO'MIS, *Su'perhumera'lē,* from επι, 'upon,' and ωμος, 'the shoulder.' The upper part of the shoulder.—Hippocrates, Galen.

EPOMPHA'LION, from επι, 'upon,' and ομφαλος, 'the navel.' A medicine, which, when placed upon the umbilicus, moves the belly.—Paulus of Ægina.

ÉPONGE, Spongia—*é. d'Eglantier,* Bedegar.

ÉPOQUES, Menses.

ÉPREINTES, Tenesmus.

EPSEMA, Decoction.

EPSESIS, Decoction, Elixatio.

EPSOM, MINERAL WATERS OF. Epsom is a town in Surrey, about 15 miles from London. The water is a simple saline;—consisting chiefly of sulphate of magnesia, which

has consequently received the name of *Epsom Salts*, though no longer prepared from the Epsom water.

ÉPUISEMENT, Exhaustion.

EPU'LIS, from επι, 'upon,' and ουλον, 'the gum.' *Odon'tia excres'cens, Sarco'ma epu'lis, Ulon'cus, Excrescen'tia gingi'væ.* An excrescence on the gum, sometimes ending in cancer.

EPULOSIS, Cicatrization.

EPULOTICA, Cicatrisantia.

EQUAL, *Æqua'lis.* An epithet applied particularly to the pulse and to respiration. The pulse and respiration are equal, when the pulsations and inspirations which succeed each other are alike in every respect.

EQUILIB'RIUM, from *æquus*, 'equal,' and *librare*, 'to weigh.' In medicine, this word is sometimes used to designate that state of organs, fluids, and forces, which constitutes health.

EQUI'NIA, from *equi'nus*, 'belonging to a horse.' *Glanders.* (F.) *Morve.* A dangerous contagious disorder, accompanied by a pustular eruption, which arises from inoculation with certain diseased fluids generated in the horse, the ass and the mule. Two forms are met with,—*E. mitis*, contracted from horses affected with grease, and *E. glandulo'sa*, a dangerous and commonly fatal disease communicated to man, either in the acute or chronic form, from the glandered horse. The veterinary surgeons make two varieties of the disease in the horse—*glanders;* and *farcy glanders, Farcino'ma*, (F.) *Morve farcineuse:*—the *former* affecting the pituitary membrane and occasioning a profuse discharge from the nostrils, with pustular eruptions or small tumours, which soon suppurate and ulcerate, being attended by symptoms of malignant fever and by gangrene of various parts:—the *latter* being the same disease, but appearing in the shape of small tumours about the legs, lips, face, neck, &c. of the horse; sometimes very painful, suppurating and degenerating into foul ulcers. They are often seen together.

The mild cases require little treatment but rest; the more severe generally resist all remedies.

EQUISETUM ARVENSE, &c., see Hippuris vulgaris—e. Minus, Hippuris vulgaris.

EQUITA'TION, *Equita'tio, Hippei'a, Hippa'sia, Hippeu'sis;* from *equus*, 'a horse.' *Horseback exercise.* A kind of exercise, advisable in many diseases, although improper in others—in uterine affections, for instance. It has been much recommended in phthisis pulmonalis. It is less fatiguing than walking, and consequently more available in disease. But to prevent disease, where exercise is required, the latter is preferable.

EQUIV'OCAL, *Æquiv'ocus*, from *æquus*, 'equal,' and *vox*, 'voice.' Those symptoms are occasionally so denominated which belong to several diseases. Generation is said to be 'equivocal,' when it is, or seems to be, spontaneous. See Generation.

EQUUS, *Hippos, Nicta'tio.* A perpetual motion of nictation, which some individuals have naturally, and others from disease.

ÉRABLE, Acer saccharinum.

ERADICA'TION, *Eradica'tio*, from *e*, 'from,' and *radix*, 'a root.' The act of rooting out, or completely removing a disease.

ERAD'ICATIVE, *Eradi'cans:* same etymon. Any thing possessed of the power of completely rooting out a disease.

ÉRAILLEMENT DES PAUPIÈRES, Ectropion.

EREBINTHUS, Acer arietinum.

ERECTILE TISSUE, from *erigere*, (*e*, and *rigere*,) 'to erect,' 'to become erect.' A tissue, whose principal character is:—to be susceptible of dilatation, i. e. of turgescence and increase of size. It is formed of a collection of arteries and veins, intermixed with nervous filaments; which form, by their numerous anastomoses, a spongy substance, whose areolæ communicate with each other. This tissue exists in the corpora cavernosa of the penis and clitoris, at the lower and inner surface of the vagina, in the spongy part of the urethra, the lips, nipples, iris, &c. Sometimes it is developed accidentally, and constitutes a kind of organic transformation.

ERECTION, *Erec'tio, Arrec'tio;* same etymon. The state of a part, in which, from having been soft, it becomes stiff, hard, and swollen by the accumulation of blood in the areolæ of its tissue.

ERECTOR CLITORIDIS, Ischio-cavernosus—e. Penis, Ischio-cavernosus.

EREMACAU'SIS, from ερημος, 'waste,' and καυσις, 'combustion.' A term applied by Liebig to the slow combustion, oxidation, or *decay* of organic matters in air.

EREMIA, Acinesia.

ER'ETHISM, *Erethis'mus, Erethis'ia*, from ερεθιζω, 'I irritate.' Irritation. Augmentation of the vital phenomena in any organ or tissue. *Orgasm.* Under this name, Mr. Pearson has described a state of the constitution produced by mercury acting upon it as a poison. He calls it *Mercurial Erethismus.* It is characterized by great depression of strength; anxiety about the præcordia; irregular action of the heart; frequent sighing; tremors; small, quick, sometimes intermitting, pulse; occasional vomiting; pale, contracted countenance, and sense of coldness; but the tongue is seldom furred, nor are the vital and natural functions much disturbed. In this state any sudden exertion may prove fatal.

ERETHISMA, Rubefacient.

ERETHISMUS, Irritation—e. Ebriosorum, Delirium tremens—e. Hydrophobia, Hydrophobia—e. Oneirodynia, Incubus, Paroniria—e. Simplex, Fidgets.

ERETHIT'IC, *Erethit'icus.* Belonging or relating to erethism,—as "erethitic phenomena," phenomena of irritation.

EREUGMOS, Eructation.

EREUXIS, Eructation, Flatulence.

ERGASMA, Myrrha.

ERGASTERION SPIRITUS, Pulmo.

ERGOT, (F.) *Ergot*, 'a spur,' *Er'gota, Seca'le cornu'tum, Clavis secali'nus, Clavis seca'lis, Mater seca'lis, Brizoce'ras, Calcar, Seca'lis mater, Seca'le luxu'rians, Ustila'go, Clavis silig'inis, Frumen'tum cornu'tum. F. cornicula'tum, F. luxu'rians, F. tur'gidum, F. temulen'tum Spurred or Horned Rye, the Spur, Hornseed.* (F.) *Seigle ergotée, Blé cornu.* Ergot is generally considered to be the result of a disease in rye, occurring most frequently when a hot summer succeeds a rainy spring. Decandolle, however, regards it as a parasitic fungus, and calls it *Sclero'tium*

clavus; whilst Leveillé esteems it to be a fungus giving a coating to the diseased grain; the medical virtues residing in the coating. This parasitic fungus he calls *Sphace'lia seg'etum.* More recently, it has been maintained, that it is a diseased state of the grain occasioned by the growth of a fungus not previously detected, to which the name *Ergotæ'tia abortans* seu *abortifa'ciens*, has been given. It is found projecting from among the leaves of the spike or ear; and is a long, crooked excrescence, resembling the spur of a cock; pointed at its extremities; of a dark-brown colour externally, and white within.

This substance has been long used in Germany to act on the uterus, as its names Mutterkorn and Gebärpulver (womb-grain, pulvis parturiens) testify. About 38 years ago, it was recommended in this country, by Dr. John Stearns, of Saratoga County, New York, for accelerating parturition; and since that period, numerous testimonials have been offered in its favour. Half a drachm of the powder is gently boiled in half a pint of water, and one-third part given every 20 minutes, until proper pains begin. Some recommend the clear watery infusion; others advise the powder; others the oil, and others the wine. It is obvious, that in many cases the uterine efforts would return in the period which would necessarily elapse in the administration of ergot, so that several of the cases, at least, of reputed efficacy, may not have been dependent upon the assigned agent. Ergot also possesses—it is affirmed—narcotic virtues, which have rendered it useful in hemorrhagic and other affections of excitement.

Bread, made of spurred rye, has been attended with the effects described under Ergotism.

ERGOT, Hippocampus minor.

ERGOTA, Ergot.

ERGOTÆTIA ABORTANS, see Ergot—e. Abortifaciens, see Ergot.

ER'GOTISM, *Ergotis'mus, Rapha'nia* (q. v.), *Ergot* or *Mildew Mortifica'tion, Ergotisme gangréneux, Necrosis ustilaginea, Gangrène des Solonois, Mal de Sologne, Convul'sio Solonien'sis, Gangræ'na ustilagin'ea.* An affection produced by the use of the spurred rye. At times, the symptoms are limited to vertigo, spasms, and convulsions. See Convulsio cerealis. Most commonly, there is torpor with numbness of the hands and feet, which waste away; lose sensation and the power of motion, and separate from the body by dry gangrene.

ERGOTISME CONVULSIVE, Convulsio cerealis.

ERGOTISMUS, Ergotism.

ERI'CA VULGA'RIS, *Callu'na vulga'ris, Common Heath.* (F.) *Bruyère vulgaire.* This has been regarded as diuretic and diaphoretic.

ERIG'ERON PHILADEL'PHICUM, *Scabious, Skevisch, Philadelphia Flea-Bane, Skevisch Flea-Bane, Daisy, Cocash, Frostweed, Fieldweed, Squaw-weed.* (F.) *Vergerette de Philadelphie.* The plant has been used in decoction or infusion for gouty and gravelly complaints, and it is said to operate powerfully as a diuretic and sudorific.

Erigeron Canaden'sē, Can'ada Fleabane, is considered to be allied in properties to the above, and the same may be said of the *Erigeron Heterophyllum, Sweet Sca'bious* or *various-leaved Fleabane;* all of which are in the secondary list of the Pharmacopœia of the United States.

ERIGERUM, Senecio.

ÉRIGNE, Hook.

ÉRINE, Hook.

ERIX, ἔριξ. This word signifies, in Galen, the upper part of the liver.

ERODENS, Caustic.

ERODIUM MOSCHATUM, Geranium moschatum.

EROMANIA, Erotomania.

ERON'OSUS, *Eronu'sos,* from ἠρ, 'spring,' and νοσος or νουσος, 'disease.' A disease which appears chiefly in spring.

EROS, Love.

EROSIA, Corrosion.

ERO'SION, *Ero'sio, Diabro'sis, Anabro'sis,* from *erodere,* (*e,* and *rodere,*) 'to eat away.' The action of a corrosive substance, or the gradual destruction of a part by a substance of that kind. It is often employed in the same sense as ulceration, *spontaneous erosion.*

EROT'IC, *Erot'icus,* from ἐρως, 'love.' That which is produced by love;—as *Erotic melancholy, E. delirium,* &c.

EROTICOMANIA, Erotomania.

EROTION, Melissa.

EROTOMA'NIA, *Eroma'nia,* from ἐρως, 'love,' and μανια, 'mania.' A species of mental alienation caused by love. *Erotic melancholy* is *Love melancholy.* Some authors write it *Erot'ico-mania.* Also, Nymphomania, (q. v.)

ERPES, Herpes.

ERRABUNDUS, Planetes.

ERRAT'IC, *Errat'icus, Atac'tos, At'ypos;* from *errare,* 'to err.' *Wandering, irregular.* That which disappears and recurs at irregular intervals. The name is given to intermittents, which observe no type. Most commonly, it is applied to pains or to any diseased manifestation, which is not fixed; but moves from one part to another, as in gout, rheumatism, erysipelas, &c.

ERREUR DE LIEU, Error loci.

ER'RHINE, *Errhi'num* or *Er'rhinum, Sternutato'rium, Ster'nutatory, Ptar'micum, Apophlegmatisans per nares,* from ἐν, 'into,' and ῥὶν, 'the nose.' A remedy, whose action is exerted on the Schneiderian membrane; exciting sneezing and increased discharge. Errhines have been chiefly used as local stimulants in head affections. The chief are: Asari Folia, Euphorbiæ gummi-resina, Hydrargyri sulphas flavus, Tabacum, and Veratrum album.

ERRHINUM, Sternutatory.

ER'RHYSIS, from ἐν, 'in,' and ῥέω, 'I flow.' With some, a draining of blood. A trifling hemorrhage.

ERROR LOCI, *Apoplane'sis.* (F.) *Erreur de Lieu.* A term, frequently used by Boerhaave to express deviation of fluids, when they enter vessels not destined for them. Boerhaave admitted several orders of capillary vessels; the diameters of which went on decreasing. The largest received red blood: those which came next received only white: others only lymph; whilst the last of all were destined for yet more subtile fluids—for a kind of vapour. When the red globules entered vessels destined for the white, or the white those intended for the thinner fluids, there was, according to the theory of

Boerhaave, an *error loci*;—the proximate cause of inflammation and other mischiefs. See Aberration.

ERUCA, Brassica eruca, Sinapis.

ERUCTA'TION, (*e*, and *ructare*,) *Ructa'tio*, *Ereug'mos*, *Er'ygē*, *Eructa'tio*, *Ructus*, *Ereux'is*, *Ruft*, (*N. of England*,) from *eructare*, 'to belch.' *Belching*. (F.) *Rot*, *Rapport*. A sonorous emission, by the mouth, of flatus proceeding from the stomach.

ERUGATORIA, Tetanothra.

ÉRUGINEUX, Æruginous.

ERUP'TION, *Erup'tio*, from *erumpere*, (*e*, and *rumpere*,) 'to issue with violence,' 'to break out.' This word has several meanings. 1. The sudden and copious evacuation of any fluid from a canal or cavity;—of serum, blood, pus, &c., for example. 2. The breaking out of an exanthem; and, 3. The exanthem itself, whether simply in the form of a rash, or of pustules, vesicles, &c.—See Cutaneous diseases.

Eruption, Violet, Ionthus.

ERUP'TIVE, *Eruptivus*. That which is accompanied by an eruption. Thus small-pox, measles, scarlet fever, miliaria, &c. are *eruptive fevers*. The term *eruptive disease* is nearly synonymous with cutaneous disease.

ERVA DE SANCTA MARIA, Arum dracunculus.

ERVUM ERVIL'IA, *Or'obus*. (F.) *Lentille Ers*, ou *Orobe*. In times of scarcity, the seeds have been made into bread, but it is said not to be wholesome. The meal was once much used in poultices: it was formerly called *Orobion*, ὀροβιον.

Ervum Lens, *Lens*, *Phacos*, the *Lentil*. (F.) *Lentille*. The seeds are eaten in many places like peas: they are flatulent and difficult of digestion.

ERYGE, Eructation.

ERYNGIUM, see E. Aquaticum.

Eryn'gium Aquat'icum, *Water Eryn'go*, *Button Snake Root*. *Nat. Order*, Umbelliferæ. This root, *Eryngium*, (Ph. U. S.,) is nearly allied to the contrayerva of the shops, and acts more especially as a sudorific. It is a secondary article in the Pharm. U. S.

Eryngium Campes'trĕ, *Centum Cap'ita*, *Lyrin'gium*, *Aster inquina'lis*, *Capit'ulum Martis*, *Acus Ven'eris*, (F.) *Panicaut*. *Chardon-Roland*, is sometimes used for *E. maritimum*.

Eryngium Marit'imum. The *Sea Holly* or *Eryngo*, *Æthe'rea Herba*. (F.) *Panicaut Maritime*. *Eryngo root* has a slightly aromatic odour, and sweetish and warm taste. It is considered to be diuretic and expectorant, but its powers are so weak, that it is scarcely ever used.

ERYNGO, SEA, Eryngium maritimum—e. Water, Eryngium aquaticum.

ERYSIMUM, *Erys'imum officina'lĕ*, *Sisym'brium officina'lĕ*, *Chamæ'plion*, *Hedge-mustard*. (F.) *Velar*, *Tortelle*, *Herbe aux chantres*. This was, formerly, much used for its expectorant and diuretic qualities. The seeds greatly resemble mustard.

Erysimum Alliaria, Alliaria.

Erysimum Barba'rea, *Barba'rea*, (F.) *Herbe de Sainte Barbe*, has been ranked amongst the antiscorbutic plants. See Alliaria.

ERYSIP'ELAS, from ερυω, 'I draw in,' and πελας, 'near.' *Febris erysipelato'sa*, *Febris erysipeli'cea*, *Em'phlysis Erisip'elas*, *St. Anthony's fire*, *Ignis sancti Anto'nii*, *Hieropyr*, *Icteri'tia rubra*, *Ignis sacer*, *Rose*, *Rubea icteri'tia*, *Vicinitra'ha*, *Vicinitrac'tus*, *Brunus*, (F.) *Érysipèle Feu St. Antoine*, *Feu sacré*, *Mal Saint Antoine*. A disease, so called because it generally extends gradually to the neighbouring parts. Superficial inflammation of the skin, with general fever, tension and swelling of the part; pain and heat more or less acrid, and redness diffused, but more or less circumscribed; disappearing when pressed upon by the finger, but returning as soon as the pressure is removed. Frequently, small vesicles appear upon the inflamed part, which dry up and fall off, under the form of branny scales. Erysipelas is, generally, an acute affection: its medium duration being from 10 to 14 days. It yields, commonly, to *general* refrigerant remedies. Topical applications are rarely serviceable. At times, when the disease approaches the phlegmonous character, copious bleeding and other evacuants may be required, as in many cases of erysipelas of the face; but this is not commonly necessary. In most cases, indeed, the general action seems deficient, and it becomes necessary to give tonics.

When erysipelas is of a highly inflammatory character, and invades the parts beneath, it is termed *Erysip'elas phlegmono'des*, (F.) *Érysipèle phlegmoneux*; when accompanied with phlyctenæ, and the inflammation terminates in gangrene, *Erysip'elas gangræno'sum*, (F.) *Érysipèle gangreneux*; and when associated with infiltration of serum, *Erysip'elas œdemato'sum*, (F.) *Érysipèle œdemateux*.

Erysipelas Gangrænosum, see Erysipelas—e. Œdematosum, see Erysipelas—e. Phlegmonodes, see Erysipelas—e. Periodica nervosa chronica, Pellagra—e. Phlyctenoides, Herpes zoster—e. Pustulosa, Herpes zoster—e. Zoster, Herpes zoster.

ERYSIPEL'ATOUS, *Erysipelato'sus*; belonging to erysipelas; as an *erysipel'atous affection*. *Erysipel'atous inflammation*, *Cuti'tis*, *Dermati'tis*, is the character of inflammation, which distinguishes erysipelas, *Erythe'ma erysipelato'sum*.

ÉRYSIPÈLE, Erysipelas—*é. Ambulant*, see *Ambulant*—*é. Gangréneux*, see Erysipelas—*é. Œdemateux*, see Erysipelas—*é. Phlegmoneux*, see Erysipelas—*é. Serpigineux*, see Serpiginous—*é. Pustuleux*, Herpes zoster.

ERYSOS, Erythema.

ERYTHE'MA, from *Erythrai'os*, *Er'ythros*, 'red, rose-coloured;' from ερυθρος, 'red.' *Erythre'ma*, (F.) *Érythème*. This name is, sometimes, given to erysipelas, especially when of a local character. It is, also, applied to the morbid redness on the cheeks of the hectic; and on the skin covering bubo, phlegmon, &c. It forms the 6th genus of the 3d order, *Exanthemata*, of Bateman's classification of cutaneous diseases; and is defined, "a nearly continuous redness of some portion of the skin, attended with disorder of the constitution, but not contagious." Many varieties are described by dermatologists, for example, *E. intertri'go*, *E. fugax*, *E. papula'tum*, *E. tubercula'tum*, *E. nodo'sum*, *E. lævĕ*, *E. centrif'ugum*, *E. margina'tum*, and *E. acrodyn'ia*.

Erythema Acrodynia, Acrodynum—e. Ambustio, Burn—e. Anthrax, Anthrax.

Erythe'ma Centrif'ugum. A variety of erythema attacking the face, commencing with

a small red spot, and spreading around, so as, at times, to affect the whole face.

Erythema Endemicum, Pellagra—e. à Frigore, Chilblain.

Erythe'ma Fugax. Patches of erythema, that sometimes appear on the body in febrile diseases, teething children, &c., and which are of brief duration.

Erythema Gangrænosum, Anthrax—e. Intertrigo, Chafing.

Erythe'ma Lævē, (F.) *Érythème léger.* Slight erythema affecting the skin, as in œdema.

Erythe'ma Margina'tum, (F.) *Érythème marginal.* A form in which the prominent patches of erythema are distinctly separated from the skin at their margins.

Erythema Mercuriale, Eczema mercuriale.

Erythe'ma Nodo'sum, (F.) *Érythème noueux.* A more severe form of Erythema tuberculatum.

Erythe'ma Papula'tum, (F.) *Érythème papuleux.* Patches of erythema, which are at first papulated, appearing on the face, neck, breast, &c., of females, and young persons more especially.

Erythema Pellagrum, Pellagra—e. Pernio, Chilblain.

Erythe'ma Tubercula'tum, *E. tuberculo'sum,* (F.) *Érythème tuberculeux.* A form of erythema in which the patches are in small lumps.

Erythe'ma Sola'rē. A name given by the Italians to Pellagra, (q. v.) owing to its being attended with an eruption of small red spots or patches on the parts that are exposed to the sun.

ERYTHÈME, Erythema—*é. Léger,* Erythema lævе—*é. Marginal,* Erythema marginatum—*é. Noueux,* Erythema nodosum—*é. Papuleux,* Erythema papulatum—*é. Tuberculeux,* Erythema tuberculatum.

ERYTHRÆA CENTAURIUM, Chironia centaurium—e. Chilensis, Canchalagua, Chironia Chilensis.

ERYTHREMA, Erythema.

ERYTHRODANUM, Rubia.

ER'YTHROID VES'ICLE, *Vesic'ula Erythroïdea.* A vesicle of the fœtus described by Pockels and others. It is pyriform, and much longer than, although of the same breadth as, the umbilical vesicle. Velpeau, Weber, and others doubt its being a physiological condition.

ERYTHRONIUM, see E. Americanum.

Erythro'nium America'num, *E flavum, E. dens canis, E. lanceola'tum, E. longifolium, Common Erythronium, Yellow Snake-leaf, Yellow Adder's tongue, Adder-leaf, Dog vi'olet, Rattlesnake vi'olet, Lamb's tongue, Scrofula root, Yellow Snowdrop.* This plant is possessed of emetic properties, but is rarely, if ever, used. The root and herb, *Erythronium,* (Ph. U. S.,) are in the secondary list of the Pharmacopœia of the U. S.

Erythronium Dens Canis, E. Americanum—e. Flavum, E. Americanum—e. Lanceolatum, E. Americanum—e. Longifolium, E. Americanum.

ES'APHĒ, from ἐσαφάω. 'I touch with the fingers.' (F.) *Le Toucher.* The introduction of a finger or fingers into the vagina, for the purpose of examining the condition of the uterus. It is employed to verify the existence or non-existence of pregnancy and its different stages; to detect certain affections or faults of conformation in the genital organs and pelvis; and, during the process of accouchement, to examine into the progress of labour, &c.

ESCA, Aliment.

ESCARA, Eschar.

ESCARGOT, Limax.

ESCHALOTTE, *Échalotte.*

ESCHAR, *Es'chara, Es'cara, a slough, a crust or scab.* The crust or disorganized portion, arising from the mortification of a part, and which is distinguishable from the living parts by its colour, consistence, and other physical properties. The inflammation which it excites in the contiguous parts, gives occasion to a secretion of pus between the living and dead parts, which ultimately completely separates the latter.

ESCARA, Vulva.

ESCHAROTICS, *Escharot'ica,* from ἐσχαρα, 'eschar.' Any substance, which, when applied upon a living part, gives rise to an eschar, such as *caustic potassa:* the *concentrated mineral acids,* &c.

ESCHELLOHE, MINERAL WATERS OF. This water rises at the foot of a mountain near the convent of Etal in Bavaria. It is a sulphuro-saline.

ESCORZONERA, Scorzonera.

ESCREVISSE, Crab.

ES'CULENT, *Esculen'tus* from *esca,* 'food,' (F.) *Comestible.* Such plants or such parts of plants or animals as may be eaten for food.

ESO, ἐσω, 'within.' A prefix which signifies an affection of an internal part; as *Esoënteritis,* inflammation of the inner membrane of the intestines:—*Esogastri'tis;* inflammation of the inner membrane of the stomach, &c.

ESO'CHĒ, ἐσωχη. A tumour within the anus.

ESOCOLITIS, Dysentery.

ESOËNTERITIS, see Enteritis.

ESOGASTRITIS. Endogastritis.

ESPACES INTERCOSTAUX, see Costa.

ESPÈCE. Powder, compound.

ESPÈCES VULNÉRAIRES, Falltranck.

ESPHLA'SIS, from φλαω, 'I break, bruise,' &c. A fracture of the skull by comminution, the fragments being depressed. See Depression, and Enthlasis.

ESPRIT, Spirit—*e. d'Ammoniaque,* Spiritus ammoniæ—*e. d'Anis,* Spiritus anisi—*e. de Camphre,* Spiritus camphoræ—*e. de Cannelle,* Spiritus cinnamomi—*e. de Carvi,* Spiritus carui—*e. de Genièvre composé,* Spiritus juniperi compositus—*e. de Lavande,* Spiritus lavandulæ—*e. de Lavande composé,* Spiritus lavandulæ compositus—*e. de Menthe poivrée,* Spiritus menthæ piperitæ—*e. de Muscade,* Spiritus myristicæ—*e. de Pouliot,* Spiritus pulegii—*e. de Raifort composé,* Spiritus armoraciæ compositus—*e. de Romarin,* Spiritus rosmarini—*e. de Vin delayé,* Spiritus tennior—*e. de Vin rectifié,* Spiritus rectificatus.

ESPRITS ANIMAUX, Nervous fluid.

ESQUILLE, Splinter.

ESQUINANCIE, Cynanche, Cynanche tonsillaris.

ESQUINE, Smilax China.

ES'SENCE, *Essen'tia,* corrupted from *existentia,* 'standing out.' (?) By some used synonymously with *volatile oil;* by others, with *simple tincture.* The *oil of peppermint* is the oil ob-

tained by distillation; the *essence*, the oil diluted with spirit. See Tinct. olei menthæ.

Essence of Coltsfoot, see Tinctura benzoini composita—e. of Musk, Tinctura moschi—e. of Mustard Pills, Whitehead's, see Sinapis—e. of Mustard, Whitehead's, see Sinapis—e. of Peppermint, Tinctura olei menthæ piperitæ—e. of Spearmint, Tinctura olei menthæ viridis.

ESSENCES, Olea volatilia.

ESSENTIA, Tincture—e. Aloes, Tinctura aloes—e. Absinthii amara, Tinctura A. composita—e. Absinthii composita, Tinctura A. composita—e. Antimonii seu stibii, Vinum antimonii tartarizati—e. Antiseptica Huxhami, Tinctura cinchonæ composita—e. Aromatica, Tinctura cinnamomi composita—e. Castorei, Tinctura castorei—e. Catholica purgans Rothii, Tinctura jalapii composita—e. de Cedro, Oleum cedrinum—e. Chinæ, Tinctura cinchonæ composita—e. Cinnamomi, Tinctura cinnamomi—e. Neroli, see Citrus aurantium—e. Corticis Peruviani antiseptica Huxhami, Tinctura cinchonæ comp.—e. Corticis Peruviani composita, Tinctura cinchonæ amara.

ESSEN'TIAL, *Essentia'lis*. The word *essential* has been applied to the immediate or active principles of vegetables, which were believed to be endowed with the properties of the plants from which they were extracted. *Essential oil* was so called because it was regarded as the only immediate principle which was *essential*. This expression is retained. *Essential salts* are true salts or extracts which exist, ready formed, in vegetables; and which are obtained by distillation, incineration, or some other process.

An *essential disease* is synonymous with an *idiopathic* disease; that is, one not depending on any other;—not symptomatic.

ES'SERA, ES'SERE, SORA, or SAIRE, *Sare*, *Morbus porci'nus*, *Rosa saltans*, *Urtica'ria porcellana*, (F.) *Ampoules*, *Porcelaine*. A species of cutaneous eruption, consisting of small, reddish tubercles over the whole body, accompanied by a troublesome itching. It seems to be a variety of lichen or urticaria. See Lichen tropicus.

ESSIEU, Axis.

ESSOUFLEMENT, Anhelatio.

ESTHEMA, Vestitus.

ESTHESIS, Vestitus.

ESTHIOM'ENUS, *Estiom'enus*, from ἐσθίω, 'I eat,' *Ex'edens*. That which devours or eats away. Certain ulcers and eruptions are so called.

ESTI'VAL, *Æsti'vus*; happening in summer, belonging to summer. This epithet is given to *summer diseases*, so called because they reign at that season, and appear to depend on the influence exerted by it on the animal economy. In the United States, the term *summer disease* or *complaint* means disorder of the bowels, as *diarrhœa*, *cholera morbus*, &c.

ESTOMAC, Stomach.

ESULA MAJOR, Euphorbia palustris—e. Minor, Euphorbia cyparissias.

ESURIES, Hunger.

ESURIGO, Hunger.

ESURITIO, Hunger.

ESYCHIA, Acinesia.

ÉTAGE, Stage.

ÉTAIN, Tin—*é. de Glace*, Bismuth—*é. Gris*, Bismuth.

ÉTAT GRANULEUX DU REIN, Kidney, Bright's Disease of the.

ÉTERNUMENT, Sneezing.

ETESTICULATIO, Castration.

ETHER. Æther—e. Acetic, see Æther—e. Chloric, Æther chloricus—e. Hydrochloric, see Æther—e. Hydrocyanic, Æther hydrocyanicus—e. Muriatic, see Æther—e. Nitric, see Æther—e. Nitrous, see Æther—e. Phosphoric, see Æther—e. Rectified, Æther sulphuricus—e. Sulphuric, Æther sulphuricus.

ETHEREAL, Æthereal.

ÉTHÉRÉE, Æthereal.

ETHEREOUS, Æthereal.

ETHERINE, HYDROCYANATE OF. Æther hydrocyanicus.

ETH'MOID. The *ethmoid bone*, *Os ethmoïdeum*, *Os multifor'mē*, *Os spongid'sum*, *Os spongoï'des*, *Os cribrid'sum*, *Os cribrifor'mē*, *Os foraminulen'tum*, *Os colifor'mē*; from ἠθμός, 'a sieve,' and εἶδος, 'form.' (F.) *Os Criblenx*. One of the eight bones which compose the cranium; so called, because its upper plate is pierced by a considerable number of holes. The ethmoid bone is situate at the anterior, inferior, and middle part of the base of the cranium. It seems to be composed of a multitude of thin, fragile, semi-transparent laminæ, which form more or less spacious cells, called the *Ethmoidal labyrinth* or *cells*, distinguished into *anterior* and *posterior*. These communicate with the nose, and are lined by a prolongation of the pituitary membrane. The ethmoid bone is constituted of compact tissue, and is surrounded by the *Ethmoid suture*. It is articulated with the *frontal* and *sphenoidal bones*, the *cornua sphenoïdalia*, the *superior maxillary bones*, the *palate bones*, the *ossa turbinata inferiora*, the *vomer*, the *proper bones of the nose*, and the *lachrymal bones*.

ETHMOID'AL, *Ethmoïda'lis*. Belonging to the ethmoid bone; as, *Ethmoidal cells*, *E. suture*, &c. The *Ethmoï'dal apoph'ysis* or *process* is the advanced part of the sphenoid bone, which articulates with the ethmoid. The *ethmoidal arteries* are two in number, the anterior of which arises from the ophthalmic artery. The origin of the other varies. The *Échancrure ethmoïdale* of the os frontis receives the ethmoid bone. The *Ethmoidal veins* correspond to the arteries.

ETHMOSYNE, Habit.

ETHMYPHI'TIS, *Inflamma'tio telæ celluld'sæ*, from ἠθμός, 'a sieve,' ὑφή, 'texture,' and *itis*, denoting inflammation. Inflammation of the cellular membrane.

ETHMYPHOTYLOSIS, Induration of the cellular tissue.

ETHOS, Habit.

ETHULE, CYANURET OF, Æther.

ÉTHUSE, Æthusa cynapium—*é. Meum*, Æthusa meum.

ETIOLA'TION, (F.) *Étiolement*. That state of plants which occurs in consequence of privation of light, when they become pale and watery. In *pathology*, it is sometimes used to denote the paleness produced in those persons who have been kept long without light; or a similar paleness, the result of chronic disease.

ÉTIOLEMENT, Etiolation.

ETIOLOGY, Ætiologia.

ÉTISIE, Hectisis—*é. Mésentérique*, Tabes mesenterica.

ÉTOILE, Stella.

ÉTONNÉ, Stunned.

ÉTOUFFEMENT, Suffocation.

ÉTOURDISSEMENT, Vertigo.

ÉTRANGLEMENT, Strangulation, Hysteria—*é. des Intestins*, *Enteremphraxis*.

ÉTRIER, Stapes.

ETRON, Abdomen, Hypogastrium.

ETRON'CUS, from ητρον, 'the lower belly,' and ογκος, 'a tumour.' A tumour of the lower belly.

ÉTUVE, Stove—*é. Humide*, Bath, vapour.

ÉTUVER, to Foment.

EU, ευ, 'good, proper,' when prefixed to words. Hence:

EUÆ'MIA, from ευ, 'well,' and αιμα, 'blood.' Good condition of the blood.—Fernelius.

EUÆSTHE'SIA, from ευ, 'well,' and αισθησις, 'perception.' Vigorous perception. A good condition of the perceptive faculties.

EUÆSTHE'TOS. Same etymon. One whose senses are in full vigour, from ευ, 'well,' and αισθανομαι, 'I feel.'

EUANTHEMON, Anthemis nobilis.

EUCALYPTUS RESINIFERA, see Kino.

EUCHYM'IA, from ευ, 'well,' and χυμος, 'juice.' A good state of the humours.

EUCRA'SIA, from ευ, 'well,' and κρασις, 'temperament,' (q. v.) A good temperament.

EUDIAPNEUS'TIA, from ευδιαπνευστος, 'one who breathes well.' Easy transpiration.

EUELCES, from ευ, 'well,' and ελκος, 'an ulcer.' One whose ulcers are readily healed.

EU'EMES, *Euem'etos*, from ευ, 'well,' and εμεω, 'I vomit.' That which readily excites vomiting. One who vomits with facility.

EUETHES, Benign.

EUEX'IA, from ευ, 'well,' and εξις, 'constitution.' A good constitution.

EUFRAISE, Euphrasia officinalis.

EUGE'NIA CARYOPHYLLA'TA, called after Prince Eugene. *Garrophyl'lus*, *Caryophyl'lus aromat'icus*. The Indian tree which affords the *clove*. *Order* Myrtaceæ. The *Clove* or *Caryophyl'lus*, *C. aromat'icus*, is the unexpanded bud, (F.) *Girofle*, *Gérofle*, *Gyrophle*. Its odour is strong, aromatic, and peculiar; taste, pungent and acrid. Like all substances, whose virtue depends upon essential oil, it is stimulant and carminative. It is generally used as a corrigent to other remedies, and in cases where substances containing the essential oils are demanded. The oil, (F.) *Huile de Gérofle*—*Oleum caryophyl'li*, *Oil of Cloves*—has the properties of the cloves.

EUGION, Hymen.

EULOPHIA, see Salep.

EUNUCH, *Eunu'chus* from ευνη, 'the bed,' and εχω, 'I keep.' *Thla'dias*, *Thla'sias*, *Thlib'ias*, *Castra'tus*, *Excastra'tus*, *Evira'tus*, *Emascula'tus*, *Spado*, *Exsectus*, *Extesticula'tus*, *Exton'tus*, *Sem'ivir*, *Semimascula'tus*. One whose organs of generation have been removed, or so altered, that he is rendered incapable of reproducing his species, or of exercising the act of venery. Eunuchs were common with the ancient Romans. In Italy, this horrible mutilation still takes place to improve the voice; and, in the East, eunuchs have the *surveillance* of the seraglio.

EUNU'CHISMUS, Castration.

EUNUCHIUM MECONIS, Lettuce.

EUNUCHUS, Castratus.

EUODES, Benecolentia.

EUONYMUS, Quassia simarouba.

EUPATHI'A, *Eupho'ria*, from ευ, 'well,' and παθος, 'suffering.' A disposition for being affected by pain easily. Also, a good state of health.

EUPATOIRE D'AVICENNE, Eupatorium cannabinum—*e. Percefeuille*, Eupatorium perfoliatum.

EUPATORIUM, Agrimony, Eupatorium perfoliatum.

EUPATO'RIUM CANNAB'INUM, (called after Mithridates Eupator,) *Eupato'rium*, *E. Arab'icum*, *Hemp agrimony*, *Eupato'rium of Avicen'na*, *Herb of Saint Cunegonde*, *Trifo'lium cervi'num*, *Origanum aquat'icum*, (F.) *Eupatoire d'Avicenne*. *Family*, Synantherеæ; *Sex. Syst.* Syngenesia æqualis. The juice of this plant proves violently emetic and purgative, if taken in sufficient quantity. It has been considered diuretic, cathartic and emetic.

EUPATORIUM CONNATUM, E. perfoliatum—*e.* Guaco, Guaco—*e.* Mesues, Achillea ageratum.

EUPATORIUM PERFOLIA'TUM, *E. Connatum*, *Eupatorium*—(Ph. U. S.) (F.) *Eupatoire percefeuille*, *Boneset*, *Thor'oughwort*, *Thor'oughstem*, *Thor'oughwax*, *Vegetable antimony*, *Crosswort*, *Agueweed*, *Feverwort*, *Indian sage*, *Joe-pye*, *Teazel*, *Sweating plant*, is a plant which grows in low, wet meadows throughout the United States. It is considered to be stimulating, tonic, emetic, purgative, diuretic, and sudorific. Dose, gr. xv. of the powder, as a gentle purgative.

EUPATORIUM, PURPLE-STALKED, E. purpureum.

EUPATORIUM PURPU'REUM, *Mohawk tassel*, *Purple-stalked Eupato'rium*, *Trumpet weed*, is used in similar cases, as well as the

EUPATORIUM TEUCRIFO'LIUM, *Wild horchound*, or *Germander-leaved horehound*.

EUPEP'SIA, from ευ, 'well,' and πεπτω, 'I digest.' A good digestion. The antithesis to *dyspepsia*.

EUPHLO'GIA, from ευ, 'well,' and φλεγω, 'I burn.' Mild inflammation. Variola, (q. v.)

EU'PHONY, *Eupho'nia*, from ευ, 'well,' and φωνη, 'voice.' An agreeable or regular voice.

EUPHORBE CYPRÈS, E. cyparissias—*e. des Marais*, E. palustris—*e. Vomitive*, E. ipecacuanha.

EUPHOR'BIA CAPITA'TA, *Caa cica*. *Ord.* Euphorbiaceæ. A Brazilian plant, which is strongly astringent, and not poisonous. It is considered to be one of the best remedies for the bites of serpents. It is, also, called *Colubri'na Lusitan'ica*.

EUPHORBIA COROLLA'TA, or *Large flowering spurge*, *Milkweed*, *Snakes' milk*, *Ipecacuanha*, *Hippo*, *Picac*, *Ipecac*, *Milk purslain*, *Purge root*, *Emetic root*, *Bowman's root*, *Apple root*, *Indian Physic*, has similar properties to the last. The dose of the root is the same.

EUPHORBIA CYPARIS'SIAS, *Es'ula minor*, *Tithym'alus Cyparis'sia*. The *Cypress spurge*, (F.) *Euphorbe cyprès*. This, like most of the spurges, is very acrimonious. Amongst the rustics, it was formerly called *poor man's rhubarb*, and was, consequently, a laxative. It is not used.

EUPHORBIA HYPERICIFO'LIA. A native of the United States. It is astringent and tonic. Used in infusion—f. ℥ss to Oj of boiling water. Dose, a tablespoonful.

EUPHORBIA IPECACUAN'HA, *Ipecacuanha*

spurge, (F.) *Euphorbe vomitive*. This species of spurge is common in the southern and middle parts of the United States. The root is a powerful emetic, in the dose of from five to fifteen grains: twenty grains act as a cathartic likewise. In large doses, it acts as a narcotico-acrid.

EUPHORBIA LATH'YRIS. The systematic name of the plant which affords the *lesser catapu'tia seeds*, *Catapu'tia minor*, *Caper spurge*, *Lath'yris*, *Gar'den spurge*, *Caper plant*, *Moleplant*, *Tithym'alus latifo'lius*. The seeds possess cathartic properties, and an expressed oil of the seeds—*Oleum Euphorbiæ Lathyr'idis*—has been given as a cathartic in the dose of six to twelve drops.

EUPHORBIA OFFICINA'RUM. The systematic name of the plant which affords the *Euphorbium*, *Euphorbiæ gummi-resi'na*, in greatest abundance. The euphorbium is an inodorous gum-resin, in yellow tears, which have the appearance of being worm-eaten. It enters into the composition of some plasters, and has been used as an errhine.

EUPHORBIA PALUS'TRIS. *The greater spurge*. *Es'ula major*, *Tithym'alus*, *Marsh spurge*, (F.) *Euphorbe des marais*. The juice is given, in Russia, as a common purge. It is used, too, as an irritant in tinea, warts, &c.

EUPHORBIA PALUSTRIS and E. VILLOSA, or E PILO'SA, have been brought forward as preventives of hydrophobia—the bitten part being washed with a decoction, and, at the same time, the decoction being taken internally.

EUPHORBIA PARA'LIAS, *Tithym'alus paralias*, *Sea spurge*. This is violently cathartic and irritating, and is seldom used.

EUPHORBIA PILOSA, see Euphorbia palustris—e. Villosa, see Euphorbia palustris.

☞ All the spurges are vesicant and rubefacient, when applied externally.

EUPHORIA, Eupathia.

EUPHRAGIA, Euphrasia officinalis.

EUPHRA'SIA OFFICINA'LIS, *Ocula'ria*, *Euphra'gia*, *Ophthal'mica*, *Eyebright*, (F.) *Eufraise*, *Casse-Lunette*. It has been recommended in diseases of the eye, but is unworthy of notice.

EUPLAS'TIC, *Euplast'icus*: from εὖ, 'well,' and πλάσσω, 'I form.' Having the capacity of becoming organizable in a high degree,—as in false membranes resulting from acute inflammation in a healthy person.

EUPNŒ'A, from εὖ, 'well,' and πνέω, 'I respire.' Freedom or facility of respiration.

EURHYTH'MIA, from εὖ, 'well,' and ῥυθμὸς, 'rhythm.' Regularity of the pulse.

EURIBALI, Juribali.

EUROS, εὖρως, 'mould, putrefaction,' *Mucor*, *Caries*. (q. v.) Corruption of the humours.

EURYCHORIA, Sinus.

EURYCLES, Engastrimythos.

EURYCLITUS, Engastrimythos.

EURYSMUS, Dilatation.

EUSAR'COS, from εὖ, 'well,' and σαρξ, 'flesh.' One who is fleshy, robust.

EUSEMI'A, from εὖ, 'well,' and σημεῖον, 'a sign.' A collection of good signs.

EUSTA'CHIAN TUBE, *Tuba Eustachia'na*, *Mea'tus cæcus*, *Tuba Aristotel'ica*, *Ductus auris palati'nus*, *Iter a Pala'to ad Aurem*, (F.) *Trompe* ou *Conduit d'Eustache*, *Conduit guttural de l'oreille*—(Ch.) This tube was so called from its discoverer, Eustachius. It is partly bony and partly cartilaginous; extending from the cavity of the tympanum to the upper part of the pharynx. Its length is about two inches; the bony portion, which belongs to the temporal bone, is about 3-4ths of an inch long. It is lined, internally, by a prolongation of the lining membrane of the pharynx. Its nerves are furnished by the palatine branches of the ganglion of Meckel, and its vessels proceed from those of the pharynx and velum pendulum. The use of the tube seems to be, to permit the renewal of air in the cavity of the tympanum.

EUSTA'CHIAN VALVE, *Valve of Eustachius*, *Valvule d'Eustachi* ou *d'Eustache*. A membranous, semilunar fold, which corresponds to the opening of the vena cava inferior into the right auricle of the heart.

EUSTHENI'A, *Vigor*, *Exuberan'tia*, from εὖ, 'well,' and σθένος, 'strength.' Flourishing, exuberant health.—Hippocrates.

EUTAX'IA, from εὖ, 'well,' and τάσσω, 'I arrange,' *Euthe'sia*. A well ordered constitution, in which every part has its proper relation.

EUTHANA'SIA, from εὖ, 'well,' and θάνατος, 'death.' An easy death.

EUTHESIA, Eutaxia.

EUTHYENTERON, Rectum.

EUTHYM'IA, *An'imi tranquil'litas*, from εὖ, 'well,' and θυμὸς, 'mind.' Tranquillity of mind. A good state of the mental faculties.

EUTROPH'IA, from εὖ, 'well,' and τροφὴ, 'nourishment.' A good state of nutrition.

EUTROPHIC, *Eutroph'icum*, same etymon. A term introduced into medical terminology by the author, for an agent whose action is exerted on the system of nutrition, without necessarily occasioning manifest increase of any of the secretions.

The chief eutrophics are,—*mercurials*, the *preparations of iodine*, *bromine*, *cod liver oil*, the *preparations of gold and silver*, *sulphur*, *sugar*, and *sarsaparilla*.

EUZOODYNAMIA, Sanitas.

EVAC'UANTS, *Evacuan'tia*, from *e*, and *vacuare*, 'to empty.' (F.) *Evacuatifs*. Medicines are so called which occasion a discharge by some emunctory; such as purgatives, emetics, &c.

EVACUATIFS, Evacuants.

EVACUATIO, Excretion.

EVACUA'TION. Same etymon. The discharge of any matter whatever by the natural passages or by an artificial opening.

EVANOUISSEMENT. Syncope.

EVANROOT. Geum Virginianum.

EVAPORA'TION, *Evapora'tio*, *Vapora'tio*, *Exhala'tio*, from *e*, and *vaporare*, 'to emit a vapour.' Transformation of a liquid into vapour, in order to obtain the fixed matters contained in it dry and separate from the liquid. When the vapour is received in a proper vessel and condensed, the process is called Distillation, (which see.) Evaporation produces cold, and this is one of the processes by which the body is cooled, through the evaporation of the perspiratory fluid.

EVAUX, MINERAL WATERS OF. Evaux is situate in Auvergne, in France. The waters are hydrosulphurous, and thermal.

EVENTRA'TION, *Eventra'tio*, *Hypogastrorix'is*, from *e*, 'out of,' and *venter*, 'the belly.' A tumour, formed by a general relaxation of

the parietes of the abdomen, and containing a great part of the abdominal viscera. Also, *ventral hernia*, or that which occurs in any other way than through the natural openings of the abdominal parietes. Lastly, any very extensive wound of the abdominal parietes, with issue of the greater part of the intestines.

EVEN'TUS, from *e*, 'out of,' and *venire*, 'to come;' *Apobainon*, *Apobesom'enon*, *Ecbesom'enon*, *Termina'tio morbi*. The *event* or issue of a disease, either favourable or unfavourable.

EVERRIC'ULUM, *Speci'lum*. A sort of sound or scoop, used for extracting sand or fragments of stone or clots of blood from the bladder, after or during the operation of lithotomy.

EVERSIO PALPEBRÆ, Ectropion.

EVIGILATION, see Sleep.

EVIL, THE, Scrofula—e. King's, Scrofula.

EVIRATIO, Castration.

EVIRATUS, Castratus, Eunuch.

EVOLUTIO SPONTANEA, Evolution, spontaneous.

EVOLU'TION, SPONTA'NEOUS, *Ver'sio* seu *Evolu'tio spontanea*, from *e*, and *volvere*, 'to roll.' A term, applied, by Dr. Denman, to what he considered to be a spontaneous turning of the fœtus in utero, in an arm presentation, in consequence of powerful uterine contractions forcing out the breech and feet, whilst the arm recedes. It is now usually considered to be a doubling of the fœtus, so that the arm changes its position but little, whilst the breech is forcibly expelled before the upper extremity;—the case becoming similar to a breech presentation.

EVOMITIO, Vomiting.

EVUI'SION, *Avulsion*, *Evul'sio*, from *evellere*, (*e*, and *vellere*,) 'to pluck out,' *Apotil'mos*, *Ectil'mos*, *Tilmos*. The action of plucking out; forcible extraction. (F.) *Arrachement*. This word is oftener used by the French than by the English surgeons, for the act of extracting certain parts, the presence of which is injurious,—as the teeth, &c.

