AND THE

### UNITED STATES OF NORTH AMERICA, AND CHINA.

Every line a lesson-every page a history.

"Statesmen and legislators should be men of superior intellectual attainment, and sound education; they should be profoundly versed in history, especially the history of their own country, and more especially that portion of it to which the least attention has hitherto been paid, viz. the condition of the great mass of the Population at different periods; and of the influence of existing laws and institutions in improving or deteriorating that condition: they should be conversant with Statistics, familiar with the details of numbers, extent, occupation, &c., of the different Provinces of the British Empire, and of the countries with which she has intercourse, whether commercially or politically: they should be able to select, combine, and arrange all these materials with the master-hand of true philosophers."

# SUMMARY of the 82 Pages 9 - 90, shewing the proportion of the POPULATION of GREAT BRITAIN; engaged in, and dependant on, each great branch of PRODUCTION and OCCUPATION.

The first Lord Ellenborough in his place in parliament once stated that there were upwards of 3,000,000 Persons in Great Britain, engaged in, and dependant on the Woolen Manufacture; the Ediburgh Review more recently americal, that upwards of 1,000,000 Persons were so occupied and dependant; from the Statement below, it will be seen to be doubtful, whether in all its variety operations, more than 250,000 (certainly not 300,000) Persons, are engaged in, or dependant on that branch of industry:—similarly mistaken notions almost universally prevail, in regard to the greater or lesser extent and importance of each great branch of Production and occupation: in a work entitled "Results of Mackinery," published in 1831, under the superintendance of the Society for the Diffusion of Useful Knowledge, it is stated that "in consequence of Machinery and all sorts cheaper, and therefore causing them to be more universally purchased, it has really increased the demand for manual labour," and in support of this assumption, at page 93, it is asserted that "Richard Arkwright, a barber of Preston, invented in 1769, the principal part of the Mackinery for spinning Cotton, and by so doing, be gave breat to about two millions of People, instead of fifty thousand;" and at page 106, in adverting to the Sirk Manufacture, it is further asserted that "the higher pride of the present day, is, that we buy three millions and a half pounds of Raw Silk from the Stranger, employ half a million of our own people in the Mackinery, and sell it to the Stranger, and our own people at a price as low as that of the Calico of half a Century ago. In refluction of the false assumption and equally false assertion kerre stife forth, the alternation of the advectage and friends of trath is directed to the Analysis of occupations below; at the period of 1769, and for 20 Years subsequent thereto, the habitations of Nos. 1-2 and 4-5, noted with an "were so many Manufacturing Establishments, carning on an accrage from 21 to 61 V Week, which carnings supplied

The following STATEMENT shews the progressive increase of the Population in England, Wales, and Scotland, at each of the Six Ten Yearly Periods, since 1780; and the annexed Statement shews the estimated proportion of the Population in 12 Classes, instead of under three heads only, as exhibited in the return made to Parliament. Notwithstanding, the prevailing notion of Manufacturing, being the predominating interest of Great Britain; by these Analyses of the Population, it is seen, that five-sixths of the Number are dependent on Agriculture for subsistence.

STATEMENT shewing the Geographical Position of each County of ENGLAND and WALES, with Numbers of reference to the Principal Towns and Parishes in each County as exhibited in the Population, &c. &c., of 5000 of the Principal Towns and Parishes in the Kingdom; together with the distance in Statute miles, and bearing of the Chief Town of each County from the Metropolis, and also the Superficies of each County in Statute Acres.

\*\* The places printed in On Koman are Cities and Ecclesiastical Sees, and those noted with a || are Sea Ports; for the other notations, see Note to the Midland Counties. The distances imply by the Mail lines of road, some of which make considerable detours: the mean distances respectively of Vork Newcoulte, and Carlisle heing only 174, 247, and 261 miles, instead of 195, 270, and 303.

STATEMENT of the Superficies, in Statute Acres, of each County of England and Wales, shewing the proportion of each County, in a state of Tillage, in Pasture, and in Wood, Unproductive, &c.. The Rental of each County, according to the Property Tax Returns of 1815, together with the average Rate of Acre of the entire Superficies, the amount of the Parochial Assessments, and of the Land and Assessed Taxes, in each County, in 1829. The proportions in a state of Tillage, Pasture, &c., does not profess to be founded on any very accurate data. The Total Superficies of York is 3,815,040 Acres, but the subdivision of the three Ridings is probably not accurate

STATEMENT showing the POPULATION of each County of ENGLAND and WALES in 1700, compared with the Number in 1831; and the Number of Houses Assessed to the House Tax in each County, at each of the 5 Periods 1690, 1708, 1781, 1823, and 1830.

\*\* A Return made to Parliament in the Session of 1822, represented 492,282 Houses only in all Great Britain, charged with duty on the Assessed Taxes in the year 1821; but in the Session of 1825, the Chancellor of the Exchequer stated that there were 527,649 persons chargeable to the tax, 171,739 of whom were assessed at Rentals under £ 10 \(\psi'\) annum, which he then proposed to exempt: supposing the Chancellor of the Exchequer's Statement and the Return of 1823 both to be correct, it left 187,981 Houses (including the total number assessed in Scotland) chargeable to the Tax assessed at Rentals of £10 to £20 \(\psi\) annum. According to the Return of 1830, the Number assessed in England and Wales at Rentals of £10 to £20 was 182,424; and 17,915 in Scotland in addition to 17,787 in Scotland at above £20, and 139,806 Farm Houses in all Great Britain occupied by Tenants (exempt.)

The above Statement shews the change that has taken place in the relative importance of the English Counties since 1700, in a more perspicuous point of view, than any in which it has heretofore been exhibited; the increase is seen to preponderate greatly in the Manufacturing and Mining Districts, while the Statement of the Population of the Principal Towns of England and Wales, shews that the increase of the Agricultural Counties is principally in the Towns; so, that the Rural Population of England, as, in the Agricultural Counties of Scotland, appears not materially, if at all, to have increased since 1700. The ratio of increase in the aggregate of the Kingdom in the 10 Years ending with Easter 1831, is less than in the preceding 10 Years, which may be accounted for by the large Number of Soldiers and Seamen, dispersed over the Country between 1815 and 1821, making due allowance for that extraneous excess, during that period, the ratio of increase from 1821 to 1831 is remarkable for its uniformity.

STATEMENT shewing the proportion and parts of SCOTLAND, engaged in Manufacturing, distinct from the Agricultural and Highland Counties, with the annual Value of Real Property in each Division; by this Analysis, it is seen, that the increase of Population since 1755, has been wholly concentrated in the Towns and Manufacturing Districts, and that while in the 75 Years, the Total Number has doubled, the Agricultural Population has remained stationary. The gregarious tendency, and preponderance of Town Population, which this Statement shews to have prevailed in Scotland, whether considered as a question of general Policy, or of individual advantage, merits the serious regard of a Wise and Paternal Government; the suggestions which the preponderance excite, are too numerous and important to be entered upon here, they will be found adverted to, in the introductory Pages.

There are two disparities, noted with an \* which require explanation; the Number of Families in Dunfermine Burgh in 1811, are stated at 5,001, the 5 should doubtless have been 2, it of course alters the Totals and proportions of the Columns to which it applies; The Parish of Govan in the under Ward of Lawark in 1811, included a part of the Gorbals of Glasgow, which in 1821, was returned under that head, take the 2 lines of Under Ward and Glasgow together, and the disparity is reconciled.

STATEMENT shewing the Geographical Position of each of the 32 Counties of IRELAND, with the distance in Statute miles and bearing of the Assize Town of each County from Dublin; shewing also the Superficies of each County in Square Miles, and in Irish Plantation acres, with the Number of Houses and Inhabitants to each Square Mile, and the proportion of Acres to each Inhabitant in 1821. \* \* The 4 Archiepiscopal Sees, are printed in Old Roman CADICALS, and the 18 Bishopricks in Old Roman, the Assize Towns are printed in SMALL CAPITALS, except where they are Bishopricks, those noted with are Sea Ports, and Ports of Entry, with Custom Houses; and those noted + or a return respectively 1 and 2 Members to Parliament, the Counties

and Ports of Entry, with Custom Houses; and those noted † or [ return respectively I and 2 Members to Parliament, the Counties noted § are Interior, and the others Maritime.

\$\sim\$ Cape Clear, the S. W. extremity of Ireland in the County of Cork, is in North Latitude 51° 19° and 9° 24° of West Longitude; and Fair Head, the extreme N. E. point in the County of Antrim, is in Latitude 55° 44° North, and 6° 2° of West Longitude, a mean line of 307 Geographical, or 356 Statute miles. Cansore Point, in the County of Wexford, is the extreme S. E. point, and is in Latitude 52° 11° North, and 6° 20° of West Longitude. The County of Kerry, extends further West than Cape Clear; the Blaskets, off the North point of entrance to Dingle Bay, being in 10° 22° of West Longitude,—this is the most Westerly Point of all Ireland: the average mean length of which from North to South, is 2° 46° Degrees of Latitude, and the mean average breadth about 3 Degrees of Longitude, which accords with the Square miles as below The Degree of Longitude in the Latitude of Ireland, being about 36½ Geographical miles.

Athlone, see No. 4, is seated on both banks of the Shannon, just below Lough Ree, and is mostly in Roscommon.

| These 13 Counties form the South Lettlands of Scottand,     |  |
|---|--|
| and are separated from the Highlands by the Istinuus be     |  |
| tween the Frith of Forth on the East, and the mouth of the  |  |
| river Clyde on the West. During the possession of principal |  |
| Chain of Ports across this Isthmus, as a barrier to protect |  |
| the Lowlands from the incursions of the Picts, and other    |  |
| Inhabitants of the Highlands; since 1767, in a line         |  |
| nearly parallel with that on which the Wall and Forts for-  |  |
| merly stood, a Canal has been formed which unites the       |  |
| Waters of the Eastern, with those of the Western Coast,     |  |
| see Note at foot of page 26. In the Occueral Acpoint of the |  |
| Agricultural State of Scottand published in 1914, and       |  |
| Countries noted with an are council assessed,               |  |
| The Waters of Nos. 1-3 run South into Solway Frith; of      |  |
| 4-6 West, or N. W. into the Frith of Clyde; of 7-11 East    |  |
| into the North Sea; and of 12-13 E. N. E. into the Frith of |  |
|   |  |

CENTRAL DISTRICT.—The County of Bute, is form the Isles of Bute, Arran, & Cambrar, in the Frith of C see page 26. The North part of Dumbutcon, and the tern parts of Stirling and Perth, form the South part of Highlands: the Waters of Dumburton and the South part of Stirling fall into the Clyde; those of the East p Stirling, and of all Perth, fall into the Eastern of Sea. Clackmannan and Kinross, are insulated Distribe S. E. part of Perth; and Fife is a Peninsular Distribut between the Friths of Forth and Tay.

Noarn East Lowlands,—lying between the Tay a South, and Murray Frith on the North, and bounded East by the North Sea. The North and South Esk, the the North Forthers, and Ugic rivors, which water 21-3, run S. E. or E. into the North Sea; and the Da the Spey, the Findhers, and the North, which int Nos. 24-6, run N. or N. E. into the Murray Frith, be Knmarid's Head and Fort George,—see Note at He page 41.

