PREFACE.

FOR PERFECTING the statistical registration of diseases, with a view to the discovery of statistical truths concerning their history, nature, and phenomena, the want of a generally recognised Nomenclature of Diseases, has long been felt as an indispensable condition.

The advantages accruing from accurate statistics of disease are likely to be the greater and the surer in proportion as the field of investigation is the wider.

The statistics of a single town may be instructive; but more instruction will be obtained from the compared statistics of various and many towns. This is alike true of different districts of the same country, and of different countries and climates: and the most instructive sanitary statistics would be those which related to the whole of the inhabited portions of the globe.

For the registration of such statistical facts it is clearly requisite that there should be a uniform Nomenclature of Diseases, co-extensive with the area of investigation; and taking the largest area, the universal globe, the Nomenclature would need to be one that can be understood and used by the educated people of all nations.

Among the great ends of such a uniform Nomenclature must be reckoned that of fixing definitely, for all places,

the things about which medical observation is exercised, and of forming a steady basis upon which medical experience may be safely built.

Another main use of the statistical registration of diseases on a wide scale, is that it must tend to throw light upon the causes of disease, many of which causes, when duly recognised, may be capable of prevention, removal, or diminution.

When a general and uniform Nomenclature of Disease has once been carefully framed, when we are sure that medical observation is occupying itself everywhere with the selfsame diseases, the value of statistical tables becomes very high, as representing the course of events in disease, under various circumstances of time, place, season, climate, manners and customs, age, sex, race, and treatment.

This general, or common, or *standard* nomenclature need not be imposed upon every nation and people as its proper nomenclature. It could not. It would be unintelligible by the people at large, and embarrassing to those by whom the necessary returns must be made. But the nomenclature proper or peculiar to each country, and which may be called its *national* nomenclature, should be readily convertible into the *standard* nomenclature.

The one, or the other, of these standard and national nomenclatures may first be framed by an English (or by any other) Committee, or the two may be framed simultaneously.

The Committee appointed by the Royal College of Physicians of London have prepared a Nomenclature suitable to England, and to all countries where the English language is in common use. For each name they have supplied the corresponding Latin term, which is the language of ancient

science, and probably the fittest language for a nomenclature common to all the world; and also the equivalent term in the three modern languages which are the richest in medical learning and literature, the French, the German, and the Italian languages: and in this way they hope to have laid the foundation for a Nomenclature of Diseases in any language extant on the earth.

In the English list of names, it seemed desirable that as little deviation as possible should be made from those employed by the Registrar-General of England; otherwise his settled plans and his forms of returns, which have been followed for 30 years, would require to be remodelled; the comparison of future with past returns would be made difficult and perplexing, if not impossible; and a damaging break would be caused in evidence which becomes more and more trustworthy and valuable, in proportion as it is prolonged and continuous.

Again, it is desirable that all lists should consist, as much as may be possible, of short names—names comprised in one word, or in the fewest words; also, in the nomenclature proper, or national, that they should be names in common and popular use, especially when these are single, or short, and distinctive, and imply no erroneous or doubtful theories.

Names are not necessarily to be excluded, however, merely because they may seem to express only vague or imperfect knowledge; such names as DROPSY, CONVULSIONS, PALSY—disorders which may severally depend upon various and different morbid changes within the body, not always easy of recognition. It has been well observed by Dr. FARR, whose aid has been of great value to the Committee, that the refusal to sanction such terms as these in the registration of diseases, 'would have an obvious

tendency to encourage reckless conjecture' in making returns.

Some names (as SMALL-POX) speak for themselves: many (as DIPHTHERIA) require to be defined, for the sole purpose, however, of identification: to others (as BRIGHT'S DISEASE) it is expedient, for the same purpose only, to append synonyms.

When fixed names have been given to diseases, their classification becomes a matter of some importance.

A good classification aids and simplifies the registration of diseases; helps towards a more easy comparison and knowledge of them, and towards the storing of experience respecting them; and facilitates the discovery of general principles from the collected, grouped, and compared phenomena.

But a good classification is a very difficult matter.

Diseases might be classified according to their symptoms; to their causes; to their intimate nature; to the tissues, or to the systems, of the body that are affected; or to the parts of the body as they lie anatomically.

After much consideration, the Committee have resolved 'that the proposed classification of diseases should be based upon anatomical considerations.'

In subservience to this anatomical distribution, diseases may also be grouped as being general or local.

General diseases are such as affect the whole frame rather than any special part of it. Local diseases are such as occupy special parts of the body.

General diseases may be conveniently subdivided into two sections, A and B.

Section A comprehends those disorders which appear to involve a morbid condition of the blood, and which

present for the most part, but not all of them, the following characters. They run a definite course, are attended with fever, and frequently with eruptions on the skin, are more or less readily communicable from person to person, and possess the singular and important property of generally protecting those who suffer them from a second attack. They are apt to occur epidemically. Of these epidemic visitations, Dr. FARR observes, that they distinguish one country from another, one year from another, have formed epochs in chronology, have decimated armies, and disabled fleets, have influenced the fate of cities, nay, of empires.

Section B comprises, for the most part, disorders which are apt to invade different parts of the same body simultaneously or in succession. These are sometimes spoken of as constitutional diseases, and they often manifest a tendency to transmission by inheritance.

The construction of this Nomenclature has been so long in hand, that it may be proper and not uninteresting to record the circumstances of its origin and progress.

The idea which led to the formation of a general Nomenclature of Diseases, originated in a correspondence between Dr. DUMBRECK, of the Medical Department of the Army, and Dr. SIBSON, respecting the need of such a Nomenclature for use in the Army Medical Service.

But at the *Comitia majora* of the Royal College of Physicians, held on the ninth day of July, 1857, it was resolved, on the motion of Dr. NAIRNE, in consequence of a letter addressed to the College by the Hospitals Committee of the Epidemiological Society, 'That a Committee be appointed to prepare a Nomenclature of Diseases, and

that such Committee have full power to co-operate with other bodies.'

