MARTIN'S ATLAS

OF

OBSTETRICS AND GYNÆCOLOGY

EDITED BY

A. MARTIN.

Docent in the University of Berlin.

TRANSLATED AND EDITED WITH ADDITIONS BY

FANCOURT BARNES, M.D., M.R.C.P.

Physician to the British Lying-in Hospital; Assistant Physician to the Royal Maternity Charity of London, &c.

"Such a book as that now under notice is indeed novel in its plan, and remarkably attractive and valuable in its achieved purpose.....If one should begin to enumerate all the features that yield masterly effects to the eye or lend interest to the mind, the spirit of commendation would continue throughout the whole work. So much is there in this splendid series of plates that excites our admiration, that mere words of praise seem tame. One must pass an hour or more in turning over the leaves, and even then only a modicum of its value reveals itself. We are glad that the work has been brought before the profession of this country, since to practitioners as well as students it must prove of inestimable service. It fills a place not hitherto occupied, and meets a want that has often been expressed, but never satisfied. The publisher deserves thanks for his part of the enterprise, and we earnestly trust that a liberal patronage will reward him."—*Boston Medical Library Journal*.

"This valuable and classic series of illustrations, first published by Professor Edward Martin in 1861, has long had a great reputation in Germany as being of great service to practitioners as well as students of midwifery. It includes 98 pages of plates, with an average of 5 illustrations on each, many of which are coloured, and some drawn on a large scale, so as to occupy the whole page, where this has seemed desirable. The subjects treated range through the whole of midwifery and gynæcology, beginning with normal and abnormal pelves, and ending with illustrations of some of the most important obstetric gynæcologic instruments used in Germany and in this country.....The descriptive letter-press is very full and accurate, and the whole makes an extremely handsome volume, of portly yet not of cumbrous size. This atlas has nothing of its kind to compete with it in the English language, and will no doubt be warmly welcomed by obstetricians and gynæcologists and students of the advanced class."—*British Medical Journal*, July 10th, 1880.

"The atlas is the most complete and comprehensive work of its kind.....Nearly every point, anatomical, physiological, obstetrical, and gynæcological, is illustrated in the best way by well known authors, from whose works the late Dr. Martin culled his illustrations. As a work of reference to the practitioner, the atlas is invaluable; while to the student who wishes to refresh his memory in the readiest way, and in the shortest time, it will be very useful."—*London Medical Record*, July 15th, 1880.

With Illustrations in Chromo-lithography, 719 pages, Roy. 8vo, 25s.

ON

THE BILE, JAUNDICE, AND BILIOUS DISEASES

BY

J. WICKHAM LEGG, F.R.C.P.

*Assistant Physician to Saint Bartholomew's Hospital, and Lecturer on
Pathological Anatomy in the Medical School.*

"It seems to us an exhaustive epitome of all that is known upon the subject."—*Philadelphia Medical Times*, 1880.

"It is, indeed, a valuable book, and the best storehouse of knowledge in its department that we know of."—*Pacific Medical and Surgical Journal*, San Francisco, 1880.

"This volume is one which will command professional respect and attention. It is perhaps the most comprehensive treatise upon the subjects treated ever published in the English language.....The subjects discussed in this volume enter largely into the everyday work of the practising physician, and are among the most intricate and important in the whole domain of medical sciences. The liver being the largest gland in the human body, is of great importance in its functional relations to health. No organ is more abused or less understood.

In this treatise its functions are fully considered, and much light has been thrown upon its various relations to health and treatment in disease. The author has presented to the profession a work of great value."—*Baltimore Medical Journal*, U. S. A., 1880.

"The chapter which treats of the bile-acids on the heart is excellent, and the views of various experimenters are clearly and accurately given. The classification of xanthelasma is full and complete, and the coloured plates illustrating this condition of the skin will be found useful by practitioners.....The chapters which treat of acute yellow atrophy are, perhaps, the best in the book. We regret that want of space prevents our noticing some of the very valuable facts which are collected in these chapters, but we would advise every practitioner to read them. The immense number of bibliographical references in this book, will make it a valuable addition to the library of every educated practitioner."—*The Birmingham Medical Review*, Oct. 1880.

"The book is an exceedingly good one.....is conspicuous for many very good points, and it is one of great merit.....and we venture to say, after an attentive perusal of the whole, that anyone who takes it in hand will derive from it both information and pleasure; it gives such ample evidence of honest hard work, of wide reading, and an impartial attempt to state the case of jaundice, as it is known by observation up to the present date... he has produced a distinct landmark in medical literature, from which most observers in the future will take their departure; and we venture to predict that his book will not only live, but be in the enjoyment of a vigorous existence long after some of the more popular productions of the present age are buried, past all hope of a resurrection."—*London Medical Record*, July, 1880.

"It is a valuable work of reference and a welcome addition to medical literature."—*Dublin Journal of Medical Science*, August, 1880.

FANCOURT BARNES, M.D., M.R.C.P.

Physician to the British Lying-in Hospital; Assistant Physician to the Royal Maternity Charity of London, &c.

A GERMAN-ENGLISH DICTIONARY OF WORDS AND TERMS USED IN MEDICINE AND ITS COGNATE SCIENCES.
Square 12mo, Roxburgh binding, 9s.

ALFRED H. CARTER, M.D. LOND.

Member of the Royal College of Physicians; Physician to the Queen's Hospital, Birmingham, &c.

ELEMENTS OF PRACTICAL MEDICINE.
Crown 8vo, 9s.

HENEAGE GIBBES, M.B.

PRACTICAL HISTOLOGY AND PATHOLOGY.
Crown 8vo, 3s. 6d.

"The chapters on staining are especially full, and in no other work with which we are acquainted will the reader find such ample information upon this important part of the preparation of the tissues for the microscope. This little work contains no padding: it consists entirely of precise instructions by one who is evidently master of the subject, and we know no work which we can more highly recommend to either student or practitioner."—*Practitioner*, Dec. 1880.

"This is a small book written by a practical man, evidently well acquainted with his subject, and will be found of real service to those who wish to learn how to prepare good preparations for microscopical examination.....The chapter on staining is in some respects the most valuable, for Dr. Gibbes has made this subject a special study, and has obtained new and excellent results from using two and even three dyes at once; the methods by which others may be as successful are plainly given."—*Lancet*, Nov. 13th, 1880.

SAMUEL W. GROSS, A.M., M.D.

Surgeon to, and Lecturer on Clinical Surgery in, the Jefferson Medical College Hospital, and the Philadelphia Hospital, &c.

A PRACTICAL TREATISE ON TUMOURS OF THE MAMMARY GLAND: embracing their Histology, Pathology, Diagnosis, and Treatment. With Illustrations, 8vo, 10s. 6d.

"We cannot here notice *seriatim* the many interesting facts brought out by Dr. Gross, but must content ourselves with indicating some of the main points in which his views differ from those commonly held in this country.....These views, we think, will meet with general adoption, as more in accord with our present knowledge than others formerly promulgated.....The part of the work that deals with the clinical features of the different classes of tumours is well done and very valuable.....The work opportunely supplies a real want, and is the result of accurate work, and we heartily recommend it to our readers as well worthy of careful study."—*Lancet*, Nov. 27th, 1880.

"We know no book in the English language which attempts to cover the ground covered by this one—indeed, the author seems to be the first who has sought to handle the whole subject of mammary tumours in one systematic treatise."—*New York Medical Journal*, Oct. 1880.

"The book shows throughout evidence of good and careful work, and will be read with pleasure and advantage by all who consult it."—*Obstetrical Journal*, Dec. 15th, 1880.

DR. FELIX von NIEMEYER.

Late Professor of Pathology and Therapeutics; Director of the Medical Clinic of the University of Tübingen.

A TEXT-BOOK OF PRACTICAL MEDICINE, WITH PARTICULAR REFERENCE TO PHYSIOLOGY AND PATHOLOGICAL ANATOMY. Translated from the Eighth German Edition, by special permission of the Author, by GEORGE H. HUMPHREY, M.D., and CHARLES E. HACKLEY, M.D., Revised Edition, 2 vols., large 8vo, 36s.

. In bringing out a new edition of this well-known work, advantage has been taken of thoroughly revising it from the latest German edition, and making such additions as to bring it fully up to the present state of medical science, short articles have been inserted upon Chronic Poisoning by Alcohol and Morphine, as well as upon Wandering Spleen, Paralysis Agitans, Scleroderma, Elephantiasis Græcorum, Progressive Pernicious Anæmia, and Yellow Fever.

"Is well translated, and retains all the characteristics of clearness and scientific breadth of principle which has made it a favourite text-book for many years. The new edition is well brought up to date."—*Brit. Med. Jour.*, Dec. 11, 1880.

"For a work which is both pleasant in the reading and valuable for its suggestiveness, the text-book of Professor Niemeyer takes the front rank. Certainly no candidate for the higher examinations should fail to read this book, and to carefully study it, for although in some sections it hardly comes up to the standard of some English authorities, yet, as a whole, there is no work like it."—*Lancet*, Sept. 13, 1879.

"The task of a reviewer is an easy and glorious one in noticing such a work as this. It is at once comprehensive and concise; it is characterised by clearness and originality and it differs from many German works on Medicine in the sagacious appreciation of the value of therapeutics which is manifested by the author.....We can cordially recommend the work as one from the perusal of which every physician may derive profit, which will be found replete with information of direct practical value, and which is instinct with a spirit of candid and earnest enquiry, which is worthy of all praise. The translation on the whole, is very creditably performed, and the volumes are handsomely brought out."—*Dublin Quarterly Jour. of Med. Science*.