Glen-more-na-HAlabin, or the great Glen of Col-in a direction from the head of Murray Frith S. W. t. Linne, through which a chain of Lakes have been into a Canal for Vessels drawing nearly 20 feet of divides the mainland of Inverness into nearly two parts,—see Note to Nos. 782, &c., and at head of pag Nos. 28-31 are all North of this Glen, and form a prominent division of Scotland, usually called the Highlands. The County of Argyle is composed of s Peninsular Districts and Islands Westward of Ayr, barton, and Perth; and forms in itself another I Division of the Kingdom; its Islands form the So sion of the Hentroes, which flank the whole of Coast of Scotland, between the Latitude of 55 22: North. The Orkneys and Shetlands are other CI Islands, extending North to the Latitude of 61 15

STATEMENT shewing the Total Number of Baptisms and Burials, in each County of ENGLAND and WALES, in each of the 7 Years 1798-1804. \* \* \* \* \* The Baptisms and Burials for these Years, have been distinctly exhibited in consequence of its appearing to have been one of the most remarkable periods in the History of the Country; a period in which the whole World, either openly or insidiously were in hostile array against Great Britain. Yet, as appears by the General Statement of the Baptisms and Burials, in all England and Wales, after the first effects of War hod subsided, contrary to all received optimion, as to the effects of War upon the progress of Population; England and Wales exhibits on unprecedented increase; the excess of Baptisms were Burials in 1798, considerably exceeding the like excess in any former Year, which progress of increase however was very sensibly checked, by the unprecedented high money price of subsistence in the Years 1800 and 1801: but, the increase since that period is still more remarkable, and the inequalities of the effects of the price of subsistence in those two Years is a feature of the account deserves particular attention; some of the Counties appear to have felt the effects in 1800, and others not till 1802 and 1803. 'If The Returns up to 1800, were incomplete, the Numbers affixed to some of the Counties, imply the Number of Parishes, or Chapelries, whose returns were deficient: from those noted with an \* they were considered complete;—see Note to General Statement of all England and Wales

STATEMENT shewing the TOTAL POPULATION in each County of England and Wales, as enumerated at each of the Three Periods 1801, 1811, and 1821. The Counties arranged in Order of their Total Population in the latter Year. The Total Number of Marriages, Baptisms, and Burials, in each County, in each of the Ten Years ending with 1790, 1800, 1810, and 1820. The Ratio of Marriages, in each of the 10 Years ending with 1800, 1819, and 1820, to every 1,000 of the Population in each County, as enumerated in each of those Years, and the Ratio of Baptisms, and Burials, in each County to every 100 Marriages, in each of the Ten Years ending with 1790, 1800, 1810, and 1820, together with a Column shewing the rate of increase on every 100 of the Population, in each County, in the Twenty Years ending with 1820.

\*.\* The Statement below will be seen to be a continuation of that on the preceding Page, and to contain an exhibition of the progressive change in the procreative and decremental state of the Population of England and Wates, in the Forty Years ending with 1870. The Parish Register Returns up to 1890, were more or less defective, those from the Commiss only noted with an \* in the first Column of the Ratio of Marriages being considered complete. The Totals for each of the Ten Years ending with 1790, and 1800, contain 162,343 Baptisms, and 113,345 Burials, more than the details, a Summary of additional Returns to that amount being included in the Totals, this defect in the Returns will be seen to affect the fair comparison of the Numbers in the Counties with one another, but not the Ratios, which is the more and most important feature of the account, and one which will be seen to deserve in a very high degree the attention equally of the Statesmen, Physiologists, and Moralists, of all Countries. It has been a generally received opinion that Marshy Countries or districts, are unfavorable to an increase of Population, as well from their tendency to retard or check fecundity, as accelerating Mostality. The Counties of England which wholly or partially come under the denomination of low Countries are Numbers 8, 11, 12, 36, and 41, which Counties will be seen to exhibit the greatest changes both in the increase of Births and decrease of Mortality, but it is a fact worthy of being known to the patriotic and philosophical enquirers of all Countries, that during the period of the unportant changes which the account below exhibits, the Marshes in the Counties in question have been converted by drainage from dreary and pestilential Wastes, to the most productive tracts in Europ

STATEMENT shewing the Total Number of Baptisms, and of Burials, in each County of ENGLAND and WALES, in each of 14 different Years from 1700, to 1820. The Counties arranged in Order of their Total Population in 1821. \* \* The Years selected for exhibition have been as follows, Viz. 1700, as the first Year of the Period, and in which the Baptisms exceeded the Burials by nearly 20,000, whilst in 1710, 1720, and 1730, the Burials exceeded the Baptisms in the latter Year by upwards of 15,000. In 1740, the Baptisms exceeded the Burials by only 1,984; In 1750, by 25,498; In 1760, by 31,431; In 1770, by 32,577; In 1780, by 29,826; the four following Years exhibit an increase of 3 to 7,000; and in 1785, the Year of Peace after the American War the excess of Baptisms and Burials amounted to 51,759.—see Continuation of Note on following Page.

•.\* From 1785, to 1792, the increase was progressive, the excess of Baptisms over Burisls in the latter Year having been 78,653. The War declared in Pebruary 1793, appears to have diminished the Number of Baptisms, and increased the Burisls, so that in 1795, the excess was only 43,890, while the excisements occasioned by the high money prices in 1796 - 8, increased the excess again in 1798, to 81,024,—the next Year exhibited is 1891, which exhibits the greatest change of the whole, occasioned doubtless by the unprecedented high money price of Subsistence in the preceding Year. In 1801, in the Metropolis, and the Counties of Lancaster, Warnetter, the Barrials will be seen to have exceeded the Baptisms, whilst on the other hand the Agricellural Counties of Norfolk, Lincoles, Sunfolk, Cambridge, and Sussex, appear not to have been at all affected by the change, an exception which descress particular attention, inamuch as at a later period they appear to be Counties in which the pressure of Parochial bustlens have been the most severely icit. The Peace of Amicus in 1802 - 3, appears to have produced the usu. I effects of a considerable increase of Baptisms, and 1804 exhibits a sensible decrease of Burislas, so that the excess of Baptisms over Burisla in 1810, was only 90,600. The general Peace in 1815, again produced an increase of Baptisms exceeding 22,600, and the excess of Baptisms over Burisla in that Year, will be seen by the aggregate Statement of all England and Wales to have amounted to 147,523, which in 1818, was reduced to 117,760: on comparing these results with the Money Rate of Wages, and price of Subsistence, which will be found in other parts of this Work, they appear to have produced a sensible effect upon the Physical, and Social condition of the People, as far as such evidence warrants any conclusion being draws on the subject.

STATEMENT of the Total Number of Marriages, Baptisms, and Burials, in each of the Five Divisions of the METROPOLIS of GREAT BRITAIN, in each of Nine Years from 1700 to 1780, and in each of the Forty Years 1781 – 1820

\*\* The Topographical exhibition of the Parishes which compose the British Metropolis, will show the extent of its Population at different Periods, and the direction in which it more particularly inclines to extend, the Numbers in the City of London within the Walls, appear to have sensibly duminished, to which diminution, various causes have contributed. The Seite of the New Post Office completed in 1829, occupied a space which in 1801, contained more than 1,000 Inhabitants. The Bank of England, and other Public Buildings, at earlier Periods displaced proportionate Numbers, but the main cause of the seeming diminution of Numbers in this division of the Metropolis arises, from the tendency which has prevailed for many Years past, to desert it as a permanent residence, by which most of the Largest Houses are now used only as Offices for Business during the day. 15-11 will be noticed that from 1801, there appears a sudden diminution in the City of London without the Walls. This arises from the Parishes of St. John Horsley Down, and of St. George, St. Olave, St. Saviour, and St. Thomas, in the Borough of Southwark, up to 1800 inclusive, having been included in that division; but subsequent to 1800, in the division of Ont Parishes, within the Bills of Mortality, which reconciles at the same time the otherways seeming disproportionate increase subsequent to 1890, in that division. The relative difference between the Baptisms and Burials in each of these divisions is a feature that deserves attention.

\*.\* The Statement below shews the aggregate result of the Parish Registers of the Metropolis, composed of the five Divisions, as exhibited on the preceding page, and distinguishes the proportion of Males and Females, both Baptised and Buried, and the excess in each Year of Burials over Baptisms, and the converse. Although in the aggregate of all England and Wales, the Baptisms have considerably exceeded the Burials in each Year since 1740, the excess of Burials over Baptisms in the Metropolis, will be seen to have continued down to 1801, since which Year a striking change has taken place in the relative increase of Baptisms, and decrease of Burials in every part of the Country; it deserves attention that whilst in Lancashire, the West Riding of Yorkshire, and some other parts of the Country, the Burials in 1801, very considerably increased, there was in the Metropolis contrary to what might have been expected a very considerable diminution. The Statement of the Total Number of Baptisms and Burials, in all England and Wales, in each of the Seven Years 1798-1894, will shew more clearly the Counties and the Years in which they were affected by the high price of Subsistence in 1800-1, in some it seems to have produced its effect in 1800; in others, in 1801; and in others, not till 1802-3; and in Norfork, and one or two other Counties, but little or no effect appears to have been produced.

‡‡ The Columns below shew the Total Number of Baptisma and Burials in that part of the Metropolis included within !!se Bills of Mortality, which comprise the first four divisions of the account on the preceding page. The Worshipful Company of Parish Clerks Publish annually, a Bill of Mortality, which is copied in general into all the Newspapers, but as inaccuracy involves no penalty, the details are not deserving of any very great confidence, although one Year with another, they are perhaps tolerably near approximations to correctness.

27 For the Diseases which occasioned the great Mortality in 1762-3, as well as generally,—see Statement of the Mortality of the Metropolis. The Assixe of Bread was discontinued in 1815,—see Statement relating to the Importation and Exportation of Grain. The Weight of the Quartern Loaf was 4 lb, 5 oz. 10 drs.

STATEMENT shewing the Number of Marriages, Baptisms, and Burials, in the Counties of LANCASTER, and in the West Riding of YORKSHIRE, at Periods of 10 Years from 1700 to 1780, and in each of the 40 Years 1731-1820; distinguishing in the Baptisms and Burials the proportion of Males and Females, and the excess of Baptisms over Burials. \*\* The Population of these 2 Districts in 1820, was as 10½ in Lancashire to 8 in the West Riding, whilst the Deaths as indicated by the Burials in the 10 Years 1811-20, will be seen to have been in the proportion of 18 in Lancashire to little more than 12 in the West Riding. This is an additional confirmation to the numerous others shewn in various parts of this Work, of the deleterious effects upon Human life of the Manufacturing operations of Lancashire, notwithstanding which, numbers seem to press towards the vortex with accellerating force; and the difference of the Mortality of these 2 Districts from the similarity of their pursuits is remarkable and merits investigation. The results exhibited of the Baptisms and Burials of Lancashire prior to 1780, imply its being naturally favorable to health and longevity. The effects of the high Money price of Subsistence in 1800-1, appear to have effected Lancashire in a far greater degree than any other part of the Kingdom, the result together with the great reaction in the 3 following Years deserves attention.—see Notes to the other Statements relating to this same subject.