The following Fellows of the College were appointed members of the Committee by the President of the College:—

DR. MAYO— <i>President.</i>	DR. BABINGTON.
DR. ALDERSON— <i>Treasurer,</i> now <i>President.</i>	DR. ADDISON.
DR. HAWKINS— <i>Registrar.</i>	DR. NAIRNE.
DR. JEAFFRESON,	DR. BARKER.
DR. PITMAN,	DR. BUDD.
DR. BENCE JONES,	DR. GULL.
DR. RISDON BENNET,	DR. BALY.
DR. MUNK— <i>Librarian.</i>	DR. BARCLAY.
	DR. SIBSON.
	DR. PARKES.

At the first meeting of the Committee DR. SIBSON was appointed Secretary.

The following representative members afterwards consented to co-operate in carrying into effect the objects of the Committee:—

MR. STANLEY, President of the Royal College of Surgeons.

DR. DRUITT, Representative of the Master of the Worshipful Society of Apothecaries.

SIR JOHN LIDDELL, Director-General of the Medical Department of the Navy.

DR. LOGAN, Director-General of the Medical Department of the Army.

SIR J. RANALD MARTIN, Physician to the Secretary of State for India in Council.

DR. FARR, Representative of the Registrar-General.

MR. SIMON, Medical Officer of Health, now the Medical Officer of the Privy Council.

MR. HOLMES, Secretary of the Hospitals Committee of the Epidemiological Society.

The meetings of the Committee were suspended in 1858, in consequence of the passing of the Medical Act of that year, and of the alterations thereby rendered necessary in the constitution and regulations of the College.

They were resumed in 1863, and the following members were then or subsequently added to the Committee:—

SIR THOMAS WATSON, Bart., President of the Royal College of Physicians.

MR. LUKE, President of the Royal College of Surgeons.

DR. BRYSON, R.N., Director-General of the Medical Department of the Navy.

DR. BALFOUR, Deputy Inspector-General of Hospitals, and Head of the Statistical Branch at the Army Medical Board.

DR. STARK, Representative of the Registrar-General of Scotland.

DR. N. M. BURKE, Representative of the Registrar-General of Ireland.

DR. MACKAY, R.N., Deputy Inspector-General of Hospitals and Fleets.

MR. MOORE, Surgeon to the Middlesex Hospital.

DR. C. J. B. WILLIAMS.	DR. QUAIN.
DR. BARLOW.	DR. KIRKES.
DR. ARTHUR FARRE.	DR. WILKS.
DR. BLACK.	DR. BRISTOWE.
DR. FREDERIC WEBER.	DR. HENRY THOMPSON.
DR. CHARLES WEST.	DR. HERMANN WEBER.
DR. CHAMBERS.	DR. GUENEAU DE MUSSY
DR. MONRO.	DR. MCWILLIAM.
DR. GEORGE JOHNSON.	

A classification sub-committee was formed, consisting of

SIR THOMAS WATSON, BART.	DR. C. J. B. WILLIAMS.
DR. FARR.	DR. QUAIN.
MR. SIMON.	MR. HOLMES.
DR. BARCLAY.	DR. SIBSON.
DR. BALFOUR.	

A definition sub-committee was also formed, consisting of—

DR. BARLOW.	DR. SIBSON.
DR. ARTHUR FARRE.	DR. PARKES.
DR. WEST.	DR. KIRKES.
DR. CHAMBERS.	DR. WILKS.
DR. MONRO.	DR. BRISTOWE.
DR. GEORGE JOHNSON.	MR. MOORE.
DR. BARCLAY.	MR. HOLMES.
DR. BALFOUR.	

Mr. GASKILL and Dr. NAIRNE (Commissioners in Lunacy) attended the meetings of the Committee when the subject of INSANITY was under consideration.

Mr. CARTWRIGHT and Mr. TOMES attended the meetings of the Committee when the diseases of the TEETH were under consideration.

The Latin Nomenclature was prepared by Dr. HENRY THOMPSON, and revised by Dr. BLACK.

The French Nomenclature was prepared by Dr. GUENEAU DE MUSSY.

The German Nomenclature was drawn up by Dr. HERMANN WEBER, and revised by Dr. FREDERIC WEBER.

The Italian Nomenclature was drawn up by Dr. FREDERIC WEBER, and was revised by Professor PACINI of Florence, at the personal request of Dr. Farr, and by Professor POLLI of Milan.

The List of Deformities was drawn up by Dr. ARTHUR FARRE.

The Botanical Terms were revised by Dr. HOOKER.

The entire work has been edited by the Secretary, Dr. SIBSON.

Dr. BARCLAY took part with the Secretary in editing the whole of the Nomenclature, but more especially the Medical portion.

The Surgical portions of the Nomenclature were prepared, and, in conjunction with the Secretary, edited by Mr. MOORE and Mr. HOLMES.

Official changes during the period of the existence of the Committee led also to the introduction into it of the following additional members:—

Mr. PARTRIDGE, as President of the Royal College of Surgeons; and

DR. BIRKETT.

DR. HERBERT DAVIES.

DR. OWEN REES.

DR. GUY.

DR. HANDFIELD JONES.

DR. PEACOCK.

DR. BASHAM.

DR. WEGG.

as Censors of the College.

Dr. ALDERSON'S first official act after his election as President of the College, was to appoint SIR THOMAS WATSON Chairman of the Committee.

EXPLANATIONS.

THOSE DISEASES only have been defined which seemed to require it ; and the definitions have been framed for the purpose of *identification* only, not as explanations of the phenomena of disease.

The words 'tending to' have always been applied to an event which is natural and probable, but not inevitable : 'resulting in' to an event which is inevitable, if the disease runs its natural course.