ROBERTS BARTHOLOW, M.A., M.D., LL.D.

Professor of Materia Medica and Therapeutics, in the Jefferson Medical College of Philadelphia, etc., etc.

I.

A TREATISE ON THE PRACTICE OF MEDICINE, FOR THE USE OF STUDENTS AND PRACTITIONERS. With Illustrations, large 8vo, 21s.

"It is concise, but is thoroughly up to date, and his references to recent pathological and therapeutical work are numerous.....Space will not permit of further analysis of this latest text-book on medicine, which has many good features, not the least of which is the lack of pretentiousness about it, and the general accuracy of its statements."—*Lancet*, Jan. 8, 1881.

"The work is of a thoroughly practical character.....In perusing the work, the reader cannot fail to be struck with the appreciation on the part of the author of the wants of the practitioner.....it may be considered a thoroughly useful, trustworthy, and practical guide for the general practitioner."—*New York Medical Record*, Oct. 30th, 1880.

"This is a new work, the production of an author who has distinguished himself considerably in the department of materia medica and therapeutics.....the book is distinguished by strong therapeutic faith."—*British Medical Journal*, Dec. 11th, 1880.

ROBERTS BARTHOLOW, M.A., M.D., LL.D.

Professor of Materia Medica and Therapeutics, in the Jefferson Medical College of Philadelphia, etc., etc.

II.

A PRACTICAL TREATISE ON MATERIA MEDICA AND THERAPEUTICS. Third Edition, large 8vo, 16s.

"Bears evidence of having been written by a master of his subject practically acquainted both with the physiological action of drugs as observed by experiment, and their therapeutical uses as shown by clinical experience."—*Practitioner*, Jan. 1879.

"A really valuable work. In it the reader will always find full and accurate information."—*Dublin Journal of Medical Science*.

"It represents extensive reading in American, English, and Continental literature, and this not unduly paraded nor drily quoted, but well digested and condensed; it contains also much original work and observation....At the same time it is throughout very practical, including in its text an unusual number of useful formulæ and ingenious suggestions....a really valuable addition to modern literature."—*British Medical Journal*.

GEO. M. BEARD, A.M., M.D.

Fellow of the New York Academy of Medicine.

AND

A. D. ROCKWELL, A.M., M.D.

Fellow of the New York Academy of Medicine.

A PRACTICAL TREATISE ON THE MEDICAL AND SURGICAL USES OF ELECTRICITY. Including localized and general Faradization; localized and central Galvanization; Electrolysis and Galvano-Cautery. Second Edition, revised, enlarged, and mostly re-written. With nearly 200 Illustrations, roy. 8vo, 28s.

"The entire book is well arranged, is concise, comprehensive, and well adapted to the wants of the expert or of the general practitioner."—*New York Medical Record*, Nov. 23, 1878.

"Embodies in a compact, practical form, all that is now known of the application of electricity to the treatment of disease, and their extensive experience of the uses of electricity in a wide variety of morbid conditions qualifies them to speak with authority."—*Dublin Medical Journal*.

DR. THEODOR BILLROTH.

Professor of Surgery in Vienna.

GENERAL SURGICAL PATHOLOGY AND THERAPEUTICS. In Fifty-one Lectures. A Text-book for Students and Physicians. Translated from the Fourth German edition with the special permission of the Author, and revised from the Eighth German edition, by C. E. HACKLEY, A.M., M.D. Copiously illustrated, 8vo, 18s.

* * This edition contains seventy-four additional pages, with a number of new woodcuts.

"Prof. Billroth has long been recognised as one of the most scientific of living surgeons, his lectures forming the most popular text-books of surgery in the German language... The want of a book in the English language presenting in a concise form the views of the German pathologists has been long felt, and we venture to say that no book could more perfectly supply that want than the present volume.....this work will be most welcome in this country as supplying a want which must have been felt by all real students of surgery."—*Lancet*.

G. H. BRANDT, M.D.

ROYAT (LES BAINS) IN AUVERGNE, ITS MINERAL WATERS AND CLIMATE. With Preface by Dr. BURNEY YEO. Frontispiece and Map. Crown 8vo, 2s. 6d.

"The reputation of this watering-place for the cure of chronic gout is considerable, and those who intend visiting it should furnish themselves with Dr. Brandt's little book, which contains all necessary information."—*Lancet*, June 5th, 1880.

"This handy little book gives a concise and useful account of the therapeutical action of the mineral springs at Royat. Dr. Brandt, who has made a special study of these waters, states that they are specially valuable in gout, and in some cases of anæmia, chlorosis, and dyspepsia..... We can recommend Dr. Brandt's work to those who wish for information on the waters of Royat."—*London Medical Record*, July 15, 1880.

GURDON BUCK, M.D.

CONTRIBUTIONS TO REPARATIVE SURGERY; showing its Application to the Treatment of Deformities, produced by Destructive Disease or Injury; Congenital Defects from Arrest or Excess of Development; and Cicatricial Contractions from Burns. Illustrated by numerous Engravings, large 8vo, 9s.

"In this little work of less than 250 pages modestly entitled *Contributions to Reparative Surgery*, the distinguished author has briefly yet clearly laid down certain rules for the guidance of the Surgeon in the preparation of parts, the closure of gaps, and modelling of flaps, the due observance of which cannot but be followed by gratifying results."—*American Jour. of Med. Science*.

J. B. BUDGETT, L.R.C.P. EDIN.

THE HYGIENE OF SCHOOLS; Or Education Physically and Mentally Considered. Crown 8vo, 2s.

"It is most important that all engaged in teaching should thoroughly understand, not only the mere mental training of children, but also the great questions of food, exercise, recreation, as well as the essential elements of air, light, heat and ventilation. All these matters are ably and lucidly set forth in Dr. Budgett's treatise, which we strongly recommend to the attention of school-board teachers and parents."—*Public Health*.

DR. O. B. BULL.

Private Docent in Ophthalmology at Christiana.

AND

DR. G. A. HANSEN.

Physician to the Leprosy Hospital at Bergen.

LEPROUS DISEASES OF THE EYE. Col. plates, 8vo, 7s. 6d.

FREEMAN J. BUMSTEAD, M.D., LL.D.

Late Professor of Venereal Diseases at the College of Physicians and Surgeons, New York.

**THE PATHOLOGY AND TREATMENT OF VENE-
REAL DISEASES.** Fourth Edition, revised, enlarged, and in great
part re-written by the author, and by ROBERT W. TAYLOR, A.M., M.D.
With 138 woodcuts, 8vo, 25s.

"It is, beyond question, the most complete and accurate book on the subject in any language, and one which ought to be in the hands of every one who has much to do with syphilitic diseases."—*Medical Times*, Dec. 11th 1880.

"Bumstead's work is already classic and hardly requires reviewing. This edition is well up to date, and everywhere bears marks of careful and erudite preparation.... Must take first rank among the works in the English language on venereal diseases."—*Lancet*, July 31st, 1880.

"An air of completeness—of having had garnered into its pages all the best fruit of the world's experience and research upon the subject of which it treats—has been given to the book, without in any way detracting from the peculiarly practical value of previous editions. None the less clinical, the treatise seems much more cosmopolitan. The possession of old editions will be no excuse to the progressive physician for not purchasing this edition, and we predict for it a very speedy sale. We congratulate Dr. Bumstead on the wisdom which led to the selection of Dr. Taylor as colleague, and we sincerely congratulate the two co-workers upon the results of their labour."—*Philadelphia Medical Times*, Dec. 6, 1879.

P. CAZEAUX.

Adjunct Professor in the Faculty of Medicine of Paris, &c.

**A THEORETICAL AND PRACTICAL TREATISE ON
MIDWIFERY INCLUDING THE DISEASES OF PREGNANCY
AND PARTURITION.** Revised and Annotated by S. TARNIER.
Translated from the Seventh French Edition by W. R. BULLOCK, M.D.
Royal 8vo, over 1100 pages, 175 Illustrations, 30s.

"M. Cazeaux's book is the most complete we have ever seen upon the subject."—*N.A. Med. Chir. Review*.

"It is unquestionably a work of the highest excellence, rich in information, and perhaps fuller in details than any text-book with which we are acquainted. The author has not merely treated of every question which relates to the business of parturition but he has done so with judgment and ability."—*Brit. and For. Med. Chir. Review*.

JOHN COCKLE, M.A., M.D.

Physician to the Royal Free Hospital.

ON INTRA-THORACIC CANCER, 8vo, 4s. 6d.

W. H. CORFIELD, M.A., M.D. OXON.

Professor of Hygiene and Public Health in University College, London.

I.

DWELLING HOUSES: THEIR SANITARY CONSTRUCTION AND ARRANGEMENTS. With 16 pages of illustrations, crown 8vo, 3s. 6d.

This book aims at giving a brief but thoroughly practical exposition of the best means of rendering houses healthy and comfortable. It embraces the Situation and Construction of Houses, Ventilation, Lighting, Warming, Water-supply, Removal of Refuse Matters, Sewerage, etc.

"We.....can give a glad welcome to such a work as Dr. Corfield's, and can recommend it."—*Medical Times*, Dec. 4th, 1880.

"Every householder owes a debt of gratitude to Professor Corfield for these pages."—*The Metropolitan*, Dec. 25th, 1880.

II.

SANITARY FALLACIES. An Address delivered before the Congress of the Sanitary Institute of Great Britain, at Croydon, October, 23rd, 1879. 1s.

J. THOMPSON DICKSON, M.A., M.B. CANTAB.

Late Lecturer on Mental Diseases at Guy's Hospital.