STATEMENT of the Total Number of Marriages, Baptisms, and Burials, in all ENGLAND and WALES, at each of nine Ten Yearly Periods from 1700 to 1780, and in each of the Forty Years 1781-1820; shewing the excess of Baptisms over Burials in each Year. \* In the first Return of Abstracts from the Parish Registers of the Kingdom made to Parliament in 1801, much difficulty was experienced in obtaining Returns from several Parishes, but ofter repeated applications 280 Places only remained from whence Returns could not be procured. (Vide Folio 449, of the Abstract printed in 1801.) and those on enquiry proved to be principally Chapelries, whose accounts were probably included in the Returns made from the Registers of their respective Purent Churches, and the Totals of the 20 Years 1801-20, include the unentered Marriages, Baptisms, and Burbals, as well as the Registered, so that the account below may be considered as exhibiting a tolerably near approximation to a correct view of the progressive increase of Numbers since 1740. The Years most remarkable for change are noted with + plus, or — minus. The period 1710-40, (comprising the 27 Years of Pouce which followed the War in the Reign of Anne) seems to have been a period of depopulation. The decrement however appears not to have been general over the whole Country; in Yorkshire and the Four Northern Counties, as well as in the Counties of Derby, Stafford, Gloucester, Hants, and Sussex, the Baptisms exceeded the Burials; the parts of the Country in which the Burials more particularly exceeded the Baptisms, were the Metropolis, Wales, and the Counties of Lancaster, Lincoln, Chester, Bedford, Berks, and Somerset.

\* This account up to 1821, has been compiled from the Appendix to the Report of the Select Committee on the Poor Laws,— Vide Folio 517. Vol. 5. of Papers, Session 1822, and the remainder from accounts laid before Parliament annually since that time, the average Price of Wheat in this Statement, will be seen to differ from those in the accounts relating to Grain, the reason is that these are made up from the 25th. of March, to the 25th. of March, whilst the others are made up from the 1st. of January, to the 31st. of December, see further,— Summary of Parochial accounts.

The Number of Children in the County of Middlesex belonging to those permanently relieved out of Workhouse in 1802-3, was 4,347 under 5 Years of Age; and 6,590 from 5 to 14, and out of the Total Number relieved 8,407 were above 60 Years of Age, or disabled from labor by permanent illness or other infirmity: of the amount expended for maintenance of the Poor in the same Year, £ 224,048 was the proportion for those maintenance of the rate of £ 14 10 W head.

On referring to the Statement of the Assessment and Expenditure of the several ont Parishes of the Actropolis, the rate W head for maintenance of the Poor in Workhouse, in the Year ending Easter 1803, will be seen to vary from £ 6 18 0 in St. John Wapping, to £41 13 2 in St. Mary Islington; this disparity (admitting the accounts to be correct) bespeaks extreme insufficiency on one side, or great profusion on the other; but, the probability is, that the disparity arises more from the want of method and competency in making up the accounts than from any actual difference in the scale or cost of subsistence; items which in one case will be charged under one head, will in another case be charged under other heads, precluding all fair comparison, and thereby showing the desirableness for some uniform mode of account being adopted and enforced into practice, in all the parishes of the Kingdom. and enforced into practice, in all the parishes of the Kingdom.

STATEMENT shewing the amount of Money Expended for the Relief of the POOR, in the Cities of LONDON and WESTMINSTER, and in each of the principal Parishes and Districts, within the COUNTY of MIDDLESEX, in the Year ending Easter 1776; annually, on an average of the three Years ending Easter 1785; in the Year ending Easter 1803; and annually, in each of the 17 Years ending Easter, or the 25th. of March 1829.

The feature first deserving of attention in the above Statement, is the large amount expended for the relief of the Poor within the Walls of the City of London; which relatively, very considerably exceeds, the amount expended for the like purpose in any other place in England; the Church, Bye Highway Rates, Law Charges, and other local Rates, also exceed in the like proportion, the similar charges in any other place; it is deserving of attention, how far so many small Parishes, might be formed into five, or fewer Divisions for Parochial purposes; Bristol, Norwich, and other places afford precedents, and reference, for the consideration of adopting such a measure: most of the out Parishes exhibit extraordinary increases since 1776; but, the Population of those Parishes, has, since that date increased in corresponding proportions, whilst the City of London within the Walls, has progressively decreased in Population, (see Note to Statement of the Population of each of the '17 Parishes.) The operative part of the Silk Manufacture, prevails more particularly in the Parish of St. Matthew, Bethnall Green; and Mile End, Old Town; partially in St. Leonard, Shoreditch; and very partially in the Parish of Parishes. Church, Spitalfields, is the original seat of the Manufacture, and in which many of the principal employers still reside, but the Parish being circumscribed, it precludes any extension of Population, within its limits, and occasions the spreading of the operatives over the adjoining Parishes. For 60 Years previous to 1823, the Rate of Wages for Weaving of Silks in this District had been regulated by legislative enactments, and during the whole of that period, the District enhabled, relatively, less poverty and Parochial burthen, than any other Manufacturing District in the Kingdom; in the Session of Parliament 1823 all those enactmens were repealed, whereby the employees became more directly subjected to the will of the employers,—see the effect, as exemplified above, in the difference of Parochial Expenditure.

STATEMENT shewing the Amount of Money expended for the Relief of the Poor, in each of the 14 Parishes and Districts, forming part of the Metropolis; and the Total thereof: and also of the annount in the like manner expended for the same purpose, in each of 15 of the principal Cities and Towns in different parts of the Kingdom, in the Year ending Easter 1776; annually, on an average of the three Years ending Easter 1785; in the Year ending Easter 1803; and annually, in each of the 1? Years ending Easter, or the 25th. March 1829; shewing also the Estimated Value of the Real Property according to the Property Tax Returns of 1815; and the Population of each Parish, District, City, and Town, at each of the 3 Periods 1801, 1811, and 1821. The following features of this account deserve attention, Viz.; 1st., the inconsiderable amount in Liverpool, being only in the proportion of 1 to 6, as compared and Leicester, between 1815 and 1823; 4th. the large amount of Birmingham, as compared either with Sheffield or Manchester; 5th. the Panics of 1816 and 1825 are strongly manifested in Manchester.

STATEMENT shewing the Number of Houses, assessed to the *House and Window Duty*, with the Rental at which the Houses were assessed, in each of 16 Classes, from l. 10 to l. 400 \(\psi'\) annum, and upwards; and the Houses in 10 Classes, having 8 to 180 Windows, and upwards, in each of the Eight Great Metropolitan Divisions, within the County of Middlesex, and the Potal of the County, in the Year ending the 5th. of April 1830; shewing also the Total Number assessed in the County of Middlesex, at Rentals of 1. 20 # annum, and upwards, and having 10 Windows, and upwards, in the Year ending the 5th. of April 1823, and the Rate at which assessed for the House Duty.

\*\* According to this Statement, the Number of Houses in the County of Middlesex, assessed to the House Tax at Rentals of L20 4f' annum, and upwards, have increased 12,561, since 1823. In 1821, the Total Number of Houses Inhabited in the County of Middlesex, was returned at 152,969, which in 1831, will probably have increased to 180,000; 495 of which being Farm Houses occupied by Tenants, are exempt,—leaving upwards of 63,000 Houses below L10 4f' annum Rental: The Return of Houses assessed to Window Duty in 1823, was in Six Classes only, as follows, Viz. having from 10 to 14 Windows; 15 to 19; 20 to 29; 30 to 39; 40 to 49; and 50, and upwards; this Classification precludes a fair comparison being made with the Return of 1830; but, as far as inference serves, the Number appears not to have increased.—see following Page, and Note thereto. \*\* The Figures at the head of the Columns refer to the Number of the Parishes in the Topographical Arrangement of the Metropolis;—see the same, for Value of Property, Population, &c. of each.

<sup>\*.</sup> The difference of 1,342 in the Number of Windows, under the head of Inns of Court and Chancery is so many Chambers Assessed in those Institutions.

STATEMENT of the Number of Houses, assessed to the House and Window Duty, in each of the four remaining Divisions of the Metropolis, in the Counties of Surrey, Kent, and Essex, and the Total of the Metropolis; shewing also the Number assessed to the like Duties in each of the Counties of Lancaster, Somerset, Gloucester, and Sussex, as containing the greatest proportion of Houses assessed at high Rentals; the Totals exhibited in comparison with the Total in each Class of assessment, in all England

and Wales, arranged to correspond with the Statement on the preceding Page.

\*\* The Total Gross Receipt of the House Duty in all England and Wales, in the Year ending the 5th. of January 1830, as credited in the Finance Accounts for that Year, was l. 1,241,791; the proportion of the Metropolis as exhibited below, being l. 770,166, exceeds of the whole; it is proper, however, to observe, in regard to this comparison, that the Duty on l. 11,154,109 of Rental, in all England and Wales, at the Rates of Duty, as exhibited on the preceding Page amounts to l. 1,327,940; whether the difference of l. 86,149 arises from arrears, awards on appeals, or from some other cause, cannot here be determined; the difference deserves consideration, in forming an estimate of the proportion between the Metropolis, and all England and Wales: the Rate of Duty on Windows, varies in a way to preclude the forming an estimate of the proceeds of the Duty from the Statement below, but the fair inference is, that the proportion of Amount which the Window Duty in the Metropolis, bears to the Duty in the whole of England and Wales, is about one-third.

STATEMENT shewing the various Offences, for which the Persons in the preceding Statement were Committed, and the proportion against whom no Bill was found, the proportion Acquitted, and the Number Convicted, shewing also the several degrees of Punishment inflicted on those Convicted, and the Number Executed, in each of the 25 Years 1805 - 1829.

\* These Statements it must be admitted, exhibit a very unfavorable picture of British Society, more especially so when it is considered, that they exhibit only those Criminals who have been committed for Trial at the Assizes; the Numbers Committed under Summary Process, exceeding those Committed for Trial at the Assizes, by several thousands annually: nor does the subject appear more favorable when viewed in comparison with the extent of Crime in other Countries, as will be seen by the Statement of following Pages; and when viewed in comparison with the extent of Crime in England from the middle of the last Century as far as the account of the Number of Convictions in London and Middlesex serves for a comparison, the result is fearfully unfavorable; it is some-

what consolatory however to see, that the more atrocious offences against the Person, have not materially increased.

A Return of the No. of Persons convicted of Forgery, or passing of Forged Notes of the Bank of England, in each of the 33 Years 1797-1829, represents 1138 Persons to have been convicted in the 6 Years 1816-1821.—Vide Par. Paper No. 442, Session 1839:

whilst the Statement below represents only 767 to have been convicted in those 6 Years in all England and Wales!!!

