THE
PHYSICIAN'S VADE MECUM;
BEING
A COMPENDIUM
OF
NOSOLOGY AND THERAPEUTICS,
FOR THE
USE OF STUDENTS.

BY THE REV. JOSEPH TOWNSEND,
RECTOR OF PEWSEY, WILTS.

P R E F A C E.

*I*N this Compendium of Nosology, I have, as far as possible, confined myself to the system and the genera of my venerable master Dr. Cullen, whose memory and justly acquired reputation will be ever dear to those who studied in his school, and were honoured with his friendship. Of all the systems which have yet appeared, his for a practitioner is undoubtedly the best: yet in some few instances I have departed from him; but it has been chiefly where he hesitates himself. My reasons for these variations, as requiring disquisitions ill suited to a Compendium, I must here omit. These will be found in my “Elements of Therapeutics.”

IV

The utility of classical distinctions is almost universally acknowledged; yet nothing is more difficult than to make such an arrangement as shall meet with universal approbation. It will, however, be acknowledged sufficient for every useful purpose, if we can with precision ascertain the name and nature of a disease, although we should not perfectly agree as to its proper place in a system of Nosology. Having once formed his diagnosis, the skilful practitioner will next proceed to investigate, where it is possible, the proximate cause of the disease; and where that is not to be discovered, he will pay particular attention both to the occasional and to the predisposing cause. In all these investigations the younger students will, I trust, receive some assistance from the Compendium now presented to the public; and with a moderate

share of penetration will be enabled, in most cases, to determine what are the most judicious indications to effect a cure.

For the Compendium of Therapeutics I have been indebted principally to Drs. Duncan, Whytte, Cullen, Elliot, Berkenhout; and for some of the most efficacious formula, I must acknowledge my obligations to the late Dr. NANKIVEL, and to Dr. THORNTON, whose fame is too well established in our metropolis to need any eulogium from my pen.

Should this little work meet with acceptance among either the students in our hospitals, or the medical practitioners in country villages, I shall think myself well rewarded for my trouble.

In addition to the hints, above conveyed, on the utility of Classical Distinctions, I have one caution more to offer, as the result of deep study, attentive observation, extensive practice, and the experience of near half a century.

Let the young practitioner, in all cases, ascertain, not merely the Class, Order, and Genus of the Disease submitted to his care, but the SPECIES; because on this principally his Indications must be formed. For unless he can ascertain the SPECIES, he will prescribe to the name of a disease, not to the disease itself; and should he be so fortunate as to effect a cure, he will be indebted to chance, and not to skill.

I have frequently had occasion to lament

VII

the inattention of eminent practitioners to this caution, not merely among the poor, but in the higher walks of life. And to this inattention must be attributed their frequent failures in cases, which attentive physicians of inferior talents might have cured.

To elucidate my meaning, I shall fix on two diseases—Phthisis and Epilepsia. Of the latter, nine species may be distinguished, of the former eight; all requiring a difference of treatment. Now, even to the most ignorant on medical subjects, it must be clear, that in every disease it is of the last importance to remove the cause; and that, to accomplish this, it must first be known.

The causes of disease have very properly been distinguished into remote and proximate;

VIII

the latter often difficult to be ascertained, the former easily discerned. These being removed, health will be restored.

The remote causes are predisponent and occasional. Now, in different parts of Europe, I have frequently observed physicians unsuccessful in their practice, merely because they had overlooked the occasional Cause, or because they had paid no attention to the Species, as distinguished by our best Nosologists, Sauvage and Cullen.

It is for this reason that I have here repeated a caution, which I gave in the first edition of my Vade Mecum, and have endeavoured to enforce in my larger work, the “Elements of Therapeutics.”

Pewsey, 1st Jan. 1807.

PART I.

A

COMPENDIUM

OF

N O S O L O G Y.

THE
CLASSES, ORDERS, GENERA,
AND
SPECIES OF DISEASE.

CLASSES,

WITH CHARACTERISTIC SYMPTOMS.

- CLASS*
- | | | |
|-----------------|---|---|
| I. PYREXIÆ - - | { | After cold shivering, a frequency of pulse, with increase of heat, and thirst. |
| II. NEUROSES - | { | Affections of sense and motion, disturbed; without either idiopathic pyrexia, or topical disease. |
| III. CACHEXIÆ - | { | A depraved habit of body; without pyrexia, and independent of neurosis, as original disease. |
| IV. LOCALES - - | { | Morbid affections, which are partial. |

ORDERS,

DISTINGUISHED BY THEIR SYMPTOMS.

CLASS I. PYREXIÆ.

ORDERS.

- | | | |
|-------------------------|---|---|
| I. <i>Febres</i> - - - | { | Pyrexia, with loss of appetite and strength; but no primary local affection. |
| II. <i>Phlegmasiæ</i> - | { | Pyrexia, with topical pain and inflammation. The blood after venesection exhibits the buff coat. |
| III. <i>Exanthemata</i> | { | Contagious diseases, beginning with fever, and followed by an eruption on the skin. |
| IV. <i>Hæmorrhagiæ</i> | { | Pyrexia, with a discharge of blood, without any external injury, the blood on venesection exhibiting the buff coat. |
| V. <i>Profluvia</i> - - | { | Pyrexia, with increased excretions. |
-

CLASS II. NEUROSES.