With a view to facilitate the registration of disease in accordance with this Nomenclature, the following Explanations are offered :—

By turning to the Alphabetical Index, the name of any disease may be readily found.

In the body of the work the name of each disease is preceded by a distinguishing number, and as a rule is printed in Roman letters, but in exceptional cases in *Italics*.

Whenever such exception is observed, the disease thus printed in *Italics* should not be registered among the local or other affections with which it appears, but under the class to which its special number refers it, and, as regards the organ in which it may be seated, in the order particularised at p. 15.

In short, the local manifestations of general diseases are to be returned, not among local, but among general diseases.*

* For example, in the list of diseases of the stomach given at p. 95, Cancer of that organ is included, but it is distinguished by *Italics*. And in making returns it should be placed among other cancerous affections, to which the prefixed number between brackets [44] refers it. If such return should include similar affections of other parts, the position assigned to disorders of the stomach, in relation to other organs, is determined by consulting the list given at p. 15.

Where varieties are observable in the forms of disease, such varieties are indicated by their being 'indented,' i.e. printed below and somewhat to the right of the principal heading, each being preceded by a distinguishing letter. Such lists are given by way of example, and are not to be regarded as exhaustive.

Diseases should only be returned under such general names as 'Dropsy,' 'Convulsions,' 'Palsy,' when the morbid conditions upon which they depend are unknown; but when the cause has been ascertained, the case should be registered under the head of the primary disease, the secondary affections being also specified.

Non-malignant Tumours and Cysts have not been numbered, for reasons stated at p. 19.

Surgical Operations, Parasites and Malformations are placed in an Appendix.

Notes in explanation of particular cases are given in various parts of the work.

Headache and analogous affections, being merely symptoms of constitutional or local diseases, are not included in this Nomenclature.

Arrangement of Local Diseases.

The attention of those making use of this Nomenclature is especially called to the 'Arrangement of Local Diseases' given at p. 29. That list, which occupies scarcely two pages, includes nearly all the important forms of disease which affect the various organs, and is therefore a key to the general arrangement of those diseases adopted throughout the work.

Latin Version.

In the Latin Version the translators have kept the following purposes steadily in view. They have endeavoured to avoid as far as possible all barbarous, ill-formed, and unnecessarily coined words; and they have taken for their standard the best writers of the Roman period, especially Celsus. To this must be ascribed the occasional deviations from the usages of modern Latin, and the discrepancies which here and there occur between the Latin version and the corresponding terms in the English Nomenclature.

GENERAL DISEASES

A.

1. Small-pox.

Group A (unmodified).

Group B (modified). *Definition*: Pustules cut short in their development by vaccination or previous attack of Small-Pox.

Varieties, applicable to both groups:

a. Confluent. *Definition*: Pustules running together over the greater part of the body.

b. Semi-confluent.

c. Distinct. *Synonym*, Discrete. *Definition*: All the pustules separate.

d. Abortive. *Synonym*, Varicelloid. *Definition*: Comparatively few pustules, the general eruption scarcely passing beyond the stage of vesicle.

Subordinate Varieties:

e. Petechial.

f. Hæmorrhagic. *Definition*: Blood effused into the vesicles or pustules, with a tendency to hæmorrhage from the mucous surfaces.

g. Corymbose. *Definition*: Some of the pustules assume the form of clusters, like a bunch of grapes (*corymbus*). This is a rare variety of the disease.

2. Cow-pox.

3. Chicken-pox.

4. Measles.

5. Scarlet fever. *Synonym*, Scarlatina.

Varieties:

a. Simple. *Definition*: A scarlet rash, with redness of the throat, but without ulceration.

b. Anginose. *Definition*: A more severe form of the disease with redness and ulceration of the throat, and a tendency to the formation of abscess in the neck.

c. Malignant. *Definition*: The throat tends to slough; the scarlet rash is scarcely, if at all, visible, petechiæ are often seen on the surface, and the fever is of a low form.

Note.—Scarlet fever occurs occasionally without any rash or sore throat being observed.

6. Dengue. *Definition*: An ephemeral continued fever or febricula, characterised by frontal headache, and by severe pains in the limbs and trunk, and sometimes by an eruption, resembling that of measles, over the body; occurring in the West Indies.
7. Typhus fever. *Definition*: A continued fever, characterised by great prostration, and a general, dusky, mottled rash, without specific lesion of the bowels.
8. Cerebro-spinal fever. *Synonyms*, Malignant purpuric fever; Epidemic cerebro-spinal meningitis. *Definition*: A malignant epidemic fever attended by painful contraction of the muscles of the neck, and retraction of the head. In certain epidemics it is frequently accompanied by a profuse purpuric eruption, and, occasionally, by secondary effusions into certain joints. Lesions of the brain and spinal cord and their membranes are found on dissection.
9. Enteric fever. *Synonym*, Typhoid fever. *Definition*: A continued fever, characterised by the presence of rose-coloured spots, chiefly on the abdomen, and a tendency to diarrhœa, with specific lesion of the bowels.

Enteric fever occurring in the child is often named Infantile remittent fever.

Note.—Fever symptomatic of worms, teething, or other sources of irritation should not be included under this head.
10. Relapsing fever. *Definition*: A continued fever of short duration, characterised by absence of eruption, and an abrupt relapse, occurring after an interval of about a week.
11. Simple continued fever. *Definition*: Continued fever having no specific character.
12. Febricula. *Definition*: Simple fever, of not more than three or four days' duration.