The annexed STATEMENT exhibits the annexal arer. No. of Capital Convictions & Extentions, in London and Middlessex, during the 81 Years 1749-1819. The account for the Years 1749-1817, was presented to Parliament in the Session of 1818, Vide Vol. XVI., of Papers of that Sension;—it was at first considered that the Convictions applied to all who were not either acquited or against whom no Bill was found, but on perceiving the vast disparity between the Total Number of Convictions since 1817, when compared with those of previous Years, it led to a further investigation of the accounts, when it proved, that the Number Convicted comprised those only who were Sentenced to Death, termed Capital Convictions; and hence, it will be perceived that the annexed account affords no just criterion of the relative extent of CRIME, at the different periods in the aggregate; inamuch as the spirit and temper of the Consta and the Times may have tended considerably to influence the nature of the Sentences; the Number of Executions when relatively considered will be seen to have greatly diminished, but whether as a cause of less structly of CRIME, or a less sanguinary infliction of Punishment does not appear. For the Years 1811-22, of the account below, see Folio 282, Appendix to Report on the Police of the Metropolis, Sension 1823; and for all other Offences in 1812, (line 3) 71 were for taking and diministering unlawful oaths; 21 for Frame breaking and destroying of Machinery; and 13 for High Treason: the Numbers (larvy, the Numbers Committed for Burglary, (line 4) shewing a corresponding diministering to Burglary, the Numbers Committed for Burglary, (line 4) shewing a corresponding diminintant.

G

STATEMENT shewing the Amount of the County Rate, distinguishing the proportion Expended under each of thirteen ansferent Heads, in each County of England Wales, in the Year 1823.—VideParliamentary Paper No. 356, Session 1824.

\*\* The details of this Account do not exactly correspond with the Totals; in the Official return the details are diffused over 20 folios of Fools Cap, without any regard to uniformity; but as no point is attempted to be established upon the accuracy of detail, it was not thought worth while, in this case, to sacrifice more time in that investigation: the account, as it is, being sufficient to show the general nature and extent of the County Rate. The Cities of Exeter, Canterbury, Lichfield, and Worcester, and the Town of Poole, as well as the Cities and Towns specified below, each keep separate accounts, but the amount was deemed too trifling to insert in detail, the aggregate of the five places being under £ 2,000. The Column of incidents, in some cases below, where the amounts are large, include payments on account of Debt paid off, &c. without being separately specified.

The following is a Statement of the amount of Dutter, teried Trude of the Empire, at the Port of Canion, in the Season of 1872 On the Traite of the East India Company Country Trade American do.

After much deliberation on the several works which have heretofore been published relating to China, the above Statements have been adopted as most entitled to regard, at the same time the above Statements present some such striking discrepancies as to excite a doubt in regard to their accuracy;—for instance, the Province of Shen se, containing seven cities of the first class, and ten of the second class, contributing 1,699,32; Tales of Revenue, and maintaining a Military Force of 104,000 men, is represented as containing only 257,704 inhabitants; while Yun-nan a Province said to be rich in Minerals, Silk, Tea, Musk, and other choice productions, and carrying on an extensive intercourse with Birmah and Sium, is represented as contributing only 243,827 Tales of Revenue. The data relating to Kwei chou and the Metropolitan Province of Chih-le exist nearly corresponding doubts, yet these data were submitted to the Committee on the Affairs of the East India Company by Mr. Crawfurd, in the Session of 1830; and what is more unpardonable in a gentleman of Mr. Crawfurd's reputation, and general claim to respect, is, that in reference to a Geographical Statement of the travelling distances of the several provincial Capitals from Pekin, he represents the distance of Canton at 2720 English Miles, while the Geographical mean distance is only 1182 English miles; all the other distances are nearly as preposterous,—see page 51; in like manner Du Halde represented the Revenues as amounting to 200,000,000 Tales, which amount has been adopted as authentic and accurate, by the compilers of the Encyclopedia Brittannica,—so much for names. The competency of Mr. Thomas which amount has been adopted as familiarity with the lunguage of China, qualified him to judge correctly of the accounts which came before him, and the circumstantiality with which he has stated them, leaves but little doubt of their being accurate. The Population Statements however are palpably erroneous, Sir George Staunton's numbers in some cases, seeming as much over rated as Mr. Crawfurd's are under-rated. It is much to be regretted that subjects of this nature should have so long remained questionable.

The Province of Yun-nan, b the same time the above Statements present some such striking discrepancies as to excite a doubt in regard to their accuracy ;-for instance, the Province of Shen se, containing

STATEMENT exhibiting the 19 Provinces of CHINA, arranged in reference to their REVENUES and EXPENDITURE, with the ratio of Inhabitants to each square mile; and rate # head of Taxation in each Province; the latter as exhibited by Mr. Crawfurd to the Parliamentary Committee on East India affairs in the Session of 1830, and the Revenues and Expenditures as exhibited on the preceding page, the Note at the foot of which implies that however questionable the Statements relating to the Population may be, those relating to the Revenues and Expenditures seemed entitled to credit; -but which, on more mature reflection, appear equally unworthy;it is impossible that the Provinces Nos. 1-9, could continue to contribute such an excess of Revenue as 15 millions of Tales annually for any length of time, unless aided by a Paper Circulating Medium; and it is also improbable that Nos. 12-17, should continue to draw in specie the amounts represented; in the one case, it would lead to exhaustion, and in the other to an undue accumulation, more particularly so as there does not appear, judging from the relative extent of Population and Productions of the respective Provinces, to be any adequate means of due equalization by Commercial exchange. \* The Tea Districts are indicated by an \*, and the Notations which follow several of the Provinces imply their producing Minerals respectively as follows, Viz. -g Gold, s Silver, c Copper, t Tin, i Iron, l Lead.

PROVINCES

Estimated Money Value of Grain and Rice . .

The Province of SHAS-TUNG, is North of the Yellow River, bounded on the West by the Metropolitan Province of CHIH-LE, and North by the Gulf of Leaotong; it is an Agricultural district. The Kinng-keon, or great 5 River intersects KIANG-NAN,-GAN-HWUY being S. of that River; it is both an Agricultural and a Manufacturing district in Cotton, Silk, & Porcelain. CHI-BEANG, appears to be the most productive Province of the Empire; it produces Silk, as well as fabricating it 10 into Stuffs, and appears to be equally active in Agriculture, Manufactures, and Commerce. SHANSE, is bounded on the West for about 250 miles by the Vellow River, which separates it from SHEN-SE; East, by the Metropolitan Province of CHIH-LE, and North by
15 Tartary; it abounds in Coal, and Salt-springs, it is a pastoral rather than an Agricultural district, and has Manufactures of Woollens; the Yellow River separates it on the South from Ho-NAN, which is an Agricultural Province. The Kiang-keon, or great River divides 20 Hou-quang into two parts, Hoo-nan being on the South; it has numerous Lakes composing several hun-dred square miles of its Superficies; the bulk of its Population appears to be concentrated on the banks of great River. KEANG-SE, is South of the great 25 River, bounded on the East by the maritime Province of FOO-KEEN, and South by KWANG-TUNG, its Waters run North into the great Lake of Poyang, uniting with the great River in Latitude 30° North.

FOO-KEEN, is a mountainous and mineral district, 30 has Manufactures of Silk and Iron, and contains the Port of Amoy in latitude 24° 20' North, and 118° 45' of East longitude. The Population and Revenues of the Island of Formosa are included in this Province. KWANG-TUNG is rich in minerals, and produces both 35 Silk and Sugar. The Island of Hainan in latitude 19° North, and 110° of East longitude is included with this Province. Nos. 12, 13, are both Mineral districts, Kwei-chou, is mountainous; part of its Waters flow North into the great River, and part through Kwang-SE into the Harbour of Canton. Yun-nan, forms the S. W. extremity of the Empire, part of its Waters run S. E. through Tonkin into the Gulf of Tonkin; one of the branches of the great River Kinng-keen intersects the N. W., and the main branch for about 50 45 miles forms the boundary between YUN-NAN and SZE-

CHUEN, but its more important features are the Cambodia, Siamese, and Erabaty Rivers, all of which appear to flow from Thibet through YUN-NAN; a junction of these Rivers with the Kiang-keen might be effected at about the same cost of time and labor as that of the junction of the Ohio with the 50 great chain of Lakes in America, and thereby open a direct Water communication from the Bay of Bengal with every part of the Chinese Empire; one of the branches of the Kiang-keon, having its source in Thibet, in the latitude of 35° North, and 96° of East longitude, runs nearly due South to the latitude of 25° where it is joined by a more important Stream from farther 55 West; from this point it intersects the Province of SZE-CHUEN in a direction N. E. through 10 degrees of longitude, from whence it flows through HOU-QUANG and KIANG-NAN into the Bay of Nankin, in the latitude of 32° North, and 121° of East longitude. Shen-se, is the N. W. Province of the Empire; the Hoang-ho, or Yellow River, having its source in Tartary 60 near the head Waters of the Kiang-keon, intersects the extreme N. W. part of SHEN-SE, from whence it makes a detour North to the latitude of and 107° of East longitude; it then runs nearly due East, to the longitude of 112°, from whence it runs South bearing West to the latitude of 34° 30° North, and 110° of East longitude, forming the boundaries between 65 SHEN-SE and SHAN-SE, No. 5; at the last mentioned point of 34° 30' of North latitude, &c.; it is joined by the Hoei-Ho, another large River with numerous tributary streams, which intersect all the North part of the Province; the Waters of the more Southern part running Kiang-keou. From the point of junction just mentioned, the Yellow River
70 runs nearly due West, separating Chan-se from Ho-nan as stated line 18,
and after intersecting the Northern part of Ho-nan, No. 6, it approaches

the South part of CHIH-LE, No. 18, and then in the latitude of 34° 40° N, and longitude of 11.0° to 117° East, divides the extreme S. W. of Shantung from the extreme N. E. of Ho-Nan, and then intersects the North 75 part of Keang-500, No. 2, falling into the Bay of Nankin about 180 miles

> North of the Kiung-keou, or great River,-see line 58. The Metropolitan Province of CHINGLE, extends from the Vellow River in the latitude of 35-to the latitude of 41° North; its principal River runs North from near the City of Ho-NAN to the latitude of 59° North, where it is joined by several other streams from the West and North, when it forms the Peiho, or White River, falling into the Gulf of Leadang in the longitude of 118° East.

6,316,438

6,346,438

The City of PEKING, is seated between two branches of this River in

latitude and longitude as stated at page 51.

The Military and Marine force, specified on the preceding page is not 85 included in the Statement of Population, and in addition to those numbers Chinese Tartary is stated to contain 12,000,000 of Inhabitants, and the Country of the Manchoos 10,000; of the Mongols 30,000; of Bocharia 45,000; and Thibet 6,000. Mr. Thoms further mentions an aquatic tribe amounting to 2,000,000, a considerable number of which inhabit the harbor of Canton; it is this tribe which appears to have given rise to the mistaken notion of the extraordinary density of the Population in China, which in the aggregate is relatively more than one half less than in England; while the Provinces of Shan-tung and Chi-Keang, as far as reliance can be placed on their Northean aggregate. on their Numbers, exceed the density of England by more than 2 to 1. The aquatic tribes who live exclusively in boats on the Water, appear to

have had their origin in a ruthless tyrant driving them from land, and habit becoming engendered among them before they dared to return.