- | | | |
|------------------------|---|---|
| I. <i>Comata</i> - - - | { | A diminution of the powers of voluntary motion, with sleep, or the senses impaired. |
|------------------------|---|---|

ORDERS.

- II. *Adynamia* - - { A diminution of the involuntary motions of either vital or natural functions.
- III. *Spasmi* - - - { A morbid contraction, or motion of muscular fibres.
- IV. *Vesania* - - - { The judgment impaired, without either coma, or pyrexia.

CLASS III. CACHEXIÆ.

- I. *Marcores* - - Universal emaciation.
- II. *Intumescentiæ* General swellings.
- III. *Impetigines* - { Cachexia, deforming the external parts of the body with tumours, eruptions, &c.

CLASS IV. LOCALES.

- I. *Dysæthesiæ* - { The senses injured, or destroyed, by the imperfection of the organs.
- II. *Dysorexia* - - { The appetite deficient, or depraved.

ORDERS.

- III. *Dyscinesiae* - { Motion impeded, or depraved, from an imperfection of the organ.
- IV. *Apocenosēs* - { A superabundant flux of blood, or humours, without pyrexia.
- V. *Epischeses* - A suppression of excretions.
- VI. *Tumores* - - { Partial swellings, without inflammation.
- VII. *Ectopiae* - - Parts displaced.
- VIII. *Dialyses* - - A solution of continuity.

GENERA,
AND THEIR SYMPTOMS.

CLASS I. PYREXIÆ.

ORDER I. FEBRES.

GENERA.

- | | | |
|----------------------------|---|---|
| 1. <i>Intermittens</i> - - | { | Cold, hot, and sweating stages, in succession, attend each paroxysm, and are followed by an intermission, or remission. |
|----------------------------|---|---|

SPECIES.

1. *quotidiana.*
2. *tertiana.*
3. *quartana.*

- | | | |
|--------------------------|---|---|
| 2. <i>Continua</i> - - - | { | No intermission, yet subject to exacerbations twice in one day. |
|--------------------------|---|---|

SPECIES.

1. *Synocha.* Heat increased; pulse frequent, strong, hard; urine high coloured; senses not much impaired.
2. *Typhus.* Contagious. Heat moderate; pulse quick, weak, small; urine, little changed; senses much impaired; prostration of strength.

VARIETIES.

1. *petechialis.*
2. *mitior.*
3. *gravior.*
4. *icterodes.*

GENERA.

3. *Hectica* - - - -

Exacerbations at noon, but chiefly in the evening, with slight remissions in the morning, after nocturnal sweats; the urine depositing a furfuraceo-lateritious sediment; appetite good; thirst moderate.

This fever is symptomatic of

1. Chlorosis.
2. Schrophula.
3. Nephralgia.
4. Phthisis.
5. Tabes, &c.

It is occasioned frequently by worms.

CLASS I. PYREXIÆ.

ORDER II. PHLEGMASIÆ.

GENERA.

4. *Phlogosis* - - - { Redness; heat; pain; and
tumour on the surface of
the body.

SPECIES.

1. *Phlegmone*. Inflammation of a bright red colour; tumour pointed, throbbing, and tending to suppuration.
2. *Erythema*. Inflammation of a dull red colour, vanishing upon pressure, spreading unequally, with a burning pain, and tumour scarcely perceptible, ending in desquamation, or vesicles of the skin.

The phlogosis often terminates in

1. *Impostume*.
2. *Gangrene*.
3. *Sphacelus*.

5. *Ophthalmia* - - - { Redness and pain of the
eye; intolerance of light;
with effusion of tears.

SPECIES.

1. *Ophthalmia Membranarum*. Inflammation in the coats of the eye, most commonly in the tunica conjunctiva.

SPECIES.

2. *Ophthalmia Tarsi*. Small ulcers in the sebaceous glands of the tarsus, discharging a glutinous matter.

GENERA.

6. *Phrenitis* - - - { Strong fever; violent head-
ach; redness of face and
eyes; impatience of light;
and noise; watchfulness;
and furious delirium.

SYMPTOMATIC.

1. exanthematica.
2. verminosa.
3. aphrodisiaca.
4. hydrophobica.
5. traumatica.
6. a dolore.

7. *Cynanche* - - - { Pain and redness of the
fauces; deglutition, and
respiration, difficult.

SPECIES.

1. *Tonsillaris*, affecting the mucous membrane of the fauces, but more especially the tonsils.
2. *Maligna*, deglutition less difficult; a mucous crust of a whitish or ash-colour covers the tonsils and mucous membrane of the fauces, which are affected with spreading ulcers. These

SPECIES.

symptoms are accompanied with typhus, and followed by exanthemata.

3. *Trachealis*. Respiration difficult; inspiration accompanied with a wheezing, and the cough occasioning a shrill ringing sound; no apparent tumour in the fauces.

4. *Pharyngæa*.

5. *Parotidæa*.

SYMPTOMATIC.

1. exanthematica.

2. arthritica.

3. hepatica.

GENERA.

8. *Pneumonia* - - - { Pyrexia; difficult respiration; cough; and pain in the thorax.

SPECIES.

1. *Peripneumonia*. The pulse not always hard, but sometimes soft; an obtuse pain in the breast; the respiration always difficult; sometimes the patient cannot breathe unless in an upright posture; the face swelled, and of a livid colour; the cough for the most part moist, frequently bloody.