19. Diphtheria. *Definition*: A specific disease, with membranous exudation on a mucous surface (generally of the mouth, fauces and air passages), or occasionally on a wound.
- a. Diphtheritic paralysis.
20. Hooping-cough.
21. Mumps. *Definition*: An epidemic and contagious affection of the salivary glands.
22. Influenza.
23. Glanders. *Definition*: An inflammatory affection of the nasal mucous membrane, produced by the contagion of matter from a glandered horse.
24. Farcy. *Definition*: An inflammatory affection of the skin and of the absorbent system, produced by the contagion of matter from a horse having glanders or farcy.
25. Equinia mitis. *Synonym*. Grease. *Definition*: A pustular eruption, produced by the contagion of matter from a horse affected with the grease.
26. Malignant pustule. *Definition*: A spreading gangrenous inflammation, commencing as a vesicle on exposed skin, attended with peculiar hardness and fœtor, and derived from cattle similarly diseased.
27. Phagedæna. *Definition*: A condition of wounds or ulcers in which they spread with a sloughy surface.
28. Sloughing phagedæna. *Definition*: A severe form of phagedæna, in which the slough extends deeper than the surface.
29. Hospital gangrene. *Definition*: Sloughing phagedæna, occurring endemically in hospitals.
30. Erysipelas. *Definition*: Inflammation of the integument, tending to spread indefinitely.

Varieties:

a. Simple. *Synonym*, Cutaneous.

b. Phlegmonous. *Synonym*, Cellulo-cutaneous.

c. Diffuse inflammation (of cellular tissue). *Definition*: Inflammation of the cellular tissue, tending to spread indefinitely.

Note I.—In slighter cases, occurring on the surface of the body, diffuse inflammation is identical with phlegmonous erysipelas.

Note II.—In registering cases of phlegmonous erysipelas and of diffuse inflammation arising from injury, surgical operation, or local disease, the cause should be specified.

31. Pyæmia. *Definition*: A febrile affection, resulting in the formation of abscesses in the viscera and other parts.

Note.—In returning cases of pyæmia, specify the affected organs.

32. Puerperal fever. *Definition*: A continued fever, communicable by contagion, occurring in connection with child-birth, and often associated with extensive local lesions, especially of the uterine system.

Note.—In returning cases of puerperal fever, the more important local lesions, such as peritonitis, effusions into serous and synovial cavities, phlebitis, and diffuse suppuration, should be specified.

33. Puerperal ephemera. *Synonym*, Weed. *Definition*: A fever consisting of one or more paroxysms, occurring a few days after delivery, generally attended by diminution of the milk and lochia, and unaccompanied by local lesions.

B.

34. Acute rheumatism. *Synonym*, Rheumatic fever.

Definition: A specific febrile disorder, characterised by non-suppurative inflammation of the fibrous tissues surrounding the joints, of which many are affected at the same time, or in succession.

Sub-acute rheumatism.

35. Gonorrhœal rheumatism. *Definition*: An analogous affection, associated with gonorrhœa.

36. Synovial rheumatism. *Definition*: A rheumatic affection, in which an accumulation of non-purulent fluid occurs in the synovial sacs, and especially in those of the knee joints.
37. Muscular rheumatism. *Definition*: Pain in the muscular structures, increased by motion.
Local varieties:
a. Lumbago.
b. Stiff neck.
38. Chronic rheumatism. *Definition*: Chronic pain, stiffness and swelling of various joints.
Note.—Cases attended with deposit of urate of soda are to be returned as chronic gout, and those in which there is marked distortion as chronic osteo-arthritis.
39. Acute gout. *Definition*: A specific febrile disorder, characterised by non-suppurative inflammation, with considerable redness of certain joints—chiefly of the hands and feet, and, especially in the first attack, of the great toe—and attended with excess of uric acid in the blood.
40. Chronic gout. *Definition*: A persistent constitutional affection, characterised by stiffness and swelling of various joints, with deposits of urate of soda.
41. Gouty synovitis.
Note.—Retrocedent gout is a term applied to cases of gout in which some internal organ becomes affected on the disappearance of the disease from the joints. It should be referred to acute or chronic gout.
42. Chronic osteo-arthritis. *Synonym*, Chronic rheumatic arthritis. *Definition*: An affection characterised by pain, stiffness, and deformity of one or more of the joints, associated with deposition of new bone around them.
43. Syphilis.
A. Primary syphilis. *Definition*: Syphilis while limited to the part inoculated, and the lymphatic glands connected with it.

- B. Secondary syphilis. *Definition*: Syphilis, when it affects parts not directly inoculated.

Tertiary syphilis is a term sometimes applied to the later symptoms, when separated by an interval of apparent health from the ordinary secondary syphilis.

- C. Hereditary syphilis. *Definition*: Constitutional syphilis of the child, derived during fœtal life from one of the parents.

1. Local syphilitic affections.

44. Cancer. *Synonym*, Malignant disease. *Definition*: A deposit or growth that tends to spread indefinitely into the surrounding structures, and in the course of the lymphatics of the part affected, and to reproduce itself in remote parts of the body.

* In returning local syphilitic affections, specify whether the case be one of primary syphilis, secondary syphilis, syphilitic deposit, or syphilitic inflammation.

Note I.—In returning cases of cancer in more than one organ, specify in which the disease is primary, and in which secondary.

Note II.—State also the kind and duration of the disease in each case, and the nature of all operations, with their dates and results.

Varieties:

a. Scirrhus. *Synonym*, Hard cancer. *Definition*: Cancer characterised by hardness of the primary tumour, and by a tendency to draw to itself the neighbouring soft structures. When ulcerated, the sore is commonly deep, uneven, and bounded by a thick everted hard edge.

b. Medullary cancer. *Synonym*, Soft cancer. *Definition*: Cancer characterised by a smoothly-lobed surface, soft irregular consistence, great vascularity, and usually rapid growth and reproduction. When ulcerated, it protrudes in large masses, which bleed copiously.

Fungus hæmatodes is a term applied to some cases of medullary cancer, which are more than usually vascular.