For the overland Commerce of China with Russia,—see Kiatka, page 54.

The S. W. point of the Japanese Isles is parallel in Latitude with the Bay 100 of Nankin, 8 degrees East of the entrance to the Hoang-ho and Kiang-keou Rivers. The Japanese Isles extend in a direction N. E. to the Longi-

keou Rivers. The Japanese Isles extend in a direction N. E. to the Longitude of 143 East, and Latitude 41 North, the large Promontory of the Corea from the Latitude of 35 to 43 North, having the Yellow Sea and Gulf of Leaotong on the W., and the Sea of Japan on the E., lies between 105 the Province of Pecheli, & Niphon the Northern & largest Island of Japan.

STATEMENT shewing the Geographical Position of each of the 55 Governments or Provinces of the RUSSIAN EMPIRE, with the Latitude and Longitude of the Capital City, or Chief Town of each, and its distance in Miles from St. Petersburgh; with the mean price of Rye and Oats # Chetwert in 1826,—Vide page 97. \*\* The great Geographical characteristic of European Russia is its evenness of surface, its greatest altitude not exceeding 1200 feet above the level of the Sea; it is however in many parts beautifully undulated and abundantly watered, and therefore affords the finest opportunities for social improvement:—no part of the World offers greater inducements to facilitate intercourse either by Water or Railways; the Baltic might be united with both the Black Sea, and the Caspian, at a less expence of Physical power and means than was applied to the subjugation of Poland in 1830-1831.

Tauride, is a Peninsula formed by the Black Sea, and Sea of Asoph; it is better known to Western Europe under the name of the Crimea. Keatsch-Jenicol, is on the Western Coust of the Strait leading into the Sea of Asoph. Bessarabia, lies between the mouths of the Pruth, and the Ducister ; Akermann, being seated at the Western point of entrance to the latter River. Cherson, lies between the Dneister and the Dneiper, and is intersected by the Bog. No. 4, is bounded on the East by the Sea of Asoph, and the Government of the Don-Kasacs, and is intersected by the Dneiper: Podolio, and Kiou, lie bet-ween the Dniester and Dneiper, they formed the S. E. part of Poland, annexed to Russia in 1793. Pullows, and Charcoff, Poland, annexed to Russia in 1793. Pultowa, and Charcoff, lie East of the Dneiper. Volhynia, and Bialostock, are bounded on the West by the Bug, which runs West into the Vistula below Warsaw.

Lithuania, is bounded on the West by the Niemen, which divides it from Prussian Poland, and is intersected on the E.
by the head Waters of the numerous tributary streams of the
Dneiper: Nos. 14-16, are also intersected by the main streams of those two Rivers, and are bounded on the East by Russia Proper. Nos. 17-19, are Maritime Provinces, bounded on the West by the Baltic Sea and Gulf of Finland. The Dwina River rises in Norgorod, No. 33, and runs past Witepsk,

River rises in Norgorod, No. SS, and runs past Witepsk, Potolsk, and Dunniburg, into the Gulf of Riga, the City of that name being at its mouth. Courland, is on the West; and Livonia, East of the Dwina,—the Waters of Coursk, and Voroneje, run South into the Sea of Asoph.

The Occa, or Oka River rises in Orel and Toula, runs past Calouga and Raizan into the Volga at Nignei-Norgorod; Jaroslau, and Costroma, are intersected by the main stream of the Volga, which rises in Tucer, and after running a very discriptions course wast. Javoslau Costroma & Nignei-Norgorod. circuitous course past Jaroslau, Costroma, & Nijnei-Norgorod, it runs past Cazan, Simbirsk, Saratov, and Tsaryisyn, into the North port of the Caspian Sea, where it forms on extensive Delta, on one of the Islands of which is seated the City of Astracan. The City of Moscow, the ancient Capital of Russia, is seated on the banks of a stream of the same name, or Moskwa, which falls into the Occa, between Calongu and

The Dneiper, has its source in the Government of Smolensk and runs South past Mohileff, and Kion to Jeeatrinoslau, and from thence into the Black Sca at Kherson, 120 miles East of Odessa. The Waters of Pskov, all run North to the Gulf of Finland, pertly through Lake Tchude, and partly through Novgorod into Lake Ladoga, both of which Lakes discharge their Waters into the Gulf of Finland. The Waters of the Eastern part of Novgorod run South into the Wolga, those of Olonetz and Vologda North, into the White, or Sea of Archangel; and those of Viatka and Perm, run South into the

Volga.

Finland, No. 35, was a conquest from the Swedes in 1812, it is bounded on the South, by the Gulf of Finland; and on the West, by the Gulf of Bothnia.

The Waters of Tambov and Penza, run in both directions partly East into the Volga, and partly South into the Don, one of the branches of the latter River rises in Toula, and another in Tambov, uniting at Voroncje, from whence it runs in a direction S. E. to near Zaritszyn, No. 46, on the Volga, schen it takes a direction due West into the Sea of Asoph at

Nova-Tcherkask,-see No. 48.

The Oural, or Ural Mountains, form the Eastern boundary of the Governments of Archangel and Vologda, and afterwards intersect those of Perm and Ovenburg. The Waters of the Eastern part of Orenburg, run East into the Obe at Tobolsk; numerous other streams unite at Oufa, and from thence run West into the Volga below Cazan, while the Oural River, forms the Eastern boundary from Verkhouralsk to Orskaia, from whence it runs due West past Orenburg to Ouralsk in Caucassia, from whence it runs again due South into the Caspian Sca at Gourier, forming in the whole of its course the boundary between Orenburg and Caucassia on the West, and the territory of the Kirghees on the East.

on the East.

The Waters of Siberia; the Obe, Ienicea, and the Lena, all run North into the Arctic Ocean. KIATKA, No. 54, on the Frontiers of Chinese Tartary, about 1100 miles N.W. of Peking, is the place where an extensive intercourse is carried on between the Empires of Russia and China, about 2,500,000 lbs. of Tea, with a variety of other choise products are annually conveyed from the centre of China through Kiatka to Moskow and St. Petersharch a distance of from 4.000 to 5.000 miles. Petersburgh, a distance of from 4,000 in 5,000 miles.

## INTRODUCTION

## Geographical and Statistical Display

THIRTY-THREE FORMER PROVINCES, AND EIGHTY-SIX PRESENT DEPARTMENTS OF

## FRANCE.

The contiguity of France to Great Britain, the similarity of pursuit of its inhabitants, and the superior natural and local advantages which France possesses, renders an accurate knowledge of its resources and power an object of the highest importance to the British Legislator; the accompanying display, therefore, of the local position, and relation of each of its eighty-six present Departments, and Statistical view of the Superficies, Population, Production, and Revenues of each, it is hoped, will be appreciated as a suitable part of the

present Collection of Statistical Details.

France, from North to South, extends in nearly a meridional line from Dunkirk in the Department of Nord (No. 1.) in the Lat. of 51° 2' N. to the village of Peats-de-mello, at the foot of the Eastern Pyrénées (No. 56), in the Lat. of 42° 25' N.; this line gives a mean distance of 517 Geographical, or 599 British Statute miles. The Naval Arsenal of Brest, in the Department of Finisterre, No. 23, is in Long. 4° 29' W., and 48° 23' of North Lat.; and Strasburgh, in the Department of the Lower Rhine, No. 61, is in Long. 7° 45' E., and 48° 35' of N. Lat.; the distance between these two points is 12° 14' deg. of Long., which, in the mean Latitude of 48° 29', are equal to 568 British Statute miles; a line exceeding this by about forty miles, may be drawn from West to East, within the present limits of France. From Point du Ras, twenty-eight miles South of Brest, to the extreme North East limit, forty-five miles North-by-East of Strasburgh: the mean extent, however, from North to South, does not exceed 470, and from West to East 420 British statute miles; these limits give an aggregate superficies of 197,400 square miles, equal to 126,336,000 British statute acres, exceeding the superficies of Great Britain, in the proportion of more than 2 to 1, and England and Wales in the proportion of more than 3 to 1. A report made to the French Government in 1817, computed the superfices to be equal to 128,000,000 of British statute acres, of which about 36,000,000 were reported to be unpro-

In addition to all the products common to the soil of Great Britain; the Vine and the Olive flourish over the greater part of France, the departments noted with an \* in the South East produce silk to the extent of 8 to 10 millions of lbs. in Cocons, while the Islands of Guadaloupe and Martinique, afford a liberal supply of Tropical Productions. The five great rivers, the Rhone, the Garonne, the Loire, the Scine, and the Meuse, afford the finest possible scope for display in internal navigation, independent of the Rhine and Moselle, which still further augment the advantages. The great seats of manufacture, are Rouen, Lisle, and Lyons, in departments Nos. 1, 14, and 69. The chief Ports of entry for Foreign productions, are Havre, Nantes, Bordeaux, and Marseilles, in departments Nos. 14, 24, 49, and 76.
The great Naval stations are Cherbourg, Brest, and Toulon, in departments Nos. 19, 23, and 75. The following detailed display of the

several Rivers, will suffice to show more particularly the relation of the several departments to each other.

The Scheldt and the Lys have their source in the Department of Nord, the former runs past Valenciennes, Tournay, and Oudenarde, to Ghent, where it is joined by the Lys, from Lisle and Courtray; the United Stream then runs past Dendermonde to Antwerp. The Somme, which gives name to No. 3, runs past Amiens, and Abbeville, into the English Channel at St. Valery. No. 4 was partly in Picardy, and partly in the Isle of France, in which Province was part of No. 12; and part of 13 in Burgundy.

The rivers Oise, Aisne, Marne, Aube, Seine, and the Yonne, all intersect the Isle of France; the Oise rises in the Forest of Ardennes, and runs past Guise, Chauny, and Noyon, to Compeigne, where it is joined by the Aisne from the Department of the Meuse; past Grand Pre, Rethel, and the Aisne from the Department of the Aiguse; past Grand Fre, Rethel, and Soissons: and from Compeigne, to the Seine at Pont-Oise, about twenty miles below Paris. The Marne rises near Langres in No. 11, and runs past Chaumont, Joinville, St. Dizier, Vitry, Chalons, Epernay, Chateau-Thierry, and Meaux, to the Seine at Charenton. The Seine has its source in the Cote d'Or, No. 66, and runs past Chatillon, Bar, and Truyes, to Nojent, where it is joined by the Aube; below Nojent it is joined by the Yonne from the Department of the Nievre; the United Stream then runs past Fontainbleau. Melun, and Corbeil, where it is joined by other tributary past Fontainbleau, Melun, and Corbeil, where it is joined by other tributary
Stream's from Loiret. No. 20; it then joins the Marne, b about four miles Stream's from Loiret. No. 20; it then joins the alarne, about four miles above Paris, through which City it flows to St. Denis, and St. Germain, to below Pontoise, where it is joined by the Oise, a from thence past Mantes, and Andelys, to Pont de l'Arche, where it is joined by the Eure from No. 16; and from thence past Rouen and Caudebac into the English

Nos. 21-23, are a promontary extending into the Atlantic Ocean, and form the extreme Western limit of France. Nos. 24 to 40, with the exception of 37, e are all watered by the Maine, and tributary streams of the Loire; the main branch has its source on the border of 78, and runs North, past Le Puy, Monistrel, Feurs, Roanne, Deuze, and Nevers, below North, past Le Puy, Monistrel, Feurs, Roanne, Deuze, and Nevers, below which it is joined by the Allier, which las run parallel with the Loire the whole of its course; from Nevers the United Stream still runs North to Gien, when it takes a N. W. course to Orleans, and from thence West past Beaugency, Blois, and Amboise, to Tours, where it is joined by the Cher, from the South: from Tours it still runs West past Lanjeais, and Saumur, to below Angers, where it receives the Sarthe and Mayenne, from the North; and from thence, after passing St. Florent and Nantes, it falls into the Atlantic Ocean. Nos. 24, 25, and 28—31, are all intersected by, and Nos. 32—43 are all South of, the main Stream of the Loire.

