The image shows the front cover of an antique book. The cover is bound in a dark reddish-brown leather. The main surface is decorated with a dense, intricate marbled paper pattern. This pattern consists of numerous small, overlapping, teardrop-shaped or scalloped motifs in shades of gold, blue, and brown, creating a shimmering, textured effect. In the center of the cover, there is a white, shield-shaped label with a decorative border. The label contains the following text: "BURRUP, SON & BLIGHT," in a bold, serif font at the top; "Stationers," in a cursive script below it; "12, East Front," in a smaller serif font; and "ROYAL EXCHANGE," in a bold, serif font at the bottom. The spine of the book, visible on the right side, is bound in a similar dark reddish-brown leather and features several raised bands.

BURRUP, SON & BLIGHT,

The following is a list of the names of the persons who have been admitted to the membership of the Society since the last meeting. The names are given in alphabetical order of their surnames. The names of the persons who have been admitted to the membership of the Society since the last meeting are given in alphabetical order of their surnames. The names of the persons who have been admitted to the membership of the Society since the last meeting are given in alphabetical order of their surnames.

REASONS
FOR ESTABLISHING
ST. LUKE'S HOSPITAL
FOR
LUNATICS.

THE advantage accruing to the public, from hospitals in general, is sufficiently proved by their great and increasing number, and the propriety and necessity of a separate establishment for the care of Lunatics, must be obvious from the nature of the accommodation and attendance which such patients require. In the year 1750, a few benevolent persons, having observed that the hospitals then established were not capable of receiving all the patients of this description who applied for relief,—and that by the unavoidable exclusion or delay in their admission, many useful members had been lost to society, either by the disorder gaining strength beyond the reach of medicine, or by the patients falling into the hands of persons utterly unskilled in the treatment of the disorder, or who had found their advantage in

neglecting the means of cure;—That many families (in no mean circumstances) through the heavy expense attending the support of one member thus afflicted, had themselves become objects of charitable relief, and had thereby doubled the load and loss to the public;—That the most fatal acts of violence on themselves, attendants, and relations, had been often consequent on the unavoidable delay in placing those afflicted with this disorder under the care of persons experienced in guarding against and preventing such acts;—That no particular provision had at that time been made by law for the care of lunatics;—That the common parish workhouses were nowise proper for their reception, either in point of accommodation, attendance, or medical assistance; and further, that the joining this to any other hospital, would have deprived it of two of its principal advantages, namely, of being under the immediate inspection and government of its own patrons and supporters, and of introducing more gentlemen of the faculty to the study and practice of this most important branch of it;—they determined to open a subscription for a new Hospital, under the name of ST. LUKE'S HOSPITAL for Lunatics, an establishment which has since enjoyed so large a portion of the patronage and support of the public, that the President and Governors consider it a proof that the Institution has answered the end proposed.

The following pages contain the Rules and Orders for the Government of the Institution, a List of the Governors and Officers of the Charity, with an account of the funds, the report of the Physicians, and Statistical Tables, arranged as follows :—

- At Page 6. Instructions to those persons who may be disposed to become Benefactors to the Charity.

- „ 25. A List of the President, Vice Presidents, Treasurer, and Governors.
- „ 38. A List of the General Committee for the year 1851.
- „ 39. A List of the Physicians and Officers of the Establishment.
- „ 40. An Account of Legacies and Benefactions to the Hospital.
- „ 63. Instructions and Forms relating to the Admission of Patients.
- „ 70. A Statement of the Property of the Hospital.
- „ 72. The Treasurer's Account of Receipts and Payments for the year 1850.
- „ 74. The Report of the Auditors.
- „ 75. A General Account of the number of Patients admitted and discharged.
- „ 77. The Physicians' Report for the year 1850.
- „ 93. Statistical Tables for the year 1850.
- „ 105. Statistical Tables for the last Century.

Benefactions and Subscriptions will be received at
the following Places :

By *Henry Francis Shaw Lefevre, esq.* the Treasurer,
No. 21, Austin Friars.

Messieurs *Fullers & Co.* Bankers, *No. 66, Moor-*
gate-street.

By the Secretary, *at the Hospital.*

And to persons who are inclined to become Bene-
factors by Will, the following form is recommended :

Item. *I give and bequeath unto the Treasurer
for the time being, of an Hospital, called by the
name of St. Luke's Hospital for Lunatics, the
sum of _____ to be raised and paid
by and out of such part of my personal estate and
effects, which by law I may or can charge with the
payment of the same, to be applied towards carrying
on the charitable designs of the Governors of the
said Hospital.*

N.B. Devises of land, or bequests of money
charged on land, or to be laid out in land, are void
by the statute of Mortmain.

RULES AND ORDERS.

I.

THAT every person, except as hereinafter Governors, their qualifications; by payment of Thirty Guineas, or otherwise. excepted, paying (in his own right) to the Treasurer for the time being, for the use of this Hospital, the entire sum of Thirty Guineas or upwards; or being nominated and appointed by the Committee in pursuance of the powers hereinafter given to them; or paying seven guineas at least, and signing an agreement (in a book to be kept for that purpose) to pay seven guineas yearly for the four next succeeding years; or any body corporate paying annually Twenty Guineas or upwards;—shall be admitted a Governor of this Hospital, and receive from the secretary a staff, and a printed copy of the rules and orders; save and except all persons except as to physicians or other officers. acting as physician, surgeon, apothecary, secretary, or any officer of this Hospital receiving salary, during the time they shall respectively act in those capacities.

II.

THAT a general court of the Governors shall Annual General court, and when to be held be held once in every year, viz., on the third

The Quorum of General Courts to be nine. Wednesday in the month of *February*, and at such other times as are hereinafter mentioned; and that every general court shall consist of nine Governors at the least.

III.

What notice to be given of general courts. THAT three days' notice at least of every general court shall be given in the London Gazette, or other public newspapers, and also be sent by the two-penny post, to all Governors residing within its limits, which notice shall contain the business intended to be there brought forward; and no other business shall then be proceeded on, in case the same shall be objected to by twelve Governors then present.

IV.

Who to preside at courts and committees. THAT in all general courts and committees the president, or (in his absence) one of the vice-presidents, or in case no vice-president shall be present, the treasurer shall preside. But in case of the absence of the president, vice-presidents, and treasurer, or of their quitting the chair before the business of such court or committee shall be finished, a president or chairman shall be elected for that time, out of the governors then present.

V.

What questions shall be put to the vote. THAT the person presiding at such respective meetings, shall put to the vote all such questions, as shall be moved and seconded, and no other.

VI.

THAT all questions shall be determined by the majority of governors present, on holding up hands, or by a division, or by a ballot in case the same shall be required by seven or more governors before a division is begun, and such ballot shall be proceeded on immediately.

How questions shall be determined.

VII.

THAT in case of an equality of votes, the person presiding for the time being shall have a double or casting vote.

Casting vote in case of equality

VIII.

THAT in all debates the person speaking shall stand up and address himself to the chair; and no person shall speak more than twice on the same question without leave of the chairman.

In all debates, persons speaking to stand up, &c.

IX.

THAT when two or more offer to speak at the same time, the president or chairman shall direct which of them is to proceed.

When two speak, Chairman to direct.

X.

THAT at the general court which shall be held annually in the month of *February*, one president, six vice-presidents, a treasurer, a general committee, a committee of audit, two physicians, a surgeon, apothecary, and secretary, shall be elected for the year ensuing.

At Annual general court; President, Vice-Presidents, & others to be elected.

XI.

Special general courts; how to be summoned.

THAT the president have power to order special general courts to be summoned as often as he shall think necessary; and in case of his death, or absence, or omission to order a general court within the time hereafter limited, one of the vice-presidents, or the treasurer, at the request of the general committee, (signified by letter from the secretary, containing the reasons for the same) or of any twelve governors, (signified by writing under their hands, containing their reasons for the same) shall order a special general court to be summoned and held within 14 days next after such request; at which court the said letter or writing shall be publicly read.

XII.

The Treasurer, his powers and business.

THAT the Treasurer shall have power to receive all benefactions, annual subscriptions, debts, legacies, and other revenues of this Hospital, and give discharges for the same. That he shall cause books to be kept with such bankers as shall be approved by the general committee for taking in the contributions of well-disposed persons to this charity. That he shall have power to pay such sums as may be ordered by the general committee, and none other, except they shall be under forty shillings. That he shall lay before the committee of audit in the month of *January* a general state of his accounts with their

vouchers. That he shall report at every monthly meeting of the general committee all sums received or paid during the preceding month, that the same may be entered in the several books kept for that purpose. That all securities upon the admission of patients, or for the fidelity and good behaviour of any officer or servant, and all contracts with tradesmen or others, shall be taken and made in the name of the treasurer for the time being. And that he shall have power to summon the general committee to meet as often as he shall see cause.

All securities and contracts to be taken in his name.

XIII.

THAT upon every vacancy in the office of treasurer, physician, surgeon, apothecary, or secretary, the committee shall signify the same by writing to the president, or, in case of his death or absence, to one of the vice-presidents, or to the treasurer, who shall order a general court to be summoned, to meet within fourteen days next after such notice, to declare such vacancy and appoint a time for an election to fill up the same, which shall be within thirty days next after such declaration. And that any person be entitled to vote at any such election at a general court, if he shall have paid £31. 10s. on or before the day of election.

In case of vacancy in the office of treasurer, &c.

How to proceed.

What persons entitled to vote at elections.

XIV.

General committee, of whom to consist.

Quorum of general committee to be five.

THAT the general committee shall consist of the president, vice-presidents, and treasurer for the time being, and of all persons who shall have paid, in their own right, for the use of the Hospital, the sum of one hundred pounds or upwards, and of such thirty other governors as shall be annually elected for that purpose, at the general court to be held in the month of *February*; of which committee five at least shall be necessary to transact business.

XV.

General committee when to meet.

Their power and business.