EXACERBATIO, Paroxysm.

EXACERBA'TION, *Exacerba'tio*, *Exaspera'tio*, *Excrescen'tia*, from *exacerbare*, (*ex*, and *acerbus*,) 'to provoke,' (F.) *Redoublement*. An increase in the symptoms of a disorder. Often used synonymously with paroxysm. (q. v.)

EXACUM SPICATUM, Coutoubea alba.

EXÆMATOSIS, Hæmatosis.

EXÆMOS, Exanguious.

EXÆ'RESIS, from ἐξ, 'out of,' and αἱρεω, 'I take away.' A surgical operation, which consists in drawing, extracting, or removing, from the human body, every thing that is useless, noxious, or extraneous. It is a generic term, which includes extraction, evulsion, evacuation, excision, ablation, amputation, &c.

EXÆRESIS, Extraction.

EXAL'MA, from ἐξ, 'out of,' and ἁλλομαι, 'I leap.' *Exalsis*. Hippocrates calls thus the displacement of the vertebræ.

EXALTA'TION OF THE VITAL FORCES, *Exalta'tio vi'rium*. This expression has been used, by modern pathologists, to designate a morbid increase in the action of organs, and partly that which occurs in an inflamed organ. Some use *exaltation of the vital forces*, and *inflammation* synonymously.

EXAMBLOMA, Abortion.

EXAMBLOSIS, Abortion.

EXANASTOMOSIS, Anastomosis.

EXANASTROPHE, Convalescence.

EXANGI'A, from ἐξαγγιζω, (ἐξ, and αγγος, 'a vessel,') 'I evacuate from a vessel.' *Exangei'a*. An enlargement or rupture of a blood-vessel, without external opening. A genus, in the order *Dysthetica*, class *Hæmatica* of Good. It comprises *aneurism* and *varix*.

EXANGIA ANEURISMA, Aneurism.

EXAN'GUIOUS, *Exæ'mos*, *Exsan'guis*, from *ex*, 'out of,' and *sanguis*, 'blood.' One who seems bloodless; as a female, who has suffered largely from uterine hemorrhage.

EXANIA, Proctocele.

EXANIMA'TION, *Exanima'tio*, from *ex*, 'out of,' and *anima*, 'the spirit.' This word has two acceptations. Sometimes, it means real death, corresponding with the Greek θανατος, *mors*. At others, it signifies apparent death, corresponding with the Greek αψυχια, εκψυχια, ελυσις, *An'imi deli'quium*.

EXAN'THEM, *Exanthe'ma*, *Anthe'ma erup'tio*, *Epanthe'ma*, *Efflorescen'tia*, *Exanthis'ma*, *Efflora'tio*, from ἐξανθεω, (ἐξ, and ανθεω,) 'I flourish.' A rash. (F.) *Élévure*. Under this term is comprehended, by some, every kind of eruption, of which the skin is the seat. Others comprehend by it those eruptions that are accompanied by fever, *Febres exanthemat'icæ*: including, under the head of the *major exanthemata*, those which attack a person but once in his life, and which are communicated by specific contagion; and, under the *minor exanthemata*, those which are not marked by these characteristics. Small-pox, measles, cow-pox, &c., belong to the major:—Chicken-pox, herpes, lichen, &c., to the minor. The general acceptation of Exanthem is, however, a more or less vivid, circumscribed, or diffuse redness of the skin, which diminishes or disappears transiently under the pressure of the finger.

EXANTHEM, CARBUNCULAR, Anthracia—e. Ichorous, Emphlysis—e. Pustulous, Empyesis—e. Rash, Enanthesis.

EXANTHEMA, Eminence—e. Internum, Eisanthema—e. Miliaria, fever—e. Pestis, Plague—e. Serosum, Pemphigus—e. Strophulus, Strophulus—e. Urticatum, Urticaria—e. Vaccina, Vaccina—e. Varicella, Varicella.

EXANTHEMATICA. Same etymon. *Eruptive fevers*. Cutaneous eruptions, essentially accompanied with fever;—the third order in the class *Hæmatica* of Good.

EXANTHÈME INTESTINALE, see Typhus.

EXANTHESIS, see Efflorescence—e. Arthrosia, Dengue—e. Roseola, Roseola—e. Rubeola, Rubeola.

EXANTHISMA, Exanthem.

EXANTHROPIA, Misanthropia.

EXARAG'MA, from ἐξαρασσω, 'I tear away,' 'I break.' Collision, violent fracture or friction.

EXARCHIA'TER. Chief of the archiatri, or chief of physicians, a title, like that of *Comes Archiatro'rum*, given to the chief physician of an emperor or king. Archiater appears to have meant, at times, the same thing.

EXAR'MA, from ἐξαιρομαι, (ἐξ, and αιρομαι,) 'I am raised.' A prominent tumour.

EXAR'SIO. A burning heat.

EXARTEMA, Amuletum.

EXARTERI'TIS, *Exarterii'tis*, from ἐξ, 'out of,' and *arteria*, 'an artery.' Inflammation of the outer coat of an artery.

EXARTHREMA, Luxation, Sprain.

EXARTHROMA, Luxation.

EXARTHROSIS, Luxatio, Sprain.

EXARTICULATIO, Luxatio.

EXARYSIS, Exhaustion.

EXASPIRATIO, Exacerbation.

EXCÆCARIA AGALLOCHA, Agallochum.

EXCALEFACTIO, *Échauffement.*

EXCARNA'TION, *Exarna'tio*, from *ex*, and *caro*, 'flesh.' A mode of making anatomical preparations, which consists in separating injected vessels from the parts in which they are situate. This is done by means of corrosion by an acid or by putrefaction.

EXCASTRATIO, Castration, Eunuch.

EXCATHISMA, Bath, half, Semicupium.

EXCEREBRATIO, Eccephalosis.

EXCEREBRATUS, Delirious.

EXCIDENTIA, Ecptoma.

EXCIPIENT, *Excip'iens*, from *excipere*, (*ex*, and *capere*,) 'to receive.' (F.) *Intermède.* A substance, which, in a medicinal prescription, gives form and consistence to it, and serves as a *vehicle* or *medium* for the exhibition of the other ingredients.

EXCIPULA, Cup.

EXCISIO, *Entaille.*

EXCIS'ION, *Excis'io*, from *excidere*, (*ex*, and *cædere*,) 'to cut off;' *Ectomē.* A surgical operation, by which parts of a small size are removed with a cutting instrument.

EXCITABIL'ITY, *Excitabil'itas.* Irritability (q. v.) The faculty, possessed by living beings, of being sensible to the action of excitants. The doctrine of excitability forms an important part of the Brunonian system.

EXCITANT, Stimulant.

EXCITA'TION or EXCITEMENT. Same etymon; from *excitare*, (*ex*, and *citare*,) 'to excite,' *Excita'tio.* Act of exciting or state of an organ or organs excited. Excitement is, sometimes, used synonymously with augmented arterial action. The effect of the exciting powers acting on the excitability, according to Brown, constitutes *excitement.* Cullen used the term to express the restoration of the energy and action of the brain, which had been interrupted by sleep or some debilitating cause,—a state opposite to that of *collapse.* Not unfrequently it is employed in the sense of excessive action—*Super-excita'tio.* (F.) *Sur excitation.*

EXCITO-MOTORY. An epithet applied by Dr. Marshall Hall to a division of the nervous system—comprising the gray matter of the spinal marrow, with the afferent and efferent nerves connected with it;—all of which are concerned in *reflex* actions. See Nerves.

EXCORIATIO. Ecdora.

EXCORIA'TION, *Excoria'tio*, *Excoriatu'ra*, *Am'ychē*, from *ex*, and *corium*, 'skin.' (F.) *Écorchure.* A slight wound, which removes only the skin.

EXCORIATURA, Excoriation.

EXCREA'TION, *Excreā'tio*, *Rasca'tio*, from *ex*, and *screare*, 'to spit.' Act of spitting. (F.) *Crachement.* See Exspuitio.

EX'CREMENT, *Excremen'tum*, *Excre'tum*, *Excre'tio*, *Perito'ma*, *Diachore'ma*, *Aph'odos*, *Apocho'reon*, *Apoc'risis*, *Ardas*, *Ar'dalos*, from *excernere*, (*ex*, and *cernere*,) 'to separate,' 'cleanse.' Every thing, which is evacuated from the body of an animal as superfluous, by the natural emunctories: such as the fæcal matters, the urine, perspiration, nasal mucus, &c. Generally, however, the term is restricted to the fæcal evacuations;—*Purgamenta*, *Hedra*, *Sedes*, *Fæces* (q. v.,) *Stercus*, *Cacce*, *Spat'ilē*, (especially when liquid,) *Deject'io alvi'na*, *O'nera alvi*, *Sordes ventris*, *Caturrhex'is*, *Copros*, *Scor.*

EXCREMENTIT"IAL, *Excrementit"ious*, *Excrementitius.* (F.) *Excrémenteux*, *Excrémentitiel.* That which is similar to excrement, and forms part of it. *Excrementitial humors* or *parts* are those destined to be evacuated, as incapable of administering to the nutrition of the body.

EXCREMENTO-RECREMENTIT"IAL, *Excremento-recrementitious.* Animal fluids, intended to be partly absorbed and partly rejected.

EXCRES'CENCE, *Excrescen'tia*, *Ephy'ma*, *Phymato'sis*, *Hypersarco'sis*, *Sarcophyia*, *Caro excrescens*, from *excrescere*, (*ex*, and *crescere*,) 'to grow outwards.' (F.) *Excroissance.* A tumor, which forms at the surface of organs, and especially on the skin, mucous membranes, or ulcerated surfaces. Excrescences differ in size, shape, cause, &c., and each requires its own treatment. *Warts*, *condylomata*, *polypi*, *hemorrhoids*, belong to this head.

EXCRESCENTIA, Exacerbation, Protuberance, Tumour—e. Carnosa, Sarcoma—e. Gingivæ, Epulis.

EXCRETIO, Eccrisis, Excrement—e. Alvina, Defecation—e. Fæcum alvinarum, Defecation—e. Urinæ involuntaria, Enuresis.

EXCRE'TION, *Excre'tio*, *Eracua'tio*, *Eject'io*, *Expul'sio*, *Eges'tio*, *Diachore'sis*, from *excernere*, (*ex*, and *cernere*,) 'to separate.' The separation or throwing off of those matters from the body of an animal, which are supposed to be useless, as the urine, perspiration, and fæces.

EX'CRETORY, *Excreto'rius*; same etymon. An *Excretory vessel* or *duct* is one, which transmits the fluid secreted by a gland, either externally or into the reservoirs in which it has to be deposited. The existence of an excretory duct is a distinctive character of the glands properly so called.

Excretory Organ means any one charged with the office of excreting: thus, the skin is said to be an excretory organ, because through it the perspiration takes place.

EXCRETUM, Excrement.

EXCROISSANCE. Excrescence.

EXCU'TIA VENTRIC'ULI, *Stomach Brush.* An instrument, composed of iron or brass wire, at one of the extremities of which is a pencil of bristles. Some ancient authors proposed this to extract foreign bodies from the œsophagus, as well as to cleanse the stomach of viscid and tenacious matters adhering to it.

EXECHEBRONCHUS, Bronchocele.

EXECHEGLUTI, Exischioi.

EXELCOSIS, see Ulceration.

EXELCYS'MOS, from ἐξ, 'from,' and ἑλκυω, 'I draw.' Extraction. Also the act of breaking out into ulcers.

EXELCYSMUS, Extraction.

EXENTERIS'MUS, *Exenteri'sis*, from ἐξ, 'out of,' and ἐντερον, 'an intestine.' The operation of disembowelling or eviscerating.

EXERAM'A, from ἐξειραω, 'I throw out.' Any thing cast out. Vomiting; or the matter vomited.—Hippocrates.

EX'ERCISE, *Exercita'tio, Exercit''ium, Asce'sis, Gymna'sion*, from *exercere*, 'to work.' Every motion of the body, arising from the contraction of muscles subjected to the will. Also, the action of any organ whatever. Exercise may be *active* or *passive*. The passive are referred to, under the head of Gestation. The chief active exercises are:—walking, running, dancing, hunting, fencing, playing at ball, cricket, racket, quoits, swimming, declamation, singing, &c. Exercise is an important prophylactic, particularly for those disposed to be plethoric. It improves the digestion; augments the secretions; and, when used in moderation, gives strength to the body; but when carried to excess, produces debility and disease.

EXERRHO'SIS, from ἐξ, 'out of,' and ῥεω, 'I flow.' The discharge, which takes place by insensible perspiration.

EXFŒTATION, see Pregnancy.

EXFOLIA'TION, *Exfolia'tio, Desquama'tio, Eclep'isis*, from *ex*, and *folium*, 'a leaf.' By this is meant the separation of the dead portions of a bone, tendon, aponeurosis, or cartilage, under the form of lamellæ or small scales. Exfoliation is accomplished by the instinctive action of the parts, and its object is to detach the dead portions from those subjacent, which are still alive. For this purpose the latter throw out fleshy granulations, and a more or less abundant suppuration occurs, which tends to separate the exfoliated part,—now become an extraneous body. The ancients distinguished exfoliation into *sensible* and *insensible*, according as the dead portions of bone were detached in fragments of greater or less size, or in very thin pieces, and in an almost insensible manner. When the dead part embraces all or almost all the substance of a bone, it takes the name Sequestrum.

EXFO'LIATIVE, *Exfoliati'vus, Desquamato'rius*. That which takes away by leaves or scales. The term has been applied to certain medicines which were regarded as proper to hasten exfoliation, such as alcohol, oil of turpentine, tincture of myrrh, &c.

Exfo'liative Trepan, *Eclepisitrep'anum*, is an ancient raspatory, or instrument for scraping exfoliating portions of bone.

EXHALAISON, Exhalation.

EXHA'LANT, *Exha'lent, Exha'lans*, from *exhalare*, (*ex*, and *halare*, 'to breathe,') 'to exhale,' 'throw out.'

Exhalant Vessels are very minute, and arise from the arterial capillary system. They are situate in every tissue of the body, and on the surfaces of the mucous and serous membranes and skin; on which each pours its particular fluid. Bichat distinguished three sets. 1. The *external*, terminating on the mucous and external dermoid system, where they pour the matter of perspiration. 2. The *internal*, comprising those of the cellular and medullary tissues, and of synovial surfaces: and, 3. The *nutritive exhalants*, which vary in each organ where they are found; and preside over the phenomena of composition and increase of every part of the body. The exhalants are the antagonists of the absorbents. They are imaginary vessels, inasmuch as they cannot be detected.

EXHALATIO, Evaporation.

EXHALA'TION, *Exhalatio;* same etymon. *Anathymi'asis*, (F.) *Exhalaison*. A function, by virtue of which certain fluids, obtained from the blood, are spread, in the form of dew, in the areolæ of the different textures, or at the surface of membranes; either for the sake of being thrown out of the body, or to serve for certain purposes. The sweat is a *liquid, excrementitious exhalation;* the serous fluid of the pleura a *liquid, recrementitious exhalation*.

Exhalation is, also, applied to that which exhales from any body whatever, organic or inorganic, dead or living.

Exhalation, Pulmonary, see Perspiration.

EXHAUS'TION, *Exar'ysis, Vires exhaust'æ*, from *exhaurire*, (*ex*, and *haurire*,) 'to draw out,' (F.) *Épuisement*. Loss of strength, occasioned by excessive evacuations, great fatigue or privation of food, or by disease.

EXHUMA'TION, *Exhuma'tio, Effos'sio*, from *ex*, and *humus*, 'the ground.' The disinterment of a corpse. The circumstances which render this necessary are:—1. Judicial investigations relative to the body of the person inhumed. 2. The removal of a body from one cemetery to another: and, 3. The evacuation of cemeteries or sepulchral vaults. The operation is attended with much unpleasant smell and annoyance, and requires the use of disinfecting agents, of which the most powerful is chlorinated lime. See Disinfection. The putrid effluvia from animal substances are not, however, found to excite endemic-disease.

EXIS'CHIOS, from ἐξ, 'out of,' and ἰσχιον, 'the ischium.' A luxation of the os femoris. All those with large nates, and prominent hips, were called *Exischioi* and *Exechegluti*.

EXITU'RA. According to some, any abscess which discharges. Paracelsus calls thus every kind of putrid excrement.

EXOÄRTERITIS, see Arteritis.

EXOCARDIAC, see Endocardiac.

EXOCARDIAL, see Endocardiac.

EXO'CHAS, *Exo'chē*, from ἐξω, 'without,' and ἐχω, 'I have.' A soft tumour without the anus: outward piles.

EXOCHE, Eminence.

EXOCOLITIS, see Colitis.

EXOCYS'TE, *Exocys'tis*, from ἐξ, 'out of,' and κυστις, 'the bladder.' A prolapsus of the bladder into the urethra. Also called *Prolap'sus vesi'cæ, Ædopto'sis vesi'cæ*. (F.) *Renversement de la vessie*.

Exocys'te Noelia'na; when the inner membrane of the bladder is protruded. So called from M. Noel, who first accurately described it.

Exocys'te Solingenia'na; when the neck of the bladder is protruded. Called after M. Solingen, who first accurately described it.

EXŒDESIS, Swelling.

EXOGOGE, Extraction.

EXOINE or *EXOENE*, from *ex*, 'out of,' and *idoneus*, 'fit,' or rather from *exonera're*, 'to exonerate.' In France, a certificate of excuse, exemption, or dispensation, given to those summoned to appear before a court of justice, and who are unable to do so.

EXOLCE, Extraction.

EXOMETRA, Prolapsus uteri.

EXOMOIOSIS, Assimilation.

EXOMPHALOCELE, Exomphalus.

EXOM'PHALUS, *Exumbilica'tio. Exom'phaloce'lē, Om'phaloce'lē, Hernia umbilica'lis*, (F.)

Hernie ombilicale, H. du nombril, Umbilical Hernia, from ἐξ, 'out of,' and ὀμφαλὸς, 'the navel.' Hernia occurring at the navel. This affection happens more frequently in infants, and takes place by the umbilical ring itself. In adults, it occurs more commonly in females than in males; and, when it does so, the sac passes in the vicinity of the umbilicus. The organs, found in this kind of hernia, are particularly,—the epiploon, the jejunum, the arch of the colon, and sometimes the stomach. The tumour is, in general, round, and presents all the characters of hernia. It is, commonly, readily reducible, and not subject to strangulation. It must be reduced, and retained by an elastic bandage, made in the form of a girdle, and furnished with a pad at its middle part. When strangulated, the stricture may be divided upwards and towards the left side.

Exomphalus Aquosus, Hæmomphalum.

EXONCO'MA, from ἐξ, and ὄγκος, 'a tumour.' A large, prominent tumour. Used, by Galen, for protuberance of the vertebræ after luxation.

EXONCOSIS LINGUÆ, Glossoncus.

EXONEIROSIS, Pollution.

EXONEURISM, Magnetism, animal.

EXOPHTHAL'MIA, *Ptosis Bulbi Oculi, Exorbitis'mus, Ophthal'mocele, Ophthalmopto'sis, Oculi totius prominen'tia*, from ἐξ, 'out of,' and ὀφθαλμὸς, 'eye.' (F.) *Procidence de l'œil.* A protrusion of the eye from its orbit, occasioned by an abscess or tumour in the cellular texture of the orbit; by exostosis of the parietes of the orbit, &c. In exophthalmia, the eye is pressed forwards; the eyelids are raised and separated, so that they can no longer cover the eye and defend it from the action of extraneous bodies: it becomes inflamed, and the sight is disturbed or destroyed. The treatment of course depends upon the cause.

EXORBITISMUS, Exophthalmia.

EXORMIA, Papula—e. Lichen, Lichen—e. Prurigo, Prurigo—e. Strophulus, Strophulus.

EXOSMO'SE, *Exosmosis, Transuda'tion*, from ἐξ, 'out of,' and ὠσμὸς, 'impulse.' The opposite to Endosmose: the act by which substances transude from within to without an animal or other membrane.

EXOSMOTIC, *Exosmot'icus*: same etymon. Belonging to Exosmose:—as an *exosmotic* current.

EXOSSATIO, Exostosis.

EXOSTEMA CARIBÆA, Cinchonæ caribææ cortex.

EXOSTOSE, Exostosis—*e. des Dents*, Exostosis dentium.

EXOSTO'SIS, *Hyperosto'sis, Emphy'ma, Exosto'sis os'tea, Exossa'tio, Ossis eminen'tia*, from ἐξ, 'out of,' and ὀστέον, 'a bone.' An osseous tumour, which forms at the surface of bones, or in their cavities. Various kinds have been enumerated. *Ivory Exosto'sis, Exostose éburnée;*—that which has the appearance and consistence of ivory. *Lam'inar Exosto'sis; E. Laminée;*—that which is formed of laminæ in superposition or of distinct filaments. The *Spongy Exosto'sis* is that, whose structure is analogous to the spongy tissue of bones. Exostoses are sometimes distinguished into the *true*, which seem to be a projection of the osseous substance, and which have the same organization and hardness as that substance; and the *false*, or osteo-sarcoma. Exostosis may depend on syphilis, scrofula, rickets, gout, &c. In such cases, it is important to get rid of the primary disease.

Those *exostoses* which occur within the bones, have, by some, been called *Enostoses.*

Exostosis, Spina ventosa.

Exostosis Dentium, (F.) *Exostose des Dents.* Exostosis of the teeth.

Exostosis Steatomatodes, Osteosteatoma.

EXOT'IC, *Exo'ticus*, from ἔξω, 'without.' That which comes from abroad. Plants or drugs which are procured from abroad, are so called. It is opposed to indigenous.

EXOTICADE'NIA, from *Exotic*, and ἀδέω, 'I dislike.' Aversion for exotic drugs.

EXOTICHÆMATOSIS, Transfusion.

EXOTICOMA'NIA. The opposite to exoticadenia. Fondness for exotic remedies.

EXPAN'SION, *Expan'sio*, from *expandere*, (*ex* and *pandere*, 'to open,') 'to spread out.' A prolongation, or spreading out, presented by certain organs. Thus, we say an *aponeurotic expansion*, &c.

EXPATRATIO, Ejaculation (of Sperm.)

EXPEC'TANT, *Expec'tans*, from *expectare*, (*ex*, and *spectare*, 'to look,') 'to wait.' That which waits:—as *Expectant Medicine,—La Médecine expectante.* See Expectation.

EXPECTA'TION, *Expecta'tio*; same etymon. The word *expectation* has been applied, in medicine, to that method, which consists in observing the progress of diseases, and removing deranging influences, without prescribing active medicines, unless such shall be imperiously required. It consists, in fact, in leaving the disease almost wholly to the efforts of nature, and has been termed the *art of curing diseases by expectation or waiting.—Ars sanan'di cum expecta'tione.*

EXPEC'TORANT, *Expec'torans, Anacathar'ticus, Ptys'magogue*, from *ex*, 'out of,' and *pectus*, 'the breast.' A medicine capable of facilitating or provoking expectoration. There is probably no such thing as a *direct* expectorant. They all act through the system, or by impressions made on parts at a distance, which, through the medium of general, continuous, or contiguous sympathy, excite the secretory vessels of the air-passages into action. The following are the chief reputed expectorants:—Ammoniacum; Asafœtida; Galbanum; Ipecacuanha; Myroxylon; Myrrha; Inhalations, (of Iodine, Stramonium, Tar, Burning Wool, Tobacco, &c.;) Scilla; Senega, and Tolutanum.

EXPECTORATIO SANGUINIS, Hæmoptysis—e. Solida, Cynanche trachealis.

EXPECTORA'TION, *Expectora'tio, Ecchei'ysis, Bex hu'mida, Anap'tysis, Anacathar'sis, Anabex'is*, same etymon. The act of expelling from the chest matters or secretions there collected or existing. It is, likewise, used for the expectorated matter.

EXPELLENS, Expulsive.

EXPE'RIENCE, *Experien'tia, Peira, Empei'ria*, from ἐξ, and πεῖρα, 'a trial.' A knowledge of things acquired by observation. In medicine, this knowledge can be obtained both by the practitioner's own experience, and by that obtained from tradition and from books. To profit by experience requires a mind capable of appreciating the proper relations between cause and effect; and hence it happens, that *false experi-*

ence, *Experien'tia fallax*, is extremely common; and that a man had better, in many instances, trust to that which he has learned from others, than to his own fallacious observation.

The union of accurate observation by the physician with that handed down by medical writers constitutes perfect experience, so far as it is attainable in any individual case.

EXPÉRIENCE, Experiment.

EXPER'IMENT, *Experimen'tum;* same etymon. (F.) *Expérience.* A trial, made on the bodies of men or animals, for the purpose of detecting the effect of a remedy, or of becoming better acquainted with their structure, functions, or peculiarities. In a more general sense, it means any trial instituted with the intent of becoming better acquainted with any thing. By experiments on living animals, we have obtained much valuable information in the various departments of medicine; but particularly in physiology and toxicology.

EXPERT, (F.) *Exper'tus*, from *ex*, and *peritus*, 'skilled.' Skilful, or of good experience. A physician, charged with the duty of making a report upon any case of legal medicine.

EXPIRA'TION, *Ec'pnoë, Ecpneumato'sis, Ecpneu'sis*, from *expirare*, (*ex*, and *spirare,*) 'to breathe out.' The act of expelling, from the chest, the air received in during respiration.

EX'PIRATORY, *Expiratio'ni inser'viens.* The expiratory muscles are all those which contribute to diminish the cavity of the chest, for the purpose of expelling the air contained in the lungs, or of producing expiration. These muscles are, chiefly, the intercostals, triangularis sterni, quadratus lumborum, serratus posticus inferior, the oblique and recti muscles of the abdomen, the sacro-lumbalis, &c.

EXPLORA'TION, *Explora'tio*, from *explorare*, 'to search into.' The act of observing and attentively examining or investigating every thing connected with a case of disease. The word is chiefly used, in this sense, by the French practitioners.

EXPLORATORIUM, Sound.

EXPRES'SION, *Expres'sio, Ecpies'mos, Ecthlipsis*, from *ex*, 'out of,' and *premere*, 'to press.' The act of compressing a substance, for the purpose of separating from it the fluids which it contains. Also, the manner in which impressions made upon us are depicted; especially in the traits of the countenance.

Expression of Sweat, (F.) *Sueur d'expression*, is a term given to the passive perspiration observable in very debilitated individuals.

EXPULSIO, Excretion—e. Fœcum, Defecation.

EXPUL'SIVE, *Expel'lens, Expulso'rius*, from *expellere*, 'to drive away.' An *expulsive bandage*, (F.) *Bandage expulsif*, is one constructed with the view of compressing a part, from which we are desirous of expelling pus, serum, &c. Certain medicines were, formerly, called *expulsives*, which were believed to have the power of driving the humours towards the skin;—as diaphoretics and sudorifics.

EXSANGUINITY, Anæmia.

EXSANGUIS, Exanguious.

EXSARCOMA, Sarcoma.

EXSECTIO VIRILIUM, Castration.

EXSECTUS, Castratus, Eunuch.

EXSICCATIO, Drying.

EXSICCATIVA, Desiccativa.

EXSOLUTIO, Eclysis.

EXSPUIT''ION, *Expuit''io, Spuit''io, Sputa'tio, Ptysma, Anachremp'sis, Apochremp'sis, Ptysis*, from *ex*, 'out of,' and *spuo*, 'I spit.' Rejection of the matters accumulated in the pharynx and larynx; spitting.

EXSTROPH'IA, *Ex'strophy*, from ἐξ, 'out of,' and στροφη, 'turning.' *Extrover'sio, Extrover'sion.* A term, used by M. Chaussier for certain displacements of organs, and especially of the urinary bladder.

Exstrophia or Exstrophy of the Bladder, (F.) *Renversement de la Vessie*, is a faulty conformation; in which the organ opens above the pubes; so that in the hypogastric region there is a red, mucous surface, formed by the inner coat of the bladder; and on which two prominences are distinguishable, corresponding to the openings of the ureters.

EXSUCCATIO, Ecchymoma.

EXSUC'TIO, *Suctio, Ecmyze'sis*, from *ex*, 'out of,' and *succus*, 'a juice.' The action of sucking.

EXSUDATIO, Ephidrosis.

EXSUFFLATIO, Ecphysesis.

EXTASIS, Ecstasis.

EXTEMPORA'NEOUS, *Extempora'neus, Extempora'lis*, from *ex*, and *tempore*, 'out of time.' Those prescriptions are called 'extemporaneous,' or magistral (q. v.,) which are made on the spot, and composed according to the prescription of the physician.

EXTENSEUR COMMUN DES DOIGTS, Extensor digitorum communis—*e. Commun des orteils*, Extensor communis digitorum pedis—*e. Court du pouce*, Extensor pollicis brevis—*e. Long du pouce*, Extensor longus pollicis—*e. Petit des orteils*, Extensor brevis digitorum pedis—*e. Propre du petit doigt*, Extensor proprius minimi digiti—*e. Propre de l'Index*, Extensor proprius indicis.

EXTENSIBIL'ITY, *Extensibil'itas.* A property, possessed by certain bodies, of being capable of extension or elongation.

EXTENSIO, Tetanus.

EXTEN'SION, *Exten'sio, Tasis, Ec'tasis, Catat'asis, Anat'asis*, from *extendere*, (*ex*, and *tendere*,) 'to stretch out.' An operation, in surgery, by which we pull strongly, either with the hands alone, or by straps, a fractured or luxated limb, to restore it to its natural position. It is the opposite of *Counter-extension.*

EXTEN'SOR. Same etymon. (F.) *Extenseur.* A muscle, whose office is to extend certain parts.

Extensor Brevis Digito'rum Pedis, *Ped'icus, Calcaneo-phalanginien commun*, of Dumas; *Muscle pédieux, Muscle petit extenseur des orteils. Calcaneo-sus-phalangettien commun*—(Ch.,) *Carré du pied; Short Extensor of the Toes.* A muscle, situate on the dorsal region of the foot. It arises from the external surface of the calcaneum, and at the anterior edge of a ligament, which unites that bone to the astragalus. Anteriorly, each of its divisions terminates by a small tendon, which is fixed successively, at the superior part of the posterior extremity of the first phalanx of the great toe, and to the second and last phalanges of the next three toes. Its use is to extend the first four toes, and to direct them a little outwards.

Extensor Carpi Radialis Brevis, see Radi-

alis—e. Carpi radialis longus, see Radialis—e. Carpi ulnaris, see Cubital muscles.

Extensor Digito'rum Commu'nis, *Extensor digitorum communis manûs cum extenso'rē proprio auricula'ris, Digitorum Tensor; Épicondylo-sus-phalangettien commun*—(Ch.,)—*Common Extensor of the Fingers.* (F.) *Extenseur commun des Doigts.* A long, flattened muscle; simple above, and divided into four portions inferiorly. It is situate at the posterior part of the forearm; arises from the external tuberosity of the humerus; from the aponeurosis of the forearm, and from the aponeurotic septa situate between it and the neighbouring muscles, and is inserted at the posterior surface of the second and third phalanges of the last four fingers. The muscle extends the phalanges of the last four fingers upon each other, and upon the metacarpal bone. It can, also, extend the hand on the forearm.

Extensor Commu'nis Digitorum Pedis, *E. Longus Digitorum Pedis, E. Digitorum longus, Péronéo-tibi-sus-phalangettien commun, Cnemodactyla'us, Péronéo-sus-phalangettien commun.* (F.) *Extenseur commun des Orteils.* This muscle, also, is situate at the anterior part of the leg. It is long, thin, flattened, simple, and fleshy above, and divided into four tendons below. It arises from the outer tuberosity of the tibia and the anterior surface of the fibula, and is inserted into the superior part of the posterior extremity of the second and third phalanges of the last four toes. It extends the three phalanges of these toes.

Extensor Digitorum Longus, E. communis digitorum pedis—e. Longus digitorum pedis, E. communis digitorum pedis—e. Proprius hallucis, E. proprius pollicis pedis—e. Indicis, E. proprius indicis—e. Internodii ossis pollicis, E. longus pollicis—e. Primi internodii, Abductor longus pollicis.

Extensor Proprius Min'imi Dig''iti, *Épicondylo-sus-phalangettien du petit doigt*,—(Ch.,) (F.) *Extenseur propre du petit doigt.* Situate on the inside of the *Extensor communis digitorum.* It arises from the external condyle of the os humeri and the aponeurotic septa seated between it, the extensor communis digitorum, and the extensor carpi ulnaris; and is inserted into the last two phalanges of the little finger. Its use is to extend the little finger, and even the hand upon the forearm.

Extensor Pol'licis Brevis. *Extensor minor pol'licis manûs, E. primi interno'dii, E. pol'licis primus, E. secun'di interno'dii* (Douglas,) *E. secun'di interno'dii ossis pol'licis; Cubito-sus-phalangien du pouce*,—(Ch.,) (F.) *Court extenseur du pouce.* Seated at the posterior and inferior part of the forearm. It is thin, long, and broader at its middle than at the extremities. It arises from the posterior surface of the ulna and the interosseous ligament, and is inserted behind the superior extremity of the first phalanx of the thumb. It extends the thumb, and aids in supination.

Extensor Pol'licis Longus; *Extensor major pol'licis manûs, Extensor secundi interno'dii, Extensor pol'licis secun'dus, Extensor ter'tii interno'dii* (Douglas,) *Extensor interno'dii ossis pol'licis, Cubito-sus-phalangettien du pouce*,—(Ch.,) (F.) *Muscle long extenseur du pouce.* This muscle is long, flat, and fusiform; and is seated at the posterior part of the forearm. It arises from the posterior surface of the ulna and the interosseous ligament, and is inserted at the posterior part of the superior extremity of the first phalanx of the thumb. It extends the last phalanx of the thumb upon the first.

Extensor Pro'prius In'dicis; *E. proprius primi dig'iti manûs, E. In'dicis, Indica'tor, Extensor secun'di interno'dii in'dicis pro'prius, Cubito-sus-phalangettien de l'Index.*—(Ch.,) (F.) *Extenseur propre de l'Index.* This muscle is long and thin; broader in the middle than at the extremities; and is situate at the posterior part of the forearm. It arises from the posterior surface of the ulna, and is inserted at the posterior part of the upper extremity of the second and third phalanx of the index finger. It extends the three phalanges of the index finger; and has, besides, the same uses as the other extremities of the fingers.

Extensor Pro'prius Pol'licis Pedis; *E. proprius Hal'lucis, E. longus* (Douglas,) *E. Pollicis longus, Péronéo-sus-phalangien du pouce, Péronéo-sus-phalangettien du pouce*,—(Ch.) This muscle is situate at the anterior part of the leg. It is fleshy, broad, flat above; small and tendinous below. It arises from the anterior part of the middle third of the fibula, and is inserted into the posterior part of the superior extremity of the last phalanx of the great toe. It extends the last phalanx of the great toe upon the first, and the first upon the first metacarpal bone.

Extensor Primi Internodii, E. pollicis brevis—e. Secundi internodii, E. pollicis brevis, Extensor longus pollicis—e. Secundi internodii indicis proprius, E. proprius indicis—e. Tertii internodii, E. longus pollicis—e. Tertii internodii indicis, Prior annularis—e. Tertii internodii minimi digiti, Abductor minimi digiti—e. Ossis metacarpi pollicis manûs, Abductor longus pollicis—e. Pollicis longus, E. proprius pollicis pedis—e. Pollicis secundus, E. Longus pollicis—e. Minor pollicis manûs, E. pollicis brevis—e. Primus pollicis, Abductor longus pollicis.

Extensor Tarsi Magnus; *E. Tarsi sura'lis.* A name given, by some anatomists, to the gastrocnemius and soleus combined.

Extensor Tarsi Minor, Plantar muscle.

EXTENUATIO, Emaciation.

EXTER'NAL DISEASES, *Extrin'sic Diseases, Morbi extrin'seci, Surgical Diseases,* (F.) *Maladies externes.* Those diseases which occupy the surface of the body, and which form the object of surgical pathology, requiring, generally, external means or surgical operations.

EXTERNUS AURIS, Laxator tympani—e. Mallei, Laxator tympani.

EXTESTICULATUS, Castratus, Eunuch.

EXTINCTIO VOCIS, (F.) *Extinction de voix.* The French use this term for cases in which the voice is not wholly suppressed, but produces only feeble sounds. *Incomplete aphonia.*

EXTINCTION OF MERCURY, *Extinc'tio Mercu'rii* vel *Hydrar'gyri.* Trituration of mercury with lard or other substance, until the metallic globules disappear. The mercury is then so divided, that it forms a black powder, generally considered to be a protoxide of mercury, but, perhaps, erroneously.

EXTIRPATION, *Extirpa'tio, Abla'tio, Aphæ'-*

resis, from *extirpare*, (*ex*, and *stirps*,) 'to root out.' The complete removal or destruction of any part, either by cutting instruments or the action of caustics. Thus, we speak of the extirpation of a cancer, polypus, encysted tumour, &c.

EXTOMIUS, Eunuch.

EXTOZOA, Ectozoa.

EXTOZOAIRES, Extozoaria.

EXTOZOARIA, Ectozoa.

EXTRA-PELVIO-PUBI-TROCHANTÉRIEN, Obturator externus.

EXTRACT, Extractum—e. of Aconite, Extractum aconiti—e. of Aconite, alcoholic, Extractum aconiti alcoholicum—e. of Aloes, purified, Extractum aloes purificatum—e. of Bark, Extractum cinchonæ—e. of Bark, resinous, Extractum cinchonæ resinosum—e. of Belladonna, Extractum belladonnæ—e. of Belladonna, alcoholic, Extractum belladonnæ alcoholicum—e. of Bittersweet, Extractum dulcamaræ—e. of Broom tops, Extractum cacuminum genistæ—e. of Butternut, Extractum juglandis—e. of Cascarilla, resinous, Extractum cascarillæ resinosum—e. of Chamomile, E. anthemidis—e. of Cinchona, Extractum cinchonæ—e. of Colocynth, Extractum colocynthidis—e. of Colocynth, compound, Extractum colocynthidis compositum—e. of Dandelion, Extractum taraxaci—e. of Elaterium, Extractum elaterii—e. of Gentian, Extractum gentianæ—e. of Hemlock, Extractum cicutæ—e. of Hellebore, black, Extractum hellebori—e. of Hemlock, alcoholic, Extractum conii alcoholicum—e. of Henbane, Extractum hyoscyami—e. of Henbane, alcoholic, Extractum hyoscyami alcoholicum—e. of Hops, Extractum humuli—e. of Jalap, Extractum jalapæ—e. of Lettuce, Extractum lactucæ—e. of Liquorice, Extractum glycyrrhizæ—e. of Logwood, Extractum hæmatoxyli—e. of Mayapple, Extractum podophylli—e. of Meat, saponaceous, Osmazome—e. of Oak bark, Extractum corticis quercûs—e. of White poppy, Extractum papaveris—e. of Quassia, Extractum quassiæ—e. of Quinia, Extractum quiniæ—e. of Rhatany, Extractum krameriæ—e. of Rhubarb, Extractum rhei—e. of Rue, Extractum rutæ—e. of Sarsaparilla, Extractum sarsaparillæ—e. of Savine, Extractum foliorum sabinæ—e. of Stramonium, Extractum stramonii—e. of Valerian, Extractum valerianæ—e. of Wormwood, Extractum cacuminum absinthii.

EXTRACTIF, Extractive.

EXTRACTION, *Extrac'tio*, *Exæ'resis*, *Exoga'gē*, *Exolcē*, *Exeleys'mus*, *Enchylo'sis*, from *extrahere*, (*ex*, and *trahere*,) 'to draw out.' The act of removing an extraneous substance from any part of the body. Thus, a splinter is said to be extracted. It is, also, applied to the removal of certain parts. The cataract is said to be *extracted*; a tooth is *extracted*, when carious, &c.

EXTRACTIVE, (F.) *Extractif*. Same etymon. A peculiar, immediate principle, which has been admitted in extracts. Thus, *bitter extractive* is the immediate principle of bitter vegetables, &c.

EXTRAC'TUM, *Extract*, *Opos*, *Chylis'ma*, *Ecchylo'ma*, (F.) *Extrait*. An extract is prepared by evaporating vegetable solutions, till a tenacious mass is obtained. When prepared from an infusion or decoction, it is called a *watery*; from a tincture, a *spirituous extract*. Both kinds contain all the principles of the vegetable, that are soluble in the menstrua with which they are prepared; but the volatile parts are dissipated, and some of the fixed parts are decomposed; the proper extractive is oxygenized, and the virtues of the vegetable substance consequently altered or destroyed. Extracts are *hard* or *soft*; the consistence of the soft being such as to retain the pilular form without the addition of a powder. A patent was taken out some years ago by a Mr. Barry, of London, for preparing them in vacuo; and, as the temperature is much lower than in the ordinary method, the virtues of the plant are less altered, and the extracts are generally green. Extracts are also prepared by displacement or percolation, (q. v.) They have, likewise, received different names according to their predominant principle. The *gummy* or *mucous*, or *mucilaginous*, are those which are mainly composed of gum or mucilage. Gum tragacanth may be considered a pure gummy extract. *Gelatinous extracts* are those composed especially of gelatin; *resinous extracts*, those of a resinous character; *extracto-resinous*, those composed of extractive or colouring matter and resin; *gum-resinous*, those containing gum and resin; and *sapona'ceous* or *sapona'ceous saline*, those containing a notable quantity of saline substances and a resinous matter, so combined with mucus and other soluble substances, that they cannot be separated.

EXTRACTUM ABSIN'THII CACU'MINUM, *Extract of wormwood*. (*A decoction defecated and evaporated*.) The flavour is dissipated along with the essential oil. It is a bitter tonic. Dose, gr. x. to ℈j in pill.

EXTRACTUM ACONI'TI, *Extract of aconite*, *Succus spissa'tus aconiti napelli*, (*from the inspissated juice without defecation*.) It is esteemed to be narcotic and diuretic; and has been given in the cases referred to under aconitum. Dose, gr. j, gradually increasing it.

EXTRACTUM ACONI'TI ALCOHOL'ICUM, *Alcoholic Extract of Aconite*, (*Aconit.* in pulv. crass. ℔j; *Alcohol. dilut.* Oiv. Moisten the aconite with half a pint of diluted alcohol: let it stand for 24 hours: transfer it to a displacement apparatus, and gradually add the remainder of the diluted alcohol. When the last portion of this has penetrated the aconite, pour in from time to time water sufficient to keep the powder covered. Stop the filtration when the liquid which passes begins to produce a precipitate, as it falls, in that which has already passed. Distil off the alcohol, and evaporate to a proper consistence. Ph. U. S.)

EXTRACTUM AL'OES PURIFICA'TUM, *Pu'rified extract of aloes*. (*The gummy part extracted by boiling water, defecated and inspissated*.) Dose, gr. v. to gr. xv.

EXTRACTUM ANTHEM'IDIS, *E. anthemidis no'bilis*, *E. chamæme'li*, *E. florum chamæme'li*, *Extract of Cham'omile*. The volatile oil is dissipated in this preparation. It is a pure, grateful bitter, and is tonic and stomachic. Dose, gr. x. to gr. xx in pills.

EXTRACTUM ASPARAGI, see Asparagus.

EXTRACTUM BELLADON'NÆ, *Succus spissa'tus at'ropæ belladon'næ*, *Extract of Belladon'na*, (*an expressed juice, inspissated*.) Properties, same as those of the plant. Dose, gr. ¼, gradually increased. It dilates the pupil when applied to the eye.

Extractum Belladonnæ Alcoholicum, *Alcoholic extract of Belladonna.* (Prepared like the Extractum aconiti alcoholicum. Ph. U. S.)

Extractum Cascaril'læ Resino'sum, *Res'inous extract of cascaril'la,* (*Cort. cascarillæ* in pulv. crass. ℔j, *Sp. vini rect.* ℔iv. Digest for four days; then decant and strain; boil the residuum in ten pints of water to two; filter and evaporate the decoction, and distil the tincture in a retort, till both are thickened; then mix and evaporate to a pilular consistence.) Dose, gr. x to gr. xx in pills.

Extractum Catharticum, E. Colocynthidis compositum—e. Catechu, Catechu—e. Chammæmeli, E. Anthemidis—e. Cicutæ, E. Conii.

Extractum Cathol'icum, (F.) *Extrait Catholique.* This epithet is given to pills composed of aloes, black hellebore, and colocynth, resin of jalap, and scammony. See, also, Extractum colocynthidis compositum.

Extractum Cincho'næ, *Extract of Cincho'na, E. Cor'ticis Peruvia'ni, E. Cincho'næ Mollē, E. of Bark. (A decoction evaporated.)* The active principles are similar to those of the bark in substance; but it is not so effectual—owing to the chymical change induced in the drug, during the boiling. When reduced, by drying, to a state fit for being powdered, it is called the *Hard Extract of Bark, Extrac'tum Cor'ticis Peruvia'ni durum, E. Cincho'næ durum.* Dose, gr. x to ʒss.

Extractum Cinchonæ Resino'sum, *E. Cinchonæ lancifo'liæ, E. Cinchonæ Rubræ resino'sum, Res'inous Extract of Bark, E. Cincho'næ Resinæ.* The aqueo-spirituous extract contains both the extractive and resin of the bark. Dose, gr. x. to xxx.

Extractum Cinchonæ of the Pharmacopœia of the United States, (1842,) is directed to be prepared as follows:—*Peruvian Bark,* in coarse powder, ℔j; *Alcohol,* Oiv; *Water,* a sufficient quantity. Macerate the Peruvian bark with the alcohol for four days; then filter by a displacement apparatus, and when the liquid ceases to pass, pour gradually on the bark water sufficient to keep its surface covered. When the filtered tincture measures four pints, set it aside, and proceed with the filtration until six pints of infusion are obtained. Distil off the alcohol from the tincture and evaporate the infusion till the liquids are respectively brought to the consistence of thin honey; then mix and evaporate to form an extract.—Ph. U. S.)

Extractum Colocyn'thidis, *Extract of Col'ocynth.* A cathartic, in the dose of from gr. v. to ʒss.

Extractum Colocyn'thidis Compos'itum, *Extractum Cathar'ticum, E. Cathol'icum, E. Querceta'ni. Compound Extract of Colocynth* (*Colocynth. pulp.* concis. ℥vj. *Aloes* pulv. ℥xij; *Scammon.* pulv. ℥iv; *Cardamom.* pulv. ℥j.; *Alcohol. dilut.* cong. Macerate the pulp in the spirit at a gentle heat, for four days; strain: add the aloes and scammony; then distil off the spirit and mix in the cardamom seeds. Ph. U. S.) It is a powerful cathartic, and is used in obstinate visceral obstructions, &c. Dose, gr. vj to ʒss.

Extractum Coni'i, *E. Cicu'tæ, Succus cicutæ spissa'tus, Extract of Hemlock, Succus spissatus conii macula'ti. (Expressed juice, inspissated, without defecation.)* Employed in the same cases as the conium. Dose, gr. iij to ℈j.

Extractum Conii Alcohol'icum, *Alcoholic Extract of Hemlock.* (Prepared like the Extractum aconiti alcoholicum.—Ph. U. S.)

Extractum Convolvuli Jalapæ, E. jalapæ—e. Corticis Peruviani, E. Cinchonæ.

Extractum Dulcama'ræ, *Extract of Bittersweet.* (Prepared by displacement from bittersweet in coarse powder.—Ph. U. S.)

Extractum Elate'rii, *Elate'rium, Extract of Elaterium. (The fecula of the expressed juice.)* It is violently cathartic, hydragogue, and sometimes emetic. Dose, gr. ss. every hour till it operates.

Extractum Genis'tæ Cacu'minum, *Extract of Broom Tops.* Diuretic and stomachic. Dose, ʒss to ʒj.

Extractum Gentia'næ, *Ext. Gentia'næ lu'teæ, Ext. Radi'cis Gen'tianæ, Extract of Gen'tian, (The evaporated decoction.* Prepared also by displacement.—Ph. U. S.) Properties like the Gentian. Dose, gr. x. to ʒss.

Extractum Glycyrrhi'zæ; *Extract of Liquorice. (The evaporated decoction.)* It is demulcent, taken *ad libitum.*

Refined Liquorice, which is sold in the form of cylinders, is made by gently evaporating a solution of the pure extract of liquorice with half its weight of gum Arabic, rolling the mass and cutting it into lengths, and then polishing, by rolling them together in a box.

Extractum Hæmatox'yli, *E. Hæmatox'yli Campechia'ni, E. Scobis Hæmatoxyli, Extract of Logwood. (The evaporated decoction.)* It is astringent. Dose, gr. x. to ʒj.

Extractum Radi'cis Helleb'ori Nigri, *Ext. of Black Hell'ebore root, E. Hellebori nigri. (The evaporated decoction.)* In large doses, this is cathartic; in smaller, diuretic, resolvent (?) and emmenagogue (?). Dose, as a cathartic, gr. x to ℈j; as an emmenagogue, &c. gr. iij to gr. x.

