## Continuatio.

ENUNTIATIO II. Duorum corporum, a quibus simul attingimur distantiam et situm distinctius percipimus, si ad transversam, quam si ad longitudinalem corporis nostri diametrum diriguntur.

Veritatem huius enuntiationis quilibet facillime in medio brachio aut medio antibrachio experiri poterit. In hoc enim crura circini împressionem duplicem facile distinguendam efficient, si duobus pollicibus distant, et ad transversum diametrum brachio imponuntur non autem duplicem, sed unam tantum impressionem proferunt, si duobus aut adeo tribus pollicibus distant et ad longitudinalem diametrum brachii adhibentur.

Multo magis autem enuntiationes a me propositae multis observationibus a me in corpore meo factis, hac tabula addita contentis, probantur, quibus in posterum experimenta in aliis hominibus instituta adiungam.

Cui quidem tabulae haec praemittenda sunt. Crura circini in cutim meam simul et pressione, quantum fieri potest, pari imponebantur et a cute removebantur, oculis meis clausis, distantia crurum a me non cognita, cruribusque sibi tantopere appropinquatis, ut distantiam crurum in primo periculo non aestimare et ne percipere quidem possem.

Imponebantur autem crura illa singulis corporis mei partibus tum ad diametrum transversam corporis artuumque, tum ad longitudinalem. Si duo crura unam tantum impressionem proferre videbantur, saepissime me nescio unum tantum crus cuti illatum est, atque hac ratione inventum, num attactum unius cruris ab attactu utriusque discernere possem. Hoc

modo iterum iterumque idem experimentum repetitum est, priusquam annotaretur utrum duae impressiones a duobus cruribus illis factae an una sentiretur, atque an de situ apicum circini horizontali i. e. transverso, aut perpendiculari i. e. longitudinali recte a me iudicatum sit. Nam quoties in tabula adiecta de situ perpendiculari et horizontali partium corporis sermo est, situm homini recto proprium in mente habui, quod intellectum volo, neutiquam experimenta in me stante facta esse. Caeterum annotandum est, me pede Parisiensi in duodecim pollices diviso, quorum singuli duodecim lineis constant, adhibuisse, et distantiam crurum circini hoc modo metitum esse, ut non distantiam axis apicum obtusorum, sed marginum sibi invicem adversorum indicaverim.

T a b u l a experimentorum circa aciem tactus in singulis partibus corporis factorum.

Producendus enim nunc est et commendandus Candidatus dignissimus

## FRIDERICVS GVSTAVVS MOERING.

qui haec de vita cum ordine medico communicavit:

Natus sum Dohnae, oppidulo prope Dresdam sito, anno h. s. quarto, d. IV. m. Julii patre GEORGIO FRIDERICO, chirurgo, et matre JOANNA CHRISTIANA e gente HENSELIA, quos carissimos parentes me adhuc salutare vivos maxima pietate inter summa summi numinis refero beneficia. Prima religionis christianae literarumque elementa tradidit mihi M. SCHNEIDERVS, Praeceptor tunc temporis de schola oppidana bene meritus. Postea ad altiora studia a S. V. BYRKHARDTO, nunc verbi divini apud Dresdenses ministro, in lingua latina instructus et ad altiora studia ita praeparatus sum, ut ei maximas habeam gratias. Anno h. s. XXV. ad Academiam medico - chirurgicam me contuli, ibique ab Illustr. FRANKIO in discentium numerum receptus, praeceptores habui in mathesi, psychologia empirica b. HAANIVM; in studii medici methodologia et historia medicinae b. RASCHIGVM, in zoologia, botanice et mineralogia Ill. REICHENBACHVM; in physice et chemia Exc. FICINVM; in anatomia theoretica et physiologia Ill. SEILE-RVM; in pathologia generali Exc. CHOVLANTVM; in practicis anatomiae exercitationibus Exp. MEDINGVM et Exp. FRENZELVM; in cognoscendis instrumentis chirurgicis fasciisque secundum artis leges applicandis b. KOEPPNERVM.

Anno huius seculi XXVII. tempore Paschali ab Ill. BECK10 in tabulas academicas relatus, prima philosophiae elementa ab Exc. RICHTERO; anthropologiam ab Ill. HEINROTHO; botanicam ab Exc. Schwaegricheno; anatomiam ab Exc. Webero; physiologiam doctrinamque de ophthalmia ab Exc. Kvehnio; chemiam ab Exc. Erdmanno; anatomiam pathologicam, pathologiam ge-

neralem et therapiam ab Exc. Cervitio accepi. Scholas porro frequentavi Exc. HAASII de materia medica et de cognoscendis et curandis febribus eiusque examina de omni medicina practica, nec non praelectiones Ill. Joergii de arte obstetricia theoretica. — Chirurgiam et chirurgicas operationes in cadaveribus instituendas me docuit, examinandoque arte chirurgica me imbuit Exc. Kvhlivs, cuius paternam benignitatem, qua studia mea privata eruditione, libris aliisque adminiculis sustentavit, satis celebrare non possum. Exercitationibus practicis, quas in instituto clinico Ill. Clarvs, Exc. Kvhlivs et Exc. Wendlervs moderantur, per annum interfui, et denique ab Exp. Bravnio, cui meritissimas ago gratias, ad lectos aegrotorum ab eo curatorum instructus et subsidiis literariis adiutus sum. Anno MDCCCXXVII. m. Decembre examine medico-theoretico superato, die XXII. Octobris anni praeteriti in practica medicinae parte examinatus sum.

Quod utrumque examen ita Candidatus superavit, ut laudatus ex ordine nostro discederet. Candidato dignissimo igitur summi in medicina honores decreti sunt, si disputatione scripta et rite defensa publicum doctrinae specimen exhibuerit. Defendet igitur disputationem historiam cholerae cum subsequente pleuroperipneumonia sistentem d. VII. m. Aprilis, moderatore Viro Exc. Schwaegricheno, Collega coniunctissimo, ad quam solemnitatem academicam VOS, RECTOR ACADEMIAE MAGNIFICE, PRINCEPS SERENISSIME, COMITES ILLVSTRISSIMI, PROCERES VTRIVSQVE REIPVBLICAE GRAVISSIMI ET COMMILITONES AESTVMATIS-SIMI humanissime invitavi.

siologiam doctrinamque de volthalmia ab Ext. KrEHNIO; elemiam

PP. Domin. Palmarum A. R. S. MDCCCXXX.