Hard encephaloid is a designation sometimes applied to medullary cancers of unusually firm consistence. These two forms of the disease should be returned under the title of medullary cancer.

c. Epithelial cancer. *Synonyms*, Cancroid; Epithelioma. *Definition*: Cancer characterised by its occurrence chiefly in parts naturally supplied with epithelium, and by the resemblance of its cells to those of the epithelium.

d. Melanotic cancer. *Synonym*, Melanosis. *Definition*: A cancer characterised by the presence of pigment.

e. Osteoid cancer. *Definition*: A tumour usually commencing in the bones, consisting almost entirely of bone, and followed by similar growths in the glands and viscera.

Note.—Cancer in mucous membranes, when covered by a villous growth, has received the name of Villous cancer.

1. Local colloid.†

ARRANGEMENT OF NON-MALIGNANT TUMOURS AND CYSTS.

In order that the malignant and non-malignant growths may appear together, the non-malignant tumours and cysts are inserted here. They should, however, be returned among the local diseases, under 'Non-malignant tumours' and they are not, therefore, numbered at this place.

- Fibrous tumour. *Definition*: A growth, consisting of fibrous tissue, circumscribed, or not invading surrounding structures.

When the tumour contains cysts, it has received the name of Fibrocystic.

When it contains earthy matter, it has been named Fibro-calcareous.

When it grows from bone and is partly ossified, it constitutes the non-malignant form of the disease known as Osteo-sarcoma.

When it contains involuntary muscle, as when growing in the uterus, it has received the name of Fibro-muscular.

When it contains fat, it has been named Fibro-fatty.

Other fibrous tumours have been named according to their seat, e.g. Neuroma. Painful subcutaneous tumour.

- Fibro-cellular tumour. *Definition*: A growth consisting of loose fibrous or areolar tissue.

Note.—When occurring as a pendulous outgrowth from a mucous surface, it constitutes the chief varieties of Polypus.

- Fibro-nucleated tumour. *Definition*: A tumour composed of fibrous tissue, mixed with elongated nuclei.

* In returning cases of local cancer, specify the variety of cancer, by adding, after '44,' the letter *a*, *b*, *c*, *d*, or *e*, according to the nature of the case (see p. 17). They are to be returned in the order specified in the foot-note at page 15.

† Cases of local colloid are to be returned in the order specified in the foot-note at page 15.

Fibro-plastic tumour. *Definition*: A rapidly growing tumour, composed in great part of fusiform nucleated cells.

Note.—When the fibro-cellular or fibro-plastic tumour, but more especially the latter, slowly involves the adjacent soft structures, and returns after removal, it has received the name of Recurrent fibroid.

Myeloid tumour. *Definition*: A tumour growing generally in the ends of the bones, having a red colour, and containing a large proportion of many-nucleated cells.

Fatty tumour. *Synonym*, Lipoma.

Osseous tumour.

a. Of bone. *Synonym*, Exostosis.

Varieties:

Compound or proliferous cysts.

- a. Complex cystic tumour. *Synonym*, Cysto-sarcoma.
 - 1. With intracystic growths.
- b. Cutaneous or piliferous cyst. *Synonym*, Dermoid.
- c. Dentigerous cyst.

46. Lupus. *Definition*: A spreading tuberculous inflammation of the skin usually of the face, tending to destructive ulceration.

Varieties:

- a. Chronic lupus.
 - b. Lupus exedens. *Definition*: This variety is characterised by the rapidity, depth, and extent of the ulceration, and by appearing in rare cases on other parts than the face.
47. Rodent ulcer. *Definition*: A destructive ulcer, characterised by the extent and depth to which it spreads in the adjoining structures, and by the absence of preceding hardness, and of constitutional affection.
48. True Leprosy. *Synonym*, Elephantiasis Græcorum.

49. Scrofula. *Definition*: A constitutional disease, resulting either in the deposit of tubercle, or in specific forms of inflammation or ulceration.

Varieties:

- a. Scrofula with tubercle.
b. Scrofula without tubercle.

Note.—The constitutional tendency which has received the name of the Scrofulous Diathesis, when unattended by local lesions, is not to be returned as a disease.

1. Local scrofulous affections.

Tubercular meningitis.

Scrofulous ophthalmia.

Tubercular pericarditis.

Scrofulous disease of glands.

Phthisis pulmonalis.

*Hæmoptysis.

DISEASES OF THE NERVOUS SYSTEM.

The diseases printed in *Italics* under this heading, are inserted for the sake of local classification only, and are not to be registered here, but at the place referred to in each instance by number.

DISEASES OF THE BRAIN AND ITS MEMBRANES.

59. Encephalitis. *Definition*: Inflammation of the brain or of its membranes.

Note.—This term is to be used only when the precise seat of the inflammation has not been ascertained by post-mortem examination.

60. Meningitis. *Definition*: Inflammation of the membranes of the brain.

1. Inflammation of the dura mater.

Note.—This form of inflammation is almost invariably the result of injury or disease of the bones of the skull; in such cases, the injury or disease by which it is caused ought to be specified.

2. Inflammation of the pia mater and arachnoid.

(49^l.) 3. *Tubercular meningitis*. *Synonym*, *Acute hydrocephalus*.

(8.) *Cerebro-spinal fever*.

61. Inflammation of the brain. *Definition*: Inflammation of the brain substance, with or without implication of the membranes, usually partial, and in many cases dependent on local injury, or foreign deposit.

62. Red softening (of the brain).

63. Yellow softening (of the brain).

64. Abscess (of the brain).

65. Apoplexy.

Varieties:

a. Congestive.

b. Sanguineous. *Synonym*, Cerebral hæmorrhage.

66. Sunstroke.

67. Chronic hydrocephalus.

68. Hypertrophy (of the brain).

69. Atrophy (of the brain). *Definition*: Diminution of brain substance without induration or softening.

ENTOZOA.