No. 44 is a practitive District, intersected by the Charente, which rises in

Channel at Havre, in No. 14; which department is North of the River, the remainder of Normandy being on the South. Nos. 17, 18, are watered

by the Orne, which falls into the mouth of the Seine below Caen. The small Province of Perche is now comprised in parts of Nos. 16, 17.

No. 44 is a maritime District, intersected by the Charente, which rises in No. 40, and runs past Angoulême, Cognac, and Saintes, into the Bay of Biscay at Rochefort. The Isles of Re, and Oberon, are included in this department, which is bounded on the S. W. by the Gironde.

Nos. 45-51, are intersected by the Dordogne, the Lot, the Tarn, and

the Garonne, and their numerous tributary Streams. The Garonne has its source at the foot of the Pyrenees, and runs past Toulouse, to Castell-Saragin, and Moissac, where it is joined by the Tarn; from thence past Valence, and Agen, to Tonnien, where it is further augmented by the Lot, and from thence past Marmande, Reolle, and Bourdeaux; below which it is joined by the Dordogne at Bourg, where the United Waters form the Gironde for about 55 miles, into the Bay of Biscay. The *Dordogne* has its source in No. 37, c and the *Lot* and the *Tarn* in No. 79. d Nos. 54, 55, are watered d by the Adour, and its numerous tributary streams, which fall into the Bay . of Biscay at Bayonne. Nos. 51, 52, 55, 56, and 85, are all bounded on the South by the Pyrenees. No. 50 is a small department, formed out of a

part of the three Provinces of Guienne, Gascoigne, and Languedoc.

The rivers Meuse and Moselle, which water the former Province of Lorraine run North; they both have their source in the Department of the Vosges, the former runs past Vaucoulers, Commercy, St. Mihel, and Verdun, into Ardennes; in which it runs past Sedan, Mezieres, and Charleville, to Givet, where it enters the Netherlands, running past Dinant, Namur, Liege, Maestricht, and Groningen, into the Delta of the Rhine at Rotterdam; one of the branches of the Moselle \* rises in No. 63, and runs past Darnay, Toul, Nancy, Metz, and Thionoville, into Luxembourg, past Treves, into the Bhine are restricted. into the Rhine opposite to Coblentz. Nos. 61, 62, are bounded on the East by the Rhine, which separates them from Baden, they form the ex-

treme Eastern limits of France, as No. 30 does the extreme West.

The waters of Nos. 63—82, except 79, 4 all run South into the Mediter-arean. The Saone as well as the Moselle, 6 has its source in No. 63, and 6 runs past Gray, and Auxonne, to Chalons, above which it is joined by the Doubs from Besancon; from Chalons it runs past Macon, Ville Franche, and Trevoux, to Lyons, where it is joined by the Rhone from the Lake of Geneva; from Lyons, the United Stream, under the name of the Rhone, runs past Vienne and Tournon, below which it is joined by the Isere, from Mont Blane, past Grenoble, St. Marcellin, and Romans; from the junction of the Isére it flows past Valence, Montelimart, Viviers, and le Pont St. Esprit, to Avignon, where it is joined by the Durance, from Embrun in the Upper Alps; from Avignon it runs between Beaucaire and Tarascon, to where it divides into two branches, falling into the Mediterranean about thirty miles West of Marseilles, and twenty East of Montpelier. Nos. 64, 65, 68, 71-76, and 81, are all East of the Saone and Rhone. The waters of Tarn and Arriege, run West into the Garonne, and those of Aude, East, into the Mediterranean.

From the preceding display of the courses of the several Rivers, it appears that in the South of France, Cantal and Correze possess the greatest elevation West of the Alps: a mountain range which gives name to the Department of Cantal, has an elevation of 5900 feet above the level of the Sea. In the North-East Nos. 11, 60, 63, and 66, which are contiguous de-partments discharge their waters both West, and North; as well as to the

East, and South.

GEOGRAPHICAL DISPLAY of the 33 former Provinces, and 86 present Departments of FRANCE; shewing the Number of subdivisions in Arrondisements, Cantons, and Communes; and Population in 1823 of each Department: and also the distance and bearing in French Leagues from Paris, of the Chief Town of each Department, with the Population thereof in 1823 and 1828.

STATEMENT shewing the 44 Departments annexed to FRANCE, during the Republican, Consular, and Imperial sway, between the Years 1792-1812; shewing the States to which they previously belonged, or to which they have since reverted; the Superficies of, and Population, and Number of Horned Cattle in each Department in 1812; the mean price of the Hectolitre of Wheat, and of five Hectogrammes of Bread, in each Department in 1809: the Number of Horned Cattle in each Department with Beet Root, the Number of Sugar Works, and the quantity of Sugar produced therefrom, in each of the 26 Northern, and North East Departments in 1812; and the Number of Arpents planted with Vines, and the produce of Wine in Hectolitres, in each of 16 of the Eastern Departments in 1812; and the Number of Arpents planted with Vines, and the produce of Wine in Hectolitres, in each of 16 of the Eastern Departments in 1802; the whole compiled from an expose of the Situation of the Empire, and presented at the command of Napoleon in 1813, to the Legislative Corps by the Minister of the Interior, M. le Comte Montalivet.

The Departments, Nos. 27, 28, and 32-44, are productive in Silk,—see Index, SILK,—for reference to Statement of the produce of each Department, as well as of each of 8 of the South East Departments of FRANCE proper.

The Number of Sheep in the above 44 Departments in 1812, amounted to 8,406,864: of which 27,593 were Meriaos, and 99,395 Cross Breed; the Number of Horses in the same Year was 938,000: and the Number Foaled annually 76,000: and the Quantity in Hectolitres of all sorts of Grain produced in each of the 3 Years 1810 - 12, was as follows, Viz.—

In 1810, 61,852,171 Hectolitres.

In 1811, 62,681,297 do.

In 1812, 70,311,174 do.

The annexed is a Statement of the Quantity of IRON, produced in 1811, in each of 7 Departments: Mont Tonnere, No. 26 had also 4 Furnaces, and 15 Establishments for the Manufact. of Iron, to the extent of 10,890 Quintals.

STATEMENT of the Geographical Position, of each of the 40 Kingdoms, Provinces, Principalities, &c., &c., of the Peninsula of SPAIN and PORTUGAL; shewing the Superficies and Population of each; increase & Cent. of Population since the close of the last Century; and Ratio of Population & Square Mile, in 1825.

\*\* The Population of the Peninsula at the close of the last Century as exhibited below, has been taken from a work published in Paris during the occupation of Spain by the French in 1810; and the Numbers in 1825, have been taken from another Work recently Published in that City; other authorities represent the Population of Spain at the commencement of the last Century, at about 7,000,000: the increase since 1799, supposing the Numbers as stated below to be accurate, is remarkable; more particularly so, under the circumstances in which the Country during that period has been involved. The extreme Latitudes of the Peninsula are, from Cape Ortegal in Gallicia, in 43. 47 North, to Gibraltar in Andalusia in 36. 7 North: being a mean distance between those two Points of 533 English Statute Miles; but, as the South parts of Andalusia and Granada form a Promontary the average extent of the Peninsula from North to South will not exceed more than about 475 miles: the extremes of Longitude are, from the Rock, in 9. 35 West, 25 miles West of Lisbon; to Cape Rosas in Catalonia, in 3.5 East, being a Total of 12 Degrees, 40 of Longitude, or 665 English Statute Miles; (the degree of Longitude between 37 and 43 of Latitude being 45½ Geographical, or 52½ English Statute Miles) but the average extent of Longitude will not exceed 10 Degrees, or about 525 English Statute Miles; these averages give a Total Superficies of 249,375 English Statute Miles, which corresponds, or nearly so, with the detailed Superficies below, supposing them intended as Geographical Miles.

STATEMENT shewing the Rural Population, under each of six degrees of Rank, in each of the Twenty four Provinces of SWEDEN, in 1820, and also, the number of Iron Masters and Manufacturers, and of Artificers, in each Province; and also under three different grades of Ages: and distinguishing the proportion of Males under each respective head, from the proportion of Females. The Province of Falun, the Richest Mining District of Sweden, exhibits the greatest disparities; the resident Wealthy Inhabitants being very inconsiderable, and the Male Population above 60 Years of age, less in proportion than in any other Province; The excess of Females over Males, above 60 Years of age, over all Sweden, deserves attention: Göteborg, exhibits the greatest exception. See page 69 for Translation of the heads of Columns.

STATEMENT shewing the Agricultural Population; and the Number of Laplanders, Poor, and Prisoners, distinguishing Males from Females, in each of the 24 Provinces of SWEDEN, in 1820: the division of Females also exhibits the Total Number of Families in each Province, under four heads, according to their circumstances or condition; The Provinces arranged in order of their Total of Agricultural Population, with Number of reference in the division of Males to their extent of Superficies; and in the Female division to their extent of Agricultural Produce.

\* \* Circumstantial as is the analysis of the Population in Pages 68 - 69, it here shews itself imperfect; inasmuch, as after all, it does not shew the proportion of the 351,064 Servant Maids & Girls which belong to the Agricultural Class and the Statement below, is, for the like reason imperfect, and accounts for the otherwise seeming excess of Mules over Females.

FEMALES and CHILDREN.

STATEMENT shewing the Quantity of each kind of GRAIN, annually required for Seed, and the produce thereof; and also the Number of Horses, Horned Cattle, Sheep, Swine, and Goats, in each of the 24 Provinces of SWEDEN.

Number of Horses, Horned Cattle, Sheep, Swine, and Goats, in each of the 24 Provinces of Sweden, that its Agriculture is susceptible of great improve
\*\* The limited return of Produce, especially of Oats deserves attention, and seems to imply, notwithstanding the Latitude of Sweden, that its Agriculture, a subject well ment; it is probable that too great a preditection for Mining and Manufactures, diverts both Capital and energy from the more sober and legitimate pursuit of Agriculture, a subject well deserving the consideration of the present callightened Sovereign of Sweden, more particularly so, as Agricultural Productions form no inconsiderable Item, in its list of Imports.

