## MRS. BEETON'S COOKERY BOOKS.

---

MRS. BEETON has been the guide, philosopher, and friend of countless happy homes for more than half a century. Her Cookery Books have appeared amongst the wedding presents of every bride as surely as the proverbial salt cellars, and thousands of grateful letters from all English-speaking countries testify that they have often proved the most useful gifts of all. Mrs. Beeton's competitors have paid her the compliment of imitation and adaption up to, and sometimes beyond, the limits that the law allows, but her work stands to-day, as of old, without a rival. Press and public alike proclaim its merits, and even the writers of romances of domestic life have recorded how it constantly rescues young housekeepers from perplexity and woe.

Sir Arthur Conan Doyle, in his great study of married life, entitled "A Duet, with an Occasional Chorus," makes his heroine say—"Mrs. Beeton must have been the finest housekeeper in the world. Therefore, Mr. Beeton must have been the happiest and most comfortable man"; and his hero concludes that Mrs. Beeton's book "has more wisdom to the square inch than any work of man"—a wonderful testimonial when one remembers that the book thus praised contains more than 80,000 square inches of closely-packed information.

The great reputation of Mrs. Beeton's Cookery Books was not attained solely by the merits of the first issues. The books have been tried and tested, and not found wanting, by generations of successful housewives. Mrs. Beeton brought to their origin such ability, method, and conscientious care that with the exception of corrections demanded by changing prices, processes, and materials, her work stands practically unaltered to the present day. While little has been taken away, very much has been added. The changing years brought extra information, new features and increased size. The world of late has travelled at electric speed, and the far-reaching changes of time have touched household affairs from almost every standpoint.

In cookery, for example, where the growth of recipes is most noticeable, many causes have contributed to change. We have relinquished almost entirely the old British prejudices against things foreign, and adopted, in great measure, those French methods which established a bond of union among good cooks all the world over, long before *l'entente cordiale* became a recognised newspaper phrase. Increased habits of travel have taught us the favourite dishes of other countries, while improved means of transport have brought to our doors fresh food supplies from all quarters of the earth. Cookery schools and classes have also educated many mistresses to the possibilities of the art, and encouraged them to insist on more variety and delicacy in their daily fare than the plain cook of old was wont to furnish. In short, every tendency of modern life, with greater wealth possibly—greater luxury certainly—is towards a tremendous enlargement of everyday cookery. In the present issue is given all information necessary to meet present-day demands in this respect.

Years ago, Mrs. Beeton and her Publishers felt the demand for, and the necessity of producing, Cookery Books that would meet the requirements of smaller households than those in which such a very comprehensive volume as MRS. BEETON'S HOUSEHOLD MANAGEMENT is a necessity; consequently they published the present volume (MRS. BEETON'S EVERY-DAY COOKERY), MRS. BEETON'S FAMILY COOKERY, MRS. BEETON'S ALL ABOUT COOKERY, and MRS. BEETON'S SHILLING COOKERY, confident that the public would find them the best of their kind, and in them a fund of information—more, indeed, than is to be found in any other work on cookery of comparative size and price. That such confidence has been justified is proved by the welcome and popularity that have been accorded these books.

Amongst the principal features of this new issue of MRS. BEETON'S EVERY-DAY COOKERY are the following:—

COOKERY.—All the old cookery recipes have been carefully re-tested and prices and details altered wherever necessary. Hundreds of new recipes are given, contributed by some of the most famous chefs and teachers of the art that the world contains.

CARVING.—Our ancestors held a practical knowledge of this art indispensable to the education of every gentleman. We moderns also realise how much a really good carver can do towards diminishing waste, distributing choice portions equally, and maintaining the sightly appearance of a joint. The art has been thoroughly dealt with and very fully illustrated by a unique series of photographs of the methods of the best professional carvers.

TRUSSING.—This, a frequent difficulty in small households, has been carefully explained and illustrated by numerous photographs, showing the methods of the best professionals.

PRICES.—The cost of the recipes and the prices of articles mentioned in this book have been most carefully, minutely, and diligently averaged from lists compiled from the most reliable authorities all over the kingdom. The task of estimating these prices has been among the most difficult and perplexing problems encountered in revising this work. Some provisions fluctuate greatly in price from day to day, whilst a very great difference indeed exists between the cost of purchases made in town or country, for cash or for credit, by mistress or by maid, selected personally or as allotted to you to suit the convenience of a tradesman. After a most minute consideration of the factors involved, we believe the costs given in our recipes should hardly ever be exceeded, whilst the housewife who gives the trouble needed to buy in the most advantageous manner, will often be able to effect a very considerable saving on the prices quoted.

VEGETARIAN COOKERY, which is so strongly believed in and practised by many thousands, has been carefully dealt with, and recipes for all kinds of dishes are included.

CHAFING DISH AND CASSEROLE COOKERY, now so popular with cooks and at picnics, and indispensable in flat life and for all amateur cookery and impromptu meals, necessitates many new recipes.

COLONIAL AND FOREIGN COOKERY.—This branch has received particular attention. Australian, American, Canadian, South African, German, Italian, and all foreign cookeries, have been treated of, and included amongst the recipes are all the most popular and typical dishes of the Continental nations and the Colonists, so that Britons living under other skies may learn how to combine the dishes of their adopted country with those of the Motherland. We at home may also gain variety in our own menus, and learn how to give complimentary and characteristic repasts when welcoming guests from abroad.

APPEARANCE.—The book has been re-composed throughout from a special fount of new type, of size and clearness to suit modern requirements, printed on the best English paper, and strongly and artistically bound in cloth, full gilt.

ILLUSTRATIONS.—The book has been copiously illustrated in the most useful manner. Hundreds of photographic reproductions of actual dishes, processes, and materials have been included. No expense, however great, has been spared in obtaining the best possible

results. The numerous coloured plates have been faithfully reproduced from nature, and printed in fourteen colours in the highest style of lithographic art.

It would be out of place in a preface to allude to all the many features of our new issue. For details, and also because it is easy in a book of this size to look for information in the wrong place, we would ask our readers to make use of the very comprehensive analytical index and tables of contents. Careful attention should also be given to the Note on page 140.

MRS. BEETON'S EVERY-DAY COOKERY, as it now stands, contains one-third, or 200 pages, more than the previous edition, and is offered at the same price. The Publishers hope that this new and enlarged issue will meet with the same hearty welcome that its old and well-tried predecessors have always enjoyed.

# INTRODUCTION TO COOKERY.

**Cookery and the Artificial Preparation of Food** has one chief object, i.e., to assist in the wonderful series of changes known as digestion and assimilation. A secondary aim is to render certain foods, noxious in their natural state, fit for human consumption. The potato and manioc are poisonous when gathered, but rendered harmless by the cook. Many declare that the art of cookery, as now understood, only results in the persistent overtaxing, instead of lightening the labours of, the digestive organs. But let us imagine what it would mean to go back to pre-cooking days, or even return to the coarse abundance of our nearer forefathers; and all will agree that the properly trained cook is more friend than foe.

**Excellence in the Art of Cookery**, as in all other things, is only acquired by experience and practice. In proportion, therefore, to the opportunities which a cook has had of these, so will be his excellence in the art.

**The Art of Cookery.**—Within the last few years cookery has made great strides. The cook has turned philosopher, and loves—if not the process of reasoning—at least to be told other people's "reasons why" for the operations of the kitchen. Chemistry is a recent science, and is now in an active state of growth. Every day something is being added to our store of physiological knowledge. The science of food cannot advance a step but by the help of one of these. Formerly the art of cookery had little enough to do with either, and flourished long before chemistry and physiology in their modern acceptation were known.

Science applied to agriculture has enabled us to support a larger population in greater comfort; science applied to food and cookery will enable us to do this and more. We can confidently look forward to the time when in the chemist's laboratory the transformation of nature's laboratory shall be imitated for the feeding of our starving millions. That goal is a very long way off, and we trace out only the first steps of the road towards it. But, as we said at the outset, good cookery must always mean the successful doing or easing in the kitchen of Nature's work.

**Everyday Science.**—It is curious that everyone knows the reason for some processes in cookery, while for other methods, equally common, no reason is assigned. It is safe to assert that supporting or condemning all such processes there is scientific fact, and if every

intelligent cook would try to find out the reason for what is done, our knowledge would soon emerge from its present chaotic condition.

**Reasons for Cooking.**—Food is prepared and cooked for six reasons : (1) To render mastication easy ; (2) to facilitate and hasten digestion ; (3) to convert certain naturally hurtful substances into nutritious foods ; (4) to eliminate harmful foreign elements evolved in food (e.g., the tinea of tapeworm in beef and mutton ; trichinae in pork ; the ptomaines resulting from tissue waste) ; (5) to combine the right foods in proper proportions for the needs of the body ; (6) to make it agreeable to the palate and pleasing to the eye.

It may be said that the last "reason" is in flat contradiction to number two ; that is only apparently so. Apart from the purely æsthetic value of an agreeable meal, and a well-spread table, there remain many solid arguments for reason number six. "The eye does half the eating." The street boy who flattens his nose against the pastrycook's window-pane, while his mouth waters at the sight of the good things within ; the animal, which, before it is killed, is shown food, in order that it may produce pepsine ; the starving man whose pangs are even sharper when he smells someone else's good dinner ; all are so many witnesses that the sight and smell of food cause the digestive juices to flow more abundantly.

Pleasant flavours are a necessity of diet. No man could be nourished on tasteless food, though arranged on the most approved scientific basis. No man can live healthily on a monotonous diet, though there may be nothing wanting from the point of view of chemical analysis. The health of the inmates of public institutions has over and over again shown noticeable improvement by reason of some change in the dietary, not implying greater expenditure, nor greater nourishment, nor even alterations of constituents.

Mastication acts mechanically in subdividing food, and so exposing a greater surface to the action of the digestive juices with which it afterwards comes in contact. It acts chemically by reason of the digestive power of saliva on starch. Among animals there are some grammivora that spend a large part of their time in chewing their food, the flow of saliva being very profuse ; there are others, chiefly carnivora, that bolt food whole, and afterwards digest at leisure. Prepared food is more or less divided, so that to some extent mastication is superseded. For the rest, in the kitchen starch is hydrated, fibre softened or made brittle, dough vesiculated, albumen coagulated, and indigestible matter removed.

Anyone may perceive how impossible it would be to masticate a mouthful of flour, and how raw meat would clog the teeth. We should fare badly if all the grinding and subdividing of food had to be accomplished by human teeth.

**Action of Heat.**—The most important results of cookery are to be ascribed to the action of heat upon the various constituents of our food. Many foods that we now eat would become useless to mankind if we had to eat them raw. Cooking may not always alter the chemical constitution of a food, but even then it may entirely change its practical value to mankind. As a matter of fact, however, heat does alter the chemical nature of a great many foods to a considerable

extent. Still, even if the change may be nothing that chemical analysis can detect, yet it is perceptible to everyone who eats a dinner.

There is no greater mistake than to suppose that the chemical analysis of a food tells us its value. Flesh and bones, and fat and heat can be, by some warm-blooded animals, obtained from a diet of grass or woody fibre, but we should starve in the midst of such plenty.

Many of the changes wrought by heat are easily explained. Whether albumen is barely coagulated or is hard and horny, whether fibre is shrivelled or swelled, whether gelatine is dry and brittle or dissolved, it does not take a scientific head to discover. But science tells us why these things are, and so enables us to bring our food readily into whatever state we will.

Given certain food, one cook so manipulates it that the consumer is well nourished and pleased; another cook leaves him hungry and discontented.

**Combination of Foods.**—In preparing food we must remember also to combine all necessary foods in a right proportion. Some foods are deficient in one respect, some superabundant in another: a little addition here and there helps digestion and supplies the body with what it needs. All cooks do this in obedience to the natural promptings of the appetite. To rice, rich in starch, they add butter and cream; with peas, they serve fat bacon; salt-fish has less nourishment than its egg sauce; beef steak is balanced by boiled potatoes. But the customs of the kitchen often err, and we have much to learn that our artificially stimulated appetites fail to teach.

Not only is the deficient supplied, but the indigestible is removed. Bran from flour, paring from potatoes, cellulose from vegetables, go to feed animals whose digestions are stronger than ours, and who utilise our discarded food to produce other in a form more fitted to our powers.

Another service that cookery does is to economise our food by heating it. Part of what we eat is used as fuel or heat-giving food—is burnt or oxidised, to keep the heat of the body at a certain point. Wherever we live or whatever we do, as long as we are in health, our body temperature is always 98° Fahr. neither more nor less. When we take cold food, some of the heat of the body has to be used to heat it, for the same reason that when we put fresh coals on the fire the temperature of the room is lowered for a time. So we take our food warm and use coals to do what our food must otherwise do. There are burners that give a very brilliant light with little gas, because the spare heat of the flame is used to heat the gas that is presently to be burnt. We warm our food on precisely the same principle. Very hot food is always unwholesome, but warm food always goes further and is more nourishing than cold.

**Amount of Food.**—A day's rations for a healthy man of average size, doing moderate work, has been reckoned as follows:—

1. Water	..	..	..	4½ oz. avoirdupois.
2. Albuminoids	..	..	..	3
3. Fats, starch, sugar, etc.	..	..	..	14
4. Salts	..	..	..	1
				<hr/>
				22½ oz.

For a woman, also working, the rations may be somewhat smaller, the proportions being the same, but the total about 3 oz. less.

This seems a small allowance, but when we remember that it is reckoned as dry food, and that food as we get it is always moist, generally containing rather more than half its weight of water, it appears that the food altogether should weigh about 40 oz.

The quantity required varies, however, very much within the limits of health. Every man requires more food if he works hard, and less if he has no work to do. Even doing the same work no two men will eat exactly the same, and it is only possible to calculate by taking an average of a large number of eaters. Generally speaking, more food is required in cold weather and cold climates than in hot. But it is necessary that all these four classes of elements should be represented in our daily food, and in something like the above proportion. If we have too little of any one class, we are sure to be ill, and if one class were to be quite left out we should die, even though we have plenty of other foods.

By whatever name we call our beverages, the chief constituent of them is water; and were we given but one food we could exist longer on water alone than upon any other, except milk. In every food, even when artificially dried, there is a percentage of water, and taking foods one with another there is about half water. But the amount varies; in lettuce, 96 per cent. is water; in onions, 91; in lean meat 75; in wheat, 14. Artificially dried substances are ready to take up water from the atmosphere, a fact of practical interest to the housewife, who will remember that oatmeal, maize-meal, biscuits, and the like, soon become flabby and moist if they are left in the open air. It is generally agreed that animals thrive better on moist food than on dry food with water.

**Carbonates and Salts** include chloride of sodium, or common salt, as well as potash, phosphates of lime, and iron. Common salt is a necessary food, but the fact is that many persons nowadays get too much of it in the form of salt fish and flesh. It is the only mineral habitually added to food as such. Potash salts we find in all fresh fruits and vegetables. Probably no defect in diet is more common than a want of these, especially in our large towns. Lime is necessary for the building up of bones and teeth. We look for it in milk for the young, and in whole grains; and we know that it has been missing when we see weak and distorted limbs and broken teeth. Iron is generally thought of as a physic and not as a food. It is, however, a necessary constituent of the blood, and is chiefly derived in an organised form from fresh vegetables. It is also largely present in many natural tonic waters.

**Starch or Floury Foods** are the cheapest and most abundant of all, so that if people have enough of any food they are likely to have enough of these. Over-fed persons are an exception to this rule, for too small a proportion of their diet is starchy. Bread, potatoes, rice, barley, and all the floury foods contain more starch than anything else, and cornflour, arrowroot, sago, and tapioca are nearly pure starches. There is much starch, too, in beans, peas, and lentils, though they are generally spoken of as albuminoids, or flesh-forming foods, because of the very large amount of legumin that they contain. There is no starch in milk,

but there is sugar, which replaces it. An infant can make no use of starchy food, having no power to digest it. Heated to  $200^{\circ}$  or  $400^{\circ}$ , starch becomes dextrine. The crust of a loaf, biscuits, and baked flour all show dextrine.

Sugar and treacle are good foods, and substitutes for starch. They are, however, apt to produce acidity in grown-up persons if used too freely, though children can and do eat large quantities without inconvenience.

The fats, starches, and sugars are called heat-producers, because they are oxidized or burnt in the body to keep up the temperature to its proper degree. From the starches and sugars fat is deposited, if more is consumed than is required to maintain the heat of the body; therefore, the way to get thin is to eat little or none of these, or, better still, to take plenty of exercise and let them become completely oxidized.

**Fat.**—Fat, whether it is in the form of butter, cream, dripping, meat, bacon, oil, or anything else, is necessary for food, and many persons suffer in health from want of it, especially among the poor, who cannot afford the dearer fats, or do not know the cheaper, and among the sickly, who cannot—or fancy they cannot—digest fat in any form. If it can be digested, one fat is as good a food as another. Cod-liver oil and cream are the easiest to digest. Fats that are greatly heated decompose, and are always difficult of digestion, which is the reason why fried food often disagrees. Many persons, who cannot eat a lump of fat with meat hot or cold, can eat buttered toast, suet pudding, or lightly fried bacon, or fat in one of the many forms in which it is served.

Fat and starch can replace one another to some extent, but there must be some fat, and it is better in this climate to have some starchy or floury foods. In the coldest countries plants will not grow, and so starch is unknown.

**Albuminoids** is a term that covers albumen and the food substances which serve the same purpose as albumen. Sometimes they are spoken of as flesh formers, or as nitrogenous foods, because they all contain nitrogen, and neither fats, starches, nor sugars do. Nothing that lives and grows is without nitrogen, and so we find it in large or small amounts in all plants as well as all animals. Our supplies of albuminoids, or flesh-formers, are obtained from lean meat, fish, poultry, game, as milk curd or cheese, eggs, gluten in flour, fibrine in oats, and in beans, peas, and lentils. Albumen is found in many other foods besides eggs. The blood of many animals contains it, and we have presently to speak of albumen in meat. In most vegetable juices and in many seeds and nuts we find it also.

**Fibrine** is also both animal and vegetable. From meat, wheat, and other corn grains we obtain our daily supply. Casein is an albuminoid that we find in the curd of milk, and in the pulses, beans, peas, and lentils. Vegetable casein is sometimes called legumin, but it was given that name before it was known to be practically the same as animal casein in milk. In China, cheese is made of curdled vegetable casein. Gelatine and some substances nearly like it are known as gelatinoids, and they can replace albumen in part, though not altogether.

## METHODS OF COOKERY.

**Six Methods of Cookery** are commonly spoken of, viz.—1. Broiling ; 2. Roasting ; 3. Baking ; 4. Boiling ; 5. Stewing ; 6. Frying.

**Broiling.**—The rules for broiling remain the same always. A hot fire at first, with a hot gridiron well greased. Frequent turning. No holes made in the surface, nor cuts to see if the meat is cooked.

The meat must be turned frequently, so that it may be heated and the albumen may coagulate all over and not merely on one side. Tongs are sold to turn it over with, because they cannot be used to stick into the meat and make holes for the juice to run out ; but a knife or spoon or a fork run into the fat answers just as well in the hands of a cook who knows the reason why a blunt instrument is recommended. Some few broiled things should not be turned ; a mushroom, for instance, is broiled stalk upwards. The inside of a split fish should first go to the fire, and afterwards the skin. Paper is wrapped round salmon and other fresh-water fish.

It is not an economical way of cooking, for, though quickly done, it takes a great deal of fuel to make a good broiling fire. The meat loses weight more than in most ways of cooking. And it is only suited for tender, juicy meat from the best joints.

**Roasting.**—This is the favourite national method of cookery. The immense stone hearths on which huge logs flared up an open chimney were just adapted for this style of cookery, and the open coal fires, in almost general use until the middle of the 19th century, were almost as prodigal of fuel. To roast before the fire could have become a national custom only where fuel was cheap. We now roast in the oven more often than before the fire ; but even so it is not an economical way of cooking, because of the much greater amount of fuel necessary to heat the oven than to boil a saucepan. The waste in roasting is also great, from a quarter to a third of the total weight of a joint is lost in the process ; only a small part of the loss being recoverable in gravy or dripping. Furthermore, it is a method only suited to the tender parts of meat, and does not answer at all for sinewy and gelatinous meat, which is the least expensive. Against this has to be set the fact that roast meat is agreeable to most persons' tastes, and is generally considered digestible. As in broiling, the object is to harden the surface albumen, and so to imprison the juices of the meat. This can only be done by making it very hot for a short time : the heat must afterwards be lessened by drawing the joint from the fire, or by cooling the oven. The larger the joint the smaller the fire, lest it should be burnt outside before it is cooked enough ; but it should always be hot **FIRST**, and cool afterwards. In a perfectly roasted joint, the outside albumen should be thoroughly hardened, but inside it should only reach the moderate heat that just coagulates the albumen and swells and softens the fibrine ; cooked more than this, the fibre becomes hard, and separates into bundles that offer an active resistance to teeth and digestive organs. It can scarcely happen to a large joint, but often does to a small one, and this is the reason why a small joint is often dry and hard. It is a sign of good meat and of good roasting to lose little in weight. Generally speaking, the loss is more before the fire than in the oven.

**Baking** naturally comes next to roasting; the two often do duty for one another. As in all other methods of cookery, the surrounding air may be many degrees hotter than boiling water, but the food is not appreciably hotter until it has lost water by evaporation, after which it may readily burn. The hot air of the oven is greedy of water, and evaporation is great, so that ordinary baking (i.e., just to shut the food into a hot-air chamber) is not suited for anything that needs moist heat. But baking often means to put some dry substance in a dish of water, and to shut it in the air chamber, and under such circumstances it amounts to much the same as boiling, with surface heat added.

To test the heat of an oven, special thermometers are made. For meat the temperature should be about 300° Fahr.; for bread, 360°, afterwards lowered; for pastry, about the same, the richest pastry requiring the hottest oven. The heat may be tested with a sheet of writing-paper, which curls up brown in a pastry oven, or with flour, which takes every shade from coffee colour to black, when sprinkled on the floor of the oven. Experienced cooks test very accurately with the hand.

The hot air of the oven sometimes imparts disagreeable flavours to the things cooked; but this can be avoided by keeping the oven scrupulously clean and having it well ventilated.

**Boiling** is generally thought to be the easiest method of cooking. Certainly nothing could be less troublesome than the simple process of boiling or stewing meat; and yet beef tough and flavourless, or a leg of mutton boiled to rags, is the rule rather than the exception. The success of this culinary method depends entirely upon the liquid in which the material is immersed or partially immersed being kept at a suitable temperature.

The temperature of boiling water at sea-level is 212° Fahr. and 100° Cent. In a mine, where the level is considerably lower than that of the sea, the water reaches a higher temperature before boiling, because the air, being more dense, offers greater resistance to it; consequently the water must acquire more heat and force to overcome this resistance before it can boil. Conversely, as we ascend a mountain we leave behind the more dense part of the atmosphere, and the column of air, reaching from the earth into space, becomes less in height, and so exerts less pressure on the surface of the water, which consequently boils at a lower temperature. But, whether the water boils gently or is in a state of violent ebullition, the temperature remains the same, and anything immersed in the water will cook at an equal rate, although there will be a wide difference between the tender, juicy joint cooked at simmering point and the tough, stringy meat that has been quickly boiled.

In order to point out the right heat, we must first know which of several substances we have to deal with, and how each one of them is acted upon by heat.

The simplest thing to boil is an egg. The white is little more than albumen and water; the yolk contains albumen and water with some oil and some sulphur, but the albumen is of a rather different character.

We have seen that albumen begins to coagulate at 145°, sets into a jelly at 160°, and at a higher temperature quickly becomes tough

and hard. Eggs should, therefore, be gently boiled. Some recommend the plan of putting the egg into a saucepan of boiling water, taking the pan off the fire and letting it cook so. Others prefer to put the egg in cold water and to take it off directly it boils.

In boiling lean meat we must deal with albumen again. Just as the white of an egg hardens by boiling, so does the albumen in a leg of mutton. Plunge it into boiling water, and on the surface an impervious crust is formed that prevents the juices of the meat from escaping. Once that is done, the boiling should cease, for the toughening of the albumen throughout the joint is as undesirable as the escape of the juices. Boiled meat intended for table should never be put into cold water: firstly, because the surface albumen is dissolved, and, afterwards, when the water boils, hardens and rises as scum; also, secondly, because the salts and extractives are dissolved, leaving the meat dry and flavourless. Cold water first and fast boiling afterwards (the common way of cooking) is the worst possible way, for the meat is not only dry, but hard. If the meat is to be boiled for soup, the object is to extract all the juice, the soluble albumen, and as much gelatine as may be, so that it should be cut up to multiply surfaces, put into cold water, and heated slowly to boiling point. To attain contrary ends, contrary means must be used.

The exceptions to this rule, if any, for boiling meat are in the case of sinewy and tendinous meat where gelatine is abundant. To make it soft and eatable, long, continued boiling is necessary. Calf's head and feet, veal tendons, cow heel, and tripe are often put into cold water.

**Flour Foods**, such as macaroni, rice, sago, cornflour, and flour puddings, should be kept all the time in boiling water, in order to burst the starch granules. The mechanical action of fast bubbling water is often useful, partly in preventing grains of rice, etc., from settling to the bottom of the saucepan.

**Boiled Fish.**—In the case of fish, the water should be kept below bubbling point, otherwise it may crack the skin and so spoil the appearance of the fish; and, on the other hand, if the fish is put into cold water, it, like meat, has much of its goodness and flavour extracted. So a compromise has to be made here, and the best plan is to put it into water as hot as the skin will bear (which varies with each fish), and to put salt with the water, or lemon-juice, or vinegar, because albumen sooner coagulates if acid is added to it. Vinegar with a poached egg answers the same purpose. Vegetables, with few exceptions, should be put into boiling water.

**Stewing** almost invariably requires a heat much below that of boiling water:  $165^{\circ}$  is about stewing point. Whatever is stewed, parts with much of its goodness to the surrounding liquor, which should not, therefore, be wasted. Less liquid is used than in boiling. It is a method particularly suitable for all gelatinous meat, such as knuckles, heads and feet, and for all tough, fibrous meat, because long-continued, moderate heat, with moisture, is the best way of bringing gelatine and tough fibre into an eatable condition. It is the cheapest method of cooking for several reasons. Little heat is required, therefore little fuel used. Nothing is wasted; whatever goes into the pot comes out. The cheapest and coarsest meat can be used, and very little attention

is needed while cooking. In order that all the juices may not be extracted from the meat, it is sometimes fried before stewing; this gives it a good colour, and also hardens the surface albumen and prevents the soluble matters from escaping. A stew should not bubble and boil. It should stand by the side of the stove, and should never do more than bubble occasionally and leisurely at one side of a large pan. A jar well tied down and set in a cool oven makes a capital stewing utensil, or a jar set in a saucepan and surrounded by boiling water.

One difficulty is that carrots and turnips when they are old and tough ought to be boiled, and so do not agree with a small piece of stewed meat. Cooked together, one must be spoiled. It is the best plan to boil the vegetables first, and then to use them and their liquor for the stew.

A common mistake is to put in too much liquid. The raw meat supplies some liquid by its own juices, and many do not sufficiently realise that at the moderate heat of stewing there is very little waste by evaporation.

**Frying** has been described as boiling in fat. It is not a correct phrase, because the fat is not boiled, and the thing fried is not always immersed in fat. It is the quickest mode of cooking, because melted fat or oil can be brought to a high temperature, and, by contact with it, the food fried is very quickly and very much heated. All fried food is heated beyond boiling water point on its surface; if the frying is prolonged, the meat is over-heated throughout, so that this method is not fitted for food that should be slowly cooked at a low temperature, such as tough meat.

The point to which fat or oils may be heated varies, some burning much more readily than others. About  $350^{\circ}$  to  $400^{\circ}$  is a suitable temperature; it can be higher; it should sometimes be lower for things that need slow cooking, but it is usually better to begin at a high temperature and lower it afterwards. The temperature is always lowered, by putting in the cold things to be cooked, to a degree that is determined by the relative quantity of fat and food, and by the sort of food.

The temperature can be taken accurately with a thermometer constructed specially for the purpose; it can be taken approximately by several homely devices.

1. Drop in a few drops of water. If the fat bubbles thereupon, it must be hotter than  $212^{\circ}$ ; if it bubbles smartly, it may be taken at over  $300^{\circ}$ .

2. Drop in a piece of bread, and take it out at the end of half a minute. If the bread is crisp, the fat is about  $350^{\circ}$  or more.

3. Parsley that becomes crisp immediately it is dropped in means fat at  $350^{\circ}$  or more.

4. The more violent the bubbling when anything is put in, the hotter the fat.

5. A thin, filmy, blue smoke rises when the fat is fit for frying, and then becomes thicker until the fat is burning, when there is a dense cloud.

6. Fat, unless it has left off bubbling and is quite still, is never hot enough to fry.

These rules are true of all fat, and more or less of all frying. But

there are two ways of frying, known to cooks as **DRY FRYING**, and frying in deep fat; the latter method being also known as "French frying." The former is more common; the latter is more economical, and produces better results.

Deep frying or frying in a saucepan, means that there must be fat enough to cover what is fried, and a pan deep enough to contain it. It is economical, for the fat can be used over and over again, and, if sufficiently hot, does not soak into the food fried, which, consequently, comes out quite dry and without any of the greasy moisture of frying-pan cookery. In the long run, less fat is used than for ordinary dry frying, though, of course, there is a greater outlay to begin with. An iron or steel saucepan must be used, as the heat of the fat melts the solder of a tin pan; it is a good plan to keep one for the purpose. Frying baskets should be used for all delicate frying, so as to do away with the need for much handling, and to lift all the things out at the same moment. Failing a basket, an iron spoon or slice may be used, but not of tin or Britannia metal, as they would melt. Baskets should not be used for fritters, which stick to the wires. As the basket always expands with heat, it should not be a very tight fit for the pan.

**Dry Frying** is so called because of the small amount of fat used, not because of the dryness of what is fried, for things fried this way are very apt to be greasy. Sometimes the frying is so "dry" that only just fat enough is used to prevent the meat from sticking to the pan, just as the bars of a gridiron are greased. The iron pan is heated, and the meat is cooked by heat directly communicated from the hot iron. Such frying, in fact, is an imitation of broiling, and usually an unsuccessful imitation. There should always be at least enough fat to cover the surface of the pan, and it always should be made as hot as possible without burning, before beginning to fry. To put cold fat and cold pan and cold chop on the stove, and let them all heat together, is always a mistake sure to result in a greasy, juiceless chop with burnt fat. **WHATEVER AND HOWEVER YOU FRY, FIRST HEAT THE FAT.**

**Fat for Frying.**—Melted suet or fat can be used for French frying, and mutton is less likely to burn than beef, but either or both together will do. Lard should never be used, for it always leaves an unpleasant flavour and costs more than beef or mutton fat. Oil is to be preferred to, and can, without burning, be made hotter than any fat. Olive oil is often recommended, but it is costly, and much of the oil sold as olive is largely adulterated with cotton-seed oil, which is far cheaper than any fat used as food. Unfortunately, though a great deal is sold, not much is sold under its right name or at a fair price, except to cook-shops or to the vendors of fried fish. Many specially prepared fats are now on the market; they vary greatly. Some are merely beef fat, freed from skin and blood, and melted into cakes; these can be used like suet. Others are solidified cotton-seed oils, purified nut oil, etc. These are sold plain or as blends. Some of them are excellent for frying purposes, and are economical where much frying is required. Animal fats, with the exception of refined lard, burn quicker than vegetable fats. Butter is the soonest spoilt by high temperatures.

To clarify fat or suet for frying, it should be cut up into small

pieces, put into a saucepan with just enough water to prevent burning, heated over a slow fire until the liquid fat is quite clear, and then strained. The pieces strained out are an economical substitute for suet for short cakes, puddings, etc. After using several times, the fat can be purified by pouring it whilst hot into a pan of water and well stirring; the pieces and impurities settle at the bottom of the cake of fat or sink into the water. The fat should be also occasionally strained when cool; if it be strained directly after frying, it will melt any soldered strainer. To fry well the food should be dried. Fish can be lightly coated with flour; vegetables well dried in a cloth. Before dropping into hot fat anything that contains much water, lift the pan off the stove, as the fat is likely to bubble over and catch fire.

Many things that are fried are previously covered with egg and breadcrumbs, or flour and milk, or batter, in order that a crust may be formed round them to keep the juice in and the fat out. The essential thing is to cover them completely and leave no crack.

### HINTS FOR AMATEUR COOKS.

The two most common faults with amateur cooks are not giving sufficient time and attention to the details of preparation, and ignorance of the varying action of heat. It is admitted that the making of soups and sauces is a test of a good cook. Now, both soups and sauces (with a few exceptions, which prove the rule) require very careful preliminary preparation and close attention during cooking. The time devoted to planning, cleaning, chopping, paring or trussing, as the case may be, is not lost. The actual process of cooking is immensely facilitated, and success half assured, if everything has been properly prepared beforehand.

Then, as regards the utilisation of heat—it is essential in boiling and roasting that the temperature should be very high at first, to prevent loss of nutriment, and then be lowered to prevent the meat being scorched and dried. In stewing, however, (and this applies to soup-making), the heat should be moderate and the cooking slow. Frying in most cases should be done in hot fat, so a deep vessel full of oil or fat at a very high temperature should be used. Omelets, pancakes, and a few other preparations only require to be placed in a pan with a little butter, in such cases the fire should be fairly brisk. When using an oven, if the dish requires long cooking, get up a high temperature at first, and then lower it slightly; but pastry requires quick cooking in a fairly brisk oven.

All dishes should be duly flavoured with the necessary condiments during the process of cooking, except in the case of roast meats, when salt should only be applied just before serving. Water is a solvent, so all meat and vegetables should be plunged into fast boiling water, unless the object is to extract flavour for making soups. Dried peas and beans, however, should be put on in cold water, as it is necessary to soften them.

Amateur cooks may prepare dainty breakfasts and suppers if they give their attention to the peculiarities of electric heated stew-pans, or the still more convenient chafing-dish. The dishes prepared in these vessels are generally of the stew or *daube* order. For stews

a fairly large amount of sauce is allowed, and the cooking should be somewhat moderate; for *daubes* very little moisture is allowed, and the pan must be closely covered; apply high temperature, then lower and finish with reduced heat. Gas as well as electric heat and the spirit lamp can be easily regulated as desired.

For outdoor cooking (picnics and camping), the chafing dish is useful, but should be supplemented with a tinplate oil cooking-stove, which generally provides an oven, hot plate, and ring for kettle or stewpan.

For emergencies a good substitute for cream can be made with fresh milk, a little butter and flour.

If milk cannot be procured for tea and coffee, use an egg beaten up to a froth.

If fresh-water fish is caught and has to be cooked, wash thoroughly in clean water; if small, fry; if large, stew with a sauce, in which wine or vinegar and aromatic herbs are used.

### PRESERVATION OF FOOD.

An important consideration is, how food may be best preserved with a view to its being suitably dressed. More waste is often occasioned by the want of judgment, or necessary care in this particular than by any other cause. In the absence of proper places for keeping provisions, a hanging safe, suspended in any airy situation, is the best substitute. A well-ventilated larder, dry and shady, is better for meat and poultry, which require to be kept for some time; and the utmost skill in the culinary art will not compensate for the want of proper attention to this particular. Though it is advisable that animal food should be hung up in the open air till its fibres have lost some degree of their toughness, yet, if it is kept till it loses its natural sweetness, its flavour has become deteriorated, and, as a wholesome comestible, it has lost many qualities conducive to health. As soon, therefore, as the slightest trace of putrescence is detected, it has reached its highest degree of tenderness, and should be dressed immediately. During the sultry summer months, a good deal of meat is either tough or tainted. It should, therefore, be well examined, and if flies have touched it, the part must be cut off, and the remainder well wiped with a clean cloth dipped in warm water and vinegar. In loins of meat, the long pipe which runs in the cavity of the bone should be taken out, as it is apt to taint, as also the kernels of beef. Rumps and aitch-bones of beef should not be purchased when bruised.

All these things ought to enter into the consideration of every household manager; and great care should be taken that nothing is thrown away, or suffered to be wasted in the kitchen, which might, by proper management, be turned to a good account.

The shank bones of mutton, so little esteemed in general, give richness to soups or gravies, if well soaked and bruised before they are added to the boiling liquor.

Roast beef bones or shank-bones of ham make excellent stock for soup.

When the whites of eggs are used for jelly, confectionery, or other

purposes, a pudding or a custard should be made, that the yolks may be used.

All things likely to be wanted should be in readiness: sugars of different sorts; currants washed, picked, and perfectly dry; spices pounded, and kept in very small bottles closely corked, or in canisters, as we have already directed. Not more of these should be purchased at a time than are likely to be used in the course of a month.

Much waste is always prevented by keeping every article in the place best suited to it.

In very cold weather, vegetables touched by the frost should be brought into the kitchen early in the morning and soaked in cold water. Vegetables keep best on a stone floor, if the air be excluded; meat in a cold, dry place, as also salt, sugar, sweetmeats, candles, dried meats, and hams.

Rice, and all sorts of cereals for puddings, should be closely covered to preserve them from insects; but even this will not prevent them from being affected by these destroyers, if they are long and carelessly kept in a damp place.

Pears and grapes should be strung, and hung up in a cold, dry place. Apples should be laid on straw, after being carefully wiped, and should not touch each other. They keep better on wood than on china.

### COST AND ECONOMY.

Two foods may cost the same and weigh the same, and yet one may be far more economical than the other. For one may be very nourishing, containing a kind of food that is not cheaply to be bought, and it may, besides, be such that it takes up water and increases in weight in the cooking. The other is a moist food, and will lose weight before it comes to table, or it may be starchy food, which can always be bought at a low price; or it may contain bone and waste. One very good contrast is afforded by a pound of rumpsteak at fourteenpence, and a pound of beans and lentils at twopence. Both are bought for the sake of flesh-forming, or nitrogenous food. From neither is there actual waste to be cut away. But the broiled meat will not weigh more than 12 oz. when it comes to table, and the pulse will have taken up more than its own weight of water, which costs nothing. We have two pounds of food for twopence against three-quarters of a pound for one and twopence.

This must always be remembered in dealing with all dry foods. One pound of Indian meal weighs, when cooked, three pounds; half a pound of macaroni increases to two pounds. Comparing rice to flour, if both are the same price, flour is cheaper because it is less starchy, and people who reckon such small economies as these are generally ill-fed, needing flesh-formers, which are chiefly to be found in the costlier foods.

As a third example, we may take beefsteak as compared to mutton chops; they are usually about the same price per pound, but there can be no question which is the cheaper of the two, for the beef has no bone and little fat.

### TABLE OF EQUIVALENTS.

Scales and weights for weighing are desirable in all culinary operations, but they are not indispensable; for weights and measures have their equivalents, as the appended tables will show. Failing weights and scales, all ingredients should be measured in cups, spoons, or whatever utensil or vessel may be best suited to the quantity. But whether the ingredients are intended for a cake, pudding, soup, or sauce, something more than exact weight and measure and careful mixing is required. The recipes give precise directions as to application of strong or gentle heat, and whether the vessels are to remain uncovered or otherwise. If these directions be disregarded, and soups and stews are allowed to reduce themselves by evaporation and rapid boiling, it naturally follows that the amount of liquid allowed for the stew is too little, and the quantity of thickening intended for the soup will be found too much. If eggs were of uniform size, and if flour always absorbed the same amount of liquid, it would be possible to state precisely how many eggs or how much milk would sufficiently moisten a given quantity of flour. As matters stand, indecisive terms and directions are occasionally unavoidable; sometimes something must be left to the discretion and common-sense of the worker.

# WORK IN THE KITCHEN.

THE cook is queen of the kitchen ; and if she be clean, neat, orderly, and quick in her work, those who are under her will emulate these good qualities ; upon her the whole responsibility of the kitchen rests, whilst the duty of others is to render her ready and willing assistance.

The cleaning of the kitchen, passages, and kitchen stairs must always be over before breakfast, so that it may not interfere with the other business of the day. Everything should be ready, and the whole house should wear a comfortable aspect.

**The Preparation of Dinner** is the most important part of the cook's work, as she has to see to the dressing and serving of those dishes which her skill and ingenuity have prepared. Whilst these, however, are cooking, she must be busy with her pastry, soups, gravies, entrées, etc. Stock, or what the French call *bouillon*, being the basis of most made dishes, must be always at hand, in conjunction with sweet herbs and spices for seasoning. "A place for everything and everything, in its place," must be the rule, in order that time may not be wasted in looking for things when they are wanted, and that the whole business of cooking may move with the regularity and precision of a well-adjusted machine. All must go on simultaneously. The vegetables and sauces must be ready with the dishes they are to accompany, and the smallest oversight must be avoided in their preparation. It is a good plan, when a dinner of many courses has to be prepared, to write out, and hang in a conspicuous place, two lists of the day's dishes, one of the order in which they must be *served*, with every accessory complete, that nothing may be forgotten, and one of the order in which each should be *cooked*, that nothing may be over or underdone. When the dinner-hour has arrived it is the duty of the cook to dish up such dishes as may, without injury, stand for some time covered on the hot plate or in the hot closet ; but such as are of a more important or delicate kind must be delayed until the order "to serve" is given. Then comes haste ; but there must be no hurry—all must work with method. The cook takes charge of the fish, soups, and poultry ; and the kitchen-maid of the vegetables, sauces, and gravies. These she puts into proper dishes, while the scullery-maid waits on and assists the cook. Every dish must be timed so as to prevent its getting cold, whilst great care should be taken that no more time is lost between the courses than is absolutely necessary, for good serving, hot plates, gravy, and sauces that have not been allowed to get cold and greasy, are vital factors in providing a good dinner. When the dinner has been served, the most important item in the daily work of the cook is at an end. She must, however, every night and morning, look to the contents of her larder, taking care to keep everything sweet and clean, so that no disagreeable smells may arise from the neglect of this precaution.

**Importance of Cooking.**—A good cook has every reason to magnify the office she holds, for her work influences not only the comfort but also the health of the whole household, and mindful of this responsibility, she will take care to study both the needs and tastes of those whose food she prepares. With invalids and people in delicate health, this care is of the utmost importance.

Make a rule to send everything up to table really well cooked. Do not regard this as an impossibility, for it can be done.

Accidents, of course, will happen (though but rarely with proper precautions); fires will not always burn, nor ovens bake, as they should; but if the joint, or whatever it may be, cannot be done to time, do not send it up raw, but obtain a little grace. If anything is really spoilt (as even with care it sometimes is), confess the fact, and do not serve a dish calculated to take away people's appetites.

**Cleanliness.**—A dirty kitchen is a disgrace to all concerned. Good cookery cannot exist without absolute cleanliness. It takes no longer to keep a kitchen clean and orderly than untidy and dirty, for the time that is spent in keeping it in good order is saved when culinary operations are going on and everything is clean and in its place. Personal cleanliness is most necessary, particularly with regard to the hands.

**Dress.**—When at your work dress suitably; wear short dresses, well-fitting boots, and large aprons with bibs, and you will be comfortable, as you never can be with long dresses, small aprons, and slipshod shoes.

**Neatness** should be studied by all engaged in domestic work. Clear as you go; do not allow a host of basins, spoons, plates, etc., to accumulate on the dresser or tables while preparing the dinner. It is as easy to put a thing in its place when it is done with as to continually remove it to find room for fresh requisites. For instance, after making a pudding, the flour tub, paste-board and rolling pin should be put away, and any basins, spoons, etc., taken to the scullery, neatly packed up near the sink, to be washed when the proper time arrives.

**Economy.**—Never waste or throw away anything that can be turned to account. In warm weather any gravies or soups that have been left from the preceding day should be boiled up and poured into clean pans. Go early every morning to your larder (which, like the kitchen, ought to be kept perfectly clean and neat), and while changing plates, looking to your bread-pan (which should always be emptied and wiped out every morning), take notice if there is anything not likely to keep. It is better if there is a spare cupboard in the kitchen to keep any baked pastry there, and thus preserve its crispness.

**Kitchen Supplies.**—Do not let your stock of pepper, salt, spices, seasonings, herbs, etc., dwindle so low that there is danger of finding yourself minus some important ingredient, the lack of which may cause much confusion and annoyance. If you live in the country, have your vegetables gathered from the garden at an early hour, so that there is ample time to get rid of caterpillars, etc., an easy task if the greens are allowed to soak in salt and water an hour or two.

**Punctuality** is an indispensable quality in a cook. When there is a large dinner to prepare get all you can done the day before or

early on the morning of the day. This will enable you, with good management, to send up your dinner in good time and style.

**Cleansing of Cooking Utensils.**—This is a most important duty, and one that should never be neglected or put off from one day to another. When you have washed your saucepans, fish-kettle, etc., stand them before the fire for a few minutes to get thoroughly dry inside before putting away. They should then be put in a dry place in order to escape rust. Put some water into them directly they are done with if they have to stand some time before they are washed. Soups or gravies should never be allowed to stand all night in saucepans. Frying pans should be cleaned (if black inside) with a crust of bread, and washed with hot water and soda. It is a good plan to have a knife kept specially for peeling onions, but where this is not done the one used should be thoroughly cleaned. If the tin has worn off copper utensils, have it immediately replaced. Clean your coppers with turpentine and fine brick dust, or waste lemon skins and sand, rubbed on with flannel, and polish them with a leather and a little dry brick dust. Clean tins with soap and whiting, rubbing on with a soft rag or flannel, wiping them with a dry cloth, and lastly with a soft, dry cloth or leather.

**Washing of Dishes, Etc.**—Do not be afraid of hot water in washing up dishes and dirty cooking utensils; as these are essentially greasy, luke-warm water cannot possibly have the effect of cleansing them thoroughly, and soda in the water is a great saving of time as is also a fresh supply of hot water. After washing the plates and dishes wash out your dish tubs with a little soap, soda and water, and scrub them often; wash the dish-cloth also and wring it out, and after wiping out the tubs stand them to dry. Pudding cloths and jelly bags should have immediate attention after being used; the former should be well washed, scalded, and hung up to dry. Let them be perfectly aired before being put away. No soda should be used in washing pudding cloths.

**The Sink.**—Do not throw anything but water down the sink, as the pipe is liable to get choked. At least three times a week pour a pailful of boiling soda water down every trap, for this prevents accumulation of fat, which stops up sink pipes more than anything else. Bad smells (often caused by a stoppage in the sink pipes) are most disagreeable and dangerous.

# MARKETING.

## PRICES AND SEASONS OF MEAT, POULTRY, FISH, ETC.

THAT these lists may be of real service, neither time nor care has been spared to render them as complete and reliable as possible. They show not only the prices and seasons of all provisions, but when they can be bought at their cheapest and best, points to be studied by all household managers, particularly those who have to provide for large families.

With regard to fish, meat, poultry, game, dairy produce, vegetables, and fruit, the prices have been obtained from the principal provincial towns as well as from different parts of London, so as to arrive at the average cost.

In the case of tinned provisions, groceries, etc., they are quoted from various sources, and at the present reduced scale of charges generally adopted by tradesmen and stores throughout the kingdom.

## MEAT.

Except in the case of early lamb, which is always expensive, the price of meat varies but little with the season. Lamb and veal are in full season during spring and summer, and are generally preferred in hot weather to beef and mutton, which are not then considered so good.

Although it is difficult to equal, and impossible to surpass, the best British grown beef and mutton, we have, as a nation, immensely benefited by the enormous and ever-increasing imports of meat from America, Australia, and New Zealand. The large supplies of beef which reach us from the river La Plata and elsewhere have undoubtedly kept down prices, so that meat is no longer a luxury except among the poor. Much of the beef from South and North America reaches us alive, but it is not of this phase of the trade that we need speak. The great development arose when it was found that cattle and sheep could be slaughtered and dressed on the other side of the ocean, then packed close together in freezing chambers on board ship, and so imported here. Actual freezing, many contend, injures the quality of meat, and certainly if the meat is heated carelessly on arrival it quickly deteriorates. As a matter of fact, however, most meat is now "chilled"—that is, packed in chambers in which the air is made cold, but is not suffered to reach freezing point. Moreover, it is packed in loose-woven cloth wrappers, and on arrival in England is removed to cold

storage chambers, and gradually exposed to higher temperature before it is put on the market. When carefully treated, mutton and lamb are none the worse for the long chilly voyage. Beef, however, is apt to lose somewhat of its natural firmness and elasticity; it therefore requires to be carefully stored, and, when cooked, should be subjected for some minutes to very high temperature, which should be subsequently lowered, otherwise the albuminous constituents will soon drain out in the gravy, leaving the mass of meat stringy, tasteless, and not very nourishing. Imported killed meat cannot safely be kept long except in winter, unless hung in a refrigerator. The housewife who takes special pride in her roast beef, had better buy English joints, using the imported meat for stews and "made-dishes."

### POULTRY AND GAME.

The cost of poultry varies considerably, being affected both by the season of the year and the district in which it is purchased. It is well to remember that poultry almost invariably rises in price at Christmas, and also tends to be expensive when no game is on the market. These considerations borne in mind, the table that is given will prove a reliable average of prices.

Game varies very much in price, being generally very expensive on the first day or two of the season, whilst, on the other hand, anyone watching the market may sometimes buy it more cheaply than ordinary poultry at any subsequent period of the season.

In this variable climate no hard and fast rule can be laid down for the keeping of game before it is cooked. In all cases it requires hanging; but while in winter it is safe to buy birds that have been shot some time, in damp and warm weather no such risk should be run.

### FISH.

In purchasing fish, it should be remembered that it is generally best when in full season, and the list will be found useful in ascertaining when it is best and cheapest. To give a satisfactory table of the prices of fish is a difficult and almost impossible task. Many circumstances conspire to make the variations in price greater than in the case of any other food commodity. The fact that fish is a most perishable article of food and is usually caught while travelling in shoals, results in alternate scarcity and over-supply of a particular kind of fish, whilst the question whether the purchaser resides near or far away from a seaside or big distributing town, affects the situation. All we have been able to do is to record fluctuations in prices over a period of years, from which the housewife must form her own judgment. In conclusion, we would say that in no branch of marketing is personal attention better repaid, both in quality and economy, than in the buying of fish. The lady who markets herself will select the fish that on the day of her visit is plentiful, consequently cheapest, and often best.

### VEGETABLES.

Vegetables and fruits vary greatly in price according to the abundance or scarcity of the supplies. Our table gives the average prices which would have to be paid at the various seasons of an average year.

**DAIRY PRODUCE, HAM, BACON, ETC.**

Dairy produce varies somewhat in price in accordance with locality, but the differences are not so great of late years, the increased railway facilities having brought about a greater uniformity of price.

The cheaper parts of bacon vary from 5*d.* to 9*d.* per lb., but by reason of the quantity of bone contained in them they are not in reality more economical than the best.

**DRIED FRUITS AND VEGETABLES.**

We have long known such dried fruits as raisins and currants, prunes, dates and figs, and pippins. These useful pudding and dessert fruits are now more abundant than ever, and as a rule prices are moderate. Within recent years other fruits have been added to the list, and we now have dried apple rings, apricots, etc. These apple rings and apricots reach us chiefly from America and Australia, where they are dried in large quantities in specially constructed ovens. They are used for pies and tarts, or may be served stewed.

These dried vegetables are chiefly to be recommended for use on board ship, for travellers, or for the store cupboards of housewives. Unquestionably fresh vegetables are to be preferred, whenever obtainable.

**PROVISIONS, Etc.**

For groceries, tinned provisions, jams, etc., the prices quoted will be found a fair average of those charged by the principal provision dealers and grocers in London and the chief provincial towns. Tinned meat, soup, fish, vegetables, etc., occupy an important place in our food supply, being available at any time, and handy substitutes when fresh provisions are difficult to procure. In the Recipe Section full directions for their use are given.

Meat, fowl, and fish imported from abroad in tins are usually excellent. Some precaution should be taken. The food remains wholesome so long as the tins remain air-tight, but if air gets in, decomposition soon follows. It is therefore necessary to see that the tins are perfect and air-tight. Tins should not be bulged; the tops and bottoms should be concave, and have the appearance of depressions. They should be free from rust. Bulged and rusty tins should be rejected, and so ought those which emit a rush of air on being opened. As soon as a tin is opened the whole contents should be turned out. Fish should be eaten (or at all events cooked) the same day it is opened. This does not apply to sardines and other kinds preserved in oil, although even these had better be placed in glass or earthenware dishes. Tinned vegetables and fruits soon deteriorate when opened if left in the tins.

As a rule, foods preserved in earthenware and glass are better and safer, though rather more expensive, than those sold in tin cans.

Tinned and bottled fruits should be stored in a cool, dry cupboard.

Tinned sardines, bottled anchovies and anchovy paste ought always to be kept in store, as they are useful in preparing many dishes.

# FOOD AND COOKERY.

## SOUPS.

THE valuable dietetic properties of soup have been, and indeed still are, much overlooked in this country. Yet no form of food is more digestible and wholesome, nor does any other method of preparing food afford so many opportunities for utilizing material that would otherwise be wasted.

The richness or quality of a soup depends more upon a proper choice of ingredients, and a proper management of the fire in the combination of those ingredients, than upon the quantity of solid nutritious matter employed; much more upon the art and skill of the cook than upon the sum laid out in the market.

The average cook imagines that the goodness of a soup depends upon the weight of meat she puts into it, and upon the size of the fire over which it is boiled.

**The Basis of all Meat Soups.**—Stock forms the basis of all meat soups and of the principal sauces; but except the rich clear stock used for consommé (or clear soup), it is not necessarily made from fresh meat. In making brown stock from the shin of beef, white stock from the knuckle of veal, or ordinary stock from the bones and the trimmings of meat, poultry, etc., the methods employed for completely extracting from the materials all their nutriment and flavour are the same; the result depends upon the quality and kind of material employed, and the length of time the simmering is continued. Five or six hours will extract from the materials all that is necessary and desirable for stock intended for clear soup; but many more hours of gentle simmering will be necessary to draw from the bones all the goodness they contain.

**There are more than five hundred** different kinds of soup, but they can be broadly divided into a few distinct classes, namely, broths, clear soups, thick soups, and purées; each group may be divided and sub-divided, but it will be more convenient to consider them under this simple classification.

**Broths.**—The unclarified liquor in which chicken, veal, beef, mutton, rabbit, or sheep's head is cooked are included in this class. They are frequently garnished with pearl barley or rice, but they are not thickened.

**Clear Soups.**—The basis of good clear soups is double stock, that is, a good beef stock which has been strengthened with veal to give

it gelatinous substance, and with fowl to improve the flavour. The clear soups include all those which are transparent in appearance, varying in colour from amber to nut-brown. Additions may be made to them as a garniture or decoration, from which they take their distinctive name. Some of the garnitures and flavourings in common use are : vegetables ; "shaped," i.e., cut into various shapes or devices ; dice, or small cubes of cooked game, chicken, meat, and fish ; quenelles of meat, fish, and chicken ; finely shredded vegetables ; various farinaceous preparations, as Italian paste, semolina, rice, sago, and batters.

**Thick Soups.**—The basis of soups of this class may be stock of any kind, white, brown, fish, or vegetable, according to the soup required, or a mixture of white stock and milk for such soups as *Potage à la Royal* and *Potage à la Bonne Femme* ; or all milk, or milk and water for such plain thick soups as cabbage and vegetable soups. Soups of this class are frequently garnished as well as being thickened ; the well-known ox-tail and mock-turtle soups may be given as examples. Thick soups owe their thickening to the addition of arrowroot, corn-flour, rice-flour, flour, or some other farinaceous substance ; rich soups, such as "*Bonne Femme*," are thickened by a *liaison* or combination of yolks of eggs and cream, while a good brown soup like "*Ox Tail*" would be thickened with butter and flour, previously either cooked or well kneaded together. In making hare soup the blood of the animal is frequently used ; it should be strained into the soup a few minutes before serving. Thick soups should have the same consistency as good single cream, i.e., cream obtained from milk that has stood 12 hours.

**Purées.**—This class of soups differs from other thick soups in being thickened by the ingredients of which they are made, such as *Bisque* of Lobster, purées of peas, beans, and lentils ; in all cases the substances comprising the soup are rubbed through a sieve and served in the soup. *Croûtons* of bread are usually used with purées.

**Flavourings for Soups.**—The following list of flavourings simply enumerates those most commonly used and conveniently obtained ; turnips, carrots, onions, celery, parsley, thyme, bay-leaf (parsley, thyme, and bay-leaf are usually tied together and spoken of as a "*bouquet-garni*"), tarragon, chervil, tomatoes, celery seeds, cloves, wine, vinegars of various kinds, and lemon juice.

The vegetables named in the recipes are supposed to be of moderate size, but two smaller ones, or half a larger one may be used instead. To avoid repetition, they are spoken of as "*prepared*," meaning that the onions have been peeled, the carrots scraped, and the turnips pared. As the fibre on the outside of the turnip is very tough and thick it is advisable, and not extravagant, to take off a thick paring. On the other hand, potatoes should be pared as thinly as possible, because the outer part contains the most valuable and nutritious part of the potato. A *bouquet-garni* is a small bunch of mixed herbs, such as parsley, thyme, bay-leaf, basil, and marjoram. Sparingly used, these herbs improve the flavour of many soups, but they are not essential, and one or more of them may be omitted if they cannot be easily procured.

**Seasoning for Soups.**—In addition to salt and pepper, which form the ordinary seasonings for soups, and which must be added with caution, nutmeg, allspice, mace, sugar, and cinnamon are used, but

in all cases judgment and discretion must be exercised, as an overdose of any one of the above ingredients may spoil the best soup.

**The exact quantity of liquid needed** in making soup cannot, speaking generally, be given, so much depends on the rate of cooking, and whether the lid of the saucepan is kept on to prevent waste by evaporation. If the liquid becomes greatly reduced by rapid boiling but has been closely covered, the contents of the saucepan have merely become concentrated in strength and flavour, and water may be added to make up the original quantity. Should the liquid, by being allowed to boil in an uncovered saucepan, have wasted its strength and flavour, sufficient stock, milk, or whatever formed the basis of the soup, must be added to make up the original strength and quantity. The inexperienced cook should take this lesson to heart—cooking cannot be hastened. If the preparations for dinner have been somewhat delayed, nothing is gained by placing the saucepan containing the soup, stew, or meat on the top of a fierce fire. When once the SLOW-BOILING or simmering point has been reached all excess of heat is wasted, and the benefit of slow progressive cooking is lost.

### STOCK.

The following information and directions will be found useful in the making of stock.

1. **Beef makes the best brown stock**, but it lacks gelatinous substance ; therefore stock for good consommé, or clear soup, should be made of beef and veal, and a fowl, or part of a fowl, added to give it an additional flavour.

2. **White stock** is usually made from veal, bones and remains of poultry and calves' feet. The liquor in which calves' heads or fowls have been boiled makes excellent white stock.

3. **Stock meat** should be as lean and as fresh as possible. Never wash meat unless obliged, as it deprives its surface of all the juices. It should be cut into small pieces, in order to multiply the surfaces to be exposed to the softening and dissolving influences of the water.

4. **The usual allowance of water** is 1 quart to each lb. of meat. This may, however, be too large a quantity if the stock is very gently simmered and kept covered the whole time ; on the other hand, if cooked too quickly, or if by careless exposure the evaporation is excessive, the amount specified may not be sufficient.

5. **The meat should be allowed to stand** in the water for a little time in order to dissolve the soluble constituents ; heat should be applied gradually until the stock reaches the boiling point ; when the scum thrown up by boiling has been removed, the stock should be reduced to, and kept at, simmering point.

6. **The vegetables must be whole** or in large pieces, and be added after the stock has boiled and the scum has been removed. They should be used very sparingly, so as not to overpower the flavour of the meat. To 4 quarts of water, 1 carrot, 1 onion,  $\frac{1}{2}$  a turnip, and 1 short strip of celery should be allowed, also a teaspoonful of salt and

12 peppercorns ; ground pepper should never be used, as it makes stock and clear soup cloudy.

7. **The stock should simmer** very gently for 5 or 6 hours, with the stock-pot covered to prevent waste by evaporation. When ready, it should be strained through a hair sieve into a large basin, and the meat and sediment put back into the stock-pot.

8. **When cold**, the fat should be removed from the surface.

**Management of a Household Stock-pot.**—For most cooking operations stock is in constant demand to form the basis of a soup, a sauce, or gravy. Recipes for making excellent stocks (including white stock or blond de Veau), and a good brown stock, are given in the following pages.

The stock-pot should supply stock for sauces, stews, and gravies, and we will now indicate how a careful cook can always have stock on hand with little or no extra expense.

The first consideration is the stock-pot. A well-tinned stock-pot with a tap is to be recommended ; the tap permits the stock to be drawn off without any admixture of grease, all the fat rising to the top of the stock-pot.

For small households the earthenware stock-pot will be found useful, as a very small amount of heat is required to keep its contents at simmering point.

The materials that may be put into the stock-pot are bones and the trimmings of meat, cooked or uncooked ; poultry, giblets, poultry bones, game bones, the rinds and bones of bacon, the remains of gravies, but not sauces thickened with flour—the latter make the stock cloudy. Scraps of raw vegetables, if fresh and suitable, may be added in cold weather ; cooked vegetables must not be used for they are liable to turn sour, especially in warm weather.

Fat should never be put into the stock-pot, but marrow from bones is often introduced in small quantity. Flour and anything thickened with flour or potatoes must also be carefully excluded.

When using a metal stock-pot the stock should be emptied and strained every night into an earthenware vessel. In starting it the following morning the pieces of meat and bones from which all the goodness has been extracted should be discarded, and the rest returned to the stock-pot with the stock or fresh water.

Fresh meat used for stock need not be washed, but should be wiped with a damp cloth before being cut up.

Any unused stock should be boiled up every day in hot weather, and in cooler weather every second or third day.

**Meat glaze.**—Any kind of rich meat stock, especially such as contains a good proportion of gelatinous substance, can be reduced to half glaze, or glaze gravy that sets to the thickness of jelly. This is effected by rapid boiling, and frequent skimming to ensure its being clear, until the desired consistency has been reached.

Glaze is used for improving the appearance of meats, galantines, pies, etc., and is very handy for enriching soups and sauces, which frequently require additional strength and flavour.

## SAUCES.

**Importance of Sauces.**—Alexis Soyer, referring to this subject, writes: "Sauces are to cookery what grammar is to language"—a most apt comparison, for grammars have been adapted in a hundred different ways to suit the genius of the languages they dominate. And so with sauces; they form an essential part of cookery, yet the innumerable variations of each class have to be skilfully adapted to the dishes with which they are amalgamated or served, in order to give some necessary flavouring or produce some desired effect. Every cook should endeavour to attain proficiency in this branch of cookery, a task by no means so difficult as the number of sauces would lead us to suppose, for, if the few which have for their base either oil, wine, or fruit, are excluded, the remainder are simply variations of the two foundation sauces, white and brown.

**Use of Sauces and Gravies.**—Each sauce must possess a distinct flavour and character of its own, and add either richness, piquancy, or flavour without losing its own identity; but unless purposely employed to disguise the absence of flavour in some insipid substance, they should never be allowed to overpower the natural flavour of dishes of game, poultry, meat, etc., with which they are served. The excellence of many entrées depends almost entirely on the sauces which enter largely into their composition. Boiled fish would be insipid without an appropriately flavoured sauce. Some dishes of boiled meat, and many simple puddings, are almost unpalatable without their customary sauces; while a good gravy is indispensable with meat, poultry, etc.

**Difference between Sauces and Gravies.**—Gravy is simply the juices of meat, diluted and seasoned but not thickened, except the slightly-thickened brown gravy, which ought really to rank as a thin sauce.

**Sauce.**—Sauce has been defined as a LIQUID SEASONING, thickened by means of one of the following liaisons (or mixtures of yolk of eggs, cream, etc., used for thickening or binding white soups and sauces):—

- |                    |                                  |
|--------------------|----------------------------------|
| 1. Roux—white.     | 5. Butter and cream.             |
| 2. „ fawn.         | 6. Blended butter and flour.     |
| 3. „ brown.        | 7. Blood.                        |
| 4. Eggs and cream. | 8. Arrowroot, cornflour, Fecule. |

**Roux.**—The literal translation of this word is "russet," but in a culinary sense it is a mixture of equal quantities of butter and flour cooked over a slow fire, or in a cool oven, until the desired colour is acquired. There are three varieties of roux; white, fawn, and brown; and this form of thickening is generally employed in making good sauces. It may be made in small quantities as required, or in larger quantities, which, if closely covered, will keep good for months. When roux is made for immediate use it should be allowed to cool slightly before adding the liquid to it. When using perfectly cold roux, the liquid should be added to it more gradually: in both cases the sauce must be constantly stirred until it boils, and then allowed to simmer until it attains the required consistency. A heaped-up tablespoonful of roux will thicken 1 pint of liquid. Directions for the preparation of the respective liaisons (sauce thickenings) are given.

**The bases or foundations of sauces.**—The following liquids form the bases of most of the sauces :—

1. **White Stock.**—Nearly all the good white savoury sauces have for their foundation white stock and milk, used in varying proportions.

2. **Brown Stock.**—All good brown savoury sauces are made from stock, more or less rich according to the purpose for which they are intended.

3. **Fish Stock.**—Fish sauces usually have for their foundation about equal quantities of fish stock and milk.

4. **Milk.**—Milk forms the basis of nearly all the plain white sauces, both sweet and savoury, also of bread sauce.

5. **Water.**—Strictly speaking, all *melted butter* sauces should be made only with water ; a little of the broth in which fish or meat has been boiled is admissible, and is also an improvement to caper sauce ; but when milk is added to the broth, as is frequently the case, to improve the colour, the foundation becomes white sauce, *not melted butter*.

6. **Oil.**—Mayonnaise sauce, and others of a similar character known as salad sauce, are composed almost entirely of oil as their basis.

7. **Fruit.**—Apple, cranberry, gooseberry, etc.

**Foundation of Standard Sauces.**—Sauces may be broadly divided into two classes, white and brown ; each class being further sub-divided into sauces made by a long, slow process, and quickly-made sauces.

(a) **White.**—**Béchamel** forms the foundation of all the good white sauces ; it is made by the slow process, which extracts the full flavour of the substances employed.

(b) **Plain White Sauce.**—Nearly all the white sauces employed in middle-class cookery have for their foundation a plain white sauce made by the quick process. Their flavour depends mainly on the substances added to them, such as parsley, celery, chocolate, vanilla, orange-essence, etc.

(a) **Brown.**—**Espagnole.**—This sauce and the Béchamel have been aptly described as “Adam” and “Eve.” France adds to them the *Veloutée* and *Allemande*, and calls the group the “sauce mères,” or “mother sauces.” The *Espagnole* forms the basis of all good brown sauces, and these, like the white sauces, derive their distinctive names from the substances added to the foundation sauce. The rich exquisite characteristic flavour of *Espagnole* sauce is due partly to the lean bacon or ham which forms an indispensable part of it, and partly to the long, slow frying process to which the flour and other ingredients are subjected.

(b) **Plain Brown Sauces.**—These sauces are always less quickly made than the plain white sauces, for no matter how simple they may be, the flour must be fried brown before adding the liquid. A little caramel may be introduced to IMPROVE the colour, but it imparts nothing to the flavour, whereas frying develops the full flavour of both the flour and vegetables used in making brown sauces.

**Stock :** Béchamel, Veloutée, Allemande, and sauces of a similar character, must have for their foundation white stock made from chicken or veal, or the bones and trimmings of the same. The stock for Espagnole sauce, and those sauces of which it forms the basis, may be made from any kind of meat, trimmings, bones, livers, and gizzards of game and poultry ; it must be rich, of good colour, but not necessarily very clear. The second stock, well reduced, would be suitable for this purpose.

**The consistency** of a sauce varies according to its use. For a coating sauce, that is, a sauce thick enough to mask a chicken, cutlets, etc., over which it is poured, the proportions of  $1\frac{1}{2}$  oz. of flour to 1 pint of liquid, when made by the slow process, during which the sauce becomes considerably reduced, but when made by the quick process nearly 2 oz. of flour must be allowed to 1 pint of liquid. Sauces to be served separately in a sauce-boat or poured round the base of a dish, should be made a little thinner, but it is always better to err on the side of over-thickening, it being much easier to reduce the consistency by adding a little more stock or milk, than to increase the consistency by reducing the quantity. The latter can only be done by boiling the liquid rapidly in an uncovered pan, which is not always convenient at the time of serving dinner. Reducing by rapid boiling is a method which may be usefully employed in dealing with stock too poor to make a suitable foundation for a good soup or sauce. As the stock is reduced by evaporation, its flavour and richness become concentrated, and if frequently skimmed it gains considerably in brightness and colour.

**Time for Cooking.**—Sauces made by the slow process are allowed to simmer for 2 or 3 hours, or until all the unabsorbed fat comes to the surface. Frequent stirring is necessary, also occasional skimming to remove the fat as it rises. The ordinary, or quickly-made sauces, should not have the liquid added until the flour and butter have been cooked together for 3 or 4 minutes, or, when flour kneaded with butter is used, or flour moistened with milk or stock is used, the liquid to which they are added should be allowed to simmer for at least 5 minutes after coming to the boil, otherwise the sauce has an unpleasant taste of raw flour.

Sometimes sauces made by the long process are over-cooked and become oily. In this case a little cold stock, milk, or water, can be added, and the sauce stirred until it boils, when it will again become smooth, but it must then immediately be removed from the fire.

**Preparations of Ingredients.**—To avoid repetition, the vegetables used in the recipes are spoken of as "prepared," meaning that the carrots have been scraped, the turnips peeled, and the onions peeled.

As regards the quantities given in the recipes, they have been kept as uniform as possible, and in most cases provide sufficient sauce to fill a sauce tureen, or for pouring round an entrée or pudding.

## THICKENINGS FOR SAUCES.

**White Roux.**—In making white roux, equal quantities of butter and flour are stirred in a stewpan over a slow fire for 10 or 15 minutes, but without allowing the roux to take any colour. If for immediate use, the roux must cool slightly before adding the liquid.

**Fawn Roux.**—For a fawn or blonde roux, take equal quantities of butter and flour, and cook slowly over the fire or in a cool oven until the mixture acquires a pale fawn colour.

**Brown Roux.**—This third variety is usually called "stock roux," because where roux is being constantly used a large quantity of it is made and kept in stock. The proportion of butter and flour are the same as for white and fawn roux. The nut-brown colour is obtained by a long, slow process of frying or roasting, during which much of the flavour, characteristic of well-made brown sauce, is developed.

**Egg Liaison.**—This thickening is composed of yolks of eggs beaten up with a small quantity of cream, milk, or white stock. The sauce to which this liaison (or thickening) is added *must require no further cooking*. One or two tablespoonfuls of hot sauce should be mixed with the eggs and cream, and the whole then strained into the sauce, which should be just below boiling point. To remove the raw taste of the eggs, it is necessary to cook and stir the sauce by the side of the fire for a few minutes, but it must not be allowed to boil, or the eggs may curdle.

**Butter and Cream Liaison.**—When butter and cream are employed for thickening, they are added in equal proportions to the sauce **JUST BEFORE SERVING**: re-heating would spoil the flavour of the sauce.

**Kneaded Butter Liaison.**—This form of liaison is exceedingly useful when no roux is at hand, and a little additional thickening is required. Butter will absorb about its own weight in flour, and the two are kneaded together on a plate until all the flour is absorbed, or, in other words, thoroughly moistened by the butter. This liaison should be added to the sauce in small portions and stirred until it is smoothly mixed with it.

**Blood Liaison.**—This liaison is used principally to thicken sauces for game and poultry entrées. The blood of poultry or game should be mixed with a little vinegar, to prevent coagulation. It should be strained and added gradually to the sauce a few minutes before serving.

**Arrowroot, Cornflour, Fecule Liaison.**—Before adding any of these substances to the sauce, they must be smoothly mixed with a little cold stock, milk, or water. The liaison is stirred into the boiling sauce, and simmered for not less than 2 minutes to cook the starch.

## GRAVY.

Gravy, pure and simple, is usually described as "the juices of the meat"; and it has been said that good gravy is an evidence of bad roasting or baking. But experience teaches us that the best gravy accompanies a joint which has been roasted before an open fire and

well basted during the process, as is the custom in the north of England. Notwithstanding the argument that if the juices of the meat are in the gravy the joint must suffer, the north-country meat, when cut, is found to be full of gravy. Long before science had discovered the coagulating properties of albumen, it was the custom to put plenty of dripping into the tin before the fire, and as soon as it was hot the joint was hung on the "jack" and well basted. Without knowing the "why and wherefore," the most ignorant housewife would have explained that this method KEPT THE GRAVY IN. As the meat cooked before the clear bright fire it became crisp and brown; and each time it was basted some of the brown particles on the surface of the joint were carried down into the dripping and settled on the bottom of the tin, to be afterwards converted into gravy. From the above facts, we draw the conclusion that a browned surface and frequent basting produce good gravy. Meat baked in the oven has not quite the same flavour and nourishment as when roasted, but a juicy joint and good gravy are possibilities under the following conditions:—the joint must be well basted with melted dripping or other fat before being put into the oven; the oven must be kept fairly hot until the meat is well browned all over; in the later stages of cooking the oven door should not be entirely closed, for meat cannot become crisp and brown in an oven full of steam; the joint must be frequently basted. Gravy in its most simple form is made by adding boiling water to the sediment which remains in the meat tin when the fat has been carefully poured off. It should be seasoned to taste, boiled up, stirring meanwhile to loosen the brown particles which adhere to the sides of the tin, well skimmed, and strained over or round the meat. Any bones that have been removed from the meat may be boiled to form the basis of the gravy, but nothing else must be introduced. Beef gravy must contain only salt and pepper; and mutton gravy the same ingredients, and a few drops of caramel when the gravy is very light in colour. Veal gravy, also, should be made from the bones, and after being mixed with that in the meat tin, should be slightly thickened with flour and butter kneaded together, or flour mixed smoothly with a little water. Gravies served with game, roast rabbits, etc., may be made from beef, beef or game bones, or from stock. Clear stock must be used for clear gravies, but with this exception, any good second stock will serve. An economical cook will always contrive to provide the basis of gravies, sauces, and soups out of the bones and trimmings of poultry and meat, except, of course, the clear soups and gravies, which must have a good clear stock for their foundation.

### FORCEMEAT.

In modern phraseology the term farce or forcemeat is applied equally to the simple and quickly made veal stuffing, the finely-pounded quenelle mixture (which is in no sense a stuffing), and the various farces used to cover sections of pigeons, cutlets, etc.

The consistency of forcemeats varies according to the purpose for which they are required. Those intended for stuffing may be moistened with milk instead of egg, and made much more moist than quenelles,

which must retain their shape and be firm enough to support their own weight during the process of cooking.

The quantity of liquid necessary to thoroughly moisten, and the number of eggs required to stiffen the various substances, cannot be stated exactly, but it is better to have a rough guide than none, and when making quenelle mixtures, which must have a certain consistency, and yet retain the lightness which is one of their chief points of excellence, it is advisable to test the mixture by poaching a small quantity of it in boiling water. When too soft, another yolk of egg should be added, if eggs have been already used, or a few crumbs may be added to mixtures of which they already form a part.

The excellence of many simple forcemeats depends largely on flavourings and seasoning. In making them, it is a common error to use too little salt and pepper, and too few flavourings; it is much better to use a small quantity of several kinds than to allow one flavour to predominate. A comparatively large quantity of nutmeg may be used in veal forcemeat without its presence being detected; it is believed that its strength is in some manner used in developing the flavour of the substances with which it is mixed.

The liquid in which quenelles are poached must always be quite boiling, in order that the surface may immediately harden, and so help them to retain their shape.

### FISH.

**Fish as Food.**—As an article of nourishment fish is less satisfying, and less stimulating, than butcher's meat. Hence it is valuable in the sick-room, when stronger kinds of animal food are unsuitable for invalids. It is, however, a matter of common experience that in fishing towns, where little or no other animal food is taken, the health and vigour of the inhabitants are excellent.

The amount of nourishment contained in fish varies with the species. Some of the red-fleshed fish are almost as nutritious as butcher's meat. Chief amongst these is salmon, once a principal article of food in this country, though in point of fact, the richness and peculiar flavour of this fish make it ill-adapted for daily food.

The white-fleshed fish, such as whiting, sole, haddock, hake, cod, and skate, are less nourishing, but more digestible; and it is said that they do not so soon pall upon the appetite of those who live on fish. The whiting is best suited for invalids, and next, perhaps, come the sole, haddock, and plaice. Cod, hake, and skate are remarkably firm-fleshed and fibrous, and even when in good condition, are somewhat difficult of digestion. The flesh of all these fish contains little fat; but in the liver, especially that of the cod-fish, oil accumulates. Fish oil is said to be more easy of digestion than any other kind of fat, and cod-liver oil is therefore commonly given to invalids.

In other fish, with flesh more or less white, there is much fat in the tissues. Herrings, pilchards, sprats, eels, lampreys, mackerel, are rich, and likely to disagree with delicate persons. However, they are nourishing; and supplying, as they do, both fat and flavour at a small cost, are very largely consumed by the poor. Herring is said to contain more nourishment and is cheaper than any other kind of fish food.

**Crimping** is employed to increase the firmness of the flesh by contraction of the muscles, in the case of cod, skate, salmon, and some other species. The popular notion that fish must be crimped while it is alive is erroneous, but it must be done immediately after death, before RIGOR MORTIS has set in. It is said that crimped fish keeps fresh longer than fish in its natural state.

**To Choose Fish**, the first necessity is that it should be fresh. Stiffness and rigidity of the flesh are a sure guide, for RIGOR MORTIS passes off in the course of time, and the flesh then becomes flabby.

The smell is not a sure guide if the fish has been kept in ice, for it may smell fresh, and yet change directly it is taken from the ice.

The redness of the gills is a good indication, and the brightness of the eyes, which should not be sunken in the head.

A proof of freshness and goodness in most fish is their being covered with scales; if the scales are deficient, the fish may be stale or they may have been damaged, and then they will not keep.

In flat fish the skin should be smooth and moist, and closely adherent to the flesh. It is a bad sign if the skin is blistered.

Salmon, cod, and the large fish generally should have a bronze tint when freshly cut. Turbot and brill should have yellowish flesh.

Very large fish are not to be preferred, as they are probably old and tough. A flat fish should be thick in proportion to its size; all fish should have large girth rather than great length. In buying a slice of fish, it is better to choose a thick slice from a small fish than a thin slice from a large one.

The red-fleshed and oily fish cannot be eaten too soon after they are out of the water. If kept they should be cleaned and wiped very dry, and laid on ice, or on stones in a current of air, when ice cannot be obtained. The larger fish can be hung up by the gills. They can be parboiled, and so kept for a day or two.

Turbot, brill, dory, and some other cartilaginous white-fleshed fish may be kept for a day or two with advantage. A turbot must always be hung up by the tail until it is ready to be cooked. White fish can be rubbed over with salt, and so kept for a day or two; but fish loses nourishment and quality in the process, which should only be resorted to when absolutely necessary. Fish that is not quite fresh can be improved by thorough washing in vinegar and water, or permanganate of potash and water. It is afterwards better fried than boiled, but no dressing will entirely conceal its quality.

**Preserved Fish.**—Various methods are resorted to for preserving fish. It is dried, smoked, salted, put up in oil; or a combination of these methods is used, the object being to remove moisture or to exclude air. Of tinned fish we have spoken in another chapter. The fish that are most easily preserved are those rich in oil and of firm fibre. All fish lose nourishing power by being salted, and salt cod is said to be the least nourishing of foods commonly eaten.

**Shell-fish** are, as a rule, difficult of digestion, owing to the toughness and hardness of the flesh. The crustacea commonly eaten are the lobster, crab, crayfish, shrimp, and prawn.

Of the bivalve shell-fish, oysters have the best reputation, both for

flavour and digestibility, and are for that reason given to invalids. Cooking, especially at a great heat, hardens them, and so renders them less digestible.

**Reptiles as Food.**—The green turtle is the only reptile that we appreciate as a food, though many reptiles are eaten in different parts of the world. Turtles sometimes weigh 600 lbs. or 700 lbs., and are imported into, and kept, in this country alive. Sun-dried turtle, sold in pieces, is much cheaper than, and is a good substitute for, fresh turtle. Tinned turtle is also sold, and extract of turtle is recommended for invalids. These preparations can be bought in small quantities, and are within the reach of many who could not procure fresh turtle soup. The edible frog (*rana esculenta*) is esteemed in many parts of Europe, but has never been appreciated by English people. Only the hind legs are eaten.

**In Preparing Fish** of any kind, the first point to be attended to is to see that it is perfectly clean. It is a common error to wash it too much, as by doing so the flavour is diminished. The best way to clean fish is to wipe it thoroughly with a clean damp cloth. If the fish is to be boiled, a little salt and vinegar should be put into the water, to give it firmness, after it is cleaned. In consequence of the amount of oil certain fish contain, their liver and roes take longer to cook than the flesh, and should be put into the saucepan before the fish, if not cooked separately. Fish, except salmon, should be put into warm water, and cooked very gently, or the outside will break before the inner part is done. Hot water should not be poured on to the fish, as it is liable to break the skin; if it should be necessary to add a little water whilst the fish is cooking, it ought to be poured in gently at the side of the vessel. The fish-plate may be drawn up, to see if the fish be ready, which may be known by its easily separating from the bone. When done, it should be immediately taken out of the water, or it will become woolly. The fish-plate should be set crossways over the kettle, to keep hot for serving, and a cloth laid over the fish to prevent it losing its colour. The exact temperature of the water, at the time of placing the fish in the kettle, depends on the kind of fish to be cooked. If it is too hot the skin breaks, and if it is cold much of the flavour is lost. Fish can scarcely cook too slowly; steaming is often better than boiling.

Fish to be fried or broiled must be dried on a soft cloth, after it is well cleaned and washed. Prior to frying, dip it lightly in flour, brush it over with egg, and cover it with some fine crumbs of bread. The fish, after it is fried must be thoroughly drained and freed from fat. A sheet of white paper must be placed to receive it, in order that the superfluous grease is absorbed. It must also be of a beautiful colour, and all the crumbs appear distinct. Butter in frying gives a bad colour to fish; lard and clarified dripping are most frequently used, but oil is considered the best. The fish should be put into the fat or oil when the latter is hot enough to immediately harden the surface. There should be sufficient fat to well cover it.

When fish is broiled, it must be seasoned, floured, and laid on a very clean gridiron, which, when hot, should be rubbed with a bit of suet, to prevent the fish from sticking. It must be broiled over or before a very clear fire, that it may not taste smoky; and not too near,

that it may not be scorched. Fish may also be baked, stewed, and made into soups. In choosing fish, it is well to remember that it is possible it may be fresh and yet not good. In this work rules are given for the choice of each particular fish, and the months when it is in season. Nothing can be of greater consequence to a cook than to have the fish good, as, if this important course in a dinner does not give satisfaction, it is rarely that the repast goes off well.

**Keeping Fish.**—When fish is cheap and plentiful, and a larger quantity is purchased than is immediately wanted, the overplus of such as will bear it should be potted, or pickled, or salted, and hung up; or it may be fried, that it may serve for stewing the next day. Fresh-water fish having frequently a muddy smell and taste, should be soaked in strong salt and water, after it has been well cleaned. If of a sufficient size, it may be scalded in salt and water, and then dried and dressed. Cod-fish, whiting, and haddock are none the worse for being a little salted and kept a day; and unless the weather be very hot, they will be good for two days.

**Garnishing Fish** requires great nicety. Plenty of parsley, horse-radish, lobster coral, and lemon should be used. If fried parsley be used it must be washed and picked, and thrown into fresh water. When the lard or dripping is hot enough, squeeze the parsley dry in a cloth, and throw it into the saucepan. It will bubble a good deal, and, therefore, it is better to lift the pan from the fire. In a few seconds the parsley will be green and crisp, and must be taken up with a slice, if there is no frying-basket. Well dressed, and with very good sauce, fish is, by the generality of people, more appreciated than almost any other dish. The liver and roe, in some instances, should be placed on the dish, in order that they may be distributed in the course of serving.

**Fresh-water Fish.**—Of the various ways in which fresh-water fish may be cooked, boiling is the least suitable. Many varieties lack flavour, others have peculiarities which render them disagreeable to some persons, and should therefore be disguised by a liberal use of seasonings, flavourings, and sharp sauces.

**Fish, to Boil.**—In boiling fish it is advisable to use a fish-kettle, provided with a strainer, so that the fish can be gently lifted without breaking. Failing this, the fish should be tied in muslin, and placed on a plate at the bottom of a saucepan. Salmon and salmon trout should be put into boiling salted water, to preserve their colour, but other kinds of fish should be placed in warm water, for boiling water has a tendency to break the skin, and cold water extracts much of the flavour. Fish should always be gently simmered after boiling point is reached, otherwise it is liable to break. It should also be cooked in the smallest possible quantity of water, which, when practicable, should afterwards form the basis of a fish soup or fish sauce. Lemon-juice or vinegar should be added to the water in which white fish is cooked, as it tends to increase its whiteness. The time required for cooking depends more on the thickness than the weight of the fish, but as soon as the bone separates readily, the fish should be taken from the water and kept covered, on the strainer, placed across the fish-kettle, until required. Fish, when boiled, should always be served

on a strainer covered with a folded napkin. It is usually garnished with slices of lemon and tufts of green parsley, a little additional colour being sometimes introduced by means of lobster coral, prawns, etc.

**Fish, to Broil.**—This method of cooking is an extremely simple one when proper appliances are at hand, but when the only means available are those usually found in middle-class kitchens, some little difficulty may be experienced. A clean gridiron and a clear fire are indispensable factors, and the former may be easily secured by heating the gridiron, and afterwards rubbing it repeatedly with soft paper until perfectly clean. No matter how clear and bright the fire may appear, more or less smoke will arise from it, but this may be checked to some extent by throwing on a good handful of salt. Fish intended for grilling should be thoroughly dried, then brushed over with oil or oiled butter, and seasoned with salt and pepper. Meat also needs to be slightly coated with oil or butter, otherwise the surface may become dry. The gridiron must be heated and rubbed over on both sides with suet or fat, to prevent whatever is being cooked sticking to it. For the same reason it is necessary to move the meat or fish occasionally, using meat-tongs or a knife for the purpose, thus avoiding making holes through which the juices could escape. Delicate fish is frequently enclosed in oiled paper, and should then be served in the paper in which it was cooked.

**Fish, to Cure.**—Empty, wash, and scale the fish, and, if large, cut it down the back. Rub it inside and out with common salt, and let it hang in a cool place for 24 hours. Mix together 1 oz. of bay-salt,  $\frac{1}{2}$  an oz. of saltpetre,  $\frac{1}{2}$  an oz. of brown sugar, and rub the fish well with the preparation. Place it on a large dish, cover it lightly, but completely, with salt, and allow it to remain undisturbed for 48 hours. Turn the fish over, cover it with fresh salt, and let it remain for 24 hours longer. Drain and well dry the fish, stretch it on sticks, and keep it in a dry, cool place. When kept for a great length of time, it will be necessary to well soak the fish before cooking.

**Fish, to Fillet.**—The skin must be removed from both sides of a sole before filleting, but the dark skin on the under side of a sole is nearly always removed by the fishmonger. Plaice is frequently filleted without removing the skin, although it is better to strip the dark skin off the back. Whiting and haddock are usually skinned, while mackerel are very seldom skinned before being filleted. When the fish has been washed, dried, and skinned, it should be placed flat on a board or table, and with the point of a knife cut from head to tail down the backbone. Next insert the knife in the slit made, and carefully separate the fish from the bone, keeping the knife pressed lightly against the bone meanwhile. Remove the fillets, trim them neatly, and cut into pieces convenient for serving.

**Fish, to Fry.**—Fish to be fried should be well dried after washing, and it is usually cut into pieces convenient for serving. Although very good results can be obtained by such simple means as a frying-pan and a very small quantity of fat—providing the fat be hot and the fish dry and slightly floured—a deep pan containing sufficient fat to completely cover the fish is desirable. Before frying, the fish should

either be dipped into well-seasoned batter or coated with egg and breadcrumbs, and in the latter case it should be first rolled in a little flour seasoned with salt and pepper, the object being to make it as dry as possible, in order that the breadcrumbs may adhere more firmly. The fat should be very hot at all times, but its temperature must be slightly lower when frying fillets of fish than when frying such things as croquettes, rissoles, etc., which are generally composed of cooked materials. When the surface of a small piece of bread immediately hardens and slightly changes its colour on being immersed in the fat, the temperature is right for raw materials or anything that is thickly coated with batter, but when frying anything of which the exterior alone has to be cooked, it is better to have the fat sufficiently hot to at once brown whatever is immersed in it. Small things are nearly always fried in a wire basket, but filets of fish are dropped into the fat, and when cooked, taken out on a fish slice. Anything fried should afterwards be well drained, either on a cloth or kitchen paper. Fish is usually garnished with lemon and parsley, croquettes and other dishes of the same class with parsley alone, while fruit fritters should be literally sprinkled with sugar before serving.

Oil may be strongly recommended for frying, but clarified fat is more generally employed in ordinary households, and for all frying purposes is preferable to lard, which is apt to impart an unpleasant fatty flavour. All fat after being used for frying should be allowed to cool slightly, and afterwards strained into an earthenware vessel; or, after repeated use, it may be partially purified by straining it into a basin of boiling water, when fragments of fish, breadcrumbs, etc., will sink to the bottom, and may be scraped off as soon as the fat hardens.

**Fish, to Salt.**—The following method of salting fish is particularly suited to herrings, mackerel, and other small varieties. Choose fish that is perfectly fresh; empty, scale, and clean, but do not wash them. Make a brine sufficiently strong to float an egg, put in the fish, which should be completely covered, and let it remain in the brine for 18 hours. When ready, drain well, place them in layers in an earthenware vessel, covering each layer thickly with salt. Cover closely to completely exclude the air, and store in a cool, dry place. The fish must be well soaked before cooking.

## MEAT.

**Methods of Cooking.**—Roasting, baking, boiling, stewing, braising, frying, and grilling are the usual methods of cooking animal food. To explain the philosophy of these simple operations, we must notice the effects that are produced by heat on the principal constituents of flesh. When finely chopped mutton or beef is soaked for some time in a small quantity of water, and then subjected to slight pressure, the juice of the meat is extracted, and there is left a white, tasteless residue, consisting chiefly of muscular fibre. When this residue is heated to between 180° and 200° F., the fibres shrink together, and become hard and horny. The influence of a higher temperature on the soluble extracts is not less remarkable. When the watery infusion

which contains the nutritive constituents of the meat is gradually heated, it soon becomes turbid, and, when the temperature reaches about  $160^{\circ}$ , flakes of whitish matter separate. These flakes are ALBUMEN, a substance precisely similar in all its properties to the white of egg. When the temperature of the watery extract is raised to  $158^{\circ}$ , the colouring matter of the blood coagulates, and the liquid, which was originally tinged red by this substance, is left perfectly clear, and almost colourless. When evaporated, even at a gentle heat, this residual liquid gradually becomes brown, and acquires the flavour of roast meat. The fibres of meat are surrounded by a liquid which contains albumen in its soluble state, just as it exists in the unboiled egg. During the operation of boiling or roasting this substance coagulates. The tenderness of well-cooked meat is consequently proportioned to the amount of heat employed, and the slight or complete coagulation of the albumen deposited in its substance. Meat is done when it has been heated throughout only to the temperature of coagulating albumen, provided the heat is continued long enough; it is thoroughly done when it has been heated through its whole mass to the temperature at which the colouring matter of the blood coagulates; it is overdone when the heat has been continued long enough to harden the fibres.

**Boiling, Roasting, and Baking.**—During these operations, fresh beef and mutton, when moderately fat, lose on an average about—

	In Boiling.	In Baking.	In Roasting.
4 lbs. of Beef lose	1 lb.	1 lb. 3 oz.	1 lb. 5 oz.
4 lbs. of Mutton lose	14 oz.	1 lb. 4 oz.	1 lb. 6 oz.

More recent experiments also show that animal matter loses more weight by roasting than by boiling. In roasting, the loss arises from the melting out of the fat and evaporation of water; but the nutritious matter remains condensed in the cooked meat, whereas, in boiling, the gelatin is partly abstracted. Roast meats are therefore more nutritious than boiled meats; but in consequence of the chemical decomposition of the fat of roast meats, due to a long continued exposure to an intense heat, they are less easily digested.

**Roasting.**—In roasting, the joint must be suspended where the rays of heat from the fire may fall directly upon it. In localities where this excellent and wholesome method of cooking is largely practised, kitchens are provided with a primitive meat-screen, a three-leaved folding "hastener," lined on the inside with a bright metal which reflects the heat. Therefore, although roasting may be described as cooking by radiant heat, it is a process in which reflected heat plays a secondary and by no means unimportant part. By many, roasting is condemned as an extravagant method of cooking. Undoubtedly meat loses considerably in weight when roasted, but there is no real loss; the melted fat remains as dripping; any meat juice which escapes coagulates and forms the basis of the gravy, and by the evaporation of water, to which the greater part of the loss is due, the nutritives of the meat have simply become more concentrated. The consumption of coal in roasting is not excessive when the fire is properly built up. Some 30 or 40 minutes before the fire must be ready, the front of the grate should

be filled with small lumps of coal, and the back with a few lumps mixed with a considerable quantity of slightly-wetted small coal. As the front of the fire burns away, the embers from the back can be brought forward, and small coal or cinders put in their place, thus keeping the front of the fire clear and bright. Immediately the fire is made up the "hastener," or meat-screen, should be drawn around it, so that its surface may become thoroughly hot before the meat is put down to roast. When the fire is clear and bright the joint should be placed quite close to it for 10 or 15 minutes; and as soon as it is put down it should be well basted with hot dripping, and this greatly assists in forming an impervious surface through which the juices of the meat cannot escape. The joint must be frequently basted during the first half-hour, and afterwards every 10 or 15 minutes. When properly roasted and sufficiently basted, the joint ought to be nicely browned without the aid of flour. A little salt and pepper is sometimes sprinkled on the joint before serving, but it is not necessary. It was considered an improvement to the gravy when the old custom obtained of pouring a little over the joint.

It is impossible to fix the exact time required for roasting meat, because so much depends upon the form and thickness of the joint, and its age and condition. The general rule is to allow 15 minutes for each lb. of beef and mutton, and 15 minutes over; and 20 minutes for each lb. of veal and pork, and 20 minutes over. Meat of recently-killed beasts requires longer cooking than meat which has hung for some time; in warm weather joints require rather less time for roasting than in cold. A square solid piece of beef will not cook as quickly as a shoulder of mutton of equal weight; and rolled and stuffed meat must be allowed a longer time than if the joints were not prepared in this manner.

White meats, and the meat of young animals, require to be very well roasted, both to be pleasant to the palate and easy of digestion. Thus veal, pork, and lamb should be thoroughly done to the centre.

Mutton and beef, on the other hand, do not, generally speaking, require to be so thoroughly done, and they should be cooked so that, in carving them, the gravy will just run, but not too freely. Of course in this, as in most other cases, the tastes of individuals vary; and there are many who cannot partake, with satisfaction, of any joint unless it is what others would call overdressed.

**Baking.**—Meat baked in the oven has never the same delicious aromatic flavour as when roasted in front of the fire, but with care it is possible to have a baked joint with a good flavour and a well-browned and crisp surface. To preserve the flavour of the meat, it is absolutely necessary that every part of the oven should be kept scrupulously clean. Nothing can brown properly or become crisp in too moist an atmosphere; therefore there must be an outlet for the steam produced by the evaporation of some of the water in the meat; and if the construction of the oven does not provide sufficient ventilation, the door must be kept partly open to allow the steam to escape. To ensure perfectly satisfactory results, a proper baking-tin must be used. This consists of a double tin, the upper part being provided with a grid, on which the meat rests, thus preventing unnecessary contact

with the dripping. The lower tin is filled with water, which prevents the fat in the upper tin burning and giving off unpleasant odours to be absorbed by the meat, which would spoil its flavour. The principles of roasting and baking are exactly the same, the object being in both processes to preserve the nutritive qualities of the meat by preventing the escape of the juices of the meat. Before putting the joint in the oven it should be well basted with hot fat, for the reason already explained in reference to roasting meat. The oven should be hot for the first 10 or 15 minutes, in order that the albumen on the surface of the meat may be quickly coagulated and the juices of the meat retained. The temperature must then be lowered, or the meat transferred to a cooler oven, if the stove is provided with two. The temperature of an oven may be quickly reduced by drawing away some of the fire, putting in the dampers, or leaving the oven door open. Frequent basting is as essential in baking as in roasting; it not only keeps the meat mellow and tender, it also prevents waste by shrinkage, and by washing off some of the hardened particles it prevents the meat becoming too brown, while at the same time it provides a deposit to be afterwards converted into good gravy.

The time required for baking meat is the same as for roasting, viz., 15 minutes to each lb. of beef and mutton, and 15 minutes over; and 20 minutes to each lb. of pork and veal, and 20 minutes over, with the usual allowances for form, condition, stuffing, etc., which experience must determine.

**Boiling.**—Boiling is generally considered one of the most easy and simple processes of cookery. Certainly meat cooked in a pot requires very little attention, and too frequently receives none at all, as is evidenced by the ragged mutton and hard, flavourless beef to which the term **BOILED** meat may be correctly applied. Although meat loses less weight when boiled than when roasted or baked, there is more loss of nutritive constituents, unless both the meat and the liquor in which it is cooked be consumed, for certain mineral salts, soluble substances, and a considerable quantity of gelatin, are abstracted during the process of cooking, and remain dissolved in the liquor. When the meat is intended to be eaten, it is desirable that its valuable nutritive juices should be retained, and this is effected, as in roasting and baking, by subjecting the joint for a short time to a temperature sufficiently high to rapidly coagulate the surface albumin, thus forming an impervious envelope which prevents the escape of the internal juices, and most effectually excludes the water, which, by diluting these juices, would render the meat insipid. All fresh meat should be immersed in boiling water for 10 minutes, but at the end of that time the temperature must be reduced, and the surest and quickest way of effecting this is to draw the pot aside and add cold water by degrees until the water in the pot ceases to boil. One pint of cold water would sufficiently reduce the contents of a large boiling pot. When it is possible to choose, the one selected should be just large enough to hold the meat, which must be kept covered with water; hot water being added to replace that which boils away, in order to maintain an even temperature. The addition of such vegetables as turnip, carrot, onion, and celery decidedly improves the flavour of meat, but they should never be used in sufficiently large quantities to overpower its natural flavour.

Turnip must be always sparingly used, for it possesses the peculiar property of absorbing the flavour of any material it comes in contact with, and is often usefully employed for that purpose. In one respect, boiling is more economical than either roasting or baking, for when once the right point is reached a very small fire will maintain the proper temperature. Any heat in excess of this is wasted, and the benefit of slow, progressive cooking is lost. Meat cooks as quickly at simmering point as if the water surrounding it were kept in a state of violent ebullition, and with far better results, for continued application of excessive heat hardens the fibres of the meat, and renders it tough and indigestible.

The time allowed for boiling meat is from 20 to 25 minutes for each lb. of meat, according to the solidity or thinness of the joint, and the kind of meat; pork requires longer boiling than beef or mutton, and salted meat longer than fresh meat.

Salt beef, salt pork, pickled pork, tongues, and hams should always be put into warm water, unless very highly salted, when they may be put into cold water to extract some of the salt. Smoked hams and tongues must be soaked in cold water for at least 12 hours before cooking. Any kind of salt meat intended to be served cold will be more mellow and juicy if allowed to remain in the liquor until cold; but this practice cannot be recommended in warm weather unless the meat will be quickly consumed, for the large amount of moisture it contains soon renders it unfit for use.

**Stewing.**—This process of cooking may be defined as “simmering in a small quantity of liquid.” Undoubtedly it is the most economical method of cooking meat, not only on account of the small amount of fuel required to keep up the gentle simmering, but also because tough, coarse, inexpensive kinds of meat may, by this long, slow, continuous process, be rendered tender and palatable. There is practically no loss of nutritive constituents, for everything abstracted from the meat is contained in the gravy. The fibres of coarse meat should never be exposed to a higher temperature than  $160^{\circ}$  F., simmering point is  $180^{\circ}$  F., boiling point,  $212^{\circ}$  F. To cook meat at this comparatively low temperature it is absolutely necessary that the vessel containing it should be provided with a lid fitting so closely that the steam cannot escape; or failing this, two or three thicknesses of greased paper must be placed under the lid. Lean meat alone is suitable for stewing, more particularly when the liquid is thickened with flour, which prevents the fat rising to the surface of the liquid. In consequence of not being able to remove the fat by skimming, stews are apt to disagree with those who are in the least inclined to dyspepsia; but when made of lean meat they are easily digested. A few rough trimmings of vegetables should be added to flavour the stew; but it is better to cook the vegetables to be served with it separately, for the low temperature at which the meat stews destroys the colour of both carrots and turnips. When the meat is very coarse its fibres may be softened either by adding a little vinegar to the stew, or by pouring a little over the meat and allowing it to soak in it for at least an hour before cooking. But when the meat is tender, if it is quickly fried on both sides before it is stewed, it has both a better appearance and flavour.

No definite rule as to time can be given; stews may be allowed to cook gently from 4 to 5 hours, but longer cooking usually reduces the

fibres of beef and mutton to a stringy, thread-like mass, so hardened that they cannot be digested, and consequently afford no nourishment. Stews cannot cook too slowly ; it is not necessary that there should be the least ebullition, but there must be sufficient heat applied to evaporate the liquid and fill the vessel with steam, otherwise the meat is not cooking.

**Braising.**—This excellent method of cooking is a combination of roasting and stewing, for when a properly constructed pan is used heat is applied from above by means of a depressed lid on which charcoal is burnt. When meat is braised in an ordinary stewpan it is simply placed on a foundation of vegetables surrounded, but not covered, with stock. The meat does not come in contact with the liquid, but becomes thoroughly flavoured with the vegetables, and by long slow cooking in the steam is rendered tender and digestible. It is then placed in a quick oven and browned and crisped before serving.

**Frying.**—From the appended table it will be seen that all fats and oils do not boil at the same temperature. In ordinary houses thermometers for testing the heat for cooking are not available, but the table given is instructive without their aid—at least it should make clear the reason why it is so much more difficult to fry in a small quantity of butter than in a corresponding amount of fat or oil.

Butter	boils at	150°	F.
Lard	"	210°	"
Clarified Fat	"	250°	"
Oil	"	390-400°	"

Many liquids boil at a lower temperature than water (212°) ; thus you may, with impunity, dip your finger in boiling spirits of wine ; you would take it very quickly from boiling brandy ; still more rapidly from water ; whilst the effect of the most rapid immersion in boiling oil need not be mentioned. As a consequence of this, heated fluids act differently on the savoury bodies presented to them. A small ball of butter, thickly coated with egg and breadcrumbs, may be fried in hot fat or oil and retain its form, but if dropped into a stew pan of boiling water it would quickly melt, and mingle with it, because the water would not be hot enough to immediately coagulate the albumen of the egg, and thus imprison the butter and effectually exclude the water. Fat may be heated to a much higher temperature than is necessary for ordinary frying purposes. Anyone experienced can tell exactly by the appearance of the fat, and by the amount of blue smoke arising from it, when the requisite degree of heat is reached. This, of course, varies considerably ; such things as rissoles and fish cakes, made principally of cooked materials, need simply browning and heating through, and consequently may be cooked in very hot fat. But such a preparation as cheese fritters or raw substances like fillets of fish must be fried in fat at lower temperature to allow the material to be fully cooked before the surface becomes too brown. The heat of the fat may be tested by frying a piece of bread ; if it turns brown immediately the temperature is suitable for such things as need browning and reheating, and for potatoes which require a high degree of heat, owing to the large proportion of water contained in them ; but for raw

materials the fat is sufficiently hot when the bread at once hardens, and acquires a pale golden-brown colour. It should, however, be remembered that the introduction of any cold substance immediately lowers the temperature of the fat; so much so, that after a few minutes the heat under the stewpan may safely be increased. Only a small quantity of anything should be fried at one time, and the fat must be heated to a proper temperature before frying a second lot. There are two distinct methods of frying, known respectively as deep or wet frying, and dry frying.

**Deep Frying.**—In this process the materials fried must be completely covered by hot fat. An iron or steel stewpan or saucepan may be used; and for such things as rissoles, croquettes, lobster cutlets, fish cakes, etc., a wire basket or wire drainer is necessary; fillets of fish are generally dropped into the hot fat from the fingers, and taken out on a fish slice. Everything fried should be transferred from the fat to a sheet of clean paper and thoroughly drained before serving.

**Dry Frying.**—Meat fried in a shallow pan with a comparatively small quantity of fat may be rendered hard and indigestible by this process if the mistake be made of putting the meat into a cold frying-pan, or into the fat before it is hot enough to coagulate the albumen on its surface. Fillets of beef and veal and mutton and veal cutlets are generally cooked in this manner, and with a protective covering of egg and breadcrumbs they may be subjected to intense heat without hardening their fibres to an injurious extent. The side to be dished upwards should be fried first, because the side cooked first invariably presents a better appearance. The frying should be done rapidly, and the frying-pan frequently shaken to prevent the contents sticking and burning to the bottom of it.

**Frying-Fat.**—For all ordinary purposes clarified fat may be recommended. It is made from beef and mutton suet, cut into small pieces, and simmered in a little water until all the fat is extracted, and then strained. Two lbs. of fat are obtained from 3 lbs. of suet; unless the suet can be bought cheaply, it may be a little more expensive than lard. Oil is excellent for frying purposes, but it requires more careful handling than the fats, for unless heated gently over a slow fire, it has a tendency to rise quickly and boil over. Lard sometimes imparts an unpleasant flavour, but the chief objection to its use is the fatty odour which lingers long after the lard has cooled. Frying-fat after being used should, WHEN COOL, be strained. The fat may be used over and over again until it becomes discoloured, and discolouration may in some measure be prevented by occasionally boiling the fat in plenty of water for  $\frac{1}{2}$  an hour. When slightly cool, both fat and water should be poured into a basin; and as soon as the cake of fat is firm all the impurities should be scraped off the bottom, and the fat melted again to evaporate every particle of water.

**Grilling or Broiling.**—Grilling, or broiling, as it is sometimes termed, is the most perfect way of cooking chops and steaks. A sharp clear fire is necessary in order that the outside may be quickly hardened, and thus prevent the escape of the juices of the meat. Grilling may be done either over the fire or before it on a gridiron contrived for

the purpose. Any ordinary gridiron may be used for cooking over the fire ; before being used it should be heated, and its bars well rubbed with paper, and afterwards with a little fat or suet. Whatever is being grilled must be repeatedly turned, by means of steak-tongs, or failing these, a fork put into the fat of the meat, for if the lean be pierced the juices will escape through the holes thus made. This cooking process is suited only to small portions of meat, or kidneys, bones, fish, mushrooms, tomatoes, etc.

**General Rules for Cooking Meat.**—(1) One general rule is that meat should never be washed, but there are at least three exceptions to the rule, viz. :—

- (a) When using diluted vinegar or charcoal to remove the taint of putrefaction.
- (b) When meat has been over-salted, and it is necessary to extract the excess of salt.
- (c) Hearts and liver before they are cut into slices ; the surface of both being protected by membranes, immersion in cold water does not deprive them of their nutritive juice.

(2) In roasting and baking an intense heat must be applied to all kinds of meat for 10 or 15 minutes, and the temperature afterwards considerably reduced.

(3) In boiling, fresh meat should be put into boiling water, boiled rapidly for 10 minutes, and then cold liquid added to reduce the temperature. Immersion in boiling water hardens the fibres of salt meat, therefore it should be put into warm water, or when too salt, it may be placed in cold water, which will extract some of the salt, and also a considerable quantity of the juices of the meat.

(4) In stewing, the process must be long, slow, and continuous, the escape of steam being prevented by a close-fitting lid, and, if necessary, by intervening layers of greased paper.

(5) In frying, a blue smoke must arise from the fat before it is hot enough to fry even things which require a comparatively low temperature. Cold things to be fried must be added to the fat gradually, to avoid reducing the temperature too suddenly. The fat must always be re-heated to a proper temperature before putting in a second set of things to be fried.

**Choosing Meat.**—Every housekeeper ought to know how to choose a good piece of meat in the butcher's shop, and how to detect a bad piece sent to her kitchen. It is almost needless to say that the first necessity is that the meat should be wholesome. It may be unwholesome from a variety of causes. It may be infested with parasites, and this condition is known to be without doubt most injurious to the consumer. The chief, indeed, the only safeguard against this danger lies in the thorough cooking of the meat, every part of which should be raised to the temperature of boiling water, 212° F. This applies particularly to all the visceral organs, where these are eaten, for it is in these parts of the animal that parasites are most often found. Even if the animal be killed in a healthy condition, the meat may become unwholesome by putrefaction.

**To Choose Good Meat** it is necessary to see that it possesses the following qualifications :—

(1) It should have a marbled appearance, from the ramifications of little veins of fat among the muscles ; this is specially characteristic of beef. Meat may be wholesome, yet not fat, as we shall explain later, but a sickly animal never fattens.

(2) It should be firm and elastic to the touch, and should scarcely moisten the fingers, bad meat being wet, sodden, and flabby, with the fat looking like wet jelly or parchment.

(3) It should be neither of a pale pink colour nor a deep purple tint ; the former is a sign of disease, the latter indicates that the animal has not been slaughtered, but has died with the blood in it, or has suffered from acute fever. In this case the inside fat surrounding the kidneys and the liver is often suffused with blood, showing plainly that there has been inflammation of those organs.

(4) It should have little or no odour, and the odour should not be disagreeable, for diseased meat has a sickly, cadaverous smell, and sometimes a smell of physic. This is easily discovered when the meat is cut up finely and put into warm water.

(5) It should not shrink or waste much in cooking, though this depends partly on the mode of cooking, as, for instance, roast meat wastes more than baked, and some joints more than others. Badly fed meat, such as pork fed on nuts and offal instead of meal, wastes much in cooking.

(6) It should not run to water or become very wet on standing for a day or two, but should, on the contrary, be dry upon the surface. Meat, however, that has been frozen is always damp on the surface, although the quality may be excellent.

**Joints should be hung** up, not laid on a dish or plate. They should be wiped, and it is a good plan to dust them over with flour, or flour and pepper. If placed in a draught, meat will keep for a longer time. The kernel, often seen in the fat of the round or silver-side, and the marrow from the backbone, should always be removed, as it taints before the joint itself. Meat from a sickly animal, or from one that has been over-driven or bruised, does not keep well. Old meat keeps better than young.

**Tainted Meat.**—If meat is clammy or musty from being kept, it should be washed in water containing vinegar or some such non-poisonous disinfectant as permanganate of potash. Powdered borax dissolved in water is the best to use. Another plan is to powder the joint with charcoal, and then wash it. In any case, it should be roasted, not boiled or stewed, if the meat is really tainted enough to give it a flavour. It is much better to half-roast or parboil a joint a day or two before it is eaten than to hang it too long, for it is really not hurt by so doing if it is put down to a very hot fire.

**Inferior Meat.**—Meat may be quite wholesome and yet may be of inferior quality. Ordinary purchasers do not understand this in theory, though they are accustomed to it in practice. An ox that had worked at the plough would be hard and somewhat strong-

flavoured ; but suitably cooked it would be unobjectionable from a hygienic point of view. Cow-beef is habitually sold in the markets, and the poor gladly buy it at a low price. Even in the best quarters of the town, superior meat hangs side by side with the second quality. Not enough comes to town of the best short-horned beef, or of South-down mutton to supply one-tenth of the customers, and in all market-lists the prices at per stone vary according to the breed and the quality. It answers the grazier's purpose to take a lower price per stone for an animal that arrives quickly at maturity, and attains to the greatest weight on a given amount of food.

As a rule, the larger the animal the coarser the flesh. This is markedly true of different varieties of the same species. In providing for a large number of persons, where quantity and cheapness are of more importance than first-rate quality, joints of large, full-flavoured beef and mutton are by far the most advantageous to buy, and for strong soup, stews with vegetables, and such dishes, there is no reason for choosing the most delicate meat.

**Fat Meat.**—As regards fat, that can be bought more cheaply than on a joint of meat, and many persons object to eat much fat. But it is always risky to buy any part of an unusually lean animal, in case its condition should be due to disease. It is better to buy a lean joint off a fat beast, or to cut off the fat before cooking the meat, as it can be clarified and used for deep frying, plain cakes, pastry, etc. Again, if economy is an object, it is well to buy a cheap part of a first-rate animal rather than a prime joint off an inferior beast. The fore-quarter costs less than the hind ; and in a bullock it is easy to get a solid lump of meat from the fore-quarter with little or no bone ; of course, if a joint is cheap because it is bony, there is no economy in buying it.

**Nutritive Value of Salted Meat.**—Every housewife knows that dry salt in contact with fresh meat gradually becomes fluid brine. The application of salt causes the fibres of meat to contract, and the juice to flow out from its pores ; as much as one-third of the juice of the meat is often forced out in this manner. As this juice is pure extract of meat, containing albumen, osmazome, and other valuable principles, it follows that meat, which has been preserved by the action of salt, cannot have the nutritive properties of fresh meat.

## BEEF.

The quality of beef depends partly upon race, but also upon age, sex, and feeding. Grass-fed beef is esteemed as superior to that of winter-fed animals fattened upon turnips, oil-cake, and other artificial foods. The best beef is red in colour, and marbled and mottled with fat finely intermingled with the lean. The hind-quarters of cattle are superior to the fore-quarters, and, in fact, necks, shoulders, and "crops" of beef are never seen on the best tables, but are sold by contract to shippers, etc., at a low price. The hind-quarters contain the ribs, the sirloins, the rumps, the buttocks, and the "rounds." The flank is rolled and used for "corned beef." Beef is highly popular

with Englishmen, and is preferred to mutton. It is, however, less easy of digestion, and seems naturally to require mustard or horse-radish as condiments, which are not needed with mutton.

**Buying Beef.**—Beef should not be eaten if it is in the least high. In dry weather it will keep some days ; but it very soon spoils in damp weather, even if the thermometer is low. At such times joints of meat may often be bought very cheaply, especially in the large markets on Saturday nights. The meat may be quite good at the time it is sold, but it would not be in twenty-four or thirty-six hours. And thrifty housekeepers, having more time than money at disposal, in this way do their marketing to great advantage. It is not wise at such times—perhaps not at any time when economy is studied—to go out with a fixed idea of the joint that is to be bought. A general idea of the relative value of each joint, of its usual price, and its average proportion of bone and fat, is all that is wanted. The prices of meat, and of all perishable articles, are only fixed so long as the circumstances which determine them are fixed, and when there is a glut in the market of anything that cannot be held back, it is sure to be sold for whatever it will fetch.

**Foreign Beef** is now imported in large quantities, and although it is not, generally speaking, considered so good in flavour or quality as English meat, is nevertheless excellent, and can be usually obtained at a lower price. The best parts only used to be sent to this country, but owing to the great improvement in the means of transport and methods for preserving the meat, carcasses frozen, chilled or refrigerated, arrive in excellent condition, and are cut up and sold in the same manner as English beef, and usually at a lower rate, thus placing good meat within the reach of all classes. The chief supplies are from the United States, Australia, and Argentina. Argentine beef is not considered to be so good as that from the United States, but is considerably less in price. Large quantities of live cattle are now brought over, especially from Argentina, to England, and are slaughtered for the market.

**The Manner in which a Side of Beef** is generally cut up is shown in the accompanying illustration. The meat on those parts of the animal in which the muscles are least called into action is most tender and succulent ; as, for instance, along the back, from the rump to the hinder part of the shoulder ; whilst the limbs, shoulder, and neck are the toughest, driest, and least esteemed.

The names of the several joints are as follows, and the way in which they are generally cooked is described :—

(1) **Sirloin.**—Two sirloins together correspond to saddle of mutton, and are known as a baron of beef. The sirloin is almost invariably roasted, and is the best joint for that purpose. Some of the kidney suet is always taken away, and some persons cook the under-cut or roll separately, instead of roasting it with the sirloin. The under-cut is better than any other part for entrées, such as grenadines, olives, fillets of beef, etc.

(2) **Rump.**—Broiling steaks should be cut from here. Also roasted. A first-rate joint for any purpose.