CLASSES.

- A. CŒLELMINTHA. *English synonym*, Hollow worms. *Definition*: Worms with an abdominal cavity.
- B. STERELMINTHA. *English synonym*, Solid worms.
- C. ACCIDENTAL PARASITES. *Definition*: Internal parasites, having the habits, but not referable to the class, of entozoa.

CLASS A. CŒLELMINTHA.

1. *Ascaris lumbricoides*. (Linnæus.) *Habitat*: Intestines.
2. *Ascaris mystax*. (Rudolphi.) *Habitat*: Intestines.
3. *Trichocephalus dispar*. (Rudolphi.) *Habitat*: Intestines.
4. *Trichina spiralis*. (Owen.) *Habitat*: Muscles.
5. *Filaria Medinensis*. (Gmelin.) *Syn.*, *Dracunculus Medinensis*. *English synonym*, Guinea-worm. *Habitat*: Skin and subcutaneous tissues.
6. *Filaria oculi*. (Nordmann.) *Synonym*, *Filaria lentis*. (Diesing.) *Habitat*: Eye.
7. *Strongylus bronchialis*. (Cobbold.) *Habitat*: Bronchial tubes.
8. *Eustrongylus gigas*. (Diesing.) *Habitat*: Kidney; intestines.

- 9 *Sclerostoma duodenale*. (Cobbold.) *Syn.* *Anchylostomum duodenale*. *Habitat*: Duodenum.
 10. *Oxyuris vermicularis*. (Bremser.) *English synonym*, Thread-worm. *Habitat*: Rectum.

CLASS B. STERELMINTHA.

11. *Bothriocephalus latus*. (Bremser.) *Habitat*: Intestines.
 12. *Bothriocephalus cordatus*. (Leuckart.) *Habitat*: Intestines.
 13. *Tænia solium*. (Linnæus.) *Habitat*: Intestines.
 14. *Cysticercus* of the *Tænia solium*. *Synonym*, *Cysticercus telæ cellulosæ*.
 15. *Tænia mediocanellata*. (Küchenmeister.) *Habitat*: Intestines.
 16. *Tænia acanthotrias*. (Weinland.) *Habitat*: Intestines.
 17. *Tænia flavopuncta*. (Weinland.) *Habitat*: Intestines.
 18. *Tænia nana*. (Siebold.) *Habitat*: Intestines.
 19. *Tænia lophosoma*. (Cobbold.) *Habitat*: Intestines.
 20. *Tænia elliptica*. (Batsch.) *Habitat*: Intestines.
 21. *Cysticercus* of the *Tænia marginata*. *Synonym*, *Cysticercus tenuicollis*.
 22. *Echinococcus hominis*, or Hydatid of the *Tænia echinococcus*. (Siebold.)
 23. *Fasciola hepatica*. (Linnæus.) *Habitat*: Liver.
 24. *Distoma crassum*. (Busk.) *Habitat*: Duodenum.
 25. *Distoma lanceolatum*. (Mehlis.) *Habitat*: Hepatic duct ; intestines.
 26. *Distoma ophthalmobium*. (Diesing.) *Habitat*: Eye.
 27. *Distoma heterophyes*. (Siebold.) *Habitat*: Small intestines.
 28. *Bilharzia hæmatobia*. (Cobbold.) *Habitat*: Portal and venous blood.
 29. *Tetrastoma renale*. (Della Chiaje.) *Habitat*: Tubes of the kidney.
 30. *Hexathyridium venarum*. (Treutler.) *Habitat*: Venous blood.
 31. *Hexathyridium pinguicola*. (Treutler.) *Habitat*: Ovary.

CLASS C. ACCIDENTAL PARASITES.

32. *Pentastoma denticulatum*. (Siebold.) *Habitat*: Liver; small intestines.
33. *Pentastoma constrictum*. *Habitat*: Liver.
34. *Cæstrus hominis*. (Say.) *English synonym*, Larva of the gad-fly. *Habitat*: Intestines.
35. *Anthomyia canicularis*. (A. Farre.) *Habitat*: Intestines.

ECTOZOA.

36. *Phthirus inguinalis*. (Leach.) *English synonym*, Crab-louse.
37. *Pediculus capitis*. (Nitzsch.)
38. *Pediculus palpebrarum*. (Le Jeune in Guillemeau.)
39. *Pediculus vestimenti*. (Nitzsch.) *English synonym*, Body-louse.
40. *Pediculus tabescentium*. (Burmeister.)
41. *Sarcoptes scabiei*. (Latreille.) *Synonym*, *Acarus*.
English synonym, Itch-insect.
Note.—The disease Scabies to be returned amongst the parasitic diseases of the skin.
42. *Demodex folliculorum*. (Owen.)
43. *Pulex penetrans*. (Gmelin.) *English synonym*, Chigoe.
Habitat: skin and cellular tissue.

ENTOPHYTA AND EPIPHYTA.

44. *Leptothrix buccalis*. (Wedl. Robin.) *English synonym*, Alga of the mouth.
45. *Oidium albicans*. (Link.) *English synonym*, Thrush fungus. *Habitat*: Mouth in cases of thrush, and certain mucous and cutaneous surfaces.
46. *Sarcina ventriculi*. (Goodsir.) *Habitat*: Stomach.
47. *Torula cerevisiæ*. (Turpin.) *Synonym*, *Cryptococcus cerevisiæ*. (Kützing.) *English synonym*, Yeast-plant. *Habitat*: Stomach; bladder, &c.
48. *Chionyphe Carteri*. *Definition*: A cotton fungus occurring in the disease called Mycetoma. *Habitat*: Deep tissues, and bones of the hands and feet.