THE SCIENCE AND PRACTICE OF MEDICINE IN RELATION TO MIND, the Pathology of the Nerve Centres, and the Jurisprudence of Insanity, being a course of Lectures delivered at Guy's Hospital. Illustrated by Chromo-lithographic Drawings and Physiological Portraits. 8vo, 14s.

"The treatise will be found very useful as a student's text-book and as a repertory of recent and typical cases to the ordinary practitioner."—*Brit. and For. Med. Chir. Review*.

"On the whole we heartily recommend this work as a text-book for students of insanity. The descriptions of disease which it contains are made unusually clear and interesting, so that to read it is a pleasure instead of a labour. Discussion has been judiciously avoided, the pathology is practical and exhaustive, and the treatment definite, carefully arranged, and rational."—*Medical Times and Gazette*.

HORACE DOBELL, M.D.

Consulting Physician to the Royal Hospital for Diseases of the Chest, &c.

I.

ON DIET AND REGIMEN IN SICKNESS AND HEALTH, and on the Interdependence and Prevention of Diseases and the Diminution of their Fatality. Sixth revised and enlarged edition, small 8vo, 6s.

"With every edition, including this last, Dr. Dobell has added new and useful matter, and has further condensed what was written so as still to keep his volume within moderate limits."—*Westminster Review*.

"Contains a great variety of interesting information relating not merely to food but also to many subjects of great hygienic importance. We can cordially recommend this little work."—*Dublin Jour. of Med. Science*.

II.

AFFECTIONS OF THE HEART AND IN ITS NEIGHBOURHOOD. Cases, Aphorisms, and Commentaries. Illustrated by the heliotype process. 8vo, 6s 6d.

"Dr. Dobell has paid particular attention to certain throat symptoms in connection with diseases of the heart. We heartily commend the present volume as full of clinical significance."—*Medical Press and Circular*.

"Dr. Dobell is one of the most hardworking members of the profession, and his work generally lies in the direction of practical clinics and therapeutics.... A good point in the present treatise is the way in which cases are set forth as the basis of the whole book, and the points which arise out of these are argued out and illustrated by the author. The author also undertakes the risk of expressing his clinical experience, in the form of aphorisms, and many of these aphorisms are valuable, as forcible embodiments of useful hints and cautions."—*Westminster Review*.

JOHN EAGLE.

Member of the Pharmaceutical Society.

A NOTE-BOOK OF SOLUBILITIES. Arranged chiefly for the use of Prescribers and Dispensers. 12mo, 2s. 6d.

This Note-book is intended to serve as a handy guide to the solubilities of the more common chemical preparations used by Medical Men and Pharmacutists.

"A handy little volume of this kind was much wanted. Prescribers often feel at a loss as to the best menstruum for dissolving some of the less familiar drugs, and will be glad to have this little work by them to refer to when in doubt and difficulty. Patients, too, will feel grateful, we are sure, if prescribers will make use of it, for it often happens that they have to swallow a very nauseous dose, from want of consideration by their physician in this matter. The contents are well arranged for reference, and the book is well printed and neatly got up."—*Lancet*, March 13th, 1880.

JOHN ERIC ERICHSEN.

Holme Professor of Clinical Surgery in University College; Senior Surgeon to University College Hospital, &c.

MODERN SURGERY; Its Progress and Tendencies. Being the Introductory Address delivered at University College at the opening of the Session 1873-74. Demy 8vo, 1s.

DR. FERBER.

MODEL DIAGRAM OF THE ORGANS IN THE THORAX AND UPPER PART OF THE ABDOMEN. With Letter-press Description. In 4to, coloured, 5s.

"Dr. Ferber's Model Diagram of the Organs in the Thorax and Upper part of the Abdomen is a very ingenious and well constructed Model of the kind which the German-called *situs phantom*, showing the relative position and aspect of the organs from the sure face as they lie in layers and are exposed by successive dissections. The lifting up of successive layers of the phantom exposes them in the same order, extent, and manner as they are seen in a well-conducted post-mortem examination; and his model diagram will be of great use to students and practitioners in enabling them to realise the precise Medical Anatomy of this important region."—*Brit. Med. Journal*.

AUSTIN FLINT, JR., M.D.

Professor of Physiology and Physiological Anatomy in the Bellevue Medical College, New York; attending Physician to the Bellevue Hospital, &c.

I.

A TEXT-BOOK OF HUMAN PHYSIOLOGY; Designed for the Use of Practitioners and Students of Medicine. Illustrated by plates, and 313 wood engravings, large 8vo, 28s.

"It has two merits we particularly desire to allude to. First, it contains excellent historical accounts of some of the principal discoveries in physiology, such as the circulation of the blood, the functions of the lymphatics, the glycogenic functions of the liver, the functions of the various parts of the spinal cord, &c., &c.; and, second, it gives a more complete description of the physiological anatomy and functions of the cranial nerves than is to be met with in any other text-book of physiology.... We can strongly recommend it to the profession more especially to those interested in diseases of the nervous system, who attempt to unravel the symptoms of a "nervous" case by the application of knowledge regarding the physiological connection of nerves with the centres, and anastomoses among themselves."—*Edin. Med. Jour.*

"Taken as a whole Dr. Flint's work is an extremely valuable one. Accurate, full without being discursive, well balanced in the space devoted to each subject, clearly and intelligently written, it contains all that the ordinary student need know."—*Lancet*.

II.

THE PHYSIOLOGY OF MAN; Designed to Represent the Existing State of Physiological Science, as applied to the Functions of the Human Body. 5 vols., large 8vo, cloth. Vol. I.—The Blood; Circulation; Respiration. 18s. Vol. II.—Alimentation; Digestion; Absorption; Lymph and Chyle. 18s. Vol. III.—Secretion; Excretion; Ductless Glands; Nutrition; Animal Heat; Movements; Voice and Speech. 18s. Vol. IV.—The Nervous System. 18s. Vol. V.—Special Senses; Generation. 18s.

"The complete work will prove a valuable addition to our systematic treatises on human physiology."—*Lancet*.

"From the extent of the author's investigations into the best theory and practice of the present day, the world over, and the candor and good judgment which he brings to bear upon the discussion of each subject, we are justified in regarding his treatises as standard and authoritative, so far as in this disputed subject authority is admissible."—*New York Times*.

J. MILNER FOTHERGILL, M.D.

Member of the Royal College of Physicians of London; Assistant Physician to the West London Hospital, and to the City of London Hospital for Diseases of the Chest, Victoria Park; Honorary Secretary of the Harveian Society; Associate Fellow of the College of Physicians of Philadelphia.

THE HEART AND ITS DISEASES, WITH THEIR TREATMENT; INCLUDING THE GOUTY HEART. Second Edition, entirely re-written, copiously illustrated with woodcuts and lithographic plates. 8vo. 16s.

"We commend his book to practitioners of medicine, who will find the great facts of heart disease and its treatment discussed in a way that will deeply interest them."—*Lancet*, Jan. 3rd, 1880.

"To many an earnest student it will prove a light in darkness; to many a practitioner cast down with a sense of his powerlessness to cope with the rout and demoralization of Nature's forces, a present help in time of trouble."—*Philadelphia Medical Times*.

"Its leading feature is, its thoroughly interesting style. From beginning to end it is neither dull nor insipid; whilst throughout its entire length certain grand principles are kept steadily before the mind of the reader. The most interesting chapter to us, and one which bears abundant testimony to the ample grasp which Dr. Fothergill has of his subject, is the chapter on treatment of diseases of the heart. . . . It was by his treatment of diseases of the heart that Dr. Fothergill's name first became known; and the chapter is worthy of the reputation which he then gained and to which he has steadily added. . . . Dr. Fothergill's book will be widely read and as widely appreciated."—*Practitioner*, March, 1880.

ERNEST FRANCIS, F.C.S.

Demonstrator of Practical Chemistry, Charing Cross Hospital.

PRACTICAL EXAMPLES IN QUANTITATIVE ANALYSIS, forming a Concise Guide to the Analysis of Water, &c. Illustrated, fcap. 8vo, 2s. 6d.

"The book is crowded with useful information, and we can very safely recommend it to our readers."—*Lancet*.

"The directions for the determination of organic impurities in water are sound. . . . It would scarcely be possible to compress a greater amount of useful matter into the small compass of 57 pages."—*Chemical News*.

C. A. GORDON, M.D., C.B.

Deputy Inspector General of Hospitals, Army Medical Department.

REMARKS ON ARMY SURGEONS AND THEIR WORKS. Demy 8vo, 5s.

SAMUEL D. GROSS, M.D., LL.D., D.C.L., OXON.

Professor of Surgery in the Jefferson Medical College of Philadelphia.

A PRACTICAL TREATISE ON THE DISEASES, INJURIES, AND MALFORMATIONS OF THE URINARY BLADDER, THE PROSTATE GLAND; AND THE URETHRA. Third Edition, revised and edited by S. W. GROSS, A.M., M.D., Surgeon to the Philadelphia Hospital, Illustrated by 170 engravings, 8vo, 18s.

"As a guide for the surgeon who may be called upon to treat diseases of the genito-urinary tract, the work is fully up to the requirements of the time, and cannot fail to maintain the rank which it has earned for itself years ago."—*New York Medical Record*.

"The present work of Prof. Gross must be held in great esteem and value by the practitioner, not only for the richness of its compilations, but also for its many other and varied excellencies."—*Amer. Jour. of Med. Sciences*.

WILLIAM A. HAMMOND, M.D.

Professor of Mental and Nervous Diseases in the Bellevue Hospital Medical College, New York, &c.