Extractum Hellebori, of the Pharmacopœia of the United States (1842) is prepared from Black Hellebore, in coarse powder, like the Extractum aconiti alcoholicum.

Extractum Hu'muli, *Extract of hops, (the evaporated decoction.)* It is tonic, anodyne (?), diuretic (?). Dose, gr. v to ʒj.

Extractum Hyoscy'ami, *Extract of Henbane, Succus spissa'tus Hyoscyami nigri, Succ. Spiss. Hyoscyami. (The expressed juice, inspissated without defecation.)* Its virtues are narcotic. Dose, gr. v. to ℈ss.

Extractum Hyoscyami Alcohol'icum, *Alcoholic Extract of Henbane.* (Prepared from leaves of Hyoscyamus, in coarse powder, like the Extractum aconiti alcoholicum —Ph. U. S.)

Extractum Jala'pæ, *E. Convol'vuli Jalapæ, E. Jala'pii, Extract of Jalap, E. Jala'pi. (A spirituous tincture distilled; and an aqueous decoction evaporated; the residua being mixed together:* kept both soft and hard.) It is cathartic and hydragogue. Dose, gr. x to ℈j.

Extractum Jalapæ Resino'sum, *Res'inous Extract of Jalap.* This is cathartic.

Extractum Jalapæ of the Ph. U. S. is prepared like the Extractum cinchonæ Ph. U. S.

Extractum Juglan'dis, *Extract of Butternut.* (Prepared by displacement from Butternut, in coarse powder.—Ph. U. S.)

Extractum Krame'riæ, *Extract of Rhatany*

(Prepared by displacement from Rhatany, in coarse powder.—Ph. U. S.)

Extractum Lactu'cæ, *Extract of Lettuce, Succus spissa'tus Lactucæ sativæ.* (*Leaves of fresh lettuce* ℔j; beat them in a stone mortar, sprinkling them with water; then express the juice and evaporate, without allowing it to subside, until it acquires a proper degree of consistence.) It is said to be narcotic and diaphoretic. Dose, gr. iij. to gr. x.

An extract is, sometimes, made from the juice of the *wild lettuce, Lactuca viro'sa*, which is regarded as diuretic.

Extractum Nucis Vomicæ Spirituosum, see Strychnos nux vomica.

Extractum Opii, *E. Opii aquo'sum, E. Theba'icum, Extract of Opium, E. Opii gummo'sum, Lau'danum opia'tum* seu *simplex, Opium cola'tum* seu *depura'tum.* (*A watery solution defecated and evaporated.*) Dose, gr. ss. to gr. v.

Extractum Papav'eris, *E. Papaveris somniferi, E. Papaveris albi, Extract of white poppy.* (*The decoction evaporated.*) It possesses nearly the same virtues as opium, but is weaker. Dose gr. ij to ℈j.

Extractum Panchymago'gum. A drastic medicine, composed of *colocynth*, bruised *with its seeds; senna* bruised; *black hellebore root, Agaric, Scammony* in powder, *Extract of Aloes* and *Powder of Diarrhodon.*

Extractum Podophyl'li, *Extract of May-apple.* (Prepared from podophyllum, in coarse powder, in the same manner as the Extract of cinchonæ —Ph. U. S.)

Extractum Purgans, see Hedera helix—e. Quercetani, E. Colocynthidis compositum.

Extractum Quassiæ, *Extract of Quassia* (Prepared by displacement from Quassia rasped —Ph. U. S.)

Extractum Cor'ticis Quercûs, *Extract of oak bark.* (*The decoction, evaporated.*) It is astringent and tonic.

Extractum Qui'niæ, *Quiniæ sulphas impu'rus.* This is made by evaporating the liquor poured off the crystals of sulphate of quinia to the consistence of a pilular mass. Twenty-four grains will generally arrest an intermittent.

Extractum Rhei, *Extract of Rhubarb.* Uses, like those of the powdered root. Dose gr. x. to ʒss.

Extractum Ru'dii, *Extract of Rudius*, (F.) *Extrait de Rudius.* Pills made of *colocynth, agaric, scammony, roots of black hellebore and jalap, socotrine aloes, cinnamon, mace, cloves, and alcohol.*

Extractum Rutæ Graveolen'tis, *E. folio'rum Rutæ, Extract of Rue, Extractum Rutæ.* (*A decoction evaporated.*) Tonic, stomachic. The volatile oil being dissipated in the boiling, this is not a good preparation. Dose, gr. x to ℈j.

Extractum Folio'rum Sabi'næ, *Extract of Savine.* (*A decoction evaporated.*) Tonic. The same remarks may be made on this preparation as on the last. Dose, gr. x to ʒss.

Extractum Sarsaparil'læ, *Extract of Sarsaparil'la.* (*A strained decoction, evaporated.*) Virtues the same as those of the powdered root. Dose, gr. x to ʒj.

Extractum Sarsaparillæ of the United States Pharmacopœia, (1842,) is prepared from Sarsaparilla, in coarse powder, like the Extractum aconiti alcoholicum.

Extractum Saturni, Goulard's, Liquor plumbi subacetatis—e. Scobis hæmatoxyli, E. hæmatoxyli.

Extractum Stramo'nii, *Extract of Stramo'nium.* (*Seeds of Stramonium,* ℔j, *boiling water,* one gallon. *Macerate for four hours in a vessel slightly covered, near the fire; then take the seeds out; bruise them in a stone mortar and return them again to the fluid when they are bruised. Boil the liquor down to 4 pints, and strain while it is hot. Finally, evaporate to a proper thickness.* Ph. L.) In the Pharm. U. S., Extractum Stramonii is the expressed juice inspissated. The *Extractum Stramonii Seminis* is made as follows:—*Stramonium seed,* ground into powder, ℔j. *Diluted Alcohol,* q. s. Having rubbed the powder with diluted alcohol, Oss, introduce the mixture into an apparatus for displacement, and pour upon it, gradually, diluted alcohol, till the liquid passes colourless. Distil off the alcohol from the filtered liquor, and evaporate the residue to the proper consistence. Used as a narcotic in asthma and other spasmodic affections. Dose, gr. ij to gr. x.

Extractum Tarax'aci, *Ext. Herbæ et Radi'cis Tarax'aci, Extract of Dandeli'on.* (*A strained decoction evaporated.*) It has been considered deobstruent, laxative, and diuretic. Dose, gr. x. to ʒj.

Extractum Thebaicum, E. Opii.

Extractum Valeria'næ, *Extract of Vale'rian.* (*An expressed decoction evaporated.*) The virtues of the valerian being dependent upon its essential oil, this is an objectionable preparation. Dose, gr. x. to ʒj.

There are some other extracts in the American and other Pharmacopœias, but they are prepared in the ordinary mode, and possess merely the virtues of the plants. They are, besides, generally of an unimportant character.

EXTRAIT, Extract—*e. Alcoholique de noix romique*, see Strychnos nux vomica—*e. des Fruits*, Rob.

EXTRA'NEOUS BODY, from *extra*, 'without.' *Corpus extra'neum, C. exter'num, C. alie'num*, (F.) *Corps étranger.* Any solid, liquid, or gaseous substance, inanimate or animate, proceeding from without or formed in the body; and which constitutes no part of the body, but occupies, in the substance of the textures or some of the cavities, a place foreign to it.

Extraneous bodies may be grouped as in the following table:

Inanimate Bodies.	1. *Proceeding from without.*	These are numberless. They may be introduced by the natural ways or by accidental openings.
	2. *Formed in the body.*	Calculi. Effusion of blood, pus, urine, or air, into parts not naturally containing them.
Animated Bodies.	1. *Participating in the life of the individual.*	Cysts, &c. of every kind developed in the different organs.
	2. *Having a separate existence.*	Parasitic animals, as worms, &c.

EXTRAVASA'TION, *Extravasa'tio*, from *extra*, 'out of,' and *vasa*, 'vessels.' Escape of fluids from the vessels containing them, and infiltration or effusion of those fluids into the surrounding textures.

EXTREMITY, *Extrem'itas;* from *extremus*,

'the outermost;' the end or termination of a thing. The limbs have been so called,—as the *upper and lower extremities*. It has been, also, used to express the last moments of life; as when we say, a patient is in 'extremity,' (F.) *le malade est à l'extrémité, à toute extrémité*. See Membrum.

EXTRIN'SIC, *Extrin'secus*. That which comes from without. This term has been used for muscles, which surround certain organs and attach them to the neighbouring parts; in order to distinguish them from other muscles, which enter into the intimate composition of these organs, and which have been named *intrinsic*. Thus, there are extrinsic and intrinsic muscles of the tongue, ear, &c.

EXTROVERSIO, Exstrophia.

EXTUBERANTIA, Protuberance.

EXTUBERATIO, Protuberance.

EXTUMEFACTIO, Swelling.

EXTUS'SIO, from *ex*, and *tussis*, 'a cough.' 'I cough with expectoration.'

EXU'BER, from *ex*, 'out of,' 'devoid of,' and *u'bera*, 'the breasts;' *Apogalac'tos*. 'A child which has been weaned.'

EXULCERATIO. Ecthlimma, Ulceration.

EXUMBILICATIO, Exomphalos.

EXUSTIO, Cauterization.

EYE, Sax, eag, Teuton. Auge, *O'culus, Ops, Omma, Ophthal'mos, Illos, Op'tilos*, (Doric,) (F.) *Œil*. The eye is the immediate organ of vision. It is seated in the orbit, whilst its dependencies, called by Haller *Tutam'ina Oc'uli*, occupy the circumference of the cavity, and are composed of the eyebrows, the eyelids, cilia, glands of Meibomius, &c. The *Ball, Globe*, or *Bulb* of the *Eye*, is covered anteriorly by the tunica conjunctiva; is moved by six muscles, four *straight* and two *oblique*, and is constituted of membranes, as the *sclerotic, cornea, choroid, tunica Jacobi, retina, iris, hyaloid*, and in the fœtus, the *membrana pupillaris;*—and of fluids, called *Humours* or *Media*,—the *aqueous, crystalline*, and *vitreous*. The vessels of the eye proceed from the ophthalmic artery. The nerves, except the optic, are chiefly furnished from the ophthalmic ganglion. The following are the dimensions, &c. of the organ, on the authorities of Petit, Young, Gordon, and Brewster:

Length of the antero-posterior diameter of the eye,		0.91
Vertical chord of the cornea,		0.45
Versed sine of the cornea,		0.11
Horizontal chord of the cornea,		0.47
Size of pupil seen through the cornea,		0.27 to 0.13
Size of pupil diminished by magnifying power of cornea to,		0.25 to 0.12
Radius of the anterior surface of the crystalline,		0.30
Radius of posterior surface,		0.22
Principal focal distance of lens,		1.73
Distance of the centre of the optic nerve from the *foramen centrale*. of Sömmering.		0.11
Distance of the iris from the cornea,		0.10
Distance of the iris from the anterior surface of the crystalline,		0.02
Field of vision above a horizontal line,	50°	120°
Field of vision below a horizontal line,	70°	
Field of vision in a horizontal plane,		150°
Diameter of the crystalline in a woman above fifty years of age,		0.378
Diameter of the cornea,		0.409
Thickness of the crystalline,		0.172
Thickness of the cornea,		0.042

EYEBALM, Hydrastis Canadensis.

EYEBRIGHT', Euphrasia officinalis, Lobelia.

Eye Glass, Scaphium oculare—e. Cat's, Amaurotic, see Amaurotic—e. Gum of the, *Chassie*—e. Lashes, Cilia—e. Purulent, Ophthalmia, purulent, of infants—e. Salve, Singleton's, Unguentum Hydrargyri nitrico-oxydi; Eye-salve, Smellome's, see Cupri subacetas—e. Sight of the, Pupil.

Eyestone. The shelly opercula of small turbinideæ. Used at Guernsey to get things out of the eyes. Being put into the inner corner of the eye, under the eyelid, it will work its way out at the outward corner, and bring out any strange substance with it.—Gray.

Eye of Typhon, Scilla—e. Water, common, Liquor zinci sulphatis cum camphorâ—e. Water, blue, Liquor cupri ammoniati—e. Watery, Epiphora.

F.

FABA ÆGYPTIACA, Nymphæa nelumbo—f. Cathartica, Jatropha curcas—f. Crassa, Sedum telephium—f. Febrifuga, Ignatia amara—f. Græca, Diospyros lotus—f. Indica, Ignatia amara—f. Pechurim, Tetranthera pechurim—f. Purgatrix, Ricinus communis—f. Sancti Ignatii, Ignatia amara—f. Suilla, Hyoscyamus.

FABAGELLE, Zygophyllum fagabo.

FABARIA CRASSULA, Sedum telephium.

FABRICA ANDROGYNA, Hermaphrodeity.

FACE, *Fa'cies, Vultus, Proso'pon*, (F.) *Face*. The face is the anterior part of the head. It is formed of 13 bones, viz. the *two superior maxillary*, the *two malar*, the *two ossa nasi*, the *two ossa unguis*, the *vomer*, the *two ossa spongiosa inferiora*, the *two palate bones*, and the *inferior maxillary*, without including the frontal portion of the os frontis, and the 32 teeth, which may be considered to form part of it. Its numerous muscles are chiefly destined for the organs of sight, hearing, taste, and smell. Its arteries proceed from the external carotid; its veins end in the jugular, and its nerves draw their origin immediately from the brain.

The face experiences alterations in disease, which it is important to attend to. It is yellow in jaundice, pale and puffy in dropsy; and its expression is very different according to the seat of irritation, so that, in infants, by an attention to *medical physiognomy*, we can often detect the seat of disease.

Hippocrates has well depicted the change which it experiences in one exhausted by long sickness, by great evacuations, excessive hunger, watchfulness, &c., threatening dissolution. Hence this state has been called *Facies Hippocrat'ica*, or *Facies Cadaver'ica, F. Tortua'lis*. In this, the nose is pinched; the eyes are sunk; the temples hollow; the ears cold, and retracted; the skin of the forehead tense, and dry; the complexion livid; the lips pendent, relaxed, and cold, &c.

The term *Face*, (F.) is likewise given to one

of the aspects of an organ; thus, we say, the *superior* face *of the stomach.*

FACE, INJECTÉE, see *Vultueux—f. Vultueuse*, see *Vultueux.*

FACETTE'. (F.) Diminutive of *face*. A small face: a small, circumscribed portion of the surface of a bone, as *the articular facette of a bone.*

FACHUNGEN, MINERAL WATERS OF. These springs are at no great distance from those of Geilenau (q. v.) They contain free carbonic acid; carbonate, sulphate, and phosphate of soda; chloride of sodium, carbonate of lime, magnesia and iron.

FACIES, Face—f. Cadaverica, see Face—f. Concava pedis, Sole—f. Hippocratica, see Face—f. Inferior pedis, Sole—f. Tortualis, see Face.

FA'CIAL, *Facia'lis*. Belonging to, or connected with, the face.

FACIAL ARTERY, *Labial artery, Angular* or *external maxillary artery, A. palato-labial*—(Ch.); is a branch of the external carotid, which rises beneath the digastricus, and is distributed to almost every part of the face. It furnishes the *inferior palatal, submental, superior labial, inferior labial*, and *dorsalis nasi.*

FACIAL NERVE, *Portio dura of the 7th pair, Ramus durior sep'timæ conjugatio'nis, Sympathet'icus minor, Respiratory nerve of the face, Par sep'timum* sive *facia'lē, Commu'nicans faciei nervus.* This nerve arises from the inferior and lateral part of the tuber annulare, in the groove which separates it from the medulla oblongata, external to the corpora olivaria, and by the side of the auditory nerve. It issues from the cranium by the *meatus auditorius internus;* enters the aqueduct of Fallopius; receives a branch of the Vidian nerve; sends off filaments to the internal muscles of the malleus and stapes; furnishes that called *Chorda Tympani;* makes its exit at the foramen stylo-mastoideum, and divides into two branches—the *temporo-facial*, and *cervico-facial.*

FACIAL VEIN, *Pal'ato-labial*—(Ch..) arises between the skin and frontalis muscle, and bears the name *V. Fronta'lis;* (F.) *Veine frontale* ou *V. préparate.* It then descends, vertically, towards the greater angle of the eye, where it is called *Angula'ris;* and afterwards descends, obliquely, on the face, to open into the internal jugular, after having received branches, which correspond with those of the facial artery. It is only in the latter part of its course that it is called *Facial Vein.* Chaussier calls the external carotid artery, *Facial Artery.*

FA'CIENT, *faciens*, 'making;' from *facio*, 'I make.' A suffix, as in *Calefacient, Rubefacient*, &c., 'warm making,' 'red making.'

FACTICE. Factitious.

FACTITIOUS, *Factitius*, (F.) *Factice*, from *facere*, 'to make.' Artificial. That which is made by art, in opposition to what is natural or found already existing in nature. Thus, we say *factitious mineral waters*, for artificial mineral waters.

FAC'ULTY, *Facultas, Power, Virtue.* The power of executing any function or act. The collection of the *intellectual faculties* constitutes the *understanding.* We say, also, *vital faculties* for *vital properties*, &c.

FÆCAL RETENTION, Constipation.

FÆCES, Plural of *Fæx; Chersæ*, 'the dregs of any thing.' *Fec'ulence*, (q. v.), (F.) *Féces.* The alvine evacuations are so called; (F.) *Garderobes:* the excrements; *Fæcal matter.* See Excrement.

FÆCOSITAS, Feculence.

FÆCULA, Fecula.

FÆCULENTIA, Feculence.

FÆCUNDATIO, Fecundatio.

FÆCUNDITAS, Fecundity.

FÆX, Feculence.

FAGA'RA OCTAN'DRA, *Elaph'rium tomento'sum, Am'yris tomento'sum*, from *fagus*, 'the beech,' which it resembles. The systematic name of the plant, which affords *Tacamahaca*, a resinous substance, that exudes from the tree. *Tacamahaca*, which has a fragrant, delightful smell, was formerly in high estimation, as an ingredient in warm, stimulating plasters, and was given internally like the balsams generally. The *East India Tacamahac, Bal'samum Vir'idē, O'leum Ma'riæ, Bal'samum Cal'aba, Balsamum mariæ, Baume vert*, is yielded by the *Calophyl'lum inophyl'lum.*

The name *Tacamahac* is also given to a resin furnished by *Pop'ulus balsamif'era*, which grows in the northern parts of America and Siberia.

FAGARA PIPERI'TA, (F.) *Fagarier poivré;* a native of Japan, possesses the qualities of pepper, and is used, as such by the Japanese. It is, also, employed as a rubefacient cataplasm.

FAGARIER POIVRÉ, Fagara octandra.

FAGOPYRUM, Polygonum fagopyrum.

FAGUS CASTA'NEA. The systematic name of the *Chestnut Tree; Casta'nea, C. vulgaris, Casta'nea vesca, Lo'pima, Mota, Glans Jovis* THEOPHRASTI, *Ju'piter's Acorn, Sardin'ian Acorn;* the Common Chestnut, (F.) *Chataignier commun. Family*, Amentaceæ. *Sex. Syst.* Monœcia Polyandria. The Chestnut, *Casta'nea nux*, (F.) *Chataigne*, is farinaceous and nutritious, but not easy of digestion.

FAGUS CASTANEA PU'MILA. The *Chin'capin* or *Chinquapin, Castanea Pumila*, (F.) *Chataignier nain.* The nut of this American tree is eaten like the chestnut. The bark, *Castanea*, (*Ph. U. S.*) has been used in intermittents.

FAGUS SYLVAT'ICA. The systematic name of the *Beech, Fagus, Oxya, Balan'da, Valanida;* the *Beech Tree*, (F.) *Hêtre.* The *Beech-nut* or *Beech-mast*, (F.) *Faine*, affords an oil, by expression, which is of a palatable character, and is eaten in some places instead of butter. It has been supposed to be a good vermifuge, but it is no better than any mild oil.

FAIBLESSE, Debility.

FAIM, Hunger—*f. Canine*, Boulimia—*f. de Loup*, Fames lupina.

FAINE, see Fagus sylvatica.

FAINTING-FIT, Syncope.

FAIRBURN, MINERAL WATERS OF. The mineral waters at this place, which is in the county of Ross, in Scotland, are sulphureous, and frequented.

FAISCEAU. Fasciculus—*f. Petit*, Fasciculus.

FALCADINA, Scherlievo.

FAL'CIFORM, *Falcifor'mis, Drepanoïdes*, from *falx*, 'a scythe,' and *forma*, 'shape.' Having the shape of a scythe. This term has been applied to different parts. See Falx and Sinus.

FALCIFORM EXPANSION OF THE FASCIA LATA is the scythe-shaped reflection of the fascia lata, which forms, outwards and upwards, the opening for the vena saphæna, and is attached to

the crural arch by its superior extremity, forming the anterior paries of the canal of the same name.

FALLOPIAN TUBE, see Tube, Fallopian.

FALLTRANCK or FALTRANCK, (G.) literally, *a drink against falls*. A vulnerary. It is a mixture of several aromatic and slightly astringent plants, which grow chiefly in the Swiss Alps, and hence the name—*Vulnéraire Suisse*—given to such dried plants, cut into fragments. They are called, also, *Espèces Vulnéraires* and *Thé Suisse*.

The infusion of the *Falltranck* is aromatic, and slightly agreeable, but of no use in the cases for which it has been particularly recommended.

FALMOUTH, CLIMATE OF. The climate of Falmouth in Cornwall, England, resembles that of Penzance (q. v.) and like it, is in many respects, a favourable retreat for the phthisical during the winter months.

FALSA VIA, False passage.

FALSE, *Falsus*, *Nothus*, *Pseudo*, *Spurious*, *Bastard*, (F.) *Faux*. This epithet has been frequently added to peripneumony, pleurisy, &c., to designate a disease similar to these, but less severe. Most commonly, a severe catarrh or pleurodynia has received the name. See Peripneumonia notha.

False Passage, *Falsa Via*, (F.) *Fausse Route*. An accidental passage, made in surgical operations, and particularly in introducing the catheter. The catheter is sometimes passed through into the rectum.

False Waters, *Hydrallan'tē*, *False Delivery*. Water, which sometimes collects between the amnion and chorion, and is commonly discharged before the birth of the child.

We say, also, *False Ribs*, *False Rhubarb*, &c.

FALSETTO VOICE, see Voice.

FALSIFICATION, *Adultera'tio*, from *falsus*, 'false,' and *facere*, 'to make.' A fraudulent imitation or alteration of an aliment or medicine by different admixtures. It is synonymous with *adulteration* and *sophistication*.

TABLE OF COMMON FALSIFICATIONS OF SOME OF THE MOST USEFUL DRUGS, &c.

Medicines.	Adulterations.	Mode of Detection.
Acaciæ Gummi.	*Gum Senegal.*	G. S. is clammy and tenacious. The A. G. is perfectly soluble in water, and its solution limpid.
Acetum Destillatum.	*Sulphuric Acid.*	Acetate of barytes causes a white precipitate.
	Nitric Acid.	By evaporating it, the residuum deflagrates, when thrown on burning charcoal.
	Copper	Supersaturate with ammonia—a blue colour is produced.
	Lead.	Sulphuretted hydrogen causes a dark precipitate.
Acidum Muriaticum.	*Sulphuric Acid.*	Deposites by evaporation the salts it may contain; precipitates with solution of hydrochlorate of baryta if it contains sulphuric acid.
—— Nitricum.	*Muriatic and Sulphuric Acid.*	The presence of chlorine is indicated by a precipitate with nitrate of silver: that of sulphuric acid by the same result with hydrochlorate of baryta.
Acidum Sulphuricum.	*Muriatic and Nitric Acids.*	The presence of muriatic and nitric acid is indicated by the smell, when the acid tested is strongly heated.
—— Citricum.	*Tartaric and Oxalic Acids*	Their presence is indicated by forming a granular sediment in a concentrated solution of a neutral salt of potassa.
Æther Rectificatus.	*Too dilute.*	Its S. G. detects this.
	Sulphuric Acid.	By acetate of barytes. Precipitate white.
	Alcohol	With phosphorus a milky instead of limpid solution is formed.
Aqua Ammoniæ.	*Carbonic Acid.*	A precipitation occurs on adding a solution of muriate of lime.
Ammoniæ Carbonas.		It should be capable of complete volatilization by heat.
Ammoniacum		The *Guttæ Ammoniaci* are white, clear, and dry. The *lump Ammoniacum*, *lapis Ammoniaci*, is often adulterated with common resin.
Antimonii Sulphuretum.		It ought to be entirely volatilized by a red heat.
	Lead.	Imparts a foliated texture, and is not vaporizable.
	Arsenic	A smell of garlic is emitted when thrown on live coals, &c.
	Manganese and Iron.	Are not vaporizable.
Argenti Nitras.	*Copper*	The solution assumes a blue colour, when supersaturated with ammonia. It may be suspected when the salt deliquesces.
	Nitrate of Potassa.	The adulteration with nitrate of potassa is easily recognised by the fracture of a stick of it, which is radiated when pure, and granular if adulterated; or by precipitating a solution of the salts with a sufficient quantity of muriatic acid, and evaporating the clear liquor: the nitrate of potassa or other salts will remain.
Arsenicum Album.	*Chalk, Sulphate of Lime, Sulphate of Barytes.*	Not volatilizable by heat.
Balsamum Peruvianum.	*A mixture of Resin and some Volatile Oil, with Benzoin.*	Not easily detected.
Calumba.		The true is distinguishable from the false Calumba by adding to an infusion of the root, a few drops of solution of sulph. iron, which gives to the infusion of the false Calumba, a greenish black colour; but produces no change in the other.

Medicines.	Adulterations.	Mode of Detection.
Capsicum. *Cayenne Pepper.*	*Muriate of Soda.*	This disposes it to deliquesce.
	Red Lead.	Digest in acetic acid, and add a solution of sulphuret of ammonia—a dark-coloured precipitate will be produced.
Castoreum. *Castor.*	*A mixture of dried blood, gum, ammoniac, and a little real castor, stuffed into the scrotum of a goat.*	Smell and taste will generally detect the fraud.
Cera Flava. *Yellow Wax.*	*Earth or Peasmeal*.....	May be suspected when the cake is brittle and colour grayish.
	Resin.....	Put it in cold alcohol, which will dissolve the resin, without acting on the wax.
	Tallow.....	Is known by the greater softness and unctuosity, and its smell when melted. Turmeric is generally added in this case to obviate the paleness.
Cera Alba. *White Wax.*	*White Lead*.....	Melt the wax, the oxide will subside.
	Tallow.....	The cake has not its ordinary translucency.
Cinchona. *Bark.*	*This is variously adulterated.*	Can only be detected by practice, and examining into the quantity of quinia or cinchona it contains.
Coccus. *Cochineal.*	*Pieces of dough formed in moulds, and coloured with cochineal.*	Throw it into water, the adulteration will appear.
Copaiba. *Balsam of Copaiva.*		If it does not retain its spherical form when dropped into water, its adulteration may be inferred.
	Oil.....	Mix one part of strong liquid ammonia of 22°, with three parts of copaiba. If pure, the mixture will, in a few minutes, become transparent; if not, it will remain opaque.
Crocus. *Saffron.*	*Fibres of smoked Beef*....	Affords an unpleasant odour when thrown on live coals.
	Petals of the Calendula officinalis, and Carthamus Tinctorius.	Infuse the specimen in hot water, and the difference will be perceptible.
Cubeba. *Cubebs.*	*Turkey Yellow Berries*, or the dried fruit of the *Rhamnus Catharticus.*	Detected by attentive examination.
Cusparia Cortex. *Angustura Bark.*	*False Angustura sometimes sold for it.*	The epidermis of the true Cusparia is characterized by being covered with a matter resembling the crust of iron.
Guaiaci Resina. *Resin of Guaiacum.*	*Common Resin*.....	Detected by the turpentine smell emitted when thrown upon hot coals.
	Manchineel Gum.....	Add to the tincture a few drops of spirit of nitre, and dilute with water: the guaiacum is precipitated—the adulteration floats in the white striæ.
Hydrargyri Nitrico-Oxydum. *Red Precipitate.*	*Red Lead*.....	Digest in acetic acid; add sulphuret of ammonia, which will produce a dark coloured precipitate. It should be totally volatilized by heat.
Hydrargyri Submurias. *Calomel.*	*Corrosive Sublimate*.....	A precipitation will be produced by the carbonate of potass, from a solution made by boiling the suspected sample with a small portion of muriate of ammonia in distilled water; or, the presence of deuto-chloride of mercury is indicated, by warming gently a small quantity of calomel in alcohol, filtering and adding to the clear liquor some lime-water, by which a reddish yellow precipitate is afforded. When calomel is rubbed with a fixed alkali it ought to become intensely black, and not exhibit any orange hue.
Hydrargyri Sulphuretum Rubrum.	*Red Lead*.....	Digest in acetic acid, and add sulphuret of ammonia—a black precipitate will be produced.
Hydrargyri Sulphuretum Nigrum.	*Ivory Black*.....	Throw a suspected portion on hot coals—the residuum will detect the fraud.
Iodine.	.....	The tests of its purity are—that it is perfectly soluble in ether. Heated on a piece of glass or porcelain, it sublimes without residuum.
Jalapæ Radix. *Jalap Root.*	*Bryony Root*.....	Bryony root is of a paler colour, and less compact texture, and does not easily burn at the flame of a candle.
Magnesia.	*Lime*.....	Detected by the solution in dilute sulphuric acid affording a precipitate with oxalate of ammonia.
	Sulphuret of Lime.	Gives off when moistened, the smell of sulphureted hydrogen.
Magnesiæ Subcarbonas. *Carbonate of Magnesia.*	*Chalk*.....	Detected by adding dilute sulphuric acid to the suspected substance, when, if chalk be present, there will be a white insoluble precipitate.
	Gypsum.....	Boil in distilled water, and test the solution by a barytic and oxalic reagent.
Manna.	....	A factitious article, consisting of honey or sugar mixed with scammony, is sometimes sold for it; but the colour, weight, transparency, and taste detect it.
	....	
Morphia et ejus Sales. *Morphine and its Salts.*	.....	Morphia and its salts, when placed in contact with nitric acid, are coloured red; with per salts of iron, blue. They are perfectly soluble in warm alcohol, and acidulated warm water. When morphia is mixed with narcotina, the adulteration is ascertained by mixing them with sulphuric ether, which dissolves the narcotina, without sensibly affecting the morphia.
Moschus. *Musk.*	.....	The bag must not appear to have been opened.
	Dried Blood.....	This may be suspected, if it emits a fetid smoke when inflamed.
	Asphaltum.....	Discovered by its melting and running, before it inflames.
	Fine particles of Lead....	Rub with water. The metallic particles will subside.

Medicines.	Adulterations.	Mode of Detection.
Olea Destillata. *Essential Oils.*	*Fixed Oils*	Touch writing paper with it, and hold it before the fire: fixed oil leaves a stain of grease.
	Alcohol	Add water. A milkiness and increase of temperature occurs.
Oleum Ricini. *Castor Oil.*	*Olive* or *Almond* or *Poppy Oil.*	Alcohol S. G. .820, will mix with any proportion of castor oil, whilst it dissolves very little of the others.
Opium.	*Extract of Liquorice, Bullets and stones sometimes in it: Extract of Poppy, of the Chelidonium majus, G. Arabic, G. Tragacanth, Linseed Oil, Cow's Dung.*	The best opium is covered with leaves and the reddish capsules of a species of *Rumex*. The inferior kinds have capsules adherent. It is bad when soft and friable, when intensely black or mixed with many impurities, and when sweet. The quantity of morphia affords the best test.
Potassii Iodidum. *Iodide of Potassium. Potassæ Hydriodas. Hydriodate of Potassa.*	*Chloride of Potassium*	The adulteration is ascertained by precipitating a solution of the salt with nitrate of silver, and treating the precipitate with ammonia, which dissolves the chloride of silver, without acting upon the iodide of this metal.
Quiniæ Sulphas. *Sulphate of Quinia.*	.....	Leaves no residue when submitted to calcination: is perfectly soluble in warm alcohol, and in water slightly acidulated with sulphuric acid.
Strychniæ et ejus Sales. *Strychnia and its Salts.*	*Brucia*	They are free from brucia when no colour is produced by contact with nitric acid.
Zinci Oxydum. *Flowers of Zinc.*	*Chalk*	Sulphuric acid excites an effervescence.
	White Lead	Sulphuric acid forms an insoluble sulphate of lead.

FALTRANCK, Falltranck.

FALX. Anatomists have given this name to several membranous reflections having the shape of a falx or scythe.

Falx Cer'ebri, (F.) *Faux du cerveau, Septum Cerebri, Falx major, Ver'tical supe'rior longitu'dinal proc''ess, Mediasti'num cerebri, Repli longitudinal de la méninge,* (Ch.,) *Proces'sus falciformis duræ matris.* The greatest process of the dura mater. It extends from the fore to the hind part of the skull, on the median line; is broad behind and narrow before, and is lodged in the groove which separates the hemispheres from each other—the *interlobar fissure.* At its superior part is seated the longitudinal sinus (*superior,*) and at its lower, corresponding to the edge of the scythe, the inferior longitudinal sinus. Its anterior extremity is attached to the crista galli; its posterior is continuous with the tentorium cerebelli, and contains the straight sinus.

Falx Cerebel'li, (F.) *Faux du cervelet, Falx minor, Septum Cerebel'li, Septum médian du cervelet* (Ch.,) *Proces'sus falcifor'mis Cerebel'li, Septum Parvum occipitalē,* is a triangular process of the dura mater opposite the internal occipital protuberance. Its base is attached to the middle of the tentorium, and its top or apex bifurcates, to proceed to the sides of the foramen magnum. Its convex surface is towards the cranium, and its concave in the fissure or groove, which separates the two lobes of the cerebellum.

Falx Major, Falx cerebri—f. Minor, Falx cerebelli.

Falx, Great, of the Peritoneum, *Falx Peritone'i max'ima,* (F.) *Grande faux du péritoine, Faux de la Veine Ombilicale, Falx of the umbilical vein,* is a reflection of the peritoneum, which ascends from the umbilicus to the anterior and inferior surface of the liver.

Falces Lesser of the Perito'neum, *Falces Peritone'i min'imæ* (F.) *Petites faux du péritoine,* are the lateral ligaments of the liver and the reflections which the peritoneum forms, raised up by the umbilical arteries.

Falx of the Umbilical Vein, Falx, great, of the Peritoneum.

FAMEL'ICA FEBRIS, from *fames,* 'hunger.' Fever accompanied with insatiable hunger.—Sylvius.

FAMES, Hunger—f. Bovina, Boulimia—f. Canina, Boulimia.

Fames Lupi'na, *Lycorex'is, Faim de Loup.* Authors have described, under this name, a kind of Bulimia, (q. v.) or depravation of the digestive function, in which the patient eats voraciously, and passes his food, almost immediately afterwards, *per anum.*

FAMIGERATIS'SIMUM EMPLAS'TRUM, from *fama,* 'fame,' and *gero,* 'I wear.' A plaster, extolled in ague, and made of aromatic, irritating substances. It was applied to the wrist.

FANCY MARK, Nævus.

FANG, Radix.

FANON, (F.) from (G.) Fahne, 'a banner,' 'ensign,' 'standard.' *Fer'ula, Lec'tulus, Thor'ulus stramin'eus.* A splint of a particular shape, employed in fractures of the thigh and leg to keep the bones in contact.

The *Fanons* were divided into *true* and *false.* The *true* consists of a cylinder of straw, strongly surrounded with a cord or riband, in the centre of which a stick is usually placed to ensure its solidity. The *false* consists of a thick piece of linen, made flat, like a compress, and folded at the extremities. It was placed between the fractured limb and the true *fanon.* The *Drap-fanon* is a large piece of common cloth placed beneath the fractured limb, and in which the fanons or lateral splints are rolled.

FANTOM or PHANTOM, from φαντασμα, 'a spectre.' (F.) *Phantôme, Fantôme, Mannequin, Man'nekin.* This word has two acceptations. It means the spectres and images which the imagination presents to the sick, when asleep or awake; and, also, the figure on which surgeons practise the application of bandages, or the accoucheur the manual part of midwifery.

FARCINOMA, Equinia.

FARCTU'RA, *Fartu'ra;* from *farcire,* 'to stuff.' The operation of introducing medicinal substances into the cavities of animals or of fruits, which have been previously emptied.

FARCY GLANDERS, see Equinia.

FARD, Paint.

FARFARA, Tussilago—f. Bechium, Tussilago.

FARI'NA, *Alphiton*, *Crimnon*, *Al'eton*, *Aleu'ron*, *Ale'ma*, from *far*, 'corn,' of which it is made. *Meal* or *flour*. The powder, obtained by grinding the seeds of the gramineous, leguminous, and cucurbitaceous plants in particular. It is highly nutritious, and is much used, dietetically as well as medicinally.

FARINA AMYGDALARUM, see Amygdala.

FARINA TRIT'ICI, wheaten flour; *F. Seca'lis*, Rye flour or meal; *F. Hordei*, Barley meal; *F. Avena'cea*, Oat meal, &c.

FARINÆ RESOLVENTES, (F.) *Farines Résolutives*. This name was formerly given to a mixture of the farina of four different plants; the *lupine*, lupinus albus, the *Ervum Ervilia*, the *Vicia faba*, and the Barley, *Hordeum distichum*. They were recommended to form cataplasms.

FARINA'CEOUS, *Farina'ceus*, *Farino'sus*, (F.) *Farineux*, *Mealy*. Having the appearance or nature of farina. A term given to all articles of food which contain farina. The term *Farinacea* includes all those substances, called *cerealia*, *legumina*, &c., which contain farina, and are employed as nutriment. In *Pathology*, the epithet *farinaceous*, (F.) *farineux*, is applied to certain eruptions, in which the epidermis exfoliates in small particles similar to farina.

FARINARIUM, Alica.

FARINES RÉSOLUTIVES, Farinæ resolventes.

FARINEUX, Farinaceous.

FARINOSUS, Farinaceous.

FART, Sax. Fapt, from Teut. *fahren*, 'to go:' —fart, 'a voyage.' (G.) Furz, (L.) *bdel'lus*, *Crep'itus* (q. v.,) (F.) *Pet*. A sonorous or other discharge of wind from behind. A low word, but of respectable parentage.

FARTURA, Farctura.

FAS'CIA, from *fascis*, 'a bundle.' *Liga'tio*, *Ligatu'ra*, *Alligatu'ra*, *Anades'mus*, *Vin'cula*, *Spar'ganon*, *Epides'mos*, a *bandage*, (q. v.,) *fillet*, *roller*, *ligature*, (q. v.) The aponeurotic expansions of muscles, which bind parts together are, likewise, so termed:—*Aponeurosis*, *Perimys'ium*.

FASCIA APONEUROTICA FEMORIS, Fascia lata aponeurosis—f. Capitalis, *Bonnet d'Hippocrate*—f. Capitis, Diadema—f. Digitalis, *Gantelet*—f. Diophthalmica, Binoculus—f. Dividens, Dividing bandage.

FASCIA ILI'ACA, *Iliac aponeuro'sis*. An aponeurosis, which proceeds from the tendon of the psoas minor, or which arises from the anterior surface of the psoas magnus, when the former muscle does not exist. It is attached, externally, to the inner edge of the crest of the ilium, below, and anteriorly—on one side, to the crural arch, sending an expansion to the fascia transversalis; and on the other, continuous with the deep-seated lamina of the fascia lata, which forms the posterior paries of the crural canal. Within and behind, the fascia iliaca is attached to the brim of the pelvis, and is continuous with the aponeurosis, which M. Jules Cloquet has called *Pelvian*. The iliac aponeurosis covers the iliac and psoas muscles, which it separates from the peritoneum.

FASCIA INGUINALIS, Spica.

FASCIA LATA. A name given by anatomists to an aponeurosis, and to a muscle.

FASCIA LATA APONEUROSIS, *Fascia aponeurot'ica fem'oris*, *Crural* or *Fem'oral Aponeurosis*, is the most extensive in the body, and envelops all the muscles of the thigh. *Above*, it is attached to the outer edge of the ilia; *before*, it arises from the crural arch by two distinct laminæ, separated by the femoral vessels and becoming confounded a little below the part where the great vena saphæna opens into the crural vein. Of these two laminæ, the one is more anterior and thicker than the other, and may be considered as a prolongation of the aponeurosis of the external oblique. It is intimately united to Poupart's ligament. The other, which is thinner, is behind, and deeper seated; and, after its union with the former, proceeds to be inserted into the pubis. *Inferiorly*, the fascia lata becomes confounded with the tendon of the triceps, and is attached to the external tuberosity of the tibia. The use of the fascia lata, like that of other aponeuroses, is to strengthen the action of the muscles, &c.

FASCIA LATA MUSCLE, *Tensor vagi'næ fem'oris*, *Fascia'lis*, *Membrano'sus*, *Ilio-aponévrosi-fémoral*, *Mus'culus aponéuro'sis* vel *fasciæ latæ*, *Ilio-aponévroti-fémoral*—(Ch.) *Tenseur de l'aponévrose fémorale*. A muscle, situate at the upper and outer part of the thigh. It arises, *above*, from the outer part of the anterior and superior spine of the ilium; and is inserted, *below*, between the two laminæ of the fascia lata, which it stretches and raises when it contracts.

FASCIA SCULTETI, Bandage of separate strips, —f. Semicircularis, Tænia semicircularis—f. Spiralis, Asci—f. Stellata, Stella—f. Submuscular, see Vaginal, (of the eye.)

FASCIA SUPERFICIA'LIS, *Superficial aponeuro'sis of the abdomen and thigh*. (F.) *Aponévrose superficielle de l'abdomen et de la cuisse*. A very thin aponeurosis, which covers the muscles and aponeuroses of the abdomen; passes before the crural arch, to which it adheres with some degree of force; sends a membranous sheath, which surrounds the spermatic chord; and is continuous with the dartos, which it assists in forming. The fascia superficialis presents, beneath the crural arch, very distinct fibres whose direction is parallel to the fold of the thigh. It is applied over the fascia lata aponeurosis, and is attached, internally, to the ascending ramus of the ischium, near the root of the corpus cavernosum. Before the descent of the testicle from the abdomen, the fascia superficialis is very manifestly continuous with the *Gubernaculum testis*.

FASCIA TFORMIS, T. bandage—f. Tortilis, Tourniquet.

FASCIA TRANSVERSA'LIS. An aponeurosis, which separates the transversalis muscle from the peritoneum in the inguinal region. It arises about the posterior edge of the crural arch, where it seems to be continuous with the aponeurosis of the greater oblique muscle. *Above*, it is lost in the cellular tissue at the internal surface of the transversalis abdominis. *Within*, it is continuous with the outer edge of the tendon of the rectus muscle and Gimbernat's ligament; *below*, it is continuous with the aponeurosis of the greater oblique, and receives an expansion from the *Fascia Iliaca*. Towards its middle and a little above the crural arch, the fascia transversalis has the wide orifice of a canal, which is occupied, in the female, by the round ligament of the uterus; and in man, fur-

nishes an expansion, that serves as a sheath to the spermatic vessels.

FASCIÆ, Swathing clothes.

FASCIALIS, Fascia lata muscle, Sartorius.

FASCIARUM APPLICATIO, Deligation.

FASCIATIO, Deligation, see Bandage—f. Cucullata, *Couvrechef*.

FASCICULI TERETES CORDIS, Columnæ carneæ.

FASCIC'ULUS, from *fascis*, 'a bundle,' *Desme'dion*, 'a small bundle.' In *Anatomy*, it is employed in this sense; as "*a fasciculus of fibres*." (F.) *Faisceau* ou *Petit Faisceau*, *Trousseau*. In *Pharmacy*, it means *manip'ulus*, *Cheirople'thes*, χειροπλήθης, 'a handful:'—Musa Brassavolus, says,—as much as can be held in two fingers.

FASCICULUS CUNEATUS, Reinforcement, fasciculus of—f. of Reinforcement, Reinforcement, F. of.

FASCINUM, Penis.

FASCIOLA, *Bandelette*—f. Cinerea, Tuberculum cinereum—f. Hepatica, Distoma hepaticum—f. Humana, Distoma hepaticum—f. Lanceolata, Distoma hepaticum.

FASELUS, Phaseolus vulgaris.

FASTIDIUM CIBI, Disgust.

FASTIGIUM, Acme.

FASTING, from Sax. Fæstan, *Limo'sis ex pers protrac'ta*, *Anorex'ia mirabi'lis*, *Ine'dia*, *Jeju'nium*. Loss or want of appetite, without any other apparent affection of the stomach: so that the system can sustain almost total abstinence for a long time without faintness. Some wonderful cases of this kind are on record. See Abstinence.

FAT, Pinguedo—f. Mackaw, see Cocos butyracea.

FATTY, *Adipo'sus*, Sax. Fæt; past participle of Fedan, to feed,—*adipous*. Relating to fat. The cellular system has been called *fatty* or *adipous*; from an opinion that, in its areolæ the fat is deposited. The cellular membrane, however, merely lodges, between its lamellæ and filaments, the vesicles in which the fat is contained.

FATTY or ADIPOUS LIG'AMENT. This name has been given to a reflection of the synovial membrane of the knee joint, which passes from the ligamentum patellæ towards the cavity that separates the condyles of the femur.

FATTY or ADIPOUS MEMBRANE, or *adipous tissue*. The subcutaneous cellular tissue, or that containing the fatty or adipous vesicles, (q. v.)

FATTY or AD'IPOUS VES'ICLES, *Sac'culi adipo'si*. This name is given to small bursæ or membranous vesicles which enclose the fat, and are found situate in the areolæ of the cellular tissue. These vesicles vary much in size. Generally, they are round and globular; and in certain subjects, receive vessels which are very apparent. They form so many small sacs without apertures, in the interior of which are filaments, arranged like septa. In fatty subjects, the adipous vesicles are very perceptible, being attached to the cellular tissue and neighbouring parts by a vascular pedicle. Raspail affirms that there is the most striking analogy between the nature of the adipous granules and that of the amylaceous grains.

FATTY or ADIPOUS VESSELS. The vessels connected with the fat. Some anatomists have called *Adipous canals*, (F.) *Conduits adipeux*, the vessels to which they attribute the secretion of fat.

FATTY DEGENERATION OF THE LIVER, Adiposis hepatica—f. Liver, Adiposis hepatica.

FATU'ITAS, *Moro'sis*, *Stultit''ia*, *Stupor mentis*, *Amen'tia*; from *fat'uus*, 'foolish.' Mental imbecility. Idiotism, (q. v.) *Dementia*, (q. v.)

FAUCES, Pharynx, Throat.

FAUCETTE VOICE, see Voice.

FAUNO'RUM LUDIBRIA. *The sports of the Fauni*. Some authors have called thus the incubus; others, epilepsy.

FAUSSE COUCHE, (F.) *Vanum partu'rium*. Some authors have used this term for the expulsion of different bodies constituting false conceptions; such as moles, hydatids, clots of blood, &c. Most accoucheurs use the term synonymously with abortion.

FAUSSE POSITION (F.) *False position*. The French use this term, in vulgar language, to indicate the torpor, and tingling, and loss of power over the motion of a part, produced by too strong contraction or painful compression.

FAUSSE ROUTE, False passage.

FAUSTI'NI PASTIL'LI. *Faustinus's Lozenges*. These were once celebrated. They were composed of *burnt paper*, *quicklime*, *oxide of arsenic*, *sandarach*, *lentils*, &c.

FAUX, False—*f. du Cerveau*, Falx cerebri—*f. du Cervelet*, Falx cerebelli—*f. Grande du péritoine*, Falx, great, of the peritoneum—*f. Petite du péritoine*, Falx, lesser, of the peritoneum—*f. de la Veine ombilicale*, Falx, great, of the peritoneum.

FAVEUX, Favosus.

FAVIFORMIS, Favosus.

FAVO'SUS. Similar to a honey-comb, *Faviform'is*, *Favous*, from *favus*, *ce'rion*, 'a honey-comb,' (F.) *Faveux*. An epithet given to a species of porrigo. *Cerion*, *Favus*, means also a state of ulceration, resembling a honey-comb.

FAVUS, Porrigo, Porrigo favosa, see Favosus.

FEATHERFEW, Matricaria.

FEBRIC'ITANS, *Feb'riens*, *Enip'yros*. One attacked with fever, from *febricitare*, 'to have a fever.'

FEBRICOSUS, Feverish.

FEBRIC'ULA. Diminutive of *febris*, 'fever.' A term employed to express a slight degree of fever.

FEBRIENS, Febricitans, Feverish.

FEBRIF'EROUS, *Feb'rifer*, from *febris*, 'fever,' and *fero*, 'I carry.' Fever-bearing, as a *febriferous locality*.