THAT the general committee shall meet on one stated day in every month, and at such other times as they, the treasurer, or their sub-committee, for the time being shall appoint. And that they shall have power to hire, govern, and discharge the domestic servants of this Hospital, keep the buildings properly repaired, and purchase provisions, furniture, and other necessaries for the same; and also to nominate and appoint as governors the executor or executors of the will of any person who shall have bequeathed to this Hospital any legacy, which may appear to them of sufficient magnitude to require such compliment; and also to admit and discharge patients according to the rules hereafter mentioned; and also to see that the several books

relating to the Hospital be regularly kept, and that all debts, legacies, annual subscriptions, and other revenues of this Hospital, be received and recovered as the same shall respectively become due; and that all just demands upon this Hospital be regularly discharged, at least, once in six months; and in general, the said committee are to make such rules for the management and economy of the Hospital as they shall find necessary, and cause them to be inserted in books to be kept for that purpose; and to propose, for the consideration of the general court, all such matters as shall appear to them conducive to the good of this charity. And further, that when and so often as there shall be more money belonging to the Hospital uninvested than in the judgment and opinion of the said committee it shall be necessary to keep in hand for defraying the current expences of the Hospital, the said committee shall cause so much of the said money as it shall not be necessary so to keep in hand, to be laid out and invested either in the name of the president, vice-presidents, treasurer, and governors of St. Luke's Hospital; or in the names or name of trustees or a trustee for the said institution; and either in some of the parliamentary stocks or public funds of Great Britain, except determinable annuities; or at interest upon real securities, to be made by mortgage of hereditaments situate in England or Wales and not

General committee.

Their power and business.

General com-
mittee.

elsewhere, of a clear and indefeasible estate in fee simple, free from all incumbrances, except quit-rents and other small annual payments; and also that the said committee shall, at discretion, call in and compel payment of any money so lent on mortgage as aforesaid, and sell out and convert into money any of the stocks or funds of this charity, and lay out and invest in manner aforesaid, or otherwise apply for the purposes of the said Hospital the monies to arise by such calling in, selling out, and conversion; and shall take all proceedings which may be necessary for compelling payment of the monies so lent on mortgage, and the interest thereof, and foreclosing the right or equity of redemption of the mortgaged hereditaments.

XVI.

To keep mi-
nutes of pro-
ceedings.

THAT the said committee do keep minutes of their proceedings.

XVII.

To appoint
sub-commit-
tees.

THAT for the more easy dispatch of business, the said committee have power to appoint sub-committees, one of which shall be called the house-committee, who shall meet weekly at the Hospital, and that one or more of such house-

And house
committee.

committee for the time being, shall at least once in every month of their attendance, inspect every part of the Hospital; and that such sub-committees have power, from time to time, to summon the general committee if they shall think proper.

XVIII.

THAT all purchases of provisions, and other materials for the use of this Hospital, shall be made as often as possible by contract. But no contract shall be made in or by which any member of the committee shall be directly or indirectly interested or concerned.

Purchases to be by contract, but not with any member of the committee.

XIX.

THAT the committee of audit shall consist of seven governors, not being of the general committee, and such committee of audit shall audit and examine the accounts relating to this Hospital, which shall be laid before them, made up to the 31st *December* in each year by the treasurer, pursuant to the 12th Rule, and which the same committee shall present, with their opinion of the same, at the general court in the month of *February*, signed by three of them at least.

Auditors, when to be elected, and their business.

Audit of Accounts.

XX.

Physicians of
other Hospitals
not eligible.

THAT no person acting as physician to any other hospital or infirmary shall be qualified to act as physician to this Hospital, unless upon his being elected he shall immediately thereupon declare and agree in writing to decline any further attendance on such other hospital or infirmary within two calendar months, and shall decline the same accordingly.

XXI.

Secretary, his
business.

THAT the secretary shall summon general courts and committees and take minutes of the proceedings thereof, and enter the same in the proper books (together with the names of the governors then present) before the next meeting of such court or committee, when he shall read the same, previous to any other business; and, when confirmed, the same shall be signed by the president, or the chairman for the time being.

XXII.

To keep books.

THAT the secretary keep books, write letters, and do such other business relating to this Hospital, as shall be ordered or directed by the general courts and committees.

XXIII.

THAT no governor, or other person (unless Where personal matters are under consideration. and only so long as he shall be thereto desired) be present at any general court or committee, when any matter relating to himself is under consideration.

XXIV.

THAT any officer or servant, having cause of Complaints how to be made. complaint, shall signify the same in writing, either to the general or house committee.

XXV.

THAT the committee shall have power to Relief to patients on their discharge. relieve any patient, at his or her discharge, with any sum not exceeding twenty shillings.

XXVI.

THAT the physicians shall attend this Hospital Physicians, when to attend. every weekly committee-day, to assist the committee in the admission of patients, and one other day in the week, at two days' distance at least, and as often otherwise as there shall be occasion.

XXVII.

THAT the surgeon shall attend the Hospital Surgeon, when to attend. every weekly committee-day, and as often otherwise as there shall be occasion.

XXVIII.

Resident Apo-
thecary, his
business.

THAT the apothecary shall constantly reside in the Hospital, prepare the medicines ordered by the physicians, and see that they be properly administered; that he shall visit all the patients at least once every day, and such as are sick or under personal restraint twice; and that he shall report in writing to the committee, every Friday, the names of all patients who are taking medicines, and their progress. That he shall keep a book (under the superintendence of the physicians and surgeon) with an account of every patient admitted; the origin and nature of his or her insanity as far as can be ascertained, with the progress and termination of the case; and that such book be also laid before the committee every week. That he shall act and assist in all cases of surgery, when the same shall be necessary; that he shall not, either directly or indirectly, follow any other business than that of the Hospital; that he shall never be absent from the Hospital without leaving word with the steward where he is to be found, nor in general be out after ten o'clock at night; and that he shall be under the direction and control of the general committee.

XXIX.

No physician,
&c. to officiate
for established
physicians, &c.

THAT no physician, surgeon, or apothecary shall officiate in the place of the established

physicians, surgeon, or apothecary, without first obtaining the consent of the general or house-committee.

XXX.

THAT every officer or servant who shall take any fee, gratuity, or reward, directly or indirectly, from any tradesman or other person dealing with this Hospital, patient, or friend of any patient, in respect to any service done, or to be done, shall forthwith be discharged and rendered incapable of being received again into the service of this Hospital.

Officer or servant taking any fee from tradesmen, &c. or friend of Patients, to be discharged.

XXXI.

THAT the rules and orders which relate to the conduct of the officers of this Hospital shall be fairly entered, in a book to be kept for that purpose, in some convenient place, where the governors of this Hospital may have the perusal of the same; and that such rules as relate to the servants be hung up in some conspicuous place in the Hospital.

Rules relating to officers and servants, where to be kept.

XXXII.

THAT every petition (having the necessary certificates annexed) for the admission of a patient, shall be signed by a governor of this Hospital, and registered by the secretary immediately on the delivery of it to him, together with the exact time of such delivery.

Petitions for admission of patients to be registered.

XXXIII.

Patients to be admitted in order, without favor or partiality.

Parish poor patients to be admitted on payment of £4. each.

THAT the patients shall be taken into this Hospital according to the order of time in which their petitions shall have been delivered to the secretary, without favor or partiality. And that every parish poor patient or patient receiving alms or support from any public body or community be admitted upon the payment of £4.

XXXIV.

Sureties' agreement on the admission of patients.

THAT on the admission of every patient, two responsible house-keepers residing within the limits of the two-penny post, (whose names, with their places of abode, shall have been left in writing with the secretary, one day at least before such admission, and who shall have been approved of by the committee) shall enter into an agreement in writing with the treasurer for the time being, in the penalty or sum of £100 to take away such patient within seven days next after notice given to them for that purpose, by the committee or their secretary. And if the patient lives beyond the limits of the two-penny post, the sureties may be housekeepers of the parish in which the lunatic dwells, provided the officiating minister of the parish certifies, in writing, to their respectability. But no governor of this Hospital shall be security for any patient.

No governor to be security.

XXXV.

THAT the patients in this Hospital shall not be exposed to public view.

XXXVI.

THAT a book (intituled the visitor's book) shall be kept in some convenient and public place of the Hospital for the governors to enter complaints of any neglect or misconduct in the officers or servants thereof; which complaints shall be subscribed with the name of the person making the same, to the intent it may be taken into consideration, and redressed by the committee.

Complaints against officers and servants to be entered in a book.

XXXVII.

THAT a charity-box, with two different locks, shall be provided and fixed up in some convenient and public place in the Hospital. That one of the keys be constantly kept by the treasurer, and the other by some member of the committee, and that the money shall not be taken out, but in the presence, or by order of the committee.

Charity box to be fixed up in the Hospital.
Who to keep the keys.

XXXVIII.

THAT no monies, received for the use of this charity, shall be expended in entertaining the general court or committee at any of their meet-

No money to be expended in entertainments

ings. But the necessary charges for their meetings at any other place than at the Hospital, not exceeding forty shillings at any one of such meetings, shall be paid out of such monies.

XXXIX.

Buildings to be plain and substantial.

THAT the buildings and furniture of this Hospital shall be plain and substantial, and without ornament; and that no buildings be erected without an order for that purpose from the general court.

XL.

Rules and orders not to be repealed unless, &c.

THAT none of these rules and orders be repealed but by a general court of governors, in which fifty at least shall be consenting thereto; or the majority of that and the next succeeding general court.

XLI.

Any patient discharged as cured, relapsing within two months, may be immediately received again.

THAT the general committee be empowered to receive again immediately into the Hospital any patient who shall have been discharged cured, in case such patient shall relapse within two months, upon a fresh application and certificates being brought with the patient.

XLII.

No person to be admitted under 12 years of age, or above 70.

THAT no patient be admitted into the Hospital who shall be under the age of twelve, or above the age of seventy years.

XLIII.

THAT the general committee be empowered to take in by rotation such patients as have been, or shall be discharged uncured from this Hospital, (except as after-mentioned) not exceeding in future one hundred, and that each of such patients shall pay after the rate of seven shillings per week; and that no uncured patient be in future received into or kept in the Hospital unless he or she be supplied with decent clothing by his or her friends, or the same be provided by the Hospital on the lowest possible terms, and paid for by the friends.

Committee empowered to take in by rotation patients discharged uncured, not exceeding 100, at 7s. per week, with supply of decent clothing.

XLIV.

THAT no parish poor patient's name be put upon the incurable list, or any patient not already on the list deemed incurable be re-admitted, if he or she shall have become wholly chargeable to a parish after leaving the Hospital.

No parish poor patient to be put upon incurable list, or re-admitted, if after discharge shall have become wholly chargeable.

INSTRUCTIONS

To Persons applying for the Admission of Patients into

SAINT LUKE'S HOSPITAL for LUNATICS, Old Street, London.

RULES RENDERING PATIENTS INADMISSIBLE.

- I. The possession of sufficient means for decent support in a Private Asylum.
- II. Having been Insane more than twelve Calendar Months.
- III. Having been discharged uncured from any other Hospital for the Reception of Lunatics.
- IV. Being troubled with Epileptic Fits, Paralysis of the Insane, or being in a state of Idiocy.
- V. Women with Child.
- VI. Requiring (from disease or debility) the separate attendance of a nurse, the assistance of a crutch, or having a wooden leg.
- VII. Being under the Age of 12, or above 70 years.
- VIII. Being brought not clean, not properly clothed, and not free from infectious disease.