2. *Pleuritis*. The pulse hard; a pungent pain in one side, aggravated during

the time of inspiration; an uneasiness when lying on one side; a most painful cough, dry in the beginning of the disease, afterwards moist, and frequently bloody.

These, if not resolved, are followed by

Vomica. Hectic; difficult respiration; cough; pain when lying on the sound side.

Empyema. The above symptoms, with remission of pain, and signs of hydrothorax.

- | | | |
|----------------------------|---|---|
| 9. <i>Carditis</i> - - - | { | Pyrexia; pain in the region of the heart; anxiety; difficult breathing; cough; irregular pulse; palpitation; fainting. |
| 10. <i>Peritonitis</i> - - | { | Pyrexia; pain in the abdomen, increased when erect. |
| 11. <i>Gastritis</i> - - - | { | Pyrexia; anxiety; heat and pain in the epigastrium, increased when any thing is taken into the stomach; vomiting; hick-up; pulse small and hard; prostration of strength. |

SPECIES.

1. *phlegmonodea*.2. *erysipelatos*, with milder symptoms.

GENERA.

12. *Enteritis* - - - { Pyrexia ; fixed pain in the abdomen ; costiveness ; vomiting.

13. *Hepatitis* - - - { Pyrexia ; tension and pain, more or less acute, in the right hypochondrium, usually referred to the top of the right shoulder, and extending to the clavicle, increased by lying on the left side ; urine high coloured.

14. *Splenitis* - - - { Pyrexia ; tension, heat, tumour, and pain in the left hypochondrium, increased by pressure.

15. *Nephritis* - - - { Pyrexia ; pain in the region of the kidneys, and shooting along the course of the ureter ; drawing up of the testicle ; numbness of the thigh ; vomiting ; urine high coloured ; costiveness, and colic pains.

SYMPTOMATIC.

1. calculosa.
2. arthritica.
3. purulenta.

GENERA.

- | | | |
|-----------------------------|---|--|
| 16. <i>Cystitis</i> - - - | { | Pyrexia; tumour and pain in the hypogastrium; frequent and painful discharge of urine; tenesmus. |
| 17. <i>Hysteritis</i> - - - | { | Pyrexia; heat, tension, tumour, and pain in the hypogastrium; pain in the os uteri, when touched; vomiting. |
| 18. <i>Rheumatismus</i> | { | Pyrexia; pains in the joints, increased by the action of the muscles belonging to the joint; heat on the part. The blood after venesection exhibits an inflammatory crust. |

This disease terminates in

Arthrodynia, pain in the joints without pyrexia.

19. *Odontalgia* - - Tooth-ach.

GENERA.

20. *Podagra* - - - { Pyrexia; pain in the joints, chiefly of the great toe, and especially of the hands and feet, returning at intervals: previous to the attack, the functions of the stomach are commonly disturbed.

SPECIES.

1. *regularis*.
2. *atonica*.
3. *retrogada*.
4. *aberrans*.

21. *Arthropuosis* - { Pain of the joints, or muscles, often after contusion, deep, blunt, of long continuance; little or no tumour; no inflammation; pyrexia slight at first, at last hectic; and finally terminating in abscess.

CLASS I. PYREXIÆ.

ORDER III. EXANTHEMATA.

GENERA.

22. *Erysipelas* - - { Synocha of two or three days continuance, with drowsiness most often, sometimes with delirium; pulse commonly full and hard; then *Erythema* in the face, with continuance of synocha; tending to either apoplexy, or to abscess.

SPECIES.

1. *versiculosum*.2. *phlyctaenodes*.

23. *Pestis* - - - - { Typhus, contagious in the extreme; prostration of strength; buboes and carbuncles; petechiæ, hemorrhage, and colliquative diarrhœa.

24. *Variola* - - - - { Synocha; eruption of red pimples the third day, which on the eighth contain pus, and dying, fall off in crusts.

SPECIES.

1. *discreta*.2. *confluens*.

GENERA.

25. *Varicella* - - - { Moderate synocha; pimples bearing some resemblance to *variola*, quickly forming pustules, which contain a fluid matter, and after three or four days from their first appearance desquamate, leaving no cicatrix.

26. *Rubeola* - - - { Synocha; hoarseness; dry cough; sneezing; drowsiness; about the fourth day eruption of small red points, discernible by the touch, which, after three days, end in mealy desquamation. Blood, after venæsection, exhibits inflammatory crust.

GENERA.

27. *Miliaria* - - -

Synochus; cold stage considerable; hot stage attended with anxiety and frequent sighing; sweat of a strong and peculiar smell; eruption, preceding by a sense of pricking, first on the neck and breast, of small red pimples, which in two days become white pustules, desquamate, and are succeeded by fresh pimples.

28. *Scarlatina* - -

Contagious synocha; 4th day face swells, and a scarlet eruption appears on the skin in patches; which, after three or four days, ends in desquamation of the cuticle, or is succeeded by anasarca.

SPECIES.

1. *simplex* without cynanche.

2. *cynanchica*.

CLASS I. PYREXIÆ.

ORDER IV. HÆMORRHAGIÆ.

GENERA.

29. *Epistaxis* - - - { Bleeding at the nose, with
pain, or fulness of the
head.
30. *Hæmoptysis* - - - { Coughing up of florid, or
frothy blood; heat or pain
in the chest; irritation in
the larynx; saltish taste.