FEB'RIFUGE. *Lexipyret'icus*, *Pyret'icus*, *Alexipyret'icus*, *Antifebri'lis*, *Antipyret'ic*, *Febrif'ugus*, from *febris*, 'a fever,' and *fugare*, 'to drive away.' A medicine which possesses the property of abating or driving away fever.

FE'BRILE, *febri'lis*. Relating to fever, as *febrile movement*, *febrile pulse*, &c.

FEBRIS, Fever—f. Acmastica, Synocha—f. Acuta, Synocha—f. Adeno-meningea, Fever, adeno-meningeal—f. Adeno-nervosa, Plague—f. Agrypnodes, see Agrypnodes and Agrypnos—f. Alba, Chlorosis—f. FÆCES, Fæces.

FÉCONDATION, Fecundation.

FÉCONDITÉ, Fecundity.

FEC'ULA or FÆ'CULA, diminutive of *fæx*, 'lee.' An immediate principle of vegetables, composed of hydrogen, oxygen, and carbon. It exists in several plants, and has different names, according to that which furnishes it. When extracted from wheat or barley, it is called *starch*, *Am'ylum*, (q. v.) When from the *Cycas circina'lis*, *Sago*;—from the *Orchis morio*, *Salep*. We say, also, Fecula of the *Potato*, *Bryony*, *Arum*, *Manioc*, &c.

Fecula Green. This name is given to a green, solid matter of variable character, which is believed to be resinous, and which renders turbid several kinds of juices, extracted from vegetables. It is, also, called *Chlorophyll*.

Fecula Amylacea, Amylum—f. Marantæ, Arrow root—f. Tapioka, see Jatropha manihot.

FEC'ULENCE, *Fæculen'tia*, *Fæcos'itas*, *Fæx*, *Fæ'ces*, *Lee*, *Deposit*, *Dregs*. In *Pharmacy*, feculent, albuminous, or other substances, which are deposited from turbid fluids.

FEC'ULENT, *Fæculen'tus*, *Trygo'des*, 'Foul,

dreggy, excrementitious;' as a *feculent fluid, feculent evacuations*, &c.

FECUNDA'TION, *Fœcunda'tio, Impregna'tion, Impregna'tio, Cye'sis, Encye'sis, Encymo'sia*, (F.) *Fécondation*. The act by which in organized beings, the germ contained in the generative organs of the female, receives from the male organs that which is necessary for its development.

FECUN'DITY, *Fœcun'ditas*, (F.) *Fécondité*. The faculty of reproduction, possessed by organized bodies.

It has been estimated that throughout a country, taking one marriage with another, not more than 4 children are the result; and in towns only 35 children to 10 marriages.

FÉGARITE, Cancer aquaticus.

FEIGNED DISEASES, *Sim'ulated diseases, Pretend'ed Diseases*, (F.) *Maladies dissimulées, M. simulées, M. feintes, M. supposées*. The tricks employed, by impostors, to induce a belief that they are attacked with diseases when they are not. These are generally assumed by beggars to obtain alms; by criminals to escape punishment; and by soldiers to be exempt from duty.

The following Table exhibits the chief feigned diseases, with the means of detection.

A TABLE OF FEIGNED, PRETENDED, SIMULATED, OR EXCITED DISEASES OR DISQUALIFICATIONS.

Diseases, &c.	How Feigned.	How Detected.
1. Abortion.	By staining the clothes and body with borrowed blood.	
2. Abstinence.	.....	By constant and minute attention.
3. Amaurotic Blindness.	By applying the extract of belladonna or the datura stramonium to the eye.	Amaurosis is characterized by dilated pupil. Where these substances have been applied, the effects will go off in ten days or a fortnight.
4. Apoplexy.	By falling down as if deprived of sensation and consciousness.	By powerful stimulants; an electric shock; application of hot water, sternutatories, actual cautery, &c.
5. Cachexia, Anæmia and Debility.	Using substances to make the face appear pale and livid. Indulging freely in wine, and privation of sleep prior to examination.	By examining if the pulse be strong, and the skin hot, and whether there be loss of appetite or of strength, or swelling of the limbs.
6. Excretion of Calculi.	Putting sand, pebbles, &c. into the urine.	By the aid of chymistry. We are acquainted with the chymical composition of urinary calculi.
7. Cancerous Ulcer.	By gluing on a portion of a spleen with the smooth side to the skin, leaving on the outside the appearance of an ulcerated surface.	By noticing whether there be signs of cachexia, and by attentive examination of the part.
8. Catalepsy.	By seeming to be suddenly motionless, the joints remaining flexible, and external objects making no impression.	By powerful stimulants, as recommended under apoplexy. Letting fall a drop of boiling water on the back. Proposing to use the actual cautery and seeing whether the pulse rises.
9. Chorea.	By assuming the convulsive motions of a part which characterize chorea.	By examining the patient whilst he may imagine himself unobserved, and seeing whether the convulsive motions go on then.
10. Contraction of Joints in General.	.....	Mode of discrimination sometimes so obscure as to deceive the most practised and attentive.
11. Contraction of the Fingers.	.....	Introduce a cord between the fingers and the palm of the hand, and gradually apply weights so as to expand the fingers. Confine him so that he cannot obtain his food without using his clenched hand.
12. Convulsions.	.....	When feigned, they do not present the rigidity of muscles or the rapidity of action which characterize the real. The mode of detection must be the same as in epilepsy.
13. Opaque Cornea.	Produced by the application of a strong acid, by acrid powders, as quicklime, &c.	The existence of the opacity can be detected by attentive observation.
14. Cutaneous Diseases.	Some articles of diet will bring on *urticaria* or *nettle rash*, in particular individuals, as shell-fish, bitter almonds, &c. By acrids, acids, or any irritants applied to the surface. An ointment of tartarized antimony causes a painful pustular eruption. See Porrigo, in this list.	By careful examination on the part of practitioner and nurse.
15. Death.	Some persons possess the power of suspending or moderating the action of the heart.	If suspected, the plan, recommended under apoplexy, will be found most efficacious.
16. Deaf-Dumbness.	.....	The really deaf and dumb acquire an expression of countenance and gestures which it is difficult to assume.
17. Deafness.	It may be assumed or excited by putting a pea in the ear, or by inserting irritants, so as to induce inflammation and temporary loss of function.	Make a noise when not expected, and see if the countenance varies or pulse rises. Put to sleep by opium, and then fire a pistol close to the ear, when he may be thrown off his guard. Examine the ear to see if any trick has been played there.

Diseases, &c.	How Feigned.	How Detected.
18. Debility, see Cachexia.		
19. Deformity.	.....	Examine the part and its articulation, naked, and compare it with the opposite.
20. Delivery.	After enlargement produced artificially, a subsidence of the tumefaction; the parts being moistened by borrowed blood and the child of another substituted as the female's own.	Can only be positively detected by examination, *per vaginam*. Soon after delivery, the vagina will be relaxed and the lochial discharge be flowing—in greater abundance, the shorter the time that may have elapsed since delivery.
21. Diarrhœa.	Said to have been caused by a mixture of vinegar and burnt cork. (?) May be occasioned by the use of any of the purgative roots, &c.	When diarrhœa is feigned by the lower classes, inspect the linen; if clean, the bowels are probably not much out of order. Let every individual have a close stool of his own; and inspect the evacuations, taking care that one suffering under the disease does not lend his evacuations to another.
22. Dropsy.	May be feigned, like pregnancy, by wearing pads. The anasarcous condition of the lower limbs has been caused by applying a ligature round them. By inflating the cellular membrane of the abdomen.	Can be detected by attentive examination. There will be a want of that leucophlegmatic habit, which accompanies and characterizes dropsy.
23. Dysentery.	May be feigned, like diarrhœa, by adding a little blood to the evacuations, or by introducing a soap or some more irritating suppository.	Same rules as under diarrhœa.
24. Epilepsy.	The foaming of the mouth has been produced by keeping a piece of soap in it.	Sensation in epilepsy is totally abolished. If any remain, disease probably feigned. Incontractility of pupil, which occurs in epilepsy, cannot be feigned. Same means to be used as in feigned apoplexy.
25. Fever.	By various stimulants, as wine, brandy, pepper; swallowing a small quantity of tobacco, or introducing it into the anus. Flour or chalk used to whiten the tongue. Redness of skin, caused by friction with a hard brush.	The deceit is generally developed by a day or two's examination. Where flour or chalk has been used to whiten the tongue, the line of demarcation, between the whitened part and the clean, healthy margin of the tongue, is too well marked to escape observation.
26. Fistula in Ano.	By making an incision near the verge of the anus, and introducing into it an acrid tent, such as the *root of white hellebore*, &c.	By careful examination.
27. Fractures.	Generally nothing, here, but the man's own testimony. He complains of pain in the part; if fracture of the skull be feigned, he states, perhaps, that he becomes deranged on tasting liquor.	By attentive examination.
28. Hæmatemesis.	By drinking the blood of some animal, or using some coloured liquid, and then throwing it up.	By cutting off the supply of the fluid, and careful examination.
29. Hæmoptysis.	By secreting bullock's blood for the purpose of colouring the saliva; making small incisions in the mouth; using bole armeniac or paint of vermilion.	Blood from the lungs is frothy and light-coloured. Mouth and fauces must be carefully inspected, and the individual be observed.
30. Hæmorrhoids.	By introducing bladders of rats or of small fish, partly into the rectum. The linen has also been stained with borrowed blood.	The means are obvious.
31. Heart, Diseases of, see Palpitation.		
32. Hepatitis.	.....	Unless the person be a well educated impostor, acute inflammation of the liver will be detected by the absence of marks of strong inflammatory action. *Chronic liver disease* is, frequently, not characterized by well marked symptoms, and hence, when assumed, is difficult of detection.
33. Hernia.	In the same manner as hydrocele. By inflation.	The detection is easy.
34. Hydrocele.	By puncturing the skin of the scrotum, and inflating the cellular membrane.	Do.
35. Hydrocephalus.	By opening the integuments of the head, near the vertex, e. g. and blowing in air.	Do.
36. Hysteria.	.....	Does not easily resist the application of strong sternutatories to the nostrils. Attentive examination necessary.
37. Insanity.	.....	The expression of countenance cannot easily be feigned. Nor can the affection be kept up so long as in real mental alienation. The individual cannot do so long without food, sleep, &c.

Diseases, &c.	How Feigned.	How Detected.
38. Jaundice.	By colouring the skin with an infusion of turmeric or tincture of rhubarb. *Clay-coloured stools* produced by taking daily a small quantity of muriatic acid. *High-coloured urine* by rhubarb taken internally.	The eyes cannot be coloured, although smoke has been used for this purpose. The skin must be washed to remove the colouring matter if any exist, and the supply of acid and rhubarb be prevented.
39. Lameness.	By keeping the limb in a contracted state, and resisting any efforts to move it.	By two persons taking hold of the individual and moving rapidly along with him; and when they are tired, having relays. The impostor will generally give in.
40. Menstruation.	By staining the clothes and body with borrowed blood.	By cutting off the supply.
41. Myopia. *Short-sightedness.*	.....	Present an open book, and apply the leaves close to the nose. If it cannot be read distinctly, when thus placed, or when glasses, proper for short-sightedness are used, the disease is feigned.
42. Ophthalmia.	Excited by a variety of acrid and corrosive substances applied to the eye; as lime, &c. A portion of black muslin, spread over the cornea. The eyelashes are sometimes extracted, and caustic applied to excite disease in the palpebræ.	When ophthalmia is thus excited, its progress is, ordinarily, very rapid, arriving at its height within a few hours.
43. Ozæna.	By impregnating a piece of sponge with some offensive juices or oils, mixed with decayed cheese, and putting the imbued sponge into the nostrils.	
44. Palpitation.	White hellebore, given in the dose of 10 or 12 grains, and repeated, will occasion general indisposition, and undue action of the heart.	Cut off the supply.
45. Pains.	.....	The detection is here often difficult. The non-existence of pain cannot be proved, and great pain may be present without any appearance externally. The imposition is more frequently detected by inconsistencies and contradictions in the patient's history of the case, than in any other manner.
46. Shaking Palsy.	.....	May be suspected, if the person be in an ordinary state of vigour. Try violent remedies and means, recommended under Chorea.
47. Paralysis.	.....	Violent remedies are here required. Cold affusion, actual cautery, electric shocks, &c.
48. Phthisis Pulmonalis.	Individuals with long necks and contracted shoulders have simulated phthisis, by covering the chest with blisters, cicatrices of issues, &c; and by taking drugs, which cause paleness.	By attentive examination of the symptoms.
49. Polypus Nasi.	By introducing the testicle of a young cock or the kidney of a rabbit into the nostril, and retaining it there by means of a sponge, fastened to it.	
50. Porrigo. *Scalled Head.*	By applying nitric acid to the head, after protecting the face with fatty substances; but the chronic state is imitated by the use of depilatories of different kinds applied sometimes in patches, so as to resemble the *porrigo decalvans.*	
51. Pregnancy.	By wearing pads, and assuming the longing after particular articles of diet, &c.	By the absence of the areola; the presence of a pad: and, if necessary, by examination *per vaginam.*
52. Prolapsus Ani.	By a portion of the intestine of the ox, in which a sponge, filled with a mixture of blood and milk is placed.	
53. Prolapsus Uteri.	By a similar fraud.	
54. Pulse, Weakness or Defect of.	By ligatures applied to the corresponding arm.	By examining whether the arteries of the two arms beat alike; and if a ligature be placed on the arm.
55. Chronic Rheumatism. See Pain.		
56. Scrofula.	By exciting ulcers below the angles of the jaw.	By examining the general habit, and observing, whether the ulcerations be glandular, and the discharge of a scrofulous character.
57. Scurvy.	By covering the teeth with wax, and then applying acid, corrosive substances to the gums.	By examining the general habit; whether debilitated, cachectic, and possessing the usual general signs of scorbutus.
58. Stammering.	.....	Simulators of this defect generally state that it is connate, or ascribe it to a fit of apoplexy or severe fever. Where the organs of speech were perfect, and the moral evidence of the previous exist-

Diseases, &c.	How Feigned.	How Detected.
58. Stammering.	.....	ence of the infirmity was not satisfactory, the French authorities used to confine the soldiers, and not supply them with food, until they called for it without stammering.
59. Stricture of the Urethra.	.....	By passing the bougie.
60. Swelling of the Legs.	By ligatures round the thighs.	Examine the limbs uncovered.
61. Syncope.	Ligatures are sometimes used to prevent the pulse being felt. By applying lotions to the face to make it pale.	By using sternutatories. By the absence of some of the symptoms of syncope. Examine the naked arms. Wash the face.
62. Tympany.	Persons have possessed the power of swallowing air, so as to distend the stomach, and simulate tympany.	
63. Ulcer of the Ear.	By introducing a tent, imbued with blistering plaster, into the ear, and repeating the application, until the tube becomes ulcerated, and a discharge of puriform matter is established. The fetid smell is imitated, by dropping into the ear a mixture of empyreumatic oil, asafœtida and old cheese. Also, by introducing a little honey into the meatus.	By careful examination.
64. Ulcers of the Legs, &c.	By corrosives, or irritants. Sometimes by abrasion, by rubbing sand on the shin-bone. At others, they are pretended, by gluing on a piece of a spleen or the skin of a frog.	Artificial ulcers have, usually, a more distinct margin, and are more readily healed than others; the latter being generally indicative of an impaired constitution.
65. Bloody Urine.	The fruit of the Indian Fig (*Cactus opuntia*) colours the urine as red as blood. Cantharides will cause it. Blood may also be procured and mixed with the urine.	By making the patient pass his urine in the presence of the physician, and examining the vessel before and after. By cutting off the supply of any substance, which could cause the appearance.
66. Incontinence of Urine.	.....	Difficult, at times, of detection. Give the person a full dose of opium, and introduce the catheter, when he is asleep. If there be urine, the incontinence is feigned.
67. Varicose Veins.	By a ligature, placed tightly round the limb. They may be excited in this manner, or aggravated if already existing.	By examining the limb.

FEL, Bile—f. Anguillæ, see Bile—f. Bovinum, Bile of the Ox—f. Bovis, see Bile—f. Naturæ, Aloes—f. Tauri, see Bile—f. Ursi, see Bile—f. Vitri, see Vitrum.

FELLIS OBSTRUCTIO, Icterus—f. Superfusio, Icterus—f. Suffusio, Icterus.

FELON, Paronychia.

FÉLURE DE GLASER, Fissure, glenoid.

FELWORT, Gentiana lutea.

FEMALE, *Fem'ina*, *Gynē*, (F.) *Femelle*. In animals, the one that engenders and bears the young. It is, also, used adjectively;—as, the *Female sex*, &c.

FEMELLE, Female.

FEMEN, Thigh, Vulva.

FEMINA, Female.

FEMME EN COUCHE, Puerpera.

FEM'ORAL, *Femora'lis*, from *femur*, 'the thigh bone.' Belonging or relating to the thigh; as *Femoral artery*, *Femoral hernia*, &c. See Crural.

FEMORALIS, Triceps cruris.

FÉMORO-CALCANIEN PETIT, Plantar muscle—f. Popliteal, great, Sciatic nerve, great, —*f. Popliti-tibial*, Poplitæus muscle.

FEM'ORO-TIBIAL, *Femoro-tibia'lis*. Belonging to the femur and tibia. The *Femoro-tibial articulation* is the knee-joint.

FEMUR, *Meros*, *Os fem'oris*. The *thigh bone*. (F.) *L'os de la Cuisse*. The strongest and longest of all the bones of the body, extending from the pelvis to the tibia, and forming the solid part of the thigh. The femur is cylindrical, slightly curved anteriorly, unsymmetrical and oblique downwards and inwards. The body of the bone is prismatic, and has, behind, a prominent ridge:—the *Linea aspera*.

Processes.
- *Upper or Pelvic Extremity.*
  - Head supported on a collum or neck.
  - Great trochanter.
  - Lesser trochanter.
- *Inferior or Tibial Extremity.*
  - External condyle.
  - Internal condyle.
  - External tuberosity.
  - Internal tuberosity.

The femur ossifies from five points:—one on each process of the pelvic extremity; one in the body of the bone; and two on the condyles. It is articulated with the pelvis, tibia, and patella. See Thigh.

FÉMUR COL DU, Collum femoris—f. Moventium septimus, Iliacus internus—f. Moventium sextus, Psoas magnus—f. Summum, Vulva.

FENES'TRA. A *Window*. (F.) *Fenêtre*. Anatomists have given this name to two apertures, situate on the inner paries of the cavity of the tympanum. The *one* of these is the *Fenestra ova'lis*, *F. vestibula'ris*. It is oval-shaped; situate at the base of the stapes, and corresponds with the cavity of the vestibule. The *other* is the *Fenestra rotun'da* or *F. Cochlea'ris*. It is closed by a fine, transparent membrane, called *Membra'na Tym'pani secun'daria*, and corresponds to the inner scala of the cochlea.

Fenestra Oculi, Pupil.

FENES'TRAL, *Fenestra'lis*, from *fenestra*, 'a window.' (F.) *Fenêtré* et *Fenestré*. Ban-

dages, compresses, or plasters with small perforations or openings, are so called. The openings prevent the detention of the discharge.

FENESTRATUS, Fenestral.

FENESTRÉ, Fenestral.

FENÊTRE, Fenestra.

FENÊTRÉ, Fenestral.

FENNEL, Anethum—f. Dogs', Anthemis cotula—f. Flower, Nigella—f. Hog's, Peucedanum—f. Sweet, Anethum—f. Water, Phellandrium aquaticum.

FENOUIL, Anethum—*f. d'Eau*, Phellandrium aquaticum—*f. Marin*, Crithmum maritimum—*f. de Porc*, Peucedanum—*f. Puant*, Anethum graveolens.

FENTE, Fissure—*f. Capillaire*, see Pilatio—*f. Glénoidale*, Fissure, glenoid—*f. Orbitaire*, Orbitar fissure—*f. Orbitaire inférieure*, Spheno-maxillary fissure—*f. Sphéno-maxillaire*, Spheno-maxillary fissure—*f. Sphénoidale*, Sphenoidal fissure.

FÉNUGREC, Trigonella fœnum.

FENUGRECK, Trigonella fœnum.

FER, ferrum—*f. Chaud*, Pyrosis—*f. Hydrate de tritoxide de*, Ætites—*f. Iodure de*, see Iodine—*f. Lactate de*, Ferri Lactas—*f. Limaille de*, Ferri limatura—*f. et de Potassium Protocyanure de*, Potassii Ferrocyanuretum.

FERINE, *Feri'nus;* 'savage, brutal;' *Theriodes.* A term, applied to any malignant or noxious disease. In France, it is used only when joined to *Toux; Toux férine*, a dry, obstinate, and painful cough.

FERMENT, *Fermen'tum*, (quasi *fervimentum*,) *Zymē*, *Zymo'ma*, *Leven*, (F.) *Lévain.* The Iatrochymists applied this name to imaginary substances, to which they attributed the power of producing diseases, by exciting a fermentation in the humours.

FERMENTA'TION, *Fermenta'tio*, *Zymo'sis*, *Æstua'tio*, *Causis*, *Brasmos.* An intestinal movement, occurring spontaneously in a liquid; whence result certain substances, that did not previously exist in it.

The chemical physicians attributed all diseases to an imaginary fermentation of the humours.

FERMENTATION, PUTREFACTIVE, Putrefaction.

FERMENTUM CEREVISIÆ, Yest.

FERN, FEMALE, Asplenium filix fœmina, Pteris aquilina—f. Male, Polypodium filix mas—f. Bush, Comptonia asplenifolia—f. Gale, Comptonia asplenifolia—f. Meadow, Comptonia asplenifolia—f. Rock, Adiantum pedatum—f. Root, Polypodium vulgare—f. Sweet, Adiantum pedatum, Comptonia asplenifolia—f. Sweet, shrubby, Comptonia asplenifolia.

FERNAMBUCO WOOD, Cæsalpinia echinata.

FERRAMEN'TUM, *Side'rion*, *Instrumen'tum fer'reum.* Any surgical instrument, made of iron. By the vulgar, in France, the word *ferrements* means the *instruments* used in difficult labours.

FERRARIA, Scrophularia aquatica.

FERREIN, CANAL OF, *Ductus Ferrei'ni.* A triangular channel, which Ferrein supposed to result from the approximation of the free edges of the eyelids applied to the globe of the eye; and which he considered adapted for directing the tears towards the puncta lachrymalia, during sleep. The canal is, probably, imaginary.

The same name is likewise given to the *cortical canals*,—the first portions of the uriniferous ducts, whilst still in the cortical substance of the kidney.

FERREIN, PYR'AMID OF, *Pyr'amis Ferrei'ni.* Each of the papillæ of the kidney, according to Ferrein, consists of, at least, 700 subordinate cones or pyramids. To these last, the name '*pyramids of Ferrein*' has been given.

FERRI ET AMMONIÆ MURIAS, Ferrum ammoniatum.

FERRI AMMONIO-TARTRAS, *Ammonio-tartrate of Iron.* This salt is best made by dissolving to saturation freshly precipitated hydrated oxide of iron in a solution of bitartrate of ammonia, and evaporating to dryness. It is very soluble, the dose is five grains or more in pill or solution.

FERRI ARSENIAS, Arseniate of Iron—f. Bromidum, see Bromine—f. Nitratis Liquor, see Tinctura Ferri muriatis—f. Sesquinitratis Liquor, see Tinctura Ferri muriatis—f. Borussias, Prussian blue—f. Carbonas, F. subcarbonas—f. Carbonatum, Graphites—f. Carburetum, Graphites.

FERRI CITRAS, *Citrate of Iron.* Two citrates of iron have been prepared of late—the *Sesqui-Citrate* or *Citrate of the sesquioxide;* and the *Citrate of the protoxide.* They resemble, in their medical properties, the tartrate and the lactate of the metal.

FERRI CYANURETUM, Prussian blue—f. Deutocarbonas fuscus, F. subcarbonas—f. Deutoxydum nigrum, Æthiops martial—f. Ferrocyanas, Prussian blue—f. Hydrocyanas, Prussian blue—f. Hypercarburetum, Graphites.

FERRI IO'DIDUM, *Iodide of Iron*, (*Iodin.* ℥ij, *Ferri rament.* ℥j, *Aq. destillat.* Oiss.) Mix the iodine with a pint of the distilled water in a porcelain or glass vessel, and gradually add the iron filings, stirring constantly. Heat the mixture gently until the liquid acquires a light greenish colour: then filter, and after the liquid has passed, pour upon the filter half a pint of the distilled water, boiling hot. When this has passed, evaporate the filtered liquor, at a temperature not exceeding 212°, in an iron vessel to dryness: keep the dry iodide in a closely stopped bottle. (Ph. U. S.) See, also, Iodine.

FERRI LACTAS, *Lactate of Iron, Lactate of Protoxide of Iron*, (F.) *Lactate de Fer.* Prepared by digesting in a sand bath, at a low temperature, lactic acid diluted with iron filings. It is employed in the same cases as the precipitated subcarbonate of iron, and especially in chlorosis. Twelve grains of the lactate may be given in the 24 hours, in the form of lozenges.

FERRI LIMATU'RA PURIFICA'TA, *Purified Iron Filings:*—purified by means of the magnet, for internal use. The filings are, also, called *Ferri Scobs, F. Rumen'ta et Pila, Mùrtis Limatu'ra, Spec'ulum In'dicum, Ferri in pulverem resolu'tio*, (F.) *Limaille de Fer.* They are considered to possess the general properties of iron:—the iron becoming oxidized.

FERRI OXIDUM FUSCUM, F. subcarbonas—f. Oxidum Nigrum, Oxydum ferri nigrum—f. Oxidum rubrum, Colcothar—f. Oxidum hydratum, Ferrum et Oxydum hydratum—f. Pila, F. limatura—f. et Potassæ tartras, Ferrum tartarizatum.

FERRI PHOSPHAS, *Phosphate of Iron, Ferri Sulphat.* ℥v, *Sodæ Phosphat.* ℥vj, *Aquæ*, cong. Dissolve the sulphate of iron and phosphate of

soda, severally in four pints of the water; then mix the solutions, and set the mixture by, that the powder may subside; lastly, having poured off the supernatant liquor, wash the phosphate of iron with water, and dry it with a gentle heat. —(Ph. U. S.) Dose, 5 to 10 grains as a chalybeate. Rarely used.

Ferri Protocarbonas, *Protocarbonate of Iron.* The protocarbonate of iron, thrown down from a solution of the sulphate of iron by the carbonate of soda, readily attracts oxygen and becomes converted into the sesquioxide. To prevent this, it may be associated with honey and sugar, and the mixture be reduced by evaporation to a pilular consistence. The mass constitutes the *Ferruginous Pills—Pilules ferrugineuses*, of Vallet—*Vallet's Pills.* See Pilulæ Ferri Carbonatis.

The protocarbonate is given in the same diseases as the lactate of iron. Ten or fifteen grains in the course of the twenty-four hours.

Ferri Protosulphas Viridis, F. sulphas—f. Prussias, Prussian blue.

Ferri et Quiniæ Citras, *Citrate of Iron and Quinia*, formed by the union of four parts of citrate of iron and one part of citrate of quinia, has been prescribed in cases where a combination of these tonics is indicated.

Ferri Ramenta, F. limatura—f. Rubigo, F. subcarbonas—f. Scobs, F. limatura—f. Sesquioxidum, F. subcarbonas præcipitatus.

Ferri Subcar'bonas, *F. Car'bonas, Ferrum præcipita'tum, Chal'ybis Rubi'go præpara'ta, Ferri Rubigo.* (The last two terms, as well as *Ferru'go*, are applied to the subcarbonate or rust, formed by the action of moist air on metallic iron.) A protoxide of iron, oxidized by the decomposition of water; the carbonic acid being attracted from the air. Dose, gr. v to ʒss and more.

The *Ferri Subcarbonas* may be precipitated from sulphate of iron by carbonate of soda. The following is the formula of the Pharmacopœia of the United States:—*Ferri sulph.* ʒviij; *sodæ carb.* ʒix; *aquæ bullient.* cong. Dissolve the sulphate of iron and carbonate of soda severally in four pints of the water, then mix the solutions, and having stirred the mixture, set it by that the powder may subside; having poured off the liquor wash the subcarbonate with hot water, wrap it in bibulous paper, and dry with a gentle heat. It is, also, called *Ferri sesquioxidum, Ox'idum ferri fuscum, Deuto-car'bonas Ferri fuscus, Crocus martis ape'riens*, (F.) *Safran de Mars apéritif.*

Ferri Sulphas, *Sal Martis, Vitriolum Martis, Vitriolum Ferri, Ferrum Vitriola'tum, Sulphas* vel *Protosulphas Ferri vir'idis, Calcadi'num, Cal'cator, Cal'cotar, Chalcan'thum, Calcite'a, Atramen'tum suto'rium, Vit'riol, Vitriolum viridē, An'ima Hep'atis, Sulphate of Iron, Green Vitriol, Copperas.* The Pharmacopœia of the United States directs it to be made by the action of *sulphuric* acid ʒxviij, on *Iron wire*, cut in pieces, ʒxij—*water*, a gallon—evaporating, crystallizing, and drying the crystals on bibulous paper. This salt is inodorous, and of a strong styptic taste. The crystals are light green, transparent, rhomboidal; and soluble in two parts of water. It is tonic and anthelmintic. Dose, gr. j to vj and more.

Ferri Sulphas Calcinatum, Colcothar—f. Tartarum, Ferrum tartarizatum—f. Tritoxydum, Colcothar.

Ferricus Hydras, Ferrum oxydum hydratum.

Ferrugineus, Chalybeate.

Ferruginosus, Chalybeate.

Ferrugo, Ferri subcarbonas, Ferrum oxydatum hydratum.

Ferrum, *Mars, Side'ros, Iron*, (F.) *Fer.* A metal of a bluish-gray colour; fibrous texture; brilliant and fine-grained fracture. Specific gravity 7.600 to 7.800: hard, ductile, malleable, and magnetic. The medicinal virtues of iron are tonic; producing fetid eructations, when it takes effect, owing to its meeting with acid in the stomach, which oxidizes it, and causes the evolution of hydrogen gas. When given in the metallic state, the filings are chiefly used: but the oxides and salts are most commonly employed.

Ferrum Ammonia'tum, *Mu'rias Ammo'niæ et Ferri, Flores martia'les, Flores salis ammoni'aci martia'les, Ens Martis, Ens Ven'eris Boylei, Sal Martis muriat'icum sublima'tum, Sal ammoni'acum martia'lē, Ammo'nium muriat'icum martia'tum* seu *martia'lē, Aroph Paracel'si, Calen'dulæ minera'les, Ferrum ammoniacalē, Ammoniated Iron.* (F.) *Muriate d'ammoniaque et de fer.* A submuriate of ammonia with red muriate of iron. (*Ferri Subcarb.* ʒiij; *acid muriat.* f. ʒx; *ammon. muriat.* ℔ijss; *aq. destillat.* Oiv. Mix the subcarbonate with the acid in a glass vessel and digest for two hours; then add the muriate, previously dissolved in distilled water, and having filtered the liquor, evaporate to dryness. Rub to powder.—(Ph. U. S.)) Dose, gr. iij. to gr. xv.

Ferrum Ammoniacale, F. ammoniatum—f. Borussicum, Prussian blue—f. Cyanogenatum, Prussian blue—f. Hæmatites, Hæmatites.

Ferrum Oxyda'tum Hydra'tum, *Ferri Oxidum Hydra'tum* (Ph. U. S.), *Ferrugo, Hydras Fer'ricus, Hydro-oxide of Iron, Hydrated Oxide of Iron, Hydrated peroxide of Iron, Hydrated Tritoxide of Iron.* It may be prepared by taking a solution of sulphate of iron, increasing its dose of oxygen by heating it with nitric acid, and precipitating the oxide by adding pure ammonia in excess, washing the precipitate and keeping it moist.

The following is the formula adopted by the Pharmacopœia of the United States, (1842,) *Ferri Sulph.* ʒiv; *acid, sulphuric*, f. ʒiiiss; *Liq. ammoniæ* q. s., *aquæ* Oij. Dissolve the sulphate of iron in the water, and having added the sulphuric acid, boil the solution: then add the nitric acid in small portions, boiling the liquid for a minute or two after each addition, until the acid ceases to produce a dark colour. Filter the liquid, allow it to cool, and add the liquor ammoniæ in excess, stirring the mixture briskly, wash the precipitate with water, until the washings cease to yield a precipitate with chloride of barium, and keep it close in bottles with water sufficient to cover it.

It has been brought forward, of late, as an antidote to arsenic; and many cases of its efficacy have been published.

From 10 to 20 parts of the hydrated oxide would seem to be more than sufficient to convert 1 part of arsenious acid into the basic salt of iron.

Ferrum Oxydulatum Hydrocyanicum,

Prussian blue—f. Potabile, F. tartarizatum—f. Præcipitatum, Ferri subcarbonas.

Ferrum Tartariza'tum, *Tartras Potas'sæ et Ferri, Tar'tarum Ferri, Ferri et Potassæ Tartras, Tar'tarus chalybea'tus, Mars solu'bilis, Tartras kal'icofer'ricus, Chalybs tartariza'tus, Tartarus martia'lis, Tartras Potas'sæ ferrugino'sus, Ferrum potabi'lē, Globus martia'lis.* (F.) *Boule de Mars, Boule de Nancy, B. de Molsheim, B. d'Acier, Glob'uli Tar'tari martia'les* seu *martia'les solu'ti* seu *martia'ti* seu *tar'tratis ferri et lixi'æ, Boli Martis, Pyri martia'les, Tartarized Iron, Tartrate of Potass and Iron, (Ferri subcarb.* ℥iij. *Acid. muriat.* f. ℥x; *Liquor Potassæ,* Ovss; *Potass. Bitart.* ℥vijss, *Aquæ destillat.* cong. iss. Mix the subcarbonate of iron and the muriatic acid, and digest for two hours; pour the solution into a gallon of the distilled water; set aside for an hour, and pour off the supernatant liquor. To this add the liquor potassæ; wash the precipitate formed frequently with water, and while yet moist, mix it with the bitartrate of potassa and half a gallon of the distilled water. Keep the mixture at the temperature of 140° for 30 hours, frequently stirring; filter the solution, and evaporate by means of a water bath, at the same temperature, to dryness.—(Ph. U. S.) It is one of the mildest of the salts of iron, and not unpalatable. Dose, gr. x. to ℥ss.

The *Tinctu'ra Martis Aperitī'va, Tincture of Ludwig; Al'cohol cum Sulphatē Ferri tartarisa'tus; Tinctura Martis Glauberi* is, essentially, an aqueous solution of this salt. It is also called *Eau de Boule*, and is used in contusions.

Helvetius's Styptic was composed of the *filings of iron and tartar*, mixed to a proper consistence with French brandy. It was called in England *Eaton's Styptic;* but this is now formed of *Sulphate of Iron.*

Ferrum Vitriolatum, Ferri sulphas—f. Vitriolatum ustum, Colcothar—f. Zooticum, Prussian blue.

FER'ULA, *Fanon, Palette,* Splint—f. Africana, Bubon galbanum—f Asafœtida, see Asafœtida—f Persica, see Sagapenum.

FETUS, Fœtus.

FEU ACTUEL, Cauterium—*f. Persique,* Herpes zoster, see Anthrax—*f. Potential,* see Cauterium—*f. Sacré,* Erysipelas—*f St. Antoine,* Erysipelas—*f. Sauvage,* Ignis sylvaticus—*f. Volage,* Ignis sylvaticus.

FEUX DE DENTS, Strophulus—*f. Volages,* Porrigo larvalis.

FÈVE, Vicia faba—*f. de Carthagène,* Habilla de Carthagena—*f. a Cochon,* Hyoscyamus—*f. Épaisse,* Sedum telephium—*f. des Marais,* Vicia faba—*f. de Sainte Ignace,* Ignatia amara—*f. Purgatif,* Ricinus communis.

FEVER, *Febris,* from *fervor,* 'heat,' or from *februo,* 'I purify:' *Pyr, Pyr'etos,* πυρετος, (F.) *Fièvre.* One of the most frequent and dangerous affections to which the body is liable. A person has an attack of fever, when he is affected with rigors, followed by increased heat of skin quick pulse, languor, and lassitude. Rigors, increased heat, and frequency of pulse have each been assumed as the essential character of fever. It is not characterized, however, by any *one,* but depends upon the coexistence of *many* symptoms. Fevers have been usually divided into *idiopathic* or *essential,* and into *symptomatic.* The idiopathic arise without any obvious local cause. The symptomatic are dependent upon local irritation. Idiopathic fevers may be divided into three classes: 1. Those attended with distinct paroxysms:—intermittents. 2. Remittent and continued fevers: and, 3. Fevers, complicated with eruptions, or the exanthematous. These divisions admit of great variety, owing to climate, season, soil, age, &c. All ages and climates are liable to fever; and its exciting causes are very numerous. These causes may be *common;* as irritations in the intestines; external injuries, stimulants, &c.; or they may be *specific;* as miasmata, contagion, &c. The greatest diversity has prevailed regarding the theory of fever. Its primary seat has been placed in the brain, mucous membrane of the stomach and intestines, skin, nerves, blood-vessels, liver, vena cava, pancreas, &c. It would seem, however, that although, in fever, the whole of the functions are morbidly impressed, the arguments in favour of the impression being first made on the nervous system and the capillary system of vessels are the strongest. The exciting cause of fever, whatever it may be, produces an irregular action of the capillary system, which is soon conveyed to the rest of the system, owing to the extensive sympathy which exists between every part of the body; and it is probable, that all those local inflammations and congestions are the consequence, rather than the cause, of this disordered condition of the system. The general character of fever is clearly shown by examination of the blood. When fever is devoid of inflammatory complication, the quantity of fibrin is in no case augmented. It frequently remains in the healthy proportion, and at times diminishes to an extent not met with in any other acute disease. The alteration of the blood in fevers, which consists generally in a diminution of the fibrinous element, is the reverse of what occurs in inflammation.

Many phenomena of fever are influenced by that *periodicity,* which we notice in the execution of several of the functions of the body. The types of intermittents are strong evidences of such an influence.

In the *treatment* of fever, it is important, 1. To bear in mind its tendency, particularly in the case of the exanthemata, to run a definite course, and terminate in restoration to health. 2 The disposition to local determination or hyperæmiæ:—the most frequent cause of the fatal termination of fever; a circumstance requiring the vigilant attention of the physician. 3. That the symptoms must be attentively studied, in order to deduce, as far as possible from them, the indications of cure. Lastly, attention must be paid to the prevalent epidemic. There are particular seasons in which fevers are very malignant; and others in which they are as mild; circumstances which necessarily have an effect upon the treatment.

Fever, Ade'no-Menin'geal, *Febris ad'nomeningea, Febris mesenter'ica* (Baglivi.) *Morbus muco'sus, Febris muco'sa; Pitu'itous Fever, Catar'rhal Fever, Contin'ued Lymphat'ic Fever, Phlegmap'yra, Phlegmopyra, Phlegmatopyra, Gastro-Bronchi'tis.* Fever, accompanied with

considerable mucous secretion; especially from the digestive tube.

Fever, Anom'alous, *Febris anom'alus, F. errat'ica, F. irregula'ris, F. vaga.* A fever, whose progress and type are irregular.

Fever, Aphon'ic, *Febris apho'nica.* A variety of intermittent, in which the voice is lost during the paroxysm.

Fever, Apoplec'tic, *Febris apoplec'tica, Com'atose Fever, Febris comato'des, F. Lethar'gica, F. sopora'sa.* An intermittent or continued fever, attended with apoplectic symptoms.

Fever, Artific''ial, *Febris artificia'lis, Febris artē promo'ta.* Fever produced designedly by the internal or external use of stimulants.

Fever, Articular, Eruptive, Dengue—f. Articular, rheumatic, Dengue.

Fever, Asthen'ic, *Febris asthen'ica.* Fever, accompanied with debility. It may include every variety of fever under certain circumstances, but is generally appropriated to typhus.

Fever, Asthmat'ic, *Febris asthmat'ica.* A pernicious intermittent, accompanied with symptoms of asthma.

Fever, Ataxo-adynam'ic; *Febris atax'o-adynam'ica.* Fever characterized by symptoms of ataxia and adynamia.

Fever, Barcelona, Fever, yellow—f. Bastard, Illegitimate fever.

Fever, Bilious, *Febris bilio'sa, F. polychol'ica, Syn'ochus bilio'sus, F. aso'des, F. choler'ica, F. gas'trica, F. hepat'ica, Cholep'yra, Febris cholepyret'ica.* The common remittent fever of summer and autumn; generally supposed to be owing to, or connected with, derangement of the biliary system.

Fever, Bilious Remitting, Yellow, Fever, yellow—f. Bladdery, Pemphigus—f. Bouquet, Dengue—f. Brain, F. cerebral, Phrenitis—f. Bucket, Dengue—f. Bulam, Fever, yellow—f. Camp, Typhus gravior.

Fever, Cardial'gic, *Febris cardial'gica.* A variety of pernicious intermittent, accompanied with violent cardialgia during the paroxysm.

Fever, Carditic. Intermittent fever, accompanied with pain at the heart.

Fever, Catarrhal, F. adeno-meningeal.

Fever, Cephalal'gic, *Febris cephalal'gica.* A pernicious intermittent, accompanied with intense pain of the head. Also, intermittent cephalalgia.

Fever, Cer'ebral, *Brain fever.* Fever, generally of an ataxic character, in which the brain is considerably affected.

Fever, Childbed, Fever, puerperal, Puerperal fever—f. Childbed, Low, see Peritonitis.

Fever, Chol'eric, *Febris choler'ica.* A variety of pernicious intermittent, accompanied with symptoms of cholera morbus.

Fever, Choleric, of Infants, Cholera infantum.

Fever, Chronic, *Febris chron'ica.* Some authors apply this name to protracted fevers; others to hectic fever.

Fever, Colliq'uative, *Febris tab'ida, Febris colliquati'va.* Fever, characterized by rapid emaciation, copious evacuations, and rapid prostration of strength.

Fever, Comatose, F. apoplectic—f. Continent, see Continent—f. Continued, common, Synochus.

Fever, Conges'tive, *Febris congesti'va.* Fever accompanied by obscure symptoms; or by great oppression and depression; in which it is difficult—and often impossible—to induce reaction. Congestive fevers occur in various parts of this country, especially in the fall; and they are very common in India.

Fever, Continent, see Continued fever—f. Continual, see Continued fever.

Fever, Convul'sive, *Febris convulsi'va.* A pernicious intermittent, accompanied by convulsions.

Fever, Delir'ious, *Febris cum delir'io,* (F.) *Fièvre délirante.* A pernicious intermittent, characterized by delirium in the paroxysms.

Fever, Dep'uratory, *Febris depurato'ria.* A fever, to which was attributed the property of purifying the blood; or which indicated, that such a supposed depuration had occurred

Fever, Diaphoret'ic, *Febris diaphoret'ica, Febris sudato'ria.* A pernicious intermittent, with excessive sweating during the fit.

Fever, Diges'tive. The chilliness, followed by increased heat and quickness of pulse, which frequently accompanies digestion.

Fever, Double, (F.) *Fièvre double* ou *doublée.* An intermittent, which has two paroxysms in a given time, instead of one.

Fever, Double-Quartan. A fever, whose paroxysms occur two days in succession, and fail the third day: the first paroxysm resembling the 4th; and the second the 5th.

Fever, Double-Quotidian. An intermittent, whose paroxysms return twice every day at corresponding hours.

Fever, Double-Tertian. An intermittent, whose paroxysms return every day; the first corresponding with the 3d, the second with the 4th, and so on.

Fever, Duodec''imane, *Febris duodecimana.* A supposititious intermittent, whose paroxysms recur on the 12th day, or every 11 days.

Fever, Epilep'tic, *Febris epilep'tica.* A variety of pernicious intermittent, accompanied with attacks of epilepsy.

Fever, Erot'ic, *Febris erot'ica,* (F.) *Fièvre d'amour.* A chronic fever, occasioned by unpropitious love.

Fever, Errat'ic, *Febris errat'ica.* An intermittent, the recurrence of whose paroxysms is irregular.

Fever, Eruptive, Exanthematica—f. Eruptive articular, Dengue.

Fever, Gan'grenous, *Febris gangræno'des.* Fever, accompanied by gangrene of various parts, and especially of the limbs and genitals. Sénac describes an intermittent of this kind.

Fever, Gastral'gic. An intermittent accompanied with acute burning tearing pain at the stomach.

Fever, Gastric, *Febris gas'trica, Stomach'ic fever, Syn'ochus Bilio'sa.* A name, given by some to *bilious fever,* which has appeared to them to be dependent on an affection of the stomach. Also, called *Menin'go-gastric fever; Harvest fever,* (F.) *Fièvre de la Moisson.*

Fever, Gastro-Adynam'ic, *Febris gastro-adynam'ica.* A fever, in which the symptoms of bilious fever are joined with those of adynamic fever.

Fever, Gastro-Angioten'ic. A fever, in which the symptoms of the bilious are united with those of the inflammatory fever.

Fever, Gastro-Ataxic. A fever, in which

the symptoms of bilious fever are united with those of ataxic fever.

Fever, Gibraltar, Fever, yellow—f. Harvest, F. Gastric.

Fever, Hæmop'toic, *Febris hæmopto'ica.* A variety of masked intermittent, in which periodical hæmoptysis is the chief symptom.

Fever, Hay, *Catarr'hus æsti'vus, Summer Catarrh, Hay Asthma, Rose Catarrh, Summer Bronchi'tis.* A catarrh to which certain persons are subject in summer, and which has been ascribed in England to the effluvium of hay, but this is not the probable cause. It is a catarrh with sneezing, headache, weeping, snuffling and cough, with, at times, fever and general discomfort. It is not uncommon in this country. It disappears spontaneously,—to recur on subsequent years about the same period.

Fever, Hebdom'adal. A suppositious fever, whose paroxysms return weekly, and on the same day.

Fever, Hectic, see Consumption, and Hectic Fever.

Fever, Hepatic or Hepatal'gic. A pernicious intermittent, with violent pain in the right hypochondrium.

Fever, Hill. A modification of remittent, occurring in the hilly districts of India.

Fever, Hospital, Typhus gravior.

Fever, Hu'moral, *Febris humora'lis.* Fever, in which an alteration or deterioration of the humours is suspected.

Fever, Hun'gary, *Febris Hungar'ica, Morbus Ungar'icus, Cephalon'osus,* (F.) *Fièvre Hongroise* ou *de Hongrie.* An endemic typhus, common amongst the soldiers in barracks, in Hungary.

Fever, Hydrophob'ic, *Febris hydrophob'ica.* Pernicious intermittent with dread of liquids.

Fever Hyster'ic, *Febris hyster'ica.* Hysteria, accompanied by fever. Hysteria, occurring with each paroxysm of intermittent.

Fever, Icter'ic, *Febris icter'ica.* Fever, accompanied by jaundice. Some intermittents exhibit this complication at each paroxysm.

Fever Infantile, Remittent, *Febris infan'tum remittens.* A fever occurring in childhood, which often assumes many of the characters of hydrocephalus. It appears generally to be dependent upon a morbid condition of the stomach and bowels.

Fever, Inflammatory, Synocha—f. Intermittent, see Intermittent fever.

Fever Insid'ious. Fever, which, at first, seems devoid of danger, but subsequently becomes of a more or less malignant character.

Fever, Jail, Typhus gravior — f. Jungle, see Jungle fever.

Fever, Lo'chial, *Febris lochia'lis.* That acceleration of the circulation which sometimes occurs during the discharge of the lochia.

Fever Lymphatic, Continued, F. adenomeningeal.

Fever Malignant, *Febris malig'na.* Fever which makes its approaches insidiously, and subsequently becomes formidable. Any fever which exhibits a very dangerous aspect.

Fever, Malignant. Typhus gravior—f. Malignant, pestilential, Fever, yellow—f. Marsh, Elodes, (febris.)

Fever, Masked, *Febris larva'ta,* (F.) *Fièvre larvée, Dead Ague, Dumb Ague.* Anomalous intermittent, the paroxysms of which have not the regular stages.

Fever Meningo-gastric, Fever gastric.

Fever Mesenteric, *Febris mesenter'ica.* A name given, by Baglivi, to a species of fever which appears to have belonged either to the *mucous* or *bilious.*

Fever Milk, *Febris lac'tea,* (F.) *Fièvre de lait* ou *laiteuse, F. Lactée; Galactop'yra.* The fever, which precedes or accompanies the secretion of milk in women recently delivered. It comes on generally about the third day after delivery, and is characterized by quick pulse; increased heat; redness of face; diminution or temporary suppression of the lochial discharge; tumefaction and tension of the breasts. It commonly terminates in twenty-four hours, and often with profuse perspiration. It requires the use of antiphlogistics, with dry diet.

Fever, Mixed, Synochus.

Fever Nephrit'ic, *Febris nephret'ica.* Intermittent fever, accompanied with nephritic pain during the paroxysm.