- (3) **Aitchbone.**—Often salted and boiled.
- (4) **Buttock.**—A large lump of solid meat without much fat. It is best when boiled or stewed.
- (5) **Topside.**—The top part of buttock, cut into steaks and joints for roasting.
- (6) **Silverside.**—The bottom part of buttock, generally salted and boiled.
- (7) **Thick Flank.**—Coarser in fibre than some parts, but well flavoured, and generally tender. No bone and little fat, and sold at a reasonable price, so that it is one of the most economical parts to buy, whether for pies, puddings, or roast; also for steaks.
- (8) **Thin Flank.**—May be used for stews, but is rather fat. Is always low-priced. Perhaps the best way to use it is to salt or pickle it, and eat it cold, when it is a very economical joint.
- (9) **Leg.**—Only purchased for soup meat, or for slow stewing.
- (10) **Fore Rib.**—The six ribs nearest the sirloin are the best. The best end of the ribs, or wing rib, has a strip of yellow gristle running about an inch from the outer skin, and is always to be preferred. The gristle should always be cut out before it comes to table. It is generally thought more economical to have the bones taken out and the meat rolled round; the bones then serve for soup. This applies, of course, to the last three or four ribs, not the wing ribs.
- (11) **Middle Rib.**—Almost always roasted. It is from this part that the top and back ribs are obtained.
- (12) **Chuck Rib.**—Cut into steaks, etc., mainly for stewing or puddings. The bladebone steak is also cut from here.
- (13) **Leg of Mutton Piece.**—Really part of chuck rib. Solid meat with little fat. The best for pies and puddings, as it is full of gravy. Good steaks are cut from it, and it is very economical to roast.
- (14) **Brisket, or Breast.**—Sold at a low price for stewing or salting.
- (15) **Clod.**—Part of this is often sent if soup meat is ordered. If it is not fat, it makes good pies and puddings, but the meat should be stewed first. It is also suitable for an economical stew.
- (16) **Neck.**—Used in the same way as the clod.
- (17) **Shin.**—For soups, gravies, and cheap stews.
- (18) **Ox Cheek.**—This is too bony to be a very cheap joint, although it is sold at a low price, and can be made very palatable by slow stewing, or is good for soup. The brains, well soaked, and boiled or fried, make a good dish.
- Beside these joints, the following parts of the ox are sold for food :—
- (19) **Cow-heel.**—The feet are boiled and neats-foot oil extracted. These are sold by butchers with the skin on, and are cooked and sold by tripe-dressers or used for soup. They make as good jelly as calves' feet, and what remains of them is very good eating. They can be used for soup in the same way as calves' head.

(20) **Ox-tail.**—For soups and stews.

(21) **Heart.**—Generally roasted. Economical, but very indigestible.

(22) **Tongue.**—Can be bought fresh or salted. Is considered a delicacy. Usually boiled and eaten cold, but also stewed as an entrée.

(23) **Liver.**—Very nutritious and very cheap, but coarse flavoured.

(24) **Lights, or Lungs.**—Sold for cats' and dogs' food.

(25) **Kidneys.**—For puddings, pies, or stewing. They are cheaper and less delicate than the kidneys of sheep, and are difficult of digestion. Kidneys need thorough but light cooking, for if they are exposed to a high temperature they dry up and become tasteless and horny.

(26) **Tripe.**—Sold partially cleaned by the tripe-dressers. It is said to be the most digestible of meats, and specially suited for invalids, although rather fat. Sometimes served as an entrée. It consists of the paunch or ruminant stomach of the ox.

(27) **Sweetbread.**—Coarser in texture than that of the calf, needing long and careful cooking.

(28) **Suet.**—The inside fat. That which surrounds the kidneys is the firmest and best for all purposes, especially for puddings.

(29) **Spleen, or Milt** of bullock, is sold for food. It is generally stuffed and roasted, or stewed, or boiled for stock.

It is not possible to lay down any exact rule as to the relative cheapness of each joint of meat. The joint itself varies, the prices vary, the tastes of eaters vary, perhaps, most of all. But, by way of a rough calculation, the following may be offered :—

Rumpsteak, beefsteak, and bullock's liver are all three without any bone. Spend one shilling, and you will get 2 lbs. of liver, 1 lb. of beefsteak, or 12 oz. of rumpsteak. Of shin of beef cut without a bone, a shilling buys 1½ lb., and of the solid roasting joint, cut from the shoulder, about 1 lb. 3 oz. Among these are the cheapest of animal food. The shin of beef is only capable of satisfactory results in the hands of a good and patient cook. Ribs of beef cost a little less than beefsteak per lb., but then there are 2 oz. or 3 oz. of bone in each shilling's worth, besides a quantity of fat. The shoulder costs less than the ribs, and has no bone.

## VEAL.

Veal is, by many, considered both unwholesome and indigestible. The practice, now illegal, of bleeding calves before killing them, until they were actually in a state of disease, had probably some effect in producing a general belief in the unwholesomeness of veal. The flesh of the immature animal is less easily digested because its fibres offer greater resistance to the digestive agents. When its fibres are reduced to a fine state of division by the various processes of mastication, mincing, pounding, and sieving, veal is easily digested. Weight for weight, it contains less nourishment than beef, in consequence of having in its composition a higher percentage of water (78 in 100 parts, as com-

pared with 72 per cent. in beef), and a corresponding decrease in the proportion of proteids and fats.

**To Choose Veal.**—The whiteness of veal is considered a sign of good quality, and animals were bled to make their flesh white. On the Continent calves are killed much younger than is customary in this country, and they are fed on milk and white food, but no feeding will make every calf equally white fleshed. As immature meat keeps badly at all times, it is of importance that the calf should not be bruised in bringing it to market. The fat should be plentiful and very white, especially that surrounding the kidney, which in all animals affords a good indication of quality.

Very young veal is constantly brought to table on the Continent, but no calf may be killed for food less than 14 days old. The flesh is in the higher state of perfection when the calf is 8 or 9 weeks old; after 12 weeks it becomes coarse in texture.

Veal is most plentiful from February to the end of July.

### MUTTON.

**Season for Mutton.**—Mutton is in season all the year round, different counties producing sheep for the market at various seasons; but just as beef is said to be in its prime when French beans are in, i.e., when the pastures are greenest and freshest, so mutton is in best condition when grass is plentiful, rather than when it is fattened entirely on roots and cake.

Mutton is often thought more digestible than beef, and is therefore prescribed for invalids, but a matter such as this must be decided by individual idiosyncrasy rather than rule. It is always thought to be less satisfying, and as it is impossible to buy a solid lump of boneless mutton, it is, no doubt, on that account also, less economical.

**Manner of Cutting up.**—Almost every large city has a particular manner of cutting up, or, as it is called, dressing the carcass. This process is very simple, and as butchers have found that much skewering back, doubling one part over another, or scoring the inner cuticle or fell, tends to spoil the meat and shorten the time it would otherwise keep, they avoid all such treatment. The sheep then is hung up and the carcass flayed (which operation is performed while yet warm). After separating the hind from the fore-quarters, with eleven ribs to the latter, the quarters are usually sub-divided in the manner shown in the illustration.

(1) **Leg.**—This is the most economical joint if it is sold, as is usual, at only one penny a pound more than the shoulder, for unless there is a considerable difference in price, it does not compensate for the greater proportion of bone in other joints. Legs can be bought of all weights, from about 5 lbs. to 6 lbs. Mutton steaks are cut from the leg.

(2) **Loin.**—This is considered the best roasting joint. Two loins together make a saddle; rather a wasteful joint, because of the way it is carved. The upper part of the loin and leg together form a haunch. Chump chops are cut near the tail, where the proportion of bone is greater.

(3) **Chump end of Loin.**—Cut with the loins for a saddle, always roasted, or in chops for broiling.

(4) **Best end of the Neck.**—Roasting, boiling, or for mutton cutlets. Small mutton is best for cutlets.

(5) **Scrag end of the Neck.**—Broth, stews, or boiling. A low-priced joint, not very fat, but very bony and wasteful.

(6 and 8) **Shoulder.**—Often sold divided for roasting. It is not so economical as the leg, and is fatter.

(7) **Breast.**—Often sold at a cheap rate for stewing or boiling. Too fat for many persons, but often economical.

Besides these joints, the following parts of the sheep are sold for food :—

(9) **Head.**—Sometimes sold with the “pluck,” but more often alone. Can be boiled, and made into most excellent broth or braised, and is usually an economical dish, but its price varies very greatly.

(10) **Heart.**—Sometimes sold separately, and sometimes with the rest of the “pluck,” consisting of liver, lights, and heart. Sheep’s liver can be fried or made into soup. The heart is best roasted. The whole of the “pluck” is frequently eaten. In Scotland it is made into “haggis.” Probably the cheapest form of butcher’s meat.

(11) **Kidneys.**—Broiled or stewed. A very common breakfast dish. The kidney is often sold with the loin.

(12) **Feet,** or “trotters,” as they are generally called, are cleaned and boiled and retailed at a halfpenny and a penny each.

(13) **Mutton Suet** is better than beef for frying, because it is less likely to burn, but it is not so good for puddings.

## LAMB.

Lamb is to be had in London from Christmas until late autumn. It is dear and scarce from January to March, gets cheaper through the summer months, from Easter to July or August ; and late in the season, as far on as October, lamb is still sent southwards from Scotland. A good deal of lamb is now imported from New Zealand, and is slightly cheaper than the home grown. The brand known as “Canterbury” is the best.

All young meat is less nourishing, and is said to be less digestible than that which is full-grown ; but lamb has a better reputation in this respect than veal.

Lamb should not be in the least high ; and if, therefore, it has to be kept, it should be partly cooked, such being the most certain way to preserve it from taint.

**Mode of Cutting up Lamb.**—Lamb, when large, is cut into the same joints as mutton ; when small, it is sold in quarters ; the leg and loin to the hind, and the shoulder, breast, and neck to the fore-quarter.

Lamb’s sweetbreads are considered a delicacy, and are expensive. Lamb’s fry consists of the liver, sweetbread, some of the inside fat or “leaf,” and the heart.

Lamb's kidney, lamb's head, and lamb's trotters are also eaten. The fore-quarter of lamb is, by many persons, preferred ; but the leg, here, as in mutton, is more economical.

## PORK AND BACON.

**To Choose Pork.**—There is now far less necessity for care in the choice of the joint of pork, since well nigh the whole is of far better quality than a few years since. The fat of the best pork is white, the lean of a brownish hue, ingrained with fat ; the rind should be thin, and the bone fine but solid ; these last are generally accepted as sure indications of good quality of meat.

The usual joints of small fresh pork are the leg, the loin, which in turn is divided into fore—or, as it is sometimes called, the crop or spare-rib—and hind ; the hand, the spring, the belly, middle cut, and the head. The respective prices of these parts varies somewhat according to the season and the district. The heavy fat pig is cut up in various ways ; in the north of England, where large fat hogs are now mainly killed, the legs, shoulders, belly, and the fat, after the roasting parts are taken off, are generally salted lightly and then boiled ; the loin, spare-ribs, etc., are roasted whole, save when converted into so-called pork-chops, which are considered to be very rich and suitable only when the weather is very cold.

**The Names of the Several Joints** are as follows :—

- (1) **Spare-rib.**—Generally roasted.
- (2) **Hand.**—Usually slightly salted and boiled.
- (3) **Fore-loin.**—For roasting.
- (4) **Spring, or Belly.**—Generally salted and boiled.
- (5) **Loin.**—The best roasting joint, but rather fat. Large chops are cut from it.
- (6) **Leg.**—The most economical roasting joint in this as in most other animals. It is less fat than the fore-quarter.

Besides these joints, the following parts of the pig are sold for food :—

(7) **Head,** also known in various parts of the country as “cheek,” or “chopper.” Weighs 5 lbs. to 6 lbs. and can often be bought very cheap. Is generally slightly salted and made into brawn. Can also be collared or boiled.

(8) **Feet, or Pettitoes.**—Generally boiled and served hot or cold. Not infrequently they are boned and stuffed.

(9) **Liver, Sweetbread,** and some of the inside fat are often sold together under the name of pig's fry.

(10) **Lard.**—Any part of the fat is melted down and sold in bladders, tubs, or by the pound, for pastry making, frying, etc. The lower

the heat at which it is melted, the smoother and less granulous it is. Occasionally it is said to be mixed with flour or starch. Much is imported annually from America. It has a lower melting point than beef or mutton fat, and—partly for that reason—is less suitable for frying than other fats. It is better adapted for making pastry.

**Ham.**—The sources of supply of the finest hams are now far more numerous than a few years since. There is also a great change in the size, form, and degree of fatness of the ham now desired. In place of the 20 to 40 lb. hams, by no means uncommon in the past, the highest priced ham is one of some 10 to 12 lbs.—a nice, plump long ham, fine in the skin and bone, fairly fat, and cut off a carcass of pork furnished by a pig which has not lived more than seven months. This kind of ham is delicate in flavour, short in texture, easily digested, and economical.

**To Choose a Ham,** select one fine in the bone, then run a skewer in close to the bone to the middle of the ham. If it comes out clean and smells sweet, it is good, but if it smells strong and has fat adhering to it, choose another. If the ham be cut, see that the fat is white and not streaked with yellow. All meat first goes bad near the bone. A ham may not be rancid, yet not of the best quality; it may be too salt or flavourless, owing to improper curing. Connoisseurs still prefer a ham which has been kept for some months, but the difficulty in obtaining them is far greater now than formerly; this is due to two causes, the vastly increased consumption of hams and the change in the system of curing.

There are various ways of keeping hams; the most common is to enclose them in brown paper and calico bags; others again place them in a box covered with malt combs or broad bran.

**To Buy Bacon.**—In choosing bacon, similar action can be taken, but as a rule the shoulder is the only part likely to be tainted. The enormously increased consumption of so-called breakfast bacon, for which the streaky—or that portion of the side extending from the shoulder to the hip, and about three-fourths of the depth of the side—is most in demand; consequently it realizes much the highest price per lb. Many economical persons now purchase the shoulder and cut it ham shape, so that it often does duty as a ham. It is not so fine in texture and has more bone, but it is certainly an economical joint. The following is a list of the parts into which a side of bacon is now generally cut.

### POULTRY.

**To Choose Poultry.**—When fresh, the eyes should be clear and not sunken, the feet limp and pliable. Stiff, dry feet being a sure indication that the bird has not been recently killed; and if the bird is plucked there should be no discoloration of the skin.

Fowls, when young, should have smooth legs and feet; the cock bird is young when it has smooth legs and short spurs, hens when young have smooth legs. The bones of all young birds are soft and gelatinous, and they always harden with age; the end of the breast-bone when young is soft and pliable; when otherwise, it may be accepted as sure evidence of the advanced age of the bird. The signs of an old fowl are its stiff, horny-looking feet, long spurs, dark-coloured and hairy thighs, stiff beak and bones. Game fowls, and those with dark-coloured legs, are better for roasting than for boiling. White fowls, such as Dorkings, are more suitable for boiling.

**Turkeys.**—Turkeys, when young, have short spurs and smooth, black legs; when the legs are pale, or reddish and rough, and the spurs long, these marks may be taken as sure indications of age. When freshly killed the eyes should be full and bright. Norfolk turkeys are considered the best; the cock-bird is usually selected for roasting, and the hen for boiling.

Geese and ducks, when young, have yellow feet and bills; as they grow old they become darker and reddish in colour. The feet of freshly killed geese and ducks are moist and soft, but, like those of fowls and turkeys, they become dry and stiff when they have been killed some time.

### GAME.

**To Keep Game.**—All water birds should be eaten as fresh as possible, because their flesh is oily and soon becomes rank. Most game is kept until putrefaction has commenced, it being thought that the flavour is thereby developed. The time that it may be kept depends upon (1) the taste of the persons who are to eat it; (2) the weather; (3) the age of the bird. Taking all these together, it is impossible to lay down any precise rules. In damp, muggy weather, even if the thermometer is not very high, game will keep a very little time; but in clear, windy weather, even if it is not very cold, it will keep for many days. It should always be kept in the fur or feathers, and should not be drawn, and should be hung up in a current of air. It may sometimes be necessary to pluck, truss, and half cook it, in which state it will keep a day or two longer.

Old birds may always be kept longer than young ones, so that it is well, in case of having a good deal of game, to cook the old on one day and the young on another. Old birds also need longer cooking.

**To Choose Game.**—At the beginning of the season it is easy to distinguish between old and young, but towards the end of the year the distinctions become obliterated. Besides the smoothness of the claws and the small lip cleft of a young hare, the ear is tender and can be easily torn. This sign, however, is not infallible if the ear is torn by

the poulterer, who, by long practice, can always tear it very readily. The short, stumpy neck and long joints of a young rabbit or hare are a better guide, and a small, bony knob can be felt near the foot of a leveret, which is absent in a full-grown hare. Partridges, at the beginning of the season, can always be distinguished by the shape of the long feathers in the wing; in an old bird they are round at the end, like the letter U; in a young one they are pointed, like a V.

The red-legged French partridges are rather larger and cheaper than the English, but they are not considered so good. The size of the spur, the smoothness of the legs, and the tenderness of the pinion are the best guides in choosing a pheasant; and, indeed, these always are the points to observe in all birds, so far as their age is concerned.

If they are in good condition the breast is thick and hard; if lean, the breast feels thin and soft. The feet generally tell if a bird is fresh. They should be supple and moist, especially in water birds, but they soon become stiff and dry after the bird is dead.

Game is less fat than poultry or butcher's meat, and is generally thought to be very nourishing. It is also easy of digestion, and is valued in the sick room as well as on the table of the epicure. This does not apply to wild fowl, which have close, firm, and rather oily flesh, and are, therefore, unsuitable for delicate persons.

A number of small birds do not, strictly speaking, come within the limits of either game, wildfowl, or poultry. They are eaten as articles of luxury to no great amount, and often replace game on the dinner table.

## PRESERVED FOODS.

**The Nutritive Value of Tinned Meat** is less than that of fresh meat, and it is somewhat insipid, owing to the loss of the osmasome, which gives to meat its agreeable flavour. In consequence of this, and because when it is overcooked the fibres become tough, a comparatively small proportion may be digested and assimilated, and so it is less satisfying than an equal amount of fresh meat. Tinned goods of nearly every description are more or less cooked, the time varying from five minutes to an hour.

If any air remains when the tin is soldered, fermentation may ensue: a bulging tin indicates this condition. In all tinned foods there is a danger that small lumps of solder, used in sealing the tin, may fall inside, and be accidentally swallowed with the meat. In turning out a tin they should be looked for in the sediment at the bottom and removed.

**Tinned Goods to be Stored in a Cool Place.**—They can then be turned out easily and sliced more evenly. The larger end of the tin should be cut away, and a small hole made in the opposite end to admit air, which, by its pressure, enables the meat to slip out easily. Great care is needed in opening tinned game and poultry.

**To Heat Tinned Meat, etc.**—The tin containing meat, game, or poultry should be immersed in boiling water until its contents are sufficiently heated, then opened and emptied. Birds may be served whole, but they are better cut up and cooked gently in a good sauce, which

should be highly seasoned and flavoured to counteract the insipidity which very often characterizes tinned foods. Birds intended to be served cold should be taken out of the tin very carefully, well-dried and glazed. Breasts and wings of tinned birds are, as a rule, quite tender, but the legs are usually hard and tough, and should be converted into rissoles or croquettes, and disposed of with as little delay as possible. Tinned foods of this description soon become unfit for use.

**Tinned Fish.**—Salmon, lobster, oysters, prawns, sardines, anchovies, herrings, and red mullet are the chief varieties of tinned fish. A good brand of the two first-named, if well drained, may be used as a substitute for fresh fish in many fish entrées and salads, thus materially reducing their cost. Tinned oysters should not be served "au naturel," but they answer very well for soup, sauce, and forcemeat. A good brand of prawns may be used for a curry.

**Tinned and Bottled Soups.**—Among the best may be mentioned—gravy, mock turtle, ox-tail, tomato, turtle, and other thick soups; the thin soups are less satisfactory. In an emergency tinned soups are invaluable, as they only require warming and a little additional flavouring and seasoning. Generally they may be diluted by rinsing out the tin or bottle with a small quantity of hot water.

**Tinned or Bottled Vegetables** are used extensively, and form an excellent substitute for fresh vegetables. To obtain satisfactory results, the method of warming should be adapted to the vegetable. A tin containing asparagus should be immersed in boiling water for about ten minutes and afterwards carefully opened, and its contents allowed to slide gently on to a drainer or a slice of toast. Peas, flageolets, lima beans, and haricots verts should be well rinsed and afterwards immersed in cold water for a short time, well drained, and cooked for a few minutes in boiling water. Salt to taste should be added; a little fresh mint and a good pinch of sugar will greatly improve the flavour of peas. A little butter and a good seasoning of salt and pepper should be added to spinach, while tomatoes should be well drained, heated and seasoned to taste. Vegetables are also preserved in bottles.

**Tinned and Bottled Fruits** of all kinds should be emptied into a glass or porcelain dish several hours before being served, and, when possible, chilled in a refrigerator. Unsweetened bottled fruit will be found an excellent substitute for fresh fruit.

## VEGETABLES.

We will now treat of those vegetable foods that are eaten with, and to some extent supply, the deficiencies of meat.

**Potato as Food.**—No doubt much of its popularity is due to its cheapness, its good keeping power, and its unobtrusive flavour. Since the potato disease it has not always been as cheap as once it was, but it still remains one of the cheapest, if not the cheapest, of foods. We have cheap corn now, and if potatoes and corn were the same price per pound, corn would be the cheaper of the two. For potatoes

are very watery. Three-quarters of the weight of every potato is water, and of the remaining quarter, half is starch, there being much less of flesh-forming material than in many other cheap foods. If a man had to live on potatoes alone, he must eat many pounds' weight daily in order to obtain flesh-formers enough to do even moderate work. The Irish, who do live on potatoes, add buttermilk to supply what is wanting, and even so consume immense quantities of vegetables. Potato, however, besides starch and water, contains much ash or salt, and is for that reason an excellent anti-scorbutic. It is a strange fact that many English people, from one week's end to another, eat no vegetable except potato, an exotic, acclimatised here at the cost of much pains and perseverance.

The potato belongs to the order Solanaceæ, to which also belong some of the deadliest poisons we possess, and also contains a poisonous principle known as solanine. Potatoes that have been frozen rapidly decompose, because, owing to the freezing of the water that they contain, the cells are burst and broken. They also deteriorate if they are allowed to sprout. Some or all of the starch is changed to dextrine, a gummy substance with a sweetish taste, which no longer assumes a mealy appearance on boiling as does a starchy potato. The waste in boiling is much less if the tubers are boiled in their skins, which are of a cork-like substance impervious to water. There is also considerable waste in peeling potatoes, owing to the fact that the least watery and most albuminous part of the tubers lies immediately under the skin. It is said that one-seventh of every potato is wasted by the common method of cooking.

Potato starch is largely used to adulterate other farinaceous preparations, as it is the cheapest form of starch. It is, however, stated that it turns watery sooner than other starches if allowed to stand after it is cooked.

**Value of Vegetable Food.**—If potatoes are watery, most of the roots and tubers are even more so. Out of every 100 lbs. of potatoes, 75 lbs. are water; out of every 100 lbs. of carrots, 89 lbs.; of turnips, 92 lbs.; of the artichoke, 80 lbs.; of onion, 91 lbs.; of the 8 or 10 lbs. that remain, there is sometimes starch, sometimes an analogous substance known as inulin, and there are 1 or 2 lbs. of albuminoids. In all, too, there is a considerable amount of cellulose and woody fibre, both of which are indigestible. We must ascribe their chief value to the salts they contain and to the value of variety in food. They also introduce into the system some water, necessary for digestion and assimilation. It is much to be regretted that, by the manner of cooking vegetables that prevails in this country, a great part of these salts is dissolved in water and thrown away, only the vegetable itself being eaten. All vegetables are best when they are grown quickly, in which case they have less woody fibre. Sometimes light is excluded, for light leads to the development of chlorophyll, and also of the characteristic principle of the plant, which is often unpleasantly pungent and occasionally unwholesome.

**Fresh Vegetables.**—All green vegetables should be as fresh as possible. A large number of those sold in towns are plucked days

before, full of sap, and stacked in heaps under circumstances the most favourable to fermentation, and sufficiently accounts for the unpleasant results often experienced after eating cabbages, etc., in such a state.

**Dried Vegetables.**—Many vegetables are now sold dried and compressed. Sliced carrots, turnips, cauliflowers, etc., suitable for julienne soups or stews, are often useful to the housewife when such vegetables are out of season and dear, and also when economy of time is necessary; but they are not as well flavoured as the fresh vegetable. Granulated potato, sold in packets, is a preparation that is useful in the same way. It only requires to have boiling water poured on it, and in ten minutes is ready to serve as mashed potato, or to be made into fritters, etc. Potatoes, like other vegetables, however, are now sliced, and “evaporated” or dried.

Pulses afford the most nourishing food that we know. Lentils, beans, and peas in point of nourishment stand in the order in which we have placed them, though very near together, lentils heading the list with 14 per cent. of water and 24 per cent. of casein. The well-known Revalenta Arabica contains lentil flour, generally mixed with barley or other meal and salt. But it is sold at many times the price of any of its ingredients. The celebrated sausage served out to the German troops during the war of 1870-71, was made of peas, bacon, and onions. Each one weighed a pound, and could be made into soup or eaten in sausage form. They are easily carried and kept, and contained the requisite proportions of the various kinds of food, but we are told that the men tired of it in a few days. It appears to be the fact that the pulses cannot be used as the flesh-forming food, and taken even in moderation they disagree with some persons. Generally, however, they are relished if so prepared that the tough skin is removed, and for this reason there is no way of cooking them more suitable than as purée soups, where they require for nourishment's sake no addition of meat, owing to the amount of albuminoid, which is far greater than in meat itself. They do require added fat. Green peas are more digestible, but less nourishing, than dried or even than full-grown peas, which require prolonged boiling to make them digestible. Bi-carbonate of soda, usually added to green vegetables to preserve the colour, at the same time softens the cellulose. Consequently it is a useful addition to old green peas, or to any of the dried pulses.

Many varieties of dried beans are sold, and all, considered as food, have much the same value. French beans are eaten in an unripe state, pod and young seeds together, in which state they more nearly approach to other green vegetables than to the dried pulses.

Lentils are of two kinds, the orange-coloured Egyptian and the browner German lentil. The former are cheaper, the latter better flavoured. Pea and lentil flour is often adulterated with other flour, which diminishes its food value.

Salads generally contain no flesh-forming or heat-giving material, but they are valuable because they introduce into the system large quantities of saline matter, which is generally removed from vegetables in the process of cooking. Their value in this way to the poorer inhabitants of our towns is scarcely to be over-rated. Sufficient care

is not, however, always bestowed upon cleansing them, and there is no doubt that parasitic animals are sometimes introduced into the human body through such negligence. They need to be freshly gathered in order to be wholesome, although they may regain some of their crispness if the stalks are freshly cut and placed under water. Many salad plants contain some essential oil, to which their characteristic flavour and odour are due. Lettuce has, besides, a small quantity of mild narcotic, the effects of which may occasionally be observed.

**Fungi** are comparatively little used in this country, although they are plentiful and highly nutritious. Only three kinds are commonly considered as good for food, and of these only one can be said to be usually eaten. These are the mushroom; the morel; and the truffle. Mushrooms contain much nitrogen and also much fat, and they are less watery than most vegetables.

**Lichens** have not often been used as food. Iceland moss is used as a food for invalids, and is nourishing. It grows where nothing else will grow, on barren rocks in northern latitudes.

**Seaweeds** are occasionally employed as food in England. Irish moss, or carra green, is given in the form of soups and jellies to consumptive patients, and is also used commonly as a food in some places. In 100 lbs. of the moss there are only 19 lbs. of water and 9 lbs. of albuminoids, so that it is among the most nourishing vegetable foods we have. Laver, tangle, or red ware, and pulse, are also collected and eaten in pickle, or as a substitute for other boiled vegetables.

**Boiling Vegetables.**—The time vegetables take to boil depends on their age. Young vegetables with tender fibres will, as a rule, cook in about 20 minutes, whereas those fully matured, and consequently containing a relatively larger amount of fibrous substance, will average no less than 40 minutes. The colour of green vegetables may be preserved by adding a little soda to the water in which they are boiled. The discoloration is due to hard water holding in solution a certain amount of lime, which is destroyed by the addition of a little soda, thereby softening the water and preserving the colour of the vegetables. As soon as the vegetables are sufficiently cooked they should be removed from the saucepan and drained, otherwise they absorb water, lose some of their flavour, and become discoloured.

All vegetables should be put into boiling water, to which salt should be added in the proportion of 1 tablespoonful to 2 quarts of water. The salt greatly improves the flavour of the vegetables, and it also raises the boiling point of the water, thus tending to preserve their colour. Plenty of water should be used for green vegetables, and a little soda to soften the water and counteract the hardening effect of the salt. All vegetables must be kept boiling, but Jerusalem artichokes, vegetable marrows, and others of a similar character, must be boiled more gently than cabbage and other greens, otherwise they may break. As soon as the vegetables are sufficiently cooked the water should be drained from them, for some are liable to break, and one and all become watery when kept in the water after they are done.

They may, however, be covered with a cloth, and kept hot in a colander placed over an empty iron saucepan for a considerable time without injury.

**Stewing Vegetables.**—The long, slow process of stewing is not often applied to green vegetables, for it would destroy their colour, but celery, celeriac, salsify, and cardons are frequently stewed, the method being peculiarly adapted to them when old. Very little stock or water should be used, and the vessel containing these vegetables must be kept closely covered to prevent the escape of the steam, which helps to cook them.

## PASTRY.

**Pastry Making.**—The quality especially to be desired in pastry is lightness, and this depends almost entirely upon the amount of cold air in the pastry when expansion takes place in the oven. The best pastry is, therefore, that which contains the greatest quantity of the coldest air prior to baking. The repeated foldings and rollings to which puff paste is subjected have this increase of air in view; while in short crust the expansion is aided by adding baking-powder, or other acid and alkaline substances, which, when moistened, combine to form a constituent identical in its composition and effect with that of the atmospheric air to which puff paste entirely owes its lightness. The difference between puff, or flaky, and short crust is that in the former there are thin layers of air and pastry alternating, and in the latter the air fills small cavities all over the paste.

**Puff Paste** usually consists of flour and butter in equal proportions, but in short crust the proportions of fat and flour vary, and may be one-fourth for an economical paste, or three-fourths for a rich short crust. For ordinary purposes  $\frac{1}{2}$  a lb. of butter or fat to each lb. of flour, will, with the addition of a good teaspoonful of baking-powder, make a sufficiently rich crust. Fine starchy flour makes the lightest pastry, the larger proportion of gluten in household flour—although exceedingly valuable from a dietetic point of view—tends to make pastry tough. Flour should always be stored in a cool, perfectly dry place. By sieving it before use, air is introduced, and if there are any lumps these may be rubbed out, with the result that the pastry will be lighter. When baking-powder is used it should be sieved with the flour, as this ensures its even distribution.

The amount of liquid required to moisten a given quantity of flour varies within narrow limits, but it may be approximately stated as being  $\frac{1}{2}$  to that of the flour. As a rule, 1 lb. of flour will need about  $\frac{1}{2}$  a pint of water, but allowance must be made for the addition of eggs, or when the fat has been reduced to a semi-liquid condition by undue friction, or prolonged contact with hot hands. The consistency of the butter determines the amount of water to be added to puff paste; when the butter is soft the paste must be equally so, otherwise it is impossible to keep the layers separate, and thus the paste is deprived of some of its flakiness. Rich short crust is lighter and more crumbly when made very stiff, but unless plain short crust is sufficiently moist-

ened it is hard and tough. Lemon-juice, like other acids, tends to make pastry lighter.

**Butter and Fat.**—The butter used for making pastry should be good and sweet, for nothing imparts its own unpleasant flavour to everything it comes in contact with more decidedly than inferior butter. Salt butter is not objectionable, if before being used it is well washed, and afterwards squeezed in a floured cloth to free it from moisture. Rancid butter may have some of its disagreeable flavour removed by kneading it first in new milk and afterwards in water. For ordinary pastry clarified fat may be recommended in preference to lard or dripping, for it is entirely free from the fatty taste which characterizes the purest home-made lard, while that bought ready prepared is frequently adulterated, and, moreover, has occasionally a strong, unpleasant taste. The objectionable characteristic flavour of dripping may be in some measure removed by creaming it, that is, beating it with a knife on a plate, and raising it well with every movement of the hand, so as to subject every part to the purifying influence of the atmosphere.

**Manipulation.**—The fat should be lightly, but very thoroughly, rubbed in with the tips of the fingers, never with the palms of the hands. The water should be added gradually, but quickly, to prevent hard lumps being formed, and to keep the consistence of the whole mass uniform. A knife should always be used for mixing, it being so much cooler than the hand. Some little practice is necessary to acquire the light, firm, even pressure and dexterous movements upon which success so largely depends. Paste should never be rolled backwards and forwards, but in short forward rolls, lifting the rolling-pin between the rolls. Puff paste should never be rolled off the edges, as this may force out some of the air; it is better to thin the edges by a little pressure, or an inward roll.

**Puff Paste** is allowed to stand between the turns in order that the butter may harden, and thus keep the layers of paste and butter separate. Paste to which baking-powder has been added should be put into the oven as speedily as possible, otherwise some of the effect of the baking-powder is wasted, its action beginning immediately the paste is moistened.

**Baking.**—All kinds of pastry should be baked in a moderately hot oven, for a high temperature is necessary to expand the air or gas, and thus make the pastry light, and also to burst the grains of the flour, thereby enabling these to absorb the fat immediately it melts. Unless the heat is sufficiently great to act upon the flour in this manner, the melted fat runs out and leaves the paste less rich, and also, probably, both heavy and tough. An oven with a good bottom heat is desirable for baking tarts and tartlets; when heated from above it is advisable to bake, or partially bake, the tarts before filling them.

## ICING.

Very pretty results can be obtained by the use of icing tubes or cones, which may be purchased at any ironmongers. Make an ordinary

conical sugar bag of paper, place an icing tube at the bottom, and fill the bag with icing sugar. Then tear away the paper covering the point of the tube and squeeze the sugar through.

### PUDDINGS, OMELETS.

To avoid repetition in the recipes for these, the application of the principles of boiling, steaming, baking, and frying such preparations will be here briefly described. Success in preparing dishes of this class depends more on suitable proportions, manipulation, and proper application of heat than on the materials themselves, which are usually of a simple character. Although the terms suet, milk, batter, and bread may be used to describe briefly a large proportion of the puddings which form part of the daily fare of the masses, there are a large number of sweet dishes that cannot be included in this classification, but individual recipes to which general remarks do not apply will be described in detail.

Each recipe gives, as nearly as possible, the exact amount of the ingredients which comprise the dish. Such terms as "well buttered mould," "creaming," "stiffly-whipped or whisked" will be explained here, for the convenience of the uninitiated.

**Preparation of Moulds and Basins.**—When the pudding to be cooked is substantial in character, the mould, basin, or dish may be greased with a little fresh butter or fat; but moulds intended for light puddings, soufflés, or omelets should be well coated with cool clarified butter, using a small brush for this purpose.

**Chopping Suet.**—Either beef or mutton suet may be used for puddings: paste made with the former is lighter, mutton suet is less rich, and its flavour is not always liked. To prepare suet for use, remove all skin, shred or cut it down in very thin flakes, and chop it finely. During the process sprinkle it liberally with some of the flour or bread-crumbs; or, when making mincemeat, which contains neither of these ingredients, use some of the sugar for the purpose. Chopping should be done with a large sharp knife held in the right hand, raising and lowering the handle quickly, while the fingers of the left hand hold the point of the blade, and keep it pressed firmly to the boards.

**Creaming Butter and Sugar, or Yolks of Eggs and Sugar.**—The term "creaming" by no means describes the process by which butter and sugar, or yolks of eggs and sugar are amalgamated. Butter and sugar are pressed by means of a wooden spoon against the sides of a basin until the friction has softened the butter, and the ingredients are then stirred vigorously, keeping the bowl of the spoon constantly pressed against the sides or bottom of the basin, not alternately raised and lowered as in beating. In cold weather the butter may first be slightly warmed, but it must not be allowed to melt. Yolks of eggs and sugar are simply stirred together until thick and creamy.

**Preparation of Dried Fruits.**—As currants do not keep for any length of time they should never be bought in large quantities. They may be cleaned with a little flour on a sieve, but some cooks pour boiling

water over them to plump them, and afterwards drain and dry them thoroughly. In either case, they must be dropped on a plate a few at a time to detect the stones. Sultanas should be cleaned with a little flour on a sieve and have the stalks removed, and Valencia raisins must be halved and stoned.

**Boiled Puddings.**—To ensure perfect cooking, the following rules, which apply equally to rich or plain, large or small puddings, must be observed :—

1. The mould or basin must be perfectly dry and well coated with butter or fat.

2. The pudding must completely fill the mould or basin.

3. A scalded and floured cloth should be tied securely over the top of the basin, but rather loosely round a roly-poly or other pudding not boiled in a basin.

4. The water must be boiling rapidly when the pudding is put in.

5. The water must completely cover the pudding, and be deep enough to float those boiled in cloths, otherwise a plate or saucer must be placed at the bottom of the pan.

6. As the water boils away, boiling water must be added.

7. The pudding must stand a few minutes before being turned out, in order that some of the steam may escape, and thus cause the pudding to shrink and less liable to break.

**Steamed Puddings.**—Puddings steamed over water are lighter than when immersed in it, but they cook more slowly. A quicker method, and one that gives practically the same results, is to stand the pudding in a saucepan containing boiling water to about half the depth of the mould or basin, the surrounding water being frequently replenished with more boiling water. A pudding to be steamed should not more than three-quarters fill the basin ; and two folds of paper, made water-proof by being rubbed with butter or fat, should cover the top instead of a cloth, which prevents the pudding rising.

**Milk Puddings.**—Milk puddings usually have the addition of eggs or some granular or powdered farinaceous substance, or they may consist of milk, eggs, and a farinaceous grain or powder. The three varieties would be represented by a custard pudding, a plain rice pudding, and a cornflour or semolina pudding made with eggs. A well-made milk pudding is a palatable and usually acceptable dish, and being so easily made it is difficult to understand why they are nearly always served in too dry or too liquid a condition, when the mean is so easily obtained. If a custard pudding be allowed to boil it becomes watery ; if cooked too quickly, without actually boiling, it is full of holes. When the oven is too hot the pudding may be kept below boiling point by placing the dish containing it in a tin of water, to which must be added, from time to time, a little cold water to prevent it boiling. Rice pudding, or any farinaceous pudding without eggs, should first be put into a hot oven for a short time to bring the milk quickly to near boiling point, but afterwards they should be cooked as slowly as possible, in order that the grains may have ample time to swell. It is better to simmer small grains like ground rice, semolina, and fine sago in a saucepan, preferably a double one, until the substance is well cooked.

Eggs are easily digested when lightly cooked, but become insoluble when over-cooked, and for this reason they should not be added to the farinaceous preparation until it is fully cooked, and then 10 minutes baking in a moderate oven is all that is necessary to set the egg and brown the surface of the pudding. For ordinary purposes skimmed milk may be used, but the fat or cream of which it has been deprived should be replaced by a little butter or finely-chopped suet, the proportion of the latter being  $\frac{1}{2}$  a tablespoonful to 1 pint of milk.

**Batter.**—Whether the batter is intended for a pudding or fritters certain points need careful attention.

1. It must be mixed as smoothly as possible, and this is effected by not adding much liquid until all the lumps of flour have been beaten out.

2. It should be well beaten to get the air in.

3. It should stand for at least 1 hour in order that the flour grains may swell and burst and ferment. The batter may be made more easily digestible by prolonging this process of fermentation.

4. It is usually cooked, i.e., fried at a high temperature.

**Fritters.**—To successfully fry anything coated with batter the fat must be hot enough to immediately harden the surface of the beignets or fritters, and thus prevent it soaking in and making them greasy, and yet it must not be sufficiently hot to brown them before they are crisp and well-cooked.

**Soufflés and Soufflé-Omelets.**—Moulds or tins in which soufflés are to be steamed or baked should, after being well coated with cool clarified butter, have a band of 3 or 4 folds of buttered paper tied round their rim to support the soufflé when it rises above the level of the tin. All these preparations should be made beforehand, so that the mixture may not have to stand and possibly lose some of its lightness. The success of soufflés and soufflé-omelets depends largely upon the whites of the eggs being whisked to a proper degree of stiffness. When the eggs are fresh, all that is necessary to ensure this is careful separation from the yolks, the addition of a pinch of salt, and that the air whipped in is as cold as possible. Another important factor is the cooking. Soufflés are lighter when steamed than when baked, but great care is needed to keep the water surrounding them at simmering point and yet prevent it actually boiling. Soufflés should be served as soon as they are done, for if over-cooked or allowed to stand, they lose some of their lightness. They should be baked in a hot oven, and served as quickly as possible in the dish or dishes in which they are cooked.

## COLD SWEETS.

**Preparation of Moulds.**—Moulds, whether intended for creams or jellies, should be thoroughly clean, and when possible rinsed with cold water before being used. In preparing them for decorated creams, they are usually coated with a thin layer of jelly. To do this quickly and satisfactorily it is necessary that the moulds should be quite dry, perfectly cold, and the jelly on the point of setting when put into the mould, which is turned over and over until thinly, but completely,

coated. The decoration is a matter of taste ; it may consist of pistachio shredded or finely-chopped, almonds, glacé cherries, etc., and may afford no indication of the composition of the cream. But just as frequently the decoration consists of fancifully cut pieces of the fruit which, reduced to a purée, forms the basis of the cream. This branch of cookery affords almost unlimited scope for display of artistic taste. Success depends largely on a suitable combination of contrasting or harmonising colours, and the decoration being neat and uniformly disposed. Each section of the mould must be decorated separately, and the decoration fixed firmly by means of a little cool jelly, which must be allowed to set before changing the position of the mould. For this reason the process is a slow one, unless the mould meanwhile rests upon and is surrounded by ice. Without this aid the task is almost an impossible one in hot weather.

**Gelatine** is prepared from the bones, etc., of animals and certain other substances. It is obtainable in sheets, strips, and powder, and the best qualities are almost entirely free from any unpleasant taste. Of the three forms in which it is sold, the sheet or leaf gelatine is to be preferred, as it dissolves more readily, but the packet gelatine may be substituted for leaf gelatine in all the following recipes. However, when doing so, rather less than the stated quantity must be used, and two or three hours' soaking should be allowed. It is always best to soak the gelatine first, and then stir it in a small saucepan by the side of the fire in a very small quantity of water until dissolved. Gelatine varies considerably in strength, therefore it is impossible to state EXACTLY how much will stiffen a given amount of liquid under varying conditions. A little more is required in summer than in winter, and when the cream or jelly is to be put into one large mould instead of several small moulds ; but at all times it should be sparingly used, for an over-stiffened cream or jelly is almost uneatable.

**Jellies.**—Jellies may be described as solutions of gelatine in water, with wine, fruit, and other additions, and their clear, brilliant transparency one of their chief recommendations. However, jellies of this class do not comprise the whole list, for in addition there are the opaque nourishing milk and egg jellies, and also those made of apples and other fruit. Calf's foot jelly, which is stiffened by the gelatine extracted from the feet by boiling, has the advantage of being perfectly pure, but it is not more nourishing than the jelly made from bought gelatine. When nourishing jelly is required, it is better made from good veal stock. For ordinary garnishing and masking purposes, jelly made from leaf gelatine is more frequently employed than that made from meat. A plain lemon jelly answers admirably for coating the moulds for creams ; and variously coloured and flavoured, it forms the basis of many other jellies. By adding a little gold and silver leaf, or a few drops of yellow, red, or green vegetable colouring matter, considerable variety may be introduced at small cost. Pleasing effects may be produced by filling the projecting divisions of a mould with gold, silver, or coloured jelly, and the body of the mould with jelly that differs either in colour or character. Of course, the colours must be blended artistically ; bright-coloured creams, like strawberry, should be very simply decorated ; and the creamy-white of the almond,

or the delicate green of the pistachio nut, imbedded in the amber-hued jelly with which the mould is lined, contrast favourably with chocolate, as also does finely flaked gold leaf.

**To Clear Jelly.**—The agent employed for this purpose is albumen, of which substance the white of egg is largely composed. The shells and lightly-beaten whites of eggs are added to the water, wine, etc., when cold, the whole being continuously whisked while coming to the boil. At a temperature of 106° F., the albumen coagulates, and as the hardened particles rise to the surface they entangle and carry with them all the insoluble substances with which they come in contact; this forms the scum and the filtering medium, through which the jelly must be afterwards passed and repassed until clear. The jelly should always be allowed to simmer for a short time after it reaches boiling point, but it must on no account be whipped, stirred, or otherwise disturbed. A little lemon-juice or any other acid assists in the coagulation of the albumen.

**Straining Jelly.**—For this purpose a jelly-stand and bag are desirable but not indispensable, for an inverted chair and a clean linen cloth may be made to do duty instead. Whichever is used, it must be previously scalded to prevent the jelly setting while running through; and on a cold day, when the jelly runs through slowly, it is advisable to place a basin of hot water in the midst of it to keep it warm. The jelly-bag or cloth must never be squeezed, as a very slight pressure will force through the particles of scum, and thus make the jelly cloudy.

**Creams.**—The term cream is used to describe compounds of cream and fruit, fruit-purée, etc., or custards, variously flavoured, stiffened with gelatine, and more or less elaborately decorated. For this purpose double cream is required, that is, cream skimmed off milk that has stood for 24 hours instead of 12, or been well drained from the milk after being separated. Cream is more quickly whipped to a stiff froth when cold, and the air introduced by whipping should be as cold as possible. The process should not be continued one moment after the proper degree of stiffness is obtained; great care being needed in this respect in warm weather, when the cream, if over-whipped, is apt to turn rather quickly to butter. Apart from the manipulation of the cream, an important factor in all preparations of this description of which it forms a part, there are one or two points which need careful attention. The gelatine, dissolved in a little water, must be added at a certain temperature, for if it be too hot it causes the cream to lose some of its lightness; if too cold, it sets in small hard lumps instead of being intimately mixed with the whole. And again, after the gelatine is added, the cream preparation must be stirred until just on the point of setting, more particularly so when it contains fruit, almonds, pistachios, etc., which would otherwise sink to the bottom of the mould. On the other hand, if the mixture is allowed to become too cold, it does not take the shape of the mould. If available, the mould should stand in an ice cave or on ice until the cream sets firmly. When creams have to set without this aid, they should be made the day before, and kept in a cold place until required.

**To Unmould Jellies and Creams.**—It is much better to dip the

## PIPING, or FANCY CAKE ICING.

Make an ordinary grocer's paper bag, place one of the piping funnels at the bottom, pour the prepared sugar into the bag, and tear the paper off the point of it. Hold the bag in the right hand, and with the fingers of the left squeeze the sugar through the funnel. The piping tubes have teeth, and patterns of piping vary according to the "outlet."

mould once into hot water than 3 or 4 times into lukewarm water ; and as the whole is immersed it is necessary that the top of the jelly or cream should be afterwards dried with a clean cloth. One sharp "up and down" jerk will instantly detach the mould of cream or jelly, which should at once be placed on a cold dish, the hand being gently withdrawn. In turning out a border mould too large to be covered by the hand, the dish and mould together may be shaken sharply up and down until the border is detached.

Sweets of this description are usually garnished with a macédoine of fruit, whipped cream, or jelly. As a rule the jelly is chopped, and the more coarsely the better is the effect, for large pieces reflect the light, whereas fine-chopped jelly has a slightly opaque appearance.

### ICES.

**Freezing Mixture.**—The materials usually employed for this purpose are ice and coarse salt, or freezing salt, the correct proportions being 1 lb. of salt to 7 or 8 lb. of ice. More salt than this is often added with a view to making the mixture freeze more quickly, which it does for a short time, but the large proportion of salt causes the ice to speedily melt, and the freezing operation comes to a standstill unless the ice is frequently renewed. The ice tub or outer compartment of the freezing machine must be filled with alternate layers of crushed ice and salt. A good layer of ice at the bottom of the tub enables the freezing pot to turn more easily and more quickly than if it were placed on the bare wood.

**Preparation of Ices.**—The mixture to be frozen is placed in the freezing pot or inner receptacle of the freezing machine, and the lid firmly secured. When the vessel has been quickly turned for a short time, a thin coating of ice will have formed on the sides. This must be scraped down with the spatula, and well mixed with the liquid contents, and as soon as another layer has formed, it must be dealt with in the same manner. This, and the turning, is continued until the mixture acquires a thick creamy consistency, when it is ready for moulding. To ensure success the following rules should be observed :—

1. Avoid putting warm mixtures into the freezing pot, for the heat, penetrating through the metal, would cause the ice to melt.
2. Add sweetening ingredients with discretion ; too much sugar or sweet syrup prevents the mixture freezing properly.
3. Avoid, as much as possible, the use of tin and copper utensils ; they are apt to spoil both the colour and the flavour of ices.
4. Carefully wipe the lid of the freezer before raising it, so as to prevent any salt getting into the mixture.

**Moulding Ices.**—The ice, in the semi-solid condition in which it is taken from the freezing machine, is put into dry moulds, and well shaken and pressed down in the shape of them. If there is the least doubt about the lid fitting perfectly, it is better to seal the opening with a layer of lard, so as to effectually exclude the salt and ice. In any case the mould should be wrapped in 2 or 3 folds of kitchen paper when the freezing has to be completed in a pail. One part of salt should

be added to 3 parts of ice, and the quantity must be sufficient to completely surround the mould. It should be kept covered with ice and salt for 3 or 4 hours, when it will be ready to unmould. When a charged ice cave is available, the ice is simply moulded, placed in the cave, and kept there until sufficiently frozen.

**Unmoulding Ices.**—Ices should be kept in the moulds, buried in ice, until required. When ready to serve, remove the paper and the lard when it has been used, dip the mould into cold water, and turn the ice on to a dish in the same way as a jelly or cream.

**Varieties of Ices.**—Ices may be broadly divided into 2 classes, viz., cream ices and water ices. The former are sometimes composed almost entirely of cream, sweetened, flavoured, and elaborated in a number of ways, but more frequently the so-called "cream-ice" consists principally of custard, more or less rich according to respective requirements, with the addition of fruit pulp, crystallized fruit, almonds, chocolate, coffee, liqueurs, and other flavouring ingredients. Water ices are usually prepared from the juices of fresh fruit mixed with syrup, fruit syrup, or jam, sieved and diluted with water or syrup. In addition to these there are the demi-glacé or half-frozen compounds, now largely introduced into high-class menus under the names of sorbet, granite or granito, and punch. This variety is always served immediately before the roast, and always in small portions in sorbet cups or glasses, never moulded; and alcoholic liqueurs are more or less used in their preparation. Parfaits, mousses, and soufflés differ from ordinary ices, inasmuch as the cream preparation is at once moulded and placed on ice, thus omitting the ordinary preliminary freezing process. In these, as in dessert ices, new combinations and moulds of original design for their use are being constantly introduced, but as the principal constituents of the preparations remain unchanged they present no difficulty to those who understand the general principles of ice making.

## SWEETMEATS

**Dessert Sweets and Sweetmeats.**—Until recently the art of sweetmeat-making was little understood, and still less practised, by private individuals. Even now there exists a mistaken idea that this artistic branch of cookery presents many difficulties, and that elaborate utensils and implements are essential. Certainly success is more assured when the operations are aided by a saccharometer, marble slab, crystallizing tray, etc., but they are not indispensable. By measuring accurately, testing repeatedly, and by taking care to apply the right amount of heat, an amateur should find no difficulty in preparing any of the sweetmeats for which recipes are given on the following pages.

Except when otherwise stated, the lid should be kept on the stewpan while the sugar is being brought to boiling point and during the early stages of the following process, to prevent the sugar crystallizing on the sides of the pan. When this occurs, the particles of sugar adhering to the sides of the stewpan must be removed by means of a brush dipped in water, for if allowed to remain, they may cause the

sugar to grain. Cream of tartar is added to the syrup to prevent the sugar granulating, and carbonate of soda serves to whiten the toffee, etc., with which it is mixed.

When cooking over gas it is advisable to have a piece of sheet-iron to place over the gas burners when a very slow continuous application of heat is required, as in making caramels, etc. In boiling treacle and brown sugar a large stewpan should be used, as these ingredients are apt to boil over more quickly than white sugar.

Of the utensils and implements mentioned in the recipes those absolutely necessary are simple and inexpensive, and comprise a hair sieve, a spatula, which is flat, wooden, with a broad rounded end tapering off to a long narrow handle, a sweet fork and ring, both made of twisted wire, and a candy hook. For this latter implement may be substituted a strong iron larder hook, which should be fixed firmly on a wall about 5 feet from the floor, according to the height of the worker. When a sugar skimmer is not available for testing the sugar as it approaches the "small ball" degree, a piece of wire twisted to form small rings will be found a good substitute. A saccharometer, caramel cutter, crystallizing tray, moulds, and a marble slab are indispensable to those who wish to excel in the higher branches of the art of sweet-making, but with few exceptions, all the recipes that are given require nothing further for their preparation than the few simple appliances enumerated above.

## SALADS.

Although lettuce frequently forms the foundation of salads composed of raw materials, there are few vegetables and edible plants that may not be used for the purpose. The long list of those generally regarded as most appropriate includes artichokes, asparagus, beetroot, carrots, cauliflower, cresses, cucumbers, endive, French beans, lentils, lettuce, onions, potatoes, radishes, salsify, spinach, tomatoes, walnuts, and many other products. On the Continent, a variety of tempting salads are prepared from cold cooked vegetables, which in England are rarely utilized in this manner, but a typical French salad is composed entirely of one vegetable, for the cooks of that nation will on no account mix any two vegetables or salad plants. By these means the characteristic delicate flavour of choice vegetables is preserved; hence the superiority of salads prepared by them. As compounding salads is regarded as an art that only a few specially gifted excel in, ordinary cooks cannot be expected to attain perfection in this respect, but careful attention to a few simple details should enable them to prepare at least a palatable dish. To ensure success, it is absolutely necessary that the plants and vegetables employed should be young, freshly gathered, and crisp. If stale and limp, they may be freshened by immersion in cold water for a time, otherwise it is better to simply wash them thoroughly. Probably the point upon which perfection largely depends is the more or less complete removal of moisture after washing. When a salad basket is not available, the materials should be well drained and shaken in a colander, and afterwards in a clean dry cloth held by the corners, and shaken lightly until the salad is dry.

Lettuce should always be torn into shreds, not cut with a knife ; and it is a good plan to pour the salad dressing into the bottom of the bowl, lay the vegetables upon it, and mix vigorously at the moment of serving. Salads afford considerable scope for the exercise of individual taste and inventive faculty, and whatever their composition, they should always look cool, inviting, and dainty.

### SANDWICHES.

The term sandwich was originally applied to slices of meat placed between bread and butter, but it has now a much wider meaning, for it is used to describe an endless number of pounded and shredded preparations, the varieties being multiplied by the addition of savoury butters, sauces, and condiments unknown in the eighteenth century, when sandwiches were first introduced. The old comparatively substantial form still accompanies the sportsman and traveller, but those intended for "afternoon tea" are dainty trifles, pleasing the eye and palate, but too flimsy to allay hunger where it exists.

To have sandwiches in perfection the bread should not be more than one day old, and sandwich loaves should be provided when a large number have to be prepared, or large French rolls, when rolled sandwiches are preferred. Creamed butter is more easily spread than ordinary butter, but when the latter is used it should first be beaten to a cream. Savoury anchovy, lobster, prawn, and shrimp butters may be usefully employed to give piquancy and variety to other substances ; they are also used alone in the preparation of rolled sandwiches, which consist of single slices of bread and butter, spread with some prepared substance, and then lightly rolled.

Sandwiches for afternoon tea, or any occasion where they will come in contact with gloved fingers, should be left perfectly plain on the outside, but when they may be eaten with a fork, some pretty effects may be produced by decorating them with variously-coloured chaud-froid sauces. Or they may be decorated with cold aspic jelly and garnished with lobster coral, Krons pepper, parsley, egg, etc.

### PRESERVES.

From the nature of vegetable substances, and chiefly from their not passing so rapidly into a decomposed state as animal substances, the method of preserving them is somewhat different, although the general principles are the same. All the methods of preservation are put in practice occasionally for fruits and the various parts of vegetables, according to the nature of the species, the climate, the uses to which they are applied, etc. Some are dried, as nuts, raisins, sweet herbs, etc. ; others are preserved by means of sugar, as, for example, many fruits whose delicate juices would be lost by drying ; some are preserved by means of vinegar, and chiefly used as condiments or pickles ; a few also by salting, as French beans ; while others are preserved in spirits. We have in this place to treat of the best methods of preserving fruits. Fruit is a most important item in the daily dietary ; therefore, when we cannot obtain it fresh, we must have it

preserved. It has long been a desideratum to preserve fruits by some cheap method to keep them fit for the various culinary purposes, as making tarts and other similar dishes. The expense of preserving them with sugar is a serious objection. By most home methods, unless sugar is used in considerable quantities, the success is very uncertain, and sugar overpowers and destroys the sub-acid taste so desirable in many fruits; so that the tinned and bottled fresh fruits, now so common, though only introduced of recent years, are a valuable addition to our food. Fruits intended for preservation should be gathered in the morning in dry weather, with the morning sun upon them if possible; they then have their fullest flavour, and keep in good condition longer than when gathered at any other time. Until fruit can be used, it should be placed in the dairy, an ice-house, or a refrigerator. In an ice-house it will remain fresh and plump for several days. Fruit gathered in wet or foggy weather will soon mildew, and be of no service for preserves unless it is used immediately and very thoroughly boiled, when it may be made into preserve or jam that will keep, though of course of inferior quality. There is no mistake more common than to suppose that any half-ripe or over-ripe fruit is good enough for jam.

**Sugar for Preserving.**—Of the various kinds of sugar in common use, the white refined lump is generally sold for preserving, and, indeed, is the only kind admissible for the more delicate kinds of preserves. Coarse brown sugar conceals the flavour of any fruit, and the whiter moist sugar has little sweetening power. Crystallized Demerara makes good preserves, is very sweet, seldom adulterated, and is less expensive than lump sugar, so that for common household preserves it is very suitable. A well-known writer says: "Sugar-candy is the purest form of sugar; white loaf sugar comes next; then the pale, dry, large-grained crystallized sugars; while all the moist sugars are of inferior purity, invariably containing not only water and uncrystallizable sugar, but also mineral and organic compounds. They are not infrequently infested by a small insect, the sugar-mite, many thousands of which have been detected in a single pound of brown sugar." Cane-sugar and grape-sugar, otherwise known as sucrose and glucose, are obtained from various sources. Most of the cane-sugar consumed in England is actually produced from the sugar-cane, but of beetroot sugar there is much in the market, and in America sugar is produced from the maple, from maize, and from the "sugar-grass." From a chemical point of view they are the same, and from a culinary one nearly so, though the difference in sweetening power and in crystallization undoubtedly affect flavours. Grape-sugar abounds in grapes and in many other fruits, and it may also be manufactured. It does not crystallize as cane-sugar does, and is not nearly so sweet, so that the admixture of grape with cane-sugar is an adulteration greatly to the disadvantage of the purchaser, though in no way unwholesome. Jams made with pure cane-sugar are apt to crystallize, or become granular; to prevent this glucose is added. If only a small proportion is used, it can hardly be considered an adulterant. When a strong solution of sugar is allowed to solidify slowly and undisturbed it deposits large crystals, such as we see in sugar-candy; if it is agitated the crystals are small, as in loaf sugar. But if the solution is heated

up to a certain point it does not crystallize any more, but settles into a solid transparent mass which we know as barley sugar, so called because the old confectioners found that its return to the crystalline condition took place less quickly if it was boiled in barley water instead of water only. Any acid or mucilaginous matter helps forward the production of this particular form of sugar. When sugar is heated to about  $400^{\circ}$  F., it decomposes, loses its power of crystallizing and fermenting, and acquires a dark-brown colour and a bitter flavour. This form of sugar is known as caramel; when it is heated beyond this stage it becomes burnt and unfit for use.

**Syrup for Preserving.**—Having secured the most important contributions to the manufacture of preserves, the fruit and the sugar, the next consideration is the preparation of the syrup in which the fruit is to be suspended, and this requires much care. In the confectioner's art there is a great nicety in proportioning the degree of concentration of the syrup very exactly to each particular case, and they know this by signs, and express it in certain technical terms. But to distinguish these properly requires very great attention and considerable experience. The principal thing to be acquainted with is the fact that, in proportion as the syrup is longer boiled, the water contained in it will become evaporated, and its consistency thickened. Great care must be taken in the management of the fire, that the syrup does not boil over, and that the boiling is not carried to such an extent as to burn the sugar. A solution of sugar prepared by dissolving 2 parts of double-refined sugar in 1 of water, and boiling this a little, affords a syrup of the right degree of strength, which neither ferments nor crystallizes. This appears to be the degree called smooth or large thread by the confectioners. The syrup employed should sometimes be clarified, which is done in the following manner:—dissolve 2 lbs. of loaf sugar in 1 pint of water; add to this solution the white of an egg, and beat it well. Put the preserving-pan upon the fire with the solution, stir it with a wooden spatula, and, when it begins to swell and boil up, throw in some cold water to damp the boiling, for, as it rises suddenly, should it boil over it would take fire, being of a very inflammable nature. Let it boil up again; then take it off, and remove carefully the scum that has risen. Boil the solution again, throw in a little more cold water, remove the scum, and so on for three or four times successively, then strain it. It is considered to be sufficiently boiled when some taken up in a spoon pours out like oil.

Although sugar passes so easily into the state of fermentation, and is, in fact, the only substance capable of undergoing the vinous stage of that process, yet it will not ferment at all if the quantity be sufficient to constitute a very strong syrup; hence, syrups are used to preserve fruits and other vegetable substances from the changes they would undergo if left to themselves. Before sugar was in use, honey was employed to preserve many vegetable productions, but this substance has now given way to the juice of the sugar-cane.

**The fruits most fit for preservation** in syrup are apricots, peaches, nectarines, apples, greengages, plums of all kinds, and pears. As an example: take some apricots, not too ripe, make a small slit at the stem

end, withdraw the stone, simmer them in water until about half cooked, and afterwards throw them into cold water. When they have cooled, take them out and drain them. Put the apricots into the preserving pan with sufficient syrup to cover them; boil up three or four times, and then skim well; remove them from the fire, pour them into an earthen pan, and let them cool till next day. Boil them up three days successively, skimming each time, and they will soon be finished and in a state fit to be put into pots for use. After each boiling the consistency of the syrup should be noted; if too thin, it will bear additional boiling; if too thick it may be lowered with more syrup of the usual standard. The reason why the fruit is emptied out of the preserving-pan into an earthen pan is that the acid of the fruit acts upon the copper of which the preserving-pans are usually made. From this example the process of preserving fruits by syrup will be easily comprehended. The first object is to soften the fruit by blanching or boiling it in water, in order that the syrup by which it is preserved may penetrate through its substance.

**Fruits Preserved in Syrup.**—Any of the fruits that have been preserved in syrup may be converted into dry preserves, by first draining them from the syrup and then drying them in a stove or very moderate oven, adding to them a quantity of powdered loaf sugar, which will gradually penetrate the fruit, while the fluid parts of the syrup gently evaporate. They should be dried in the stove or oven on a sieve, and turned every 6 or 8 hours, fresh powdered sugar being sifted over them each time they are turned. Currants and cherries may be preserved whole in this manner in bunches. Orange and lemon chips are thus preserved. After being thoroughly dried they should be stored in air-tight tins in a cool, dry place.

**Marmalades and Jams** differ little from each other; they are preserves of half liquid consistency, made by boiling the pulp of fruits and sometimes part of the rinds, with sugar. The term marmalade is applied to those confitures which are composed of the firmer fruits, as pineapples or the rinds of oranges, whereas jams are made of the more juicy berries, such as strawberries, raspberries, currants, mulberries, etc. Jams require the same care and attention in the boiling as marmalade; the slightest degree of burning communicates a disagreeable empyreumatic taste, and if they are not boiled properly they will not keep. Marmalades and jams are now so cheap that they are within the reach of the poorest. They can also be bought so good that there is little inducement to make them at home if the fruit has to be bought or is dear. Nevertheless, it must be confessed that they are seldom both cheap and good, so that housekeepers who desire both quality and economy, and are not over anxious to spare their own trouble, usually prefer them home-made. To make them successfully a properly constructed preserving-pan or maslin-kettle is necessary. Formerly these were composed of solid brass or copper, and formed one of the careful housewife's most cherished possessions. They may now be obtained at a comparatively trifling cost in enamelled iron, but the objection to their use is that the syrup boils over more quickly than in a preserving-pan made of copper or brass, and, moreover, it is more apt to burn and stick to the bottom of the pan. A

long wooden spoon or stick is necessary. The end to be attained is to boil the juice of the fruit to such a consistency that it will neither ferment nor mildew. Some persons add a little water, others put only the fruit in with the sugar. From  $\frac{3}{4}$  of a lb. to 1 lb. of sugar for each lb. of fruit is the usual amount, but  $\frac{1}{2}$  a lb. is sometimes enough to preserve the fruit, and if this quantity is sufficient no more should be used, as jam is often unpleasantly sweet with very little flavour of the fruit left. The methods employed vary considerably; sometimes the fruit is boiled a long time and slowly, and the sugar added towards the end of the process; but more frequently the sugar is boiled first with a little water, and the fruit added afterwards and boiled from 20 to 60 minutes.

The latter method is commonly employed in manufactories where time is money, and it certainly preserves the shape, colour, and flavour of the fruit better than the former, which, however, has advantages for some fruits that require long stewing, and for those persons who find it difficult with the means at their disposal to make the jam boil as thoroughly and completely as it readily does in the manufacturer's pans, heated by steam coil or gas to the exact temperature required.

**The pots** in which the jam is put must be perfectly dry, and the cupboard in which they stand neither so warm that the jam ferments, nor so damp that it becomes mouldy. The housekeeper will do well to remember that mould is a plant sowing itself by multitudes of seeds, so small that they penetrate the tiniest crack. It spreads, therefore, readily from one thing to another, and may sometimes lurk unsuspected on the shelves of a cupboard that is not well cleansed and aired. Formerly jam was allowed to become quite cold before being covered, under the erroneous belief that the steam arising from it would, if confined, produce mould. Now jams, jellies, and marmalades of every description are covered as speedily as possible, before the escaping steam loses its power to exclude the air. If air is allowed to enter it may carry with it bacteria which quickly develop into mould, more particularly so when the preserved substances happen to be stored in a warm, damp place favourable to the growth of such organisms.

**Fruit Jellies** are compounds of the juice of fruit and sugar, concentrated by boiling to such a consistency that the liquid upon cooling assumes the form of a jelly. But, notwithstanding the resemblance in appearance and in name, this jelly, which is known as pectin, is, from a chemical and nutritive standpoint, entirely different from gelatine. It is closely allied to gum, and has about the same food value as the sugar with which it is boiled.

**Candied or Glacé and Crystallized Fruits.**—Before fruit can be subjected to the final processes by which it is preserved for use in these two forms, it must first be boiled in syrup. The fruit to be candied or iced is dried before the fire or in a cool oven, the syrup in which it was cooked being meanwhile boiled to the "large blow" degree. When the syrup has cooled a little, the fruit should be dipped into it until thoroughly coated, and then dried, when they will have a transparent coating. Fruit to be crystallized should, immediately on its removal from the syrup, be rolled in crushed loaf

sugar and afterwards dried. Flowers, such as violets, orange and rose petals and primroses, may be preserved in this way.

**Fruit Pastes** consist of the pulp of fruits, first evaporated to a proper consistency and afterwards boiled with sugar. The mixture is then poured into a mould, or spread on sheets of tin, and subsequently dried in the oven or stove until it has acquired the consistency of a paste. From a sheet of this paste, strips may be cut and formed into any shape that may be desired, as knots, rings, etc. They are now somewhat out of date.

### PICKLES.

Pickles may now be purchased in such variety and so cheaply that very few, save those who grow vegetables they cannot utilize in any other way, think of preparing them at home. Pickles consist of vegetables and fruits steeped in vinegar previously boiled with spices, to which is frequently added salt and sugar, in quantities varied according to individual taste. The chief pickles are cabbage, cauliflower, chillies, gherkins, onions, and walnuts. Any or all of these, except cabbage, may be mixed; one variety of mixed pickles, highly seasoned with mustard, is well known, and often usefully employed as a dressing for devilled bones, re-heating pork, etc. Indian pickles form a class by themselves; they are generally thick and highly spiced, mangoes forming a general base. Damsons are more frequently preserved by means of vinegar than other kinds of fruit, but the method is equally applicable to any unripe stone-fruit. To make pickles successfully, the vegetables or fruit must be perfectly dry, fresh, and not over-ripe. Vinegar should be boiled in an enamelled pan, or, failing this, a stewjar placed in a saucepan of boiling water. If a metal pan must of necessity be used, one made of iron produces the least injurious effects. Fatal results have followed the use of copper vessels for pickling purposes.

**Vinegar.**—The active principle of vinegar is an acid produced by the secondary fermentation of liquids of vegetable origin. Thus we have vinegar from malt liquors, from wine, cider, date juice, etc. Malt vinegar is obtained by brewing weak wort. To 100 gallons of this at 70° F., 4 gallons of yeast are added, and stirred for about 10 minutes. It is then allowed to stand for 2 days, and afterwards put into tubs, covered with canvas and placed in a dark room, which is maintained at a warm, even temperature by means of a stove or stoves. The tubs are left thus until the wort is converted into vinegar, the process being usually completed in about 3 weeks, although it can be hastened by adding a small quantity of grape skins or crushed raisins. Vinegar is also produced by inducing long fermentation in poor qualities of wines. Cider can also be converted into vinegar by admitting air into the barrels containing it, and inducing prolonged fermentation. The acid developed during fermentation is known as "acetic," except that derived from the distillation of wood, which is "pyroligenous acid." This latter variety is somewhat deficient in flavour, but it is perfectly wholesome, and being cheap is largely employed by those who make pickles in large quantities.

### MILK.

**To Keep Milk.**—For the preservation of milk, scrupulous cleanliness is the first necessity. Not only must the pots and pans be scrubbed and scalded (that every dairy woman understands, at least, in theory), but the dairy must be clean and well ventilated ; in it no open drain, no meat or game hanging ; outside it no foul heap of yard refuse or decaying matter. Nothing is more certain to taint the milk and spoil the butter than neglect of these precautions.

Boiling milk preserves it ; this is one great advantage of the Devonshire method of butter-making for small dairies. And we have already spoken of the addition of soda or borax. Soda may very well be put in if the milk is to be used for soups or savouries, as the flavour is then disguised.

**Condensed Milk** in tins has a large and increasing sale. Fresh milk is evaporated in open pans until it loses the greater part of the water. A certain quantity of cane sugar is then added, and the milk is sealed down in tins, when it will keep for any length of time. The objection is the peculiar flavour that milk acquires in boiling, but this is not of consequence for many cooking purposes. The excessive sweetness is also objectionable, but unsweetened condensed milk may now be had. When the full milk is preserved it forms a valuable addition to our stock of foods, especially for infants and children, for whom a plentiful supply of good milk cannot be obtained. But, on the whole, condensed milk is less nutritive than the fresh article, from the fact that it is chiefly made of skimmed or separated milk, and in consequence is less rich in fats.

**Milk, Considered as an Aliment.**—Although milk in its natural state is a fluid, yet, considered as an aliment, it is both solid and fluid ; for, no sooner does it enter the stomach than it is coagulated by the gastric juice, and separated into curds and whey, both of which are extremely nutritious. The milk of the human subject is much thinner than cow's milk ; asses' milk comes the nearest to human milk of any other ; goat's milk is somewhat thicker and richer than cow's milk ; ewe's milk has the appearance of cow's milk, and affords a larger quantity of cream ; mare's milk contains more sugar than that of the ewe.

### BUTTER.

In England, butter has been made from time immemorial, though the art of making cheese is said not to have been known to the ancient Britains, and to have been learnt by them from the Romans. The taste of butter is peculiar, and very unlike any other fatty substance. It is extremely agreeable when of the best quality, but its flavour depends much upon the food given to the cows.

**Butter, with regard to its dietetic properties,** may be regarded as a combination of neutral fats mixed with water and small quantities of casein and salts. Its average proportion is as follows :—Fat, 78 to 94 ; curd, 1 to 3 ; water, 5 to 14 ; salt, 0 to 7. Butter becomes sooner

rancid than other fats, owing to the presence of more or less casein, which, no matter how thoroughly washed the butter may be, is never completely removed. When fresh, it is a very wholesome article of diet; but it should be quite free from rancidity. If slightly salted when it is fresh, its wholesomeness is not at all impaired; but should it begin to turn rancid, salting will not correct its unwholesomeness. When salt butter is put into casks, the upper part next to the air is very apt to become rancid, and this rancidity is also liable to affect the whole cask.

**To Make Butter.**—There are three methods pursued in the manufacture of butter. In one, the cream is separated from the milk, and in that state it is converted into butter by churning. In the second method, the whole milk is subjected to the same process, but it is extremely wasteful, for the sour butter milk is of no use except as food for pigs, whereas new skimmed milk has a marketable value, or, enriched with linseed meal or other oily substances, may be given to calves instead of whole milk. In Devon and Cornwall, and the West of England generally, the milk, as soon as it comes from the cow, is heated over a stove or hot water pipes, which makes the cream rise and thicken into the well-known "clotted cream," which is afterwards very readily and quickly turned into butter. The first method is generally said to give the richest butter, and the last the largest quantity; but opinions differ.

**Churning.**—A great many different churns are sold, but the secrets of good butter making are simple and applicable to all kinds. The first is scrupulous cleanliness. Everything must be scalded daily with boiling water, rinsed with cold water, and used wet. Each utensil must be set out in the open air every day.

The second is the right temperature for the cream. A thermometer is absolutely necessary, and must register  $55^{\circ}$  to  $60^{\circ}$  F. when churning begins. The desired temperature is usually attained by adding a little warm water, or icy cold water when it is necessary to modify the temperature. Butter, under these conditions, should come in about 15 minutes. It is then washed quite free from butter milk, usually with cold water, before the butter is removed from the churn. Salt is generally added in the proportion of from  $\frac{3}{4}$  to 1 oz. for each 3 lb. of butter. It should be dried and finely powdered.

**To Sweeten Rancid Butter.**—This is done in several ways: by beating it in lime water (water in which 1 lb. would be washed should have about 15 drops of chloride added); by scalding with boiling water, or by washing in new milk. The last named is the safest and best method, and those who live some distance from the place from whence they procure their supplies of butter will find these instructions to perfectly sweeten rancid butter of service to them. The butter must be thoroughly washed and kneaded first in new milk, where it will lose the acid which has turned it, then in fresh spring water.

## CHEESE.

Cheese is the curd of milk, dried. This curd, or casein, which is held in solution in the whey under natural conditions, or so long as the

milk is fresh, has the curious property of coagulating under the influence of an acid.

Lactic acid, formed in the milk, serves to precipitate the curd in the ordinary process of souring. Curd is formed in the first stage of digestion by the action of the gastric acid of the stomach. Lemon-juice is often used to make curd for cheese cakes. In cheese making, "rennet," or "runnet," is used—a preparation from the stomach of the calf; or in some countries, principally in Holland, a weak solution of hydrochloric acid is substituted for the rennet.

**Method of Making.**—Although the broad principles of cheese making may be said to apply to all varieties of a particular class, the cheese of each country has certain distinguishing characteristics. That of Cheshire and Wales has a crumbly texture, and a deep yellow colour, produced artificially by the addition of annatto. Cheddar cheese, although similar in shape and size, is less crumbly, and usually of a pale colour. The methods employed in making these well-known varieties of cheese are almost indetical. They are usually made of whole milk, unless the milk is very rich in cream, in which case the night's milk is skimmed before adding that of the morning. A properly equipped dairy is provided with a jacketed milk vat, so contrived that the milk may be surrounded with either hot or cold water. By these means the temperature of the milk is raised to a suitable heat, usually about 70° F. and the rennet is added. The temperature is then raised and maintained at a higher level until the curd is firm enough to cut. Many-bladed knives greatly facilitate this part of the work, but some little practice is necessary to enable the worker to wield one successfully. After cutting, the fine particles of curd are stirred continuously until the necessary degree of firmness is attained, and these are then allowed to sink to the bottom of the vat, where they remain in warm whey until sufficient acidity is developed. When the right point is reached, the whey is drawn off, the curd is broken up, covered with warm cloths, and kept thus until ripe enough to be salted and put into cheese moulds. The cheese remains in the mould under pressure until sufficiently firm to support its own weight, when it is trimmed and ironed into a good shape, and then transferred to the drying room. Here it remains for months, being turned every day, so that any moisture contained in the cheese may be equally distributed. The whole process is extremely simple, but the success of the whole depends on the amount of acidity developed during the various stages of the work. If the curd is allowed to become too acid, a hard cheese is the result; if not sufficiently developed, the cheese is too crumbly, and consequently wasteful.

**To Choose Cheese.**—The taste and smell are the best indications of quality. There is so much difference of taste, that cheese, almost alone of all foods, is tasted by the customer before purchasing. A good cheese has rounded edges and sides, and when a piece is rubbed between the fingers it should melt and feel smooth. The bulging should not be great, however, as that indicates slight fermentation, and the cheese should be flat at the top. The best cheese is made of new milk, and contains, therefore, fat in addition to the curd. Skimmed milk cheeses are hard and indigestible. In fact, no cheese is easy of

digestion, which probably accounts for its not being a universal food; it has almost every other virtue, being cheap, portable, easy to store, and palatable. In every pound of cheese as much solid food is contained as in a pound of lean meat, and the food is of the flesh-forming kind, being rich in both proteid and fat.

**The principal varieties of Cheese** used in England are the following, and most of these are shown in the coloured plate:—Cheshire Cheese, famed all over Europe for its rich quality and fine piquant flavour. It is made of entire new milk from which the cream has not been taken off. Gloucester Cheese is much milder in its taste than the Cheshire. There are two kinds of Gloucester cheese, single and double. Single Gloucester is made of skimmed milk, or of milk deprived of half the cream; Double Gloucester is a cheese that pleases almost every palate; it is made of the whole milk and cream. Stilton Cheese is made by adding the cream of one day to the entire milk of the next; it was first made at Stilton, in Leicestershire. Gorgonzola strongly resembles Stilton, and has a large sale. Much is now made in England to imitate the original. Sage Cheese is so called from the practice of colouring some curd with bruised sage, marigold-leaves, and parsley, and mixing this with some uncoloured curd. With the Romans, and during the middle ages, this practice was extensively adopted. Cheddar Cheese is manufactured principally at Pennard, near Cheddar, and is one of the best and most widely known cheeses we consume. American Cheddar is considered the best of the cheeses sold as American. Dunlop Cheese has a peculiarly mild and rich taste; the best is made entirely from new milk. Skimmed Milk Cheese is made in most dairy countries, and is eaten by the peasantry, but is not generally exported. There are some exceptions, such as the Parmesan Cheese, made in Parma and Piacenza, the most celebrated of all cheese, and made entirely of skimmed cow's milk. The high flavour which it possesses is supposed to be owing to the rich herbage of the meadows of the Po, where the cows are pastured. The best Parmesan is kept for three or four years, and none is carried to market until it is at least six months old. Dutch Cheese derives its peculiar pungent taste from the practice adopted in Holland of coagulating the milk with muriatic acid instead of rennet. Swiss Cheeses, in their several varieties, are all remarkable for their fine flavour. That from Gruyère, a bailiwick in the canton of Fribourg, is best known in England. It is flavoured by the dried herb of *Melilotos officinalis* in powder. Cheese from milk and potatoes is manufactured in Thuringia and Saxony. Cream Cheese, although so called, is not properly cheese, but is merely cream dried sufficiently to be cut with a knife. All cheeses are imitated in countries and places other than those from which they take their conventional names. Cheese is also made of skimmed milk mixed with animal fats or margarine, in the place of the cream that has been removed for sale. Camembert is a Brittany cheese, one of the most esteemed of cream cheeses, it being richer than most; it is a small, flat cheese of a pale yellow colour, with a dark rind. Roquefort is a very rich cheese, made in the South of France, from the milk of sheep and goats. Like Stilton, it has to be kept a considerable time before it is sufficiently ripe for eating. Shabzieger is a cheese exceedingly

strong both in smell and taste, and for that reason is considered a delicacy by some and a cheese to be avoided by others. An excellent but little known English cheese is one called Wensleydale, which takes its name from the place where made, a small village in Yorkshire. This cheese has the characteristics of Stilton, and is rich in quality. Dorsetshire yields a very good cheese, called Blue Veiny, from its blue-veined appearance. It may be compared to Stilton in flavour, but is less rich, being made entirely from skimmed milk. There are, in addition to the above, various fancy cheeses.

### EGGS.

**The Nutritive Properties of Eggs.**—Although the qualities of those belonging to different birds vary somewhat, their nutritive constituents of fats and salts are identical, varying only in degree. Eggs are valuable on account of their concentrated nourishment, and their ready digestibility when raw or slightly cooked. The quality of eggs depends much upon the breed of the hens, and upon the character of the food given to them. New-laid eggs are more easily digested than eggs a day or two old, but the milkiess of an egg cooked almost as soon as it is laid is generally disliked. Poaching is undoubtedly the lightest way of dressing eggs; and this is effected by putting them for two or three minutes into boiling water, to which is added a little salt and a few drops of lemon-juice or vinegar to assist the coagulation of the albumen. Another light, digestible way of cooking an egg is to place it into a saucepan of boiling water, and let it remain covered by the side of the fire for 10 minutes. Immersion for this period will cook the white of the egg to the consistency of a jelly, but the water must not be allowed to even simmer.

**Uses of Eggs.**—The purposes for which eggs are employed are more numerous and varied than any other article of food; they form an impervious coating for frying; they bind dry mixtures; they increase the tenacity of paste and dough, so that they more completely retain the air; when beaten to a froth, they are the means of introducing a good deal of air into a mixture, and thus increase its lightness; and to all mixtures they give colour, flavour, and lightness.

**The Eggs of different birds** vary much in size and colour. The eggs of the turkey are almost as mild as those of the hen; the egg of the goose is large, but well flavoured. Duck's eggs have a rich flavour; the albumen is slightly transparent, or bluish, when set or coagulated by boiling, and requires less time to cook than hen's eggs. Guinea fowl's eggs are smaller and more delicate than those of the hen. Eggs of wild fowl are generally coloured, often spotted; and the taste generally partakes somewhat of the flavour of the bird. Those of land birds that are eaten, as the plover, lapwing, ruff, etc., are in general much esteemed; but those of sea-fowl have, more or less, a strong fishy taste. The eggs of the turtle are very numerous; they consist of yolk only, without shell, and are delicious. The average weight of a hen's egg in the shell is 2 oz., the shell constituting about 10 per cent. of its total weight. Eggs keep best in a cold temperature of 36° F.

## BREAD.

If the instructions given in the recipes are carefully carried out, there should be no difficulty in making a palatable and satisfying loaf, whose merits will be appreciated by all who partake of it. In making bread, no matter how large or small the quantity, it is of the first importance that everything should be scrupulously clean, sweet, and dry. If these precautions are omitted, the bread will not turn out as desired. Before commencing, see that everything is in readiness, so that it will be unnecessary to leave off in the middle. Have a sufficient quantity of water at hand for the purpose, and also some flour in a tin or basin in which to dip the hands and rub them clean when necessary. When you have finished with it, run the flour through a sieve, and any pieces that may have fallen from the hands should be added to the dough and well kneaded in. If no more than  $\frac{1}{2}$  a bushel of flour (8 quarterns) is being worked, a large red earthenware pan will answer admirably to mix it in. It should, after being thoroughly washed out and dried, be set out on a strong kitchen chair (from which the back has been removed) in front of the kitchen fire; then turn the flour into the pan, cover it over with a clean cloth, and allow it to stand until the chill passes off before commencing. This is of course more necessary in winter than in the summer, and as there is only a small quantity of dough it will very soon get cold and be spoilt if it is not properly taken care of; and, since much depends upon the warmth, the whole process should be performed in front of the kitchen fire if the weather is at all cold and chilly. At the same time, under no consideration must the dough become too hot, for heat will kill the yeast sooner than cold, and the result in each case would be the same—heavy and unsatisfactory bread. Heavy bread is the result of insufficient fermentation, and sour bread is caused by over fermentation; it will therefore be seen how desirable it is to adopt just the happy medium—to have the water neither too hot nor too cold, to give the yeast sufficient time to work or ferment properly, but not long enough to work itself sour. This happy medium will soon be arrived at by experience. On no account must the pan containing the dough be placed close enough to the fire for the heat to penetrate and form a crust on the inside of the pan, for that would presently be mixed into the remainder of the dough, and result in dark, heavy patches in the bread. Care must also be taken by keeping the dough sufficiently well covered to prevent it from becoming skinned over, producing a very unsightly appearance should it get on the outside of the loaves when they are moulded or shaped up ready for the oven; such loaves are known generally as “slut’s farthings.” When making the dough, it is of the greatest importance that it should be thoroughly well kneaded; in fact, up to a certain point, the more kneading given to the bread the better it will be, while, if it is not kneaded sufficiently the dough may run flat in the oven, and not spring as it should. When freeing the hands of paste after the dough has been made, very particular notice should be taken that the scraps are first well rubbed into the dough, and then kneaded into the mass, leaving the finished dough perfectly smooth and clear.

When making the dough, keep all the flour in the pan, and do not get it all over the sides of the pan on to the floor; for, besides being wasteful, it is a very dirty and slovenly proceeding.

**When the dough is well kneaded**, it is left to stand for some time, and then, as soon as it begins to swell, it is divided into loaves. After this process, it is again left to stand, when it once more swells up, and manifests for the last time the symptoms of fermentation. It is then put into a hot oven, where the water contained in the dough is partly evaporated, and the loaves swell up again, while a yellow crust begins to form upon the surface. When the bread is sufficiently baked, the bottom crust is hard and resonant if struck with the knuckles, and the crumb is elastic, rising again in its place if pressed with the fingers. It will take from 30 to 45 minutes to bake in an ordinary oven, according to the size of the loaves, but a full 2-lb. loaf will never bake in less than 45 minutes, and if the oven is not over-hot, a much longer time is necessary.

### CAKES.

**Butter** is of the first importance in cake-making, and where a rich cake is desired of fine flavour and keeping qualities, only the best butter should be used. But in most instances it will be desirable to use a somewhat cheaper fat for the purpose of cake-making, especially where the family is large and the means limited. In this case lard, dripping, or good margarine may be used with advantage, and there are also several vegetable fats procurable that answer very well for these purposes; but, although they are more economical in price, and some of them are richer where flavour is the first consideration, nothing better than pure butter can be used. So-called cooking butter is, in too many instances, nothing but margarine, but there should be no compunction in buying margarine under its right name, and paying a corresponding low figure for it. In this connection it should be said that the very cheapest that is offered should not be purchased; but for about 6*d.* per lb. a good sweet perfectly wholesome margarine can be procured that is eminently suitable for all purposes of cake-making, and will give results almost equal to pure butter.

**Eggs.**—After butter, the eggs next claim attention. For making cakes, eggs that are from 7 to 14 days old, are best. The longer an egg is kept, up to a certain point, the less moisture it contains, for the shell of a new-laid egg is perfectly full, and if shaken no sound emanates from it; but if the egg is kept for a few days and then shaken, it will give out a rattle, increasing in sound as the egg gets older. This is caused by a certain amount of the water in the albumen, or white, drying out into the shell and air, and thus the albumen is stronger and the yolk more solid for being kept; and the reason these eggs are better for cake-making is that the ingredients will only take a limited quantity of liquid, and the deficiency must be made up with milk, which is richer than the water that has evaporated from the eggs. Nor is this the only advantage. The whites will whip up better and give more body than fresh eggs, and therefore more light-

ness to the cakes, for the white being more solid and stronger in every way retains the air better after it is beaten in. But when eggs are used for these purposes, it is important that each egg is broken into a cup, and carefully tested by its smell, to guard against any egg that may be bad, and especially a musty one, which, were it added to the cake, would spoil the whole of the work and render it uneatable. When breaking the eggs make sure that they are useable, turn them into a basin or other suitable vessel, and cover them over with a sheet of paper to keep out all dirt, until they are required for use.

Eggs act in two ways. They increase the tenacity of the dough, so that it better retains the air, and when they are beaten to a froth, they carry a good deal of air into the cake.

**Baking-powder** is largely used to vesiculate bread and cakes. The carbonic acid gas in this case is formed by the effervescence of bicarbonate of soda with some acid, usually tartaric, but sometimes hydrochloric. Many different kinds are sold, but each differs but slightly from the other. Some are coloured yellow and are known as egg-powder ; some go by the name of yeast-powder ; but the action of all is practically the same. A common recipe for home-made baking-powder is 10 oz. of ground rice, 9 oz. of carbonate of soda, 5 oz. of tartaric acid, well mixed and sifted together ; the rice is merely used to increase the bulk, and so to facilitate its mixing with the flour. If a teaspoonful of this or any other baking-powder is put in a tumbler of water, it effervesces rapidly ; presently the effervescence subsides, and there remains water, with the rice undissolved, and some tartrate of soda. In the same way it effervesces in a cake, or in dough, and bubbles up exactly as in the case of the water. As the water soon subsided, so will the dough, the gas will escape, and there will remain flour, water, and tartrate of soda settled down into a solid mass. Such is the action of baking-powder on bread or pastry. If the latter is not baked at once, the whole value of the powder is lost. But if it is put in the oven while the gas is held in the dough, it will rise still further, because gas or air always expands with heat, and long before the gas escapes the dough will be baked into shape with all the bubbles in it, and is then called "light." It is not a good word, for whether a cake is "light" or "heavy" it weighs the same, except in so far as it may be too wet if it is not sufficiently baked ; the difference will consist in the size and relative weight of the two, and not in the actual weight. A "light" loaf is puffed up to look larger.

All goods, therefore, made with baking-powder should be put into the oven as soon as possible after the moistening ingredient is added, or the result will be a very indifferently aerated cake or loaf. This rule applies generally to all kinds of baking-powders, cakes, pastry, or bread.

Another rule is to use the coldest water and to mix it in a cold place. We have seen that the rising of a loaf depends on the sudden expansion by heat of the air it contains, and the greater the difference between the coldness of the air as it goes into the oven, and the heat of the oven itself, the more it will rise, always provided that the oven is not so fierce as to scorch and stiffen the crust before the inside has had time to be heated. Cakes can be made light with snow instead

of water, even with no baking-powder, because of the extreme coldness of the air that is mixed into them.

In this kind of bread-making, the gas is formed in the dough, but not of it, as with yeast, and, therefore, the taste of the wheat is more perfectly preserved.

**Sugar.**—Refined sugars can now be procured at so low a price, already ground and pulverised, that it is more economical to buy it in this form than to use loaf sugar and pound it, for, besides the trouble, it also involves some waste and loss of time, for powdered sugar is no dearer than loaf sugar, and if it cannot be procured from the grocers, a baker who makes small confectionery goods would be willing to supply the quantity required.

**Fruit.**—Currants can be procured comparatively clean, and need only a rub in a dry cloth and picking over to remove any sprigs and stones. In almost every case washing is not at all necessary; in fact, washing the currants deprives them of some of their goodness, and, therefore, is not only a waste of time, but waste of material, and makes the cake heavy. Sultanas, although they are no doubt cleaned, require carefully picking over, and a good rub on a coarse sieve will remove almost the whole of the sprigs, which are a very objectionable ingredient in a cake. Raisins should in all cases be stoned.

**Almonds,** before use, require to be blanched. This is done by putting the almonds into a basin and pouring boiling water over them. When they have scalded for a short time their jackets are easily removed. When blanched they should be dried in the oven. There are very many varieties of the almond. The largest and dearest are the Jordan, and the cheapest are termed Barbary. There are both sweet and bitter almonds, the latter being used but sparingly for flavouring purposes. Ground almonds are used for icings, paste, macaroons, ratafias, and biscuits, and are procurable prepared all ready for use. Cocoanut is sometimes liked, and for all purposes desiccated nut can be used. It is sold in shreds, strips, and either fine or coarse, also sugared and plain.

**Flour** for cakes should always be of the finest quality procurable, and for best goods Vienna is the most suitable for use, and will also give the best results. But for all ordinary purposes of the household, what is termed "Whites" is suitable. But in any case let the flour be dry to the touch and sweet to the smell, with some colour and strength.

## INVALID COOKERY.

**Diet of the Sick.**—It is not possible to lay down universal laws for the diet of sick persons. Given any two persons suffering from disease, the temperament, the disease, and the needs of one may be entirely different from those of the other. One may be in danger of collapse from weakness; another may be in a high fever. One may need to make blood and regain strength; the other may be suffering from a lifetime of overfeeding and underwork. To feed all these people alike would be ridiculous. There are besides many persons hopelessly ill, for whom food and physic can do no more than keep them alive with the least possible discomfort. One can only make the food pleasant to the eye and taste, and easily digestible, remembering always that in the course of any long illness the human machine is so worn that the least extra strain may stop its working altogether. It is with such cases as these that the art of sick-room cookery is of most avail.

Roughly speaking, the fundamental idea of sick-room diet is (1) to select food that will provide the necessary nourishment, and will not strain any digestive organs that may be affected; (2) to compensate for any waste or drain upon the system.

**Overfeeding Gives no Strength.**—Nothing is more common than to find some such reasoning as this: "All invalids are more or less weak; weakness is to be cured by food; all persons in poor health should be persuaded or coerced into taking as much food as possible." It is forgotten that not what a man swallows feeds him, but what he is able to digest and assimilate out of what he swallows. To overload feeble digestive organs is the surest way of preventing them from doing even as much work as they could do if they were allowed to work quietly. Again, a little wise starvation is Nature's cure.

**Diet as a Cure.**—There are not a few diseases where the only hope of cure or alleviation lies in rigid abstention from some sorts of food. Diet can often cure where drugs are useless, or worse.

**Food or Physic?**—Many well-known remedies are thought to be physic because they are prescribed by the doctor and sold by the chemist, but they are, in reality, foods. The best example is cod-liver oil, the most digestible of all fats, given often to consumptive and other persons, who either cannot take other fats or who do not like any fat, and will not force themselves to swallow fat food as they do to take fat physic. Cream, or any other fat, if it is digested, answers the same purpose as oil.

**Certain rules** apply to all sick-room feeding. Give little food and often. It is a mistake to persuade a patient to swallow large quantities at once. What is eaten willingly and with relish does more good than double the amount swallowed with disgust. At the same time it must be remembered that when people are very ill they will often refuse to swallow anything, though they are actually sinking for want of food.

Let the food come at stated times, and punctually. A very weak patient faints and flags if the hour is stretched to an hour and a quarter. A convalescent looks forward to meals as the great event of the day, and frets and worries if they do not come to time. As a rule, a patient should not be awakened to be fed, though it may sometimes be necessary. Amateur nurses often forget to feed in the small hours of the morning, when the patient's strength is always at the lowest ebb. If obliged to wait a long time the patient loses the desire to eat, and often turns against the food when brought.

When there is no appetite, give such food as affords most nourishment for the least work, either to the digestive organs or to the teeth. If the patient is very weak the exertion of eating, even without mastication, is already very severe. Put the greatest amount of nourishment into the smallest space, and let the food be already divided.

Only just so much as the patient is likely to eat should be taken into the sick-room, and what remains should be at once removed. Never keep any food standing by the bedside. Never leave food about a sick room; if the patient cannot eat it when brought to him, take it away, and bring it to him in an hour or two's time.

In a case of infectious fever, all remains of food should at once be burnt, and on no account eaten by another person. The nurse should not take her meals in the sick room.

For a convalescent the food should be as varied as possible.

For invalids, never make a large quantity of one thing, as they seldom require much at a time. Because a patient once likes a food, do not repeat it till he is tired of its very name.

If the food may not be varied, the mode of serving may. A stray flower, or a new patterned plate, is better than no variety at all. Let everything look as tempting as possible. Have a clean tray-cloth laid smoothly over the tray; let the spoons, tumblers, cups and saucers, etc., be very clean and bright. Gruel served in a tumbler is more appetising than when served in a basin, or cup and saucer. Do not put a very little broth in the bottom of a very large basin. Let all kitchen utensils used in the preparation of invalids' cookery be scrupulously clean; if this is not the case, a disagreeable flavour may be imparted to the preparation, which flavour may disgust and prevent the patient from partaking of the refreshment when brought to him or her. Invalids notice flavour more than people in health. It is generally better to cook in earthenware, or glass, than in metal.

No cooking may be done in the sick-room.

**In Acute Disease**, the diet is often limited to milk and beef tea. Inexperienced persons imagine that every liquid food is insufficient nourishment, and that the patient should be persuaded to take some

solid. So far from this being true, milk is the best of all foods, the only food we could live on for a length of time without admixture of anything else. A patient who can take milk has at once a greater chance of prolonging life or recovering health.

But there are some persons who cannot take milk, in health or sickness. They will often find it agrees with them better mixed with limewater, a third or half of water to two-thirds or half of milk. Soda-water and milk is agreeable to some patients, and to some boiled milk is more digestible, especially boiled milk hot. Only in rare cases should the cream be removed. Whey has been found useful when every preparation of fresh milk has been tried in vain. Kaumiss, or fermented milk, is also sold for the use of invalids.

**Sickness and Nausea.**—If the patient suffers from sickness and nausea, every food should be given iced, or as cold as possible, and in the smallest quantities, and it is a good plan to slip a tiny piece of ice into the patient's mouth immediately after taking food. Milk may be kept on ice for a long time, or, if no ice is at hand, set the jug in a tub of salt and water, or wrap a wet cloth round the jug and stand it in a draught outside the door. The slightest souring is enough to make milk disagree with a patient.

**Variety is an Essential.**—In sick-room cookery, except in very serious cases, veal-tea, mutton-tea or broth, or chicken broth, should occasionally replace the beef-tea in order to prevent the patient becoming tired of it. Soups thickened with yolk of egg and cream are very nourishing, but they are also very rich, and should therefore be given sparingly even when the patient is convalescent. Meat teas, soups and broths all offer nourishment in an easily digested form, and their restorative powers are very quickly felt, hence their value in the diet of the sick and convalescent. Savoury jellies are more nourishing when made from veal or calves' feet, for they then contain not only gelatine, but also other extractives of considerable dietetic value. When variety, and not the amount of nourishment afforded, is the chief consideration, jelly may be more easily prepared from isinglass or gelatine, the purest forms of which should alone be used.

**Seasonings and Flavourings** should always be added sparingly, for in sickness the organs of taste are often abnormally sensitive.

**Peptonized Foods.**—Peptonized foods are most valuable for those who suffer from severe indigestion, also in cases of dyspepsia and gastritis, or when the patient is unable to take milk in its natural form.

The chief peptonizing agents are pepsine and liquor pancreaticus, and the food, when acted upon, becomes partially predigested, and consequently more readily absorbed. When the natural digestive juices are deficient, and the stomach is unable to properly perform its office, those who suffer from this cause may, by employing one of these valuable agents, be supplied with more varied food than they would otherwise be able to digest. During the process of peptonization a slightly bitter taste is developed, but this may be arrested before it becomes too pronounced by bringing whatever is being acted upon quickly to boiling point. The several simple recipes that are given will sufficiently illustrate the principles of peptonization.

# FOREIGN, COLONIAL, AND AMERICAN COOKERY.

Recipes are given in this book for the typical dishes of the different Continental Nations, and for the cooking of those articles of food that are only obtainable in India and the Colonies; also for the principal Jewish and American dishes. Lists of such recipes will be found in the Analytical Index at the end of the book.

**French Cookery** ranks deservedly high—perhaps higher than any other—and the land that gave birth to a Carême, a Savarin, and a Soyer has appropriately raised the culinary art to a high standard of perfection. Now, French methods of cookery are identical with the cooking of the upper classes in England, so identical, in fact, that the “national” dishes of France are common to the whole world. The chief difference in the French cuisine lies in the diet of the *bourgeoise*, with whom soup, stews, ragoûts, and braises largely replace the joints so common in England.

**German Cookery.**—The reputation of German cookery is not high in this country, but with no other nation does cookery form such an important part of advanced education. Many think the German diet consists chiefly of boiled beef and dumplings, milk soup, peas, pudding, and sauerkraut and sausages. The recipes given in this book should disabuse such an erroneous idea, for many dainty and useful dishes are included that might be advantageously employed to vary the somewhat monotonous diet of the English middle classes.

**Italian Cookery** is, like our own, adapted and borrowed from the French, though Italian cooks excel in the art of providing a variety of vegetables in many tempting forms unknown to us, and the delicious flavour which characterises many of their vegetable preparations is largely due to the introduction of cheese. The Italians alone appear to understand the use of this nutritious article of food. Farinaceous preparations, such as macaroni and spaghetti, also figure largely in the diet of the Italians, and may be said to be national foods.

**Jewish Cookery.**—The Mosaic code takes cognizance of the danger to health which arises from the consumption of unsound food, and minute regulations are laid down for the examination and slaughtering of animals.

Apart from these precautions for the safety of the general public, there are various domestic rules designed to secure the wholesomeness of the food eaten by the Jews. For example, certain joints are soaked

in cold water to extract all traces of blood; fish must be cleansed with the most scrupulous care both inside and outside. Methods of cooking are also prescribed in certain cases. Fish and other classes of food must be fried in oil—a sound gastronomic and hygienic rule, for the oil, before being fit for use, must be raised to a high temperature to ensure thorough cooking and the retention of the savour of the viand, which thus becomes completely sterilized.

There are many interesting dishes peculiar to special feasts and fast-days, but in all the directions given for these, it will be noticed that cleanliness and health are regarded as the essential.

**Cookery in Australia** is, of course, English in character, while in the hotels the French cuisine plays a prominent part just as it does the world over. The various dishes which are peculiar to the country are those obtained from animals and fruits indigenous to the soil, such as Kangaroo-tail Soup.

Australian Fish is plentiful and good, and includes nearly all the varieties esteemed in England except the sole, which is not found in any Australian waters; but there are many other varieties unknown in England, such as trumpeter, schnapper, flathead, barracouta, etc.

Vegetables grow abundantly in most parts of Australia, and in addition to the varieties common in England, there are many unknown to us. Sour sop, a fruit which in its ripe condition resembles the custard apple, may in its green state be cooked and served as a vegetable. Paw-paw also serves the double purpose of fruit and vegetable, for it is equally excellent boiled while in a green, unripe condition and served with white sauce, or eaten when ripe with wine and sugar. The choko is a vegetable little known, although it grows freely in many parts of Australia. It is excellent plainly boiled and served with white sauce.

Fruit is so plentiful in many parts of Australia that many varieties may there be had for the picking. In addition to apples, apricots, peaches, bananas, figs, melons, and other well-known fruit, there are others almost unknown in England, such as gramma, granadilla, loquat, Passion fruit, etc.

**Cooking in South Africa.**—The instinct of good feeding is inherent in the Boer character, and the better-class Boer housewives are capital cooks. They are very fond of sweetmeats in every shape and form, and are exceedingly clever in making home-made preserves. "Mebos" is a very common and universally appreciated preparation of dried and salted apricots, while "honing kock," and "koe-sisters" are typical old Dutch sweetmeats. "Bobotee," "Sasatees or Kubobs," and "Gesmoorde Noender" all owe their origin to the same source.

**Indian Cookery.**—The culinary arts followed by the Hindus and Mohammedans of Asia differ considerably, for while meat is rigidly excluded from the diet of the former, the Mohammedan indulges in it freely. The Hindu delights in farinaceous foods such as cakes of wheat and other grain, rice variously dressed; also curries prepared from vegetables, ghee, oil, acid vegetables or fruit, the whole flavoured with spices; and the piquancy is further heightened by the chutneys and pickles served with them. The principal dishes of the Mohammedan are curries, pilleaus, brianes, hashes, and cakes.

A glance at the Oriental recipes for curries at once explains why those served in England differ so widely from the preparations in India. Some of the ingredients employed are unknown to us, all of them are used in a green state, and consequently impart a better flavour to the dish of which they form a part. Ghee, a substance largely used in making curries, differs from ordinary clarified butter, inasmuch as it is flavoured with ground cloves and green mint, cooked in the butter while it is being clarified. Curries are best when made in an earthenware vessel like the natives' "chattie," or the French casserole, and stirred with a wooden spoon. When making a curry in a stewpan, great care must be taken that the metal is well tinned. In India curries are very generally served with thin wafer-like cakes, called Papodums, and thin strips of dried fish, known as Bombay Ducks.

The recipes for typical Indian dishes will be more generally useful in India, where all the materials contained in them are easily obtained. The quantities are expressed in the commercial weights of this country, but the appended table of equivalents will enable the reader to easily convert avoirdupois into Indian weight:—

1 seer, 2 lb. ; 1 chittack, 2 oz. ;  $2\frac{1}{2}$  tolaks, 1 oz. ; 1 masher, 19 grains (or about  $\frac{1}{8}$  of a teaspoonful).

**American and Canadian Cookery** differs very little, if at all from cookery in England. If Caneton à l'Aylesbury were substituted for the Canvas-back Duck, which appears in the menu of a banquet recently given at the White House, in every other respect—as regards materials employed and arrangement of service—it would correspond with similar functions at the Mansion House. Evidently the French cuisine is as much appreciated and as much sought after in America and Canada as in England, although, like every other nation, Americans and Canadians have several dishes prepared from fish, animals, and fruits which are common to the country.

The Americans have a marked taste for sweet dishes, in which taste they show dietetic wisdom. The value of sugar as an article of food is sometimes overlooked by people who have accustomed themselves to a highly nitrogenous diet. Hot cakes at breakfast are quite a national institution. These are often made with soda or baking-powder, and must be regarded as somewhat beyond the capacities of average digestive organs.

## CARVING AT TABLE.

THE advantages of good carving are many, the chiefest being the ability to derive the best possible flavour from a dish, and at the same time to dispose of it in an economical manner. Your true artist cuts in such a way that every piece which he serves is sightly and palatable and does not contain a disproportionately large amount of fat. He has, too, a knowledge of the natural construction of various joints—a knowledge indispensable to all who wish to attain any proficiency in the art—and ensures that only the choicest cuts will be served, and that he will not give to any one person two differently flavoured slices of the same joint.

Many people find it very difficult to learn to carve, but as a rule it is because they do not begin at the beginning. They try to cut up a bird without any idea of its anatomy, and to cut slices of meat without knowing how the grain goes or where to find the joints, if any, and they therefore cannot succeed. In the succeeding pages will be found full directions for carving fish, meat, poultry, and game, and accompanying illustrations to help out the instructions. A careful study of the same will prevent anyone from making any grave error; but at the same time, as practice alone makes perfect, they should take all the opportunities of carving that come in their way, and when they see a good carver should watch his or her operations and take a lesson therefrom.

When carving a slice of meat, after the first incision has been made, the angle at which the knife is held must never be altered, or a jagged slice will be obtained. When the way to control the knife has been mastered the keystone to successful carving has been acquired.

The cut should be direct, sharp, and incisive. A saw-like action should never enter into the operation.

Generally speaking, the knife should be held firmly, but it cuts best when applied lightly, and less gravy is squeezed from the meat when the pressure is slight. By using the point of the knife lightly as a wedge, and the fork as a lever, even a big turkey or goose may be easily jointed, provided the carver is aware exactly how the joint is situated and held together. Every assistance should be given the carver by providing him with a thin sharp-bladed knife of suitable size, and by serving whatever is to be carved on a dish large enough to allow the joint or bird to be turned to the most convenient position for the purpose. The dish should also afford space for carved portions, for an expert carver will, with a few strokes of the knife, disjoint a

bird, and usually prefers to do so before beginning to serve any part of it. Carving is always more easily and pleasantly performed when the dish contains neither gravy nor garnish.

A steel knife and fork should never be used for fish, because contact with this metal is apt to spoil its flavour, and a silver or plated slice and fork should be provided for carving and serving. When serving fish be careful not to break the flakes, which ought to be served as entire as possible, though short-grained fish, such as salmon, should be cut lengthwise.

The carving of loins and necks of either veal, mutton, or lamb must in some measure be determined by the size of the joints, but if the butcher has separated the chine bone into narrow divisions, the carver should have no difficulty in cutting suitable portions. He can then cut between the bones, and each bone with meat attached should be of a convenient size for serving.

Some joints, such as the undercut of a sirloin of beef, or the knuckle end of a leg of mutton, are best when eaten hot; others are equally good either hot or cold, but sometimes by using only one particular part the joint may present a better appearance when served cold. Thus, if the under side of either a shoulder or leg of mutton is cut without encroaching on the upper surface, when the joint is turned over it will have almost the appearance of an uncut one. Moreover, multiplied cut surfaces provide means of escape for the juices of the meat, and as a natural consequence leave a dry and flavourless cold joint. Meat should always be cut across the grain, the one exception to the rule being the saddle of mutton, which is nearly always carved at right angles to the rib bones, in slices running parallel with the fibres of grain of the meat. When the joint or bird is stuffed a little of the forcemeat should be served with each portion, and the same rule applies to the watercress used to garnish birds and the toast upon which many small birds are dished. The gravy may be poured over brown meats, but it should always be put at the side of chicken, veal, and white meats.

Ham and beef should be carved into very thin slices, and mutton and pork into fairly thick ones. Joints that have to be carved should be served on dishes without any gravy or dressing.

**To Sharpen the Carving Knife.**—Hold the steel in the left hand, which should be on a level with the elbow, pointing the steel towards the right shoulder, and hold the knife almost perpendicularly in the right hand. Place the hilt of the knife's edge at the top of the steel, and draw the blade downwards the whole length of both steel and knife, first on one side and then on the other—i.e., so that the point of the knife finishes at the hilt of the steel. The blade should be almost flat on the steel, with the back slightly raised but with only the edge touching it.

### TO CARVE FISH.

**Cod** (ILLUSTRATION NO. 1, FIG. 2).—Cut in fairly thick slices through to the centre bone and detach just above it. Of this fish, the parts about the backbone and shoulders are the firmest, and most esteemed.

The sound, which lines the fish beneath the back bone, is considered a delicacy, as are also the gelatinous parts about the head and neck.

**Eel and all Flat Fish.**—The thick part is the best.

**Lobster, To Dress.**—Insert the knife at the centre of the back and cut through towards the tail. Then turn the lobster round and cut through towards the nose. Now remove the "brains." These are usually of a greenish colour and are found on either side of the lobster's head. Crack the claws with a hammer and arrange the fish on a dish, garnishing with fresh parsley. The tail of the lobster is the prime part, and next to that the claws.

**Mackerel** (ILLUSTRATION NO. 2, FIG. 2).—First cut along the backbone of the fish. Then insert the fish-knife at this part and cut through, separating the upper half of the fish which may be divided; when the fish is of moderate size serve for two helpings only. Next remove the backbone, tail, and head, and divide the lower half.

**Salmon** (ILLUSTRATION NO. 2, FIG. 3).—First run the knife down the centre of the back and along the whole length of the fish. Then cut downwards from the backbone to the middle of the fish, cut through the centre and remove the piece from the back. Next cut the lower part of the fish in the same manner.

A slice of the thick part should always be accompanied by a smaller piece of the thin from the belly, where lies the fat of the fish.

**Sole, Boiled or Fried** (ILLUSTRATION NO. 1, FIG. 1).—The usual way of helping this fish is to cut it quite through, bone and all, distributing it in nice and not too large pieces. The guests should be asked which part they prefer. The middle part is generally thought better than either head or tail. The head should be cut off—not laid on a guest's plate. In helping filleted soles, one fillet is given to each person.

**Plaice** (ILLUSTRATION NO. 1, FIG. 3).—First run the knife down the centre of the fish. Then cut downwards (only through to the bone) and remove portions in the manner shown in the illustration. Next take away the backbone and head of the fish, and treat the lower half the same way.

**Turbot** (ILLUSTRATION NO. 2, FIG. 1).—First run the fish-slice down the thickest part of the fish, quite through to the bone, and then cut slices towards the sides of the fish and upwards, as shown in the engraving. When the carver has removed all the meat from the upper side of the fish, the backbone should be raised, and the under side helped as the upper. The thick parts of the middle of the back are the best slices in a turbot; and the rich gelatinous skin covering the fish, as well as a little of the thick part of the fins, are dainty morsels, and small portions should be placed on each plate.

**Brill and John Dory.**—These are carved in the same manner as a turbot. The fillet near the head of a John Dory is the best part.

**Whiting, Haddock, etc.**—Whiting, pike, haddock, and similar fish, when of sufficiently large size, may be carved in slices from each side of the backbone in the same manner as salmon, each fish serving for four or more slices. When small, they may be cut through, bone and all, and helped in nice pieces. A small whiting is served whole; a middle-sized fish in two pieces.

### TO CARVE BEEF.

**Aitchbone of Beef** (ILLUSTRATION No. 4, FIG. 2).—A very simple joint to carve, as will be seen on referring to the illustration. Cut nice thin slices.

**Brisket of Beef.**—The point to be observed is that the joint should be cut evenly and firmly quite across the bones, in slices the whole width of the joint, so that on its re-appearance at table it should not have a jagged and untidy look.

**Beef Tongue.**—Cut nearly through across the tongue at the thick part and then serve a fairly thick slice. The carving may be continued in this way towards the point until the best portions of the upper side are served. The fat lies about the root of the tongue.

**Ribs of Beef** (ILLUSTRATION No. 3, FIG. 1).—The mode of carving is similar to that of the upper cut of the sirloin, viz., cut in slices off the sides, starting at the thick end and through to the other, as shown in Carving Illustration No. 3, Fig. 1. This joint will be the more easily cut if before commencing to carve it into slices the knife is inserted immediately between the bone and the meat.

**Sirloin of Beef** (ILLUSTRATION No. 3, FIGS. 1 AND 2).—This dish is served differently at various tables, some preferring it to come to table with the fillet, or, as it is usually called, the undercut, uppermost (see Fig. 2). The reverse way, as shown in the first illustration, is that most usually adopted. Still, the undercut is one of the prime parts of beef, and is best eaten when hot; consequently the carver himself may raise the joint, and cut some fairly thick slices out of the inner side, in the manner shown in Fig. 2. The upper part of the sirloin should be cut in the direction that the knife is travelling in Fig. 1, and care should be taken to carve it evenly and in thin slices. In carving this joint, the knife should be first inserted just above the bone at the bottom, and run sharply along between the bone and meat, and also to divide the meat from the bone in the same way at the side of the joint. The slices will then come away more readily.

**Round of Beef** (ILLUSTRATION No. 3, FIG. 3).—Off the outside of the joint, at its top, a thick slice should first be cut, so as to leave the surface smooth; then thin and even slices should be carved as shown in the illustration.

### TO CARVE VEAL.

**Breast of Veal.**—The breast of veal consists of two parts—the rib-bones and the gristly brisket. These two parts should first be separated by sharply passing the knife through the centre of the joint; when they are entirely divided, the rib-bones should each be detached separately and served. The brisket can be helped by cutting pieces from the centre part of the joint.

**Fillet of Veal.**—The carving of this joint is similar to that of a round of beef. Between the flap and the meat the stuffing is inserted, and a small portion of this should be served to every guest.

CARVING. No. 6.

1. Saddle of Mutton. 2. Forequarter of Lamb. 3. Forequarter of Lamb.

**Knuckle of Veal.**—This is carved in the same manner as leg of mutton (see Illustration No. 5, Fig. 1). The best slices are those from the thickest part of the knuckle—that is, the part where the fork is shown in the illustration.

**Loin of Veal.**—When jointing is properly performed, there is little difficulty in carrying the knife across and separating each chop. To each guest should be given a piece of the kidney and kidney-fat, which lie underneath, and are considered great delicacies.

**Calf's Head** (ILLUSTRATION NO. 4, FIG. 1).—A calf's head is nearly always boned before serving, and is then cut into slices like any other boned and rolled joint, but the illustration shows the method of carving when the bones have not been removed. Cut strips from the ear to the nose; with each of these should be helped a piece of what is called the throat sweetbread, cut in semi-circular form from the throat part. The eye and the flesh round are favourite morsels with many, and should be given to those at the table who are known to be the greatest connoisseurs. The jawbone being removed, there will then be found some nice lean, and the palate, which is reckoned by some a tit-bit, lies under the head. On a separate dish there is always served the tongue and brains, and each guest should be asked to take some.

## TO CARVE MUTTON AND LAMB.

**Fore-quarter of Lamb** (ILLUSTRATION NO. 6, FIGS. 2 AND 3).—In carving a fore-quarter of lamb, the separation of the shoulder from the breast is the first point to be attended to; this is done in the manner shown in Fig. 2, and then, by raising with a little force the shoulder, into which the fork should be firmly fixed, it will come away with just a little more exercise of the knife. In dividing the shoulder and breast take care not to cut away too much of the meat from the latter, as that would rather spoil its appearance when the shoulder is removed. Unless the whole of the quarter is to be cut up, the shoulder should be transferred to another dish and put aside to be served cold. The joint is then ready to be served to the guests; cutlets are carved from the ribs in the manner shown in Fig. 3, and the shoulder is carved in the usual manner. (See Illustration No. 5, Figs. 2 and 3.) When the shoulder is being used, the carver may ask those at the table which parts they prefer, ribs, brisket, or a piece of shoulder, or he may serve a piece of shoulder and a cutlet in each portion.

**Leg of Mutton** (ILLUSTRATION NO. 5, FIG. 1).—The knife should be carried sharply down, and slices taken from either side, as the guests may desire, some liking the knuckle end as well done, and others preferring the more underdone part. The fat should be sought near the bottom corner of the thick end.

**Loin of Mutton.**—A loin of mutton should be thoroughly well jointed by the butcher. This task is frequently imperfectly performed; therefore it is advisable to examine the loin before cooking it, and carefully joint any part that has been neglected. The knife should be inserted in the thick side of the joint, and after feeling a

way between the bones, it should be carried sharply through, separating each chop in the same manner.

**Saddle of Mutton** (ILLUSTRATION No. 6, FIG. 1).—The method adopted in carving this joint is contrary to the general rule of cutting meat, across the grain; in this case, the meat is carved across the ribs, in slices running parallel with the backbone and the fibres or grain of the meat. The illustration clearly shows what is meant. Each long slice should be cut across into two or three pieces, according to its length, and with each portion is usually served a small piece of fat cut from the bottom of the ribs where the joint rests on the dish, and some good gravy. Red-currant jelly is served separately.

