THE HISTORY OF THE
MEDICAL DISSECTIONS
AND OTHER WORKS

ABERDEEN UNIVERSITY PRESS.

NOTE.

THE works in the present catalogue consist mainly of dissertations for the degree of M.D. in the Imperial Military Medical Academy of St. Petersburg which have been sent to me by the kindness of Dr. V. A. Manassein, Editor of the chief Russian Medical Journal ВРАЧЪ (*Vrach*, i.e., *The Medical Man*), and until recently Professor of Special Pathology and Therapeutics in the Academy.

These dissertations are the outcome of an immense amount of labour on the part of their Authors, and as I felt that they would be of more use in a public institution than in my private library I have sent them to the College of Surgeons. In order that they may be to some extent available for reference to those who do not read Russian, I have indicated in the Catalogue the nature of each work in English, and have given references to such abstracts in the *Lancet* or elsewhere as I have myself made or happen to be acquainted with. In many cases I have appended to the figures, tables and charts in the works some indication of their meaning. A copy of the English abstract is in some cases affixed. The literary references in the dissertations are of course given in the language of the paper referred to, and these are in many cases very numerous and should prove useful to those who happen to be working at similar subjects. If translations should be required Russians can always be met with in London, who can render medical Russian perfectly intelligible to an English medical man.

Attempts to refer to the writings of Russian authors in catalogues and works of reference are often very tedious and disappointing, owing to the fact that no principle of transliteration can be said to be as yet thoroughly accepted by English and American authors, and still more to the different principles adopted by French and German abstractors of Russian articles. This will be easily understood from the following table:—

TRANSLITERATIONS.

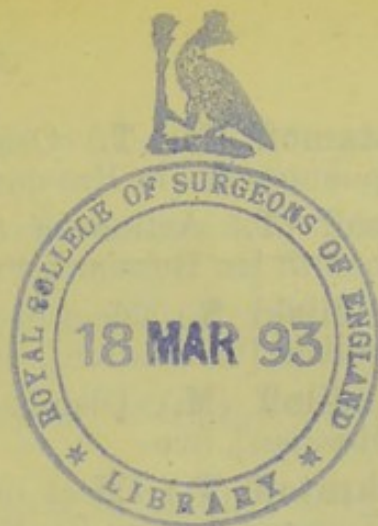

Russian Letter.	French.	German.	In this Catalogue.
В	V (FF terminal)	W	V (FF terminal)
Е	E also ĬE	E also JE	E
Ж	J	SH	ZH
З	Z	S	Z
С	S	SS	S
У	OU	U	U
Х	KH	CH	KH
Ц	TS	Z	TS
Ч	TCH	TSCH	CH
Ш	CH	SCH	SH
Я	ĬA	JA	YA

There being no H in the Russian alphabet non-Russian names commencing with the aspirate are written with Г, so that Hoffmann appears in Russian as Гофманъ, Gofman.

As far as possible the recommendations of the Royal Geographical Society about transliteration have been carried out in this Catalogue. Ф and Θ are both written F; Ъ is written Y, except when it is followed by Ы at the end of a word, the two together -ЪЫ being represented by -I (for this the Germans frequently write ij). Ъ, which does not differ in sound from the Russian E, is written Ê (it is written by some YE or IE), Ю is written YU, and Э, È. With regard to the semi-vowels, Ы is written I, and Ъ and Ь are omitted altogether, except in words terminating with -ОБЪ and -ЕБЪ when -OFF and -EFF are substituted for -OV and -EV.