Fever, Nervous, *Febris nervo'sa, Febris lenta nervo'sa.* A variety of Typhus; the *Typhus mitior* (q. v.) of Cullen. By many, however, it is esteemed a distinct disease. See Typhoid fever.

Fever, Non'ane, *Febris nona'na.* A suppositious fever, whose paroxysms recur every ninth day, or every eight days.

Fever, Oc'tane, *Febris octa'na.* An intermittent, whose paroxysms recur every eighth day.

Fever, Period'ical, *Febris period'ica.* An intermittent or remittent fever.

Fever, Pernic''ious, *Febris pernicio'sa.* Intermittent fever, when attended with great danger, and which destroys the majority of those affected by it in the first four or five paroxysms; sometimes in the very first.

Fever, Pestilen'tial, *Febris pestilentia'lis.* The *Plague.* Also a severe case of typhus. The yellow fever and sweating sickness have, likewise, been thus designated.

Fever, Pitu'itous, F. adeno-meningeal.

Fever, Pleurit'ic; an intermittent or remittent, accompanied with inflammation of the pleura.

Fever, Pneumon'ic; an intermittent, accompanied with inflammation of the lungs.

Fever, Puer'peral, *Febris puerpera'lis, Childbed fever,* (F.) *Fièvre puerpérale.* This name has been given to several acute diseases, supervening after delivery. It means, generally, a malignant variety of peritonitis, which runs its course very rapidly, and passes into a typhoid condition, unless met, at the very onset, by the most active depleting measures. By the generality of practitioners, it is esteemed to be eminently contagious; some, however, deny that it is so. See Peritonitis and Puerperal fever.

Fever, Puerperal, Adynamic, or Malignant, see Peritonitis.

Fever, Puking, Milk sickness.

Fever, Pu'rulent, *Febris purulen'ta.* Fever, which accompanies suppuration.

Fever, Putrid, Typhus gravior.

Fever, Quintan, *Febris quinta'na.* A fever, whose paroxysms return every fifth day. It is seen rarely, if ever.

Fever, Quotid'ian, *Febris quotidia'na.* A fever, whose paroxysms recur daily.

Fever, Red Tongue, see Typhus.

Fever, Regular, *Febris regula'ris.* An intermittent whose paroxysms follow a determinate type. It is opposed to *atypic.* Sometimes opposed to *anomalous.*

Fever, Remittent, see Remittent Fever—f. Remittent, infantile, see Fever, infantile remittent.

Fever, Rheumat'ic, Rheumatism, acute—f. Root, Triosteum perfoliatum.

Fever, Scorbu'tic, *Febris scorbu'tica.* The febrile movement, which sometimes accompanies scorbutus or scurvy.

Fever, Secondary. A febrile condition, which recurs in certain affections after having ceased; such as the secondary fever, which comes on at the time of the maturation of the variolous pustules, or after the eruption of scarlatina, &c., has disappeared.

Fever, Septan, *Febris septa'na.* An intermittent, whose paroxysms recur every six days, and consequently on the seventh.

Fever, Sextan, *Febris sexta'na.* A fever, which recurs every five days, and consequently on the sixth.

Fever, Simple, *Febris simplex.* Simple fever is that which has no predominant character—bilious, inflammatory, or nervous; and which is unaccompanied by any local determination, hyperæmia, or complication. It may be continued, remittent, or intermittent.

Fever, Simple Continued. This is the most favourable form of continued fever, and has a tendency to wear itself out, provided only the *lædentia* be avoided. The prognosis is consequently favourable, and the treatment simple; consisting in perfect repose of body and mind, abstinence, and relieving the thirst by cold acidulated drinks.

Fever, Singul'tous, *Febris singulto'sa.* Fever, accompanied with singultus or hiccough.

Fever, Spotted, Typhus gravior.

Fever, Ster'coral, *Febris stercora'lis.* Fever, produced by an accumulation of fæces in the intestines.

Fever, Stomachic, Gastric Fever.

Fever, Strangers'. Yellow, or remittent fever, which is endemic in certain places, and to which strangers are especially liable.

Fever, Subintrant, *Febris subin'trans.* An intermittent, in which one paroxysm is scarcely finished before the other begins.

Fever, Sweating, Sudor Anglicus.

Fever, Syn'copal, *Febris syncopa'lis, F. minu'ta,* (F.) *Fièvre syncopale.* A variety of pernicious intermittent, in which there is, in every paroxysm, one or more faintings.

Fever, Syphilit'ic, *Febris syphilit'ica.* Fever, accompanying syphilis, or supposed to be owing to a syphilitic taint.

Fever, Ter'tian, *Febris tertia'na.* A fever, whose paroxysm returns on the third day, and consequently every two days.

Fever, Trag''ic, *Febris Trag''ica.* A low fever, in which the patient declaims like an actor during the delirium.

Fever, Traumat'ic, *Febris traumat'ica.* The fever, which supervenes on wounds or great surgical operations.

Fever, Typhoid, of India, Cholera.

Fever, Ver'minous, *Febris Vermino'sa, Helminthop'yra, worm fever.* Fever, produced by the presence of worms in the digestive tube, or accompanied by their expulsion.

Fever, Vernal, *Febris verna'lis.* An intermittent or other fever occurring in the spring. Vernal intermittents were formerly considered salubrious.

"An ague in the spring
Is physic for a king."

Fever, Vesicular, Pemphigus.

Fever, Walcheren, *Gall-sickness.* The remittents and intermittents to which the British troops were exposed, who were attached to the expedition to Walcheren, in 1809.

Fever, Winter, see Tongue, black.

Fever, Worm, Verminous F.

Fever, Yellow, *Febris flava, F. America'na, Pestis occidenta'lis, Vom'itus niger, Epan'etus malignus flavus, Remitt'ens ictero'des, Tritæophy'a America'na, Typhus ictero'des, F. trop'icus, F. contin'ua pu'trida ictero'des Caroliniensis, Elo'des ictero'des, Febris malig'na bilio'sa Americæ, Ochrop'yra, Syn'ochus ictero'des, Fièvre matelote, Febris malig'na flava In'diæ Occidenta'lis, Endé'mial Causus of the West Indies, Causus trop'icus endem'icus, Bilious remitting yellow fever, Malig'nant pestilen'tial fever, Fièvre jaune d'Amerique, Fièvre gastro-adynamique, Typhus miasmatique ataxique putride jaune, Vomito prieto, Vomito negro, Mal de Siam, Fièvre de la Barbade, F. de Siam, F. Ictérique, F. Gastro-hépatique, Hæmagas'tric Pes'tilence, Black vomit, Febris toxica, Febris tropica, Typhus d'Amérique, Bulam Fever, Gibraltar Fever, Barcelona Fever.* A very acute and dangerous febrile affection; so called, because complicated, in its second stage, with jaundice, and accompanied by vomiting of black matter. Sauvages, Cullen, and others regard it as a variety of typhus; and Pinel as a species of gastro-adynamic, or bilious putrid fever. It occurs, endemically, only within the tropics; but it has been met with epidemically in the temperate regions. Broussais regards the disease as gastro-enteritis, exasperated by atmospheric heat; so that it runs through its stages with much greater rapidity than the gastro-enteritis of our climates. The yellow colour of the skin, according to him, is owing to the inflammation of the small intestine,—and especially of the duodenum,—augmenting the secretion of the liver, and at the same time preventing its discharge into the duodenum. The pathology of this affection, as well as its origin, is still unsettled. The treatment must generally be of the most active nature at the onset; consisting in bleeding largely, and exhibiting mercury so as to excite a new action, if possible;—the other symptoms being combated according to general principles. It must vary, however, according to the epidemic.

FEVERBUSH, Laurus benzoin, Prinos.

FEVERFEW, Matricaria.

FE'VERISH, *Feb'riens, Febrico'sus,* (F.) *Fiévreux* from *febris,* 'fever.' That which causes fever, as *feverish food, feverish diathesis,* &c. Also, the state of one labouring under fever.

FEVERROOT, Pterospora andromedea.

FEVERTREE, Pinckneya pubens.

FEVERWOOD, Laurus benzoin.

FEVERWORT, Eupatorium perfoliatum, Triosteum.

FIBER, Castor fiber.

FIBRA AUREA, Coptis—f. Sanguinis, Fibrin.

FIBRE, *Fibra, Is, Ctedon, Filum, Filamen'tum.* An organic filament, of a solid consistence, and more or less extensible, which enters into the composition of every animal and vegetable texture. The *simple* or *elementary fibre* of the ancients, from a particular assemblage and arrangement of which every texture of the body was conceived to be constituted, seems entirely ideal. The moderns usually admit, with Haller and Blumenbach, *three elementary fibres* or *tissues.* 1. The *cellular* or *laminated*, formed chiefly of thin plates, of a whitish colour and extensible, which seems to consist of concrete gelatin. 2. The *nervous, pulpy,* or *med'ullary,* formed of a soft substance, contained in a cellular sheath, and consisting of albumen united to a fatty matter. 3. The *muscular,* composed of round filaments, of a grayish or reddish colour, and formed of fibrin. Chaussier has added to these the *albugineous fibre,* but it seems to differ from the cellular fibre only in greater condensation of the molecules.

A very small fibre is called a *Fibril, Fibrilla.*

Fibre, Albugineous, see Albuginea.

FIBRIL, see Fibre.

FI'BRIN, or *Fib'rin, Fibrine, Fibrina, Fibra san'guinis, Mate'ria fibro'sa, Lympha plastica.* An immediate animal principle—solid, white, and inodorous; insipid; heavier than water; without action on the vegetable blues: elastic, when moist; hard and brittle when dry. It enters into the composition of the chyle and the blood, and forms the chief part of the muscles of red-blooded animals. In certain diseased actions, *Fibrin* or *Coagulable lymph, gluten,* is separated from the blood, and is found in considerable quantity on the surfaces of membranes, and in the cavities of the body. Fibrin is likewise a proximate principle of vegetables, and differs but little in chemical composition from animal fibrin; nor does it differ much from albumen and casein. It is, however, more organizable than either. Albumen, indeed, possesses no plastic powers; but it appears to be converted into fibrin, which acquires such powers by some peculiar action of the living tissue.

Fibrin is very nutritious.

FIB'RINOUS, *Fibrino'sus.* That which is composed of fibrin, or has the appearance of fibrin.

FIBRO CARTILAGE, *Fibro-cartila'go.* An organic tissue, partaking of the nature of the fibrous tissue, and of that of cartilage. It is dense, resisting, elastic, firm, supple, and flexible. Fibro cartilages are distinguished into,—1. *Membraniform,* or those which serve as moulds to certain parts, as the alæ nasi and eyelids. 2. *Vaginiform,* or those which form sheaths for the sliding of tendons. 3. *Interarticular,* those which are met with in the moveable articulations. 4. *Uniting,* (F.) *Fibro-cartilages d'union,* which form a junction between two bones, as the symphysis pubis. Fibro-cartilages are, sometimes, formed adventitiously, as the result of a morbid process in different organs.

Fibro-Cartilages, Tarsal, see Tarsus.

FIBRO-MUCOUS, *Fibro-muco'sus.* Fibrous membranes, intimately united with other membranes of a mucous nature, as the *pituitary membrane,* the *membrane of the urethra.*

FIBRO-SEROUS, *Fibro-sero'sus.* Possessing the nature of fibrous and serous membranes. Membranes, composed of a fibrous, and a serous sheet, intimately united:—as the *Dura Mater, Pericardium, Tunica albuginea testis,* &c.

FI'BROUS, *Fibro'sus.* Composed of fibres. Certain membranes, as the dura mater, periosteum, ligamentous capsules of the joints, &c. are *fibrous.* The *fibrous system* of Bichat includes the system of organs, formed by the *albugineous fibre* of Chaussier. It comprises, particularly, the periosteum and perichondrium; the articular capsules and ligaments; the tendons; the dura mater, pericardium, tunica sclerotica, tunica albuginea testis, outer membrane of the spleen, &c.

Fibrous Membranes, see Membranes, fibrous.

FIB'ULA, *Cruris radius, Canna minor, Os perone'ē, Foc'ile minus, Sura, Arun'do minor, Fist'ula Cruris, Tib'ia min'ima,* 'a clasp.' The *splinter bone* of the leg. (F.) *Péroné.* The long, small bone, situate at the outer part of the leg. The superior or tibial extremity of the fibula is rounded and forms the *caput* or *head.* It is articulated with the tibia. Its inferior or tarsal extremity is broader than the superior. It is articulated with the tibia and astragalus, and forms the *malleolus externus* or *outer ankle* by means of its *coronoid process.* The body of the bone has three faces, having more or less prominent edges. It is separated from the tibia by the interosseous space, and is developed by three points of ossification; one at the body, and one at each extremity. It prevents the foot from turning outwards.

FIBULATIO, Infibulatio.

FIC, Ficus.

FICAIRE, Ranunculus ficaria.

FICARIA, Scrophularia aquatica—f. Ranunculoides, Ranunculus ficaria.

FICATIO, Ficus.

FICOSA EMINENTIA, Ficus.

FICUS, *Syco'sis, Syco'ma, Fica'tio, Fico'sus Tumor, Fico'sa eminen'tia, Matris'ca,* (F.) *Fic.* A fleshy excrescence, often soft and reddish, sometimes hard and scirrhous, hanging by a peduncle, or formed like a fig; occurring on the eyelids, chin, tongue, anus, or organs of generation. The fici seated on the last mentioned parts, are generally of a syphilitic character.

Ficus, F. Carica.

Ficus Car'ica. The systematic name of the fig tree, (F.) *Figuier, Carica, Ficus, Ficus vulga'ris, Ficus commu'nis, Syce,* συκη, (F.) *Figue.* The fig—*Ficus,* (Ph. U. S.)—is a pleasant fruit when ripe; as well as when dried in the state in which it is found in the shops. It is used, at times, in place of a cataplasm; especially in gum boils.

Ficus Indiæ Grana, Coccus cacti—f. Indica, Musa paradisiaca, see Caoutchouc and Lacca.

Ficus Religiosa, see Lacca.

FIDGETS. Of doubtful etymology. *Dysphor'ia simplex, D. nervo'sa, Erethis'mus simplex, Tituba'tio,* (F.) *Frétillement.* General restlessness and troublesome uneasiness of the nerves and muscles; with increased sensibility, and inability of fixing the attention, accompanied with a perpetual desire of changing the position. See *Agacement des Nerfs.*

FIDICINALES, Lumbricales manus.

FIEL, Bile.

FIELDWEED, Anthemis cotula, Erigeron Philadelphicum.

FIÈVRE, Fever—*f. d'Accès*, Intermittent fever—*f. Adynamique*, Typhus—*f. Algide*, see Algidus—*f. d'Amour*, Fever, erotic—*f. Angeioténique*, Synocha—*f. Annuelle*, see Annual Diseases—*f. Ardent*, Ardent fever, Synocha—*f. Ataxique*, Typhus—*f. de la Barbade*, Fever, yellow—*f. des Camps*, Typhus gravior—*f. Catarrhale*, Catarrh—*f. Cérébrale*, Cerebral fever—*f. Cérébrale des Enfans*, Hydrocephalus internus—*f. Cholérique*, Choleric, (fever)—*f. de Consomption*, see Consumption—*f. Continente inflammatoire*, Synocha—*f. Délirante*, Fever, delirious—*f. Double*, Fever, double—*f. Doublée*, Fever, double—*f. Entéro-mesentérique*, Typhoid fever—*f. Étique*, Hectic fever—*f. Gastro adynamique*, Fever, yellow—*f. Gastro-hépatique*, Fever, yellow—*f. Hectique*, Hectic fever—*f. de Hongrie*, Fever, Hungaric—*f. d'Hôpital*, Typhus gravior—*f. Ictérique*, Fever, yellow—*f. Inflammatoire*, Synocha—*f. Intermittente*, Intermittent fever—*f. Irritative*, Synocha—*f. Jaune d'Amérique*, Fever yellow—*f. Lactée*, Fever, milk—*f. de Lait*, Fever, milk—*f. Laiteuse*, Fever, milk—*f. Larvée*, Fever, masked—*f. Lenticulaire*, Typhus gravior—*f. du Levant*, Plague—*f. des Marais*, Intermittent Fever—*f. Matelotte*, Fever, yellow—*f. Mésentérique*, see Typhus—*f. de la Moisson*, Fever, gastric—*f. Sanguine*, Synocha—*f. Semitierce*, Hemitritæa—*f. de Siam*, Fever, yellow—*f. Suante*, Sudor Picardicus—*f. Syncopale*, see Fever syncopal, and Syncopal—*f. Tierce*, Tertian fever.

FIÈVREUX, Feverish.

FIG, INDIAN, Cactus opuntia.

FIGUE, Ficus carica.

FIGUIER, Ficus carica—*f. d'Inde*, Cactus opuntia.

FIGURATIO, Imagination.

FIGURE, Countenance.

FIGURÉ, (F.) An epithet for a compressive bandage, applied over the head after bleeding from the frontal vein. It has also been called *bandage royal*.

FIGWORT, Scrophularia nodosa—f. Water, greater, Scrophularia aquatica.

FIL'AMENT, *Filamen'tum*, from *filum*, 'a thread.' This word is used synonymously with *fibril*; thus, we say, a *nervous* or *cellular filament*. Also, the glairy, thread-like substance, which forms in the urine in some diseases, and which depends on a particular secretion from the mucous membrane of the urinary passages.

FILAMENTUM, Fibre, Frænum.

FILARIA HOMINIS BRONCHIALIS, see Worms—f. Medinensis, Dracunculus—f. Oculi, see Worms.

FILELLUM, Frænum.

FILET (DE LA LANGUE.) Frænum—*f. de la Verge*, Frænum penis—*f. Opération du*, see Frænum.

FILICULA, Polypodium filix mas.

FIL'IFORM, *Filiform'is*, from *filum*, 'a thread,' and *forma*, 'form;' having the shape of a thread; as the *filiform papil'læ* of the tongue. See Papillæ.

FILIPENDULA, Spiræa filipendula.

FILIUS ANTE PATREM, Tussilago.

FILIX FŒMINEA, Pteris aquilina—f. Florida, Osmunda regalis—f. Mas, Polypodium filix mas—f. Nymphæa, Pteris aquilina—f. Veneris, Adiantum pedatum.

FILLE, Girl.

FILLET, Fascia.

FILTRA'TION, *Filtra'tio*, *Percola'tio*. A pharmaceutical operation, which consists in passing a fluid through a filter or strainer, for the purpose of clarifying it. In ancient physiology, it meant the action by which the different humours of the body are separated from the mass of blood.

FILTRUM. A *filter*. Any porous material; such as *sand*, some kinds of *freestone*, powdered *charcoal*, pounded *glass*, *flannel*, unsized *paper*, &c., through which a fluid is passed for the purpose of separating it from the matters suspended in it.

FILUM, Fibre—f. Tæniaforme, Tæniola.

FIM'BRIA, *Parar'ma*. A band; a fringe; as the fimbria or fimbriated extremity of the Fallopian tube.

FIMBRIÆ CARNOSÆ COLI, Epiploic appendages.

FIMUS, *Stercus*, *Dung*.

FIMUS seu STERCUS AN'SERIS or *Goose-dung*, was applied as a poultice to the feet in malignant fever. See Chenocoprus.

FIMUS EQUI'NUS, *Stercus equi non castra'ti*, *Stone horse-dung*, was once thought anti-pleuritic.

FIMUS VACCÆ, or *Cow-dung*, was employed as a cataplasm, especially in gout.

FINCKLE, Anethum.

FINGER, Digitus—f. Ring, Annular finger—f. Stall, Digitale.

FINIS ASPERÆ ARTERIÆ, Larynx.

FIOLE, Phiala.

FIR-MOSS, UPRIGHT, Lycopodium selago—f. Scotch, Pinus sylvestris—f. Spruce Norway, Pinus abies—f. Tree, silver, European, Pinus picea—f. Yew-leaved, Pinus abies.

FIRE, PERSIAN, Anthracion—f. St. Anthony's, Erysipelas—f. Weed, Senecio.

FISHSKIN, Ichthyosis.

FISH TONGUE. An instrument—so called from its shape—used by some dentists for the removal of the dentes sapientiæ.

FISSICU'LATIO, from *fissiculare*, 'to cut off,' 'open,' 'make incisions.' An old word for an opening made with a scalpel.

FISSIPAROUS, see Generation.

FISSURA CAPILLORUM, Distrix—f. Contrajacens, Contra-fissura—f. Pilaris, Trichismus.

FISSURE, *Fissu'ra*, from *findere*, 'to cleave;' a long and narrow cleft or opening in a bone—*Rhage*, ῥαγη, *Ceasma*, κεασμα. (F.) *Fissure*, *Fente*. See Rhagades.

FISSURE, CAPILLARY, see Pilatio—f. of Glaserius—f. Glenoid.

FISSURE, CENTRAL, is the aggregate of the cavities or ventricles of the brain. Meckel considers this but one cavity in the form of a cross.

Fissure, Glenoid, or *Fissure of Glase'rius*, (F.) *Fissure* ou *Scissure de Glaser*, *Fente glenoïdale* ou *Félure de Glaser*, divides the glenoid cavity of the temporal bone into two parts, and gives passage to the chorda tympani, &c.

Fissure of Rolan'do. A transverse fissure placed between two superior cerebral convolutions, which are met with above the fissure of Sylvius.

Fissure, Semilu'nar. A notch at the anterior edge of the cerebellum, where it receives fibres which connect it to the cerebellum and mesocephalon.

Fissure of Sylvius, *Fissura* vel *Fossa Magna Sylvii*. A deep, narrow sulcus, which ascends obliquely backwards from the temporal ala of the sphenoid bone near to the middle of the parietal bone; and which parts the anterior and middle lobes of the cerebrum on each side.

Fissure Orbitar, Inferior, Spheno-maxillary fissure—f. Orbitar, superior, Sphenoidal Fissure—f. of Sylvius, Ventricle, fifth.

Fissure. Same etymon: 1. A fracture, *Catag'ma fissu'ra*, in which the bone is cracked, not separated, as in fracture. 2. A narrow, long, and superficial solution of continuity, around the external openings of the mucous membranes. A sort of chap, observed on the hands, particularly on the callous hands, of workmen, in certain mechanical employments. 3. Small, chapped ulcerations, sometimes noticed in young children, owing to the contact of the fæces and urine with the fine delicate skin of the thighs, nates, and genital organs. 4. Clefts, of a more or less deep nature, occurring on the genital organs in the vicinity of the anus, in those labouring under syphilis. These are usually called *rhagades*, (q. v.)

FIS'TULA, *Syrinx*. A solution of continuity, of greater or less depth, and sinuosity; the opening of which is narrow, and the disease kept up by an altered texture of parts, so that it is not disposed to heal. A fistula is *incomplete* or *blind*, when it has but one opening; and *complete* when there are two, the one communicating with an internal cavity, the other, externally. It is lined, in its whole course, by a membrane, which seems analogous to mucous membranes. *Incomplete fistulæ* may be *internal* or *external*. The former are those which open *internally*; the latter, those which open *externally*. *External incomplete fistulæ* are kept up by caries or necrosis of bones, by extraneous bodies in any of the living textures, or by purulent cavities, the walls of which have not become united. *Internal incomplete fistulæ* generally soon become complete, since the discharge that escapes from them into the cavities into which they open, has a constant tendency to make its way outwardly, and soon occasions ulceration of the integuments. Fistulæ have received different names, according to the discharge which they afford, and the organs in which they are seated,—as *lachrymal*, *biliary*, *salivary*, *synovial*, *urinary*. The great object of treatment, in fistulous sores, is to bring on an altered condition of the parietes of the canal; by astringent or stimulating injections, caustics, the knife, pressure, &c. Those which are dependent on diseased bone, cartilage, tendon, &c. do not heal until after the exfoliation of the diseased part. Fistulæ of excretory ducts are produced either by an injury of the duct itself or by the retention and accumulation of the fluids to which they have to give passage. Thus, *Fis'tula lachryma'lis*, *Emphrag'ma lachryma'lē*, *Hydrops sacci lachryma'lis*, *Dropsy of the lachrymal sac*, *Mucocē'lē of the lachrymal sac*, commonly proceeds from the obliteration of the nasal duct, or from anatomy of the lachrymal sac; which circumstances prevent the tears from passing into the nostrils.

Fistula in Ano, *Archosy'rinx*, generally occurs from some mechanical pressure or impediment. The principal indication, in the treatment of these fistulæ of the excretory canals, being to put a stop to the constant discharge of the secretions, &c. through the preternatural channel, the fistulous passage is at times laid open, and a communication established with the natural excretory canal; at others, strong pressure is employed to procure its obliteration.

Fistula Belleniana, Uriniferous tube—f. Cibalis, Œsophagus—f. Cruris, Fibula—f. Duræ matris, Sinus of the dura mater—f. Lachrymalis, see Fistula—f. Nervorum, Neurilema—f. Sacra, Medulla spinalis, Vertebral column—f. Spiritalis, Trachea—f. Urinaria, Urethra—f. Ureterum rènum, see Calix—f. Ventriculi, Œsophagus.

FISTULES STERCORAIRES, see Stercoraceous.

FITROOT, Monotropa uniflora.

FIVE FINGERS, Panax quinquefolium.

FIXED, *Fixus*, from *figere*, 'to fasten.' A body not capable of being volatilized by fire is said to be fixed. Thus, we say *fixed oils*, in contradistinction to *volatile oils*.

FIXEN, MINERAL WATERS OF. This spring is four leagues from Waldsassen, in Bavaria. It contains carbonic acid, holding in solution carbonates of lime and magnesia, chlorides of lime and magnesia, carbonate of soda and silica. In Bavaria, it replaces the Seltzer water.

FIXI DENTES. The teeth of the second dentition.

FLABELLA'TION, *Flabella'tio*, from *flabellare*, to agitate the air. An operation, recommended by Ambrose Paré, which consists in keeping the fractured limbs cool, as well as the dressings surrounding them, by the renewal of the air around them, either by the use of a fan, or the repeated change of position of the parts affected.

FLABELLUM ET VENTILABRUM CORDIS, Pulmo.

FLACCID'ITY, *Flaccid'itas* from *flaccidus*, 'flabby,' 'soft.' Softness of a part, so as to offer little resistance on pressure.

FLAG, BLUE, Iris versicolor—f. Myrtle, Acorus calamus—f. Root, Acorus calamus.

FLAMBE, Iris Germanica—*f. Bâtard*, Iris pseudacorus.

FLAMBOISE, Ignis sylvaticus.

FLAME, VITAL, Vital principle.

FLAMMA, Fleam.

FLAMME, Fleam—*f. Vitale*, Vital principle.

FLAMMETTE, Fleam.

FLAMMULA. Fleam—f. Jovis, Clematis recta—f. Vitalis, Vital principle.

FLANCS, Flanks.

FLANKS, *Ilia*, *La'gones*, *Lap'ara*, *Ceneo'nes*, (F.) *Flancs*, *Les Iles*. The regions of the body,

which extend on the sides, from the inferior margin of the chest to the *crista ilii*.

FLAP OPERATION of AMPUTATION, *Amputation à lambeaux*.

FLATUARIUS, Alchymist.

FLATULENCE, *Flatulen'tia*, *Elatus*, *Flatuos'ity*, *Clydon*, *Physa*, *Polyphy'sia*, *Wind*, *Limo'sis Fla'tus*, *Ereux'is*, *Bombus*, (F.) *Ventosité*. Emission of wind by the mouth or anus, or accumulation of wind in the digestive tube.

FLATULENTUS, Windy.

FLATUOSITY, Flatulence.

FLATUS, Crepitation, Flatulence—f. Furiosus, Ambulo-flatulentus.

FLAVEDO CORTICUM CITRI, see Citrus medica.

FLAVUS, Yellow.

FLAX, COMMON, Linum usitatissimum—f. Purging, Linum catharticum—f. Seed, see Linum usitatissimum—f. Toad, Antirhinum linaria.

FLEABANE, GREAT, Conyza squarrosa—f. Various-leaved, Erigeron heterophyllum—f. Bane, Canada, Erigeron Canadense—f. Bane, Philadelphia, Erigeron Philadelphicum—f. Skevish, Erigeron Philadelphicum—f. Wort, Plantago psyllium.

FLEAM, *Flamma*, *Flam'mula*, *Schaste'rion*, *Fosso'rium*, *Phlebot'omus*. A surgical instrument, used for the operation of phlebotomy. (F.) *Flamme*, *Flammette*. It consists of a small metallic box, containing a spear-pointed cutting instrument, which, by means of a spring, can be forced into the vein. It is much used in Germany and some other European countries, and is not unfrequently employed in America; but is scarcely ever seen in France or Great Britain.

FLÉCHISSEUR, Flexor—*f. Court commun des orteils*—*f.* Flexor brevis digitorum pedis—*f. Court du petit doigt*, Flexor parvus minimi digiti—*f. Court du petit orteil*, Flexor brevis minimi digiti pedis—*f. Profond des doigts*, Flexor profundus perforans—*f. Sublime des doigts*, Flexor sublimis perforatus—*f. Superficiel des doigts*, Flexor sublimis perforatus—*f. Court du gros orteil*, Flexor brevis pollicis pedis—*f. Grand commun des orteils*, Flexor Longus digitorum pedis profundus perforans—*f. Long commun des orteils*, Flexor longus digitorum pedis profundus perforans—*f. Long du gros orteil*, Flexor longus pollicis pedis—*f. Court du pouce*, Flexor brevis pollicis manûs.

FLECTENS PAR LUMBORUM, Quadratus lumborum.

FLEGMEN, Flemen.

FLEMEN, *Flegmen*. A tumour about the ankles. Also, chaps of the feet and hands.

FLERECIN, Gout.

FLESH, *Caro*, *Sarx*, (F.) *Chair*. Every soft part of an animal is so named; but more particularly the muscles, which are called *muscular flesh*.

FLESH, PROUD, Fungosity.

FLEURS, Flowers, Menses—*f. Blanches*, Leucorrhœa—*f. de Muscade*, Mace—*f. de Soufre*, Sulphur sublimatum.

FLEXIBIL'ITY. A physical property of the tissues, which varies greatly according to the structure. The tendons exhibit this property in a marked manner.

FLEXIO, Campsis.

FLEX'ION, *Flex'io*, *Campē*, from *flectere*, 'to bend.' The state of being bent. The action of a flexor muscle.

FLEXOR. Same etymon. (F.) *Fléchisseur*. A muscle, whose office it is to bend certain parts.

FLEXOR BREVIS DIGITO'RUM PEDIS PERFORA'TUS, *F. Sublī'mis*, *Flexor brevis*, *Flexor digito'rum brevis* sive *perforatus pedis*, *Perfora'tus* seu *flexor secun'di interno'dii digito'rum pedis*, *Calcanéo-sous-phalangettien commun*,—*Calcanéo-sous phalanginien commun*,—(Ch.) (F.) *Muscle court fléchisseur commun des orteils*. A muscle, placed at the middle part of the sole of the foot. It is narrower and thicker behind than before, where it is divided into four portions. It arises from the posterior part of the inferior surface of the os calcis, and is inserted at the inferior surface of the second phalanx of the last four toes. It bends the second phalanges of the toes on the first, and the first on the metatarsal bones; in this manner augmenting the concavity of the vault of the foot.

FLEXOR BREVIS MINIMI DIGITI, F. parvus minimi digiti.

FLEXOR BREVIS MIN'IMI DIG''ITI PEDIS, *Para'thenar minor*, (F.) *Court fléchisseur du petit orteil*, *Tarso-sous-phalangien du petit orteil*—(Ch.) A muscle, situate at the anterior and outer part of the sole of the foot. It arises from the posterior extremity of the fifth metatarsal bone, and is inserted into the posterior part of the first phalanx of the little toe, which it bends.

FLEXOR BREVIS POL'LICIS MANUS, *Flexor secun'di interno'dii*, *Thenar*, *Flexor primi et secun'di ossis pol'licis*—*Court fléchisseur du pouce*—*Carpophalangien du pouce*—(Ch.) *Demi-interosseux du pouce*. A muscle, situate at the outer part of the palm of the hand. It is divided into two portions by the tendon of the *Flexor longus pollicis*. It arises from the os magnum, the anterior annular ligament of the carpus and the third metacarpal bone; and is inserted into the superior part of the first phalanx of the thumb, and into the two ossa sesamoidea at the articulation of the first phalanx with the first metacarpal bone. Its use is to bend the first phalanx of the thumb on the first metacarpal bone; and the latter upon the trapezium.

FLEXOR BREVIS POL'LICIS PEDIS, *Flexor brevis*, *Flexor hal'lucis* vel *brevis pol'licis*, *Tarso-phalangien du pouce*, *Court fléchisseur du gros orteil*, *Tarso-sous-phalangettien du premier orteil*,—(Ch.) It is situate at the anterior and inner part of the sole of the foot; is thin and narrow behind, thick and divided into two portions before. It arises from the inferior part of the os calcis and the last two cuneiform bones, and is inserted at the inferior part of the base of the first phalanx of the great toe, and into the two sesamoid bones of the corresponding metatarso-phalangien articulation. It bends the first phalanx of the great toe on the first metacarpal bone.

FLEXOR CARPI RADIALIS, Palmaris magnus—f. Carpi ulnaris, see Cubital (muscles)—f. Hallucis, F. brevis pollicis pedis—f. Hallucis longus, F. longus pollicis pedis.

FLEXOR LONGUS DIGITO'RUM PEDIS PROFUN'DUS PER'FORANS; *Per'forans* seu *Flexor profun'dus*, *Perodactyle'us*, *Flexor digito'rum longus* sive *Perforans pedis*, *Perforans* seu *Flexor tertii internodii digito'rum pedis*; *Tibio-phalangettien*,

—(Ch) *Grand* ou *long fléchisseur commun des orteils.* A muscle, situate at the posterior and deep-seated part of the leg. It is broader at its middle than extremities, the inferior of which is divided into four portions. It arises from the posterior surface of the tibia; and its tendons are attached to the posterior part of the lower surface of the three phalanges of the last four toes. It bends the three phalanges on each other, and the toes on the metatarsus, and extends the foot on the leg.

The *Accesso'rius Flexo'ris Longi Digitorum Pedis, Caro quadra'ta Sylvii, Caro accesso'ria, Planta'ris verus, Accessoire du long fléchisseur commun des orteils, Carrée* is a small muscle of the sole of the foot, which passes obliquely from the os calcis to the outer edge of the flexor longus, whose force it augments, and corrects its obliquity.

Flexor Longus Pollicis Manus, *Flexor longus pollicis, Flexor tertii internodii, Flexor tertii internodii* sive *longis'simus pollicis; Radio-phalangettien du pouce,*—(Ch.) Situate at the anterior and profound part of the forearm. It arises from the upper three-quarters of the anterior surface of the radius and interosseous ligament, and is inserted, by a tendon, into the anterior surface of the last phalanx of the thumb. It bends the second phalanx of the thumb on the first; the first on the corresponding metacarpal bone, and this upon the radius. It can, also, bend the hand on the forearm.

Flexor Longus Pollicis Pedis, *Flexor Hallucis* vel *Pollicis longus, Péronéo-phalangien du gros orteil, Long fléchisseur du gros orteil, Péronéo-sous-phalangettien du pouce,*—(Ch) It is situate at the posterior and profound part of the leg. It arises from the posterior surface of the fibula and the interosseous ligament, and is inserted, by means of a long tendon, into the inferior part of the first phalanx of the great toe. It bends the third phalanx on the first, and this upon the corresponding metatarsal bone. It augments the concavity of the sole of the foot, and extends the foot on the leg.

Flexor Parvus Min'imi Dig''iti, *Abduc'tor minimi digiti, Hypoth'enar Riola'ni, Flexor brevis minimi digiti manûs, Hypoth'enar minimi digiti, Carpo-phalangien du petit doigt*—(Ch.) *Court fléchisseur du petit doigt.* It arises from the anterior annular ligament of the carpus and the process of the *os unciforme*, and is inserted at the inner side of the superior extremity of the first phalanx of the little finger. It bends the first phalanx of the little finger.

Flexor Perforans, .F profundus perforans —f. Perforatus, F. sublimis perforatus—f. Primi internodii. Opponens pollicis—f. Primi internodii digitorum manus, Lumbricalis manus—f. Primi et secundi ossis pollicis, F. brevis pollicis manus.

Flexor Profun'dus Per'forans, *F. Profundus, F. Per'forans, F. Per'forans* vulgo *profundus, Flexor ter'tii interno''dii digito'rum manûs* vel *Per'forans manûs; Cubito-phalangettien commun*—(Ch.,) *Fléchisseur profond des doigts.* A thick, flat, long muscle, seated beneath the *Flexor sublimis perforatus.* Its upper extremity is simple, and arises from the anterior surface of the ulna and from the interosseous ligament. Its inferior extremity terminates by four tendons which, after having passed through the slits in the *sublimis*, are inserted into the anterior surface of the last phalanges of the four fingers. It bends the third phalanges on the second; and, in other respects, has the same uses as the following.

Flexor Secundi Internodii Digitorum Pedis, F. brevis digitorum pedis—f. Tertii internodii, F. longus pollicis manûs—f. Tertii internodii digitorum manûs, F. profundus perforans—f. Tertii internodii digitorum pedis, F. longus digitorum pedis profundus perforans—f. Ossis metacarpi pollicis, Opponens pollicis—f. Perforatus pedis, F. brevis digitorum pedis—f. Sublimis, F. brevis digitorum pedis.

Flexor Subli'mis Perfora'tus, *F. Perfora'tus, Fléchisseur sublime* ou *superficiel des doigts, Epitroklo-phalanginien commun;*—(Ch.) It is a thick, flat, muscle, seated at the anterior part of the forearm. Its upper extremity, which is simple, arises from the internal condyle of the os humeri;—from the coronoid process of the ulna, and from the anterior edge of the radius. Its lower extremity divides into four tendons, which slide under the anterior annular ligament of the carpus, and are inserted into the second phalanges of the last four fingers, after having been slit to allow the tendons of the flexor profundus to pass through them. This muscle bends the second phalanges on the first; these on the carpal bones, and the hand on the forearm.

FLIXWEED, Sisymbrium sophia.

FLOCCI, see Villous membranes.

FLOCCORUM VENATIO, Carphologia.

FLOCCULI, see Villous membranes.

FLORENCE, CLIMATE OF. This agreeable Italian city is by no means a favourable residence for the phthisical invalid. Sir James Clark affirms, indeed, that he does not know any class of invalids for whom Florence offers a favourable residence. It is subject to sudden vicissitudes of temperature, and to cold piercing winds during the winter and spring.

FLORES BENZOËS, Benjamin, flowers of —f. Boracis, Boracic acid—f. Macis, Mace—f. Martiales, Ferrum ammoniatum—f. Salis ammoniaci martiales, Ferrum ammoniatum.

FLORIDA, CLIMATE OF, see Saint Augustine.

Florida, Waters of. Near Long Lake, in Florida, United States, which communicates with St. John's River by a small creek: there is a vast fountain of hot mineral water, issuing from a bank of the river. From its odour it would seem to be sulphureous.

FLORION, Influenza.

FLOS SALIS, Soda, subcarbonate of—f. Sanguineous monardi, Tropæolum majus—f. Virginitatis, Hymen.

FLOUR, POTATO, see Solanum tuberosum.

FLOWER DE LUCE, Iris Germanica.

FLOWERS, *Flores.* (F.) *Fleurs.* The ancient chymists gave this name to different solid and volatile substances, obtained by sublimation. The term is not yet entirely banished from chymical and medical language, as *Flowers of Benjamin, Flowers of Sulphur*, &c.

Flowers, Four Carmin'ative, *Quat'uor flores carminati'vi*, were chamomile, dill, feverfew, and melilot.

Flowers, Four Cordial, *Quat'uor flores cordia'les*, were formerly, borage, bugloss, roses, and violets.

Flowers, Menses.

FLUCTUA'TION, *Fluctua'tio*, from *fluctus*, 'a wave.' *Undula'tio*, (F.) *Ondulation*. The undulation of a fluid, collected in any natural or artificial cavity, which is felt by pressure or by percussion, properly practised. In ascites, the fluctuation is felt by one of the hands being applied to one side of the abdomen, whilst the other side is struck with the other hand. In abscesses, fluctuation is perceived by pressing on the tumour, with one or two fingers alternately, on opposite points.

FLUELLEN, Antirhinum elatine.

FLUELLIN, Veronica.

FLUEURS, Menses—*f. Blanches*, Leucorrhœa.

FLUID, *Flu'idus*, from *fluere*, 'to flow.' The human body is chiefly composed of fluids. If a subject, weighing 120 pounds, be thoroughly dried in an oven, the remains will be found not to weigh more than 12 or 13 pounds: so that the proportion of fluids to liquids in the body is about 9 or 10 to 1.

TABLE OF FLUIDS OF THE HUMAN BODY.

1. *Blood.*
2. *Lymph.*
3. *Exhaled or Perspiratory Fluids.* — Transpiration of the mucous, serous, and synovial membranes; of the cellular membrane; of the adipous cells; of the medullary membrane; of the interior of the thyroid gland; the thymus; suprarenal capsules; eye; ear; vertebral canal, &c.
4. *Follicular Fluids.* — Sebaceous humour of the skin; cerumen; gum of the eye; mucus of the mucous glands and follicles; that of the tonsils, of the glands of the cardia, the environs of the anus, of the prostate, &c.
5. *Glandular Fluids.* — Tears; saliva; pancreatic fluid; bile; cutaneous transpiration; urine; of the glands of Cowper; sperm; milk; fluid of the testes and mammæ of the new-born child.

FLUID, CEPHALO-RACHIDIAN, Cephalo-spinal fluid—f. Cephalo-spinal, Cephalo-spinal fluid—f. Cerebro-spinal, Cephalo-spinal fluid.

FLUIDUM NERVEUM, Nervous fluid—f. Cerebro-spinale, Cephalo-spinal fluid.

FLUKE, Distoma hepaticum—f. Liver, Distoma hepaticum.

FLUMEN DYSENTERICUM, Dysentery.

FLUOR ALBUS INTESTINORUM, Cœliac flux—f. Albus malignus, Gonorrhœa impura—f. Muliebris, Leucorrhœa—f. Muliebris non Gallicus, Leucorrhœa.

FLUX, *Fluxus*, *Profla'vium*, from *fluere*, 'to flow.' A discharge. *Rhysis*. In nosology, it comprises a series of affections, the principal symptom of which is the discharge of a fluid. Generally it is employed for dysentery, (q. v.)

FLUX, BILIOUS, *Fluxus bilio'sus*. A discharge of bile, either by vomiting or by stool, or by both, as in cholera.

FLUX, BLOODY, Dysentery—*f. de Bouche*, Salivation—*f. Bronchique*, Bronchorrhœa—*f. Dysentérique*, Dysentery—*f. Hépatique*, Hepatirrhœa—*f. Muqueux*, Catarrh—*f. Muqueux de l'estomac*, Gastrorrhœa—*f. Muqueux de la vessie*, Cystirrhœa—f. Root, Asclepias tuberosa—*f. Salivaire*, Salivation—*f. de Sang*, Dysentery—f. Sebaceous, Stearrhœa—*f. de Sperme*, Spermatorrhœa—*f. de Sueur*, Ephidrosis—f. Weed, Sysimbrium sophia—*f. d'Urine*, Diabetes—*f. de Ventre*, Diarrhœa.

FLUXIO ALBA, Leucorrhœa—f. Arthritica, Gout.

FLUXION, *Flux'io*, *Afflux'us*. A flow of blood or other humour towards any organ with greater force than natural. A *determination*. Thus we say, in those disposed to apoplexy, there is a *fluxion* or *determination* of blood to the head.

FLUXION CATARRHALE, Catarrh—*f. Sur les dents*, Odontalgia.

FLUXION DE POITRINE, (F.) By this name, the French often understand *acute pulmonary catarrh*, or *pleurisy*, but most commonly *peripneumony*.

FLUXUS, Discharge—f. Cœliacus, Cœliac flux—f. Cœliacus per Renes, Chyluria—f. Cruentus cum tenesmo, Dysentery—f. Dysentericus, Dysentery—f. Hepaticus, Hepatirrhœa, see Hepateros—f. Lientericus, Lientery—f. Lunaris, Menses—f. Matricis, Leucorrhœa—f. Menstrualis, Menstruation—f. Menstruus, Menses—f. Muliebris, Leucorrhœa—f. Salivæ, Salivation—f. Venereus, Gonorrhœa impura.

FLYTRAP, Apocynum androsæmifolium.

FOC'ILE. This name was formerly given to the bones of the leg, as well as to those of the forearm.

FOCILE MAJUS, Tibia—f. Inferius seu majus, Ulna—f. Minus, Fibula—f. Minus seu superius, Radius.

FŒMEN, Perinæum.

FŒNICULUM, Anethum—f. Aquaticum, Phellandrium aquaticum—f. Erraticum, Peucedanum silaus—f. Porcinum, Peucedanum—f. Vulgare, Anethum.

FŒNUGREEK, Trigonella fœnum.

FŒNUM CAMELORUM, Juncus odoratus—f. Græcum, Trigonella fœnum.

FŒTAB'ULUM. An encysted abscess.—Marcus Aurelius Severinus.

FŒTAL, *Fœta'lis*. Relating to the fœtus. A name, given to parts connected with the fœtus. Thus we say—the *fœtal surface of the placenta*, in contradistinction to the *uterine* or *maternal* surface.

FŒTAL CIRCULATION differs from that of the adult in several respects. Commencing with the placenta, the fœtal blood is sent from the placenta, where it probably undergoes some change analogous to what occurs in the lungs in extra-uterine existence, by the umbilical vein as far as the liver, where a part of it is poured into the vena porta; the other proceeds into the vena cava inferior; the latter, having received the suprahepatic veins, pours its blood into the right auricle. From the right auricle, a part of the blood is sent into the right ventricle; the rest passes directly through into the left auricle, by the foramen ovale. When the right ventricle contracts, the blood is sent into the pulmonary artery; but as the function of respiration is not going on, no more blood passes to the lungs than is necessary for their nutrition; the remainder goes directly through the ductus arteriosus into the aorta. The blood, received by the left auricle from the lungs, as well as that which passed through the foramen ovale, is transmitted into the left ventricle; by the contraction of which it is sent into the aorta,

and by means of the umbilical arteries, which arise from the hypogastric, it is returned to the placenta.

Fœtal Head. The diameters of this at the full period, are as follow:—1. The *Biparietal* or *transverse*, extending from one parietal protuberance to the other, and measuring 3½ inches. 2. The *Temporal*, from one temple to another, 3 inches. 3. The *Occipito-mental*, from the occiput to the chin; the greatest of all, 5 inches. 4. The *Occipito-frontal* or *antero-posterior*, 4¼ or 4½ inches. 5. The *Cervico-bregmatic*, from the nape of the neck to the centre of the anterior fontanelle. 6. The *Fronto-mental*, from the forehead to the chin, about 3½ inches. 7. The *Trachelo-bregmatic*, from the front of the neck to the anterior fontanelle, 3½ inches. 8. The *Vertical diameter*, from the vertex to the base of the cranium.

FŒTATION, Pregnancy.

FŒTICIDE, *Fœticid'ium*; from *fœtus*, and *cæ'dere*, 'to kill.' Criminal abortion.

FŒTOR ORIS, Breath, offensive.

FŒTUS, *Fetus*, *Cye'ma*, *Epicye'ma*, *Epigo'nion*, from *feo*, 'I bring forth.' The unborn child. By *κυημα*, Hippocrates meant the fecundated, but still imperfect, germ. It corresponded with the term *embryo*, as now used; whilst *εμβρυον*, 'embryo,' signified the fœtus at a more advanced stage of utero-gestation. The majority of anatomists apply to the germ the name *embryo*, which it retains until the third month of gestation, and with some until the period of quickening; whilst *fœtus* is applied to it in its latter stages. The terms are, however, often used indiscriminately. When the ovule has been fecundated in the ovarium, and remained there for some days, it descends into the uterus, with which it becomes more or less connected by means of the placenta. When first seen, the fœtus has the form of a gelatinous flake, which some have compared to an ant, a grain of barley, a worm curved upon itself, &c. The fœtal increment is very rapid in the first, third, fourth, and sixth months of its formation, and at the end of nine months, it has attained its full dimensions. Generally, there is but one fœtus in utero; sometimes, there are two; rarely three. The fœtus presents considerable difference in its shape, weight, length, situation in the womb, proportion of its various parts to each other, arrangement and texture of its organs, state of its functions at different periods of gestation, &c. All these differences are important in an obstetrical and medico-legal point of view. The following table exhibits the length and weight of the fœtus at different periods of gestation, on the authority of different observers. Their discordance is striking. It is proper to remark, that the Paris pound—*Poid de Marc*—of 16 ounces, contains 9216 Paris grains, whilst the avoirdupois contains only 8532.5 Paris grains, and that the Paris inch is 1.065977 English inch.