SPIRITUALISM AND ALLIED CAUSES AND CONDITIONS OF NERVOUS DERANGEMENT. With Illustrations, post 8vo, 8s. 6d.

"Whatever Dr. Hammond writes about the nervous system is gladly accepted as the work of a master; and we anticipate a wide circulation and great resulting benefit from the diffusion of this work, marked as it is by the candid admission of whatever is worth credit in the subject discussed."—*Medical Times and Gazette*.

ALEXANDER HARVEY, M.A., M.D.

Emeritus Professor of Materia Medica in the University of Aberdeen; Consulting Physician to the Aberdeen Royal Infirmary, &c.

FIRST LINES OF THERAPEUTICS; as based on the Modes and the Processes of Healing, as occurring Spontaneously in Disease; and on the Modes and the Processes of Dying, as resulting Naturally from Disease. In a series of Lectures. Post 8vo, 5s.

"This is a book which should be read by every advanced student and by every practitioner of medicine."—*Ohio Medical Record*, 1880

"He treats his subjects in masterly style, and gives to the world as the result of his researches vast volumes of valuable truth and information in a wonderfully condensed form, all summed up, and presented in this little work of modest dimensions."—*New York Medical and Surgical Journal*, 1880.

"If only it can get a fair hearing before the profession, it will be the means of aiding in the development of a therapeutics more rational than we now dream of. To medical students and practitioners of all sorts it will open up lines of thought and investigation of the utmost moment."—*Detroit Lancet*, 1880.

"We would earnestly commend to our readers the study of this work, the principles advocated in it lie at the foundation of a rational practice of medicine.....and we are confident that the readers of this volume will feel, as the writer does, a debt of gratitude to Professor Harvey, and will date from its perusal the origin of clearer views and sounder conceptions of the art of healing."—*Canada Medical and Surgical Journal*, Sept. 1879.

ALEXANDER HARVEY, M.D.

Emeritus Professor of Materia Medica in the University of Aberdeen, &c.

ALEXANDER DYCE DAVIDSON, M.D.

Professor of Materia Medica in the University of Aberdeen.

SYLLABUS OF MATERIA MEDICA FOR THE USE OF TEACHERS AND STUDENTS. Based on a selection or definition of subjects in teaching and examining; and also on an estimate of the relative values of articles and preparations in the British Pharmacopœia with doses affixed. Fourth Edition, 16mo, 1s. 6d.

GRAILY HEWITT, M.D.

Professor of Midwifery and Diseases of Women in University College, Obstetrical Physician to University College Hospital, &c.

OUTLINES OF PICTORIAL DIAGNOSIS OF DISEASES OF WOMEN. Fol. 6s.

Affording a ready means of making permanent records of cases of diseases of women.

HINTS TO CANDIDATES FOR COMMISSIONS IN THE PUBLIC MEDICAL SERVICES, WITH EXAMINATION QUESTIONS, VOCABULARY OF HINDUSTANI MEDICAL TERMS, ETC. 8vo, 2s.

F. HOFFMANN, PH.D.

Pharmacist in New York.

MANUAL OF CHEMICAL ANALYSIS AS APPLIED TO THE EXAMINATION OF MEDICINAL CHEMICALS. A Guide for the Determination of their Identity and Quality, and for the Detection of Impurities and Adulterations. For the use of Pharmacists, Physicians, Druggists, and Manufacturing Chemists, and of Pharmaceutical and Medical Students. With Illustrations, roy. 8vo, 12s.

"This handsome volume is a guide to the determination of the quantity and quality of the chemicals used as remedies as well as for the detection of their impurities and adulterations. . . . Most of the common manuals give some information of the kind, and much more is scattered through medical and chemical periodicals. Dr. Hoffman has had the happy idea of bringing all this information together in a systematic form, and he has produced a volume that cannot fail to be prized. . . . A full index completes the volume which does credit to both author and publishers."—*The Doctor*.

"This volume is a carefully prepared work, and well up to the existing state of both the science and art of modern pharmacy. It is a book which will find its place in every medical and pharmaceutical laboratory and library, and is a safe and instructive guide to medical students and practitioners of medicine."—*American Journal of Science and Arts*.

E. HOLLAND, M.D., F.R.C.S.

HEALTH IN THE NURSERY AND HOW TO FEED AND CLOTHE A CHILD, with Observations on Painless Parturition. A Guide and Companion for the Young Matron and her Nurse. Second Edition. Fcap. 8vo, 2s., paper cover 1s.

SIR W. JENNER, Bart., M.D.

Physician in Ordinary to H.M. the Queen, and to H.R.H. Prince of Wales.

THE PRACTICAL MEDICINE OF TO-DAY: Two Addresses delivered before the British Medical Association, and the Epidemiological Society. Small 8vo, 1s. 6d.

NORMAN W. KINGSLEY, M.D.S., D.D.S.

President of the Board of Censors of the State of New York; Member of the American Academy of Dental Science, &c.

A TREATISE ON ORAL DEFORMITIES AS A BRANCH OF MECHANICAL SURGERY. With over 350 illustrations, 8vo, 16s.

"It contains a large amount of information bearing upon mechanical dentistry and the surgery of the jaws, which, previous to the appearance of this book, could only be obtained by searching through various works, some of which are little likely to form part of the library of the busy practitioner. . . . The book is one which we can confidently recommend both to the advanced student and the busy practitioner."—*British Journal Dental Science*, Sept., 1880.

"The whole subject is so thoroughly studied that nothing is left to be desired by any surgeon who wishes to treat these fractures intelligently and successfully. The work as a whole, bears marks of originality in every section, and impresses the reader with the painstaking efforts of the author to get at the truth, and apply it in an ingenious and practical way to the wants of the general practitioner, the surgeon, and the dentist."—*New York Medical Record*.

E. A. KIRBY, M.D., M.R.C.S. ENG.

Late Physician to the City Dispensary.

A FORMULARY OF SELECTED REMEDIES WITH THERAPEUTIC ANNOTATIONS, and a Copious Index of Diseases and Remedies, Diet Tables, etc. A Handbook for Prescribers. Fifth Edition, p. 8vo, 3s. 6d.

"We have been much pleased with this capital little work . . . The book contains a good deal of information of a very useful kind to anyone at all busily engaged in practice."—*Lancet*.

J. WICKHAM LEGG, F.R.C.P.

Assistant Physician to Saint Bartholomew's Hospital, and Lecturer on Pathological Anatomy in the Medical School.

I.

A GUIDE TO THE EXAMINATION OF THE URINE;
intended chiefly for Clinical Clerks and Students. Fifth Edition, revised and enlarged, with additional Illustrations, fcap. 8vo, 2s. 6d.

"Is distinguished by its great accuracy and conciseness.....there could not, for its size, be a better manual.....it would be difficult to find such an amount of useful, sound information condensed into 106 small pages of clear, readable type."—*Dublin Journal of Medical Science*, July, 1880.

"We are glad to welcome this little work....Just what was wanted."—*Brit. Med. Jour.*

"Is an admirable guide to the clinical examination of the urine.....A most excellent and useful work."—*Edin. Med. Jour.*

II.

A TREATISE ON HÆMOPHILIA, SOMETIMES CALLED THE HEREDITARY HÆMORRHAGIC DIATHESIS.
Fcap. 4to, 7s. 6d.

"Dr. Legg deserves the thanks of the profession for this exceedingly painstaking and laborious compilation, which, containing as it does the opinions of 163 writers who have touched upon the disease, cannot fail to impart to its readers as much learning on the subject as it is possible to derive from mere book-reading.... We are deeply indebted to Dr. Legg for this painstaking monograph, which comes before the world in a most elegant form, and is a credit alike to the author and publisher."—*Lancet*.

"The book now lying before us contains an exhaustive examination and discussion of the literature relating to hæmophilia. In one chapter several cases occurring under the author's own observation are detailed. Dr. Legg is thoroughly acquainted with the German literature on this subject, and the book may therefore be recommended to all persons specially interested in it. The get-up of the book is such as has not yet been attained by German publishers."—*Medicinisch-chirurgische Rundschau*.

DR. GEORGE LEWIN.

Professor at the Fr. Wilh. University, and Surgeon-in-Chief of the Syphilitic Wards and Skin Disease Wards of the Charité Hospital, Berlin.

THE TREATMENT OF SYPHILIS WITH SUBCUTANEOUS SUBLIMATE INJECTIONS. Translated by DR. CARL PRÆGLE, and DR. E. H. GALE, late Surgeon United States Army.
Small 8vo, 7s.

"Dr. Lewin's volume has a special value as giving the results of the author's very large experience in the treatment of syphilis by the hypodermic use of mercury. Over seventy clinical histories are given in detail, and even making allowance for a little natural enthusiasm in behalf of a method with the introduction of which the author's name is so prominently connected, the results certainly seem to warrant the conclusion that, in the subcutaneous injection of mercury, a powerful and efficient remedy has been found, with which the surgeon may hopefully combat cases of syphilis which have resisted other modes of treatment."—*American Journal of Medical Science*.

J. S. LOMBARD, M.D.

Formerly Assistant Professor of Physiology in Harvard University.

I.

EXPERIMENTAL RESEARCHES ON THE REGIONAL TEMPERATURE OF THE HEAD, under Conditions of Rest, Intellectual Activity and Emotion. With Illustrations, 8vo, 8s.

"This is an essay of great interest and value. The experiments seem to establish an important doctrine in cerebral physiology; namely, that the evolution of heat is in proportion to the intensity of mental action."—*Journal of Psychological Medicine*, October, 1880.