NOTICE. Every Person who, through mistake or misinformation, shall have been received into the Hospital as a Patient, shall be discharged therefrom, immediately on a discovery of any of the above disqualifications.

A Committee of Governors assemble at the Hospital, every Friday morning, (the only day on which Patients are admitted), at Eleven o'Clock precisely, for the purpose of receiving and considering Applications for the admission of Patients to the benefits of this Charity.

✂ The Committee will not sit on Good Friday, nor on Christmas Day when it falls on a Friday, but in either case on the Thursday preceding.

Special }
 Directions. } When the Order, Statement, Certificate of Overseer or Relieving Officer, and the Two Medical Certificates, are properly filled up and signed, the Form must be left with or forwarded to the Secretary, Mr. *George Mence*, at the *Hospital*; and the nearest Relation, or Friend of the Lunatic, must attend the Committee, on the Friday Morning, to state particulars relative to the Patient's Case; and such particulars proving satisfactory, the Committee will forthwith proceed to examine and admit the Patient, if a fit object for the Charity.

N. B. The Form of Application must be sent to the Secretary the day previous to the proposed Admission, and no Patient can be received, unless both the Medical Certificates be signed within the seven days previous to the Admission: in case of urgency the Form of Application may be brought with the Patient on Friday Morning, but in such case it must be delivered at the Hospital by Ten o'Clock at latest, or it cannot be received.

Securities. If the Patient reside within ten miles of London, two substantial Housekeepers must attend at the Hospital, at Eleven o'Clock precisely, on the morning of the day of Admission, to enter into an Agreement in writing, as set forth in the annexed Form, binding themselves in a Penalty of One Hundred Pounds, to remove the Patient from the Hospital when required so to do, by the Committee or their Secretary: but if the Patient reside more than Ten miles from London, the Sureties may be Housekeepers of the Parish in which such Patient dwells, provided the Officiating Minister of the Parish certifies to their respectability, in writing, at the foot of the Agreement.

. It being very important in the treatment of insanity generally, and conducive to the recovery of those afflicted with that distressing malady, that the physical condition of the Brain, as well as the cause of the disorder, should be ascertained, in cases of death,—the Committee have directed that, should a Patient die while in the Hospital, the Medical Officers of the Establishment be authorized to examine the body, unless an objection shall have been made in writing to the Secretary previous to the decease of such Patient.

FORM OF APPLICATION FOR A PRIVATE
PATIENT.

*To the President, Vice Presidents, Treasurer, and Governors
of ST. LUKE'S HOSPITAL for LUNATICS, LONDON.*

ORDER.

* Insert Name of Patient. *I the undersigned hereby request you to receive*
a Lunatic, as a Patient into your Hospital. Subjoined
is a Statement respecting the said*

+ To be signed
by the nearest
Relation or
Friend.

Name †
Occupation (if any)
Place of Abode
Degree of Relationship (if any) or other cir-
cumstances of connexion with the Patient }

insertion of any of the above particulars }

To be signed by the nearest Relation or Friend ; name

Dated this _____ day of _____ 18

I do hereby certify that the above-named
has *not* received Parochial Relief or Alms from his or her Parish.

To be Signed by the Overseer, or Relieving Officer.

I the undersigned, a Governor of SAINT LUKE'S HOSPITAL, desire the said
Lunatic may be admitted if a fit object.

The Medical Gentlemen certifying, must not be in Partnership with each other, nor, in Partnership with, nor nearly related to, the person signing the annexed order: They are required to state the Facts on which their Opinion has been formed, and the Certificates must not have reference to each other.

First Medical Certificate.

* N. B. I being a *
 State whether
 Physician,
 Surgeon
 or Apothecary.
 that I have This Day, separately from any other Medical Practitioner, visited and personally examined the Person named in the accompanying Statement and Order, and that the said is a Lunatic, and a proper Person to be confined, and that I have formed this opinion from the following fact or facts, viz.

Name

Place of Abode

Dated this Day of 18

Second Medical Certificate.

* N. B. I being a *
 State whether
 Physician,
 Surgeon
 or Apothecary.
 that I have This Day, separately from any other Medical Practitioner, visited and personally examined the Person named in the accompanying Statement and Order, and that the said is a Lunatic, and a proper Person to be confined, and that I have formed this opinion from the following fact or facts, viz.

Name

Place of Abode

Dated this Day of 18

N. B. It is indispensably necessary that the Patient be brought to the Hospital for Admission, within seven days from the date of each Medical Certificate, or the Patient cannot lawfully be received; and a Statement of the Patient's Case from one of the Medical Gentlemen who has attended the Patient, should be sent to the Hospital, directed to "Drs. Sutherland and Philp," the Physicians, previous to the admission of the Patient.

AGREEMENT to be signed by Two substantial Housekeepers where the Patient resides more than Ten Miles from London; otherwise they must attend to sign the same at the Hospital when the Patient is brought for admission.

WHEREAS a Lunatic is about to be or has been this day received as a Patient into the Hospital established for Lunatics, known by the Name of SAINT LUKE'S HOSPITAL, on our jointly and severally promising and agreeing to remove and take away the said Patient on being required so to do in manner hereinafter mentioned: NOW we whose names are hereunder written, being Housekeepers in the Parish of _____ in the County of _____

do hereby jointly and severally promise and agree that we, or one of us, shall and will forthwith at our or one of our Costs and Charges, after we, or either of us, shall be thereto required, by Notice in Writing, to be signed by the Secretary for the time being of the said Hospital, remove and take away the said

_____ from the said Hospital; And in Default thereof, we jointly and severally promise and agree to pay to the Treasurer of the said Hospital for the time being, the Sum of One Hundred Pounds on Demand: As Witness our Hands this _____ Day of _____ 18 _____

Here the Sureties sign their names, residences, &c.

NAME.	RESIDENCE.	OCCUPATION.

I, the Officiating Minister of the Parish above-mentioned, do certify that the above two persons are respectable Housekeepers in my Parish.

FORM OF APPLICATION FOR A PAUPER PATIENT.

REPORT OF THE PHYSICIANS
OF
ST. LUKE'S HOSPITAL,

For the Year 1850.

IN laying our Annual Report before the Committee for the past year, we have deemed it expedient to accompany it with Statistical Tables relative to the admissions, discharges, and deaths of patients during the last 100 years, and to give a brief outline of the history of the Hospital.

The original Institution was on the north side of Upper Moorfields, called Windmill-hill, where a mill formerly stood, facing what is now called Worship Street. The estate was leasehold, held of the Corporation of London; and as the accommodations were not sufficiently extensive to receive more than 110 patients, it was deemed most advantageous to suffer the lease to expire, and to seek a larger ground-plot on which a more commodious building might be erected.

The present Institution originated in the benevolent designs of a few gentlemen who saw the necessity of further provision for poor Lunatics; "for"—as it is worded in the original circular—"there is no disease to which human nature is "subject so terrible in its appearances, or so fatal in its consequences; those who are melancholy often do violence to "themselves,—and those who are raving to others, and too "often to their nearest relations and friends, the only persons

“ who can be expected to take the trouble of these unhappy
“ objects upon them.”

In the beginning of June 1750 the above circular was subscribed by several gentlemen, who on the 13th of the same month met together to consider the means of establishing a Hospital for the said purpose.

The subscribers having been considerably increased met a third time on the 12th of September, chose a Committee, and empowered them to take such steps as they should think necessary to forward this good work. A fourth general meeting was summoned on the 10th of October, when an account was opened with Messrs. Honeywood & Fuller, and with Messrs. Drummond, to receive subscriptions for the erection of the present building.

We are glad to chronicle the benevolent feelings of those who a century ago laid the foundation of so noble a Charity; and be it remembered that these same feelings have wrought great changes in our times in the condition and treatment of the poor lunatic. The Hospital, no doubt, was built according to the opinions, possibly the prejudices of those times. Tradition seems to have handed down to our ancestors a monastery as the proper model for a lunatic asylum. The first that was built was at Jerusalem, by the monks of the sixth century; and the long galleries and solitary rooms of Bethlem and St. Luke's seem to point to the corridors and cells of the monastery as their original type; but, however this may be, it is undoubtedly unfortunate that our ancestors had not a better model,—and it ill becomes those who possess the advantages of modern improvements to speak lightly of the efforts of those who were actuated by the same benevolent motives which have effected so much good in ameliorating the sad condition of the insane.

The present building was commenced on the 30th of July 1782; it was erected by voluntary contributions at an expense of about £50,000 upon leasehold ground belonging to St Bartholomew's Hospital; the lease is held for a term of 40 years, renewable every fourteen years on payment of a fine of £200., and at the yearly rent of £200.

It does not appear that boarders, or those deemed incurable, were admitted into the Hospital till 1754; at first only ten were admitted at the rate of 5s. per week, and from that time till the year 1795 the Committee were authorized to admit 110 such patients for the same sum.

We must not omit to quote one clause in the original considerations for the establishment of this Hospital, which is as follows:—"Although the only end proposed was to establish
 " a charity for poor lunatics, in such manner that hereafter
 " all persons who shall be found proper objects may, for the
 " sake of the public as well as themselves, be admitted with-
 " out delay, and (should our success answer our expectations)
 " without expense also. Yet some advantages of a very
 " interesting nature to the good of all mankind certainly will
 " arise in consequence of it; for more gentlemen of
 " the Faculty making this branch of Physic their particular
 " care and study, it may from thence reasonably be expected
 " that the cure of this dreadful disease will hereafter be
 " rendered more certain and expeditious, as well as less
 " expensive. And from the many improvements already
 " made in other arts and sciences, as well as in the several
 " parts of Physic, the same may with reason be concluded in
 " the present instance."

We are filled with much anxiety when we reflect that, while we hold so responsible a trust, we may have failed to do all in our power to advance science, and to aid in carrying

out the intentions of the originators of the Charity. If, however, the proportion of patients discharged cured be any test of an improvement in our knowledge of the treatment of the disease, we might refer to the following Statement of the per centage of Recoveries for the last 30 years.

*Average per centage of Patients discharged Cured from
St. Luke's Hospital.*

From 1821 to 1830	47 $\frac{1}{2}$ per cent.
From 1831 to 1840	56 $\frac{1}{4}$ „
From 1841 to 1850	60 $\frac{3}{4}$ „

But whilst we feel ourselves called upon to give an account of the trust thus reposed in us, we are cheered by the recollection of the many kindnesses which we have received, and of the many advantages we have possessed from the assistance of others. The Committee have always lent a willing ear to any suggestions from us for the improvement of the Hospital; and the Resident Officers of the Establishment have vied with each other in the attention which they have bestowed upon the patients.