	Beck.	*Maygrier.*	*Granville.*	*Beck.*	*Maygrier.*	*Granville.*
	Length.			Weight.		
At 30 days.	3 to 5 lines.	10 to 12 lines.			9 or 10 grs.

8 do.	16.	16 do.	17 do.	3 to 4 do.	4 do.	4 to 5 do.

Fœtus in Fœtu, Cryptodidymus—f. Zephyrius, Mole.

FOIE, Liver—*f. d'Antimoine*, Oxidum stibii sulphuretum—*f. de Soufre*, Potassæ sulphuretum.

FOLIACEUM ORNAMENTUM, see Tuba Fallopiana.

FOLIE, Insanity—*f. des Ivrognes*, Delirium tremens.

FOLLETTE, Influenza.

FOLLICLE, *Follic'ulus*, diminutive of *Follis*, a bag. See Crypta.

Follicles, Ciliary, Meibomius, glands of—f. Palpebral, Meibomius, glands of—f. Synovial, Bursæ mucosæ.

FOLLICULE, Crypta—*f. Ciliaire*, Meibomius, gland of—*f. Dentaire*, Dental follicle—*f. Palpébral*, Meibomius, gland of.

FOLLIC'ULI GRAAFIA'NI, *O'vula Graafia'na*, *Follicles* or *Vesicles of de Graaf*, *Ovicapsules*, *Ovisacs*. Small spherical vesicles, from 15 to 20 in number, in each ovary, which are filled with an albuminous fluid. They exist in the fœtus. The ovum—*ovule* of some—is contained in them.

Folliculi Rotundi et Oblongi Cervicis Uteri, Nabothi glandulæ—f. Sanguinis, Globules of the blood—f. Sebacei, Sebaceous glands.

FOLLICULOSE GLAND, Crypta.

FOLLICULUS, Vulva—f. Dentis, Dental Follicle—f. Fellis, Gall-bladder.

TO FOMENT, *Fove're*, (F.) *Étuver*, *Bassiner*. To apply a fomentation to a part.

FOMENTA'TION, *Fomenta'tio*, *Fotus*, *Py'ria*, *Thermas'ma*, *Æone'sis*, *Perfu'sio*, *Asper'sio*, *Fomen'tum*, (quasi *fovimentum*,) from *fovere*, 'to bathe.' A sort of partial bathing, by the application of hot cloths, which have been previously dipped in hot water or in some medicated decoction. They act, chiefly, by virtue of their warmth and moisture, except in the case of the narcotic fomentations, where some additional effect is obtained.

A *dry fomentation* is a warm, dry application to a part;—as a hot brick, wrapped in flannel;—a bag, half filled with chamomile flowers made hot, &c.

Fomentation Herbs, *Herbæ pro fotu*. The herbs, ordinarily sold under this title by the

English apothecary, are—*southernwood, tops of sea wormwood, chamomile flowers*, each two parts: *bay leaves*, one part. ℥iijss of these to Ovj of *water*.

FOMENTUM, Fomentation.

FOMES MORBI, *Fomes mali*. The *focus* or seat of any disease. (F.) *Foyer*.

Fomes Ventriculi, Hypochondriasis.

FOM'ITES, from *fomes*, 'fuel, any thing which retains heat.' *Enaus'ma, Zop'yron*, ἐναυσμα, ζοπυρον. A term, applied to substances which are supposed to retain contagious effluvia; as woollen goods, feathers, cotton, &c.

FONCTION, Function.

FOND, Fundus.

FONDANT, Solvent.

FONGIFORME, Fungoid.

FONGOÏDE, Fungoid.

FONGOSITÉ, Fungosity.

FONGUS, Fungus.

FONS, Fontanella—f. Medicatus, Water, mineral—f. Pulsans, Fontanella—f. Pulsatilis, Fontanella—f. Salutarius, Water, mineral—f. Soterius, Water, mineral.

FONSANGE, MINERAL WATERS OF. Fonsange is situate near Nismes in France. The water is sulphuretted.

FONTANA, CANAL OF. A canal, of a triangular shape, at the inner side of the ciliary circle; partly formed by the groove at the inner edges of the cornea and sclerotica.

FONTANEL'LA. A *fontanel*, diminutive of *fons*, 'a fountain.' *Fons pulsat'ilis, Fons pulsans, Vertex palpitans, Fons, Bregma, Fontic'ulus* (q. v.) *Lacu'na, Mould*. The *opening of the head*. A name, given to spaces occupied by a cartilaginous membrane, in the fœtus and new-born child; and situate at the union of the angles of the bones of the cranium. There are six fontanels. 1. The *great* or *sincipital* or *anterior*, situate at the junction of the sagittal and coronal sutures. 2. The *small* or *bregmatic* or *posterior*, situate at the part where the posterior and superior angles of the parietal bones unite with the upper part of the os occipitis. 3. The *two sphenoidal*, in the temporal fossæ; and, 4. The *two mastoid*, or of Casserius, at the union of the parietal, occipital, and temporal bones.

FONTES, see Fons—f. Medicati plumbarii, Plombières, Mineral waters of—f. Sulphurei calidi, Waters, mineral, sulphureous.

FONTICULE à POIS, see Fonticulus.

FONTIC'ULUS, *Fontanel'la*, (F.) *Fonticule, Cautère*. A small ulcer produced by art, either by the aid of caustics or of cutting instruments; the discharge from which is kept up with a view of fulfilling certain therapeutical indications. The *Pea issue*, (F.) *Fonticule à pois*, is kept up by means of a pea placed in it. This *pea*, (F.) *Pois à cautère*, is sometimes formed of wax; at others, the young, blasted fruit of the orange is employed. The common dried garden pea answers every purpose. The seton is also an issue.

FOOL'S STONES, MALE, Orchis mascula.

FOOT, Pes—f. Flat, see Kyllosis—f. Griffon's, Gryphius pes.

FORA'MEN, *Trema*, from *foro*, 'I pierce.' *Aulos*, (F.) *Trou*. Any cavity, pierced through and through. Also, the orifice of a canal.

Foramen Alveolare Anterius, see Palatine canals—f. Alveolare posterius, see Palatine canals—f. Amplum pelvis, Obturatorium foramen—f. Aquæductus Fallopii, F. styloinastoideum—f. Auditorium externum, see Auditory canal, external—f. Auditorium internum, see Auditory canal, internal—f. Cæcum ossis maxillaris superioris, see Palatine canals—f. Carotid, see Carotica foramina.

Fora'men Centra'le et Limbus Lu'teus Ret'inæ; the *central foramen and yellow spot of the retina;* discovered by Sömmering. *Macula lu'tea*. (F.) *Tache jaune*. It is situate about two lines to the outside of the optic nerve, and in the direction of the axis of the eyes.

Foramen Commune Anterius, Vulva—f. Commune posterius, see Anus—f. Condyloid, see Condyloid—f. Conjugationis, see Conjugation—f. Ethmoideum, Orbitar foramen, internal—f. Incisivum, see Palatine canals—f. Infraorbitarium, see Suborbitar canal—f. Infrapubianum, Obturatorium foramen—f. Jugulare, Lacerum posterius foramen—f. Lacerum in basi cranii, Lacerum posterius foramen—f. Lacerum inferius, Sphenomaxillary fissure—f. Lacerum superius, Sphenoidal fissure—f. Oculi, Pupil—f. Oodes, Ovale foramen—f. Orbitarium internum, Orbitar foramen, internal—f. Orbitarium superius, Orbitar foramen, superior, F. supraorbitarium—f. Ovale, Botal foramen, Obturatorium foramen, Ovale foramen—f. Palatinum anterius, see Palatine canals—f. Palatinum posterius, see Palatine canals—f. Palato-maxillare, see Palatine canals—f. Spheno-spinosum, Spinale foramen—f. Thyroideum, Obturatorium foramen—f. of Winslow, Hiatus of Winslow.

FORCE, from *fortis*, 'strong.' *Vis, Poten'tia, Energi'a, Dy'namis, Cratos*. Any power which produces an action. Those powers which are inherent to organization, are called *vital forces*. We say, also, *organic forces*, and *muscular forces*, to designate that of the organs in general, or of the muscles in particular. To the latter the word *Dynamis*, δυναμις, corresponds; and the absence of this force is termed *adynamia*. The *vital forces* have to be studied carefully by the pathologist. The doctrine of diseases is greatly dependent on their augmentation or diminution; freedom or oppression, &c.

Force of Assimilation, Plastic force—f. Catalytic, see Catalysis—f. of Nutrition, Plastic force.

FORCE-REAL, MINERAL WATERS OF. The name of a mountain, situate four leagues from Perpignan in France. The water is chalybeate.

FORCEPS, quasi, *ferriceps*, from *ferrum*, 'iron,' and *capio*, 'I take.' *Pincers, Labis*, λαβις, *Volsel'læ*. An instrument for removing bodies, which it would be inconvenient or impracticable to seize with the fingers. (F.) *Pinces, Pincettes*. There are various kinds of forceps,—1. The ordinary kind, contained in every dressing-case, for removing the lint, &c. from wounds or ulcers. (F.) *Pinces à anneaux*. 2. The *Dissecting* or *Lig'ature* or *Arte'rial Forceps*. (F.) *Pinces à dissection, P. à ligature*, to lay hold of delicate parts. 3. *Pol'ypus Forceps, Tooth Forceps, Forceps of Museux*, for laying hold of the tonsils or other parts to be removed. The *Bullet Forceps, Strombul'cus*, (F.) *Tire-balle*, &c. The *Lithot'omy Forceps, Lithol'abon, Tenac'ula, Volsel'la*, which resembles the Craniotomy Forceps, (F.) *Tenettes*.

Forceps is also an instrument used by obstetrical practitioners to embrace the head, and bring it through the pelvis. It consists of two branches, blades or levers; one of which, in the case of the *short forceps*, is passed over the ear of the child, and the other opposite to the former, so that the blades may lock. When the head is securely included between the blades, the operation of extraction can be commenced. See Parturition.

FOREARM, *Pars infe'rior bra'chii, Cu'bitus*, (F.) *Avant-bras*. The part of the upper extremity, comprised between the arm and the hand. It is composed of two bones—*radius* and *ulna*—and 20 muscles.

FOREHEAD, Front.

FORENSIC ANATOMY, see Anatomy—f. Medicine, Medicine, legal.

FORESKIN, Prepuce.

FORFEX, Scissors—f. Dentaria, Dentagra.

FORGES, MINERAL WATERS OF. Forges is situate four leagues from Gournay, in the department of Seine Inférieure, France. There are three springs, which are acidulous chalybeates. They are called *Royal, Reinette*, and *Cardinal*, in honour of Louis XIII., Queen Anne of Austria, and Cardinal Richelieu, who used them.

FORMI'CA, *Myrmex*, the ant or pismire, (F.) *Fourmi*. It contains an acid juice and gross oil, which were formerly extolled as aphrodisiacs. The chrysalides of the animal are said to be diuretic and carminative; and have been used in dropsy. 2. Also, the name of a black wart with a broad base and cleft surface; so called because the pain attending it resembles the biting of an ant, μυρμηκια, *myrme'cia*.—Forestus. 3. A varicose tumour on the anus and glans penis. 4. Also, any miliary herpes.

Formica Ambulatoria, Herpes circinatus—f. Corrosive, Herpes exedens.

FORMI'CANT, *Myrme'cizon, Formi'cans*, from *formica*, 'an ant.' (F.) *Fourmillant*. An epithet, given to the pulse when extremely small, scarcely perceptible, unequal, and communicating a sensation like that of the motion of an ant through a thin texture.

FORMICA'TION, *Formica'tio, Myrmecias'mos, Myrmeci'asis*. Same etymon. (F.) *Fourmillement*. A pain, compared with that, which would be caused by a number of ants creeping on a part.

FOR'MULA, from *forma*, 'a form,' (F.) *Formule, Ordonnance*. The receipt for the formation of a compound medicine; a prescription.

FORM'ULARY, *Formula'rium, Codex medicamenta'rius*. A collection of medical formulæ or receipts.

FORMULE, Prescription.

FORMYL, PERCHLORIDE OF, Chloroform.

FORNIX, ('an arch or vault,') *Cam'era, Fornix trilat'erus, Psalis, Testu'do, Arcus medulla'ris*, (F.) *Trigone cérébral*—(Ch.,) *Voute à trois piliers, Triangle Médullaire*. A medullary body, observed in the brain, below the corpus callosum and above the middle ventricle, on the median line. This body, which is curved upon itself, terminates anteriorly by a prolongation, which constitutes its *anterior pillar* or *crus*, (F.) *Pilier antérieur*, and posteriorly by two similar prolongations, called *posterior pillars* or *crura*. See Achicolum, and Vault.

FORPEX, Scissors.

FORTIFIANT, Corroborant, Tonic.

FORTRAITURE, Hysteralgia.

FOSSA, from *fodio*, 'I dig,' *Scammà*. A cavity of greater or less depth, the entrance to which is always larger than the base. The fossæ of bones have been called *simple*, when they belong to one bone only, as the *parietal fossæ*; and *compound*, (F.) *Fosses composées*, when several concur in their formation, as the *orbitar fossæ, temporal fossæ*, &c.

Fossa Amyntæ. A kind of bandage, used in fractures of the nose; so called by Galen from Amyntas of Rhodes, its inventor. It consisted of a long band, applied round the head, the turns of which crossed at the root of the nose.

Fossa Cerebel'li, (F.) *Fosse cérébelleuse*. The inferior occipital fossa, which lodges the corresponding portion of the cerebellum.

Fossæ Cerebra'les, *Cerebral fossæ*. Fossæ or excavations at the base of the cranium. They are nine in number; three occupy the median line, and three are placed at each side. They are distinguished into *anterior, middle*, and *posterior*.

Fossa Corona'lis, *Coro'nal* or *frontal fossa*. A depression on the orbitar plate of the frontal or coronal bone, which supports the anterior lobe of the brain.

Fossa Coronoidea, *Coronoid fossa*. A cavity before the inferior extremity of the humerus, in which the coronoid process of the ulna is engaged during the flexion of the forearm.

Fossa Cotyloidea, see Cotyloid.

Fossa Ethmoida'lis, *Ethmoid fossa*. A shallow gutter on the upper surface of the cribriform plate of the ethmoid bone, on which is lodged the expanded portion of the olfactory nerve.

Fossa Guttura'lis, *Guttural fossa*. The depression which forms the guttural region of the base of the cranium, between the foramen magnum and posterior nares.

Fossa Hyaloidea, see Hyaloid (Fossa)—f. Magna Muliebris, Vulva.

Fossa Occipita'lis, *Occip'ital fossa*. The occipital fossæ are four in number; the *superior* or *cerebral*, and the *inferior* or *cerebellous*. They are separated by a groove, which lodges the lateral sinus.

Fossa Palatina, Palate—f. Pituitaria, Sella Turcica—f. Scaphoides, Navicularis fossa—f. Supra-sphenoidalis, Pituitaria fossa—f. of Sylvius, Ventricle, fifth—f. Magna Sylvii, Fissura Sylvii—f. Umbilicalis, see Liver.

Fossa Poplite'a, *Poplite'al fossa*. The hollow of the ham or the popliteal region.

FOSSE BASILAIRE, Basilary fossa—*f. Sous-épineuse*, Infra-spinata fossa—*f. Sus-épineuse*, Fossa supra-spinata.

FOSSES CONDYLOÏDIENNES, Condyloidea foramina—*f. Nasales*, (*Ouvertures postérieures des*,) Nares posterior.

FOSSETTE, (F.) Diminutive of *fossa, Scrobic'ulus, Bothrion*. Several depressions are so called. A *dimpled chin, Fossette du menton*, consists in a slight depression, which certain persons have on the chin. 2. A *dimple of the cheek*, (F.) *Fossette des joues*, a depression which occurs on the cheeks of certain persons when they laugh, (F.) *Fossette du cœur, Scrobic'ulus cordis, Anticardion, Præcor'dium*. The

depression observed on a level with the xiphoid cartilage at the anterior and inferior part of the chest. It is, also, called *pit of the stomach*, (F.) *Creux de l'estomac.*

FOSSETTE ANGULAIRE DU QUATRIÈME VENTRICULE, Calamus scriptorius—*f. du Cœur*, Scrobiculus cordis.

Fossette, *Fos'sula*, *Anulus*, *Bothrium*, is also a small ulcer of the transparent cornea, the centre of which is deep.

FOSSORIUM, Fleam.

FOSSULA, Argema, *Fossette.*

FOTUS, Fomentation—f. Communis, Decoctum papaveris.

FOUGÈRE FEMELLE, Asplenium filix fœmina, Pteris aquilina—*f. Grande*, Pteris aquilina—*f. Mâle*, Polypodium filix mas.

FOULURE, Sprain.

FOURCHE, (F.) from *fourché*, 'cleft,' from *furca*, 'a fork.' *Aposte'ma Phalan'gum.* A French provincial term, for small abscesses, which form on the fingers and hands of working people. Also, an instrument, invented by M. J. L. Petit for compressing the ranine artery, in cases of hemorrhage from that vessel.

FOURCHETTE, *Furcil'la*, a little fork, *Fur'cula.* A surgical instrument used for raising and supporting the tongue, during the operation of dividing the frænum.

Fourchette, in anatomy, is, 1. The posterior commissure of the labia majora, called also, *Frænum* and *Fur'cula.* 2. The cartilago ensiformis: so called from its being sometimes cleft like a fork.

FOURMI, Formica.

FOURMILLLANT, Formicant.

FOURMILLEMENT, Formication.

FO'VEA, from *fodio*, 'I dig.' *Bothros.* A slight depression; the *pudendum muliebre*; see Vulva. Also, the *fossa navicularis.* A vapour bath for the lower extremities.

Fovea Axillaris, Axilla—f. Lacrymalis, Lachrymal fossa.

FOXBERRY, Arbutus uva ursi.

FOXGLOVE, Digitalis.

FOYER, Fomes morbi.

FRACTURE, *Fractu'ra*, from *frangere*, *fractum*, 'to break,' 'bruise,' *Catag'ma*, *Catag'ma Fractu'ra*, *Catax'is*, *Clasis*, *Clasma*, *Agmē*, *Diar'rhagē.* A solution of continuity in a bone. A *simple fracture* is when the bone only is divided. A *compound fracture* is a division of the bone with a wound of the integuments communicating with the bone,—the bone, indeed, generally protruding. In a *comminuted fracture*, *Alphite'don*, *ἀλφιτηδον*, *Caryé'don Catag'ma*, *καρυηδον καταγμα*, the bone is broken into several pieces; and in a *complicated fracture* there is, in addition to the injury done to the bone, a lesion of some considerable vessel, nervous trunk, &c. Fractures are also termed *transverse*, *oblique*, &c., according to their direction. The treatment of fractures consists, in general, in reducing the fragments when displaced; maintaining them when reduced; preventing the symptoms, which may be likely to arise; and combating them when they occur. The reduction of fractures must be operated by extension, counter-extension, and coaptation. (See these words.) The parts are kept in apposition by position, rest, and an appropriate apparatus. The position must vary according to the kind of fracture. Commonly the fractured limb is placed on a horizontal or slightly inclined plane, in a state of extension; or rather in a middle state between extension and flexion, according to the case.

FRACTURE EN RAVE, Raphanedon.

FRACTURES PAR RESONNANCE, see Contrafissura.

FRÆNA MORGAGNII, F. of the valve of Bauhin.

FRÆNULUM, Frænum, *Bride*—f. Clitoridis, Frænum clitoridis—f. Novum, Tænia semicircularis.

FRÆNUM, *Fre'num*; (F.) *Frein*, a bridle. *Fræ'nulum*, *Filel'lum*, *Filamen'tum.* A small bridle. A bridle. Names given to several membranous folds, which bridle and retain certain organs.

Frænum Glandis, F. Penis.

Frænum or Fræn'ulum Clitor'idis. (F.) *Frein du Clitoris.* A slight duplicature formed by the union of the internal portions of the upper extremity of the nymphæ.

Frænum Labio'rum, (F.) *Frein des lèvres.* There are two of these; one for the upper, the other for the lower lip. They unite these parts to the maxillary bone, and are formed by the mucous membrane of the mouth.

Frænum or Fræn'ulum Linguæ, (F.) *Filet* ou *Frein de la langue*, is a triangular reflection, formed by the mucous membrane of the mouth, and situate between the inferior paries of that cavity and the inferior surface of the tongue. When the frænum extends as far as the extremity of the tongue, it cramps its movements, interferes with sucking, &c. This inconvenience is remedied by carefully snipping it with a pair of scissors. The French call this, *l'opération du filet.*

Frænum Penis, *F. Præpu'tii*, *F. Glandis*, *Cynodes'mion*, (F.) *Filet* ou *Frein de la verge*, is a membranous reflection which fixes the prepuce to the lower part of the glans. When too short, it prevents the prepuce from sliding over the glans.

Frænum Præputii, F. Penis.

Fræna of the Valve of Bauhin. (F.) *Freins de la valvule de Bauhin.* A name given by Morgagni to the projecting lines formed by the junction of the extremities of the two lips of the ileo-cœcal valve. They are also called *Fræna* and *Retinacula Morgagnii.*

FRAGA'RIA, from *fragro*, 'I smell sweetly.' The *Strawberry*. *Fraga'ria vesca*, *Chamæ'batos*, (F.) *Fraisier.* The fruit is agreeable and wholesome, and the roots have been used as tonic and slightly diuretic. The fruit is the *Fragum*, *χαμαιον*, of the ancients. (F.) *Fraise.*

Fragaria Vesca, Fragaria.

FRAGILE VITREUM, Fragilitas ossium.

FRAGILITAS OS'SIUM, *Osteopsathyro'sis*, *Brit'tleness of the bones*, *Friabil'ity of the bones*, *Paros'tia frag''ilis*, *Frag''ilē vit'reum.* Pathologists have given this name to the extreme facility with which bones break in certain diseases of the osseous texture. It is owing to a deficiency of the animal matter.

FRAGMENT, *Fragmen'tum*, *Fragmen*, *Ramen'tum*, from *frangere*, 'to break.' The French use this term for the two portions of a fractured bone; thus, they speak of the *superior* and *inferior fragment.*

Fragments, Precious. A name formerly given, in *Pharmacy*, to the garnet, hyacinth,

emerald, sapphire and topaz. The Arabs falsely attributed to them cordial and alixiterial properties.

FRAGON, Ruscus.

FRAGUM, see Fragaria.

FRAISE, see Fragaria.

FRAISIER, Fragaria.

FRAMBŒ'SIA, from *Framboise*, (F.) A raspberry, *Syph'ilis In'dica*, *Anthra'cia ru'bula*, *Thymio'sis*, *Lues In'dica*, *Vari'ola Amboinen'sis*, *Lepra fungif'era*. The *Yaws*, *Epian*, *Pian*. A disease of the Antilles and of Africa; characterized by tumours, of a contagious character, which resemble strawberries, raspberries, or champignons; ulcerate, and are accompanied by emaciation. The *Pian*, for so the Indians call it, differs somewhat in America and Africa.

Pian of Amer'ica, *Framba'sia America'na*, *Anthra'cia Ru'bula Americana*, occurs under similar circumstances with the next, and seems to be transmitted by copulation. The tumours have a similar form, and are greater in proportion to their paucity. In some cases they are mixed with ulcers.

Pian of Guinea, *Framba'sia Guineen'sis*, *Anthra'cia Ru'bula Guineen'sis*, is common amongst the negroes, especially in childhood and youth. It begins by small spots, which appear on different parts, and especially on the organs of generation and around the anus; these spots disappear, and are transformed into an eschar, to which an excrescence succeeds, that grows slowly, and has the shape above described.

The treatment is nearly the same in the two varieties. The tumours will yield to mercurial friction, when small. When large, they must be destroyed by caustic. In both cases, mercury must be given to prevent a recurrence.

An endemic disease resembling yaws was observed in the Feejee Islands by the medical officers of the United States' Exploring Expedition. It is called by the natives *Dthoke*.

Frambœsia Illyrica, Scherlievo—f. Scotica, Sibbens.

FRAMBOISE, Rubus idæus.

FRANCOLIN, Attagen.

FRANGES SYNOVIALES, Synovial glands.

FRANGULA ALNUS, Rhamnus frangula.

FRANKINCENSE, COMMON, see Pinus abies—f. True, Juniperus lycia.

FRANZENSBAD, MINERAL WATERS OF. A celebrated water at Eger in Bohemia, which contains sulphate of soda, carbonate of iron, and carbonic acid gas. The springs are also called Franzensbrunnen

FRASERA CAROLINIENSIS, see Calumba—f. Officinalis, see Calumba—f. Walteri, see Calumba.

FRATERNITAS, Adelphixia.

FRATRATIO, Adelphixia.

FRAXINELLA, WHITE, Dictamnus albus.

FRAX'INUS EXCEL'SIOR. The systematic name of the *Ash tree*, *Frax'inus*, *Ornus* seu *Fraxinus sylves'tris*, *Bume'lia* seu *Macedon'ica Fraxinus*, *Bumelia*. *Ord.* Oleineæ. (F.) *Frêne*. The fresh bark has a moderately strong, bitterish taste. It has been said to possess resolvent and diuretic qualities, and has been given in intermittents. The seeds, called *Birds' tongues*, *Linguæ avis*, *Ornithoglos'sæ*, have been exhibited as diuretics, in the dose of a drachm. Its sap has been extolled against deafness.

Fraxinus Macedonica, F. Excelsior.

Fraxinus Ornus, *Fraxinus Melia*. The systematic name of the tree whence *manna* flows. This substance is also called *Manna Calabri'na*, *Ros Calabri'nus*, *Aerom'eli*, *Drosom'eli*, *Drysom'eli*, *Mel aë'rium*. In Sicily, not only the *Fraxinus Ornus*, but also the *rotundifolia* and *excelsior* are regularly cultivated for the purpose of procuring manna, which is their condensed juice. In the Ph. U. S. it is assigned to the *Ornus Europæa*. Manna is inodorous, sweetish, with a very slight degree of bitterness; in friable flakes, of a whitish or pale yellow colour; opaque, and soluble in water and alcohol. It is a laxative, and is used as a purgative for children, who take it readily on account of its sweetness. More generally, it is employed as an adjunct to other purgatives. Dose, ℥ss to ℥ij. Its immediate principle is called *Mannite* or *Mannin*. This has been recommended by Magendie as a substitute for manna. Dose, ℥ij for children

Fraxinus Rotundifolia, F. ornus.

FRAYEUR NOCTURNE, Panophobia.

FRECKLES, Ephelides.

FREIN, Frænum—*f. du Clitoris*, Frænum clitoridis—*f. de la Langue*, Frænum linguæ—*f. des Lèvres*, Frænum laborium—*f. de la Verge*, Frænum penis.

FREINS DE LA VALVULE DE BAUHIN, Frænum linguæ.

FREINWALDE, MINERAL WATERS OF. These springs are in Brandenburg, twelve leagues from Berlin. They contain chloride of sodium, sulphate of magnesia, muriate of magnesia, sulphate of lime, carbonates of lime and magnesia, iron, &c., and are used in asthenic diseases.

FRÉMISSEMENT, Shuddering.

FRÉMISSEMENT CATAIRÉ, (F.) 'Cat's purr.' Laënnec has given this name to the agitation which is sensible to the hand, when applied on the præcordial region, and which he considers a sign of ossification or other contraction of the auriculo-ventricular openings. This name was chosen by him from the analogy of the sounds to the purring of a cat.

FREM'ITUS, *Bruissement*, *Frémissement*, Shuddering.

The *Pec'toral* or *Vocal Fremitus* or *Pectoral Vibra'tion* is an obscure diffused fremitus, owing to the resonance of the voice, which is felt when the hand is applied to the chest.

FRENA, Alveolus.

FRÊNE, Fraxinus excelsior—*f. Épineux*, Xanthoxylum clava Herculis.

FRENUM, Frænum.

FRET, Herpes.

FRÉTILLEMENT, Fidgets.

FRICATIO, Friction.

FRICATORIUM, Liniment.

FRICÉ, *Fricum*, *Frico'nium*. Any medicine which the ancients employed under the form of friction. They distinguished the *Fricē siccum* and *F. mollē*.—Gaubius.

FRICONIUM, Frice.

FRICTA, Colophonia.

FRICTION, *Frictio*, *Frica'tio*, *Anat'ribē*, *Anatrip'sis*, *Trypsis*, from *fricare*, 'to rub.' The action of rubbing a part of the surface of the body with more or less force, with the

hands, a brush, flannel, &c., constituting *Xerotrib'ia*, *Frica'tio sicca*, or *dry friction*; or with ointments, liniments, tinctures, &c., constituting *moist friction*. It is a useful means for exciting the activity of the vital properties of the skin.

FRICTION SOUND, *Bruit de frottement.*

FRICTRIX, *Tribade.*

FRICTUM, Liniment.

FRICUM, Frice.

FRIGIDARIUM, Bath, cold.

FRIGID'ITY, *Frigid'itas*, from *frigidum*, 'cold.' A sensation of cold. Also, impotence, and sterility. *Frigidity of the stomach* is a state of debility of that organ, imputed to excessive venery,—the *Anorex'ia exhausto'rum* of Sauvages.

FRIGORIF'IC, from *frigus*, 'cold,' and *fio*, 'I make.' That which has the power of producing cold. The best FRIGORIFIC MIXTURES are the following. Their effects are owing to the rapid absorption of heat when solids pass into the liquid state.

FRIGORIFIC MIXTURES WITH SNOW.

Mixtures.	*Therm. falls.*
Snow, or pounded ice, two parts by weight; Muriate of Soda, 1.	From any temperature. to—5°
Snow or pounded ice, 5. Muriate of Soda, 2. Mur. of Ammonia, 1.	to—12°
Snow or pounded ice, 24. Muriate of Soda, 10. Muriate of Ammonia, 5. Nitrate of Potash, 5.	to—18°
Snow or pounded ice, 12. Muriate of Soda, 5. Nitrate of Ammonia, 5.	to—25°
Dilut. Sulph. Acid, 2. Snow, 3.	from +32° to—23°
Concentr. Mur. Acid, 5. Snow, 8.	from +32° to—27°
Concentr. Nitrous Acid, 4. Snow, 7.	from +32° to—30°
Muriate of Lime, 5. Snow, 4.	from +32° to—40°
Crystall. Mur. of Lime, 3. Snow, 2.	from +32° to—50°
Fused Potash, 4. Snow, 3.	from +32° to—51°

Frigorific Mixtures may also be made by the rapid solution of salts, without the use of snow or ice. The salts must be finely powdered and dry.

FRIGORIFIC MIXTURES WITHOUT SNOW.

Mixtures.	*Therm. falls.*
Mur. of Ammonia, 5. Nitrate of Potash, 5. Water, 16.	from +50° to—10°
Mur. of Ammonia, 5. Nitrate of Potash, 5. Sulphate of Soda, 8. Water, 16.	from +50° to +10°
Nitrate of Ammonia, 1. Water, 1.	from +50° to + 4°
Nitrate of Ammonia, 1. Carbonate of Soda, 1. Water, 1.	from +50° to— 7°
Sulphate of Soda, 3. Dilut. Nitrous Acid, 2.	from +50° to— 3°
Sulphate of Soda, 6. Mur. of Ammonia, 4. Nitrate of Potash, 2. Dilut. Nitrous Acid, 4.	from +50° to—10°
Sulphate of Soda, 6. Nitrate of Ammonia, 5. Dilut. Nitrous Acid, 4.	from +50° to—14°
Phosphate of Soda, 9. Dilut. Nitrous Acid, 4.	from +50° to—12°
Phosphate of Soda, 9. Nitrate of Ammonia, 6 Dilut. Nitrous Acid, 4.	from +50° to—21°
Sulphate of Soda, 8. Muriatic Acid, 5.	from +50° to— 0°
Sulphate of Soda, 5. Dilut. Sulphuric Acid, 4.	from +50° to— 3°

FRIGUS, Cold—f. Tenue, see Rigor.

FRISSON, Rigor.

FRISSONNEMENT, Horripilation.

FROGLEAF, Brasenia Hydropeltis.

FROG TONGUE, Ranula.

FROID, Cold—*f. Glacial*, Ice-cold.

FRÔLEMENT, (F.) 'Grazing or touching lightly.'

FRÔLEMENT PÉRICARDIQUE. Rustling noise of the pericardium. A sound resembling that produced by the crumpling of a piece of parchment or of thick silken stuff, accompanying the systole and diastole of the heart. It indicates roughness of the pericardium induced by disease.

FROMAGE, Cheese.

FROMENT, Triticum.

FRONCEMENT, Corrugation.

FRONCLE, Furunculus.

FRONDE, Funda.

FRONT, *Frons, Meto'pon, Forehead, Brow.* That part of the visage, which extends from one temple to the other, and is comprised, in a vertical direction, between the roots of the hair and the superciliary ridges.

FRONTAL, *Fronta'lis.* Relating or belonging to the front. This name has been given to several parts. Winslow, Sömmering, and others, call the anterior part of the occipito-frontalis—the *frontal muscle* or *fronta'lis, Musculo'sa Frontis Cutem movens substan'tia Par* (Vesalius.)

FRONTAL ARTERY, *A. supra-orbita'lis*, is given off by the ophthalmic, which is itself a branch of the internal carotid. It makes its exit from the skull at the upper part of the base of the orbit, and ascends the forehead between the bone and the orbicularis palpebrarum; dividing into three or four branches, which are distributed to the neighbouring muscles.

FRONTAL BONE. *Os frontis, Os coronā'lē, Os inverecun'dum, Meto'pon, Os puppis, Os Ratid'nis.* A double bone in the fœtus, single in the adult, situate at the base of the cranium, and at the superior part of the face. It forms the vault of the orbit; lodges the ethmoid bone in a notch at its middle part; and is articulated, besides, with the sphenoid, parietal, and nasal bones, the ossa unguis, superior maxillary, and malar bones.

FRONTAL FURROW extends upwards from the frontal spine, and becomes gradually larger in its course, to lodge the upper part of the supe-

rior longitudinal sinus, and to give attachment to the falx cerebri.

Frontal Nerve, *Palpébro-frontal*, — (Ch.) is the greatest of the three branches of the ophthalmic nerve,—the first division of the 5th pair. It proceeds along the superior paries of the orbit, and divides into two branches:—the one, *internal*, which makes its exit from the orbitar fossa, passing beneath the pulley of the oblique muscle:—the other, *external*, issuing from the same cavity, by the foramen orbitarium superius.

Frontal Sinuses, *Frontā'les Sinus, Prosopan'tra, Sinus Supercilia'res, S. pituita'rii frontis, Cavernæ frontis*, are two deep cavities in the substance of the frontal bone, separated from each other by a medium septum, and opening, below, into the anterior cells of the ethmoid bone.

Frontal Spine, *Crista inter'na*, is situate in the middle of the under part of the bone, and is formed by the coalescence of the inner tables for the attachment of the falx cerebri.

Surgeons have given the name Frontalis, to a bandage or topical application to the forehead. Such have, also, been called προμετωπίδια and ἀναχολλύματα.

FRONTALIS ET OCCIPITALIS, Occipito-frontalis—f. Verus, Corrugator supercilii.

FRONTO-ETHMOID FORAMEN, Cæcum foramen—*f. nasal*, Pyramidalis nasi—*f. Sourcilier*, Corrugator supercilii.

FROSTBITE, Congelation.

FROSTWEED, Erigeron Philadelphicum, Helianthemum Canadense.

FROSTWORT, Helianthemum Canadense.

FROTHY, from Gr. ἀφρός; 'froth.' (?) *Spumo'sus*, (F.) *Spumeux, Écumeux, Mousseux*. An epithet given to the fæces or sputa, when mixed with air.

FROTTEMENT, see *Bruit de frottement*.

FROTTEMENT GLOBULAIRE. A name given by M. Simonnet, to the pulse in aortic regurgitation, when it is jerking, and, in well marked cases, appears as if the blood consisted of several little masses, which passed in succession under the finger applied to the artery.

FRUCTUS HORÆI, Fruit, (summer.)

FRUGIV'OROUS, *Frugiv'orus*, from *fruges*, 'fruits,' and *voro*, 'I eat.' One that eats fruits.

FRUIT, *Fructus*, from *frui*, 'to enjoy:' *Carpos*. In a medical sense it may be defined to be;—that part of a plant which is taken as food. The effects of fruits on the body, in a medical as well as dietetical point of view, are various. They may be distinguished into classes: for, whilst the *Cerealia*, for example, afford fruits, which are highly nutritious, the *Summer Fruits* (*Fructus Horæi*,) which include strawberries, cherries, currants, mulberries, raspberries, figs, grapes, &c. are refrigerant and grateful, but afford little nourishment.

FRUMENTUM, Triticum—f. Corniculatum, Ergot—f. Cornutum, Ergot—f. Luxurians, Ergot—f. Temulentum, Ergot—f. Turgidum, Ergot.

FRUSTRATOIRE (F.) Any liquor, taken a short time after eating, for the purpose of assisting digestion, when difficult. Sugared water, *eau sucré*, or water with the addition of a little brandy or some aromatic substance, is commonly used for this purpose.

FRUTEX BACCIFER BRAZILIENSIS, Caa-ghivuyo—f. Indicus spinosus, Cara schulli.

FUCUS, F. vesiculosus, Paint.

Fucus Amyla'ceus, *Ceylon Moss, Marine Moss*. This moss belongs to the natural order Algæ. It was introduced some years ago into England, from India. It is white, filiform and fibrous, and has the usual odour of sea-weeds. Its medical properties are similar to those of Irish moss, (q. v.)

Fucus, Bladder, F. vesiculosus.

Fucus Crispus, *Lichen Carrageen, Chondrus, Ch. crispus, Sphærococ'cus crispus, Ulva crispa, Chondrus polymor'phus, Irish moss, Carrageen* or *Corrigeen moss*, (F.) *Mousse d'Islande, M. perlée*. This Fucus of the Natural Family *Algæ*, is found on the coast of England, Ireland, Western France, Spain, and Portugal, and as far as the tropics. It is also a native of the United States. In Ireland, it is used by the poor as an article of diet. As met with in America, it is of a light yellow colour, and resembles plates of horn, crisped and translucent. An agreeable jelly is obtained from it by boiling in water or milk; which forms a good article of diet in consumptive cases. Its properties are indeed exactly like those of the *Iceland Moss*.

Fucus Helmintho-corton, Corallina Corsicana—f. Saccharine, Rhodomela palmata.

Fucus Vesiculo'sus, *Quercus Mari'na, Fucus, Bladder Fucus, Sea Oak, Sea Wrack, Yellow Bladder Wrack*, (F.) *Varec vésiculeux, Chêne marin*. It has been said to be a useful assistant to sea-water, in the cure of disorders of the glands. When the wrack, in fruit, is dried, cleaned, exposed to a red heat in a crucible with a perforated lid, and is reduced to powder, it forms the *Æ'thiops vegetab'ilis*—the *Pulvis Quercûs Mari'næ*—of the Dublin Pharmacopœia, which is used, like the burnt sponge, in bronchocele and other scrofulous swellings. Its efficacy depends on the iodine it contains. Dose, gr. x to ℈ij, mixed in molasses or honey. See Soda.

FUGA DÆMONUM, Hypericum perforatum.

FUGA'CIOUS, *Fugax*, from *fugere*, 'to fly.' An epithet given to certain symptoms, which appear and disappear almost immediately afterwards; as *a fugacious redness*, &c.

FUGAX, Fugacious.

FUGE, from *fugo*, 'I expel,' 'an expeller.' A common suffix. Hence *Febrifuge, Vermifuge*, &c.

FU'GILE. This term has several acceptations. It means, 1. The cerumen (q. v.) of the ear. 2. The nebulous suspension in, or the deposition from, the urine. 3. An abscess near the ear.—Ruland and Johnson. 4. Abscess in general.—Forestus.

FULGUR, Astrape.

FULIG''INOUS, *Fuligino'sus*, from *fuligo*, 'soot.' *Lignyo'des*. Having the colour of soot. An epithet given to certain parts, as the lips, teeth, or tongue, when they assume a brownish colour, or rather are covered with a coat of that colour.

FULI'GO, *Soot*, (F.) *Suie*, &c. *Wood soot, Fuligo Ligni*, consists of a volatile alkaline salt, empyreumatic oil, fixed alkali, &c. A tincture, *Tinctu'ra Fulig''inis*, prepared from it, has been recommended as a powerful antispasmodic in hysterical cases. (*Fulig. lign.* ℥ij, *potass. subcarb.* ℔ss, *ammon. muriat.* ℥j, *aquæ fluviat.* Oiij.

Digest for three days.) This tincture bears the name *Soot drops* and *Fit drops*. An ointment of soot has been used in various cutaneous diseases.

Fuligo Alba Philosophorum, Ammoniæ murias.

FULIGO'KALI, from *fuligo*, 'soot,' and *kali*, 'potassa.' This is an analogous preparation to anthrakokali; soot being used in the place of coal. It is employed in the same diseases. What might be regarded as a weak solution of fuligokali has been used for many years in Philadelphia, under the names *medical lye, soot tea, alkaline solution, and dyspeptic lye.*

FULNESS, *Replē'tio, Plen'itude, Pletho'ra.* (q. v.) Also, a feeling of weight or distention in the stomach or other part of the system.

FUMA'RIA, *Fumā'ria officina'lis, Fumus terræ, Capnos, Herba melancholif'uga, Fu'mitory, Common Fu'mitory, Fumiter'ra, Solu'men Scabioso'rum*, (F.) *Fumeterre.* The leaves are extremely succulent, and have a bitter, somewhat saline, taste. The infusion of the dried leaves and the expressed juice of the fresh plant have been extolled for their property of clearing the skin of many disorders of the leprous kind.

Fuma'ria Bulbo'sa, *Aristolochi'a fabā'cea, Coryd'alus bulbo'sus, Capnor'chis.* The root of this plant was formerly given as an emmenagogue and anthelmintic. (F.) *Fumeterre bulbeuse.*

FUMETERRE, Fumaria.

FUMIGATIO ANTILOIMICA GAUBII, see Disinfection—f. Guytoniensis, see Disinfection—f. Smythiana, see Disinfection.

FUMIGA'TION, *Fumiga'tio*, from *fumus*, 'smoke.' *Suffi'tus, Suffimen'tum, Apocapnis'mus, Thymiama, Capnis'mos, Hypocapnis'mos, Anathymi'asis*, from *fumus*, 'smoke.' An operation, the object of which is to fill a circumscribed space with a gas or vapour; with the intention either of purifying the air, of perfuming it, or of charging it with a substance proper for acting upon a part of the surface of the human body. Hence, fumigations have been distinguished into *aqueous, aromatic, sulphureous, mercurial, disinfecting, Guytonian*, &c. Benzoin generally constitutes the chief ingredient in the *Fumigating Pastilles*, to which any variety of odoriferous substances may be added. The following is one formula:

℞. *Benzoin*, ℥j, *cascarillæ* ℥ss, *myrrh.* ℈j, *ol. myrist., ol. caryoph.* āā gtt. x, *potassæ nitrat.* ℥ss, *carbon. lign.* ℥vj. *mucil. trag.* (q. s.)

Fumigation, Chlorine, see Disinfection—f. Nitrous, see Disinfection—f. Oxymuriatic, see Disinfection.

FUMITERRA. Fumaria.

FUMITORY, Fumaria.

FUMUS ALBUS, Hydrargyrum—f. Citrinus, Sulphur—f. Terræ, Fumaria.

FUNAMBULA'TIO, from *funis*, 'a cord,' and *ambulare*, 'to walk.' An exercise with the ancients, which consisted in scaling ropes.

FUNC'TION, *Func'tio*, (F.) *Fonction*, from *fungor*, 'I act,' 'perform.' The action of an organ or system of organs. Any act, necessary for accomplishing a vital phenomenon. A *function* is a special office in the animal economy, which has, as its instrument, an organ or apparatus of organs. Thus, *respiration* is a function. Its object is,—the conversion of venous into arterial blood, and its instrument is the lungs. The ancient physiologists divided the functions into *vital, animal*, and *natural*. They called *vital functions* those which are essential to life, as innervation, circulation, respiration; *animal functions*, those which belong to the encephalon; viz: the functions of the intellect, the affections of the mind, and the voluntary motions; and *natural functions*, those relating to assimilation, such as the actions of the abdominal viscera, of the absorbent and exhalant vessels, &c. Bichat divided the functions into those which relate to the preservation of the individual, and those that relate to the preservation of the species. The former he subdivided into *animal* and *organic*. The *animal functions* are those of the intellect, sensation, locomotion, and voice. The *organic functions* include digestion, respiration, circulation, exhalation, absorption, the secretions, and nutrition. The *functions*, whose object is the preservation of the species, are all those that relate to generation;—such as conception, gestation, accouchement, &c. Each of these admits of numerous subdivisions in a complete course of *Physiology*;—for so the doctrine of the functions is called.

FUNDA, *Sphen'donē*. (F.) *Fronde*. A bandage, composed of a fillet or long compress, cleft at its extremities to within about two inches of its middle. It is used in diseases of the nose and chin, and especially in cases of fracture of the lower jaw. In such case it has, also, been called *Mentonnière*, because placed beneath the chin; from (F.) *Menton*, 'the chin.'

FUNDAMENT, Anus—f. Falling down of the, Proctocele.

FUNDAMENTAL, from *fundare*, 'to lie deeply.' Some anatomists have called the sacrum *Os Fundamenta'lē*, because it seems to serve as a base to the vertebral column. The *sphenoid bone* has, likewise, been so denominated, from its being situate at the base of the cranium.

FUNDUS, (F.) *Fond*. The base of any organ which ends in a neck, or has an external aperture; as the Fundus vesicæ, F. uteri, &c. Also, the Vulva.

FUNES CORDIS, Columnæ carneæ—f. Semicirculares, Semicircular canals.

FUNG'OID, *Fungoï'des, Fungifor'mis, Fungiform*, (F.) *Fongoïde, Fongiforme*, from *fungus*, 'a mushroom,' and *εἶδος*, 'resemblance.' That which has the shape of a fungus, or which grows in some measure like a mushroom, as the *fungoid* or *fungiform* papillæ of the tongue.

FUNGOS'ITY, *Fungos'itas, Caro luxu'rians, C. fungo'sa, Ecsarco'ma, Proud Flesh, Hypersarco'sis*, (F.) *Fongosité*. The quality of that which is fungous:—fungous excrescence. The fungosities which arise in wounds or ulcers, are easily repressed by gentle compression, dry lint, the sulphas cupri, or other gentle caustics. At times, the more powerful are necessary, and, sometimes, excision is required.

FUNGUS, *Myces*, (F.) *Fongus, Champignon*. The *mushroom* order of plants; *class* Cryptogamia, in the Linnæan system. In *Pathology*, the word is commonly used synonymously with fungosity, *myco'sis*. M. Breschet has proposed to restrict the term *fungosity* to vegetations which arise on denuded surfaces, and to apply the term *fungus* to the tumours which form in

the substance of the textures, without any external ulceration. Fici, and warts, e. g. would be fungi of the skin.

Fungus Albus Salignеus, Boletus suaveolens—f. Articuli, Spina ventosa—f. Bleeding, Hæmatodes fungus—f. Cancrosus hæmatodes, Hæmatodes F.—f. Cancrosus medullaris, see Encephaloid—f. Cerebralis, see Encephaloid—f. Cerebri, Encephalocele—f. Cynosbati, Bedeguar—f. Hæmatodes, Hæmatodes fungus—f. Igniarius, Boletus igniarius—f. Laricis, Boletus laricis—f. of Malta, Cynomorion coccineum—f. Medullaris, see Encephaloid—f. Melitensis, Cynomorion coccineum—f. Petræus marinus, Umbilicus marinus—f. Quercinus, Boletus igniarius—f. Rosarum, Bedeguar—f. Salicis, Boletus suaveolens—f. Sambucinus, Peziza auricula.

FUNICULUS, Cord—f. Spermaticus, Spermatic cord—f. Tympani, Chorda tympani.

Funic'ulus Umbilica'lis, *Funis umbilica'lis, Umbilical cord, Navel string*, from *Funis*, 'a cord.' (F.) *Cordon ombilicale.* A cord-like substance, which extends from the placenta to the umbilicus of the fœtus. It is composed of the chorion, amnion, an albuminous secretion called the *Jelly of the Cord*, cellular substance, an umbilical vein, and two umbilical arteries. The former conveys the blood from the placenta to the fœtus—the latter return it. Its usual length is from 16 to 22 inches.

Funiculus Varicosus, Cirsocele.

FUNIS, Cord, Laqueus—f. Hippocratis, Achillis tendo—f. Umbilicalis, Funiculus umbilicalis.

FUR, *Enduit.*

FURCELLA INFERIOR, Xiphoid cartilage.