"This book gives the results of an enormous amount of work.....It is sought to determine the relative temperatures of different parts of the brain at rest, and the changes which these temperatures undergo in intellectual work and emotion, by measuring thermoelectrically the surface temperature of the scalp, which for this purpose is mapped out into very small divisions.—*Dublin Journal of Medical Science*, July, 1880.

"It will be seen, from this *résumé* of the most important conclusions arrived at by Dr. Lombard, that his book will prove of special interest to the students of localization, and to those engaged in local thermo-metrical investigations. He deserves all praise for the careful, minute, and elaborate character of his work, of which we have only given a sketchy outline. In all he has made no less than sixty thousand observations."—*American Journal of the Medical Sciences*, April, 1880.

"This is a masterly research."—*Brit. Med. Jour.*, April 3rd, 1880.

II.

ON THE NORMAL TEMPERATURE OF THE HEAD.
8vo. [In the Press.]

DR. V. MAGNAN.

Physician to St. Anne Asylum, Paris; Laureate of the Institute.

ON ALCOHOLISM, the Various Forms of Alcoholic Delirium and their Treatment. Translated by W. S. GREENFIELD, M.D., M.R.C.P. 8vo, 7s. 6d.

"The work of Dr. Magnan is of world-wide repute, and it is a great advantage to English readers to have it translated for them. Dr. Greenfield has done his part of the work well also."—*Brit. Med. Jour.*

"It is seldom that a book falls into the hands of a reviewer which can be spoken of in terms of such unqualified praise as that of Dr. Magnan. His observations are precise, his records of cases are fluently and effectively written, and the principles which he propounds are advanced and attractive. Dr. Greenfield deserves the thanks of the medical profession for having made such an admirable treatise accessible to all classes of medical readers."—*Practitioner*.

"He has had special opportunities for observation, and he has laboured so assiduously that his work must be consulted by all who desire accurate information on the subject. . . . It will be seen that a great number of points of interest are treated in this volume, the general get up of which reflects credit on the publisher."—*The Doctor*.

J. F. MEIGS, M.D.

Consulting Physician to the Children's Hospital, Philadelphia.

W. PEPPER, M.D.

Lecturer on Clinical Medicine in the University of Pennsylvania.

A PRACTICAL TREATISE ON THE DISEASES OF CHILDREN. Sixth Edition, revised and enlarged, roy. 8vo, 28s.

"There are few diseases of children which it does not treat of fully and wisely in the light of the latest physiological, pathological, and therapeutical science."—*Lancet*.

"As a text-book and general guide to practitioners as well as a standard work of reference, we know of no other volume which contains more useful or reliable information."—*Dublin Jour. of Med. Science*.

"Of the new edition of Dr. Meigs' well-known volume we can speak in the highest terms. It is a full and exhaustive encyclopædia of the subject, by men who have made themselves familiar with all that has been written on it and who have specially devoted themselves to its study.....An exhaustive treatise, comprising an excellent epitome of the work of others, combined with much valuable personal experience."—*Edin. Med. Jour.*

DR. MORITZ MEYER.

Royal Counsellor of Health, &c.

ELECTRICITY IN ITS RELATION TO PRACTICAL MEDICINE. Translated from the Third German Edition, with notes and additions by WILLIAM A. HAMMOND, M.D. With Illustrations, large 8vo, 18s.

"Meyer's book is well known.....He has himself made no slight original contributions to electro-therapy. Dr. Hammond deserves our hearty thanks for his translation, a boon which is as much for us as for his own countrymen."—*Brit. and For. Med.-Chir. Review*.

"The number of editions through which Dr. Meyer's work has passed in Germany attests the esteem in which it is there held, and we do not doubt that an equal measure of approbation will be accorded to it in this country."—*Dublin Quarterly Jour. of Med. Science*.

"May be taken as an intelligent guide in studying the subject. Since its first appearance in 1854 it has gradually won its way through three editions; till, in its present form it takes rank as the approved text-book of the subject in Germany. Dr. Hammond has, therefore, done good service in placing it within the reach of English readers."—*Journal of Mental Science*.

Wm. JULIUS MICKLE, M.D., M.R.C.P. LOND.

Member of the Medico-Psychological Association of Great Britain and Ireland; Member of the Clinical Society, London; Medical Superintendent, Grove Hall Asylum, London.

GENERAL PARALYSIS OF THE INSANE. 8vo, 10s.

This monograph describes General Paralysis of the Insane, and deals with its diagnosis, causation, morbid anatomy, pathology, pathological physiology, prognosis, and treatment. It also indicates several varieties of the disease, each of which is illustrated by cases.

"As a solid contribution to the subject, the book is one of considerable value.....It testifies to a profound acquaintance with the literature of the subject, and will be mainly valued as a work of reference. Nothing seems to have escaped his observation."—*Lancet*, December, 11, 1880.

"This book has all the good points which a work on the subject should have. It is concisely and carefully written. The history is given of each part of the subject, and the authorities from whom information is gleaned are carefully referred to. We look upon this as the best book on general paralysis that has appeared for a very long time.....In concluding the review, we have only to say that the book is eminently satisfactory, and that the continued record of the observations so carefully made by the author, will add largely to our knowledge of general paralysis."—*Journal of Mental Science*, Oct., 1880.

E. A. MORSHEAD, M.R.C.S., L.R.C.P.

Assistant to the Professor of Medicine in University College, London.

TABLES OF THE PHYSIOLOGICAL ACTION OF DRUGS. Fcap. 8vo, 1s.

WILLIAM NEWMAN, M.D. LOND., F.R.C.S.

Surgeon to the Stamford Infirmary.

SURGICAL CASES: Mainly from the Wards of the Stamford, Rutland, and General Infirmary, 8vo, paper boards, 4s. 6d.

C. F. OLDHAM, M.R.C.S., L.R.C.P.

Surgeon H.M. Indian Forces; late in Medical charge of the Dalhousie Sanitarium.

WHAT IS MALARIA? AND WHY IS IT MOST INTENSE IN HOT CLIMATES? An explanation of the Nature and Cause of the so-called Marsh Poison, with the Principles to be observed for the Preservation of Health in Tropical Climates and Malarious Districts. Demy 8vo, 7s. 6d.

"May be read with profit by all, and especially by the military and naval surgeon."—*Brit. and For. Med.-Chir. Review*.

"What is Malaria?.....To answer this question Mr. Oldham now addresses himself having made careful investigations, not only by studying the writings of others, but, which is of much greater value, by studying the disease itself.....Mr. Oldham's work shows much and careful research, and, containing much information in a small space, will well repay perusal."—*Dublin Quarterly*.

JOHN S. PARRY, M.D.

Obstetrician to the Philadelphia Hospital, Vice-President of the Obstetrical and Pathological Societies of Philadelphia, &c.

**EXTRA-UTERINE PREGNANCY ; Its Causes, Species,
Pathological Anatomy, Clinical History, Diagnosis, Prognosis and
Treatment. 8vo, 8s.**

" Since the Edinburgh Memoir of Dr. Campbell, published in 1840, there has appeared no such comprehensive and valuable work on this subject as that to which we now call attention by Dr. Parry of Philadelphia. Since Campbell's time our knowledge has greatly increased over the whole field, and almost all the novelty has been faithfully swept into Parry's learned net."—*Edin. Med. Jour.*

" This work is a careful and elaborate monograph on the subject of which it treats..... We have endeavoured to indicate the most important conclusions arrived at by Dr. Parry, but we refer our readers to the book itself as containing the fullest information on the subject anywhere to be found."—*Obstetrical Journal of Great Britain and Ireland.*

" It is, so far as we know, the most complete work on the subject, and is based on the analysis of 500 cases.....The book is one of exceeding interest.....Each chapter treats of the part of the subject to which it is devoted in the most thorough manner possible, without being in the least tedious."—*American Journal of Obstetrics.*

E. RANDOLPH PEASLEE, M.D., LL.D.

Late Professor of Gynæcology in the Medical Department of Dartmouth College ; President of the New York Academy of Medicine, &c., &c.

**OVARIAN TUMOURS : Their Pathology, Diagnosis, and
Treatment, especially by Ovariectomy. Illustrations, roy. 8vo, 16s.**

" The book merits and has received very high praise. It is systematic, clear, candid, and takes account of every question which can arise with reference to ovarian disease." DR. CHARLES WEST in *Annual Address to the Obstetrical Society*, Jan. 1st, 1879.

" This is an excellent work, and does great credit to the industry, ability, science, and learning of Dr. Peaslee. Few works issue from the medical press so complete, so exhaustively learned, so imbued with a practical tone, without losing other substantial good qualities.....We take leave of Dr. Peaslee with our best thanks for his excellent, rich, valuable work."—*Edin. Med. Jour.*

" In this book which has extended his name throughout the civilised world, and has been translated into the German and other languages, is found the rich experience of a life which was devoted to the study and practice of this department of surgery. In these writings, extending over 500 pages, are embodied the principles which should guide operators in this domain of surgery, and are those which have been generally adopted by the most distinguished gynaecologists. The work is notable for the clearness of its thought, the precision of its style, and the valuable and original contributions which it contains..... An enduring monument to his name, and one which will doubtless remain and do him honour as long as the healing art is practised."—*Lancet*, March 2, 1878.

R. DOUGLAS POWELL, M.D. F.R.C.P., LOND.

*Physician to the Hospital for Consumption and Diseases of the Chest at Brompton,
Assistant Physician to the Middlesex Hospital.*

**ON CONSUMPTION AND ON CERTAIN DISEASES
OF THE LUNGS AND PLEURA.** Being a Second Edition
revised and extended of "The Varieties of Pulmonary Consumption."
Illustrated by woodcuts and a coloured plate, 8vo, 9s.