SPECIES.

1. *plethorica*.
2. *violenta*.
3. *phthisica*.
4. *calculosa*.
5. *vicaria*.

31. *Phthisis* - - - - { Emaciation ; debility ;
cough ; hectic ; purulent
expectoration ; hæmopty-
sis ; diarrhœa. *V. Tussis*.

SPECIES.

1. *hæmoptoica*.
2. *exanthematica*.
3. *chlorotica*.
4. *scrophulosa*.
5. *syphilitica*.
6. *stomachalis*.
7. *verminosa*.
8. *catarrhalis*.

GENERA.

32. *Hæmorrhoids* - - { Flux of blood from the
anus; pain there, and hæ-
morrhoids; vertigo; pain
in the loins and head-
ach.
33. *Menorrhagia* - { A too copious menstrual
flux.

SPECIES.

1. *rubra*.
2. *abortus*.
3. *lochialis*.
4. *vitiorum*.
5. *alba*.

CLASS I. PYREXIÆ.

ORDER V. PROFLUVIA.

34. *Catarrhus* - - - { Increased excretion of mu-
cus from the membranes
of the nose, fauces, and
bronchiæ, with pyrexia,
and attended by cough,
thirst, lassitude, and want
of appetite.

SPECIES.

1. *a frigore*.
2. *a contagio*.

SYMPTOMATIC.

1. tussis exanthematica.
2. verminosa.
3. a dentitione.
4. arthritica.
5. stomachalis.

GENERA.

35. *Dysenteria* - -

{ Contagious pyrexia ; frequent griping stools ; tenesmus ; stools chiefly mucus, sometimes mixed with blood, the natural fæces being retained or voided in a hardened state ; loss of appetite and nausea, arising from spasmodic constriction of the colon retaining hardened fæces.

CLASS II. NEUROSES.

ORDER I. COMATA.

36. *Apoplexia* - - -

{ Abolition, in some degree, of the powers of sense and motion, with sleep, and sometimes snoring, the respiration, and motion of the heart, remaining.

SPECIES.

1. *sanguinea*.
2. *serosa*.
3. *hydrocephalica*. In early youth, lassitude, febricula, pain in the head, then a more sluggish pulse, dilated pupils, drowsiness, and apoplexia. The sutures of the cranium open.
4. *atrabilaria*.
5. *traumatica*.
6. *venenata*.
7. *mentalis*.
8. *cataleptica*.
9. *suffocata*.

SYMPTOMATIC.

1. *exanthematica*.
2. *arthritica*.
3. *verminosa*. Carus, cataphora, coma, and lethargus, are degrees only of apoplexy.

GENERA.

37. *Paralysis* - - - { A loss of the power of voluntary motion affecting certain parts.

SPECIES.

1. *partialis*.
2. *hemiplegica*.
3. *paraplegica*.
4. *venenata*.

SYMPTOMATIC.

1. exanthematica.
2. arthritica.
3. verminosa.
4. scrophulosa.
5. syphilitica.
6. traumatica.

CLASS II. NEUROSES.

ORDER II. ADYNAMIÆ.

GENERA.

38. *Syncope* - - -

The respiration, and action of the heart, either cease, or become much weaker than usual, with paleness and coldness, arising from diminished energy of the brain, or from organic affections of the heart.

SPECIES.

1. *cardiaca*, returning without a visible cause, and with violent palpitation of the heart during the intervals.
2. *cerebralis*, from passions such as horror, anger, joy, &c.; deficiency of blood, extreme pain, &c.
3. *Pulmonæa*.

GENERA.

39. *Dyspepsia* - - - { Want of appetite; nausea;
vomiting; flatulence;
heart-burn; costiveness;
and pain in the stomach;
with other symptoms of
debility in the organ of
digestion.

SYMPTOMATIC.

1. schirrosa.
2. ulcerosa.
3. a veneno.
4. verminosa.
5. chlorotica.
6. gravidarum.
7. arthritica.
8. nephritica.
9. aphrodisiaca.

40. *Hypochondriasis* { Dyspepsia; languor and
want of energy; dejection
of mind and apprehension
of evil, more especially
respecting health, without
sufficient cause; with a
melancholic temperament.

CLASS II. NEUROSES.

ORDER III. SPASMI.

In the Animal Functions.

GENERA.

41. *Tetanus* - - - - { Spasmodic rigidity of almost the whole body.

VARIETIES ARE,

1. *opisthotonos*,
2. *emprosthotonos*, and
3. *Trismus*, or locked-jaw.

SYMPTOMATIC.

1. syphiliticus.
2. verminosus.

42. *Convulsio* - - - - { Alternate relaxations, with violent and involuntary contractions of the moving fibres, without sleep.

43. *Chorea* - - - - { Convulsive motions of the limbs or trunk.

44. *Raphania* - - - - { A spasmodic contraction of the joints with convulsive motions and most violent pain : periodical.

GENERA.

45. *Epilepsia* - . - { Convulsions with sleep, and
usually froth issuing from
the mouth.

SPECIES.

1. *traumatica*
2. *a dolore.*
3. *verminosa.*
4. *a veneno.*
5. *exanthematica.*
6. *a cruditate ventriculi.*
7. *ab inanitione.*
8. *uterina.*
9. *ex onanismo.*

In the Vital Functions.