**Shoulder of Mutton** (ILLUSTRATION No. 5, FIGS. 2 AND 3).—The joint should be raised from the dish and as many slices cut away as can be taken in the manner shown in Fig. 2; afterwards the meat lying on either side of the bladebone should be served, by carving from the knuckle end. The uppermost side of the shoulder being now finished, the joint should be turned, and slices taken off along its whole length. There are some who prefer the underside of the shoulder for its juicy flesh, although the grain of the meat is not so fine as that on the other side, and this is served in the manner shown in Fig. 3.

### TO CARVE PORK.

**Sucking-Pig.**—A sucking-pig is usually sent to table split in half and the head separated from the body. The first point to be attended to is to separate the shoulder from the carcass, which is done in the same way that the shoulder of a fore-quarter of lamb is separated. The next step is to take off the leg, and this is done in the same way. The ribs then stand fairly open to the knife, and two or three helpings will dispose of these. The other half of the pig is served, of course, in the same manner. Different parts of the pig are variously esteemed, some preferring the flesh of the neck, others the ribs, and others, again, the shoulders.

**Ham** (ILLUSTRATION No. 4, FIG. 3).—In cutting a ham, the carver must be guided according as he desires to practice economy, or have, at once, fine slices out of the prime part. Under the first supposition he will commence at the knuckle end, and cut off thin slices towards the thick part of the ham, slanting the knife from the thick part to the knuckle. To reach the choicer portion, the knife, which must be very sharp and thin, should be carried quite down to the bone, at the centre of the ham, which is then carved in the manner shown in the illustration.

**Leg of Pork.**—The knife should be carried sharply down to the bone, clean through the crackling, in exactly the same manner as that described for leg of mutton.

**Loin of Pork.**—It is essential that this dish should be properly jointed before cooking, and the crackling must be scored. Then divide into neat and even chops.

The other dishes of pork do not call for any special remarks as to their carving or helping.

## TO CARVE POULTRY.

**Roast Duck** (ILLUSTRATION NO. 7, FIG. 3).—No dishes require so much knowledge and skill in carving as game and poultry, for it is necessary to be well acquainted with the anatomy of the bird and animal in order to place the knife at exactly the proper point. A young duck or duckling is carved in the same manner as a chicken. First remove the wings, then the breast should be cut off the bone in one slice, or several slices if very plump. The legs are next removed and divided at the joints, and the foot and the bone to which it is attached should be cut off before serving. When stuffing has been introduced, the skin should be cut across and the farce scooped out with a spoon. "The wings of a flyer and the legs of a swimmer" are generally considered the best portions.

**Boiled Fowl** (ILLUSTRATION NO. 8, FIGS. 2 AND 3).—Though the legs of a boiled fowl are hidden beneath the skin, the method of carving is not affected, and the following directions may be applied to birds either roasted or boiled. The fork should be inserted firmly in the breast of the bird, and with a sharp knife a downward cut made between the thigh and the body, after which an outward turn of the blade of the knife usually detaches the leg sufficiently to allow the joint connecting it to the body to be easily severed. With the fork still inserted in the breast, the next step should be to remove the wings. In doing this a good carver will contrive by cutting widely, but not deeply, over the adjacent part of the breast, to give to the wing the desired shape without depriving the breast of much of its flesh. When carving a large fowl the breast may be sliced; otherwise it should be separated from the back by cutting through the rib-bones, the only difficulty in carving this part being the small hinge-bones near the neck. The breast should be cut across in half, thus providing two portions, to which may be added, when a larger helping is desired, a slice off the thigh. Cut lengthwise into rather thin slices; the legs may be satisfactorily disposed of even when those to be served consist of persons to whom a whole leg could not be offered. To conclude the carving, the back should be turned over with the cut side to the dish, and if the knife be pressed firmly across the centre of it, and the neck raised at the same time with the fork, the back is easily dislocated about the middle. To remove the sockets of the thigh-joints (the side-bones to which is attached choice morsels of dark-coloured flesh) the tail part of the back must be stood on end, and held firmly by means of the fork, while the bones are cut off on either side. The more highly esteemed parts of a fowl are the breast, wings, and merry-thought; the thigh may be served to a gentleman, but the drum sticks should be put aside, and used afterwards in some way that necessitates the flesh being minced. A fowl, when boned and stuffed, is usually cut across in slices.

**Roast Fowl** (ILLUSTRATION NO. 8, FIG. 1).—Fowls, when roasted, are carved in exactly the same manner as when boiled, therefore the foregoing directions and illustrations render it unnecessary to describe the operation again. When the liver and gizzard have been trussed

and cooked with the fowl, the wing to which the liver is attached may be regarded as the choice portion of the bird, and should be offered to the person entitled to the most consideration in this respect. When the fowl is stuffed, a little forcemeat should be served with each portion, but it is better to hand the gravy and bread sauce separately.

**Roast Goose.**—The breast of a goose is the part most esteemed, therefore when the bird is larger than is necessary to meet the requirements of one meal, it frequently happens that the carving is confined solely to the breast. The carver should, however, consult the tastes of those he is serving with reference to choice of parts, for the leg is sometimes preferred. A large number of slices may be cut off the breast, and as the wing is the part least esteemed, the flesh of the upper part of it may with advantage be included in the slices cut from the breast. When onion farce has been employed it is advisable to ascertain if it be agreeable to the taste of the person for whom the portion of goose is intended, for so many dislike the farce itself, although they may like the flavour imparted to the bird by its use. The directions given for carving a boiled fowl may be applied here, although greater force will most probably be required in detaching the various parts. When the goose is stuffed with onion farce it is nearly always accompanied with apple sauce and gravy, both of which should, when convenient, be handed separately.

**Roast Turkey** (ILLUSTRATION NO. 7, FIGS. 1 AND 2).—A small turkey may be carved in the same manner as a large fowl (see directions for carving the same); and no bird is more easily carved than a large turkey, for the breast alone may, when properly carved, be made to serve a large number of persons. If more meat is required than the breast provides, the upper part of the wing should be served. When it is necessary for the legs to be carved, they should be severed from the body and then cut into slices. The forcemeat in the crop of the bird should be carved across in thin slices, and when the body is stuffed, the apron should be cut across.

A boiled turkey is carved in the same manner as when roasted.

**Pigeon.**—Carry the knife entirely through the centre of the bird, cutting it into two precisely equal and similar parts. If it is necessary to make three pieces of it, a small wing should be cut off with the leg on either side, thus serving two guests; and, by this means, there will be sufficient meat left on the breast to send to the third guest.

**Rabbits.**—In carving a boiled rabbit the knife should be drawn on each side of the backbone, the whole length of the rabbit, thus separating the rabbit into three parts. Now divide the back into two equal parts, then let the leg be taken off, and next the shoulder. This is an easy way to carve a rabbit, though there are other modes equally practical.

A roast rabbit is rather differently trussed from one that is meant to be boiled; but the carving is nearly similar. The back should be divided into as many pieces as it will give, and the legs and shoulders can then be detached in the same manner as those of the boiled animal.

## TO CARVE GAME.

**Blackcock.**—The method of carving blackcock is identical with that for boiled fowl. The breast and the thigh are the only parts esteemed; the latter may be cut lengthwise into thin slices, or served whole.

**Wild Duck.**—As game is almost universally served as a dainty, these dishes are not usually cut up entirely, but only those parts are served of each which are considered the best flavoured and the primest. Of wild fowl, the breast alone is considered by epicures worth eating, and slices are cut; if necessary, the leg and wing can be taken off by generally following the directions described for carving boiled fowl.

**Roast Hare.**—Place the hare on the dish with the head at the left hand. Make an incision, and cut along the spinal bone from about the centre of the back to the end. Then cut through the side at the point where the incision was made, and then cut the portion away. Then cut off the hind leg in the way that the leg of a fowl is severed, and afterwards the foreleg or wing. It is the usual plan not to serve any bone in helping hare; and thus the flesh should be sliced from the legs and placed alone on the plate. In large establishments, and where men cooks are kept, it is often the case that the backbone of the hare, especially in old animals, is taken out, and then the process of carving is, of course, considerably facilitated. Plenty of gravy should accompany each helping, otherwise this dish, which is naturally dry, will lose half its flavour, and so become a failure. Stuffing is also served with it, and the ears, which should be nicely crisp, and the brains of the hare, are esteemed as delicacies.

**Grouse.**—Grouse may be carved in the way first described in carving partridge. The backbone of the grouse is highly esteemed, and this part of many game birds is considered to possess the finest flavour.

**Partridges.**—The usual method is to carry the knife sharply along the top of the breastbone and cut it quite through, thus dividing the bird into two equal parts. When smaller portions are desired the bird is sometimes divided into three parts. The legs and wings may be easily severed from the body in the manner described for boiled fowl, while the breast, if removed intact, will provide a third helping. Another easy and expeditious way of carving birds of this description is to cut them through the bones lengthwise and across, thus forming four portions. A piece of toast should accompany each portion of bird; sometimes the fried breadcrumbs, bread sauce, and gravy are added by the carver, but it is much better to hand them separately.

**Pheasant.**—The choice parts are the breast and wings. Carve in exactly the same manner as roast or boiled fowl.

**Snipe.**—One of these small but delicious birds may be given whole to a gentleman, but in helping a lady it will be better to cut them quite through the centre, completely dividing them into equal and like portions, and put only one-half on the plate.

**Haunch of Venison.**—An incision being made completely down to the bone, the gravy will then be able easily to flow, when slices, not too thick, should be cut along the haunch, the thick end of the joint having been turned towards the carver, so that he may have a more complete command over the joint. Each guest should be served with a portion of fat; like mutton, venison soon begins to chill, when it loses much of its excellence.

**Woodcock.**—This bird may be carved by cutting it exactly into two like portions, or made into three helpings, as described in carving partridge. The backbone is considered the tit-bit of a woodcock, and by many the thigh is also thought a great delicacy.

**Landrail.**—Landrail is carved in the same manner as snipe.

**Ortolans** are usually helped whole, but may be divided for ladies.

**Ptarmigan.**—Carve in the same way as grouse and partridge.

**Quails** are trussed and served and carved like woodcock.

**Plovers.**—Plovers may be carved like quails or woodcock.

**Teal and Widgeon.**—Both these birds are trussed and served like wild duck, and should be similarly carved.

# TRUSSING POULTRY AND GAME.

REALISING the importance of this branch of the cook's art, and knowing how difficult it is to learn from written instructions, we have prepared a series of illustrations to practically show the various stages in the preparation of game and poultry for different modes of cooking. To obtain these and to ensure their being reliable guides for the uninitiated, we secured the services of a very experienced trusser. The latter, taking each bird or animal in turn, demonstrated the manner of drawing, trussing, etc., at each stage of which a photograph was taken, so that by studying these the amateur will be able to acquire the proper method. Skewers are not now used for trussing fowls and similar small birds, which are always trussed with a needle and twine. This mode not only facilitates the carving, but avoids serving a dish rendered unsightly by skewers or skewer holes. Trussing needles, made of iron, are obtainable from any ironmonger. They are very similar to packing needles—strong and straight, about 9 inches long.

**To Pluck a Bird.**—Hold the bird in the left hand and commence to pull off the feathers from under the wing. Having plucked one side, take the other wing and proceed in the same manner until all the feathers are removed. Poultry feeders usually pluck birds immediately after killing, because the feathers are more easily withdrawn before the flesh stiffens. Another way is to plunge the bird into hot, but not boiling, water for about one minute, and immediately pull out the feathers. But this is a rather risky method, for if the bird be left too long in the water, the skin becomes tender, apt to be easily torn, and the appearance is thus spoiled.

**To Singe Poultry.**—Hold the bird by the neck with the left hand, and with the right hand singe off the down with a lighted paper, moving it quickly so as not to scorch the bird; those parts that will be hidden after the bird is trussed must be most carefully gone over, but it is usual to again singe after trussing. In large kitchens there is sometimes a gas-tube, which is very convenient for singeing poultry, and avoids, to some extent, any chance of burning or scorching during the operation; but a lighted paper carefully used is all that is necessary.

It is useless to expect singeing to take away the feathers that have been left in through careless plucking; if any should appear, they must be pulled out, not singed off, otherwise they will impart a disagreeable odour of burnt feathers to the bird.

**To Bone Poultry and Game.**—Birds are invariably plucked and singed before boning, but not drawn. The crop, however, should be removed, the wings and legs cut off at the first joint, and the tendons of the legs carefully drawn at the same time. To bone the bird, use a small sharp knife, and first remove the merry-thought at the neck. This done, cut the skin down the centre of the back and raise the flesh carefully on either side, sever the wing joints, and continue to detach the flesh, keeping the blade of the knife close to the bone. When the legs are reached, dislocate the joints, cut the connecting tendons, but leave both wings and legs intact until the breast and back bones have been removed, together with the viscera. Turn the body inside out; take the thigh bones of one of the legs in the left hand and strip the flesh downwards. Repeat this until all the small bones are removed. The bird may then be turned right side out again, when it will be found completely boned and should be quite whole.

Both large and small birds may be boned in this way. They are then stuffed, re-shaped, and trussed, or rolled into galantines.

**To Draw Poultry** (ILLUSTRATION No. 1).—Lay the bird back downwards upon the table, and cut off the ends of the pinions. Then turn the bird breast downwards, and cut a long slit in the back of the neck, in the manner shown in Trussing Illustration No. 1, Fig. 1; pass the knife under the skin, cut off the neck at its junction with the body, taking care not to cut through the under skin of the neck in this motion. Then cut through the skin of the back of the neck at the place where the first incision was made, and through the underneath skin about three inches from the breast, leaving the two flaps of neck skin to fold over the jagged opening (see Figs. 2 and 3), and draw out the neck. Then take out the crop, and well loosen the entrails by placing the forefinger inside the body, and working it round from left to right (see Fig. 4). Put the fowl on the table tail upwards and make a deep cut straight across the body, between the tail and the vent. The vent can then be easily cut out, and the opening will be found sufficiently large to enable the fingers to be put inside the bird to take hold of the gizzard, etc. (see Fig. 5), and if the loosening at the other end has been properly performed, the whole of the inside of the fowl can be easily drawn away in one mass. Care should be taken not to draw away the fat on gizzard. This can be felt with the fingers and may be easily left inside the bird.

Be very careful not to break the gall-bladder, for this accident may ruin the bird by imparting a very bitter taste to the flesh. Now wipe out the inside with a clean cloth, but do not wash the bird, unless any part of the inside has been broken in drawing; dip the legs of the bird in boiling water, scrape them, and cut off the claws.

**To Truss a Fowl for Roasting** (ILLUSTRATION No. 2).—Place the fowl upon the table as shown in illustration, and pass the needle and string through the centre of the fowl, just above the thigh-bone, exactly in the centre of the two joints (see Fig. 1), leaving the end of the string protruding from the place where the needle entered the bird. Turn the fowl over on to its breast, and carrying the twine on, pass it in a slanting direction between the two centre bones of the wing, catching

TRUSSING. No. 3.

(See instructions.)

TRUSSING. No. 4.

(See instructions.)

the underneath part of the pinion (see Fig. 2), and then over the bird through the pinion and then the wing of the other side, and the string will come out near the point where it first entered the fowl; then tie the two ends together, but not too tightly, or the bird will not lie flat on the dish (Fig. 3). Next take the fowl in the left hand, breast downwards, and pass the needle and twine through the back, close to the end of the thigh-bones (Fig. 4); put the legs into position shown, turn the fowl on its back, and carry the string over the leg and then through the breast, catching up a small portion of the bone as the needle passes through. Take the string on over the other leg, and tie the ends together, and the bird will be ready for roasting (see Fig. 5).

Now again singe the bird, going over it very carefully, so that no feathers remain; then, after cleaning and washing the gizzard and liver, put one in each of the pinions.

**To Truss a Fowl for Boiling** (ILLUSTRATION No. 3).—It is generally found more difficult for a beginner to truss a fowl for boiling than for roasting, for in loosening the skin and drawing it over the bone it is very easy to tear it.

Loosen the skin of the leg by placing the two first fingers of the hand inside the body, and working round the leg, as shown (Fig. 1). Make a cut in the drumstick of the fowl, about half an inch from the hock (Fig. 2), to prevent the bone from breaking under the next operation. Turn the shank inward on to the back of the fowl (Fig. 3), and draw the skin of the leg over the hock, tucking the joint into the body (as in Fig. 4). Next cut off the shank about half an inch above the foot, i.e., cutting off all the leg and foot that shows in Fig. 4. Sew with needle and string as for roasted fowl (see Fig. 5).

**To Truss a Turkey** (ILLUSTRATION No. 4).—Turkeys are plucked and singed in exactly the same manner as fowls, but before trussing draw the sinews. To do this, break the leg bones close to the feet, run them on a hook placed in the wall (*above* you, so that weight as well as strength can be brought to bear), and draw out the sinews as shown in Fig. 1. Next cut off the neck close to the back, leaving enough skin to turn over it, and loosen the liver and the rest of the inside at the throat end. Cut off the vent, take out the gut, and draw the bird with a hook sold for this purpose. Take great care not to break the gut joining the gizzard, for fear of grit, or the gall bladder, which, if broken, would make the flesh bitter. Next dry the inside thoroughly. Cut the breastbone through at each side close to the back, beat it flat with a wooden rolling-pin, then place the pinions as shown in illustration, and skewer (Figs. 2 and 3). Press the legs close to the body and skewer at first and second joints, and the turkey will now be ready for stuffing.

Having filled the bird with the forcemeat (the fuller the better), skewer over the flap of skin, also that at the neck. Turn the bird back uppermost and put a string across and across as shown.

As with a fowl, a boned turkey has sometimes the legs put inside, so that less stuffing is needed, and the aim is not to preserve its form, but to make it present a broad smooth surface that is easy to carve.

**To Truss a Goose or Duck** (ILLUSTRATION No. 4, FIG. 5).—Geese and ducks are prepared, drawn, and trussed in the same manner as

fowls and turkeys, except that the wings or pinions are cut off at the first joint. The feet of a goose are often removed, but those of a duck are just as frequently left on, the tips of the toes alone being cut off.

**To Truss Grouse.**—When plucking leave the breast feather for removal afterwards, in order to prevent the skin being broken in trussing. First cut off the head, leaving enough skin to skewer back, loosen the inside at neck and squeeze out and wipe the inside of the bird. Secondly, bring the legs close to the breast, between it and the side bones, and pass a needle through the pinions and the thick part of the thighs, tie round, then take off the breast feathers with the aid of a knife, thus avoiding the breaking of the skin.

Partridges and pheasants are trussed in the same manner, but the latter can be drawn in the same way as a fowl.

**To Truss a Pigeon** (ILLUSTRATION NO. 2, FIGS. 6 AND 7).—First pluck and draw the bird, wash it very thoroughly and wipe perfectly dry. Then cut off the neck and head, and the toes at the first joint. Truss for roasting by crossing the legs and running a trussing needle and twine through both pinions and legs (Fig. 7). For stewing, twist the legs up on each side and fasten with a trussing needle and twine (Fig. 6). Pigeons are better if drawn directly they are killed.

**To Truss Snipe, Plovers, Quails, and Woodcock.**—First pluck the birds, and wipe them outside with a damp cloth, but do not draw them. Twist the legs, thrust them close to the body; skin the neck and head, and bring the beak round under the wing. The birds should then be placed on toast.

**To Skin and Truss a Hare** (ILLUSTRATION NO. 4, FIGS. 6 AND 7).—Cut off the fore and hind legs at the first joint, make a long slit in the skin underneath the body, detach it from the flesh, and draw it over the hind legs, leaving the tail on. The next step is to draw the skin over the back and slip out the fore legs, easing it with a knife, if necessary, over the neck and head, and being very careful not to injure the ears, which are left on. In skinning this is the most delicate part, and one that is always found difficult by the amateur, but the appearance of a roast hare is spoilt if the ears are torn or otherwise injured.

To hang the hare on a hook is a most convenient way of accomplishing the skinning. Slit the body in the same direction as the skin was cut, remove all the viscera except the kidneys, and wipe the inside with a clean, damp cloth. Next cut the sinews beneath the hind legs and press them towards the head, and bring the fore-legs backwards to the hind ones. A skewer can then be passed through the two legs on one side, through the body and the two legs on the other side, the chief part of the trussing being thus effected by means of one skewer. Press back the head (Fig. 6), pass a skewer through the top of the shoulder, the back of the neck, and out through the top of the opposite shoulder.

**To Truss a Rabbit for Roasting or Boiling.**—Empty, skin and wash the rabbit, wipe it dry, and take out the eyes. Then cut off the fore-joints of the shoulders and legs, and fasten close to the body with needle and twine; raise the head and skewer it back between the shoulders. Put stuffing in (if liked) when roasting, and sew up.

## SERVIETTES.

THE serviettes or table napkins should be neatly and tastefully folded when first put on the table. In ordinary family use they are often folded smoothly and slipped through napkin rings made of silver, ivory, or bone ; in fact, after the first use this is usually done, each member of the family having his own marked ring. In the following pages we give instructions and illustrations showing a few ways of making these useful articles an ornament to the table, but these fancy designs are not fashionable in the household now, and the serviette should simply be folded neatly and laid flat on the plate.

The accompanying engravings depict popular designs and the methods of folding them. It must, however, be remembered that it is useless to attempt anything but the most simple forms unless the napkins have been slightly starched and smoothly ironed. In every case the folding must be exact, or the result will be slovenly and unsightly.

The usual size of these indispensable accompaniments to the dinner table is a square measuring about 30 inches. The designs in the following pages are worked out with a square serviette, and there is a diagram showing how each fold is made and the effect that is produced in every case.

A small dinner roll or a piece of bread cut thick, about 3 inches square, should be placed in each napkin, when such designs as "The Mitre," are used, and the appearance of the dinner-table may be greatly improved by putting a flower or small bouquet in napkins folded into other patterns.

## MENU-MAKING.

THE successful compilation of menus, which to the inexperienced presents many difficulties, requires much more than a superficial knowledge of the materials used in cooking, and their method of preparation and serving.

In considering the three chief points of a menu, the first, *the materials to be provided*, depends upon the occasion, the season, and the number of persons to be provided for. The more elaborate the meal, the more difficult is the task of selecting dishes which, while they differ from one another in material, appearance, and flavour, will yet, when blended together, form a harmonious whole. Nothing can be more unsatisfactory than a series of badly-assorted dishes selected without consideration for variety in composition, flavour, and colour.

Dishes appropriate to the season should also be selected, for when food materials are plentiful they are comparatively good and cheap. Moreover, a larger proportion of fruits and salads, and light dishes generally, should be introduced in summer, while in colder weather more substantial food will be found acceptable.

The success of a dinner does not depend upon the number of dishes introduced. It is far better to have fewer courses well cooked and well served than an elaborate, pretentious, badly-cooked meal.

There are certain rules which must at all times be observed. The inexperienced are apt to forget that if two soups are served they must be entirely opposite in character and consistency; that two brown or white sauces may not follow each other; and that each dish should vary in colour and taste from that served before and after it.

**Arranging Menus.**—A complete dinner consists of eight courses, arranged in the following order:—

- |                  |            |            |               |
|------------------|------------|------------|---------------|
| 1. Hors d'œuvre, | 3. Fish,   | 5. Remove, | 7. Entremets, |
| 2. Soup,         | 4. Entrée, | 6. Rôti,   | 8. Dessert.   |

**Hors d'œuvre.**—In recent years *hors d'œuvre* have rapidly gained favour and nearly always appear on elaborate menus. The term *hors d'œuvre* is now applied exclusively to such cold trifles as oysters, sardines, anchovies, fillets of herring, prawns, olives, and radishes served as a relish or appetiser at the commencement of a dinner; but it originally extended to rissoles, croquettes, oyster-patties, and such things a previous generation classed as "side-dishes," which are now served as light *entrées*. When the term *hors d'œuvre* appears after the fish, as it does in many old bills of fare, it refers to this class of dishes, rather than to the savoury appetisers now in vogue.

The *hors d'œuvre* dishes are frequently placed on the plates before the guests enter the dining-room.

**Soups.**—When the number does not exceed twelve, one soup alone is necessary, and with but few exceptions clear soup is given preference to, being more generally appreciated than a thick soup. When two soups are served, one should be clear and the other a thick soup, cream or purée, and in such cases the clear soup should be served first and be placed first on the menu. If either of the latter consists of vegetables, the clear soup must contain no vegetable garnish. According to the same rule, if a purée of chicken or hare be served, neither chicken nor hare must appear in the courses that are to follow. The soups should also vary in colour; and here the green of the spinach and pea soups, and the red of the tomato soup; will be found useful when the dinner has a preponderance of white or brown dishes.

**Fish.**—When two kinds of fish are included in the course, it is usual to serve first that which is boiled, and generally a large fish, such as turbot, salmon, or cod; cold salmon would be served *after* the hot fish. Some small fish should be selected to follow the large boiled one, and it must be prepared by some dry method as frying, grilling, or broiling. Should the service consist of grilled or fried fish, and lobster or oyster soufflés, or fish dressed in small portions to be handed round instead of being served from the sideboard, the latter would follow the grilled fish. Considerable discretion must be exercised in selecting sauces to accompany the fish. It may happen that a green soup has been given to form a contrast to the white fish to follow; if this be so, a green sauce cannot be served with the fish, neither can a yellow one, if a sauce of that colour has been chosen to accompany the grilled or fried fish. And throughout the whole dinner the same care is necessary to avoid repetition.

**Entrées.**—In the present day the term *entrée* is used to distinguish practically all kinds of made dishes, from the simple rissole of cold meat to the artistic productions for which this part of the dinner provides such ample scope. As *entrées* are always handed, they come more under the direct observation of the guest than any other part of the service, consequently it is upon the dishes forming this course that the taste and skill of the cook is largely bestowed. Tasteful dishing and a little artistic decoration is desirable, but over-ornamentation is in bad taste, and should be studiously avoided. All such light dishes as rissoles, croquettes, quenelles, and kromeskis come before the more substantial *entrées* of fillets and cutlets. Whether a brown or white *entrée* should be served first depends partly on the dish to follow, but in a greater measure on the composition of the respective dishes. For instance, if the dishes selected are sweetbread, and chicken cooked in a rich brown sauce, as Chicken à la Maréngo, the sweetbread, being more delicate in flavour, would be more likely to be appreciated if it preceded the highly-flavoured brown *entrée* than if it followed it. Hot *entrées* are always served before cold ones; and an *entrée* of any small bird, such as quails, would be served before a more substantial *entrée* of poultry, game, or meat. Sauces are usually served in the dish poured round the *entrée* in many cases, poured over it in some few. The exception to this rule is when

soufflés and other mixtures are served in china or paper cases, and the accompanying sauce is served in a sauce-boat.

**Removes.**—The joint, or *pièce de résistance*, constitutes the most substantial part of fashionable dinners, and the most important feature of plain homely dinners. Although a saddle of mutton or sirloin or fillet of beef frequently comprise this course, one's choice is not necessarily confined to joints of meat, for turkeys, chickens, geese, ducks, pies, venison, etc., may all be served instead. If there are two removes, the poultry is served before the joint of meat. Appropriate, plainly-dressed vegetables are always served with the "remove," but it is a matter of choice as to whether they appear on the menu; and the same remark applies to such sauces as mint and horseradish, and other things which always accompany certain dishes.

**Roasts.**—The term roast, or *rôti*, signifies a dish of poultry or game, such as partridges, grouse, pheasants, woodcock, guinea fowls, turkeys, chickens, ducks, geese, and a variety of other things. When arranging the menu for a *recherché* dinner some luxury not in full season is usually selected, some delicacy to tempt the partially-appeased appetites of the guests. In a more simple dinner this course is frequently omitted altogether.

**Entremets.**—The term *entremets* applies to all vegetable dishes, jellies, pastries, salads, prawns, lobsters, and in general to everything that appears in the second course, except the roast."

**Entremet of Vegetables.**—Although *entremets* may be classed under one heading, the service consists of three courses as distinct in themselves as those of soup, fish, and *entrée*. The first, the vegetable *entremet*, comprises one or more dishes of dressed vegetables, such as cauliflower *au gratin*, tomatoes prepared in a variety of ways, savoury cucumber, vegetable marrow fritters, peas, celery, French beans, and asparagus. Dressed vegetables, like *hors d'œuvres*, have gained rapidly in favour during recent years.

**Sweets.**—When both hot and cold sweets are provided, the hot dish is served first. All sweets, whether hot or cold, come before iced puddings or ices, which, when large, are served in this course. Smaller ices may be served either in this course or with the dessert. In selecting the sweets, their colours and flavours should be carefully assorted, but there is such a variety of creams, jellies, babas, savarins, puddings, and fruits to choose from that little difficulty is experienced.

**Savouries.**—Savouries are intended to prepare the palate for the taste of the choice wines which usually follow a good dinner. A piquant, rather strong appetising flavour is an essential in a savoury, and they are so quickly and easily decorated that it is an easy matter to provide a combination pleasing alike to the eye and the palate. They exist in endless variety, and there is no necessity to use things that have already figured as *hors d'œuvres*.

**Dessert.**—Cheese is served immediately after the savouries. Any kind of fresh fruit may be selected, also dried fruits, crystallized fruits, bon-bons, petits fours, fancy biscuits, and dessert ices.

## HOW TO WAIT AT TABLE.

THE servants who wait at table are usually a butler and several footmen, or one man-servant and a parlour-maid, but in many cases parlour-maid and housemaid only. If hired waiters are employed, they must be very neatly attired in a black dress suit and a white necktie.

The women-servants should wear muslin aprons (white) and collar, cap, and cuffs. There should be at least one servant or waiter on each side of the table at a moderately large dinner party. The waiting commences from the head of the table, and there must be assistants, outside the door, to bring the dishes and remove them entirely from the room. When the dinner is served on the table the waiter must stand at the left-hand side of the carver and remove the covers. As the soup comes first, a plateful is carried to each person, unless they signify they do not wish for any, and commences from the one on the right of the host. The sherry and claret then are handed round. The moment a person's plate is empty, or finished with, it must be quietly taken away, spoon and all. These soiled plates are all carried to their proper receptacle, a zinc-lined basket for the purpose, standing in a convenient corner near the sideboard. The soup-tureen is removed last. All forks, spoons, and cutlery, when dirty, are placed in boxes or baskets similar to the plate bucket or basket, with a cloth at the bottom; the cloth is for two good purposes—that there may be no unnecessary noise, and that the articles therein shall not be scratched or otherwise damaged. The fish is carried round in the same manner as the soup, the attendant having in the left hand the sauce-tureen, or being followed by another servant carrying it. All plates are placed and removed by the waiter at the left-hand of the carver, or of the person being served. Sauces are next taken round, and then the wine. Entrées are almost invariably handed, even when the joints are carved upon the table. When the joint comes on, and the meat has been taken to the guests as before, the vegetables (which are usually placed upon the sideboard, and not on the table) are handed about, together with a tureen of gravy for fowls or birds. The same process is gone through with respect to the soiled plates. Dinner over, the crumb-brushes are brought into requisition; the dessert plates arranged upon the table, and after everything is in proper order, a few dishes are handed round by the attendants, who then leave the room. In handing beer, which is not now much drunk at dinners that come at all under the head of "party dinners," or the aerated waters now always given, the attendants take the small tray or salver in the left hand, and, standing at the left side of the guest who places his or her glass upon it to be filled, pours out the liquid with the right hand.

## NOTE.

It will be seen, on referring to the recipes which follow, that by the original method of explanation adopted, the rules for the preparation of each dish are clearly and intelligibly indicated. We would recommend the young housekeeper, cook, or whoever may be engaged in the important task of "getting ready" the dinner or other meal, to follow precisely the order in which the recipes are given. Thus, let them first place on their table all the **ingredients** necessary; then their **method** of preparation will be quickly and easily managed. By carefully reading the recipes there should not be the slightest difficulty in arranging a repast for any number of persons, and an accurate notion will be gained of the **time** required for the cooking of each dish, the periods when it is **seasonable**, and its **average cost**.

The prices are based on a careful study of the London market lists of the season, when the various articles are at their best. Where the fluctuations are very considerable, the item is omitted from the calculation. As stated, the prices are **average** only, and must be modified according to season, district, and the supply of and demand for the articles that may prevail.

The recipes are arranged in Dictionary form, and any difficulty that may occur in turning up a recipe will be easily overcome by referring to the Analytical Index at the end of the book, in which the recipes are arranged alphabetically under the respective modes of cookery with which they are associated. A fund of general information and hints will be found in the chapter entitled "Food and Cookery," and this section should be carefully studied by those who wish to acquire proficiency in the art of cookery.

# RECIPES.

---

## ALMA PUDDING.

INGREDIENTS.—8 ozs. of flour, 6 ozs. of castor sugar, 4 ozs. of butter, 2 ozs. of currants, 2 ozs. of sultanas, 4 eggs, 1 teaspoonful of baking powder, the grated rind of 1 lemon.

METHOD.—Clean and pick the currants and sultanas. Cream the butter and sugar together until thick and white, then beat in the eggs, and add the rest of the ingredients. Have ready a well-buttered mould or basin, pour in the mixture, and steam for 2 hours. Serve with a suitable sauce.

TIME.—2½ hours. AVERAGE COST, about 1s. SUFFICIENT for 5 or 6 persons.

## ALMOND BREAD.

INGREDIENTS.—4 ozs. of almond meal, 2 tablespoonfuls of gluten meal, 1 teaspoonful of baking powder, 1 oz. of butter, 2 eggs, salt.

METHOD.—Mix the meal, salt, and baking powder together, and add the butter previously well beaten. Add the eggs separately, beat well, then bake in a shallow tin from 20 to 25 minutes.

TIME.—1 hour.

## ALMOND CAKE.

INGREDIENTS.—½ lb. of ground sweet almonds, ½ oz. of pounded bitter almonds, 6 ozs. of castor sugar, 3 ozs. of butter, 14 ozs. of flour, 6 eggs, essence of lemon.

METHOD.—Break the eggs into a clean bowl, add the sugar, pre-

viously warmed, and beat the mixture well together with a wire egg whisk until it is as thick as cream; then add the butter (melted), then mix in the almonds, flour (sifted), and essence of lemon with a spoon. Butter a plain mould, fill it with the mixture, and bake in a steady oven. It will require from 1½ to 2 hours to bake, and great care must be taken to prevent the mixture burning. Cover an equal number of slices thickly with creamed butter or mayonnaise sauce, and press the parts firmly together. Trim neatly, cut into circles, squares, or triangles, and serve on a folded serviette garnished with watercress or parsley.

## ANCHOVY BUTTER.

INGREDIENTS.— $\frac{1}{4}$  lb. of fresh butter, 6 anchovies, and Krona pepper.

METHOD.—Wash and bone the anchovies, pound them in a mortar until smooth, using a little butter to facilitate the pounding, then rub them through a fine sieve. Mix with them the rest of the butter, and add a little Krona pepper to deepen the red hue of the fish. Anchovy essence or paste may be used instead of anchovies, but the flavour of the preparation is not nearly so good, although when thus prepared it answers ordinarily as an adjunct to other substances. Lobster, sardine, prawn, and shrimp butter may be made by pounding the fish until smooth, adding butter gradually until the preparation is sufficiently moist to be easily spread. When pungency is desired, it may be obtained by adding curry-powder and paprika pepper, or cayenne; and when less highly seasoned preparations are preferred, the mild, agreeably-flavoured Krona pepper should be employed.

Lay an oyster on each, add a few drops of lemon-juice, roll up tightly, and secure the bacon in position with a large pin. ### APPLE CHARLOTTE.

✓ **INGREDIENTS.**—2 lbs. of good cooking apples, 4 ozs. of brown sugar, or to taste, 1 oz. of butter, the rind of 1 lemon. For lining the mould: thin slices of bread, oiled butter.

**METHOD.**—Peel, core, and slice the apples, put them into a stewpan with the sugar, and 1 tablespoonful of water, and cook until tender. When the apples are reduced to a soft smooth pulp, add the butter and lemon-rind, and sweeten to taste. Meanwhile, take a plain soufflé mould, and cover the bottom with a round of bread, previously cut in quarters and dipped into the melted butter. If a pretty dish is desired, the sides of the mould should be lined with rounds of bread, of  $\frac{3}{4}$ -inch diameter, arranged overlapping each other; but as 3 or 4 tiers may be required this method occupies considerable time. It may be more quickly lined with long narrow strips the size of Savoy biscuits; these may also overlap each other, or they may be laid flat against the tin. Each piece of bread must be dipped into the oiled butter before being used. When the mould is ready, put in the apple pulp, cover the top with a round of bread, and bake in a moderate oven for about 30 minutes.

**TIME.**—About 2 hours. **AVERAGE COST,** 1s. to 1s. 2d. **SUFFICIENT** for 6 or 7 persons.

## APPLE SAUCE.

2 tablespoonfuls of moist sugar, 6 cloves, if liked.

**METHOD.**—Peel, core, and cut the apples into rather thick slices. Make the paste as directed for Suet Crust. Cut off rather more than a  $\frac{1}{4}$  of the paste for the lid, roll out the remainder, and with it line the basin, previously well greased. Put in half the fruit, then the sugar, intersperse the cloves, cover with the remainder of the fruit and add  $\frac{1}{2}$  gill of cold water. Roll out the rest of the pastry to the size of the top of the basin, moisten the edges slightly, and join them carefully to the edges of the pastry lining the basin. If the pudding is to be boiled, cover the top with a well-floured cloth; if steamed, 2 folds of greased paper may be used. Cook from  $2\frac{1}{2}$  to 3 hours.

**METHOD.**—Peel, core, and slice the apples, put them into a saucepan with the sugar, butter, and a very little water, and cook them until tender. Add more sugar if necessary, before serving.

**TIME.**—30 to 40 minutes. **AVERAGE COST,** 4d. to 5d.

## APPLE SNOW.

**INGREDIENTS.**—6 sour cooking apples, 4 ozs. of sugar, or to taste, yolks of 4 eggs, 2 whites of eggs, the grated rind of  $\frac{1}{2}$  lemon, vanilla pod,  $\frac{1}{2}$  pint of milk, 1 tablespoonful of cream.

**METHOD.**—Pare, core, and slice the apples, put them into a stewpan with the lemon-rind, 2 ozs. of sugar and a little water. Cook

until tender, rub them through a fine sieve, let the purée cool, then stir in the cream. Simmer the milk and vanilla pod together until sufficiently flavoured, then remove the pod (dry it and place in castor sugar for future use), add sugar to taste, stir in the well-beaten yolks of eggs, and cook by the side of the fire until they thicken, stirring meanwhile. Now put the apple purée into a buttered piedish, pour the custard on the top, and cover with the stiffly-whisked whites of eggs. Dredge liberally with castor sugar, and bake in a moderate oven until the surface hardens and acquires a little colour. Serve hot or cold.

**TIME.**—About 1 hour. **AVERAGE COST,** 1s. 1d. **SUFFICIENT** for 5 or 6 persons.

## APPLE SNOW (Another Method).

**INGREDIENTS.**—6 apples, 2 whites of eggs, 2 tablespoonfuls of castor sugar, 1 tablespoonful of coarsely-chopped candied peel, 2 tablespoonfuls of sherry, the thinly-cut rind of  $\frac{1}{2}$  a lemon.

**METHOD.**—Peel, core, and slice the apples, put them into a stewpan with the water, sherry, sugar, and lemon-rind. Cook gently until tender, pass through a hair sieve, add the stiffly-whisked whites of eggs, and whisk until the mixture becomes firm. Stir in the candied peel, and serve in small glasses.

**TIME.**—About  $1\frac{1}{4}$  hours. **AVERAGE COST,** from 1s. to 1s. 3d. **SUFFICIENT** for 6 or 7 persons. **SEASONABLE** at any time.

## APPLE SNOWBALLS.

## APPLE TART.

**METHOD.**—Simmer the rice in the milk until all the milk is absorbed (a good pinch of salt should be added to the rice and milk, and, if liked, 1 tablespoonful of sugar to every pint of milk). Pare and core the apples, keeping them whole, fill the centre of each with sugar, and put in a clove, if liked. Cover with the rice, and tie each ball in the corner of a pudding cloth. Put into boiling water, and boil gently from 45 to 60 minutes. Serve with sugar.

**TIME.**—About 2 hours. **AVERAGE COST,** 1½*d.* to 2*d.* each. Allow 1 to each person.

## APPLE TART.

**INGREDIENTS.**—2 lbs. of apples, 2 tablespoonfuls of moist sugar, 4 cloves or ¼ teaspoonful of grated lemon-rind, short crust.

**METHOD.**—Peel, core, and cut the apples into thick slices. Roll the paste into an oval form a little larger than the top of the piedish, invert the dish in the centre of the paste, and cut round, leaving a ¼-inch margin on all sides. Line the edge of the piedish with the trimmings, put in half the apples, add the sugar, and flavouring ingredient, then the remainder of the fruit. Moisten the paste lining the edge of the dish with water, put on the cover, press the edges together, and notch them at intervals of about ⅙ of an inch. Bake in a brisk oven from 40 to 50 minutes, and when the paste has risen and set, brush it over lightly with cold water, and dredge well with castor sugar. This must be done quickly, and the tart immediately replaced in the oven. If the tart is to be eaten cold, directly it leaves the oven the crust should be raised gently with a knife, to allow some of the steam to escape, otherwise it may lose some of its crispness.

## APPLE TRIFLE.

**TIME.**—About 1 hour. **AVERAGE COST,** 6*d.* to 8*d.*, exclusive of the pastry. **SUFFICIENT** for 6 or 7 persons.

Pass the apples through a hair sieve, add more sugar, if necessary, and put the purée into a piedish lined with pastry (*see* Apple Amber).

Bake in a quick oven until the paste has risen and set, then add the prepared custard, and bake more slowly until the pastry is sufficiently cooked and the custard firm. Serve either hot or cold.

**TIME.**—From 40 to 50 minutes. **AVERAGE COST,** 1*s.* 4*d.* to 1*s.* 6*d.* **SUFFICIENT** for 6 or 7 persons.

When it has risen to nearly twice its original size add the salt, sugar, warm butter, flour, and as much tepid milk as is needed to form a light dough. Let it rise again, and meanwhile drain the apricots from the syrup. Cover the halves of the apricots completely with a thin coating of dough, place them on a well-buttered paper, let them remain near the fire for about  $\frac{1}{2}$  an hour, then fry in hot fat until nicely browned. When ready, place the fruit, sugar, and kernels in a preserving-pan, simmer very gently, skimming meanwhile, and as the pieces of apricot become clear remove them from the syrup and place them at once in the pots. Pour on the syrup and kernels, cover with pieces of paper dipped in salad-oil, and stretch over the tops of the jars tissue paper, brushed over with white of egg. METHOD.—Soak the fish in slightly salted water for 2 or 3 hours. Put into a fish-kettle with warm water and the salt, and boil gently until done. Take 1 pint of the water, and add to it the other ingredients enumerated above. Simmer gently for about 15 minutes, then strain, and return to the saucepan. Put in the fish, and let

## BARBERRY TARTLETS.

it heat gradually in the sauce, but it must not boil again.

TIME.—Altogether, 1 hour. SUFFICIENT for 4 persons. SEASONABLE from September to February.

## BARBERRY TARTLETS.

INGREDIENTS.—Short crust paste, 1 lb. of barberries,  $\frac{1}{2}$  lb. of moist sugar, or to taste.

METHOD.—Remove the stalks, put the fruit and sugar into a jar, place the jar in a saucepan of boiling water, or in a slow oven, and cook until tender. Line 1 large or 2 medium-sized tart tins with the paste, fill them with rice, or crusts of bread placed in buttered papers, and bake until crisp in a brisk oven. When cold, fill them with the prepared cold fruit and syrup, and serve.

TIME.—About 3 hours. AVERAGE COST, 8d. or 10d. SUFFICIENT for 1 large or 2 medium-sized tarts.

## BARLEY CUSTARD PUDDING (Invalid Dish).

INGREDIENTS.—1 oz. of patent barley,  $\frac{1}{2}$  oz. of butter, 1 teaspoonful of castor sugar, 1 large egg,  $\frac{1}{2}$  pint of milk, salt, nutmeg.

METHOD.—Mix the barley smoothly with a little cold milk, boil up the remainder, and pour it over the barley, stirring meanwhile. Add the butter, sugar, and a pinch of salt, replace in the stewpan, and stir the mixture until it boils. Cool slightly, beat in the yolk of egg, and lastly add the white of egg previously stiffly whisked. Turn into a buttered piedish, grate a little nutmeg on the top, and bake gently for 10 minutes.

TIME.—20 minutes. AVERAGE COST, 3 $\frac{1}{2}$ d. SUFFICIENT for 1 or 2 persons.

## BARLEY SUGAR.

### BARLEY SOUP.

INGREDIENTS.—1 pint of white second stock, 1 pint of milk, 1 dessertspoonful of flour, 1 oz. of butter, salt and pepper, croûtons of fried or toasted bread, 2 tablespoonfuls of fine crushed barley, sold in packets under the name of "Crème d'Orge."

METHOD.—Boil the stock and milk together in a saucepan, melt the butter, stir in the flour, add the stock and milk, and stir until it boils. Sprinkle in the barley, stir and cook until the mixture becomes transparent (about 10 minutes). Season to taste, and serve. The croûtons (small slices of bread cut into shapes) should be either fried in hot fat or cut from thin slices of toast. They should be handed separately, unless directions are given to put them into the soup before serving.

TIME.—20 to 30 minutes. COST, 4d. to 5d. without the stock. SEASONABLE at all times. SUFFICIENT for 4 persons.

Note.—Rice and tapioca, finely crushed and ground, may also be bought in packets, and will be found useful preparations for soups of this class. When not easily obtainable, ground rice or semolina will be found good substitutes. The well-known "Potage Crème de Riz" can be made from this recipe, using crème de riz instead of crème d'orge; and either soup can be made richer by omitting the flour and butter, and in their place using the yolks of 2 eggs, and 2 tablespoonfuls of cream, which should be added to the soup a few minutes before serving.

### BARLEY SUGAR.

INGREDIENTS.—2 lbs. of loaf sugar, 1 pint of water,  $\frac{1}{2}$  teaspoonful of lemon-juice, a pinch of cream of tartar, essence of lemon, saffron-colouring.

## BARLEY WATER.

**METHOD.**—Dissolve the sugar in the water, boil to the "small ball" degree (*see* Sugar, to Boil), and add the lemon-juice. Continue boiling to the "large crack," add a few drops of saffron-yellow, flavour to taste, and turn on to an oiled slab. When cool, cut into narrow strips, twist them into a spiral form, and when perfectly cold store them in air-tight tins or boxes.

### BARLEY WATER (For Invalids).

**INGREDIENTS.**—2 ozs. of pearl barley, 2 or 3 lumps of sugar, the thinly-pared rind of  $\frac{1}{2}$  small lemon, 1 pint of boiling water.

**METHOD.**—Cover the barley with cold water, boil for 2 minutes, and strain. Place the barley, sugar, and lemon-rind in a jug, pour in the boiling water, and cover closely. When cold, strain and use. This forms a nutritious, agreeable drink, and it is also largely used to dilute milk, thus making it easier of digestion.

**TIME.**—1 hour. **AVERAGE COST,** 1½d.

### BARONESS PUDDING.

**INGREDIENTS.**— $\frac{3}{4}$  lb. of finely-chopped suet,  $\frac{3}{4}$  lb. of flour,  $\frac{3}{4}$  lb. of raisins (stoned),  $\frac{1}{2}$  pint of milk, a saltspoonful of salt.

**METHOD.**—Mix all the dry ingredients together, add the milk and stir well. Put into a well-greased basin, and boil or steam for about 3 hours. Serve with any suitable sweet sauce, or with a little sugar.

**TIME.**—About 3¾ hours. **AVERAGE COST,** about 1s. **SUFFICIENT** for 8 or 9 persons.

### BASIL.

The flavour of this herb greatly resembles that of the bay-leaf. It finds great favour with French cooks, but it is not much used in England, except as a flavouring for

## BATTER FOR FRYING.

fish soups and fish sauces. It is in perfection about August, when it should be dried and preserved in air-tight bottles or tins for winter use. Like many other herbs, it may be obtained ready-prepared.

### BATH BUNS.

**INGREDIENTS.**—1¼ lbs. of flour, 10 ozs. of sugar nibs, 1½ ozs. of compressed yeast,  $\frac{1}{2}$  lb. of butter, the yolks of 4 and the whites of 2 eggs, water, caraway comfits, candied peel, essence of lemon.

**METHOD.**—Dissolve the yeast in  $\frac{1}{2}$  gill of tepid water, mix with it the eggs and  $\frac{1}{4}$  lb. of flour; beat the mixture up in a bowl, and set it before the fire to rise. Rub the butter well into the 1 lb. of flour, add the sugar, and put in a few of the comfits and the peel cut into small cubes. When the sponge has risen sufficiently, mix all the ingredients together, throw over it a cloth, and set it again to rise. Grease a baking tin, form the buns, place them on the tin, brush over yolk of egg and milk, and strew on them a few comfits. Bake in a quick oven.

**TIME.**—About 20 minutes, to bake the buns. **AVERAGE COST,** 1s. 8d. **SUFFICIENT** for 16 buns.

### BATTER FOR FRYING.

**INGREDIENTS.**—4 ozs. of flour,  $\frac{1}{2}$  oz. of butter (melted), 1 table-spoonful of cream, 1 yolk of egg, 2 whites of eggs, a good pinch of salt,  $\frac{1}{8}$  pint of warm water (about).

**METHOD.**—Sieve the flour into a basin, add the salt, yolk of egg, butter and cream, and stir until smooth, adding the water gradually. Beat well, put aside for at least  $\frac{1}{2}$  an hour, then add the white of eggs, previously stiffly-whipped, and use as required.

**TIME.**—About 1 hour. **AVERAGE COST,** 5d. to 6d.

## BATTER PUDDING.

### BATTER PUDDING, BAKED.

INGREDIENTS.—1 pint of milk, 2 eggs, 4 heaped tablespoonfuls of flour, salt, dripping.

METHOD.—Put the flour and a good pinch of salt into a basin, make a well in the centre, break in the eggs, stir, gradually mixing in the flour from the sides, and add milk by degrees until a thick, smooth batter is formed. Now beat well for 10 minutes, then add the remainder of the milk, cover, and let it stand for at least 1 hour. When ready to use, put a tablespoonful of dripping into a pie-dish, and while it is heating give the batter another good beating. Pour into the dish, and bake in a quick oven for about 35 minutes. Serve with sugar, butter and sugar, jam or stewed fruit.

TIME.—2 hours. AVERAGE COST, 4½d. SUFFICIENT for 4 or 5 persons.

Note.—The batter may also be baked in small cups or on saucers (buttered). It may be varied by the addition of any kind of fresh or tinned fruit, or raisins, currants, candied peel, etc.

### BATTER PUDDING, BOILED.

INGREDIENTS.—¾ to 1 pint of milk, 6 ozs. of flour, 4 eggs, a good pinch of salt.

METHOD.—Mix the flour and salt together, and make a well in the centre of the flour. Beat the eggs thoroughly, strain them into the flour, and stir gently so that the flour becomes gradually incorporated. Add the milk a little at a time until the batter has the consistency of thick cream; then cover, and let it stand for 1 hour. When ready, pour into a well-buttered basin, cover with a scalded, well-floured cloth, and boil for about 1½ hours.

TIME.—Altogether, about 3 hours. AVERAGE COST, 6d. SUFFICIENT for 5 or 6 persons.

## BAYRISCHE KNÖDEL.

Note.—Boiled batter puddings may be varied by the addition of either fresh or dried fruits. They should be placed in the basin, and the batter poured over them.

### BATTER, SAVOURY.

INGREDIENTS.—4 tablespoonfuls of finely-chopped beef or mutton, 1 teaspoonful of finely-chopped parsley, ½ a teaspoonful of powdered mixed herbs, 1 saltspoonful of salt, ½ a saltspoonful of pepper, 4 ozs. of flour, 1 egg, ½ pint of milk.

METHOD.—Mix the flour, egg, milk, and salt into a smooth batter, let it stand for ½ an hour, then add to it the meat, parsley, and herbs. Melt a little dripping in a Yorkshire pudding-tin, pour in the batter, and bake until set in a moderately hot oven.

TIME.—To bake, from 20 to 30 minutes. AVERAGE COST, 6d. SUFFICIENT for 2 or 3 persons.

### BAY-LEAVES.

The leaves of the common laurel, *Prunus laurocerasus*, are employed for culinary purposes to give a kernel-like flavour to sauces, stocks, mire-poix, custards, puddings, etc. They may be dried and their flavour preserved for a great length of time if kept in an air-tight tin.

### BAYRISCHE KNÖDEL (Bavarian Dumplings).

INGREDIENTS.—8 ozs. of finely-chopped raw or cooked meat, 2 ozs. of breadcrumbs, ½ teaspoonful of powdered mixed herbs, 1 or 2 eggs, nutmeg, salt and pepper, 2 ozs. of butter oiled.

METHOD.—Mix the meat, breadcrumbs, herbs, a pinch of nutmeg, and a good seasoning of salt and pepper well together, and moisten thoroughly with beaten egg. Form the mixture into balls of moderate

## BEAN CROQUETTES.

size, drop them into boiling stock or slightly salted water, cook gently from 10 to 15 minutes, then remove the balls carefully and drain well. Serve with the oiled butter poured over them, or, if preferred, pour a little good gravy round them. The excellency of this dish depends on the mixture being of proper consistency, therefore an inexperienced cook would do well to test a little of the mixture by dropping it into boiling water before forming the whole of it into balls.

TIME.— $\frac{1}{2}$  an hour. AVERAGE COST, 9d. to 1s. SUFFICIENT for 6 or 8 persons.

### BEAN CROQUETTES (Vegetarian Dish).

INGREDIENTS.—Boiled beans, breadcrumbs, salt and pepper, onion, egg, oil to fry.

METHOD.—Take some boiled haricot beans—any that are left over from a dish of the day before will do—mash them, add sufficient breadcrumbs to make them stiff enough to mould, a little fried chopped onion, pepper and salt. Shape them into balls or flat cakes, egg-and-bread-crumb them, and fry in hot oil. Serve with some sauce, or brown gravy poured round, and garnish with fried parsley. If peas are preferred, the ordinary split peas can be used; and if lentils, either the Egyptian or the German; the latter, though dearer, are better. Parsley and herbs, or lemon-rind, can be added if liked. The croquettes are best eaten hot.

TIME.—Altogether,  $\frac{1}{2}$  hour. AVERAGE COST, 3d., exclusive of the beans. ALLOW 2 to each person.

### BEANS AND TOMATOES (Vegetarian Dish).

INGREDIENTS.—Baked or boiled haricot beans, 1 oz. of flour,  $\frac{1}{2}$  oz. of butter,  $\frac{1}{2}$  pint of water in which

the beans were cooked, 2 table-spoonfuls of tomato sauce.

METHOD.—Strain the beans, thicken the liquor with flour or flour and butter, add the tomato sauce, and let it boil. Put in the beans, and serve hot.

TIME.— $\frac{1}{2}$  hour. AVERAGE COST, 6d. SUFFICIENT for 2 persons.

### BEANS, CURRIED (Vegetarian Dish).

INGREDIENTS.— $\frac{1}{2}$  pint of haricot beans,  $\frac{1}{2}$  a carrot, 1 apple, 1 onion, a tablespoonful of oil or butter, 1 dessertspoonful of flour and curry powder mixed,  $\frac{1}{4}$  pint of water, rice.

METHOD.—Cook the beans in a slow oven with water until they are soft, and grate or chop the vegetables very fine. Heat up the oil, add the vegetables, fry for 5 minutes, put in the flour and curry, and lastly the water or an equal quantity of the liquor in which the beans were boiled. Boil and thicken the stew, add the beans, make thoroughly hot, and serve with a border of boiled rice. Or, press the rice into a mould or into teacups, turn them into the middle of the dish, and pour the beans round.

TIME.—1 hour. AVERAGE COST, 4d. or 5d. SUFFICIENT for 2 or 3 persons.

Note.—Peas and lentils may be cooked in the same way, or indeed any kind of vegetable.

### BEANS, FRENCH, BOILED.

INGREDIENTS.—French beans, salt.

METHOD.—Cut off the heads, tails, and a thin strip on each side of the beans, so as to remove the string. Cut the beans in a slanting direction into slips, and, as they are cut, drop them into cold water. Have ready a saucepan of boiling water,

## BEANS.

add 1 heaped teaspoonful of salt to each quart of water, and a small piece of soda if the beans are old. Put in the beans, keep the saucepan uncovered, and boil briskly from 15 to 25 minutes, according to age. Drain well, sprinkle with pepper, then serve.

TIME.—To boil the beans, from 15 to 25 minutes. AVERAGE COST, from 3*d.* to 1*s.* per lb., according to season. SEASONABLE from July to October.

### BEANS (French Method of Cooking).

INGREDIENTS.—2 lbs. of French beans, 2 ozs. of butter, the juice of  $\frac{1}{2}$  a lemon, a dessertspoonful of finely-chopped parsley, salt and pepper.

METHOD.—Cut and boil the beans as in the preceding recipe; when tender, drain them into a stewpan, and shake over the fire until the greater part of the moisture has evaporated. Add the butter, parsley, lemon-juice, season well with salt and pepper, toss over the fire for a few minutes, then serve.

TIME.—From 20 to 30 minutes. AVERAGE COST, from 2*d.* per lb. SEASONABLE from July to October; obtainable all the year.

### BEANS, POTTED (Vegetarian Dish).

INGREDIENTS.— $\frac{1}{2}$  pint of haricot beans, 2 ozs. of breadcrumbs, 2 ozs. of strong cheese grated, 2 ozs. of butter, cayenne, pepper and salt, nutmeg to taste.

METHOD.—Bake the beans in a slow oven, pound them in a mortar, adding gradually the other ingredients. Press the mixture into pots, and run a little butter over the top, if it is to keep many days. Potted beans make very good sandwiches with bread and butter. Store in a

## BÉCHAMEL SAUCE.

cool, dry place, as all kinds of beans quickly ferment.

TIME.—1 $\frac{1}{4}$  hours. AVERAGE COST, 6*d.* SUFFICIENT for 3 or 4 pots.

### BEARNAISE SAUCE.

INGREDIENTS.—2 shallots, peeled and chopped finely, a few fresh tarragon leaves, 1 gill of French wine vinegar, 3 yolks of eggs,  $\frac{1}{2}$  a teaspoonful of Mignonette pepper, a little salt,  $\frac{1}{2}$  a gill of Béchamel sauce, 3 ozs. of butter,  $\frac{1}{2}$  a teaspoonful of chopped parsley and tarragon leaves.

METHOD.—Put the vinegar, shallots, and whole tarragon leaves in a stewpan, cover it, and let the liquor reduce to about one-eighth of the original quantity. Remove from the fire, cool a little, add the sauce, and re-heat; then stir in the yolks of the eggs, and season with salt and Mignonette pepper. Whisk the whole over the fire, and incorporate the butter by degrees. This sauce must on no account be allowed to boil when once the eggs are added. Pass it through a tammy-cloth. Return to another stewpan, and whisk again over hot water or in a bain-marie. Add the chopped parsley and a few chopped tarragon leaves, and serve as directed.

TIME.—35 to 45 minutes. AVERAGE COST, 10*d.* QUANTITY,  $\frac{1}{2}$  a pint.

### BÉCHAMEL, or FRENCH WHITE SAUCE.

INGREDIENTS.—1 $\frac{1}{2}$  ozs. of flour, 2 ozs. of butter (or of corresponding quantity of white roux), 1 $\frac{1}{4}$  pints of milk (or white stock), 1 small onion or shallot, 1 small bouquet-garni (parsley, thyme, bay-leaf), 10 peppercorns,  $\frac{1}{2}$  a bay-leaf, 1 small blade of mace, seasoning.

METHOD.—Put the milk on to boil with the onion or shallot, the bouquet-garni, peppercorns, mace,

## BEEF À LA MODE.

and bay-leaf. Melt the butter, stir in the flour, and cook a little without browning; stir in the hot milk, etc., whisk over the fire until it boils, and let it simmer from 15 to 20 minutes. Strain and pass through a sieve or tammy-cloth, return to the stewpan, season lightly with a pinch of nutmeg,  $\frac{1}{2}$  a pinch of cayenne, and  $\frac{1}{2}$  a teaspoonful of salt. The sauce is then ready for use.

TIME.—40 to 50 minutes. AVERAGE COST, 7d. with milk. SUFFICIENT for 1 boiled fowl.

## BEEF À LA MODE.

INGREDIENTS.—3 lbs. of rump of beef, larding bacon, 1 quart of stock, 1 glass of claret,  $1\frac{1}{4}$  ozs. of butter, 1 oz. of flour, 2 carrots, 1 finely-chopped small onion, 10 button onions, a bouquet-garni (parsley, thyme, bay-leaf), the juice of  $\frac{1}{2}$  a lemon, 2 cloves, salt and pepper.

METHOD.—Trim, bone, and lard the meat, place it in a basin with the wine, lemon-juice, chopped onion, cloves, salt, pepper, and bouquet-garni, and let it stand for 2 hours, basting it frequently. Melt the butter in a stewpan, drain the beef, and fry it brown, and, at the same time, lightly fry the button onions. Remove both from the stewpan, put in the flour, and fry until it acquires a nut-brown colour; then add the stock and the wine-marinade in which the meat was soaked, and stir until boiling. Replace the meat and onions, season to taste, add the carrots thinly sliced, and cook gently for  $2\frac{1}{2}$  or 3 hours, stirring and skimming occasionally. When done place on a hot dish, strain the sauce over, and garnish with little groups of onions and carrot.

TIME.— $2\frac{1}{2}$  to 3 hours. AVERAGE COST, 3s. to 3s. 6d. SUFFICIENT for 8 or 9 persons.

## BEEF, BAKED.

### BEEF AND SAGO BROTH (Invalid Cookery).

INGREDIENTS.—1 lb. of gravy beef, 1 quart of cold water,  $\frac{1}{2}$  oz. of fine sago, 1 yolk of egg, 2 table-spoonfuls of cream or milk,  $\frac{1}{2}$  a teaspoonful of salt.

METHOD.—Trim off all skin and fat, and cut the meat into small pieces. Put them into a stewpan with the water and salt, cover closely and cook gently for 3 hours, skimming occasionally. Strain into a basin; when cold remove every particle of fat, then replace in the stewpan and re-heat. When boiling sprinkle in the sago and cook until clear, stirring meanwhile. Beat the yolk of egg and cream together, strain into the soup, stir, and cook by the side of the fire for 2 minutes longer, but take care the preparation does not boil or the egg may curdle. Season to taste, and serve with thin strips of well-toasted bread.

TIME.—Altogether, 5 or 6 hours. AVERAGE COST, 10d.

## BEEF, BAKED.

INGREDIENTS.—2 lbs. of cold roast beef, about 2 lb. of mashed potatoes, 2 small onions, 2 small carrots, 1 teaspoonful of powdered mixed herbs, salt and pepper, 1 pint of gravy.

METHOD.—Remove the bones and the brown outside parts of the meat, simmer them slowly for at least 2 hours, strain, season, and use as gravy. Cut the meat into thin small slices, cook the vegetables and cut them into very thin slices. Spread a thin layer of mashed potato on the bottom of a piedish, on the top place a few slices of meat, add a little carrot and onion, sprinkle on some of the herbs, and season well with salt and pepper. Repeat until the dish is full, pour in as much

## BEEF BALLS.

gravy as the dish will hold, cover with the mashed potato, and bake in a moderate oven until the surface is well browned. The potato should be smoothed and shaped by means of a knife to resemble as nearly as possible a paste crust; and the appearance may be further improved by brushing over the top with beaten egg, or a little milk. Serve the remainder of the gravy separately.

TIME.—To bake, about  $\frac{3}{4}$  of an hour. AVERAGE COST, 4*d.*, exclusive of the meat. SUFFICIENT for 4 or 5 persons.

## BEEF BALLS, RAW (Invalid Cookery).

INGREDIENTS.—3 or 4 ozs. of raw juicy steak, a little cream or strong beef tea, butter.

METHOD.—Scrape the meat into tiny fragments with a sharp knife, and press it through a wire sieve. Mix with it about  $\frac{1}{2}$  a teaspoonful of cream or strong beef tea, then form into balls the size of a very small Spanish nut. Rub the bottom of a sauté-pan or stewpan slightly with butter, make the pan hot, put in the balls, and move them about for a few seconds with a spoon until the colour is slightly changed, but leaving the inside absolutely raw. Serve with beef tea or soup.

TIME.— $\frac{1}{2}$  an hour. AVERAGE COST, steak, 1*s.* 2*d.* to 1*s.* 4*d.* per lb.

## BEEF, BOILED.

INGREDIENTS.—Salt beef, turnips, carrots, onions, peppercorns, bouquet-garni (parsley, thyme, bay-leaf), suet dumplings, if liked.

METHOD.—The aitchbone, round, and brisket are all suitable for boiling. In boiling meat a certain proportion of the nutritive qualities escape into the water, and the

## BEEF, BOILED.

liquor should therefore be utilized for soup, when it is not too salt for the purpose. With this end in view the liquor should be reduced to the smallest possible quantity by using a boiling-pot just large enough to contain the joint, with barely sufficient water to cover it. The meat must be skewered, or bound with tape, into a compact form. The water in which it is immersed should be warm unless the meat be very salt, then cold water is necessary to extract some of the salt. In either case, it should be heated gradually to boiling point, and well skimmed. With a joint weighing from 10 to 14 lbs., an allowance should be made of 2 or 3 medium-sized onions, 2 large or 4 small carrots, 1 large or 2 small turnips, and 12 peppercorns. The onions should be kept whole, the turnips cut in thick slices, and the carrots lengthwise into 2 or 4 pieces. They should be added after the liquor has been well skimmed. When suet dumplings form part of the dish, they should be put into the liquor  $\frac{1}{2}$  an hour before serving, the liquor being previously brought to the boil. To serve, replace the tapes and skewers with one or 2 silver skewers, pour some of the liquor round the dish, and garnish with the vegetables.

TIME.—From 20 to 30 minutes to each lb. AVERAGE COST, 8*d.* to 10*d.* per lb. SEASONABLE in winter.

SOYER'S RECIPE FOR PRESERVING THE GRAVY IN SALT MEAT, when it is to be served cold: Fill 2 tubs with cold water, into which throw a few pounds of rough ice; when the meat is done, put it into one of the tubs of ice-water, let it remain 1 minute, then take it out, and put it into the other tub. Fill the first tub again with water, and continue this process for about 20 minutes; then set it upon a dish, and let it

## BEEF, BRAISED.

remain until quite cold. When cut, the fat will be as white as possible, and the whole of the gravy will have been saved. If there is no ice, spring water will answer the same purpose, but will require to be more frequently changed.

### BEEF, BRAISED.

**INGREDIENTS.**—4 to 6 lbs. of fresh brisket of beef, 2 carrots, 1 turnip, 2 or 3 strips of celery, 1 or 2 leeks,  $\frac{1}{2}$  lb. of button onions, a bouquet-garni (parsley, thyme, bay-leaf), 12 peppercorns, salt, stock, a few slices of bacon. For the sauce:  $1\frac{1}{2}$  ozs. of butter,  $1\frac{1}{2}$  ozs. of flour, stock.

**METHOD.**—Turn about a  $\frac{1}{4}$  pint each of carrot and turnip with a large-sized, pea-shaped cutter, and put them and the button onions aside. Slice the remainder of the carrot and turnip, the leeks and the celery, and place them in a stewpan just large enough to contain the meat. Lay the meat on the top of the vegetables, cover with slices of bacon, add the bouquet-garni, peppercorns, a little salt, and stock or water to nearly cover the vegetables. Put on a close-fitting lid, and cook as gently as possible for 4 or 5 hours. Meanwhile, heat the butter in a smaller stewpan, add the flour, stir and cook slowly until well browned, and then add the stock, using that from the larger stewpan when none other is available. Stir until boiling, season to taste, boil for at least 10 minutes, then strain and use. The carrot and turnip dice and button onions must be cooked separately in well-flavoured stock until tender, and they may be added to the sauce, or arranged in groups round the dish on which the meat is served.

**TIME.**—From 4 to 5 hours. **AVERAGE COST,** 6s. **SUFFICIENT** for 18 or 20 persons. **SEASONABLE** at any time.

## BEEF, BRISKET OF.

### BEEF, BRISKET OF.

**INGREDIENTS.**—6 lbs. of brisket of beef, slices of bacon, 2 carrots, 1 onion, a bouquet-garni (parsley, thyme, bay-leaf), 2 cloves, 1 blade of mace,  $\frac{1}{4}$  of a teaspoonful of allspice, 10 peppercorns, salt and pepper, 1 pint of brown sauce, stock or water.

**METHOD.**—Cover the bottom of a stewpan with slices of bacon, put in the meat, lay slices of bacon on the top of it, and add the bouquet-garni, cloves, mace, allspice, peppercorns, and a few vegetable trimmings. Nearly cover with stock or water, cook very gently for 5 or 6 hours, adding more stock or water to replace that which boils away, and taking care to keep the stewpan closely covered. Make the brown sauce as directed, using the stock from the stewpan when none other is available. Cut the vegetable into dice, cook in stock or water until tender, and add them to the sauce. The meat should be glazed, garnished with a little vegetable, and served on a hot dish.

**TIME.**—5 or 6 hours. **AVERAGE COST,** 4s. 6d. **SEASONABLE** at any time.

### BEEF, BRISKET OF, STEWED.

**INGREDIENTS.**—6 or 7 lbs. of fresh brisket of beef, vinegar, 2 carrots,  $\frac{1}{2}$  a turnip, 2 onions, 2 or 3 strips of celery, 1 blade of mace, 10 peppercorns, a bouquet-garni (parsley, thyme, bay-leaf),  $1\frac{1}{2}$  ozs. of butter,  $1\frac{1}{2}$  ozs. of flour, stock, salt and pepper.

**METHOD.**—Rub the meat over with vinegar and salt, and let it remain 2 or 3 hours before dressing. Put it into a stewpan just large enough to contain it, barely cover with stock, or water when stock is not available, bring to the boil and skim well. Simmer gently for 1 hour, then add the prepared

## BEEF, BROILED.

vegetables, mace, peppercorns, bouquet-garni, and salt if required, and continue to cook as slowly as possible for  $2\frac{1}{2}$  hours longer, keeping the stewpan closely covered meanwhile. During the preparation of the above, heat the butter in a smaller stewpan, add the flour, stir and cook slowly until it acquires a nut-brown colour, then put aside until wanted. When ready, take up the meat, remove the bones, strain the stock, and add to it either stock or water to make up 1 pint. Add this to the prepared butter and flour, stir until boiling, boil gently for a few minutes, and season to taste. Serve the meat garnished with the vegetables, and the sauce separately.

TIME.—To stew,  $3\frac{1}{2}$  hours.  
AVERAGE COST, 3s. 8d. to 4s.  
SEASONABLE at any time.

## BEEF, BROILED, WITH MUSH-ROOMS.

INGREDIENTS.—1 lb. of tinned roast beef, 12 preserved mushrooms, 1 oz. of butter, 1 oz. of flour,  $\frac{3}{4}$  pint of stock or water, salt and pepper.

METHOD.—Slice the mushrooms, fry them lightly in hot butter, and sprinkle in the flour. Cook until nicely browned, add the stock or water, season to taste, stir until boiling, and afterwards simmer gently for about  $\frac{1}{2}$  an hour. Slice the meat, coat each slice lightly with oil or oiled butter, and broil over or in front of a clear fire. Serve with a little sauce and all the mushrooms round the dish, and put the remainder of the sauce in a sauce boat.

TIME.—About 1 hour. AVERAGE COST, 1s. to 1s. 3d. SUFFICIENT for 4 persons.

## BEEF BROTH.

INGREDIENTS.—2 quarts of good stock, 1 carrot, 1 turnip,  $\frac{1}{2}$  cabbage, 2 ozs. of butter, 1 dinner roll,

## BEEF CAKE.

parsley or chives, pepper, salt, and nutmeg to season.

METHOD.—The stock should be made from beef and veal bones, well skimmed, but not necessarily clarified. The vegetables, after being washed and pared, may be cooked whole in the stock-pot.

Cut the carrot and turnip into round slices, drain the cabbage and cut it into small pieces. Put all the vegetables in a stewpan with the butter, cover, and cook slowly for about 10 minutes. Season with pepper, salt, and a little grated nutmeg. Strain the stock on to the vegetables, let them simmer for about 30 minutes, and skim occasionally. Cut the roll into thin round slices, place them on a baking sheet, bake them on both sides a golden brown in a moderate oven, put them in a soup tureen, moisten with a little stock, pour the soup over, sprinkle over with a little chopped parsley or chives, and serve.

AVERAGE COST.—2s. 6d. SEASONABLE at all times. SUFFICIENT for 6 or 8 persons.

## BEEF CAKE.

is very dry. Then turn into the prepared mould, press carefully into shape, cover with a greased paper, and bake in a moderate oven for about 45 minutes. Turn out carefully, and pour a little brown sauce round.

TIME.—To bake, about 45 minutes. AVERAGE COST, 6d., exclusive of the meat. SUFFICIENT for 3 or 4 persons.

## BEEF, COLLARED.

INGREDIENTS.—7 lbs. of thin end of the flank of beef, 2 ozs. of coarse sugar, 6 ozs. of salt, 1 oz. of saltpetre, 1 large handful of parsley minced, 1 dessertspoonful of minced sage, a bunch of savoury herbs,  $\frac{1}{2}$  teaspoonful of pounded allspice; salt and pepper to taste.

METHOD.—Choose fine tender beef, but not too fat; lay it in a dish, rub in the sugar, salt, and saltpetre, and let it remain in the pickle for a week or 10 days, turning and rubbing it every day. Then bone it, remove all the gristle and the coarse skin of the inside part, and sprinkle it thickly with parsley, herbs, seasoning, in the above proportions, taking care that the former are finely minced. Roll the meat up in a cloth as tightly as possible, bind it firmly with broad tape, and boil it gently for 6 hours. Immediately on taking it out of the pot, put it under a good weight, without undoing it, and let it remain until cold.

TIME.—6 hours. AVERAGE COST, 3s. 6d. to 4s. SEASONABLE at any time.

## BEEF CROQUETTES.

### BEEF COLLOPS (Tinned Beef).

METHOD.—Mince the beef finely, put the butter or dripping into a stewpan. Add the onion (chopped finely) and fry till it is nicely browned. Add the juice of the lemon, the stock, ketchup, and seasoning, simmer for 5 minutes, then add the meat, simmer for 5 minutes longer, and serve on a hot dish with a border of mashed potatoes or rice.

TIME.—20 minutes. AVERAGE COST, 10d. SUFFICIENT for 3 or 4 persons.

### BEEF, CORNED.

INGREDIENTS.—Pickled round of beef.

METHOD.—The beef may be bought ready pickled, or pickled and, if liked, afterwards smoked according to directions given in recipe "Beef, Spiced." Put it into a stewpan with sufficient warm water to cover it, boil up, and afterwards simmer very gently until done. If required for immediate use, allow it to remain in the water until cold, as this will improve the flavour and render the meat more juicy, but it will not keep fresh quite so long.

TIME.—To cook, 8 or 10 lbs., about 3 $\frac{1}{2}$  hours. AVERAGE COST, 10d. per lb.

### BEEF CROQUETTES.

INGREDIENTS.—4 ozs. of lean cooked beef,  $\frac{1}{2}$  pint of gravy or stock,  $\frac{1}{2}$  oz. of butter,  $\frac{1}{2}$  oz. of flour,  $\frac{1}{2}$  teaspoonful of finely-chopped parsley, a pinch of nutmeg, salt and pepper, about 4 ozs.

**METHOD.**—Chop the meat very finely. Heat the butter in a small stewpan, fry the onion slightly, stir in the flour, add the stock, and boil well. Now add the meat, parsley and nutmeg, season to taste, and when well mixed turn on a plate to cool. Roll the paste out to the thickness of foolscap paper, cut it into rounds of  $1\frac{1}{4}$  or 2 inches diameter, place a little of the meat mixture on one half, moisten the edges of the paste, fold the other half over, making the croquette half-moon or crescent shape, and press the edges of the paste together. Brush them over with beaten egg, roll them in crushed vermicelli or breadcrumbs, and fry in hot fat.

**TIME.**—From 40 to 50 minutes. **AVERAGE COST,** 7d., exclusive of the meat. **SUFFICIENT** for 1 dish.

## BEEF, CURRIED.

**METHOD.**—Cut the meat into slices about  $\frac{1}{2}$  inch thick, and 1 inch square. Melt the butter in a stewpan, fry the meat quickly and lightly, then take it out on to a plate, put in the onion, flour, and curry-powder, and fry gently for 10 minutes. Add the stock, curry-paste, apple sliced, and salt to taste, boil, replace the meat, cover closely, and cook gently for  $1\frac{1}{2}$  hours. Boil the rice, drain and dry thoroughly. When the meat is done, remove it to a hot dish, season the sauce to taste, add the lemon-juice,

and strain over the meat. The rice should be served separately.

**TIME.**—About 2 hours. **AVERAGE COST,** 2s. to 2s. 6d. **SUFFICIENT** for 5 or 6 persons.

## BEEF, CURRY OF, COLD.

**INGREDIENTS.**— $1\frac{1}{2}$  lbs. of cold roast beef, 1 pint of stock,  $1\frac{1}{2}$  ozs. of butter, 1 tablespoonful of flour, 1 tablespoonful of curry-powder, 1 teaspoonful of curry-paste, 1 sour apple, 2 onions coarsely-chopped, 1 teaspoonful of lemon-juice, salt, 4 ozs. of rice.

**METHOD.**—Put the bones and brown outside parts of the meat into a saucepan, cover with cold water, and boil for at least 2 hours, then strain and use. Cut the meat into slices about  $\frac{1}{2}$  an inch thick and 1 inch square. Melt the butter in a stewpan, fry the onions for 2 or 3 minutes, then add the curry-powder and flour, and fry gently for 5 minutes. Add the stock, curry-paste, sliced apple, and salt to taste, stir until the sauce boils, and simmer gently for  $\frac{1}{2}$  an hour. Now put in the meat, cover closely, draw the stewpan aside to prevent the contents boiling, and let it remain  $\frac{1}{2}$  an hour for the meat to become impregnated with the flavour of the sauce. Arrange the meat in a pyramidal form in the centre of a hot dish, season the sauce to taste, add the lemon-juice, and strain over the meat. Serve the rice separately.

**TIME.**— $1\frac{1}{4}$  hours. **AVERAGE COST,** 6d. to 8d., exclusive of the meat. **SUFFICIENT** for 4 or 5 persons.

## BEEF DRIPPING, TO CLARIFY.

Put the dripping into an old iron saucepan, cover with boiling water, and boil uncovered for  $\frac{1}{2}$  an hour. Cool slightly, then pour into an

## BEEF, DRY PICKLE FOR.

earthenware vessel, and as soon as it is cold and firm scrape the impurities from the under surface, and re-heat, to evaporate all water. If the fat is left on the water, after it is set, it will absorb some of the water.

## BEEF, DRY PICKLE FOR.

INGREDIENTS.—1 lb. of common salt, 2 ozs. of brown sugar,  $\frac{3}{4}$  oz. of saltpetre,  $\frac{1}{2}$  a teaspoonful of ground black pepper.

METHOD.—Pound the above ingredients in a mortar until reduced to a fine powder. Rub them well into the meat, which must be turned and rubbed every day for 7 or 8 days, or until it is sufficiently salt.

*Note.*—Before applying dry pickling or salting ingredients, it is as well to rub the meat all over with common salt, and allow it to drain for 24 hours.

## BEEF, FILLETS OF, LARDED.

INGREDIENTS.—2 or  $2\frac{1}{2}$  lbs. of fillet of beef, larding bacon, 3 ozs. of butter,  $\frac{1}{2}$  pint of either Espagnole or demi-glaze sauce, 24 button onions, glaze.

METHOD.—Cut the meat into round, even-sized fillets about  $\frac{1}{2}$  an inch in thickness, and lard them on one side in close rows. Heat 2 ozs. of butter in a sauté-pan, put in the fillets, fry the under side for 5 minutes, then transfer the pan to a moderately hot oven, and cook for 10 minutes longer, basting well during the time. In the meantime melt the remaining oz. of butter in a small stewpan, and fry the onions brown, and just before serving mix with them 2 tablespoonfuls of either Espagnole or demi-glaze sauce. Brush the fillets over with glaze, arrange them in a circle on a border of mashed potato, serve the onions in the centre, and pour round the sauce.

## BEEF FRITTERS.

TIME.—About 15 minutes. AVERAGE COST, 4s. 6d. to 5s. SUFFICIENT for 7 or 8 persons. SEASONABLE at any time.

## BEEF, FILLET OF, WITH TOMATOES.

INGREDIENTS.—3 lbs. of fillet of beef, 6 or 8 small tomatoes, 2 ozs. of butter, 1 tablespoonful of finely-chopped parsley,  $\frac{1}{2}$  a teaspoonful of powdered mixed herbs, 1 moderate-sized onion (sliced), 1 teaspoonful of flour,  $\frac{1}{2}$  pint of beef stock, salt and pepper.

METHOD.—Trim and bind or skewer the fillet into a good shape. Heat the butter in a stewpan, put in the fillet, and fry it until the entire surface is well browned, then add the onion, parsley, herbs, and  $\frac{1}{2}$  a saltspoonful of pepper, cover closely, and let the meat cook AS SLOWLY AS POSSIBLE for 2 hours, basting frequently. Boil up the stock, mix the flour smoothly with a little cold stock or water, pour on to it the hot stock, return to the saucepan, simmer for 10 minutes, and  $\frac{1}{2}$  an hour before serving pour it into the stewpan containing the meat. The tomatoes may be plainly baked or stuffed with either mushrooms or meat farce (*see Tomatoes Stuffed*). When the meat is cooked, remove the strings or skewers, place it on a hot dish, and garnish with the tomatoes. To the gravy add seasoning to taste, deepen the colour by adding a few drops of caramel browning, Lemco, or a piece of meat glaze, and strain into a sauceboat.

TIME.— $2\frac{1}{2}$  hours. AVERAGE COST, 4s. 6d. SUFFICIENT for 8 or 10 persons. SEASONABLE at any time.

## BEEF FRITTERS.

INGREDIENTS.— $\frac{1}{4}$  lb. of cold roast beef, 6 ozs. of flour, 2 tablespoonfuls of oiled butter,  $\frac{1}{4}$  pint

## BEEF, FRIZZLED.

of tepid water, the whites of 2 eggs,  $\frac{1}{2}$  teaspoonful of powdered mixed herbs, the rind of  $\frac{1}{2}$  a lemon, a good pinch of nutmeg, salt and pepper, frying-fat.

**METHOD.**—Chop the meat finely. Mix the flour, tepid water, and melted butter into a smooth batter, add to it the meat, herbs, lemon-rind, nutmeg, salt and pepper to taste, and lastly the stiffly-whipped whites of eggs. Have ready a deep pan of hot fat, drop in the mixture in tablespoonfuls, and fry until golden-brown. Drain well, dish in a pyramidal form on a folded napkin or dish-paper, and garnish with fried parsley. The mixture may be varied by the addition of a teaspoonful of powdered sage, and a tablespoonful of parboiled and finely-chopped onion, instead of lemon-rind and nutmeg.

**TIME.**—To prepare and cook, about 1 hour. **AVERAGE COST,** 6d. exclusive of the meat. **SUFFICIENT** for 4 or 5 persons.

Make quite hot, put in the meat, fry quickly until lightly browned on both sides, then remove and keep hot. Put in the onion, fry until nicely browned, then add the potatoes, and season carefully with salt and pepper. Press them well down in the pan, fry until well browned, then turn and fry the other side. Arrange on a hot dish, place the meat on the top, and serve with a little gravy.

In another saucepan prepare a sauce as follows: put 1 oz. of butter in the pan and fry the sliced onions to a nice brown, cut up the turnip and carrot, add them, and mix the stock smoothly with a tablespoonful of ground rice and flour, place the stock in the saucepan, add the Harvey's sauce and simmer for  $\frac{1}{2}$  an hour. Empty the tin of beef, cut the meat into neat squares, roll these in flour and put them into the sauce to simmer for 5 minutes. Dish with the meat and gravy in the centre and the beans in a border round.

TIME.—2 hours. AVERAGE COST, 1s. 4d. SUFFICIENT for 4 persons.

## BEEF, HASHED.

## BEEF, HUNG, TO PREPARE.

METHOD.—The meat should be

## BEEF, HUNTER'S.

hung in a cool, dry place as long as is consistent with safety to make it tender, but it must not be allowed to decompose in the least. Pound the above ingredients in a mortar until reduced to a powder, and when the meat is ready, rub the centre surface with the preparation, going carefully between the muscles and under the flaps of the meat. Let it be turned every morning for 14 days; at the end of that time roll it tightly in a cloth, and hang it in a warm (not hot) dry place for 3 weeks. When a smoky flavour is desired, the beef should be hung where it would receive the smoke, but not the heat, from a wood fire. Meat treated in this manner may be kept for a long time.

The pickle, after being boiled and well skimmed, may be used again.

## BEEF, HUNTER'S.

INGREDIENTS.—For a round of beef weighing about 24 lbs., allow 3 ozs. of saltpetre, 3 ozs. of coarse sugar, 1 oz. of cloves, 1 grated nutmeg,  $\frac{1}{2}$  oz. of allspice, 1 lb. of salt,  $\frac{1}{2}$  lb. of bay-salt.

METHOD.—Let the beef hang for 2 or 3 days, and remove the bone. Pound the spices, salt, etc., in the above proportions, and let them be reduced to the finest powder. Put the beef into an earthenware pan, rub all the ingredients well into it, and turn and rub it every day for a little over a fortnight. When it has been sufficiently long in pickle, wash the meat, bind it up securely with string, and place it in a pan with  $\frac{1}{2}$  pint of water at the bottom. Mince some suet, cover the top of the meat with it, and over the pan put a common crust of flour and water; bake for 6 hours, and when cold remove the paste. The gravy that flows from it should

## BEEF JELLY.

be saved, as it adds greatly to the flavour of hashes, stews, etc. The beef may be glazed and garnished with aspic jelly.

TIME.—6 hours. AVERAGE COST, from 16s. 6d. to 17s. 6d. SEASONABLE all the year.

*Note.*—In salting or pickling beef or pork for family consumption, when it is not to be kept for any length of time, a smaller quantity of salt, and a larger quantity of other matters more adapted to retain mellowness in meat, may be employed. Sugar, which is well known to possess antiseptic principles in a very great degree, without the pungency and astringency of salt, is very generally used in the preserving of meat for family consumption. Although it acts without hardening or contracting the fibres of meat as is the case with salt, and, therefore, does not impair its mellowness, yet its use in sufficient quantities for preserving effect without the addition of other antiseptics, would impart a flavour not agreeable to the taste of many persons. It may be used, however, with salt, in a proportion of 1 part by weight to 4, to impart mildness and mellowness to cured meat.

### BEEF JELLY (Invalid Dish).

INGREDIENTS.—1 pint of beef tea, 1 oz. of gelatine, salt and pepper.

METHOD.—Dissolve the gelatine in 2 tablespoonfuls of hot water, add it to the beef tea, and season to taste. Stir until beginning to set, then pour into small moulds, and put aside until firm. In cases where all nourishment must be administered, cold or iced, the above recipe will be found useful.

TIME.—2 or 3 hours. AVERAGE COST, 1s. 2d. to 1s. 4d.

### BEEF JUICE (Invalid Cookery).

INGREDIENTS.— $\frac{1}{2}$  lb. of lean, juicy beef-steak, salt and pepper.

METHOD.—Remove all fat, and

## BEEF, MINCED.

grill the steak quickly on both sides over a clear fire until slightly cooked. Cut it into strips, press out the juice with a lemon-squeezer into a hot cup, season to taste, and serve.

TIME.—To grill the steak, 8 to 10 minutes. AVERAGE COST, 7d. or 8d.

### BEEF, LEG OF, STEW.

INGREDIENTS.—1 lb. of leg or shin of beef,  $\frac{3}{4}$  pint of water, 2 tablespoonfuls of vinegar, 1 onion 1 carrot,  $\frac{1}{2}$  a turnip, a bouquet-garni (parsley, thyme, bay-leaf), pepper and salt.

METHOD.—Cut the meat into 5 or 6 pieces, put them in a dish, pour the vinegar over, and let them remain at least 1 hour, turning them 2 or 3 times. When ready, put the pieces with the vinegar into a jar with a close-fitting lid, add a good seasoning of salt and pepper, the herbs, and the vegetables cut into thick slices. Put on the lid, cover with 2 or 3 thicknesses of greased paper, stand the jar either in a cool oven or in a saucepan of boiling water, and simmer slowly for 3 hours. When done, remove the bouquet-garni, and serve the stew in a hot dish with its gravy.

TIME.—3 hours to stew. AVERAGE COST, 9d. or 10d. SUFFICIENT for 3 or 4 persons.

### BEEF, MINCED.

INGREDIENTS.—1 lb. of cold roast beef,  $1\frac{1}{2}$  ozs. of flour,  $1\frac{1}{2}$  ozs. of butter, 1 onion coarsely-chopped, 1 small carrot,  $\frac{1}{4}$  of small turnip, a bouquet-garni (parsley, thyme, bay-leaf), 6 peppercorns.

ready the brown roux (or thickening), made by frying together the flour and butter until brown, add to it the hot stock, stir until it boils, then season to taste, and boil gently for 20 minutes. Chop the meat finely, or cut it into very small dice, put it into the sauce, cover closely, draw the stewpan to the side of the stove, and let it remain for  $\frac{1}{2}$  an hour, in order that the flavour of the sauce may be imparted to the meat. Before serving, the mince may be flavoured with mushroom ketchup, walnut liquor, Harvey's or other sauce, but these additions must be determined by individual taste. The mince may be garnished with fried potatoes or croûtons or poached eggs; if served as a luncheon dish, it may be sent up in a border of mashed potato.

TIME.—About 1 hour, after the stock is made. AVERAGE COST, 3d., exclusive of the meat. SUFFICIENT for 3 or 4 persons.

## BEEF MINCED AND POACHED EGGS.

METHOD.—Cut the meat into small dice, melt the butter in a stewpan, fry the onion until lightly browned, sprinkle in the flour and brown slightly, then add the stock and boil for 2 or 3 minutes. Now put in the meat, ketchup, sauce or vinegar, season with salt and pepper, and let the pan stand where the contents will be kept hot without boiling for 10 or 15 minutes. Meanwhile, poach the eggs and trim them to a round form; cut the toast into small triangular shapes,

## BEEF CURRY.

When ready to serve, turn the mince on to a hot dish, place the eggs on the top, and surround the base with the pieces of toast. Serve hot.

TIME.—20 minutes. AVERAGE COST, 8d. SUFFICIENT for 2 persons. SEASONABLE at any time.

## BEEF NOISETTES, WITH MUSHROOMS.

METHOD.—Cut the meat into fillets of even size, not less than  $\frac{1}{2}$  an inch in thickness, and as round as possible, chop the mushrooms finely, add to them the shallot, parsley, and a little salt and pepper, and mix well together. Place a little of the mixture in the form of a round pat, in the centre of each fillet. Heat the butter in a sauté-pan, put in the fillets THE FARCED SIDE DOWN, fry quickly, then turn and fry the other side rather more slowly. Cover closely and simmer for about 30 minutes, then strain and return to the stewpan. Bring nearly to boiling point, add the lemon-juice, season to taste, and put in the meat. Draw the saucepan to the side of the stove, and let the meat remain in the hot sauce for about 20 minutes, but do not allow it to boil. Serve in a border of boiled rice.

TIME.—About 1 hour. AVERAGE COST, 10d. SUFFICIENT for 3 or 4 persons.

## BEEF PALATES

Pork, hams, and bacon may be similarly treated, but will require double the quantity of brine, and after being hung for 3 weeks they should be either smoke-dried or placed in tubs filled with dry oat-rusks.

TIME.—3 weeks in the brine, 3 weeks hung. AVERAGE COST, 8d. to 10d. per lb. SEASONABLE at any time.

## BEEF, POTTED.

Cover with a close-fitting lid and 3 or 4 thicknesses of buttered paper, and place the jar either in a saucepan of boiling water, or in the oven in a baking-tin containing boiling water, which must be replaced as it reduces. Cook gently for about 3 hours, then pound well in a mortar, adding the gravy the meat has yielded, and a few drops of anchovy by degrees. Season to taste, rub through a fine wire sieve, press into pots, and cover with clarified butter.

**METHOD.**—Make the batter as directed for frying batter, season it with salt and pepper, and add the herbs and meat. Melt a little dripping in a piedish or deep baking-tin, put in the preparation, bake until set and nicely browned, then serve.

**TIME.**—To bake, about 40 minutes. **AVERAGE COST,** 3d., in addition to the meat. **SUFFICIENT** for 3 or 4 persons. **SEASONABLE** at any time.

### BEEF, RAGOÛT OF.

**INGREDIENTS.**— $1\frac{1}{2}$  lbs. of cold roast beef (preferably underdone), 2 ozs. of butter or fat,  $1\frac{1}{2}$  ozs. of flour, 2 onions coarsely chopped, 1 carrot cut into dice,  $\frac{1}{2}$  a turnip cut into dice, 1 pint of stock made from bones and trimmings, salt and pepper.

sprinkle in the flour. Stir and cook slowly until well browned, put in the stock, season to taste, and stir until boiling. Boil gently for 15 minutes, then cool slightly, put in the meat, cover closely, and cook very gently for  $1\frac{1}{2}$  hours, taking care to keep the temperature just below simmering point. Place the slices of meat on a hot dish, strain the sauce over, and garnish with the vegetable dice cooked separately. A tablespoonful of mushroom ketchup, walnut liquor, sharp sauce or vinegar, may be used to give additional flavour to the sauce.

**TIME.**—To stew,  $1\frac{1}{2}$  hours. **AVERAGE COST,** 4d., exclusive of the meat. **SUFFICIENT** for 3 or 4 persons. **SEASONABLE** at any time.

### BEEF, RIB BONES OF.

**INGREDIENTS.**—Rib bones, 1 carrot, 1 turnip, 1 onion finely chopped,  $\frac{1}{4}$  pint of good gravy, salt and pepper, mashed potato.

**METHOD.**—The bones should have on them a slight covering of meat. Peel the carrot and turnip, scoop out small pea shapes with a special cutter, or, if more convenient, cut them into dice. Saw the bones into pieces 3 inches long, place them in a stewpan with the turnip, carrot and onion, add the gravy, and season to taste. Stew very gently until the vegetables are tender, and serve piled within a border of mashed potato.

**TIME.**—About  $\frac{3}{4}$  of an hour. **AVERAGE COST,** exclusive of the bones, 4d. **SEASONABLE** at any time.

### BEEF, ROAST.

**INGREDIENTS.**—Beef, beef-dripping.

**METHOD.**—The joints usually roasted are the sirloin, ribs, and

## BEEF ROAST.

aitchbones, and sometimes the round. When cooking a large sirloin, it is a good plan to cut off the thin end, and salt, cook, and press it (as in Recipe Beef, Pressed). When the joint to be roasted consists of 1 or 2 ribs of beef off a large animal, it may be made compact and easier to carve by removing the bones, and skewering or tying the meat into a round form. The usual accompaniments to roast beef are gravy and horseradish, or horseradish sauce.

### BEEF, ROAST FILLET OF.

✓  
INGREDIENTS.—4 lbs. of fillet of beef,  $\frac{1}{2}$  pint of beef gravy, or demi-glacé sauce, horseradish sauce. For the marinade: 3 tablespoonfuls of salad-oil, 1 tablespoonful of lemon-juice, 1 teaspoonful of chopped onion, 1 teaspoonful of chopped parsley,  $\frac{1}{2}$  a teaspoonful of powdered mixed herbs,  $\frac{1}{4}$  a teaspoonful of pepper, a pinch of ground cloves.

METHOD.—Tie the meat into a good shape, place it on a dish, pour over the marinade, and let it remain in it for 3 hours, turning and basting frequently. Have ready a sheet of stout, well-greased paper, drain away half the liquid part of the marinade, fold the remainder and the meat in the paper, and fasten the ends securely. Roast or bake for  $1\frac{1}{2}$  hours, basting frequently with butter or dripping. Half an hour before serving remove the paper, and when the meat is nicely browned brush it over with meat glaze and place it on a hot dish. The demi-glacé sauce may be poured round the dish or served separately, the horseradish sauce being served in a sauce-boat.

TIME.— $1\frac{1}{2}$  hours to cook. AVERAGE COST, 6s. SUFFICIENT 4 lbs. for 8 or 9 persons.

## BEEF, ROLLED.

### BEEF ROLL (Tinned Beef).

INGREDIENTS.—1 lb. of tinned roast beef, coarsely chopped,  $\frac{1}{2}$  lb. of cooked bacon, cut into small dice, 1 teaspoonful of finely-chopped parsley,  $\frac{1}{2}$  a teaspoonful of powdered mixed herbs, salt and pepper, 2 eggs.

METHOD.—Mix the meat, bacon, parsley, herbs and a good seasoning of salt and pepper well together, and moisten gradually with beaten egg. Shape into a roll, brush over with egg, and bake gently for about 1 hour.

TIME.—About  $1\frac{1}{2}$  hours. AVERAGE COST, 1s. 2d. to 1s. 4d. SUFFICIENT for 4 or 5 persons.

### BEEF, ROLLED.

INGREDIENTS.—5 lbs. of fillet of beef, 2 glasses of port, an equal quantity of vinegar, forcemeat,  $\frac{1}{2}$  a teaspoonful of pounded allspice, piquante sauce, red-currant jelly.

METHOD.—Pour the wine and vinegar over the meat, let the preparation remain for 2 days, basting frequently meanwhile, and turning once at least. Drain well, flatten slightly, cover with forcemeat, roll up tightly, and bind with tape. Place the roll in a baking-dish, add the allspice to the liquor in which the meat was marinated, and pour the whole into the baking-dish. Cook gently for about 1 hour, basting frequently. Serve with piquante sauce and red-currant jelly, or, if preferred, substitute brown sauce or good gravy.

TIME.—To cook, about 1 hour. AVERAGE COST, fillet of beef from 1s. 1d. to 1s. 2d. per lb. SUFFICIENT for 12 or more persons. SEASONABLE at any time.

## BEEF ROLLS.

### BEEF ROLLS OR OLIVES.

INGREDIENTS.—1½ lbs. of rump steak, veal forcemeat, ¾ pint of stock or water, 1½ ozs. of butter, 1 oz. of flour, 1 small onion sliced, a few slices of carrot, salt and pepper.

METHOD.—Remove all fat from the meat, cut it into very thin slices about 4 inches long and 2 inches wide, and flatten them with a wet cutlet-bat. Spread a little forcemeat on each slice of meat, roll up lightly, and tie securely with twine. Heat the butter in a stewpan, fry the olives until their entire surface is lightly browned, then remove them from the stewpan. Now put in the carrot and onion, fry quickly for 3 or 4 minutes, then sprinkle in the flour, fry brown, pour in the stock, and stir until boiling. Replace the olives in the stewpan, add salt and pepper, cover with a greased paper and the lid of the stewpan, and simmer slowly for 1½ hours. Remove the strings, dish the olives on a bed of mashed potato, season the sauce to taste, and strain it over them.

TIME.—About 2 hours. AVERAGE COST, 2s. to 2s. 4d. SUFFICIENT for 6 or 7 persons.

### BEEF SANDWICHES.

INGREDIENTS.—Cold roast beef, tomato, cucumber or cress, mustard or curry-butter, white bread, salt.

METHOD.—Spread thin slices of bread with mustard or curry-butter, cover ½ of them with thinly-sliced beef, add slices of tomato, cucumber, or watercress leaves, seasoned with salt, pepper and vinegar. Cover with buttered bread, press well together, trim and cut into squares or triangles. Variety may be obtained by spread-

## BEEF, SCOTCH COLLOPS.

ing the bread with creamed butter, and adding a thin layer of horse-radish sauce to the beef instead of tomato or cucumber.

### BEEF SANDWICHES, FROM RAW BEEF (Invalid Cookery).

INGREDIENTS.—2 or 3 ozs. of raw juicy steak, thin slices of bread and butter, salt and pepper.

METHOD.—Scrape the meat finely, rub it through a wire sieve, and season lightly with salt and pepper. Spread it on thin bread and butter, and place another piece on the top. Cut into dainty squares and serve. If preferred, the pepper and salt may be omitted, and the meat preparation, when spread on the bread, plentifully dredged with castor sugar. This entirely masks the flavour of the meat.

TIME.—10 minutes. AVERAGE COST, steak, 1s. 2d. to 1s. 4d. per lb.

### BEEF SAUSAGES.

INGREDIENTS.—2 lbs. of lean beef, 1 lb. of beef suet, ¼ of a teaspoonful of powdered allspice, salt and pepper, sausage-skins, frying-fat.

METHOD.—Chop both beef and suet as finely as possible, add the allspice, salt and pepper to taste, and mix well. Press the mixture lightly into the prepared skins, prick well, and fry in hot fat until cooked and well-browned. When sausage skins are not available, the mixture may be shaped into small cakes, which should be floured before frying.

TIME.—To fry, 10 to 15 minutes. AVERAGE COST, 2s. 6d.

### BEEF, SCOTCH COLLOPS.

INGREDIENTS.—1 lb. of lean beefsteak, 1½ ozs. of butter, 1 teaspoonful of flour, ½ a teaspoonful of finely-chopped onion, ¼ pint of stock, salt and pepper.

## BEEF, SHIN OF, SOUP.

**METHOD.**—Cut the meat into very small pieces, but do not chop it. Make the butter hot in a stewpan, fry the onion lightly, stir in the flour and cook a little longer, then add the meat and the stock, and simmer slowly for 40 minutes. Surround the dish with sippets of fried or toasted bread, and serve hot.

**TIME.**—To cook, 1 hour. **AVERAGE COST,** 1s. 4d. to 1s. 6d. **SUFFICIENT** for 2 or 3 persons.

## BEEF, SHIN OF, SOUP.

**INGREDIENTS.**—2 lbs. of shin of beef, 3 quarts of water, 2 ozs. of butter or dripping, 1 oz. of flour, 1 onion sliced, 1 carrot sliced,  $\frac{1}{4}$  of a turnip sliced, a bouquet-garni (parsley, thyme, bay-leaf), 6 peppercorns, salt.

**METHOD.**—Heat the butter in a saucepan, put in the prepared onion, carrot, and turnip, and fry them brown. Add the water, the meat cut into small pieces, the bouquet-garni, peppercorns, and a little salt, and simmer gently for 3 or 4 hours. Strain, skim well, re-heat, and stir in the flour previously mixed with a little cold water. Boil gently for 5 or 6 minutes, then serve garnished with a little cooked vegetable, macaroni, or other farinaceous substance.

**TIME.**—From  $3\frac{1}{2}$  to  $4\frac{1}{2}$  hours. **AVERAGE COST,** 1s. 3d. to 1s. 5d. **SUFFICIENT** for 8 persons. **SEASONABLE** at any time.

## BEEF, SLICED AND BROILED.

**INGREDIENTS.**—Slices of cold roast beef, potato ribbons, frying-batter, frying-fat, salad-oil or oiled butter, salt and pepper.

**METHOD.**—Brush the slices of meat over with salad-oil or oiled butter, broil over a clear fire, and season carefully with salt and pepper. Dip the potato ribbons into the prepared batter, fry them

## BEEFSTEAK.

rather slowly in a deep pan of hot fat until crisp and nicely browned, and drain well. Place the meat on a hot dish, garnish with the potato ribbons, then serve.

**TIME.**—To broil the meat, 5 minutes. **SEASONABLE** at any time.

## BEEF, SPICED.

**INGREDIENTS.**—10 or 12 lbs. of pickled beef, 1 dessertspoonful of black pepper,  $\frac{1}{2}$  a teaspoonful of ginger, 1 saltspoonful of powdered cloves, 1 saltspoonful of grated nutmeg,  $\frac{1}{2}$  a saltspoonful of ground mace, 1 glass of claret or port wine.

**METHOD.**—Drain the beef from the pickle, mix together the above ingredients (except the wine), and sprinkle them over the entire surface of the meat, which must then be rolled, bound, and skewered into a good shape. Put the meat into an earthenware stewpot with a lid, pour over it the wine, cover the top of the vessel with 2 or 3 thicknesses of greased paper, and put on the lid. As no other liquid than the wine is added, it is absolutely necessary that the steam generated should be kept within the vessel, and for this purpose the lid is frequently covered with a paste of flour and water. The meat should be cooked slowly in the oven for about 4 hours, and then pressed between 2 boards or dishes until cold.

## BEEFSTEAK AND FRIED POTATOES.

**INGREDIENTS.**—2 lbs. of rump steak,  $1\frac{1}{2}$  ozs. of butter, 1 good teaspoonful of finely-chopped parsley,  $\frac{1}{2}$  a teaspoonful of lemon-juice, cayenne, salt, 4 or 5 potatoes, frying-fat.

**METHOD.**—Knead the butter, parsley, lemon-juice, and a little cayenne together, spread the mixture smoothly on a plate, and put

## BEEFSTEAK PIE.

it aside, to become firm and cold. Peel the potatoes, cut them across into slices, and fry thoroughly in a cloth. Have ready a deep pan of fat, put the potatoes into a frying-basket, lower them into the fat, and cook until tender. Stand the basket and potatoes on a plate or baking-sheet until the fat boils up again, then replace them in the pan, and fry for 2 or 3 minutes to make them crisp. Meanwhile, grill the steak over a clear bright fire, and stamp the maître d'hôtel butter into rounds, by means of a small cutter. Serve the steak on a hot dish, garnished with the potatoes, with the pats of butter placed on the top of it.

TIME.—7 to 10 minutes to cook the steak, according to thickness. AVERAGE COST, 2s. 6d. to 2s. 10d. SUFFICIENT for 5 or 6 persons.

## BEEFSTEAK AND KIDNEY PIE.

INGREDIENTS. — 1 lb. buttock steak, 2 sheep's kidneys, or  $\frac{1}{2}$  lb. of ox kidney,  $\frac{3}{4}$  lb. rough puff paste, seasoning, 1 egg.

METHOD.—Cut the kidney into thin slices across, place 1 on each slice of meat, roll up tightly, and put the rolls on end in the pie-dish. Season with salt and pepper, and moisten with  $\frac{1}{2}$  gill of water or gravy, line the edges of the dish, and then cover with paste. Ornament the surface with fancifully cut leaves of paste, flake the edge of paste, brush over with beaten egg and bake in a fairly hot oven from  $1\frac{1}{2}$  to  $1\frac{3}{4}$  hours.

TIME.—About 2 hours. AVERAGE COST, 3s. SUFFICIENT for 6 or 7 persons.

## BEEFSTEAK AND KIDNEY PUDDING.

INGREDIENTS.—The same as in the recipe for Beefsteak Pudding, with the addition of 2 sheep's kidneys, or  $\frac{1}{2}$  lb. of ox kidney.

## BEEFSTEAK PIE.

METHOD.—Cut the kidney into thin slices, 3 inches long and 2 inches wide, dip them in the seasoning mixture, place one on each slice of meat, roll up tightly, and place the rolls on end in the basin. In other respects, proceed as directed in the recipe for "Beefsteak Pudding."

TIME.—4 to  $4\frac{1}{2}$  hours. AVERAGE COST, 2s. 6d. SUFFICIENT for 5 or 6 persons.

## BEEFSTEAK AND OYSTER PIE.

INGREDIENTS.—The same as the recipe for Beefsteak Pie, substituting 2 dozen sauce oysters for the kidney.

METHOD.—Beard the oysters, and blanch the beards in the oyster liquor, which must be re-heated, seasoned, strained, and added to the gravy in the pie just before serving. Place an oyster on each slice of meat, roll up tightly, and put the rolls on end in the pie-dish. See "Beefsteak Pie" for directions for making.

TIME.—About 2 hours. AVERAGE COST, 4s. 6d. SUFFICIENT for 6 or 7 persons.

## BEEFSTEAK AND POTATO PIE.

INGREDIENTS.— $1\frac{1}{2}$  lbs. of beefsteak, potatoes to fill the dish, 1 small onion parboiled and finely-chopped, 1 tablespoonful of flour, 1 teaspoonful of salt,  $\frac{1}{2}$  a teaspoonful of pepper, short crust paste.

METHOD.—Peel the potatoes, and cut them into thick slices. Cut the meat into thin slices, about 2 inches long and an inch wide. Mix the flour, salt and pepper together on a plate, dip the slices of meat in the mixture, and roll them up tightly. Line the bottom of the pie-dish with slices of potato, sprinkle with salt and pepper, cover with rolls of meat, and add a little onion, but use it very

sparingly unless the flavour is much liked. Repeat until the dish is full, add boiling water to  $\frac{3}{4}$  fill the dish, and cover with paste. Bake for 2 hours in a moderately hot oven, and, before serving, pour a little hot beef gravy, or hot water seasoned with salt and pepper, through the hole in the top.

TIME.—To bake, about 2 hours.

AVERAGE COST, 2s. to 2s. 2d.

SUFFICIENT for 5 or 6 persons.

## BEEFSTEAK, FRIED.

INGREDIENTS.—1½ lbs. of rump steak, salt and pepper, butter or frying-fat.

METHOD.—Although this method of cooking steaks is not to be recommended, it is often more convenient than grilling, and with proper care the tender juicy qualities of the steak may be preserved, but it is less easily digested, in consequence of the fat in which it is fried. Make the butter or fat hot in a frying-pan, have sufficient to barely cover the bottom of the pan, put in the steak, fry one side quickly, then turn and fry the other side. When the entire surface is browned and hardened the cooking should be done a little more slowly, to avoid burning the fat in the pan, the steak being repeatedly turned. The steak may be served with a little butter spread lightly on the surface, or with gravy. To make this, drain off all the fat, add a little boiling water to the sediment in the frying-pan, season with salt and pepper, boil up, skim, strain, and serve round the dish or separately in a sauce-boat.

TIME.—From 10 to 15 minutes.

AVERAGE COST, from 1s. 2d. to 1s. 4d. per lb. SUFFICIENT for 4 to 5 persons.

## BEEFSTEAK, GRILLED.

### BEEFSTEAK, GRILLED.

INGREDIENTS.—1½ lbs. of steak cut off the fillet, rump, sirloin, or tenderloin,  $\frac{1}{2}$  oz. of butter, salt and pepper.

METHOD.—Grilling is a very simple process in cookery, the success of which depends almost entirely upon the fire being clear, bright, and free from smoke. A handful of salt sprinkled on the fire just before use will assist in clearing it. Before using the gridiron, it should be heated and the bars well rubbed with paper, and afterwards with fat or suet, to prevent the meat sticking to them. The chief point in grilling is to quickly harden the outside of the meat, in order to keep in the flavour and goodness, and this result is achieved more quickly if the meat be brushed over with salad-oil or warm butter before grilling. The steak should be turned frequently, by means of steak-tongs, or, failing these a fork, which must not, however, be thrust into the lean part of the meat to make holes through which the juices of the meat would escape. A steak cooked to perfection should be very dark on the outside, and the inside red and full of gravy. When done, spread the butter lightly on the surface, sprinkle with salt and pepper, and serve on a very hot dish. If liked, the dish may be garnished with watercress or scraped horseradish. Oyster sauce, grilled or baked tomatoes, or fried onions, are frequently served with beefsteak; they must always be cooked first, as the shortest possible time must be allowed to elapse between the steak leaving the grill and being served.

TIME.—10 to 15 minutes, for steaks of average thickness. AVERAGE COST, 1s. 2d. to 1s. 4d. per lb. SUFFICIENT for 4 persons.

## BEEFSTEAK, PICKLED.

### BEEFSTEAK, PICKLED (South African Recipe).

INGREDIENTS.—2 lbs. of steak, 2 onions sliced, 2 or 3 tablespoonfuls of tarragon vinegar, 1 tablespoonful of salad-oil, 24 white peppercorns, 6 cloves, 1 teaspoonful of finely-chopped mixed parsley, thyme, and marjoram.

METHOD.—Place the steak in a deep dish, cover with slices of onions, add the rest of the ingredients, and let the steak remain in the marinade for about 12 hours. Drain and wipe well, and grill quickly over a clear fire. Strain the marinade into a stewpan, boil up, season to taste, put in the steak and let it cook very gently for about 20 minutes.

TIME.—To grill the steak, 7 or 8 minutes. AVERAGE COST, 2s. 6d. to 3s. 6d. SUFFICIENT for 5 or 6 persons. SEASONABLE at any time.

### BEEFSTEAK PIE.

INGREDIENTS.—2 lbs. of beef-steak, 1 tablespoonful of flour, 1 level teaspoonful of salt,  $\frac{1}{2}$  a teaspoonful of pepper, the yolk of an egg, puff paste or short crust paste.

METHOD.—Cut the meat into thin slices, about 3 inches in length and width, but of no particular shape. Mix the flour, salt, and pepper together on a plate, dip the slices of meat in the mixture, and place them in a piedish, which should be sufficiently small to allow the meat to be well raised in the centre, and thus give to the pie a desirable plump appearance. Sprinkle the rest of the seasoning mixture between the layers of meat, and pour in enough boiling water to  $\frac{3}{4}$  fill the dish. Make the paste as directed, roll it out to a suitable thickness, invert a piedish of the same size

## BEEFSTEAK PUDDING.

as the one filled with meat, in the centre of the paste, and cut round, leaving a margin of about  $\frac{3}{4}$  of an inch. Line the edge of the dish with the trimmings, for paste is always lighter when not re-rolled. Put on the cover, ease it well over the raised meat, for which purpose the  $\frac{3}{4}$  of an inch margin was allowed, moisten and press the edges together, and notch them at regular intervals. Make a hole in the centre of the top, decorate with leaves, and brush over with the yolk of egg. The pie must be baked in a hot oven until the paste has risen and set, afterwards it must be cooked more slowly, otherwise the paste will be over-baked before the meat is done. Before serving, pour in through the hole in the top either a little beef gravy, or hot water seasoned with salt and pepper.

TIME.—To bake the pie, about 2 hours. AVERAGE COST, 2s. 6d. SUFFICIENT for 6 or 7 persons.

Note.—If preferred, the meat may be partially cooked before covering with paste. In which case it should be closely packed in a piedish or baking dish, covered with an inverted dish or tin, and gently cooked in the oven for about  $1\frac{1}{2}$  hours. A saucepan is not to be recommended for this preliminary process, for unless the meat is closely packed it is apt to curl up and lose its shape. The meat must be transferred to a cold piedish, and allowed to cool slightly before being covered with paste.

### BEEFSTEAK PUDDING, BAKED.

INGREDIENTS.—1 lb. of beef-steak,  $\frac{1}{2}$  lb. of ox kidney, 6 ozs. of flour, 2 eggs,  $\frac{3}{4}$  pint of milk, salt and pepper, dripping.

METHOD.—Cut the steak into finger-shaped pieces, fry for a few minutes in dripping, and the kidney into rather thin slices, and season liberally with salt and pepper.

## BEEFSTEAK PUDDING.

Mix the eggs, milk, and flour into a smooth batter, and season to taste with salt. Melt a little dripping in an earthenware baking-dish or piedish, put in half the batter, and bake until set. Place the partially fried steak and kidney on the top of the batter, fill up the dish with the remainder of the batter, and bake until set and well browned.

TIME.—To bake, about  $1\frac{1}{4}$  hours.  
AVERAGE COST, 1s. 6d. to 1s. 10d.  
SUFFICIENT for 4 or 5 persons.  
SEASONABLE at any time.

## BEEFSTEAK PUDDING (Another Method).

INGREDIENTS.—2 lbs. of beef-steak, 1 tablespoonful of flour, 1 level teaspoonful of salt,  $\frac{1}{2}$  a teaspoonful of pepper, 1 lb. of suet paste.

METHOD.—Cut the meat into thin slices, about 3 inches in length and width, but not necessarily uniform in shape. Mix the flour, salt and pepper, together on a plate, and dip each slice in the mixture. Make the paste as directed, cut off about  $\frac{1}{4}$  of it, and put it aside for the lid, roll out the remainder to the size of the basin, which must be previously well greased. Line the basin with the paste, put in the meat, sprinkle the rest of the seasoning mixture between the layers, and leave spaces to admit water, thus preventing the pudding becoming too dry. Three-quarters fill the basin with boiling water, which extracts less of the juices of the meat than cold water, put on the cover, and moisten and seal the edges. If the pudding is to be boiled, tie over a scalded and floured pudding cloth. If steamed, cover with a greased paper. Let the water be quite boiling, put in the pudding,

## BEEF SUET.

and boil for  $3\frac{1}{2}$  hours, or steam for 4 hours.

TIME.—From 4 to  $4\frac{1}{2}$  hours to cook. AVERAGE COST, 2s. 4d.  
SUFFICIENT for 5 or 6 persons.

## BEEFSTEAK, ROLLED.

INGREDIENTS.—2 lbs. of steak, cut in one piece,  $\frac{3}{4}$  of an inch in thickness, 6 to 8 ozs. of veal forcemeat, 1 pint of stock or water,  $1\frac{1}{2}$  ozs. of butter, 1 tablespoonful of flour, salt and pepper.