"We cannot conclude without expressing the pleasure with which we have read all parts of the book, and we can assure our readers that nowhere will they get a more thorough and, at the same time, succinct account of the diseases of which Dr. POWELL has treated."—*Brit. Med. Jour.*, Aug. 31st, 1878.

".....We have nothing but praise for the more practical portions of the volume, dealing with diagnosis and treatment.....the volume must prove a very acceptable one to all who have had some little experience in the management of chest diseases, and wish to know the methods and results of those who have had more. We have read the work with much appreciation, often receiving a valuable suggestion even where we were obliged to disagree."—*Medical Times*, Dec. 21, 1878.

"We take pleasure in calling attention to this truly valuable work.....the book begins with a short discussion of the pathological changes which diseased lungs present post-mortem, and it is here, at the start, that the author wins the reader's confidence, by the calm conservative manner in which he handles many disputed points."—*Boston Medical Journal*, Jan. 23, 1879.

RALPH RICHARDSON, M.A., M.D.

Fellow of the College of Physicians, Edinburgh.

ON THE NATURE OF LIFE: An Introductory Chapter to Pathology. Second Edition, revised and enlarged. Fcap. 4to.
10s. 6d.

To this second edition the title of "The Nature" instead of "The Simplicity of Life" is prefixed, the latter designation having been misunderstood.

The object of this Essay is to explain the Nature of Living Action in all organic Beings, the similarity of such actions in both Health and Disease, and their complete analogy with those included in the term gravitation.—
Extract from Preface.

"We think this work may be very profitably studied as an antidote to the modern diseases of vagueness in language, and of rashness and dogmatism in theory."—*Quarterly Journal of Science*, March, 1880.

W. RICHARDSON, M.A., M.D., M.R.C.P., LOND.

REMARKS ON DIABETES, ESPECIALLY IN REFERENCE TO TREATMENT. Demy 8vo, 4s. 6d.

"Dr. Richardson, who has himself suffered from Diabetes in its milder form for many years, has entered on this part of the subject with much earnestness. His remarks on treatment will repay perusal."—*Brit. and For. Med.-Chir. Rev.*

"Finally, we again recommend this as a book well worthy the attention of the profession.... As the work of a diabetic it is sure to contain everything of importance on the subject; as that of a man who has cured himself, it is certain to contain rules and axioms which others may follow."—*Med. Times and Gazette.*

SYDNEY RINGER, M.D.

Professor of the Principles and Practice of Medicine in University College; Physician to, and Professor of Clinical Medicine in, University College Hospital.

I.

A HANDBOOK OF THERAPEUTICS: Eighth Edition, revised. 8vo, 15s.

"The well-deserved popularity of this work is shown by the rapidity with which another edition has been called for. The present edition is larger than the former one by twenty-four pages..... We need say nothing in its praise. The rapid sale of successive editions, already indicates how widely its value is appreciated."—*Practitioner*, May, 1880.

"The fact that Dr. Ringer's book has passed through seven editions speaks for itself. We know no work on Therapeutics which gives a more connected and intelligibly written account of the several drugs and groups of therapeutic agents than this, and it will be found a very useful companion to the Pharmacopœia."—*Lancet*, Feb. 1, 1879.

"We are glad to see that this most valuable treatise on Therapeutics has reached a seventh edition. It is unquestionably the ablest work on Therapeutics which we possess in our language, and one which should be carefully perused, not only by students, but also by practitioners..... The seventh edition contains chapters on the tongue, the pulse, the skin, and the temperature, with the indications they afford in treatment. These additional chapters are well written, and will render this edition even more valuable than any of those previously published. Ringer's Therapeutics is a work so well-known that it needs no commendation from us to ensure it a wide circulation."—*Edin. Med. Jour.*, Feb. 1879.

II.

ON THE TEMPERATURE OF THE BODY AS A MEANS OF DIAGNOSIS AND PROGNOSIS IN PHTHISIS. Second Edition, small 8vo, 2s. 6d.

"The arguments which Dr. Ringer so ably advances for the proposition which he seeks to maintain, if they do not fully support his conclusions, at least point to a valuable means of distinguishing between the heated outburst of tuberculosis and the insidious development of chronic phthisis, and may on further observation help to establish a more material difference between these two diseases, or varieties of disease which have so long, been classed in the same category. The practitioner will find the book under notice most useful. It has reached a second edition and will probably run to a third."—*Lancet.*

FREDERICK T. ROBERTS, M.D., B.SC., F.R.C.P.

*Professor of Therapeutics in University College; Physician to University College Hospital;
Assistant Physician to Brompton Consumption Hospital, &c.*

**A HANDBOOK OF THE THEORY AND PRACTICE
OF MEDICINE.** Fourth Edition, with Illustrations, 2 vols., 8vo, 22s.

"We have already on more than one occasion expressed a high opinion as to the merits of this work, which has now reached a fourth edition. From our experience of the 'Handbook,' we believe that it will always be popular amongst medical students, and that it is sufficiently classical to deserve a place in the bookshelves of every physician..... We heartily commend it as a reliable guide not less to the practical than to the theoretical study of medicine."—*Dublin Journal of Medical Science*, August, 1880.

"We have much pleasure in recommending this text-book as by far the most complete manual that can be placed in the hands of our students."—*Birmingham Medical Review*, April, 1880.

NOTICES OF PREVIOUS EDITIONS.

"Although Dr. Roberts modestly calls this work a handbook, it will be found on reference to its pages, that the various subjects have been treated in a complete and masterly manner..... We heartily commend this handbook, not only to gentlemen preparing for the medical profession, but to those who may have finished their professional education; as this work contains, in a brief and concise shape, all that the busy general practitioner needs to know to enable him to carry on his practice with comfort to himself, and with advantage to his patients."—*Brit. Med. Jour.*

"This handbook seems to have been appreciated, as indeed we think it deserved..... The amount of information in this book is, for its size, enormous..... The book seems to be thoroughly trustworthy, and those who read it may be sure that the views put before them are not the fanciful notions of the few, but the well-considered and generally adopted ideas of our leading scientific practitioners."—*Lancet*.

"In the compass of little more than 800 pages, Dr. Roberts has condensed a mass of matter on those diseases which are generally called medical in opposition to surgical, such as we think no book of the same size ever before contained: and although thus condensed the book is still a readable one..... It is not only well printed and neatly got up, but it is well written; and Dr. Roberts may fairly be congratulated on having produced the best text-book of medicine we possess."—*Medical Record*.

D. B. ST. JOHN ROOSA, M.A., M.D.

Professor of Diseases of the Eye and Ear in the University of the City of New York; Surgeon to the Manhattan Eye and Ear Hospital; Consulting Surgeon to the Brooklyn Eye and Ear Hospital, &c., &c.

**A PRACTICAL TREATISE ON THE DISEASES OF
THE EAR,** including the Anatomy of the Organ. Fourth Edition,
Illustrated by wood engravings and chromo-lithographs, large 8vo, 22s.

"The work is copiously illustrated, and the descriptions of the disease and the directions for treatment are given in a clear and concise manner... Altogether, the work is, perhaps, the best of its kind that has yet been published."—*Lancet*.

"When the first edition of Dr. Roosa's book was noticed in this Journal in January 1874, it was predicted that it would at once take its place as a standard authority. That it has done so and that it still maintains this position is fully shown by the present demand for a fourth edition."—*Amer. Jour. of Med. Sciences*, Jan. 1879.

"It will be observed that of all the points which we have noticed, not one constitutes a defect sufficient to impair in any degree the value of the treatise. This remains the very best which has been offered to the profession, whether in America or England; and the debt of gratitude to the accomplished author will be cheerfully acknowledged for the part he has played in bringing aural surgery and medicine to their present high development."—*New York Medical Record*.

J. BURDON SANDERSON, M.D., LL.D., F.R.S.

Jodrell Professor of Physiology in University College, London.

SYLLABUS OF A COURSE OF LECTURES ON PHYSIOLOGY. Second Edition, 8vo, 4s.

"Notes of a course of lectures by such an able physiologist and such an experienced teacher as Dr. Sanderson cannot but be welcome to every student and teacher of physiology. . . . It is surprising what an enormous amount of matter is condensed into so few pages. There is scarcely a fact of importance which does not find mention, and the whole is written in the accurate pointed style which distinguishes all the writings of the author. We think this work will be found most useful to all students of physiology."—*Dublin Jour. Med. Science*, March, 1880.

"This syllabus gives only a brief notice of the most important things so as to refresh the memory of the student.....it contains brief but clear directions for performing the most important physiological experiments in physiological chemistry.....The work supplies a want, and will be useful both to lecturers and to students."—*Practitioner*, July, 1880.

EDWARD ALBERT SCHÄFER, F.R.S.

Fullerian Professor of Physiology.

SOME TEACHINGS OF DEVELOPMENT. Being the Substance of the Last Two of a Series of Twelve Lectures on Animal Development delivered at the Royal Institution, during the months of January, February, and March, 1879. 8vo, 1s.

"The author shows clearly and convincingly that the successive phases in the development of the individual represent similar phases in the process of formation or development of the race to which the individual belongs. Development, therefore, represents descent. The ancestors of every animal have successively exhibited structural conditions which in an abridged form are represented by the successive stages of development of the individual. This, the author justly says, is the only logical conclusion to which the study of animal development leads."—*Journal of Science*, April, 1880.

ALDER SMITH, M.B. LOND., F.R.C.S.