FURCHMUHL, MINERAL WATERS OF. These Bavarian springs contain carbonic acid, sulphuretted hydrogen, carbonates of lime and soda; chlorides of lime and magnesium, oxides of iron and magnesia, &c.

FURCILLA, *Fourchette.*

FURCULA, Clavicle, *Fourchette.*

FUREUR UTÉRINE, Nymphomania.

FURFUR, *Bran, Pit'yron, Ach'yron, Cantabru'no*, (F.) *Son.* The skin of the grain of the cerealia, when bruised and separated from the farina. The decoction is sometimes employed as an emollient.

FURFURA, Scarf

FURFURA'CEOUS, from *furfur*, 'bran.' *Scurfy, Canica'ceous, Pithyri'nus.* Resembling bran. A name given to eruptions, in which the epidermis is detached in small scales resembling bran. Also, a bran-like sediment observed at times in the urine.

FURFURATIO, Porrigo, Pityriasis.

FU'RIA INFERNA'LIS. A kind of vermiform insect, scarcely two lines long, common in Sweden, which flies about and stings both man and animals, exciting the most excruciating torture.

FURNAS, MINERAL WATERS OF. A thermal chalybeate water in St. Michael's, Azores, which contains carbonic acid, and carbonate of iron.

FURONCLE, Furunculus.

FURONCLE GUÊPIER. A malignant boil, *Wasp's nest boil*, which generally attacks the nape and region of the neck; and rarely others than old people. Hence it has been called *Old People's boil.*

FUROR BREVIS, Rage—f. Uterinus, Nymphomania.

FURUNCULI ATONICI, Ecthyma—f. Ventriculus, see Furunculus.

FURUN'CULUS, from *furiare*, 'to make mad.' *Chi'adus, Chi'oli, Doth'ien, Furun'culus suppurato'rius, F. Verus, F. benig'nus, Abscess'sus nuclea'tus.* A *Furuncle, a Boil, a Bile*, (F.) *Furoncle, Froncle, Clou.* A small phlegmon, which appears under the form of a conical, hard, circumscribed tumour, having its seat in the dermoid texture. At the end of an uncertain period, it becomes pointed, white or yellow, and gives exit to pus mixed with blood. When it breaks, a small, grayish, fibrous mass sometimes appears, which consists of dead cellular tissue. This is called the *Core, Setfast, Ventric'ulus Furun'culi*, (F.) *Bourbillon.* The abscess does not heal until after its separation. The indications of treatment are,—to discuss by the application of leeches and warm fomentations;—or, if this cannot be done, to encourage suppuration by warm, emollient cataplasms. When suppuration is entirely established, the part may be opened or suffered to break, according to circumstances.

Furunculus Gangræ'nosus, Anthrax—f. Malignus, Anthrax.

FUSÉE PURULENTE, (F.) The long and sinuous route, which pus takes, in certain cases, in making its way to the surface. These *Fusées* almost always form beneath the skin, between the muscles; or along aponeuroses, bones, tendons, &c.

FUSEL OIL, see Oil, Fusel.

FUSTIC TREE, Cladrastis tinctoria.

FUTUTOR, Tribade.

G.

The Greek G, Γ, with the ancient Greek physicians, signified an ounce.—Rhod. ad Scribonium.

GABALLA, Cabal.

GABEL'LA, *Glabel'la.* The space between the eyebrows, which is devoid of hair in the majority of persons.

GABIR'EA, γαβιρεα. A fatty kind of myrrh, mentioned by Dioscorides.

GÆOPHAGIA, Geophagism.

GAGEL, Myrica gale.

GAGUE-SANG, Caque-sang.

GAHET, Cagot.

GAIAC, Guaiacum.

GAILLET ACCROCHANT, Galium aparine—*g. Crochant*, Galium aparine—*g. Jaune*, Galium verum—*g. Vrai*, Galium verum.

GAÎNE, Vagina or sheath—*g. de l'Apophyse styloïde*, Vaginal process of the temporal bone—*g. de la veine porte*, Vagina or sheath of the vena porta.

GALA, γαλα, genitive γαλακτος, milk, (q. v.) Hence:—

GALACTACRASIA, Galactia.

GALACTAPOSTEMA, Mastodynia apostematosa.

GALAC'TIA, *Galactirrha'a*, from γαλα, 'milk.' *Lactis redundan'tia*, *Galactacra'sia*. A redundant flow of milk, either in a female who is suckling, or in one who is not. It may occur without being provoked by suckling. When to a great extent, it sometimes causes wasting; *Tabes lac'tea*, *T. nutri'cum*. Good uses *Galac'tia*, in his Nosology, for 'morbid flow or deficiency of milk.'

GALACTIRRHŒA, Galactia.

GALACTO'DES, from γαλα, 'milk,' and ειδος, 'resemblance.' In Hippocrates, the term signifies milkwarm, and likewise a milky colour, as of the excrements, &c.

GALACTOM'ETER, *Lactom'eter*, from γαλα, 'milk,' and μετρον, 'measure.' An instrument for appreciating the quantity of cream in milk. It is a kind of graduated separatory or *éprouvette*,—the degrees on the scale indicating the thickness of the layer of cream that forms on the surface of the milk.

GALACTOPH'AGOUS, *Galactoph'agus*, *Lactiv'orus*, sometimes used substantively; from γαλα, 'milk,' and φαγω, 'I eat.' That which feeds on milk. A name given to certain people, with whom milk appears to constitute the chief nourishment.

GALACTOPHORA, Galactopoietica.

GALACTOPH'OROUS, *Lactif'erous*, (q. v.) from γαλα, 'milk,' and φερω, 'I carry.' That which carries milk.

Galactoph'orous, or Lactif'erous Ducts, are those which convey the milk, secreted by the mammary gland, towards the nipple, where their external orifices are situate. The *Lacteals* have also been so called.

GALACTOPH'ORUS. Some accoucheurs have given this name to an instrument intended to facilitate sucking, when the faulty conformation of the nipple prevents the child from laying hold of it.

GALACTOPLA'NIA, from γαλα, 'milk,' and πλανη, 'wandering.' Extravasation of milk into the cellular membrane.

GALACTOPOIESIS, Galactosis.

GALACTOPOIET'ICA, *Galactoph'ora*; from γαλα, 'milk,' and ποιεω, 'I make.' Substances, to which has been attributed the property of favouring the secretion of milk and augmenting its quantity.

GALACTOPO'SIA, from γαλα, 'milk,' and ποσις, 'drink.' Treatment of a disease by means of milk.

GALACTOP'OTES, *Galactop'otus*, *Lactipotor*. Same etymon. A drinker of milk. One subjected to a milk diet.

GALACTOPYRA, Fever, milk.

GALACTOSACCHARUM, Saccharum lactis.

GALACTO'SIS, *Galactopoie'sis*, from γαλακτομαι, 'I am changed into milk.' The secretion or formation of milk.

GALACTURIA, Chyluria.

GALANGA, Maranta galanga.

GALANGAL, Maranta galanga.

GALANGALE, Cyperus longus.

GALARIPS, Allamanda.

GALAXIA, Thoracic duct.

GALBANUM, see Bubon galbanum—g. Long-leaved, Bubon galbanum.

GAL'BULUS, from *galbus*, 'yellow.' A kind of congenital jaundice, in which the yellow colour continues through life. It is rather a defect in colour than a disease.—Vogel.

GALE, Myrica gale—*g. Odorant*, Myrica gale—g. Sweet, Myrica gale.

GALE, Psora—*g. Canine*, Psoriasis—*g. Épidémique*, Eczema—*g. Miliaire*, Psoriasis—*g. Sèche*, Lichen, Psoriasis.

GA'LEA. A helmet, from γαλη, 'a cat;' of the skin of which it was formerly made. A name given to the *amnios*, (q. v.) and also, to the *bandage of Galen*, (q. v.) In *Pathology*, it indicates a headache affecting the whole head. See, also, Caul.

Galea Aponeuro'tica Cap'itis, *Ga'lea tendin'ea Santori'ni*, *Membra'na epicra'nia*. The tendinous expansion, which unites the frontal and occipital portions of the occipito-frontalis muscle.

GALEANTHRO'PIA, *Galeanthro'pia*, from γαλη, 'a cat,' and ανθρωπος, 'a man.' A variety of melancholy in which the patient believes himself changed into a cat. An affection similar to the lycanthropy and cynanthropy.

GALE'GA OFFICINA'LIS, *Galega*, *Ruta capra'ria*, *Goat's rue* (F.) *Rue de chèvre*, *Faux Indigo*. It is slightly aromatic, and was once used as a sudorific and alexiterial, in malignant fevers, &c.

Galega Virginia'na, *Virginia goat's rue* or *cat gut*, is used in some parts of the United States as an anthelmintic. The decoction of the roots is given.

GALEN'IC or GALEN'ICAL, *Galen'icus*, *Gale'nius*, from *Gale'nus*. That which relates to the doctrine of Galen or to Galenism. Used, substantively, for drugs that are not chymical.

Galenic Medicine, Galenism.

GA'LENISM, *Galen'ic med'icine*. The doctrine of Galen.

GA'LENIST. A follower of the doctrines of Galen.

GALENIUS, Galenic.

GALEOBDOLON, Galeopsis.

GALEOPDOLON, Galeopsis.

GALEOPSIS, Lamium album.

Galeop'sis, *Galeob'dolon*, *Galeop'dolon*, *La'mium rubrum*, *Urti'ca iners magna fœtidis'sima*, *Stachys fœ'tida*, *Hedge nettle*, (F.) *Ortie morte des bois*. This plant was formerly reckoned a vulnerary and anodyne.

Galeop'sis Grandiflo'ra, *G. Ochroleu'ca*, *G. Seg"etum*, *Herba Sideri'tidis*. This plant is regarded in Germany as a bitter resolvent. It is the basis, also, of a celebrated nostrum, the *Blankenheimer Tea*, called, likewise, *Lieber's pectoral and phthisical herbs* (Liebersche Brust oder Auszehrungs-Kraut er,) which has enjoyed great repute in pectoral complaints. The tops of the plant are given in decoction, (℥j, boiled in a pint of water for a quarter of an hour.) This quantity to be taken in the day.

Galeop'sis Versic'olor, and the G. Villo'sa, are possessed of the same virtues.

Galeopsis Ochroleucha, G. grandiflora—g. Segetum, G. grandiflora.

GA'LIA. An ancient composition, in which galls were an ingredient; the *Galia pura*. There was, also, a *Galia aromat'ica*, *moscha'ta* vel *musca'ta*, which consisted of a mixture of several perfumes, such as musk.

GALIPÆA FEBRIFUGA, Cusparia febrifuga—g. Officinalis, see Cusparia febrifuga.

GALIPOT, see Pinus sylvestris.

GALIUM. (from *γαλα*, 'milk,' because some species curdle milk.) G. verum.

GALIUM ALBUM, G. mollugo.

GA'LIUM APARI'NĒ, *Aparinē*, *Lappa*, *Philanthro'pus*, *Ampelocar'pus*, *Omphalocar'pus*, *Ixus*, *Asphari'nē*, *Asper'ula*, *Goose-grass*, *Cleaver's bees*, *Cleavers*, *Goose-share*, *Hayriff*. *Family*, Rubiaceæ. *Sex. Syst.* Tetrandria Monogynia. (F.) *Gaillet accrochant*, *G. crochant*, *Gratteron*. The expressed juice has been given as an aperient diuretic in incipient dropsies; also, in cancer.

GALIUM LUTEUM, G. verum.

GALIUM MOLLU'GO, *Galium album*, *Greater ladies' bed-straw*, *Alys'sum Plin''ii*, (F.) *Caillelait blanc*. The herb and flowers have been used, medicinally, in epilepsy.

GA'LIUM TINCTO'RUM, an American species is closely allied in properties to G. verum.

GA'LIUM VERUM, *Ga'lium*, *G. lu'teum*, *Ladies' bed-straw*, *Cheese-rennet*, *Bed straw*, *Cleavewort*, *Goose-grass*, *Savoyan*, *Clabber-grass*, *Milk sweet*, *Poor Robin*, *Gravel-grass*, (F.) *Gaillet jaune*, *G. vrai*, *Vrai Gaillelait*. The tops were used in the cure of epilepsy. The leaves and flowers possess the property of curdling milk.

GALL, Bile, Glass, see Vitrum and Eczema Impetiginodes—g. of the Earth, Prenanthes—g. Nut, see Quercus infectoria—g. of the Ox, see Bile—g. Sickness, Fever, Walcheren.

GALL-BLADDER, *Vesic'ula fellis*, *Cholecyst*, *Follic'ulus fellis*, *Cystis fel'lea*, *Vesi'ca fellea*, *Vesic'ula bilis*, *Vesi'ca biliaria*, *Follic'ulus felleus*, *Cystis choled'ochus*, (F.) *Vésicule du fiel* ou *Vésicule biliaire*, *Réservoir de la bile*. A membranous, pyriform reservoir, lodged in a superficial depression at the inferior surface of the right lobe of the liver. It receives, by the hepatic and cystic ducts, a portion of the bile secreted by the liver, when the stomach is empty, which becomes in it more acrid, bitter, and thick. It receives an artery called the *cystic*. Its veins empty into the vena porta. Its nerves come from the hepatic plexus, and its lymphatic vessels join those of the liver.

GALLA, see Quercus infectoria—g. Maxima orbiculata, see Quercus infectoria.

GALLÆ QUERCÛS, see Quercus infectoria—g. Tinctoriæ, see Quercus infectoria—g. Turcicæ, see Quercus infectoria.

GALLI GALLINACEI CAPUT, Gallinaginis caput.

GALLINAG''INIS CAPUT, *Galli gallina'cei Caput*, *Verumonta'num*, *Crista urethra'lis*, *Crête uréthrale*,—(Ch.,) from *Gallinago*, 'a woodcock.' An oblong, rounded, projection, formed by the mucous membrane in the spongy portion of the urethra, at the sides of which the ejaculatory ducts open.

GAL'LIPOT. Perhaps from *gala*, 'finery.' (?) A pot painted and glazed or merely glazed, and commonly used for medicines.

GALLITRICHUM, Salvia sclarea.

GALLS, see Quercus infectoria—g. Nut, see Quercus infectoria—g. Turkey, see Quercus infectoria.

GALLSTONES, Calculi, biliary.

GALREDA, Gelatin.

GAL'VANISM, *Galvanis'mus*, *Electric''itas animal'is*, *E. Galvan'ica* vel *metal'lica*, *Irritamentum metallo'rum* vel *metal'licum*, *Vol'taism*, *Volta'ic Electricity*. A series of phenomena, consisting in sensible movements, executed by animal parts, which are endowed with irritability, when placed in connexion with two metallic plates of different nature, between which a communication is established by direct contact or by means of a metallic wire. Galvanism has been employed medicinally in the same cases as electricity, and especially in neuralgic affections. It is often applied in the form of plates. "Mansford's plates." In asthma, for example, a small blister, the size of a dollar, may be placed on the neck over the course of the phrenic and pneumogastric nerves, and another on the side in the region of the diaphragm. One metal is placed mediately or immediately over the vesicated surface on the neck, and another over that in the side. They are then connected by means of a wire. The new nervous impression, in this way induced, is often signally beneficial.

GALVANOPUNCTURE, Electropuncture.

GAMBOGIA, Cambogia.

GAMBUGIUM, Cambogia.

GAMMARUS, Crab.

GAM'MATA FERRAMEN'TA, Cauteries, having the shape of the Greek letter Γ; which were used for cauterizing hernias.

GAMMAUT. The Italians, according to Scultetus, gave this name to a kind of crooked bistouri, used for opening abscesses.

GAMPHELE, Gena.

GANGLIA CEREBRI POSTICA, Thalami nervorum opticorum—g. Nervorum, Ganglions, nervous, see Ganglion.

GANG'LIFORM or GANG'LIOFORM, *Ganglifor'mis*. Having the shape of a ganglion. A name generally given to a knot-like enlargement, in the course of a nerve.

GANGLION, *γαγγλιον*, 'a knot.' A name given to organs differing considerably from each other in size, colour, texture, functions, &c. They are divided into *glandiform*, *lymphatic*, and *nervous*. 1. *Glandiform ganglions*, called also *adenoid*, *vascular*, and *sanguineous ganglions*, *blind glands*, *aporic glands*, *glandulæ spuriæ*, &c., are organs of whose functions we are, in general, ignorant; and which have the appearance of glands. They are formed of agglomerated globules, pervaded by blood-vessels, surrounded by cellular membrane, and contain a milky or yellowish fluid. To this class belong the thymus, thyroid, and supra-renal glands. 2. *Lymphat'ic ganglions*. See Conglobate. 3. *Nervous ganglions*, *Ganglia* seu *Nodi* seu *Nod'uli Nervorum*, *Ganglid'nes*, *Tumo'res*, seu *plexus ganglioformes*, *Plexus glandifor'mes*, *Tuber'cula nodo'sa Nervo'rum*, *Divertic'ula spirituum anima'lium*. Enlargements or knots in the course of a nerve. They belong, in general, to the system of the great sympathetic. One, however, exists on the posterior root of every spinal nerve, and one on the cerebral,—the 5th. Bichat regarded them as so many small brains, or centres of nervous action, independent of the encephalon, and intended exclusively for organic life. Being formed by the union of the cerebral and spinal nerves, they may send out the influence of both these nervous centres to the parts to which the nerves proceeding from them are distributed. We know not, however, their precise uses, although it is probable that they may be connected with the nutrition of

the part, on which the nerves proceeding from them are dispersed.

Ganglion Abdominale, G. semilunar—g. Adenoid—g. glandiform—g. of Andersch, Petrous ganglion—g. Auricular, Oticum G.—g. Cerebelli, Corpus dentatum—g. Ciliare, Corpus dentatum—g. *Cérébral inférieur, grand*, Thalami nervorum opticorum—g. *du Cervelet*, Corpus dentatum.

Ganglion of Ehrenritter, *Ganglion nervi glosso-pharyngæi superius, G. jugulare superius, G. Ehrenritteri* seu *Mulleri*. A reddish gray mass on the glosso-pharyngeal nerve in the foramen lacerum, above the ganglion of Andersch.

Ganglion of Gasse'rius. A semicircular knot on the 5th pair of nerves, before its division into three branches.

Ganglion, Glandiform, see Ganglion—g. Jugulare Superius, G. of Ehrenritter—g. *Lacteux*, Milk-knot—g. Lenticular, G. ophthalmic—g. Lymphatic, Conglobate gland—g. *Maxillo-tympanique*, Oticum G.—g. of Meckel, Spheno-palatine G.—g. Mulleri, G. of Ehrenritter—g. Nervi glosso-pharyngei superius, G. of Ehrenritter—g. Optic, Quadrigemina tubercula—g. Orbitar, G. ophthalmic—g. Oticum, Oticum G.—g. Sanguineous, G. glandiform—g. Solare, G. semilunare—g. Sphenoidal, Spheno-palatine ganglion—g. Splanchnicum, G. semilunare—g. *Supérieur du cerveau (grand,)* Corpora striata—g. *Surrénal*, G. semilunare—g. Transversum, G. semilunare—g. Vascular, G. glandiform—g. de Vieussens, Cœliac plexus.

Ganglion. Same etymon. *Emphy'ma encys'tis ganglion*. A globular, hard, indolent tumour, without change in the colour of the skin; of a size varying from that of a pea, to that of an egg, and always situate in the course of a tendon. The tumour is formed of a viscid, albuminous fluid, contained in a cyst of greater or less thickness. The cyst is sometimes loose; but in the majority of cases it communicates, by a narrow footstalk, with the sheath of a tendon, or even with the synovial capsule of a neighbouring articulation. The *causes* are generally unknown. The *treatment* consists in compression, percussion, the use of discutients, extirpation, or incision.

GANGLIONES GANGLIOFORMES, Ganglions, nervous.

GANGLION'IC, *Ganglion'icus*. Nerves, in the course of which ganglions are met with; as the greater part of the branches of the great sympathetic or trisplanchnic, the posterior roots of the spinal nerves, &c.

Ganglionic Nerve, Trisplanchnic nerve.

GANGLIONITIS PERIPHERICA et MEDULLARIS, Cholera.

GANGRÆNA ALOPECIA, Alopecia—g. Caries, Caries—g. Nosocomiorum, Hospital gangrene—g. Oris, Cancer aquaticus—g. Ossis, Spina ventosa—g. Ossium, Caries—g. Pottii, see Gangrene—g. Pottii, Gangrene of old people—g. Pulmonum, Necropneumonia—g. Senilis, Gangrene of old people—g. Sphacelus, Sphacelus—g. Tonsillarum, Cynanche maligna—g. Ustilaginea, Ergotism.

GANGRÆNOPSIS, Cancer aquaticus, (q.v.); also, gangrenous inflammation of the eyelids. *Blepharitis gangrænosa*.—Siebenhart.

GANGRENE, *Gangræ'na, Cancré'na, Hot mortification*, (F.) *Gangrène, G. Chaude, Asphyxie des parties*. Privation of life or partial death of an organ. Authors have generally distinguished mortification into two stages; naming the first *incipient* or *gangrene*. It is attended with a sudden diminution of feeling in the part affected; livid discoloration: detachment of the cuticle, under which a turbid fluid is effused; with crepitation, owing to the disengagement of air into the cellular texture. When the part has become quite black, and incapable of all feeling, circulation, and life, it constitutes the *second stage*, or *mortification*, and is called *sphacelus*. Gangrene, however, is frequently used synonymously with mortification,—*local asphyxia* being the term employed for that condition, in which the parts are in a state of suspended animation, and, consequently, susceptible of resuscitation. When the part is filled with fluid entering into putrefaction, the affection is called *humid gangrene*, (F.) *Gangrène humide;* on the other hand, when it is dry and shrivelled, it constitutes *dry gangrene;* (F.) *Gangrène sèche*. To this class belongs the *gangræ'na senil'is, G. Pot'tii, Presbyosphac''elus*, or *spontaneous gangrene* of old people, which rarely admits of cure. Whatever may be the kind of gangrene, it may be caused by violent inflammation, contusion, a burn, congelation, the ligature of a large arterial trunk, or by some internal cause inappreciable to us.

The treatment, both of external and internal gangrene, varies according to the causes which produce it. Gangrene from excessive inflammation is obviated by antiphlogistics; and that from intense cold by cautiously restoring the circulation by cold frictions, &c. When the gangrene has become developed, the separation of the eschars must be encouraged by emollient applications, if there be considerable reaction; or by tonics and stimulants if the reaction be insufficient.

Gangrene of the Lungs, Necropneumonia.

GANGRÈNE DE LA BOUCHE, Cancer aquaticus—g. *Chaude*, Gangrene—g. *Froide*, Sphacelus—g. *Humide*, see Gangrene—g. *Sèche*, see Gangrene—g. *Hôpital*, Hospital gangrene—g. *du Poumon*, Necropneumonia—g. *des Solonois*, Ergotism.

GANTELET, (F.) *Chirothe'ca, Fascia digita'lis, Gauntlet;* from (F.) *gant*, a glove. A sort of bandage, which envelops the hand and fingers, like a glove. It is made with a long roller, about an inch broad; and is applied so that the fingers are covered to their tips, when it is called *Gantelet entier* ou *complet*. The *Demi-gantelet* includes only the hand and base of the fingers. Both bandages are used in fractures and luxations of the fingers, burns of the hand, &c. See Chirotheca.

GANTS DES DAMES, Condom—g. *de Notre Dame*, Digitalis.

GAPING, Yawning.

GARANCE, Rubia.

GARCIN'IA MANGOSTA'NA. The systematic name of the *Mangos'tan* or *Mangous'tan tree, Mangostana*. It grows in great abundance in Java and the Molucca islands. The fruit, which is about the size of an orange, is delicious, and is eaten in almost every disorder. The dried bark is used medicinally in dysentery and tenesmus; and a strong decoction has been much esteemed in ulcerated sore throat.

GARDE-MALADE, Nurse.
GARDEROBE, Artemisia abrotanum.
GARDEROBES, Fæces.
GARDOUCHES, Vesiculæ seminales.
GARETUM, Poples.
GAR'GALOS, *Gargalis'mos*, *Titilla'tio*, *Irrita'tio*, *Pruri'tus*. Titillation, irritation, itching.
GARGALISMOS, Gargale.
GARGALOS, Gargale.
GARGAREON, Uvula.
GAR'GARISM, *Gargaris'mus*, *Gargaris'ma*, *Anagargalic'ta*, *Gargaris'mum*, *Colluto'rium*, *Dyaclys'ma*, *Anagargaris'ton*, *Anaconchylis'mos*, from γαργαριζω, 'I wash the mouth.' Any liquid medicine, intended to be retained in the mouth, for a certain time, and to be thrown in contact with the uvula, velum pendulum, tonsils, &c. For this purpose, the liquid is agitated by the air issuing from the larynx, the head being thrown back. Gargles are employed in cynanche tonsillaris and other diseases of the fauces, and are made of stimulants, sedatives, astringents, refrigerants, &c., according to circumstances.

The term *collutorium* or *collutorium oris*, is generally restricted to a wash for the mouth.

GARGET, Phytolacca decandra.
GARGOUILLEMENT, Borborygmus, Gurgling. See *Râle muqueux*.
GARLIC, Allium—g. Hedge, Alliaria.
GAROSMUM, Chenopodium vulvaria.
GAROU BARK, Daphne gnidium.
GARRETUM, Poples.
GARROPHYLLUS, Eugenia caryophyllata.
GARROT, (F.) from *garrotter*, 'to tie fast.' A small cylinder of wood, used for tightening the circular band, by which the arteries of a limb are compressed, for the purpose of suspending the flow of blood in cases of hemorrhage, aneurism, amputation, &c.
GARROTILLO, Cynanche maligna.
GARRULITAS, Loquacity.
GARUM, γαρον. The ancient Romans gave this name to a kind of pickle made by collecting the liquor which flowed from salted and half putrefied fish. It was used as a condiment.—The *Geoponics*, Humelberg on Apicius. Martial, &c.
GAS AMMONIACAL, Ammonia—G. Animale sanguinis, G. sanguinis—g. Azoticum, Azote—g. Azoticum oxygenatum, Nitrogen, gaseous oxide of—g. Hepaticum, Hydrogen, sulphuretted—g. Hydrogenium sulphuretum, Hydrogen, sulphuretted—g. Intoxicating, Nitrogen, gaseous oxide of—g. Laughing, Nitrogen, gaseous oxide of—g. of the Lungs, Gas, pulmonary—g. Nitrous, dephlogisticated, Nitrogen, gaseous oxide of—g. Oxygenated muriatic acid, Chlorine—g. Oxymuriatic acid, Chlorine—g. Palustre, Miasm, marsh—g. Paradise, Nitrogen, gaseous oxide of—g. Sulphuris, Sulphurous acid.
GASCARILLA, Croton cascarilla.
GASTEIN, MINERAL WATERS OF. Gastein is in the Noric Alps, Austria. The waters are thermal. Temp. 100° to 118° Fahr.
GASTER, γαστηρ. The abdomen, (q. v.) Also, the stomach, (q. v.) in particular; Hence:
GASTERANAX. A name given by Dolæus to a hypothetical vital principle, corresponding to the Archæus of Van Helmont, the seat of which he placed in the lower belly. See Bithnimalca.
GASTERANGIEMPHRAX'IS. Obstruction of the pylorus, from γαστηρ, 'stomach,' αγχω, 'I strangle,' and εμφραττω, 'I obstruct.'—Vogel.
GASTRALGIA, Cardialgia.
GASTRANEURYSMA, Gastrectasis.
GASTREC'TASIS, *Gastraneurys'ma*, *Dilata'tio Ventric'uli*: from γαστηρ, 'the stomach,' and εκτασις, 'dilatation.' Dilatation of the stomach.
GASTRELCO'SIS, *Ulcera'tio Ventric'uli*, from γαστηρ, 'the stomach,' and 'ελκωσις, 'ulceration.' Ulceration of the stomach.
GASTROSTENO'SIS CARDI'ACA et PYLORI'CA; from γαστηρ, 'the stomach,' and στενος, 'narrow.' Narrowness of the cardiac and pyloric orifices of the stomach from cancer of that organ.—*Scirrhus et Carcino'ma Ventric'uli*.
GASTRIC, *Gas'tricus*, from γαστηρ, 'the stomach.' Belonging or relating to the stomach.
GASTRIC AR'TERIES are three in number. *Arte'ria gastro-epiplo'ica dextra*, *A. gastro-epiploi'ca sinis'tra*, and *A. corona'ria ventri'culi*.
GASTRIC JUICE, *Succus gas'tricus*, (F.) *Suc Gastrique*, *Gastric Acid*. A fluid, secreted from the mucous membrane of the stomach. As met with, it is a mixture of the fluids secreted by that organ with those of the supra-diaphragmatic portion of the alimentary canal. Owing to such admixture, the most contrary properties have been assigned to it. That such a fluid is secreted, which concurs powerfully in digestion, is evident from many considerations, and has been positively proved by the author and numerous others. It is always found to contain chlorohydric and acetic acids. The gastric fluid in cases of sudden death sometimes corrodes and perforates the stomach; giving rise to interesting questions in medical jurisprudence.
GASTRIC NERVES. The two cords by which the pneumogastric nerves terminate, and which descend on the two surfaces of the stomach; as well as the filaments of the great sympathetic, which accompany the gastric vessels.
GASTRIC PLEXUS, *Plexus corona'rius ventri'culi*. A nervous net-work, formed by the solar plexus. It accompanies the *Arteria coronaria ventriculi*, and passes along the lesser curvature of the stomach, to which it gives branches.
GASTRIC VEINS follow the same distribution as the arteries, and open into the *Vena porta abdominis*.
GAS'TRICISM, *Gastricis'mus*, from γαστηρ, 'the stomach.' A name, by which is designated the medical theory, that refers all, or almost all, diseases to an accumulation of saburræ in the digestive passages.
GASTRILOQUE, Engastrimythos.
GASTRILOQUIST, Engastrimythos.
GASTRINUM, Potash.
GASTRI'TIS, from γαστηρ, 'the stomach,' and *itis*, denoting inflammation. *Ventric'uli inflamma'tio*, *Cauma gastritis*, *Empres'ma gastritis*, *Inflamma'tio gastritis*, *Cardial'gia inflammato'ria*, *Febris stomach'ica inflammato'ria*, *Inflamma'tio ventric'uli*, *I. stom'achi*, *Phleg'monē ventric'uli*, *Inflammation of the stomach*, (F.) *Inflammation de l'Estomac*, *Gastrite*, *Catarrhe gastrique*. A disease, characterized by pyrexia; great anxiety; heat and pain in the epigastrium; increased by taking any thing into the stomach; vomiting and hiccup. Gastritis may either be seated in the peritoneal or mucous coat. It is most frequently in the latter (*Esogastri'tis*, or

Endogastri'tis, Gastromycoderi'tis,) being excited directly by acrid ingesta. It requires the most active treatment;—bleeding, blistering, fomentations, diluents, &c. Some degree of inflammation of the mucous coat of the stomach is considered by the followers of Broussais to be present in almost all fevers; and the various forms of dyspepsia have been supposed by some to be nothing more than *chronic endogastritis.*

GASTRO-ARTHRITIS, Gout—g. Ataxia, Dyspepsia—g. Atonia, Dyspepsia—g. Bronchitis, Fever, adeno-meningeal—*g. Entérite intense,* Synocha—*g. Entérite,* with nervous affection of the brain, see Typhus—g. Enteritis, follicular, Dothinenteritis; see Typhus.

GASTROBRO'SIS, *Perfora'tio Ventric'uli, Gastrorrhex'is,* (F.) *Perforation;* from γαστηρ, 'the stomach,' and βρωσις, 'the act of gnawing.' Perforation of the stomach.—Alibert.

GASTROCE'LE, from γαστηρ, 'the stomach,' and κηλη, 'a tumour.' *Hernia of the Stomach, Hernia ventric'uli,* (F.) *Hernie de l'Estomac.* Hernia, formed by the stomach through the upper part of the linea alba: a disease, the existence of which has been doubted by many. See Epigastrocele.

GASTROCNE'MII, from γαστηρ, 'the belly,' and κνημη, 'the leg.' The name of the two fleshy masses which occupy the posterior and superficial part of the leg; (F.) *Gastrocnémiens, Jumeaux de la jambe, Gemelli, Bifémoro-calcanien*—(Ch.:) the two constituting the *Gastrocnémius exter'nus,* of English anatomists. These muscles are distinguished into *internal* and *external,* which are distinct above, but united at their inferior extremity. They are long, flat, and thick; and arise—the *former,* from the posterior part of the outer condyle of the femur; the *latter,* from the posterior part of the inner condyle of the same bone. The aponeurosis, which unites these muscles below, joins with that of the solaris, and forms, with it, a large tendon, which, under the name *Tendo-Achillis,* is inserted at the posterior part of the calcaneum. These muscles extend the foot on the leg, and the leg on the foot. They can, also, bend the leg and the thigh reciprocally on each other. For the *Gastrocnemius internus,* see Soleus.

GASTRODID'YMUS, *Did'ymus, Symphygas'trius, Psod'ymus;* from γαστηρ, 'the belly,' and διδυμος, 'a twin.' A monstrosity in which twins are united by the abdomen.

GASTRODYNIA, Cardialgia—g. Flatulenta, Colica flatulenta.

GASTRO-ENTERITIS, from γαστηρ, 'the stomach,' εντερον, 'an intestine,' and *itis,* a suffix denoting inflammation. Inflammation of the stomach and small intestine. According to Broussais, the essential fevers of authors are gastro-enteritis, simple, or complicated.

GASTRO-EPIPLOIC, *Gastro epiplo'icus,* from γαστηρ, 'the stomach,' and επιπλοον, 'the epiploon.' That which relates to the stomach and epiploon.

Gastro-Epiploic Arteries, or *Gastric inferior,* are two in number, and distinguished into *right* and *left.* The *right,* also called *Gastro-hepatic, Gas'trica infe'rior dextra, Gastro-epiplo'ica dextra,* is furnished by the hepatic artery. It descends behind the pylorus, and passes from right to left, along the great curvature of the stomach. It gives branches to the pancreas, duodenum, stomach, omentum majus, and terminates by anastomosing with the *Gastro-epiplo'ica sinis'tra, Gas'trica sinis'tra, Gas'trica infe'rior sinis'tra.* This—the *left*—arises from the splenic artery. It is of considerable magnitude, and passes from left to right, along the great curvature of the stomach, distributing its branches more particularly to the stomach and omentum majus. It terminates by joining the right gastro-epiploic.

Gastro-Epiploic Ganglions are the lymphatic ganglions or glands, situate towards the great curvature of the stomach, between the two anterior laminæ of the omentum majus.

Gastro-Epiploic Veins are distinguished, like the arteries, into *right* and *left.* They empty themselves;—the former, into the superior mesenteric: the latter, into the splenic vein.

GASTRO-HÆMORRHAGIA, Hæmatemesis.

GASTRO-HEPATIC, *Gastro-hepat'icus* or *Hep'ato-gas'tricus;* from γαστηρ, 'the stomach,' and ηπαρ, 'the liver.' Relating to the stomach and liver. This name has been given to several organs. See Epiploon, Gastro-epiploic, &c.

GASTRO-HYSTEROTOMY, Cæsarean section.

GASTROMALACIA, Gastromalaxia.

GASTRO-MALAX'IA, *Gastro-mala'cia, Malax'is ventric'uli, Dissolu'tio ventric'uli, Emollitio ventric'uli, Pseudophlogo'sis ventric'uli resoluti'va et colliquati'va, Metamorpho'sis ventric'uli gelatinifor'mis,* (F.) *Ramolissement de l'Estomac,* from γαστηρ, 'the stomach,' and φρενες, 'the diaphragm.' Belonging to the stomach and diaphragm.

GASTROMYCODERITIS, see Gastritis.

GASTROP'ATHY, *Gastropathi'a:* from γαστηρ, 'the stomach,' and παθος, 'disease.' Disease of the stomach.

GASTRO-PHREN'IC, *Gastro-phren'icus,* from γαστηρ, 'the stomach,' and φρενες, 'the diaphragm.' Belonging to the stomach and diaphragm.

Gastro-Phrenic Ligament is a reflection of the peritoneum, which descends from the inferior surface of the diaphragm to the cardia.

GASTRO'RAPHY, *Gastrorrha'phia, Sutu'ra abdomina'lis,* from γαστηρ, 'the belly,' and ραφη, 'a suture.' The suture used for uniting wounds penetrating the abdomen, when they are too extensive or too unequal to be kept in contact by position, adhesive plaster, or appropriate bandages. The *interrupted* and *quilled* sutures are those chiefly employed.

GASTRORRHAGIA, Hæmatemesis.

GASTRORRHEXIS, Gastrobrosis.

GASTRORRHŒ'A, from γαστηρ, 'the stomach,' and ρεω, 'I flow.' *Blennorrhœ'a ventric'uli,* (F.) *Flux muqueux de l'estomac, Catarrhe stomacal.* A morbid condition of the stomach, which consists in the secretion of an excessive quantity of mucus from the lining membrane of the stomach.

GASTRO'SIS. A generic name for diseases which are seated in the stomach.—Alibert.

GASTROT'OMY, from γαστηρ, 'the belly,' and τομη, 'incision.' Several different operations have been so called. 1. The Cæsarean Section, which see. 2. An incision, made into the abdomen for the purpose of removing some internal strangulation or volvulus; or to reduce

hernia, *Laparot'omy*: and, 3. The opening made into the stomach, to remove a foreign body which has passed into it through the œsophagus.

GÂTEAU FÉBRILE, Ague cake.

GATTILIER, Vitex.

GAUDIA FŒDA, Masturbation.

GAULTHE'RIA, *Gaulthe'ria* seu *Gualthe'ria procum'bens*, *Gautie'ra repens*, *Mountain Tea*, *Partridge Berry*, *Berried Tea*, *Grouseberry*, *Deerberry*, *Spice berry*, *Tea berry*, *Redberry*, *Wintergreen*, *Redberry Tea*, *Ground berry*, *Ground ivy*, *Ground holly*, *Hill berry*, *Box berry*, *Chequer berry*. An American plant, which is one of the principal articles of the materia medica of some Indian tribes. The infusion of the leaves is stimulant and anodyne, and is said to have been used, with advantage, in asthma. The oil—*Oleum Gaultheriæ*, Ph. U. S.,—is used, chiefly on account of its pleasant flavour, to cover the taste of other medicines.

GAUNTLET, *Gantelet*.

GAUQUAVA, Smilax China.

GAUTIERA REPENS, Gaultheria.

GAY FEATHER, Liatris spicata.

GAYAC, Guaiacum.

GAZ, or GAS, *Air*. Van Helmont first designated by this name,—the etymology of which is unknown,—the carbonic acid developed in the vinous fermentation. Afterwards, the term was appropriated to every permanently elastic fluid; that is, which preserves its aëriform state at all temperatures: and ultimately it was extended to all aëriform bodies;—which were divided into *permanent* and *non-permanent gazes*. The latter are generally termed vapours:—they return to the liquid state, when a portion of their caloric is abstracted. The permanent gazes, or *gazes* properly so called, are numerous, and may be divided into four sections with regard to their effects on the animal economy.

1. *Irrespirable gazes.*	Carbonic acid, ammoniacal gaz, muriatic acid gaz, deutoxide of azote, nitrous acid gaz, and chlorine.
2. *Negatively deleterious gazes.*	Hydrogen, azote.
3. *Positively deleterious gazes.*	Oxygen, protoxide of azote, carburetted hydrogen, carbonic oxide, sulphuretted hydrogen, and arseniuretted hydrogen.

It is proper to remark, that the term *respirable* has been very differently employed by different writers. Sometimes it has meant the power of supporting life, when applied to the blood in the lungs. At others, all gazes have been deemed irrespirable, which are incapable of being introduced into the lungs by voluntary efforts,—without any relation to their power of maintaining vitality; and this is perhaps the best sense. The gazes were, at one time, employed in medicine, under great expectations,—especially by the enthusiastic Beddoes; but they are now scarcely ever had recourse to. They differ, considerably, in their effects on the animal economy. Some, as oxygen, are exciting; others, as nitrogen, depressing; whilst others, again, as the *Protoxide of azote* or *laughing gaz*, produce the most singular effects.

GAZ, PUL'MONARY, *Gaz of the lungs*. A name given to the expired air; which contains,—besides common air, an increase of carbonic acid, water, and some animal matter.

GAZ SANG'UINIS, *Gaz anima'lē san'guinis*, *Hal'itus san'guinis*, *Aura san'guinis*. The halitus, or vapour, given off by freshly drawn blood.

GAZELLE, Antilopus.

GEBARPULVER, Ergot.

GEILENAU, MINERAL WATERS OF. Geilenau is a village in the grand duchy of Nassau, at no great distance from Frankfort. The waters contain carb nic acid, carbonate, sulphate and phosphate of soda, chloride of sodium; carbonate of lime, magnesia and iron.

GEISMAR, MINERAL WATERS OF. The mineral waters of Geismar in Bavaria are acidulous chalybeates.

GELAPPIUM, Convolvulus jalapa.

GELASMUS, Risus sardonicus.

GEL'ATIN, *Gel'atine*, *Gelati'na*, *Galreda*, from (F.) *Gelée*, 'gelly or jelly.' An immediate animal principle. It is semitransparent, insipid, inodorous, insoluble in cold water, very soluble in hot; which it thickens, and transforms into gelly on cooling. Gelatin is a very nutritious substance; and, when dissolved in a considerable quantity of water, forms an emollient fluid, much used in therapeutics, but not the most easy of digestion.

GELATIN OF WHARTON, *Gelati'na Wharto'nia*, *Jelly of the Cord*. A soft, dense, fluid, gelatinous substance, which envelops the umbilical cord, and is conceived, by some, to be inservient to the nutrition of the fœtus.

GELATINA AQUATICA, Brasenia hydropeltis.

GELATIO, Congelation.

GELÉE, Gelly.

GELLY or JELLY, *Jus gela'tum*, *Gelu*, *Jus coagula'tum*, (F.) *Gelée*. A substance of a soft consistence, tremulous, and transparent, which is obtained by an appropriate treatment, from animal and vegetable matters: hence the distinction into *animal* and *vegetable jelly*. The former is merely a concentrated solution of gelatin, left to cool.

Vegetable Jelly is found in the juice of the currant, mulberry, and of almost all acid fruits, when ripe. It is of itself colourless, but almost always retains a little colouring matter of the fruit which has furnished it. It has an agreeable taste; is scarcely soluble in cold water, but boiling water dissolves it readily: the jelly is, however, almost all deposited on cooling. If this aqueous solution be boiled for a long time, it becomes analogous to mucilage, and loses the property of being jellied on cooling.

GELOS, Risus.

GELSEMI'NUM NITI'DUM, *Yellow Jessamine*. The flowers, root, &c., of this shrub are narcotic, and the effluvia from the former are said sometimes to induce stupor.

GELU, Gelly.

GEMELLI, Gastrocnemii, Ischio-trochanterianus, Testicles.

GEMEL'LUS, *Gem'inus*, *Did'ymos*, δίδυμος, 'a twin.' (F.) *Jumeau*, *Jumelle*, *Besson*, *Bessonne*. One of two children, born at the same accouchement.

GEMELLUS MUS'CULUS. Cowper applies this name to the long portion of the triceps brachialis united to the inner portion.

GEMINI, Ischio-trochanterianus, Testicles.

GEMINUM CENTRUM SEMICIRCULARE, Tænia semicircularis.

GEMINUS, Gemellus.

GEMMA, Granulation—g. Oculi, Crystalline.

GEMMIPAROUS, see Generation.

GEMUR'SA, a Corn; also a name given by the ancients to a disease seated between the toes;—the nature of which is unknown to us.

GEN, *Gen'esis*, 'generation,' from γεννάω, 'I make.' Hence Hydro*gen*, Osteo*geny*, &c.

GENA. The *Cheek*, *Genys*, *Pareí'a*, *Gamphe'lē*, *Gnathos*, *Mala*. (F.) *Joue*. The cheeks form the lateral parts of the mouth. *Externally*, they have no precise limits: they are continuous, *above*, with the lower eyelid; *below*, they descend as far as the base of the jaw: *before*, they terminate at the alæ nasi, and at the commissures of the lips; and *behind*, at the ear. Their thickness varies, according to the degree of fatness of the individual. They are formed of three layers;—one dermoid, another muscular, and the third mucous.

GENCIVES, Gingivæ.

GENEI'AS, *Lanu'go prima*. The downy hairs, which first cover the cheek. Also, a bandage which passes under the chin.

GENEION, Beard, Mentum.

GENERAL ANATOMY, see Anatomy.

GÉNÉRALE, Influenza.

GENERATION, *Genera'tio*, *Gen'esis*, from γεινω, or γεννάω, 'I engender.' Under this name physiologists comprehend the aggregate of functions, which concur, in organized beings, towards the production of their kind. The *act of generation* means the union of the sexes. See Coition. The writers of antiquity believed, that all organized bodies are produced either by what is termed *univocal* or *regular generation*, (*Homogen'esis*, *genera'tio homogen'ea*, *propaga'tio*,) which applies to the upper classes of animals and vegetables, or by *spontaneous generation*, (*Heterogen'esis*, *genera'tio heterogen'ea*, *æquiv'oca*, *primiti'va*, *primog''ena*, *origina'ria*, *sponta'nea*,) which they considered applicable to the very lowest classes only, as the mushroom, the worm, the frog, &c. There are still many distinguished naturalists who consider that beings low in the scale of animality, are produced in the latter way. Spontaneous generation and *equivocal generation* have been regarded by many to be synonymous. Others, however, mean by spontaneous generation, the production of a new being from the mere combination of inorganic elements; whilst by equivocal generation they understand the evolution of a new being from organized beings dissimilar to themselves, through some irregularity in their functions, or through the incipient decay or degeneration of their tissues. As to the mode in which regular generation is accomplished, there have been many views. According to the doctrine of Hippocrates, and of the ancient philosophers, the ovaries of the female furnish a prolific fluid, similar to that of the male; and the fœtus results from the mixture of the two seeds in copulation. Steno and others conceived, that the ovaries contain ova, which are not developed until vivified by the male sperm. Bonnet and Spallanzani believed in the pre-existence of germs, created since the origin of the world, but *encased* in each other, and becoming developed in succession; whence it would follow, that the ovary of the first female must have contained the germs of all subsequent generations; and that the number of these germs must go on always diminishing, until ultimately extinct. This was the system of the *evolution of germs*. According to Leeuenhoek, the ovaries do not contain eggs, but vesicles destined to receive animalcules; which, in his view, live in the sperm. Thousands of these animalcules are thrown into the uterus during copulation, and the most expeditious and vigorous reaches the ovary, after having scattered and destroyed its competitors. Buffon—admitting the hypothesis of the two seeds—supposes that they were formed of molecules proceeding from every part of the body of each parent; and that, by a kind of respective affinity, those which were furnished by the head, the trunk, or the extremities of the male parent, could only unite with those proceeding from the same parts of the female. Before him, Maupertuis, admitting, with many of the ancient philosophers, the system of *Epigenesis*, and adopting, as regarded the composition of the sperm, a theory analogous to that of Buffon, had supposed that the molecules, capable of being organized, were attracted towards a centre; that the nose attracts the two eyes; the body, the arms; the arms, the hands, &c., nearly as the particles of a salt, dissolved in a liquid, arrange themselves in regular crystals around the same nucleus. These and various other systems have been successively proposed and rejected, and the mystery of generation remains impenetrable. The simplest kind of reproduction does not require sexual organs. The animal separates into several fragments, which form so many new individuals. This is *Fissip'arous generation*. *Gemmip'arous generation* consists in the formation of buds, sporules or germs on some part of the body, which at a particular period drop off and form as many new individuals. In *Oviparous generation*, the egg is hatched out of the body; in *ovoviviparous generation* the new being is hatched in the excretory passages. In *viviparous generation*, the new individual is born under its appropriate form; and in *marsupial* or *marsupiate generation*, the young being, born at a very early stage of development, is received and nourished in a *marsupium* or pouch.

All the acts comprising the function of generation in men, may be referred to five great heads. 1. *Copulation*. 2. *Conception* or *fecundation*. 3. *Gestation* or *Pregnancy*. 4. *Delivery* or *Accouchement*: and, 5. *Lactation*.

GENERATION, ORGANS OF, FEMALE, see Vulva.

GEN'EROUS, *Genero'sus*. A name given to wines which contain a great quantity of alcohol.

GENESIS, Generation, Gen.

GENÊT, Spartium scoparium—g. *des Teinturiers*, Genista tinctoria.

GENETHLIACUS, from γενεθλιος, 'natal,' 'pertaining to nativity.' A name, given by the ancients to certain astrologers, who, from the state of the heavens at the time of the birth of an individual, predicted his future character and the events of his life.

GENET'ICA, from γενεσις, 'origin,' 'rise.' Diseases of the sexual functions: the 5th class in Good's Nosology.