It may not be amiss if we give a short abstract of what the Committee have done for the Hospital at the recommendation of the Physicians during the last ten years.

In 1841 the Infirmaries at each end of the Hospital were fitted up for the reception of male and female patients.

In 1842 a Chaplain was appointed to the Institution, and the present chapel was set apart for divine service.

Open fire-places were placed in each of the galleries.

The old method of coercion was abolished; padded rooms were made available for the treatment of the paroxysm; additional attendants were hired; and an airing ground was laid out and set apart for the use of the noisy and refractory patients.

Wooden doors were substituted for the iron gates of the galleries; and the removal of the wire-guards from the windows inside of the galleries added much to their cheerfulness. The windows of gallery F were altered (agreeably to the plan presented) for the better lighting and ventilating the sleeping rooms.

The bars over the doors of the bed-rooms, and the screens outside the windows of the galleries, were also ordered to be removed.

In 1843 the reading rooms for the male and female patients were completed, and a library containing 200 vols. was supplied by the kindness of the Treasurer: an amusement fund was established for the purchase of bagatelle and backgammon-boards and other games for the use of the patients.

In 1845 the Hospital came under the provisions of the Lunacy Act, 8 & 9 Vic. cap. 100. An Act was passed in August of that Year for the Regulation of the Care and Treatment of Lunatics, since which time the affairs of the Hospital have been subjected to a mixed government; to the control of the House Committee and of the General Board of Governors has been added that of the Commissioners in Lunacy.

This form of government, provided there be a mutual good understanding between the governing bodies, is calculated to be eminently beneficial to the patients,—as the Commissioners in Lunacy, from their experience in the practical details of the management of all the asylums in England, have it in their power to afford many valuable suggestions,—and as the Committee is composed of independent and high-minded gentlemen, upon whose shoulders the mantle of the Founders of the Charity has gracefully fallen, and whose only interest in the

Hospital consists in doing the greatest amount of good to the greatest number of patients.

In 1848 the chapel was improved by the presentation of an organ by Sir Charles Knightley, Bart ; and the daily service was recommended to be performed, which has since been continued with much advantage and consolation to the patients.

Gas was this year introduced into the Hospital, which has been not only a great improvement to the galleries, but a great benefit to the attendants and patients.

In 1849 strict inquiries were made relative to the ventilation, drainage, and supply of water to the Hospital, in anticipation of the return of the cholera ; and the pauper burial-ground at the back of the Hospital was closed.

To conclude our summary of the alterations effected by the House Committee, we have to remark that in the past year additional improvements have been carried out, partly by the advice of the Commissioners in Lunacy, and partly by that of the Physicians ; and when Mr. Wyatt's plans have been duly considered, the new laundry built, and the new workshops fitted up, we hope to see, not only a great increase of comfort to the patients, but also some better means of alleviating their disease.

THE MEDICAL TREATMENT.

When the Hospital was first opened for the reception of patients, Dr. Battie was its Physician ; in his time, and in that of Dr. Thomas Brooke, his successor, six Apothecaries supplied the medicines to the patients gratuitously. It would appear from reference to some of the old books that the medical treatment consisted principally in anti-spasmodics and purgatives ; and the patients seem to have escaped the

practice, at one time prevalent in the treatment of lunacy, of being bled and purged periodically every spring and fall. But a time arrived when the Physician appointed to the Hospital had no faith in medicine in the treatment of insanity, but relied chiefly upon moral treatment, upon good diet and exercise, and upon the occasional use of purgatives for effecting a cure; and we find by referring to our Tables that the average per centage of recoveries during this period, *i. e.* from 1791 to 1800, was $11\frac{1}{2}$ per cent. lower than between 1831 and 1840. This fact alone, without reference to any other considerations, would have been sufficient to have convinced us of the importance of attending to the medical treatment of the patients confided to our care; and we are of opinion that the moral treatment being the same, and other things being assumed equal, the number of recoveries will advance *pari passu* with the improvement in our knowledge of the pathology and medical treatment of the disease.

The medical treatment of Insanity was not neglected by those who immediately preceded us. Dr. Warburton was the first physician in this country who prescribed morphia to allay the irritation of the nervous system, and to procure sleep. This medicine has been considered by some as a specific in all cases of insanity. In our opinion the choice of any remedy, more especially that of a sedative, is not unimportant; opium, stramonium, belladonna, henbane, hemlock, ether, &c., have each their peculiar effect upon the nervous system; and it is not even a matter of indifference whether opium or its salts are prescribed. If, therefore, we were to be reduced to the employment of one medicine only as a specific for all cases, we should consider that we were going back to those times when insanity was supposed to be cured by hellebore, or to the dark ages when it was treated by exorcism.

The principles of our medical treatment have been so recently published in the Report of the Commissioners in Lunacy that we need not dwell any longer upon this subject. We will only add that in 1848 we took advantage of the assistance of Dr. Parker, who officiated in the absence of the resident medical officer, to ascertain the effect of the inhalation of ether and chloroform in the treatment of insanity. As Dr. Parker is in the habit of exhibiting these substances in operations at the London Hospital, we felt that his great experience gave us an opportunity of testing their influence; and we will give very briefly the conclusions we have arrived at upon this subject.

1. The same caution is requisite in the selection of patients in administering ether and chloroform, as in all other cases.

2. The inhalation of these substances arrests the paroxysm of mania, and sometimes procures sleep, but does not appear to have any curative influence upon the disease.

3. The only patients who have derived any decided benefit from inhalation, have been those labouring under acute dementia, when ether was prescribed as a stimulant.

4. Ether and chloroform, although beneficial in epilepsy, are injurious in cases of epilepsy complicated with insanity.

5. One case only of puerperal mania has been admitted into the Hospital after the inhalation of chloroform during parturition, and it is fair to state that the patient had had a previous attack after a former labour when chloroform was not administered.

6. The inhalation of ether and chloroform has been recommended where patients obstinately refuse their food. Our experience of the effect under such circumstances is very limited, but not unsatisfactory.

PUPILS.

In 1753 a law was passed for the admission of pupils to the Hospital, and Dr. Battie permitted medical men to observe his practice. In 1843 this law was revived, and a course of Clinical Lectures is given annually at the Hospital to pupils who are selected by the Physicians of the Metropolitan Hospitals, and who are allowed to attend the Course gratuitously.

MORAL TREATMENT.

The moral treatment of our patients is based upon those benevolent principles which have been so humanely endeavoured to be carried out at other Asylums. We believe that the only question which can now arise is by what method the insane can be treated in the most humane manner. We should, however, be deceiving the profession and the public if we were to say that the result of our experience leads us to the belief that restraint can be abolished with advantage to the patient in all cases, and under all circumstances. But in saying this we distinctly repudiate the notion of encouraging by our example any return to the cruel method of treatment which was formerly practised in this and in other countries; and we assert that we feel no sympathy with those who employ restraint merely for the purpose of saving trouble to themselves and attendants. There is no general rule without its exceptions, and we conscientiously think that there are some exceptions to the total abolition of coercion, not only in private practice where there are no means and appliances at hand for the treatment of the paroxysm, but even in asylums also. The exceptions to our general rule of the non-employment of coercion in the Hospital amount according to the daily report to two in 100.

The chief burden of the moral treatment falls upon the resident officers of the establishment ; and we take this opportunity of thanking them for carrying out our wishes with so much zeal and discretion in endeavouring to soothe and amuse the patients. It is very gratifying to see the influence of occupation and amusement upon the minds of the patients. We have observed some of the incurables, whose intellect appeared almost gone, gradually to become more interested in their employment,—their minds have acquired a certain amount of vigour,—and an expression of intelligence has lit up their countenance. The amusements also have tended to reconcile those who, although incurably insane, are well able to appreciate kindness. Balls are given in the Hospital once a fortnight ; the male and female patients meet in the centre corridor, which is fitted up for the occasion as a ball-room,—and we are glad to find that they not only enjoy themselves in singing and dancing, but that they also behave with the utmost decorum.

These gratifications, when not carried to excess, or made a vain display of, are calculated to do much good ; they not only are the source of much enjoyment, but create harmony and good feeling between the attendants and the patients.

But that which we consider to be the chief and most important part of the moral discipline of the Hospital, is the daily attendance of the officers and of a certain number of the patients in the chapel, when a portion of the Liturgy is read, and where the practical duties of christianity are taught by our worthy Chaplain, and where God's blessing is called down upon our mere human efforts.

With regard to occurrences of the past year, we are glad to be able to report that, with the exception of 1842, a greater

proportion of patients was discharged cured than in any previous year; forty-four males and sixty-nine females have been sent out as recovered, being in the proportion of $69\frac{1}{2}$ per cent. We are happy also to state that four boarders, from the class of patients deemed incurable, were in the same year discharged cured.

We refer to the Statistical Tables for the details of the number of cases admitted, discharged cured and uncured, and of the number of deaths, and to the tables relative to the period of residence in the Hospital, the domestic condition of the patients, their hereditary predisposition to the disease, &c. To these have been added some useful tables relating to the admission and discharge of patients for the last 100 years, which were commenced by our late apothecary Mr. Barnes, and which have been continued by our present Steward Mr. Walker, who deserves our best acknowledgments for his assistance. We have to thank Mr. Arlidge for his analysis and table of the relative weights of patients on their admission and discharge, and also for his statement of post-mortem appearances.

We are happy to say that the health of the patients has been generally speaking good; no epidemic disease has visited the hospital,—there has been no instance of suicide,—and no accident has occurred to any of the patients, a circumstance which reflects much credit on the resident officers. With regard to atmospheric influence upon the disease, it is well-known that sudden variations in the temperature and weight of the air exert a powerful influence upon all nervous disorders. The mild winter has been especially favourable to all our patients suffering under, or having a tendency to, paralysis. The effect of a thunder-storm upon the patients is sometimes very marked; this last year, however, the thunder-

storm of April 12th produced no apparent effect upon any of the patients.

There are a few cases of special interest to which we may be permitted to refer. In the past year a mother and her two daughters were under treatment in the Hospital at the same time; the daughters have been discharged cured, but the mother still remains. A father and his son were admitted on the same day, viz., May the 3d; the former was sent out cured July 26th, the latter December 13th.

We subjoin a short history of the four boarders who were discharged recovered, one of whom has unfortunately relapsed.