METHOD.—Flatten the meat with a cutlet-bat or rolling-pin. Let the forcemeat be rather highly seasoned, spread it on the meat, roll up tightly, and bind with tape. Heat the butter in a stewpan, put in the meat, and fry quickly until the whole surface is browned, then add the hot stock or water, cover closely, and cook slowly for about 2 hours. When done, place on a hot dish, thicken the gravy with the flour, boil for 3 or 4 minutes, season to taste, and strain over the meat.

TIME.—About 2 hours, to cook.  
AVERAGE COST, 2s. 9d. to 3s.  
SUFFICIENT for 4 or 5 persons.

Note.—The roll may also be baked in the oven, but it must be well basted either with stock or fat.

## BEEF SUET OR FAT, TO CLARIFY.

INGREDIENTS.—6 lbs. of beef fat, 1 pint of cold water.

METHOD.—Remove skin and sinews of the fat, then cut it into small pieces; put them with the water into an old iron saucepan, and boil until all the water has evaporated, and the liquid becomes clear, and the pieces of fat light-brown and shrivelled in appearance. Stir frequently to prevent the fat sticking to the pan. When cool, strain. This amount of fat should produce 4 lbs. of clarified fat. The

## BEEF TEA.

fat may be cooked or uncooked, and a small quantity may be more conveniently clarified in a jar in the oven.

TIME.—From 2 to 3 hours.  
AVERAGE COST, from 4*d.* per lb.  
QUANTITY, 6 lb. yields 4 lb. of clarified fat.

### BEEF TEA (For Invalids).

INGREDIENTS.—1 lb. of gravy beef, 1 pint of cold water,  $\frac{1}{2}$  a teaspoonful of salt.

METHOD.—Remove the fat, shred the meat finely, as in the following recipe, or pass it through a mincing machine. Place it in an earthenware jar, add the water and salt, and cover closely. Place the jar in a saucepan of boiling water, or in a slow oven, and cook for 3 hours, stirring occasionally. Strain, remove carefully all traces of grease, and serve.

TIME.—3 hours. AVERAGE COST, 7*d.*

### BEEF TEA AND EGG (For Invalids).

INGREDIENTS.— $\frac{1}{4}$  pint of beef tea, 1 yolk of egg, salt, toasted bread.

METHOD.—Beef tea, veal tea, mutton tea, or diluted beef essence may be employed in this preparation. Beat the yolk of an egg in a teacup, season lightly with salt, and, if allowed, add a little pepper. Heat the beef tea, but do not allow it to boil, and pour it over the yolk of egg, stirring briskly meanwhile. Serve with thin strips of toast.

TIME.—10 minutes. AVERAGE COST, 4*d.*

### BEEF TEA CUSTARD (Invalid dish).

INGREDIENTS.— $\frac{1}{4}$  pint of good beef tea, the yolks of 2 eggs, the white of 1 egg, salt.

## BEEF TEA, RAW.

METHOD.—Beat the yolks and white thoroughly together, pour on to it the beef tea, and season to taste. Have ready a well-buttered cup, pour in the preparation, cover with a buttered paper, and stand the cup in a stewpan containing a little boiling water. Steam very gently for about 20 minutes, then turn out carefully. Serve either hot or cold, or cut into dice, and serve in broth or soup.

TIME.—20 minutes. AVERAGE COST, 5*d.* or 6*d.*

### BEEF TEA CUSTARD (Another way).

INGREDIENTS.—Beef essence, 1 egg,  $\frac{1}{4}$  pint of boiling water, salt and pepper.

METHOD.—Make a stock of required strength with beef essence and water. Beat the egg well, then add the stock, and season to taste. Turn into a buttered cup, place in a saucepan, surround with boiling water, and cook very gently until the custard is set firmly.

TIME.—About 20 minutes. AVERAGE COST, 4*d.* or 5*d.* SUFFICIENT for 1 person.

### BEEF TEA, RAW (For Invalids).

INGREDIENTS.—2 ozs. of lean, juicy beef, 2 tablespoonfuls of cold water, a pinch of salt.

METHOD.—Cut off all skin and fat, shred the meat finely, pour over it the water, add the salt, cover and let it stand for at least 2 hours. When ready to use strain into a coloured glass, and season to taste. This variety of beef tea is more easily digested than any other, in consequence of the albumen being contained in an uncooked and therefore soluble condition.

TIME.—2 hours. AVERAGE COST, 1*½d.*

## BEEF TEA.

### BEEF TEA, WHOLE (For Invalids).

INGREDIENTS.—1 lb. of gravy beef, 1 pint of cold water,  $\frac{1}{2}$  a teaspoonful of salt.

METHOD.—Remove all fat, shred the meat finely, and as soon as it is shredded put it into the water, in which the salt should be previously dissolved. Let it stand covered for  $\frac{1}{2}$  an hour, then heat slowly, and cook as gently as possible until the liquid turns a rich reddish-brown, and the meat becomes white. Strain, pound the meat thoroughly in a mortar, and pass it through a wire sieve. Stir the pounded meat into the beef tea, season to taste, and serve.

TIME.—1 $\frac{1}{4}$  hours. AVERAGE COST, 8d. to 10d.

## BEETROOT, BOILED.

### BEETROOT AND ONION SALAD (See Onion Salad).

Use one part of thinly-sliced onion and two parts of sliced and pickled beetroot.

### BEETROOT, BOILED.

INGREDIENTS.—Beetroot, boiling water.

METHOD.—When large, young and juicy, this vegetable makes a very excellent addition to winter salads, and may easily be converted into an economical and quickly-made pickle. Beetroot is more frequently served cold than hot; when the latter mode is preferred, melted butter should be sent to table with it. Beetroot may also be stewed with button onions, or boiled and served with baked onions. Wash the beets thoroughly, but do not prick or break the skins before they are cooked, or they will lose some of their beautiful colour in boiling. Put them into boiling water, and let them boil until tender, keeping them well covered. If the beets are to be served hot, rub off the peel quickly, cut the beet into thick slices, and send to table with melted butter. For salads, pickle, etc., let the root cool, then peel by rubbing, and cut into slices.

TIME.—Small beetroot, 1 $\frac{1}{2}$  to 2 hours; large, 2 $\frac{1}{2}$  to 3 hours. AVERAGE COST, 1d. to 3d. each. SEASONABLE at any time.

Note.—In boiling beetroot great care must be taken not to damage the skin, otherwise it will "bleed," becoming white and tasteless. Should the skin be accidentally broken it is better to bake them in a moderate oven, previously covering the damaged part with a little flour paste.

## BEETROOT, DRESSED.

METHOD.—Prepare thin slices of bread and butter, cut from them 8 or 9 rounds about  $1\frac{3}{4}$  inches in diameter, and cover them with slices of beetroot of corresponding size and thickness. Cut the eggs across into thin slices, select 8 or 9 of suitable size, remove the yolk, and place the rings of white of egg on the croûtes, leaving visible a narrow margin of beetroot. Pass the remainder of the eggs through a sieve, mix with them the capers and shallot, add a few drops of lemon-juice and sufficient anchovy essence to form a moist paste. Season to taste, pile the preparation in the centre of the croûtes, garnish with fine strips of anchovies, and serve.

TIME.—1 hour. AVERAGE COST, 1s. SUFFICIENT for 6 or 7 persons. SEASONABLE all the year.

### BEETROOT FRITTERS.

METHOD.—Pass the beetroot through a fine sieve, sprinkle in the flour, add the yolks of eggs, lemon-rind, and nutmeg, and sweeten to taste. Stir over a slow fire for 10 minutes, and put aside until cold. Drop the mixture in dessertspoonfuls into the batter, drain slightly, and fry in hot fat until crisp and lightly browned.

METHOD.—Wash the beetroots well, taking care not to break the skins, and bake them in a moderate oven for  $1\frac{1}{2}$  hours. When cool enough to handle remove the skins, cut the beetroots into  $\frac{1}{2}$ -inch slices, and place them in jars. Meanwhile, boil the vinegar, horseradish, pepper, and spice together, let the mixture become quite cold, then pour in over the beetroot. Cover the jars closely with parchment paper coated on both sides with white of egg, and store until required in a cool, dry place.

TIME.—From 2 to 3 hours. AVERAGE COST, 1s. 4d.

## BRAIN CAKES.

### BOUQUET-GARNI.

This name is given to the small bunch of herbs so much used for flavouring sauces, soups, and stews. In its most simple form it consists of a sprig of thyme, marjoram, and a bay-leaf wrapped together in parsley, and tied into a little roll. To these may be added a small quantity of one or more of the following: chervil, chives, celery leaf, basil, tarragon.

METHOD.—Let the tongues and brains soak in salt and water for 2 or 3 hours, then cover the former with hot stock or water, and simmer gently until the skin can be removed. and fibres, and let them remain in salt and water until wanted. When the calf's head is cooking they may be tied in muslin and boiled with it for about 20 minutes. When cooked separately, they must be put into a stewpan with as much water as will cover them, 1 teaspoonful of salt, 1 tablespoonful of vinegar, the slices of onion, peppercorns, and bay-leaf, and cooked gently for the same length of time, or until firm. When cool, chop finely, season well with salt and pepper, and add as much beaten egg as is necessary to bind the ingredients together. Stir over the fire until the mixture thickens, and when cool form into small round cakes, coat them with egg and breadcrumbs, and fry until lightly browned in hot fat.

### BRAWN, TO MAKE.

INGREDIENTS.—To a pig's head weighing 6 lbs. allow  $1\frac{1}{2}$  lbs. of lean beef, 2 tablespoonfuls of salt, 2 teaspoonfuls of pepper, a little cayenne, 6 pounded cloves.

METHOD.—Cut off the cheeks and salt them, unless the head be small, when all may be used. After carefully cleaning the head, put it on in sufficient cold water to cover it, with the beef, and skim it just before it boils. A head weighing 6 lbs. will require boiling from 2 to 3 hours. When sufficiently boiled to come off the bones easily, put it into a hot pan, remove the bones, and chop the meat with a sharp knife before the fire, together with the beef. It is necessary to do this as quickly as possible to prevent the fat settling in it. Sprinkle in the seasoning, which should have been previously mixed. Stir it well, and put it quickly into a brawn-tin, a cake-tin, or mould will answer the purpose, if the meat is well pressed with weights, which must not be removed for several hours. When quite cold, dip the tin into boiling water for a minute or two, and the preparation will turn out and be fit for use.

## BREAD PUDDING.

The liquor in which the head was boiled will make a good pea soup, and the fat, if skimmed off and boiled in water, and afterwards poured into cold water, answers the purposes of lard.

TIME.—From 2 to 3 hours. AVERAGE COST, for a pig's head, 5d. per lb.

### BREAD AND BUTTER FRITTERS.

INGREDIENTS.—8 slices of thin bread and butter, jam, frying-fat, frying-batter, castor sugar.

Dip them into the prepared batter, drop them into hot fat, and fry slowly until crisp and lightly browned. Drain well, dredge with castor sugar, and serve as hot as possible.

TIME.—To fry, about 15 minutes. AVERAGE COST, 6d. SUFFICIENT for 6 or 7 persons.

### BREAD AND BUTTER PUDDING, STEAMED.

INGREDIENTS.—5 or 6 slices of bread and butter,  $\frac{3}{4}$  pint of milk, 1 dessertspoonful of sugar, 2 eggs, sultanas, raisins, currants, or candied peel, if liked.

METHOD.—Butter a pudding basin, sprinkle it with currants or chopped peel, or arrange raisins or sultanas in some simple design on the bottom and sides of the basin. Cut each slice of bread into 4 pieces, place them in layers, each layer being sprinkled with fruit and a little finely-chopped candied peel. Beat the eggs, add the milk and the sugar, stir until the sugar is dissolved, then pour slowly over the bread, etc., let it stand at least 1 hour, if convenient, for 2 hours,

## BREAD PUDDING.

before being cooked. Cover the top with a greased paper, and steam slowly for about 1 hour. Serve with a sweet sauce or fruit syrup.

TIME.—To make, about 20 minutes; altogether from  $2\frac{1}{4}$  to 3 hours. AVERAGE COST,  $5\frac{1}{2}d.$  without the bread. SUFFICIENT for 4 or 5 persons.

### BREAD AND BUTTER PUDDINGS, BAKED.

INGREDIENTS.—5 or 6 thin slices of bread and butter, 1 pint of milk, 2 eggs, 1 dessertspoonful of sugar, sultanas, currants, or candied lemon, if liked.

METHOD.—Cut off the crust and divide each slice of bread into 4 squares, arrange them in layers in a well buttered piedish, and sprinkle each layer with sultanas or whatever is being used. Beat the eggs, add the sugar, stir until dissolved, then mix in the milk and pour gently over the bread, which should only half fill the dish. Let it stand at least 1 hour for the bread to soak, then bake in a moderately cool oven for nearly 1 hour.

TIME.— $2\frac{1}{4}$  hours. AVERAGE COST,  $6d.$  to  $8d.$  SUFFICIENT for 4 or 5 persons.

### BREAD CUTLETS (Vegetarian Dish).

INGREDIENTS.—Slices of bread, milk, nutmeg, pepper, chopped parsley, herbs and lemon-rind, egg and breadcrumbs, oil for frying.

METHOD.—Cut slices of bread of a suitable shape and about  $\frac{3}{4}$  of an inch thick. Soak them in a little milk on a plate, but not sufficiently long to cause them to break. Mix the parsley, herbs, lemon-rind, spice, and breadcrumbs. Break the egg on a plate, dip each slice into it, and then in the crumbs, and fry at once in a frying-pan. Drain on paper and serve hot.

## BREAD PUDDING.

Beat out all the lumps with a fork and stir in the sugar, suet, raisins, nutmeg, and mix well. Add the egg, previously beaten, and as much milk as is necessary to make the mixture moist enough to drop readily from the spoon. Pour into a greased piedish and bake gently for about 1 hour. When done, turn out on to a hot dish, and dredge well with sugar.

TIME.— $1\frac{3}{4}$  to 2 hours. AVERAGE COST,  $4d.$  to  $5d.$  SUFFICIENT for 5 or 6 persons.

**METHOD.**—Break the bread into small pieces, cover with cold water, soak for  $\frac{1}{2}$  an hour, then strain and squeeze dry. Beat out all the lumps with a fork, add the raisins, suet, sugar, peel, and nutmeg, and mix well. Beat the egg, add to it the milk, and stir into the rest of the ingredients. **TIME.**—20 to 25 minutes. **AVERAGE COST,** about 3d. **QUANTITY,**  $\frac{1}{2}$  pint.

*Note.*—The cream may be omitted, and, if preferred, a little more butter added. Flavouring is simply a matter of taste (when cloves are not liked, mace or nutmeg may be substituted).

## BREAD SOUP.

**INGREDIENTS.**—2 quarts of stock, broth, or pot-liquor, 1 lb. of bread-crusts, salt and pepper.

**METHOD.**—Break the bread into small pieces, and place them in a basin. Boil up the stock, pour sufficient over the bread to cover it,

## BREADCRUMBS.

let it remain closely covered until the bread is quite soft, then beat out the lumps with a fork. Add the bread thus prepared to the remainder of the stock, boil up, simmer gently for 10 or 15 minutes, then season to taste, and serve.

**TIME.**—About 1 hour. **AVERAGE COST,** 1s. 2d. when made of second stock. **SUFFICIENT** for 6 or 8 persons. **SEASONABLE** at any time.

## BREADCRUMBS.

(Brown).—Put the crusts removed from the loaf in making white breadcrumbs, or any pieces of stale bread there may be, into a moderate oven, and bake them brown. Then crush them with a rolling-pin or pound them in a mortar, pass them through a fine wire sieve, and keep them in an air-tight tin. To make them more quickly, brown white breadcrumbs in a hot oven, turning them frequently during the process, pass them through a fine sieve and use.

## BREADCRUMBS.

(Fried).—Put some fresh, fine white breadcrumbs into a frying-pan or baking-tin, with a small piece of butter; season with salt and pepper, and either fry or bake until well browned. Drain well on paper, and serve hot with roast game.

## BREADCRUMBS.

(White).—Remove the crust from some stale bread and rub it through a fine wire sieve, using the palm of the hand for the purpose. Any crumbs left over from egging and bread-crumbing should be dried in the oven, passed through a sieve, and kept in an air-tight tin or jar for future use.

## BREAKFAST CAKES.

### BREAKFAST CAKES.

INGREDIENTS.—1 lb. of flour,  $\frac{1}{2}$  a teaspoonful of baking-powder,  $\frac{1}{2}$  a teaspoonful of salt,  $\frac{3}{4}$  pint of milk, 1 oz. of castor sugar, 2 eggs.

METHOD.—These cakes are made in the same manner as the bread, with the addition of eggs and sugar. Mix the flour, baking-powder, and salt well together, and stir in the sifted sugar. Add the milk and eggs, which should be well whisked, and with this liquid work the flour, etc., into a light dough. Divide it into small cakes, put them into the oven immediately, and bake for about 20 minutes.

TIME.—20 minutes to bake. AVERAGE COST, 6d. SUFFICIENT for 18 or 20 cakes.

### BREAKFAST ROLLS.

INGREDIENTS.—1 lb. of flour, 1 oz. of butter or lard,  $\frac{1}{2}$  oz. of yeast, 1 pint of water, a little salt.

METHOD.—The process for making rolls is exactly the same as directed for bread, but the quantity being smaller, it requires more yeast, and wants nursing and keeping warm. When the dough is ready, turn it out on the board and knead it well over; then let it lie for a few minutes to recover itself, divide into small pieces, mould them up round, and set them on a clean flat tin that will fit the oven. Cover them over with a damp clean cloth, let them stand in a warm place to prove; when nice and light, uncover, brush over with an egg beaten up in a cup, taking care not to knock out any of the proof, and then bake in a moderately heated oven for about 25 minutes. If preferred, milk can be used instead of water. Almost all fermented dough will make a very

## BREAM, BROILED.

satisfactory roll, but of course the dough is not always available. There is nothing, however, to prevent these rolls being made for breakfast, or hot tea bread upon baking days. It is quite optional whether fat is used in them or not; the principal advantage of the fat is that the rolls will be of a more even texture, and the crust will eat short and crisp instead of being tough.

TIME.—2 hours. AVERAGE COST, 4d. SUFFICIENT for 12 rolls.

### BREAM, BAKED.

INGREDIENTS.—Bream, fish forcemeat, fat for basting, anchovy or other fish sauce.

METHOD.—Empty, wash, and dry the fish, but do not scale it. Make the forcemeat as directed, stuff the inside of the fish, and sew up the opening neatly. Bake in a moderate oven from 40 to 50 minutes, basting occasionally with sweet dripping. Serve with anchovy or other fish sauce. If preferred, the forcemeat may be omitted, and the fish wrapped in buttered paper and baked slowly for about  $\frac{1}{2}$  an hour.

TIME.—From 40 to 50 minutes. AVERAGE COST, from 8d. to 1s. per lb. Allow 6 to 8 ozs. per head. SEASONABLE all the year.

### BREAM, BROILED.

INGREDIENTS.—Bream, anchovy or other fish sauce.

METHOD.—Empty, wash, and thoroughly dry the fish, but do not scale it. Broil over a clear fire until thoroughly cooked and nicely browned, then serve with anchovy, or other fish sauce.

TIME.—To broil, about  $\frac{1}{2}$  an hour. AVERAGE COST, 8d. to 1s. per lb. Allow 6 to 8 ozs. per head. SEASONABLE all the year.

## BREDEE.

### BREDEE (South African Dish).

METHOD.—Cut the meat into small pieces, discarding any superfluous fat. Heat the butter or fat, fry the onions until lightly browned, put in the meat, fry quickly for a few minutes, turning repeatedly. Add the tomatoes, chili, salt and pepper to taste, barely cover with water, cover closely, and cook gently for 2 hours. Before serving add a little sugar.

### BRIANE MAHEE (Indian Dish).

METHOD.—Wash and clean the fish, cut it into pieces convenient for serving, dry thoroughly, pour over it the gingly oil, and let it stand for  $\frac{1}{2}$  an hour. Wash off the oil, dry the fish well, rub it all over with the chennah and anise pounded or ground, allow it to stand for a few minutes, then wash it again. Now pour over it the buttermilk, add the cardamoms and cloves, a teaspoonful of salt, the juice of the green ginger, and let it soak for 1 hour. Fry the

onions in a little hot ghee, add the ginger, coriander, cinnamon, cumin, and saffron, put in the fish, and cover with the rice, previously par-boiled. Add a little of the buttermilk, pour over the whole the melted ghee, cover closely, and cook as slowly as possible for about 1 hour, serve hot.

METHOD.—Slice the meat, sprinkle it liberally with salt and pounded ginger, let it remain for about  $\frac{1}{2}$  an hour, then pour over it the gravy. Allow the meat to soak for 1 hour, turning it 2 or 3 times, and adding a little more gravy if necessary, then drain it well and dip each slice in flour seasoned with salt. Heat a little ghee in a stewpan, fry the onions until well browned, then add the meat, and fry it also. As soon as the meat is lightly browned, sprinkle in the coriander seeds, previously ground, pour in the gravy in which the meat was soaked, and cook gently until it has become evaporated or absorbed. Meanwhile, parboil the rice in water, then drain it well, and stir in the saffron. As soon as the meat is sufficiently dry, add the coriander, cinnamon, cloves, cardamoms, and cumin seeds, all previously pounded or ground, mix well together, place the rice on the top, over which spread the

green chumah dhal, and pour upon it the remaining ghee previously melted. Cover closely, and cook as slowly as possible for about 40 minutes, then serve.

TIME.—2 hours. SUFFICIENT for 6 persons. Cost, 2s. 3d.

### BRILL.

INGREDIENTS.—1 brill, salt and vinegar to taste.

METHOD.—Clean the brill, cut off the fins, and rub it over with a little lemon-juice to preserve its whiteness. Barely cover the fish with warm water, add salt and vinegar, and simmer gently until done (about 10 or 15 minutes for a small fish). Garnish with cut lemon and parsley, and serve with one of the following sauces: lobster sauce, shrimp sauce, Hollandaise sauce, or melted butter.

METHOD.—Procure some young and freshly gathered beans, and shell sufficient to make 2 pints; boil them as in the recipe for Broad or Windsor Beans, until nearly done; then drain them and put them into a stewpan with the stock, finely-minced herbs, and sugar. Stew the beans until they are perfectly tender and the liquor has reduced a little, then beat up the yolk of an egg with the cream, and add this to the beans. Let the whole get thoroughly hot, and, when on the point of simmering, serve. Should the beans be very large, the skins should be removed previously to boiling them; they are, however, more quickly removed after they are boiled.

TIME.—10 minutes to boil the beans, 15 minutes to stew them in the stock. AVERAGE COST, unshelled, 6d. to 10d. per peck. SUFFICIENT for 5 or 6 persons. SEASONABLE in July and August.

$\frac{1}{2}$  a glass of sherry, 1 oz. of butter, 1 oz. of flour, 1 small onion finely chopped, 1 teaspoonful of finely-chopped parsley, 6 or 8 button mushrooms, 1 bay-leaf, 2 or 3 sprigs of thyme, salt and pepper, lemon-juice.

**METHOD.**—Shell the beans, put them into boiling water, boil rapidly for 6 or 7 minutes, then drain and remove the skins. Have the stock ready boiling in a stewpan, add to it the beans, onion, thyme, and bay-leaf, season with salt and pepper, and simmer gently from 20 to 30 minutes, according to the age of the beans. Meanwhile, fry the mushrooms for a few minutes in the hot butter without browning, then transfer them to the stewpan containing the beans. Add the flour to the butter, cook over the fire until it acquires a nut-brown colour, then strain in the stock from the other stewpan, and stir until a perfectly smooth sauce is obtained. Season to taste, add the parsley, sherry, and lemon-juice, the beans and mushrooms, and when thoroughly hot, serve. If liked, the dish may be garnished with tiny rolls of crisply-fried bacon, croûtes of fried bread, or potato croûtes. The sherry and mushrooms may be omitted, and the dish would then be Broad Beans with Brown Sauce. Vegetarians could substitute vegetable stock or milk for the meat stock.

**TIME.**—From 35 to 40 minutes.  
**AVERAGE COST,** 1s. to 1s. 3d.  
**SUFFICIENT** for 6 or 7 persons.  
**SEASONABLE** in July and August.

## BROAD OR WINDSOR BEANS.

**INGREDIENTS.**—1 peck broad or Windsor beans, salted water, parsley sauce.

**METHOD.**—This favourite vegetable to be nice should be young and freshly gathered. After shelling the

beans, put them into boiling water, salted to taste, and boil rapidly until tender. Drain them well in a colander; dish, and serve separately a boat of parsley sauce. Boiled bacon often accompanies this vegetable, but should be cooked separately. This dish is usually served with the beans laid round the bacon, and the parsley butter sauce in a tureen. Beans also make an excellent garnish to a ham: when used for this purpose they should have their skins removed.

**TIME.**—Very young beans, 15 minutes; when of a moderate size, 20 to 25 minutes, or longer. **AVERAGE COST,** unshelled, 6d. to 10d. per peck. Allow 1 peck for 6 or 7 persons. **SEASONABLE** in July and August.

## BROCCOLI, BOILED.

**INGREDIENTS.**—Broccoli. To each  $\frac{1}{2}$  gallon of water allow 1 heaped tablespoonful of salt.

**METHOD.**—Strip off the dead leaves, and cut off the inside ones level with the flower, cut off the stalk close to the bottom, and put the broccoli into cold salt and water, or vinegar and water, with the heads downwards. Let them remain for about  $\frac{3}{4}$  of an hour, then put them into a saucepan of boiling water, salted in the above proportion, and keep them boiling gently with the stalk upwards and the saucepan uncovered. Take them up with a slice the moment they are done; drain them well, and serve with a tureen of melted butter, a little of which should be poured over the broccoli. If left in the water after it is done, the broccoli will break, its colour will be spoiled, and its crispness lost. If boiled too fast they break.

**TIME.**—Small broccoli, 10 to 15 minutes; large broccoli, 20 to 30 minutes. **AVERAGE COST,** 2d. to

## BROOD KHUTJES.

3*d.* each. SEASONABLE from October to March.

*Note.*—It is a good plan to place a small piece of toast or crust of bread in the saucepan in which any vegetable of the cabbage tribe is boiled, as this absorbs the unpleasant odour generated during the cooking.

## BROWN SOUP.

stirred they brown less quickly. Add the water or stock, stir until it boils, simmer for 10 minutes, then season to taste and use. A few drops of browning (*see* Browning for Stock) may be added when the sauce is too light in colour.

TIME.—25 to 30 minutes. AVERAGE COST, 2*d.* without the stock.

### BROWN SOUP FROM TINNED MUTTON.

## BROWN STOCK.

pieces convenient for serving, pour over them the vinegar, let them remain for at least 1 hour, turning two or three times, then drain and dry well. Cut some of the carrots into julienne strips, and put aside until wanted. Heat the butter or fat in a stewpan, fry the meat quickly until lightly-browned, then take it out, and put in the onion and the remainder of the carrot and turnip. Fry brown, then sprinkle in the flour, stir and cook until nicely browned, and add the water. Boil up, stirring meanwhile, simmer gently for 15 minutes, then cool slightly and put in the meat. Season to taste, and cook as slowly as possible for 2 $\frac{1}{2}$  hours. Arrange the meat neatly on a hot dish, strain the sauce over, and garnish with the shredded vegetables, which must be previously cooked until tender in a little stock or water.

TIME.—To stew, 2 $\frac{1}{2}$  hours. AVERAGE COST, 1*s.* 4*d.* SUFFICIENT for 3 or 4 persons. SEASONABLE at any time.

### BROWN STOCK (Economical).

INGREDIENTS.—4 lbs. of raw or cooked bones, the neck, cleaned feet, gizzards, and liver of a chicken, the bones and rind of ham or bacon, 2 onions sliced, 2 carrots sliced, 1 turnip sliced, a strip of celery cut into small pieces, 2 ozs. of butter or sweet dripping, 12 peppercorns, 2 cloves, 1 tablespoonful of salt, and 1 quart of water to each lb. of meat and bone.

METHOD.—Clean and peel the vegetables. Make the fat hot in a large stewpan, chop or break the bones into small pieces, drain the vegetables thoroughly. Place the bones, herbs, and vegetables in the hot fat, put on the cover of the stewpan, and fry gently until the whole is quite brown, stirring and turning the ingredients occasionally

## BROWN VEGETABLE SOUP.

to prevent anything becoming overcooked. Put in the cold water, salt, peppercorns, and cloves, let it come gently to the boil, and remove the scum as it rises. When clear, put on the cover and simmer gently for 5 or 6 hours. Some of the fat used in frying will rise to the surface during the process of simmering and should be taken off with a spoon. When done, strain through a sieve into a large basin, and when cold, remove the fat.

Soup made from this stock may not have a transparent brilliancy, but if gently simmered and carefully cleared it is quite good enough for ordinary purposes. Frying the bones and vegetables before adding the water greatly improves the flavour and colour.

TIME.—6 hours. AVERAGE COST, 6d. per quart.

1 lb. of solid material employed for stock should produce about 1½ pints of stock.

## BROWN VEGETABLE SOUP (Vegetarian Dish).

INGREDIENTS.—2 quarts of water, 1 slice of bread, 1 cabbage, 2 carrots, 1 turnip, 2 onions, 2 potatoes, parsley, salt and pepper, 1 tablespoonful of oil or 1 oz. of butter.

METHOD.—Fry a slice of onion in the oil or butter in a large saucepan. When it is brown, but not burnt, add 2 quarts of water, salt, pepper, a slice of stale bread toasted, and vegetables cut up into small pieces. (One small cabbage, 2 carrots, 1 turnip, 2 onions, 2 or 3 potatoes, and a bunch of parsley make a good soup). French beans, green peas with their pods, celery, parsnips, or any other vegetable may be added. Boil for 3 or 4 hours, then mash the vegetables through a colander, or in a saucepan with a spoon. boil for another 10 minutes,

## BRUSSELS SPROUTS.

and the soup is ready. If it is too thick, add more water, and boil for 10 minutes after putting in the water; if too thin, boil fast with the lid off the saucepan until it is thick enough.

TIME.—From 3 to 4 hours. AVERAGE COST, 3d. to 4d. SUFFICIENT for 4 or 5 persons.

## BROWNING, CARAMEL, FOR STOCK.

The best way to get brown stock is to fry the meat and bones in a little fat, as directed in the foregoing recipe. Another way to colour stock or any kind of soup or sauce is to add a few drops of caramel. This is obtained by boiling ½ lb. of loaf sugar with ½ gill of water until it is a dark brown, almost black colour. Then add a gill of cold water, and boil again till it acquires the consistency of thick syrup. Put it in a bottle and use as required; it will keep for any length of time.

## BRUSSELS SPROUTS, BOILED.

INGREDIENTS.—Brussels sprouts. To each ½ gallon of water allow 1 heaped tablespoonful of salt, a very small piece of soda, white sauce, or parsley butter.

METHOD.—Clean the sprouts from insects, wash them, and pick any dead or discoloured leaves from the outsides; put them into a saucepan of boiling water, with salt and soda in the above proportion; keep the pan uncovered, and let them boil quickly until tender; drain, dish, and serve with a tureen of melted butter: maître d'hôtel sauce is sometimes poured over them. Another method of serving is to toss the sprouts in about 1 oz. of butter and a seasoning of pepper and salt. They must, however, be sent to table very quickly, for

## BRUSSELS SPROUTS.

on account of the smallness of the sprouts this vegetable soon cools.

TIME.—From 10 to 15 minutes, after the water boils. AVERAGE COST, 2*d.* to 3*d.* per lb. SEASONABLE from September to March.

### BRUSSELS SPROUTS SALAD.

INGREDIENTS.—Cooked Brussels sprouts, salad dressing, beetroot.

METHOD.—Toss the sprouts lightly in a little salad dressing, pile in a salad-bowl, and decorate with beetroot.

### BRUSSELS SPROUTS SOUP.

INGREDIENTS.—1½ lbs. of Brussels sprouts, 3 pints of good stock, 1 gill of cream, a small piece of soda, salt, pepper,\* and grated nutmeg.

METHOD.—Wash and trim the sprouts, cook them in salted water containing a very small piece of soda (to preserve the colour) till tender. Drain well and rub through a sieve. Put the purée in a stewpan with the stock, boil, and let it simmer for a few minutes, skimming meanwhile. Season to taste, add the cream, keep hot until wanted for table, but on no account let the soup boil after the cream is added.

TIME ½ an hour. AVERAGE COST, 2*s.* SUFFICIENT for 6 persons. Seasonable from September to February.

### BUBBLE AND SQUEAK.

INGREDIENTS.—Thin slices of cold roast or boiled beef, cold mashed potatoes, cold greens of any kind, 1 onion shredded, butter or dripping, salt and pepper, vinegar if liked.

METHOD.—Melt a little butter or fat in a frying-pan, put in the meat, fry quickly until lightly-browned

## BULLOCK'S HEART.

on both sides, then remove and keep hot. Put in the onion, fry until brown, add the potatoes and greens, and season to taste. Stir until thoroughly hot, then add a little vinegar, if liked, and turn on to a hot dish. Place the slices of meat on the top, and serve.

TIME.—About 20 minutes.

### BUCKWHEAT CAKES (Canadian Dish).

INGREDIENTS.—1 cup of buckwheat flour, ½ a cup of Indian corn meal, ½ a cup of fine flour, ¼ of a cup of brewer's yeast, ½ a teaspoonful of salt, ¼ of a teaspoonful of carbonate of soda, 1 pint of boiling milk or water.

METHOD.—Pour the boiling water or milk over the Indian corn meal, add the salt, and stir well. Let it remain covered until lukewarm, then add the buckwheat flour, the white flour, and the yeast, and beat well. Cover with a cloth, and let the preparation stand all night, and in the morning repeat the heating. When the batter has risen again, add the soda dissolved in a little warm water, beat well again, and at once bake on a griddle.

TIME.—To bake, about 10 minutes. AVERAGE COST, 7*d.* SUFFICIENT for 1½ lbs. of cakes. SEASONABLE at any time.

### BULLOCK'S HEART, STUFFED and BAKED.

INGREDIENTS.—A bullock's heart, veal forcemeat, fat for basting, ½ pint of good stock, red currant jelly.

METHOD.—Wash the heart in several waters, cut away any cartilage or gristle there may be at the base, remove the lobes and the membrane, separating the cavities inside the heart. Drain and dry the heart thoroughly, make the forcemeat as directed, and put it

## BUNS, PLAIN.

inside the heart; cover the base with a greased paper to keep in the forcemeat, and tie round securely with tape or twine. Have ready in a deep baking tin 3 or 4 table-spoonfuls of hot fat, put in the heart, baste it well, and repeat the basting frequently during the 3 hours it must be allowed to cook in a moderate oven. Half an hour before serving remove the paper, in order that the base of the heart may brown. Have the stock ready boiling, transfer the heart to a HOT dish, and keep it as HOT AS POSSIBLE. Drain the fat from the tin, sprinkle in a little salt and pepper, pour in the BOILING stock, mix well with the sediment in the tin, bring to the boil, and strain. Serve with red currant jelly, a little gravy poured round the dish, and the remainder in a sauce-boat.

TIME.—To cook, 3 hours. AVERAGE COST, 2s. 6d. to 3s. SUFFICIENT for 6 or 7 persons.

## BUNS, PLAIN.

INGREDIENTS.—To every 2 lbs. of flour allow 6 ozs. of moist sugar, 1 oz. of yeast,  $\frac{1}{2}$  pint of milk,  $\frac{1}{2}$  lb. of butter, 1 pint of tepid milk.

METHOD.—Put the flour into a basin, mix the sugar well with it, make a well in the centre, and stir in the yeast and  $\frac{1}{2}$  pint of milk (which should be lukewarm), with enough of the flour to make it the thickness of cream. Cover the basin over with a cloth, and let the sponge rise in a warm place, which will be accomplished in about  $1\frac{1}{2}$  hours. Melt the butter, but do not allow it to oil; stir it into the other ingredients, using a little more milk if necessary, and make the whole into a soft dough. Mould it into buns about the size of an egg; then lay them in rows quite 3 inches apart; set them again in a warm place until they

## BURNT CREAM.

have risen to double their size; then put them into a good brisk oven, and when they are done wash them over with a little milk. From 15 to 20 minutes will be required to bake them nicely. These buns may be varied by adding a few currants, candied peel, or caraway seeds to the other ingredients. The above mixture also answers for hot cross buns, by putting a little ground mixed spice, and by pressing a tin mould in the form of a cross in the centre of the bun.

TIME.—15 to 20 minutes to bake. AVERAGE COST, 1d. each. SUFFICIENT to make 24 buns.

## BURLAS (Indian Dish).

This term is applied to a mixture of vegetables, fried in ghee (frying fat or butter). A favourite mixture is cabbage and potato, known to us as "Coleanum."

## BURNT ALMONDS.

INGREDIENTS.—1 lb. of Demarara sugar,  $\frac{1}{2}$  lb. of almonds, 1 gill of water.

METHOD.—Put the sugar and water into a stewpan and stir occasionally until dissolved. As soon as it comes to the boil cease stirring, boil 2 or 3 minutes, and add the almonds. Now stir briskly until the sugar browns slightly and granulates, and has completely coated the almonds, then turn them on to a sieve, separate any that may have stuck together, and let them remain until cold.

## BURNT ALMOND CREAM.

INGREDIENTS.— $1\frac{1}{2}$  pints of custard (see Custard for Cream Ices),  $\frac{3}{4}$  of a gill of cream, 1 tablespoonful of Kirsch, 2 ozs. of loaf sugar, 2 ozs. of almonds.

METHOD.—Blanch, shred, and bake the almonds until brown, pre-

## BURNT CREAM.

pare the custard according to the recipe. Put the sugar and a few drops of water into a small stewpan, and boil until it acquires a deep golden brown colour. Now add the cream, boil up and stir into the custard. Let the mixture cool, then add the prepared almonds and Kirsch, and freeze.

TIME.—About 1 hour. AVERAGE COST, 2s. 3d. SUFFICIENT for 7 or 8 persons.

## BURNT CREAM.

INGREDIENTS.— $\frac{1}{2}$  pint of cream,  $\frac{1}{2}$  pint of milk, 1 dessertspoonful of crème de riz or cornflour, 6 yolks of eggs,  $1\frac{1}{2}$  ozs. of vanilla sugar, ground cinnamon.

METHOD.—Mix the crème de riz or cornflour smoothly with a little milk, and put the remainder with the cream and 1 oz. of vanilla sugar into a stewpan. When boiling, add the crème de riz, cook for 2 or 3 minutes, cool slightly, then put in the well-beaten yolks of eggs, and whisk briskly by the side of the fire until they thicken, but do not allow the mixture to boil. Pour the preparation into a well-buttered soufflé dish, sprinkle the surface lightly with cinnamon, and thickly with vanilla sugar, and bake in a quick oven for 10 or 15 minutes. The top must be well-browned, and when the oven is not hot enough for the purpose, the dish should be held under a salamander before serving.

TIME.—From 35 to 45 minutes. AVERAGE COST, 1s. 6d. SUFFICIENT for 6 or 7 persons.

## BUTTER—Anchovy.

To 1 oz. of butter add a teaspoonful of lemon-juice, 1 teaspoonful of anchovy essence or paste, a pinch of cayenne, and a few drops of cochineal or carmine. Mix all well together, and use as required.

## BUTTER.

### BUTTER—Clarified.

Put the butter into a small stewpan, let it heat slowly by the side of the fire, removing the scum as it rises, and when the butter presents the appearance of clear salad-oil, carefully pour it off from the sediment at the bottom of the pan. Clarified butter, or, as it is sometimes called, oiled or melted butter, is frequently served instead of sauce with fish, meat and vegetables; it is also used to moisten the surface of many things grilled or cooked "au gratin," and it is also frequently employed for coating moulds and baking tins.

### BUTTER (Parsley Butter)—Maitre d'Hôtel.

Mix well together 1 oz. of butter, 1 teaspoonful of finely-chopped parsley, and 1 teaspoonful of lemon-juice, a little salt and pepper to taste. Spread the preparation on a plate, and when cold and firm, use as required.

### BUTTER, SALT, TO PRESERVE AND TO CHOOSE.

METHOD.—In large families, where salt butter is purchased a tub at a time, the first thing to be done is to turn the whole of the butter out, and, with a clean knife, to scrape the outside; the tub should then be wiped with a clean cloth, and sprinkled all round with salt, the butter replaced, and the lid kept on to exclude the air. It is necessary to take these precautions, since a want of proper cleanliness in the dairy-maid may cause the outside of the butter to become rancid; and if the scraping be neglected, the whole mass will soon become spoiled. To choose salt butter, plunge a knife into it, and if, when drawn out, the blade smells rancid or unpleasant, the

## BUTTER SCOTCH.

butter is bad. The layers in tubs will vary greatly, the butter being made at different times; so to try if the whole tub be good, the cask should be unhooped, and the butter tried between the staves.

Butter may be kept fresh for 10 or 12 days by a very simple process. Knead it well in cold water till the butter-milk is extracted; then put it in a glazed jar, invert this in another, putting into the latter a sufficient quantity of water to exclude the air. Renew the water every day.

## BUTTER SCOTCH.

INGREDIENTS.—1 lb. of loaf sugar,  $\frac{1}{2}$  lb. of butter, a pinch of cream of tartar,  $\frac{1}{2}$  pint of milk.

METHOD.—Place the sugar and milk in a stewpan, and stir occasionally by the side of the fire until the sugar is dissolved. Now add the cream of tartar and the butter a small piece at a time, and boil the mixture until a little, dropped into cold water, forms a moderately hard ball. Pour on to an oiled or buttered tin, and as soon as it is sufficiently firm, mark off into small oblongs or squares, and when cold divide the sections thus formed. Wrap each piece first in wax paper, then in tinfoil.

## CABBAGE 'AU GRATIN.

INGREDIENTS.—1 good cabbage, 3 or 4 slices of bacon, 1 dessert-spoonful of grated cheese, 1 dessert-spoonful of breadcrumbs,  $\frac{1}{2}$  pint of white sauce (*see* Béchamel sauce), 1 oz. of butter, salt and pepper.

## CABBAGE, BOILED.

METHOD.—Wash, trim, and quarter the cabbage, put it into boiling water, add a tablespoonful of salt, and boil rapidly. When  $\frac{3}{4}$  cooked, drain well, chop coarsely, season with salt and pepper, and press into a pudding basin. Place the bacon in a gratin dish, or in any fire-proof dish that may be sent to table, invert the basin on the top, and turn out the cabbage. Cover the surface with the mixed grated cheese and breadcrumbs, put small pieces of butter on the top, and bake in a moderate oven until lightly brown. Serve the sauce separately.

TIME.—From 40 to 60 minutes.  
AVERAGE COST, 9d. SEASONABLE at any time.

## CABBAGE, BOILED.

INGREDIENTS.—Cabbages. To each  $\frac{1}{2}$  gallon of water allow 1 heaped tablespoonful of salt, a very small piece of soda.

METHOD.—Pick off all the dead outside leaves, cut off as much of the stalk as possible, and cut the cabbages across twice at the stalk end; if very large, quarter them. Wash them well in cold water, place them in a colander, and drain; then put them into plenty of fast-boiling water, to which have been added salt and soda in the above proportions. Stir the cabbages once or twice in the water, keep the pan uncovered, and let them boil quickly until tender. The instant they are done take the cabbages up into a colander, place a plate over them, let them thoroughly drain, dish, cutting them into squares.

TIME.—Small young cabbages, 15 to 20 minutes; large cabbages and savoys, from 30 to 40 minutes.  
AVERAGE COST, from 1d. each.  
SEASONABLE all the year.

## CABBAGE, BRAISED.

### CABBAGE, BRAISED.

INGREDIENTS.—Savoy cabbages, slices of fat bacon, 1 or 2 onions, 1 or 2 carrots, a bouquet-garni (parsley, thyme, bay-leaf), stock, salt and pepper.

METHOD.—Wash, trim, and halve the cabbages, cover them with boiling water, adding 1 tablespoonful of salt. Boil rapidly for 15 minutes, then drain well, and cut away the stalks. Sprinkle carefully with salt and pepper, put 2 halves together, and fasten them securely. Cover the bottom of a stewpan with slices of bacon, put in the cabbages, add the onions and carrots thickly sliced, herbs, and a good seasoning of salt and pepper. Add sufficient stock to nearly cover the cabbages, put on a closely-fitting lid, and simmer gently for 1 hour. When ready, remove the strings, drain well, press dry in a cloth, shape as required, and use as a garnish to an entrée.

TIME.—Altogether, about 1½ hours. AVERAGE COST, cabbages, 2d. each. Allow 1 small cabbage for 2 persons. SEASONABLE in winter.

### CABBAGE, BUTTERED.

INGREDIENTS.—1 good cabbage, 2 medium-sized Spanish onions, 1½ ozs. of butter, salt and pepper.

METHOD.—Boil the cabbage and onions together, allowing a little longer time to the latter, when the cabbage is young, then drain, and chop finely. Heat the butter in a frying-pan, put in the vegetables, season well with salt and pepper, fry for 10 or 15 minutes, then serve. If preferred, a tablespoonful each of good gravy and vinegar may be added before serving.

TIME.—About 1 hour. AVERAGE COST, 6d. SEASONABLE at any time.

## CABBAGE, PICKLED.

### CABBAGE, MINCED.

INGREDIENTS.—1 cabbage, 3 ozs. of butter, 1 oz. of flour, 2 tablespoonfuls of vinegar, salt and pepper, hard-boiled eggs.

METHOD.—Boil, press the cabbage dry and chop it finely. Heat the butter in a frying-pan, sprinkle in the flour, mix smoothly, and put in the cabbage. Add salt and pepper to taste, put in the vinegar, stir over the fire for 5 or 6 minutes, then serve garnished with sections of hard-boiled egg.

TIME.—Altogether, from 1 to 1½ hours. AVERAGE COST, 6d. to 8d., exclusive of the eggs. SUFFICIENT for 3 or 4 persons. SEASONABLE at any time.

### CABBAGE, PICKLED RED.

INGREDIENTS.—1 good, firm red cabbage, 1 quart of vinegar, ½ oz. of whole pepper, ½ oz. of all-spice.

METHOD.—Remove the outer leaves of the cabbage, quarter it, remove the centre stalk, and cut each section across into very fine strips. Pile the shredded cabbage on a large dish, sprinkle it liberally with salt, and let it remain thus until the following day. Meanwhile, boil the vinegar, pepper and spice together, the latter being tied together in a piece of muslin, and allow the preparation to become quite cold. Turn the cabbage into an earthenware or enamelled colander, and when well drained put it into a large jar, and pour in the vinegar. It will be fit for use in 3 or 4 days; if kept for any length of time it loses the crispness and colour which are its chief recommendations.

TIME.—Altogether, 2 days. AVERAGE COST, 9d. to 10d.

## CABBAGE, RED, STEWED.

### CABBAGE, RED, STEWED.

INGREDIENTS.—1 red cabbage, 1 small slice of ham,  $\frac{1}{2}$  oz. of fresh butter, 1 pint of fresh stock, 1 gill of vinegar, salt and pepper to taste, 1 tablespoonful of pounded sugar.

METHOD.—Cut the cabbage into very thin slices, put it into a stew-pan, with the ham cut in dice, the butter,  $\frac{1}{2}$  pint of stock, and the vinegar; cover the pan closely, and let it stew for 1 hour. When it is very tender, add the remainder of the stock, a seasoning of salt and pepper, and the pounded sugar; mix the ingredients well together, stir over the fire until nearly all the liquor has dried away, and serve. Fried sausages are usually sent to table with this dish: they should be laid round on the cabbage as a garnish.

TIME.—Rather more than 1 hour. AVERAGE COST, 1s. without sausages. SEASONABLE from September to January.

### CABBAGE SOUP.

METHOD.—Cover the shredded cabbage with boiling water, bring to the boil and strain. Return the cabbage to the saucepan, add to it 2 pints of boiling water, the milk, onion, parsley, butter, salt and pepper, and boil gently for 15 minutes. Sprinkle in the tapioca and cook for about 10 minutes longer, or until the tapioca becomes transparent, then serve.

INGREDIENTS.—Cabbage,  $\frac{1}{2}$  pint of white sauce or melted butter sauce. To each  $\frac{1}{2}$  gallon of water allow 1 heaped tablespoonful of salt, a very small piece of soda.

METHOD.—Pick off all dead or faded outside leaves, cut off as much of the stalk as possible, and cut the cabbages across twice at the stalk end; if they should be very large quarter them. Wash them well in cold water, and drain. Throw them into plenty of fast-boiling water, to which have been added salt and soda in the above proportions. Stir them down once or twice in the water, and let them boil quickly for 8 minutes; have another saucepan with fast-boiling water prepared as above, and throw them into it, and let them boil for 15 minutes; cast away the water contained in the first saucepan, and fill it as before, remove the cabbages once again into this, and let them boil for 10 minutes if small, for 20 minutes if large. Take up into a colander, drain and press well, and season with pepper. Serve in a hot vegetable dish, cut into squares, and pour over the sauce.

TIME.—20 to 40 minutes, according to size and age. AVERAGE COST, from 1d. each. SEASONABLE all the year.

### CABINET PUDDING.

METHOD.—Butter a mould with plain straight sides, ornament the

## CABINET PUDDING, PLAIN.

bottom with strips of angelica and cherries cut in halves, and line the sides with narrow strips of sponge cake or Savoy biscuits. Break the trimmings of the cake or 3 or 4 biscuits into small pieces, put them, together with the ratafias, into the mould. Beat the eggs, add to them the sugar, flavouring, and milk, stir until the sugar is dissolved, then pour the custard slowly into the mould. Cover with a buttered paper, and steam gently for nearly 1 hour.

TIME.—About  $1\frac{1}{2}$  hours. AVERAGE COST, 10d. to 1s. SUFFICIENT for 5 or 6 persons.

## CABINET PUDDING, PLAIN.

INGREDIENTS.—5 or 6 thin slices of bread (*see Note*), 1 pint of milk, 2 eggs, 1 tablespoonful of sugar, 2 tablespoonfuls of raisins, a few drops of almond essence, or other flavouring.

METHOD.—Cut the raisins in halves and remove the stones. Cut the crusts off the bread, divide each slice into strips 1 inch wide, taper one end and trim to a uniform length. Have ready a well-buttered basin, decorate with raisins, and line with strips of bread. Beat the eggs, add to them the sugar, milk, and flavouring, and stir until the sugar is dissolved. Cut all the bread-trimmings into dice, put them into the prepared basin, pour on the custard, cover with a greased paper, and steam gently for 1 hour.

TIME.— $1\frac{1}{2}$  hours. AVERAGE COST, 7d., without the bread. SUFFICIENT for 4 or 5 persons.

*Note.*—In place of bread, savoy, finger biscuits, or stale cake may be advantageously used for this pudding.

## CAKE, PLAIN.

INGREDIENTS.—1 lb. of flour,  $1\frac{1}{2}$  teaspoonfuls of baking-powder,  $\frac{1}{4}$  lb. of good dripping, 1 tea-

## CAKE, PLAIN.

cupful of moist sugar, 3 eggs, 1 breakfast-cupful of milk,  $\frac{1}{4}$  oz. of caraway seeds,  $\frac{1}{4}$  lb. of candied peel cut fine.

METHOD.—Put the flour and baking-powder into a basin; stir these together, then rub in the dripping, add the sugar, caraway seeds, and peel; whisk the eggs with the milk, and beat all together very thoroughly until the ingredients are well mixed. Butter a tin, put in the cake mixture, and bake it from  $1\frac{1}{2}$  to 2 hours. Let the dripping be quite clean before using; to ensure this, it should be clarified. Beef dripping is better than any other for cakes, etc., as mutton-dripping frequently has a very unpleasant flavour, which would be imparted to the preparation. The eggs are not necessary.

TIME.— $1\frac{1}{2}$  to 2 hours. AVERAGE COST, 1s. SUFFICIENT for 1 cake.

## CAKE, PLAIN, FOR CHILDREN.

INGREDIENTS.—1 quartern of dough,  $\frac{1}{4}$  lb. of moist sugar,  $\frac{1}{4}$  lb. of butter or good beef-dripping,  $\frac{1}{4}$  pint of warm milk,  $\frac{1}{2}$  a teaspoonful of grated nutmeg, or  $\frac{1}{4}$  oz. of caraway seeds.

METHOD.—If bread is not made at home, procure the dough from the baker's, and as soon as it comes in, put it into a basin near the fire; cover the basin with a thick cloth, and let the dough remain a little while to rise. In the meantime, beat the butter to a cream, and make the milk warm; when the dough has risen, mix with it thoroughly all the above ingredients, and well rub the mixture to obtain a smooth soft paste. Butter some cake-tins, half fill them, and stand them in a warm place to allow the mixture to rise again. When the tins are 3 parts full, put the cakes into a good oven, and bake

## CAKE, PLUM.

them from  $1\frac{3}{4}$  to 2 hours. A few currants, or sultanas, can be substituted for the caraway seeds, when the flavour of the latter is disliked.

TIME.— $1\frac{3}{4}$  to 2 hours. AVERAGE COST, 11d. SUFFICIENT for 6 or 8 small cakes. SEASONABLE at any time.

## CAKE, PLUM.

INGREDIENTS.—1 lb. of flour,  $\frac{1}{4}$  lb. butter,  $\frac{1}{2}$  lb. of sugar,  $\frac{1}{2}$  lb. of currants,  $\frac{1}{4}$  lb. of sultanas, 4 ozs. of candied peel,  $\frac{1}{2}$  pint of milk,  $\frac{1}{2}$  a teaspoonful of carbonate of ammonia, a pinch of carbonate of soda.

METHOD.—Put the flour into a basin with the sugar, soda, currants, and sliced candied peel; beat the butter to a cream, and mix all these ingredients together with the milk. Stir the ammonia into 2 tablespoonfuls of milk; add it to the dough, and beat the whole well until everything is mixed. Put the batter into a buttered tin, and bake the cake from  $1\frac{1}{2}$  to 2 hours.

TIME.— $1\frac{1}{2}$  to 2 hours. AVERAGE COST, 1s. 3d. SUFFICIENT for 1 medium-sized cake.

## CAKE, PLUM, COMMON.

METHOD.—Rub the butter into the flour, add the sugar, currants or raisins, and allspice; warm the milk, and dissolve the yeast in it, mix the whole into a soft dough, knead it well, and put it into 6 buttered tins. Place them near the fire for 1 hour, or until they are light, then bake the cakes in a good oven from 1 to  $1\frac{1}{4}$  hours. To ascertain when they are done, plunge

a clean skewer in the middle, and if on withdrawal it comes out clean, the cakes are done.

TIME.—1 to  $1\frac{1}{4}$  hours. AVERAGE COST, 1s. 8d. SUFFICIENT to make 10 small cakes.

## CALCUTTA BECTIE, TO COOK (Indian Dish).

This fish may be cooked according to the numerous recipes for dressing cod, a fish it somewhat resembles.

## CALF'S BRAINS, FRIED.

Remove from the stewpan, strain, dry well, and cut the brains into rather thin slices. Add a little salt to the flour, mix smoothly with the salad-oil and water, whip the white of egg stiffly, and stir it lightly into the batter. Have ready a deep pan of hot frying-fat, dip each slice of brains into the batter, drop these into the hot fat, and fry them until lightly browned. Drain well, dish up, garnish with fried parsley, and serve hot.

TIME.—From 30 to 40 minutes. AVERAGE COST, 10d. to 1s. SUFFICIENT for 3 or 4 persons.

## CALF'S BRAINS, MILAN STYLE.

Break the macaroni into short lengths, put it into salted boiling water, and boil rapidly until tender, then drain well. Have the white sauce ready, add to it the macaroni and cream, and season to taste. Dish the slices of brains on a potato border, pile the macaroni in the centre, pour round a little of the hot tomato sauce, and serve the remainder in a tureen.

**METHOD.**—Wash the brains in salt and water, remove the skin and fibres, and drain well. Warm the stock in a stewpan, put in the brains, and simmer gently for about 10 minutes, then drain well. Fry the butter in an omelette-pan over a quick fire until it acquires a nut-brown colour, then add to it the parsley and vinegar; pour this over the brains and serve.

**TIME.**—From 20 to 25 minutes. **AVERAGE COST,** 1s. 6d. **SUFFICIENT** for 4 to 6 persons.

## CALF'S FEET, FRIED.

**METHOD.**—Prepare and cook the brains as directed in the preceding recipe, and cut them into small thick slices. Have the sauce ready in a stewpan, add the parsley, lemon-juice, and season to taste. Put in the slices of brain, and, when thoroughly hot, serve.

**TIME.**—About 30 minutes. **AVERAGE COST,** 1s. 6d. **SUFFICIENT** for 3 or 4 persons.

### CALF'S FEET FRICASSÉE.

oil, 2 tablespoonfuls of vinegar, 1 dessertspoonful of finely-chopped parsley, 1 teaspoonful of finely-chopped onion, salt and pepper, 1 egg, breadcrumbs, frying-fat, flour. Tomato sauce.

**METHOD.**—Wash and scald the calves' feet, bone the upper part, remove the shank-bone, split them in two, and soak them in cold water for 2 hours. Put them in a stewpan with some salt, cover with cold water, bring to the boil, and drain. Return to the stewpan with as much cold water as will cover the feet, add the peppercorns, onion, and carrot (sliced), and cook slowly until tender. Take away the rest of the bones, press the feet until cold, then slice them, set them in a deep dish, pour over the marinade, and let them remain in it for 1 hour, basting or turning occasionally in order that both sides may be equally flavoured. Season a heaped teaspoonful of flour with salt and pepper, drain the slices of meat well, dip each piece in the flour, brush over with beaten egg, toss in crumbs, and fry in hot fat until nicely browned. Serve with tomato sauce.

**TIME.**—From 3 to 3½ hours to boil the feet. **AVERAGE COST,** 1s. 6d. **SUFFICIENT** for 3 or 4 persons.

taste, and to each ½ pint allow 1 yolk of egg. Stir by the side of the fire until the broth thickens, but do not let it boil, or it may curdle. Free it from any particle of fat, and serve.

**TIME.**—6 or 7 hours. **AVERAGE COST,** 10d. to 1s. **SUFFICIENT** for 1½ pints of broth.

## CALF'S FOOT JELLY (See Aspic Jelly from Calves' Feet).

## CALF'S FOOT JELLY (Invalid Cookery).

**INGREDIENTS.**—2 calves' feet, 5 pints of water, ½ pint of sherry, ¼ pint of lemon-juice, 6 ozs. of loaf sugar, the rinds of 3 lemons, the whites and shells of 2 eggs, 1 inch of cinnamon, 4 cloves.

**METHOD.**—Wash and blanch the feet, and divide each one into 4 pieces. Replace them in the stewpan, add the water, and boil gently for 6 hours, skimming when necessary. Strain and measure the stock, and if there is more than 1 quart, boil until reduced to this quantity. When cold remove every particle of grease, turn the jellied stock into a stewpan, and add the lemon-rinds, pared off in the thinnest possible strips, the lemon-juice, sherry, sugar, the stiffly-whisked whites and crushed shells of the eggs, and the cinnamon and cloves. Whisk until boiling, then draw the stewpan to the side of the fire, and let the contents simmer for 10 minutes. Strain through a scalded jelly-bag, or scalded tea-cloth tied to the legs of a chair reversed, and turn into moulds rinsed with cold water. Turn out when firm, and serve.

**TIME.**—12 hours. **AVERAGE COST,** 3s. 6d.

## CALF'S FOOT, STEWED.

### CALF'S FOOT, STEWED (Invalid Cookery).

INGREDIENTS.—1 calf's foot, 1 oz. of butter, 1 oz. of flour,  $\frac{1}{2}$  gill of cream, 1 pint of water, 1 small onion sliced, 2 or 3 sprigs of parsley, 2 cloves, 1 small blade of mace, a little finely-chopped parsley.

METHOD.—Wash and blanch the foot, put it into the stewpan with the spices and vegetables, and stew gently for 3 hours, adding more water if much evaporation occurs. When done, remove the bones, cut the meat into neat pieces, and keep them hot in a little of the stock. Melt the butter in a stewpan, stir in the flour, strain in the stock, boil gently until the sauce becomes thick and smooth, then season carefully and stir in the cream. Arrange the calf's foot neatly on a hot dish, pour the sauce over, sprinkle with parsley, and serve.

TIME.— $3\frac{1}{2}$  hours. AVERAGE COST, 1s. 4d. to 1s. 7d.

### CALF'S HEAD.

INGREDIENTS.—1 tin of calf's head, frying-batter, tomato, piquant, or other suitable sauce, frying-fat.

METHOD.—Slice the head neatly, dip each slice into the prepared batter, and fry in hot fat until crisp and nicely browned. Serve the sauce separately.

TIME.—About  $\frac{1}{2}$  an hour, after the batter is made. AVERAGE COST, 1s. 4d., exclusive of the sauce. SUFFICIENT for 5 or 6 persons.

### CALF'S HEAD, BOILED.

INGREDIENTS.—A calf's head. For the stock: 1 or 2 onions, 1 or 2 carrots, 1 small turnip, 2 strips of celery, a bouquet-garni (parsley, thyme, bay-leaf), 12 peppercorns, salt. For the sauce:  $1\frac{1}{2}$  ozs. of butter,  $1\frac{1}{2}$  ozs. of flour,  $\frac{1}{2}$  pint of stock,  $\frac{1}{2}$  pint of milk, lemon-juice, 1 dessertspoonful of finely-chopped

parsley, 1 egg, browned bread-crumbs.

METHOD.—Prepare and blanch the head in the usual manner, return it to the saucepan, cover with cold water, bring to the boil, skim well, then add the prepared vegetables, herbs, peppercorns, salt to taste, and simmer from 2 to  $2\frac{1}{2}$  hours, according to size. Boil the tongue at the same time. Wash the brains in several waters, let them remain in salt and water until wanted, then tie loosely in a piece of muslin, boil with the head for about  $\frac{1}{2}$  an hour, and when cool, chop coarsely and use for the sauce. The head may be served plainly-boiled, but it presents a better appearance when it has been coated with egg and brown bread-crumbs, and baked for 20 minutes in the oven, being frequently basted during the time. It is more easily carved, and the various parts are more evenly distributed when the bones are removed, and the head rolled, before baking; it must be bound with strong tape, and the bare parts under the tape sprinkled with breadcrumbs before serving. About  $\frac{1}{2}$  an hour before the head is ready to serve, melt the butter in a stewpan, add the flour and cook for 5 minutes, then pour in the milk and  $\frac{1}{2}$  pint of liquor from the pot in which the head is cooking. Stir until it boils, simmer for 10 minutes, add the prepared brains, parsley, lemon-juice, and seasoning to taste. Remove the skin from the tongue, and cut it into thin slices. Place the head on a hot dish (if not egged and breadcrumbed brush over with glaze), garnish with slices of tongue and lemon, and serve the sauce in a tureen. A piece of boiled ham or bacon is occasionally served as an accompaniment to this dish.

TIME.—To cook, about 4 hours. AVERAGE COST, 5s. 6d. to 8s.

## CALF'S HEAD, COLLARED.

### CALF'S HEAD, COLLARED (Cold).

INGREDIENTS.—A calf's head, 1 lb. of lean uncooked ham, 2 hard-boiled eggs, 2 tablespoonfuls of finely-chopped parsley, ground mace, nutmeg, salt and pepper. For the stock: 1 or 2 onions, 1 carrot,  $\frac{1}{2}$  a turnip, 1 strip of celery, a bouquet-garni (parsley, thyme, bay-leaf), 12 peppercorns.

METHOD.—Cut the head in half, take out the brains, dress and serve them with the tongue as a separate dish. Wash the head in several waters, and afterwards let it soak for 12 hours in salted water, which should be changed several times. Put it into a saucepan with a handful of salt, cover with cold water, bring to the boil, then drain, and wash well in cold water. Return to the saucepan, cover with cold water, boil, skim well, then add the prepared vegetables, bouquet-garni, peppercorns, salt to taste, and cook gently for  $1\frac{1}{2}$  to 2 hours, or until the bones can be easily removed. When the head is boned, spread it out on the table, season well with salt and pepper, sprinkle on it a little mace and nutmeg, distribute the narrow strips of ham and slices of boiled egg evenly over the surface, add the parsley and a little more flavouring and seasoning, then roll up tightly, and wrap and tie securely in a pudding-cloth. Have the stock boiling in the saucepan, put in the head, and cook gently for 2 hours. When cool, tighten the cloth, and press between 2 dishes or boards until cold.

TIME.—To cook, about 4 hours. AVERAGE COST, from 7s. to 9s. 6d.

### CALF'S HEAD FRICASSÉE.

INGREDIENTS.— $\frac{1}{2}$  a calf's head, 1 pint of the liquor in which the head was boiled,  $1\frac{1}{2}$  ozs. of butter,

$1\frac{1}{2}$  ozs. of flour, 2 tablespoonfuls of cream, the yolks of 2 eggs, the juice of 1 lemon, a good pinch of mace, salt and pepper, rolls of fried bacon, forcemeat balls.

METHOD.—Prepare and boil the calf's head as directed in the recipe for "Calf's Head Collared" (the remains of a calf's head may be used), remove the bones, and cut the meat into pieces  $1\frac{1}{2}$  inches square. Melt the butter in a stewpan, fry the flour for a few minutes without browning, then add the stock, stir until it boils, and simmer gently for 10 minutes. Add the mace, seasoning to taste, put in the pieces of meat, cover closely, and draw the stewpan to the side of the stove for about 20 minutes. Shape the forcemeat into small balls, and either fry or bake them until nicely browned. Place the rolls of bacon on a skewer and fry or bake them until crisp. Remove the pieces of meat from the sauce, and arrange them on a hot dish in a pile. Have ready the cream and yolks of eggs mixed lightly together, add these to the sauce, and stir by the side of the fire until they thicken, but the sauce must on no account be allowed to boil. Add the lemon-juice, season to taste, and strain over the meat. Garnish with the forcemeat balls and rolls of bacon, and serve.

TIME.—After the calf's head is boiled, nearly 1 hour. AVERAGE COST, 4s. to 5s. SUFFICIENT for 6 or 7 persons.

### CALF'S HEAD, FRIED.

INGREDIENTS.—The remains of a cooked calf's head. For the marinade: 2 tablespoonfuls of salad-oil or melted butter, 1 tablespoonful of lemon-juice or vinegar, 1 teaspoonful of finely-chopped shallot or onion, 1 teaspoonful of finely-

chopped parsley,  $\frac{1}{2}$  a teaspoonful of mixed herbs, salt and pepper. For the batter: 4 ozs. of flour, 2 tablespoonfuls of salad-oil,  $\frac{1}{4}$  pint of tepid water, the whites of 2 eggs, salt. Frying-fat.

METHOD.—Cut the meat into strips about  $2\frac{1}{2}$  inches long and 1 inch wide, place them in a deep dish, pour over the marinade, and allow the strips to remain in it for at least 1 hour. Mix the flour, salt, salad-oil, and water smoothly together, whisk the white of egg stiffly, and stir it lightly into the batter. Drain the pieces of meat well, dip them into the batter, and fry in hot fat until nicely browned. Pile on a hot dish, and garnish with fried parsley. ## CANNELL PUDDING.

INGREDIENTS.—4 ozs. of ground almonds, 4 ozs. of castor sugar, 3 ozs. of crumbled Savoy biscuits or Madeira cake,  $1\frac{1}{2}$  ozs. of butter, 1 oz. of flour, 4 eggs,  $\frac{1}{2}$  pint of milk, a good pinch of grated nutmeg, 1 inch of cinnamon.

**AVERAGE COST.**—2*d.* or 3*d.*

**CAPONS AND POULARDES, TO DRESS.**

The male fowl, the capon, and the female bird, the poularde, are both, by treatment while young, made incapable of generating, with the result that their size is increased, and they become fatter than ordinary fowls. The flavour of the poularde is considered more delicate than that of the capon, but the latter is the larger bird. They may be boiled, braised, roasted, or otherwise dressed, according to the directions given for cooking chickens and fowls. Care, of course, must be taken that the methods, accessories, and garnishes used are equal to the birds in point of excellence.

**CARMEL CREAM.**

Add the lemon-rind and castor sugar to the boiling milk, sprinkle in the ground rice, and boil gently for 10 minutes. When ready, remove the lemon-rind, pour the mixture into the prepared mould, and let it remain in a cold place until set.

**TIME.**—From 35 to 45 minutes.

**METHOD.**—Prepare the custard according to the recipe. Put the sugar into a small stewpan with a few drops of water, and boil until it acquires a deep golden-brown colour. Now add the cream, and when boiling stir into the custard. Let the mixture cool, add the Benedictine, and freeze.

**TIME.**—From 35 to 40 minutes.  
**AVERAGE COST,** 2s. **SUFFICIENT** for 7 or 8 persons.

**CARMEL FOR COLOURING SAUCES.**

**METHOD.**—Put the sugar and a good tablespoonful of water into an untinned stewpan, and stir over the fire until it becomes dark brown. Boil it, add the rest of the water to the sugar, stir until it boils, simmer until the caramel acquires the consistency of syrup, and, when cold, bottle for use. It may be used for sweet or savoury sauces.

**TIME.**—About 40 minutes.

Beat the eggs, add to them the sugar, flavouring and milk, and stir until the sugar is dissolved. Strain the custard into the mould, cover with a greased

paper, steam very slowly for about 40 minutes, then turn out carefully. No other sauce is needed than the caramel, which runs off when the pudding is inverted. This pudding is equally nice cold; when intended to be served thus, it may be allowed to cool before being turned out of the mould, and so lessen the probability of its breaking. If preferred, 6 dariole moulds may be used instead of 1 large mould.

TIME.—About  $1\frac{1}{4}$  hours. AVERAGE COST, 7d. or 8d. SUFFICIENT for 4 or 5 persons.

## CARAMEL RICE PUDDING.

METHOD.—Prepare the caramel, and line the mould as directed in the preceding recipe. Simmer the rice in the milk until tender, cool slightly, then stir in the well-beaten eggs, sugar, and a few drops of vanilla essence. Turn into the prepared mould, cover with buttered paper, and steam for nearly 1 hour. Serve either hot or cold. If preferred, the rice may be steamed in dariole moulds.

TIME.—About 2 hours. AVERAGE COST, 7d. or 8d. SUFFICIENT for 5 or 6 persons.

METHOD.—Dissolve the sugar in the milk, add the cream and bring slowly to boiling point. Dissolve the chocolate in the smallest possible quantity of hot water, stir into the syrup, and boil very gently until a little, dropped into cold water, at once hardens and snaps easily. Pour it on to an oiled slab into a square formed by bars, or, failing these, into an oiled tin. When cold, cut into squares with a caramel cutter, or a buttered knife, and wrap each piece in wax paper.

## CARAMELS, CREAMS (Sweetmeat).

Take out the fish and keep it hot. Have ready the flour and the remainder of the butter kneaded to a smooth paste, add it to the contents of the stewpan, and simmer and stir until the sauce is cooked smoothly. Place the fish on a hot dish, strain the sauce over, and garnish with the mushrooms (heated in sauce), fried roe, and sippets of toast.

METHOD.—Wash and scrape the carrots, cut each one into 3 or 4 pieces, place them in a preserving-pan with barely sufficient water to cover them, and simmer gently till tender. Drain well, pass through a fine sieve, weigh the pulp, and replace it in the preserving-pan with an equal weight of sugar. Bring slowly to boiling point, boil for 5 minutes, stirring and skimming frequently. When cool, add the almonds, brandy, lemon-juice and rind, turn into small pots, cover closely, and store in a cool, dry place. If the brandy be omitted the jam will not keep.

METHOD.—Use only the outer red part of the carrots. Cut all the vegetables into small pieces, and cook them for 10 or 15 minutes in hot butter without browning. Add the stock and simmer until the vegetables are tender (about 40 minutes), then rub them through a fine sieve. Return to the stewpan, add the milk, salt, pepper, and a little nutmeg, and bring to the boil. Mix the cornflour with a small quantity of stock or milk, pour it into the soup and stir for a few minutes, then add a good pinch of sugar, the cream, and the rice (which should be nicely cooked, and dry), and serve.

TIME.—1¼ to 1½ hours. AVERAGE COST, about 9*d.* or 10*d.* without the stock. SEASONABLE at any time. SUFFICIENT for 6 persons.

## CARROTS AND TURNIPS.

The manifold purposes for which both these vegetables are employed are too well known to need comment. In adding them to a soup, sauce, or ragoût, the rule of using

## CARROTS, STEWED.

less turnip than carrot should always be observed. Both should be used sparingly, otherwise their flavour overpowers that of the materials with which they are cooked.

## CARROTS, BOILED.

INGREDIENTS.—To each ½ gallon of water allow 1 heaped tablespoonful of salt, carrots.

METHOD.—Cut off the green tops, wash and scrape the carrots, and remove any black specks. If the carrots are very large cut them in halves, divide them lengthwise into 4 pieces, and put them into boiling water, salted in the above proportion; let them boil until tender, which may be ascertained by piercing the carrots with a skewer or fork, then drain well. Young carrots should be boiled whole.

### CAULIFLOWER, BOILED, WITH WHITE SAUCE.

INGREDIENTS.—2 cauliflowers (to each gallon of water allow 1 heaped tablespoonful of salt), white sauce.

METHOD.—Choose cauliflowers that are close and white, trim off the decayed outside leaves, and cut the stalk off flat at the bottom. Open the flower a little in places to remove the insects, which generally are found about the stalk, and let the cauliflowers lie in salt and water for an hour previous to dressing them, with their heads downwards; this will effectually draw out all insects. Put them into fast-boiling water, with the addition of salt in the above proportion, and let them boil gently, keeping the saucepan uncovered. The water should be well skimmed. When the cauliflowers are tender, take them up with a slice, let them drain, and lay them carefully in the dish. Serve with white sauce or else plain melted butter, a little of which may be poured over the cauliflower.

TIME.—Small cauliflower, 12 to 15 minutes; a large one, 20 to 25 minutes, after the water boils. AVERAGE COST, from 3*d.* to 4*d.* each. SEASONABLE from June to November.

METHOD.—Trim and cleanse the cauliflowers in the usual way, and half boil them in salt and water. Melt the butter in a little hot water, stir in the flour, oil, and salt, making a batter which will run from the spoon; mix lightly with it the whites of 2 eggs well beaten up. Drain the cauliflowers thoroughly, divide them into branches, and shake the branches well in the vinegar, seasoned with salt and pepper; then dip them in the batter, and fry in deep fat, taking care that they do not stick to each other. Serve in pyramidal shape, and garnish with some sprigs of parsley.

*riz*, or ground rice, with a little cold milk, boil up the remainder of the milk with the stock, stir in the ground rice, and cook for a few minutes, stirring all the while; add the cauliflower water, season with salt, pepper, and grated nutmeg to taste, bring it to the boil, put in the cream and stir a little longer, but do not let it boil again. The purée is now ready for serving.

TIME.—1 hour. AVERAGE COST, 2s. SEASONABLE at any time. SUFFICIENT for 6 persons.

**CAVIARE SANDWICHES**

INGREDIENTS.—Astrakhan caviere creamed butter, lemon-juice, cayenne pepper.

METHOD.—Prepare some thin slices of bread, spread them lightly with caviare, sprinkle with lemon-juice and a little cayenne. Have ready an equal number of slices of bread and creamed butter, cover, press lightly together, trim, and cut into square, triangular, or finger-shaped pieces. These sandwiches may be varied by using lobster, prawn, or shrimp butter, any of which flavours combine agreeably with that of caviare.

**CAYENNE** is a powder prepared from several varieties of the *Capsicum*, annual East India plants, of which there are three so far naturalized in this country as to be able to grow in the open air; these are extremely pungent to the taste, and in the green state are used as a pickle. When ripe, they are ground into cayenne pepper, and sold as a condiment. The best cayenne, however, is made in the West Indies from the *Bird* pepper, so named because of the partiality of hens and turkeys to the berry. It is imported ready for use. Of the *Capsicum* species of plants there are five; but the principal

## CAYENNE VINEGAR.

are: (1) *Capsicum annum*, the common long-podded *Capsicum*, cultivated in our gardens, of which there are two varieties, one with red, and another with yellow fruit. (2) *Capsicum baccatum*, or *Bird pepper*, which rises with a shrubby stalk 4 or 5 feet high, with its berries growing at the division of the branches; this is small, oval-shaped, and of a bright red colour, from which, as already stated, the best cayenne is made. (3) *Capsicum grossum*, the bell-pepper; the fruit of this is red, and is the only kind fit for pickling.

## CAYENNE VINEGAR.

INGREDIENTS.—1 pint of vinegar,  $\frac{1}{2}$  oz. of cayenne pepper.

METHOD.—Mix the vinegar and cayenne together in a bottle, let it stand for 1 month, shaking the preparation daily. When ready, strain into well-corked bottles, and store for use.

TIME.—1 month. AVERAGE Cost, about 6d.

## CELERY.

METHOD.—This vegetable is generally eaten raw, and is served with cheese. Let the roots be washed free from dirt, all the decayed and outside leaves being cut off, preserve as much of the stalk as possible, and carefully remove all specks and blemishes. Should the celery be large, divide it lengthwise into quarters, and place it root downwards in a celery-glass, which should be rather more than half filled with water. The top leaves may be curled by shredding them in narrow strips with the point of a knife to a depth of about 2 inches from the top.

AVERAGE COST.—From 2d. per head. SEASONABLE from September to February.

Cover the pan, and put it in a hot oven to cook its contents for about 30 minutes. METHOD.—Trim the celery, pare off the green parts and wash thoroughly, cut it into small pieces, and blanch in slightly salted water. Drain well, and return to the stewpan with 3 ozs. of butter. stock or salted water. Drain the pieces on a sieve. When cold toss it in the thick Béchamel sauce, previously mixed with Mulligatawny or curry-paste: the pieces must be thoroughly coated with sauce. Dip each piece in batter; drop into boiling fat, fry a golden colour, and drain on a cloth or paper. Sprinkle with fine salt mixed with a little curry-powder (just enough to colour it), dish up on a folded napkin, and send to table immediately.

Meanwhile, melt the butter in another stewpan, stir in the flour, and cook for a few minutes without browning. Take up the celery and keep it hot; strain the milk on to the roux or mixture of flour and butter, and stir until boiling. Rub the onion that was cooked with the celery through a hair sieve, add it with the cream and lemon-juice to the sauce, season to taste, and simmer for about 5 minutes. Arrange the celery neatly on a hot

dish, pour the sauce over, and serve hot.

**TIME.**—About 1 hour. **AVERAGE COST,** 1s. 3d. **SEASONABLE** from September to February.

## CELERY WITH WHITE SAUCE.

**INGREDIENTS.**—2 or 3 heads of celery, ½ pint of white sauce, salt, toast.

**METHOD.**—Wash the celery, remove the outer stalks and the greater part of the root, trim away the green tops, and cut each head lengthwise into four. Have ready a saucepan of slightly-salted boiling water, put in the celery, and cook from 30 to 35 minutes, or until the root may be easily pierced with a skewer. Drain well, dish on the toast, pour over the sauce, and serve.

**TIME.**—From 30 to 35 minutes. **AVERAGE COST,** from 2d. per head. **SEASONABLE** from September to February.

## CHAMPAGNE CUP.

**INGREDIENTS.**—1 bottle of champagne, 1 liqueur glass of brandy, 2 bottles of seltzer or soda water, ½ a teaspoonful of Maraschino, a few fine strips of lemon peel.

**METHOD.**—When the time permits it is much better to ice the liquor which forms the basis of a "cooling cup" than to reduce the temperature by adding crushed ice. Place the champagne and seltzer water in a deep vessel, surround them with ice, cover them with a wet woollen cloth, and let them remain for 1 hour. When ready to serve, put the strips of lemon-rind into a large glass jug, add the Maraschino and liqueur brandy, pour in the soda water and serve at once. If liked, a teaspoonful of castor sugar may be added, but it should be stirred in gradually, otherwise the wine may overflow.

## CHEESE BISCUITS.

### CHEESE.

When a whole cheese is bought, and it is necessary to preserve some portion of it for a considerable time, it will be found a good plan to keep the cut surfaces of the cheese covered with well-buttered paper. The rind of the cheese should be left exposed to the air, and it should be turned frequently and its surface well rubbed first with a dry cloth and afterwards with melted fat or oil. To keep moist, a piece of cheese that is in daily use, when it comes from the table wrap it at once in a damp cloth, preferably damped with beer, and keep it in a nearly air-tight tin or other receptacle.

### CHEESE BALLS.

INGREDIENTS.—2 ozs. of grated Cheshire or Cheddar cheese, 1 oz. of flour, 1 egg, salt, pepper, cayenne, frying-fat.

METHOD.—Mix the cheese, flour, and yolk of egg together, add salt, pepper, and cayenne to taste, then whip the white of the egg to a stiff froth and stir it lightly into the rest of the ingredients. Have ready a deep pan of hot fat, drop in the mixture in teaspoonfuls and fry until nicely browned. Drain well, and dish in a pyramidal form on a folded serviette or dish paper.

PROBABLE COST, 3d. or 4d. SUFFICIENT for 6 or 7 persons. SEASONABLE at any time.

### CHEESE BISCUITS.

METHOD.—Simmer the ground rice in the milk for  $\frac{1}{2}$  an hour, then stir in the butter, sugar, lemon-rind, the well-beaten eggs, a good pinch of salt, and stir and cook by the side of the fire until the mixture thickens. Now let it cool slightly, and meanwhile line the patty-pans with paste, and unless the oven has a good bottom heat, half bake them before putting in the mixture (*see* Cherry Tartlets). When ready, fill them with the cheesecake preparation, sprinkle a few currants on the top of each cake, and bake from 25 to 30 minutes in a brisk oven.

TIME.—From  $1\frac{1}{4}$  to  $1\frac{1}{2}$  hours.

METHOD.—Trim 8 or 9  $\frac{1}{2}$ -inch slices of cheese into pieces 2 inches long and 1 inch wide, pour over them a little clarified butter, sprinkle well with Krona pepper, and let them remain  $\frac{1}{2}$  an hour, during which time they must be turned once and seasoned as before. Prepare the batter as directed, season with cayenne pepper, dip in the pieces of cheese, and fry them in deep fat, but not too thickly, as the cheese should be well cooked. Serve quickly.

TIME.—1 hour. AVERAGE COST, 1s. SUFFICIENT for 6 or 7 persons. SEASONABLE at any time.

### CHEESE, METHODS OF SERVING.

There are several methods of serving cheese. In large establishments, where 3 or 4 kinds are in daily use, it is a convenient plan to hand the butter and biscuits in a dual dish, and ask what cheese will be eaten with them. Each piece of cheese should, of course, be arranged on a folded napkin, raised at the sides to conceal some of the lower portion of the cheese. When only one kind of cheese is in use, and the number to be served is considerable, the easiest and most economical method is to use dishes with three divisions, and fill one of them with small, square pieces of cheese, and the other two respectively with butter and biscuits. In small households, it is more economical to place the cheese on the table in the piece, and cut off from it what is required.

Have the butter ready, heated and well skimmed, in an omelette-pan, pour in the egg-mixture, and stir over the fire until the eggs begin to set. Now fold one half over the other, making it crescent-shaped, or fold the sides towards the middle in the form of a cushion. Roll out the paste, cover the piedish with it, ornament, and brush over with yolk of egg. Bake from  $1\frac{1}{4}$  to  $1\frac{1}{2}$  hours, in a quick oven, until the paste has risen and set, and then more slowly. Before serving add the remainder of the hot stock to the pie. and pepper, and cook the ingredients gently by the side of the fire. Melt the remaining 2 ozs. of butter, fry the pieces of chicken slowly until nicely browned, keep them hot until the rice has absorbed the greater part of the stock, then put them with the curry-paste into the stewpan and mix well with the rice. Continue the cooking until the rice and chicken are perfectly tender, adding more stock if necessary. A few minutes before serving re-heat the butter in which the chicken was fried, cut the 2 small onions into thin slices, and fry them brown. Pile the pillau in the centre of a hot dish, scatter on the rings of fried onion, and serve.

Pound the chicken and ham until smooth, moistening gradually with a little stock, and pass these ingredients through a wire sieve. Stir in the cream, season to taste, make thoroughly hot, stirring meanwhile, and add stock, a little at a time, until the preparation is reduced to the consistency of thick cream. Turn into 5 or 6 well-buttered scallop shells, arrange the rice to form a narrow border, sprinkle the surface with truffle, and serve.

TIME.—Altogether, about 1½ hours. AVERAGE COST, 1s. 3d. to 1s. 6d. SUFFICIENT for 4 or 5 persons. SEASONABLE at any time.

Shred or mince the chicken-meat finely, or pass it through a mincing machine, pound well in the mortar, adding the panada by degrees and each egg separately, season well, and rub through a fine wire or hair sieve. Whip the cream slightly, and stir it lightly into the chicken purée. Poach a little of the preparation, and, if too stiff, add a little more stock or cream. butter, 2 mushrooms, 1 truffle, salt and pepper.

**METHOD.**—Shred the chicken-meat finely, or pass it through a mincing machine, then pound it well in the mortar, adding by degrees the yolks of 4 eggs, season well, and rub through a fine wire sieve. Whip the cream slightly, and whisk the whites of eggs to a stiff froth, and then add with the mushrooms and truffle cut into small dice, to the chicken purée. Mix lightly together, and put the mixture into 8 well-buttered china or paper ramakin cases. The cases should not be more than three parts filled, as the mixture rises considerably in baking. Place the cases on a baking-sheet, and cook them in a moderate oven for about 20 minutes. Serve in the cases, and, if liked, send hot Béchamel or other suitable sauce to table in a sauce-boat.

**TIME.**—To bake, from 18 to 20 minutes. **AVERAGE COST,** 2s. 6d. **SUFFICIENT** for 8 cases.

the paste as thinly as possible—stamp it out into rounds of about 2 inches diameter, pile a teaspoonful of the preparation in the centre, wet the edges with water, place another round of paste on the top, and press the edges together neatly. Brush over with egg and cover with breadcrumbs, and fry until lightly browned in hot fat. If preferred, half the quantity of the meat mixture may be enclosed in 1 round of paste, one half of which must be folded over to form them into half-moon shapes; variety may be introduced by substituting crushed vermicelli for the breadcrumbs.

**TIME.**—Altogether,  $1\frac{1}{2}$  hours. **AVERAGE COST,** 1s. to 1s. 3d. **SUFFICIENT** for 8 to 12 rissoles, according to the size made.

**METHOD.**—Truss the chicken for roasting, prick the entire surface of the breast with the point of a metal skewer or trussing needle, skewer over it the slices of bacon, baste well with hot fat, and roast before a clear fire or in a moderate oven for about 1 hour. Baste frequently, and a few minutes before serving remove the bacon for the breast to brown. Meanwhile, simmer the neck (and the liver and gizzard when not trussed in the wings) in the stock. When the chicken is sufficiently cooked remove it to a dish, drain off every particle of fat, taking care not to disturb the sediment, pour in the stock, boil for 2 or 3 minutes, season and colour to taste, and strain into a sauce-boat. Have ready the watercress well washed, drained, and season lightly with

METHOD.—Draw the chicken, wash the liver and heart, and put them aside; cut off the legs just below the first joint, truss for roasting, and spread the butter thickly over the breast. Slice the vegetables, put them into a baking-tin with the bacon, and the liver and heart of the chicken, fry these a little, then place the chicken on the top of the mirepoix, season well with salt and pepper, and cook in a quick oven for about 40 minutes. Baste frequently, and, if necessary, cover the breast with buttered paper to prevent it becoming too brown. When the chicken is done, remove the trussing string and skewers and keep hot. Drain the fat from the baking-tin, add the stock, boil for 2 or 3 minutes, season it to taste, and strain. Garnish the chicken with tufts of crisp watercress, and serve the gravy and bread sauce separately.

## CLEAR TURTLE SOUP.

### CLEAR TURTLE SOUP.

INGREDIENTS.— $\frac{1}{2}$  lb. of the best sun-dried turtle, 1 small tin of turtle fat (this may be omitted),  $\frac{1}{2}$  lb. of lean neck of beef,  $\frac{1}{2}$  lb. of lean veal, the whites and shells of 2 eggs, 5 quarts of good stock, 2 onions, 2 carrots, 1 turnip, 1 strip of celery, bouquet-garni (parsley, thyme, bay-leaf, basil, marjoram), 12 peppercorns, 2 cloves, 1 blade of mace (tied in muslin), 2 glasses of sherry, 1 tablespoonful of lemon-juice, salt.

METHOD.—Soak the turtle for 3 days, changing the water frequently. Put the stock, turtle, and a dessertspoonful of salt into a large stewpan and bring to the boil, then add the prepared vegetables, herbs, bag of peppercorns, etc., and when the stock boils remove the scum as it rises. Put on the cover and cook gently for 8 or 9 hours, adding more stock if that in the pan reduces very much. Strain, put the pieces of turtle aside, and remove the fat from the soup when cold. Pass the beef and veal 2 or 3 times through the mincing machine, and add them, together with the shells and stiffly-whipped whites of the eggs, to the soup, and whisk until it boils. Simmer gently for  $\frac{1}{2}$  an hour, then strain and return to the stewpan with the turtle and turtle fat cut into small squares, adding sherry, lemon-juice, and the necessary seasoning, and cook gently for a few minutes. Lemons cut in quarters are sometimes handed separately with this soup for those who prefer a stronger flavour of lemon.

TIME.—To make the stock, 9 to 10 hours. To clarify and re-heat,  $1\frac{1}{4}$  to  $1\frac{1}{2}$  hours. AVERAGE COST, 8s. 6d. without stock. SEASONABLE at any time. SUFFICIENT for 10 persons.

## CLOVES.

### CLOVES.

This very agreeable spice is the dried flowerbuds of the *Caryophyllus aromaticus*, a handsome branching tree, a native of the Malacca Islands. The Ambroyna, or royal clove, is said to be the best, and is rare; but other kinds, nearly equally good, are produced in other parts of the world. The clove contains about 20 per cent. of volatile aromatic oil, to which is attributed its peculiar pungent flavour, its other parts being composed of woody fibre, water, gum, and resin.

### COATING WITH EGG AND BREADCRUMBS.

For this purpose an egg, slightly beaten, and without seasoning or flavouring of any description, is frequently used; but better results may be obtained by adding to the egg 1 teaspoonful of salad-oil or clarified butter, 1 dessertspoonful of milk,  $\frac{1}{2}$  a saltspoonful of salt, and half this quantity of pepper. These ingredients being mixed together on a plate, the articles to be fried should be laid separately in the preparation, and coated thickly by means of a small brush. After being well drained on the point of a knife, they should be tossed lightly in plenty of bread-crumbs held in a sheet of paper. Before frying, the crumbs should be pressed firmly on with the blade of a knife.

### COBURG PUDDINGS.

INGREDIENTS.— $\frac{1}{2}$  pint of milk, 3 ozs. of flour, 3 ozs. of castor sugar, 3 ozs. of butter, 3 ozs. of currants cleaned and picked, 3 eggs, 1 tablespoonful of brandy, a good pinch of nutmeg, a good pinch of salt,  $\frac{1}{2}$  a teaspoonful of baking-powder.

## COCK-A-LEEKIE SOUP.

METHOD.—Cream the butter and sugar together, add the eggs gradually, and beat in well each one. Mix in the rest of the ingredients, pour into well-buttered dariole moulds or small cups, and bake for about  $\frac{1}{2}$  an hour. Serve with wine sauce.

METHOD.—Slice the sponge cakes, spread  $\frac{1}{2}$  of them with jam, and cover with the remainder. Arrange them compactly in a glass dish, pour the wine over them, place the macaroons on the top in the form of a pyramid, and cover with the custard. Whip the cream stiffly, pile it on lightly, and garnish with strips of angelica and cherries and the shredded almonds. This dish should be made at least 1 hour before serving.

TIME.—About  $\frac{1}{2}$  an hour, after the custard is made. AVERAGE COST, 3s. SUFFICIENT for 1 large dish.

the cloves. When the fowl is tender take it out. Wash the leeks, trim off the roots and outside leaves, and cut into 1-inch lengths. Strain the broth (which should measure about 3 pints) into another stewpan, add the leeks and the rice, previously washed and blanched. Boil for about  $\frac{1}{2}$  an hour, season to taste, cut the fowl in half, divide one half into very small pieces and put these with the soup. Use the remainder for some other purpose. Before serving, add a teaspoonful of chopped parsley to the soup. If preferred, the fowl need not be served in the soup, but it is essential that this soup should be made from chicken stock.

TIME.—About  $1\frac{1}{2}$  hours. AVERAGE COST, 2s. 10d. SUFFICIENT for 6 persons.

## COCKLE SAUCE.

INGREDIENTS.— $\frac{1}{4}$  pint of cooked cockles, 1 pint of melted butter, 1 teaspoonful of lemon-juice, salt and pepper.

METHOD.—Prepare and cook the cockles in the usual way, and remove them from the shells. Have the melted butter ready boiling, add the cockles and lemon-juice, season to taste, and serve as an accompaniment to cod or other fish.

TIME.—From 20 to 30 minutes. AVERAGE COST, 5d.

## COCOA HUSKS.

METHOD.—Simmer the husks very gently in the water for about 3 hours, then strain. When cold, skim off any fat there may be and re-heat when required.

## COCOANUT BISCUITS.

### COCOA, TO PREPARE.

INGREDIENTS.—To  $1\frac{1}{2}$  teaspoonfuls of prepared cocoa, allow  $\frac{1}{4}$  pint of milk,  $\frac{1}{4}$  pint of water.

Let it cool a little, then pour  $\frac{1}{2}$  into the prepared tin, and stand the vessel containing the remainder in hot water, to prevent it setting. As soon as the portion in the tin is set, add a few drops of carmine or cochineal to the preparation in the stewpan, and pour it over the ice in the tin. When cold turn out and cut into bars.

### COCOANUT BISCUITS OR CAKES.

METHOD.—Sieve the baking-powder well with the flour on to a sheet of paper laid on the table. Weigh and add the cocoanut. Put the butter and sugar into a clean basin, warm slightly, and beat up well with a large wooden spoon; beat in the eggs, 1 at a time, and when all are in add the flavouring, flour, and cocoanut; bring to cake batter consistency with milk, divide the mixture into 2 or more well-papered and greased tins as preferred, sprinkle some cocoanut over the top, and bake in a moderately warm oven.

TIME.—30 minutes.

## COCOANUT PUDDING.

### COCOANUT CANDY.

INGREDIENTS.—1 $\frac{1}{2}$  lbs. of Demarara sugar,  $\frac{3}{4}$  pint of water, 1 medium-sized cocoanut.

METHOD.—Remove the shell and rind from the cocoanut, and slice it thinly. Dissolve the sugar in the water, boil to the "large ball" degree (*see* Sugar to Boil), then remove the pan from the fire, and grain the syrup by rubbing it with the spatula against the sides of the stewpan. As soon as the mixture begins to grow cloudy add the sliced cocoanut, stir until quite thick, then pour on to an oiled tin. When sufficiently firm, mark into squares or oblongs, and when perfectly cold and firm divide into sections. White candy may be made by substituting white sugar for the Demarara.

### COCOANUT COOKIES (American Dish).

METHOD.—Simmer the cocoanut in the milk until tender, and allow it to become quite cold. Cream the butter and sugar together until quite smooth, stir in the yolks of eggs separately, add the cake-crumbs, cream, vanilla, and the prepared cocoanut and milk. Whisk the whites of eggs to a stiff froth, stir them lightly into the rest of the ingredients, and pour the mixture into a piedish, the edges of which must be previously lined and decorated with paste (see Apple Amber). Bake in a moderate oven until the mixture is set, then pile on the remaining two whites of eggs, previously stiffly whisked, replace in the oven until the meringue hardens and acquires a little colour, then serve.

## COD, CURRIED.

of rice flour, 2 tablespoonfuls of cream, mace, salt and pepper.

METHOD.—When desiccated cocoanut is used it should be previously soaked for 2 or 3 hours in a little of the stock. Boil the stock, add a small blade of mace and the cocoanut, and simmer gently for 1 hour. Mix the rice flour smoothly with a little stock, boil the remainder, add the blended rice flour, and stir and boil gently for about 10 minutes. Season to taste, stir in the cream, and serve.

TIME.—About 1 $\frac{1}{4}$  hours. AVERAGE COST, 9d., exclusive of the stock. SUFFICIENT for 6 persons. SEASONABLE at any time.

## COD.

Cod may be boiled whole, but a large head and shoulders are quite sufficient for a dish, and contain all that is usually served, because, when the thick part is done, the tail is insipid and overdone. The latter, however, cut in slices makes a very good dish for frying, or it may be salted and served with egg sauce and parsnips. Cod, when boiled quite fresh, is watery; salted a little, it is rendered firmer. The liver is considered a delicacy, and a piece should, if possible, be bought and cooked with the fish.

## COD, CURRIED.

INGREDIENTS.—2 lbs. of cod, 1 pint of white stock (fish or meat), 2 ozs. of butter, 1 tablespoonful of flour, 1 dessert-spoonful of curry-powder, 1 medium-sized onion, salt and pepper, cayenne, a tablespoonful of lemon-juice.

METHOD.—Wash and dry the cod, and cut it into pieces about 1 $\frac{1}{2}$  inches square. Melt the butter

## COD, CUTLETS OF

in a stewpan, fry the cod slightly, then take out and set aside. Add the sliced onion, flour, and curry-powder to the butter in the stewpan, and fry 15 minutes, stirring constantly to prevent the onion becoming too brown, then pour in the stock, stir until it boils, and afterwards simmer gently for 20 minutes. Strain and return to the saucepan, add lemon-juice and seasoning to taste, bring nearly to boiling point, then put in the fish, cover closely, and draw aside for about  $\frac{1}{2}$  an hour, or until the fish becomes thoroughly impregnated with the flavour of the sauce. An occasional stir must be given to prevent the fish sticking to the bottom of the stewpan. The remains of cold fish may be used, in which case the preliminary frying may be omitted.

TIME.— $1\frac{1}{2}$  hours. AVERAGE COST, from 1s. 9d. to 2s. SUFFICIENT for 5 or 6 persons. SEASONABLE from November to March.

## COD, CUTLETS OF (Invalid Dish).

INGREDIENTS.—Thin slices of cod, lemon-juice, brown bread, butter.

METHOD.—Divide each slice of cod into small cutlets, place them on a greased baking-tin and sprinkle them lightly with salt, pepper, and lemon-juice. Cover with a buttered paper, and bake in a moderate oven for about 10 minutes. Serve the fish with slices of lemon, the liquor that has come from it in cooking, also thin slices of brown, buttered bread.

TIME.—10 minutes. AVERAGE COST, 8d. per lb.

## COD-FISH PIE.

sauce,  $\frac{1}{2}$  lb. of short paste, or mashed potatoes, salt and pepper, nutmeg.

METHOD.—Take off the beards of the oysters, simmer them for a few minutes in a little water, then strain and mix with the oyster liquor (from fresh oysters). Cut the oysters into 2 or 4 pieces, according to size; divide the fish into large flakes, put half of it into the dish, lay the oysters on the top, season with salt and pepper, grate on a little nutmeg, add the melted butter sauce, and cover with the rest of the fish. Make the short crust paste according to directions given for short crust paste. Or, when a potato covering is preferred, season the potato with salt and pepper, and warm and stir in a saucepan, with a small piece of butter, and 2 or 3 tablespoonfuls of milk. Bake about  $\frac{1}{2}$  an hour in a moderate oven.

TIME.—From 1 to  $1\frac{1}{4}$  hours. AVERAGE COST, 1s. 9d. to 2s. SUFFICIENT for 5 or 6 persons. SEASONABLE from November to March.

## COD, HASHED.

INGREDIENTS.—2 lbs. of cooked cod, 2 ozs. of butter,  $1\frac{1}{2}$  ozs. of flour, 1 pint of milk,  $\frac{1}{4}$  pint of picked shrimps, pepper and salt, mashed potatoes, chopped parsley.

METHOD.—Blend the butter and flour in a stewpan, and fry for a few minutes without allowing them to colour. Add the milk, and stir until boiling. Put in the cod, flaked into small pieces, and the shrimps. Cook these together until thoroughly hot, and season carefully. Make a deep border of mashed potatoes on a hot dish. Pour the hash in the centre, and sprinkle a little chopped parsley over the top.

## COD RÉCHAUFFÉ.

TIME.— $\frac{1}{2}$  an hour. AVERAGE COST, 1s. 10d. to 2s. SUFFICIENT for 4 or 5 persons. SEASONABLE from November to March.

Make the sauce as directed, add the mushroom sauce, anchovy essence, mustard, and salt and pepper to taste, put in the fish, mix well together, then turn the whole into a well-buttered fireproof baking-dish. Cover the surface lightly with breadcrumbs, add a few pieces of butter, bake in the oven until well browned, then serve in the dish.

## COD SOUND PATTIES.

## COD SOUND PATTIES.

INGREDIENTS.—1 or 2 cod sounds,  $\frac{1}{4}$  pint of white sauce (about), white stock, 2 tablespoonfuls of cream, milk, salt, pepper, mace, puff paste cases, oysters, if liked.

METHOD.—Salted sounds should be soaked in warm water for several hours, fresh sounds simply washed in warm water; in both cases the dark skin must be scraped off. Cover them with equal parts of white stock and milk, add salt, pepper and a small blade of mace, and simmer gently for about  $\frac{1}{2}$  an hour. Drain and cut them into rather large dice; add the cream to the white sauce, stir the prepared sounds lightly in, and pour the preparation into the puff paste cases. Put on the pastry covers, make thoroughly hot and serve. A few oysters previously blanched and halved will improve the flavour.

TIME.— $\frac{1}{2}$  an hour to cook the sounds. COST, about 6d. per pound. QUANTITY, allow 1 patty to each person. SEASONABLE from November to March.

## COD SOUND PATTIES (Economical).

INGREDIENTS.—1 or 2 cod sounds, milk, salt, pepper, mace,  $\frac{3}{4}$  oz. of butter,  $\frac{3}{4}$  oz. of flour, paste, 1 egg.

## COD SOUNDS.

**METHOD.**—Prepare the sounds as directed in the preceding recipe. Cover them with equal parts of milk and water, add salt and pepper to taste, and a small blade of mace. Simmer gently until about three-quarters cooked (20 minutes), then drain and preserve the liquor, and cut the sounds into large dice. Melt the butter in a small stewpan, stir in the flour, strain in the liquor, and season to taste. Let it boil gently for 2 or 3 minutes, stirring meanwhile; add the prepared sounds, and put the mixture aside to cool. Line some deep patty-pans with paste, fill them with the preparation, piling it rather high. Cover with paste, brush over with beaten egg, and bake in a moderately hot oven for about 20 minutes.

**TIME.**—To bake, about 20 minutes. **COST**, about 1*d.* each. **QUANTITY**, allow 1 to each person. **SEASONABLE** from November to March.

## COD WITH BUTTER.

**METHOD.**—Wash and thoroughly dry the fish. Mix together the flour, salt and pepper, and coat the fish completely with the mixture. Have ready in a frying-pan a good layer of hot fat, put in the fish and fry until crisp and well browned on both sides. Meanwhile melt the butter, add to it the lemon-juice, and, if liked, a little finely-chopped parsley, or omit both lemon-juice and parsley, and serve simply with oiled butter. When more convenient the fish may be baked in the oven, but it lacks the crispness obtained by frying.

**TIME.**— $\frac{1}{2}$  an hour. **AVERAGE COST**, about 10*d.* **SUFFICIENT** for 3 or 4 persons. **SEASONABLE** from September to April.

## COD STEAKS (Australian Recipe).

**METHOD.**—Wash, dry the fish thoroughly, and brush each slice over with salad oil. Add a good seasoning of salt and pepper to the yolks of eggs, stir them with a wooden spoon in a small basin until thick, then add salad-oil, a few drops at a time, until the preparation has the consistency of very thick cream. Cut the capers in halves, and add them with a few drops of vinegar to the sauce. Grill the cod steaks over or in front of a clear fire, and serve hot. The sauce should be served separately.

## COD'S HEAD AND SHOULDERS.

**INGREDIENTS.**—Cod's head and shoulders, salt, lemon.

**METHOD.**—Cleanse the fish thoroughly, and rub a little salt over the thick part and inside the fish 1 or 2 hours before dressing it, as this very much improves the flavour. Lay it in the fish-kettle, with sufficient hot water to cover it. Be very particular not to pour the water on the fish as it is liable to break, and keep it only just simmering. If the water should boil away, add a little, pouring it in at the side of the kettle, and not on the fish. Skim very carefully, draw it to the side of the fire, and let it gently simmer till done. Garnish with cut lemon, and serve with either oyster or caper sauce.

**TIME.**—20 to 35 minutes, according to size. **AVERAGE COST,** from 4d. to 9d. per lb. **ALLOW** 3 lbs. for 6 persons. **SEASONABLE** from November to March.

Bake in a moderately hot oven for 10 to 15 minutes, then serve.

*Note.*—Fresh roe also may be dressed in this manner. It should first be well washed, then covered with boiling water, seasoned with a dessertspoonful of vinegar, and ½ a teaspoonful of salt, boiled gently for 10 minutes, and when cold cut into slices, and cooked as directed above.

Now dissolve the gelatine in 1 tablespoonful of water, and add it to the custard. Whip the cream stiffly, stir it into the custard when nearly cold, add the coffee essence, and pour into the prepared mould. Let the mould remain on ice in a cold place until firm.

METHOD.—Put the water, butter, sugar and salt into a stewpan, when boiling, stir in the cornflour and Vienna flour (previously mixed), work it with a wooden spoon over the fire, sufficiently long to produce a soft paste which will leave the side and bottom of the pan clean. Draw the stewpan from the fire, add the flavouring essence, and work the eggs in gradually (leaving out 1 white). Beat the paste well for some minutes, then put in it a large forcing or savoy bag with a plain tube, and force out even-sized shapes, similar to finger biscuits, on to a lightly-buttered baking tin, about 1 inch apart from each other. ### COFFEE, TO MAKE.

INGREDIENTS.—Allow 1 good tablespoonful of freshly-ground coffee to each  $\frac{1}{2}$  pint of water.

METHOD.—Place the coffee in the coffee chamber of a caf ti re, and pour the boiling water through the distributor on to the coffee. When the boiling water has percolated through the fine strainer with which the coffee-pot is provided, and has been allowed to stand for a few minutes, it will be found to be quite clear and ready to serve. Coffee may be allowed to just come to the boil, but boiling it, even for a short time, quite destroys its flavour and aroma.

### COFFEE, TO MAKE (Another Method).

INGREDIENTS.—Allow 2 good teaspoonfuls of freshly-ground coffee to each  $\frac{1}{2}$  pint of water.

## COLD CABINET PUDDING.

Repeat this carefully 2 or 3 times, cover, let the coffee stand five minutes longer to settle, then pour, without disturbing the grounds, into a hot coffee-pot or jug, and serve as hot as possible.

### COFFEE WITH MILK.

METHOD.—Prepare the mould as directed for the recipe for Charlotte Russe. Bring the milk and sugar nearly to boiling point, stir it into the beaten yolks of the eggs, replace in the stewpan, and stir by the side of the fire until the mixture thickens, but it must not boil. Dissolve the gelatine in 1 or 2 tablespoonfuls of water, add it to the custard, and when nearly cold stir in the cream, and flavour to taste with vanilla. Place the ratafias and trimmings off the Savoy biscuits in the mould, and pour the preparation, when cold and on the point of setting, over them. Place on ice or in a cold place until firm.

Heat the butter in a sauté-pan or frying-pan, fry the onion until lightly browned, then add the flour and fry a little; next put in the meat, and stir over the fire for a few minutes. Add the stock or water, bouquet-garni, and mushroom ketchup, and season to

broken. The compote may be served as a separate sweet, or as an accompaniment to plain creams, blanchmange, etc.

**CONDIMENTS** serve a useful purpose in dietetics, not only in enhancing the flavour of substances to which they are added, but also in inducing greater activity in digestive processes. A little additional seasoning of salt and pepper may be necessary, just before serving, to render a dish more palatable, but all condiments used for seasoning or flavouring should be added either before the dish is cooked or during the process of cooking, otherwise their full flavour cannot be imparted to the materials with which they are mixed.

milk or stock if the mixture appears at all dry, and stir briskly over the fire until thoroughly hot. When the cucumbers are tender, drain them well, place each piece on a croûte of bread, fill carefully with the preparation, which should be piled up rather high, and, if liked, garnished with finely-chopped parsley, or white of egg. Dish in two close rows, pour the sauce over, sprinkle on the garnish, and serve as hot as possible.

TIME.—Altogether, 1 hour. AVERAGE COST, 1s. 6d. to 1s. 10d. OBTAINABLE all the year; cheapest in July and August.

## CUCUMBERS, TO DRESS.

INGREDIENTS.—3 tablespoonfuls of salad-oil, 4 tablespoonfuls of vinegar, salt and pepper to taste, cucumber.

METHOD.—Pare the cucumber, cut it equally into very thin slices, cutting from the thick end; if commenced at the stalk the cucumber will most likely have an exceedingly bitter and far from agreeable taste. Put the slices into a dish, sprinkle over salt and pepper, and pour over oil and vinegar in the above proportion; turn the cucumber about, and it is ready to serve. This is a favourite accompaniment to boiled salmon, and is a nice addition to all descriptions of salads.

AVERAGE COST.—From 6d. each. OBTAINABLE all the year. SEASONABLE in April, May, June and July.

## CUCUMBERS, WITH EGGS.

INGREDIENTS.—2 large cucumbers, 1½ pints of white sauce, 3 hard-boiled eggs, 1 tablespoonful of grated cheese, as many croûtes of fried bread and rolls of rice as there are pieces of cucumber, salt and pepper.

METHOD.—Pare the cucumbers,

## CUMBERLAND PUDDING.

cut them into pieces about 3 inches in length, and remove the centre with a vegetable cutter or a small knife. Stand them on end in a stewpan in a little hot stock or water, cover closely, and simmer very gently until tender; the time required varies from 15 to 20 minutes, according to the age of the cucumber. Rub the yolk of 1 egg through a wire sieve, and put it aside, cut the remainder of the eggs into dice, add them to ½ pint of hot white sauce, and when ready for use stir in the grated cheese. Have the rice rolls nicely fried, and the cucumber drained and on croûtes ready to receive the mixture, which should be pressed lightly in, piled rather high, and garnished with yolk of egg. Dish in two close rows, arrange the rice rolls overlapping each other round the base, and serve the remainder of the sauce in a sauceboat.

TIME.—Altogether, from 1¼ to 1½ hours. AVERAGE COST, from 2s. 9d. to 3s. 3d. OBTAINABLE at any time.

Note.—This dish may be varied by substituting a macédoine of cooked vegetables for the eggs and cheese, or by filling the pieces of cucumber with a purée of any white vegetable, such as celery or artichokes, and garnishing the base with Tomatoes Farcies au Gratin or tomatoes stuffed with macaroni, cheese, and white sauce, or tomatoes stuffed with mushrooms.

## CUMBERLAND PUDDING.

INGREDIENTS.—6 ozs. of flour, 4 ozs. of finely-chopped suet, 6 ozs. of coarsely-chopped apple, 4 ozs. of currants cleaned, 3 eggs, salt and nutmeg to taste.

## CUP CAKES.

TIME.—From 2 to 2½ hours.  
AVERAGE COST, 9d. to 10d. SUFFICIENT for 4 or 5 persons.

### CUP CAKES, PLAIN (American Recipe).

INGREDIENTS.—3 level cupfuls of flour, 1 cupful of sugar, ½ a cupful of butter, 1 cupful of milk, 3 eggs, 1 teaspoonful of cream of tartar, 1 teaspoonful of carbonate of soda, the finely-grated rind and juice of 1 lemon.

METHOD.—Sieve the flour, cream of tartar, and soda together. Beat and add the eggs, stir in the milk, lemon rind, and juice, and lastly the flour. Bake in shallow tins or small cups.

or 3 tablespoonfuls of milk, 1 salt-spoonful of salt.

METHOD.—Cream the butter and sugar together until thick and smooth, add the eggs and beat well. Now stir in the potato, the juice and grated rind of the lemon, salt, and a little milk, and when well mixed pour into a greased pie-dish. Bake from 30 to 35 minutes in a moderate oven.

TIME.—About 1 hour. AVERAGE COST, 8d. or 9d. SUFFICIENT for 4 or 5 persons.

## CURDS AND WHEY.

INGREDIENTS.—Milk, rennet.

METHOD.—Rennet varies so much in strength that no definite rules for its use can be given. It may be prepared from the lining of the paunch of a calf, but it is much better to buy it ready prepared. Heat the milk to about 80° Fahr., add rennet according to the printed directions on the bottle, and allow it to stand in a warm place until the curd separates itself from the whey.

## CURLED BUTTER.

METHOD.—Tie a strong cloth by two of the corners to an iron hook in the wall. Tie the other end of the cloth into a knot, but so loosely that the index finger may be easily passed through it. Place the butter in the cloth, twist it lightly, thus forcing the butter through the knot in fine short rolls or curls. The butter may then be garnished with parsley and served. Butter for garnishing hams, etc., should be worked until sufficiently soft, and then used by means of a piece of stiff paper folded in the form of a cornet. The butter is squeezed in fine strings through the hole at the

## CURRENT WINE.

bottom of the cornet, and a little experience soon enables the worker to execute various designs.

### CURRENT AND RASPBERRY WINE.

INGREDIENTS.—5 gallons of red-current juice, 1 pint of raspberry juice, 10 gallons of water, 10 lbs. of either loaf sugar or good preserving sugar.

METHOD.—Extract the juice as directed in the recipe for Current Wine, Red. Add to it the water and sugar, stir until the latter is dissolved, then turn the whole into a cask, and bung closely, but provide the top of the cask with a vent peg. As soon as fermentation ceases, tighten the vent peg, and let the cask remain undisturbed in a moderately warm place for 12 months. At the end of this time rack off into dry bottles, cork them closely, and seal the top with melted wax. The wine should be ready for use in about 3 months.

### CURRENT FRITTERS.

INGREDIENTS.—3 tablespoonfuls of currants, 3 tablespoonfuls of boiled rice, 2 tablespoonfuls of flour, sugar to taste, nutmeg, 3 eggs,  $\frac{1}{2}$  pint of milk, frying-fat.

METHOD.—Mix the yolks of eggs with the flour, and add milk gradually until a smooth batter is obtained. Whisk the whites stiffly, stir them lightly in, add the currants, rice, a good pinch of nutmeg, and sweeten to taste. Drop the mixture, in small quantities, into hot fat, fry until crisp and lightly browned, and drain well. Serve piled high on a hot dish, and dredge well with castor sugar.

TIME.—From 10 to 15 minutes, to fry the fritters. AVERAGE COST, 8d. SUFFICIENT for 5 or 6 persons.

## CURRENT WINE, BLACK.

### CURRENT PUDDING, BOILED.

INGREDIENTS.— $\frac{1}{2}$  lb. of currants cleaned,  $\frac{1}{2}$  lb. of suet finely-chopped, 1 lb. of flour, milk, lemon, butter, sugar.

METHOD.—Mix the dry ingredients together, and add sufficient milk to form a stiff batter. Turn the mixture into a floured cloth, boil gently for  $2\frac{1}{2}$  hours, and serve with a cut lemon, fresh butter, and sugar. For directions for making a pudding of fresh fruit, see Apple Pudding, Boiled, and Damson Pudding.

TIME.—To boil the pudding, about 3 hours. AVERAGE COST, 1s. SUFFICIENT for 7 or 8 persons.

### CURRENT SAUCE.

INGREDIENTS.—2 ozs. of currants cleaned, 2 ozs. of butter,  $1\frac{1}{2}$  ozs. of flour,  $\frac{3}{4}$  pint of water, 1 glass of red wine, 1 dessertspoonful of lemon-juice,  $\frac{1}{2}$  a teaspoonful of finely-grated lemon-rind,  $\frac{1}{4}$  of a teaspoonful of ground ginger, sugar to taste.

METHOD.—Melt the butter in a saucepan, add the flour, and cook gently until it acquires a light brown colour. Put in the wine and water, bring to the boil, add the lemon-rind and lemon-juice, ginger, currants, and sugar to taste. Simmer gently for 10 minutes, then serve without straining.

TIME.—About  $\frac{1}{2}$  an hour. AVERAGE COST, 6d. to 8d.

### CURRENT WINE, BLACK.

INGREDIENTS.—Ripe black currants. To each pint of juice obtained add 1 pint of cold water, 1 lb. of preserving sugar, and a good glass of French brandy.

METHOD.—Take away the stalks, put the currants into an earthenware bowl, bruise well with a

wooden spoon, then drain off the juice and put it aside. Add the water to the berries, stir them frequently for 2 or 3 hours, then strain the liquid and mix it with the juice. Add the sugar, and as soon as it is dissolved turn the whole into a cask. When fermentation has ceased rack off the liquid into a smaller cask, add the brandy, bung closely, and let it remain for at least 12 months in a warm place. At the end of this time drain the wine off carefully into dry bottles, cork them tightly, and store in a dry, moderately-warm place.

## CURRANT WINE, RED.

**INGREDIENTS.**—Ripe red currants. To each gallon of fruit allow  $1\frac{1}{2}$  gallons of cold water, and 5 lbs. either loaf sugar or good preserving sugar, and  $\frac{1}{2}$  pint of good brandy.