GENETICOS, Genital.

GENEVA, Gin—g. Hollands, see Spirit.

GENÉVRIER, Juniperus communis.

GENGIVITE, Ulitis.

GENI, Genian.

GE'NIAN, *Genia'nus*, from γενειον, 'the chin.' The *Genian apoph'ysis* or *Process*, (F.) *Apophyse Génienne* ou *géni*, is situate at the posterior part of the symphysis menti, and is formed of four small tubercles.

GÉNIE, *Ge'nius*. The French sometimes apply this term to diseases, nearly synonymously with *nature*; as *Génie inflammatoire*, *G. bilieux*, *G. adynamique*. Some use it in the same sense as type; *Génie intermittent*. The unwonted predominance of any mental faculty is also so called.

GÉNIEN, Genian.

GENIÈVRE, Gin, Juniperis communis (the berry.)

GENI'O-GLOSSUS, *Genio-hyoglos'sus*, from γενειον, 'the chin,' and γλωσσα, 'the tongue.' *Mesoglossus*, *Nonus linguæ mus'culus*. The name of a flat, triangular muscle, which extends from the genian apophysis to the inferior surface of the os hyoides and tongue, which it carries forward.

GENI'O-HYOIDEUS, from γενειον, 'the chin,' and ὑοειδης, 'the os hyoides.' A muscle, which arises from the genian apophysis, and is inserted at the anterior part of the body of the os hyoides. Its use is to raise the os hyoides, and carry it forwards. It may, also, contribute to depress the lower jaw in contracting towards the os hyoides.

GENI'O-PHARYNGE'US, from γενειον, 'the chin,' and φαρυγξ, 'the pharynx.' A name given, by some anatomists, to a bundle of fibres, which passes from the lower jaw to the sides of he pharynx, and forms part of the *constrictor pharyngis superior*.

GENIPI ALBUM, Artemisia rupestris—*g. Blanc*, Artemisia rupestris.

GENISTA, Spartium scoparium—*g.* Canariensis, see Rhodium lignum.

GENIS'TA SPINO'SA IN'DICA, *Bahel Schulli*. An oriental tree, a decoction of the roots of which is diuretic. The leaves boiled in vinegar, have the same effect.—Ray.

GENIS'TA TINCTO'RIA, *Dyers' broom*, *Dyers' weed*, *Green weed*, *Wood waxen*, (F.) *Genêt des Teinturiers*; is a shrub cultivated in this country and in Europe. The flowering tops and seed have been used in medicine. It has the same properties as spartium scoparium, (q. v.)

GEN'ITAL, *Genita'lis*, *Genet'icos*. Same etymon as Generation, (q. v.) That which belongs to generation.

GEN'ITAL ORGANS, *Sex'ual Organs*, *Puden'da*, *Natura'lia*, *Natu'ra Æda'a*, *Me'dia*, *Me'zea*, *Me'sa*, *Mo'rion*, *Interfemine'um*, *Genital parts*, *Noble parts*, *Nat'ural parts*, *Private parts*, *Privities*, *Privy parts*, *Privy Members*, *the Parts*, *Partes genita'les*, *Partes generatio'ni inservien'tes*, *Genita'lia*, *Or'gana generatio'ni inservientia*, (F.) *Organes genitaux*, *Parties génitales*, *P. honteuses*, *P. génitoires*, *P nobles*, *P. sexuelles*, *P. naturelles*, *les Parties*. The parts that are inservient to the reproduction of the species. These are very different in the male and female. In man, they are numerous; some *secreting the sperm*, as the testicles and their appendages; others *retaining it*, as the vesiculæ seminales; and another for *carrying it* into the organs of the female,—the penis. In the female, the parts of generation form an apparatus, perhaps more complicated than that of the male. Some are inservient to copulation, as the vulva, vagina, &c.; others to conception and the preservation of the product for a determinate time, as the uterus and its appendages; whilst others concur in the alimentation of the infant after birth, as the mammæ.

GENITALE, Sperm—*g.* Caput, Glans.

GENITALIA, Genital organs.

GENITU'RA. That which is fecundated or engendered in the maternal womb. This word has been used synonymously with *embryo*, *fœtus*, and *infant*. Also, the sperm; (q. v.) and the penis. See GONÊ.

GENNETICON'OSI, from γεννητικος, 'genital,' and νοσος, 'disease.' Diseases of the genitals.

GENOA, CLIMATE OF. The climate of this Italian city and its vicinity has been often selected as favourable for the phthisical valetudinarian during the winter, but it is now admitted to be decidedly improper for pulmonary affections, being subject to frequent and rapid changes of temperature, and to dry cold winds from the north, alternately with warm moist winds from the south-east.—Sir James Clark.

GENONU'SI, *Morbi sexûs*, from γενος, 'sex,' and νουσος, 'disease.' Sexual diseases.

GENOS, Sex.

GENOU, Genu.

GENOUILLÉS, (*Corps*,) Corpora geniculata.

GENRE, Genus.

GENSANG, Panax quinquefolium.

GENTIA, Gentianina.

GENTIAN, Triosteum—*g.* Blue, Gentiana catesbæi—*g.* Catesbian, Gentiana catesbæi—*g.* White, Laserpitium latifolium—*g.* Southern, Gentiana catesbæi—*g.* White, Triosteum—*g.* Yellow, Gentiana lutea, see Calumba.

GENTIANA, G. lutea—*g.* Alba, Laserpitium latifolium—*g.* Cachenlaguen, Chironia Chilensis—*g.* Centaurium, Chironia centaurium.

GENTIANA CATESBÆ'I; *G. Catesbia'na*, *Blue Gentian*, U. S. *Cates'bian Gen'tian*, *Southern Gentian*, *Bluebells*, *Bitterroot*. It is a pure and simple bitter, and the root may be used wherever that of the *Gentiana lutea* is proper.

GENTIA'NA CHIRAYTA or CHIRAYI'TA, *Henrice'a Pharmacear'cha*, *Swer'tia Chirayi'ta*, *Agatho'tes chirayi'ta*, *Chiret'ta*, *Chirayi'ta*. A native of India, which has been much employed in that country, in dyspepsia, and as an antiperiodic in intermittents. It is preferred by some to sarsaparilla, where the latter is considered to be indicated,—as after large quantities of mercury have been taken, or where profuse salivation has been induced. It has also been advised in atonic leucorrhœa. It yields its virtues to alcohol and water.

GENTIA'NA LU'TEA. The systematic name of the officinal gentian: *Gentia'na major*, *G. vet'erum*, *Gentia'na rubra*, *Yellow Gentian*, *Felwort*, *Gentia'na*, *Ord.* Gentianeæ, (F.) *Gentiane jaune*. This is a plant common in the mountains of Europe. The root is almost inodorous, extremely bitter, and yields its virtues to ether, alcohol, and water. It is tonic and stomachic; and in large doses, aperient. Dose, gr. x. to ℈ij. It is most frequently, however, used in infusion or tincture.

GENTIANA MAJOR, G. lutea.

Gentiana Peruviana, Chironia Chilensis—g. Rubra, G. lutea—g. Veterum, G. lutea.

GENTIANE JAUNE, Gentiana lutea.

GENTIANI'NA, *Gentianine*, *Gentianin*, *Gentiania*, *Gentia*. An alkali, obtained from gentian, and, according to some, supposed to be its active principle. It is intensely bitter. Dose, gr. j to iv.

GENTILIUS, Hereditary.

GENU, *Gony*, γονυ (F.) *Genou*. The articulation of the leg with the thigh;—the *Femoro-tibial* joint. It is the most complicated in the body. It is formed by the inferior extremity of the femur, the superior extremity of the tibia, and the rotula. The articular surfaces of the bones are covered by layers of cartilage—more or less thick—and by the synovial membrane of the articulation. The soft parts of this joint are,—the *ligamentum patellæ*, two lateral ligaments, distinguished by the names *internal* and *external*; a posterior ligament; two crucial ligaments,—the one anterior, and the other posterior; two interarticular fibro-cartilages: some albugineous fibres, which form an imperfect capsule, &c. The knee receives its arteries from the femoral and popliteal. They bear the name *articular*. Its veins have the same distribution as the arteries, and discharge their blood into the saphena and crural veins. Its nerves are furnished by the sciatic, popliteal, and crural. The joint is protected by the tendons and muscles which surround it.

The French use the term *Articulation en genou* for a joint, in which the head of a bone is received into a bony cavity of another, where it rolls and moves in all directions.

GENUGRA, Gonagra.

GENUINUS, Legitimate.

GENUS, (F.) *Genre*. A collection or group of species, analogous to each other; and which can be united by common characters. When a species cannot be referred to a known genus, it constitutes a distinct one.

GENYANTRAL'GIA, from γενειον, 'the chin,' αντρον, 'the antrum,' and αλγος, 'pain.' Pain in the antrum of Highmore.

GENYANTRUM, Antrum of Highmore.

GENYS, γενυς, 'the jaw;' also the chin. See Gena.

GEOFFRÆ'A INERMIS, *Geoffræ'a*, *Geoffroy'a*, *Cabbage Tree*, *Cabbage-Bark Tree*, *Andira inermis*. *Nat Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. *Geoffræa Jamaicen'sis*, *Worm-Bark Tree*. The odour of the bark is very unpleasant. It is anthelmintic and cathartic. Dose, of the powder, ℈j to ℈ij.

Geoffræ'a Surinamen'sis, *Andira Surinamensis*, has similar properties.

Huttenschmidt has separated their active principles, to which he has given the names *Jamaicine* and *Surinamine*. They are alkaline.

GEOFFROYA, Geoffræa inermis—g. Jamaicensis, G. inermis.

GEOG'RAPHY, MEDICAL, *Geogra'phia Med'ica*. The description of the surface of the globe as regards the influence of situation on the health, vital functions, and diseases of its inhabitants—vegetable and animal; but principally on those of man.

GEOPH'AGISM, *Geophag''ia*, *Gæophag''ia*, from γη, 'earth,' and φαγω, 'I eat.' The act or practice of eating earth. See Chthonophagia.

GER'ANIS, from γερανος, 'a crane,' which it resembled. A bandage, used by the ancients in cases of fractured clavicle. Some authors attribute it to Hippocrates; others, to Perigenes.

GERA'NIUM, same etymon, because its pistil is long, like the bill of the crane. The *Crane's Bill*.

Geranium Maculatum, see Geranium.

Geranium Moscha'tum; *Erod'ium Moschatum* (F.) *Bec de grue musqué*. A European plant, esteemed to be excitant and diaphoretic.

Geranium Noveboracense, G. Maculatum.

Geranium Robertia'num: *Stinking Crane's Bill*, *Herb Robert* (F.) *Herbe à Robert*, *Bec de Grue Robertin*. This plant was, at one time, used as an antispasmodic and slight stimulant; as well as for an external application in various painful sores and inflammations.

Most of the species of geranium have been used as astringents. In some of the northwestern parts of the United States, the root of the *Geranium macula'tum*—*Gera'nium*, (Ph. U. S.)—*G. Noveboracen'se*, *Spotted Crane's bill*, *Crowfoot*, *Alum root*, *Tormentil*, *Stork bill*—is called *Racine à Becquet*, after a person of that name. It is highly extolled by the Western Indians as an antisyphilitic.

Geranium Maculatum, see G. Moschatum.

GERAS, Senectus.

GERM, *Germen*, *Blaste'ma*. The rudiment of a new being, not yet developed, or which is still adherent to the mother.

GERMANDER, COMMON, Teucrium chamædrys—g. Creeping, Teucrium chamædrys—g. Marum, Teucrium marum—g. Small, Teucrium chamædrys—g. Water, Teucrium scordium.

GERMANDRÉE AQUATIQUE, Teucrium scordium—*g. Maritime*, Teucrium marum—*g. Officinale*, Teucrium chamædrys—*g. Scorodine*, Teucrium scordium.

GERME FAUX, Conception, false.

GERMEN, Germ—g. Dentale, Dental Pulp—g. Falsum, Mole—g. Spurium, Conception, false.

GERMINAL CELL, see Cytoblast—g. Membrane and Vesicle; see Molecule—g. Nucleus, see Molecule—g. Spot, see Molecule.

GERMS, DISSEMINATION OF, Panspermia.

GEROCO'MIA, *Gerocom'icē*, *Gerontocom'icē*, from γερων, 'an aged person,' and κομειν, 'to take care of.' The part of medicine whose object is the preservation of the health of the aged:—the hygiène of old people.

GEROCOMICE, Gerocomia.

GEROCOMI'UM, *Gerontocomi'um*, *Gerotrophe'um*, same etymon. An hospital for the aged.

GÉROFLE, see Eugenia caryophyllata.

GEROFLÉE JAUNE, Cheiranthus cheiri.

GERONTOCOMICE, Gerocomia.

GERONTOCOMIUM, Gerocomium.

GERONTOTOXON, Gerotoxon.

GERONTOXON, Gerotoxon.

GEROTOX'ON, *Gerontox'on*, *Gerontotox'on*, *Mac'ula cor'neæ arcua'ta*, *Arcus seni'lis*; from γερων, 'an old person,' and τοξον, 'a bow.' A bow-shaped obscurity at the under margin of the cornea, common to old people.

GEROTROPHEUM, Gerocomium.

GERSA, Plumbi subcarbonas—g. Serpentariæ, see Arum maculatum.

GESTA, 'things done,' from *gerere*, *gestum*,

'to do,' 'carry.' A Latin term, introduced by Hallé, into medical language, to designate, among the objects which belong to hygiene, the functions which consist in the voluntary movements of muscles and organs. In the class of *Gesta* are found *sleep*, *the waking state*, *movements* or *locomotion*, and *rest*.

GESTA'TION, *Gesta'tio*, *Phora*, from *gestare*, 'to carry.' The time, during which a female who has conceived, carries the embryo in her uterus. See Pregnancy. Gestation, likewise, signifies the bearing or carrying of an individual; a kind of exercise, easier than that in which he moves by virtue of his own powers. Thus, we speak of *gestation on horseback*, *in a carriage*, &c.

GESTICULA'TION, *Gesticula'tio*, same etymon. The act of making many gestures; a symptom in disease, which always indicates very vivid sensations. It is met with in numerous affections.

GEUM, G. rivale—g. Palustre, G. rivale.

Geum Riva'lĕ, *G. palus'trĕ*, *Water avens*. (F.) *Bénoite aquatique*, *B. des Ruisseaux*. *Family*, Rosaceæ. *Sex. Syst.* Icosandria Polygynia. The root of this plant *Geum*, (Ph. U. S.) is astringent. It has been much extolled in the cure of intermittents, diarrhœas, hemorrhages, &c.

Geum Urba'num, *Caryophylla'ta*, *Caryophyl'lus vulga'ris*, *Sanamun'da*, *Lagophthal'mus*, *Caryophyl'la*, *Janamun'da*, *Common avens*, *Herb Bennet*, *Herba benedicta*, (F.) *Bénoite*. The root of this plant has a smell not unlike that of cloves. Taste bitterish, austere; virtues yielded to water and alcohol. It has been used in intermittents, dysentery, chronic diarrhœa, debility, &c. Dose, ʒss to ʒj of the powder.

Geum Virginia'num, *White avens*, *Avens*, *Evan root*, *Choc'olate root*, *Bennet*, *Throat root*, *Cureall*, (F.) *Bénoite de Virginie*, is common from Maine to Carolina and Kentucky, flowering in June and July. It has the same medical properties as Geum rivale.

GEUMA, Taste.

GEUSION'OSI, from γευσις, 'taste,' and νοσος, 'disease.' *Geusionu'si*. Diseases of the organ or sense of taste.

GEUSIS, Taste.

GEUTHMOS, Taste.

GEZIR, see Pastinaca opoponax.

GÉZIT, *Cagot*.

GÉZITAIN, *Cagot*.

GHERKIN, see Cucumis sativus.

GHITTA JEMOCO, Cambogia.

GIALAPPA, Convolvulus jalapa.

GIBBA, Hump.

GIBBEROSITAS, Gibbositas.

GIBBOSITAS, *Gibberos'itas*, *Cypho'sis*, from (F.) *Gibbeux*, (L.) *Gibbus*, 'something arched or vaulted, prominent.' *Gibbos'ity*, *Gib'bousness*, *Curvature of the spine*, *Hybo'ma*. A symptom which occurs in different diseases; particularly in rickets and caries of the vertebræ. See Hump.

Gibbositas Cariosa, Vertebral disease.

GIBBOUSNESS, Gibbositas.

GIBBUS, Hump—g. Pottii, Vertebral disease.

GIBLETS. According to Minsheu, from *Gobbet*, *Goblet*; but, according to Junius, from (F.) *Gibier*, 'game.' The word seems to be the old (F.) *Gibelez*, *Gibelet*, &c., i. e. *Gibier*, (L.) *Cibarium*, food, (F.) *Abattis*. It means, generally, the parts which are cut off from a goose before it is roasted. Also, the extremities of fowls, such as the head, wings, feet; to which are sometimes added, the liver, gizzard, &c. Soup made from these, is moderately nutritious.

GIDDINESS, Vertigo.

GIGARUS SERPENTARIA, Arum dracunculus.

GILARUM, Thymus serpyllum.

GILEAD, BALM OF, see Amyris opabalsamum.

GILET DE FORCE, Waistcoat, strait.

GILL, Glecoma hederacea.

Gill-go-by-ground, Glecoma hederacea.

GILLA THEOPHRASTI, Zinci sulphas—g. Vitrioli, Zinci sulphas.

GILLENIA STIPULACEA, *Small-flowered In'dian Physic* has the same properties.

Gille'nia Trifolia'ta, *Spiræ'a trifolia'ta*, *common Gille'nia*, *Indian Physic*, *Western Dropwort*, *Indian Hippo*, *Ipecac*, *Bowman's root*, *Meadow sweet*, *Beaumont root*. *Nat. Ord.* Rosaceæ. *Sex. Syst.* Icosandria Pentagynia. The root of this shrub,—*Gille'nia*, (Ph. U. S.)—which grows plentifully in the United States, is a safe and efficacious emetic, in the dose of about 30 grains. It resembles, in its properties, the ipecacuanha.

GILLIFLOWER, Dianthus caryophyllus.

GIM'BERNAT'S LIGAMENT. A fibrous, triangular, expansion, which is detached from the posterior and inner part of the crural arch, and is inserted into the crest of the pubis. This ligament forms the inner part of the superior aperture of the crural canal. It is one of the most frequent causes of strangulation in crural hernia.

GIN, *Hollands*, *Geneva*, (F.) *Genièvre*. This spirit, which is distilled from corn and juniper berries, or from some substitute for them, is largely used in Great Britain; and is extremely detrimental, to the lower classes particularly. It possesses the properties of other spirituous liquors; but is, in popular medicine, more used than other varieties, in cases of colic or intestinal pain of any kind. See Spirit.

GIN DRINKERS' LIVER, Liver, nutmeg.

GINGEMBRE, Amomum zingiber.

GINGER, Amomum zingiber—g. Beer powder, see Amomum zingiber—g. Indian, Asarum Canadense—g. Jamaica, concentrated essence of, see Amomum zingiber—g. Preserved, see Amomum zingiber—g. Wild, Asarum Canadense.

GINGIBRA'CHIUM, from *gingivæ*, 'the gums,' and *brachium*, 'the arm.' A name given to the scurvy, because the gums and arms are chiefly affected by it. It has, also, been called *Gingipe'dium*, because the lower limbs are in many cases the seat of scorbutic spots.

Gingibrachium, Porphyra nautica.

GINGIPEDIUM, see Gingibrachium, Porphyra nautica.

GINGI'VÆ, from *gignere*, 'to beget,' because the teeth are, as it were, begotten in them.(?) The gums, ουλα, *U'la*, *Carnic'ula* (F.) *Gencives*. The portion of the mucous membrane of the mouth which covers the maxillary bones to the level of the alveolar arches. The gums are formed of a red tissue, more or less solid, and of a fibro-mucous nature, which adheres strongly to the necks of the teeth, and transmits, between the roots and their alveoli, a very thin

expansion; the *alveolo-dental periosteum*. The gums fix the teeth and contribute greatly to their solidity. In the aged, after the loss of the teeth, they become fibrous and very solid, and are inservient to mastication.

GING'LYMOID, *Ginglymoideus*, from γιγγλυμος, 'a ginglymus,' and εἶδος, 'resemblance.' Resembling a ginglymus or hinge. An epithet applied to joints which resemble a hinge, as a *ginglymoid joint*.

GIN'GLYMUS, γιγγλυμος, *Cardinamen'tum*, *Cardo*, 'a hinge.' (F.) *Charnière*, *Articulation en charnière*. A species of diarthrodial articulation, which only admits of motion in two directions, like a hinge,—as the knee-joint or elbow-joint.

GINSENG, Panax quinquefolium—g. Blue, Caulophyllum thalictroides—g. Yellow, Caulophyllum thalictroïdes—g. Horse, Triosteum—g. White, Triosteum.

GIRARD-ROUSSIN, Asarum.

GIRL. This seems, formerly, to have been an appellation common to both sexes. Many etymologists deduce the word from the Su. Goth. Karl, 'a man.' It means a young female, (L.) *Filia*, from φιλειν, 'to love,' *Virgo*. (F.) *Fille*.

GIROFLE, see Eugenia caryophyllata.

GISSA, Cynanche parotidæa.

GIZZARD, Ventriculus callosus.

GLABELLA, Gabella, Mesophryon.

GLABRITIES, Calvities.

GLACE, Ice.

GLACIALE, Mesembryanthemum crystallinum.

GLACIES, Ice.

GLADIOLUS, Machærion—g. Cæruleus, Iris Germanica.

GLADI'OLUS COMMU'NIS, *G. vulga'ris*, *Victoria'lis rotun'da*, *Cornflag*, *Victoria'lis feminea*. (F.) *Glayeul*. The root of this plant has been considered aphrodisiac. Applied in cataplasm, it has been extolled against scrofulous tumours.

GLADIOLUS LUTEUS, Iris pseudacorus—g. Vulgaris, G. communis.

GLADIUS, Penis.

GLAMA, Lippitudo, *Chassie*.

GLAND, *Glan'dula*, from *glans*, (q. v.) 'an acorn, a kernel,' *Aden*. The ancient anatomists gave this name to a number of organs, of a texture generally soft, and a shape more or less globular, but differing greatly in their nature and functions. They applied it, for instance, 1. To those organs which separate from the blood any fluid whatever. When such organs were composed of several lobules, united by common vessels, they received the name *conglomerate glands*, as the parotid, pancreas, &c. 2. To the reddish and spongy, knot-like bodies, which are met with in the course of the lymphatics. These they called *conglobate glands*. See Ganglion, (*lymphatic*;) and 3dly and lastly, to various other organs, whose intimate texture and functions are still unknown, as the *Pineal gland*, *Pituitary gland*, *Glands of Pacchioni*, *Thyroid gland*, *Thymus gland*, *Supra-renal glands*, &c. Chaussier restricts the word *gland* to those softish, granular, lobated organs, composed of vessels, nerves, and a particular texture, of which there are seven kinds in the human body, viz. the *lachrymal*, *salivary*, and *mammary*, the *testicles*, the *liver*, *pancreas*, and *kidneys*. These are all destined to draw from the blood the molecules necessary for the formation of new fluids; and to convey these fluids externally, by means of one or more excretory ducts. Several glands, besides their excretory ducts, have especial reservoirs, in which the fluids, secreted by them, collect, remain for a greater or less space of time, and undergo slight modifications before being evacuated;—such are, the gall-bladder for the liver, the urinary bladder for the kidneys, &c. Each gland has an organization peculiar to it, but we know not the intimate nature of the glandular texture.—Malpighi believed that the vessels terminate in small, solid masses, to which he gave the name—*glandular grains*. In these, he considered, the excretory ducts originate. Ruysch thought that the glands are entirely vascular, and that the excretory ducts are immediately continuous with the *vasa afferentia*, &c. The best view, perhaps, is, that the exhaling or secreting vessel is distributed on the animal membrane, that forms the blind extremity of the excretory duct, and that the secretion is effected through it by means of cells.

The term *glande* (F.) is sometimes appropriated to the tumour formed by inflammation or engorgement of a lymphatic ganglion.

GLAND, Glans—g. Globate, Conglobate gland—g. Prostate, Prostate—g. Salivary, abdominal, Pancreas.

GLANDAGE, Adenophyma.

GLANDE, Gland—g. *Thyroïde*, see Thyroid gland.

GLANDERS, Equinia—g. Farcy, see Equinia.

GLANDES BRONCHIQUES, Bronchial glands—g. *Conglobées*, Conglobate glands—g. *de Croissance*, Waxing kernels—g. *de Meibomius*, Meibomius, glands of.

GLANDIFORM CORPUSCLE, Acinus—g. Ganglion, see Ganglion.

GLANDIUM, Thymus.

GLANDS, see Quercus alba—g. Accessory, Cowper's glands—g. Aporic, Ganglions, glandiform—g. Blind, Ganglions, glandiform—g. Haver's, Synovial glands—g. of Bartholinus, Cowper's glands of the female—g. Cowper's, see Cowper's glands—g. of Duverney, Cowper's glands of the female—g. Lenticular, Lenticulares glandulæ—g. Lieberkühn's, Lieberkühn's glands—g. Miliary, Sebaceous glands—g. Oil, Sebaceous glands—g. Peyeri, Peyeri glandulæ—g. Renal, Capsules, renal—g. Sebaceous, see Sebaceous glands—g. of Willis, Albicantia corpora, Mamillary tubercles.

GLANDULA, Gland—g. ad Aures, Parotid—g. Bartholiniana, Sublingual gland—g. Basilaris, Pituitary gland—g. Innominata Galeni, Lachrymal gland—g. Mucosa, Conglobate gland—g. Pinealis, Pineal gland—g. Pituitosa, Pituitary gland—g. Riviniana, Sublingual gland—g. Salivalis abdominis, Pancreas—g. Thymus, Thymus—g. Thyreoidea, Thyroid gland.

GLANDULÆ ARTICULARES, Synovial glands—g. Assistentes, Prostate—g. Brunneri, Brunner's glands—g. Cervicis uteri, Nabothi glandulæ—g. Duræ matris, G. Pacchioni—g. Duræ meningis, G. Pacchioni—g. in Agmen congregatæ intestinorum, Peyeri glandulæ—g. Intestinales, Peyeri glandulæ—g. Meibomianæ, Meibomius, glands of—g. Mucosæ coagminatæ intestinorum, Peyeri glandulæ—g. Muciparæ racematim congestæ intestinorum, Peyeri glan-

dulæ—g. Myrtiformes, Caruncule myrtiformes—g. Odoriferæ Tysoni, see Sebaceous glands—g. Peyerianæ, Peyeri glandulæ—g. Plexiformes, Peyeri g.—g. Prostatæ mulierum, see Corpus glandulosum mulierum—g. Sebaceæ ciliares, Meibomius, glands of—g. Solitariæ, Brunner's glands—g. Spuriæ, Peyeri g., Ganglions, glandiform—g. Sudoriferæ, see Perspiration—g. Suprarenales, Capsules, renal—g. Vasculosæ, Conglomerate glands.

GLANDULAIRE, Glandular.

GLAND'ULAR, *Glandula'ris, Glandulo'sus*, (F.) *Glandulaire, Glanduleux:* having the appearance, form, or texture of *Glands;* as a *glandular* body, a *glandular* texture, &c.

GLANDULEUX, Glandular.

GLANDULO'SO-CARNEUS. Ruysch gives this epithet to fleshy excrescences which he found in the bladder.

GLANDULOSUS, Glandular.

GLANS, ('an acorn.') *Bal'anus, Cyt'taros, Cuspis, Caput, C. Penis, Genita'lē caput.* (F.) *Gland.* The extremity of the penis and of the clitoris. The *glans penis* is of a conical, slightly flattened shape. It is continuous with the urethra, which opens at its apex; and is circumscribed by a projecting edge called the *Corona glandis.* It is covered by a thin mucous membrane; is furnished, at its base, with sebaceous follicles, called *glan'dulæ odorif'eræ Tyso'ni*, the secretion from which is termed *Smegma prepu'tii;* and can, almost always, be covered by the reflection of the skin, called the *prepuce.* Lastly, it is formed of a spongy texture, susceptible of being thrown into erection.

Glans Clitor'idis is smaller. It is imperforate, and likewise covered with a sort of prepuce formed by the mucous membrane of the vulva.

Glans Jovis Theophrasti, Fagus castanea—g. Ulnæ, Olecranon—g. Unguentaria, Guilandina moringa.

GLAREA, Gravel.

GLASS, Vitrum.

GLAUBER'S SALTS, Soda, sulphate of.

GLAUCEDO, Glaucoma.

GLAUCO'MA, from γλαυκος, 'sea-green.' *Glauco'sis, Glauce'do, Catarac'ta glauca, Oc'ulus cæ'sius, Cæ'sius, Phtharma glauco'ma, Parop'sis glauco'sis, Apoglauco'sis.* Amongst the older pathologists, this word was used synonymously with cataract. It is now ordinarily applied to opacity of the vitreous humour or of the tunica hyaloidea, which manifests itself by a grayish or greenish spot, apparent through the pupil. The diagnosis is generally difficult; and the disease is almost always incurable.

Glaucoma Woulhousi, Cataract.

GLAUCOSIS, Glaucoma.

GLAYEUL, Gladiolus vulgaris—*g. Puant*, Iris fœtidissima.

GLECHO'MA HEDERA'CEA, *Heder'ula, Chamæcle'ma, Calamin'ta humil'ior, Chamæcis'sus, Hed'era terres'tris. Nep'eta glecho'ma, Ground ivy, Gill, Gill-go-by-ground. Alehoof, Robin run-away,* (F.) *Lierre terrestre, Terrette.* This plant has a strong smell, and a bitterish, somewhat aromatic, taste. It has been considered expectorant and tonic.

GLECHON, Mentha pulegium.

GLECHONI'TIS. Wine, impregnated with the Glechon, γληχων, *mentha pulegium*, or pennyroyal.

GLEET, see Gonorrhœa.

GLENÉ, γληνη, 'the pupil of the eye.'

GLENOID, Glene.

Gle'soid or Glenoid'al, *Glenoïda'lis, Glenoï'des, Gleno'des*, from γληνη, 'the pupil,' and ειδος, 'resemblance.' (F.) *Glénoïde* ou *Glénoïdale.* Any shallow, articular cavity, which receives the head of a bone; such as, 1. The *glenoid cavity* or *fossa* of the scapula, *Fossa glenoïdea, Omocot'ylē. Entypo'sis*, is situate at the anterior angle of the scapula; and is articulated with the head of the humerus. 2. The glenoid cavity or fossa of the temporal bone. It is seated between the two roots of the zygomatic process, and receives the condyle of the lower jaw.

Glenoid Lig'ament, (F.) *Ligament Glénoïdien*, is a fibro-cartilaginous ring or *bourrelet* which seems formed by the expansion of the tendon of the long head of the biceps brachialis, and surrounds the glenoid cavity of the scapula, the depth of which it increases.

GLÉNOÏDALE, Glenē.

GLISCHRAS'MA, *Glis'chrotes*, from γλισχραινω, (γλια, 'glue,') 'I become glutinous.' Lentor, viscidity.—Hippocrates.

GLISCHROCH'OLOS, from γλισχρος, 'viscid,' and χολη, 'bile.' Excrements which are glutinous and bilious.

GLISCHROTES, Glischrasma.

GLISOMARGO, Creta.

GLOBE, Bandage (head.)

GLOBE-FLOWER, Cephalanthus occidentalis.

GLOBULAIRE PURGATIVE, Globularia alypum

GLOBULA'RIA AL'YPUM, *Globula'ria, Montpel'lier Turbith.* (F.) *Globulaire purgative, Turbith blanc.* The leaves of this plant are bitter, and have been used in intermittents and in constipation. See Alypon.

GLOB'ULE, *Glob'ulus, Sphæ'rion:* a small globe.

Globules of the Blood, *Blood-corpuscles, Blood-disks, Blood-vesicles*, (F.) *Globules du sang, Globuli, Vesiculæ* seu *Folliculi sanguinis*, are small, spherical bodies, which are particularly observable when the transparent parts of cold-blooded animals are examined by the aid of the microscope. They were first seen by Malpighi, and are met with in the blood of all animals. The globules of blood are circular in the mammalia, and elliptical in birds and cold-blooded animals. They are, also, flat in all animals, and composed of a central nucleus enclosed in a membranous sac. Chemically they consist of hæmatin and globulin—hæmato-globulin.

Size of the Globules.

Sir E. Home and Bauer, with colouring matter,	1.1700th part of an inch.

GLOBULE D'ARANTIUS, see Sigmoid valves—*g. du sang*, Globule of the blood.

GLOBULI ARTERIARUM TERMINI, see Acinus—*g.* Sanguinis, Globules of the blood—g. Tartari martiales, Ferrum tartarizatum—g. Tartratis ferri et lixiviæ, Ferrum tartarizatum.

GLOB'ULIN, *Glob'uline*, *Blood casein*. The colourless substance that remains after the abstraction of the colouring matter of the blood-corpuscle. It is a peculiar albuminous principle. The globulin of Berzelius consists of the envelopes of the blood globules, and of the part of their contents that remains after the extraction of the hæmatosin. Lecanu regards it as identical with albumen; and, according to Mulder, it belongs to the combinations of protein.

The term *globulin* is likewise given by M. Donné to small granulations appertaining to the chyle, which are observable in the blood with the microscope. They are small white pustules, roundish, isolated or irregularly agglomerated grains; of about the 1-300 of a *millimètre* in diameter, and are regarded by M. Donné as the first elements of the blood globules. They are the *white granulated corpuscles* of Mandl.

GLOBULUS STAPEDIS OSSIS, Os orbiculare.

GLOBUS HYSTER'ICUS, *Nodus hyster'icus*, *An'gonē*, (q. v.) A sensation, experienced by hysterical persons, as if a round body were rising from the abdomen towards the larynx, and producing a sense of suffocation.

GLOBUS MARTIALIS, Ferrum tartarizatum.

GLOBUS UTERI'NUS. A term applied by accoucheurs to the round tumour, formed by the uterus in the lower part of the abdomen, immediately after delivery.

GLOMERATE, Conglomerate.

GLOSSA, *Gloʹta*, γλωσσα, γλωττα, 'the tongue,' (q. v.) Hence:

GLOSSAGRA, Glossalgia.

GLOSSAL'GIA, *Glos'sagra*, from γλωσσα, 'the tongue,' and αγλος, 'pain.' Pain in the tongue.

GLOSSANTHRAX, from γλωσσα, 'the tongue,' and ανθραξ, 'a carbuncle.' *Carbuncle of the tongue*. A disease more common in cattle than man.

GLOSSIANUS, Lingual muscle.

GLOSSI'TIS, from γλωσσα, 'the tongue,' and *itis*, a suffix denoting inflammation. *Glosson'cus inflammato'rius*, *Angi'na linguaʹria*, *Inflammation of the tongue*. (F.) *Inflammation de la Langue*. When confined to the mucous membrane, it is of slight importance. That which affects the whole of the tongue is a serious disease, and requires the vigorous use of antiphlogistics. It is rare.

GLOSSOCAT'OCHUS, from γλωσσα, 'the tongue,' and κατεχω, 'I arrest.' *Linguæ Detento'r*, *Specʹulum Oris*, (F.) *Abaisseur de la langue*. An instrument, the invention of which is attributed to Paulus of Ægina, and which was employed to depress the tongue, in order to examine diseases of the fauces. It was composed of two branches; one of which had, at its extremity, a plate for depressing the tongue; whilst the other, shaped like a horse shoe, was applied under the chin. The finger, or the handle of a spoon, or a spatula, is now alone used in similar cases.

GLOSSOCE'LE, from γλωσσα, 'the tongue,' and κηλη, 'hernia,' 'tumour.' *Hernia of the Tongue*. Projection of the tongue from the mouth. It depends, generally, on an inflammatory swelling of the organ. At times, however, a *chronic glossocele*, or sort of œdematous engorgement, is met with; which proceeds to a great length; and deforms the dental arches, the lips, &c. Inflammatory glossocele must be combated by antiphlogistics. In the œdematous kind, such as is sometimes caused by excessive salivation, the infiltrated fluid may be pressed back by the hand of the practitioner, to get the tongue behind the teeth; and it may be kept there by a piece of gauze tied over the mouth. The chronic, elongated kind sometimes requires amputation of a portion of the organ.

GLOSSOCOMA, Glossospasmus.

GLOSSOC'OMON, *Glossoc'omum*, *Glossocomi'on*, from γλωσσα, 'the tongue,' and κομειν, 'to guard.' The ancients gave this name to a small case for holding the tongues of their wind-instruments. By extension, it was applied to the box or cradle in which fractured limbs were kept. We find, in the ancient writers, a *Glossocomon* of Hippocrates, of Nymphodorus, Galen, &c.

GLOSSO-EPIGLOT'TICUS. That which belongs to the tongue and epiglottis. Some anatomists have so denominated certain fleshy fibres, which pass from the base of the tongue towards the epiglottis. These muscles are more evident in some of the mammalia than in man; and their use seems to be,—to raise the epiglottis, and to remove it farther from the glottis. Santorini, who described them after Eustachius, calls them *Retracto'res Epiglot'tidis*.

GLOSSOG'RAPHY, *Glossogra'phia*, from γλωσσα, 'the tongue,' and γραφη, 'a description.' An anatomical description of the tongue.

GLOSSO-HY'AL. A name given, by Geoffroy Saint-Hilaire, to the posterior cornua of the os hyoides.

GLOSSOL'OGY, *Glossolog''ia*, from γλωσσα, 'the tongue,' and λογος, 'a treatise,' 'a discourse.' A treatise of the tongue.

GLOSSOL'YSIS, *Glossople'gia*, from γλωσσα, 'the tongue,' and λυσις, 'solution.' Paralysis of the tongue.

GLOSSOMANTI'A, *Progno'sis ex linguâ*, from γλωσσα, 'the tongue,' and μαντεια, 'divination.' Prognosis from the state of the tongue.

GLOSSON'CUS, from γλωσσα, 'the tongue,' and ογκος, 'tumour.' *Exonco'sis linguæ*. Swelling of the tongue.

GLOSSONCUS INFLAMMATORIUS, Glossitis.

GLOSSO-PALATINUS, Glosso-staphylinus—g. Pharyngeal, Pharyngo-glossal.

GLOSSO-PHARYNGEAL, Glosso-pharyngeus—g. Nerve, Pharyngo-glossal nerve.

GLOSSO-PHARYNGEUS, *Glosso-pharyngeal*, from γλωσσα, 'the tongue,' and φαρυγξ, 'the pharynx.' Belonging to the tongue and the pharynx. Some anatomists thus designate certain fleshy bundles, which arise from the lateral parts of the base of the tongue, and are inserted into the parietes of the pharynx. They form part of the constrictor pharyngis superior. (q. v.)

GLOSSOPLEGIA, Glossolysis.

GLOSSOSCOP'IA, from γλωσσα, 'the tongue,'

and σκοπεω, 'I view.' Inspection of the tongue as an index of disease.

GLOSSOSPAS'MUS, *Glossoco'ma*, from γλωσσα, 'the tongue,' and σπασμος, 'spasm.' Cramp or spasm of the tongue.

GLOSSO-STAPHYLI'NUS, from γλωσσα, 'the tongue,' and σταφυλη, 'the uvula.' *Glossopalati'nus, Constric'tor Isthmi Faucium.* A small, thin, narrow, and long muscle, which arises from the base of the tongue, and is inserted at the inferior and lateral part of the velum palati, in the anterior pillar of which it is situate. Its use is to contract the isthmus faucium, by depressing the velum palati, and raising the base of the tongue.

GLOSSOT'OMY, *Glossotom'ia*, from γλωσσα, 'the tongue,' and τεμνειν, 'to cut.' Dissection of the tongue. Amputation of the tongue.

GLOTTA, Glossa, Tongue.

GLOTTIS, γλωττις, (also, 'the mouth-piece of a flute,') *Lig'ula.* A small oblong aperture, situate at the upper part of the larynx. This aperture is comprised between the *chordæ vocales.* It is narrow, anteriorly; wider, posteriorly; and is capable of being modified by muscular contraction, as may be required by the voice. It is by the chordæ vocales, that voice is produced. The glottis is nearly an inch long in the adult male:—less in the female and child.

Glottis is, by some, used synonymously with ventricle of the larynx: with others, it includes the whole of the larynx.

GLOTTIS, LIPS OF THE, Thyreo-arytenoid ligaments.

GLOUGLOU D'UNE BOUTEILLE, Gurgling.

GLOUTERON, Arctium Lappa—*g. Petit*, Xanthium.

GLOUTIUS, Gluteal—g. Maximus et extimus, Glutæus maximus—g. Secundus et medius, Glutæus medius—g. Tertius et intimus, Glutæus minimus.

GLOWWORM, Cicindela.

GLUANT, Glutinous.

GLUCOSURIA, Diabetes mellitus.

GLUE, FISH, Ichthyocolla.

GLUE BONE, Osteocolla.

GLUTÆUS MAGNUS, G. major—g. Major, G. Maximus.

GLUTÆ'US MAX'IMUS, *Gluta'us major, Maximus et ex'timus glou'tius, G. magnus, Ilio-sacro-fémoral; Sacro-fémoral*, (Ch.) (F.) *Muscle grand fessier.* This muscle is situate at the posterior part of the pelvis, and at the upper and posterior part of the thigh. It is large, thick, and quadrilateral; and is attached, *above*, to the posterior part of the crista ilii, to the part of the ilium comprised between the crista and the upper curved line, to the posterior surface of the sacrum, coccyx, and great sacro-sciatic ligament; and *below*, it terminates by a broad aponeurosis, which is inserted into the rugged surface that descends from the trochanter major to the linea aspera of the femur. This muscle extends the thigh on the pelvis, and rotates the thigh outwards. It is greatly concerned in station and progression.

GLUTÆ'US ME'DIUS, *Glou'tius Secun'dus et me'dius, Ilio-trochantérien: Grand Ilio-trochantérien*, (Ch.) (F.) *Moyen Fessier.* This muscle is situate in part beneath the preceding; it is broad, very thick, radiated, and triangular; attached, *above*, to the crista ilii, and to the part of the outer surface of that bone comprised between the three anterior fourths of its crista, its upper curved line, and its lower; and, *below*, it ends by a tendon, inserted at the upper edge of the great trochanter. It is an abductor of the thigh; but can turn the thigh outwards or inwards, according as its posterior or inferior fibres are thrown separately into contraction.

GLUTÆ'US MIN'IMUS, *Glutæ'us minor, Ilio-ischii-trochantérien, Ter'tius et In'timus Glou'tius* (F.) *Petit Fessier;—Petit Ilio-trochantérien* (Ch.) This muscle, which is situate beneath the preceding, is flat, triangular, and with radiated fibres. It is attached, *above*, to the external surface of the os ilii, from the inferior curved line to the acetabulum; and, *below*, is inserted into the anterior part of the great trochanter. It has the same uses as the preceding.

GLUTÆ'US MINOR, G. minimus.

GLUTE'AL, *Glou'tius, Glutæ'us*, from γλουτος, 'the nates' or 'buttocks.' (F.) *Fessier.* That which belongs or relates to the nates. This name has been given to many parts which compose the nates.

GLUTE'AL ARTERY, or *Poste'rior Il'iac Artery*, (F.) *Artère fessiere*, is one of the largest branches of the hypogastric. It makes its exit from the pelvis at the upper part of the superior sciatic foramen; gains the posterior part of the pelvis, and divides into two branches;—the one *superficial*, the other *deep-seated.* The last subdivides into three secondary branches, whose ramifications are distributed particularly to the *Glutæi, Longissimus Dorsi, Sacro-lumbalis*, &c., and anastomose with the sciatic and internal circumflex arteries.

GLUTE'AL NERVE, (F.) *Nerf Fessier*, is a large branch, furnished by the 5th pair of lumbar nerves. It is chiefly distributed to the glutæi muscles.

GLUTE'AL VEIN, (F.) *Veine fessière*, follows the same march as the artery of the same name.

GLUTEN, *Glu'tinum, Lentor*, 'glue, paste.' An immediate principle of vegetables. It is soft, of a grayish white, viscid consistence, and very elastic. Exposed to the air, it becomes hard, brown, and fragile; and, in moist air, putrefies. Water and alcohol do not dissolve it. It is soluble in vegetable, and in weak mineral acids, at a high temperature. The farinæ, in which it is found, are those preferred for the preparation of bread; on account of the property it has of making the paste rise. It is a compound of protein, and hence has been ranged amongst the "*proteinaceous alimentary principles*" by Dr. Pereira.

GLUTEN ARTICULORUM, Synovia.

GLUTIA, see Quadrigemina corpora.

GLUTINANS, Agglutinant.

GLUTINATIF, Agglutinant.

GLUTINATIO, Agglutination.

GLUTINEUX, Glutinous.

GLU'TINOUS, *Glutino'sus, Collo'des*, from *gluten*, 'paste, glue.' (F.) *Glutineux, Gluant.* An epithet given to substances taken from the animal or vegetable kingdom, and endowed with unusual viscidity. The decoctions of marshmallows, and figs, and the jelly of hartshorn, are said to be glutinous.

GLUTINUM, Gluten.

GLUTOI, Nates.

GLUT'TONY, from *glutio*, 'I swallow,' *gluttus*, 'the gullet.' *Limo'sis Helluo'num*, (F.)

Gourmandise. Excessive appetite, owing to habitual indulgence.

GLUTTUS, Œsophagus.

GLYCANSIS, Edulcoration.

GLYCAS'MA, from γλυκυς, 'sweet.' A sweet wine, prepared from must.—Linden.

GLYCERATON, Glycyrrhiza.

GLYCERIN, see Pinguedo.

GLYCIPICROS, Solanum dulcamara.

GLYCISIDE, Pæonia.

GLYCYPHYTON, Glycyrrhiza.

GLYCYRRHI'ZA, from γλυκυς, 'sweet,' and ριζα, 'a root.' *Glycyrrhi'za Glabra, Liquori''tia, Liquorit''ia Scythi'ca* (*Radix,*) *Glyceraton, Glycyph'yton, Liq'uorice, Adip'sos, Alcacas, Alimos,* (F.) *Réglisse. Order,* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. The root of this southern European plant is inodorous; has a sweet taste; is mucilaginous; and leaves, when unpeeled, a degree of bitterness in the mouth. It is used as a demulcent, and chiefly in catarrh. The extract, made from it and sold in the shops, is known under the name *Spanish Liquorice* or *Liquorice Juice,* (F.) *Jus de Réglisse.*

Pectoral Balsam of Liquorice—a quack preparation—is said by Dr. Paris to consist chiefly of *Paregoric Elixir,* strongly impregnated with *Oil of Aniseed.*

GLYSTER HERBS, *Herbæ pro Enem'atē.* The herbs ordinarily sold by the English apothecary under this title, are:—*mallow leaves,* one part; *chamomile flowers,* one part. (℥iss to Oj of water.)

GNAPHALIUM DIOÏCUM, Antennaria dioica.

GNAPHALIUM MARGARITA'CEUM, *Cudweed. Life everlasting.* An indigenous plant, growing in woods and fields, and flowering in August. Its virtues are not defined, and the same may be said of

GNAPHALIUM POLYCEPH'ALUM; *Sweet-scented Life everlasting.*

GNATHI'TIS, from γναθος, 'the cheek, the jaw.' Inflammation of the cheek or upper jaw.

GNATHOCEPH'ALUS, from γναθος, 'the jaw,' and κεφαλη, 'head.' A monster who has no head visible externally, but exhibits voluminous jaws.—G. St. Hilaire.

GNATHOPLE'GIA, from γναθος, and πληγη, 'a stroke.' Paralysis of the cheek.

GNATHORRHAG''IA, from γναθος, and ῥηγνυμι, 'to burst forth.' Hemorrhage from the internal surface of the cheeks.

GNATHOS, from κναω, 'I scrape, rub.' The *cheek,* the *upper jaw.* Also, the part of the jaws in which the teeth are fixed.—Hippocr., Foësius. See Bucca, and Gena.

GNATHOSPASMUS, from γναθος, and σπασμος, 'spasm.' Spasm of the lower jaw.

GNESIOS, Legitimate.

GNOSIS, γνωσις, 'knowledge.' A common suffix, as in *Diagno'sis, Progno'sis,* &c.

GOACONAZ, see Toluifera balsamum.

GOATS' BEARD, COMMON, Tragopogon

GOATS' THORN, Astragalus verus.

GOBELET EMÉTIQUE, Goblet, emetic

GOBLET, EMETIC, *Poc'ulum emet'icum, Calix vomito'ria,* (F.) *Gobelet émétique.* A vessel, made by pouring melted antimony into a mould. By putting wine into this and allowing it to stand some time, it acquires the property of producing vomiting. This kind of emetic has been long rejected; as the practitioner could never be certain of the dose he exhibited.