J. C., a female, æt. 34, was admitted as a boarder May 8th, 1835, having been previously discharged as uncured September 19th, 1828. She was sent out cured September 27th, 1850; the disease, therefore, existed 23 years.

M. P., a female, æt. 46, was admitted as a boarder March 10th, 1837, having been previously discharged uncured October 26th, 1821. In August 1847 and in July 1848, she had epileptic fits; but notwithstanding these she became so well that we did not consider it right to detain her any longer in the Hospital. She was therefore discharged September 27th, 1850, the disease in this case having existed upwards of 30 years. She relapsed about a month afterwards, and was re-admitted December 13th, 1850.

S. L., a female, æt. 49, was admitted as a boarder January 5th, 1849, having been discharged as uncured November 21st, 1845. She was sent out cured September 27th, 1850, the disease having existed upwards of six years.

J. B., a male, æt. 50, was admitted as a boarder October 20th, 1837, having been discharged as uncured October 8th, 1830. He was sent out cured September 27th, 1850, the disease having existed upwards of 20 years.

In conclusion, we beg to add a list of those gentlemen who have held the office of Physician to the Hospital from its foundation, together with the dates on which they were respectively appointed:—

WILLIAM BATTIE, M.D., October 31st, 1750.

THOMAS BROOKE, M.D., April 19th, 1764.

SAMUEL FOART SIMMONS, M.D., November 8th, 1781.

ALEXANDER ROBERT SUTHERLAND, M.D., March 16th, 1811.

JOHN WARBURTON, M.D., May 19th, 1829.

ALEXANDER JOHN SUTHERLAND, M.D., March 25th, 1841.

FRANCIS RICHARD PHILP, M.D., June 22nd, 1842.

We have the honour to be,

Gentlemen,

Your obedient Servants,

A. J. SUTHERLAND, M.D., Oxon, F.R.S.

1, Parliament Street.

F. R. PHILP, M.D., Cantab.

Kensington House.

February 12th, 1851.

TABLE

OF THE

POST MORTEM APPEARANCES

OF

Patients who died during 1850.

APPENDIX No. I.—TABLE OF POST-MORTEM APPEARANCES.

Name.	Age.	Sex.	Mental Malady.	Duration of Malady.	Mode of Death.	Date of Post-mortem Examination.	General Appearances of Body.	Scalp.	Cranium.	Membranes.	Cerebral Substance.	Thorax.	Abdomen.
J. G.	23	Male.	Melan- cholia.	Four Months.	Exhaus- tion	12 hours.	Consi- der- able emaci- ation.	Contained but little blood. Was easily sepa- rable.	Of moderate thickness. Ra- ther flattened at its summit. Forehead low Occipit. spine very slightly developed but prominent.	Dura mater healthy— firmly adherent to the cranial bones, except the os frontis. Pac- chionian bodies large & numerous. Arach- noid thickened, tough, and opaque, with numerous granular points.	Blood vessels of the surface very full; op- posite sides of the longitudinal fissure adherent at many points. Serum in the ventricles above the average amount.	Heart healthy. Lungs congested; right lung adherent firmly to the ribs. The lower lobe of the right lung pre- sented several small abscesses, like those of purulent infiltra- tion.	Stomach healthy. Liver large, of a bright reddish brown colour. Gall bladder distended with a very dense black bile of the consistency of treacle. Kidneys and intes- tines healthy.
M. B.	45	Fem.	Melan- cholia.	Six Weeks.	Exhaus- tion	20 hours.	Strong and well-formed Complex- ion dark. A general de- ficiency of subcutane- ous fat.	Contained but little blood.	Rather thick.	Dura mater thick and strong. Arach- noid more or less opaque, both over the summit and base. Pia mater very vas- cular. Pacchionian bodies numerous and large.	Grey matter rather more red than usual. Numerous bleeding points on the section of the white sub- stance. In the ex- amination of the brain 3oz. of serum escaped.	Some old and but slight adhesions at the base of the lungs. Heart healthy, not enlarged.	Liver large, with some venous conges- tion. Gall bladder large, containing 4oz. of nearly black and viscid bile. Trans- verse colon crossing a little below the um- bilicus.
H. P.	42	Fem.	Mania.	Eight Months	As- phyxia	12 hours.	Delicately and well- formed. Skin pale.	Thin, hold- ing much serum and venous blood.	Thin.	Dura mater not thick. Arachnoid opaque, both over the summit and base of the brain.	Grey matter pallid, its lamina thin. 6 oz. of bloody serum es- caped in the examina- tion of the brain.	Contained much fluid. Pericardium very fatty, adherent to the pleura. Heart very large: double its natural size. Walls of the ventricles very thick. Semilunar valves healthy. Tri- cuspid and mitral valves thickened, al- most cartilaginous. Left lung very small, much compressed by the large heart, and pleuritic effusion. Right lung pale and firmly adherent.	Right lobe of liver reached below the umbilicus. Gall blad- der large, contain- ing thin orange coloured bile. Other viscera heal- thy.

APPENDIX No. I.—TABLE OF POST-MORTEM APPEARANCES—continued.

Name.	Age.	Sex.	Mental Malady.	Duration of Malady.	Mode of Death.	Date of Post-Mortem Examination.	General Appearance of Body.	Scalp.	Cranium.	Membranes.	Cerebral Substance.	Thorax.	Abdomen.
T. M. T.	31	Male.	Mania.	Two Months	Coma.	60 hours.	Fair, anemic low. Decomposition had proceeded rapidly, discoloring the surface generally.	Very thick, congested with venous blood, very separable from the cranium.	Of moderate thickness.	Dura Mater but Pachionian bodies few and small. Arachnoid generally opaque. Veins of Pia Mater much congested.	Lamina of grey matter thin, its median white band (Foville's) indistinguishable. Cerebral matter soft. White matter injected. Lateral ventricles large, each containing $\frac{1}{2}$ -oz. of serum. No particular congestion about the metulla oblongata.	Posterior part of right, and the greater part of the left lung adherent. Lungs venously congested: this with the progress of decomposition gave them a nearly black colour large — collapsed; walls thin; valves healthy.	Liver of full size, and of a leaden hue. Bile thin, orange coloured. Stomach large. Other viscera healthy.
M. S.	56	Fem.	Melancholia.	Nine Months	Syncope.	32 hours.	Complexion sallow, dusky, great emaciation	Very thin, readily separable, bloodless.	Thin, pitted along the sagittal suture by the Pachionian bodies.	Dura Mater normal not morbidly adherent. Arachnoid more or less opaque over both the summit and base: its opacity over the former greater, as usual, in the course of the great veins.	Firm: grey substance of natural tint. Some bleeding puncta on section of the white matter, but these few and small. Ventricles contained but little fluid.	Some condensation of the anterior part of the upper lobe of the right lung.	Liver small, of a purplish colour, full of blood. Bile thin. Other viscera healthy.
E. B.	54	Fem.	Melancholia.	Twenty Months with a brief intercid interval. Since that interval Eight Months	Coma.	27 hours.	Considerably wasted. Complexion sallow and dusky.	Thickness moderate; separability natural, with little blood.	Thick and dense, especially so the occipital bone	Dura Mater not abnormally adherent nor thickened. Arachnoid generally opaque. Pachionian bodies not numerous nor large. Sinuses not congested. Some ossific deposit in the large arteries.	Cortical substance freely supplied with blood, and of rather a deep colour. Numerous bleeding points on section of white matter; consistence firm. Choroid plexus occupied with cysts. Each ventricle contained half-an-ounce of serum.	Lungs extensively adherent: with a considerable deposit of carbonaceous matter in their tissue: some portions condensed, as in lobular pneumonia. Heart healthy. Pericardium contained one ounce and a half of serum.	Liver not enlarged. Gall bladder with little bile, and that thin and not very dark. Other viscera healthy. Contained in the layers of the mesentery were several masses, larger than peas, of so-called earthy matter.

APPENDIX No. I.—TABLE OF POST-MORTEM APPEARANCES—continued.

Name.	Age.	Sex.	Mental Malady.	Duration of Malady.	Mode of Death.	Date of Post Mortem Examination.	General Appearance of Body.	Scalp.	Cranium.	Membranes.	Cerebral Substance.	Thorax.	Abdomen.
M. R.	40	Fem.	Mania.	Five Months Second attack	Syncope.	20 hours.	Complexion fair and clear. Considerable emaciation.	Of moderate thickness, with little blood.	Of moderate thickness.	Dura Mater separable without difficulty, healthy. Pachionian bodies small, not numerous. Opacity of arachnoid evident over the base, but scarcely observable over the summit. Dura Mater firmly attached; its veins engorged. 3 ounces of blood escaped in removing the brain. Arachnoid with a general milky opacity, and increased tenacity. Pachionian bodies few & not large.	Grey matter natural in appearance and colour. General consistency firm. Each lateral ventricle with about 2 drms. serum. Numerous bleeding punctae. Choroid plexus with cysts. Not very firm. Grey matter not deeply coloured; its median band distinguishable. Numerous and large venous punctae on cutting the white substance. Lateral ventricles, each with 2 ounces of serum. Choroid plexus congested, and occupied with cysts. The venous congestion extended to the spinal cord.	Lungs healthy—adherent at only a few points. Heart healthy with however a rather thick left ventricle, & a reticular aortic semilunar valve. Pericardium with 2 drachms of serum. Right lung partially, and left universally adherent; adhesions old and firm; upper lobe of right lung puckered, not consolidated; congested throughout; upper lobe of left with a tubercular cavity, the size of an orange, with dense cartilaginous walls; below it a large portion consolidated by tubercle; the rest congested. Heart large; tricuspid valve rather imperfect.	Liver healthy; gall-bladder with a little thin orange-brown bile. Other viscera also healthy.
T. S.	37	Male.	Mania.	Eight Months	Asphyxia.	24 hours.	Not wasted. Well developed. Complexion fair and clear.	Thin, congested with venous blood easily separable.	Rather thin.				Liver large but healthy; gall-bladder with a little orange-coloured bile. Stomach and intestines healthy. Kidneys very large: their section also presenting a nutmeg-like appearance.
E. A. G.	23	Fem.	Acute Dementia.	Fifteen Months	Asphyxia.	38 hours.	Complexion fair, florid. No emaciation.	Thin—readily detached, containing considerable venous blood.	Thin, but osseous tissue dense, diploe almost absent and the cranium partially diaphanous at many places. Internal plate much undulated.	Dura Mater natural: some opacity of the arachnoid over the summit; much more over the base, where it was thick & tough. The meshes of the Pia Mater occupied by a deposit of lymph organized and dense generally, but softer and almost gelatinous over and behind the optic commissure.	Cortical matter deeply coloured, its median band distinct. Convolutions rather shallow. White matter very firm. Lateral ventricles very large, nearly filled with fluid; so also the third ventricle. Choroid plexus with cysts. Above 4 ounces of serum escaped during examination.	Anterior surface of lungs anomic; posterior rather congested from position. Left lung with numerous consolidated tubercular masses, and its upper lobe with two or three cavities. Only a few scattered tubercular masses in the right lung. Heart small; walls thin, valves healthy.	Abdominal viscera healthy. Gall-bladder nearly full of thin orange-coloured bile.