**METHOD.**—Remove the stalks from the currants, put them into an earthenware bowl, bruise them well with a wooden spoon, and drain off the juice. Put the juice aside, add the water to the berries, let it stand for 2 or 3 hours, stirring occasionally meanwhile. At the end of this time strain the liquid from the berries into the juice, add  $\frac{3}{4}$  of the sugar, stir occasionally until dissolved, then pour the whole into a cask, filling it three-parts full. Bung closely, but place a vent peg near the top of the cask, and let the cask remain for 1 month where a uniform temperature of about 65° Fahr. can be maintained. Dissolve the remainder of the sugar in the smallest possible quantity of warm water, mix it well with the contents of the cask, replace the bung, and allow the cask to remain undisturbed for 6 weeks longer. Now drain off the wine into a clean, dry cask, add the brandy, let the

cask stand for about 6 months in a dry, warm place, then bottle and cork tightly. The wine may be used at once, but will be better if kept for 12 months at least.

## CURRY.

Curry is composed of various condiments and spices, which include cardamon-seed, coriander-seed, cumin-seed, dried cassia leaves, dried chilies, cayenne, ginger, mustard-seed, turmeric, cinnamon, mace, and cloves. It owes its peculiar odour and bright colour to the presence of turmeric, a variety of ginger largely cultivated in the East Indies. Thorough cooking is absolutely necessary to develop the full flavour of the various ingredients comprising curry-powder, the directions given in the respective recipes for preparing the curry sauce before adding to it other substances should therefore be strictly followed.

## CURRY POWDER (Indian Recipe).

**INGREDIENTS.**—8 ozs. of turmeric, 6 ozs. of coriander seeds, 3 ozs. of cardamoms, 3 ozs. of cumin, 3 ozs. of fenugreek, 1 oz. of cloves, 1 oz. of white peppercorns,  $\frac{1}{4}$  oz. of cayenne.

**METHOD.**—Thoroughly dry and pound the above ingredients, first separately, then all together. When well mixed, pass the whole through a fine sieve, put the preparation into dry bottles, cork lightly, and store for use.

**TIME.**—1 hour. SUFFICIENT for  $1\frac{1}{2}$  lbs. of powder. Cost, 1s. to 1s. 2d.

## CURRY SAUCE.

**INGREDIENTS.**— $\frac{3}{4}$  pint of good stock,  $1\frac{1}{2}$  ozs. of butter, 1 tablespoonful of curry-powder, 1 des-

sertspoonful of flour, 1 tomato sliced, 1 small onion sliced, salt.

**METHOD.**—Melt the butter in a saucepan, fry the onion until lightly browned, then add the flour and curry-powder. Stir and cook gently for a few minutes, then add the stock, and bring to the boil. Put in the tomato, and seasoning to taste. Simmer gently for 20 minutes, then strain and serve.

**TIME.**—From 35 to 40 minutes.  
**AVERAGE COST,** 8*d.* to 10*d.*

### CUSTARD.

**INGREDIENTS.**— $\frac{1}{2}$  pint of milk, 2 eggs, saccharine, flavouring, salt.

**METHOD.**—Beat the eggs, add the milk, a good pinch of salt, and sweeten and flavour to taste. The preparation may be baked in a piedish, steamed in a basin, or cooked in a jug placed in a saucepan of boiling water. Savoury custard may be made by substituting salt, pepper, and parsley for the saccharine and flavouring, and some or all of the milk should be replaced by good white stock.

**TIME.**— $\frac{3}{4}$  of an hour. **AVERAGE COST,** 4*d.*

### CUSTARD (for Cream Ices).

**INGREDIENTS.**—1 pint of milk,  $\frac{1}{2}$  pint of cream, 6 ozs. of castor sugar, 6 yolks of eggs.

**METHOD.**—Bring the milk nearly to boiling point, and pour it over the beaten yolks of eggs, stirring meanwhile. Return to the stewpan, and stir by the side of the fire until the mixture thickens, but do not let it boil, or the eggs may curdle. Stir in the sugar, strain, and when cool add the cream.

**TIME.**—From 25 to 30 minutes.  
**AVERAGE COST,** 1*s.* 6*d.* **SUFFICIENT** for 1 $\frac{3}{4}$  pints.

## CUSTARD, BOILED.

Cool slightly, then add the beaten yolks of eggs, and stir by the side of the fire until the mixture thickens. Strain into a basin; when cool add the cream, the whites of eggs stiffly whisked, and use as required.

**TIME.**—From 25 to 30 minutes.  
**AVERAGE COST,** 1*s.* 2*d.* **SUFFICIENT** for 1 $\frac{3}{4}$  pints.

### CUSTARD, BOILED.

**INGREDIENTS.**— $\frac{1}{2}$  pint of milk, 3 yolks of eggs, 1 to 1 $\frac{1}{2}$  ozs. of castor sugar, according to taste, lemon-rind, bay-leaf, vanilla-pod, or other flavouring, 2 tablespoonfuls of thick cream.

**METHOD.**—Rinse a stewpan with cold water, to prevent the milk sticking to the bottom. Put in the milk and flavouring ingredient, simmer gently until pleasantly flavoured, and add the sugar. Strain on to the eggs, stirring meanwhile, return to the stewpan, and stir by the side of the fire until the mixture thickens. Considerable care is needed to cook custard in this manner without curdling it, and anyone inexperienced should, instead of replacing the preparation in the stewpan, pour it into a jug or double saucepan, place whichever is used in a saucepan of boiling water, and stir until the custard coats the spoon. Add the cream, stir 2 or 3 minutes longer to cook the cream, and let

## CUSTARD, BOILED.

the custard cool, stirring frequently meanwhile.

TIME.—From 35 to 45 minutes.

Strain this into a well-buttered plain tin mould; stand it in a stewpan containing a little boiling water, cover the mould with a buttered paper, and let it poach in a moderately heated oven for 20 minutes. When done, take out the mould and put in a cool place. Turn out when cold, and cut the custard into dice, cubes, or other fanciful shapes (known as Royal). Use for garnish in clear or thick soups.

Pour it on the gelatine in a basin, add the brandy and vanilla, stir until dissolved, then pour into 1 large or several small moulds. Sherry may replace the brandy, or it may be omitted altogether. A little cold jam sauce or fruit syrup served round the dish will be found an improvement.

TIME.—About  $\frac{1}{2}$  an hour. AVERAGE COST, 9*d.* SUFFICIENT for 4 or 5 persons.

METHOD.—The fruit must be firm, dry, and ripe. Remove the stalks, put the fruit into a large jar or stewpot, cover closely, place it in a boiling-pot of cold water, and cook very slowly until the plums are perfectly tender. Strain the juice through a jelly-bag, or fine cloth, into a preserving-pan, add from 8 to 10 ozs. of sugar to each pint of juice, and boil until the jelly sets quickly when tested on a cold plate. Pour into pots, cover closely with paper brushed over with white of egg, and fasten securely so as to exclude the air. Store in a cool, dry place.

TIME.—Altogether, from 6 to 7 hours. AVERAGE COST, 9d. to 10d. per lb.

Note.—The fruit from which the juice has been extracted may be converted into damson cheese.

### DAMSON PUDDING.

INGREDIENTS.—Suet crust,  $1\frac{1}{2}$  pints of damsons, 2 tablespoonfuls of brown sugar, or to taste.

## DAMSON WINE.

METHOD.—Line the basin as directed for Apple Pudding; half fill it with fruit, add the sugar and then the remainder of the fruit. Put on the cover, carefully seal the edges, and if the pudding is to be boiled, tie on a scalded, well-floured cloth; if steamed, cover it with a sheet of greased paper. Cook from  $2\frac{1}{2}$  to 3 hours.

TIME.—From 3 to  $3\frac{1}{2}$  hours. AVERAGE COST, 7d. to 8d. SUFFICIENT for 6 or 7 persons.

### DAMSON TART.

INGREDIENTS.—Short crust paste,  $1\frac{1}{2}$  pints of damsons, 2 heaped tablespoonfuls of brown sugar, or to taste.

METHOD.—Prepare the crust as directed in Apple Tart, in the centre of the pie-dish place an inverted cup or a ventilating cup and funnel to retain the juice, half fill the dish with fruit, add the sugar, then put in the remainder of the fruit. Cover with paste, brush lightly over with cold water, sprinkle liberally with castor sugar, and bake in a quick oven.

TIME.—About  $1\frac{1}{4}$  hours. AVERAGE COST, 10d. SUFFICIENT for 5 or 6 persons.

### DAMSON WINE.

INGREDIENTS.—To each gallon of damsons add 1 gallon of boiling water; to each gallon of liquor obtained from these add 4 lbs. of loaf sugar, and  $\frac{1}{2}$  pint of French brandy.

METHOD.—Remove the stalks, put the fruit into an earthenware bowl, pour in the boiling water, and cover with a cloth. Stir the liquid 3 or 4 times daily for 4 days, then add the sugar and brandy, and, when the former is dissolved, turn the whole into a clean, dry cask. Cover the bung-hole with a

cloth, folded into several thicknesses, until fermentation ceases, then bung tightly, and allow the cask to remain undisturbed for 12 months in a moderately warm place. At the end of this time it should be racked off into bottles. The wine may be used at once, but if well corked and stored in a dry place it may be kept for years.

### DAMSONS, BAKED, for keeping.

INGREDIENTS.—To each lb. of fruit allow  $\frac{1}{2}$  lb. of sugar, mutton suet.

METHOD.—Fruit for preserving in this manner should be perfectly sound and not over-ripe. Remove the stalks but not the stones; place the fruit and sugar in a large stew-jar in alternate layers, cover closely, and bake in a very cool oven until the plums are tender. Pack the plums closely in large jars, pour the syrup over, and when quite cold cover with white paper cut to the size of the jar. Have ready some mutton suet melted, but on the point of setting, pour it into the jars to the depth of about  $\frac{1}{2}$  inch, stretch pieces of bladder or paper brushed over with white of egg over the jars, and fasten them securely. If stored in a cool, dry place the fruit will keep good for 3 or 4 months.

TIME.—From 4 to 5 hours.  
AVERAGE COST, 4d. per lb.

### DAMSONS, BOTTLED.

INGREDIENTS.—Damsons, sugar.

METHOD.—Remove the stalks but not the stones, place the fruit in wide-necked glass bottles, and tie a piece of bladder securely over the top of each one. Cover the bottom of a large boiling pot with a thin layer of straw, stand the bottles side by side on the top of it, and surround them with cold

## DANISH PUDDING.

water. Bring slowly to boiling point, then remove the boiling pot from the fire, but let the bottles remain in it until the contents are perfectly cold. Before storing them remove the bladder, fill the mouths of the bottles with sugar, and cork with tight-fitting corks. Cover with melted wax, and store in a cool, dry place.

TIME.—Altogether, about 12 hours. AVERAGE COST, 4d. per lb.

### DAMSONS (OR PLUMS), TO PRESERVE.

INGREDIENTS.—Damsons or any other plums, suet.

METHOD.—Let the fruit be dry and sound. Place it in wide-necked jars, cover completely with boiling water, and pour over a good layer of melted mutton suet. Cover with parchment, to completely exclude the air. The fruit will keep a considerable time, and when required for use, the water should be poured off, and the jelly at the bottom of the jar used to improve the flavour of the fruit.

## DANISH PUDDING.

INGREDIENTS.—1 breakfastcupful of tapioca, 1 breakfastcupful of red currant jelly, salt and castor sugar to taste, 3 pints of water.

METHOD.—Soak the tapioca in the water for at least 12 hours, then turn it into a double saucepan, cook for  $1\frac{1}{2}$  hours, and add salt and sugar to taste. Stir in the jelly, and, when well mixed, turn the preparation into a mould, and put aside until set. Serve with whipped cream.

TIME.—To cook the tapioca,  $\frac{3}{4}$  of an hour. AVERAGE COST, 1s.  
SUFFICIENT for 4 or 5 persons.

## DATE PUDDING.

### DATE PUDDING.

INGREDIENTS.— $\frac{1}{2}$  lb. of stoned and chopped dates,  $\frac{1}{2}$  lb. of finely-chopped suet, 1 lb. of flour,  $\frac{1}{4}$  of a teaspoonful of salt, milk or water.

METHOD.—Mix the dry ingredients well together, add sufficient milk or water to moisten them slightly, and turn the mixture into a well-greased basin. Steam or boil from  $2\frac{1}{2}$  to 3 hours, or form the mixture into a roly-poly, enclose it in a cloth, and boil gently for  $1\frac{1}{4}$  hours.

TIME.—From 2 to  $3\frac{1}{2}$  hours. AVERAGE COST, 8d. SUFFICIENT for 7 or 8 persons.

### DELHI PUDDING (Indian Dish).

METHOD.—Stone and halve the raisins, pare, core, and slice the apples; mix the flour, suet, baking-powder, a good pinch of salt, add a little cold water and make into a smooth, stiff paste. Divide it into 2 equal portions; with one line the basin, from the other portion cut off sufficient to form the lid, and roll the remainder out thinly. Put a layer of apple in the basin, add a few raisins, and sprinkle with sugar, lemon-rind, and nutmeg, previously well mixed together. From the rolled-out paste cut a round large enough to rather more than cover the fruit in the basin, moisten the edges of it with water, and join them carefully to the paste lining the basin. Now put in another layer of apple, add raisins, sprinkle with sugar, etc., and cover with pastry as before. Repeat until the basin is full, then cover with a greased paper, and steam for 3 hours.

## DESSERT BISCUITS.

TIME.—About 4 hours. AVERAGE COST, from 1s. 2d. to 1s. 4d. SUFFICIENT for 7 or 8 persons.

### DELICIOSA CAKES (South African Recipe).

INGREDIENTS.—4 ozs. of Jordan or Valencia almonds, 8 ozs. of castor sugar, 3 stale 1d. sponge cakes, the whites of 3 eggs,  $\frac{1}{4}$  of a teaspoonful of finely-grated orange rind,  $\frac{1}{4}$  of a teaspoonful of powdered cinnamon, whipped cream, jam.

METHOD.—Pound or finely chop the almonds, and pass the sponge cakes through a fine sieve. Mix the two together, add the orange rind and cinnamon, and stir in the whites of the eggs. Bake in well-buttered small patty-pans for about 15 minutes, turn out, and when cold garnish with a small pyramid of cream with a little jam or preserved fruit in the centre of it.

### DESSERT BISCUITS (which may be flavoured with Ground Ginger, Cinnamon, etc.).

INGREDIENTS.—1 lb. of flour,  $\frac{1}{2}$  lb. of butter,  $\frac{1}{2}$  lb. of castor sugar, the yolks of 6 eggs, flavouring to taste.

## DESSERT CAKES.

**METHOD.**—Put the butter into a basin, warm it, but do not allow it to oil; then with a wooden spoon beat it to a cream. Add the flour by degrees, then the sugar and flavouring, and moisten the whole with the yolks of the eggs, which should previously be well beaten. When all the ingredients are thoroughly incorporated, drop the mixture from a spoon on to a buttered paper, leaving a distance between each cake, as they spread as soon as they begin to warm. Bake in rather a slow oven for 12 to 18 minutes, and do not let the biscuits acquire too much colour. In making the above quantity, half may be flavoured with ground ginger, and the other half with essence of lemon, or some currants added to make a variety. The biscuits are named after the preparation with which they are flavoured, and an endless variety may be made in this manner.

**TIME.**—12 to 18 minutes, or rather longer in a very slow oven. **AVERAGE COST,** 1s. 6d. **SUFFICIENT** to make from 3 to 4 dozen biscuits. **SEASONABLE** at any time.

## DESSERT CAKES.

**INGREDIENTS.**— $\frac{3}{4}$  lb. of flour, 6 ozs. of butter,  $\frac{1}{2}$  lb. of sifted sugar, 3 eggs.

**METHOD.**—Clarify the butter and beat the sugar well in; add the flour by degrees, then the eggs, still beating; mix thoroughly, and bake in small tins for 8 or 10 minutes.

**TIME.**—8 to 10 minutes, to bake. **AVERAGE COST,** 1s. **SUFFICIENT** for 20 or 30 cakes.

## DEVILLED BUTTER.

**METHOD.**—Mix 1 oz. of butter with white pepper, cayenne, and curry-paste, about a saltspoonful of each, and blend thoroughly with a few drops of lemon-juice.

## DEVONSHIRE JUNKET.

### DEVILLED SAUCE (For Devilled Bones, etc.).

**INGREDIENTS.**—2 tablespoonfuls of Harvey sauce, 2 tablespoonfuls of vinegar, 2 tablespoonfuls of butter (melted), 1 teaspoonful of mustard, salt, and cayenne.

**METHOD.**—Mix all the ingredients together in a deep dish. Score the legs of a cooked chicken, etc., lengthwise, and soak well in the sauce. Grill or fry in a little hot fat or butter, serve very hot.

**TIME.**—About 1 hour. **AVERAGE COST,** 3d. to 4d. for this quantity of sauce.

## DEVONSHIRE CREAM.

**METHOD.**—The milk should be allowed to stand for 12 hours in winter, and about half that length of time when the weather is warm. The milk-pan is then set on a stove, and should remain there until the milk is quite hot, but it must not boil, otherwise the albumen will coagulate and form a skin on the surface. The more slowly the milk is heated the better will be the result. The time required depends upon the size and shape of the vessel containing the milk, and the amount of heat applied, but small rings and undulations on the surface of the milk indicate that it is sufficiently scalded. When the process of scalding is completed, the vessel should at once be transferred to a cold place and kept there until the following day, when the cream is skimmed off into the tins or pots in which it is sold. In Devonshire nearly all the butter is made from scalded cream, and is usually very firm.

## DEVONSHIRE JUNKET.

**INGREDIENTS.**—1 pint of new milk, 1 dessertspoonful of brandy,

## DEVONSHIRE PUDDING.

1 dessertspoonful of castor sugar, 1 teaspoonful of prepared rennet, whipped or clotted cream, ground cinnamon or grated nutmeg.

**METHOD.**—Heat the milk to about 80° Fahr. and stir in, off the fire, the sugar, brandy, and rennet. Pour this preparation into a deep dish, in which it will be served; put it aside until set, then cover the surface with either whipped or clotted cream, sprinkle on a little cinnamon or nutmeg, and serve.

**TIME.**—2 hours. **AVERAGE COST,** 9d. **SUFFICIENT** for 1 dish.

## DEVONSHIRE RUM PUDDING.

**INGREDIENTS.**—Cold plum pudding cut into strips, milk, allowing 1 pint to 1 tablespoonful of cornflour, 1 egg, 1 level tablespoonful of castor sugar, and a good glass of rum.

**METHOD.**—Butter a piedish, and fill it with strips of plum pudding crossed lattice fashion. Mix the cornflour smoothly with a little milk, boil up the remainder, add the blended cornflour, and cook gently for 3 minutes. Stir in the sugar, beat and add the eggs, and put in the rum. Pour the sauce over the plum pudding, bake gently for about  $\frac{1}{2}$  an hour, then serve. If preferred, the pudding may be steamed for 2 hours in a basin.

**TIME.**—About  $\frac{1}{2}$  an hour. **AVERAGE COST,** 1s. 9d. to 2s. **SUFFICIENT** for 6 persons.

## DOUGHNUTS.

**INGREDIENTS.**— $\frac{1}{2}$  pint of new milk,  $\frac{1}{2}$  oz. of compressed yeast, 1 egg, 2 ozs. of sugar, 2 ozs. of butter, flour.

**METHOD.**—Make the milk warm, and dissolve the yeast in it; stir in about  $\frac{1}{4}$  lb. of flour and the sugar, cover over, and stand the

## DRESDEN PUDDING.

mixture aside in a warm place where it will not be disturbed, and leave it to rise up and drop. When it drops it is ready, but it must not be touched until it has dropped. When ready, add the melted butter, the egg, and a pinch of salt; beat it well together, and then add sufficient flour to make a workable paste. Put the paste when made into a basin, cover over, and stand it aside in a warm place to prove; when well proved, turn out on to the board, dry over, and divide up into 2-oz. pieces, mould up round, then flatten the pieces out slightly with a rolling-pin, damp round the edges, lay 1 spoonful of raspberry jam in the centre, and gather the edges into the centre, forming them up into round balls with the jam in the middle; pinch them together firmly and lay them on a clean floured cloth as each one is worked. Cover over with another cloth when they have all been done, and stand them aside to prove. When they are light enough, have ready a pot of boiling lard on the stove, drop the doughnuts into it, cook them for about 7 minutes on one side and then turn them over and cook them the reverse way. Take up with a drainer on 3 or 4 thicknesses of clean kitchen paper, and when the doughnuts have all been cooked roll them into fine castor sugar, and serve.

**TIME.**—To cook, 15 minutes. **AVERAGE COST,** 8d.

## DRESDEN PUDDING.

**INGREDIENTS.**—2 ozs. of flour, 2 ozs. of sugar, 2 ozs. of crumbled brown bread,  $1\frac{1}{2}$  ozs. of butter, 2 tablespoonfuls of desiccated cocoa-cut,  $\frac{1}{2}$  a teaspoonful of ground cinnamon, the grated rind of  $\frac{1}{2}$  a lemon,  $\frac{3}{4}$  of pint of milk, 1 dessertspoonful of Curaçoa, 3 eggs.

## DRIED FRUIT.

**METHOD.**—Melt the butter in a stewpan, stir in the flour, cook for 2 or 3 minutes, then add  $\frac{1}{2}$  gill of water and  $\frac{1}{3}$  of the milk, bring to boiling point, stirring meanwhile, and simmer gently for 5 minutes. Heat the remainder of the milk, and pour it over the cocoanut, add the brown bread, previously passed through a fine sieve, sugar, and lemon-rind, cover, and let it stand for 10 minutes. Meanwhile add the yolks of the eggs to the contents of the stewpan, stir until they thicken, then put in the cocoanut preparation, add the cinnamon and Curaçoa, and lastly the stiffly-whisked whites of eggs. Turn into a well-buttered mould or souffl  tin, bake in a moderate oven for about 1 hour, and serve with a suitable sweet sauce or fruit syrup.

**TIME.**—About  $1\frac{1}{2}$  hours. **AVERAGE COST,** 1s. 3d. **SUFFICIENT** for 4 or 5 persons.

### DRIED FRUIT (Apples, Apricots, Nectarines, Peaches, etc.).

**INGREDIENTS.**—Fruit, sugar, lemon-rind, cloves or cinnamon to flavour.

**METHOD.**—The following method is applicable to any of the dried fruits from California and other countries. Rinse or wash the fruit in cold water, cover it with fresh cold water, and let it remain in soak for 10 or 12 hours until well swollen. Turn both fruit and water into a stewpan or a jar placed in a pan of boiling water, and cook gently until the fruit is tender. Sugar to taste, or sugar boiled to a syrup (*see* Sugar to Boil), and flavouring ingredients should be added when the fruit is about half cooked. When syrup is used the water required for it should be taken from the vessel containing the fruit, unless a rather

liquid compote is liked. The water in which the fruit soaks always extracts some of the flavour of the fruit, and the latter should therefore be cooked in it. Much stirring should be avoided, as dried fruit, when nearly cooked, breaks easily.

Newtown pippins, from which the peel and cores have been removed, and Normandy pippins, from which only the peel is removed, may require soaking a little more than apple rings and apple chips.

**TIME.**—Altogether  $11\frac{1}{2}$  to  $13\frac{1}{2}$  hours. **AVERAGE COST,** 6d. to 8d. per lb. **SUFFICIENT,**  $\frac{1}{2}$  lb. of fruit for 1 good dish. **SEASONABLE** at any time.

### DRIPPING CRUST (For Plain Pies and Puddings).

**INGREDIENTS.**—1 lb. of flour, 6 ozs. of clarified dripping,  $\frac{1}{2}$  pint of water.

**METHOD.**—With a knife mix the flour to a smooth paste, adding the water gradually. Roll the paste out thinly, place  $\frac{1}{3}$  of the dripping over it in small pieces, and fold over. Repeat this process twice, using  $\frac{1}{3}$  of fat each time, and use as required.

**TIME.**—20 minutes. **AVERAGE COST,** 4d. to 5d. **SUFFICIENT** for 2 lbs.

## DROP CAKES.

**INGREDIENTS.**— $\frac{1}{2}$  lb. of butter,  $\frac{3}{4}$  lb. of castor sugar, 1 lb. of flour, 4 eggs, baking-powder, and milk.

**METHOD.**—Add 2 teaspoonfuls of baking-powder to the flour on the board, well mix it and run it through a sieve 2 or 3 times. Put the butter and sugar into a clean basin, and beat it well up into a cream with the hand, add the eggs

one at a time, beating well after each addition of eggs, and when all are well beaten in, add the flour, and moisten the mixture with milk to batter consistency. Scrape down the sides with a palette-knife, and with the point of the knife mix in all the material scraped down. Have some clean white sheets of kitchen paper cut to the size that will fit the baking-plates or tins, and with a spoon lay out small cakes all over the sheets of paper, allowing about  $1\frac{1}{2}$  inches between each cake or drop, which should be about the size of half a walnut shell; then dust lightly over with sugar and bake in a moderate oven.

TIME.—1 hour. AVERAGE COST, 1s. 6d. SUFFICIENT for 3 or 4 dozen cakes.

## DUCHESS PUDDING.

INGREDIENTS.—2 ozs. of butter, 2 ozs. of castor sugar, 2 ozs. of macaroons,  $\frac{1}{2}$  oz. of pistachios, 3 tablespoonfuls of orange marmalade, 1 level teaspoonful of ground rice, 3 eggs.

METHOD.—Blanch, peel, and chop the pistachios coarsely, and crush the macaroons. Work the butter and sugar together until thick and creamy, then beat in the yolks of the eggs, and add the macaroons and marmalade. Whisk the whites of the eggs to a stiff froth, add lightly the ground rice and half the pistachios, then stir the whole carefully into the mixture. Have ready a well-buttered soufflé-mould, sprinkle the remainder of the pistachios on the bottom and sides, pour in the preparation, and steam slowly for about  $1\frac{1}{4}$  hours. Serve with suitable sauce.

TIME.—From  $1\frac{3}{4}$  to 2 hours. AVERAGE COST, 1s. SUFFICIENT for 4 or 5 persons.

## DUCK, BRAISED.

### DUCK AND RED CABBAGE.

INGREDIENTS.—Remains of 2 or 3 cold ducks,  $\frac{1}{2}$  a red cabbage, 2 ozs. of butter, good gravy or stock, 1 tablespoonful of vinegar, salt and pepper.

METHOD.—Wash and drain the cabbage, and shred it finely. Heat the butter in a stewpan, put in the cabbage and a good seasoning of salt and pepper, cover closely, and cook gently for 1 hour, adding a little gravy or stock, if necessary, to prevent burning. Divide the ducks into neat joints, place them in a stewpan with just sufficient hot gravy or stock to barely cover them, put on a close-fitting lid, and allow the stewpan to stand just below simmering point for nearly 1 hour. When ready, add the vinegar to the cabbage, turn it on to a hot dish, arrange the duck neatly upon it, and serve with a little good gravy, either poured round or handed separately.

TIME.—About 1 hour. AVERAGE COST, 6d., exclusive of the ducks. SUFFICIENT for 4 or 5 persons. SEASONABLE, September to January.

### DUCK, BRAISED, WITH CHESTNUTS.

INGREDIENTS.—1 duck, 1 pint of stock,  $\frac{3}{4}$  pint of Espagnole sauce, 1 glass of port wine, 1 dessertspoonful of red currant jelly, 1 Spanish onion, 1 lb. of chestnuts, larding bacon, 2 ozs. of butter, the yolks of 2 eggs. For the mirepoix, or foundation: 2 onions, 2 carrots, 1 small turnip, 2 strips of celery, a bouquet-garni (parsley, thyme, bay-leaf), 6 allspice, 2 cloves, salt and pepper.

METHOD.—Boil the chestnuts and remove the skins, cook the Spanish onion in stock or water until tender, chop both finely, season with salt and pepper, add the

## DUCK, BRAISED.

yolks of eggs, and use these for stuffing the duck. Truss the duck and lard it neatly. Put the butter and sliced vegetables into a large stewpan, place the duck on the top of them, cover and fry gently for 20 minutes. Next add as much of the stock as will  $\frac{3}{4}$  cover the vegetables, and the remainder as that in the stewpan boils away. Cover the duck with a buttered paper, put on the lid, and cook gently for about 2 hours, or until the duck is perfectly tender. Heat the Espagnole sauce, add to it the wine and jelly, and season to taste. Remove the trussing strings, and put the duck in a hot oven for a few minutes to crisp the bacon. Serve with a small quantity of the sauce poured over, and the remainder in a sauce-boat.

TIME.—About 2 hours. AVERAGE COST, 5s. to 5s. 6d. SUFFICIENT for 4 or 5 persons. SEASONABLE from August to March.

## DUCK, BRAISED, WITH TURNIPS.

INGREDIENTS.—1 duck, 1 pint of good stock, larding bacon,  $\frac{1}{2}$  a glass of sherry, 3 young turnips, salt and pepper, mirepoix as in the preceding recipe, glaze.

METHOD.—Truss and lard the duck, and braise it as directed in the foregoing recipe. When cooked brush over with warm glaze, and crisp the lardoons in the oven. Strain the stock and reduce it by rapid boiling until about half the liquid remains, then add the sherry, and season to taste. Have ready the turnips cut into dice, and cooked until tender. Place the duck on a hot dish, arrange the turnips in groups, pour the sauce round, and serve.

TIME.—About 2 hours. AVERAGE COST, 4s. 6d. to 5s. SUFFICIENT for 4 to 5 persons. SEASONABLE from August to March.

Chop the onion finely, fry it in the butter, add the flour, stir over the fire until brown, then pour in the stock, stir until it boils, and simmer for 10 minutes. Cut the orange rind into very thin strips, add them with the juice of the orange, the wine, and the duck to the sauce, season with salt and pepper, and simmer very gently for  $\frac{1}{2}$  an hour.

**METHOD.**—Singe, draw, and truss the duck, slice the onion, and put it into a baking-tin; place the duck on the top, baste with hot fat, and roast in a moderate oven for  $\frac{1}{2}$  an hour, basting frequently. In the meantime, melt the butter, stir in the flour, and cook over the fire until a brown roux or thickening is formed, then add the stock, stir until boiling, and simmer until required. When the duck is sufficiently roasted, remove the trussing string, cut the bird into small joints, add these with the olives to the sauce, season well, and simmer gently for about  $\frac{1}{2}$  an hour. Return the baking-tin to the oven until the slices of onion are tender, then rub them through a fine hair sieve, and add them to the contents of the stewpan. ### EGGS, BOILED.

Have ready a saucepan of boiling water, put the eggs into it gently with a spoon, letting the spoon touch the bottom of the saucepan before it is withdrawn, to avoid cracking the shell. For those who like eggs lightly boiled, 3 to 3½ minutes will be found sufficient, 4 minutes' gentle boiling will lightly coagulate the white, and 5 minutes will set it firmly. METHOD.—Brush the inside of the ramakin cases over with clarified butter or oil, and place them on a baking-tin in the oven for a few minutes. Fry the shallot in a little butter, then drain and put it equally divided into the cases. To the breadcrumbs add half the cheese and parsley and a good seasoning of salt and pepper, and put an equal amount of the mixture into each case. Add a very small piece of butter, carefully break and put in the eggs, and sprinkle with salt and pepper. Pour a little cream over each egg, add the remainder of the cheese, bake in a moderate oven until set, then sprinkle with parsley and serve.

TIME.—About 1 hour. AVERAGE COST, 2*s.*

## EGGS, POACHED.

INGREDIENTS.—Eggs, buttered toast, salt, vinegar, or lemon-juice.

METHOD.—Eggs for poaching should be fresh, but not new-laid; for if poached before they have been laid 36 hours, the white is so milky that it is almost impossible to coagulate it. To prepare, boil some water in a shallow stewpan or deep frying-pan, add salt to taste, and allow to each pint of water 1 tablespoonful of vinegar, or 1 teaspoonful of lemon-juice. Break the egg into a cup, taking care to keep the yolk whole, and when the water boils, remove the pan to the side of the fire, and gently slip the egg into it. Tilt the pan, with a tablespoon gently fold the white of the egg over the yolk, so as to produce a plump appearance, and simmer gently until the white is set. Take it up carefully with a slice, trim the edges, if necessary, and serve either on buttered toast, slices of ham or bacon, or spinach.

TIME.—5 minutes to cook.

## EGGS, POACHED, WITH HAM.

INGREDIENTS.—4 eggs, 3 ozs. of finely-chopped cooked ham, 4 rounds of buttered toast, the size of the eggs when cooked, 4 small teaspoonfuls of cream or milk, butter, 1 teaspoonful of finely-chopped parsley, cayenne, salt and pepper.

METHOD.—Add the parsley and a little pepper to the ham. Coat 4 small deep patty-pans thickly with butter, over which sprinkle the

ham preparation, then add an egg, breaking them carefully so as to keep the yolks whole. Season with salt, pepper, and cayenne, add a teaspoonful of cream, and place on the top a morsel of butter. Put the tins in the oven, in a sauté-pan, surround them to half their depth with boiling water, and poach until the white is firm. When ready, turn the eggs carefully out of the tins on to the toast, and serve.

TIME.—15 minutes. AVERAGE COST, 1s. 2d. to 1s. 4d. SUFFICIENT for 4 persons. SEASONABLE at any time.

## EGGS, POACHED, WITH SPINACH.

METHOD.—Prepare the spinach purée, place it in a saucepan, add the butter, a good pinch of nutmeg, salt, pepper, and the brown sauce, and make thoroughly hot. Meanwhile, poach the eggs and turn them neatly. Turn the spinach on to a hot dish, flatten the surface lightly; upon it place the eggs and garnish with sippets of toasted bread. Serve good gravy or brown sauce separately.

INGREDIENTS.—4 eggs, 4 rounds of buttered toast, 2 ozs. of finely-chopped cooked ham, 1 teaspoonful of finely-chopped parsley, salt and pepper.

METHOD.—Butter 4 small china ramakin cases or dariole moulds, and coat them thickly with ham and parsley, previously mixed together. Break an egg carefully into each case, and sprinkle them with salt and pepper. Bake or steam until firm, then turn them on to the prepared toast, and serve.

TIME.—10 to 15 minutes. AVERAGE COST, 10d. SUFFICIENT for 3 or 4 persons. SEASONABLE at any time.

## EGGS, SCOTCH.

INGREDIENTS.—3 hard-boiled eggs,  $\frac{1}{2}$  lb. of sausages, 1 raw egg, breadcrumbs, frying-fat, fried parsley, 6 croûtes of fried bread.

**EGGS, TO CHOOSE.**

The freshness of eggs may be tested in several ways. One ingenious apparatus is a speculum, furnished with an interior looking-glass, which renders the egg sufficiently transparent to show if it is fresh, infected, or really bad. If fresh, a clear disk is thrown; if stale, a cloudy disk with spots; and if bad, a dark unsightly disk is visible. Another method of ascertaining their freshness is to hold them before a lighted candle or to the light. If the egg looks clear, it will be perfectly good, but if there is a black spot attached to the shell, it is worthless. The former test cannot be put into practice when purchasing eggs in the ordinary way, and the latter test can only be applied at night time when an artificial light is burning. To an experienced buyer the size, weight, and appearance of eggs indicate their value, stale eggs being considerably lighter than those newly-laid. Eggs that cannot be relied on should always be broken separately.

## EGGS, TO KEEP.

Eggs contain, for their bulk, a greater quantity of nutriment than any other article of food. In 100 parts there are 73.50 parts of water, 13.50 of proteids, 11.60 of fats, and 1.40 of salts. It does not, however, follow that eggs are always suited to weak digestions; quite the contrary, for it is often a great object to give the stomach a large surface to work upon, a considerable volume of *ingesta*, over which the nutritive matter is diffused, and so exposed to the action of the gastric juice at many points; for there are many persons who cannot digest eggs, however cooked. The indigestibility of eggs decreases in proportion to the degree in which they are hardened by boiling.

### EGGS, TO KEEP, FOR WINTER USE.

**METHOD.**—Procure the eggs warm from the nest, grease them thoroughly all over with butter, lard, or oil, lay them in a box on a thick layer of bran, and surround each egg with a little bran, to prevent them touching each other. Cover each layer of eggs thickly with bran.

### EGGS WITH HAM.

**INGREDIENTS.**—6 eggs, 2 tablespoonfuls of finely-chopped cooked ham, 1 tablespoonful of browned breadcrumbs, 2 tablespoonfuls of white or brown sauce or gravy,  $\frac{1}{2}$  oz. of butter, salt, pepper.

**METHOD.**—Butter 6 china soufflé cases. Season the ham with pepper, moisten with the sauce or gravy, add a few drops of mushroom ketchup or any cruet sauce, and put the preparation into the cases. Now add the eggs, taking care to keep the yolks whole, and sprinkle on a little salt and pepper. Cover with a thin layer of breadcrumbs, place small pieces of butter on the top, bake in a moderate

Line the edge of the piedish with paste, then spread a thin layer of rice on the bottom of the dish, and cover thickly with jam or stewed fruit. Repeat until the dish is full, letting the top layer be of rice. Bake in a moderate oven for about  $\frac{1}{2}$  an hour, and serve with boiled custard sauce.

**TIME.**—About 2 hours. **AVERAGE COST,** 1s. 3d. to 1s. 6d. **SUFFICIENT** for 6 or 7 persons.

### ENDIVE.

This vegetable is generally served as a salad, but may also be served hot, stewed in cream, brown gravy, or butter; but when dressed thus,

### ENDIVE SALAD.

INGREDIENTS.—Endive, cress, shredded celery, boiled beetroot, salad dressing (*see* recipes for same).

METHOD.—Separate the endive into tufts, toss these in salad dressing, pile them high in a salad-bowl, and garnish with cress, celery, and beetroot.

Place both fish and onion in a cooking vessel with a closely-fitting lid, barely cover with stock, add the ketchup, mace, cloves, and a good seasoning of salt and pepper, cover closely and cook gently for an hour. of golden syrup, 2 pennyworth of gingerbread,  $\frac{1}{2}$  pint of cold water,  $1\frac{1}{2}$  gills of vinegar, cayenne, salt.

**METHOD.**—Cook the onions in the water until barely tender, then add the fish, cayenne and salt to taste. Crumble the gingerbread, pour over it the vinegar, stir until smooth, and add the golden syrup. When the fish is about half cooked add the above mixture, and continue to cook slowly until done, stirring frequently meanwhile. Serve hot or cold.

**TIME.**—About 1 hour. **AVERAGE COST**, 6d., exclusive of the fish. **SUFFICIENT** for 6 or more persons.

### FISH, STEWED (Passover Dish).

**INGREDIENTS.**—2 or 3 lbs. of white fish, 1 onion finely chopped, 2 tablespoonfuls of oil, 1 pint of water, 1 tablespoonful of finely-chopped parsley, ground ginger, nutmeg, salt and pepper. For the balls:  $\frac{1}{2}$  lb. of fish liver (or equal parts of liver and fish) finely chopped, 2 ozs. of bread-crumbs, 1 tablespoonful of finely-chopped parsley, 1 egg, ginger, nutmeg, pepper and salt to taste. For the sauce: the juice of 3 lemons, 2 eggs, a pinch of saffron.

**METHOD.**—Cook the onion in the oil without browning, drain off the oil, leave three parts of the onion in the stewpan, and put aside the rest. Mix together the ingredients for the balls, add the onion taken out of the stewpan, ginger, nutmeg, pepper and salt to taste, form into small balls, and roll them lightly in flour. Divide the fish into conveniently shaped pieces, place them in the stewpan, add the water, parsley, and a good sprinkling of ginger, nutmeg, salt and pepper. Lay the balls on the top, cover closely, and stew very gently until the fish is done. Beat the 2 eggs, strain over them the

lemon-juice, pour this over the fish a few minutes before serving, and afterwards stir occasionally, but do not let it actually boil, else it will curdle. When ready, transfer the fish to a hot dish and garnish, then place the balls round the base, stir the saffron into the sauce, and serve strained over the fish.

**TIME.**—About 50 minutes. **AVERAGE COST**, 6d. to 9d. per lb. **SUFFICIENT** for 5 or 6 persons. **SEASONABLE** at any time.

### FISH STOCK.

**INGREDIENTS.**—2 lbs. of any inexpensive white fish, such as plaice or flounders (the bones and trimmings of fish will serve), 1 onion sliced, a blade of mace, a bouquet-garni (parsley, thyme, bay-leaf), 12 white peppercorns, 1 teaspoonful of salt, 2 quarts of water.

**METHOD.**—Put all the ingredients together into a clean stewpan, and simmer gently for 1 hour from the time the stock begins to cook, when all that is desirable will have been extracted. Further cooking sometimes imparts a disagreeably bitter taste to the stock. The stock should be well skimmed, strained, and put into a basin. For thick soups and sauces it is ready for immediate use, but for clear fish stock (which is very rarely used), it would be necessary to clarify it with the whites and shells of eggs, allowing 4 to each quart of stock.

**TIME.**—1 hour. **AVERAGE COST**, 6d. per quart. **QUANTITY**, about 3 pints of stock.

Drain well, and serve garnished with parsley.

**TIME.**—To fry the fish, from 6 to 10 minutes, according to its size and thickness. **AVERAGE COST,** 4d. to 8d. per lb. Allow 2 lbs. for 5 or 6 persons. **SEASONABLE** all the year.

**INGREDIENTS.**—1 quart of milk, 1 tablespoonful of butter, 3 eggs,  $\frac{3}{4}$  lb. of sifted flour, 1 oz. of yeast.

**METHOD.**—Melt the butter in the milk, and when lukewarm add the eggs, the whites and yolks beaten separately, and stir in the flour. Add the dissolved yeast, beat well, and leave to rise. Then make into cakes, and bake for 15 minutes in a hot oven. This mixture will be very soft, and require very careful handling. The cakes are nice broken open while hot and toasted.

and sherry, cover closely, stand the stewpan in a tin containing boiling water, and cook until tender, but not sufficiently so as to break easily. Meanwhile, line a 6-inch diameter flan or paste-ring with paste rolled out to about  $\frac{1}{4}$  of an inch in thickness, fill it with rice, placed on an inter-lining of buttered paper, and bake in a quick oven. When done, remove the rice and paper, fill with the apples, arranged in a pyramid, strain the juice (if any) over them, and sprinkle well with sugar. Whip the whites of eggs to a stiff froth, spread it lightly over the apples, dredge well with castor sugar, and bake in a cool oven until lightly browned. Serve either hot or cold.

There are two ways of making a flan without the aid of a ring. The first is by means of a round cake tin. The tin is placed in the centre of the rolled-out paste, which is cut round, leaving a margin of about 1 inch, to be afterwards raised and moulded to the shape of the tin. Before removing the tin a narrow-folded band of greased paper must be pinned lightly round this raised border. In the second method, the bottom is cut out to the required size, and a narrow strip of paste fastened to the edge of it by means of white of egg. A band of paper must support the border, and in both cases the inside should be filled with rice before baking.

**TIME.**—About 1 $\frac{1}{4}$  hours. **AVERAGE COST,** from 1s. to 1s. 2d. **SUFFICIENT** for 4 or 5 persons.

## FLAN OF PINEAPPLE.

**INGREDIENTS.**— $\frac{1}{2}$  a preserved pineapple, castor sugar, 2 eggs,  $\frac{1}{2}$  lb. of flaky or short crust paste.

**METHOD.**—Prepare and bake the flan as for Flan of Apples. Cut

the pineapple into dice and remove all the specks. Strain the syrup, place a  $\frac{1}{4}$  pint of it in a stewpan with a dessertspoonful of sugar, bring to boiling point, and simmer for 3 or 4 minutes. Let it cool slightly, then add the yolks of the eggs, and cook gently by the side of the fire until they thicken, stirring meanwhile. Now place the pineapple in the prepared flan, cover with the custard, and spread the stiffly-whipped whites of eggs on the top. Bake in a moderately cool oven until the meringue hardens and browns slightly. Serve either hot or cold.

TIME.—About 1 hour. AVERAGE COST, about 1s. SUFFICIENT for 5 or 6 persons.

## FLAN OF STRAWBERRIES.

INGREDIENTS.—1 lb. of strawberries, castor sugar, 2 whites of eggs,  $\frac{1}{2}$  lb. of short crust.

METHOD.—Make the flan as directed in the recipe Flan of Apples; when about three-parts baked remove the rice, and fill with strawberries, from which the stalks have been removed. Pile the fruit high in the centre, dredge well with castor sugar, and cover with stiffly-whisked white of egg. Cover the surface lightly with castor sugar, replace in the oven, and bake slowly for about 15 minutes. When the meringue is set, cover with paper to prevent it browning too much before the strawberries are sufficiently cooked. Serve either hot or cold.

TIME.—About 1 hour. AVERAGE COST, 1s. 2d. to 1s. 6d. SUFFICIENT for 5 or 6 persons.

Note.—Almost any kind of fruit may be made into a flan; the varieties employed for culinary purposes may be broadly divided into 3 classes, viz., fruit requiring a comparatively large amount of cooking, such as apples,

Add the sliced vegetables, bouquet-garni, peppercorns, and salt if necessary, and cook very gently until the fowl is tender. A young fowl should be ready to serve at the end of 1 hour, but an old bird may need twice that length of time. Meanwhile, melt the butter in a stewpan, add the flour, cook for a few minutes without browning, pour in the stock (use some of the liquor in which the fowl was cooked if none other is at hand), and boil up, stirring all the time. be cut into rounds from 1½ to 1¾ inches in diameter. Season the potato liberally with salt and pepper, and stir it over the fire, adding a little milk gradually until it becomes sufficiently moist to be easily spread. Cover both sides of the prepared rounds with potato, smoothing it with a hot, wet knife. Dip the rounds in batter (or coat them with egg and breadcrumbs if preferred), and fry them in hot fat. If available, use a deep pan of fat for the purpose; if not, by having a fairly deep layer of fat, and exercising a little care, the fritters may be nicely cooked in a frying-pan.

Stew the fruit in a jar until tender, sweeten to taste, and pour both fruit and syrup into the basin. **FRUIT, STEWED.**

INGREDIENTS.—1 lb. of fruit, 4 ozs. of sugar,  $\frac{1}{4}$  pint of water.

METHOD.—Apples and pears intended for stewing should be peeled, quartered and cored. Gooseberries should have the tops and tails cut off; rhubarb is usually sliced, and if at all old the stringy outer skin is stripped off. Other fruit, such as cherries and plums, should have the stalks removed, but the stones may be taken out or not, as preferred. Bring the water and sugar to the boil, add the fruit, and stew very gently until tender. Or, place the fruit and sugar in a jar, stand the jar in a saucepan of boiling water, and cook until tender.

**FRYING BATTER.**

Put 4 ozs. of flour and a salt-spoonful of salt into a basin, add gradually  $\frac{1}{4}$  pint of tepid water and 1 tablespoonful of salad oil or clarified butter, and mix into a smooth batter. Put in the game, ham, mushrooms, parsley, the yolk of the egg, a few drops of lemon-juice, a pinch of nutmeg, salt and pepper to taste, stir over the fire until well mixed and thoroughly hot, then spread on a plate to cool. Brush the inside of 8 or 9 oval paper cases with butter, and fry sufficient parsley to form little beds for each case. Mould the game preparation into oval or cork-shaped pieces of suitable size, enclose them in pieces of caul, previously washed and well dried, and seal the ends with a little white of egg. Heat the remaining  $1\frac{1}{2}$  ozs. of butter in a sauté-pan, fry the andouillettes until nicely browned, then brush over them with warm meat glaze, and place them on the top of the fried parsley in the paper cases. Fix the decorations with a little aspic, and as soon as it has stiffened add small pieces of game, previously seasoned and freed from skin and bone. Leave plenty of space to be filled with jelly, and let the jelly covering one layer of game become quite set before adding another. Let the mould remain on ice, or in a cool place until wanted, then turn out and serve.

METHOD.—Free the game from skin and bone, chop it finely, or pass it 2 or 3 times through a mincing machine; pound in the mortar until smooth, moistening gradually with strong game gravy or stock, or, failing this, clarified butter. Season well with salt, pepper, and cayenne, then rub through a fine sieve. Press into small pots, and cover with clarified butter.

### GAME, PURÉE OF.

INGREDIENTS.—Cold game, butter, gravy, cream, salt and pepper.

METHOD.—Remove the bones, and simmer them in a little water for at least 1 hour, when gravy is not at hand. Season to taste, stir in a little cream, turn the preparation into well buttered scallop-shells, make thoroughly hot, then serve.

### GAME, SALMI OF.

TIME.—From 30 to 35 minutes.  
AVERAGE COST, about 1s. to 1s. 3d., without the game.

### GAME, TO KEEP FROM TAINTING.

In cold, frosty weather, game may be hung for 2 or 3 weeks in an ordinary larder without becoming tainted, but when the atmosphere is warm and damp, great care should be taken to hang it in a well-ventilated place, preferably where there is a current of air. The feathers are a great protection from flies, but it is advisable to apply a good sprinkling of pepper, which usually serves to keep away these pests.

### GAME, TO REMOVE TAINT FROM.

As soon as there is the least evidence of taint, remove the feathers and draw the birds, and wash them in water with plenty of salt and a little vinegar. If badly tainted, repeat the process 2 or 3 times, and afterwards rinse in fresh water. Dry thoroughly before cook-

ing. The tainted flavour may be still further removed by putting some fresh powdered charcoal, tied in muslin, inside the crop before cooking, which must be removed before the birds are served. When charcoal is not at hand it may easily be made by placing wood in a hot oven until it is burnt through.

### GARIBALDI CREAM.

INGREDIENTS.—Equal quantities of pistachio, strawberry and vanilla cream (*see* recipes for same).

METHOD.—Place a layer of strawberry cream at the bottom of a mould previously lined with jelly, or rinsed with cold water. Allow it to set, add an equal depth of vanilla cream, and when firm pour over it the pistachio cream. Let it remain on ice until set, and unmould.

TIME.—Without ice, 3 to 4 hours.  
AVERAGE COST, 2s. 6d. to 3s., according to size.

### GARLIC.

The genus *Allium* includes the chive, garlic, leek, onion, and shallot. Of these, garlic possesses the most powerful aroma and flavour. In Spain, Italy, and other parts of the Continent, garlic is highly esteemed, but unless very sparingly used the flavour is disagreeable to the English palate. The root consists of several bulbs called cloves, and sufficient flavour may be added to any dish or salad by simply rubbing the vessel containing it with the end of half of one of these cloves.

### GELATINE JELLY.

Butter a fire-proof china soufflé dish, arrange the rice and apple purée in alternate layers, letting rice form the bottom and top layers, and bake in a moderate oven from 35 to 40 minutes.

**TIME.**—About  $1\frac{1}{2}$  hours. **AVERAGE COST,** 11d. **SUFFICIENT** for 6 or 7 persons.

Bake in a moderate oven until set, then take them out carefully with a palette-knife, and wrap them round buttered cornet tins. Place one inside the other, to keep them in shape, replace in the oven, and bake until lightly browned, turning them frequently in order that all parts may be equally coloured. When cool remove the moulds, partly fill them with stiffly-whipped sweetened cream, add a little jam, and fill the remaining space with cream.

Strain over the macaroons and brandy, add the prepared fruit, and when cool stir in the stiffly-whipped cream. Continue the stirring until the mixture is on the point of setting, then turn into the prepared mould. Let it remain on ice or in a cool place until firm.

## GINGER.

Ginger is the tuber of a perennial plant called *Zingiber officinale*, growing chiefly in the West Indies. There are two varieties, the white and the black. The former is considered the better, and is prepared by washing and scalding the tubers, and then scraping them and drying them in the sun: in the black ginger the scraping process is omitted, it being merely scalded before being dried. Ginger is much used in culinary operations; grated green ginger is deemed by epicures to be an important item in a dish of curry.

### HAM, TO BAKE A

INGREDIENTS.—Ham, a common crust.

METHOD.—As a ham for baking should be well soaked, let it remain in water for at least 12 hours. Wipe it dry, trim away any rusty places underneath, and cover it with a common crust, taking care that this is of sufficient thickness all over to keep in the gravy. Place the ham in a moderately heated oven, and bake for nearly 4 hours. Take off the crust, and skin, and cover with raspings, the same as for boiled ham, and garnish the knuckle with a paper frill.

## HAM BOILED.

### HAM BOILED.

INGREDIENTS.—Ham, water, glaze or raspings.

METHOD.—In choosing a ham, ascertain that it is perfectly sweet, by running a sharp knife into it close to the bone; if, when the knife is withdrawn, it has an agreeable smell, the ham is good; but, on the contrary, should the blade have a greasy appearance and offensive smell, the ham is bad. If it has been long hung, and it is very dry and salt, let it remain in soak for 24 hours, changing the water frequently. This length of time is only necessary in the case of the ham being very hard; from 8 to 12 hours would be sufficient for a Yorkshire or Westmoreland ham. Wash it thoroughly clean and trim away from the under side all the rusty and smoked parts, which would spoil the appearance. Put it into a boiling pot, with sufficient cold water to cover it, bring it gradually to boil, and carefully remove the scum as it rises. Keep it simmering very gently until tender, and be careful that it does not stop boiling nor boil too quickly. When done take it out of the pot, strip off the skin, sprinkle over it a few bread-raspings, put a frill of cut paper round the knuckle, and serve. If to be eaten cold, let the ham remain in the water until nearly cold; by this method the juices are kept in, and it will be found infinitely superior to one taken out of the water hot. When the skin is removed sprinkle over bread-raspings, or glaze it.

TIME.—A ham weighing 10 lbs., 4 hours to simmer gently; 15 lbs., 5 hours; a very large one about 6 hours. AVERAGE COST, from 1*s.* per lb., by the whole ham.

METHOD.—Fry the shallot in the butter until slightly browned, then add the ham and stir over the fire until hot. Now put in the yolks of eggs and cream, season with pepper, stir until the mixture thickens, then dish on the croûtes, and serve sprinkled with parsley.

TIME.—15 minutes. AVERAGE COST, 8d., exclusive of the ham. SUFFICIENT for 6 or 7 persons. SEASONABLE at any time.

### HAMS AND FISH, TO SMOKE, AT HOME.

Take an old hog'shead, stop all the crevices, and fix a place to put a cross-stick near the bottom, to hang the articles to be smoked on. Next, in the side, cut a hole near the top, to introduce an iron pan filled with sawdust and small pieces of green wood. Having turned the tub upside down, hang the articles upon the cross-stick, introduce the iron pan in the opening, place a piece of red-hot iron in the pan, cover it with sawdust, and all will be complete. Let a large ham remain for 40 hours, and keep up a good smoke.

METHOD.—Rub the hams well with common salt, and leave them for a day or two to drain; then rub well in the above proportion of sugar, salt, saltpetre, and vinegar, and turn them every other day. Keep them in the pickle 1 month, drain them, and send them to be smoked over a wood fire for 3 weeks or a month.

TIME.—To remain in the pickle, 1 month; to be smoked, 3 weeks or 1 month. SUFFICIENT for 1 ham.

### HAMS, TO CURE.

INGREDIENTS.—For 2 hams, weighing each about 16 or 18 lbs., allow 1 lb. of moist sugar, 1 lb. of common salt, 2 ozs. of saltpetre, 1 quart of good vinegar.

METHOD.—As soon as the pig is cold enough to be cut up, take the 2 hams, rub them well with common salt, and leave them in a large pan for 3 days. When the salt has drawn out all the blood, drain the hams and throw the brine away. Mix sugar, salt, and saltpetre together in the above proportion, rub the hams well with these, and put them into a vessel large enough to hold them, always keeping the salt over them. Let them remain for 3 days, then pour over them 1 quart of good vinegar. Turn them in the brine every day for a month, then drain them well, and rub them with bran. Have them smoked over a wood fire, and be particular that the hams are hung as high as possible from the fire; otherwise the fat will melt, and they will become dry and hard.

TIME.—To be pickled, 1 month; to be smoked, 1 month. SUFFICIENT for 2 hams of 18 lbs. each.

## HAMS, TO CURE.

### HAMS, TO CURE (Westmoreland Recipe).

Rub and turn them every day, but do not take them out of the pickling-pan, and have them smoked for a month.

TIME.—To be pickled, 1 month; to be smoked, 1 month.

METHOD.—Cut the hare into neat slices, and put these aside while the bones and trimmings are being boiled for stock. Make the brown sauce as directed, and, when economy is an object, use equal parts of stock and stout instead of adding wine to the sauce when finished. Season the sauce to taste, put in the slices of hare, let them remain until thoroughly hot, then serve with red-currant jelly.

TIME.—15 minutes, to re-heat the hare. AVERAGE COST, 1s. 4d. to 1s. 6d.

Fry the onion brown, add it and the cloves, etc., to the hare, cover with stock, put on the lid, and cook gently for about 2 $\frac{1}{2}$  hours, or until the hare is tender. Knead the remaining oz. of butter and the flour smoothly together, divide into small pieces,

METHOD.—Prepare the hare as directed in "Trussing Poultry and Game," and cut it into pieces about the size of a small egg. Heat 2 ozs. of butter in a frying-pan, fry the pieces of hare brown, then put them into a stewjar with a little salt, the onion stuck with cloves, 1 glass of wine, the lemon-juice, peppercorns, herbs, and the stock previously made hot. Cover the jar closely, and cook in a moderate oven for about 3 hours. When the oven is too hot the jar should be placed in a baking-tin surrounded by boiling water, or, when more convenient, the jar may stand in a saucepan of boiling water on the stove. About  $\frac{1}{2}$  an hour before serving knead the remaining oz. of butter and the flour together, stir into the stock, add the other glass of wine, and seasoning if necessary. Make the forcemeat as directed, shape it into small balls, fry in hot butter or fat, and drain

well. Pile the pieces of hare on a hot dish, strain the gravy over, arrange the forcemeat balls round the base, and serve the red-currant jelly separately.

TIME.—To cook, about 3 hours.  
AVERAGE COST, 5s. 6d. to 6s. 6d.  
SEASONABLE from September to March.

## HARE, POTTED.

INGREDIENTS.—1 hare, slices of bacon, good stock, a bouquet-garni (parsley, thyme, bay-leaf), 3 cloves, 10 peppercorns, 1 blade of mace, 2 bay-leaves, cayenne, salt and pepper, clarified butter.

METHOD.—Prepare the hare as directed in "Trussing Poultry and Game," and cut it into rather small pieces. Line the bottom of a stewjar or stewpan with slices of bacon, pack the pieces of hare closely on the top, add the herbs, cloves, peppercorns, mace, bay-leaves, and a liberal seasoning of salt. Barely cover with stock, lay slices of bacon on the top, cover closely, and cook very gently either on the stove or in the oven for about 3 hours, adding more stock from time to time. Remove the bones, chop the flesh and the bacon finely, and pound these in a mortar until smooth, moistening gradually with stock, previously strained. Season rather highly, pass the preparation through a fine sieve, and press it into small pots. Cover with clarified butter, and keep in a cool, dry place.

TIME.—To stew, about 3 hours.  
AVERAGE COST, 5s. 6d. to 6s.

Note.—Cold remains of hare may also be potted, a little good gravy or brown sauce being used to moisten the preparation.

## HARE, ROASTED.

INGREDIENTS.—1 hare, bacon, veal forcemeat,  $\frac{3}{4}$  pint of stock, 1 glass of port, 2 ozs. of butter,  $1\frac{1}{2}$

## HARE, ROASTED.

ozs. of flour,  $\frac{1}{2}$  a teaspoonful of finely-chopped shallot or onion,  $\frac{1}{2}$  a teaspoonful of finely-chopped parsley, a good pinch of thyme, salt and pepper, red-currant jelly, milk for basting.

**METHOD.**—Choose a young hare, which may be known by its smooth and sharp claws, and the narrow cleft in the lip. To be eaten in perfection it should hang about 8 days. When ready for use, skin, draw, and truss according to directions given in "Trussing Poultry and Game." Force meat is a matter of taste; if used, it should be pressed lightly inside the hare and the body sewn up with a needle and strong cotton before trussing. Carefully truss, then brush the hare all over with warm butter or dripping, cover the back with slices of fat bacon, and tie it down with string in 3 or 4 places. Roast the hare in front of a clear fire or in a moderate oven from  $1\frac{1}{2}$  to 2 hours, basting it very frequently with milk, to which may be added, when economy is not an object, 1 or 2 ozs. of butter. Meanwhile, remove the gall-bladder carefully from the liver, put the liver into cold water, bring to the boil, cook for 5 minutes, then drain and chop finely. Melt the butter in a small stewpan, add the liver, onion, parsley, and thyme, fry for 10 minutes, then drain, and return the butter to the stewpan. If available, pound the liver, etc., in a mortar until smooth, and rub through a fine wire sieve. Re-heat the butter, stir in the flour, and cook over the fire until a nut-brown roux is obtained, then add the stock (if none is at hand substitute the milk used for basting), stir until it boils, then add the liver preparation, season to taste, simmer for 10 minutes, and just before serving put in the wine. When the hare is rather more than three parts cooked remove

**METHOD.**—Wipe the hare with a clean damp cloth, and cut it into small joints. Melt the butter in a stewpan, put in the hare, the vegetables sliced, and the herbs, and fry until brown. Add the stock, salt, and peppercorns, and simmer gently for 3 hours. Strain, remove the meat from the bones, and pound it well in a mortar. Rub it through a fine sieve, then return it and the stock to the stewpan, and when boiling add the wine and the cornflour, previously mixed smoothly together. Stir and cook for a few minutes, season to taste, and serve.

**METHOD.**—Wash the beans, and soak them in water for 12 hours. Melt the butter in a stewpan, put in the onion and celery sliced, fry for a few minutes without browning, then put in the beans, cover closely, and let them steam for 15 or 20 minutes. Add the stock or water,  $\frac{1}{2}$  a teaspoonful of salt, and simmer until tender ( $2\frac{1}{2}$  to 3 hours). Strain, and rub the vegetables through a wire sieve. Return to the stewpan, add the milk, and boil up. Season to taste, and serve.

**TIME.**— $3\frac{1}{2}$  to 4 hours. **AVERAGE COST,** 6*d.* without the stock. **SEASONABLE** at any time. **SUFFICIENT** for 2 or 3 persons.

**METHOD.**—Put the beans into cold water, and let them soak for several hours, according to their age; then put them into cold water, salted in the above proportion, bring them to the boil, and let them simmer very slowly until tender. Pour away the water, and let them stand by the side of the fire, with the lid of the saucepan partially off, to allow the beans to dry; then add 1 oz. of butter and a seasoning of pepper and salt. Toss the beans for about 5 minutes, then dish up and serve.

**TIME.**—After the water boils, from 2 to  $2\frac{1}{2}$  hours. **AVERAGE COST,** 4*d.* per quart. **SUFFICIENT** for 6 or 8 persons. **SEASONABLE** at any time.

**METHOD.**—Should the beans be very dry, soak them for 1 or 2 hours in cold water, and boil them until perfectly tender, as in the preceding recipe. Should the water boil away, replenish it with a little more cold to make the skin of the beans tender. Let them be thoroughly done; drain them well, then add to them the butter, chopped parsley, and a seasoning of pepper and salt. Shake the stewpan gently over the fire, and when the various ingredients are well mixed, squeeze in the lemon-juice, and serve very hot.

**METHOD.**—Divide the mutton into cutlets, and if very fat remove some of it. Heat about  $\frac{1}{2}$  the butter or fat in a stewpan, fry the meat quickly until the entire surface is lightly browned; meanwhile sprinkle it with flour so as to make it brown more quickly. When ready, add the boiling water, garlic, bouquet-garni, and a little salt and pepper, cover with a close-fitting lid, and cook very slowly for 1 hour. In the meantime heat the remaining butter, fry the turnips brown, then drain them and put them into the stewpan containing the meat. Continue to cook slowly until both meat and turnips are tender, then pile the meat in the centre of a hot dish, and arrange the pieces of turnip round the base. METHOD.—Cut the meat and onions into thin slices, and fry them in hot ghee until lightly browned. Add the flour, stir over the fire until it acquires a nut-brown colour, then cover with stock and simmer very slowly until the meat is half cooked. Strain off the gravy, and again fry the meat in hot ghee or fat with the cloves and coriander seeds previously ground to a fine powder. Replace in the stewpan, add the strained gravy, stock, and milk, bring to the boil, and thicken with ground rice. Stir over the fire for a few minutes, then add the salt, spices, carrots, soya, and paluk cut into small pieces. Fry the almonds in hot ghee until well browned, add them to the contents of the stewpan, add also the previously well washed and soaked rice, cover

closely, and cook gently for about 1 hour. Serve hot.

TIME.— $1\frac{1}{4}$  hours. COST, 2s. 3d.  
SUFFICIENT for 5 or 6 persons.

### HASTY PUDDING.

TIME.—1 hour. AVERAGE COST, 8d. or 9d. SEASONABLE at any time.

### HERB SAUCE.

METHOD.—Put the herrings in a moderate oven for 2 or 3 minutes, so as to enable the skins to be easily removed. Cut off the heads, split the fish in halves, and divide into small pieces, carefully removing the bones. Place the onion, parsley, and a seasoning of salt and pepper in a salad-bowl, stir in the oil and vinegar, and mix well. Cut the eggs and potato into small dice, mix them and the flaked fish lightly but thoroughly with the salad dressing, and decorate with the sliced beetroot and capers.

## HERRINGS, BAKED.

the cases with clarified butter. Heat 1 oz. of butter in a small stewpan, put in the mushrooms, shallot, and parsley, fry lightly, then drain off the butter into a sauté-pan. Add the brown sauce, lemon-juice, and anchovy essence to the mushrooms, etc., season to taste, and when hot pour a small teaspoonful into each paper case. Re-heat the butter in the sauté-pan, toss the roes gently over the fire until lightly browned, then place one in each case, and cover them with the remainder of the sauce. Add a thin layer of breadcrumbs, on the top place 2 or 3 morsels of butter, and bake in a quick oven for 6 or 7 minutes. Serve as hot as possible.

TIME.—20 minutes. AVERAGE COST, 1s. 6d. SUFFICIENT for 6 or 7 persons. SEASONABLE at any time.

### HERRINGS, BAKED, FRESH.

INGREDIENTS.—12 fresh herrings, salt and pepper, vinegar, 1 or 2 Spanish onions.

METHOD.—Wash the herrings in 3 or 4 waters, cut off the heads, split them open, and remove the gut and backbone. Season well with salt and pepper, and roll them up tightly, beginning with the neck of the fish. Pack the herrings closely in a piedish, cover them with thin slices of onion, half fill the dish with equal quantities of vinegar and water, and bake in a very slow oven for 2 hours. When done, remove the onion, but let the fish remain in the dish in which they were cooked until ready to serve.

### HERRINGS, BAKED, FRESH (Another Method).

INGREDIENTS.—12 herrings, 2 bay-leaves, 2 allspice, 6 cloves, a good pinch of ground mace, salt and pepper, vinegar.

## HERRINGS, BROILED.

**METHOD.**—Wash the herrings in 3 or 4 waters, cut off the heads, and remove the gut. Place them in a piedish, heads and tails alternately, sprinkle each layer with salt and pepper, and add the flavouring ingredients. Cover the fish with vinegar, or, when vinegar is not much liked, with equal quantities of vinegar and water, and bake for  $1\frac{1}{2}$  hours in a very slow oven. Serve cold.

**TIME.**—About 2 hours. **AVERAGE COST,** 6*d.* to 1*s.* per dozen. **SUFFICIENT** for 9 persons. **SEASONABLE** from May to November.

## HERRINGS, BROILED, WITH MUSTARD SAUCE.

**INGREDIENTS.**—4 fresh herrings, 1 oz. of butter,  $\frac{1}{2}$  oz. of flour, 1 teaspoonful of mustard,  $\frac{1}{4}$  pint of water,  $\frac{1}{8}$  pint of vinegar, 1 finely-chopped onion.

**METHOD.**—Fry the onion in the butter until lightly browned, put in the flour and mustard, add the vinegar and water, stir until boiling, and simmer gently for 15 minutes. Wipe and dry the herrings, remove the heads, and score them across the backs and sides, but avoid cutting the roe. Sprinkle them with salt and pepper, and grill over or in front of a clear fire from 10 to 15 minutes. Place on a hot dish, strain the sauce round, and serve.

**TIME.**— $\frac{1}{2}$  an hour. **AVERAGE COST,** 5*d.* or 6*d.* **SUFFICIENT** for 3 or 4 persons. **SEASONABLE** from July to February.

## HERRINGS, FRESH, STUFFED AND BAKED.

## HOCK CUP.

**METHOD.**—Wash and split the herrings and remove the backbone. Mix the above ingredients to make a forcemeat, season each herring with salt and pepper, spread on a thin layer of the forcemeat and roll up tightly, beginning with the neck. Pack closely in a greased piedish, cover with greased paper, and bake from 1 to  $1\frac{1}{4}$  hours in a moderate oven. Serve hot.

**TIME.**— $1\frac{1}{2}$  to  $1\frac{3}{4}$  hours. **AVERAGE COST,** 5*d.* to 6*d.* **SUFFICIENT** for 5 persons. **SEASONABLE** from May to November.

## HERRINGS, RED, OR YARMOUTH BLOATERS.

**METHOD.**—The best way to cook these is to make incisions in the skin across the fish, because they do not then require to be so long on the fire, and will be far better than when cut open. Place them on a buttered gridiron, broil over or before a clear fire for 5 minutes, turning frequently. The hard roes makes a nice relish if pounded in a mortar, with a little anchovy, and spread on toast. If very dry, soak the bloaters in warm water 1 hour before dressing.

**TIME.**—5 minutes. **AVERAGE COST,**  $1\frac{1}{2}$ *d.* each. **SEASONABLE** from May to November.

## HOCK CUP.

**INGREDIENTS.**—1 bottle of hock, 1 liqueur glass of old brandy,  $\frac{1}{2}$  a liqueur glass of Curaçoa or Bénédictine, 2 bottles of seltzer or soda water, a few strips of lemon-peel, a little borage.

**METHOD.**—Stand the wine, seltzer or soda water in a deep vessel, surround them with rough ice, and let them remain for an hour. Have the rest of the ingredients ready in a glass jug, pour in the wine, add the mineral water, and serve at once.

**HOLLANDAISE SAUCE (For Fish and certain Vegetables).**

INGREDIENTS.—1 gill of white sauce,  $\frac{1}{4}$  gill of good white stock, 1 dessertspoonful of lemon-juice, 2 yolks of eggs, 1 oz. of butter, salt and pepper.

METHOD.—Make the white sauce hot, add the stock and yolks of eggs well mixed together, and whisk by the side of the fire until the sauce thickens, but it must not be allowed to boil. Add the lemon-juice, and the butter bit by bit, season to taste, and pass through a fine strainer or tammy-cloth. Re-heat, and use as required.

TIME.—15 minutes. AVERAGE COST, 7d.

**HOME-MADE BREAD.**

INGREDIENTS.— $\frac{1}{2}$  pint of brewer's yeast, 1 lb. of potatoes, 1 peck and  $\frac{1}{2}$  lb. of flour, 2 quarts of cold water, and  $1\frac{1}{2}$  ozs. of salt.

METHOD.—Procure  $\frac{1}{2}$  pint of good brewer's yeast, fresh from the brewhouse, and see that it weighs at least  $3\frac{1}{2}$  ozs. Having procured the yeast, boil about 1 lb. of potatoes in their skins, first washing them clean. When cooked, strain away the liquor they were boiled in, turn into a clean wooden pail, add  $\frac{1}{2}$  lb. of flour, and pound them well with the end of a rolling-pin, then add 2 quarts of cold water, stir the ingredients up, and mix well. Put 1 peck of flour into a large pan, make a hole in the centre, place a couple of sticks across the top, set a sieve over the hole in the centre, and strain the liquor into it, using more water to rinse through every particle of the potatoes, leaving the skins perfectly clean in the sieve; now add the  $\frac{1}{2}$  pint of yeast, and stir in sufficient flour to make a thin batter, cover over, and leave the mixture for about 2 hours. By

that time it should have fermented and dropped about 1 inch. Then add  $1\frac{1}{2}$  ozs. of salt and sufficient water to make the flour into dough. Knead well, and leave dry, cover over with a clean cloth, and let it prove for  $1\frac{1}{2}$  hours. Then knead it over, and throw out on to the board, divide into convenient-sized pieces, mould or make up into suitable shaped loaves, prove, and then bake in a moderate oven. The time taken to bake will, of course, depend upon the size of the loaves. A 2-lb. loaf in a moderate oven will take from 20 to 40 minutes, and larger loaves in proportion.

**HOME-MADE BREAD (Another Method).**

INGREDIENTS.—1 peck of flour, 2 ozs. of compressed or distillery yeast,  $1\frac{1}{2}$  ozs. of salt, 3 quarts of water.

METHOD.—Turn the flour into a clean pan, and make a "bay," or hole in the centre. Let the water be about 80° Fahr., or blood-warm, so it feels neither hotter nor colder than the hand when placed in the water. Put the water into a bowl, add the yeast and salt, and stir up well with the hand till dissolved, then turn it into the bay, and make up into rather a stiff dough; knead well, and leave dry, cover over with a clean cloth, and set the pan of dough in a warm place to prove for at least 2 hours, then give it another good kneading and drying over, and leave it for another hour; turn out on to the board, divide into suitable-sized pieces, make into loaves, prove and bake.

**HOMINY CROQUETTES (Vegetarian Dish).**

**TIME.**—To fry the croquettes, 5 minutes. **AVERAGE COST,** 9d. to 10d. **SUFFICIENT** for 4 or 5 persons.

### HOMINY FRITTERS (Vegetarian Dish).

**INGREDIENTS.**—Cold hominy porridge, fat to fry, flour.

**METHOD.**—Cut the cold porridge into slices, about 1 inch thick, flour them lightly on both sides, and fry in a frying-pan with butter or oil. Serve hot.

**TIME.**—10 minutes. **AVERAGE COST,** uncertain.

### HOMINY PORRIDGE (Vegetarian Dish).

**INGREDIENTS.**—Hominy, water, a piece of butter.

**METHOD.**—Pour boiling water on the hominy over night, and let it stand until morning. Then add more water if necessary, and boil for at least  $\frac{1}{2}$  an hour. Stir in the butter just before serving.

**TIME.**— $\frac{1}{2}$  an hour. **AVERAGE COST,** 2d. or 3d. **SUFFICIENT** for 2 persons.

*Note.*—Hominy is the inner part of the maize and bears about the same relation to maize-meal that coarsely-ground flour does to whole wheat meal. It is not so nourishing, but being less oily it keeps well, and has not the characteristic flavour of maize-meal, which is unpleasant to some persons.

### HONEY CAKE.

Put it into a buttered tin, and bake it from  $\frac{1}{2}$  to  $\frac{3}{4}$  of an hour, and let it be eaten warm.

**TIME.**— $\frac{1}{2}$  to  $\frac{3}{4}$  of an hour. **AVERAGE COST,** 8d. **SUFFICIENT** for 3 or 4 persons.

### HONEY PUDDING.

**METHOD.**—Cook the florador in the milk for 10 minutes, then pour the preparation over the breadcrumbs, add the honey, lemon-rind, ginger, warmed butter, and the yolks of the eggs, and beat well. Whisk the whites stiffly, stir them lightly into the rest of the ingredients, and turn the mixture into a well-buttered plain mould. Steam gently from  $1\frac{3}{4}$  to 2 hours, and serve with a suitable sauce.

**TIME.**—About 2 hours. **AVERAGE COST,** 9d. **SUFFICIENT** for 5 or 6 persons.

### HONEYCOMB CREAM (South African Recipe).

**INGREDIENTS.**—1 quart of milk, 1 oz. of castor sugar,  $\frac{1}{2}$  oz. of gelatine, 3 eggs, vanilla to taste.

**METHOD.**—Dissolve the gelatine in a little hot water. Beat the yolks of the eggs until light, and whisk the whites to a stiff froth. Boil the milk, stir in the sugar, add the yolks of eggs and dissolved gelatine, and

## HOP BEER.

INGREDIENTS.—5 ozs. of hops, 8 gallons of water, 2½ lbs. of brown sugar, 3 or 4 tablespoonfuls of yeast.

METHOD.—Boil hops and water together for 45 minutes, add the sugar, and, when dissolved, strain into a bowl or tub. As soon as it is lukewarm add the yeast, let it work for 48 hours, then skim well, and strain into bottles, or a small cask. Cork securely, and let it remain for a few days before using it.

## HORSERADISH SAUCE.

### HORSERADISH.

METHOD.—This root scraped is served with hot roast beef, and is also used for garnishing cold roast beef and many kinds of boiled fish. Let the horseradish remain in cold water for 1 hour; wash it well, and with a sharp knife scrape it into very thin shreds, commencing from the thick end of the root. Arrange some of it lightly in a small glass dish, and use the remainder for garnishing the joint; it should be placed in tufts round the border of the dish, with 1 or 2 bunches on the meat.

TIME.—20 to 30 minutes. AVERAGE COST, 6*d.* to 7*d.*

Shape the dough in buns, and lay them apart on buttered tin plates or baking-sheets in rows at least 3 inches apart, to rise for  $\frac{1}{2}$  an hour. Place a cross mould on them (this may be done roughly with the

Pour down the side of the dish  $\frac{1}{2}$  pint of hot stock or hot water seasoned with salt and pepper. Brush the upper layer of potatoes over with warm butter, cover with a buttered paper, and bake for 2 hours in a moderate oven. The paper must be removed during the latter part of the time to allow the potatoes to become crisp and brown. When ready to serve, pour in a little gravy, and send the rest to table in a tureen. The hot pot must be served in the dish in which it is baked.

Season each layer with salt and pepper and a pinch of dried savoury herbs. Moisten with the stock, cover the jar, and place it to cook in a fairly hot oven for about  $1\frac{1}{2}$  hours. The stew must cook

slowly, and the fat must be carefully removed before the dish is sent to the table. When ready for serving, sprinkle a little chopped parsley on top.

TIME.—To cook, about  $1\frac{1}{2}$  hours. AVERAGE COST, 1s. 8d. SUFFICIENT for 4 persons. SEASONABLE at any time.

Let the meat simmer gently for 1 hour, then put in the onion, carrot, and lettuce;  $\frac{1}{2}$  an hour afterwards add the turnip, peas, and cauliflower, and cook slowly for 1 hour, or until all the vegetables are tender; then add the chopped parsley, season to taste, and serve.

Whisk the white of egg to a stiff froth, stir it and the dissolved soda lightly into the mixture, and pour into well-buttered shallow tins. Bake in a moderately hot oven. If more convenient, new milk and 2 level teaspoonfuls of baking-powder may be used instead of sour milk and soda.

METHOD.—Mix the cream of tartar and salt with the flour, and dissolve the soda in the milk. Stir the eggs into the flour, add the milk gradually, and beat well. Pick and mash the berries, stir them into the batter, and add the dissolved soda. The batter should be rather thick; a little more flour should therefore be dredged in if the required consistency has not been obtained. Turn into a well-buttered basin, and boil for 1 hour, or steam for 1½ hours. Serve with a sweet sauce.

TIME.—To cook, from 1 to 1½ hours. AVERAGE COST, 10*d*. SUFFICIENT for 1 pudding. SEASONABLE, July to September.

METHOD.—Blanch and split the almonds, and mix all the dry ingredients together. Warm the butter in a clean basin, add the sugar, and beat to a cream with the hand; add the eggs 1 at a time, beating well after each addition; when all are in, add the other ingredients, well mix, and turn out into a round papered and greased tin. Bake for about  $1\frac{1}{2}$  hours. When cold cover with white icing, and decorate to taste.

TIME.— $1\frac{1}{2}$  hours. AVERAGE COST, 1s. 8d. SUFFICIENT for 1 cake.

### ICED CAKE (Another Method).

INGREDIENTS.— $\frac{3}{4}$  lb. of icing sugar, the whites of 2 eggs, orange-flower water.

METHOD.—Beat these ingredients as in preceding recipe, and while the cake is still warm, pour and smooth the icing evenly over it; then dry in a moderate heat to harden, but not to colour the icing.

AVERAGE COST.—Icing sugar, 6d. per lb.

### ICED FRUIT.

Fruit of nearly every description may be iced by first dipping it in beaten white of egg, and afterwards in crushed loaf sugar, the process being repeated until a sufficiently thick coating is obtained. Pine-apples should be sliced; pears, peaches, and plums should be halved after removing the skins; cherries, strawberries, and similar fruit are iced with the stems on; and from oranges and lemons every

Beat the sugar and whites of eggs together until quite smooth, dip each orange in separately, and tie them securely to a stick. Place the stick across the oven, which must be very cool, and let them remain until dry. If well coated and smoothed with a palette knife they have the appearance of balls of snow.

**METHOD.**—Put some icing sugar into a clean basin, taking sufficient to ice the cakes, which, of course, will always depend upon the thickness put upon them, and pour upon the sugar sufficient boiling water to mix it up into rather a thick cream, beating it up well with a wooden spoon, adding the water gradually to the sugar until the proper consistency is obtained, then use as previously directed.

This icing will dry rather quickly, with a good gloss. It can be flavoured with any kind of essence, and coloured with vegetable colours as may be required.

**TIME.**— $\frac{1}{2}$  an hour. **AVERAGE COST,** icing sugar, 6*d*. per lb. **SUFFICIENT** for 1 cake.

Arrange the slices of kidney neatly on a hot dish, season the sauce to taste, and strain it over. When intended for luncheon the kidney may be served within a border of mashed potato, and the dish garnished with small cooked tomatoes. Pass a steel skewer through them, to keep them open, brush over with salad-oil or oiled butter, season with salt and pepper, and grill them over a clear fire, cooking the cut side first. Time required for cooking depends upon the size of the kidney and individual taste; 5 minutes will be found sufficient for a small kidney, and 8 minutes for a large one; kidneys are almost uneatable when over-cooked. Roast the coriander seed, crush it with the cloves, cardamoms, ginger, pepper, and salt to a fine powder, and rub the mixture well into the fowl. Heat the ghee in a stewpan, fry the onions until lightly browned, then sprinkle in the turmeric, add the cream and stock, and stir until it boils. TIME.—3 hours. Cost, 2s. 3d. SUFFICIENT for 6 persons.

### LAMB, BOILED.

The leg of lamb is the part usually selected for boiling, but this method of cooking is not often adopted. Careful and frequent skimming is essential to preserve the colour of the meat, and the liquor in which it is cooked must contain nothing to destroy or overpower its delicate flavour. The peas, carrots, or whatever is served as a garnish should be cooked separately, and the meat masked with a good white or Béchamel sauce.

### LAMB, BLANQUETTE OF.

INGREDIENTS.—2 lbs. of loin, neck, or breast of lamb, 1 onion sliced, a bouquet-garni (parsley, thyme, bay-leaf), 6 white peppercorns. For the sauce:  $\frac{1}{2}$  pint of stock,  $1\frac{1}{2}$  ozs. of butter, 1 oz. of flour, 2 yolks of eggs, 2 tablespoonfuls of cream, salt and pepper.

METHOD.—Cut the meat into pieces about 2 inches square, and put them into a stewpan with the onion, herbs, peppercorns, and a little salt. Cover with cold water, and cook gently for 2 hours. Melt the butter, add the flour, stir, and cook for a few minutes without browning. When the meat is ready, strain from it  $\frac{1}{2}$  pint of the liquor, and add it to the blended

## LAMB, BREAST OF.

flour and butter. Stir until boiling, simmer for 3 or 4 minutes, then add the yolks of eggs and cream, previously beaten together. Stir and cook gently for a few minutes, taking care that it does not boil, or it may curdle. Arrange the meat neatly on a hot dish, strain the sauce over, and serve.

TIME.—About  $2\frac{1}{4}$  hours. AVERAGE COST, from 8*d.* to 1*s.* 2*d.* per lb. SUFFICIENT for 3 or 4 persons. SEASONABLE from April to October.

## LAMB, BREAST OF, STUFFED.

For the mirepoix or foundation:  $\frac{3}{4}$  of a pint of stock, 2 onions, 2 carrots,  $\frac{1}{2}$  a small turnip, a bouquet-garni, 6 peppercorns, 2 ozs. of butter.

METHOD.—Remove the bones, flatten the meat with a cutlet-bat or rolling-pin, season well with salt and pepper, spread on the veal forcemeat, roll up tightly, and bind securely with string. Slice the vegetables, and put them into a large stewpan with the butter, place the meat on the top, cover, and cook gently for 20 minutes; then add the herbs, peppercorns, and stock to nearly cover the vegetables. Place a buttered paper over the meat, put on the lid, and braise for 2 hours. Cook the beans in salted water and drain them well. Melt the butter in a stewpan, put in the beans, season with salt and pepper, toss over the fire for a few minutes, and serve them arranged in small groups round the dish. Before serving, brush the meat over with glaze, and send the sauce to table in a sauce-boat.

TIME.— $2\frac{1}{2}$  hours, to cook the meat. AVERAGE COST, 8*d.* to 10*d.* per lb. SUFFICIENT for 3 or 4 persons.

## LAMB CUTLETS, COLD.

### LAMB CROQUETTES.

INGREDIENTS.— $\frac{1}{2}$  lb. of finely-chopped cooked lamb, 1 teaspoonful of finely-chopped parsley,  $\frac{1}{4}$  of a teaspoonful of finely-chopped shallot or onion,  $\frac{1}{2}$  oz. of butter,  $\frac{3}{4}$  oz. of flour,  $\frac{1}{4}$  pint of strong stock, salt and pepper, 1 egg, breadcrumbs, frying-fat.

METHOD.—Melt the butter in a stewpan, fry the onion lightly, then stir in first the flour and afterwards the stock, and boil gently for 3 or 4 minutes, stirring briskly meanwhile. Add the meat, parsley, and a good seasoning of salt and pepper, stir over the fire until well mixed, and turn on to a plate to cool. Form into cork-shaped pieces, coat carefully with egg and breadcrumbs, and fry in hot fat. (See Beef Croquettes.)

TIME.—To fry, 4 to 5 minutes. AVERAGE COST, 5*d.*, exclusive of the meat. SUFFICIENT for 3 or 4 persons. SEASONABLE from April to October.

### LAMB CUTLETS, COLD.

There are various ways of preparing this dish. The cutlets may be cooked in butter (sautéed or grilled), or braised and pressed. The former method is, no doubt, more simple, although braising is highly recommended on account of the fine flavour imparted to the meat by this method of cooking. The cutlets must be carefully pared, trimmed, and flattened before they are cooked, and when cooked they must be pressed beneath a heavy weight, and kept thus until they are quite cold. To finish them, proceed as follows:—

Pour a layer of aspic jelly in a sauté-pan, or large dish; when set arrange the cutlets in it, cover with another layer of aspic jelly, and let this also set. Place the pan or dish on the ice for about 1 hour, then cut the cutlets out with a

## LAMB CUTLETS.

sharp knife, and arrange them in a circle on a round dish. Fill the centre of the dish with some kind of cooked vegetables—peas, beans, asparagus points, or macedoine—previously seasoned with mayonnaise or French salad-dressing, and garnish with neatly-cut cubes of set aspic jelly, and serve.

AVERAGE COST.—1s. to 1s. 2d. per lb. Allow 9 or 10 cutlets for 6 or 7 persons.

### LAMB CUTLETS, GRILLED.

INGREDIENTS.—9 or 10 cutlets cut from the best end of the neck,  $\frac{1}{2}$  pint of shelled peas,  $\frac{1}{4}$  pint of good gravy or demi-glacé sauce, salt and pepper, salad-oil.

METHOD.—Trim the cutlets into a good shape, brush over with salad-oil, then grill them over or in front of a clear fire for about 8 or 10 minutes, turning them 3 or 4 times. Season the cutlets lightly with salt and pepper, cover the end of each bone with a cutlet-frill, arrange neatly in a circle on a border of mashed potato, serve the peas in the centre, and pour the hot sauce round.

TIME.—30 minutes altogether. AVERAGE COST, 1s. to 1s. 2d. per lb. SUFFICIENT for 6 or 7 persons.

### LAMB CUTLETS, STEWED WITH TOMATOES.

INGREDIENTS.—8 or 9 lamb cutlets, 4 tomatoes, 1 oz. of butter, 1 finely-chopped shallot or small onion, stock or water, salt and pepper.

METHOD.—Trim the cutlets, and cut the tomatoes into thick slices. Heat the butter in a sauté-pan or shallow stewpan, fry the cutlets quickly until lightly browned on both sides, then add the shallot to blend, then add the tomatoes, and season with salt and pepper. Cover closely, and cook very slowly for  $1\frac{1}{2}$  hours,

## LAMB CUTLETS.

adding a very small quantity of stock or water from time to time if necessary; but when the tomatoes are juicy, none will be needed. When ready, remove the cutlets and keep them hot, pass the tomatoes through a fine sieve, season to taste, and if more sauce is liked add a little stock and thicken with cornflour. Arrange the cutlets in a close circle on a hot dish, pour the sauce round, and serve.

TIME.—About 2 hours. AVERAGE COST, 11d. to 1s. 2d. per lb. SUFFICIENT for 6 or 7 persons. SEASONABLE from April to October.

### LAMB CUTLETS, TO PREPARE.

METHOD.—Take the best end of a neck of lamb, remove the chine bone and saw the rib bones across, reducing the length to  $3\frac{1}{2}$  or 4 inches, according to the size of the fillet or lean portion of the meat. Trim off the greater part of the fat, and scrape the end of the bone, leaving about  $\frac{3}{4}$  of an inch quite bare. A more even surface and a better shape may be obtained by flattening the cutlets with a wetted cutlet-bat or chopping-knife. The cutlets may be plainly grilled or fried, coated with egg and breadcrumbs, and fried or braised, and glazed. The most suitable vegetable accompaniments are asparagus, green peas, and spinach; and an almost infinite number of sauces may be served with the cutlets, and allowed to give their name to the dish when it is a simple one.

### LAMB CUTLETS WITH CUCUMBER.

INGREDIENTS.—8 or 9 cutlets from the best end of the neck, or 6 or 7 chops from the loin, 1 large or 2 small cucumbers, 3 ozs. of butter,  $\frac{1}{4}$  pint of gravy, 1 egg, breadcrumbs, salt and pepper, butter or clarified fat for frying the cutlets.

## LAMB CUTLETS.

**METHOD.**—Peel the cucumber, remove the seeds, and cut it into  $\frac{1}{2}$ -inch dice. Heat the butter in a stewpan, put in the cucumber, season well with salt and pepper, cover closely, and let it cook very gently in the butter for nearly  $\frac{1}{2}$  an hour, or until the pieces are tender but unbroken, then drain well. Trim the cutlets into a good shape, sprinkle both sides of them with salt and pepper, dip them in egg, crumb them, and then fry in hot butter or fat in a sauté or frying-pan until lightly browned on both sides. Arrange the cutlets neatly on a thin potato border, serve the cucumber in the centre, and pour the hot sauce round.

**TIME.**—To cook the cutlets, from 8 to 10 minutes. **AVERAGE COST,** 1s. to 1s. 2d. per lb. **SUFFICIENT** for 6 or 7 persons.

## LAMB CUTLETS WITH SPINACH.

**INGREDIENTS.**—8 or 10 cutlets,  $\frac{3}{4}$  pint of spinach purée (*see* Spinach Soup), 1 oz. of butter, 1 egg, bread-crumbs, salt and pepper,  $\frac{1}{2}$  pint of gravy, tomato or any other sauce preferred.

**METHOD.**—Trim the cutlets, brush them over with beaten egg seasoned liberally with salt and pepper, and coat with breadcrumbs. Prepare the spinach purée as directed, and keep it hot until required. Heat the butter in a sauté or frying-pan, fry the cutlets quickly until lightly browned on both sides, and drain them free from fat. Arrange in a close circle on a hot dish, pile the purée in the centre, and pour the sauce round.

**TIME.**—To fry, 5 or 6 minutes. **AVERAGE COST,** 1s. to 1s. 2d. per lb. **SUFFICIENT** for 5 or 6 persons. **SEASONABLE** from April to October.

*Note.*—Peas, asparagus, beans, or dressed potatoes may be substituted for the spinach.

**METHOD.**—Trim the meat, and cut into 2-inch squares. Heat the butter in a stewpan, put in the onion sliced, bay-leaves, cloves, mace, peppercorns,  $\frac{1}{2}$  a saltspoonful of pepper, salt, and the meat, cover, and cook very gently for  $\frac{1}{2}$  an hour, stirring occasionally. Now add the boiling stock or water and salt to taste, and simmer gently for 1 hour longer, 20 minutes before serving mix the flour smoothly with a very small quantity of cold water, and add to it gradually about  $\frac{1}{2}$  pint of the liquor from the stewpan, stirring all the time. Bring the contents of the stewpan to boiling point, pour in the thickened liquor, boil for 2 or 3 minutes, then simmer until the meat is sufficiently cooked. When ready, arrange the pieces of meat inside a border of mashed potato, or otherwise, as may be preferred, season the sauce, add to it the capers to taste, and pour over the meat.

## LAMB, ROAST.

Lamb, when roasting, requires more attention than any other kind of meat. No part of it must be underdone, and to secure this result without drying and hardening the thinner portions to an undesirable degree, much care is necessary. The intense heat to which all meat must first be subjected for a few minutes is applied for too short a time to affect the colour of a joint kept constantly in motion, and the subsequent browning and over-

## LAMB, ROAST.

cooking of any part may be obviated by covering the meat with 2 or 3 folds of well-greased paper and by frequent basting. The amount of heat applied to any part may be regulated by raising or lowering the joint on the spit, and the rate of cooking by increasing or decreasing the distance between the joint and the fire.

### LAMB, ROAST FORE-QUARTER.

INGREDIENTS.—Fore-quarter of lamb, mint sauce.

METHOD.—(See Lamb, Roast). Serve with gravy made from the sediment in the roasting-tin, and mint sauce.

TIME.— $1\frac{1}{2}$  to 2 hours, according to size. AVERAGE COST, 11d. to 1s. 2d. SUFFICIENT for 8 to 12 persons, according to weight. SEASONABLE, grass lamb from March to September.

### LAMB, SHOULDER OF, BRAISED.

INGREDIENTS.—A shoulder of lamb, larding bacon, 1 pint of stock, 3 ozs. of butter,  $1\frac{1}{2}$  ozs. of flour, 2 shallots finely-chopped, 1 teaspoonful of finely-chopped parsley. For the mirepoix: 2 onions, 2 carrots,  $\frac{1}{2}$  a small turnip, a bouquet-garni (parsley, thyme, bay-leaf), 6 peppercorns. Meat glaze.

METHOD.—Bone the shoulder, season well with salt and pepper, roll up tightly, and bind securely with string. Cut the lardoons, or strips of bacon for insertion in the meat, about 2 inches long, and rather more than  $\frac{1}{8}$  of an inch in thickness, and insert close rows in the rolled meat. Slice the vegetables, and put them into a large braize-pan with  $1\frac{1}{2}$  ozs. of butter, place the meat on the top, cover closely, and cook gently for 20 minutes. Add the herbs, peppercorns, and stock to nearly cover the vegetables, place a buttered

## LAMB, SHOULDER OF.

paper over the meat, put on the lid, and braise in the oven for 2 hours. Half an hour before serving, melt the remaining butter in a stew-pan, fry the shallots slightly; then add the flour, and cook until it acquires a nut-brown colour. When the meat is ready, remove the strings, brush it over with stock reduced to glaze, and put it into a moderate oven for a few minutes to crisp the bacon. Strain the stock, increase the quantity to  $\frac{3}{4}$  pint, pour it over the brown roux or thickening, and stir until it boils. Add to it the parsley, season to taste, simmer for 2 or 3 minutes, then serve in a sauce-boat. Cooked tomatoes, mushrooms, fancifully-cut turnips and carrots, small timbales of spinach or green pea purée, haricots verts, and macedoine are all suitable garnish for this dish.

TIME.—To braise, about 2 hours. AVERAGE COST, 10d. to 1s. 1d. per lb.

Note.—The loin, neck, or breast may be cooked in this manner. If preferred, the shoulder may be stuffed with sausage meat or veal forcemeat, and the larding may in all cases be omitted, if more convenient.

### LAMB, SHOULDER OF, STUFFED.

INGREDIENTS.—A shoulder of lamb, veal forcemeat,  $\frac{3}{4}$  pint of stock, 1 oz. of butter,  $\frac{3}{4}$  oz. of flour, 2 or 3 ozs. of dripping, salt and pepper.

METHOD.—Remove the bones and boil them for at least 1 hour for stock. Flatten the meat with a cutlet-bat or heavy knife, season well with salt and pepper, and spread on the forcemeat. Roll up lightly, tie securely with string, and place in a baking-tin in which the dripping has been previously melted. Baste well, put it into a moderate oven, and cook gently for about  $1\frac{1}{4}$  hours, basting frequently. Mean-

while, fry the butter and flour together until well browned, add the prepared stock, stir until boiling, and season to taste. Remove the meat and keep it hot, pour off the fat without disturbing the sediment in the tin, and add the brown sauce. Replace the meat, and cook it gently for 20 minutes longer, basting frequently meanwhile. Serve with a little sauce poured over the meat, and send the remainder to table in a tureen. If preferred, the meat may be braised according to directions given in reference to "Lamb, Loin of, Rolled and Braised."

TIME.—About  $1\frac{1}{2}$  hours. AVERAGE COST, 11d. to 1s. 2d. per lb. SUFFICIENT for 4 or 5 persons. SEASONABLE all the year.

### LAMB, STEWED.

INGREDIENTS.—3 or 4 lbs. of loin, neck, or breast of lamb, 2 ozs. of butter, the juice of  $\frac{1}{2}$  a lemon, 6 mint leaves,  $\frac{1}{4}$  of a teaspoonful of pepper,  $\frac{1}{2}$  a pint of Soubise sauce.

METHOD.—Saw the long bones across, and either skewer or bind the meat into a compact form. Heat the butter in a large stewpan, add the pepper, mint, and lemon-juice, put in the meat, cover closely, and cook very gently for about 1 hour, turning the meat 2 or 3 times, in order to brown the entire surface. Serve the Soubise sauce separately; or, instead of this sauce, add  $\frac{1}{4}$  pint of stock mixed with 1 dessertspoonful of flour to the butter, etc., in the stewpan, boil for 2 or 3 minutes, season to taste, improve the colour if necessary by adding a few drops of liquid caramel. Dish up and serve hot.

For the seasoning: 1 tablespoonful of flour,  $\frac{1}{4}$  of a teaspoonful of powdered mixed herbs,  $\frac{1}{4}$  of a teaspoonful of salt,  $\frac{1}{8}$  of a teaspoonful of pepper, a pinch of finely-grated lemon-rind,  $\frac{1}{2}$  pint of gravy, stock, or water.

METHOD.—Cut the meat into fillets about  $2\frac{1}{2}$  inches in diameter, sprinkle both sides with seasoning, and put aside for 1 hour. Cut the tips of the asparagus about 2 inches long, and boil them in salted water until tender, the stems being put aside to be afterwards used for soup. Heat the butter in a frying-pan, cook the collops quickly until lightly browned on both sides, then remove and keep them hot. Sprinkle the flour on the bottom of the pan, cook until well browned, and add the gravy or stock. Season to taste, boil rapidly for about 5 minutes, then strain. Arrange the collops in a close circle on a hot dish, place the asparagus tips in the centre, and pour the sauce round.

METHOD.—Wash the fry, put it into a stewpan with sufficient cold water to just cover it, bring to the boil, cook for 2 or 3 minutes, then drain and dry well. Mix the flour,

## LAMB'S HEAD.

1 saltspoonful of salt, and  $\frac{1}{2}$  the quantity of pepper into a smooth batter with the 2 tablespoonfuls of cold water, and add to it the egg, previously beaten. Heat the clarified fat in a frying-pan; dip the pieces of fry in the batter, and fry them gently until nicely browned on both sides, but take care not to overcook the liver. Have ready a very hot dish on which to put the fry, and keep it as hot as possible while the gravy is being made. The fat in the pan may be used for this purpose, or, if preferred, it can be poured away, and 1 oz. of butter used instead. Stir the flour into the fat, and when brown pour in the hot water, stir and boil for five minutes, season to taste, and either strain it round the dish or serve it separately in a sauceboat.

TIME.—To cook, about 15 or 20 minutes. AVERAGE COST, 10d. to 1s. per lb. SUFFICIENT for 3 or 4 persons.

Note.—If preferred, the fry may be coated with egg and breadcrumbs, instead of the batter, before frying.

## LAMB'S HEAD AND PLUCK.

INGREDIENTS.—A lamb's head and pluck (which consists of the heart, liver, and lungs, or lights), 2 ozs. of butter,  $1\frac{1}{2}$  ozs. of flour, 1 large onion, 1 carrot,  $\frac{1}{2}$  a small turnip, a bouquet-garni (parsley, thyme, bay-leaf), 6 peppercorns, 1 teaspoonful of finely-chopped parsley, salt and pepper, 1 egg, browned breadcrumbs.

METHOD.—Wash the head well, put it into a stewpan, cover it with cold water, and bring to the boil, strain, scrape off the hairs, if any, and rinse well. Wash the pluck in cold water, and put it into the stewpan with the head; cover with cold water, and when boiling skim well. When all the scum has been

## LAMBS' SWEETBREADS.

removed, put in the sliced vegetables, the bouquet-garni, peppercorns, and  $\frac{1}{2}$  a teaspoonful of salt, and simmer gently for about 1 hour. Divide the head, take out the tongue and brains, and keep the head hot over a saucepan of boiling water. Skin the tongue, cut it into dice, chop the brains coarsely, and cut the pluck into small pieces. Meanwhile, the liquor in the pan must have been allowed to boil rapidly to reduce, and before using it for the sauce it must be strained and well skimmed. Melt the butter in a stewpan, add the flour, and cook for 5 minutes. Pour in  $1\frac{1}{4}$  pints of the liquor, and stir until it boils; then put in the pluck, tongue, and brains, add the parsley, and season to taste, cover closely, re-heat, and keep hot until required. Coat the head with beaten egg and browned breadcrumbs, bake it in a moderate oven for 10 or 15 minutes, basting frequently with hot fat, then drain well. Place the head in the centre of a hot dish, pour the mince round, and serve.

TIME.—From  $1\frac{3}{4}$  to 2 hours. AVERAGE COST, from 2s. to 2s. 6d. SUFFICIENT for 5 or 6 persons.

Add a little salt, bring to the boil, cook gently for 15 minutes, then press between 2 dishes until cold. Roll lightly in a little flour seasoned with salt and pepper, coat carefully with egg and breadcrumbs, and fry in hot butter or fat until

METHOD.—Rub the fish well with salt, wash it in warm water, and remove the cartilage and strings which run down the back. Fill the body with the prepared farce, sew it up securely, and fasten round 2 or 3 thicknesses of buttered or greased paper. Cover the fish with hot water, boil gently for 20 minutes, then drain and dry well. Put it into a baking-dish, in which a little butter or fat has been previously melted, and baste well. Bake gently for about  $\frac{1}{2}$  an hour, basting frequently, then strip off the skin, brush the fish over with beaten egg, and coat it lightly with breadcrumbs. Bake the fish for about 20 minutes longer, or until nicely browned, then serve it garnished with sliced lemon, and send the sauce to table in a tureen.

## LANDRAIL.

fry the onion slightly, then add the flour, and fry slowly until well browned. Roast the birds before a clear fire, keep them well basted, and serve with fried breadcrumbs, with a tureen of brown gravy. If preferred, bread sauce may also be sent to table with them.

Let it simmer gently, and as it melts pour it carefully from the sediment. Put it into small jars or bladders for use, and keep it in a cool place. The

## LARK PIE.

flead, or inside fat of the pig, before it is melted makes exceedingly light crust, and is particularly wholesome. It may be preserved a length of time by salting it well, and occasionally changing the brine. When wanted for use, wash and wipe it, and it will answer for making paste as well as fresh lard.

AVERAGE COST, 10d. per lb.

## LARK PIE.

METHOD.—Bone the larks and stuff them with the farce, cut the beef into small thin slices, and the bacon into strips. Put a layer of beef at the bottom of a piedish, arrange the larks on the top, intersperse the remainder of the meat and the strips of bacon, season well with pepper and salt,  $\frac{3}{4}$  fill with stock, and cover with the paste. Brush over with yolk of egg, bake in a quick oven until the paste has risen and become set, then cook more slowly for about 1 hour. Before serving add the remaining stock, pouring it carefully through the hole in the centre of the pie. Serve either hot or cold, but a little gelatine must be added to the stock if the pie is intended to be eaten cold, in order that the gravy may form a jelly.

### LEMON.

This fruit is a native of Asia, and was first cultivated in England in the beginning of the seventeenth century. Lemons are imported in large quantities from the Azores, St. Helena, Spain, and Portugal, those from Spain being considered the best. The juice of the lemon is invaluable in many culinary operations, being employed in some

## LEMON BISCUITS.

as a bleaching agent, in others to expedite disintegration and thereby soften the fibres of the substance, while a third purpose it fulfils is that of adding piquancy to sauces and other preparations. Citric acid extracted from lemons is largely employed as an anti-scorbutic. The rind of the lemon contains an essential oil of very high flavour and fragrance. This oil is contained in tiny cells on the surface of the lemon, immediately beneath which lies a white pith with a bitter, disagreeable flavour. As a rule, the rind is grated, but the best way to obtain the largest amount of the essence from the lemon without encroaching on the white pith, is to pare off the rind in small, almost transparent, strips with a sharp knife. The peel, preserved by boiling in syrup, forms the well-known candied peel.

### LEMON BISCUITS.

INGREDIENTS.—1  $\frac{1}{4}$  lbs. of flour,  $\frac{3}{4}$  lb. of castor sugar, 6 ozs. of fresh butter, 4 eggs, the grated rind of a lemon, 2 dessertspoonfuls of lemon-juice.

METHOD.—Rub the butter into the flour, stir in the castor sugar and very finely-minced lemon-peel, and when these ingredients are thoroughly mixed, add the eggs, which should be previously well whisked, and the lemon-juice. Beat the mixture well for 1 or 2 minutes, then drop it from a spoon on to a buttered tin, about 2 inches apart, as the biscuits will spread when they get warm; place the tin in the oven and bake the biscuits a pale brown from 15 to 20 minutes.

TIME.—15 to 20 minutes. AVERAGE COST, 1s. 6d. SUFFICIENT for 3 or 4 biscuits. SEASONABLE at any time.

Weigh the flour on to the board, make a bay, put in the sugar and butter, add a few drops of essence of lemon, and rub the ingredients together till smooth; then add the eggs and dissolved ammonia, wet up into a smooth paste, divide it into 3-oz. pieces, flatten it out, wash it over with milk, turn it over on to castor sugar, place the buns on to greased baking tins, lay a slice of lemon-peel on the top, and bake in a warm oven.

## LETTUCES.

METHOD.—These form one of the principal ingredients of summer salads. They are seldom served in any other way, but may be stewed and sent to table in a good brown gravy flavoured with lemon-juice. In preparing them for salad carefully wash them free of dirt, pick off all the decayed and outer leaves, and dry them thoroughly by shaking them in a cloth. Cut off the stalks, and either halve, or cut the lettuces into small pieces. The manner of cutting them up entirely depends on the salad for which they are intended. In France, the lettuces are sometimes merely wiped with a cloth, and not washed, the cooks there declaring that the act of washing them injuriously affects the pleasant crispness of the plant; in this case, scrupulous attention must be paid to each leaf, and the grit thoroughly wiped away.

AVERAGE COST.—From 1*d.* to 2*d.* per head. OBTAINABLE all the year.

## LEVERET, ROASTED.

## LOBSTERS, TO DRESS.

### LOBSTERS, TO BOIL.

INGREDIENTS.— $\frac{1}{4}$  lb. of salt to each gallon of water.

METHOD.—Buy the lobsters alive, and choose those that are heavy and full of motion, which is an indication of their freshness. When the shell is encrusted, it is a sign they are old; medium-sized lobsters are the best. Have ready a stewpan of boiling water, salted in the proportion mentioned above, put in the lobsters and keep them boiling quickly from 20 to 45 minutes, according to their size, and do not forget to skim well. If boiled too long, the meat becomes thready, and if not done enough, the spawn is not red. Rub the shells over with a little butter or sweet oil, which must be wiped off again.

TIME.—Small lobster, 20 minutes to  $\frac{1}{2}$  an hour; large ditto,  $\frac{1}{2}$  to  $\frac{3}{4}$  of an hour. AVERAGE COST, medium size, 1s. to 3s. 6d. Seasonable all the year, but best from June to September.

### LOBSTERS, TO DRESS.

Wash the lobster well before boiling, tie the claws securely, and throw the lobster, head first, into a saucepan of salted boiling water; this method instantly destroys life. Then boil the lobster gently from 20 to 40 minutes, according to its size, but avoid overcooking, which causes the flesh to become hard. When cool enough to handle, rub over with a little salad-oil to brighten the colour. When quite cold, break off the claws and tail, and divide the latter lengthwise by the line running from head to tail. Place the body upright in the centre of a dish, with one-half of the tail on either side, and at the ends arrange the claws, which should previously be cracked with a hammer without injuring the flesh.

Allow 15 to 20 minutes for a mackerel of medium size, and a few minutes longer when broiled in paper. Serve with maître d'hôtel butter or parsley sauce.

Hang the mackerel in a row by means of a stick pushed through the sockets of the eye, and dry them in the sun or expose them to the heat of the fire for a day or two. If the ordinary means of smoking in the chimney are available they should be employed; if not, half fill an old cask, open at both ends with sawdust put a red-hot iron in the middle of it, and suspend the fish across the cask, which must be covered to keep in the smoke. In about 30 hours the fish will be ready.

### MEAT, TO PREPARE, FOR COOKING (Jewish Recipe).

Cover the meat with cold water, let it remain for  $\frac{1}{2}$  an hour, then wash it well, to remove as much of the blood as possible. Place it on a koshering board, or, if the perforated wooden draining board known by this name is not available, use a basket-lid, placed in a slanting position, to allow the water to drain away more freely. When sufficiently drained, sprinkle every part of the meat with coarse salt, let it remain for 1 hour, then remove the salt by washing the meat 3 times under the tap. Drain it thoroughly on a clean cloth, and afterwards cook in the usual manner.

**Liver** must be cut open and well washed in cold water, and may be fried on a shovel over the fire. Before being cooked, it must be again washed and sprinkled with salt.

**Hearts**, before being placed in the water, must be cut, to allow the blood to flow out easily.

**Fat for Clarifying, or Suet**, must first have the skin removed, and then be subjected to the same washing, salting, and drying processes described for preparing meat.

METHOD.—Melt the butter in a saucepan, stir in the flour and cook for 2 or 3 minutes. The water now to be added must not be quite boiling, but it may be hot, and as the sauce has to be constantly stirred until it boils to incorporate the substances contained in it, considerable time is saved by adding warm or hot water, instead of cold. Bring to the boil, and simmer for a few minutes. Season, and use as required.

TIME.—10 to 15 minutes. AVERAGE COST, 2d.

Cover a ¾-inch thick board or a baking-tin with foolscap paper (slightly oiled). Put the preparation into a forcing-bag attached to a plain pipe, and press on to the paper small round or oval portions in rows about 1 inch apart. Dredge them well with castor sugar, and bake in a cool oven for about 2 hours, when they should have acquired a pale fawn colour, and be perfectly crisp. Turn them over, scoop out any portion not hardened, and let them remain in a warm place until dry. Use as required.

TIME.—Altogether, about 2½ hours. AVERAGE COST, 8*d.* SUFFICIENT for 1 dish.

Cover over with a clean cloth, and keep the dough in a warm place for 3 hours; at the end of that time turn it out on to the board, and give it a good kneading and dusting over; cover again, and keep warm for 1 hour for the dough to recover itself, then divide it into convenient-sized pieces and mould them up round. Let them stand on the board, and cover up with a cloth to prove. When light enough, wash over with a beaten-up egg, using a brush for the purpose. When all the loaves are washed over, take a sharp knife and cut them five or six times crosswise. ### MINT.

This aromatic plant belongs to the natural order *Labiatae*. The *Mentha vividis*, the variety cultivated in our kitchen gardens, has a more agreeable flavour than its congeners, and it is the one generally used in cookery. Mint possesses the property of correcting flatulence, hence the custom of using it in pea-soup and with new potatoes.

### MINT SAUCE (To serve with Roast Lamb).

INGREDIENTS.—4 dessertspoonfuls of chopped mint, 2 dessertspoonfuls of sugar,  $\frac{1}{4}$  pint of vinegar.

METHOD.—The mint should be young and fresh-gathered. Wash it free from grit, pick the leaves from the stalks, mince them very fine, put them into a tureen, add the sugar and vinegar, and stir until the former is dissolved. This sauce is better by being made 2 or 3 hours before it is required for the table, as the vinegar then becomes impregnated with the flavour of the mint. Good white wine vinegar is preferable to ordinary malt vinegar. Sugar should be added with discretion until the required degree of sweetness is obtained.

AVERAGE COST.—3d. SUFFICIENT to serve with a quarter of lamb.

### MINT VINEGAR.

INGREDIENTS.—Vinegar, mint.

METHOD.—The mint for this purpose must be young and fresh. Pick the leaves from the stalks, and

### MIREPOIX.

A mirepoix is the foundation for flavouring sauces, braised meats, and a number of thick soups. It usually consists of equal quantities of onion and carrot, half the quantity of turnip, 1 or 2 slices of raw ham or bacon, a little butter, a bouquet-garni (parsley, thyme, bay-leaf), a few peppercorns, and 1 or 2 cloves. In recipes where the mirepoix occurs the exact quantities of the ingredients comprising it are given. In all cases where it is intended the mirepoix should form the foundation for braising, sufficient vegetables should be used to make a substantial bed upon which to place the bird, joint, etc.

## MUFFINS.

**METHOD.**—Wash, peel, and boil the potatoes, rub through a colander, add the water (just warm enough to bear the hand in it without discomfort); then dissolve the yeast and salt in it, and stir in sufficient flour to make a moist paste. Beat it well in a deep bowl, and then clear off the paste from the hands; cover over with a clean cloth, and leave it to rise in a warm place. When it has well risen, and is light and spongy, turn it out on the table, dredge over with flour, and then divide it off into pieces about 3 ozs. in weight; roll them up into round shapes, and set them on a wooden tray, well dusted with flour, to prove. When light enough, see that the hot plate is hot, and then carefully transfer the muffins from the tray, one at a time, using a thin tin slice for the purpose, taking particular care not to knock out the proof, or the muffins will be spoilt. When they have been properly cooked on one side, turn over with the slice and cook the other side. When the muffins are done, brush off the flour, and lay them on a clean cloth or sieve to cool.

Put it on a toasting fork, and hold it before a clear fire till one side is nicely browned, but not burnt; turn, and toast it on the other. Do not toast them too quickly, otherwise the middle of the muffin will not be warmed through. When done, divide them by pulling them open; butter them slightly on both sides, put them together again, and cut them into halves. When sufficient are toasted and buttered, pile them on a very hot dish, and send them very quickly to table.

**TIME.**—From 25 to 30 minutes to bake them. **AVERAGE COST,** 1d each.

Cellars are often utilised for this purpose. In Paris most of the mushrooms are grown on artificially-formed beds, in dark, disused quarries.

Carefully remove the little weed which is found under the black tongue. Melt the butter, add the flour, and cook for 3 or 4 minutes, then pour in the mussel liquor, and stir until it boils. Cool slightly, then add the yolks of the eggs, vinegar, and parsley, season to taste, and stir by the side of the fire until the eggs thicken. Put in the mussels to re-heat, and serve in the sauce.

TIME.—About  $\frac{1}{2}$  an hour. AVERAGE COST, 8d. to 10d. SUFFICIENT for 2 or 3 persons. SEASONABLE all the year, but best in winter.

## MUSTARD.

There are two varieties of mustard seeds. *Sinapis Nigra* (the common), and *Sinapis Alba* (the white). The mustard of commerce is composed of the seeds of both varieties, ground and mixed to-

gether. Mustard taken in small quantities is said to stimulate the appetite and aid digestion. The pungency of mustard is not fully developed until moistened with water; its flavour is best when freshly prepared.

## MUSTARD (TO MIX).

Mustard is usually prepared for use by simply mixing it smoothly with cold water, and it is generally considered of right consistency when sufficiently moist to drop slowly from the spoon. A salt-spoonful of salt added to each tablespoonful of mustard not only improves the flavour, but it also prevents the mustard from becoming so quickly dry. If desired, the pungency may be greatly increased by mixing a little chili vinegar and cayenne with the mustard, the flavour of the whole being softened by the addition of a good pinch of sugar. On the other hand, when a very mild flavour of mustard is liked, it may be obtained by using cream or milk, preferably the former, instead of water. In any case it should be mixed in small quantities, as it quickly loses its flavour and fresh appearance.

## MUSTARD SAUCE (For Fresh Herrings).

INGREDIENTS.—1 teaspoonful of mustard, 1 dessertspoonful of flour, 1 oz. of butter, 1 gill of boiling water, 1 teaspoonful of vinegar.

METHOD.—Mix the flour and mustard, knead them well with the butter, stir in the boiling water, turn into a stewpan, and boil for 5 minutes. Add the vinegar, and serve.

TIME.—10 minutes. AVERAGE COST, 2d.