49. *Achorion Schönleinii*. (Remak.) *Habitat*: *Tinea favosa*.
Note.—To be returned amongst the parasitic diseases of the skin.
50. *Puccinia favi*. (Ardsten.) *Habitat*: *Tinea favosa*.
Note.—To be returned amongst the parasitic diseases of the skin.
51. *Achorion Lebertii*. (Robin.) *Synonym*, *Trichophyton tonsurans*. (Malmsten.) *Habitat*: *Tinea tonsurans*.
Note.—To be returned amongst the parasitic diseases of the skin.
52. *Microsporon Audouini*. (Gruby.) *Habitat*: *Tinea decalvans*.
Note.—To be returned amongst the parasitic diseases of the skin.
53. *Trichophyton sporuloides*. (Von Walther.) *Habitat*: *Tinea Polonica*.
Note.—To be returned amongst the parasitic diseases of the skin.
54. *Microsporon furfur*. (Eichstädt.) *Habitat*: *Tinea versicolor*.
Note.—To be returned amongst the parasitic diseases of the skin.
55. *Microsporon mentagrophytes*. (Gruby.) *Habitat*:
Follicles of hair in *Sycosis* or *Mentagra*.
Note.—To be returned amongst the parasitic diseases of the skin.

The foregoing list might be extended by the addition of various parasitic vegetations, which have been reported under the names of *Algæ*, *Fungi*, *Mycoderms*, *Leptomiti*, &c., but the characters or the existence of which are still the subject of enquiry.

Defectio pulmonum (alterutrius vel utriusque).
Pulmonum lobi numero deficientes.
Larynx et trachea aut nulla aut inchoata.

CONCOCTIONIS APPARATUS.

Œsophagus impervius.
Intestina impervia vel deficientia in variis partibus.
Anus impervius.
Anus in alieno situ.
Jecur præter naturam exiguum.
Defectio vesiculæ fellis.

Nose imperfect.
Nose resembling a proboscis.

OF THE VASCULAR SYSTEM.

Heart absent.
Cavities of heart deficient in number.
 a. One auricle and one ventricle.
 b. Two auricles and one ventricle.
Septa incomplete.
 a. Auricular.
 b. Ventricular.
Orifices obstructed or imperfect.
 a. Right auriculo-ventricular aperture.
 b. Pulmonic aperture.
 c. Left auriculo-ventricular aperture.
 d. Aortic aperture.
Foramen ovale prematurely closed.
Ductus arteriosus prematurely closed.
Origins of aorta and pulmonary artery transferred.
Origin of ascending aorta from left ventricle and of descending aorta from right ventricle, through the ductus arteriosus.
Commencement of descending aorta, contracted or obliterated.
Foramen ovale persistent.
Ductus arteriosus pervious.
Cardiac valves imperfect.
Pericardium absent.

OF THE RESPIRATORY SYSTEM.

Lung (one or both) absent.
Pulmonary lobes deficient in number.
Larynx and trachea absent or imperfect.

OF THE DIGESTIVE SYSTEM.

Œsophagus impervious.
Intestine impervious, or deficient in various regions.
Anus impervious.
Anus in unusual situations.
Liver preternaturally small.
Gall bladder absent.

Ductus jecinoris impervii.
Urachus patens. Ductus Vitellinus patens.

URINÆ APPARATUS.

Defectio renum (alterutrius vel utriusque).
Renes multifidi.
Ureteres aut nulli aut impervii.
Urachus perstans.

GENITALIUM VIRILIUM.

Coles pusillus, clitoridi similior.
Præputium justo brevius—justo longius.
Defectio testiculorum (alterutrius vel utriusque).
Defectio partium exteriorum.

GENITALIUM MULIEBRIUM.

Defectio ovariorum (alterutrius vel utriusque).
Defectio uteri.
Defectio vaginæ.
Vagina impervia.
Vagina in sinum desinens.
Defectio partium exteriorum.

DEFORMITATES INGENITÆ EX PARUM COËUNTIBUS AB
UTROQUE LATERE PARTIBUS DIMIDIIS, QUÆ DEBUERANT
CONJUNGI.

MEDIARUM REGIONUM A PRIORI PARTE.

Fissura faciei.
Fissura iridis. Coloboma.
Fissura labri.
 a. Labrum leporinum simplex.
 b. Labrum leporinum duplex.
Fissura palati
 a. Palati duri.
 b. Palati mollis.
Fissura nasi. Fissura nasi et buccarum.
Fissura ossis pectoralis.
Fissura septi transversi.

Biliary ducts impervious.
 Urachus patent. Vitelline duct patent.

OF THE URINARY SYSTEM.

Kidney (one or both) absent.
 Kidney lobulated.
 Ureters absent or impervious.
 Urachus persistent.

OF THE MALE ORGANS OF GENERATION.

Penis diminutive, resembling clitoris.
 Prepuce abbreviated—elongated.
 Testicle (one or both) absent.
 External organs absent.

OF THE FEMALE ORGANS OF GENERATION.

Ovary (one or both) absent.
 Uterus absent.
 Vagina absent.
 Vagina impervious.
 Vagina a cul-de-sac.
 External organs absent.

MALFORMATIONS RESULTING FROM INCOMPLETE COALESCENCE OF THE LATERAL HALVES OF PARTS WHICH SHOULD BECOME CONJOINED.

A.—ON THE ANTERIOR MEDIAN PLANE.

Fissure of the face.
 „ „ iris. Coloboma.
 „ „ lip.
 a. Single harelip.
 b. Double harelip.
 „ „ palate.
 a. Hard palate.
 b. Soft palate.
 „ „ nose. Naso-buccal fissure.
 „ sternum.
 „ diaphragm.

Fissura abdominis.
 Fissura commissuræ pectinis.
 Fissura membranæ prioris vesicæ (posteriore dimidio
 foras everso).
 Fissura epispadica itineris urinæ.
 Fissura hypospadica itineris urinæ.
 Fissura scroti.