46. *Palpitatio* - - - { A palpitation of the heart,
either constant or fre-
quently returning.

SPECIES.

1. *Organica.*
2. *arthritica.*
3. *chlorotica.*
4. *hysterica.*
5. *melancholica.*

GENERA.

47. *Asthma* - - - - { Difficult respiration returning at intervals, with a sense of stricture across the breast and in the lungs; a wheezing; hard cough at first, but more free towards the close of every paroxysm, with a discharge of mucus, followed by a remission.

SPECIES.

1. *spontaneum*.
2. *exanthematicum*.
3. *plethoricum*.
4. *arthriticum*.
5. *venereum*.
6. *hystericum*.
7. *hypochondriacum*.
8. *catarrhale*.
9. *stomachicum*.
10. *a polypo cordis*.

48. *Dyspnoea* - - - { Difficult respiration, continual, and without sense of stricture. Cough frequent through the whole course of the disease.

SPECIES.

1. *catarrhalis*.
2. *aquosa*.
3. *pinguetudinosa*.
4. *aëria*.

GENERA.

49. *Pertussis* - - - { Convulsive, strangulating
cough, with hooping re-
lieved by vomiting; con-
tagious.

In the Natural Functions.

50. *Pyrosis* - - - - { Heartburn, with copious
eructation, generally of a
watery insipid fluid.
51. *Colica* - - - - - { Pain in the lower belly, and
twisting round the navel;
vomiting; costiveness.

SPECIES.

1. *spasmodica*.
2. *pictonum*, ending in palsy.
3. *stercorea*.
4. *verminosa*.
5. *accidentalis*.
6. *calculosa*.
7. *callosa*.

GENERA.

- | | | | |
|-----|-----------------------|---|--|
| | | { | A purging and vomiting of
bile; anxiety; painful grip-
ings; spasms of the ab-
dominal muscles, and those
of the thighs. |
| 52. | <i>Cholera</i> - - - | | |
| | | { | Frequent liquid stools with
the natural excrement, but
not contagious, and seldom
attended with pyrexia. |
| 53. | <i>Diarrhæa</i> - - - | | |

SPECIES.

1. *crapulosa*.
2. *biliosa*.
3. *mucosa*.
4. *cæliaca*.
5. *lienteria*.
6. *hepatirrhæa*.
7. *verminosa*.

- | | | | |
|-----|-----------------------|---|---|
| 54. | <i>Diabetes</i> - - - | { | A superabundant discharge
of urine, which is limpid,
and sweetish to the taste. |
|-----|-----------------------|---|---|

SYMPTOMATIC.

1. *hystericus*.
2. *arthriticus*.

GENERA.

55. *Hysteria* - - -

{ A grumbling noise in the belly; a ball ascending to the throat, with a sense of suffocation; stupor; insensibility and convulsions; involuntary laughing and crying; sleep interrupted by sighs; urine limpid and abundant, previous to the fit; great sensibility and irritability of mind.

SPECIES.

1. *chlorotica*.
2. *a menorrhagia*.
3. *a leucorrhœa*.
4. *libidinosa*.

56. *Hydrophobia* -

{ A dread of water, as inducing painful convulsions of the pharynx.

CLASS II. NEUROSES.

ORDER IV. VESANIÆ.

GENERA.

57. *Amentia* - - - { Imbecility of intellect, by which the relations of things are either not perceived, or not recollected.
58. *Melancholia* - - { Erroneous judgment, but not merely respecting health, from imaginary perceptions, or recollections, influencing the conduct, and depressing the mind with ill-grounded fears; not combined with either pyrexia or comatose affections; often appearing without dyspepsia, yet attended with costiveness, chiefly in persons of rigid fibres and torpid sensibility.
59. *Insania* - - - { Erroneous judgment from imaginary perceptions, or recollections, attended with agreeable emotions in persons of a sanguine temperament. Vide *Cullen's Practice*, §. 1581.

GENERA.

60. *Mania* - - - -

A conception of false relations, and an erroneous judgment, arising from imaginary perceptions or recollections, exciting the passions, and producing unreasonable actions or emotion, with a hurry of mind in pursuing a train of thought, and in running from one train of thought to another, attended with incoherent and absurd speech, called raving, and violent impatience of either contradiction, or restraint

SPECIES.

1. *melancholica*.
2. *phrenitoides*.
3. *hysterica*.

61. *Oneirodynia* - - { Disturbed imagination during sleep.

SPECIES.

1. *gravans*. The incubus or night-mare.
Ephialtes of Sauvage.
 - a. *plethorica*.
 - b. *stomachica*.
 - c. *verminosa*.

- d. tertianaria.
- e. hypochondriaca.
- f. ex hydrocephalo.

2. *activa*. *Somnambulismus of Sauvage*.

CLASS III. CACHEXIÆ.

ORDER I. MARCORES.

GENERA.

62. *Tabes* - - - - { Emaciation ; weakness ;
 hectic.

SPECIES.

1. *famelicarum*.
2. *dyspeptica*.
3. *hypochondriaca*.
4. *purulenta*.
5. *scrophulosa*.
6. *venenata*.
7. *inanitorum*.
8. *senilis*.

63. *Atrophia* - - - - { Emaciation ; weakness, but
 without hectic.

SPECIES.

1. *inanitorum*.
2. *famelicorum*.
3. *cacochymica*.
4. *debilium*.
5. *senilis*.