APPENDIX No. I.—TABLE OF POST-MORTEM APPEARANCES—continued.

Name.	Age.	Sex.	Mental Malady.	Duration of Malady.	Mode of Death.	Date of Post-Mortem Examination.	General Appearance of Body.	Scalp.	Cranium.	Membranes.	Cerebral Substance.	Thorax.	Abdomen.
D. H.	32	Male.	Monomania. (Melancholic.)	Twelve Months.	Asphyxia.	40 hours.	Strong and well made. Complexion fair.	Very thick and elastic. Congested.	Of moderate thickness. Osseous tissue dense.	Dura Mater rather firmly adherent. Its veins and sinuses distended with blood. Opacity of Arachnoid not very marked, but general. Pia Mater congested.	Grey matter well coloured. Median white band distinct. Convulsions good. Surface of brain resting upon the roof of the orbit peculiarly concave. Consistence firm. Numerous bleeding points on surface of its anterior portion. Lateral ventricles with 3 drachms of serum each. Choroid plexus congested, with many cysts. Two ounces of blood escaped during examination of the brain.	Right lung not cre-pitant from great con-density. Left lung less congested. Pleu-ritic adhesions gen-eral, but old. Heart large—mus-cular. The depres-sion of its anterior surface and its trans-verse fissure loaded with fat. Valves healthy.	Abdominal viscera healthy.
M. A. N.	36	Fem.	Monomania.	Five Years.	Asphyxia.	22 hours.	Very deformed. Great curvature of the spine, to the right in the thorax, and for-wards in the abdomen. Decompo-sition very rapid.	Thick—ve-nously con-gested—easily se-parable.	Head large. Bones very thick; os frontis $\frac{1}{2}$ inch, os occi-pitis $\frac{1}{4}$ inch at the spine, which was not promi-nent. Asym-metrical.	Veins of Dura Ma-ter filled with venous blood. Pacchionian bodies large and nu-merous. Arachnoid opaque over summit and base, and also tough. Pia Mater congested, thickened and strong. 4 ounces of blood escaped during ex-amination.	Anterior lobes flat-tened and concave on under surface. Pos-terior lobes deficient, imperfectly overly-ing the cerebellum. Convulsions few, but sulci very deep and tortuous—chiefly posteriorly. Each la-teral ventricle with 2 drachms of fluid. Numerous bleeding punctae. Choroid plexus congested with cysts.	Its capacity much contracted by the spinal deformity, which encroached particularly on the right side, the lung being but a small flat-tened viscus; whilst the large heart intru-ded much on the space for the left lung, a-long with the contor-tion of the chest on that side. Both lungs congested. Heart large, healthy. Peri-cardium with 2 oz. of serum.	Liver large, and together with the stomach thrust up-wards beneath the sternum and ribs by the bulging portion of the lumbar part of the spine. Cæcum large—very much distended. Kidneys healthy—flattened in front. The gall blad-der contained two large yellowish white calculi, sinking in water.

APPENDIX No. I.—TABLE OF POST-MORTEM APPEARANCES—continued.

Name.	Age.	Sex.	Mental Malady.	Duration of Malady.	Mode of Death.	Date of Post-Mortem Examination.	General Appearance of Body.	Scalp.	Cranium.	Membrane.	Cerebral Substance.	Thorax.	Abdomen.
H. G.	44	Feu.	Mania.	One Month. Second attack.	Coma.	3½ hours.	Well formed. Not wasted. Complexion dark.	Of natural thickness; slightly congested.	Rather asymmetrical; Bone thin, cancellous, not dense.	Veins and sinuses of dura mater rather congested. Dura mater naturally separable. Copious serous effusion in the meshes of the pia mater, which, when viewed through the arachnoid, appeared like a soft gelatinous layer covering the hemispheres. Pia mater thickened and tough. Arachnoid opaque and thickened over the summit and base.	Grey matter not highly coloured. General consistence firm. But few and not large bleeding punctae on section. Lateral ventricles with 2 or 3 drachms each of serum. Choroid plexus with cysts, not congested. 3 to 4 ounces of sero-sanguineous fluid escaped during examination of brain.	Lungs very healthy, with no adhesion, and crepitation throughout. Heart of full size; not particularly fatty; both sides contained much blood. Mitral valve thickened on its margin.	Liver healthy; colour reddish-brown Gall-bladder half full of thin orange coloured bile. Intestines healthy. Kidneys particularly small; the right had a small abscess on its convex (dorsal) aspect just beneath the fibrous capsule; the left had at a similar part a slight depression and thickening of the capsule, but no abscess. Cortical substance dense.

APPENDIX No. II.

THE
 REPORT OF THE PHYSICIANS
 OF
 ST. LUKE'S HOSPITAL,

For the Year 1851.

THE Physicians have much satisfaction in laying their Annual Report before the Committee of St. Luke's Hospital, as in the present year the per centage of recoveries is higher than it has been in any previous year. It will probably be in the recollection of the members of the Committee that the average per centage of recoveries

From 1821 to 1830 was $47\frac{1}{2}$ per cent.

From 1831 to 1840 was $56\frac{1}{2}$ „

From 1841 to 1850 was $60\frac{2}{3}$ „

The per centage of recoveries during the last 10 years was as follows:—

1841	60.91	1846	57.60
1842	70.37	1847	56.11
1843	60.82	1848	56.38
1844	50.00	1849	64.33
1845	62.22	1850	65.69

In the present year, however, the per centage has been 74.01.

It will be seen by referring to the Tables, that the recoveries of the male patients were in the proportion of

63.08 per cent, and that those of the females were equal to 80.36 per cent.

While thus recording this unusually large proportion of recoveries, it becomes us to acknowledge that there have been circumstances in the past year which may have given an impulse to such a result, more especially among the female patients. The Centenary Anniversary undoubtedly attracted much attention, and the interest which was manifested in its success among the Governors was communicated to the Officers of the Charity. This probably animated the curiosity and stimulated the energies of the patients. Those who watch the manifold associations which, either for good or for evil, influence the diseased mind, know well how to appreciate such emotions, and to direct them into a proper channel; and it is not too much to say, that some of the recoveries which have been noted in the past year, may with justice be attributed to the knowledge which the patients acquired of the exertions which were being made in their behalf. The chord of hopes long past may have been touched, the germ of sympathies long buried may have been quickened, and if so, how ample is the reward of those who have endeavoured to ameliorate the condition of the inmates of the Charity, when they reflect that, by God's blessing upon their labours, more than the usual proportion among the patients have been restored to their happy home. It is with deep feelings of gratitude that your Physicians have to record the alterations and improvements which have taken place during the past year in the Hospital, as carried out by Mr. Wyatt. The arrangements, when completed, will undoubtedly add much to the comfort of the patients, and we trust will also add to the means which we already possess of treating their disease.

We therefore take this opportunity of saying, how highly

we appreciate the efforts of the Committee, in carrying out the present alterations at so much labour and expense.

We now turn to the subject of the Certificates of Insanity, respecting which much inconvenience has arisen.

In consequence of the frequent occurrence of inaccurate and insufficient statements of Medical Men signing certificates of insanity for the admission of patients into the Hospital, the Physicians brought the matter before the Weekly Committee, and having duly considered the subject, we beg to lay before the Committee the following Instructions for the consideration of the Medical men who sign the certificates, which Instructions it is proposed to print and forward with the admission paper.

Instructions for the Medical men who are called in to sign certificates of insanity for the admission of patients into St. Luke's Hospital.

“ The Physicians of St. Luke's Hospital beg most respectfully to call the attention of the Medical man, who is required to sign a certificate of insanity, to the following extracts from the 45th and 46th sections of the Act 8 and 9 Vict., cap. 100:—

SECT. XLV.—Provides that the Medical Gentlemen certifying must not be in partnership with each other, and that each of them, shall separately from the other have personally examined the person to whom it relates not more than seven clear days previously to the reception of such person into such house or Hospital; and shall have signed and dated the same on the day on which such person shall have been so examined.”

The Medical Gentlemen must not be in partnership with, nor nearly related to the persons signing the order for admission.

SECT. XLVI.—“ Provided always, and be it enacted, that every
 “ Physician, Surgeon, or Apothecary, signing such certificate,
 “ shall specify therein any fact or facts (whether arising from
 “ his own observation, or from the information of any other
 “ person) upon which he has formed his opinion that the
 “ person to whom such certificate relates is a lunatic or an
 “ insane person, or an idiot, or a person of unsound mind.”

The fact or facts referred to in the latter section,
 as indicating insanity, must be derived from the
 following symptoms:—

- 1st. Those of the Intellect.
- 2nd. Those of the Affections.
- 3rd. Those of the Overt Acts.
- 4th. Those of the Physical Condition.

Examples of the 1st are—delusions of the mind—incoherence in the conversation—weakness and fatuity of the intellect—with failure of memory. Of the 2nd—alteration and perversion of the affections, without adequate cause. Of the 3rd—evidence of the patient being dangerous to himself or to others—an alteration in the conduct and manner—inattention to, and unconsciousness of, the common decencies of life—wandering from home without object or motive—tearing and burning clothes—destroying furniture—paroxysms of maniacal violence. Examples of the 4th are—emaciation and exhaustion from the refusal of food—thickness and hesitation of the speech—with tremor of the upper lip—and tremor of the muscles of the arms and legs—asynchronous action of the pupils—occasional attacks of faintness—a succession of sleepless nights, and acceleration of the pulse co-existing with the disorder of the mind.

We now come to the more pleasing duty of making mention of the exertions of the resident officers of the establishment in behalf of the patients. It is to the great interest which they feel in their anxious and laborious duties that we owe the improvement in our moral treatment. By Mr. Arlidge's skilful and unobtrusive labours many weeks have elapsed without any of the patients being subjected to mechanical restraint; and the praise bestowed upon the Matron by the graphic pen of one of the most popular authors of the day, is most deservedly earned.

"St. Luke's is indeed her home, and its inmates her afflicted children."

The balls, the library, and the different occupations and amusements of the patients, fall more immediately under the superintendence of the resident officers; and we therefore take this opportunity of saying how efficiently they have laboured in the various departments allotted to each.