**MUTTON, BOILED.**

The leg, neck, and breast are the parts usually selected for boiling. When intended for this purpose, the meat should not be allowed to hang many days, for the least taint spoils the flavour of boiled mutton. Too often the natural flavour of a boiled joint is overpowered by the flavour of the vegetables with which it is cooked. To avoid this, only the quantity sufficient to impart a slight flavour should be cooked in the liquor, and the remainder boiled separately. The flavour of the meat is thus preserved, and the vegetables are a better colour when cooked more quickly than is possible if their rate of cooking is adapted to the meat. The side of the joint intended to be dished upwards should be put downwards in the boiling-pot, for however gentle the ebullition of the water may be, its action somewhat spoils the upper surface of the meat. Moreover, any scum that is not removed during the process of cooking is apt to fall on the upper surface of the meat, and impair its appearance. The time allowed for boiling is from 20 to 25 minutes for each lb. of meat, according to the thickness of the joint.

Roast before a clear fire, or bake in a moderately hot oven from  $2\frac{1}{4}$  to  $2\frac{1}{2}$  hours, and when ready, serve with brown sauce or good gravy.

METHOD.—Remove the bones and any superfluous fat, flatten the meat and season it well. Mix the breadcrumbs, suet, parsley, herbs, and a good seasoning of salt and pepper together, and moisten with milk. Spread the mixture on the meat, roll up lightly, and bind securely with string. Flatten the meat, spread the forcemeat evenly, roll up as lightly as possible, and secure with string. Put the roll into a stewpan containing just sufficient stock to cover it, or failing stock, use water and add the bones removed from the meat, also vegetables and herbs to give flavour. Simmer very gently for  $2\frac{1}{2}$  hours, then transfer to an earthenware vessel, and strain the stock. Add to it half its quantity of vinegar and a tablespoonful of salt, and pour the mixture over the meat, which it should completely cover. If pearl-barley is used, blanch it by putting it into cold water and bringing to the boil. Cut the vegetables into rather small dice or cubes, and add them to the broth when it has cooked for 1 hour; add also the pearl-barley. When the broth has simmered gently for 3 hours, strain and return to the saucepan. Carefully remove any fragments of bone from the meat, vegetables and pearl-barley, and return. Meanwhile, make the paste as directed, and roll it into a round or oval form of smaller dimensions than the casserole. Lay the paste on the top of the meat, replace the lid, and cook gently for  $1\frac{1}{2}$  hours longer. Divide the paste into sections before serving.

## MUTTON CUTLETS, BRAISED.

$\frac{1}{8}$  of a teaspoonful of ground cloves,  $\frac{1}{8}$  of a teaspoonful of ground cardamoms, the juice of 5 limes, 1 clove of garlic,  $\frac{1}{2}$  pint of cream,  $\frac{1}{2}$  a teaspoonful of black pepper, salt.

**METHOD.**—Pound the green ginger with a little ghee, season it well with salt, and rub it into the meat, previously cut into small thin slices. Let it stand for  $\frac{1}{2}$  an hour, and meanwhile fry the onions in hot ghee until lightly browned. Put the meat into the stewpan, add the garlic very finely chopped, ground cloves, cardamom seeds, and pepper, and fry until the meat is cooked, taking care the onions do not become burnt. Now add the cream, ground almonds, saffron, the juice of the limes, and salt to taste, cover closely, and cook as slowly as possible for 20 minutes. Serve with plainly boiled rice.

**TIME.**— $2\frac{1}{4}$  hours. **SUFFICIENT** for 5 or 6 persons. **COST**, 2s. 2d.

## MUTTON CUTLETS, BRAISED.

Slice the vegetables, put them into a stewpan with the butter and bouquet-garni, lay the cutlets on the top, put on the lid, and cook gently for 20 minutes. Have the stock boiling, pour into the stewpan as much of it as will three-quarters cover the

vegetables, and add the remainder of the stock as that in the pan reduces. Cover the cutlets with a buttered paper, put on the lid, and cook gently for about 50 minutes on the stove or in the oven. When done, brush over one side with meat glaze, and put them into a hot oven for a few minutes to crisp the bacon. Arrange them in a close circle on a border of potato, serve the prepared vegetables in the centre, and pour round the sauce.

**TIME.**—To cook the cutlets, about  $1\frac{1}{4}$  hours. **AVERAGE COST**, 1s. per lb. **SUFFICIENT** for 5 or 6 persons.

## MUTTON CUTLETS (Chaud-froid of).

**INGREDIENTS.**—8 or 10 cutlets from the best end of the neck, 6 ozs. of liver farce, 6 leaves of French gelatine,  $\frac{1}{2}$  pint of tomato sauce,  $\frac{1}{2}$  pint of Béchamel sauce, dressed salad, salt and pepper.

**METHOD.**—Braise the neck in the usual way; when cold cut it into neat cutlets, trim off the greater part of the fat, season with salt and pepper, and cover one side with a thin layer of the liver farce. Dissolve the gelatine in 2 tablespoonfuls of cold water, and divide it equally between the tomato and Béchamel sauces, which should be warm when the gelatine is added. Let the sauces cool slightly, then coat the covered sides of the cutlets, making one half red and the other white. Let them remain on ice or in a cool place until the sauce is quite set, then arrange them in a circle in alternate colours, place a frill on each cutlet, and serve the dressed salad in the centre.

**TIME.**— $1\frac{1}{2}$  hours after the meat is cooked. **AVERAGE COST**, 3s. 6d. to 4s. **SUFFICIENT** for 7 or 8 persons.

## MUTTON CUTLETS, GRILLED.

*Note.*—Brown sauce may be substituted for the white, the combination of red and brown being very effective; or a green chaud-froid sauce may be used instead of the tomato sauce.

### MUTTON CUTLETS, GRILLED.

**INGREDIENTS.**—7 or 8 cutlets cut from the best end of the neck, 7 or 8 very small tomatoes stuffed with mushrooms,  $\frac{1}{4}$  pint of demi-glace sauce,  $1\frac{1}{2}$  ozs. of butter, breadcrumbs.

**METHOD.**—Trim and flatten the cutlets into a good shape. Prepare the tomatoes as directed, and bake them until tender in a moderate oven. Warm the butter, dip in the cutlets, taking care that the sides are well coated, cover lightly with breadcrumbs, and press them firmly on with a knife. Grill them over or in front of a clear fire, turning them carefully 2 or 3 times in order that both sides may be equally cooked and browned. Arrange neatly on a border of potato, serve the tomatoes piled in the centre, and pour the sauce round.

**TIME.**—From 8 to 10 minutes, to cook the cutlets. **AVERAGE COST,** 1s. per lb. **SUFFICIENT** for 5 or 6 persons.

### MUTTON CUTLETS (Reform Style).

**METHOD.**—Mix the breadcrumbs and chopped ham together, and

## MUTTON CUTLETS.

season rather highly with salt and pepper. Flatten the cutlets slightly, trim them to a good shape, and coat them first with beaten egg, and afterwards with the breadcrumbs, etc. Melt the butter, add all the shredded ingredients and a little pepper, moisten with stock, and make thoroughly hot. Fry the cutlets quickly in hot butter or fat until nicely browned, and drain free from fat. Arrange them on a hot dish in a close circle with the garnish in the centre, and the sauce poured round, or, if preferred, in a close row with the sauce poured round, and the garnish arranged lightly on one side.

**TIME.**—To fry, 6 or 7 minutes. **AVERAGE COST,** about 4s. 6d. **SUFFICIENT** for 5 or 6 persons. **SEASONABLE** at any time.

### MUTTON CUTLETS (Tinned Meat).

**INGREDIENTS.**—1 tin of roast mutton, 1 egg, breadcrumbs, butter or frying-fat,  $\frac{1}{3}$  of a pint of tomato sauce.

**METHOD.**—Carefully remove the meat from the tin, slice it rather thickly, and trim it to a cutlet shape, putting all jelly and trimmings aside to be afterwards converted into croquettes, rissoles, or mince. Coat the cutlets with egg and breadcrumbs, which should be highly seasoned to counteract the lack of flavour in the meat, fry in hot butter or fat until nicely browned, and serve with the sauce poured round. The dish may be varied by serving tinned peas with it, haricots verts, flageolets, turnips and carrots, spinach or asparagus.

**TIME.**—About  $\frac{1}{2}$  an hour. **AVERAGE COST,** 1s. 6d. to 1s. 9d. **SUFFICIENT** for 5 or 6 persons.

### MUTTON CUTLETS, TO PREPARE.

The best end of a neck of mutton must be selected for this purpose.

## MUTTON CUTLETS.

Saw off the chine bone and the ends of the rib bones, leaving the part to be divided into cutlets about 4 inches long, but this must be determined by the size of the fillet or lean portion of the meat. The end of each bone must be scraped quite bare to the depth of about  $\frac{3}{4}$  of an inch. A more even surface and a better shape may be obtained by beating them slightly with a wetted cutlet-bat or chopping-knife. When the mutton is large, 1 cutlet may be cut with a bone and 1 cutlet between each of the bones; when the cutlet frills are attached the appearance of the boneless cutlets is identical with the rest. Nearly all the fat must be trimmed off, and should be clarified and used for frying or making plain pastry and cakes, while the lean parts may be boiled down for gravy or sauce to be served with the cutlets, or when not required for this purpose they may be put into the stock-pot.

### MUTTON CUTLETS WITH GREEN PEAS.

INGREDIENTS.—7 or 8 cutlets cut from the best end of a neck of mutton, 1 pint of shelled peas,  $\frac{1}{2}$  pint of Espagnole sauce, 3 ozs. of butter, 1 egg, breadcrumbs, salt and pepper.

METHOD.—Trim the cutlets and flatten them with a wetted cutlet-bat or heavy chopping-knife. Beat the egg, add to it  $\frac{1}{2}$  oz. of warm butter and a liberal seasoning of salt and pepper; dip the cutlets in the preparation, and coat them carefully with breadcrumbs. Boil the peas, drain them well, and just before serving put them into a stewpan with 1 oz. of butter and a little salt and pepper, and toss over the fire until well mixed with the butter. Heat the remaining  $1\frac{1}{2}$  ozs. of butter in a sauté-pan and fry the cutlets quickly until lightly

browned on both sides, then drain well. Arrange them overlapping each other on a thin potato border, serve the peas in the centre, and pour the hot Espagnole sauce round.

TIME.—To cook the cutlets, from 7 to 10 minutes. AVERAGE COST, 1s. per lb. SUFFICIENT for 5 or 6 persons.

### MUTTON CUTLETS WITH SOUBISE SAUCE.

INGREDIENTS.—7 or 8 cutlets cut from the best end of the neck,  $\frac{1}{2}$  pint of Soubise sauce,  $\frac{1}{4}$  pint of demi-glace or brown sauce, salt and pepper, salad-oil, or butter.

METHOD.—Trim and flatten the cutlets into a good shape, brush them over with oiled butter or salad-oil, and grill over or in front of a clear fire for 8 or 10 minutes. The cutlets should be turned 2 or 3 times, and before serving sprinkle both sides with a little salt and pepper. Arrange them in a close circle on a border of mashed potato, serve the Soubise sauce in the centre, and pour the other sauce round.

TIME.—8 to 10 minutes. AVERAGE COST, 1s. per lb. SUFFICIENT for 5 or 6 persons.

### MUTTON DORMERS.

METHOD.—Cook and dry the rice as directed, add to it the meat, suet, shallot, and a good seasoning of salt and pepper, mix the ingredients well together, and form them into cork-shaped pieces. Coat with

egg and breadcrumbs, fry in hot fat until nicely browned, and drain well. Serve garnished with crisply-fried parsley, and send the gravy to table in a tureen.

TIME.—To fry, 5 or 6 minutes. AVERAGE COST, 5*d.*, in addition to the meat. SUFFICIENT for 3 or 4 persons. SEASONABLE at any time.

## MUTTON, ESSENCE OF (Invalid Cookery).

INGREDIENTS.—1 lb. of lean mutton, 1 gill of water, salt and pepper.

METHOD.—Cut away every particle of fat, shred the meat finely, and place it in a jar with the cold water. Cover closely, place the jar in a saucepan of boiling water or in a cool oven, and cook gently for at least 2 hours. Strain and press all the liquid from the meat, and add salt and pepper to taste. This preparation being highly concentrated, should be administered in small quantities.

TIME.—2½ hours. AVERAGE COST, 10*d.*

## MUTTON, FILLET OF, TO DRESS.

INGREDIENTS.—A large leg of mutton, veal forcemeat, gravy or suitable brown sauce.

METHOD.—This method is specially suited to a small household where cold meat is disliked. Cut off the knuckle part which, braised or boiled, will supply a dinner on a following day. From the other end of the leg cut a roasting piece, thus leaving the fillet 3 or more inches in thickness. Remove the bone, flatten the meat with a cutlet-bat or rolling-pin, season well with salt and pepper, and spread on the forcemeat. Roll up tightly, bind securely with string, and either boil, braise, roast, or bake according to the directions given under respective headings. If preferred, the fillet may be grilled, or roasted in a

Dutch oven, the forcemeat, of course, being omitted. It will be found excellent if lightly fried, and afterwards stewed slowly, and served with tomatoes or mushrooms. (See also Oxford John, and Mutton Pudding.)

## MUTTON, GRILLED, WITH TOMATO SAUCE.

INGREDIENTS.—Two slices of mutton, about an inch in thickness, cut from the middle of the leg, ½ pint of tomato sauce. For the marinade: 2 tablespoonfuls of salad-oil or oiled butter, 1 dessertspoonful of vinegar, ½ a teaspoonful of finely-chopped parsley, ¼ of a teaspoonful of finely-chopped shallot or onion, a pinch of powdered mixed herbs, 1 saltspoonful of salt, ½ a saltspoonful of pepper, potato garnish.

METHOD.—Put the slice of meat on to a dish, pour over it the marinade, and let it remain for 2 hours, turning and basting occasionally. When ready to cook, drain, dry well, brush over with salad-oil or warm butter, and grill over a clear fire for about 15 minutes. Have ready the tomato sauce and some crisply-fried straws, ribbons, or chips of potato, place the meat on a hot dish, arrange the potatoes round the base, and serve the sauce in a sauceboat. The dish may be varied by serving with it mushroom sauce and baked tomatoes, or baked or stewed mushrooms, and brown sauce.

TIME.—To grill the meat, about 15 minutes. AVERAGE COST, 1*s.* per lb. SUFFICIENT for 3 or 4 persons.

## MUTTON HAM, TO CURE.

in a mortar, dry them well before the fire, then rub them into the meat, taking care that the parts surrounding the knuckle bone are done thoroughly. Repeat the rubbing every morning for a fortnight, turning the meat each day. At the end of the time dry well, rub the centre surface with common salt, let the meat remain under heavy pressure for 3 or 4 days, and smoke it for at least 10 days before using.

### MUTTON, HASHED.

INGREDIENTS. — Cold mutton, pickles, brown sauce, breadcrumbs, salt.

METHOD.—Cut the meat into thin slices, and boil the bones and trimmings for stock for the brown sauce. Cover the bottom of a greased piedish with a layer of breadcrumbs, add 2 or 3 tablespoonfuls of brown sauce, and on the top arrange the slices of meat slightly overlapping each other. Sprinkle with chopped gherkins (or other pickle), salt and pepper, and cover lightly with the breadcrumbs and sauce. Repeat the process until the materials are used, making the top layer a rather thick one of breadcrumbs. Cover with a greased paper, and bake very gently for about  $\frac{1}{2}$  an hour. Serve in the dish in which it is cooked.

TIME.—1 hour. SEASONABLE at any time.

### MUTTON, HUNTER'S.

INGREDIENTS.—A boned leg of mutton, 8 ozs. of common salt, 4 ozs. of bay-salt,  $1\frac{1}{2}$  ozs. of moist sugar, 1 oz. of saltpetre, 1 teaspoonful of ground allspice,  $\frac{1}{2}$  a teaspoonful of ground cloves,  $\frac{1}{2}$  a nutmeg grated, slices of bacon.

METHOD.—Mix the salting ingredients well together, and rub the

## MUTTON, KNUCKLE OF.

mixture over the entire surface of the meat, the skin being previously closely scored, to allow the flavour to penetrate. Turn and rub the meat daily for a fortnight, then rinse in warm water, and bind it into a good shape. Place in a deep baking-dish or tin with about  $\frac{1}{2}$  pint of water, cover first with slices of bacon, and afterwards with several folds of well-greased paper, which must be secured round the edge of the dish or tin to keep in the steam. Cook as gently as possible for 4 hours, press until cold, then glaze, and use as required.

TIME.—To pickle, 14 days. To cook, 4 hours. AVERAGE COST, 1s. per lb.

### MUTTON, IN IMITATION OF VENISON.

INGREDIENTS.—A neck, loin, or leg of mutton,  $\frac{1}{4}$  pint of vinegar,  $\frac{1}{4}$  pint of claret or other red wine, 3 bay-leaves, 3 shallots sliced, 1 teaspoonful of pepper, 1 teaspoonful of pounded allspice.

METHOD.—Let the meat hang at least 3 or 4 days, then rub it over with mixed pepper and allspice, and repeat the rubbing at intervals for 48 hours. Mix together the vinegar, wine, shallots, and bay-leaves, baste the meat well with the mixture, and let it remain for 2 days, basting frequently. When ready, wash in warm water, dry thoroughly, and enclose in a flour and water paste. Cook according to directions given for dressing venison, and serve with good gravy and red-currant jelly.

TIME.—About 8 days. AVERAGE COST, 10d. to 1s. per lb. SEASONABLE at any time.

### MUTTON, KNUCKLE OF, TO BOIL.

INGREDIENTS.—1 knuckle of mutton (*see* Mutton, Fillet of, to Dress), 1 onion, 1 carrot,  $\frac{1}{4}$  of a turnip, a

## MUTTON, LEG OF.

bouquet-garni (parsley, thyme, bay-leaf), 8 peppercorns, salt.

**METHOD.**—Prepare and slice the vegetables. Place the knuckle in a stewpan just large enough to hold it, and containing sufficient boiling stock or water to barely cover the meat. Add the vegetables, herbs, peppercorns, and a little salt, and simmer very gently for about  $1\frac{1}{2}$  hours (*see* Mutton, Boiled). If liked, the stock in which the mutton has cooked may be converted into onion sauce.

**TIME.**—About  $1\frac{1}{2}$  hours. **AVERAGE COST,** 10d. per lb.

### MUTTON, LEG OF, BRAISED.

**INGREDIENTS.**—A small leg of mutton, boned, stock or water. When using the latter, add 2 onions, 1 carrot,  $\frac{1}{2}$  a turnip, a bouquet-garni (parsley, thyme, bay-leaf), 10 peppercorns. For the forcemeat:  $\frac{3}{4}$  lb. of mutton trimmings,  $\frac{3}{4}$  lb. of raw ham or bacon, 1 Spanish onion finely chopped, a clove of garlic bruised, salt and pepper. For the sauce:  $1\frac{1}{2}$  ozs. of butter,  $1\frac{1}{2}$  ozs. of flour, 1 pint of stock, slices of fat bacon.

**METHOD.**—Remove any superfluous fat, and from the cavity from which the bone was taken trim off the lean meat needed for the forcemeat. Chop both bacon and mutton finely, add the onion, garlic, and a good seasoning of salt and pepper, moisten with a little stock; and fill the cavity with the mixture. Secure any opening that would allow the forcemeat to escape, and bind the meat into a good shape with strong string. Put the meat into a stewpan containing hot stock, or vegetables and hot water, to half cover the meat, lay slices of fat bacon on the top of it, and put on a close-fitting lid. Stew very gently for 4 hours, adding more stock or water when necessary. Half an hour before serving heat

## MUTTON, LEG OF.

the butter in a stewpan, add the flour and stir and cook slowly until well browned. Remove the string from the meat and keep hot; strain 1 pint of the stock on to the browned flour and butter, stir until boiling, and season to taste. The meat may either be glazed or served with a little of the sauce poured over, and the remainder sent to table in a tureen.

**TIME.**—About 4 hours. **AVERAGE COST,** 10d. per lb. **SUFFICIENT,** 1 leg for 10 or more persons. **SEASONABLE** at any time.

### MUTTON, LEG OF, BRAISED (Another Method).

**INGREDIENTS.**—1 small leg of mutton. For the mirepoix: 2 onions thickly sliced, 2 carrots thickly sliced, 1 small turnip thickly sliced, a bouquet-garni (parsley, thyme, bay-leaf), 10 peppercorns. For the sauce:  $1\frac{1}{2}$  ozs. of butter,  $1\frac{1}{2}$  ozs. of flour, 2 shallots finely chopped, 1 pint of stock, salt and pepper, stock or water.

**METHOD.**—Put the mirepoix into a braising-pan or large stewpan, nearly cover with boiling stock or water, lay the meat on the top, and wrap round it a well-greased paper. Put on the lid, which should fit closely, and cook gently from 3 to  $3\frac{1}{2}$  hours, adding more stock or water as that in the pan becomes reduced. Half an hour before serving melt the butter in a stewpan, fry the shallots lightly, then add the flour, and cook until it acquires a nut-brown colour. Keep the meat hot, strain the stock, increase the quantity to 1 pint, pour it over the browned flour and butter, and stir until boiling. Season to taste, boil gently for ten minutes, then pour a little over the meat, and serve the remainder in a tureen. Cooked tomatoes, mushrooms, fancifully-cut turnips, and carrots,

## MUTTON, LEG OF.

small timbales of spinach or green pea purée, haricots verts, and macedoine are all suitable garnishes for this dish.

TIME.—About 4 hours. AVERAGE COST, 10d. per lb. SEASONABLE at any time.

METHOD.—Blanch the oysters in their own liquor, which afterwards strain. Chop the oysters coarsely, add to them the breadcrumbs, yolks of eggs, parsley, shallot, and a little salt and pepper, and moisten slightly with oyster liquor. Press the forcemeat lightly into the cavity from which the bone was removed, carefully secure any opening there may be, and bind with strong string. Boil gently in stock, or water flavoured with vegetables and herbs, from  $2\frac{1}{2}$  to 3 hours, according to size, and serve with oyster sauce.

TIME.—To boil,  $2\frac{1}{2}$  to 3 hours. AVERAGE COST, 10d. per lb.; oysters, 1s. to 1s. 6d. per dozen. SUFFICIENT for 12 or more persons, according to size. SEASONABLE from September to April.

## MUTTON, LOIN OF, BONED AND STUFFED.

## MUTTON, MINCED.

METHOD.—Bone the meat, trim away any superfluous fat, and flatten with a cutlet-bat or rolling-pin. Mix all the dry ingredients well together, add a good seasoning of salt and pepper, stir in the egg and as much milk as is necessary to moisten the whole. Spread the forcemeat on the inner surface of the meat, roll up tightly, and secure with tape. Bake the meat in a moderately hot oven for 2 or  $2\frac{1}{2}$  hours, according to size, basting frequently with hot fat; or, if preferred, the meat may be either braised or stewed according to directions given under the respective headings. METHOD.—Melt the butter in a stewpan, fry the onion until lightly browned, add the flour and brown it also. Stir in the stock, add the walnut liquor and seasoning to taste, and simmer gently for 10 minutes. Put in the meat, draw the stewpan aside, where the contents will be kept just below simmering point, and let it remain for at least  $\frac{1}{2}$  an hour. METHOD.—Select tender, juicy meat, trim off all the fat, and cut the lean into tiny dice. Melt the butter in a stewpan, fry the onion lightly, add the meat, and cook gently for a few minutes, browning it slightly. Stir in the flour, add the stock, and a little salt and pepper, and simmer very gently until tender (about  $\frac{1}{2}$  an hour). Serve garnished with triangles of thin toasted bread.

TIME.—40 minutes. AVERAGE COST, 6d.

Slice the vegetables, put them into a stewpan with 1 oz. of butter, the herbs, peppercorns, and cloves, lay the meat on the top, put on the lid of the stewpan, and cook gently for  $\frac{1}{2}$  an hour. The vegetables must be occasionally stirred or shaken, and when sufficiently fried add stock to  $\frac{3}{4}$  cover them, and the remainder as that in the pan reduces. Cover the meat with a buttered paper, and cook gently for about 2 hours. Fry the flour and remaining 2 ozs. of butter together until a brown roux is formed. When the meat is ready, transfer it to a hot dish, brush it over with the stock reduced to glaze, and keep it hot. Strain the liquor on to the brown roux, stir until boiling, season to taste, simmer for five minutes, then add the capers, and serve in a sauceboat. If preferred, glazing the meat may be omitted, and a little sauce poured over instead.

TIME.—To cook, about 2 hours. AVERAGE COST, 1s. per lb. ALLOW 3 lbs. for 6 or 7 persons.

**MUTTON, NECK OF, BROWNEED.**

INGREDIENTS.—Best end of a neck of mutton, stock, 2 ozs. of butter, 2 ozs. of flour, 1 egg, bread-crumbs, 1 teaspoonful of finely-chopped parsley,  $\frac{1}{4}$  of a teaspoonful of powdered mixed herbs, pepper and salt, frying-fat.

METHOD.—Saw the rib bones across, remove the short ends, fold the flap under, and bind securely. Place the meat in a stewpan containing as much boiling stock (or boiling water and usual flavouring vegetables) as will barely cover it, simmer gently for 1 hour, then drain well. Beat the egg, add the parsley, herbs, and a good seasoning of salt and pepper, and coat the meat thickly with the mixture. Cover lightly with breadcrumbs, and bake in a moderately hot oven until well browned, meanwhile basting frequently with hot fat. Heat the butter in a stewpan, add the flour, stir and cook slowly until well browned, and add 1 pint of boiling stock from the larger stewpan. Stir until boiling, season to taste, simmer gently until required, and serve separately.

Fry until lightly browned, sprinkle in the flour, and when well browned add the stock or water. Boil up, season to taste, add the trimmings of carrot and turnip, and replace the meat. Cover closely, cook very gently for 1 hour, then arrange the cutlets neatly on a hot dish, strain the sauce over, and serve garnished with the vegetable dice, which must have been meanwhile boiled in salted water.

**TIME.**—Altogether, about 2 hours. **AVERAGE COST**, about 1s. 8d. for a dish. **SUFFICIENT** for 4 persons.

## MUTTON, ROAST.

When possible, mutton should be roasted before the fire, for this method of cooking imparts a more delicate and better flavour to the meat. Whatever the joint, it should be well basted with hot fat before setting the roasting-jack in motion; and for 10 or 15 minutes it must be placed quite close to a clear, bright fire, in order to quickly form a hard surface layer. The meat revolves too quickly for it to become over-browned in a short space of time. During the first few minutes the joint should be almost constantly basted, and afterwards at short intervals. The time required for roasting depends principally upon the condition of the fire and the form or the size of the joint.

## MUTTON, ROLL OF.

### MUTTON, ROAST HAUNCH OF.

**INGREDIENTS.**—A haunch of mutton.

**METHOD.**—This joint requires great care in roasting, for if cooked too quickly the loin is overdone while the thick part of the leg remains insufficiently cooked. This may be remedied to some extent by enclosing the loin in several thicknesses of well-greased paper; also by hanging the thick part of the leg where it will receive the hottest rays of heat from the fire. Follow directions given for Mutton, Roast.

**TIME.**—About 15 minutes per lb. **AVERAGE COST**, 10d. per lb. **SUFFICIENT** for 12 or more persons, according to size of joint. **SEASONABLE** from June to January.

### MUTTON, ROAST SADDLE OF.

**INGREDIENTS.**—Saddle of mutton, salt and pepper, fat for basting, gravy, red-currant jelly.

**METHOD.**—Remove the skin, pare off any superfluous fat, and take away the fat and kidneys from the inside. Fold the flaps under, bind securely in shape, and cover the back with several folds of greased paper. Roast in front of a clear fire, basting frequently, or, if more convenient, bake in a moderately hot oven (*see* Mutton, Roast). Serve with good gravy and red-currant jelly.

**TIME.**—About 15 minutes per lb. **AVERAGE COST**, 1s. per lb. **SUFFICIENT** for from 12 to 18 persons, according to weight. **SEASONABLE** at any time.

### MUTTON, ROLL OF.

**INGREDIENTS.**—3 lbs. of lean mutton, 1 lb. of ham or bacon finely chopped, 4 tablespoonfuls of breadcrumbs, 1 teaspoonful of finely-chopped parsley,  $\frac{1}{2}$  a teaspoonful of powdered mixed herbs,

## MUTTON SAUSAGES.

$\frac{1}{2}$  a teaspoonful of finely-grated lemon-rind,  $\frac{1}{2}$  a teaspoonful of finely-chopped shallot or onion, a good pinch of nutmeg, salt and pepper, 1 or 2 eggs, stock, gravy, or sauce, fat for basting.

**METHOD.**—Chop the meat finely, or pass it 2 or 3 times through a mincing machine. Mix with it all the dry ingredients enumerated above, and season somewhat liberally with salt and pepper. Add 1 large or 2 small eggs, and enough stock to gradually moisten the whole, then form the mixture into a short thick roll. Enclose in 3 or 4 folds of greased paper, bake in a moderate oven for about 2 hours, and baste frequently meanwhile. Half an hour before serving remove the paper, and either dredge the roll lightly with flour, or coat it with egg and breadcrumbs. Serve with good gravy or brown sauce.

**TIME.**—To cook, about 2 hours.  
**AVERAGE COST,** 4s. **SUFFICIENT** for 7 or 8 persons. **SEASONABLE** at any time.

**Note.**—Underdone cold mutton may be utilised in this way, and the ham or bacon may be either raw or cooked. When cold materials are used, the roll should be cooked for about 1 hour.

## MUTTON SAUSAGES.

**INGREDIENTS.**—1 lb. of lean, raw or underdone mutton, 2 ozs. of finely-chopped ham or bacon, 4 ozs. of finely-chopped suet, 4 ozs. of breadcrumbs, 2 ozs. of finely-chopped mushrooms, 1 teaspoonful of finely-chopped parsley,  $\frac{1}{2}$  a teaspoonful of finely-chopped shallot or onion,  $\frac{1}{2}$  a teaspoonful of powdered mixed herbs, salt and pepper, 2 eggs, stock, sausage-skins.

**METHOD.**—Chop the meat finely, mix with it the rest of the dry ingredients, seasoning liberally with salt and pepper. Stir in the eggs and as much stock as is necessary to slightly moisten the whole.

## MUTTON, SCRAG OF.

Press the mixture lightly into skins, or, if more convenient, form it into cork-shaped pieces or small cakes. Fry in hot butter or fat.

**TIME.**—To fry, 8 to 10 minutes.  
**AVERAGE COST,** 1s. 8d. to 1s. 10d.  
**SUFFICIENT** for 4 or 5 persons.  
**SEASONABLE** at any time.

## MUTTON, SCOTCH, COLLOPS.

**INGREDIENTS.**—1 lb. of lean mutton (chops), 1 oz. of butter,  $\frac{1}{2}$  a small onion, 1 teaspoonful of chopped parsley, 1 tablespoonful of flour, stock, salt and pepper, croûtons of bread, 1 gill of stock.

**METHOD.**—Free the meat from bones and fat, and chop it or mince it evenly, but not too finely. Chop finely the onion, fry, *i.e.*, blend, in the butter, put in the meat, and cook quickly over the fire for a few minutes. Sprinkle in the flour, stir for a while, and moisten with the stock, boil up, skim, and cook gently for about  $\frac{1}{2}$  an hour. Season to taste, add the chopped parsley. Dish up, and garnish with croûtons of fried bread.

**TIME.**—About  $\frac{3}{4}$  of an hour.  
**AVERAGE COST,** 1s. 2d. to 1s. 4d.  
**SUFFICIENT** for 3 or 4 persons.

## MUTTON, SCRAG OF, TO COOK.

**INGREDIENTS.**—The scrag end of a neck, slices of bacon, stock or water, 2 onions sliced, 2 carrots sliced,  $\frac{1}{2}$  a turnip sliced, a bouquet-garni (parsley, thyme, bay-leaf), 10 peppercorns, salt, 1 egg, breadcrumbs, frying-fat.

**METHOD.**—Wash the extreme end of the neck in salt and warm water, saw the rib bones across, and remove the short ends. Place the vegetables in a stewpan just large enough to hold the meat, lay the meat on the top, cover with slices of bacon, and add the herbs, peppercorns, and either stock or water to nearly cover the vegetables. Put

## MUTTON, SHOULDER OF.

on a close-fitting lid, cook very gently for  $2\frac{1}{2}$  hours, then coat with egg and breadcrumbs, and bake in a quick oven until nicely browned. Serve with brown sauce, or any sauce of which the stock used in cooking the meat may form the base.

TIME.—About 3 hours. AVERAGE COST,  $6\frac{1}{2}d.$  per lb.

## MUTTON, SHOULDER OF, BAKED AND STUFFED.

INGREDIENTS.—A small shoulder of mutton, veal forcemeat,  $\frac{3}{4}$  pint of stock, 1 oz. of butter,  $\frac{3}{4}$  oz. of flour, 2 or 3 ozs. of dripping, salt and pepper.

METHOD.—Have all the bones removed from the shoulder, and boil them down for stock. Flatten the meat, using either a wetted cutlet-bat or rolling-pin for the purpose. Season well with salt and pepper, spread on the forcemeat, roll up tightly and bind securely with string. Have ready the baking-tin with the dripping melted, baste the meat well, put it into a moderate oven, and cook gently for  $1\frac{1}{2}$  hours, basting frequently. Meanwhile, fry together the butter and flour until a brown roux, or thickening, is formed, strain on to it  $\frac{3}{4}$  pint of stock made from the bones (which should be boiled for at least 2 hours), stir the sauce until it boils, and season to taste. When the meat has cooked for  $1\frac{1}{2}$  hours, drain off every particle of fat, but leave the sediment in the tin, pour in the brown sauce, return to the oven, and cook  $\frac{1}{2}$  an hour longer, basting frequently. When ready, serve on a hot dish, pour a little of the sauce over the meat, and send the remainder to table in a sauce-boat.

TIME.—To prepare and cook, about  $2\frac{1}{2}$  hours. AVERAGE COST,  $9d.$  to  $10d.$  per lb.

## MUTTON WITH SAUCE.

*Note.*—Either leg, loin, or neck of mutton may be cooked according to the above recipe; and when preferred, onion force may be substituted for the veal forcemeat.

## MUTTON, SPICED.

INGREDIENTS.—A boned leg or shoulder of mutton, 8 ozs. of common salt, 1 oz. of bay-salt,  $\frac{3}{4}$  oz. of saltpetre, 4 ozs. of moist sugar, 1 teaspoonful of pepper, 1 dessert-spoonful of finely-chopped shallot or onion, 1 saltspoonful of powdered allspice, 1 saltspoonful of powdered cloves.

METHOD.—Mix the ingredients together, rub the preparation well into the meat, and repeat daily for a fortnight. When ready, rinse in warm water, and bind into a good shape with strong tape. Cook very gently for 5 or 6 hours in good stock, or water flavoured with vegetables, press between 2 dishes until cold, glaze, and use as required.

TIME.—To pickle, 14 days. To cook, 5 to 6 hours. AVERAGE COST,  $10d.$  to  $1s.$  per lb. SEASONABLE at any time.

## MUTTON TEA (Invalid Cookery).

INGREDIENTS.— $\frac{1}{2}$  lb. of lean mutton,  $\frac{1}{2}$  pint of water,  $\frac{1}{4}$  of a teaspoonful of salt.

METHOD.—Mutton tea is less generally employed than beef tea, but it is a useful means of varying the diet, and it is both light and easily digested. For invalids it should be prepared as directed for "Beef Tea for Invalids"; but a more savoury and palatable preparation for convalescents may be made by gently stewing the meat for 2 or 3 hours.

TIME.— $\frac{1}{2}$  an hour. AVERAGE COST,  $5d.$

## MUTTON WITH CAPER SAUCE.

INGREDIENTS.— $1\frac{1}{2}$  lbs. of tinned mutton,  $\frac{3}{4}$  pint of caper sauce.

**METHOD.**—Turn the meat out of the tin, and remove all jelly and gravy (to be afterwards converted into caper sauce). Replace the meat in the tin, put it in a stewpan and surround it with boiling water until thoroughly heated. Meanwhile, make the sauce as directed, using the jelly and gravy with stock or water to make up the amount required. Serve the mutton on a hot dish with the sauce poured over.

**TIME.**—About 1 hour. **AVERAGE COST,** 1s. 6d. **SUFFICIENT** for 4 or 5 persons.

### MUTTON WITH VINAIGRETTE SAUCE.

**INGREDIENTS.**—8 or 9 slices of cooked mutton, sliced gherkins, capers, salad. For the sauce: 4 tablespoonfuls of salad-oil, 2 tablespoonfuls of vinegar (preferably tarragon),  $\frac{1}{2}$  a teaspoonful of finely-chopped gherkin,  $\frac{1}{2}$  a teaspoonful of finely-chopped parsley,  $\frac{1}{2}$  a teaspoonful of finely-chopped shallot or onion, salt and pepper.

**METHOD.**—Mix the sauce ingredients together, adding salt and pepper to taste. Arrange the meat neatly on the dish to be sent to table, pour the sauce over, and put aside for at least 1 hour. Garnish with sliced gherkin, capers, and small tufts of salad, and serve the rest of the salad separately.

**TIME.**—About  $1\frac{1}{4}$  hours. **AVERAGE COST,** 1s. 9d. to 2s. **SUFFICIENT** for 6 persons.

### NEAPOLITAN ICE.

**INGREDIENTS.**— $\frac{1}{4}$  pint of strawberry or raspberry pulp,  $\frac{1}{2}$  oz. of grated chocolate, 3 yolks of eggs,

$1\frac{1}{2}$  pints of milk,  $\frac{1}{2}$  pint of cream, 3 ozs. of castor sugar,  $\frac{1}{2}$  a teaspoonful of vanilla essence, carmine, or cochineal.

**METHOD.**—Cream the yolks of eggs and 3 ozs. of castor sugar well together. Add the rest of the sugar to the milk, and when boiling pour on to the yolks of eggs and sugar, stirring vigorously meanwhile. Replace in the stewpan, and stir by the side of the fire until the mixture thickens, then strain. Dissolve the chocolate in 1 tablespoonful of water, mix with it  $\frac{1}{3}$  of the custard, and let it cool. Mix the fruit pulp with half the remaining custard, and if necessary add a few drops of carmine. To the other third of the custard add the vanilla essence. Whip the cream slightly, divide it into 3 equal portions, and add 1 to each preparation. Freeze separately, then pack in layers in a Neapolitan ice-box, or, failing this, a mould best suited to the purpose. Cover closely, and pack in salt and ice for about 2 hours. Serve cut across in slices.

**TIME.**—From 1 to  $1\frac{1}{2}$  hours. **AVERAGE COST,** about 2s. **SUFFICIENT** for 7 or 8 persons.

### NEAPOLITAN PASTE.

**METHOD.**—Blanch and pound the almonds to a smooth paste, moistening from time to time with a little cold water to prevent them oiling. Add the flour, sugar, butter, lemon-rind, and a good pinch of salt, and stir in the yolks of eggs. Work into smooth paste, put aside in a cool place for about  $1\frac{1}{2}$  hours, then roll out rather thinly, and cut into squares or rounds. Bake in a moderate oven.

**NUTMEGS.**

Nutmegs are the seeds of the nutmeg tree, known to botanists as the *Myristica moschata*. This tree is a native of the Molucca Islands, but is now cultivated in Java, Cayenne, Sumatra, and some of the West Indian Islands. There are two kinds of nutmegs—one wild, and long and oval-shaped, the other cultivated and nearly round; the husk which surrounds the shell of the nutmeg when growing is known as mace. This familiar spice is largely used as a flavouring; but it should be added sparingly to farinaceous preparations, for its strong aromatic flavour is greatly disliked by many. forcemeats and

similar preparations containing parsley and other herbs may have a comparatively large amount of nutmeg mixed with them, and yet the flavour of the spice will be hardly perceptible. It is generally thought that the strength of the nutmeg is spent in developing the flavour of the herbs with which it is mixed.

**OAT CAKES, SCOTCH.**

INGREDIENTS.—2 lbs. of oatmeal, 6 ozs. of flour, 2 ozs. of sugar,  $\frac{1}{2}$  lb. of butter and lard,  $\frac{1}{2}$  oz. of carbonate of soda,  $\frac{1}{4}$  oz. of tartaric acid, a little salt, milk.

METHOD.—Weigh the flour and meal on to the board, take the soda, acid, and salt, and rub these ingredients through a fine hair-sieve on to the flour and meal; then add the sugar and fat, and rub together until smooth; make a bay or hole in the centre, and work into a smooth paste with milk, taking care not to have it too dry or tight, or considerable trouble will be experienced in rolling out the cakes, as they will be found very short. Having wet the paste, take small pieces about the size of an egg, and roll these out thin and round with a small rolling-pin, dusting the board with a mixture partially of oatmeal and flour. When rolled down thin enough, take a sharp knife and cut them in four, place them on clean, flat tins, and bake in a warm oven. These cakes require very careful handling, or they will break all to pieces.

TIME.—To bake, 20 to 25 minutes. AVERAGE COST, 1s. SUFFICIENT for about 18 small cakes.

**OATMEAL PORRIDGE.**

INGREDIENTS. — Oatmeal, salt, water.

METHOD. — There are several ways of making porridge. The one generally adopted—although by no means the best—is to sprinkle the oatmeal into boiling, slightly salted water with the left hand, meanwhile stirring briskly with a wooden spoon or wooden spatula. When the porridge is thick enough, the stewpan is drawn to the side of the fire, and the contents, slowly cooked from 20 to 30 minutes, being occasionally stirred to prevent it sticking to the bottom of the pan. A better method is to soak 4 ozs. of oatmeal in  $1\frac{1}{2}$  pints of cold water overnight, and in the morning strain the water into a stewpan, and when boiling add the oatmeal, and salt to taste. Twenty minutes' gentle simmering will sufficiently cook it, and it must be well stirred during the process. Probably the best plan of all is to use a water-jacketed saucepan for making porridge, for it is always desirable to have oatmeal thoroughly cooked, and as the water in the outer pan obviates the necessity of frequent stirring, the porridge may, with little trouble, be cooked for 2 or 3 hours on the previous day, and reheated when required; a pinch of salt should always be added to the porridge. There are three varieties of oatmeal—coarse, medium, and fine; any kind may be used for making porridge, but coarse oatmeal is generally preferred.

**OATMEAL PUDDING.**

INGREDIENTS. — 1 tablespoonful of fine oatmeal, 1 dessertspoonful of flour,  $1\frac{1}{4}$  pints of milk, 1 egg, salt.

METHOD. — Mix the oatmeal and flour smoothly with a little cold milk, boil up the remainder, and add the blended oatmeal and flour.

Stir and boil gently for 5 minutes, add salt to taste, and, when cool, put in the egg. Turn the whole into a buttered piedish, bake gently for 20 minutes, and serve with cream and sugar, or golden syrup.

TIME. — 40 minutes. AVERAGE COST, 4d. SUFFICIENT for 3 or 4 persons.

**OATMEAL SCONES.**

INGREDIENTS. — Cold oatmeal porridge, flour.

METHOD. — Into the cold porridge knead as much flour as will enable it to be rolled out  $\frac{3}{4}$  of an inch thick. Cut in three-cornered pieces and bake on a greased griddle or in the oven. Serve hot, split, and buttered.

TIME. — To bake, from 20 to 25 minutes. AVERAGE COST, uncertain.

**OKRA.**

This plant is a native of the West Indies, although now largely cultivated in India and America. The young green pods are sometimes pickled, and the older pods are preserved in tins for export. Those imported resemble gherkins in size, but their ends form a sharper point; their colour is lighter and less vivid in tone, and their pods contain seeds not unlike pearl barley. Okra has a peculiar flavour, often disagreeable to an unaccustomed palate, and it is exceedingly mucilaginous, the pods in the tin being surrounded by a substance of greater viscosity than gum.

**OKRA, TO BOIL.**

INGREDIENTS. — 24 fresh okras, 2 tablespoonfuls of oiled butter, 2 tablespoonfuls of cream, salt and pepper.

Heat the butter in a stewpan, add the flour, stir and cook the mixture for a few minutes, then put in the milk, and stir until boiling. Season to taste, and simmer gently for 5 minutes. Place the mixture of okras and tomato in well-buttered scallop shells, sprinkle lightly with salt and pepper, and add a little sauce. Cover lightly with browned breadcrumbs or cracker crumbs, add 2 or 3 small pieces of butter, and bake in a moderately-hot oven from 10 to 15 minutes. Serve hot.

## ONIONS, PICKLED.

### ONIONS.

This bulb, the *Alium cepa*, which is the most common, but, at the same time, the most popular of this class of vegetable, differs widely as regards size and flavour. The smaller varieties are the more powerful, while the larger species, like the Spanish, are mild and sweet. A mild flavour of onion is generally liked, but the objection to its use is the odour left on the palate. This may be obviated in some measure by parboiling them before adding them to any preparation, the objectionable matter being more effectually removed by changing the water two or three times during the process.

### ONIONS, BURNT, FOR GRAVIES.

**INGREDIENTS.**— $\frac{1}{2}$  lb. of onions coarsely chopped,  $\frac{1}{2}$  lb. of moist sugar,  $\frac{1}{2}$  pint of water,  $\frac{3}{4}$  pint of vinegar.

**METHOD.**—Place the onions and water in a steel stewpan, let them boil for 5 or 6 minutes, then add the sugar, and simmer gently until the preparation becomes nearly black. Have the vinegar ready boiling, pour it into the stewpan, stir until well mixed, then strain, and when cold, bottle for use. This browning must be used very sparingly, or it will impart a disagreeable taste. When colouring alone is required, it is safer to use caramel, recipes for which will be found under that name.

### ONIONS, PICKLED.

**INGREDIENTS.**—Pickling onions; to each quart of vinegar add 2 teaspoonfuls of allspice, 2 teaspoonfuls of whole black pepper.

**METHOD.**—Have the onions gathered when quite dry and ripe, and, with the fingers, take off the thin outside skin; then with a silver knife (steel should not be

## ONIONS, PICKLED.

used, as it spoils the colour of the onions), remove one more skin, when the onions will look quite clear. Have ready some very dry bottles or jars, and as fast as the onions are peeled put them in. Pour over sufficient cold vinegar to cover them, with pepper and all-spice in the above proportions, taking care that each jar has its share of the latter ingredients. Tie down with the bladder, and put them in a dry place, and in a fortnight they will be ready for use.

### ONIONS, PICKLED (Another Method).

INGREDIENTS. — Silver onions, white wine vinegar to cover.

METHOD. — Remove the skins, throw the onions a few at a time into a saucepan of boiling water, taking care to have no more than will form a single layer floating on the surface of the water. As soon as the onions look clear on the outside take them up as quickly as possible with a slice, fold them in a clean dry cloth, so as to keep in the steam, and allow them to remain closely covered until the whole have been scalded. Let the onions be until quite cold, then put them into bottles or jars, and pour over them the vinegar, which should previously have been boiled and allowed to cool slightly. When cold, cover closely, and store in a cool, dry place.

### ONIONS, ROASTED.

INGREDIENTS. — Onions, either red or yellow.

METHOD. — Top and tail the onions, but do not skin them. Put them into a saucepan containing sufficient boiling salted water to cover them, boil gently until nearly done, then drain and dry thoroughly. Place the onions in a tin, or in a

Dutch oven, in front of a clear fire, and roast them for 15 or 20 minutes, turning them frequently. Serve as a garnish to roast fowl.

TIME. — To boil the onions, about 1 hour. AVERAGE COST, 2d. per lb. SEASONABLE at any time.

### ONIONS, SPANISH, BAKED.

INGREDIENTS. — 4 or 5 Spanish onions, salt, and water.

METHOD. — Put the onions, with their skins on, into a saucepan of boiling water, slightly salted, and let them boil quickly for 1 hour. Then take them out, wipe them thoroughly, wrap each one in a piece of buttered paper, and bake them in a moderate oven for 2 hours, or longer, should the onions be very large. They may be served in their skins, and eaten with a piece of cold butter and a seasoning of pepper and salt; or they may be peeled, and a good brown gravy poured over them.

TIME. — From 1 to 1½ hours to boil; 2 hours to bake. AVERAGE COST, 2d. per lb. SUFFICIENT for 4 or 5 persons. SEASONABLE from October to April.

### ONIONS, SPANISH, BOILED.

INGREDIENTS. — Spanish onions, white sauce, salt and pepper.

METHOD. — Peel the onions, put them into cold water, bring to the boil, and strain. Have ready a saucepan of boiling water, add to it a teaspoonful of salt, put in the onions, and boil gently from 1½ to 2 hours, according to size. Or they may be steamed, in which case about ½ an hour longer must be allowed. Serve with the white sauce poured over them.

TIME. — From 1½ to 2½ hours. AVERAGE COST, 2d. to 3d. per lb. SEASONABLE from October to April.

## PARKIN.

### PARKIN.

INGREDIENTS.—4 lbs. of fine oatmeal, 3 lbs. of treacle or golden syrup,  $\frac{1}{2}$  lb. of butter or lard,  $\frac{1}{2}$  lb. of brown moist sugar, 1 oz. of ground ginger.

METHOD.—Let the treacle warm gradually by the side of the fire until it becomes quite liquid. Meanwhile, rub the butter or lard into the oatmeal, and add the sugar and ginger. Stir in the treacle with a strong wooden spoon. To follow the Yorkshire method exactly, the vessel which held the treacle must be rinsed out with beer, but milk may be substituted. This is added gradually until the right consistency is obtained. The mixture must be smooth, but it must not drop too easily from the spoon. Have ready some greased Yorkshire pudding tins, pour in the mixture, and bake in a steady oven until the centre of the parkin feels firm (from 1 to  $1\frac{1}{2}$  hours, according to thickness of the parkin and condition of oven). As the mixture improves by being allowed to stand, each cake should be baked separately when the oven is a small one. Let the parkin cool slightly, then cut it into squares, remove them from the tin, and when cold place them in an air-tight biscuit tin. The parkin may be kept for months.

TIME.—To bake, from 1 to  $1\frac{1}{2}$  hours. AVERAGE COST, 2s. 3d. to 2s. 6d. SUFFICIENT for 2 or 3 cakes. SEASONABLE at any time.

Line a piedish with the beef, over it place 6 of the parakeets, intersperse slices of egg, parsley, and lemon-rind, dredge lightly with flour, and season with salt and pepper. Cover with the bacon cut into strips, lay the rest of the birds on the top, intersperse slices of egg, season with salt and pepper, and sprinkle with parsley and lemon-rind as before. Three-quarters fill the dish with cold water, cover with puff paste, and bake in a quick oven.

### PARSLEY.

This herb is said to be a native of Sardinia, but is largely cultivated in every country in Europe. Parsley possesses the peculiar property of absorbing the strength of other flavouring ingredients; hence the necessity of using it with discretion. In consequence of being generally regarded as exceedingly simple and

## PARSLEY SAUCE.

harmless in character, this herb is frequently employed in altogether disproportionate quantities, thereby overpowering the flavour of other substances with which it is mixed. Parsley intended for winter use should be gathered before it loses its tender shade of green. It is first blanched in boiling water for 1 minute, then put into a hot oven, and when dry enough to be easily reduced to a fine powder, it is rubbed through a hair sieve, and put into well-corked bottles or air-tight tins.

### PARSLEY SAUCE (For Boiled Fowl, Veal, Calf's Head, etc.).

INGREDIENTS.— $\frac{1}{2}$  pint of the liquor in which the meat has been cooked,  $\frac{1}{4}$  pint of milk, 1 oz. of butter, 1 oz. of flour, 1 tablespoonful of chopped parsley, salt and pepper.

METHOD.—Melt the butter in a saucepan, stir in the flour, cook for 2 or 3 minutes, then add the liquor and milk, and stir until it boils. Simmer for a few minutes, season to taste, add the parsley, and use as required. If the parsley is allowed to boil in the sauce it will lose some of its green colour.

TIME.—20 to 25 minutes. AVERAGE COST, 3d.

### PARSLEY SAUCE FOR FISH.

INGREDIENTS.— $\frac{1}{2}$  pint of fish stock or water, 1 oz. of butter,  $\frac{3}{4}$  oz. of flour, 1 tablespoonful of finely-chopped parsley, salt and pepper.

## PARSNIP SOUP.

the sauce it will lose some of its green colour.

TIME.—20 to 25 minutes. AVERAGE COST,  $1\frac{1}{2}$ d. per  $\frac{1}{2}$  pint.

### PARSLEY, TO FRY.

Remove some small sprigs from some fresh parsley, wash it in cold water, drain well, and press gently in a clean, dry cloth to absorb as much moisture as possible, otherwise the damp leaves may cause the hot fat to spurt up in an unpleasant, if not dangerous, manner. When the articles are fried, put the parsley in a wire basket into the fat, and fry about 1 minute, when it should be crisp. Or, when a frying-basket is not available, leave rather long stalks attached to the parsley, tie them together with string and let a long end remain, by which the parsley can be held whilst frying. Fried parsley can be kept fresh and crisp for several days if stored in an air-tight tin: before using, it should be re-heated in the oven.

### PARSNIP SOUP.

INGREDIENTS.—2 pints of second stock, 1 pint of milk, 3 or 4 parsnips, 1 onion, 2 strips of celery, 1 oz. of butter, the juice of a lemon, or 1 tablespoonful of vinegar, 1 dessertspoonful of flour, salt and pepper.

METHOD.—Slice the vegetables, and fry them in the butter, without browning, for about 15 minutes. Add the stock, and simmer until the parsnips are tender (about 40 minutes), then rub through a wire sieve. Return to the stewpan, add the milk, salt and pepper, and bring to the boil. Mix the flour with a little milk or water, pour it into the soup, stir, and cook for 5 or 6 minutes. Add the lemon-juice and serve with croutons of fried or toasted bread. The lemon-juice

## PARSNIPS, BOILED.

is added to correct the sweetness of the parsnips, and is simply a matter of taste.

TIME.— $1\frac{1}{2}$  to  $1\frac{3}{4}$  hours. AVERAGE COST, about 7*d.* without the stock. SEASONABLE from October to April. SUFFICIENT for 6 persons.

## PARSNIPS, BOILED.

INGREDIENTS.—Parsnips; to each  $\frac{1}{2}$  gallon of water allow 1 heaped tablespoonful of salt.

METHOD.—Wash the parsnips, scrape them thoroughly, and with the point of the knife remove any black specks about them, and should they be very large, cut the thick part into quarters. Put them into a saucepan of boiling water, salted in the above proportion, boil them rapidly until tender, which may be ascertained by piercing them with a fork or skewer, take them up, drain them, and serve in a vegetable-dish. This vegetable is usually served with salt fish, boiled pork, or boiled beef; when sent to table with the latter, a few should be placed alternately with carrots round the dish, as a garnish.

TIME.—Large parsnips, 1 to  $1\frac{1}{2}$  hours; small ones,  $\frac{1}{2}$  to 1 hour. AVERAGE COST, 2*d.* per lb. SEASONABLE from October to May.

## PARSNIPS, FRIED.

INGREDIENTS.—Parsnips, salt and pepper, egg and breadcrumbs, or frying-batter.

METHOD.—Boil the parsnips as in the preceding recipe (cold ones may be used), cut them into slices, about  $\frac{1}{2}$  inch in thickness, sprinkle them with salt and pepper, and either coat them with egg and breadcrumbs, or dip them into batter. In either case, they must be fried until golden-brown in hot fat.

AVERAGE COST.—2*d.* per lb. SEASONABLE from October to May.

## PARTRIDGE PIE.

### PARSNIPS, MASHED

(See Turnips, Mashed).

### PARTRIDGE, BROILED.

INGREDIENTS.—Partridges, salt and cayenne to taste, a small piece of butter, brown gravy or mushroom sauce.

METHOD.—Pluck, draw, and cut the partridge in half, and wipe the insides thoroughly with a damp cloth. Season the birds with salt and cayenne, broil them over a very clear fire, and dish them on a hot dish; rub a small piece of butter over each half, and send them to table with brown gravy or mushroom sauce.

TIME.—From 20 to 25 minutes. AVERAGE COST, from 3*s.* 6*d.* a brace. SEASONABLE from September 1 to February 12.

### PARTRIDGE PIE.

INGREDIENTS.—2 partridges,  $\frac{3}{4}$  lb. of veal cutlet, 2 or 3 slices of streaky bacon,  $\frac{1}{2}$  pint of good stock, 1 oz. of butter, 2 hard-boiled eggs, 2 tablespoonfuls of coarsely-chopped mushrooms, preferably fresh ones, 1 teaspoonful of finely-chopped parsley,  $\frac{1}{4}$  of a teaspoonful of very finely-chopped shallot or onion, salt and pepper, paste.

METHOD.—Draw, singe, divide the birds into quarters and fry them until lightly browned in hot butter. Cut the veal into small thin slices, place them in the bottom of a pie-dish, season well with salt and pepper, and lay the partridges on the top interspersed with strips of bacon and quarters of egg. Sprinkle on the mushrooms, parsley and onion, season well with salt and pepper, add stock to  $\frac{3}{4}$  the depth of the dish, and cover with paste (see Veal and Ham Pie). The pie will bake in about  $1\frac{1}{4}$  hours; it should first be put into a hot oven to make

the pastry rise, and afterwards baked more slowly. Several folds of well-greased paper laid on the top of the pie will prevent the crust becoming too brown, and a glazed appearance may be given to it by brushing it over with yolk of egg when  $\frac{3}{4}$  baked. The remainder of the stock should be warmed and poured into the pie before serving.

TIME.—To bake, from  $1\frac{1}{4}$  to  $1\frac{1}{2}$  hours. AVERAGE COST, 5s. to 6s. SEASONABLE from September 1 to February 12.

## PARTRIDGE, ROASTED.

INGREDIENTS.—Partridge, brown gravy, bread sauce, fried bread-crumbs, slice of toast, butter for basting, 1 slice of bacon.

METHOD.—Pluck, draw, and truss in the same manner as a roast chicken. Cover the breast with a slice of fat bacon, and roast before a clear fire for about 30 minutes, basting frequently with hot butter. A few minutes before serving remove the bacon, dredge lightly with flour, and baste well to give the bird a nice pale brown appearance. Dish on the toast, and serve the gravy, breadcrumbs, and bread sauce separately.

TIME.—To roast, about 30 minutes. AVERAGE COST, 3s. 6d. to 4s. 6d. the brace. SEASONABLE from September 1 to February 12.

lemon and then with bacon. Have the stock ready heated in a stewpan, put in the prepared birds, vegetables, bouquet-garni, wine, and a seasoning of salt and pepper. Cover closely, cook very gently for 1 hour, then remove the bacon and slices of lemon, and brown the breasts of the birds in a moderately hot oven. Meanwhile, the flour should have been cooked in  $\frac{3}{4}$  oz. of butter until it acquires a nut-brown colour; now add the strained stock from the stewpan, and stir until it boils. If liked, the birds may be served garnished with crisply-fried straws or thin slices of potato, or a purée of mushrooms or green peas. Serve the sauce separately.

TIME.— $1\frac{1}{2}$  hours. AVERAGE COST, from 5s. 6d. SUFFICIENT for 2 persons. SEASONABLE from September to February.

## PARTRIDGE, BRAISED, WITH CABBAGE (Casserole Cookery).

INGREDIENTS.—1 brace of partridges, 3 slices of fat bacon, 2 peeled shallots, 1 bay-leaf, 1 small bouquet-garni, 1 blade of mace, 1 sliced carrot, 1 pint of good stock, 2 small cabbages,  $\frac{1}{2}$  pint of well-reduced brown sauce, 1 sausage, salt and pepper.

METHOD.—Pick, draw, and truss the partridges for boiling. Line the bottom of an earthenware braising-pan with the slices of fat bacon, the shallots, bay-leaf, bouquet-garni, mace, and sliced carrot. Put in the partridges, and cook over a brisk fire for about 10 minutes—long enough to brown the birds a little. Then moisten with the stock. Trim and wash the cabbages, cut them into quarters, and cook them in salted water till half done, drain them well, press in a cloth, and tie up each with string. Put them in the pan with the birds, season with salt and pepper, and

cook the whole in the oven for about an hour. Strain the liquor or stock, and return it to the braising-pan with the brown sauce. Boil up and skim, now place in the partridges, the portions of cabbage and a few pieces of sausage, cover the pan, let it cook gently for another 10 minutes, and serve.

TIME.—About 2 hours. AVERAGE COST, 7s. to 8s. 6d. SUFFICIENT for 4 persons. SEASONABLE, September to February.

## PASTE, FLAKY (For Pies, Tarts, and Tartlets).

INGREDIENTS.—12 ozs. of flour, 9 ozs. of butter, (or butter and lard mixed),  $\frac{1}{4}$  pint of water (about).

METHOD.—Sieve the flour into a basin, and rub in lightly  $\frac{1}{3}$  of the butter. Add the water and mix into a smooth paste, more or less moist, according to the consistency of the butter, with which it must agree in this respect; roll it out into a long, narrow strip. Divide the remainder of the butter into 3 equal portions; put one portion on the paste in small pieces, dredge lightly with flour, fold it evenly in three, turn it round so as to have the folded edges to the right and left when rolling, press the edges lightly with the rolling-pin, to prevent the air escaping, and roll out as before. Repeat this process with the other portions of butter. The pastry may be used at once, but it will be lighter if allowed to stand for 1 hour in a cool place before being used. In making-up, handle as lightly, and roll as evenly, as possible. Bake in a hot oven, and avoid opening the oven door until the pastry has risen and become partially baked.

TIME.— $\frac{1}{2}$  an hour to bake. AVERAGE COST, 10d.

## PASTE, PUFF.

### PASTE FOR RAISED PIES.

INGREDIENTS.—1 lb. of flour, 6 ozs. of lard,  $\frac{1}{4}$  pint of water,  $\frac{1}{2}$  a teaspoonful of salt.

METHOD.—Put the flour and salt into a warm basin, and let it stand near the fire until it feels dry and warm. Boil the lard and water for 5 minutes, then pour the mixture into the centre of the flour, and mix well with a spoon until cool enough to knead with the hands. Knead well, keeping it warm during the process, let it remain near the fire for about 1 hour, then re-knead and use at once.

Throughout the processes of mixing, kneading, and moulding, the paste must be kept warm, otherwise moulding will be extremely difficult. On the other hand, if the paste be too warm, it will be so soft and pliable that it cannot retain its shape, or support its own weight. Fine flour is not to be recommended for this purpose, for it is deficient in gluten, a sticky, tenacious substance which greatly increases the adhesive properties of the paste, and so makes it easier to mould.

TIME.—1 $\frac{1}{4}$  hours. AVERAGE COST, 5d. SUFFICIENT for 1 large pie.

### PASTE, PUFF.

INGREDIENTS.—1 lb. of flour, 1 lb. of butter, 1 teaspoonful of lemon-juice, about  $\frac{1}{3}$  pint of cold water.

METHOD.—Wash and squeeze the butter in cold water, dry well in a floured cloth, shape into a square about the size of a slice of sandwich bread, and keep in a cool place while the paste is being prepared. Sieve the flour on to a marble slab, or board, make a well in the centre, put in the lemon-juice, and add water gradually until a smooth paste is formed. The condition of the butter deter-

mines the consistency ; when soft, the paste must be equally so. Knead the paste until smooth, then roll it out into a strip a little wider than the butter, and rather more than twice its length. Place the butter on one-half of the paste, fold the other half over, enclosing the butter entirely, and press the edges together with the rolling-pin. Let it remain in a cool place for about 15 minutes, then roll out to about three times the original length, but keeping the width the same, and fold exactly in three. Turn the paste round so that the folded edges are on the right and left, roll and fold again, and put aside for 15 minutes. Repeat this until the paste has been rolled out six times. The rolling should be done as evenly as possible, and the paste kept in a long narrow shape which, when folded, forms a square. Each time the paste is rolled out it may be well sprinkled with flour, but it must be evenly distributed with a paste-brush, and all the loose flour carefully brushed off before beginning to roll. When the paste has had its sixth roll it is ready for use ; it should be baked in a hot oven, and until the paste has risen and become partially baked the oven door should not be opened, because a current of cold air may cause the flakes to collapse on one side.

TIME.—1½ hours. AVERAGE COST, 1s. to 1s. 2d. per lb.

## PASTE, PUFF, WITH JAM RINGS.

INGREDIENTS.—Puff paste trimmings, jam, white of egg, castor sugar.

METHOD.—Roll the paste out to about ¼ of an inch in thickness, and stamp out an equal number of rounds 2½ and 1¾ inches in diameter. Brush the larger rounds over with white of egg ; stamp out

## PASTE, ROUGH PUFF.

the centre of the smaller rounds, thus forming them into rings, one of which must be pressed lightly on the top of each round of paste. Bake in a moderately hot oven, and when cold fill with jam.

TIME.—15 minutes to bake. AVERAGE COST, 2d. each.

## PASTE, RICH SHORT CRUST.

INGREDIENTS.—1 lb. of flour, ¾ lb. of butter, 2 yolks of eggs, 1 level tablespoonful of castor sugar, 1 teaspoonful of baking-powder.

METHOD.—Rub the butter lightly into the flour, add the baking-powder, sugar, yolks of eggs, and a little water if necessary, but this paste must be rather stiff, and when the butter is soft or the paste is being mixed in a warm place, only a few drops of water may be required. Roll out thinly and use at once. The crust for fruit tarts should be lightly brushed over with cold water, and dredged with castor sugar before being baked.

TIME.—¼ of an hour. AVERAGE COST, 1s. 2d. SUFFICIENT for 2 tarts of medium size or 24 patty-cases.

## PASTE, ROUGH PUFF, OR HALF-PUFF.

INGREDIENTS.—8 ozs. of flour, 6 ozs. of butter (or equal quantities of butter and lard), ½ a teaspoonful of lemon-juice, salt, about ¼ pint of water.

METHOD.—Sieve the flour on to a pasteboard, divide the butter into pieces about the size of a small walnut, and mix them lightly with the flour. Make a well in the centre, put in the lemon-juice, salt, and 1 tablespoonful of water, mix lightly, keeping the pieces of butter intact, and add water gradually until a moderately stiff paste is formed. Roll into a long strip, fold it equally in 3, turn it round so as to have the folded edges to

## PASTE, SHORT CRUST.

the right and left, and roll out as before. Repeat until the paste has been rolled out 4 times, then use; or, if convenient, let it remain for 1 hour in a cool place before being used.

TIME.— $\frac{1}{2}$  an hour. AVERAGE COST 8d. if butter is used. SUFFICIENT for 1 pie of average size.

## PASTE, SHORT CRUST.

INGREDIENTS.—8 ozs. of flour, 2 ozs. of butter, 2 ozs. of lard, 1 yolk of egg, 1 teaspoonful of baking-powder, a good pinch of salt, about  $\frac{1}{8}$  pint of water.

METHOD.—Rub the butter and lard lightly into the flour, add the baking-powder, salt, yolk of egg, and as much water as is necessary to form a stiff paste. Roll out to the required thickness, and use at once.

TIME.— $\frac{1}{4}$  of an hour. AVERAGE COST, about 4 $\frac{1}{2}$ d. SUFFICIENT for 1 medium-sized tart.

## PASTE, SHORT CRUST, PLAIN.

INGREDIENTS.— $\frac{1}{2}$  lb. of flour, 3 ozs. of lard, clarified fat, or dripping, 1 teaspoonful of baking-powder (heaped),  $\frac{1}{4}$  of a teaspoonful of salt,  $\frac{1}{4}$  pint of water.

METHOD.—Pass the flour, salt, and baking-powder through a sieve into a large basin, then rub in the fat, add the water, and work into a smooth paste with a knife. Roll out to desired shape and thickness, and use at once. When required for fruit tarts, 1 tablespoonful of sugar should be added to the above ingredients.

TIME.— $\frac{1}{4}$  of an hour. AVERAGE COST, 3d. SUFFICIENT for 1 medium-sized tart.

## PASTE, SWEET, FOR TARTLETS.

INGREDIENTS.—1 lb. of fine flour, 8 ozs. of castor sugar, 5 ozs. of butter, 3 eggs, the finely-grated rind of lemon.

## PASTRY SANDWICHES.

METHOD.—Sieve the flour into a basin, make a well in the centre, put in the sugar, butter, and eggs, and mix the whole into a stiff paste. Roll out and use as required.

TIME.—10 minutes. AVERAGE COST, 1s.

## PASTE, TO KEEP.

Paste not intended for immediate use should be enfolded in grease-proof or slightly buttered paper, and kept in a cool place.

## PASTE, TRANSPARENT.

INGREDIENTS.—1 lb. of flour (dry and sifted),  $\frac{3}{4}$  lb. of butter, 1 egg.

METHOD.—Wash the butter in 2 or 3 waters, and afterwards remove as much moisture as possible by means of a dry cloth. Melt the butter over a gentle fire, let it remain until nearly cold, then stir in the flour and egg. Knead lightly until smooth, roll out very thinly, and use for tartlets, etc.

TIME.—About  $\frac{1}{2}$  an hour. AVERAGE COST, 1s. SUFFICIENT for 2 lbs.

## PASTRY SANDWICHES.

INGREDIENTS.—Pastry trimmings, jam, castor sugar.

METHOD.—Knead the trimmings lightly into a smooth round ball, and roll out very thinly, keeping the shape as square as possible. Spread jam evenly over one-half, fold the other half over, wet the edges, and press them lightly together. Brush over with water, dredge well with castor sugar, and with the back of a blade of a knife mark the paste across in lines about 1 inch apart. Bake for about 20 minutes in a moderate oven, and when cold cut the paste into strips. If preferred, currants, with the addition of a little sugar and shredded candied peel, may be used instead of jam.

TIME.—30 minutes.

## PASTRY, TO GLAZE.

### PASTRY, TO GLAZE.

Meat pies, patties, sausage-rolls, and similar articles, are usually brushed over with well-beaten egg before or during the process of baking; when a deeper tone of colour is desired the yolk alone is used. Or, when economy is a point, and the white can be otherwise utilized, a little milk may be added to the yolk of egg when a larger quantity than is afforded by 1 yolk is required. Fruit tarts, puffs, etc., are usually brushed lightly over with cold water, and sprinkled liberally with castor sugar before baking. Or, when a thin coating of icing is desired, they are, when nearly baked, brushed over with well-beaten white of egg, and well dredged with castor sugar.

### PASTRY WITHOUT BUTTER.

INGREDIENTS.—1 lb. of flour, 1 teaspoonful of baking-powder, a small wineglassful of salad-oil, water.

METHOD.—Mix the flour and baking-powder. Add the oil to cold water, and stir the paste to a proper consistency for rolling. Fold it over and roll it out 2 or 3 times, place on a baking tin, and bake immediately.

METHOD.—Wash the peas and soak them for 12 hours in water. Put them into a stewpan with the bones (if any) and the stock, and bring to the boil. Slice the vegetables and add them to the stock when it boils, and simmer for at least 3 hours. Then rub through a wire sieve, return to the saucepan, add the flour mixed smoothly with a little water, and boil. When the purée is thoroughly incorporated with the soup, season to taste, and serve. *Note.*—When making pea soup in large quantities, the process of rubbing the vegetables through the sieve is omitted, and the turnips, carrots, etc., are cut into small pieces and added to the soup about 1 hour before serving.

When the peas are tender, well rub them through a colander with a wooden spoon, and add the butter, eggs, pepper, and salt. Turn it on to the dish, and serve very hot.

TIME.—Altogether, about 3½ hours. AVERAGE COST, 7d. SUFFICIENT for 5 or 6 persons. SEASONABLE at any time.

## PEPPER.

This valuable condiment is produced from the seed of the berries of the plant known by the name of *Piper nigrum*. The plant, a species of climbing vine, is a native of the East Indies, and is extensively cultivated in Malabar and the eastern islands of Borneo, Sumatra, and Java, and also in Cayenne. The berries hang on the branches of the plant in bunches; in shape they resemble the grape, but each berry grows distinct on a little

## PEPTONIZED BEEF TEA.

stalk like currants. The same plant produces both white and black pepper. The berries, when ripe, are bright red in colour, and each contains a single seed of globular form and brownish hue, which changes to nearly black when dried. This is the black pepper of commerce, white peppercorns being produced by steeping the dark berries in lime and water, and afterwards subjecting them to certain rubbing processes, by which their dark husks are removed.

## PEPPER, KRONA.

This well-known condiment is made from the Hungarian *paprika*, capsicum pod, etc. It is bright-red in colour, with an agreeable flavour, and with less pungency than cayenne, and consequently may be regarded as an exceedingly useful combination of flavouring and seasoning ingredients.

## PEPPER, MIGNONETTE.

This is ordinary white pepper with the husks removed and crushed finely, but not ground.

## PEPPER SAUCE.

INGREDIENTS.—¾ pint of Espagnole sauce, ½ oz. of butter, ½ a small carrot, ½ a small onion, 18 peppercorns, 1 bay-leaf, a sprig of thyme, 2 cloves, ½ oz. of raw ham.

METHOD.—Mix the onion and carrot, cut the ham into small pieces, fry in the butter for 3 minutes, and add all the other ingredients. Skim, boil for 10 minutes, strain, and serve.

TIME.—From 15 to 20 minutes. AVERAGE COST, 1s. 2d.

**METHOD.**—Put the water, beef, and bi-carbonate of soda into a stewpan, heat slowly to  $140^{\circ}$  F., stirring gently meanwhile, and keep at this temperature for about  $\frac{1}{2}$  an hour. Remove from the fire, and when it has cooled down to a lukewarm temperature add the liquor pancreaticus, and allow the vessel to remain covered in a warm place for about 1 hour. Then strain, bring to the boil, season to taste, and serve.

**TIME.**— $1\frac{3}{4}$  hours. **AVERAGE COST,** 1s.

## PEPTONIZED BEEF TEA JELLY (For Invalids).

**INGREDIENTS.**— $\frac{1}{2}$  pint of peptonized beef tea,  $\frac{1}{2}$  oz. of sheet gelatine.

**METHOD.**—Make the beef tea as directed in the preceding recipe, then strain and bring to boiling point. Soften the gelatine in a little cold water, add it to the beef tea, and stir until dissolved. Strain into a mould previously rinsed with cold water, and keep in a cold place until set.

minutes, sweeten and flavour to taste, then serve.

**TIME.**—40 minutes. **AVERAGE COST,** 5d.

## PEPTONIZED MILK (For Invalids).

**INGREDIENTS.**— $\frac{1}{2}$  pint of milk,  $\frac{1}{4}$  pint of water, 1 dessertspoonful of liquor pancreaticus, 20 grains of bi-carbonate of soda.

**METHOD.**—Put the milk and water into an enamelled stewpan, heat it to  $140^{\circ}$  F., then pour it into a jug containing the liquor pancreaticus and bi-carbonate of soda. Cover the jug, wrap it in flannel, and let it stand in a warm, but not hot, place for 1 hour. Boil up to prevent the bitter taste becoming too much developed. Milk thus prepared can be used for various preparations, or it may be served as ordinary milk, either hot or cold.

## PEPTONIZED SOUPS (For Invalids.)

Any purée or stock forming the basis of soup may be peptonized by adding to each pint 1 table-spoonful of liquor pancreaticus and 20 grains of bi-carbonate of soda. As soon as the right stage of peptonization is reached the soup should at once be boiled, otherwise an unpleasant bitter flavour will be imparted to the preparation.

## PERCH, BOILED.

**INGREDIENTS.**—4 perch, salt.

**METHOD.**—The peculiarity of the perch is the difficulty experienced in removing its scales. Sometimes it is boiled and the scales removed afterwards, but a better plan is to plunge the fish for 2 or 3 minutes into boiling water, and then scale it. Before boiling, the fish must be washed in warm water, cleaned,

and the gills and fins removed. Have ready boiling water to cover the fish, add salt to taste, and boil them gently from 10 to 20 minutes, according to their size. Serve with Hollandaise or melted butter sauce.

TIME.—10 to 20 minutes.  
AVERAGE COST, 6d. to 1s. each.  
SUFFICIENT for 4 or 5 persons.  
SEASONABLE from May to February.

*Note.*—Tench may be boiled the same way, and served with the same sauces.

## PERCH, FRIED.

INGREDIENTS.—4 perch, egg, breadcrumbs, frying-fat, salt, pepper, flour.

METHOD.—Scale, clean, wash, and dry the fish thoroughly. Sprinkle with salt and pepper, dredge well with flour, brush over with beaten egg, and cover them with breadcrumbs. forcemeat. Wrap it in a well-buttered paper, put it into boiling stock or water, to which must be added, when it re-boils, 1 onion, 1 carrot,  $\frac{1}{2}$  a small turnip, and a bouquet-garni (parsley, thyme, bay-leaf). Simmer gently from 40 to 60 minutes, according to size, then remove the trussing strings, and serve on a hot dish with a little of the oyster sauce poured over, and the remainder sent to table in a sauce-boat. If preferred, a purée of chestnuts may be substituted for the oyster forcemeat, or the bird may be dressed without forcemeat, and served with oyster or celery sauce.

TIME.—From 40 to 60 minutes.  
AVERAGE COST, 2s. 6d. to 4s. each.

Then coat carefully with egg and breadcrumbs, and broil over a clear fire. As soon as the crumbs are set, brush over with warm butter, and repeat at frequent intervals during the process of grilling. Arrange in a pyramidal form on a hot dish, and serve the sauce in a sauce-boat.

## PHEASANT, CUTLETS OF.

**METHOD.**—Make the sauce as directed, add the minced pheasant, the yolk of 1 egg, salt and pepper, and stir briskly over the fire until the mixture thickens, then turn on to a plate. When cold, form into cork-shaped croquettes, coat with egg and breadcrumbs, and fry until nicely browned in hot fat. ## PHEASANT, SALMIS OF.

**METHOD.**—Pluck and draw the bird, truss in the same way as a roast chicken, but leave the head on. Put the beefsteak inside the pheasant; the beefsteak is intended to improve the flavour of the bird and keep it moist, and not to be eaten with it, but it may afterwards be used in the preparation of some cold meat dish. Cover the breast with thin slices of bacon, or lard it with strips of fat bacon, and roast in front of a clear fire or in a moderate oven from 40 to 50 minutes, according to size and age. Baste frequently with butter, and when the cooking is about three-quarters completed remove the bacon, dredge the breast lightly with flour, and baste well to give the bird a nice light brown appearance. ### PILCHARDS.

Pilchards are rarely found on the British shores, except at St. Ives, Mount's Bay, Mevagissey, and one or two other places on the coast of Cornwall and Devon. The pilchard may be distinguished from the herring by the fin, which is exactly in the middle of the back, while in the herring it is nearer to the tail. The taste of the pilchard is similar to that of the herring, but it is more oily. Pilchards quickly lose their freshness, and therefore are not often sent uncured to any great distance from the places where they are caught. In a cured condition they are largely exported. Pilchards may be dressed according to the directions given for cooking herrings.

Strain the syrup into a preserving-pan, add the rest of the sugar, and boil to the "large pearl" degree (see Sugar to Boil). Allow it to cool slightly, put in the plums, simmer very gently until tender, then remove them very carefully to a deep dish and strain the syrup over them. Let the plums remain covered for 48 hours, drain well, spread them on large dishes in single layers, and when quite dry pack them in air-tight tins with wax paper between the layers.

TIME.—Altogether, 3 days. AVERAGE COST, 4d. to 6d. per lb.

## POMPLET, TO COOK.

### POMPLET, TO COOK (Indian Recipe).

This fish is not unlike turbot or brill, and may be treated according to the directions given for dressing turbot and brill.

### POOLOOT (Indian Recipe).

INGREDIENTS.—1 fowl, 1 lb. of rice, 4 ozs. of butter, 1 oz. of green ginger finely sliced, 3 onions sliced, 3 onions finely chopped,  $\frac{1}{4}$  of a teaspoonful of black pepper,  $\frac{1}{8}$  of a teaspoonful of ground cardamom seeds, 1 quart of stock, 6 hard-boiled eggs, rolls of fried bacon, the juice of 1 lemon, salt.

METHOD.—Wash, parboil, and drain the rice. Truss the fowl for boiling, place it in a stewpan with the rice under and round it, add the chopped onions, green ginger, lemon-juice, 1 teaspoonful of salt, and a little stock. Cover closely, and cook as gently as possible, adding more stock from time to time. When the fowl is sufficiently cooked take it up and cut it into neat joints, keep it hot and dry by the side of the fire. Heat the butter in a stewpan, fry the remaining onions until lightly browned, then drain them and keep them hot. Fry the fowl in the same butter, turning it frequently that all parts may be equally browned. Pile the rice in the centre of a hot dish, arrange the pieces of fowl on the top with the fried onions interspersed, and garnish the base with quarters of hard-boiled eggs and rolls of fried bacon.

TIME.— $2\frac{1}{4}$  hours. AVERAGE COST, 4s. SUFFICIENT for 5 or 6 persons.

### PORK AND BEANS.

INGREDIENTS.—A shoulder of young pork pickled, 1 onion, 1 carrot,  $\frac{1}{4}$  of a turnip, 10 peppercorns, Windsor beans, parsley sauce.

METHOD.—Put the pork into a stewpan containing sufficient warm water to cover it, bring to the boil, add the vegetables and peppercorns, and boil gently for about 2 hours. Half an hour before the pork will be ready throw the beans into salted boiling water, boil gently from 25 to 30 minutes, then drain well, and pour over them the parsley sauce. Serve the pork and beans on separate dishes.

TIME.—From 2 to  $2\frac{1}{2}$  hours, according to size. AVERAGE COST, 10d. per lb. SUFFICIENT for 5 or 6 persons. SEASONABLE in the winter.

### PORK, BAKED.

## PORK, BOILED.

hour before serving, peel the small onions, and fry them brown in hot butter. Serve the meat on a hot dish, garnish with the onions, and send the gravy to table in a sauce-boat. If necessary, the gravy can be made from the sediment in the meat tin.

## PORK, BOILED, AND PEASE PUDDING.

INGREDIENTS.—Leg or other joint of salted or pickled pork, 1 good cabbage, 6 parsnips, 1 onion, 1 carrot,  $\frac{1}{2}$  a turnip, 1 strip of celery, 12 peppercorns. For the pudding: 1 quart of split peas, 1 oz. of butter, 2 yolks of eggs, salt and pepper.

METHOD.—Soak the peas for 12 hours. Place the pork in a boiling pot, cover it with warm water, unless very salt, in which case use cold water. Bring to the boil, skim well, boil for 10 minutes, add the onion, carrot, turnip, and celery, all cut into thick slices, put in the peppercorns, and simmer gently until done. Boil the parsnips and cabbage separately; divide the former lengthwise into 4 pieces, and press the latter well, season it with pepper, and cut it into small squares. Serve the pork in a hot dish, garnished with the parsnips and cabbage. The liquor in which pork is cooked may be converted into good pea-soup.

There are two methods of making the pease pudding. By the first method, the peas are drained from the water in which they are soaked, tied in a cloth, and cooked for about  $1\frac{1}{2}$  hours in the boiling-pot with the pork. They are then rubbed through a fine sieve, mixed with the butter and yolks of eggs, seasoned with salt and pepper, replaced in the cloth, and boiled with

## PORK, CROQUETTES OF.

the pork for about 40 minutes longer. The second method is probably the better one. After being drained from the water in which they were soaked, the peas are placed, with a dessertspoonful of salt, in a stewpan, which they about half fill, and covered with cold water, which must be replaced as it boils away. Cook the peas gently for about 2 hours, or till they are quite soft, then rub them through a fine sieve, add the butter, yolks of eggs, and season to taste. Press the purée into a well-buttered mould or basin, and either steam or bake for about 40 minutes.

TIME.—Allow 25 minutes to each lb. of pork. AVERAGE COST, the pork 9d. per lb., the pudding 9d.

## PORK CHEESE.

INGREDIENTS.—1 lb. of cold roast pork, 1 dessertspoonful of finely-chopped parsley,  $\frac{1}{4}$  of a teaspoonful of powdered sage,  $\frac{1}{4}$  of a teaspoonful of mixed herbs,  $\frac{1}{2}$  a teaspoonful of grated lemon-rind,  $\frac{1}{4}$  of a teaspoonful of grated nutmeg, salt and pepper,  $\frac{1}{2}$  pint of gravy or stock, sufficiently strong to form a jelly when cold.

METHOD.—Cut the meat into dice, using more or less of the fat, according to taste. Add to it the parsley, sage, herbs, lemon-rind, nutmeg, and a liberal seasoning of salt and pepper, and mix well together. Press tightly into a mould, fill up with gravy, and bake about  $1\frac{1}{4}$  hours in a moderate oven. When cold, turn out of the mould and garnish with parsley.

TIME.—About  $1\frac{1}{2}$  hours. AVERAGE COST, 1s. 3d., in addition to the stock. SUFFICIENT for 5 persons.

## PORK, CROQUETTES OF.

INGREDIENTS.— $\frac{1}{2}$  lb. of finely-chopped cooked lean pork,  $\frac{1}{2}$  a teaspoonful of finely-chopped

## PORK CUTLETS, GRILLED.

**METHOD.**—Melt the butter in a stewpan, fry the onion lightly, then stir in first the flour and afterwards the stock, and boil gently for 10 or 12 minutes, stirring briskly meanwhile. Add the meat, sage, marjoram, and a good seasoning of salt and pepper, stir over the fire until well mixed, and turn on to a plate to cool. Form into cork-shaped pieces, coat with egg and breadcrumbs, and fry in hot fat.

**TIME.**—To fry, 4 to 5 minutes. **AVERAGE COST,** 9d. **SUFFICIENT** for 4 or 5 persons. **SEASONABLE** in winter.

## PORK CUTLETS, GRILLED.

**INGREDIENTS.**—7 or 8 lean cutlets cut from the best end of the neck,  $2\frac{1}{2}$  ozs. of butter, 1 oz. of flour,  $\frac{1}{2}$  pint of gravy or stock, 2 tablespoonfuls of chopped gherkins, 1 tablespoonful of vinegar, salt and pepper.

**METHOD.**—Trim off nearly all the fat, and make the cutlets a good uniform shape. Season both sides of them with salt and pepper, dip them in warm butter, coat carefully with breadcrumbs, and grill over a clear fire for 20 minutes, turning them 3 or 4 times. Pour the remainder of the butter into a small stewpan, add the flour, stir over the fire for 2 or 3 minutes, put in the gravy and vinegar, boil up, season to taste, and add the gherkins. Arrange the cutlets in a close circle on a hot dish, pour the sauce round, and serve.

**TIME.**—20 minutes, to grill the cutlets. **AVERAGE COST,** 10d. per lb. **SUFFICIENT** for 5 or 6 persons.

## PORK CUTLETS OR CHOPS.

### PORK CUTLETS, HASH OF.

**INGREDIENTS.**—The remains of cold loin of pork; to 6 or 7 cutlets allow 1 medium-sized Spanish onion coarsely chopped, 1 oz. of butter, 1 dessertspoonful of flour, 1 teaspoonful of vinegar, 1 teaspoonful of made mustard,  $\frac{1}{3}$  of a pint of good gravy, salt and pepper.

**METHOD.**—Divide the loin into neat cutlets, and trim away the greater part of the fat. Melt the butter in a sauté or frying-pan, put in the cutlets, fry them until both sides are lightly browned, then remove and keep hot. Add the onions to the butter in the pan, fry until they acquire a good brown colour, sprinkle in the flour, season with salt and pepper, and cook for a few minutes longer to lightly brown the flour. Now add the stock, vinegar, and mustard, boil up and pour the mixture over the cutlets, which must be previously arranged in a close circle on a hot dish.

**TIME.**—About 5 minutes, to fry the cutlets. **AVERAGE COST,** 1s. 6d. to 1s. 9d. **SUFFICIENT** for 6 or 7 persons.

### PORK CUTLETS OR CHOPS.

**METHOD.**—Trim the chops into a good shape, and remove the greater part of the fat. Put any bones, lean trimmings, and the onion into a stewpan with barely sufficient water to cover them, and boil gently for at least 1 hour. Heat the butter in a sauté or frying-pan, and fry the chops slowly, to cook them thoroughly. In the meantime, strain the gravy, skim off the fat, rub the onion through a

## PORK CUTLETS OR CHOPS.

fine sieve, replace in the stewpan with the gelatine, which is intended to give it consistency, but when convenient may be replaced with glaze, which improves the flavour. Season to taste, and brighten the colour by adding a few drops of liquid caramel. Arrange the cutlets in a close circle on a potato border, pour the sauce (which must be thick enough to coat the cutlets) over them, and serve the tomato or apple sauce separately.

TIME.—To fry the chops, from 15 to 20 minutes. AVERAGE COST, 10d. per lb. SUFFICIENT for 3 or 4 persons.

### PORK CUTLETS OR CHOPS (Another Method).

INGREDIENTS.—2½ lbs. of loin or neck of pork, ½ pint of tomato sauce, salad-oil or oiled butter, salt and pepper.

METHOD.—Remove the greater part of the fat, divide the meat into cutlets, and trim them into a good shape. Brush over with salad-oil or butter, sprinkle both sides with salt and pepper, and grill the cutlets over a clear fire for about 15 minutes, turning them 3 or 4 times. Arrange neatly on a hot dish, pour the hot sauce round, and serve.

TIME.—To grill the cutlets, about 20 minutes. AVERAGE COST, 10d. per lb. SUFFICIENT for 6 or 7 persons.

### PORK CUTLETS WITH ROBERT SAUCE.

METHOD.—Trim the cutlets neatly, leaving about ½ an inch of fat round each one. Place them

## PORK, GALANTINE OF.

on a dish, pour over the marinade, and let them remain in it for 1 hour, turning them frequently. Drain well, and broil over a clear fire for about 20 minutes. Or, if preferred, fry the cutlets in a little hot butter, in a sauté-pan. Arrange them in a close circle on a hot dish, pour the Robert sauce round, and serve.

TIME.—To cook, about 20 minutes. AVERAGE COST, 10d. per lb. SUFFICIENT for 5 or 6 persons.

### PORK CUTLETS WITH SOUBISE SAUCE.

INGREDIENTS.—8 or 9 cutlets from the best end of the neck, ½ pint of thick Soubise sauce, ½ pint of demi-glaze sauce, marinade as in preceding recipe, salt and pepper.

METHOD.—Prepare and marinate the cutlets as directed in the preceding recipe, and either grill them from 15 to 18 minutes over a clear fire or fry them for the same length of time in hot butter, in a sauté- or frying-pan. Dish them in a circle, serve the soubise sauce in the centre, and pour the demi-glaze sauce round the base of the dish.

TIME.—To fry or grill, about 20 minutes. AVERAGE COST, 10d. per lb. SUFFICIENT for 6 or 7 persons.

## PORK, HASHED.

in a cloth. Place the roll in a stewpan containing sufficient hot stock, or hot water and vegetables, to just cover it, and cook gently from  $2\frac{1}{2}$  to 3 hours. Press between two dishes until cold, then remove the cloth, brush over with glaze, and serve garnished with parsley.

TIME.—To cook, from  $3\frac{1}{2}$  to 4 hours. AVERAGE COST, 8*d.* per lb. SEASONABLE in the winter.

## PORK, HASHED.

INGREDIENTS.—1 lb. of either cold roast or boiled pork,  $1\frac{1}{2}$  ozs. of butter, 1 dessertspoonful of Worcester sauce, 1 dessertspoonful of ketchup, 1 small teaspoonful of made mustard,  $\frac{1}{2}$  a teaspoonful of lemon juice, cayenne, salt and pepper.

METHOD.—Cut the meat into small slices, and sprinkle them with salt and a very little cayenne. Put the butter, Worcester sauce, ketchup, lemon-juice, and mustard into a stewpan, and when quite hot add the slices of meat, and allow them to remain for 15 or 20 minutes, to become thoroughly impregnated with the flavour of the sauce. Shake the stewpan or stir the contents occasionally, but on no account allow the sauce to boil.

TIME.—About 20 minutes. AVERAGE COST, 1*s.* 3*d.* SUFFICIENT for 4 or 5 persons.

## PORK KIDNEY, FRITTERS OF.

INGREDIENTS.—2 pig's kidneys, pig's caul,  $\frac{1}{2}$  pint of brown sauce, 2 yolks of eggs, 1 finely-chopped shallot,  $\frac{1}{2}$  a teaspoonful of finely-chopped parsley, 1 oz. of butter, frying-fat. For the batter: 2 ozs. of flour,  $\frac{1}{2}$  gill of tepid water, 1 tablespoonful of salad-oil or warm butter, the white of 1 egg, 1 salt-spoonful of salt.

## PORK, LEG OF, ROASTED.

METHOD.—Remove the skins and cores, and cut the kidneys into dice. Heat the butter in a stewpan, fry the shallot slightly, add the parsley and kidneys, cook gently for 5 minutes, then drain away the butter, and, if preferred, use it instead of salad-oil for the batter. Make the brown sauce, cool slightly, then pour it on to the yolks of eggs, stirring all the time. Have this sauce ready to add to the kidneys, pour it over them, season to taste, stir by the side of the fire until the yolks thicken, then turn on to a plate to cool. Meanwhile, wash the caul in salt and water, dry well, and cut into 3-inch squares. Make a smooth batter of the flour, water, salt, and salad-oil or butter, then add the white of egg stiffly whipped. When the mixture is cold divide it into small portions, enclose them in the pieces of caul, dip them into the batter, and fry until brown in hot fat.

TIME.— $1\frac{1}{2}$  hours. AVERAGE COST, 1*s.* 6*d.* to 1*s.* 9*d.* SUFFICIENT for 4 persons.

## PORK, LEG OF, ROASTED.

INGREDIENTS.—A leg of pork, onion forcemeat, salad-oil,  $\frac{1}{2}$  pint of gravy, dripping for basting, apple sauce.

METHOD.—Remove the bones down to the knuckle bone, break them into smaller pieces, and simmer them for gravy. Make the forcemeat as directed, press it lightly inside the leg, and secure the opening. Score the skin in narrow strips, brush over with salad-oil, and either roast it before a clear fire or bake it in a moderate oven. Serve the gravy and apple sauce in sauce-boats.

TIME.—Allow 25 minutes to each lb. of meat. AVERAGE COST, 9*d.* per lb.

## PORK, LOIN OF, BAKED.

### PORK, LOIN OF, BAKED.

INGREDIENTS.—3 or 4 lbs. of loin of pork, 18 potatoes, 8 apples, 6 onions, all peeled and quartered, salad-oil, gravy.

METHOD.—Score the skin in narrow lines, and brush it over with salad-oil. Bake in a moderately hot oven for 40 minutes, then put the potatoes, apples, and onions into the tin containing the meat, and continue to cook gently from  $1\frac{1}{4}$  to  $1\frac{1}{2}$  hours longer. When ready, arrange the vegetables and apples on a hot dish, place the meat in the centre, and serve the gravy separately.

TIME.—From 2 to  $2\frac{1}{2}$  hours. AVERAGE COST, 9d. to 10d. per lb. SUFFICIENT for 6 or 7 persons. SEASONABLE during the winter months.

Add all the ingredients enumerated above, and let the meat remain in the marinade 4 or 5 days, turning and basting it daily. When ready, put both meat and marinade into an earthenware baking-dish, add  $\frac{1}{2}$  pint of boiling water, and cook very gently in the oven from  $2\frac{1}{2}$  to 3 hours, basting frequently. Strain the gravy, and serve a little poured over the meat, and the remainder separately.

TIME.—To cook, from  $2\frac{1}{2}$  to 3 hours. AVERAGE COST, 10d. per lb. SUFFICIENT for 6 or 7 persons. SEASONABLE in the winter.

## PORK, MINCED.

### PORK, LOIN OF, STUFFED.

INGREDIENTS.—A loin of pork, onion stuffing, gravy, apple sauce.

METHOD.—Score the skin in narrow lines, and make an opening for the stuffing by separating the meat from the bone on the inner side. After putting in the stuffing secure the opening, wrap the loin in a greased paper, and roast before a clear fire, or in a moderately hot oven for about 2 hours. Baste frequently, and  $\frac{1}{2}$  an hour before serving remove the paper to allow the crackling to brown. Serve the gravy and apple sauce separately.

TIME.—About 2 hours. AVERAGE COST, 9d. to 10d. per lb. SUFFICIENT for 6 or 7 persons. SEASONABLE in the winter.

Note.—The sage and onion stuffing may be baked and served separately, or altogether omitted.

### PORK, MINCED.

INGREDIENTS.—1 lb. of cold roast pork, 2 onions finely chopped, 2 apples coarsely chopped, 2 ozs. of butter, 1 dessertspoonful of flour, 1 teaspoonful of lemon-juice,  $\frac{1}{3}$  pint of stock, dry mustard, salt and pepper.

METHOD.—Cut the meat into very small dice, and, unless gravy or good stock is at hand, boil the bones and trimmings for at least 1 hour, then strain and boil rapidly until reduced to  $\frac{3}{4}$  pint. Melt the butter in a stewpan, fry the onion until lightly browned, then add the apple, and fry until tender, but not broken. Sprinkle in the flour, add a good pinch of mustard, stir and cook gently for 3 or 4 minutes, then add the stock, and stir until boiling. Season to taste, boil gently for 5 minutes, then put in the meat, add the lemon-juice, and allow the stewpan to stand for about  $\frac{1}{2}$  an hour where the contents will remain just below simmering point.

## PORK MOULD.

Serve in a border of rice, or mashed potato, or garnished with sippets of toasted bread.

TIME.—To re-heat the meat, about  $\frac{1}{2}$  an hour. AVERAGE COST, 1s. 6d. to 1s. 8d. SUFFICIENT for 3 or 4 persons. SEASONABLE in winter.

## PORK MOULD.

INGREDIENTS.—1 lb. of cold roast pork, 2 tablespoonfuls of mashed potato, 1 teaspoonful of parboiled and finely-chopped onion, about  $\frac{1}{4}$  pint of sour cream or milk, salt and pepper, brown breadcrumbs,  $\frac{1}{2}$  pint of gravy.

METHOD.—Remove the skin and greater part of the fat from the meat, chop it finely, and add to it the onion and potatoes. Season highly with salt and pepper, and work in sufficient sour cream or milk to bind the mixture together. Coat a well-buttered mould or pie-dish thickly with brown breadcrumbs, put in the mixture, and bake for about  $\frac{3}{4}$  of an hour in a moderate oven. The mixture may also be formed into small cakes, coated with egg and breadcrumbs, and fried. The gravy may be made from the bones and trimmings of the meat, and should be served separately.

TIME.—To cook, about  $\frac{3}{4}$  of an hour. SUFFICIENT for 2 or 3 persons.

## PORK, PICKLED, TO BOIL.

INGREDIENTS.—Pork, water.

METHOD.—Should the pork be very salt, let it remain in water about 2 hours before it is dressed. Put it into a saucepan with sufficient cold water to cover it, let it gradually come to a boil, then gently simmer until quite tender. Allow ample time for it to cook, as nothing is more unwholesome than underdone pork, and, when boiled

## PORK PIE.

fast, the meat becomes hard. This is sometimes served with boiled poultry and roast veal, instead of bacon; when tender, and not over salt, it will be found equally good.

TIME.—A piece of pickled pork weighing 2 lbs.,  $1\frac{1}{4}$  hours; 4 lbs., rather more than 2 hours. AVERAGE COST, 9d. per lb. for the prime parts.

## PORK PIE.

INGREDIENTS.— $1\frac{1}{2}$  lbs. of lean pork, 1 lb. of household flour, 6 ozs. of lard, 1 small onion,  $\frac{1}{4}$  pint of water, cayenne, pepper and salt.

METHOD.—Cut the meat into dice, and season it well with salt and pepper. Place the bones in a stewpan, add the onion, salt and pepper, cover with cold water, and simmer for at least 2 hours to extract the gelatine, in order that the gravy, when cold, may be a firm jelly. Put the flour into a large basin, and add to it a good pinch of salt. Boil the lard and water together for 5 minutes, then add it to the flour, stirring it thoroughly until cool enough to be kneaded. Knead until smooth, cover with a cloth, and let the basin stand near the fire for about  $\frac{1}{2}$  an hour. Throughout the whole process the paste must be kept warm, otherwise moulding may be extremely difficult; but overheating must also be avoided, for when the paste is too soft it is unable to support its own weight. At the end of this time, re-knead the paste, put aside about  $\frac{1}{4}$  for the lid, and raise the remainder into a round or oval form, as may be preferred. If an inexperienced worker finds any difficulty in raising the pie by hand alone, a small jar may be placed in the centre of the paste, and the paste moulded over it. When the lower part of the pie has been raised to the necessary

## PORK PIES.

shape and thinness, subsequent work may be made much easier by putting in some of the meat, and pressing it firmly down to support the lower part of the pie. Before adding the lid, moisten the meat with 2 or 3 tablespoonfuls of the prepared seasoned gravy; the remainder is re-heated, and added after the pie is baked and still hot. Three or four folds of greased paper should be pinned round the pie to preserve its shape, and prevent it becoming too brown. The pie should be baked for at least 2 hours in a moderate oven, and its appearance is greatly improved by brushing it over with yolk of egg when about  $\frac{3}{4}$  baked. Slices of hard-boiled egg are often added with the meat.

TIME.—To bake, about 2 hours.  
AVERAGE COST, 1s. 6d. to 1s. 8d.  
SUFFICIENT for 1 medium-sized pie.

### PORK PIES, LITTLE RAISED.

INGREDIENTS.—2 lbs. of lean pork, 1 lb. of household flour, 8 ozs. of lard,  $\frac{1}{2}$  a teaspoonful of powdered sage, cayenne, pepper and salt,  $\frac{1}{4}$  pint of water, 1 small onion.

METHOD.—Prepare the stock, meat, and paste as directed in the recipe for "Pork Pie." Divide the paste into small pieces, raise in a round or oval form, and fill with meat. Sprinkle lightly with sage, moisten with stock, and put on the covers. Bake in a moderately hot oven for about 1 hour, then fill up with stock, and serve either hot or cold.

TIME.—To bake, about 1 $\frac{1}{2}$  hours.  
AVERAGE COST, 2s. 3d. to 2s. 6d.

### PORK STUFFING.

INGREDIENTS.—1 lb. of onions, 4 tablespoonfuls of bread-crumbs, 2 ozs. of butter, 1 dessertspoonful

## PORK, TO CURE.

of finely - chopped sage or a teaspoonful of powdered sage, salt and pepper.

METHOD.—Cut the onions into slices, cover them with cold water, bring to the boil, cook for 5 minutes, then strain and drain well. Melt the butter in a stewpan, and fry the onions for about 15 minutes without browning. Add the bread-crumbs, sage, and seasoning, mix well, and use as required.

AVERAGE COST.—4d. SUFFICIENT for a leg or loin of pork.

Note.—For other methods See "Sage and Onion Stuffing."

### PORK, TENDERLOIN OF.

INGREDIENTS.—Tenderloin chops, sage, salt and pepper, frying-fat.

METHOD.—Place the chops in a frying-pan containing a little hot fat, sprinkle lightly with sage, salt and pepper, cook gently for 10 minutes, then turn and sprinkle the other side. Cook slowly for 10 minutes longer, then remove the chops and keep them hot and pour away all the fat. Add a little boiling water to the sediment in the frying-pan, season to taste with salt and pepper, boil up, pour round the chops, and serve.

TIME.—About 20 minutes. AVERAGE COST, 7d. or 8d. per lb. ALLOW 1 large or 2 small chops to each person. SEASONABLE at any time.

### PORK, TO CURE OR PICKLE.

INGREDIENTS.— $\frac{1}{4}$  lb. of saltpetre, salt.

METHOD.—As pork does not keep long without being salted, cut it into pieces of a suitable size as soon as the pig is cold. Rub the pieces of pork well with salt, put them into a pan with a sprinkling of it between each piece, and as it dissolves on the top, sprinkle on more. Lay a coarse cloth over the pan, and over it a board, and place

## PORTERHOUSE STEAK.

a weight on the board, to keep the pork down in the brine. If the air be excluded, it will continue good for nearly 2 years.

AVERAGE COST.—9*d.* per lb. for the prime parts.

## PORTERHOUSE STEAK.

INGREDIENTS.—A steak, about 1½ inches in thickness, cut from a well-hung sirloin of beef, warm butter or salad-oil.

METHOD.—Brush the steak over on both sides with salad-oil or warm butter, sprinkle with pepper, and when convenient let it remain for 1 hour before cooking. METHOD.—Slice the potatoes, onion, and celery. Make the butter hot in a stewpan, add the vegetables, fry and cook until the butter is absorbed, stirring frequently to prevent them browning. Add the stock, and simmer until the vegetables are tender (about 1 hour). Rub through a fine sieve; return to the saucepan, add the milk, and bring to the boil. Sprinkle in the sage, cook until transparent, add seasoning to taste, and serve.

TIME.—About  $1\frac{1}{2}$  hours. AVERAGE COST, 9d. to 1s. SEASONABLE at any time. SUFFICIENT for 4 or 5 persons.

METHOD.—Cut up the prepared vegetables, using only the white part of the leek, and put them in a saucepan with the butter. Let them cook for about 10 minutes, but not take colour; then add the milk and water, and boil for about  $\frac{3}{4}$  of an hour, or until the mixture is soft enough to rub through a fine sieve. TIME.—To fry the straws, about 15 minutes. AVERAGE COST, 3d. SUFFICIENT for 2 or 3 persons. SEASONABLE at any time.

### POTATO VERMICELLI.

## POTATOES, BAKED.

INGREDIENTS.—Potatoes.

METHOD.—Choose large potatoes, as much of a size as possible; wash them in lukewarm water, and scrub them well, for the brown skin of a baked potato is by many persons considered the better part of it. Put them in a moderate oven, and bake them for about 2 hours, turning them 3 or 4 times while they are cooking. Serve them in a napkin immediately they are done, for if they are kept a long time in the oven they will have a

shrivelled appearance. Potatoes may also be roasted before the fire in an American oven, but when thus cooked, they must be done very slowly.

TIME.—From 1 to 2 hours, according to size. AVERAGE COST, 1*d.* per lb. SEASONABLE all the year.

## POTATOES, BOILED.

INGREDIENTS.—Potatoes, salt.

METHOD.—Choose potatoes of equal size, scrub them, peel them thinly, wash them well in clean cold water, but do not let them remain in it for more than 10 minutes. Put them into a saucepan, with sufficient BOILING water to cover them, add a teaspoonful of salt to each quart of water, and boil GENTLY from 20 to 40 minutes, according to age and size. Ascertain when they are done by trying one with a skewer; if soft, drain off the water, put the saucepan by the side of the fire with the lid tilted, to allow the steam to escape, let them remain for about 10 minutes, then serve.

TIME.—From 20 to 40 minutes. AVERAGE COST, 1*d.* per lb. SEASONABLE at any time.

Note.—Opinions are divided as to whether potatoes should be put into cold or boiling water. Those who adopt the former method can give no reason for so doing, save that of its being an old custom, whereas many who have made a scientific study of the culinary treatment of this vegetable, assert, and with good reason, that the darker layer of potato immediately under the skin is composed almost entirely of gluten, a substance which, like albumen, when subjected to the temperature of boiling water, at once hardens, forming an impervious layer that prevents the water reaching the inner starchy part of the potato. Consequently, the potatoes are more dry and floury than they would otherwise be. Potatoes may be kept hot for some time without spoiling if covered

with a folded cloth to absorb the moisture, and the saucepan itself uncovered, to allow the steam to escape.

## POTATOES, COLD, TO USE UP.

INGREDIENTS.—1 lb. of cold potatoes, 1 oz. of butter, 2 tablespoonfuls of finely-chopped onion, 2 tablespoonfuls of flour, milk, salt and pepper.

METHOD.—Pass the potatoes through a sieve, or beat them smooth with a fork. Add the butter, onion, and sufficient milk to moisten them, season to taste with salt and pepper, and press the mixture into a well-greased mould or basin. Bake in a moderate oven for about  $\frac{1}{2}$  an hour, then turn the potatoes out and serve. For other methods of utilizing cold potatoes, see Bubble and Squeak, Potato Balls, Potatoes, Mashed and Baked.

TIME.—To bake the mould, about  $\frac{1}{2}$  an hour. AVERAGE COST, 2*d.* to 2 $\frac{1}{2}$ *d.* SUFFICIENT for 2 or 3 persons. SEASONABLE at any time.

## POTATOES, CRISP

(See Potatoes, Fried).

## POTATOES, FRIED.

INGREDIENTS.—Potatoes, hot oil or clarified dripping, salt.

METHOD.—Peel and cut the potatoes into thin slices, as nearly the same size as possible; parboil them, and dry them in a cloth. Make some oil or dripping quite hot in a saucepan, put in the potatoes, and fry to a nice brown. When they are crisp and done take them up, drain them on paper before the fire, and serve very hot, after sprinkling them with salt. These are delicious with rump-steak, and in France are frequently served as a breakfast dish. The remains of cold potatoes

## POTATOES, FRIED.

may be sliced and fried by the above recipe, but the slices must be cut a little thicker.

TIME.—Sliced raw potatoes, 25 minutes; cooked potatoes, 15 minutes. AVERAGE COST, 1*d.* per lb. SEASONABLE at any time.

### POTATOES, FRIED (Another Method).

INGREDIENTS.—6 potatoes,  $\frac{1}{2}$  lb. of butter, salt.

METHOD.—Peel the potatoes very evenly, cut them into slices as thin as possible. Place the butter in a frying-pan, and as soon as it is boiling add the sliced potatoes, and fry them a bright gold colour, shaking them so as to cook them equally. Drain on sheets of paper before the fire, powder with salt, and serve very hot. Serve with game.

TIME.—10 to 12 minutes to fry. AVERAGE COST, 1*d.* per lb. SUFFICIENT for 3 persons. SEASONABLE at any time.

*Note.*—POTATO BREAD.—The adhesive tendency of the flour of the potato prevents its being baked or kneaded without being mixed with wheaten flour or meal; it may, however, be made into cakes in the following manner: A small wooden frame, nearly square is laid on a pan like a frying-pan, and is grooved and so constructed that, by means of a presser or lid introduced into the groove, the cake is at once fashioned, according to the dimensions of the mould. The frame containing the farina may be almost immediately withdrawn after the mould is formed upon the pan, because from the consistency imparted to the incipient cake by the heat it will speedily admit of being safely handled; it must not, however, be fried too hastily. It will then eat very palatably, and might from time to time be soaked for puddings, like tapioca, or be used like the casada-cake, for, when well buttered and toasted, it is excellent for breakfast.

## POTATOES, MASHED.

### POTATOES (German Method of Cooking).

INGREDIENTS.—8 or 9 medium-sized potatoes, 2 ozs. of butter, 2 tablespoonfuls of flour, 2 tablespoonfuls of vinegar,  $\frac{1}{2}$  pint of stock, salt and pepper.

TIME.—About 25 minutes. AVERAGE COST, 4*d.* to 5*d.* SUFFICIENT for 3 or 4 persons. SEASONABLE at any time.

### POTATOES, MASHED.

INGREDIENTS.—1 lb. of potatoes, 1 oz. of butter, 1 or 2 tablespoonfuls of milk, salt.

METHOD.—Peel and steam the potatoes over a saucepan of boiling water, or boil them in their skins, and afterwards peel them. In either case, pass the potatoes through a wire sieve, or mash them well with a fork. Heat the butter in a stewpan, add the milk, stir in the potato, and season to taste with salt. Beat well with a wooden spoon, pile lightly in a hot dish, then serve. *See* Potato Rice, and Potato Vermicelli.

TIME.—To steam the potatoes, from 30 to 40 minutes. AVERAGE COST, 1*d.* per lb. SUFFICIENT for 3 persons. SEASONABLE at any time.

### POTATOES, MASHED AND BAKED.

INGREDIENTS.—1 lb. of cold mashed potato, 1 $\frac{1}{2}$  ozs. of butter, 1 heaped tablespoonful of grated cheese, preferably Parmesan, 1 tablespoonful of milk (about), the yolk of 1 egg, salt and pepper.

## POTATOES, PARISIAN.

**METHOD.**—Boil the potatoes, and rub them through a sieve whilst hot. Mix all the ingredients well together in a stewpan over the fire, then spread it on a floured board, and shape into rolls about  $2\frac{1}{2}$  inches long, and rather less than 1 inch in width. Or, cut into triangular or diamond-shaped pieces, place on a greased baking-tin, brush over with egg, and bake them in a moderately hot oven until nicely browned. Before serving, brush over with warm butter, and sprinkle with finely-chopped parsley. The potatoes may be served as a separate dish, or used as a garnish for many entrées and “dressed vegetables.”

**TIME.**—From  $1\frac{1}{4}$  to  $1\frac{1}{2}$  hours. **AVERAGE COST**, about 6*d.* **SEASONABLE** at any time.

## POTATOES, PARISIAN.

**INGREDIENTS.**—Potatoes, 2 or 3 ozs. of butter, 1 teaspoonful of finely-chopped parsley, salt.

**METHOD.**—With a large round vegetable scoop prepare as many potatoes as may be required. To 1 pint allow the above proportions of butter and parsley. Heat the butter in a sauté-pan, fry the potatoes over the fire until well browned, then cook more slowly in the oven until tender. Drain off the butter, season with salt, sprinkle with parsley, and serve.

**TIME.**—About 15 minutes. **AVERAGE COST**, 1*d.* per lb. **SEASONABLE** at any time.

and even-sized potatoes, wash and boil them in their skins until three parts cooked, let them dry thoroughly, then peel and slice them rather thinly. Heat the butter in a sauté or frying-pan, put in the potatoes, and season with salt and pepper. Toss them over the fire until they acquire a little colour, then serve.

**TIME.**—To sauté the potatoes, from 4 to 5 minutes. **AVERAGE COST**, 2*d.* to 3*d.* **SUFFICIENT** for 2 or 3 persons. **SEASONABLE** at any time.

## POTATOES, TO BOIL NEW.

**INGREDIENTS.**—Potatoes; to each  $\frac{1}{2}$  gallon of water allow 1 heaped tablespoonful of salt, a few sprigs of mint.

**METHOD.**—Have the potatoes as fresh as possible, for they are never good when they have been some time out of the ground. Well wash them, rub or scrape off the skins, and put them and the mint into boiling water salted in the above proportion. Let them boil until tender; try them with a fork, and, when done, pour away the water. Allow them to stand by the side of the fire with the lid of the saucepan partially removed, and when they are thoroughly dry, put them in a hot vegetable dish, with a piece of butter the size of a walnut. If they are old, boil them in their jackets; drain, peel, and serve them as above, placing a piece of butter in the centre. Parsley chopped and mixed with the butter is an improvement.

**TIME.**— $\frac{1}{4}$  to  $\frac{1}{2}$  an hour, according to the size. **AVERAGE COST**, in full season  $1\frac{1}{2}$ *d.* per lb. **SUFFICIENT**, 3 lbs. for 5 or 6 persons. **SEASONABLE** in May and June, but may be had forced in March and April.

## POTATOES, TO STEAM.

### POTATOES, TO STEAM.

INGREDIENTS.—Potatoes, boiling water.

METHOD.—This method of cooking potatoes is now much in vogue, from its convenience when large quantities are required. Pare the potatoes, throw them into cold water as they are peeled, then put them in a steamer. Place the steamer over a saucepan of boiling water, and steam the potatoes from 30 to 40 minutes, according to size and sort. When the fork goes easily through the potatoes they are done; then take them up, dish, and serve very quickly.

TIME.—From 30 to 40 minutes. AVERAGE COST, 1*d.* per lb. SEASONABLE at any time.

### POTATOES WITH CHEESE.

METHOD.—Scrub the potatoes and bake them in their skins. When ready, cut in halves, empty the skins into a small stewpan, add the cheese, butter, yolk of egg, milk, and parsley, season with salt and pepper, and mix well over the fire. Beat the whites stiffly, stir them lightly in, then fill the potato skins with the mixture, piling it somewhat high. Brush over with a little yolk of egg, and bake in a moderate oven for about 15 minutes.

TIME.—From 1½ to 2 hours. AVERAGE COST, 6*d.* SUFFICIENT for 6 persons. SEASONABLE at any time.

*Note.*—This mixture can also be baked in scallop shells or patty-pans, which should be previously well buttered and covered with breadcrumbs.

TIME.—To bake the pudding, ½ an hour. AVERAGE COST, 5*d.* SUFFICIENT for 2 persons.

### POT-AU-FEU (French Family Soup).

INGREDIENTS.—4 lbs. of brisket of beef, ½ a cabbage, 2 leeks, 1 large onion, 2 carrots, a bouquet-garni (parsley, thyme, bay-leaf), 1 dessertspoonful of chopped parsley, 4 cloves, 12 peppercorns, 1 tablespoonful of salt, ½ lb. of French bread, 6 quarts of cold water.

METHOD.—Put the meat and water into a stock-pot or boiling pot, let it come gently to boiling point, and skim well. Wash and clean the vegetables, stick the cloves in the onion, tie up the cabbage and leeks, and put all in with the meat. Add the carrots cut into large pieces, the bouquet-garni, peppercorns, and salt, and let the whole simmer gently for 4 hours. Just before serving cut the bread into thin slices, place them in a soup tureen, and add some of the carrot, leeks, and onions cut into small pieces. Remove the meat from the pot, season the broth to taste, and strain it into the soup tureen. Sprinkle the chopped parsley on the top and serve. The meat and remaining vegetables may be served as a separate course; they may also be used up in some form for another meal. Or the meat and

METHOD.—Boil the salt, sugar, saltpetre, and water together for  $\frac{1}{2}$  an hour, skimming when necessary. Pour the brine into an earthenware vessel, and when quite cold put in the fowls, and let them remain 2 or 3 days. This method of preserving poultry is employed in South Africa, Australia, and other hot countries. The birds are killed, immediately scalded and stripped of their feathers, and at once immersed in brine. They are usually conveyed to market in small barrels, 3 or 4 being packed closely together, and covered with brine. They are best when dressed as a curry or pilau.