Resident Medical Officer, Christ's Hospital, London.

RINGWORM: ITS DIAGNOSIS AND TREATMENT.
With woodcuts, fcap. 8vo, 2s. 6d.

"Deserves to meet with wide acceptance at the hands of those members of the profession who from time to time have to treat cases of ringworm.....It is a short, thoroughly practical, and sound exposition of the diagnosis and treatment of the several kinds of common ringworm, with especial reference to ringworm of the head (*Tinea Tonsurans*).....We can cordially recommend the guidance offered by Mr. Smith."—*Lancet*, December 11, 1880.

"This little book will be found extremely useful to medical officers who are attached to workhouses, industrial schools, where a number of boys and girls are received, as it is the outcome of the experience of the Surgeon to Christ's Hospital, where a large number of children are annually admitted, and where ample opportunity must have been afforded for the study of this complaint."—*Medical Press and Circular*, Dec. 15, 1880.

J. LEWIS SMITH, M.D.

Physician to the New York Infants' Hospital; Clinical Lecturer on Diseases of Children in Bellevue Hospital Medical College.

A TREATISE ON THE DISEASES OF INFANCY AND CHILDHOOD. Fourth Edition, thoroughly revised, with Illustrations, large 8vo, 21s.

"Having so recently expressed our favourable opinion of the third edition of Dr. J. Lewis Smith's Treatise... little remains to be said in praise of this the fourth edition of so valuable and practical a work."—*Dublin Medical Journal*, Nov. 1879.

"If this had been the first instead of the third edition of Dr. Lewis Smith's work, we should have gladly availed ourselves of the opportunity to point out its many excellencies, and particularly to draw attention to the fulness of its information, the fairness with which the reasoning is conducted in relation to disputed questions, and the completeness and soundness of its therapeutical suggestions and recommendations..... It is particularly good in the remarks upon the treatment of disease, which, though the most important, is often treated with little thoroughness in a systematic treatise."—*Practitioner*.

LEWIS A. STIMSON, B.A., M.D.

Surgeon to the Presbyterian Hospital; Professor of Pathological Anatomy in the Medical Faculty of the University of the City of New York.

A MANUAL OF OPERATIVE SURGERY. With three hundred and thirty-two Illustrations. Post 8vo, 10s. 6d.

"The descriptions are thoroughly practical, and the subsidiary points of the exact position of the patient, the duties of assistants, and so forth, receive their due attention, and we are sure the work will be useful and well received here."—*Lancet*, Sept. 27th, 1879.

"Among the handbooks of operative surgery this must take a first place. The surgeon will always find here aid sufficient to direct him in any operation when he is beyond professional help..... The chapters upon amputations, excisions, plastic operations, and operations upon the eye, are specially good. The author gives a very good view of European Continental Surgery, much of which will be new to those who have not the opportunity of consulting the works of the French and German writers. The most recent improvements are included."—*The Dublin Journal of Medical Science*, March, 1879.

"The work before us is a well-printed profusely illustrated manual of over four hundred and seventy pages. Our author has endeavoured, as the result of much painstaking and careful study to present to the student and to the practitioner a trustworthy digest of the most approved methods of operating. In such efforts he has been signally successful..... The precision and conciseness with which the different operations are described enable the author to compress an immense amount of practical information in a very small compass."—*New York Medical Record*, Aug. 3, 1878.

HUGH OWEN THOMAS, M.R.C.S.

I.

DISEASES OF THE HIP, KNEE, AND ANKLE JOINTS, with their Deformities, treated by a new and efficient method. With an Introduction by RUSHTON PARKER, F.R.C.S., Lecturer on Surgery at the School of Medicine, Liverpool. Third Edition, 8vo, 25s.

"His criticisms are very able and acute."—*Westminster Review*. Jan. 1879.

II.

THE PAST AND PRESENT TREATMENT OF INTESTINAL OBSTRUCTIONS, REVIEWED, with an Improved Treatment Indicated. Second Edition, 8vo, 10s. 6d.

"It is the work of a shrewd observer and clear-headed thinker."—*Westminster Review*, October, 1879.

III.

CASES IN SURGERY ILLUSTRATIVE OF A NEW METHOD OF APPLYING THE WIRE LIGATURE IN COMPOUND FRACTURES OF THE LOWER JAW. Second Edition, 8vo, 5s.

J. C. THOROWGOOD, M.D.

Assistant Physician to the City of London Hospital for Diseases of the Chest.

THE CLIMATIC TREATMENT OF CONSUMPTION AND CHRONIC LUNG DISEASES. Third Edition, post 8vo, 3s 6d.

J. ASHBURTON THOMPSON, M.R.C.S.

Surgeon at King's Cross to the Great Northern Railway Company.

FREE PHOSPHORUS IN MEDICINE WITH SPECIAL REFERENCE TO ITS USE IN NEURALGIA. A contribution to Materia Medica and Therapeutics. An account of the History, Pharmaceutical Preparations, Dose, Internal Administration, and Therapeutic uses of Phosphorus; with a Complete Bibliography of this subject, referring to nearly 200 works upon it. Demy 8vo, 7s. 6d.

"Mr. Thompson has collected a great deal of information on the nature and properties of a drug that appears to be gaining favour with the profession.....The book forms a compact guide to practitioners contemplating adding phosphorus to their medicinal armoury."—*Lancet*.

"The work is very interesting and most comprehensive.....evidently the result of much careful research, and we heartily recommend it to all interested in the treatment of nervous disorders."—*Journal of Psychological Medicine*.

LAURENCE TURNBULL, M.D., PH.G.
Aural Surgeon to Jefferson Medical College Hospital, &c., &c.

ARTIFICIAL ANÆSTHESIA: A Manual of Anæsthetic Agents, and their Employment in the Treatment of Disease. Second Edition, with Illustrations, crown 8vo, 6s.

"Indicates that much labour has been spent in its preparation.....Contains a great deal of useful and interesting information on the subject of anæsthetics."—*British Medical Journal*, Dec. 18, 1880.

"He has produced a treatise containing a large amount of valuable information which the student and practitioner will find a difficulty in procuring elsewhere."—*American Journal of Medical Sciences*, July, 1880.

"..... the favour with which it has been received is shown by the rapid sale of the first edition this work is a useful and acceptable contribution to the literature of anæsthetics."—*Practitioner*, Jan., 1880.

"The value of such a work as the present is unquestionable...the book contains a great amount of useful information on the nature and use of anæsthetics, applied externally or internally, in vapour, or in ordinary modes of administration."—*Medical Times and Gazette*, Nov. 29th, 1879.

RUDOLPH VIRCHOW, M.D.

Professor in the University, and Member of the Academy of Sciences of Berlin, &c., &c.

INFECTION - DISEASES IN THE ARMY, Chiefly Wound Fever, Typhoid, Dysentery, and Diphtheria. Translated from the German by JOHN JAMES, M.B., F.R.C.S. Fcap. 8vo, 1s. 6d.

"We anticipate for this pamphlet a wide circulation."—*Medical Press and Circular*.

"Dr. James has done service to the profession by bringing this short treatise by the distinguished Virchow within their reach It is refreshing and reassuring at any time to have a subject of common interest such as contagion, brought under the bulls-eye of a man of genius long familiar with questions of the higher pathology."—*Edin. Med. Journal*, June, 1879.

ALFRED VOGEL, M.D.

Professor of Clinical Medicine in the University of Dorpat, Russia.

A PRACTICAL TREATISE ON THE DISEASES OF CHILDREN. Translated and Edited by H. RAPHAEL, M.D. From the Fourth German Edition, illustrated by six lithographic plates, part coloured, large 8vo, 18s.

"We do not know of a compact text-book on the diseases of children more complete, more comprehensive, more replete with practical remarks and scientific facts, more in keeping with the development of modern medicine, and more worthy of the attention of the profession, than that which has been the subject of our remarks."—*American Journal of Obstetrics*.

"Several excellent lithographic plates, and the admirable way in which the volume is got up, add to the attractiveness of Dr. Vogel's work. Dr. Vogel is more a physician than a surgeon; and he is clearly a physician of no mean order, judged either from a pathological or a clinical standpoint. Of Dr. Vogel, as a medical practitioner, we would only say that he seems to belong to the comparatively small class of physicians who, when they give a medicine, have a clear notion of the effects which they desire it to produce."—*Brit. Med. Jour.*

A. DE WATTEVILLE, M.A., B.SC., M.R.C.S.

*Assistant Physician to the Hospital for Epilepsy and Paralysis, late Electro-Therapeutical
Assistant to University College Hospital.*

A PRACTICAL INTRODUCTION TO MEDICAL ELECTRICITY; (with a Compendium of Electrical Treatment translated from the French of DR. ONIMUS). With more than 100 Illustrations, 8vo, 5s.

"Mr. De Watteville's Introduction seems really to supply a want, and is calculated to be exceedingly useful to practitioners who have little time to consult large works and wish a short, clear, and accurate summary of what is known on the subject. It is an exceedingly able *exposé* of the physical questions involved in applying electricity medically, and contains also a number of practical hints which will be found of great advantage to those who intend occupying themselves with the various applications of electricity in general practice."—*Practitioner*, Feb., 1879.

"We can honestly recommend the book to our readers as an admirable practical guide to electro-therapeutics.....It impresses one as the work of a writer thoroughly conversant with his subject, theoretically and practically. There is a wholesome rational tone throughout, which stands in refreshing contrast to the spirit of many treatises on medical electricity."—*Dub. Med. Jour.*, Aug. 1878.