The weekly average number of patients attending Divine service has been greater this year than the last; and it will probably be greater still in subsequent years, as the accommodation in the chapel recently erected is so superior to the old building appropriated for the purpose. Our worthy chaplain devotes himself to this holy work with much zeal and discretion—a task of no small difficulty—for in insanity the higher faculties of the intellect, and the better feelings of the heart, are generally suspended; and it is necessary to warn those who associate with the insane, to take care lest they should imperceptibly be induced to lower their standard of responsibility, and suffer themselves to imitate in any degree the uncontrolled passions of those whose disease renders them irresponsible, while at the same time it is essential to recal the healthy affections of the patient, to soothe his fears, to correct his desires, and to avoid stimulating his imagination, already too active.

We have more especially to notice the accuracy with which Mr. Arlidge and Mr. Walker have drawn up the Analyses and Statistical Tables.

These tables will in future years possess a high value when sufficient data have been collected to enable the physician (by the inductive process of reasoning) to arrive at satisfactory conclusions; and we therefore hope that they will be steadily persevered in, and reported year by year.

With regard to cases of special interest, we have to report that the three boarders who were discharged on trial, September 27th, 1850, have continued well, and the Physicians therefore consider that sufficient time has now elapsed to enable them to place these cases upon the Table of Recoveries, in order that the vacancies may be filled up from the uncured list.

The poor woman who before her admission into St. Luke's, was attacked by an ox, and who prevented its goring her by holding it by the horns, has unfortunately been discharged uncured. This case has been alluded to by the eloquent author of the paper upon St. Luke's Hospital, recently published in the "Household Words," whose observations are well deserving of careful notice. "Despite," he says, "the large amount of cures effected in the Hospital, testifying to the general efficacy of the treatment pursued in it, I think that if the system of finding the inmates employment, so successful in other hospitals, were introduced into St. Luke's, the proportion of cures would be much greater."

This undoubtedly is the great problem which we have to solve. We can supply amusements, but it is very difficult to find occupation for the male patients, as any one will easily understand who will glance at the Table of their previous occupations.

This subject has occupied the attention of the Committee

and of the Physicians, for many years past ; when any employment has been introduced, if compulsory, it has partaken too much of the nature of prison discipline, and has been on that account abandoned ; and if voluntary, the patients have neither had inclination nor energy to pursue it long : but although we have had many disappointments in the introduction of occupation, our efforts have not been entirely fruitless. In our report last year, we stated that “ It was gratifying to see the influence of occupation and amusement upon the minds of the patients. We have observed some of the incurables, whose intellect appeared almost gone, gradually to become more interested in their employment, their minds have acquired a certain amount of vigour, and an expression of intelligence has lit up their countenance.”

We trust, that when the additional arrangements for the occupation of patients shall have been completed, the proportion of cures will be greater, but we fear that it cannot be “ much greater ” than 74 per cent.

We conclude our Report with the touching words of the author above alluded to, the chief aim and object of whose writings appears to be the amelioration of the condition of his fellow creatures, whether in poverty or in sickness :—
 “ Wonderful things have been done for the blind, and for the deaf and dumb ; but the utmost is necessarily far inferior to the restoration of the senses of which they are deprived. To lighten the affliction of insanity by all human means, is not to restore the greatest of the Divine gifts, and those who devote themselves to the task do not pretend that it is ; they find their sustainment and reward in the substitution of humanity for brutality, kindness for maltreatment, peace for raging fury ; in the acquisition of love instead of hatred ; and in the knowledge that, from such treatment,

“ improvement, and hope of final restoration will come, if
“ such hope be possible. It may be little to have abolished
“ from mad-houses all that is abolished, and to have substi-
“ tuted all that is substituted. Nevertheless, reader, if you
“ can do a little in any good direction—do it. It will be
“ much some day.”

TABLE
OF THE
POST MORTEM APPEARANCES
OF
Patients who died during 1851.

TABLE OF POST-MORTEM APPEARANCES.

Name.	Age.	Sex.	Mental Malady.	Duration of Malady.	Concomitant Bodily Affections.	Mode of Death.	Date of Post-mortem Examination.	General External Appearances.	Scalp.	Cranium.	Weight of Brain.	C E R E B R A L.		Thorax.	Abdomen.
												Membranes.	Substance.		
W. B.	51	Male.	Chronic Dementia. Total mental Atony.	32 Years.	Great Anemia; Diarrhoea.	Syncope from exhaustion.	18 hours. — in Jan.	Body well developed; not emaciated; very pale.	Bloodless; not wasted; not readily separable.	Large, rounded, oval. Bones of moderate thickness but of increased density.		Dura Mater almost bloodless; yellowish on its cerebral surface from serum in the sub-arachnoid tissue. Pacchionian bodies few; not large. Arachnoid opaque generally. Serous infiltration in meshes of Pia Mater, which was tougher than usual. Choroid very pale, without distinct cysts. Four ounces of serum, almost unmixed with blood, escaped.	Very anomic; consistency increased. Grey matter, scarcely distinguishable from white, from its great paleness. White substance, peculiarly pearly and glistening. Bleeding puncta almost wanting. Lateral ventricles large.	Not examined.	Not examined.
J. S.	38	Male.	Mania.	3 Months.	Phthisis, Pneumonia; great aneurism; granular kidneys.	Apnoea and exhaustion.	47 hours. — in Jan.	Body well developed; rather fat; pale, sallow.	Very thick and fatty; with little blood.	Symmetrical; elongated posteriorly. Bones dense, not thick.		Dura Mater firmly adherent: sinuses rather empty. Pacchionian bodies large not numerous. Arachnoid generally rather opaque, and tougher than normal. Pia Mater thick & tough, especially over Pons Varolii. About the origins of 7th and 8th nerves of each side, was a collection of fibrous circular corpuscles, processes from the Pia Mater. Choroid with many and large cysts.	Consistence firm: fibrous structure very distinct. Grey matter pale. Its chief white band very prominent. Puncta few.	Right lung adherent at apex and base. Pleura enormously thickened on right side, especially its costal layer. Vomica in apex of right lung, with tubercular condensation about it: lung elsewhere congested or hepatized. Apex of left lung with crude tubercles: its base congested. Heart large, fatty: mitral valve and aorta with deposit.	Abdominal wall very fat: so also omentum and mesentery. A small abscess in left lobe of liver. Much fat about the kidneys and intestines: former with cortical structure nearly destroyed by fatty degeneration.

TABLE OF POST-MORTEM-APPEARANCES—continued.

Name.	Age, Sex.	Mental Malady.	Duration of Malady.	Concomitant Bodily Affections.	Mode of Death.	Date of Post-Mortem Examination.	General External Appearances.	Scalp.	Cranium.	Weight of Brain.	C E R E B R A L.		Thorax.	Abdomen.
											Membranes.	Substance.		
S. W.	42 Fem.	Acute Melancholia.	5 Months.	Marasmus: Diarrhoea.	Syncope from exhaustion.	6 hours. — in Feb.	Stature small, slight; chest flat; very emaciated.	Very thin, almost bloodless; separable with much difficulty.	Asymmetrical. Depressed at the site of the posterior fontanelle. Bones very thin, but dense; almost without diploe. Diaphragm at places.	<i>lb. oz.</i> 2. 11½ avoirdupois.	Dura Mater adherent; thin; very little blood in its sinuses. Pacchionian bodies not numerous, but large, and producing pits in the cranial vault. Arachnoid very slightly opaque anywhere. Pia Mater normal.	Anterior lobe shallow; concave over the orbital plates. Grey matter pale white, soft, with very few bleeding points on section.	Lungs small, anemic; slightly adherent in places. Some interlobular emphysema of the upper lobes. Heart small; walls thin. Mitral valve with some deposit.	Viscera healthy; one ovary with a compound cyst.
C. F.	36 Fem.	Mania.	Seven Months.	Marasmus diarrhoea. Tubercles of lungs.	Syncope from exhaustion.	30 hours. — Jan.	Extreme emaciation. Body delicately and well formed.	Excessively thin without a particle of fat; bloodless, very adherent.	Rather small. Bones not dense; thickness moderate.	2.14.	Dura Mater normal but bloodless. Arachnoid rather opaque generally. Infiltration of serum in meshes of Pia Mater: the latter not deficient of blood; rather thickened. Choroid with cysts.	Firm. Grey lamina well colored. Lateral ventricles capacious, filled with serum; about 4-oz. of bloody serum escaped.	Not examined.	Not examined.

TABLE OF POST-MORTEM APPEARANCES—continued.

Name.	Age, Sex.	Mental Malady.	Duration of Malady.	Concomitant Bodily Affections.	Mode of Death.	Date of Post-mortem Examination.	General External Appearances.	Sculp.	Cranium.	Weight of Brain.	C E R E B R A L .		Thorax.	Abdomen.
											Membranes.	Substance.		
E. L.	26 Fem.	Dementia after Mania.	Six Years.	Extensive thoracic and abdominal lesions with vomiting, diarrhoea and typhoid symptoms.	Apnoea.	24 hours, — Feb.	Body stout made; not emaciated. Decomposition advancing speedily.	Thick, very elastic; not readily separable.	Frontal arch contracted, shallow. Cranium asymmetrical, flattened behind. Bones of moderate thickness and density.	<i>lb. oz.</i> 2 14½	Dura Mater normal; vessels not congested. Arachnoid generally but only slightly opaque. Pachionian bodies not large nor numerous. Pia Mater normal.	Rather firm; grey lamina well colored but thin. Convoltions shallow, save two or three very long ones; their distribution very irregular. The posterior cerebral lobes very deficient.	Very contracted by the upward encroachment of the diaphragm. Heart rather large, some deposit on mitral valve. Lungs much compressed by the large heart and the diaphragm and containing a very fetid greasy pus. A portion of liver had been destroyed. Intestines glued together; the omentum, an irregular fatty mass was inseparable from them. Two or three feet of the lower end of ilium were gangrenous and perforated at several spots. There appeared to have been a special sac; the walls of which were oldest and thickest behind the pubes.*	

* In the limits of this abstract it is impossible to convey a precise notion of this extensive abdominal lesion.

TABLE OF POST-MORTEM APPEARANCES—continued.