CLASS III. CACHEXIÆ.

ORDER II. INTUMESCENTIÆ.

Adipose.

GENERA.

64. *Polysarcia* - - Troublesome obesity.

Flatulent.

65. *Pneumatosi*s - { Air collected in the cellular texture under the skin, rendering it tense, elastic, and crepitating.

SPECIES.

1. *spontanea*.
2. *traumatica*.
3. *venenata*.
4. *hysterica*.

66. *Tympanites* - { Elastic distention of the abdomen, not readily yielding to pressure, and sounding like a drum, with costiveness and atrophy; but no fluctuation.

SPECIES.

1. *intestinalis*, with discharge of wind giving relief.
2. *abdominalis*, without such relief.

GENERA.

67. *Physometra* - - { A permanent elastic swelling in the hypogastrium from flatulent distention of the womb.

Aqueous.

68. *Anasarca* - - - { Swelling on the surface of the body; not elastic; pitting by the pressure of the finger; and rising slowly to its former fulness.

SPECIES.

1. *serosa.*
2. *exanthematica.*
3. *a compressione.*
4. *debilium.*

69. *Hydrocephalus* { External swelling of the head, soft, not elastic.

The *internal hydrocephalus* has been described already as the third species of *Apoplexia*.

70. *Hydrorachitis* { Tumor in new-born infants on the lumbar vertebræ, soft, and small.

GENERA.

71. *Hydrothorax* - { Dyspnoea; paleness of face;
œdematous swelling of the
feet; scarcity of urine;
impatience of an horizon-
tal position, with sudden
starting from sleep, and
palpitation; fluctuation of
water in the chest.
72. *Ascites* - - - - { Swelling of the abdomen,
tense, and scarcely elas-
tic; with fluctuation.

SPECIES.

1. *abdominalis*.

2. *saccatus*.

73. *Hydrometra* - - { A swelling in the hypogas-
trium of females not preg-
nant; with fluctuation; no
suppression of urine.
74. *Hydrocele* - - - { A soft tumour of the scro-
tum, increasing slowly,
without pain, fluctuating,
generally pellucid.

Of the Solids.

75. *Physconia* - - - { Tumour occupying chiefly
one part of the abdomen,
increasing slowly, and
neither sonorous nor fluc-
tuating.

SPECIES.

1. *hepatica.*
2. *splenica.*
3. *renalis.*
4. *uterina.*
5. *ab ovario.*
6. *mesenterica.*
7. *omentalis.*
8. *visceralis.*

GENERA.

76. *Rachitis* - - - - { Large head ; prominent forehead ; protruded sternum ; flattened ribs ; big belly ; emaciated limbs, with great debility.

CLASS III. CACHEXIÆ.

ORDER III. IMPETIGINES.

77. *Scrophula* - - - { Swelled lymphatic glands ; thick upper lip ; obstinate ulcers ; ophthalmia tarsi ; indolent tumours on the joints ; fair complexion ; irritable habit.

GENERA.

78. *Syphylis* - - -

A disease arising from impure connection, and appearing generally after a local affection of the organs, occasioning chancres; buboes; ulcers in the mouth and nose; clustered pimples of a copper colour, ending in scabby ulcers, chiefly situated near the hairy scalp; blotches on the surface of the body; nocturnal pain in the bones; nodes, &c.

79. *Scorbutus* - - -

Extreme debility; complexion pale and bloated; spongy gums; livid spots on the skin; breath offensive; œdematous swellings in the legs; hæmorrhages; foul ulcers; urine foetid; stools extremely offensive.

GENERA.

80. *Elephantiasis* - { Skin thick, rough, wrinkly, unctuous, and void of hair; face deformed, with tubera; voice hoarse and sounding through the nose; want of feeling in the extremities.—It is contagious.
81. *Lepra* - - - - - { The skin rough and chopped, with white furfuraeous scales and crusts, under which is frequently a moisture, with itching.
82. *Frambæsia* - - { Fungi, like mulberries, growing out of the skin in various parts of the body, and discharging ichor; infectious. Called *Yaws*.
83. *Trichoma* - - - { The hair grows coarse and twisted into inextricable tangles. It is contagious. Called the *Plica Polonica*.
84. *Icterus* - - - - - { Yellowness of the skin and eyes; fæces white; urine of a high colour, and tinges linen yellow.

SPECIES.

1. *calculosus*, acute pain in the epigastric region, increasing after eating: gall stones pass by stool.
2. *spasmodicus*, without pain, after spasmodic diseases and passions of the mind.
3. *mucosus*, without either pain, gall-stones, or spasm, and relieved by the discharge of tough phlegm by stool.
4. *hepaticus*.
5. *gravidarum*.
6. *infantum*.

GENERA.

85. *Chlorosis* - - - { Dyspepsia; livid paleness;
great debility; palpitation;
depraved appetite, with *amenorrhœa*.

CLASS IV. LOCALES.

ORDER I. DYSÆSTHESIÆ.

86. *Caligo* - - - - { Sight diminished, or destroyed, by the interposition of a dark body, between the object and the retina.

SPECIES.

1. *lentis.*
2. *cornæa.*
3. *pupillæ.*
4. *humorum.*
5. *palpebrarum.*

GENERA.

87. *Amaurosis* - - - { Sight diminished, or destroyed, without any visible injury of the eye: the pupil mostly dilated and immoveable.