"This little book will, we believe, be of great use to many.....The object of M. de Watteville appears to be to give a more definite basis than that which has hitherto been given in books on Medical Electricity, to the superstructures which have been raised thereon with regard to the ascertained facts of the behaviour of electrical currents; and, further to supply minute and specific directions as to the mode of their appliance in the treatment of disease.....In respect of the medical application of electricity.....he has furnished clearly, directions as to the form, force, and locality of such applications, and has enriched his book with copies of woodcuts, exhibiting very plainly the points to which the electric current should be applied.....We heartily commend the book to the careful study of those who are interested in Electro-Therapeutics."—DR. RUSSELL REYNOLDS, F.R.S., in *Brain*, July, 1878.

W. SPENCER WATSON, F.R.C.S. ENG., B.M. LOND.

Surgeon to the Great Northern Hospital; Surgeon to the Royal South London Ophthalmic Hospital.

I.

DISEASES OF THE NOSE AND ITS ACCESSORY CAVITIES. Profusely Illustrated. Demy 8vo, 18s.

"The reader will be tolerably sure to find all that he looks for in Mr. Spencer Watson's volume; and we must say that in the practical part of it he will not be disappointed.....It is well done, clear and full.....On the whole the work is one very creditable to the author, and very useful as a book of reference in this department of surgery."—*Brit. Med. Jour.*

"We are sure that the voice of the profession will be uttered in no uncertain tones of praise and satisfaction at his production. It stands by itself, the leading monograph upon this subject. Nowhere can the practitioner turn to find more completely under his eye, all that the field embraces."—*Amer. Jour. of Medical Sciences*.

"This is a neat Volume—well printed, well illustrated, with a good index. Its author has spared himself neither time nor trouble.....Mr. Watson having gleaned all that he found good in other writers—English, French, and German—has added in many places valuable experience of his own."—*Practitioner*.

II.

EYEBALL-TENSION, ITS EFFECTS ON THE SIGHT AND ITS TREATMENT. With woodcuts, p. 8vo, 2s. 6d.

"As regards the treatment of Eyeball-tension, the author's remarks are valuable and to the point.....this little work is a clear and concise statement of some of the most modern doctrines as to the pathology and treatment of glaucoma."—*Brit. Med. Journal*, June 5th, 1880.

"We would recommend the book to the profession as the best monograph on the subject in the English language."—*New York Medical Record*, Oct. 25th, 1879.

"A publication of such a nature as this will encourage many a hardworked practitioner to look into the subject much more narrowly than when presented in a less handy form—say in one of the large text-books"—*Medical Times*, Dec. 13th, 1879.

III.

ON ABSCESS AND TUMOURS OF THE ORBIT. Post 8vo, 2s. 6d.

DR. F. WINCKEL.

Formerly Professor and Director of the Gynaecological Clinic at the University of Rostock.

THE PATHOLOGY AND TREATMENT OF CHILD-

BED: A Treatise for Physicians and Students. Translated from the Second German edition, with many additional notes by the Author, by J. R. CHADWICK, M.D., 8vo, 14s.

"This treatise which has been the standard one of its kind in Germany, bids fair to take a distinguished place as an authority in this country.....The work will be found to be of the greatest value to the practitioner."—*Medical Record*.

"There is abundant evidence of thoughtful consideration and care throughout, so as to place before the reader only what is profitable and capable of proof from reason and experience. The absence of speculative and literary padding is a charming recommendation in the present day and one which will go far to increase the popularity of a work which we may justly hope will be extensively read."—*Birmingham Medical Review*.

EDWARD WOAKES, M.D., LOND.

Surgeon to the Ear Department of the Hospital for Diseases of the Throat and Chest; and Surgeon to the Hospital.

ON DEAFNESS, GIDDINESS AND NOISES IN THE

HEAD. Second Edition, revised and enlarged, with additional Illustrations, crown 8vo, 7s.

"The early demand for a fresh edition of Dr. Woakes' little volume is a sufficient criticism of its merits.....No brief summary of his views could do full justice to the cogency and subtlety of his reasons. We prefer to commend the whole work to the thoughtful perusal of all intelligent medical practitioners who desire to rise above the level of mere routine empiricism."—*Lancet*, August 28th, 1880.

"This work demands the full attention of all aural surgeons... it is thoroughly original and introduces, in a truly scientific spirit, a great many new observations and new ideas." Dr. Weber-Liel, in *Monatsschrift für Ohrenheilkunde*.

"This book, although small, is evidently the result of much careful thought and observation.... We cordially recommend the work as original and suggestive, and as being likely to prove very useful in explaining both the causation of symptoms otherwise puzzling, and their appropriate treatment."—*Practitioner*.

E. T. WILSON, B.M. OXON., F.R.C.P. LOND.

Physician to the Cheltenham General Hospital and Dispensary.

DISINFECTANTS AND HOW TO USE THEM. In

Packets of one doz. price 1s.

The importance of Disinfection is now fully understood; there seems, however, to be a danger lest an ignorant or an imperfect employment of disinfecting substances may lead to a misplaced feeling of security. The right choice of a disinfectant and the manner of its use are important elements in its successful application. In Dr. Wilson's little card full directions are given as to the strength of the various disinfecting solutions, also how and when to use them. To these are added rules, clear and concise, for the guidance of nurses and others in charge of the sick—with a list of the legal restrictions placed on infected persons.

The card will be found peculiarly suitable for heads of families, clergymen, and nurses; or for distribution amongst the artisans and tradesmen of our larger towns.

"On the subject of disinfectants, the reader is referred to 'Disinfectants and how to use them,' by Dr. Edward Wilson of Cheltenham. The directions are printed upon cards, which are sold in packets of 12 for 1s., published by Mr. Lewis, 136 Gower Street. These cards should be in the possession of all medical practitioners, clergymen, and others, whose duty and desire it is to prevent as much as possible the spread of contagious diseases."—From Dr. Lionel Beale's *Work on Disease Germs*. 1872, p. 298.

Published Monthly.

THE GLASGOW MEDICAL JOURNAL. Edited by Joseph Coats, M.D. Subscribers 20s. per Annum. Separate nos. 2s. each. A specimen number forwarded on receipt of 24 stamps.

TRANSACTIONS OF THE COLLEGE OF PHYSICIANS OF PHILADELPHIA. Vols. I to IV. Third Series (1875 to 1879). With Illustrations, royal 8vo, 10s. 6d. each.

CLINICAL CHARTS FOR TEMPERATURE OBSERVATIONS, &c. Arranged by W. RIGDEN, M.R.C.S. Price 7s. per 100, or 1s. per dozen.

Each Chart is arranged for four weeks, and is ruled at the back for making notes of cases; they are convenient in size, and are suitable both for hospital and private practice.

CASE BOOKS.

I.

Case-books with Outlines for Notes of Cases of Diseases of the Chest. Post 4to, 2s. and 4s.

II.

Case-books with Outlines for Notes of Cases of Diseases of Women. Large post 4to, 2s. 6d. and 5s.

THE NEW SYDENHAM SOCIETY.

President—SIR WILLIAM GULL, BART., M.D., F.R.S.

Hon. Secretary—JONATHAN HUTCHINSON, ESQ.

Treasurer—W. SEDGWICK SAUNDERS, M.D.

The publications of this Society comprise translations of important Continental works, and also reprints of valuable standard English authors. Among other works issued are the following: those with prices affixed may be had separately: others, only by subscription for the years in which they are published.

TROUSSEAU.

LECTURES ON CLINICAL MEDICINE, Delivered at the Hotel Dieu, Paris. By PROFESSOR TROUSSEAU. Translated from the Third Edition by SIR JOHN ROSE CORMACK. 5 vols., 21s.

STRICKER.

MANUAL OF HUMAN AND COMPARATIVE HISTOLOGY.
By S. STRICKER. Translated by MR. POWER. 3 vols., 31s. 6d.

RINDFLEISCH.

A MANUAL OF PATHOLOGICAL HISTOLOGY.
By PROFESSOR RINDFLEISCH (Bonn). Translated by DR. BAXTER. 2 vols. (Vol. 2 only separately, 5s.)

HEBRA.

ON DISEASES OF THE SKIN, INCLUDING THE EXANTHEMATA. By PROFESSOR HEBRA. Translated and edited by DR. HILTON LAGGE, DR. J. PYE-SMITH and MR. WARREN TAY. 5 vols. Vols. 1 to 4, separately, 21s.

NIEMEYER.

LECTURES ON PHTHISIS.
By PROFESSOR NIEMEYER. Translated by DR. BAUMLER. 2s. 6d.

WUNDERLICH.

ON THE TEMPERATURE IN DISEASES: A MANUAL OF MEDICAL THERMOMETRY. By DR. C. A. WUNDERLICH, Leipzig. Translated by DR. WOODMAN.

VOLKMANN.

CLINICAL LECTURES.
By Various German Professors, from PROFESSOR VOLKMANN'S Series, (Halle). Vols. 1 and 2, 5s. each.

DONDERS.

ON THE ANOMALIES OF ACCOMMODATION AND REFRACTION OF THE EYE: With a preliminary essay on physiological dioptrics. Translated by Dr. W. D. Moore, 7s. 6d.

AN ATLAS OF PATHOLOGY.

Fasciculi I. and II. Diseases of the Kidney.

Annual Subscription, One Guinea, payment of which constitutes membership, should be forwarded to Mr. Lewis, the Society's Agent, from whom the Annual Report and all further information may be obtained. All the works issued are now in stock, and can be obtained by new subscribers. Subscriptions for full sets including 1881, Twenty-Three Guineas.

LONDON: H. K. LEWIS, 136 GOWER STREET.