Name.	Age.	Sex.	Mental Malady.	Duration of Malady.	Concomitant Bodily Affections.	Mode of Death.	Date of Post-Mortem Examination.	General External Appearances.	Scalp.	Cranium.	Weight of Brain.	C E R E B R A L .		Thorax.	Abdomen.
												Membranes.	Substance.		
J. C. N.	51	Male	Melancholia.	Seven months.	Phthisis.	Syncope from exhaustion.	32 hours. — March.	Body much emaciated. Shortening of one leg from an old fracture below the neck of the femur, and dislocation on the dorsum ilii, with false joint.	Of moderate thickness with little blood; rather adherent.	Large posteriorly. Bones thick and dense.	$\frac{3}{4}$ lb. 4 oz.	Dura Mater inoperable. Pacchionian bodies large, but few. Great opacity and thickening of the Pia Mater, and Arachnoid; of the latter, chiefly over the summit. Pia Mater rather vascular. Vessels healthy. Choroid with few cysts.	Anterior lobes adherent. Grey matter normal. White, soft, much gritty, calcareous matter in the white stem of cerebellum. Bleeding puncta numerous.	Lungs tubercular; left lung with an old large cavity at its apex. Pleuritic adhesions extensive. Heart healthy.	Viscera healthy. Left kidney much larger than right.
J. R. P.	49	Male	Melancholia.	Nine months.	Diarrhœa.	Syncope from exhaustion.	39 hours. — March.	Much emaciation. Stature small, thin; head large.	Thin. Separable with facility.	Large. Bones dense.	3 0 $\frac{1}{2}$	Dura Mater almost inseparable, rather vascular. Groups of Pacchionian bodies large and numerous. Arachnoid very opaque and thickened; lesion over the base. About 2 ounces bloody serum escaped.	Anterior lobes adherent. Grey lamina rather pale, white matter firm; its fibrous structure very distinct. Puncta numerous on section; bleeding little. No cysts in Choroid.	Lungs healthy, rather vascular. Heart small; some opacity of mitral valve, and of the lining of the aorta.	Stomach large, distended with flatus; but otherwise, like the other viscera, healthy.

TABLE OF POST-MORTEM APPEARANCES—continued.

Name.	Age.	Sex.	Mental Malady.	Duration of Malady.	Concomitant Bodily Affections.	Mode of Death.	Date of Post-Mortem Examination.	General External Appearance.	Scalp.	Cranium.	Weight of Brain.	C E R E B R A L .		Thorax.	Abdomen.
												Membranes.	Substance.		
R. M. E.	36	Male	Acute melancholia.	Three or Four Months.	Imperfect hemiplegia with tremor or convulsion before death. Inflammation of lungs.	Coma.	26 hours. — March.	Stature large, much wasted. Decomposition early and rapid.	Rather thick, and venously congested, adherent firmly.	Long; compressed laterally. Bones dense, thick; diploe almost wanting.	<i>lb. oz.</i> 2 13½	Dura Mater rather congested with venous blood. Pacchionian bodies numerous. Much opacity of Arachnoid with thickening, both over summit and base. Infiltration of serum in the Pia Mater, which was also vascular.	Cerebral substance very soft, most readily broken down; rather vascular. Grey layer, rather pale. Numerous bleeding puncta on section. Choroid without cysts.	Well developed. Left lung generally adherent; congested, easily broken down, not above half the size of other lung. Right capacious, lower half congested, becoming hepatized in front. No tubercles. Heart large.	Liver large, rather soft. Spleen pulpy; other viscera healthy.
G. A.	58	Male	Chronic mania with Dementia.	Twenty-eight Years.	Chronic Asthma and Paraplegia.	Apnoea.	56 hours. — March.	Stature small, much wasted. Acquired curvature of spine.	Scalp normal.	Rather small. Bones with a well developed diploe; not dense.	3 5½	Veins of Dura Mater rather full. Some large patches of Pacchionian bodies. Arachnoid generally opaque, considerable serous effusion in meshes of Pia Mater, which was rather congested. Cysts in Choroid.	Grey lamina rather pale, consistence generally normal. Pineal with a cyst as large as itself.	Not examined.	Not examined.
E. C.	52	Male	Monomania.	Thirteen Years.	Spasmodic Dyspnoea.	Coma in an epileptic fit.	24 hours. — April.	Body well developed, in good condition.	Rather thick, spongy, and congested; readily separable	Large, well-formed; symmetrical. Bones thick and dense.	3 3¼	Dura Mater nearly inseparable. Sinuses and veins much congested. Pacchionian bodies small. Arachnoid slightly and generally opaque. Pia Mater congested, with some serous infiltration. Bloody serum escaped.	Puncta not numerous nor prominent on section. Grey lamina well developed, colored and convoluted. Choroid with cysts. Internal vessels of brain congested.	Not examined.	Not examined.

TABLE OF POST-MORTEM APPEARANCES—continued.

Name.	Age.	Sex.	Mental Malady.	Duration of Malady.	Concomitant Bodily Affections.	Mode of Death.	Date of Post-Mortem Examination.	General External Appearances.	Scalp.	Cranium.	Weight of Brain.	C E R E B R A L.		Thorax.	Abdomen.
												Membranes.	Substance.		
J. A.	65	Male	Mania.	Three-Months	Asthma and disease of heart.	Apnea.	24 hours. — May.	Body stout made, fat. Decomposition rapid.	Thick; not readily separable; with excess of blood.	Rather large. Bones dense; of moderate thickness.	<i>lb. oz.</i> 3 2¼	Dura Mater very firmly attached; its vessels full. General opacity of Arachnoid, but slight. Pia Mater congested. Choroid with small cysts; rather congested.	Consistence normal. Numerous bleeding puncta on section. Grey layer rather pale and thin.	Well developed. Old adhesions of both lungs, especially the left, which was also much diseased. Right lung consolidated in upper lobe. Heart very large, fatty; mitral valve with deposit. Bronchial glands enlarged. Ascending aorta dilated, with progressing calcareous deposit.	Liver becoming fatty; rather small. Stomach and intestines healthy. Kidneys contracted; in an advanced stage of granular degeneration; cysts on their surface.
T. C.	65	Male	Melan- cholia	Six Months	Granular kidneys. Disease of heart & lungs. Subject to gout.	Coma.	27 hours. — June.	Stature slender; subcutaneous fat not deficient.	Rather thick; firmly adherent.	Well-formed. Bones rather thick and dense.	3 8½	Dura Mater strongly adherent. Sinuses full. Pacchionian bodies numerous and large. Arachnoid very opaque generally, Pia Mater congested, with serous effusion in its meshes. Choroid with numerous small cysts. Basilar and carotid arteries with commencing earthy deposit.	Grey lamina rather pale; its secondary lines indistinguishable. White matter soft; color dull. Optic thalami & corpora striata soft and vascular; convolutions well developed. Puncta numerous.	Well developed. Costal cartilages ossified. Tubercular consolidation of apex of right lung. Heart soft and fatty. Mitral valve with advancing earthy deposit. Ascending aorta much dilated, with numerous and large calcareous plates.	Liver becoming fatty; rather small. Stomach and intestines healthy. Kidneys contracted; in an advanced stage of granular degeneration; cysts on their surface.

TABLE OF POST-MORTEM APPEARANCES—continued.

Name.	Age.	Sex.	Mental Malady.	Duration of Malady.	Concomitant Bodily Affections.	Mode of Death.	Date of Post-Mortem Examination.	General External Appearances	Scalp.	Cranium.	Weight of Brain.	C E R E B R A L .		Thorax.	Abdomen.
												Membranes.	Substance.		
C. E.	43	Fem.	Acute Mania.	Ten Days	Inflammation of Brain: convulsion & paralysis preceding death.	Coma.	25 hours. — July.	Well formed, thin, but not emaciated.	Thin, readily separable; not congested.	Rather small; lower half of occiput prominent. Bones normal.	<i>lb. oz.</i> 2 9½	Dura Mater strongly adherent; vessels rather full. Pacchionian bodies large and numerous. Arachnoid of summit extremely thickened and opaque; that of base but very slightly so. Pia Mater congested, especially in the left temporal region posteriorly. Cerebral vessels and Choroid congested. Some subarachnoid effusion.	Beneath the congested inflamed Pia Mater, the grey matter was of a dusky crimson hue, and much softened; the subjacent white substance unaffected. Right corpus striatum more vascular than normal; the left in a state of red softening, in a circumscribed central portion extending nearly to the crus cerebri. Brain-matter elsewhere healthy. The secondary layers in the inflamed portion of grey matter indistinguishable. About 3 ounces of bloody serum escaped from brain.	Not examined.	Not examined.
R. W.	37	Fem.	Mania.	Seven weeks.	Phthisis with diarrhoea.	Syncope from exhaustion.	24 hours. — Sept.	Small stature. Emaciated.	Very thin and bloodless.	Bones thin, but dense; diploë absent.	2 14	Dura Mater adherent rather firmly; its sinuses nearly empty. Arachnoid slightly opaque on base, but not on summit. Pia Mater with little blood. Pacchionian bodies few, not large.	Cortical lamina rather thin; not pale. White matter rather softer than normal about the 3rd ventricle. Puncta numerous, but bleeding little. Choroid bloodless, with numerous large cysts.	Lungs inseparably adherent throughout, crumpled with tubercular matter crude and softened; and their apices occupied by cavities. Heart healthy.	Viscera healthy.

TABLE OF POST-MORTEM APPEARANCES—continued.

Name.	Age.	Sex.	Mental Malady.	Duration of Malady.	Concomi- tant, Bodily Affections.	Mode of Death.	Date of Post- Mortem Exami- nation.	General External Appearances	Scalp.	Cranium.	Weight of Brain.	C E R E B R A L .		Thorax.	Abdomen.
												Membranes.	Substance.		
W. G.	31	Male	Chro- nic De- mentia.	Fifteen Years.	Sub- cute Rheu- matism.	Coma from E- pilepsy.	50 hours. — Dec.	Body well made, in good condition; very pale. Stature large.	Of mode- rate thickness; rather congested	Large; wide across the summit. Cranial bones thick and dense.	<i>lb. oz.</i> 3 11½	Dura Mater not particularly adher- ent: sinuses distend- ed. Pacchionian bodies not numerous nor large. Arach- noid, both of summit and base, almost nor- mal. Pia Mater con- gested; so also in- ternal cerebral ves- sels: but choroid not congested and with- out cysts.	Consistence normal. Grey lamina well colored; convolutions good. Numerous bleed- ing puncta on sec- tion,	Both lungs ad- herent in places; posteriorly engor- ged; the right one more so. Apices with transformed calcareous tuber- cles. Heart heal- thy. Diaphragm thrust upward by distended stomach and intestines.	Abdomen of great length; and large in other dimen- sions. Much sub- cutaneous fat. O- mentum fatty. In- testines healthy, but much distend- ed with flatus. Kid- neys very large, healthy.