SPECIES.

1. *sanguinea.*
2. *serosa.*
3. *spasmodica.*
4. *organica.*

88. *Dysopia* - - - - { Sight depraved, requiring one certain quantity of light, one particular distance, or one position.

SPECIES.

1. *tenebrarum.*
2. *luminis.*
3. *dissitorum.*
4. *proximorum.*
5. *lateralis.*

GENERA.

89. *Pseudoblepsis* - { Sight depraved, creating
objects, or representing
them different from what
they are.

SPECIES.

1. *imaginaria*.
2. *mutans*.

90. *Dyscœa* - - - - { Hearing diminished or de-
stroyed.

SPECIES.

1. *organica*, from wax in the *meatus*, injuries of the *membrana*, or inflammation and obstruction of the *tuba*.
2. *atonica*, without any discernible injury of the organ.

91. *Paracusis* - - - Hearing depraved.

SPECIES.

1. *imperfecta*.
2. *imaginaria*.

92. *Anosmia* - - - - { Smell diminished, or de-
stroyed.

SPECIES.

1. *catarrhalis*.
2. *ab ozæna*.
3. *a polypo*.
4. *syphilitica*.
5. *verminosa*.
6. *a siccitate*.
7. *paralytica*.

GENERA.

93. *Ageusia* - - - { Taste diminished, or destroyed.
94. *Anæsthesia* - - { Touch diminished, or destroyed.
-

CLASS IV. LOCALES.

ORDER II. DYSOREXIÆ.

95. *Bulimia* - - - - { Appetite voracious or canine.

SYMPTOMATIC.

1. verminosa.
2. a rachitide.
3. ab acidis.

96. *Pica* - - - - - { Appetite depraved, or a strong desire of unnatural food.

SPECIES.

1. *infantis*.
2. *chlorotica*.
3. *gravidarum*.
4. *medicatrix*.

97. *Polydipsia* - - - Excessive thirst.

SYMPTOMATIC.

1. febrilis.
2. hydropica.
3. fluxuum.
4. a venenis.

GENERA.

98. *Satyriasis* - - - { Excessive and violent desire in men.

99. *Nymphomania*. The same in women.

100. *Nostalgia* - { Impatience when absent from one's native home, and vehement longing to return, attended with gloom and melancholy, loss of appetite, and want of sleep.

101. *Anorexia* - - - Appetite impaired.

This is merely symptomatic.

102. *Anaphrodisia* Impotence.

SPECIES.

1. *paralytica*.
2. *gonorrhoeica*.

CLASS IV. LOCALES.

ORDER III. DYSCINESIÆ.

GENERA.

103. *Aphonia* - . - { Suppression of the voice,
without either syncope,
or coma.

SPECIES.

1. *gutturalis*.
2. *trachealis*.
3. *atonica*.

104. *Mutitas* - - - Dumbness.

SPECIES.

1. *organica*.
2. *atonica*.
3. *surdorum*.

105. *Paraphonia* - Depravation of voice.

106. *Pselismus* - - { Vitiated articulation of the
voice.

107. *Strabismus* - - Squinting.

108. *Contractura* - { A rigid contraction of a
joint.

SPECIES.

1. *ab inflammatione*.
2. *spasmo*.
3. *ob antagonistas paryliticos*.
4. *ab acrimonia irritante*.
5. *articularis*.

CLASS IV. LOCALES.

ORDER IV. APOCENOSES.

GENERA.

109. *Profusio* - - - Loss of blood.

110. *Ephidrosis* - - { Violent and morbid sweat-
ing.

SPECIES.

1. *febrilis*, critical and salutary.
2. *febricosa*, injurious.
3. *hectica*.
4. *exanthematum*.
5. *syncoptica*.
6. *scorbutica*.
7. *a saburra*.
8. *lactea*.
9. *mellea*.
10. *vinosa*.
11. *viridis*.
12. *nigra*.
13. *lutea*.
14. *urinosa*.
15. *cruenta*, &c. &c.

111. *Epiphora* - - Flux of tears.

SPECIES.

1. *apathemate*.
2. *ophthalmica*.
3. *calida*.

4. *frigida.*
5. *arthritica.*
6. *ab ectropio.*
7. *ex rhyade.*
8. *ex variolis.*
9. *ex ægylope.*
10. *ab anchylope.*

GENERA.

112. *Ptyalismus* - A salivation.

SPECIES.

1. *nauseosus.*
2. *apyrosi.*
3. *a laxitate.*
4. *variolosus.*
5. *scorbuticus.*
6. *hypochondriacus.*
7. *arthriticus.*
8. *phthisicus.*
9. *viridis.*
10. *aphthosus.*
11. *gravidarum.*
12. *catarrhalis.*
13. *a carie.*
14. *febrilis.*
15. *syphiliticus.*
16. *mercurialis.*
17. *a calculo.*

18. *purulentus*.

19. *urinosus*.

20. *lapponicus*.

GENERA.

113. *Enuresis* - - - { Involuntary discharge of
urine.

SPECIES.

1. *infantum*.

2. *paralyticorum*.

3. *herniosorum*.

4. *puerperarum*.

5. *gravidarum*.

6. *calculosa*.

7. *a fistula*.

8. *catamenialis*.

9. *asparganosi*.

114. *Gonorrhœa* - - { A preternatural flux from
the urethra in men.