STATEMENT shewing the Mortality, in each of the 24 Provinces of SWEDEN, and in the City of STOCKHOLM, in the Year 1820; shewing the various Diseases under which the Mortality ensued, and distinguishing the Number of Males from the Number of Females; the Provinces arranged in Order of their Total Population. The Column of Totals includes 30 Males and 7 Females Murdered; 117 Male and 21 Female Suicides; and 14 Males and 3 Females Executed.

• On comparing this Statement with the London Bills of Mortality, one feature which it presents unfavorable to Sweden, is the Number of Females reported to have died in Child-bed, which are as 3 in Sweden, to 2 within the London Bills of Mortality; The Number (1233) of Illegitimate Children dying under a Year Old in Sweden, is considerable, but there is no corresponding data in England, on which to form a comparison; An Account of the Children annually received into all the London Workhouses makes the Number about 12,000, of whom, about 900 are reported as Illegitimate, and 200 Foundilings; The Numbers reported Drowned, and to have died of Drunkenness, as well, as the Murders, Suicides, and Executions, specified above, are all indications unfavorable to the moral Character of Sweden: The legitimate object, and end of Statistics, is, to enable the relations and conditions of Society to be correctly understood, whereby its social and moral improvement may be progressively advanced. Unfortunately the object and end of Statistics, as yet, do not appear to be understood in Sweden, notwithstanding their long continued popularity.

<sup>\*</sup>In addition to the 1,191,708 Rix-Dollars, Excess of Value Experted, over and above the Value Imported, which the above account exhibits; The Imports will be found to include 1,078,788 Rix-Dollars of Value in Fish, which may be regarded as the produce of Swedish labor, rather than a Foreign Production, for which any other Product has been given, and further, Salt will be found Valued at 553,812 Rix-Dollars, whilst the quantity is stated at less than equal to 25,000 English Tons; and consequently, supposing it to have been Imported into Swedish Ships its Value is greatly over rated, and occasions a still further disparity between the Value of the Exports and Imports. —see Statement Balance of Trade

STATEMENT showing the Geographical Position of each of the Colonies belonging to the BRITISH EMPIRE in 1833, with the date of Settlement\*, Capitulation\*, or Cession\* of each; the Population of each in 1829; the Tonnage of Shipping, cleared outwards to, and entered

inwards from; and the value of the Exports to, and Imports from each, in the year 1830.

inwards from; and the value of the Exports to, and Imports from each, in the year 1830.

The diminution in the Slave Population of the British West Indies, when compared with the increase in the Slave States of North America is deserving of consideration; in addition to the number of Slaves in the West Indies; there are further 55,504 at the Cape of Good Hope; 20,464 at Ceylon; and 76,774 at the Mauritius, making a Total of 829,665; the Population of Van Diemans Land includes 8,484 Convicts; and that of New South Wales 15,668; both Totals are exclusive of Aborijines,—Vide Par. Pa., No. 260, Session 1831,—for the Imports and Exports, see No. 690, Session 1832: The excess of Export to Canada, Gibraltar, Malta, the Cape of Good Hope, Van Diemans Land, and New South Wales, is equalized in Mercantile account by the Bills drawn by the Agents of the Government at the respective places, and that to the Foreign West Indies becomes involved in the general account with Continental Europe.

\*\* The Shipping entered inwards from New Brunssick appears greatly to have exceeded that cleared outwards, the difference probably arises from New Vessels built in that Province; to Newfoundland the Tonnage cleared outwards, greatly exceeds the Tonnage from; Gibraltar exhibits a still greater disproportion; several of the Vessels cleared for Newfoundland proceed direct from thence with Fish to Spain and Portugal, while several of those which clear outwards for Gibraltar, seek homeward Freights from those Countries, and the general Statement of Shipping cleared outwards and entered inwards to and from all Countries will shew that the Tonnage entered inwards from Spain and Portugal exceeds the Tonnage cleared outwards thereto in a similar proportion to the excess outwards to Newfoundland and Gibraltar. In like munner the Tonnage inwards to Van Diemans Land and New South Wales, and to the Foreign West Indies greatly exceeds the Tonnage from thence, most of the Vessels clearing out for the former with Conciets and Settlers proceed to the Ma

STATEMENT shewing the Population, (distinguishing the proportion in Towns, from the proportion in the Villages,) in each of the 19 Provinces of the Kingdom of the NETHERLANDS, (as constituted in 1814) at each of the two Periods 1816 and 1825, the Provinces of the Kingdom of the NETHEREANOS, (as constituted in 1614) at each of the two Periods 1816 and 1825, the Provinces arranged in Order of their Total Population in 1816, with Number of Reference to their Geographical Position as exhibited on the preceding Page; shewing also the Total Number of Marriages, Divorces, Births, & Deaths; the increase & Cent.; and the Total increase; the Total excess of Births over Deaths, and the Ratio of Births to every 100 Marriages, and of Deaths to

every 100 Births, in the 10 Years 1815-24.

\*.\* These Statements relating to the Population of the NETHERLANDS, have been compiled from an Official Work of 31 Sheets, printed at the Hague in 1827, in pursuance of an order of His Majesty's the King of the Netherlands, bearing date the 3rd, of July of the preceding Year; the first 10 Sheets purport to shew all the changes in the Numbers of the Population in each Province of the Kingdom, in each of the 19 Years 1815-24; the 11th, Sheet is a Sammary of the 10 perceding Sheets; the 19 following Sheets purport to shew the change in each of the 19 Provinces separately, in each of the reforessid 10 Years 1815-21; and the 31st, and last Sheet is a Summary of the 19 preceding ones; in this Work the proportion of the Births and Deaths which the Males hore to the Fenales is worked out to 4 places of Decimals with various other minutice of detail; with such a display of circumstantiality it was deemed fair to suppose that some additional light on the subject of the causes which influence the changes and progress of Population might have been derived; but on investigation it proved, that the 31 Tables contained a greater display of calculation and detail, than Philosophy; for, it will be seen that whilst in Liege (see No. 17, in the Order of Geographical Position) the Births in the 10 Years 1815-24, exceeded the Deaths by 30,925, and only 936 in the 10 Years represented to have taken place in Luxembourg is as irreconcileable, as is the decrease in Liege; and although the results of the two Provinces here specifically adverted to.

The diminution of Births, and great increase of Mertality in 1817, decrease of Mortality however ensued: in 1818-19 the Number of Divorces, in North and South Holland, bespeaks precularities in the domestic habits of the Provinces here ensued: in 1818-19 the Number of Divorces, in North and South Holland, bespeaks precularities in the domestic habits of the Provinces here ensued: in 1818-19 the Number of Divorces, in North and South Holland, bespea

|   | Years  | Income  | Expenditure  |
|---|--|---|--|
| The annexed is a Statement of the Income from Taxes, and Expenditure of the Government of the Netherlands, in florins, in each of the Eleven Years 1816—1826; according to these amounts the Expenditure has exceeded the Income by an average of about ten Millions of florins annually; equalized probably by Loans, or issues of some Government Security similar to the English Exchequer Bill. | 1816<br>17<br>18<br>19<br>1820<br>1<br>2<br>3<br>4 | 140,023,658<br>83,416,634<br>83,075,521<br>80,933,971<br>80,472,734<br>89,511,721<br>85,272,108<br>96,150,985<br>81,369,677<br>95,954,765 | 111,877,561<br>94,825,409<br>92,361,408<br>85,030,664<br>91,454,256<br>93,922,428<br>101,878,147<br>106,177,979<br>112,116,749 |

The above STATEMENTS relating to the Productions and Revenue of the NETHERLANDS, have been compiled from two or three vague works on the subject, published in France; which works also represent the Manufactured Productions of the same Kingdom, to amount annually to 675,000,000 of francs, which amount, includes 10,000,000 francs for Cheese; whilst Butter and Coals are omitted in both estimates: although these accounts seem entitled to but little consideration for accuracy, they will suffice to shew the various Items of Resource.

An ACCOUNT shewing the Superficies in German Square Miles; the Population; and amount of Tax on Traders; and also the Number of Sheep, Horses, and Horned Cattle, in each of the 9 Departments of the PRUSSIAN MONARCHY, in 1816 and 1828. \*\* The part of the account relating to Horses, and Horned Cattle, was taken from Mr. Jacobs 2nd. Report on Agriculture and Corn of Europe. Vide Parliamentary Paper, No. 258, Session 1828. \*\* The Totals of Horned Cattle in 1825, do not agree with the details. The Total of Bulls being 50, and Cows 10,456 too many, and the Young Cattle 4,050 too few.

The progressive increase of Population in the United States of North America, may be regarded as one of the remarkable features in the events of the last 49 Years. During each of the three Ten Yearly Porisds from 1800 to 1820, the rate of increase has been about 35 V Cent., or 141 in the aggregate of the 30 Years; white, in Great Britain the increase in each Period has been only about 15½ V Cent., or 51 in the aggregate of the 20 Years. The Cierical and Typographical accuracy of the compilation of the American Official Returns is creditable to the puries entreated with their arrangement and execution; had any errors or Typographical blunders existed, the working of the above results would have discovered them, but none were found to exist. It is as bonomable to the American people to have produced so accurate a display of their Numbers, as their amount and increase are interesting to the Philosophical enquirers of all countries; but before they are entitled to unqualified commendation for their regard for this interesting branch of social enquirty, they must exhibit an equally accurate Account of the No. of Births, and a corresponding display of Deaths in each Glass of Ages. On comparing the proportional results of the United States, with the Total results of the different Sections of the United States, who a considerable disproportion to the Numbers within that Age; it is probable that both materially contribute to the disproportion in the United States; not until an equally accurate account of the Briths and Deaths are given, much must be left to conjecture; the migratory tendency, also, of the Industration of the United States; to such Accounts, the change of residence though be given as is done in the Neitherlands, see page 82. See also pages 71, & 91, for comparison of the results with Sweden, and the several parts of the United Kundelm.

Landon, Nept. 1833

The Rental of Houses discssed to the House Tax in 1829, will be seen to be considerably below the amount of Rental in 1811, but it will be remembered that in 1823, all Houses of less than £10 Yearly Value were exempted from the House Tax; while previously, a considerable Number below that Value were subject thereto; Scotland however appears not to contribute a fair quota of direct Taxes; while the Land Rental is one sixth of that of England, the Assessed Taxes are only one fifteenth, and the contribution of all Scotland, is less, than that of the City of Westminster.

No. of Houses Assessed to House & Window Duty, Rentals at which Assessed; & Amount of Lana and Assessed Taxes, in each Co.

Number of Houses Assessed to House and Window Duty; Rental at which Assessed; and Amount of Land and Assessed Taxes, in each county.