### POUND CAKE.

INGREDIENTS.—1 lb. of butter,  $1\frac{1}{4}$  lbs. of flour, 1 lb. of castor sugar, 1 lb. of currants, 8 eggs,  $\frac{1}{4}$  lb. of mixed candied peel, 2 ozs. of sweet almonds; and, if liked, a little pounded mace.

METHOD.—Shred the peel very finely, taking equal quantities of orange, lemon, and citron. Blanch the almonds, and chop them finely. Sieve the flour on to a sheet of paper, and add the peel and almonds to it. Put the butter into a clean bowl, and beat it up to a light cream with the hand; then add the sugar, and give it another good beating; add in the eggs one at a time, beating them after each addition of eggs, and when all

these ingredients are in, add the flour and carefully mix, using a little milk, if necessary, to bring the mixture to proper cake-batter consistency. Turn the preparation into round tins, lined at the bottoms and sides with white greased paper. Bake it from  $1\frac{1}{2}$  to 2 hours, and let the oven be well heated when the cake is first put in, otherwise the currants will all sink to the bottom. A glass of wine is sometimes added to the mixture, but this is scarcely necessary, as the cake will be found quite rich enough without it.

TIME.— $1\frac{1}{2}$  to 2 hours. AVERAGE COST, 3s. SUFFICIENT: the above quantity can be divided in 2 or more cakes as desired.

### POUND PUDDING.

INGREDIENTS.—1 lb. of finely-chopped suet, 1 lb. of currants cleaned, 1 lb. of raisins stoned,  $\frac{1}{2}$  lb. of breadcrumbs,  $\frac{1}{2}$  lb. of flour, 2 ozs. of shredded mixed peel, 1 teaspoonful of ground ginger,  $\frac{1}{2}$  a grated nutmeg,  $\frac{1}{2}$  pint of milk, 4 eggs.

METHOD.—Mix all the ingredients well together, and add a little more milk if necessary. Turn into a well-buttered mould, and boil for about  $3\frac{1}{2}$  to 4 hours.

TIME.—About  $4\frac{1}{2}$  hours. AVERAGE COST, 2s. 6d. SUFFICIENT for 9 to 11 persons.

### PRAWNS, CURRIED.

the curry-powder and flour, and cook slowly for 5 minutes. Add the milk and stir until it boils, then cover and let the sauce simmer gently for  $\frac{1}{2}$  an hour. Now put in the prawns and lemon-juice, season to taste, cook gently for 10 minutes, and serve with boiled rice.

TIME.—1 hour. AVERAGE COST, from 1s. 6d. to 2s. SUFFICIENT for from 4 to 8 persons, according to size. SEASONABLE at any time.

### PRAWNS, CURRIED (Tinned Food).

INGREDIENTS.—1 tin of prawns,  $\frac{1}{4}$  pint of curry sauce, well-boiled rice, lemon-juice.

METHOD.—Make the sauce as directed (tinned curry sauce may be substituted, or the prawns may be obtained ready curried), put in the prawns, make thoroughly hot, add lemon-juice to taste, and serve in a border of rice, or hand the rice separately.

TIME.—10 minutes, after the sauce is made. AVERAGE COST, 1s. 4d. to 1s. 6d. SUFFICIENT for 3 or 4 persons.

### PRAWNS, CURRY OF.

INGREDIENTS.—2 dozen prawns,  $1\frac{1}{2}$  ozs. of butter, 1 dessertspoonful of curry powder, 1 dessertspoonful of flour, 1 sour apple coarsely chopped, 1 small onion sliced, 1 tablespoonful of cocoanut grated, 1 teaspoonful of lemon-juice,  $\frac{1}{2}$  pint of stock, salt.

METHOD.—Shell the prawns and put them aside. Melt the butter in a stewpan, fry the onion without browning, then add the curry-powder and flour, and fry slowly for at least 20 minutes. Add the stock, apple, cocoanut, and a little salt, simmer gently for  $\frac{1}{2}$  an hour, then strain and return to the stewpan. Season to taste, add the lemon-juice, put in the prawns,

## PRAWNS, TO SERVE.

and when thoroughly hot serve with well-boiled rice.

TIME.—About 1 hour. AVERAGE COST, 2s. 6d. to 6s., according to the size of the prawns. SUFFICIENT for 5 or 6 persons. SEASONABLE at any time.

### PRAWNS OR SHRIMPS, POTTED.

INGREDIENTS.—1 quart of fresh prawns or shrimps,  $\frac{1}{4}$  lb. of fresh butter, cayenne, pounded mace or nutmeg, a little salt.

METHOD.—The fish should be perfectly fresh and as large as possible. Boil, then shell them and divide them slightly, and pound to a paste in a mortar with the butter and seasoning. Rub through a fine sieve, press into small pots, cover with clarified butter, and when cold tie down closely.

TIME.—8 minutes, to boil the prawns. AVERAGE COST, 1s. 3d. to 2s. SEASONABLE at any time.

### PRAWNS OR SHRIMPS, TO BOIL.

METHOD.—Prawns should be very red, and have no spawn when cooked; much depends on their freshness, and the way in which they are cooked. Throw them into boiling water, salted, and keep them boiling for about 7 or 8 minutes. Shrimps should be done in the same way, but less time must be allowed. It may easily be known when they are done by their changing colour. Care should be taken that they are not over-boiled, as they then become tasteless and indigestible.

TIME.—Prawns, about 8 minutes; shrimps, about 5 minutes. AVERAGE COST, prawns, 9d. to 1s. 6d. per dozen; shrimps, 4d. to 6d. per pint. SEASONABLE all the year.

### PRAWNS, TO SERVE.

Beat up the white and shell of the egg, add the mixture to the contents of the stewpan when sufficiently cool, and whisk by the side of the fire until boiling. Simmer very gently for 10 minutes, then strain through a hot jelly-bag or a cloth until clear, and pour into a mould previously rinsed with cold water.

let simmer for 10 minutes. Remove the bay-leaf, and stir in the egg yolks. Cut the chicken livers up small, sauté them in butter in which the finely-chopped shallot has been blended, season with pepper and salt, and rub through a sieve. Mix the purée with the breadcrumbs, etc., and stuff the bird with this. Wrap each quail in a thin slice of bacon, place them in an earthenware pan (casserole) with the remainder of the butter, and cook over a slow fire for  $\frac{1}{2}$  an hour. Pour off the fat, add the sauce, and finish cooking.

TIME.—About 1 hour. AVERAGE COST, 9s. to 10s. 6d. SUFFICIENT for 5 or 6 persons. SEASONABLE from October to February.

### QUAILS, ROASTED.

INGREDIENTS.—Quails, as many vine-leaves, small slices of fat bacon, and square croûtons of buttered toast as there are birds, good brown gravy, fried breadcrumbs, watercress, butter for basting.

METHOD.—Pluck the birds, remove the head, neck, and crop, but leave the trail. Truss the birds for roasting, brush them over with warm butter, cover each breast with a vine-leaf, and tie a piece of bacon over the leaf. Attach them to a long steel skewer, running it through the body of each bird, and either roast or bake from 12 to 15 minutes, basting frequently with hot butter. When cooked, remove the skewers and strings, but the bacon and vine-leaves may be served or not as preferred; if not removed, the bacon should be brushed over with warm glaze. Serve the birds on the toast, which should previously be put into the dripping-tin to catch the trail as it drops from the birds, garnish with watercress, and send the gravy and breadcrumbs to table in sauce-boats.

## QUAILS, STUFFED.

TIME.—From 12 to 15 minutes.  
AVERAGE COST, 1s. each. SEASON-  
ABLE from September to February.

### QUAILS, STUFFED.

INGREDIENTS.—Quails, liver farce, Madeira sauce, finely-chopped truffle, finely-chopped cooked ham, 2 ozs. of butter, white of egg, pork caul, salt and pepper. Vegetables for garnish.

METHOD.—Bone the quails, stuff them with the prepared farce, press into a good shape, and encircle each one with a band of buttered paper. Heat the butter in a sauté-pan, baste the birds well, and roast them in a moderate oven from 15 to 20 minutes, basting frequently. Meanwhile, wash the caul in salt and water, dry it well, and cut it into pieces large enough to contain half a bird. Split the birds in halves with a hot wet knife, enfold each half in a piece of caul, brush over with white of egg, and sprinkle one half of them with ham and the other half with truffle. Re-heat the butter in the sauté-pan, replace the birds, cover them with a buttered paper, and cook gently in the oven for 10 minutes. Dish in a close circle on a potato border, alternating the colours, fill the centre with asparagus points, peas, flageolets, or purée of spinach, and pour the hot Madeira sauce round. If preferred, the birds, instead of being sprinkled with ham and truffle, may be simply wrapped in caul, cooked for 10 minutes, then brushed over with warm glaze, and served in paper cases.

TIME.—About  $\frac{1}{2}$  an hour to cook.  
AVERAGE COST, 9d. to 1s. each.

METHOD.—Sieve the baking-powder well with the flour on to a sheet of paper. Put the butter, sugar, and cream into a clean basin, and beat up to a light cream. Add the eggs one at a time. When all the eggs are in, add the flour and fruit, and moisten with milk to the consistency of cake-batter. Put it into small buttered tins, and bake the cakes from  $\frac{1}{4}$  to  $\frac{1}{2}$  an hour. Grated lemon-rind may be substituted for the lemon and almond flavouring, and will make the cakes equally nice.

METHOD.—Soak the gelatine in the milk for  $\frac{1}{2}$  an hour, then stir it over the fire until dissolved, and add the sugar. Cool slightly, put in the yolks of eggs and cream, stir by the fire until the mixture thickens, but it must not boil. Let it cool, add the cherries, citron, and vanilla to taste, stir until on the point of setting, then turn into a mould previously lined with jelly, or rinsed with cold water.

TIME.—About 1 hour. AVERAGE COST, 2s. 3d. SUFFICIENT for 5 or 6 persons.

## QUEEN'S PUDDING.

**METHOD.**—Boil the milk, pour it over the breadcrumbs, add the sugar, butter, lemon-rind, and when it has cooled a little, stir in the beaten yolks of eggs. Place the mixture in a buttered piedish, and bake for 10 minutes or until set. Now spread on a thick layer of jam, cover with the stiffly-whisked whites of eggs, and dredge well with castor sugar. Return it to the oven, and bake until the meringue hardens and acquires a little colour.

**TIME.**—About 1 hour. **AVERAGE COST,** 10*d.* **SUFFICIENT** for 5 or 6 persons.

## QUEEN'S PUDDING.

**INGREDIENTS.**—4 ozs. of finely-chopped suet, 2 ozs. of castor sugar, 6 bananas sliced, 3 eggs, 1 breakfastcupful of whole meal, 1 breakfastcupful of boiling milk.

**TIME.**—To steam the pudding, about 1 hour. **AVERAGE COST,** 1*s.* 4*d.* to 1*s.* 6*d.* **SUFFICIENT** for 5 or 6 persons.

## QUENELLES, TO SHAPE.

To make quenelles a good shape it is necessary to use a knife and two dessertspoons, or smaller spoons when intended for soup. Dip one of the spoons in hot water to prevent the mixture sticking to it, fill it with the farce, press it from the sides, and raise it in the centre with the knife (previously dipped in hot water), making it a nice oval shape. Take the other spoon, dip it into hot water, pass the knife carefully round the edge

of the quenelle, transfer it to the second spoon and shape as before. As the quenelles are shaped they should be placed in the sauté-pan, or stewpan, in which they are to be cooked. When ready, sufficient boiling stock or water to half cover them should be added, and the top of the quenelles must be covered with a sheet of greased paper to preserve the colour, and keep moist that part of the quenelles not under water.

## QUINCE AND APPLE MARMALADE (See Quince Marmalade).

Use equal parts of quince and apple purée.

## QUINCE BLANCMANGE.

**INGREDIENTS.**—1 lb. of ripe quinces, 6 ozs. of castor sugar,  $\frac{3}{4}$  oz. of gelatine,  $\frac{1}{4}$  pint of double cream, 1 pint of water.

**METHOD.**—Peel and core the quinces, simmer them in the water until quite soft and broken, but not reduced to a pulp, then strain through a jelly-bag. Replace the liquor in the pan, add the sugar and the gelatine previously soaked in a little cold water, and stir and boil gently until the gelatine is dissolved. When cool, add the cream, mix well, and turn into a mould rinsed with cold water.

**TIME.**—About 1½ hours. **AVERAGE COST,** 1*s.* 6*d.* **SUFFICIENT** for 4 or 5 persons.

Barely cover with stock, put on a close-fitting lid, and cook very gently until tender. Meanwhile, heat the butter in another stewpan, fry the flour slowly until it acquires a nut-brown colour, then stir in the tomato purée. When ready, remove the rabbit and keep it hot. peppercorns, salt, onion sauce, boiled or fried bacon.

**METHOD.**—Wash and truss the rabbit, put it into boiling water; when the water re-boils add the vegetables cut into large pieces, the bouquet-garni, peppercorns, and a teaspoonful of salt. ## RASPBERRY AND CURRANT PUDDING (From bottled raspberries).

INGREDIENTS.—1 bottle of raspberries and currants,  $\frac{1}{2}$  pint of water, stale bread, sugar. For the custard: 1 packet of custard powder, 2 tablespoonfuls of condensed milk, 1 pint of water.

METHOD.—Add  $\frac{1}{2}$  pint of water to the fruit and juice, cook gently for 20 minutes, sweeten to taste, and strain off the juice. Select a piedish large enough to contain three-fourths of the materials, line the bottom with a rather thin slice (or slices) of bread, and add a layer of fruit, cover with bread, repeat until all the fruit is used, and add the syrup, a little at a time, to avoid floating the bread. On the following day make the custard, pour it into the piedish, and serve when quite cold.

TIME.—1 day. AVERAGE COST, 1s. 6d. SUFFICIENT for 6 or 7 persons.

## RASPBERRY CARMELS.

### RASPBERRY CARMELS.

INGREDIENTS.—2 lbs. of granulated sugar, 1 oz. of butter,  $\frac{1}{2}$  pint of cream,  $\frac{1}{2}$  pint of water, 3 tablespoonfuls of glucose, raspberry essence, cherry-red colouring or carmine.

METHOD.—Put the sugar with the water into a stewpan; when dissolved stir in the glucose, and boil to the "ball" degree (*see Sugar, to Boil*). Add the cream and the butter in small pieces, stir and boil until the syrup reaches the "crack" degree (*see Sugar, to Boil*), then transfer the stewpan at once to a bowl of cold water, to arrest further cooking. Colour and flavour to taste, pour between bars on an oiled slab or into an oiled tin, and when sufficiently cool, cut into small squares by means of a caramel cutter or a slightly buttered knife, and wrap each caramel in wax paper.

### RASPBERRY CREAM.

INGREDIENTS.—1 pint of cream,  $\frac{1}{4}$  pint of milk,  $1\frac{1}{2}$  ozs. of castor sugar,  $\frac{1}{2}$  oz. of gelatine, the juice of 1 lemon,  $\frac{1}{4}$  pint of raspberry syrup, or 2 tablespoonfuls of raspberry jam.

METHOD.—When raspberry jam is used instead of syrup, pass it through a hair sieve, dilute with water to make the required quantity, and add a few drops of cochineal. Dissolve the gelatine and sugar in the milk, add the lemon-juice, mix with the raspberry syrup, and stir in the stiffly-whipped cream.

TIME.—About  $\frac{1}{2}$  an hour. AVERAGE COST, 2s. 3d. to 2s. 6d. SUFFICIENT for 1 medium-sized mould.

### RASPBERRY ICE CREAM.

INGREDIENTS.—1 lb. of raspberries, 1 pint of custard (*see Custard for Cream Ices*), 6 ozs. of

## RASPBERRY JELLY.

castor sugar, 1 teaspoonful of lemon-juice, carmine.

METHOD.—Make the custard as directed. Pass the raspberries through a fine hair sieve, add the sugar and lemon-juice, and mix with the prepared custard, adding at the same time as much carmine as is needed to produce a bright red colour. Freeze in the usual way.

TIME.—About 1 hour. AVERAGE COST, 10d. to 1s., exclusive of the custard. SUFFICIENT for 7 or 8 persons.

### RASPBERRY JAM.

INGREDIENTS.—To every lb. of raspberries allow 1 lb. of sugar,  $\frac{1}{4}$  pint of red-currant juice.

METHOD.—Let the fruit for this preserve be gathered in fine weather and used as soon after it is picked as possible. Take off the stalks, put the raspberries into a preserving-pan, break them well with a wooden spoon, and let them boil for  $\frac{1}{4}$  of an hour, keeping them well stirred. Add the currant-juice and sugar, and boil again for  $\frac{1}{2}$  an hour. Skim the jam well after the sugar is added, or the preserve will not be clear. The addition of the currant-juice is a very great improvement to this preserve, as it gives it the piquant taste which the flavour of the raspberries seems to require.

TIME.—About 1 hour. AVERAGE COST, 7d. to 8d. per lb.

### RASPBERRY JELLY.

INGREDIENTS.—To each pint of juice allow  $\frac{3}{4}$  lb. of loaf sugar.

METHOD.—Let the raspberries be freshly gathered, quite ripe, and picked from the stalks; put them into a large jar, after breaking the fruit a little with a wooden spoon, and place the jar, covered, in a saucepan of boiling water. When

## RASPBERRY ICE.

the juice is well drawn, which will be from  $\frac{3}{4}$  to 1 hour, strain the fruit through a fine hair sieve or cloth, measure the juice, and to each pint allow the above proportion of loaf sugar. Put the juice and sugar into a preserving-pan, place it over the fire, and boil gently until the jelly thickens upon a little being poured on a cold plate; carefully remove all the scum as it rises, pour the jelly into small pots, cover down, and keep in a dry place. This jelly answers for making raspberry cream, and for flavouring various sweet dishes, when the fresh fruit is not obtainable.

TIME.—About  $1\frac{1}{2}$  hours. AVERAGE COST, 10d. to 1s. per lb.

## RASPBERRY OR STRAWBERRY WATER ICE.

INGREDIENTS.— $1\frac{1}{2}$  lbs. of ripe strawberries or raspberries,  $1\frac{1}{2}$  pints of syrup (see Syrup for Water Ices), the juice of 2 lemons.

METHOD.—Prepare the syrup as directed. Rub the fruit through a fine sieve, add the lemon-juice, and, if necessary, deepen the colour with a few drops of carmine. Freeze in the usual way.

TIME.—About 40 minutes. AVERAGE COST, 2s. SUFFICIENT for 7 or 8 persons.

## RASPBERRY PUDDING.

INGREDIENTS.—Raspberry jam,  $\frac{1}{2}$  lb. of breadcrumbs,  $\frac{1}{4}$  lb. of castor sugar,  $\frac{1}{4}$  lb. of butter, 3 eggs, brown breadcrumbs.

METHOD.—Cream the butter and sugar together until thick and smooth, beat in the eggs separately, and add the breadcrumbs. Have ready a well-buttered plain mould, coat it completely with brown breadcrumbs, place a layer of the preparation on the bottom, and cover it thickly with jam, taking

## RASPBERRY TARTLETS.

care that it does not touch the sides of the mould. Repeat until the mould is full, letting the mixture form the top layer. Bake in a moderate oven from 1 to  $1\frac{1}{4}$  hours, and serve with custard or other suitable sauce.

TIME.—From  $1\frac{1}{2}$  to  $1\frac{3}{4}$  hours. AVERAGE COST, 1s. 2d. SUFFICIENT for 5 or 6 persons.

## RASPBERRY SAUCE.

INGREDIENTS.— $\frac{1}{4}$  pint of water, 2 tablespoonfuls of raspberry jam, 1 glass of sherry, sugar to taste, a few drops of carmine or cochineal.

METHOD.—Put the water, jam, and 3 or 4 lumps of sugar into a saucepan, and simmer for 10 minutes; then add the sherry, and strain. Add sugar to taste, and a few drops of colouring if required, and serve.

TIME.—About 15 minutes. AVERAGE COST, from 5d. to 6d.

## RASPBERRY SOUFFLÉ.

INGREDIENTS.— $\frac{1}{2}$  lb. of ripe raspberries, 2 ozs. of cakecrumbs or breadcrumbs, 2 ozs. of castor sugar, 2 ozs. of rice flour or cornflour,  $\frac{1}{2}$  oz. of butter,  $\frac{1}{2}$  gill of cream, 4 eggs.

METHOD.—Put the raspberries, cream, rice flour, and sugar into a basin, and reduce them to a pulp by means of a wooden spoon. Beat in the yolks of the eggs, add the cakecrumbs, stir in lightly the stiffly-whisked whites of eggs, and turn the mixture into a well-buttered mould. Bake in a hot oven from 25 to 30 minutes, and serve as quickly as possible.

TIME.—From 25 to 30 minutes. AVERAGE COST, 1s. 2d. to 1s. 4d. SUFFICIENT for 5 or 6 persons.

## RASPBERRY VINEGAR.

brandy (optional), desiccated cocoanut.

**METHOD.**—Boil the sugar and water together until reduced to a syrup, add the raspberries, and cook gently for a few minutes. Drain, replace the syrup in the stewpan, boil rapidly until considerably reduced, then let it cool, and add the brandy. Line 10 or 12 patty-pans with paste, fill them with rice, placed in buttered papers, and bake in a moderately hot oven until crisp. When cool, fill them with the prepared fruit, add an equal portion of syrup to each tartlet, sprinkle with cocoanut, and serve cold.

**TIME.**—To bake, from 10 to 15 minutes. **AVERAGE COST,** 1s. 3d. to 1s. 6d., exclusive of the paste. **SUFFICIENT** for 10 or 12 tartlets.

## RASPBERRY VINEGAR.

**INGREDIENTS.**—Raspberries, white wine vinegar, sugar.

**METHOD.**—Cover the raspberries with vinegar; let them remain undisturbed for 4 days, then strain through a fine hair sieve, but do not press the fruit. Pour the vinegar over a fresh lot of raspberries and proceed as before. Repeat this process two or three times, taking care to drain each lot thoroughly. Measure the vinegar, to each pint add from 12 to 16 ozs. of sugar, simmer gently for 10 minutes, skimming well meanwhile. When quite cold, bottle for use. Or, put equal measures of raspberries and vinegar into a large jar, stir the mixture 2 or 3 times daily for 10 days, then strain off the vinegar. Measure it, adding 12 ozs. of sugar to each pint, boil up, skim well, and, when cold, bottle for use.

**AVERAGE COST,** 2s. 6d. per quart.

## READING SAUCE.

### RASPBERRY WINE.

**INGREDIENTS.**—6 quarts of ripe raspberries, 6 quarts of water, loaf sugar.

**METHOD.**—Put the raspberries into an earthenware or wooden vessel, bruise them well with a heavy wooden spoon, and pour over them the cold water. Let them stand until the following day, stirring them frequently, then strain the liquid through a jelly-bag or fine hair sieve, and drain the fruit thoroughly, but avoid squeezing it. Measure the liquid; to each quart add 1 lb. of sugar; stir occasionally until dissolved, then turn the whole into a cask. Bung loosely for several days, until fermentation ceases, then tighten the bung, let it remain thus for 3 months, and bottle for use.

## READING SAUCE.

**INGREDIENTS.**—1 quart of walnut pickle, 1 quart of cold water,  $\frac{1}{2}$  pint of soy,  $1\frac{1}{2}$  ozs. of shallots,  $\frac{1}{2}$  oz. of whole ginger bruised,  $\frac{1}{2}$  oz. of capsicums, 1 oz. of mustard seed,  $\frac{1}{2}$  oz. of cayenne,  $\frac{1}{4}$  oz. of bay-leaves, 1 tablespoonful of essence of anchovy.

**METHOD.**—Peel the shallots, chop them finely, place them in a fireproof jar with the liquor strained from the walnuts, and simmer gently until considerably reduced. In another fireproof jar put the water, soy, ginger, capsicums, mustard seed, cayenne, and essence of anchovy, bring to the boil, and simmer gently for 1 hour. Now mix the contents of the two jars together, and continue the slow cooking for  $\frac{1}{2}$  an hour longer. Let the jar remain closely covered in a cool place until the following day, then add the bay-leaves, replace the cover, and allow the jar to remain undisturbed for 7 days.

## RED CURRANT TART.

At the end of this time, strain off the liquor into small bottles, and store for use.

### RED CURRANT AND RASPBERRY TART.

INGREDIENTS.— $1\frac{1}{2}$  pints of red-currents,  $\frac{1}{2}$  pint of raspberries, 2 or 3 tablespoonfuls of moist sugar, short crust paste.

METHOD.—Strip the currants from the stalks, put half of them into a piedish with an inverted cup in the midst, add the sugar and raspberries, then the remainder of the currants, piling them rather high in the centre. Cover with paste (*see* Apple Tart), brush lightly over with water, dredge well with castor sugar, and bake for about  $\frac{3}{4}$  of an hour, in a moderately hot oven.

TIME.—About 1 hour. AVERAGE COST, 1s. 2d. SUFFICIENT for 6 or 7 persons.

### RED CURRANT JAM.

### REFORM SAUCE.

INGREDIENTS.— $\frac{1}{2}$  pint of pepper sauce, 1 glass of port wine, 1 tablespoonful of red currant jelly, cayenne pepper to taste.

### RHUBARB AND ORANGE JAM.

INGREDIENTS.—1 quart of finely-cut rhubarb, 6 oranges,  $1\frac{1}{2}$  lbs. of preserving sugar.

METHOD.—Cut the rinds of the oranges into sections, remove them and scrape off as much of the white pith as possible. Free the pulp from fibrous skin and pips, put it into a preserving-pan, with the sugar, rhubarb, and orange-rinds, previously finely shredded. Bring slowly to boiling point, skim well, and boil until the jam stiffens when tested on a cold plate. Cover

## RHUBARB JAM.

closely, and store in a cool, dry place.

TIME.—About 1 hour. AVERAGE COST, 4*d.* to 5*d.* per lb.

## RHUBARB JAM.

INGREDIENTS.—To each lb. of rhubarb allow 1 lb. of preserving sugar,  $\frac{1}{2}$  a teaspoonful of ground ginger, and the finely-grated rind of  $\frac{1}{2}$  a lemon.

METHOD.—Remove the outer stringy part of the rhubarb, cut it into short lengths, and weigh it. Put it into a preserving-pan with sugar, ginger, and lemon-rind in the above proportions, place the pan by the side of the fire, and let the contents come very slowly to boiling point, stirring occasionally meanwhile. Boil until the jam sets quickly, when tested on a cold plate. Pour it into pots, cover closely, and store in a cool, dry place.

TIME.—From 1 to 1½ hours, according to the age of the rhubarb. AVERAGE COST, 4*d.* per lb.

## RHUBARB JELLY.

INGREDIENTS.—1 small bundle of rhubarb, 4 ozs. of castor sugar, or to taste,  $\frac{3}{4}$  oz. of leaf gelatine, the finely-cut rind of 1 lemon,  $\frac{1}{2}$  pint of water.

METHOD.—Wipe the rhubarb with a damp cloth, and cut it into short lengths, leaving on the peel. Put it into an earthenware or wooden vessel, crush it thoroughly with a wooden mallet or heavy potato masher, and pour over it the water. Let it remain covered for 10 days, stirring it daily; then strain the liquor into another vessel, add the sugar, lemon-juice and rind, and stir occasionally until the sugar is dissolved. Now put it into a cask, and add the isinglass previously dissolved in a little warm water; cover the bung-hole with a folded cloth for 10 days, then bung securely, and allow it to remain undisturbed for 12 months. At the end of this time rack off into bottles, and use.

**RICE (For Curry).**

Put  $\frac{1}{2}$  lb. of Patna rice in a stew-pan, with sufficient cold water to cover it; bring to the boil, then strain, and hold the strainer under the cold water tap until the rice is thoroughly washed. Have ready 3 or 4 pints of salted boiling water, put in the rice, and cook from 12 to 15 minutes; then turn into it a colander, pour some hot water over it, cover with a clean, dry cloth, and let the rice remain in the screen or near the fire for about an hour, when every grain should be separate. A less troublesome, but at the same time less satisfactory, way of preparing rice is to omit the blanching process, and simply wash the rice in cold water before cooking. It is boiled as described above, and the finishing process may be carried out in two ways. In the first, after being strained and rinsed in cold water, the rice is returned to the saucepan and allowed to remain, covered with a clean cloth or with the lid tilted for about 1 hour, when each grain should be separate and perfectly dry. Or, after being washed and rinsed, it may be tied loosely in a pudding-cloth, and steamed for 1 hour; when a steamer is not available, the rice may be laid on a plate on the top of an inverted basin, and placed in a saucepan containing a little boiling water.

**RICE AND APPLE SOUFFLÉ.**

**INGREDIENTS.**—1 lb. of sour cooking apples, 2 ozs. of ground rice, 2 ozs. of castor sugar, 1 oz. of butter, 3 eggs,  $\frac{3}{4}$  pint of milk, 2 tablespoonfuls of moist sugar, or to taste, the rind of  $\frac{1}{2}$  a lemon thinly pared, 1 clove,  $\frac{1}{2}$  an inch of stick cinnamon.

**METHOD.**—Cook the apples with 2 tablespoonfuls of water, the moist sugar, butter, lemon-rind,

clove, and cinnamon in a jar placed in a saucepan of boiling water, and when soft rub them through a hair sieve. Meanwhile, mix the ground rice smoothly with a little cold milk, boil the remainder, add the blended rice and milk, and simmer gently for 15 minutes. Now add the sugar, let the mixture cool a little, then add each yolk of egg separately, give the whole a good beating, and lastly stir in very lightly the stiffly-whisked whites of eggs. Fill a well-buttered soufflé dish with alternate layers of rice and apple purée, piling the last layer of rice in a pyramidal form. Dredge well with castor sugar, and bake in a moderate oven for about 30 minutes.

**TIME.**—To bake, from 25 to 35 minutes. **AVERAGE COST,** 1s. **SUFFICIENT** for 5 or 6 persons.

**RICE AND CREAM.**

**INGREDIENTS.**—3 ozs. of Carolina rice, 1 pint of milk,  $\frac{1}{2}$  pint of cream, 1 tablespoonful of castor sugar, 2 tablespoonfuls of sherry, glacé cherries.

**METHOD.**—Simmer the rice in the milk until tender, drain well on a sieve and let it cool. Whip the cream stiffly, stir in the rice, add the sherry and sugar, and serve in custard-glasses garnished with strips of cherries.

**TIME.**—About 1 $\frac{1}{4}$  hours. **AVERAGE COST,** 1s. 3d. to 1s. 6d. **SUFFICIENT** for 5 or 6 persons.

**RICE AND TOMATOES.**

**INGREDIENTS.**—4 ozs. of rice, 2 ozs. of butter, 1 oz. of grated cheese, 3 small firm tomatoes, 1 onion stuck with a clove, 2 finely-chopped shallots, a bouquet-garni (parsley, thyme, bay-leaf), 1 gill of stock, 2 gills of tomato sauce, mace, salt and pepper, cayenne.

**METHOD.**—Pick, wash, and blanch

## RICE AU GRATIN.

the rice in salted water. Drain well, replace in the stewpan with the onion, bouquet-garni, stock, and tomato sauce, and cook gently until tender, adding more sauce or stock if necessary to prevent the rice becoming too dry. Fry the shallots in 1 oz. of butter until brown, then add both to the contents of the stewpan. Remove the onion and bouquet-garni, season to taste with salt, pepper, cayenne, and mace, and stir in the cheese. Meanwhile, the tomatoes should have been thinly sliced and fried in the remaining oz. of butter; now pile the rice on a hot dish, garnish with the tomatoes and serve hot.

TIME.—1¼ hours. AVERAGE COST, 8d. or 9d. SUFFICIENT for 3 or 4 persons. SEASONABLE at any time.

## RICE AU GRATIN (Vegetarian Dish).

INGREDIENTS.—6 ozs. of rice, ¾ pint of white sauce, grated cheese, butter, cayenne, salt and pepper.

METHOD.—Wash the rice, throw it into a large saucepan of rapidly-boiled salted water, boil for 12 or 14 minutes, then drain, wash, and dry thoroughly. Make the sauce as directed, and, as soon as the rice is thoroughly cooked and dry, add it to the rice, and season with salt and pepper. Turn it into a shallow baking-dish, or several coquille moulds, sprinkle the top thickly with grated cheese, add a few small pieces of butter, bake in a quick oven until nicely browned, and serve.

TIME.—To cook and dry the rice, about 1¼ hours. AVERAGE COST, 10d. SUFFICIENT for 3 or 4 persons.

## RICE BISCUITS.

INGREDIENTS.—½ lb. of rice flour, ¼ lb. of castor sugar, ¼ lb. of butter, 1 egg.

## RICE WITH PRUNES.

METHOD.—Beat the butter to a cream, stir in the rice flour and pounded sugar, and moisten the whole with the egg, which should be previously well beaten. Roll out the paste, cut out with a round paste cutter into small cakes, and bake them from 12 to 18 minutes in a very slow oven.

TIME.—12 to 18 minutes. AVERAGE COST, 9d. SUFFICIENT to make about 18 cakes.

Note.—Ground Rice, or rice flour, is used for making several kinds of cakes, also for thickening soups. The Americans make rice bread, and prepare the flour for it in the following manner: When the rice is thoroughly cleansed, the water is drawn off and the rice, while damp, bruised in a mortar; it is then dried, and passed through a hair sieve.

## RICE BLANCMANGE (See Ground Rice Blanemange, and Whole Rice Mould).

## RICE BORDER WITH PRUNES.

INGREDIENTS.—2 dozen French plums or prunes, 2 ozs. of Carolina rice, 2 ozs. of castor sugar, 1 oz. of pistachios blanchéd and chopped, 1 pint of milk, ½ gill of cream, 3 yolks of eggs, 2 tablespoonfuls of apricot marmalade or jam, the finely-grated rind of ½ a lemon, 1 glass of Maraschino, glacé cherries, angelica, sugar.

METHOD.—Simmer the rice in the milk until tender, add the lemon-rind and sugar, let it remain uncovered for a short time for some of the moisture to evaporate, then stir in the yolks of eggs and Maraschino. Press into a well-buttered border mould, place the mould in the oven in a tin, surround with boiling water, and bake for about ½ an hour. Dilute the apricot marmalade with a little water, sweeten to taste, strain over the

moulded rice, when cold, and sprinkle on the prepared pistachios. Meanwhile, stew the plums or prunes, remove the stones, press the parts together again, and insert a short strip of angelica in each one to represent a stalk. Pile them in the centre of the rice, and garnish with halved cherries and the whipped cream, using a forcing-bag and rose pipe.

TIME.—About  $1\frac{1}{2}$  hours. AVERAGE COST, 2s. 6d. to 2s. 9d. SUFFICIENT for 6 or 7 persons.

## RICE BREAD.

INGREDIENTS.—1 lb. of rice, 7 lbs. of flour, 1 oz. of salt,  $1\frac{1}{2}$  ozs. of compressed yeast, water.

METHOD.—Wash the rice in cold water, put it in a clean saucepan, cover with water, set over the fire, and cook until tender. Turn the flour into a clean pan, make a hole in the centre, put in the boiled rice, add 1 quart of cold water, and stir up gently without mixing in much flour; test the heat, and, if cold enough, add the yeast, dissolved in another pint of water, stirring it into the rice with another handful of flour. Cover over with a clean cloth, and let it stand for 2 hours, then add the salt in fine powder, and make into dough, using any more water that may be necessary for the purpose. Cover over, and leave the dough to rise, then turn out on to the board, divide into convenient-sized loaves, mould up, prove, then bake in a moderate oven. The rice can be boiled in milk if preferred.

TIME.—About 4 hours. AVERAGE COST, 1s. 4d. SUFFICIENT for 6 or 8 loaves.

of lemon, or the grated rind of  $\frac{1}{2}$  a lemon,  $\frac{1}{2}$  lb. of butter.

METHOD.—Sieve the rice and flour together on to a sheet of paper. Put the butter into a clean basin, add the sugar and yellow rind of the lemon, grated, and beat to a cream. Add the eggs one at a time, and when all are in, add the flour, moisten to cake-batter consistency, using a little milk if necessary. Turn into 1 or 2 buttered moulds, and bake in a moderate oven from 1 to 2 hours.

If preferred, the cake may be flavoured with essence of almonds.

TIME.—About  $1\frac{1}{2}$  hours. AVERAGE COST, 1s. 6d. SUFFICIENT for 2 medium-sized cakes.

## RICE CREAM.

INGREDIENTS.—2 ozs. of Carolina rice, 4 ozs. of castor sugar,  $\frac{1}{4}$  oz. of leaf gelatine, 1 pint of milk,  $\frac{1}{2}$  pint of cream, vanilla or other flavouring, fruit compote.

METHOD.—Simmer the rice in the milk until perfectly tender, and when the milk is nearly absorbed, stir frequently to prevent the rice sticking to the bottom of the pan. Melt the gelatine in 1 or 2 table-spoonfuls of water, stir it into the rice with the sugar and flavouring ingredient, and when sufficiently cool add the stiffly-whipped cream. Turn into a decorated border mould and allow it to remain on ice or in a cold place until set. Serve with compote of fruit piled in the centre.

TIME.—About 2 hours. AVERAGE COST, 1s. 4d., exclusive of the fruit compote. SUFFICIENT for 1 medium-sized mould.

**METHOD.**—Wash and drain the rice, put it into a stewpan with 1 pint of milk, a good pinch of salt, a little thin lemon-rind, and cook until the rice is tender, adding more milk as required. When done, take out the lemon-rind, add the sugar and the yolks of eggs, stir over the fire until sufficiently cooked, then spread the mixture on a plate. When ready, form into pear or cork shapes, coat with egg and breadcrumbs, and fry in hot fat until lightly browned. Drain well, dredge with castor sugar, and serve with a fruit syrup or suitable sweet sauce.

**TIME.**—About  $1\frac{1}{2}$  hours. **AVERAGE COST,** 9d. **SUFFICIENT** for 6 or 7 persons.

spoonful of salt, and add the onion, milk, and water. Boil gently until the rice is tender, adding more milk if necessary, but when ready no unabsorbed liquor should remain. Add the butter, parsley, 2 eggs, more seasoning if necessary, and stir by the side of the fire for 10 minutes. Let the preparation become cold, form it into cork-shaped pieces, and coat them with egg and breadcrumbs. METHOD.—Remove the Genoese cake from the tin as soon as it is baked, and force the white of egg round the edge to form a raised border. Replace in a cool oven until the meringue hardens, but do not allow it to acquire much colour. Place a good layer of macaroons or ratafias on the top of the cake, pour the wine over, taking care not to touch the border, and let it soak for at least 1 hour. chopped parsley, 1 shallot, salt and pepper, and grated nutmeg to taste, caper sauce.

**METHOD.**—Lay the salmon in a baking-dish, place the pieces of butter over it, and add the other ingredients, rubbing a little of the seasoning into the fish. Baste frequently, and when done place the salmon on a dish, pour caper sauce over it, and serve. Salmon dressed in this way with tomato sauce is very delicious.

**TIME.**—About  $\frac{3}{4}$  of an hour. **AVERAGE COST,** 3s. 6d. **SUFFICIENT** for 6 persons. **SEASONABLE** from April to August.

## SALMON, BOILED.

**INGREDIENTS.**—Salmon. For the court-bouillon (or highly-seasoned fish stock), allow to each quart of water 1 dessertspoonful of salt, 1 small turnip, 1 small onion,  $\frac{1}{2}$  a leek, 1 strip of celery, 6 peppercorns, a bouquet-garni (parsley, thyme, bay-leaf).

**METHOD.**—Put into the fish-kettle just enough water to cover the fish, and when boiling add the prepared vegetables, and cook gently for 30 minutes. In the meantime, wash, clean, and scale the fish, and tie it loosely in a piece of muslin. Remove any scum there may be on the court-bouillon, then put in the fish and boil gently until sufficiently cooked (the time required depends more on the thickness of the fish than the weight; allow 10 minutes for each lb. when cooking a thick piece, and 7 minutes for the tail end), then drain well, dish on a folded napkin, garnish with parsley, and serve with sliced cucumber, and Hollandaise, or other suitable sauce.

**TIME.**—From 7 to 10 minutes per lb. **AVERAGE COST,** from 1s. 3d.

## SALMON, CRIMPED.

to 2s. 6d. **SUFFICIENT,** allow from 4 to 6 ozs. per head. **SEASONABLE** from April to August.

## SALMON, COLLARED.

**INGREDIENTS.**—1 small salmon, vinegar, salt and pepper, mace, cayenne, peppercorns, allspice, bay-leaves, cloves.

**METHOD.**—Cut off the head and tail, wash and scale the fish, and cut it in two lengthwise. Only one half is required for a roll; therefore either 2 rolls must be made, or the other half dressed in another way. Mix together  $\frac{1}{2}$  a teaspoonful of salt,  $\frac{1}{4}$  of a teaspoonful of pepper, a good pinch each of mace and cayenne. Remove the bones and skin from the fish, spread it flat on the table, and rub the inside well with the seasoning. Roll up the fish, and bind it firmly with string. Have ready a stewpan, just large enough to hold the fish, containing boiling water and vinegar, in the proportion of  $\frac{1}{4}$  pint of vinegar to 1 pint of water, and add 12 peppercorns,  $\frac{1}{2}$  a teaspoonful of allspice, 2 cloves, 2 bay-leaves, and salt to taste. Put in the fish, and simmer gently for about 1 hour. When done, place in a deep earthenware vessel, and when the liquor is cold pour it over the salmon, and let it remain until required for use.

**TIME.**—To prepare and cook, about 1 $\frac{1}{2}$  hours. **AVERAGE COST,** 1s. 3d. to 2s. 6d. per lb. **SUFFICIENT** for 1 dish. **SEASONABLE** from April to August.

## SALMON, CRIMPED.

Salmon should be crimped as soon as possible after being caught. Deep gashes about 2 inches apart should be made on both sides of the fish, which should at once be plunged into cold water and allowed to remain for 2 hours, changing the water 3 times at least.

## SALMON, CURED.

### SALMON, CURED OR SALTED.

INGREDIENTS. — Salmon, salt-petre, salt.

METHOD.—Split the fish in halves, remove the bone, dry well with a soft cloth, and sprinkle liberally with salt. Let it remain thus for 24 hours, then drain and dry thoroughly, and divide the fish into pieces to pack conveniently in a large jar. Add 1 oz. of salt-petre to 12 ozs. of salt, rub the mixture well into the fish, and pack closely in a jar with salt between the layers. If the salt, when dissolved, does not cover the fish, make a little strong brine, and add it, when quite cold, to the contents of the jar.

### SALMON, CURRIED.

INGREDIENTS.—1½ lbs. of cooked salmon, 1 oz. of butter, 1 dessertspoonful of curry-powder, 1 dessertspoonful of flour, 1 sour apple (or a corresponding amount of rhubarb or green gooseberries) coarsely chopped, 1 small onion sliced, 1 teaspoonful of lemon-juice, ½ a teaspoonful of anchovy essence, ½ pint of fish stock or water, salt.

METHOD.—Melt the butter, fry the onion without browning, then add the curry-powder and flour, and fry slowly for about 20 minutes. Add the fish stock or water, apple, onion, and salt to taste, simmer gently for ½ an hour, then strain, replace in the stewpan, and add the anchovy essence, lemon-juice, and seasoning, if necessary. Have the fish ready freed from skin and bones, and separated into large flakes, put it into the prepared curry sauce, make thoroughly hot, and serve with well-boiled rice.

TIME.—About 1 hour. AVERAGE COST, 2s. 6d. to 3s. SUFFICIENT for 5 or 6 persons. SEASONABLE from April to August.

## SALMON, FRIED.

### SALMON CUTLETS.

INGREDIENTS.—Slices of salmon, butter, pepper and salt, anchovy or caper sauce.

METHOD.—Cut the slices 1 inch thick, and season them with pepper and salt. Butter some sheets of white paper, enclose each slice of fish separately, and secure the ends of the paper case by twisting tightly, broil gently over a clear fire, and serve with anchovy or caper sauce.

TIME.—From 10 to 15 minutes. AVERAGE COST, 1s. 3d. to 2s. 6d. per lb. SEASONABLE from April to August.

### SALMON FILLETS, FRIED IN BUTTER (Passover Dish).

INGREDIENTS.—1½ lbs. of salmon, 1 teaspoonful of finely-chopped parsley, ½ a teaspoonful of finely-chopped shallot or onion, ½ a teaspoonful of powdered mixed herbs, flour, frying-batter, frying-oil, salt and pepper.

METHOD.—Divide the salmon into slices about 2 inches square and rather more than ½ an inch in thickness, and roll them in flour seasoned with a little salt and pepper. Make the batter, add to it the onion, parsley, herbs, and a good seasoning of pepper, and dip in the pieces of fish. If available, fry them in a deep pan of oil; if not, heat a good layer of oil in a sauté-pan or a good sized frying-pan, and cook the fish until well browned on both sides. Serve cold.

TIME.—40 minutes. AVERAGE COST, 2s. to 3s. SUFFICIENT for 4 or 5 persons. SEASONABLE from February to August.

### SALMON, FRIED (Jewish Recipe).

INGREDIENTS.—2 slices of salmon, about 1¼ inches thick, 1 egg, flour, salt and pepper, salad-oil.

## SALMON, FRIED.

**METHOD.**—Wash the fish in cold water, dry it well on a cloth, sprinkle both sides of each slice with salt, let them remain for  $\frac{1}{2}$  an hour, then fold them in a clean cloth and press gently to remove all moisture. Season 1 good tablespoonful of flour with salt and pepper, coat the fish completely, and dip it into beaten egg. During this process heat some salad oil in a sauté or frying-pan, and then put in the fish and fry it until well browned on both sides. Drain thoroughly, and serve cold.

**TIME.**—1 hour. **AVERAGE COST,** 2s. to 3s. **SUFFICIENT** for 4 persons. **SEASONABLE** from February to August.

## SALMON, FRIED (Jewish Recipe).

**INGREDIENTS.**—1  $\frac{1}{2}$  lbs. of salmon, a small flask of olive-oil.

**METHOD.**—Pour the oil into a small but deep pan, set over a clear fire, and when it ceases to bubble, put in the salmon, previously cleaned and dried with a cloth, and fry it gently until it is completely cooked through. It should be only a golden-brown, and when the salmon has acquired this colour, the pan should be placed where the fish will cook slowly, so as to prevent it becoming darker. When thoroughly done, drain and leave it to get cold, and serve it upon a fish paper, garnished with parsley.

**TIME.**—About  $\frac{1}{2}$  an hour to cook the fish. **AVERAGE COST,** 2s. 6d. **SUFFICIENT** for 4 persons. **SEASONABLE** from April to August.

ter in a stewpan, put in the rice, make it thoroughly hot, season to taste, and add the fish. Stir very gently over the fire for 3 or 4 minutes, and serve piled on a hot dish. One or two hard-boiled eggs coarsely chopped are sometimes added to the above ingredients.

**TIME.**— $\frac{1}{2}$  an hour. **AVERAGE COST,** 10d. to 1s. **SUFFICIENT** for 4 or 5 persons.

## SALMON, MAYONNAISE OF.

**INGREDIENTS.**—Cold boiled salmon, lettuce, cucumber, beetroot, gherkins, capers, boned anchovies, hard-boiled eggs, mayonnaise sauce.

**METHOD.**—A mayonnaise of salmon may consist of a large centre-cut, a thick slice, or the remains of cold salmon cut into pieces convenient for serving. In all cases the skin and bone must be removed, and the fish completely masked with thick mayonnaise sauce, the stiffening properties of which are greatly increased by the addition of a little liquid, but nearly cold, aspic jelly. When procurable, a little endive should be mixed with the lettuce, for although the somewhat bitter flavour of this salad plant is disliked by many people, its delicate, feathery leaves greatly improve the appearance of any dish of which it forms a part. Many other garnishings, in addition to those enumerated above, may be used; the leaves of the tarragon and chervil plants, and fancifully-cut thin slices of truffle being particularly effective when used to decorate the surface of mayonnaise sauce (*see* Lobster Mayonnaise).

**AVERAGE COST.**—Salmon, 1s. 3d. to 2s. 6d. per lb.

## SALMON OMELET (Chafing Dish Cookery).

**INGREDIENTS.**—4 ozs. of salmon, 6 eggs, 1 tablespoonful of milk,

## SALMON, PICKLED.

1 oz. of butter, white sauce, salt and pepper.

**METHOD.**—Free the salmon from skin and bones and flake it finely; heat it up in just enough butter and white sauce to moisten. Season with salt and pepper, and keep hot. Beat up the eggs with 1 tablespoonful of milk; melt the butter in the chafing dish, pour in the egg mixture, and stir over a quick fire until the eggs begin to set. When ready to fold, put in the hot salmon mixture, fold in the ends and shape neatly. Serve hot.

**TIME.**—5 or 6 minutes. **AVERAGE COST,** 1s. 6d. to 1s. 9d. **SUFFICIENT** for 3 persons. **SEASONABLE** from February to October.

## SALMON, PICKLED.

**INGREDIENTS.**—Salmon,  $\frac{1}{2}$  oz. of whole pepper,  $\frac{1}{2}$  oz. of whole allspice, 1 teaspoonful of salt, 2 bay-leaves, equal quantities of vinegar and the liquor in which the fish was boiled.

**METHOD.**—After the fish comes from table, and the bones have been removed, lay it in a clean, deep dish. Boil the liquor and vinegar with the other ingredients for 10 minutes, let them stand to get cold, then pour them over the salmon, and in 12 hours it will be ready for use.

**TIME.**—10 minutes. **AVERAGE COST,** 1s. 3d. to 2s. 6d. per lb. **SEASONABLE** from April to August.

## SALMON PIE.

**INGREDIENTS.**—1 lb. of cold salmon, 2 tablespoonfuls of mashed potatoes, 2 tablespoonfuls of white breadcrumbs, 2 tablespoonfuls of oiled butter, 2 eggs,  $\frac{1}{4}$  pint of milk (about), panurette or browned breadcrumbs, butter, salt and pepper.

**METHOD.**—Free the fish from skin and bone, and chop it coarsely.

## SALMON SANDWICHES.

Put it into a basin with the potato, white breadcrumbs, and oiled butter, season rather highly with salt and pepper, and stir in the eggs and as much milk as is needed to form the whole into a stiff batter. Have ready a well-greased white china baking dish or a piedish, turn in the fish preparation, sprinkle the surface with red panurette or brown breadcrumbs, and add a few very small bits of butter. Bake in a moderate oven for about 1 hour, or until the mixture is set. Serve hot, or re-heat at the time of serving.

**TIME.**—1 $\frac{1}{2}$  hours. **AVERAGE COST,** 10d. to 1s. **SUFFICIENT** for 5 or 6 persons. **SEASONABLE** from February to September.

## SALMON, POTTED.

**INGREDIENTS.**—Cold salmon, clarified butter, anchovy essence, powdered mace, salt and pepper, cayenne.

**METHOD.**—Free the fish from skin and bone, then pound it thoroughly in a mortar. Add by degrees the seasoning and the anchovy essence and clarified butter a few drops at a time, until the right consistency and flavour is obtained, then rub the ingredients through a fine sieve, press into small pots, and cover with a good layer of clarified butter. Fresh salmon may also be potted (*see* Lobster, Potted).

**AVERAGE COST.**—Salmon, from 1s. 6d. to 2s. 6d. per lb.

## SALMON SANDWICHES.

**INGREDIENTS.**—Cold boiled salmon, prepared cucumber (*see* Cucumber Sandwiches), mayonnaise or tartare sauce, bread, butter.

**METHOD.**—Cover thin slices of bread and butter with salmon separated into very small flakes, add a thin layer of mayonnaise or tartare sauce, and on the top place

## SALMON, SCALLOPED.

slices of cucumber. Cover with more bread and butter, press well together, trim, and cut into shape. Other kinds of fish may be used in this manner, or they may be pounded and passed through a sieve. Tomato, lettuce, or cress may replace the cucumber, and any suitable thick sauce may be substituted for the mayonnaise.

### SALMON SCALLOPED.

INGREDIENTS.—1 tin of salmon, breadcrumbs, white sauce, butter, salt and pepper, grated cheese.

METHOD.—Divide the salmon into rather large flakes. Butter as many scallop shells as are required rather thickly with butter, and sprinkle them lightly with breadcrumbs. Nearly fill them with salmon, add 1 or 2 tablespoonfuls of sauce, and cover the surface with breadcrumbs. Sprinkle lightly with cheese, season with salt and pepper, then add 2 or 3 small pieces of butter. Bake in a moderate oven until nicely browned, and serve.

TIME.—20 minutes. AVERAGE COST, 1s. to 1s. 3d., when the whole tin is used. ALLOW 1 to each person.

### SALMON, SMOKED OR KIPPERED.

INGREDIENTS.—Salmon, equal quantities of common salt and Jamaica pepper mixed together; also a mixture composed of 1 lb. of salt, 3 ozs. of coarse sugar, 1 oz. of saltpetre.

METHOD.—Scale the fish, split it down the back, remove the head and all the backbone except 3 inches at the tail. Clean and dry the inside thoroughly, then rub well with salt and Jamaica pepper, and let it remain thus for 24 hours. Drain well, rub the fish two or three times with the mixture of salt, sugar, and saltpetre, let it stand for 2 days, and then rub it

## SALPICON.

again with the mixture. Now stretch the fish on sticks, hang it by the tail, exposed to the rays of the sun or the heat of the fire, for 3 or 4 days, and afterwards suspend it in the smoke of a wood or turf fire until dry—usually from 15 to 20 days. Sometimes salt and Jamaica pepper alone are used, but the process is exactly the same. The peculiar flavour possessed by some varieties is due to juniper bushes being used as fuel instead of wood or turf.

### SALMON, SMOKED, TO COOK.

INGREDIENTS.—Smoked salmon, salad-oil.

METHOD.—Cut the fish into small thin slices, brush them over with salad-oil, and enclose them in oiled papers. Grill the slices over a slow clear fire for 7 or 8 minutes, turning them 2 or 3 times during the process. Serve with oiled butter, or any fish sauce that may be liked.

TIME.—7 or 8 minutes. AVERAGE COST, 3s. 6d. per lb. for smoked salmon.

### SALMON STEAKS.

These may be enclosed in an oiled or buttered paper, and either grilled or fried in hot butter in a sauté-pan. Or they may be coated with egg and breadcrumbs and fried. Serve with sliced cucumber and a suitable sauce.

## SALPICON.

This name is applied to the various mixtures used for filling timbales, bombs, patty-cases, croustades, ramakins, etc. It may consist of dice of chicken, game, veal, ham, tongue, truffles, mushrooms, oysters, shrimps, lobsters, sole, or other kind of fish, variously seasoned, and moistened with a thick sauce, usually Béchamel or Espagnole.

## SALSIFY, BOILED.

### SALSIFY, BOILED.

INGREDIENTS.—Salsify : to each  $\frac{1}{2}$  gallon of water allow 1 heaped tablespoonful of salt, 1 oz. of butter, 2 tablespoonfuls of lemon-juice.

METHOD.—Scrape the roots gently, so as to strip them only of their outside peel ; cut them into pieces about 4 inches long, and, as they are peeled, throw them into water mixed with a little lemon-juice, to prevent their discolouring. Put them into boiling water with salt, butter, and lemon-juice in the above proportion, and let them boil rapidly until tender ; try them with a fork, and, when it penetrates easily, the roots are done. Drain the salsify, and serve with good white sauce.

TIME.—From 30 to 40 minutes.  
SEASONABLE from December to March.

*Note.*—Salsify may also be cooked according to any of the recipes given for dressing celery.

### SALT.

The importance of salt as a condiment, as an antiseptic, and an article of food cannot be over-estimated. In cookery its uses are apparently contradictory, for it aids in softening certain substances when applied through the medium of cold water, and greatly assists in hardening the same when the medium is boiling water. It increases the specific gravity of water, and consequently raises the boiling point, a matter of considerable importance in boiling rice, when it is necessary to keep the water in a state of ebullition to prevent the rice coalescing. Every other condiment, no matter how desirable, may be dispensed with, or one condiment may be substituted for another, but salt is absolutely indispensable, for it

## SANDWICHES.

makes palatable food that would otherwise be uneatable. Salt, like all other seasonings, must be used with judgment : the expression "salt to taste," even when applied to water in which vegetables are cooked, means that the amateur should taste the water until experience teaches her how much salt to add.

### SANDWICHES, ADELAIDE.

INGREDIENTS.—Cooked chicken and ham, white bread, curry-butter.

METHOD.—Cut the chicken and ham into very thin slices, and remove all skin, gristle, and the greater part of the fat. Prepare some thin slices of bread, spread with curry-butter, add next a slice of ham, then a layer of chicken, sprinkle lightly with salt, and cover with bread and butter. Press well to make the parts adhere firmly together, trim away the crusts, and cut into 4 triangles. Dish neatly on a folded serviette, and garnish with water-cress or parsley.

### SANDWICHES, FROSTED ALMOND.

INGREDIENTS. — Puff paste, cheesecake mixture, apricot or raspberry jam, blanched and shredded almonds, 1 white of egg, milk, castor sugar, vanilla sugar.

METHOD.—Roll the paste out to about  $\frac{1}{4}$  of an inch in thickness, and cut it into two long strips 3 inches wide. Place one strip on a wetted baking-tin, prick lightly with a fork to prevent it blistering, spread first a thin layer of jam, and then a layer of cheesecake mixture. Cover with the other strip of paste, moisten the edges and pinch them together, brush lightly over with milk, and dredge with castor sugar. Bake in a moderate oven for about 10 minutes, and let the pastry

Pass the tomatoes and yolks of eggs through a fine sieve, mix with them a little butter, add the lemon-juice or vinegar, and salt and pepper to taste. Prepare some fingers of bread, spread them with the tomato preparation; on the top place  $\frac{1}{2}$  a sardine, and cover with fingers of bread and butter. Press well together, and dish tastefully on a folded serviette garnished with parsley.

## SARDINE PASTIES.

INGREDIENTS.—1 tin of sardines, short crust or rough puff paste, or puff paste trimmings, 1 egg.

METHOD.—Skin the sardines, take away the backbone, and replace the two halves. Roll out the paste as thinly as possible, cut it into strips about 4 inches by 2 inches, and in each strip enclose a sardine, leaving the ends open. Brush over with beaten egg, bake in a quick oven, and serve hot.

TIME.—To bake the pasties,

Melt as much dripping in a Yorkshire pudding tin as will form a very thin layer, put in the mixture, spread it evenly with a knife, and bake for about 1 hour in a moderate oven. When done, cut into squares and serve with good gravy. This pudding may be served with pork, duck, or goose. In Yorkshire, this pudding, like the batter pudding that takes its name from the county, is served separately, and before the meat.

Then put the mixture into a savoy bag, lay the biscuits out on to a sheet of thick cartridge paper, and bake them in rather a hot oven; but let them be carefully watched, as they are soon done, and a few seconds over the proper time will scorch and spoil them. These biscuits, or ladies' fingers, as they are sometimes called, are used for making Charlotte Russes and a variety of fancy sweet dishes.

TIME.—10 to 12 minutes. AVERAGE COST, 9d. SUFFICIENT for 2 dozen cakes.

Butter a mould, dust it out with sugar and flour, pour in the cake mixture, and bake it from  $1\frac{1}{4}$  to  $1\frac{1}{2}$  hours. This is a very nice cake for dessert, and may be iced for a supper table, or cut into slices and spread with jam, to convert it into sandwiches.

Fill the mould with alternate layers of slices of sponge cake, pieces of macaroon and ratafias. Beat the eggs well, add the milk,

Then steam from  $1\frac{1}{2}$  to  $1\frac{3}{4}$  hours, and serve with fruit syrup, German or other suitable sauce. This pudding is exceedingly nice cold, with whipped cream as an accompaniment.

TIME.—About  $2\frac{1}{2}$  hours. AVERAGE COST, 2s. SUFFICIENT for 5 or 6 persons.

## SCALLOPS AND MUSHROOMS.

INGREDIENTS.—6 scallops, 6 large flap mushrooms, 1 oz. of butter, 1 or 2 tablespoonfuls of white sauce, milk, salt and pepper.

Drain well, chop the yellow and white parts separately, moisten with a little white sauce, and season to taste. While the scallops are cooking, remove the stalks of the mushrooms, peel them, and fry them in hot butter. Place an equal portion of the white part of the scallops on each mushroom, pile the red part on the top, make thoroughly hot in the oven, and serve.

Let the batter stand for an hour, then stir in a dessertspoonful of chopped parsley. Season the scallops with a little salt, a good pinch of white pepper, and a small pinch of cayenne. Dip them into the batter, drop them one by one into hot fat, fry to a golden-brown, drain on a cloth, pile up on a hot dish, garnish with fried parsley, and serve with lobster or tomato sauce.

TIME.—To fry, from 5 to 6 minutes. AVERAGE COST, 1s. 6d. SUFFICIENT for 8 or 9 persons. SEASONABLE from January to June.

METHOD.—Wash, dry and fillet the fish; place the fillets on a well-greased baking dish or tin, and sprinkle them with lemon-juice. Mix the mushroom, parsley, and onion together, season liberally, and spread the mixture on the fish. Cover rather thickly with browned breadcrumbs, add a few bits of butter, and bake in a moderately hot oven from 20 to 30 minutes. The fish should be served on the dish on which it was baked.

### SCOTCH BROTH.

INGREDIENTS.—3 quarts of cold water, 3 lbs. of scrag end of mutton, 1 onion, 1 leek, 1 carrot, 1 turnip, a strip of celery, 1 dessertspoonful of finely-chopped parsley, 2 table-spoonfuls of Scotch barley, salt and pepper.

METHOD.—Cut the meat into small pieces, put them into a stewpan with the water and a teaspoonful of salt, and cook gently for 2 hours. Wash the barley, cut the vegetables into dice, add them to the broth, and cook for another hour, making 3 hours in all. Strain and return the broth to the stewpan. ## SCOTCH HAGGIS.

TIME.—10 to 15 minutes. AVERAGE COST, 3s. 6d. SUFFICIENT for 5 dozen small cakes.

METHOD.—Soak the paunch for several hours in salt and water, then turn it inside out and wash it thoroughly in several waters. Wash the pluck, cover the liver with cold water, boil it for  $1\frac{1}{2}$  hours, and at the end of  $\frac{3}{4}$  of an hour add to it the heart and lights. Chop half the liver, chop the remainder and the heart and lights finely, mix all together, add the oatmeal, onions, salt, pepper, nutmeg, lemon-juice, and stock. Turn these ingredients into the paunch, sew up the opening, taking care that sufficient space is left for the oatmeal to swell: if the paunch be over-full, there is a possibility of its bursting. Put the haggis into boiling water, and cook gently for about 3 hours; during the first hour it should be occasionally pricked with a needle, to allow the air to escape. As a rule, neither sauce nor gravy is served with a haggis. When a small dish is required, a lamb's paunch and pluck may be substituted for those of the sheep's.

TIME.—To boil the haggis, 3 hours. AVERAGE COST, 2s. 9d. to 3s. 9d. SUFFICIENT for 8 or 9 persons.

Blanch the pearl-barley and add it when the meat has cooked for 1 hour. Wash the cabbages, shred them finely, and put them into the stewpot 1 hour before the meat is to be served. Take up the meat, cut some of it into small pieces, and place these in a soup tureen. Season the broth and serve.

TIME.—About  $3\frac{1}{2}$  hours. AVERAGE COST, 2s. 6d. to 2s. 9d. SUFFICIENT for 6 or 7 persons. SEASONABLE at any time.

Note.—Scotch Kail is the *Pot-au-feu* of Scotland, and like its Continental prototype may have the meat served separately, or in the broth. But it differs from *Pot-au-feu* in having only the green vegetables from which it derives the name of "kail."

### SCOTCH STEW (Vegetarian Dish).

INGREDIENTS.—3 tablespoonfuls of pearl barley,  $\frac{1}{2}$  a small cabbage or 1 lettuce shredded,  $\frac{1}{2}$  a head of celery, 3 onions, 2 carrots, 1 turnip, all cut into large pieces, to which may be added other vegetables in season, salt and pepper to taste.

METHOD.—Cut the toast into 2-inch squares, butter well, and spread them with anchovy paste. Season the yolks with a little cayenne and salt; when slightly beaten add them to the hot cream, stir over the fire until they thicken sufficiently, then pour the preparation over the toast, and serve as hot as possible.

TIME.—10 minutes. AVERAGE COST, 10d., when cream is used. SUFFICIENT for 5 persons. SEASONABLE at any time.

### SCRAP CAKES.

INGREDIENTS.—2 lbs. of flead, or the inside fat of a pig, 1½ lbs. of flour, ¼ lb. of moist sugar, ½ lb. of currants, 1 oz. of candied lemon-peel, ground allspice to taste. Water.

METHOD.—Cut the flead, or leaf, as it is more generally called, into small pieces, put it into a large dish, place it in a quick oven, taking care that it does not burn, and in a short time it will be reduced to oil with the small pieces of leaf floating on the surface; it is of these that the cake should be made. Gather all the scraps together, put them into a basin with the flour, and rub them well together. Add the currants, sugar, the candied peel cut into thin slices, and the ground allspice. When all these ingredients are well mixed, moisten with sufficient cold water to make the whole into a nice paste; roll it out thin, cut it into shapes, and bake the cakes in a quick oven from 15 to 20 minutes. These are

## SEA-BREAM, BAKED.

very economical and wholesome cakes for children, and the lard, melted at home, produced from the flead, is generally better than the purchased article. To prevent the lard from burning, and to ensure its being of a good colour, it is better to melt it in a jar placed in a saucepan of boiling water, thus preventing its discolouring.

TIME.—15 to 20 minutes. AVERAGE COST, 1s. 10d., for this quantity. SUFFICIENT to make 3 or 4 dozen cakes.

### SEA PIE.

INGREDIENTS.—1 lb. of beefsteak, ¾ lb. of suet crust, 1 small onion, 1 carrot, pepper and salt.

METHOD.—Cut the steak into thin slices about 2 inches square, put them into a shallow stewpan, season with salt and pepper, barely cover the slices with boiling water, put on the lid, and simmer gently. Slice the carrot thinly, cut the onion into small pieces, and add them to the meat. Make the paste as directed, roll it into a round rather less than the top of the stewpan. Lay this on the top of the meat when it has simmered for ½ an hour, replace the lid, and continue the cooking for 1½ hours longer. When the pie is done, cut the paste into 4 pieces, and remove them carefully from the stewpan to a plate; arrange the meat and vegetables neatly on a hot dish, and place the crust on the top.

TIME.—About 2½ hours. AVERAGE COST, 1s. 4d. to 1s. 6d. SUFFICIENT for 4 persons.

### SEA-BREAM, BAKED.

INGREDIENTS.—1 bream, seasoning to taste of salt, pepper, and cayenne, ¼ lb. of butter.

METHOD.—Well wash the bream, but do not remove the scales, and wipe away all moisture with a dry

## SEA-KALE, BOILED.

cloth. Season it inside and out with salt, pepper, and cayenne, and lay it in a baking-dish. Place the butter, in small pieces, upon the fish, and bake for rather more than 30 minutes. It will be found a great improvement to stuff the fish before baking.

TIME.—Rather more than 30 minutes. AVERAGE COST, 4*d.* to 6*d.* per lb. SEASONABLE in summer, but may be procured all the year round.

Note.—This fish may be broiled over a nice, clear fire, and served with a good brown gravy or white sauce, or it may be stewed in wine.

## SEA-KALE, BOILED.

INGREDIENTS.—To each  $\frac{1}{2}$ -gallon of water allow 1 heaped tablespoonful of salt.

METHOD.—Well wash the kale, cut away any worm-eaten pieces, and tie it into small bunches. Put it into boiling water, salted in the above proportion, and let it boil quickly until tender. Take it out, drain, untie the bunches, and serve with plain melted butter or white sauce, a little of which may be poured over the kale. Sea-kale may also be parboiled and stewed in good brown gravy; it will then take about  $\frac{1}{2}$  an hour altogether.

TIME.—25 minutes. When liked very thoroughly done, allow an extra 5 minutes. AVERAGE COST, in full season, 9*d.* per basket. SUFFICIENT, 12 heads for 4 or 5 persons. SEASONABLE from February to June.

METHOD.—Beat the butter and

## SEED CAKE, RICH.

sugar well together, add the eggs by degrees, then the flour, until a paste thick enough to roll out is made. Make into small cakes, and bake in a quick oven.

TIME.—10 to 15 minutes. AVERAGE COST, 1*s.* SUFFICIENT for 3 to 3 $\frac{1}{2}$  dozen small cakes or buns.

## SEED CAKE, COMMON.

METHOD.—Beat the butter to a cream, add the sugar, mace, nutmeg, and caraway seeds, and beat these ingredients well together. Whisk the eggs and beat them gradually into the mixture; then mix in the flour, using a little milk if necessary, to bring it to cake-batter consistency. Put it into a tin lined with buttered paper, and bake it from 1 $\frac{1}{2}$  to 2 hours in a moderate oven. This cake would be equally nice made with currants, omitting the caraway seeds.

TIME.—1 $\frac{1}{2}$  to 2 hours. AVERAGE COST, 2*s.* SUFFICIENT for 1 cake.

**SHALLOT OR ESCHALOT.**

This root is a native of Palestine, and was introduced into England by the Crusaders. It derives its botanical name, *Allium Ascalonicum*, from Ascalon, in the vicinity of which place it was found growing wild. The shallot has a bulbous root, made up of a number of smaller bulbs, called cloves. It is more pungent than garlic, but its flavour is more delicate, and more palatable to those unaccustomed to the use of garlic. The shallot is more pronounced in taste than

## SHALLOT SAUCE.

the onion, but does not leave so strong an odour on the palate, and for this reason it is often employed instead of the onion for flavouring culinary preparations, sauces, and vinegars, and more especially for salads eaten in a raw state. Shallots are in best condition in July, August, and September, but may be kept for a great length of time if hung in nets in a cool dry place.

### SHALLOT SAUCE.

## SHEEP'S HEAD BROTH.

METHOD.—Remove the brains and tongue, and soak the head in salt and water for 12 hours, changing the water repeatedly. Put it into a large saucepan with a good handful of salt, cover with water, bring to the boil, strain and wash well. Return it to the saucepan, add the water, and bring to the boil, skim thoroughly, add a teaspoonful of salt, then simmer for 3 hours. Meanwhile, cut the vegetables into dice, and now add them and the rice to the broth. Continue the cooking for another hour, then take up the head, cut the meat into dice, and return it to the broth and simmer for a few minutes. Take out the herbs, add seasoning to taste, and serve.

TIME.—About 4 hours. AVERAGE COST, 1s. to 1s. 2d. SEASONABLE at any time, particularly in winter. SUFFICIENT for 5 or 6 persons.

## SHEEP'S HEART.

INGREDIENTS.—1 sheep's heart, veal forcemeat, dripping for basting.

## SHEEP'S TONGUES.

METHOD.—Soak the heart for 1 hour in warm water. Cut off the deaf ears, any cartilage or gristle there may be, and the muscular wall dividing the cavities of the heart, and boil them down for gravy. Dry the heart thoroughly, fill the inside with forcemeat, and tie a greased paper round the base to keep in the forcemeat. Heat 2 or 3 ozs. of dripping in a baking-tin, baste the heart well, and bake in a moderate oven for about 1 $\frac{1}{4}$  hours. Gentle cooking and frequent basting are necessary to prevent the heart becoming dry and hard. When done, drain off the fat, but leave the sediment, pour in the prepared gravy, boil up, season to taste, and either pour over the heart or serve separately. The excellence of this dish depends mainly on its being served as hot as possible.

TIME.—To bake, about 1 hour. AVERAGE COST, 9d. to 1s. SUFFICIENT for 2 persons.

Note.—Sheep's hearts may also be stuffed with onion farce (*see* Bullock's Heart); if more convenient, they may be cooked in an iron saucepan over or by the side of the fire, care being taken to baste them liberally with dripping all the time.

## SHEEP'S TAILS.

Sheep's tails may be dressed as directed in the recipes for Sheep's Tongues, Braised, and Sheep's Tongues, Fried. Instead of being braised, they may be stewed in good stock until tender, and served with a vegetable garnish and brown sauce.

## SHEEP'S TONGUES, BRAISED.

INGREDIENTS.—4 sheep's tongues,  $\frac{3}{4}$  pint of brown sauce, glaze. For the mirepoix or foundation: 1 oz. of butter, 1 or 2 slices of bacon, 1 onion, 1 carrot,  $\frac{1}{2}$  a turnip, 1 or 2 strips of celery, a bouquet-garni (parsley,

## SHEEP'S TONGUES.

thyme, bay-leaf), 6 peppercorns,  $\frac{1}{2}$  a pint of stock.

**METHOD.**—Soak the tongues in salt and water for 2 hours, blanch and dry them thoroughly. Slice the vegetables, put them into a stewpan with the butter, bouquet-garni, and peppercorns, lay the tongues on the top, put on the lid, and cook gently for 20 minutes. Then add hot stock to nearly cover the vegetables, lay the bacon on the top of the tongues, cover with a greased paper, put on the lid, and cook gently for  $2\frac{1}{2}$  hours, or until the tongues are tender. When ready, skin them, slit them in halves lengthwise, brush over with warm glaze, place them on a buttered paper on a baking-sheet, and put them into a moderate oven for a few minutes to re-heat. Dish in 2 rows on a bed of mashed potato, or a purée of spinach, pour a little hot sauce round, and serve the remainder in a sauce-boat.

**TIME.**—About 3 hours. **AVERAGE COST,** 1s. 10d. to 2s. 2d. **SUFFICIENT** for 5 or 6 persons.

### SHEEP'S TONGUES, FRIED.

**METHOD.**—Braise the tongues as directed in the preceding recipe. Warm the butter, dip each half tongue in it, and coat these with breadcrumbs, pressing them firmly on with a knife. Turn the butter into a sauté-pan, and fry the tongues until the entire surface is lightly browned. Dish on a bed of spinach or green-pea purée, and serve the sauce round the base of the dish.

**TIME.**—About 3 hours. **AVERAGE COST,** 4d. each. **SUFFICIENT** for 5 or 6 persons.

## SHEEP'S TROTTERS.

### SHEEP'S TONGUES (Preserved Meat).

**INGREDIENTS.**—1 tin of sheep's tongues, 1 egg, breadcrumbs, frying-fat, salt and pepper, tomato, piquant, or brown sauce.

**METHOD.**—Turn the tongues carefully out of the tin, remove the jelly, split each tongue in half lengthwise, and take off the skin. Coat with egg and well-seasoned breadcrumbs, fry in hot fat until well browned, and serve with a little of the sauce poured round, and the remainder in a sauce-boat.

**TIME.**—About  $\frac{1}{2}$  an hour. **AVERAGE COST,** 1s. 4d. **SUFFICIENT** for 5 or 6 persons.

### SHEEP'S TROTTERS, STEWED.

**INGREDIENTS.**—2 gangs (8) of dressed trotters, 1 small onion, 1 tablespoonful of flour, milk, salt and pepper.

**METHOD.**—Wash the trotters, put them into a stewpan, cover them with milk and water in equal proportions, add the onion sliced, season with salt and pepper, cover, and cook gently for about 3 hours, or until the bones may be easily removed. Take away the bones, strain the liquor if necessary, add milk to increase the quantity to  $\frac{3}{4}$  pint, return it to the stewpan, and re-heat. Mix the flour smoothly with a little milk, pour it into the stewpan, stir until boiling, simmer for 10 minutes, and season to taste. Replace the trotters, and when thoroughly hot, serve.

**TIME.**—From 3 to  $3\frac{1}{2}$  hours. **AVERAGE COST,** 1s. 2d. to 1s. 6d. **SUFFICIENT** for 2 or 3 persons.

## SHEPHERD'S PIE.

coated with egg and breadcrumbs, or dipped into batter and fried in hot fat. (See recipes for cooking calf's feet and cow heel.)

### SHEPHERD'S PIE.

INGREDIENTS.— $\frac{1}{2}$  lb. of cold mutton, 1 lb. of mashed potato, 1 oz. of butter or dripping,  $\frac{1}{2}$  pint of gravy or stock, 1 teaspoonful of parboiled and finely-chopped onion, salt and pepper.

METHOD.—Cut the meat into small thin slices. Melt half the butter or fat in a stewpan, add to it the potato, salt and pepper, and stir over the fire until thoroughly mixed. Grease a piedish, line the bottom thinly with potato, put in the meat, sprinkle each layer with onion, salt and pepper, pour in the gravy, and cover with potato. The potato covering may be given a rough appearance by scoring it in every direction with a fork, or it may be made to resemble an ordinary crust by being smoothed over with a knife, notched at the edges, and brushed over with the yolk of egg before baking. When egg is not used for this purpose, the remainder of the butter or fat must be put on the top of the pie in small pieces. Bake in a moderate oven until the surface is well-browned.

TIME.—To bake, from 30 to 40 minutes. AVERAGE COST, 10d. to 1s. SUFFICIENT for 3 or 4 persons.

### SHEPHERD'S PIE (Preserved Meat).

INGREDIENTS.— $\frac{1}{2}$  lb. of beef or mutton, 1 lb. of mashed potato, 1 oz. of butter or dripping,  $\frac{1}{2}$  pint of gravy or stock, 1 teaspoonful of parboiled and finely-chopped onion, salt and pepper.

METHOD.—Cut the meat into small thin slices. Melt half the butter or fat in a stewpan, add to it the potato, salt and pepper, and stir over the fire until thoroughly

mixed. Place on the bottom of a greased piedish a thin layer of potato, put in the meat, sprinkle each layer with onion, salt and pepper, pour in the gravy, and cover with potato. The potato covering may be roughed with a fork or smoothed over with a knife: the latter method produces an appearance similar to that of ordinary crust. Before baking, the remainder of the fat or butter should be put on the top of the pie in small pieces, or when economy is not an object, the appearance of the pie may be improved by brushing it over with yolk of egg. Bake until the crust is well browned.

TIME.—About  $\frac{1}{2}$  an hour. AVERAGE COST, 6d. SUFFICIENT for 2 persons.

### SHORTBREAD, SCOTCH.

INGREDIENTS.—2 lbs. of flour,  $\frac{1}{4}$  lb. of cornflour, or ground rice, 1 lb. of butter,  $\frac{1}{4}$  lb. of castor sugar, 1 oz. of sweet almonds, a few strips of candied orange-peel.

METHOD.—Beat the butter to a cream, gradually dredge in the flour, and add the sugar and sweet almonds, which should be blanched and cut into small pieces. Work the paste until it is quite smooth, and divide it into 6 pieces. Put each cake on a separate piece of paper, roll the paste out square to the thickness of about 1 inch, and pinch it round the edges. Prick it well with a skewer, and ornament with 1 or 2 strips of candied orange-peel. Put the cakes into a moderately-heated oven, and bake from 25 to 30 minutes.

TIME.—25 to 30 minutes. AVERAGE COST, for this quantity, 2s. SUFFICIENT to make 6 cakes.

### SHRIMPS, POTTED.

**METHOD.**—Have ready 1 pint of picked shrimps, put them, with the other ingredients, into a stewpan, let them heat gradually in the butter, but do not let it boil. Pour into small pots, and, when cold, cover with melted butter, and carefully exclude the air.

**TIME.**— $\frac{1}{4}$  of an hour, to soak in the butter. **AVERAGE COST,** 1s. 6d.

## SHRUB.

**INGREDIENTS.**— $\frac{1}{2}$  gallon of rum,  $\frac{3}{4}$  pint of orange-juice,  $\frac{1}{2}$  pint of lemon-juice, the peel of 2 lemons, 2 lbs. of loaf sugar, 2 $\frac{1}{2}$  pints of water.

**METHOD.**—Slice the lemon-peel very thinly, and put it, with the fruit juice and spirit, in a large covered jar. Let it stand for two days, then pour over it the water in which the sugar has been dissolved, take out the lemon-peel, and leave it for 12 days before using.

## SHRIMP SALAD.

**INGREDIENTS.**—1 pint of picked shrimps, 2 or 3 tablespoonfuls of mayonnaise sauce, sliced cucumber, shredded lettuce.

**METHOD.**—Stir the sauce into the shrimps, put the mixture in a salad-bowl or dish, garnish with cucumber and lettuce, then serve.

**TIME.**—Altogether about 40 minutes. **AVERAGE COST,** 8d.

## SHRIMP TOAST.

**INGREDIENTS.**— $\frac{1}{4}$  pint of picked shrimps, anchovy paste,  $\frac{1}{2}$  oz. of butter, 1 egg, 1 tablespoonful of milk, salt, cayenne, 8 croûtes of buttered toast.

**METHOD.**—Melt the butter in a stewpan, put in the shrimps, and when hot add the eggs and milk, previously beaten together, salt and cayenne to taste, and stir by the side of the fire until the mixture thickens. Meanwhile, spread the toast lightly with anchovy paste, and now add the shrimp preparation, and serve as hot as possible.

**TIME.**—20 minutes. **AVERAGE COST,** 9d. **SUFFICIENT** for 6 or 7 persons. **SEASONABLE** at any time.

## SHRIMPS AND PRAWNS, TO SHELL.

There is a slight difference in the shape of shrimps and prawns, the tail of the former being rounded at the bend, like that of a lobster, but the tail of the prawn presents a sort of knee or angle. To shell a shrimp, take the head between the right thumb and forefinger, and with the left forefinger and thumb-nail raise on each side the shell of the tail, pinch the tail, and the shell will at once separate. To shell prawns, take the head between the right hand thumb and second finger, take the tip of the tail between the left thumb and forefinger; with the nail of the right forefinger raise the shell at the knee or angle, pinch the tail,

METHOD.—Cut the shrimps across in halves. Fry the shallot slightly in butter, add the curry-powder, and cook it for 3 minutes, then pour in the stock and stir until it boils. Let it simmer very gently for 15 minutes, put in the shrimps, cream, lemon-juice, and add the necessary seasoning. Make thoroughly hot, and serve in china ramakin cases.

TIME.—Half an hour. AVERAGE COST, 9d. SUFFICIENT for 5 or 6 persons. SEASONABLE at any time.

### SIRLOIN, ROAST (See Beef, Roast).

METHOD.—Clean the skate thoroughly, and let it hang at least a day, and in cold weather even longer. When ready to use, remove the skin, divide the flesh into fillets, which put aside. Put the bones and trimmings into a saucepan, add the water, onion, celery, bay-leaf, white pepper or peppercorns, and a little salt, and simmer gently for 1 hour. Stir and cook gently until the soup thickens slightly, then season to taste, and serve.

TIME.—About  $1\frac{1}{2}$  hours. AVERAGE COST, 1s. 9d. to 2s. SUFFICIENT for 6 persons. SEASONABLE in winter.

Strain off the liquid, remove the fruit, replace with fresh sloes, and pour on the gin, adding more spirit if necessary. Let it stand for 10 days longer, then strain, add from 4 to 5 ozs. of sugar to each pint of liqueur, and bottle for use.

## SNIFE, ROASTED.

INGREDIENTS. — Snipe, toast, bacon, good gravy, watercress, butter for basting.

METHOD.—These birds, like the ortolan, plover, and woodcock, are dressed without being drawn. They are trussed in the same way as other birds for roasting, but the head is skinned and left on, the long beak of the bird being passed through the legs and body instead of a skewer. Brush them over with warm butter, tie a thin slice of fat bacon over each breast, and hang them on the spit feet downwards. Put the toast under them to catch the drippings from the trail, baste frequently with butter, and roast them for about 15 minutes, or less if preferred very much underdone. white and light. Line a flat tin with raised edges with a sheet of buttered paper, pour in the cake, and put it into the oven. It must be rather slow, and the cake must not be allowed to brown at all. If the oven is properly heated, 1 to 1 $\frac{1}{4}$  hours will be found long enough to bake the cake. Let it cool, then with a clean, sharp knife cut it into small square pieces, which should be gently removed to a large flat dish to get cool before putting away. This cake will keep for several weeks.

TIME.—1 to 1 $\frac{1}{4}$  hours. AVERAGE COST, 1s. SUFFICIENT for 1 cake.

## SNOW PUDDING (See Lemon Sponge).

METHOD.—Put the flour into a clean basin, rub in the butter and sugar, make a hole in the centre, break the eggs and beat them up well with a wire egg-whisk, dissolve the soda in a little water, turn all the ingredients together into the hole, and wet up into rather a soft paste, using a little milk if necessary. Turn out on to the board, flour over, and roll down in sheets about  $\frac{1}{4}$  of an inch thick, cut out with a small plain round cutter, set on to clean greased baking-plates, and bake in a warm oven.

METHOD.—Rub the butter into the flour, add the sugar, currants, and flavouring. Beat the egg well, add it to the dry ingredients and well mix, leaving a tablespoonful of the milk to dissolve the soda, adding this just before putting into the oven, and well mix it through the batter. Bake in buttered moulds. Prick with a knitting needle or small skewer; if this comes out clean the cakes are sufficiently done. A nice lunch or tea cake.

TIME.—30 minutes or an hour. AVERAGE COST, 1s. SUFFICIENT for 2 medium-sized cakes.

## SOLE, BAKED.

### SOLE AU GRATIN.

In France there is but one way of doing Sole au Gratin, but in England there are several ways. There is, however, no better method than the French; and a sole cooked "au gratin" after the French manner is an exceedingly tasty dish, and once introduced will be preferred to all others.

INGREDIENTS.—1 large sole,  $\frac{1}{2}$  a glass of white wine, preserved mushrooms sliced, Italian sauce, mushroom liquor, chopped parsley, brown breadcrumbs, butter, salt and pepper, lemon-juice.

METHOD.—Take the sole, skin both sides, cut off the head and fins, and make several incisions with a knife across one side of the fish. Place, cut side upwards, on a well buttered silver-plated "gratin dish," season with pepper and salt, add half a small glass of white wine, a few drops of lemon-juice, a little mushroom liquor, and some chopped parsley. Place a row of sliced preserved mushrooms down the centre of the fish, and cover with a rich Italian sauce. Sprinkle with brown breadcrumbs, put a few tiny bits of butter here and there on top of the fish, and bake in a moderate oven from 20 to 30 minutes, according to the size of the sole. Place the dish as it leaves the oven on another (larger) dish, and send to table.

TIME.—From 20 to 30 minutes. AVERAGE COST, 1s. 9d. to 2s. 6d. SUFFICIENT for 2 or 3 persons. SEASONABLE all the year.

### SOLE, BAKED (French Dish).

INGREDIENTS.—1 rather large plump sole, 1 tablespoonful of breadcrumbs, 1 tablespoonful of finely-chopped mushrooms, 1 teaspoonful of finely-chopped parsley,  $\frac{1}{2}$  a teaspoonful of finely-chopped fat bacon, 1 finely-chopped shallot,

## SOLE, WITH SHRIMPS.

1 glass of white wine, and an equal quantity of good stock, butter, brown breadcrumbs, salt and pepper.

**METHOD.**—Trim and skin the sole. Mix the breadcrumbs, mushrooms, parsley, bacon, shallot, and a good seasoning of salt and pepper well together. Cover the bottom of a flat silver or fireproof dish rather thickly with butter, over which sprinkle half the prepared seasoning, and place the fish on the top of it. Cover with the remainder of the seasoning, sprinkle lightly with brown breadcrumbs, and add a few drops of oiled butter. Pour the wine and stock round the fish, and bake from 15 to 20 minutes in a moderate oven. Serve in the dish in which it has been cooked.

**TIME.**—To cook, 15 to 20 minutes.  
**AVERAGE COST,** 2s. to 2s. 6d.  
**SUFFICIENT** for 2 or 3 persons.  
**SEASONABLE** at any time.

## SOLE, BAKED WITH SHRIMPS.

**INGREDIENTS.**—1 medium-sized sole,  $\frac{1}{4}$  pint of picked shrimps, 1 dessertspoonful of white breadcrumbs, 1 teaspoonful of anchovy essence, 1 egg, a little white sauce or milk, cayenne, salt, brown breadcrumbs, a little butter.

**METHOD.**—Remove the skin, make an incision down the centre as for filleting, and raise as far as possible the flesh on each side. Chop the shrimps coarsely, add the breadcrumbs, cayenne, salt (if necessary), anchovy essence,  $\frac{1}{2}$  the egg, and sufficient white sauce or milk to moisten the whole. Press the mixture lightly inside the fish, and instead of drawing the two sides together, fill the gap between them with the forcemeat, and flatten the surface of it to the level of the fish. Brush over with the remainder of the egg, cover

## SOLE, FRIED.

lightly with pale brown breadcrumbs, and bake for about 20 minutes in a moderate oven.

**TIME.**—About 40 minutes. **AVERAGE COST,** from 1s. 9d. to 2s. 6d. **SUFFICIENT** for 2 to 3 persons. **SEASONABLE** at any time.

## SOLE, BOILED.

**INGREDIENTS.**—1 large sole, salt.

**METHOD.**—Wash and clean the fish, but do not skin it, and cut off the fins. Have ready a fish-kettle with sufficient warm water to cover the fish, add salt to taste, put in the sole, and cook gently from 10 to 12 minutes, according to its size. Drain well, dish on a folded napkin, garnish with parsley and cut lemon, and serve with shrimp, lobster, or plain melted butter sauce.

**TIME.**—After the water boils, 10 to 12 minutes for a large sole. **AVERAGE COST,** 1s. 9d. to 2s. 3d. **SUFFICIENT** for 4 persons.

## SOLE, FRIED.

**INGREDIENTS.**—1 medium-sized sole, oil or clarified fat, egg, breadcrumbs, flour, salt and pepper.

**METHOD.**—Wash and skin the sole, cut off the fins, and dry well. Add a liberal seasoning of salt and pepper to a teaspoonful of flour, rub it well into the sole, then brush it over with egg, and cover with fine breadcrumbs. Lift it carefully on to the wire drainer, lower it into the hot oil or fat, and fry until it acquires a pale, golden-brown colour. Soles may also be fried, though less easily, and sometimes less satisfactorily in a large frying-pan. The oval form is preferable for the purpose; and in frying, care should be taken to first cook the side of the sole intended to be served uppermost, otherwise breadcrumbs that have become detached from the side first

## SOLE, GRILLED.

fried may adhere to the side next cooked, and spoil its appearance. Drain well on kitchen paper, and serve garnished with fried parsley.

TIME.—About 10 minutes. AVERAGE COST, 1s. 9d. to 2s. SUFFICIENT for 2 or 3 persons. SEASONABLE all the year.

## SOLE, GRILLED.

INGREDIENTS.—1 medium-sized sole, butter, salt and pepper.

METHOD.—Trim the sole, and wipe it thoroughly with a damp cloth. Rub it over with a little salt and pepper, and coat it completely with liquid butter. Place the sole on a scrupulously clean, well buttered grill, and cook over or in front of a clear fire, turning it occasionally during the process. Serve on a dish paper, garnish with parsley and lemon. A good white sauce or other suitable sauce may accompany the dish.

TIME.—10 minutes. AVERAGE COST, 1s. to 1s. 6d.

## SOLE, STEAMED (Invalid Cookery) (See Whiting, Steamed).

## SOLE, WITH FINE HERBS.

INGREDIENTS.—1 medium-sized sole, 1 oz. of butter,  $\frac{1}{4}$  pint of good stock, 1 glass of sherry, 2 finely-chopped shallots, 1 tablespoonful of finely-chopped parsley,  $\frac{1}{2}$  a teaspoonful each of anchovy and Harvey's sauce, salt and pepper.

METHOD.—Melt the butter in a sauté-pan, add the rest of the ingredients, except the anchovy and Harvey's sauce, and warm gradually. Wash and skin the sole, put it into the pan as soon as the contents are hot, cover closely, and cook in a moderate oven for  $\frac{1}{2}$  an hour. Just before serving add the anchovy and Harvey's sauce, then place the sole on a hot dish, and strain the sauce over.

## SOLES WITH MUSHROOMS.

TIME.—About 40 minutes. AVERAGE COST, 2s. 3d. SUFFICIENT for 2 or 3 persons. SEASONABLE at any time.

## SOLE, WITH MAÎTRE D'HÔTEL SAUCE.

Sole à la Maître d'Hôtel is dressed and served in precisely the same way as Sole à la Crème, with the addition of a dessertspoonful of finely-chopped parsley and a teaspoonful of lemon-juice, both of which must be stirred into the sauce just before serving.

## SOLES, TO FILLET.

Soles for filleting should be large, as the flesh can be more easily separated from the bones, and there is less waste. To skin any fish, it must be kept wet. It is easier to skin if it is stale.

METHOD.—With flat-fish begin at the tail, cut the skin across, but do not cut into the flesh, and loosen the skin along the fins on either side with a skewer or finger. Then tear off the skin with the left hand, keeping the thumb of the right hand well pressed over the backbone to prevent the removal of the flesh with the skin. Use a sharp knife for filleting; keep it pressed to the bone, raise the flesh carefully, remove the fillets, and divide them into pieces suitable for serving. Fillets of a small sole are not divided; they are rolled, tied, or folded according to requirements.

## SOLES WITH MUSHROOMS.

INGREDIENTS.—2 medium-sized soles,  $\frac{1}{2}$  pint of mushroom sauce, milk, salt and pepper.

METHOD.—Skin and trim the soles, place them in an earthenware baking-dish, sufficiently large to allow the fish to lie flat, but one above the other if more convenient.

## SOMERSETSHIRE PUDDING.

Sprinkle them liberally with salt and pepper, barely cover with milk, and put over all a greased paper to keep in the steam. Cook in a moderate oven for 10 or 15 minutes, then drain well, and place the soles on a hot dish. Make the sauce as directed, but before adding the mushrooms, boil well to reduce, in order that some or all of the liquor from the dish may be mixed with it, otherwise the sauce would be too thin. Season to taste, pour over the fish, and serve.

TIME.—To cook the soles, from 10 to 15 minutes. AVERAGE COST, 2s. to 2s. 6d., exclusive of the sauce. SUFFICIENT for 3 or 4 persons. SEASONABLE at any time.

## SOMERSETSHIRE PUDDING.

INGREDIENTS. — 3 eggs, their weight in flour, and the weight of 2 eggs in castor sugar and butter, essence of vanilla, or other flavouring.

Turn the preparation into well-buttered darioles or cups, bake gently for 20 minutes, or until done, and serve with either jam or custard sauce. These puddings are sometimes served cold, with the inside scooped out, and the cavity filled with jam or stewed fruit and cream.

TIME.—About 40 minutes. AVERAGE COST, 8d. SUFFICIENT for 6 or 8 persons.

## SOUFFLÉ FRITTERS.

bottom of the pan, sprinkle with salt, and cook gently for about 20 minutes, turning it over, and dressing it down repeatedly with a spoon, in order to equalize the cooking. Drain well, rub through a fine sieve, put the purée into a stewpan, add the butter, cream, or gravy, season well with salt and pepper, and stir over the fire for 8 or 10 minutes, dredging in gradually a little flour until the purée acquires the desired consistence, then serve.

TIME.—About 45 minutes. AVERAGE COST, 3d. per lb. SUFFICIENT for 4 or 5 persons. SEASONABLE in best condition from May to October.

## SOUBISE SAUCE (White Onion Sauce).

INGREDIENTS.— $\frac{1}{2}$  pint of Béchamel sauce or other good white sauce, 2 tablespoonfuls of white stock, 2 Spanish onions, sugar, salt and pepper.

METHOD.—Peel and parboil the onions in salted water, then drain well and chop them finely. Put the prepared onions and stock into a stewpan, cover closely, cook slowly until reduced to a pulp, and add the sauce. Simmer gently until reduced to the right consistency, then add a pinch of sugar, season to taste, and use as required.

TIME.—About 1 hour. AVERAGE COST, 6d. to 7d.

## SOUFFLÉ FRITTERS.

INGREDIENTS.—Choux paste (*see* Recipe), frying-fat, castor sugar.

METHOD.—Prepare the paste as directed, drop teaspoonfuls of it into hot fat, and fry rather slowly until crisp and lightly browned. Drain well, dredge with castor sugar, and serve.

METHOD.—Heat the butter in a stewpan, add the prepared vegetables, cover closely, and cook very slowly for about  $\frac{1}{2}$  an hour. Now add the boiling water and a seasoning of salt and pepper, and simmer gently until all the vegetables are tender. Beat the yolks of eggs slightly, add gradually a few tablespoonfuls of the boiling soup, and when thoroughly blended add the preparation to the contents of the saucepan. The following is a simple way by which any cloudy stock can be clarified or rendered transparent.

## STOCK FOR JELLY.

Peel, wash, and cut up small the following prepared vegetables:— $\frac{1}{2}$  an onion, or  $\frac{1}{2}$  a leek, 1 small carrot, a piece of celery or some celery leaves; put these into a clean and dry stewpan, with a sprig of thyme and marjoram, a sprig or two of tarragon, chervil, 6 peppercorns, the white and shell of an egg (the egg shell must be clean), a little lemon-juice, and a teaspoonful of vinegar. Stir this with a whisk, and add  $\frac{1}{4}$  to  $\frac{3}{4}$  lb. of finely-chopped lean beef, moistened with a little cold water, then put in the stock (2 to 3 quarts), which should be cold and free from fat. Bring it to the boil whilst whisking, remove from the fire, and let it simmer gently for about 20 to 30 minutes. Season to taste with salt, etc., and strain through a cloth.

AVERAGE COST.—1s. 6d. per quart.

## STOCK FOR JELLY (See Aspic Jelly from Calves' Feet, Gelatine Jelly, and Wine Jelly).

When sweet jelly is required, lemon-rind, cloves, bay-leaf, and mace should replace the vegetables, herbs, and vinegar used in making aspic jelly.

## STONE CREAM.

INGREDIENTS.—1 pint of milk, 2 ozs. of sugar, 1 heaped-up tablespoonful of arrowroot, 3 drops each of essence of cloves and almonds, jam, strips of angelica, glacé cherries.

METHOD.—Place a good layer of jam at the bottom of a glass dish. Mix the arrowroot smoothly with a little cold milk, boil the remainder, pour it over the arrowroot, stirring meanwhile. Replace in the stewpan, add the sugar, simmer gently for 2 or 3 minutes, and stir in the flavourings. Stir

## STRAWBERRY CREAM.

METHOD.—Bring the milk and cream to near boiling point, add the beaten yolks of eggs, stir by the side of the fire until they thicken, then put in the sugar, and when dissolved, strain and let the preparation cool. Pass the strawberries through a fine sieve, mix with the custard, add the lemon-juice and carmine gradually until a deep pink colour is obtained. Then freeze.

TIME.—About 1 hour. AVERAGE COST, 2s. to 2s. 3d. SUFFICIENT for 7 or 8 persons.

## STRAWBERRY ICE CREAM (Another Method).

INGREDIENTS.—1 lb. of strawberries, 1 quart of milk,  $\frac{1}{2}$  gill of cream, 10 ozs. of castor sugar,  $\frac{1}{2}$  oz. of cornflour, 4 eggs, the juice of 2 lemons, carmine.

pan, and stir by the side of the fire until the mixture thickens. Strain, add the strawberries, previously reduced to a purée by being passed through a fine sieve, the lemon-juice, a few drops of carmine, and when cold, the cream, and well whisked whites of eggs. Then freeze.

TIME.—About 1 hour. AVERAGE COST, 2s. SUFFICIENT for 7 or 8 persons.

## STRAWBERRY JAM.

INGREDIENTS.—To each lb. of fruit allow from 12 to 16 ozs. of preserving sugar.

METHOD.—Remove the stalks from the fruit, put it into a preserving-pan, covering each layer thickly with sugar. Place the pan by the side of the fire, bring the contents slowly to boiling point, and stir occasionally. Skim well, boil gently until the jam sets when tested on a cold plate, taking care in stirring to keep the fruit as whole as possible. Pour into pots, cover with paper brushed over on both sides with white of egg, and keep in a cool, dry place.

TIME.—About 1 hour. AVERAGE COST, from 6d. to 8d. per lb.

## STRAWBERRY JELLY.

INGREDIENTS.—1 lb. of strawberries,  $\frac{1}{2}$  lb. of loaf sugar, 2 ozs. of gelatine, the juice of 1 lemon, the whites and shells of 2 eggs, a little lemon jelly.

METHOD.—Boil the sugar and 1 pint of cold water to a syrup, and when cool, pour it over  $\frac{1}{2}$  lb. of strawberries, previously picked and crushed to a pulp. Cover the basin and let the fruit remain thus for  $\frac{1}{2}$  an hour. Coat a mould thinly with lemon jelly, decorate tastefully with whole strawberries, and fix them firmly in place with a little more jelly. Place the gelatine

with 1 pint of water in a stew-pan; when dissolved add the strawberry preparation and the lemon-juice. Let the mixture cool, then stir in the whites of the eggs and the shells. Whisk until boiling, and strain through a jelly-bag or cloth until clear. When the preparation is cold and on the point of setting pour it into the prepared mould, and let it remain on ice or in a cool place until firm.

TIME.—About  $1\frac{1}{2}$  hours. AVERAGE COST, 1s. 9d. to 2s. 3d. SUFFICIENT for 1 large mould. SEASONABLE from June to August.

METHOD.—Mix the powder smoothly with a little cold milk, boil the remainder of the milk, add the blended milk and powder, and stir until boiling. Add the butter, sweeten to taste, boil gently for about 5 minutes, then turn into a wetted mould, and put aside until cold.

TIME.—To make the mould, about 20 minutes. AVERAGE COST, 6d. SUFFICIENT for 4 persons.

## STRAWBERRY SOUFFLÉ.

INGREDIENTS.— $\frac{1}{2}$  pint of strawberry pulp sweetened to taste,  $\frac{1}{2}$  lb. of strawberries cut into dice, 2 ozs. of castor sugar, 2 ozs. of fine flour,  $1\frac{1}{2}$  ozs. of butter, 3 yolks of eggs, 4 whites of eggs, 1 gill of milk or cream, carmine.

METHOD.—Reduce the strawberries to a pulp by passing them through a hair sieve, and sweeten to taste with castor sugar. Melt the butter, stir in the flour, add the milk, boil well, then incorporate the sugar and strawberry pulp.

## STURGEON CUTLETS.

Now beat in the yolks of eggs separately, brighten the colour by adding a few drops of carmine, stir in the strawberries cut into dice, and lastly, and very lightly, the stiffly-whisked whites of eggs. Pour the mixture into a well-buttered mould, and bake in a hot oven from 35 to 40 minutes. Serve with a suitable fruit syrup or sweet sauce.

METHOD.—Cut the corn from the cob and shell the beans, put them into separate vessels of

## SUCKING PIG.

slightly salted boiling water, cook until tender, and drain well. Mix them together, put them into a stewpan with a lump of butter and a little cream, add a good pinch of sugar, and a seasoning of pepper, and shake gently over the fire until thoroughly hot. In winter, when the vegetables are dry and hard, soak both corn and beans for at least 12 hours, then proceed as directed above. Canned Lima beans and canned corn are also used.

TIME.—About  $\frac{1}{2}$  an hour. AVERAGE COST, 1s. SUFFICIENT for 7 or 8 persons. SEASONABLE from July to September.

## SUCKING PIG, ROASTED.

INGREDIENTS.—A sucking pig, not more than 3 weeks old, butter, or salad-oil to baste with, onion forcemeat.

METHOD.—Make the forcemeat as directed, put it inside the pig, and close the opening by means of a trussing needle and string. Brush the entire surface of the pig with salad-oil or warmed butter, wrap it in several folds of well-oiled or well-greased paper, draw the legs well back, tie into shape, and either roast or bake the pig for  $2\frac{1}{2}$  or 3 hours, according to its size. It should be thoroughly well basted, and about  $\frac{1}{2}$  an hour before the time of serving the paper must be removed, and the pig brushed over with thick cream or salad-oil to improve the colour, and crisp the surface. Before serving, cut off the head, and split the pig down the centre of the back; lay the two halves on a dish, divide the head, and place half at each end of the dish. The usual accompaniments are brown and apple sauces, and sometimes hot currants; the latter should be prepared the day before. To make them plump, they must

## DRESSED VEGETABLES.

1. Wafer Potatoes,    2. Spinach Soufflés.    3. Stuffed Tomatoes.

be scalded, and afterwards thoroughly dried. Re-heat in the oven before serving.

TIME.—From  $2\frac{1}{2}$  to 3 hours. AVERAGE COST, from 6s. to 10s. 6d. SUFFICIENT for 8 or 9 persons.

## SUCKING PIG, TO SCALD.

Put the pig into cold water directly it is killed; let it remain for a few minutes, then immerse it in a large pan of boiling water for 2 minutes. Take it out, lay it on a table, and pull off the hair as quickly as possible. When the skin looks clean, make a slit down the belly, take out the entrails, well clean the nostrils and ears, wash the pig in cold water, and wipe it thoroughly dry. Take off the feet at the first joint, and loosen and leave sufficient skin to turn neatly over. If not to be dressed immediately, fold it in a wet cloth, to exclude the air.

## SUET CRUST.

INGREDIENTS.—12 ozs. of flour, 6 ozs. of suet, 1 heaped teaspoonful of baking-powder,  $\frac{1}{4}$  of a teaspoonful of salt,  $\frac{1}{3}$  of a pint of cold water.

METHOD.—Free the suet from skin, shred it into fine flakes, but do not chop it. Add the flour to the suet, and mix both well together in a basin, then add the salt, baking-powder, and as much water as is necessary to mix the whole into a fairly stiff paste. Knead lightly, then roll out, and use for any kind of pie or pudding intended to be eaten hot.

TIME.— $2\frac{1}{4}$  hours. AVERAGE COST, 5d. SUFFICIENT for 1 large pie.

## SUET CRUST, RICH.

INGREDIENTS.—8 ozs. of flour, 3 ozs. of breadcrumbs, 6 ozs. of suet, 1 heaped teaspoonful of baking

## SUET PUDDING.

powder,  $\frac{1}{4}$  of a teaspoonful of salt, about  $\frac{1}{3}$  pint of water.

METHOD.—Free the suet from skin, shred and chop it finely. Mix well together the flour, breadcrumbs, suet, salt, and baking-powder, and add water to form a paste soft enough to roll out easily, but not sufficiently moist to stick to the board and rolling-pin. This paste makes an exceedingly light and easily-digested pudding, but in consequence of its extreme lightness, it is liable to break if turned out of the basin.

TIME.— $2\frac{1}{4}$  hours. AVERAGE COST, 5d. SUFFICIENT for 1 fair-sized pudding.

## SUET FORCEMEAT.

INGREDIENTS.—2 tablespoonfuls of finely-chopped suet, 4 tablespoonfuls of breadcrumbs, 1 good dessertspoonful of finely-chopped parsley,  $\frac{1}{2}$  a teaspoonful of powdered mixed herbs,  $\frac{1}{4}$  of a teaspoonful of grated lemon-rind, 1 egg and a little milk, nutmeg, salt and pepper.

METHOD.—Mix all the dry ingredients well together, add the egg and sufficient milk to slightly moisten the whole, season to taste, and use.

TIME.—20 to 30 minutes. AVERAGE COST, 3d. to 4d.

## SUET PUDDING.

INGREDIENTS.—12 ozs. of flour, 6 ozs. of finely-chopped suet, 1 teaspoonful of baking-powder,  $\frac{1}{4}$  of a teaspoonful of salt, cold water.

METHOD.—Mix the flour, suet, baking-powder, and salt together, and add water gradually until a rather stiff paste is formed. Shape it into a roll, wrap it in a pudding-cloth, which must be previously scalded and well dredged with flour on the inner side, and secure the ends with string. Put it into

## SUET PUDDING.

boiling water, and cook for about  $2\frac{1}{4}$  hours. Serve with jam, treacle, stewed fruit, or, if preferred, good gravy.

TIME.—About  $2\frac{3}{4}$  hours. AVERAGE COST, 6d. SUFFICIENT for 6 or 7 persons.

Note.—The above mixture may also be made into dumplings, which require boiling for two hours. For savoury dumplings, see Exeter Stew.

### SUET PUDDING (Invalid Cookery).

INGREDIENTS.—3 ozs. of finely-chopped beef suet,  $1\frac{1}{2}$  ozs. of sugar, 6 ozs. of flour, 1 egg, salt.

METHOD.—Mix the suet, flour, sugar, and a pinch of salt together, and beat and add the egg. Mix well, turn into well-greased dariole moulds, cover with buttered paper, and steam from 50 to 60 minutes. Serve with honey, jam, or golden syrup.

TIME.—To cook the puddings, from 50 to 60 minutes. AVERAGE COST,  $3\frac{1}{2}$ d. SUFFICIENT for 3 or 4 persons.

## SUGAR.

Sugar, like salt, is both an antiseptic and a valuable food, as well as a useful flavouring ingredient. What salt is to meat and vegetables, sugar is to all fruits and many farinaceous foods, rendering palatable what would otherwise be insipid or uneatable in consequence of extreme sourness. In very small quantities, sugar is frequently used to soften or heighten the flavour of ragoûts and sauces.

### SUGAR FOR COMPÔTES (See Sugar to Boil).

### SUGAR, TO BOIL.

Although sugar may be boiled, and the degree approximately gauged by applying certain simple

## SUGAR.

tests, the process is greatly simplified by the use of a saccharometer.

The different degrees to which sugar is boiled are classed as follows:—

#### I. Small Thread. 215° F.

INGREDIENTS.—2 lbs. of loaf sugar, 1 pint of water.

METHOD.—Dissolve the sugar in the water, bring to boiling point, and remove the scum. Boil for a few minutes, then dip the tip of the forefinger into the syrup and apply it to the thumb. If, on immediately separating the finger and thumb, the syrup is drawn out into a fine thread which breaks at a short distance, the sugar is boiled to the *small thread* (215° F.).

#### II. Large Thread. 217° F.

Boil the syrup a little longer, and apply the same test; if the thread can be drawn longer without breaking, the syrup is boiled to the *large thread* (217° F.).

#### III. Small Pearl. 220° F.

Continue the boiling for a few moments and proceed as before. When the thumb and forefinger may be separated to a little distance without breaking the thread, the sugar is boiled to the *small pearl* (220° F.).

#### IV. Large Pearl. 222° F.

After a little further boiling dip the forefinger in again, stretch the thumb and forefinger as far as possible, and if the thread remains unbroken the sugar has been boiled to the *large pearl* (222° F.).

#### V. Small Blow. 230° F.

Boil a little longer, then take a skimmer, dip it into the syrup, drain it well over the pan, and

## SUGAR.

blow through the holes. If small bubbles appear on the other side of the skimmer, the sugar is boiled to the *small blow* (230° F.).

### VI. Large Blow or Feather. 233° F.

After a moment's further boiling repeat the test, and when the bubbles appear in much larger quantities and fly off the skimmer when shaken, like small feathers or down, the sugar is boiled to the *large blow* (233° F.).

### VII. Small Ball. 237° F.

Now dip the forefinger into a basin of cold water, then dip it into the sugar, and again quickly into the water. When the sugar can be rolled between the thumb and forefinger into a *small ball* it has reached the stage known by that name (237° F.).

### VIII. Large Ball. 247° F.

Continue the boiling and proceed as before; as soon as the sugar can be formed into a larger and harder ball, it is boiled to the *large ball* (247° F.).

### IX. Small Crack. 290° F.

Boil for a moment longer, then dip in the forefinger, and if the sugar adhering to it breaks with a slight noise, and sticks to the teeth when bitten, it is boiled to the *small crack* (290° F.).

### X. Large Crack. 312° F.

Boil a little longer, dip the forefinger into cold water, then into the sugar, and again quickly into the water. If the sugar breaks short and brittle, and does not stick to the teeth when bitten, it is boiled to the *large crack* (312° F.).

### XI. Caramel. 350° F.

*Note.*—If the boiling is prolonged beyond this stage, the sugar soon

## SUMMER SQUASH.

begins to acquire a little colour, which gradually deepens until brown, and finally, black, burnt sugar is obtained.

### SUGAR, TO CLARIFY (for Syrup).

INGREDIENTS.—6 lb. of loaf sugar, 1 quart of water, 2 whites of eggs.

METHOD.—Dissolve the sugar in the water in a large stewpan, but do not let it become very hot. Beat the whites of eggs, pour the warm syrup on to them, and return to the stewpan. When the syrup boils, add  $\frac{1}{2}$  a gill of cold water, repeat 3 times, thus using in all  $\frac{1}{2}$  a pint. Now draw the pan aside for about 10 minutes, then strain by means of a jelly bag or fine muslin, and use as required.

### SUMMER SALAD.

INGREDIENTS.—2 or 3 lettuces shredded, 2 handfuls of mustard and cress, 12 radishes sliced,  $\frac{1}{2}$  a cucumber sliced, salad dressing (*see* recipes for same).

METHOD.—Place a little salad dressing at the bottom of a salad-bowl, put in the lettuce, etc., and serve when well mixed.

### SUMMER SQUASH (American Recipe).

INGREDIENTS.—Young, fresh, tender squashes, butter, salt and pepper.

METHOD.—Wash and dry the squashes, do not pare them, cut them into quarters and remove the seeds. Put them into slightly salted boiling water, and cook gently for about 20 minutes, or until tender. Drain well, mash, replace in the stewpan with a lump of butter and a seasoning of salt and pepper, re-heat and serve.

TIME.—About  $\frac{1}{2}$  an hour. AVERAGE COST, 3d. each. SUFFICIENT, allow 2 to 3 for 4 persons. SEASONABLE all the year.

## SWARTZUIR.

*Note.*—The term Squash is loosely used, especially in the United States, for 2 or 3 kinds of gourd, including the pumpkin.

### SWARTZUIR (An old Cape Recipe).

**INGREDIENTS.**—2 or 3 lbs. of neck of mutton, 1 onion, 1 breakfastcupful of white flour, 2 ozs. of tamarinds, 1 pint of boiling water, 6 cloves, 1 teaspoonful of brown sugar, salt, pepper, 2 eggs.

**METHOD.**—Remove the meat from the bones and cut it into rather small pieces. Place it in a stewpan with the onion and 1 pint of cold water. To the pint of boiling water add the tamarinds, cloves, sugar, and a good seasoning of salt and pepper. Cook the meat gently for 1 hour, and then strain a breakfastcupful of the liquor into another stewpan, and to this add salt and pepper and the cupful of flour. Stir over the fire until the dough is well cooked, and when cold work in the eggs and form into dumplings no larger than a walnut. To the meat add the tamarinds, water, and spices, let it boil well, add the dumplings, and cook gently for 10 minutes longer.

**TIME.**—About 2 hours. **AVERAGE COST,** 2s. 6d. to 3s. 6d. **SUFFICIENT** for 5 or 6 persons. **SEASONABLE** at any time.

### SWEETBREAD, FRIED.

**INGREDIENTS.**—1 calf's heart sweetbread, 1 pint of white stock or water (when water is used, add a little onion, carrot, and turnip), 1 egg, breadcrumbs, 1 oz. of butter or frying-fat.

**METHOD.**—Blanch the sweet bread (*see Sweetbreads, to Blanch*), then put it into a stewpan with the stock, add seasoning if necessary, and simmer gently for 40 minutes. Press between two plates until cold,

## SWEETBREADS.

then cut into slices, brush over with egg, coat with breadcrumbs, and fry in the butter in a sauté-pan, or in a deep pan of hot fat, until lightly browned. Drain well, and serve on a folded serviette, or dish paper, garnished with fried parsley.

**TIME.**—1¼ hours, after the sweetbread is blanched. **AVERAGE COST,** 3s. 6d. **SUFFICIENT** for 2 or 3 persons.

### SWEETBREADS, BRAISED.

**INGREDIENTS.**—A pair of calf's sweetbreads, ¾ pint of stock, 1 small onion, 1 small carrot, ½ a small turnip, 1 strip of celery, 6 peppercorns, a bouquet-garni (parsley, thyme, bay-leaf), glaze, 1 croûte of fried bread, ½ pint of good gravy or tomato sauce.

**METHOD.**—Blanch the sweetbreads (*see Sweetbreads, to Blanch*), slice the vegetables, put them into a stewpan with the bouquet and peppercorns, nearly cover them with stock, adding more when required. Wrap the sweetbreads in a buttered paper, place them on the top of the vegetables, put on the lid, and cook gently for ¾ of an hour. In the meantime, cut a block (croûte) of bread to fit the dish, and not less than 2 inches in thickness. Fry in hot fat, drain well, place the sweetbreads on the top of the bread, brush them over with glaze, pour round the gravy, or tomato sauce, and serve. If preferred, the dish may be garnished with little groups of green peas, haricots verts, or a macedoine (mixed garnish) of vegetables, either placed at the four corners or at intervals round the base of the croûte.

**TIME.**—About ¾ of an hour, after the sweetbreads are blanched.

**AVERAGE COST,** 5s. to 7s. 6d. **SUFFICIENT** for 6 or 7 persons.

## SWEETBREADS.

### SWEETBREADS, FRIED, AND SPINACH.

INGREDIENTS.—A pair of sweetbreads,  $\frac{1}{2}$  pint of spinach purée,  $\frac{1}{2}$  pint of THICK Béchamel sauce, 1 egg, breadcrumbs, salt and pepper,  $\frac{1}{2}$  pint of Madère, Robert, or piquant sauce, frying-fat.

