Source of the nitrogen exhaled from the lungs and skin . . . . .	109
Composition of proteine . . . . .	116
Composition of the animal tissues . . . . .	120
Gelatine contains no proteine, although formed from it . . . . .	122
The secretions contain all the elements of the blood . . . . .	126
Formula of blood and metamorphoses of bile . . . . .	127
Metamorphoses of blood and flesh . . . . .	130
The constituents of the urine derived from the metamorphosed tissues . . . . .	131
Relation of blood or flesh and proteine to the secretions and excretions . . . . .	133
Formation of gelatine . . . . .	135
Origin of bile in the carnivora . . . . .	137
Origin of bile in the herbivora . . . . .	140
Origin of hippuric acid . . . . .	142
Formation of the chief secretions and excretions . . . . .	144
Soda essential to the bile . . . . .	146
Relation of urine to bile . . . . .	148
Relation of starch to bile . . . . .	150
Uses of common salt . . . . .	153
Certain remedies take a share in the vital transformations . . . . .	161
Chief qualities of the blood . . . . .	163
Modus operandi of organic remedies . . . . .	165
All organic poisons contain nitrogen . . . . .	168
Theine identical with caffeine . . . . .	170
Relation of theine and caffeine to bile . . . . .	170
Theory of their action . . . . .	171
Theory of the action of the vegetable alkalies . . . . .	173
Composition and origin of nervous matter . . . . .	174
It is related to that of the vegetable alkalies . . . . .	176
Theory of the action of the latter . . . . .	178
Phosphorus seems essential to nervous matter . . . . .	180