COMPARATIVE VIEW of the Total Number of Houses, Building, Uninhabited, and Inhabited; and of Families and their Occupations, under each of three general heads in each County of Scotland and Wales; and the Total of each in all Great Britain, and the Isles of Guernsey, Jersey, and Man, in 1821 & 1831; distinguishing in Scotland the proportion of each, in the Six principal Cities and Burghs: Page 88 shows the Number of Houses and Families in 1801 and 1811; and page 13 exhibits a comparison of the Occupations in 1811 and 1821, and the Note thereto directs attention to the stationary number of Agriculturists, while the Statement below shows a diminution in 1851 compared with 1821, and an undue increase in the third Column; the Note however to the Display of the Occupations in the English Counties at pages 10-11, will explain in part the cause of that seeming disproportion.

|--|--|
| the same of the sa | Silk & Cotton, Mold  |
| in the other   | rs returned under the head of Manufactures<br>Counties of Wales, are almost exclusively<br>Domestic consumption. |

#### SCOTLAND.

SCOTLAND.

In Scotland the predominating Manufacture is Cottons in the counties of Lanark, Renfrew, Ayr, Dumbarton, and Perth; in Fife and Forfar Linens predominate; in Aberdeen Linen and Cotton; in Stirling, Woollens and Cottons; in Edinburgh, Fine Shawls and various fancy articles, and the Silk Manufacture partially prevails in Perth and a few other places. In the remaining counties of Scotland the numbers returned under the head of Manufactures, like those in Wales, are chiefly Weavers for local Domestic consumption: in Glasgow, Greenock, and Leith, the usual Manufacture of Cordage, Chemicals, and other articles incidental to large Sea Ports, prevail to some extent, and the following is a list of articles peculiar to the places specified, viz.— (see following page)

STATEMENT showing the Proportion of the Male Population in each County of SCOTLAND and WALES, 20 Years of age, and upwards, Returned under the Population Act of 11 Geo. IV. cap. 30, employed or engaged in Agriculture, distinguishing the proportion employed as Labourers from the proportion engaged as Occupiers; showing also, the proportion employed or engaged under each of Six general heads of Occupation or Service, as well as the Total Population, distinguishing Males from Females; and also, the Number of Male Servants under 20 Years of age, and Female Servants of all ages in each County; Col. No. 5, exhibits the Total of those displayed in detail on the preceding folding sheets; Col. No. 6, comprises Miners, Fishermen, and Labourers, employed as Porters, Warhousemen, or otherways, by the employers of Cols. No. 5, 7, and 8,—see Note preceding page relating to the Col. of Manufacturers; No. 8, comprises the Clergy, Legal, and Medical Practitioners, Artists, and Teachers; No. 9, may be defined Passive Agents, Consumers without either producing or rendering any useful Service, and probably include a greater Number, not being heads of Families than any other Class.

For details under each of the 9 heads in each County of England,—see pages 10-11, a remarkable feature in the Population of Scotland, is the preponderance of Females over Males, a consequence, probably, of the greater Emigration of Males from Scotland, than from any other part of the Kingdom.

| of         | of Females over Males, a consequence, probably, of the greater Emigration of Males from Scotland, than from any other part of the Kingdom. |                       |                  |                   |                   |                                     |  |                  |                          |                                |                 |                             |                     |                      |                      |                   |

## AN ACCOUNT

OF THE NUMBER OF

# Marriages, and of Baptisms and Burials,

DISTINGUISHING THE PROPORTION OF MALES AND FEMALES.

BAPTIZED AND BURIED, AND UNENTERED AS WELL AS REGISTERED,

IN EACH COUNTY OF ENGLAND AND WALES, IN THE TEN YEARS.

1821-1830,

AND OF THE

# Aumber of Illegitimate Children of each Ser,

BORN IN EACH COUNTY, IN THE LATTER YEAR:

ALSO

#### AN ACCOUNT

COMPILED FROM THE RETURNS MADE TO PARLIAMENT, UNDER THE ACT OF XI. GEORGE IV.

C. 30., FROM THE 11,301 PAROCHIAL REGISTERS OF ENGLAND AND WALES.

OF THE TOTAL NUMBER OF EACH SEX.

(1,996,195 Males, 1,942,301 Females,)

THAT DIED WITHIN EACH OF THIRTEEN GRADES OF AGES, IN EACH COUNTY OF ENGLAND AND WALES, IN THE METROPOLIS, AND ELEVEN OTHER OF THE PRINCIPAL CITIES AND TOWNS, AND IN THE ISLE OF ELY, IN THE EIGHTEEN YEARS,

## 1813-1830.

SHOWING FURTHER, THE PROPORTION TO EVERY 10,000 OF EACH SEX THAT DIED DURING THE SAME PERIOD WITHIN EACH OF THE THIRTEEN GRADES OF AGES, IN EACH COUNTY, CITY, TOWN, &c., AND ALSO THE PROPORTION TO EVERY 10,000 OF EACH SEX, IN EACH GRADE OF AGE, LIVING IN EACH COUNTY,

IN 1821, &c., &c., &c.

STATEMENT showing the POPULATION of each County of England and Wales in 1821, and the Total Number of Marriages, Baptisms, and Burials, both registered and un-entered in each of the same, in the 10 Years 1821—30; distinguishing the proportion of Males and Females in each County; the Counties arranged in order of their Total Population in 1821, whereby the disproportion of Marriages, Baptisms, and Burials, is the more readily discernable; For a similar display for the 20 Years 1801—20, see pages 18-21.

TABLE showing the Total of the MALE Population of each County of England and Wales, of the Metropolis, and of Eleven of the most populous Cities and Towns, and of the Isle of Eleven of the most populous Cities and Towns, and of the Isle of Eleven of the most populous Cities and Towns, and of the Isle of Eleven of the most populous Cities and Towns, and of the Isle of Eleven of the most populous Cities and Towns, and of the Isle of Eleven of Eleven of Eleven of Eleven of Eleven of Eleven 1813-30, and the proportion in each of 15 grades of ages, the Counties being arranged in order of their Total Population, whereby the inequality of Deaths in each grade of age is more immediately discernable than if the Counties had been arranged in alphabetical order. This, and the Statements on the two preceding, and five following pages are the result of the second part of the enquiry under the Population Act of 1831, [XI of Geo. IV. ca. 30.] the object of which second part, was, that the account of Births and Deaths might serve as a corollary or check upon the enumeration returns, the first of which in this Country took place in 1801, and has been continued at intervals of 10 Years since that time. Four ten yearly returns having now been made, the basis is laid for a more perfect developement of the effect of climate and 10 Years since that time. Four ten yearly returns having now been made, the basis is laid for a more perfect developement of the effect of climate and 10 Years since that time. The STATEMENT below exhibits the Total of the Female Population in England and Wales, &c. &c., and the Total Number of Registered Burials thereof in corresponding time and order to that of the Males on the preceding page. On referring to page 98 it will be seen that the births of Males greatly exceed those of Females, while by the Statement below it appears that the Mortality of Males in infancy, and up to 10 Years of age, exceeds that of the Females in a greater proportion than the excess of Births; from 10 to 15 Years of age, the Mortality of the two sexes appear equal; while from 15 to 40 the Mortality of Females greatly exceeds that of the Males; from 40 to 50 it again appears nearly equal; and from 50 to 70 preponderates among the Males; after 70 the period of longevity may be considered to have commenced, and to preponderate greatly in favor of the Female: hence, notwithstanding the excess of Males born, the greater Mortality in infancy, and the shorter duration of Life, together with the greater emigration of Males, a preponderance of Females always appears on enumeration; one or two Counties which will be noticed in another place present an exception to this general rule. The two following pages exhibit the proportion in every 10,000 of each grade of age in each of the Counties and Towns exhibited on this and the preceding page, by which the relative mortality in each County and Town is more readily discernable than by inspection of the Total Numbers. According to the proportional results, the North Riding of York, and the County of Hereford, exhibit the highest indications of longevity, and inconsiderable mortality in mfancy; but as regards the North Riding of York it deserves consideration how far the results are affected by its large emigration; it is shewn at page 90 (see No. 32 of that page) that admitting the enumeration returns to be accurate, 10,095 Males, and 7,204 Females must have left that district, and augmented the Numbers in some other Counties in equal proportions, and at page 21 it is s

STATEMENT of the Total Number of DEATHS, distinguishing Males from Females, in each County of England and Wales, in the Metropolis, in each of eleven of the principal Cities and Towns, and in the Isle of Ely, in the 18 Years 1813—1830, and the proportion thereof in every 10,000 of each sex, at each of 13 grades of ages; also a Statement of the total numbers that died during the same 18 Years, distinguishing Males from Females, at each year of their respective ages; compiled and deduced from the returns of the number of Burials made to Parliament under the Act of 11 Geo. IV., cap. 30, from the 11,301 Parochial Registers kept within England and Wales in 1831, the returns being all complete. At the present time, when the principle of Insurance of Lives is producing increasing excitement, and when the result of its practice is about to develope itself, the interest and importance of Statements like these cannot be too highly appreciated; these notwithstanding some discrepancies are probably the most complete and importance of Statements like these cannot be too highly appreciated; these notwithstanding some discrepancies are probably the most complete and importance of Statements like these cannot be too highly appreciated; these notwithstanding some discrepancies are probably the most complete and importance of Statements like these cannot be too highly appreciated; these notwithstanding some discrepancies are probably the most complete and importance of Statements like these cannot be too highly appreciated; these notwithstanding some discrepancies are probably the most complete and importance of Statements like these cannot be too highly appreciated; these notwithstanding some discrepancies are probably the most complete and importance of Statements like these cannot be too highly appreciated; these notwithstanding some discrepancies are probably the most complete and importance of Statements like these cannot be too highly appreciated; these notwithstanding some discrepancies are probably the most complete. The STATEMENT below exhibits the proportion in every 10,000. Females that died, in each County of England and Wales, in each of 13 grades of ages, in the 18 Years 1813-1830, in corresponding order with the Males as exhibited on the preceding page. \*.\* In reference to the seeming disproportion of ages in the several Counties, see note at head of page 101, where it is shown that the Metropolitan, Mining, and Manufacturing Counties, received in the 10 Years, 1821-1830, no less than 682,599 Inhabitants, beyond the excess of Births over Deaths, while the Agricultural Counties during the same period gave out 130,055, leaving upwards of 550,000 to be accounted for, as having Immigrated into the Metropolitan, &c. Counties of England and Wales from Ireland, Scotland, and Foreign parts; in addition to these causes for disproportion in the ages of the se dying in the different Counties, the results are further affected by the emigration to distant parts during the same period of about 330,000 persons of mature age; to enable a just comparison to be drawn of the relative effect of locality and circumstances on humus existence, all that are born in their respective districts should continue therein until they die, and an accurate account be kept of the Number and age of all who may immigrate thereinto. Page 17 exhibits the result of Mortality during the same 18 Years, in eleven other of the principal towns of England in comparison with the Counties of Essex and Rutland, and the Metropolis, and the following page exhibits the proportion living in every 10,000, in each grade of age, in each County of England and Wales, and in Scotland in 1821; from the whole of which it is deducible, that while the Manufacturing Districts exhibit the greatest tendency to increase of numbers by procreation, as well as by immigration, the Manufacturing operations are unfavorable to life; but the aggregate of Great Britain exhibits a high physical condition, whether viewed in comparison with its state at former periods, or in comparison with the