MEDIARUM REGIONUM A TERGO.

Fissura calvariæ.
 Fissura vertebrarum in spina. Spina bifida.
 a. Ex toto.
 b. Ex parte.
 1. Cervicis.
 2. Lumborum.
 3. Sacri.
 Fissura medullæ in spina.

DEFORMITATES INGENITÆ EX COËUNTIBUS AB UTROQUE
 LATERE DIMIDIIS PARTIBUS, QUÆ DEBUERANT IN
 PERPETUUM DISSOCIARI.

Membra inferiora commissa. Fœtus syreniformis.
 Digiti cohærentes.
 Unoculus. Cyclops.
 Renes in unum conjuncti.

DEFORMITATES INGENITÆ EX LATIUS PATENTE COMMIS-
 SURA DIMIDIARUM A LATERIBUS PARTIUM (DUPLICATA
 OMNIA REPRÆSENTANTES).

Uterus duplex.
 Vagina duplex.

DEFORMITATES INGENITÆ EX REPETITIS IN DUPLUM
 PARTIBUS SINGULORUM FËTUUM.

Superantes numero digiti.
 Superantia numero cava cordis.
 Superantes numero valvæ cordis.

Fissure of the abdominal walls.
 " " pubic symphysis.
 " " anterior wall of the urinary bladder
 (with extroversion of the posterior
 half).
 Epispadic fissure of the urethra.
 Hypospadic fissure of the urethra.
 Fissure of the scrotum.

B.—ON THE POSTERIOR MEDIAN PLANE.

Fissure of the skull.
 " " spinal column. Spina bifida.
 a. Complete.
 b. Partial.
 1. Cervical region.
 2. Lumbar " "
 3. Sacral " "

Fissure of the Spinal cord.

MALFORMATION RESULTING FROM COALESCENCE OF THE
 LATERAL HALVES OF PARTS WHICH SHOULD REMAIN
 DISTINCT.

Lower extremities conjoined. Syreniform Fœtus.
 Fingers or toes conjoined.
 Monoculus. Cyclops.
 Double kidney.

MALFORMATIONS RESULTING FROM THE EXTENSION OF
 A COMMISSURE BETWEEN THE LATERAL HALVES OF
 PARTS (CAUSING APPARENT DUPLICATION).

Double uterus.
 Double vagina.

MALFORMATIONS RESULTING FROM REPETITION OR DU-
 PPLICATION OF PARTS IN A SINGLE FŒTUS.

Supernumerary fingers and toes.
 " cavities of the heart.
 " valves of the heart.

DEFORMITATES EX COHÆRENTIBUS INTER SE BINIS FŒTIBUS, SIVE EX TOTO SIVE EX PARTE.

Fœtus, plus minus absolutus, alio in fœtu inclusus.

Fœtus, plus minus absolutus, tumorem repræsentans cute obductum.

Fœtus duplex.

a. Altera pars integra. Altera appendix tantummodo

b. Utraque pars plus minus integra.

1. Partes mediæ continentis. Superiora et inferiora discreta.

2. Superiora continentia. Inferiora discreta.

3. Inferiora continentia. Superiora discreta.

MUTATIO LOCI ET POSITURA INUSITATA IN FŒTU INGENITA.

Viscera inter se transposita.

Hernia sive ectopia cerebri.

Hernia sive ectopia cordis.

Hernia sive ectopia pulmonum.

Hernia sive ectopia intestinorum.

Varietates:

Per septum transversum. *Idem valet* Hernia diaphragmatica.

Per abdomen. *Idem valet* Hernia abdominalis.

Per umbilicum. *Idem valet* Hernia umbilicaris.

Membrana vesicæ posterior foras extrusa.

Testiculus in ventre retentus.

„ in foramine inguinali.

MORBI A PARTU IPSO VEL POST PARTUM APPARENTES.

Partus intempestivus.

Partus intus emortuus—Asphyxia.

Pulmonis imperfecta explicatio.

Morbus regius.

Amentia.

Infantia linguæ vel mutorum surditas.

Suffusio ingenita.

Cephalæmatoma,

Syphilis.

MALFORMATIONS RESULTING FROM THE COALESCENCE OF TWO FÆTUSES, OR OF THEIR PARTS.

Fœtus, more or less perfect, contained within another fœtus.

Fœtus, more or less perfect, constituting a tumour covered by integument.

Double fœtus.

a. One perfect. The other an appendage.

b. Both more or less perfect.

1. The middle parts united. The upper and lower distinct.

2. The upper parts united. The lower distinct.

3. The lower parts united. The upper distinct.

CONGENITAL DISPLACEMENTS AND UNUSUAL POSITIONS OF PARTS OF THE FÆTUS.

Transposition of viscera.

Hernia or ectopia of the brain.

” ” heart.

” ” lungs.

” ” intestines.

Varieties :

Through the diaphragm. *Synonym*, Diaphragmatic hernia.

Through the abdominal walls. *Synonym*, Abdominal hernia.

Through the umbilicus. *Synonym*, Umbilical hernia.

Extroversion of the posterior wall of the bladder.

Testicle retained in the abdomen.

” ” ” inguinal canal.

DISEASES MANIFESTED AT OR AFTER BIRTH.

Premature birth.

Stillborn—Asphyxia.

Atelectasis pulmonum.

Jaundice.

Idiotcy.

Dumbness or deaf-dumbness.

Congenital cataract.

Cephalhæmatoma.

Syphilis.

MANIPULATION RESULTING FROM CHANGE OF TWO POINTS OF CONTACT

Factor name or less perfect contact within contact

Factor name or less perfect contact resulting a tumour covered by integument

Double factor

a. One perfect. The other an opposite

A. Both name or less perfect

1. The middle part united. The upper and lower distinct

2. The upper part united. The lower distinct

3. The lower part united. The upper distinct