SPECIES.

1. *pura*, not arising from impure connection, and without dysuria.

2. *impura*, arising from the action of the venereal virus on the urethra, producing first an itching at its orifice; afterward a discharge like pus; ardor urinæ; often phymosis; paraphymosis; and swelled testicles.

3. *laxorum*.

4. *dormientium*.

CLASS IV. LOCALES.

ORDER V. EPISCHESES.

GENERA.

115. *Obstipatio* - - Costiveness.

SPECIES.

1. *debilium*.
2. *rigidorum*.
3. *obstructorum*.
4. *paralytica*.

116. *Ischuria* - - - Suppression of urine.

SPECIES.

1. *renalis*.
2. *ureterica*.
3. *vesicalis*.
4. *urethralis*.

117. *Dysuria* - - - { Difficulty, and pain, in dis-
charging water.

SPECIES.

1. *ardens*.
2. *spasmodica*.
3. *compressionis*.
4. *phlogistica*.
5. *calculosa*.
6. *mucosa*.

118. *Dyspermatis-* { Seminis in actu venereo
mus - - - - { tarda, impedita, et ad
generationem insufficiens
emissio.

GENERA.

119. *Amenorrhœa* - { Menses wholly or partially
obstructed without pregnancy.

SPECIES.

1. *plethorica*.
2. *spasmodica*.
3. *atonica*.

CLASS IV. LOCALES.

ORDER VI. TUMORES.

120. *Aneurisma* - - { A soft tumour, with pulsation, on arteries.
121. *Varix* - - - - { A soft tumour, without pulse, on veins.
122. *Ecchymoma* - { A black and blue swelling, either from a bruise, or from a morbid extravasation of blood.
123. *Schirrus* - - - { A hard tumour of a glandular part, indolent, and not readily suppurating.
124. *Cancer* - - - - { A hard tumour of a glandular part, painful and obstinate, which terminates in the foulest ulcer.

GENERA.

125. *Bubo* - - - - { A suppurating tumour of
conglobate glands.
126. *Sarcoma* - - - { A soft excrescence, not
painful.
127. *Verruca* - - - A wart.
128. *Clavus* - - - - A corn.
129. *Lupia* - - - - { A cyst under the skin,
moveable, soft, indolent.
130. *Ganglion* - - - { A hard tumour, moveable,
on the tendon.
131. *Hydatis* - - - { A cuticular cyst full of an
aqueous fluid.
132. *Hydarthus* - - { A white swelling on the
joints.
133. *Exostosis* - - A hard tumour on the bone.

SPECIES.

1. *benigna.*
2. *rachitica.*
3. *cancrosa.*
4. *scrophulosa.*
5. *scorbutica.*
6. *syphilitica.*

CLASS IV. LOCALES.

ORDER VII. ECTOPIÆ.

GENERA.

134. *Hernia* - - - - { The displacing of a soft
part, covered by the com-
mon teguments. A rup-
ture.
135. *Prolapsus* - - { The protrusion of a soft
part uncovered.

SPECIES.

1. *exophthalmia*.

- a. *hydropica*.
- b. *purulenta*.
- c. *cancrosa*.
- d. *traumatica*.
- e. *ab exostosi*.
- f. *a polypo*.

2. *blepharoptosis*.3. *hypostaphyle*.4. *paragloss*.5. *exania*.6. *hysteraptosis*.

136. *Luxatio* - - - The disjoining of a bone.

CLASS IV. LOCALES.

ORDER VIII. DIALYSES.

GENERA.

137. *Vulnus* - - - - A wound.
138. *Ulcus* - - - - { An ulcer discharging pus
or ichor.
139. *Herpes* - - - - { Tetters, or an assemblage
of little creeping ulcers,
itching much, and not in-
clined to heal, but ter-
minating in furfuraceous
scales.

SPECIES.

1. *farinosus*, or tetters.
 2. *pustulosus*, or scald head.
 3. *miliaris*, or ring worm.
 4. *exedens*, or shingles.
140. *Tinea* - - - - { *A scald head.* Small ulcers
at the root of the hairs,
which produce a friable
white crust.
141. *Psora* - - - - { *The itch.* Small pustules
with watery heads, ap-
pearing first on the wrists,
and between the fingers.
Contagious.
142. *Fractura* - - - The fracture of bones.
143. *Caries* - - - - The decay of bones.

APPENDIX.

1. *Gas oxygenium.*
2. *Gas azoticum.*
3. *Gas hydrogenium.*
4. *Gas acidum carbonicum.*

These factitious airs promise, under the skilful management of Dr. BEDDOES at the Hot Wells, Bristol, and especially under Dr. THORNTON in London, to be a remedy well worthy public attention.

The *oxygene air*, in a properly diluted state, is a stimulus the most natural and diffusive. It promotes the insensible perspiration, greatly aids digestion, favours sleep, exhilarates the spirits, and relieves difficult respiration. It is found of the highest use in the low nervous fever. The *azotic air* abates inflammation, and with the *hydrogene air* seems to be capable of arresting the progress of consumption. The *carbonic acid air* is a most powerful antiseptic.

These Gases are frequently useful adjuncts to the powers of other medicines, and combined perform cures, where neither would alone. Vide BEDDOES'S "*Considerations relative to Factitious Airs,*" and THORNTON'S "*Philosophy of Medicine.*"