METHOD.—Prepare and blanch the sweetbreads (*see* Sweetbreads, to Blanch), boil them for 10 minutes in slightly salted water, and when cool cut them into slices  $\frac{1}{4}$  of an inch in thickness. Have the Béchamel sauce ready and nearly cold; season each slice with salt and pepper, coat both sides with the sauce, and, if possible, put them on ice until the sauce sets. Now dip the slices into beaten egg, coat them very carefully with breadcrumbs, and fry until lightly browned in hot fat. Dish in a circle on a thin border of mashed potato, fill the centre with the spinach purée (*see* Vegetables as to method of preparation), pour the sauce round the base of the dish, and serve.

TIME.—About 2 hours. AVERAGE COST, 6s. 6d. to 8s. 6d. SUFFICIENT for 6 or 7 persons.

### SWEETBREADS (To Blanch).

In whatever form the sweetbreads may be subsequently dressed they must be first blanched, to render them white and firm. One hour's soaking, at least, in cold water, is necessary to free them from blood, and they may with advantage be allowed to remain longer. They should then be put into a stewpan, covered with cold water, and brought slowly to the boil, and after 2 or 3 minutes' gently cooking, may be either transferred to a basin of cold water and allowed to remain in it until

## SWISS CREAM.

cold or well washed in cold water and pressed between two dishes until cold.

### SWEET POTATO FRITTERS.

INGREDIENTS.— $\frac{1}{2}$  lb. of sweet potatoes, 2 tablespoonfuls of warm butter, 1 tablespoonful of flour, 1 egg, and a little salt, frying-fat, egg and breadcrumbs.

METHOD.—Prepare, boil, and mash the potatoes; add to them the butter, flour, and the egg, and season with salt. Form the mixture into small round flat cakes, coat them carefully with egg and breadcrumbs, fry in hot fat until nicely browned, then drain well, and serve as a sweet with sugar and ground cinnamon.

TIME.—To fry the fritters, 4 or 5 minutes. AVERAGE COST, 8d. or 9d. SUFFICIENT for 4 or 5 persons. SEASONABLE at any time.

### SWEET POTATOES, ROAST.

### SWEET POTATOES, DRIED.

METHOD.—Pour boiling water over the potatoes the night before they are wanted. The next day drain and peel, boil, and dress with butter.

## SWISS CREAM.

INGREDIENTS.— $\frac{1}{2}$  pint of cream,  $\frac{1}{2}$  pint of milk,  $\frac{1}{4}$  pint of sherry, 1 oz. of castor sugar, 1 tablespoonful of cornflour, 1 lemon, 1 teaspoonful of finely-chopped pistachios, sponge cake.

METHOD.—Cut the cake into 1-inch thick slices, place them in a

## SWISS PUDDING.

deep silver or glass dish, and pour over the sherry. Mix the corn-flour smoothly with a little milk, boil the remainder with the thinly-cut lemon-rind and sugar until pleasantly flavoured, remove the lemon-rind, then add the blended cornflour and milk, boil for ten minutes, and let the mixture cool. Whip the cream slightly, add it and the lemon-juice to the corn-flour preparation, and pour over the sponge cake. Sprinkle with the pistachios, and serve when perfectly cold.

METHOD.—Pare, core, and slice the apples. Cover the bottom of a buttered piedish with breadcrumbs, add a layer of apple, sprinkle with sugar, moisten with water, and add one or two cloves and a few small pieces of butter. Repeat until all the materials are used, letting the breadcrumbs form the top layer. Pour on a little oiled butter, cover with a greased paper, and bake gently for about  $\frac{3}{4}$  of an hour. As soon as the apples begin to fall remove the paper to allow the surface to brown.

TIME.—About  $\frac{3}{4}$  of an hour, to bake the pudding. AVERAGE COST, 10d. to 1s. SUFFICIENT for 4 or 5 persons.

Bring the stock to boiling point, sprinkle in the sago, or whatever is used in its place, and stir and cook until it becomes transparent; then let the soup cool slightly. Mix the yolks of the eggs and the cream together (¼ of a pint of milk may be substituted when it is not convenient to use cream), add to the soup and stir till it thickens; it should have the consistency of single cream. When a thicker soup is desired, mix a teaspoonful of flour or corn-flour with a little milk, and add it to the soup at the same time as the sago. Season to taste, and serve.

TIME.—20 to 30 minutes. AVERAGE COST, about 9d., not including the stock. SUFFICIENT for 8 persons. SEASONABLE at any time.

gathered on a dry day about the end of July, just before the plant begins to bloom. Remove the stalks, bruise the leaves slightly, put them into a wide-necked bottle, and cover them with vinegar. Cover closely so as to completely exclude the air, and let the bottle stand in a cool, dry place for 7 or 8 weeks. Now strain the liquid through fine muslin until it is quite clear, put it into small bottles, cork tightly, and store them in a cool, dry place.

## TARTARE SAUCE.

INGREDIENTS.— $\frac{1}{4}$  pint of mayonnaise sauce, 1 tablespoonful of chopped gherkin or capers,  $\frac{1}{2}$  a teaspoonful of very finely-chopped shallot (this may be omitted).

TIME.—25 minutes altogether. AVERAGE COST, 5d. to 7d.

## TART, OPEN, OF STRAWBERRY, OR OTHER PRESERVE.

INGREDIENTS. — Trimmings of puff paste, any kind of jam.

METHOD.—Butter a tart-pan of the usual shape, roll out the paste to the thickness of  $\frac{1}{8}$  of an inch, and line the pan with it, prick a few holes at the bottom with a fork to prevent the paste rising and blistering, and bake the tart in a brisk oven from 10 to 15 minutes. Let the paste cool a little; then fill it with preserve, place on it a few stars or leaves, which have been previously cut out of paste and baked, and the tart is ready for table. By making the tart in this manner, both the flavour and the colour of the jam are preserved, which would be spoiled were it baked in the oven on the paste, and less jam is required.

TIME.—15 to 20 minutes to bake.

## TARTLETS, FILBERT.

### TARTLETS, BALMORAL.

INGREDIENTS.—1 oz. of butter, 1 oz. of castor sugar,  $\frac{1}{2}$  oz. of cake-crumbs,  $\frac{1}{2}$  oz. of glacé cherries cut into small dice,  $\frac{1}{2}$  oz. of candied peel finely shredded,  $\frac{3}{4}$  oz. of corn-flour, or potato flour, 1 egg, short crust paste.

METHOD.—Make the paste as directed, and line 12 patty-pans. Cream the butter and sugar until thick and white, stir in the yolk of the egg, add the cake-crumbs, cherries, peel, and cornflour. Whisk the white of egg stiffly, stir it in lightly, and fill the patty-cases with the preparation. Cross 2 narrow strips of paste on the top of each tartlet, and bake for about 20 minutes in a moderate oven.

TIME.—To prepare and bake, from 1 to 1 $\frac{1}{4}$  hours. AVERAGE COST, 1s. 2d. SUFFICIENT for 12 small tartlets.

METHOD.—Cream the butter and sugar well together until thick and smooth, add the eggs separately, and beat well. Mix the cream and cornflour smoothly together, stir the ingredients into the mixture, add the ground almonds, cakecrumbs, cinnamon, and lemon-juice, and mix well together. Line 12 tartlet-moulds with paste, fill them with the preparation, and bake in a moderate oven from 15 to 20 minutes. When about  $\frac{3}{4}$  baked, dredge them well with castor sugar.

When cold place a little jam at each corner, and sprinkle cocoanut on the raspberry jam, and a little finely-chopped pistachio nut on the apricot jam.

TIME.—To bake, from 10 to 15 minutes.

### TARTLETS, ST. CLOUD.

INGREDIENTS.—Short paste crust, puff paste or puff paste trimmings,  $\frac{1}{2}$  lb. of greengage jam, castor sugar, vanilla sugar,  $\frac{1}{2}$  gill of cream, glacé cherries, angelica.

METHOD.—Line the patty-pans with short paste, brush the edges lightly over with beaten egg or water, and sprinkle with castor sugar. Fill them with jam, and bake in a moderately hot oven from 10 to 15 minutes. Roll the puff paste out to about  $\frac{1}{8}$  of an inch or less in thickness, and stamp out some rings fully  $\frac{1}{2}$  an inch less in diameter than the tartlets. Brush them over with milk, turn the wet side on to the castor sugar, and place on the baking-sheet sugared side upwards. Bake in a quick oven; when cold, place the rings of paste on the tartlets, and fill the centre with cream, stiffly-whipped and sweetened with vanilla sugar. Place half a glacé cherry in the centre of each, and insert a

few strips or leaves of angelica to complete the decoration.

METHOD.—Make the milk and water luke-warm, turn it into a convenient-sized basin, dissolve the yeast and 2 ozs. of the sugar in it, stir in  $\frac{1}{4}$  lb. of flour, cover over with a clean cloth, and stand aside in a warm place for 20 minutes. While this is standing, weigh the remainder of the flour on to the board, rub the butter into it with the hands, then make a bay, add the other 2 ozs. of sugar, the yolks of eggs, and the salt in fine powder, and then, if the ferment is ready, put it into the bay, wet up into a smooth paste, give it a good kneading, then cover over with a clean cloth and leave it to prove. When well proved, divide up into pieces about 2 ozs. in weight, and form them into various shapes—twists, crescents, scrolls, rosettes, or any other shape fancy may suggest. As these are formed, set them on to a clean tin, cover them over and leave to prove. When well proved, wash them over with a beaten-up egg, and bake in a moderately warm oven to a nice colour.

These rolls are very much appreciated for afternoon tea, tennis and garden parties, and are an excellent adjunct to coffee cut up into slices and dried in the oven as rusks.

TIME.—About 2 hours. AVERAGE COST, 1s. 8d. SUFFICIENT for 30 to 40 rolls.

## TEA ICE CREAM.

### TEA CREAM.

Dissolve the gelatine in a little boiling water, strain it into the cream, and sweeten to taste. Whip the remainder of the cream stiffly, stir it into the tea, etc., when sufficiently cool. Pour into a mould rinsed with cold water, and let set.

the stiffly-whipped cream and freeze in the usual way.

TIME.—From 35 to 40 minutes. AVERAGE COST, 1s. 6d. SUFFICIENT for 7 or 8 persons.

## TEA, TO MAKE.

In order to make good tea it is necessary that the water should be quite boiling, but it must on no account be water that has boiled for some time, or been previously boiled, cooled, and then re-boiled. It is a good plan to empty the kettle and refill it with fresh cold water, and make the tea the moment it reaches boiling point. Soft water makes the best tea, and boiling softens the water, but after it has boiled for some time it again becomes hard. When water is very hard, a tiny pinch of carbonate of soda may be put into the teapot with the tea, but it must be used very sparingly, otherwise it may impart a very unpleasant taste to the beverage. Tea is better made in an earthen than a metal pot. One good teaspoonful of tea will be found sufficient for two small cups, if made with boiling water and allowed to stand 3 or 4 minutes; longer than this it should never be allowed to stand. The delicate flavour of the tea may be preserved, and injurious effects avoided by pouring the tea, after it has stood 3 or 4 minutes, into a clean teapot which has been previously heated.

## TEA-CAKES.

INGREDIENTS.—2 lbs. of flour,  $\frac{1}{2}$  a teaspoonful of salt,  $\frac{1}{4}$  lb. of butter or lard, 1 egg,  $\frac{1}{2}$  oz. of distillery yeast, warm milk.

milk, add the egg, and then sufficient warm milk to make the whole into a smooth paste, and knead it well. Let it rise near the fire, and when well risen form it into cakes; place them in tins, let them rise again before placing them in the oven, and bake from a  $\frac{1}{4}$  to  $\frac{1}{2}$  an hour in a moderate oven. These cakes are also very nice with the addition of a few currants and a little sugar to the other ingredients, which should be put in after the paste is moistened. The cakes should be buttered and eaten hot as soon as baked; but, when stale, they are very nice split and toasted; or, if dipped in milk, or even water, and covered with a basin in the oven till hot, they will be almost equal to new.

TIME.— $\frac{1}{4}$  to  $\frac{1}{2}$  an hour. AVERAGE COST, 10d. SUFFICIENT to make 8 tea-cakes.

## TEA-CAKES, SMALL.

INGREDIENTS.—2 teacupfuls of flour, 1 teacupful of ground rice,  $1\frac{1}{2}$  ozs. of moist sugar, 2 ozs. of butter, 2 ozs. of lard or dripping, 2 eggs, lemon to taste.

TIME.—15 minutes to bake. AVERAGE COST, 9d. SUFFICIENT for 12 or 14 small tea-cakes.

## TEA-CAKES, TO TOAST.

METHOD.—Cut each tea-cake into 3 or 4 slices, according to its thickness; toast them on both sides before a nice clear fire, and as each slice is done, spread it with butter on both sides. When a cake is

## TEAL, ROASTED.

toasted, pile the slices one on the top of the other, cut them into quarters, put them on a very hot plate, and send the cakes immediately to table. As they are wanted, send them in hot, 1 or 2 at a time, for they spoil if allowed to stand unless kept in a muffin-plate over a basin of boiling water.

## TEAL, ROASTED.

INGREDIENTS.—Teal, butter for basting, good brown gravy, orange savoury sauce, watercress, lemons.

METHOD.—Pluck, draw, and truss the teal for roasting. Brush them over with hot butter, and roast before a clear fire from 25 to 30 minutes, basting frequently. Serve on a hot dish, garnish with watercress and quarters of lemon, and send the sauce to table in a sauce-boat.

Melt the butter in a baking-dish, put in the fish, and baste it well, sprinkle with salt and pepper, and add the shallots. Cover the fish with a greased paper, and bake gently from 25 to 35 minutes, according to size. Make the sauce as directed, add the gherkin and a tablespoonful of lemon-juice, and season to taste. When sufficiently cooked, the legs can be broken with a slight pressure and the shell will separate easily. The liver, gall, bladder, and sand-bag must be taken away, also the head when not

## THICK SOUP.

cut off before cooking, and the film surrounding the eggs. What remains is edible, and the water in the shell should be preserved.

### THICK SOUP (For Sickroom).

Strain, replace in the stewpan, add the almond flour or gluten flour mixed smoothly with a little cold water, and stir until boiling. Stir and cook gently for about 10 minutes, add the cabbage and cream, and season to taste.

TIME.—2 hours.

### THRUSH, TO ROAST.

INGREDIENTS.—Thrush, butter for basting, gravy, watercress, croûtes.

METHOD.—After trussing the birds cover each breast with well-buttered paper instead of bacon, which would impair the delicate flavour of the birds. Place them side by side on a skewer, baste well with hot butter and roast before a clear fire for about 10 minutes, basting almost continuously with butter. Serve on croûtes, garnish with watercress, and send the gravy to table separately.

TIME.—To roast the birds, about 10 minutes. AVERAGE COST, uncertain, thrush being seldom sold. Allow 2 to each person.

### THYME AND LEMON THYME.

Both these species belong to the natural order *Labiatae*, or mint tribe. The leaves of the *Thymus vulgaris* possess a highly aromatic flavour, and should be sparingly used. Lemon thyme, or *Thymus*

## TIPSY PUDDINGS.

*citrodorus*, is a trailing evergreen of much smaller growth than the ordinary common kind, and is remarkable for its smell, which closely resembles that of the rind of a lemon, hence its distinctive name.

### TIPPAREE JELLY.

INGREDIENTS.—Tipparee pods (Cape gooseberries), sugar, lemon-juice.

METHOD.—Wipe the pods, cover them with cold water, simmer gently until soft, then drain through a jelly bag, but do not squeeze the pulp. Measure the liquor; to each pint add 1 lb. of sugar and 1 dessert-spoonful of lemon-juice, and simmer gently for  $\frac{1}{2}$  an hour, skimming meanwhile. Pour the jelly into prepared moulds, or into jars if not required for immediate use.

TIME.—About 2 hours. AVERAGE COST, uncertain.

### TIPSY CAKE.

INGREDIENTS.—8 sponge cakes, raspberry jam, 1 pint of boiled custard,  $\frac{1}{4}$  pint of sherry.

METHOD.—Split the cakes, spread on a good layer of jam, replace the halves, arrange them compactly in a dish, giving them as far as possible the appearance of one large cake. Pour over the sherry, and let them soak for 1 hour. Make the custard as directed, and, when cool, pour it over. The cake may be garnished with cherries, angelica, chopped pistachios, or baked almonds.

TIME.—About  $1\frac{1}{2}$  hours. AVERAGE COST, 1s. 9d. SUFFICIENT for 6 or 7 persons.

### TIPSY PUDDINGS.

## TOAD-IN-THE-HOLE.

**METHOD.**—Beat the eggs and sugar together until thick and smooth, and stir in the flour as lightly as possible. Coat 6 or 7 well-buttered dariole moulds thickly with castor sugar, fill them three-quarters full with the mixture, and bake in a moderately hot oven. When cooked, baste them with rum sweetened to taste, sprinkle lightly with cocoanut, and serve cold.

**TIME.**—About 20 minutes. **AVERAGE COST, 9d.** SUFFICIENT for 6 or 7 persons.

## TOAD-IN-THE-HOLE.

**INGREDIENTS.**—1 lb. of beef-steak (cut up small), 4 ozs. of flour,  $\frac{1}{2}$  pint of milk, 1 egg, salt, dripping.

**METHOD.**—Mix the flour, milk, egg, and a little salt into a smooth batter. Put into a Yorkshire pudding tin sufficient dripping to form a thin layer when melted, pour in about  $\frac{1}{4}$  of the batter, and bake until set. Then add the meat, season it with salt and pepper, pour in the remainder of the batter, bake quickly until it has risen and set, and then more slowly until sufficiently cooked. Serve in squares arranged neatly overlapping each other on a hot dish.

**TIME.**—To bake, about 1 hour. **AVERAGE COST, 1s. 3d. to 1s. 5d.** SUFFICIENT for 3 or 4 persons. **SEASONABLE** at any time.

## TOAST, DRY.

on the bottom, pour in about  $\frac{1}{4}$  of the batter and bake until slightly set. **TIME.**—40 minutes. **AVERAGE COST, 10d.** SUFFICIENT for 5 persons.

## TOAST CURRIED (Chafing Dish Cookery).

**INGREDIENTS.**—1 sandwich loaf, curry or mulligatawny paste, and anchovy or bloater paste.

**METHOD.**—Cut 4 slices from the sandwich loaf, not too thin, and toast them in front of a clear fire; trim off the crusts and butter each slice; then spread with a mixture composed of equal proportions of curry or mulligatawny and anchovy or bloater paste. Cut the prepared toast into fingers, place it in a hot chafing dish to heat it: the toast is then ready to serve.

**TIME.**—10 minutes. **AVERAGE COST, 6d.** SUFFICIENT for 3 or 4 persons. **SEASONABLE** at any time.

## TOAST, DRY, TO MAKE.

**METHOD.**—To make dry toast properly, a great deal of attention is required; much more, indeed, than people generally suppose. Never use new bread for making any kind of toast, as it is moist and tough, and, in addition, is very extravagant. Procure a loaf of household bread about two days old; cut off as many slices as may be required, not quite  $\frac{1}{4}$  of an inch in thickness; trim off the crusts and ragged edges, put the bread on a toasting-fork, and hold it before a very clear fire. Toast it carefully until the bread is nicely coloured, then turn it and

## TOAST, HOT BUTTERED.

toast the other side, but do not hold it so close to the fire that it blackens. Dry toast should be made more gradually than buttered toast, as its best feature is its crispness, and this cannot be attained unless the process is slow, and the bread is allowed gradually to colour. Toast should never be made long before it is wanted, as it soon becomes tough unless placed on a fender in front of the fire. Directly each piece is ready, it should be put into a rack or stood upon its edges and sent quickly to table.

## TOAST, HOT BUTTERED, TO MAKE.

METHOD.—A loaf of household bread about 2 days old answers for making toast better than cottage bread, the latter not being a good shape and too crusty for the purpose. Cut as many nice even slices as may be required, rather more than a  $\frac{1}{4}$  inch in thickness, and toast them before a very bright fire without allowing the bread to blacken, which spoils both the appearance and flavour of toast. When both sides are nicely coloured, put the toast on a hot plate; divide some good butter into small pieces, place these on the toast, set this before the fire, and when the butter is just beginning to melt spread it lightly over the toast. Trim off the crust and ragged edges, divide each round into 4 pieces, and send the toast quickly to table. Some persons cut the pieces of toast across from corner to corner, thus making the pieces of a three-cornered shape. Soyer recommends that each slice should be cut into pieces as soon as it is buttered, and when all are ready, that they should be piled lightly on the dish they are intended to be served on. He says that by cutting through 3 or 4 slices at a time all the butter

is squeezed out of the upper ones, while the bottom one is swimming in fat liquid. It is highly essential to use good butter for making this dish.

## TOAST WATER (For Invalids).

INGREDIENTS.—1 crust of bread, 1 pint of cold water.

METHOD.—Toast the bread very brown and hard, but do not burn it, or it will impart a disagreeable flavour to the water. Put it into a jug, pour over it the cold water, let it soak for 1 hour, then strain and use.

TIME.—1  $\frac{1}{2}$  hours.

## TOFFEE.

INGREDIENTS.—1 lb. of loaf sugar,  $\frac{1}{4}$  pint of water, a pinch of cream of tartar, lemon essence or other flavouring.

METHOD.—Put the water and sugar into a sugar-boiler or stewpan, stir occasionally until dissolved, bring to the boiling point, and add the cream of tartar. Boil to the "little crack" degree ( $310^{\circ}$ ), pour into an oiled tin, allow it to cool slightly, then mark off into diamonds or squares with a knife, and when cold divide into sections thus formed.

## TOFFEE, COCOANUT.

INGREDIENTS.— $\frac{3}{4}$  lb. of granulated sugar,  $\frac{1}{2}$  lb. of Demerara sugar,  $\frac{1}{4}$  lb. of desiccated cocoanut,  $\frac{1}{4}$  lb. of glucose, 1  $\frac{1}{2}$  gills of water, flavouring essence.

METHOD.—Dissolve the sugar in the water, add the glucose, and boil to the "little crack" degree (*see Sugar, to Boil*). Remove the stewpan from the fire, stir in the cocoanut, and boil to the "large crack" (*see Sugar, to Boil*). Add a few drops of flavouring essence, and pour on to oiled or buttered tins.

**TOFFEE, RASPBERRY.**

INGREDIENTS.—1 lb. of sugar, 1 gill of cold water, a few drops of cochineal, a few drops of raspberry essence, a pinch of cream of tartar.

METHOD.—Dissolve the sugar in the water, then add the cream of tartar, bring to boiling point, skim carefully, and boil to the "large crack" (*see* Sugar, to Boil). Remove the stewpan from the fire, stir in the cochineal and raspberry essence, and pour into an oiled or buttered tin. Let it harden stiffly, then mark off into sections, and divide them when cold.

**TOFFEE, RUSSIAN.**

INGREDIENTS.— $\frac{3}{4}$  lb. of loaf sugar,  $\frac{3}{4}$  pint of cream, flavouring essence.

METHOD.—Dissolve the sugar in the cream, stand the stewpan in a bain-marie or tin of boiling water, and stir and cook until the mixture thickens and leaves the sides of the pan. Remove from the fire, stir in the flavouring essence, pour on to oiled or buttered tins, and when cold cut into squares.

**TOFFEE, WALNUT.**

INGREDIENTS.—2 lbs. of golden syrup, 1 lb. of walnuts, 1 tablespoonful of glucose, a good pinch of carbonate of soda.

METHOD.—Blanch the walnuts, break them into small pieces or chop them coarsely, and dissolve the carbonate of soda in a small quantity of hot water. Bring the syrup slowly to boiling point, add the glucose, and boil to the "little crack" degree (*see* Sugar, to Boil). Now draw the stewpan aside, stir in the prepared walnuts and carbonate of soda, and at once pour on to an oiled or buttered tin. When sufficiently set, mark into

sections, and when perfectly cold, divide and wrap each piece in wax paper.

**TOMATO AND ARTICHOKE SALAD.**

METHOD.—Wash and soak the lentils for 12 hours, and drain well before using. Slice all the vegetables, and cut the bacon into dice. Melt the butter in a stewpan, put in the ham and all the vegetables, except the tomatoes, and cook slowly for a few minutes, then add the tomatoes and lentils, cover closely, and steam the contents of the stewpan for 15 or 20 minutes. Add the stock or water, bouquet-garni, peppercorns, and cloves, and simmer for 3 hours, or until the lentils are tender. Strain, return to the saucepan, and when boiling add the milk. ## TONGUE, BOILED.

TIME.—1 hour. AVERAGE COST, 1s. 3d. to 1s. 7d. SEASONABLE at any time. SUFFICIENT for 6 persons.

## TONGUE, BOILED.

INGREDIENTS.—1 tongue, a bunch of savoury herbs, water.

METHOD.—In choosing a tongue, ascertain how long it has been dried or pickled, and select one with a smooth skin, which denotes its being young and tender. If a dried one and rather hard, soak it at least for 12 hours previous to cooking it; if, however, the tongue is fresh from the pickle, 2 or 3 hours will be sufficient for it to remain in soak. Put the tongue into a stewpan with plenty of cold water, and a bunch of savoury herbs, let it gradually come to a boil, skim well, and simmer very gently until tender. Peel off the skin, garnish with tufts of cauliflowers or Brussels sprouts, and serve. Boiled tongue is frequently sent to table with boiled poultry, instead of ham, and is preferred by many. If the tongue is to be served cold, peel it, fasten it down to a piece of board by sticking a fork through the root, and another through the top to straighten it. When cold, glaze it, put a paper ruche round the root, and garnish with tufts of parsley.

TIME.—A large smoked tongue, 4 to 4½ hours; a small one, 2½ to 3 hours. A large, unsmoked tongue, 3 to 3½ hours; a small one, 2 to 2½ hours. AVERAGE COST, for a moderate-sized tongue, 5s. to 6s. 6d.

## TONGUE, CURRIED (Tinned Food).

METHOD.—Remove the tongues carefully from the tin, strip off the

## TRANSPARENT PUDDING.

skin, and slice rather thinly. Make the sauce as directed, put in the sliced tongue, and when thoroughly impregnated with the flavour of the sauce, serve either surrounded or accompanied by the rice.

TIME.—About ½ an hour. AVERAGE COST, 1s. 3d. SUFFICIENT for 4 persons.

## TONGUES, TO CURE.

INGREDIENTS.—For a tongue of 7 lbs., 1 oz. of saltpetre, ½ oz. of black pepper, 4 ozs. of sugar, 3 ozs. of juniper berries, 6 ozs. of salt.

METHOD.—Rub the above ingredients well into the tongue, let it remain in the pickle for 10 or 14 days, then drain it, tie it up in brown paper, and have it smoked for about 20 days over a wood fire. It may be boiled without smoking if liked.

TIME.—From 10 to 14 days, to remain in pickle; to be smoked 24 days. AVERAGE COST, for a medium-sized uncured tongue, 3s. 6d.

## TRANSPARENT PUDDING.

INGREDIENTS.—3 yolks of eggs, 2 ozs. of castor sugar, 2 ozs. of butter, apricot jam.

METHOD.—Cream the butter and sugar together until thick and smooth, then add each egg separately, beating meanwhile. Place a layer of this preparation in the bottom of 6 well-buttered dariole moulds, add to each a dessertspoonful of apricot jam, and cover with the remainder of the mixture. Steam from 20 to 25 minutes, let them cool slightly before turning them out, to lessen the probability of their breaking, and serve with custard sauce.

TIME.—About 50 minutes. AVERAGE COST, 9d. SUFFICIENT for 4 or 5 persons.

**TRANSPARENT SOUP.**

Cook slowly on the stove or in the oven until reduced to  $\frac{1}{2}$  the original quantity, then strain. When cold, remove every particle of fat, boil up the stock, sprinkle in the vermicelli, simmer gently for 10 or 15 minutes, then season to taste, and serve.

**TIME.**—To prepare the stock, 8 hours. **AVERAGE COST,** 2s. 9d. **SUFFICIENT** for 8 persons. **SEASONABLE** at any time.

**METHOD.**—Place the treacle, sugar, butter, and vinegar in a large stewpan, boil until a few drops will harden immediately when dropped into cold water, then stir in the carbonate of soda, previously dissolved in a little hot water. Pour at once into an oiled or buttered tin, turn the edges in as they cool, and as soon as the whole can be handled, pull it until white, draw it into sticks, and cut into short lengths.

**TREACLE PUDDING.**

**INGREDIENTS.**—1 lb. of flour, 8 ozs. of finely-chopped suet, 2 ozs. of breadcrumbs, treacle, the grated rind of 1 lemon, 1 teaspoonful of baking-powder, salt.

of salt together, and form into a stiff paste with cold water. Divide it into two equal portions; with one line the basin, from the other portion cut off sufficient paste to form the lid, and roll the remainder out thinly. Put a layer of treacle in the basin, sprinkle liberally with breadcrumbs, and lightly with lemon-rind. From the rolled-out paste cut a round sufficiently large to rather more than cover the treacle, etc., in the basin, moisten the edges of it with water, and join them carefully to the paste lining the basin. Now add another layer of treacle, breadcrumbs, and lemon-rind, and cover with pastry as before. Repeat until the pudding basin is full, then cover with a greased paper, and steam for  $2\frac{1}{2}$  hours.

**TIME.**—From  $2\frac{3}{4}$  to 3 hours. **AVERAGE COST,** 1s. **SUFFICIENT** for 8 or 9 persons.

**TREACLE TOFFEE.**

**INGREDIENTS.**—1 pint of treacle, 2 ozs. of brown sugar, 1 oz. of butter,  $\frac{1}{2}$  a gill of vinegar,  $\frac{1}{2}$  a teaspoonful of carbonate of soda, essence of almonds.

**METHOD.**—Place the sugar in a sugar-boiler or stewpan, pour on the vinegar, and when dissolved add the treacle and boil to the "large ball" degree (*see* Sugar, to Boil). Remove the pan from the fire, add the soda dissolved in a little hot water, the butter, almond essence to taste, boil to the "little crack" degree, and pour into an oiled or buttered tin. When partially set, mark into bars or squares, and when quite firm break into sections.

**TRIFLE.**

Cut the sponge cakes into rather thick slices, spread half of them with jam, cover with the remainder, and arrange them alternately with the macaroons and ratafias in a glass dish. Pour over the wine, adding a little more if necessary to soak them thoroughly, sprinkle on the lemon-rind, add the almonds, and cover with the custard. Mix the cream and whites of eggs together, whip stiffly, sweeten to taste with castor sugar, pile lightly on the top of the custard, and garnish with halved cherries and strips of angelica.

METHOD.—Make the custard as directed, and let it cool. Spread jam on half the biscuits, cover with the others, and arrange them with the ratafias compactly on a glass dish. Mix the sherry and milk together, pour it over the biscuits, stick in the shreds of almonds, and let the preparation soak for 1 hour. Then pour over the custard, pile the stiffly-whisked sweetened whites of eggs on the top, and serve.

Add a little salt and pepper, and when boiling, put in the onions and parsley and simmer gently. Knead the butter and flour smoothly together, and add it, in small pieces, to the contents of the stewpan when they have cooked 1 hour. Stir until the flour becomes smoothly mixed with the milk, continue cooking for about  $\frac{3}{4}$  of an hour longer, then season to taste, and serve.

Cut the tripe into 3-inch squares, dip them into the batter, and fry them until crisp and brown in a little hot dripping in a frying-pan. Onions sliced and fried are frequently served as an accompaniment to this dish.

When the liquor boils, add the onions, carrots, and turnip cut into large pieces, the bouquet-garni, peppercorns, and salt to taste; put on the cover and cook gently from  $1\frac{1}{2}$  to  $2\frac{1}{4}$  hours, according to size. vated in the East Indies. The tubers are dried and then ground to a fine powder. This condiment enters largely into the composition of curry-powder, and gives to it the peculiar odour and the bright yellow colour which that compound possesses.

### TURNIP SALAD.

Keep stirring them over the fire until the butter is well incorporated, and the turnips are thoroughly hot, then dish and serve. A little cream or milk added after the turnips are pressed through the sieve is an improvement to both the colour and flavour of this vegetable.

TIME.—From 45 to 60 minutes. AVERAGE COST, 6d. SUFFICIENT for 5 or 6 persons. SEASONABLE at any time.

## VANILLA BREAD PUDDING.

### VANILLA.

Vanilla is the fruit of a tropical orchid plant, the best varieties of which are now grown in Mexico. The dried, aromatic, sheath-like pod has a delicious fragrance. Its use was first discovered by the Spaniards, but it is now extensively employed as a flavouring for cakes, custards, puddings, chocolates, liqueurs, etc. The most familiar form is the essence of vanilla, extracted from the pod, but its use cannot be recommended, for being volatile, the greater part of its flavour escapes during the process of cooking. It is much better to use vanilla pods or vanilla sugar.

### VANILLA BLANCMANGE.

INGREDIENTS.—¾ pint of milk, ½ pint of cream, 4 ozs. of loaf sugar, 1 oz. of leaf gelatine, 4 yolks of eggs, 2 inches of vanilla-pod.

METHOD.—Bring the milk, sugar, and vanilla-pod to boiling point, and simmer gently until sufficiently flavoured. Beat the yolks of eggs slightly, strain on to them the boiling milk, stirring vigorously meanwhile, return to the stewpan, and stir by the side of the fire until the mixture thickens. Dissolve the gelatine in a ¼-pint of water, add it to the custard, and when cool stir in the stiffly-whipped cream. Stand on ice or in a cold place until set.

TIME.—About 1 hour. AVERAGE COST, 1s. 6d. SUFFICIENT for 6 or 7 persons.

Place the bread, cut into thin slices, in a well-buttered pie-dish, pour the preparation over it, cover, let it remain for at least 1 hour, then bake in a moderately-hot oven until it is set and the surface nicely browned. The pudding may be served either hot or cold, and may be easily turned out if this method of serving is desired.

TIME.—About  $\frac{1}{2}$  an hour. AVERAGE COST, 6d. SUFFICIENT for 3 or 4 persons. SEASONABLE at any time.

Note.—If milk bread is available this pudding will be much lighter and more tasty.

INGREDIENTS.—12 ozs. of cooked veal, 4 ozs. of either cooked or raw ham, about  $\frac{1}{4}$  pint of stock or water, the grated rind of 1 lemon, a good pinch of nutmeg, 1 level teaspoonful of salt, 1 level saltspoonful of pepper, puff paste, rough puff.

METHOD.—Cut the meat into small dice, add to it the salt, pepper, herbs, and moisten with the stock or water. Make the paste as directed, roll it out thinly, and stamp out with a cutter a little larger than the patty-pans as many rounds as possible, and put 12 aside to form the covers. Roll out the cuttings, stamp into rounds, place one in each patty-pan, fill with meat, moisten the edges with water, and put on the covers. Press the edges together, notch them at regular intervals, make a hole in the centre of the top, and decorate with leaves. Brush over with egg or milk, and bake for about 20 minutes in a moderately hot oven.

## VEAL AU GRATIN.

TIME.—20 minutes to bake. AVERAGE COST, 2d. each. SUFFICIENT for 12 large patties.

## VEAL AND HAM PIE.

INGREDIENTS.—1 $\frac{1}{2}$  lbs. of lean veal (fillet or cushion part),  $\frac{1}{4}$  lb. of cooked ham, 2 or 3 hard-boiled eggs, about  $\frac{1}{2}$  a teaspoonful of mixed dried herbs, a teaspoonful of chopped parsley, a little stock or water, seasoning, puff or rough puff paste.

METHOD.—Cut the veal into neat slices, free from skin, also cut the ham into suitable slices. Arrange a layer of veal in a piedish, then a layer of ham, and next a layer of thin slices of hard-boiled egg. Season each layer with a very little salt and pepper, dried herbs, and parsley. Continue thus until the dish is quite full. Pour in about 1 gill of stock, or, failing this, water. Cover with paste in the usual manner, decorate the centre tastefully with paste leaves, brush over with egg, and bake in a moderate oven for about 1 $\frac{1}{4}$  hours.

TIME.—To make and cook, 2 hours. AVERAGE COST, 3s. SUFFICIENT for 7 or 8 persons.

## VEAL AU GRATIN.

METHOD.—Place any bones and trimmings there may be in a stewpan with the onion, a blade of mace or a little nutmeg, and a seasoning of salt and pepper. Cover with cold water, simmer gently for 1 hour, then strain and add stock or water to make up the  $\frac{3}{4}$  pint. ## VEAL, BREAST OF.

add the strained stock. Stir until boiling, add the lemon-juice, season to taste, simmer gently for 20 minutes, and add to the meat. Fill well-buttered scallop shells with the preparation, cover it rather thickly with breadcrumbs, and add a few bits of butter. Bake in a moderate oven until the surface is nicely browned, then serve.

TIME.—To bake, from 10 to 15 minutes. AVERAGE COST, 3d., in addition to the meat. SUFFICIENT for 5 or 6 persons. SEASONABLE at any time.

## VEAL, BREAST OF, ROLLED AND STEWED.

INGREDIENTS.—A breast of veal, veal forcemeat, rolls of fried bacon, forcemeat balls, lemon.

METHOD.—Remove the bones and tendons (boil the former down for gravy; see recipe Veal Tendons). Flatten the meat with the cutlet bat or rolling-pin, season well with salt and pepper, spread on a thin layer of forcemeat, roll up tightly, and bind firmly with tape. Have ready boiling in a saucepan sufficient stock or water to cover the joint; if water is used, 1 onion, 1 carrot,  $\frac{1}{2}$  a turnip, and a little celery and seasoning should be added when the water boils. Bring to the boil, skim well, and simmer gently for 3 or  $3\frac{1}{2}$  hours, according to size. Meanwhile, prepare the gravy, forcemeat balls, and rolls of bacon. When sufficiently cooked, remove the meat to a hot dish, take away the tapes, and garnish with the forcemeat balls, rolls of bacon, and cut lemon. When the veal is not a good colour a little of the brown gravy may be used to partially mask it, otherwise serve the whole in a tureen.

TIME.—From  $3\frac{1}{2}$  to 4 hours altogether. AVERAGE COST, 10d. per lb. SUFFICIENT, allow 4 lbs. for 5 or 6 persons.

## VEAL, BREAST OF.

INGREDIENTS.—Breast of veal, 2 onions, 2 small carrots, 1 very small turnip, 12 peppercorns, salt, parsley or piquant sauce.

METHOD.—Put the veal into a saucepan with as much cold water as will cover it, bring to the boil, skim well, add the vegetables cut into dice, and peppercorns, salt to taste, cover closely, and simmer gently for  $2\frac{1}{2}$  or 3 hours. To serve, pour a little sauce over the veal and send the remainder to table in a tureen.

METHOD.—Wipe the meat with a clean damp cloth, and cut it into pieces convenient for serving. Melt the dripping in a stewpan, and fry the meat until lightly browned; fry the onion for 2 or 3 minutes, then drain off all the fat. Have ready as much boiling stock or water as will just cover the meat, put it into the stewpan, with the herbs, cloves, mace, allspice, peppercorns, and lemon-rind, add a liberal seasoning of salt, cover closely,

## VEAL BROTH.

and simmer gently for nearly 2 hours. Meanwhile roll the bacon and run a skewer through it, prepare the forcemeat as directed, but make it less moist than when intended for stuffing, shape it into balls the size of a walnut, and either fry or bake them until crisp and brown in a little hot butter or fat; the bacon may be cooked at the same time. When the meat has stewed for 2 hours put in the peas, cook until nearly tender, then add the butter and flour (kneaded smoothly together), in very small portions. Continue the cooking until the peas are ready, then take out the herbs, etc., put in the ketchup, tomato sauce, lemon-juice, season to taste, and serve garnished with the forcemeat balls and rolls of bacon.

TIME.—About 3 hours. AVERAGE COST, 10d. per lb. SUFFICIENT for 6 or 7 persons.

METHOD.—Cut the meat into small pieces, put them with the water into a stewpan, and bring slowly to the boil. Skim, add a little salt, and simmer gently for 1 hour; then add the rice or pearl-barley (the latter must be blanched), and the vegetables cut into dice. When the broth has cooked gently for 3 hours, strain and return to the stewpan. Add the meat to the broth. Carefully remove any fragments of bone from the vegetables and pearl-barley, then return them to the broth. When boiling, sprinkle in the parsley, season to taste, and serve.

## VEAL CHOPS.

TIME.—3 to 3¼ hours. AVERAGE COST, 1s. 2d. to 1s. 3d. SEASONABLE at any time. SUFFICIENT for 4 or 5 persons.

## VEAL CAKE.

METHOD.—Cut the veal and bacon into dice, cut the eggs into sections or slices, and arrange some of them in a pattern on the bottom of the buttered mould; mix the parsley, lemon-rind, flavourings, and seasonings together. Cover the bottom of the mould with a thick layer of veal, on the top of it place a thin layer of bacon, add a few slices of egg, and sprinkle well with the seasoning. Repeat until the mould is full, pour in the warm stock, cover with a greased paper, place the mould in a tin containing water, and bake for about 3 hours in a slow oven. Add a little more hot stock as soon as the mould is taken out of the oven. When cold, turn out of the mould, garnish with tufts of parsley, and serve.

TIME.—To cook, about 3 hours. AVERAGE COST, about 2s. SUFFICIENT for 5 or 6 persons.

## VEAL CHOPS.

INGREDIENTS.—1½ lbs. of loin of veal, crisply-fried rolls of bacon, flour, butter, salt and pepper.

METHOD.—Cut the meat into chops and trim them neatly. Run a skewer through the rolls of bacon, fry them lightly, and keep hot until required. Sprinkle the chops with pepper, fry them in the bacon fat slowly, in order that they may be thoroughly cooked without becoming too brown. Keep the chops hot, drain off any fat that remains

## VEAL CROQUETTES.

in the pan, and add a little butter. When melted, sprinkle in a little flour, brown lightly, and add  $\frac{1}{2}$  pint of boiling water. Season to taste, boil up, and strain. Arrange the chops on a hot dish, pour the gravy over, and garnish with the bacon.

TIME.—To fry, about 20 minutes. AVERAGE COST, 2s. SUFFICIENT for 5 or 6 persons. SEASONABLE at any time.

METHOD.—Chop the meat finely, and boil the bones and trimmings, for the stock. Melt the fat or butter in a stewpan, add the flour, pour in the stock, and stir until it boils (this sauce is intended to bind the mixture, when more convenient an egg may be used instead), boil the sauce 2 or 3 minutes, then add the meat, parsley, lemon-rind, nutmeg, salt and pepper to taste, and stir well over the fire. Turn on to a plate, when cool form into cork-shaped pieces, brush over with beaten egg, coat well with breadcrumbs, and fry until nicely browned in hot fat.

TIME.—From  $1\frac{1}{2}$  to 2 hours. AVERAGE COST, 4d., exclusive of the meat. SUFFICIENT for 4 or 5 persons.

Note.—A properly made croquette or rissole is dry and crisp on the outside, and very moist inside, but the mixture must of necessity be made moderately dry unless the liquid used in its preparation contains the stiffening properties of gelatine, for when it

## VEAL CUTLETS.

lacks a certain degree of firmness it is moulded with great difficulty. All that is required to obtain a moist, in fact, almost liquid rissole, is to add to the mixture a considerable amount of stock that will form a jelly when cold, and when re-heated will again become liquid.

### VEAL, CURRY OF.

INGREDIENTS.—2 lbs. of neck, breast, or fillet of veal, 1 pint of stock or water, 2 ozs. of butter, 1 tablespoonful of flour, 1 tablespoonful of curry-powder, 1 teaspoonful of curry-paste, 1 sour apple, 2 small onions coarsely chopped, 1 teaspoonful of lemon-juice, salt, 4 ozs. of rice.

Lift the pieces of meat on to a plate, sprinkle in the flour and curry-powder, add the onion, and fry gently for 10 minutes. Add the stock, curry-paste, sliced apple, salt to taste; boil, replace the meat, and cook gently from 2 to  $2\frac{1}{2}$  hours. Boil the rice, drain, and dry well. When the meat is tender remove it to a hot dish, season the sauce to taste, add the lemon-juice, and strain over the meat. The rice should be served separately.

TIME.—From  $2\frac{1}{2}$  to 3 hours. AVERAGE COST, 2s. 6d. to 2s. 9d. SUFFICIENT for 5 or 6 persons.

METHOD.—Cut the meat into thin slices, which afterwards trim into neat fillets. Beat the egg, mix with it the parsley, lemon-rind, and a good seasoning of salt and pepper.

## VEAL CUTLETS.

Brush the cutlets over with this preparation, coat them carefully with breadcrumbs, and fry in hot butter or fat until nicely browned. Serve with either tomato or piquant sauce, or, when gravy is preferred, brown a little flour in the fat in the frying-pan, add a little salt and pepper, pour in a  $\frac{1}{4}$  pint of hot water, boil up, and strain.

TIME.—To fry, about 15 minutes. AVERAGE COST, 2s. SUFFICIENT for 5 or 6 persons.

METHOD.—Saw off the chine-bone and the upper part of the rib-bones, leaving the latter about 3 inches long. Divide into cutlets, flatten with a cutlet-bat, trim neatly, and season with salt and pepper. Melt  $\frac{1}{2}$  oz. of butter, add to it the herbs, parsley, lemon-rind, the yolks of eggs, and mix thoroughly. Dip each cutlet in this mixture, and coat with the breadcrumbs. Melt the remainder of the butter in a sauté- or frying-pan, and fry the cutlets until nicely browned on both sides. Drain, dish in a circle, put a frill on each bone, and serve with tomato or demi-glacé sauce.

TIME.—To cook the cutlets, from 15 to 20 minutes. AVERAGE COST, 8d., exclusive of the veal. SUFFICIENT, allow one cutlet for each person.

### VEAL FARCE (For Quenelles, etc.).

Also add about  $\frac{1}{4}$  pint of cold water, but before using the whole, poach a little of the mixture in boiling water to test the consistency; if too soft, add a little more bread; if too stiff, a little more water; shape into quenelles.

### VEAL FILLETS.

INGREDIENTS.—1  $\frac{1}{2}$  lbs. of fillet of veal, a few slices of bacon, 2 ozs. of butter, 1 egg, breadcrumbs, the grated rind of 1 lemon, 1 teaspoonful of lemon-juice,  $\frac{1}{2}$  a teaspoonful of finely-chopped parsley,  $\frac{1}{4}$  of a teaspoonful of thyme,  $\frac{1}{2}$  a pint of tomato sauce, brown sauce, or sauce made with the following ingredients:— $\frac{1}{2}$  pint of white stock,  $\frac{1}{2}$  oz. of flour, 2 tablespoonfuls of cream,  $\frac{1}{2}$  teaspoonful of lemon-juice, a small piece of meat glaze, salt and pepper.

METHOD.—Cut the veal into slices about  $\frac{1}{2}$  an inch in thickness, and each slice into rounds 2  $\frac{1}{4}$  or 2  $\frac{1}{2}$  inches in diameter. Beat the egg, add to it the parsley, thyme, lemon-rind, lemon-juice, dip each fillet in the mixture, coat with breadcrumbs, and fry in hot butter, in a sauté-pan. When nicely browned on both sides take them out of the pan, and keep them hot. Add the flour to the butter in the pan, fry lightly, pour in the stock, stir until it boils, then add the lemon-juice, cream, and glaze, season to taste, and simmer for 2 or 3 minutes. The fillets may be dished in a circle on a border of mashed potato, with the rolls of bacon piled in the centre, or in two

METHOD.—Flatten the meat well with a cutlet-bat or rolling-pin, spread on the forcemeat, roll up and tie securely with tape. Melt the dripping in a stewpan, fry the meat until the entire surface is nicely browned, then drain off the fat. Add the mushrooms, stock, or water, and if using the latter add a little sliced onion, carrot, and turnip, and a good seasoning of salt and pepper. Cover closely, simmer gently for 2 hours, taking care that the stock or water is kept just at simmering point. Meanwhile, melt the butter in a stewpan, add the flour, stir and cook gently until nicely browned, and when ready, add the strained liquor in which the veal has been cooked. Stir until boiling, simmer gently for 10 minutes, then add the lemon-juice, and season to taste. Serve the meat on a hot dish with a little sauce poured over, and the remainder in a tureen.

## VEAL, GATEAU OF.

and slices of egg over the surface, add mace, nutmeg, and cloves in very small quantities, and a liberal seasoning of salt and pepper, and cover with the remainder of the sausage meat. Roll the meat up tightly, wrap it in a pudding cloth, secure the ends with string, put the roll into boiling stock, or into boiling water, to which has been added the veal bones, 1 or 2 onions, 1 or 2 small carrots, 1 turnip, celery, salt, and peppercorns, and cook gently for 3 or 3½ hours. When cooked and nearly cold, take off the cloth, which always becomes loose, re-roll, tie tightly as before, and press the galantine between two boards or dishes until cold. Before serving, brush over with glaze, and garnish with parsley, and, if liked, some fancifully-shaped or coarsely-chopped aspic jelly.

TIME.—From 3 to 3½ hours, to boil the galantine. AVERAGE COST, 1s. per lb.

METHOD.—Grease a round mould or cake tin, and well cover it with browned breadcrumbs. Chop the meat finely, add to it the white breadcrumbs, parsley, lemon-rind, nutmeg, the egg beaten, and as much gravy or milk as will thoroughly moisten the whole. Season rather highly with salt and pepper, press the mixture tightly into the

## VEAL, KNUCKLE OF.

cake tin, and bake in a moderate oven for 40 or 45 minutes. Turn out, pour a little gravy round, and serve the remainder separately.

TIME.—About 1½ hours, altogether. AVERAGE COST, 3d. or 4d., exclusive of the meat. SUFFICIENT for 3 or 4 persons.

METHOD.—Divide the meat into pieces convenient for serving, cut the vegetables into small dice, which put aside, and preserve the trimmings. Heat the butter or fat in a stewpan, fry the meat lightly on both sides, then remove to a plate. Sprinkle in the flour, fry slowly until well browned, then add the stock or water, and stir until boiling. Season to taste, add the vegetable trimmings, put in the meat, and cover closely. Simmer very gently for 2 hours, then remove to a hot dish, strain the sauce over, and garnish with the dice of vegetables, previously boiled separately until tender.

## VEAL, LARDED.

into dice), the herbs, and salt to taste. The ham or bacon should be boiled separately. The veal must be gently simmered for about 3 hours; at the end of 2 hours the rice should be well washed and added to the contents of the saucepan. Remove the meat from the broth, and keep it hot. Take out the bones and bouquet-garni, season the broth to taste, and serve separately. Pour a little parsley sauce over the meat, and serve the remainder in a tureen. Send the ham or bacon to table on a separate dish.

TIME.—About 3 hours. AVERAGE COST, 5s. 6d. to 6s. SUFFICIENT for 6 or 7 persons.

## VEAL, LARDED AND ROAST

INGREDIENTS.—3 lbs. of neck of veal, larding bacon, stock,  $1\frac{1}{2}$  ozs. of butter,  $1\frac{1}{2}$  ozs. of flour, 1 onion sliced, 2 carrots sliced, 1 small turnip sliced, 2 or 3 strips of celery sliced, bouquet-garni (parsley, thyme, bay-leaf), 10 peppercorns, salt and pepper, fat for basting.

METHOD.—Saw the bones across, remove the short ends and the skin, and fold the flap under. Lard the upper surface in close rows. Place the prepared vegetables in a stewpan, add the bouquet-garni, peppercorns, salt to taste, and stock to barely cover the vegetables. Lay the meat on the top, cover with a greased paper, and put on the lid, which must fit closely. Cook gently for 2 hours, adding more stock when necessary. Have ready a baking-tin containing a little hot dripping, put in the meat, baste, and bake gently for  $\frac{1}{2}$  an hour, basting it well. Meanwhile, melt the butter in a stewpan, add the flour, stir and cook gently until the mixture acquires a nut-brown colour, then add  $\frac{3}{4}$  pint of stock, including that from the stewpan in which the veal was braised. Stir until boiling,

simmer gently for a few minutes, and season to taste. Serve the meat on a hot dish, and the sauce in a tureen.

TIME.—About  $2\frac{1}{2}$  hours. AVERAGE COST, 3s. SUFFICIENT for 6 or 7 persons. SEASONABLE at any time.

## VEAL LOAF.

INGREDIENTS.—1 lb. of cold roast veal finely chopped,  $\frac{1}{2}$  lb. of sausage meat, 2 tablespoonfuls of breadcrumbs, a little gravy or stock, 1 egg, salt and pepper.

METHOD.—Mix the veal, sausage meat, and breadcrumbs together, season liberally with salt and pepper, and add the egg. Mix thoroughly, and add gravy or stock gradually until the whole is thoroughly moistened. Form into a short thick roll, cover lightly with flour or, when economy is not an object, coat with egg and breadcrumbs. Bake in a moderate oven for 1 hour, basting occasionally with hot fat, and serve either hot or cold. When served hot, it should be accompanied by good gravy or some suitable sauce.

TIME.—To bake,  $1\frac{1}{4}$  hours. AVERAGE COST, 7d., in addition to the veal. SUFFICIENT for 5 or 6 persons. SEASONABLE at any time.

## VEAL, LOIN OF, BAKED OR ROASTED.

INGREDIENTS.—4 or 5 lbs. of loin of veal, a few slices of bacon, veal forcemeat,  $\frac{3}{4}$  pint of brown sauce, a little meat glaze, lemons.

METHOD.—Bone the veal, season the inside with salt and pepper, fill with forcemeat, and skewer or tie it in the form of a roll. Baste well with hot dripping, cover with a greased paper, and either bake or roast from 2 to  $2\frac{1}{4}$  hours, basting frequently. Meanwhile, boil the bones for stock for the brown sauce.

## VEAL, MINCED.

Half an hour before serving remove the paper from the meat and brush it lightly over with the glaze, drain away all the fat in the tin, but leave the brown sediment. Pour the brown sauce into the tin, return to the oven to finish cooking, and baste frequently. (When economy is not an object, the veal should be basted with cream instead of brown sauce, the cream being afterwards slightly thickened, seasoned and served with the meat.) Roll the bacon, put on a skewer, and fry or bake until crisp, or it may be broiled before the fire, and cut into dice. Remove the meat to a hot dish, garnish with rolls of bacon and cut lemon, or little piles of bacon dice and lemon. Strain the sauce, and serve it separately in a tureen.

TIME.—To cook the veal, 2 to 2½ hours. AVERAGE COST, 10d. to 11d. per lb.

*Note.*—The above recipe is equally applicable to a shoulder or fillet of veal; and a loin of veal is not necessarily boned; a little forcemeat may be inserted, and the remainder made into small balls. The bone of the fillet is nearly always removed, and the cavity filled with forcemeat.

## VEAL, MINCED.

INGREDIENTS.—1½ lbs. of cold veal, 1 pint of white sauce, forcemeat balls, the grated rind of ½ a lemon, 1 teaspoonful of lemon-juice, salt and pepper.

METHOD.—Remove all skin and gristle, cut the meat into very small pieces, but do not chop it. Make the white sauce as directed, add to it the lemon-rind and lemon-juice, season to taste, put in the meat, cover closely, and let it remain in the sauce for ½ an hour WITHOUT BOILING. Serve on a hot dish, garnished with the forcemeat balls and slices of lemon.

## VEAL, NECK OF.

TIME.—To prepare and cook, from 1 to 1½ hours. AVERAGE COST, 1s. 9d. to 2s. SUFFICIENT for 4 or 5 persons.

## VEAL, MINCED, WITH MACARONI.

INGREDIENTS.—¾ lb. of cold roast veal finely minced, 3 ozs. of ham finely minced, 4 ozs. of bread-crumbs, 4 ozs. of macaroni, 2 tablespoonfuls of good gravy, 1 large or 2 small eggs, butter, nutmeg, salt and pepper, gravy.

METHOD.—Mix the veal, ham, and breadcrumbs together, add salt, pepper, and grated nutmeg to taste, moisten with the gravy, and as much beaten egg as is necessary to bind the mixture together. Boil the macaroni in salted water until tender, but not broken, and arrange it at the bottom and sides of a well-buttered mould or basin in some simple form, such as trellis or stripes. Cut the remainder into short lengths, mix them with the meat preparation, and press the whole lightly into the mould or basin. Cover with a greased paper, steam gently for 1 hour, then carefully unmould and serve good gravy, previously made from veal bones and trimmings, separately.

TIME.—To steam, 1 hour. AVERAGE COST, 6d., in addition to the meat. SUFFICIENT for 5 or 6 persons. SEASONABLE at any time.

bones, and fold the flap under, slice the vegetables, put them together with the bouquet-garni, mace, cloves, and 1 oz. of butter into a shallow stewpan, nearly cover the vegetables with stock, and add the remainder gradually to replace that which boils away. Place the veal on the bed of vegetables, cover with a greased paper, put on the lid, and cook gently for 3 hours. Meanwhile, melt the remaining oz. of butter in a small stewpan, add the flour and fry gently until it acquires a nut-brown colour. When the meat is tender, remove it to a hot dish, and brush it over with glaze. Strain the liquor in the stewpan on to the butter and flour, stir until smooth, if necessary reduce with a little stock, add the capers, lemon - juice, season to taste, and serve separately in a tureen.

TIME.—About 3 hours. AVERAGE COST, 3s. 6d. SUFFICIENT for 6 or 7 persons.

## VEAL, NECK OF, STEWED.

INGREDIENTS.—2 lbs. of neck of veal,  $\frac{1}{2}$  pint of white stock, 2 or 3 rashers of bacon crisply fried and cut into dice, 6 small tomatoes, 2 ozs. of butter,  $\frac{1}{2}$  oz. of flour, 1 dessertspoonful of finely-chopped parsley, the grated rind of  $\frac{1}{2}$  a lemon, 1 teaspoonful of lemon-juice, salt and pepper, 2 tablespoonfuls of cream (if liked), meat glaze.

Melt the butter in a stewpan, fry the meat lightly on both sides, then add the lemon-rind, parsley, and a good seasoning of pepper, cover closely, and cook very gently for 2 or 2 $\frac{1}{4}$  hours. The meat must be well basted, and the stewpan stand on a cool part of the stove to avoid burning the butter. Meanwhile,

## VEAL OLIVES.

fry or broil the bacon and cut it into dice; bake or broil the tomatoes until tender, but not too soft. Remove the meat from the stewpan, brush it lightly over with meat glaze, and keep it hot. Have ready the flour mixed smoothly with a little cold stock, and the remainder of the stock boiling in a stewpan, add the moistened flour to the stock, stir and boil for 5 minutes, then strain and add the butter in which the meat was cooked, the lemon-juice, and the cream. Season to taste, bring to the boil, and serve in a tureen. Garnish the dish alternately with little bunches of bacon and tomatoes. When economy is an object, dripping may be substituted for the butter, and the tomatoes and meat glaze omitted.

TIME.—From 2 $\frac{1}{2}$  to 2 $\frac{3}{4}$  hours. AVERAGE COST, 2s. 6d. SUFFICIENT for 4 or 5 persons.

## VEAL OLIVES.

INGREDIENTS.—1 $\frac{1}{2}$  lbs. of fillet of veal, cut in 8 thin slices, an equal number of slices of bacon, veal forcemeat, 1 pint of brown sauce, 1 $\frac{1}{2}$  ozs. of butter, salt and pepper, olives.

METHOD.—The slices of meat and bacon should be about 4 inches long and 3 inches wide. Place a slice of bacon on each piece of meat, spread on a thin layer of forcemeat, roll up tightly, and fasten securely with twine. Melt the butter in a stewpan, put in the olives, and fry until lightly browned. Pour away the butter, add the brown sauce (hot), cover closely, and simmer gently from 1 $\frac{3}{4}$  to 2 hours. When done, remove the strings, arrange the olives in 2 rows on a foundation of mashed potatoes, and strain the sauce over. Or, arrange them in a circle on a border of mashed potatoes, and fill

## VEAL PATTIES.

the centre with purée of spinach, or any other suitable vegetable.

TIME.—To prepare and cook, about  $2\frac{1}{4}$  hours. AVERAGE COST, 3s. 4d. SUFFICIENT, 8 fillets for 6 persons.

## VEAL PATTIES.

INGREDIENTS.—Puff paste. For the mixture: 8 ozs. of lean cooked veal, 2 ozs. of lean cooked ham, 3 or 4 tablespoonfuls of rich stock, 2 tablespoonfuls of cream, 1 teaspoonful of lemon-juice, a pinch of nutmeg, the grated rind of  $\frac{1}{2}$  a lemon, salt and pepper.

METHOD.—Chop the veal and ham very finely, pound it in the mortar with the salt, pepper, nutmeg, lemon-rind, lemon-juice, moisten by degrees with the stock, and when perfectly smooth rub through a fine sieve. Stir in the cream, season to taste, and use. When the paste is ready for the last turn, roll it out to about  $\frac{1}{3}$  of an inch in thickness, and stamp out 8 or 9 rounds with a hot, wet cutter,  $2\frac{1}{2}$  inches in diameter. Brush over with beaten egg, then take a cutter 2 or 3 sizes smaller, dip it into boiling water, and make an incision in the centre of each round, to half the depth of the paste. Bake in a hot oven; when done, remove the tops, scoop out the soft inside, fill with the mixture, replace the tops, and serve. They may be served either hot or cold; if the former, they should first be put into the oven to become thoroughly hot.

TIME.—From 1 to  $1\frac{1}{4}$  hours, after the paste is made. AVERAGE COST, 1s., exclusive of the meat. SUFFICIENT for 8 or 9 patties.

## VEAL POT PIE

INGREDIENTS.—2 lbs. of either raw or cooked veal,  $\frac{1}{2}$  lb. of pickled pork, 1 lb. of potatoes parboiled and thickly sliced, stock made from

## VEAL, POTTED.

bones and trimmings (*see* Veal au Gratin), puff paste, salt and pepper.

METHOD.—Cut the meat into pieces convenient for serving, and cut the pork into thin small slices. Place the veal and pork in layers in a piedish, seasoning each layer liberally with salt and pepper, and  $\frac{3}{4}$  fill the dish with stock. Cover with an inverted dish, cook in a moderate oven for  $1\frac{1}{2}$  hours, and cool slightly. When using cold meat, this preliminary cooking is not necessary. Add stock to replace the loss, place the potatoes on the top, and cover with paste. Bake in a moderate hot oven from 40 to 45 minutes, add more hot stock through the hole in the top and serve (*see* Veal and Ham Pie).

TIME.—To bake, 40 to 45 minutes. AVERAGE COST, 2s. 9d. SUFFICIENT for 6 or 7 persons. SEASONABLE at any time.

## VEAL, POTTED.

INGREDIENTS.—1 lb. of veal finely chopped,  $\frac{1}{4}$  lb. of ham finely chopped, butter, mace, cayenne, salt and pepper.

METHOD.—Place both veal and ham in a buttered jar, add 2 tablespoonfuls of cold water, and tie a buttered paper over the mouth. Stand the jar in a saucepan or tin of boiling water, and cook gently for 3 hours either on the stove or in a moderately cool oven. Pound the meat finely in a mortar, adding gradually the liquor in the jar, and as much oiled butter as is required to reduce the whole to a perfectly smooth paste. Season liberally with cayenne, salt and pepper, add mace to taste, and pass the preparation through a sieve. Press into small pots, cover with clarified butter, and use as required.

TIME.—To cook, 3 hours. AVERAGE COST, 1s. 6d. to 1s. 9d. SEASONABLE at any time.

**VEAL, PRESSED.**

**INGREDIENTS.**—A breast of veal, 1 large onion sliced, 1 carrot sliced,  $\frac{1}{2}$  a turnip sliced, 2 or 3 strips of celery sliced, a bouquet-garni (parsley, thyme, bay-leaf), 10 peppercorns, salt.

**METHOD.**—Remove all bones and tendons, trim neatly, season liberally, roll up lightly, and bind securely with tape. Put the bones and trimmings into a stewpan just large enough to contain the meat, add the prepared vegetables, bouquet-garni, peppercorns, and a good seasoning of salt. Place the meat on the top, add stock or water to the depth of the vegetables, but not enough to touch the meat; cover with a greased paper, and put on a close-fitting lid. Cook very gently for 3 hours, basting frequently, then place the meat between two heavily-weighted dishes, and let it remain until cold. Strain the stock, and on the following day boil it rapidly until reduced to a glaze. Trim the meat to a good shape, brush it over with glaze, and serve as a luncheon or breakfast dish.

**TIME.**—To cook, 3 hours. **AVERAGE COST,** 9d. to 10d. per lb.

**VEAL PUDDING.**

**INGREDIENTS.**—2 lbs. of veal,  $\frac{1}{2}$  lb. of raw ham, bacon, or pickled pork, suet paste, salt and pepper.

**METHOD.**—Cut the meat into rather small neat pieces, and put the bones and trimmings aside. Cut the ham, bacon, or pork into narrow strips; line a well-greased basin thinly with paste, put in the meat, interspersing strips of bacon, and seasoning liberally with salt and pepper. Nearly fill the basin with boiling water, put on a thin lid of paste, and cover with a greased paper (see Beefsteak

Pudding). Place the basin in a steamer, or in a saucepan containing boiling water to half the depth of the basin, and add boiling water as that in the saucepan reduces. Cook for 3 hours, and serve with good gravy made from the bones and trimmings.

**TIME.**—To cook, 3 hours. **AVERAGE COST,** 2s. 6d. to 2s. 9d. **SUFFICIENT** for 6 or 8 persons. **SEASONABLE** at any time.

**VEAL, QUENELLES OF.**

**INGREDIENTS.**—1 lb. of fillet of veal,  $\frac{1}{4}$  pint of good stock, 1 oz. of butter, 2 ozs. of flour, 2 eggs, salt and pepper.

**METHOD.**—Melt the butter in a saucepan, add the flour and the stock, stir and cook until the mixture forms a compact mass round the bowl of the spoon, then put it aside to cool. Pass the veal 2 or 3 times through a mincing machine, or chop it finely. Pound the panada (flour, butter, and stock), and the meat together until smooth. Add the eggs one at a time, season to taste, and pound all well together. Rub the mixture through a wire sieve, and then shape into quenelles. To do this it is necessary to use 2 dessertspoons, or smaller spoonsful if making quenelles for soup. Dip one spoon into boiling water, fill it with the mixture, press it from the sides and raise it in the centre with a knife dipped in hot water, making it a nice oval shape; take another spoon, dip it into hot water, scoop the mixture carefully from the first spoon into the second, and place in a buttered sauté-pan. When all the quenelles are in the pan, pour in sufficient boiling water to nearly cover them; have ready a sheet of greased paper, place it on the top of the quenelles, and cook them gently for about  $\frac{1}{2}$  an hour. Drain, arrange in a circle

## VEAL RAGOÛT.

or straight row, and mask with a good white sauce.

TIME.—To make and cook, from  $1\frac{1}{4}$  to  $1\frac{1}{2}$  hours. AVERAGE COST, 1s. 6d. to 1s. 8d. SUFFICIENT for 4 or 5 persons.

## VEAL RAGOÛT.

INGREDIENTS.—2 lbs. of neck, breast, or knuckle of veal,  $1\frac{1}{2}$  ozs. of dripping,  $1\frac{1}{2}$  ozs. of butter,  $1\frac{1}{2}$  ozs. of flour, 1 onion cut into dice, 1 carrot cut into dice,  $\frac{1}{2}$  a small turnip cut into dice, salt and pepper.

METHOD.—Cut the meat into pieces convenient for serving; heat the fat in a stewpan, fry the meat until lightly browned, then drain off the fat. Cover the meat with hot water, add the vegetable trimmings, and keep the carrot, turnip and onion dice in water until required. Season with salt and pepper, cover with a close-fitting lid, and cook as slowly as possible for 2 hours, taking care to keep the water just at simmering point. Meanwhile, heat the butter in another stewpan, add the flour, and stir and cook slowly until it acquires a pale-brown colour. When the meat is done, strain the liquor, add stock or water to make up  $\frac{3}{4}$  of a pint, and mix with the blended butter and flour. Stir until boiling, season to taste, add the meat, and simmer gently for  $\frac{1}{2}$  an hour. Serve garnished with the vegetable dice, which should be boiled separately.

TIME.—About  $2\frac{3}{4}$  hours. AVERAGE COST, 1s. 8d. to 2s. SUFFICIENT for 4 or 5 persons. SEASONABLE at any time.

## VEAL, RÉCHAUFFÉ, OF.

INGREDIENTS.—1 lb. of cold roast veal, forcemeat, sippets of toast, 1 tablespoonful of coarsely-chopped

## VEAL SALAD.

gherkin or capers,  $\frac{3}{4}$  pint of water,  $\frac{3}{4}$  oz. of butter,  $\frac{3}{4}$  oz. of flour, 1 small onion, 1 blade of mace, lemon-juice, salt and pepper, fat.

METHOD.—Cut the meat into thin slices and put them aside. Place the bones and trimmings in a stewpan with the onion, mace, and a little salt and pepper, and cover with cold water. Simmer gently for at least 1 hour, then strain, and add stock or water to make up the  $\frac{3}{4}$  of a pint. Melt the butter in a stewpan, add the flour, stir and cook slowly until it acquires a pale-brown colour, then add the strained stock. Stir until boiling, add the lemon-juice, season to taste, and put in the meat. Stand the stewpan where the contents will be kept just below simmering point, and let it remain for 1 hour, stirring occasionally. Meanwhile, make the forcemeat as directed, form into small balls, and fry or bake in hot fat until crisp and brown. Place the meat on a hot dish, strain the sauce, season to taste, add the gherkin, and pour over the meat. Garnish with forcemeat balls, and sippets of toast, then serve.

TIME.—About 2 hours. AVERAGE COST, 6d. or 7d., in addition to the meat. SUFFICIENT for 4 or 5 persons. SEASONABLE at any time.

## VEAL SALAD.

INGREDIENTS.— $\frac{1}{2}$  lb. of shredded cold veal, shredded lettuce, endive, 1 tablespoonful of capers or chopped gherkin, lemon-juice, salt and pepper, salad dressing.

METHOD.—Season the meat with salt and pepper, sprinkle liberally with lemon-juice, and put it aside for 1 hour. Add the capers and lettuce, moisten with salad dressing, and serve garnished with tufts of endive.

## VEAL SAUSAGES.

### VEAL SAUSAGES.

INGREDIENTS.—1 lb. of lean veal, 1 lb. of fat bacon, 1 teaspoonful of finely-chopped fresh sage, salt and pepper, sausage skins, frying-fat.

METHOD.—Chop both veal and bacon finely, add the sage and a liberal seasoning of salt and pepper. Press lightly into the skins, prick well and fry in hot fat until nicely browned. If preferred, form into small round cakes, coat with seasoned flour or eggs and bread-crumbs, and fry in hot fat.

TIME.—To fry, 10 minutes. AVERAGE COST, about 1s. 6d. for this quantity.

### VEAL, SHOULDER OF, BAKED.

INGREDIENTS.—A shoulder of veal, a few rashers of bacon (allow 2 to each person), forcemeat, salt, pepper, flour, fat for basting.

METHOD.—Take out the bone (or order it to be sent in already boned). Press the forcemeat tightly inside the shoulder, and fasten the sides with small skewers. Have ready the meat tin, with a sufficient quantity of boiling water in the lower tin, and in the upper 2 or 3 tablespoonfuls of hot fat. Put in the meat, baste well, bake in a hot oven for 10 or 15 minutes, then reduce the temperature by putting in the damper, drawing the fire away, or leaving open the oven door. Baste frequently, and bake gently until the meat is done, the time required depending more upon the thickness of a joint than upon its weight; the rule of so many minutes to each lb. serves as a rough but not absolutely reliable guide in cooking. Meanwhile, prepare the gravy by boiling the bones removed from the meat (*see* Brown Gravy), and a few minutes before the meat is ready to serve roll up the rashers of bacon, put a skewer through them, and bake in

the oven until crisp. To serve, remove the skewers from the meat, place it on a hot dish, garnish with the rolls of bacon, and if liked slices of lemon. A piece of boiled ham or bacon may be substituted for the rolls of bacon. Serve the gravy separately in a tureen.

TIME.—To bake a large shoulder, about 3 hours. AVERAGE COST, from 9d. to 10d. per lb.

### VEAL, SHOULDER OF, STEWED.

INGREDIENTS.—A small shoulder of veal, 12 ozs. of sausage meat, 6 ozs. of veal forcemeat, a few slices of bacon, 2 lemons, 2 tomatoes, 1½ pints of white sauce (made of equal quantities of milk and veal liquor), salt and pepper, 2 onions, 2 small carrots, 1 small turnip, 2 strips of celery, a bouquet-garni (parsley, thyme, bay-leaf), 12 peppercorns.

METHOD.—Bone the veal, flatten it on the table, season well with salt and pepper, spread on half the sausage meat, cover with half the forcemeat, then add the remainder of the sausage meat, and cover with forcemeat as before. Roll up tightly, bind with tape, put it with the bones, prepared vegetables, herbs, and peppercorns into boiling water, boil quickly for 10 minutes, add a little cold water to reduce the temperature, and simmer very gently until done. Remove to a hot dish, pour a little sauce over, garnish with rolls of bacon, and slices of tomato and lemon, and serve the remainder of the sauce in a tureen.

TIME.—Allow 25 to 30 minutes to each lb. of veal. AVERAGE COST, 2s., exclusive of the meat.

### VEAL SOUFFLÉ.

INGREDIENTS.—1 lb. of lean uncooked veal, ¼ pint of white sauce, ¼ pint of double cream, 2 ozs. of

## VEAL, STEWED.

butter, 3 eggs, 1 small truffle, a pinch of nutmeg, salt and pepper,  $\frac{1}{2}$  pint of Béchamel or Suprême sauce.

**METHOD.**—Pass the meat 2 or 3 times through the mincing machine, then pound it in a mortar, adding gradually the butter, white sauce (cold), and 3 yolks and 1 white of egg, one at a time. Season to taste, add a little nutmeg, and when the mixture is perfectly smooth rub it through a fine wire sieve. Whip the cream slightly, whisk the remaining 2 whites of eggs to a stiff froth, and mix lightly with the veal purée. Have ready a well-buttered plain mould, decorated or not, according to taste, with sliced or chopped truffles, put in the mixture, cover with a buttered paper, and steam gently for about 1 hour. Serve with the Béchamel or Suprême sauce round.

**TIME.**—To prepare and cook, from  $1\frac{3}{4}$  to 2 hours. **AVERAGE COST,** 2s., exclusive of the sauce. **SUFFICIENT** for 4 or 5 persons.

## VEAL, STEWED.

**INGREDIENTS.**—2 lbs. of neck or breast of veal, 1 pint of milk, 2 tablespoonfuls of cream, 1 oz. of butter, 1 tablespoonful of corn-flour or flour, 1 small onion, 1 blade of mace, salt and pepper.

**METHOD.**—Cut the meat into pieces convenient for serving, place them in a fireproof stewing pot, season with salt and pepper, add the onion and mace, pour in the milk, cover closely, and cook gently in the oven or on the stove for  $2\frac{1}{2}$  or 3 hours. A few minutes before serving, knead the butter and flour or cornflour smoothly together, divide into very small portions, and stir them into the milk. When flour is used, it must be allowed to cook for at least 10 minutes.

## VEAL TENDONS.

Put the meat on to a hot dish, add the cream to the sauce, season to taste, and strain over the meat. The sauce is never perfectly white, therefore it is better to add 1 or 2 drops of caramel to make it a pale fawn colour.

**TIME.**—From  $2\frac{1}{2}$  to 3 hours. **AVERAGE COST,** 2s. **SUFFICIENT** for 4 or 5 persons.

## VEAL TENDONS.

The tendons of veal are the cartilaginous or gristly portions found at the extremity of the bones toward the thick end of a breast of veal. They may, of course, be dressed with the joint, except when it is roasted or baked. The tendons must first be rendered perfectly tender by long and gentle stewing, and afterwards may be dressed in a variety of ways. They cannot be bought separately, but as they are confined principally to the thicker half of the breast, that part alone should be procured. The meat from which they are removed may be used for many purposes.

## VEAL TENDONS, FRIED.

**INGREDIENTS.**—The thick end of a breast of veal,  $1\frac{1}{2}$  pints of stock, 1 onion sliced, 1 carrot sliced,  $\frac{1}{2}$  a turnip cut into small pieces, 2 strips of celery, a bouquet-garni (parsley, thyme, bay-leaf), 12 peppercorns, egg, breadcrumbs, frying-fat, salt and pepper, tomato or Espagnole sauce.

**METHOD.**—Remove the meat from the tendons, and divide them into pieces about 2 inches square. Put them into a stewpan with the vegetables, bouquet-garni, peppercorns, stock, and salt, and cook very gently for 4 hours. Remove them very carefully from the stewpan, press between two dishes

until cold, then trim them if necessary, coat with egg and breadcrumbs, and fry in hot fat until nicely browned.

TIME.—About 5 hours. AVERAGE COST, 1s. 8d., exclusive of the meat. SUFFICIENT for 7 or 8 persons.

### VEAL WITH PARSLEY SAUCE.

INGREDIENTS.—2 lbs. of fillet of veal,  $\frac{3}{4}$  pint of white sauce, 1 oz. of butter, 1 dessertspoonful of finely-chopped parsley, 1 dessertspoonful of lemon-juice, 1 yolk of egg, salt and pepper.

METHOD.—If the meat is not one compact piece, bind it into a good shape with tape. Melt the butter in a stewpan, fry the meat gently until the entire surface is lightly browned, then add the white sauce and seasoning to taste. Cover closely, simmer gently from 2 to 2½ hours, then take up the meat and keep it hot. Strain, and return the sauce to the stewpan, add the parsley, lemon-juice, and yolk of egg, stir until the sauce thickens, then pour it over the veal, and serve.

TIME.—From 2½ to 3 hours. AVERAGE COST, 3s. SUFFICIENT for 5 or 6 persons. SEASONABLE at any time.

METHOD. — Stew all the above ingredients together in a very little water until they are three-parts cooked. They should be cut into small pieces; then place them in a piedish, cover it with a crust like a meat pie, and bake it until the crust is done. The pie may be made of any vegetables that are in season. A few mushrooms or some mushroom powder are an improvement.

TIME. — To bake the pie, about  $\frac{1}{2}$  an hour. AVERAGE COST, 3d. or 4d., exclusive of the paste. SUFFICIENT for 2 persons.

### VEGETABLE RAGOUT.

INGREDIENTS. — Vegetables as in the recipe for Vegetables, Curry of, 1 pint of good brown sauce.

## VEGETABLE SALAD.

**METHOD.**—Prepare and cook the vegetables according to directions given for Vegetables, Curry of. When cooked and well drained, add them to the brown sauce, in which the sliced tomatoes should already have been simmered for about 10 minutes; allow them to remain in the sauce until thoroughly hot, then serve garnished with croûtons of fried bread, or small shapes of mashed potato (*see* Potatoes, Mashed and Baked).

**TIME.**—From 30 to 40 minutes. **AVERAGE COST,** 1s. **SEASONABLE** at any time.

## VEGETABLE SALAD, MIXED.

**INGREDIENTS.**—1 small cooked cauliflower, 1 small cooked beetroot, 1 small cucumber, 2 or 3 firm cooked potatoes, 2 firm tomatoes, 1 crisp lettuce,  $\frac{1}{3}$  pint of mayonnaise sauce or salad dressing.

**METHOD.**—Divide the cauliflower into small sprays, cut the beetroot and potatoes into fine strips, slice the cucumber and tomatoes. Place all these ingredients in layers in a salad bowl, piling somewhat high in the centre, and season each layer with salt and pepper. Pour over the salad dressing, and garnish with a border of lettuce, previously well washed and dried.

## VEGETABLE SOUP.

**INGREDIENTS.**—2 carrots, 1 turnip, 1 onion, 1 leek, 2 strips of celery, 1 dessertspoonful of finely-chopped parsley, 2 ozs. of butter,  $1\frac{1}{2}$  ozs. of flour, 1 pint of boiling water, 1 pint of milk, salt and pepper.

**METHOD.**—Prepare the vegetables and cut them into strips about the size of a short and rather thick match. Melt the butter in a stewpan, and fry the vegetables very slowly until the butter is absorbed; then add the water,

## VEGETABLE STOCK.

$\frac{3}{4}$  of the milk, salt and pepper, and simmer gently until the vegetables are tender (5 to 10 minutes). Mix the flour and the rest of the milk smoothly together, pour the mixture into the saucepan, stir and cook for a few minutes, then serve.

**TIME.**—To prepare the vegetables, 20 to 30 minutes. To make the soup, 25 to 30 minutes. **COST,** about 5d. **SUFFICIENT** for 4 persons. **SEASONABLE** at any time.

## VEGETABLE SOUP (Vegetarian Dish).

**INGREDIENTS.**—1 small vegetable marrow, 3 or 4 tomatoes, 1 small onion, 4 ozs. of rice, 2 ozs. of butter, 3 pints of water, pepper and salt.

**METHOD.**—Cut the marrow and tomatoes into small pieces, and slice the onion finely. Melt the butter, fry the onion without browning, then add the water and rice, previously washed and drained, boil for 10 minutes, add the vegetable marrow and tomatoes, season to taste, cook gently until the vegetables are tender. Pass the soup through a sieve, re-heat, then serve.

**TIME.**— $\frac{1}{2}$  an hour. **AVERAGE COST,** 7d. to 8d. **SUFFICIENT** for 5 or 6 persons.

## VEGETABLE STOCK.

**INGREDIENTS.**—3 carrots, 2 onions, 1 turnip, 2 tomatoes, 1 stick of celery, 1 head of lettuce, a bouquet-garni (parsley, thyme, bay-leaf), a blade of mace, 12 peppercorns, 2 cloves, 3 ozs. of butter, 2 quarts of water, 1 teaspoonful of salt.

**METHOD.**—Cut the onions, turnips, and carrots into thin slices and the celery into small pieces. Make the butter hot in a stewpan, put in the vegetables and fry gently

## VEGETABLE STOCK.

for  $\frac{1}{2}$  an hour, keeping the stewpan covered. In the meantime, shred the lettuce, and when the vegetables are sufficiently cooked, add it, together with the tomatoes (sliced), herbs, flavourings, seasonings, and water, and bring gently to the boil. Skim off the scum as it rises, then cover and simmer gently for  $1\frac{1}{2}$  hours, strain, and it is ready for use.

TIME.—2 hours. AVERAGE COST, 5d. per quart. QUANTITY, about 2 quarts.

### VEGETABLE STOCK (Vegetarian Dish).

INGREDIENTS.—2 quarts of water, 2 ozs. of haricot beans, 2 ozs. of split peas, 1 onion, 1 carrot,  $\frac{1}{2}$  a stick of celery, parsley, herbs, pepper and salt, 3 cloves, 1 blade of mace.

METHOD.—Boil all the above vegetables, spice and herbs, in 2 quarts of water, for 3 or 4 hours. Skim well; strain it off; it will keep for some time if it is left to stand and poured from the sediment.

TIME.—From 3 to 4 hours. AVERAGE COST, 3d. SUFFICIENT for 4 or 5 persons.

Note.—This may serve as the basis of a good many soups and sauces, just as stock made of meat and bones serves many purposes. All cooks may be assured that if gravy has to be made, and no meat is at hand of which to make it, water in which any vegetables have been boiled (except potatoes) will be better than plain water.

### VEGETABLES, COLD, TO RE-HEAT.

Vegetables may be re-heated in a basin placed in a steamer over a saucepan of boiling water, or they may be fried in a little hot butter or fat. See also Potatoes, Cold, to use up.

## VEGETABLES.

### VEGETABLES, CURRY OF.

INGREDIENTS.—1 small cauliflower,  $\frac{1}{2}$  pint of shelled peas, 2 carrots, 1 turnip, 2 or 3 raw potatoes, 1 onion, a few strips of celery,  $1\frac{1}{2}$  ozs. of butter, 2 tablespoonfuls of flour, 1 tablespoonful of curry-powder, 1 teaspoonful of lemon-juice, 1 or 2 tomatoes, 1 pint of stock, 6 ozs. of boiled rice, salt and pepper.

METHOD.—Divide the cauliflower into small sprays, and cut the carrot, turnip, potatoes, onion and celery into dice. In boiling the vegetables, it is as well to use 2 or 3 small stewpans, and divide them according to the time respectively required. Onion and celery would cook together, also the carrot and turnip, provided the former were given a few extra minutes. They must be drained from the water when about  $\frac{3}{4}$  cooked, otherwise they are apt to break and spoil the appearance of the curry. Melt the butter in a stewpan, add the flour and curry-powder, fry slowly for not less than 10 minutes, then put in the sliced tomatoes and stock, and stir until boiling. Simmer gently for 15 minutes, then rub through a tammy or fine hair sieve, and replace in the stewpan. Season to taste, add the lemon-juice and cooked vegetables, and when thoroughly hot serve in a border of nicely-cooked rice.

TIME.—About 1 hour. AVERAGE COST, 1s. 6d. to 2s. SUFFICIENT for 4 or 5 persons. SEASONABLE at any time.

### VEGETABLES, GARNISH OF, FOR SOUPS AND ENTRÉES.

Vegetables for garnishing simple soups and plain entrées may be cut into dice or matches, but for more elaborate dishes they should either be turned into small balls with a round scoop, or cut into thin

## VEGETABLES, MIXED.

slices and afterwards stamped out by means of a fancy cutter. Carrot and turnip should either be boiled separately, or the former should be slightly cooked before adding the turnip, which requires longer cooking.

### VEGETABLES, MIXED, OR MACE-DOINE FOR GARNISH.

**INGREDIENTS.**—Equal quantities of carrots, turnips, peas, salt.

**METHOD.**—Wash and scrape the carrots and turnips, shape them round or oval by means of special cutters sold as vegetable scoops. Boil them and the peas separately in salted water until tender, then drain well, and use as required. Asparagus points, flageolets, sprays of cauliflower, French beans, cut into diamonds, all may be used in addition to the above.

### VEGETABLES, TINNED

(See Peas, Tinned, to Dress).

Follow the directions given, but omit the mint.

### VEGETABLES, TO BOIL.

The time vegetables take to boil depends on their age. Young vegetables with tender fibres will, as a rule, cook in about 20 minutes, whereas those fully matured, and consequently containing a relatively larger amount of fibrous substance, will average no less than 40 minutes. The colour of green vegetables may be preserved by adding a little soda to the water in which they are boiled. The discoloration is due to hard water holding in solution a certain amount of lime, which is destroyed by the addition of a little soda, thereby softening the water and preserving the colour of the vegetables. As soon as the vegetables are sufficiently cooked they should be removed from the saucepan and

## VEGETABLES.

drained, otherwise they absorb water, lose some of their flavour, and become discoloured.

All vegetables should be put into boiling water, to which salt should be added in the proportion of 1 tablespoonful to 2 quarts of water. The salt greatly improves the flavour of the vegetables, and it also raises the boiling point of the water, thus tending to preserve their colour. Plenty of water should be used for green vegetables, and a little soda to soften the water and counteract the hardening effect of the salt. All vegetables must be kept boiling, but Jerusalem artichokes, vegetable marrows, and others of a similar character, must be boiled more gently than cabbage and other greens, otherwise they may break. As soon as the vegetables are sufficiently cooked the water should be drained from them, for some are liable to break, and one and all become watery when kept in the water after they are done. They may, however, be covered with a cloth, and kept hot in a colander placed over an empty iron saucepan for a considerable time without injury.

The long, slow process of stewing is not often applied to green vegetables, for it would destroy their colour, but celery, celeriac, salsify, and cardons are frequently stewed, the method being peculiarly adapted to them when old. Very little stock or water should be used, and the vessel containing these vegetables must be kept closely covered to prevent the escape of the steam, which helps to cook them.

### VEGETABLES, TO RENDER CRISP.

Lettuce, parsley, and other stale green vegetables may be made less limp by pouring over them a considerable quantity of boiling water,

## VELVET CREAM.

After 2 or 3 minutes' immersion they should be well washed in cold water and served immediately.

### VELVET CREAM.

INGREDIENTS.— $\frac{1}{2}$  pint of cream,  $\frac{1}{2}$  gill of water, 1 wineglassful of brandy or sherry, 1 oz. of castor sugar,  $\frac{1}{2}$  oz. of leaf gelatine.

METHOD.—Dissolve the gelatine and sugar in the water, and add the sherry or brandy. Whip the cream stiffly, add to the rest of the ingredients when cool, and mix well. Pour into the prepared mould, and let it stand on ice or in a cold place until firm.

TIME.—From 20 to 30 minutes.  
AVERAGE COST, 1s. 4d. to 1s. 6d.  
SUFFICIENT for 1 small mould.

### VENISON, BROILED (Polish Fashion.

INGREDIENTS.—8 or 10 slices,  $\frac{1}{4}$  inch thick, cut from a leg of venison,  $1\frac{1}{2}$  ozs. of clarified butter,  $\frac{1}{2}$  pint of Velouté or Allemande sauce,  $\frac{1}{2}$  gill of wine vinegar, 1 tablespoonful of meat glaze or meat extract, 12 juniper berries, salt and pepper.

METHOD.—Crush the juniper berries, simmer them for 10 or 15 minutes in the vinegar, then add the meat glaze and sauce, and cook gently for 15 minutes. When ready to use, strain, return to the stew-pan, season to taste, and stir in  $\frac{1}{2}$  oz. of butter. Flatten the slices of venison with a cutlet-bat, and trim neatly. Heat the remainder of the butter in a sauté-pan, and fry the slices of venison quickly until nicely browned on both sides. Arrange them neatly in a hot entrée dish, pour over the prepared sauce, and serve.

TIME.—To fry, from 10 to 15 minutes. AVERAGE COST, 1s. 3d. to 1s. 6d. per lb. SEASONABLE from September to January, but may be bought from June.

## VENISON, HASHED.

### VENISON, CHOPS AND STEAKS OF.

Venison chops are cut from the loin, and a thick slice from the leg is usually served as a steak. They should be grilled over a clear fire, and served with a sauce made of equal quantities of oiled butter, red wine, and dissolved red-currant jelly. See Venison, Broiled Polish Fashion, and Venison Cutlets.

### VENISON CUTLETS.

INGREDIENTS.—Best end of the neck of venison, butter, fresh mushrooms, to each lb. allow  $\frac{1}{4}$  pint of good brown stock or gravy, and 1 oz. of butter, salt and pepper.

METHOD.—Skin and trim the mushrooms, put them into a stew-pan with the butter, gravy, and plenty of seasoning, and stew gently from 35 to 40 minutes, or until tender. Divide the venison into cutlets about  $\frac{1}{2}$  inch in thickness, trim the bones at the end, but let the rest of the fat remain; flatten and pare the cutlets. Brush over with warm butter, season with salt and pepper, and grill over or in front of a clear fire from 20 to 25 minutes, turning occasionally, and brushing over frequently with hot butter. Place a small pat of fresh butter on the top of each cutlet, serve as hot as possible, and send the stewed mushrooms to table separately.

TIME.—About 40 minutes.  
AVERAGE COST, 1s. 6d. per lb.  
SEASONABLE from September to January.

### VENISON, HASHED.

INGREDIENTS.—Remains of roast venison, and to each lb. allow 2 ozs. of butter,  $1\frac{1}{2}$  ozs. of flour, 1 glass of port wine, 1 tablespoonful of red currant jelly.

METHOD.—Cut the meat into neat slices, break up the bones, put them, with the trimmings of the meat

and any venison gravy there may be, into a stewpan, cover with cold water, and simmer gently for 1 hour. When water alone is used, a small onion and a bunch of herbs should be added. Melt the butter in a stewpan, stir in the flour, and fry until brown. Add the strained stock, stir until boiling, then put in the meat, wine, jelly, salt and pepper to taste, cover the stewpan closely, and let it stand at the side of the stove for about 20 minutes for the meat to become thoroughly impregnated with the flavour of the sauce, which must not, however, be allowed to boil. Serve as hot as possible, garnished with croûtons of fried or toasted bread, and hand red currant jelly separately.

TIME.—About  $\frac{1}{2}$  hour, after the stock is made. AVERAGE COST, 8d. to 10d., exclusive of the venison. SEASONABLE from September to January, but may be bought from June.

### VENISON, HAUNCH OF, ROASTED.

INGREDIENTS.—A haunch of venison, flour, brown sauce or brown gravy, red currant jelly.

METHOD.—The haunch is the prime part of venison, and its excellence depends greatly on the relative proportions of fat and lean. An abundance of clear, creamy-white fat of close texture may be generally accepted as an indication of the good quality of the meat. The flesh of the buck is more highly esteemed than that of the doe. Venison, like mutton, improves with age, and this can be judged by the condition of the hoof, which in an old animal is deeply cut and rugged, whereas that of a young one has a small and smooth cleft. In cold weather, venison should be allowed to hang for about 14 days in a cool, dry place, but it must be carefully examined every day. The meat round the haunch bone first be-

comes tainted; it is therefore advisable to run a small sharp knife into the flesh; on being withdrawn, if it has an unpleasant smell, the affected parts must at once be washed with warm milk and water, dried thoroughly, and covered thickly with ground ginger and pepper, which must, however, be washed off before cooking. If a little of these condiments be sprinkled on the venison in the first instance, and the meat wiped dry every day, decomposition may be considerably retarded. When ready for use, saw off the knuckle-bone, rub well all over with clarified fat or dripping, and enfold in a well-greased paper. Make a stiff paste of common flour and water, put it over the joint, cover with another well-greased paper, and tie securely with string. Roast in front of a clear fire or in a moderate oven from 3 to 4 hours, according to size, and baste frequently. Within  $\frac{1}{2}$  an hour of serving, remove the paper and paste, dredge lightly with flour, and baste well with hot butter until the joint acquires a good brown colour. Serve as hot as possible, as the fat quickly cools and hardens, and send the brown sauce or gravy and the red currant jelly to table separately. The best end of the neck of venison, boned and rolled, makes an excellent dish, but other parts are not often roasted, the neck and shoulder being considered better adapted for stews, pies, and pasties.

AVERAGE COST, 1s. 6d. per lb. SEASONABLE, buck venison from June to the end of September; doe venison from October to January.

### VENISON (Chafing Dish Cookery).

INGREDIENTS.—1 lb. of venison, the juice of 3 small onions, 1 egg, 1 oz. of butter, flour, 1 teaspoonful of finely-chopped parsley, nutmeg, salt and pepper.

METHOD.—Pound the peeled,

## VENISON, NECK OF.

sliced, and blanched onions in a mortar until reduced to a pulp, place this in muslin, and press out the juice with the back of a wooden spoon. Remove all skin, fat, and gristle from the meat, chop it finely, and mix with it the onion-juice, parsley, and a pinch of nutmeg. Stir in the egg, season to taste, form into flat cakes the size and shape of a fillet, and coat them lightly with flour. Heat the butter in a chafing-dish, put in the steaks, and fry gently for 10 minutes, turning them once. Place the cover on the chafing-dish, continue to cook gently for 5 minutes longer, then serve.

TIME.—To cook the steaks, about 15 minutes. AVERAGE COST, 2s. SUFFICIENT for 3 or 4 persons. SEASONABLE from June to January.

## VENISON, NECK OF, TO ROAST.

Cover the top of the jar with 2 or 3 thicknesses of buttered paper, press the lid down tightly, and cook in a moderately cool oven for 2 hours. Drain well, chop finely, pound in a mortar until smooth, moistening the preparation gradually with gravy, and pass it through a wire sieve. Season to taste, press into

METHOD.—Peel, core, and chop the apples finely, and mix with them the suet, breadcrumbs, flour, peel, cherries, and sugar. Beat the eggs well, add the jam, cream, and brandy; when well mixed, stir them into the dry ingredients, and beat well. Pour into a well-buttered mould, cover with the buttered paper, and steam from  $1\frac{1}{2}$  to 2 hours. Serve with a suitable sauce.

through a sieve, stir it lightly into the rest of the ingredients, and add milk by degrees until the mixture drops readily from the spoon. Now whisk the whites of eggs stiffly, stir them in as lightly as possible, and pour the preparation into a well-buttered Yorkshire pudding tin. Bake in a moderately hot oven for about 20 minutes, let it cool, split in halves, spread thickly with jam, replace the parts, and press lightly together. Cut into finger-shaped pieces, arrange them in groups of 3, letting the layers cross each other, sprinkle liberally with castor sugar, and serve.

METHOD.—Chop the meat finely or pass it twice through a mincing machine. Add the parsley, herbs, a little nutmeg, salt and pepper, mix well, and moisten with 1 whole egg and 1 yolk. Divide the preparations into equal portions, and shape them neatly, giving them the appearance of rather large fillets of beef, and roll them lightly in flour. Peel and slice the onions, divide the larger slices into rings, and if onions are liked, cut the smaller slices into large dice, fry them in a little hot butter, and when well drained add them to the brown sauce. Fry the prepared fillets in a little hot butter until nicely browned, and sufficiently cooked, then drain and keep them hot. Coat the onion rings with flour, dip them into white of egg,

## VIENNA PUDDING.

then again into flour, and fry in a wire basket in hot fat until crisp and lightly browned. Serve the steaks garnished with the onion rings, pour a little sauce round, and send the remainder to table in a sauce-boat.

Heat the milk, add sufficient caramel or burnt sugar to make it a deep, nut-brown colour, then pour it on to the well-beaten yolks of eggs, stirring meanwhile. Mix the bread dice, sugar, sultanas, peel, almonds, and lemon-rind well together, add the sherry and prepared milk, etc., cover, and let it stand for 1 hour. When ready, turn the mixture into a well-buttered mould, steam for about 2 hours, and serve with German custard, arrow-root, or other suitable sauce.

## WAFFLES.

METHOD.—Mix all well together, and use as required.

TIME.—About 5 minutes. AVERAGE COST, 4d. or 5d.

## VINEGAR.

The best vinegar comes from France, and is made from white wine. Ordinary vinegar is made chiefly from malt, cheap wine, and cider, by a long process whereby acetic acid is produced. Any of these vinegars may be used to form the base of chili, tarragon, or eschalot vinegar, the ingredients from which they take their name being steeped in the vinegar until the desired flavour is imparted. An inferior variety of vinegar is distilled from wood, but it is somewhat lacking in flavour and consequently considered suitable only for pickling purposes. Vinegar serves many useful purposes in cookery: it enters largely into the composition of many sauces; and greatly assists in softening the fibres of tough meat. Vinegar is also an antiseptic; and, taken in small quantities, it promotes digestion by stimulating the organs engaged in the process into greater activity; but if taken in excess it is highly injurious.

## WAFFLES (American Recipe).

INGREDIENTS.—1 cupful of butter, 3 cupfuls of sugar, 3 eggs,  $\frac{1}{2}$  teaspoonful of saleratus,  $\frac{1}{2}$  a nutmeg grated,  $\frac{1}{2}$  a teaspoonful of salt, 1 teaspoonful of milk, flour.

METHOD.—Beat the butter, add to it the sugar, nutmeg, salt, saleratus, previously dissolved in the milk, and the eggs. Beat well, add

## WAFFLES.

ing gradually as much flour as will make a thick batter. Heat the waffle-iron, rub it over with butter, put in about 2 tablespoonfuls of the batter, and cook over a sharp fire.

TIME.—To cook, from 8 to 10 minutes. AVERAGE COST, 1s. 2d. to 1s. 4d. SUFFICIENT for 8 or 9 persons. SEASONABLE at any time.

### WAFFLES MADE WITH YEAST (American Recipe).

INGREDIENTS.—Flour, 1 pint of warm milk, 1 tablespoonful of fresh yeast, 1 oz. of butter,  $\frac{1}{2}$  a nutmeg grated,  $\frac{1}{2}$  a teaspoonful of salt, 3 eggs.

METHOD.—Beat the eggs well, add the yeast, milk, butter melted, nutmeg, salt, and as much flour as will make a light batter. Cover and let it remain in a warm place from  $2\frac{1}{2}$  to 3 hours. Cook as directed in recipe for Waffles or Wafers.

TIME.—Altogether, about 4 hours. AVERAGE COST, 9d. SUFFICIENT for 7 or 8 persons. SEASONABLE at any time.

### WAFFLES OR WAFERS.

INGREDIENTS.—1 quart of milk, 6 eggs,  $\frac{1}{4}$  lb. of butter, 2 ozs. of distillery compressed yeast, salt, flour.

METHOD.—Beat the eggs, and melt the butter; then dissolve the yeast in a little of the milk, mix all together, then add in sufficient flour to make a nice, smooth, thin batter. Set this to rise, and bake in waffle-irons, which may be obtained at an ironmonger's.

TIME.—10 to 15 minutes. AVERAGE COST, 1s. 3d. SUFFICIENT for about 3 dozen wafers or waffles.

### WALLABY, ROASTED (Austrian Recipe).

INGREDIENTS.—1 wallaby, veal forcemeat, milk, butter.

## WALNUT KETCHUP.

METHOD.—In winter the animal may hang for some days, as a hare, which it resembles; but in summer it must, like all other flesh, be cooked very soon after it is killed. Cut off the hind legs at the first joints, and after skinning and paunching let it lie in water for a little while, to draw out the blood. Make a good veal forcemeat, and after well washing the inside of the wallaby, stuff it, and sew it up. Truss as a hare, and roast before a bright, clear fire from  $1\frac{1}{4}$  to  $1\frac{3}{4}$  hours, according to size. It must be kept some distance from the fire when first put down, or the outside will be too dry before the inside is done. Baste well, first with milk and then with butter, and when nearly done dredge with flour and baste again with butter till nicely browned.

TIME.—2 hours.

### WALNUT CREAM ICE (See Pistachio Cream Ice).

Omit the spinach greening, and, if preferred, substitute vanilla essence for the noyau.

### WALNUT GRAVY (for Vegetarian Dish).

INGREDIENTS.— $\frac{1}{2}$  pint of vegetable stock, 2 tablespoonfuls of walnut ketchup, salt and pepper.

METHOD.—Make the stock as directed, strain, season to taste, add the walnut ketchup, and serve. The colour may be improved by the addition of a few drops of caramel.

TIME.—Altogether, 1 hour. AVERAGE COST,  $1\frac{1}{2}$ d. to 2d.

### WALNUT KETCHUP.

INGREDIENTS.—100 green walnuts, 1 quart of good vinegar, 3 ozs. of salt, 4 ozs. of anchovies, 12 finely-chopped shallots,  $\frac{1}{2}$  a stick

## WALNUT SAUCE.

of finely-grated horseradish,  $\frac{1}{2}$  a teaspoonful each of mace, nutmeg, ground ginger, ground cloves, and pepper, 1 pint of port.

**METHOD.**—The walnuts must be very young and tender. Bruise them slightly, put them into a jar with the salt and vinegar, and let them remain for 8 days, stirring them daily. Drain the liquor from them into a stewpan, add to it the rest of the ingredients, simmer very gently for 40 minutes, and when cold strain the preparation into small bottles. Cork them closely, cover with melted wax, and store in a cool, dry place.

## WALNUT SAUCE.

## WHEY

(See Curds and Whey, Lemon Whey, and White Wine Whey).

## WHITEBAIT.

INGREDIENTS. — Whitebait, ice, flour, cayenne, salt, frying fat.

METHOD.—The frying of whitebait is a most difficult task for cooks with little experience. The following is a well-tryed method which, if carefully followed, never fails to produce satisfactory results: Put the whitebait with a piece of ice in a basin, which must be kept on the ice. When required for cooking, spread the fish on a cloth to drain, then sprinkle a clean cloth with flour, put a small quantity of whitebait on this, sprinkle over some more flour, fold the cloth and shake it well, holding the ends of the cloth with both hands. Turn the contents into a wire drying basket, and shake it so as to get rid of the superfluous flour. Plunge the basket into a pan of clean, very hot lard, and fry rapidly over a bright fire for 3 or 4 minutes. Keep moving the basket all the time the frying goes on. Take up the basket, shake so as to strain off the fat, and turn the fish on to a cloth or paper; repeat this until all the whitebait are fried. Season with cayenne or black pepper, and fine salt. Dish up on a folded napkin or lace paper, and send the fish to table accompanied with quarters of lemon and thin slices of brown bread and butter.

TIME.—From 3 to 4 minutes.  
AVERAGE COST, 1s. 6d. per quart.

finely-chopped parsley, salad dressing, salt and pepper.

**METHOD.**—Peel and slice the beetroot, slice the potatoes, shred the celery, but not too finely. Arrange the prepared vegetables in separate layers, seasoning each layer with a little salt and pepper. Pour over 4 or 5 tablespoonfuls of salad dressing, sprinkle on the parsley, and serve.

**METHOD.**—Wash and trim the cabbage, cut the leaves into very fine shreds, put them into salted boiling water and cook for 10 minutes; take up and drain. Melt the butter in a saucepan, add the onion and leek (previously peeled, cleaned, and cut into thin slices), cook a little, then add the cabbage, and stir the whole over the fire for a few minutes longer. Moisten with a quart of water, boil, skim, and simmer gently until all the vegetables are tender; season with pepper and salt, add the milk (boiling), put in the sago or rice, and cook for another 20 minutes. Serve with small sippets of toasted bread.

**TIME.**—About  $\frac{1}{2}$  an hour. **AVERAGE COST,** 3d. each. **SUFFICIENT,** allow 2 to 3 or 4 persons. **SEASONABLE** all the year.

## WOODCOCK, ROASTED.

**INGREDIENTS.**—Woodcocks, toast, bacon, butter for basting, good brown gravy, watercress.

**METHOD.**—The skin of these birds is particularly tender, therefore they must be plucked very carefully. They are trussed in the same manner as other birds for roasting, but the head is skinned and left on, the long beak of the bird being passed through the legs and body in place of a skewer. Brush over with warm butter, fasten a thin slice of fat bacon over each breast, and hang them on the spit feet downwards to roast. Put the toast under to receive the drippings from the trail, baste frequently with hot butter, and roast for about 15 minutes, or 4 or 5 minutes less when preferred very much underdone. Serve on the toast, garnish with watercress, and send the gravy to table in a sauce-boat.

**TIME.**—About 15 minutes. **AVERAGE COST,** from 3s. 9d. to 5s. per brace. **SEASONABLE** from August 1 to March 15.

## WOODCOCK TOAST.

**INGREDIENTS.**— $\frac{1}{2}$  lb. of chicken or duck livers, 2 anchovies, 1 oz. of butter, 2 tablespoonfuls of cream, 3 yolks of eggs,  $\frac{1}{4}$  of a teaspoonful of castor sugar,  $\frac{1}{4}$  of a teaspoonful of paprika or Krona pepper, salt, buttered toast.

Add to them the butter, cream, yolks of eggs, castor sugar, paprika or Krona pepper, salt to taste, and stir in a stewpan by the side of the fire until the mixture thickens. Have ready some buttered toast, pour on the preparation, and serve at once.

**TIME.**— $\frac{1}{4}$  of an hour. **AVERAGE COST,** 1s. to 1s. 3d. **SUFFICIENT** for 6 or 7 persons. **SEASONABLE** at any time.

## WOODCOCK TOAST (Chafing Dish Cookery).

**INGREDIENTS.**— $\frac{1}{2}$  lb. of chicken or duck livers, 2 small Gorgona anchovies,  $\frac{1}{2}$  a teaspoonful of castor sugar, 1 oz. of butter, 3 yolks of eggs,  $\frac{1}{2}$  gill of cream,  $\frac{1}{4}$  of a teaspoonful of spiced pepper (paprika or Krona pepper), a pinch of salt.

**METHOD.**—Wash and clean the livers, removing carefully any gall that may be left on. Drain them in a cloth, and pound in a mortar until quite fine; bone and skin the anchovies, and pound them to a paste. Mix all thoroughly, and add the butter, sugar, and seasoning. Rub through a fine sieve and incorporate the egg yolks and half the above-mentioned quantity of cream. Stir this in a chafing dish until it is sufficiently cooked; have ready a plate with a piece of buttered toast just before serving, add a little more cream and seasoning if needed, pour the mixture over the toast, garnish with fried bread croûtons, and serve.

**TIME.**—15 minutes. **AVERAGE COST,** 1s. 6d. **SUFFICIENT** for 3 or 4 persons. **SEASONABLE** at any time.

## YAMS, BOILED.

### WORCESTER SAUCE.

**METHOD.**—Put all the ingredients into a large bottle, cover closely, and shake well every day for a fortnight. At the end of this time it will be ready for use, but it may be stored for a length of time in well-corked bottles.

**TIME.**—2 weeks. **AVERAGE COST,** 1s. 4d.

### YAMS, BAKED.

**INGREDIENTS.**—Yams, butter, salt and pepper.

**METHOD.**—Wash and dry the yams, bake them in a moderately-hot oven until soft, and serve on a folded napkin. Butter, salt and pepper are the usual accompaniments.

### YAMS, BOILED.

**INGREDIENTS.**—Yams, salt.

**METHOD.**—Wash and peel the yams and let them remain in cold water for  $\frac{1}{2}$  an hour. Cover them with hot water, add a little salt, boil gently until tender, then drain and serve.

Yams may also be steamed, stewed, fried, mashed, curried, baked "au gratin" (see Cauliflower Baked with Cheese), made into rissoles (see Potato Balls), soup, purée, or salad.

## YEAST CAKE.

### YEAST CAKE.

INGREDIENTS.— $1\frac{1}{2}$  lbs. of flour,  $\frac{1}{2}$  pint of milk,  $\frac{1}{4}$  lb. of butter, 3 ozs. of distillery yeast, 3 eggs,  $\frac{3}{4}$  lb. of currants,  $\frac{1}{2}$  lb. of white moist sugar, 2 ozs. of candied peel.

METHOD.—Put the milk and butter into a saucepan and shake it round over the fire until the butter is melted, but do not allow the milk to become very hot. Put the flour and sugar into a basin, stir it to the milk and butter, the yeast dissolved in a little cold milk, and the eggs, which should be well beaten, and form the whole into a smooth dough. Let it stand in a warm place, covered with a cloth, to rise, and when sufficiently risen add the currants, and candied peel cut into thin slices. When all the ingredients are thoroughly mixed, line two moderate-sized cake-tins with greased paper, which should be put 6 inches higher than the tin; pour in the mixture, let it stand to rise again for another  $\frac{1}{2}$  hour, and then bake the cakes in a brisk oven for about  $1\frac{1}{2}$  hours. If the tops of them become too brown, cover them with paper until they are done through. A few drops of essence of lemon or a little grated nutmeg, may be added if this flavour is liked.

TIME.—From  $1\frac{1}{4}$  to  $1\frac{1}{2}$  hours.  
AVERAGE COST, 1s. 6d. SUFFICIENT to make 2 moderate-sized cakes.

### YEAST, TO MAKE.

INGREDIENTS.— $1\frac{1}{2}$  ozs. of hops, 4 quarts of water,  $1\frac{1}{4}$  lbs. of bruised or ground malt,  $\frac{3}{4}$  lb. of flour,  $\frac{1}{2}$  pint of liquid yeast.

METHOD.—Put the hops into a boiler, add the water, put on the lid, and set them over the fire to boil for about  $\frac{1}{2}$  an hour, or until all the hops have sunk to the bottom. Then strain the liquor

## YEAST, TO MAKE.

into a clean wooden bucket, squeeze out the hops and throw them away. Let the resultant liquor stand for 5 or 10 minutes, or until the face can be seen reflected in it, then turn in the malt, stir up well with a clean spoon, cover over, and let it stand until lukewarm, or about  $70^{\circ}$  Fahr. Then put in  $\frac{1}{2}$  pint of yeast and the  $\frac{3}{4}$  lb. of flour, stir it well up with the hand, cover over with a cloth, and let it remain in a warm corner undisturbed for at least 8 hours. At the end of that time give it a good stir up, and strain away the grains, squeeze them dry, and put the whole of the liquor into bottles; after stirring it well up, tie over with string, and keep it in a cool cellar. Half pint of this yeast will be sufficient for about 20 lbs. of flour. When required for use, it is usual to first set what is termed a ferment, as follows:—First wash, clean, and then boil about 2 lbs. of potatoes, without salt; when cooked strain off and turn them into a clean wooden bucket. Take a rolling-pin and pound the potatoes down with it; add about  $\frac{1}{2}$  lb. of flour, and mix it well into the scalding hot potatoes with the rolling-pin; add 1 quart of water, and stir all the ingredients well up together, and when it has cooled down to  $75^{\circ}$  Fahr., shake well, and add  $\frac{1}{2}$  pint of the previously made yeast. Stir well in with the hand, breaking up the potatoes, and then cover over with a clean cloth, and let it stand the same as the yeast, in a warm place to work or ferment. In about 3 hours it will have come up and dropped, and it is necessary, to ensure good bread, that it should drop. Prepare the flour in a large pan, or wooden trough; make a hole in the centre of the flour if the pan is used, and if a trough, at one end, and strain in the ferment or "comp.," add about 3 ozs. of

## YORKSHIRE GINGER CAKE.

salt, or more if liked, and sufficient water to wet the 20 lbs. of flour into dough, knead it well, and leave it as dry as possible; cover it over with a cloth, and leave it to prove in a warm place for about 3 hours, then give it another good kneading over with flour, cover, and prove for another hour. Then turn out to the board, divide into suitable-sized pieces, mould up into loaves, and when nicely proved bake in a moderate oven.

## YORKSHIRE GINGER CAKE.

INGREDIENTS.—3 eggs,  $\frac{1}{2}$  pint of cream, 1 lb. of butter,  $\frac{1}{2}$  lb. of castor sugar,  $2\frac{1}{2}$  ozs. of ground ginger, 2 lbs. of flour, a little salt.

METHOD.—Whisk the eggs thoroughly, add the cream, and beat these together. Put the mixture into a saucepan, stirring till warm; add the butter, sugar, and ginger, carefully stirring over a very moderate fire. When the butter has melted, stir in the flour, adding salt, and make into a paste (the flour must be fine). Roll out the paste and cut it out with a plain round paste cutter on to buttered flat tins, and bake in a moderate oven.

TIME.— $\frac{3}{4}$  of an hour. AVERAGE COST, 2s. 10d. SUFFICIENT for 3 to 4 dozen small cakes.

## YORKSHIRE PUDDING.

INGREDIENTS.—1 pint of milk, 2 eggs, 4 heaped tablespoonfuls of flour, salt, dripping.

METHOD.—Put the flour and a good pinch of salt into a basin, make a well in the centre, break in the eggs, stir gradually, mixing in the flour from the sides, and add milk by degrees until a thick smooth batter is formed. Now beat well for 10 minutes, then add the remainder of the milk, cover, and let it stand for at least 1 hour.

## YORKSHIRE RABBIT.

When ready to use, cover the bottom of a pudding-tin with a thin layer of dripping taken from the meat-tin, and while the tin and dripping are getting thoroughly hot in the oven, give the batter another good beating. Bake the pudding for 10 minutes in a hot oven to partially cook the bottom, or, if more convenient, place the hottest shelf from the oven on the meat stand, and at once put the pudding in front of the fire, and cook it until set and well browned. "Yorkshire" pudding is always cooked in front of the fire; when baked in the oven, the term "batter pudding" is applied to it by the people in the county whence it derives its name.

TIME.—About 40 minutes. AVERAGE COST, 6d. SUFFICIENT for 5 or 6 persons.

## YORKSHIRE PUDDING, BOILED (See Batter Pudding, Boiled).

## YORKSHIRE PUDDING WITH RAISINS (See Yorkshire Pudding).

Sultana raisins or currants may be sprinkled in after the batter has been poured into the tin. This pudding is frequently served with gravy, and, as a rule, before the meat.

## YORKSHIRE RABBIT OR RARE-BIT.

INGREDIENTS.—4 ozs. of Cheshire or Cheddar cheese,  $\frac{1}{2}$  oz. of butter, 3 tablespoonfuls of milk or ale, Worcester sauce or vinegar, mustard, pepper, buttered toast, 2 poached eggs.

METHOD.—Cut the cheese into small pieces, place them in a saucepan with the butter, milk, or ale, add a little made mustard, a few drops of Worcester sauce or vinegar, pepper to taste, stir and cook gently until the mixture resembles

## ZWETSCHEN SAUCE.

thick cream. Meanwhile, prepare 1 slice of buttered toast, trim the edges and cut it in two, and poach the eggs in as plump a form as possible. Pour the cheese preparation over the toast, lay the eggs on the top, and serve quickly.

TIME.— $\frac{1}{4}$  of an hour. AVERAGE COST, about 8*d.* SUFFICIENT for 2 persons. SEASONABLE at any time.

## ZWETSCHEN SAUCE. (Prune Sauce).

INGREDIENTS.— $\frac{1}{2}$  a lb. of French prunes, 1 glass of port or sherry, 1 tablespoonful of lemon-juice, the finely-grated rind of  $\frac{1}{2}$  a lemon,  $\frac{1}{2}$  a teaspoonful of powdered cinnamon, sugar to taste.

METHOD.—Simmer the prunes until tender, in just enough water to cover them. When cool, crack, and preserve the kernels. Replace the

## ZELTLINGER CUP.

fruit and kernels in the stewpan, add sugar to taste, cinnamon, lemon-rind and lemon-juice, cook gently for 10 minutes, and pass through a fine hair sieve. Re-heat, add the wine, and a little water if too thick, and used as required.

TIME.—About 1 hour. AVERAGE COST, 8*d.*

## ZELTLINGER CUP.

INGREDIENTS.—1 bottle of Zeltlinger, 1 glass of sherry or brandy, 1 bottle of soda or seltzer water, 3 or 4 slices of fresh or preserved pineapple cut into sections, the juice and thin rind of 1 lemon, 1 dessertspoonful of castor sugar, or to taste, ice.

METHOD.—Strain the lemon-juice into a large glass jug, add the sugar, lemon-rind, pineapple, wine, a few lumps of ice, and lastly the soda-water. Serve at once.
